Cataloging University Research Resources to Create DMPTool Templates

and a LibGuide Research Portal.

Margaret E. Henderson, VCU Libraries & Christopher Wimble

Research data management plans require information about the resources used to create, store, and analyze the collected data. A table of resources in and outside the university was compiled for use when writing DMPTool templates for grants. The table was also used to create a LibGuide to help researchers learn about all the available resources – a listing that stakeholders thought was needed at the university.

Name	Website	Contact/Info	Summary	Services	Instruments	Staff	Building/Camps	Funding	Subjects	Tags	Notes
Biological Macromolecules Shared Resource Center	http://www.vcu.edu/bmc	703-270-9888	Biological Macromolecules Shared Resource Center	Biological Macromolecules Shared Resource Center					Biological Macromolecules Shared Resource Center

Research Navigator

Connecting Researchers to Resources at VCU

Biomedical & Biological | Genetics | Research Navigator

Chemistry | Mathematics | VCU has a wealth of resources to help with all levels, types, and subjects of research. Research Navigator pulls together core facilities, departments, offices, institutes, and other groups that provide research services to VCU faculty, staff, and students. It also includes resources outside VCU that provide reliable free or open source resources.

Conclusions

- Collect resources first, then categorize, rather than making categories based on what is expected.
- Involve web designers to help brand the site properly and professionally.
- Communicate with colleagues so they understand this is not a library research guide/LibGuide replacement but rather a complementary resource.

DMPTool

VCU Rice Rivers Center Data Management Plan Template

- Complete
- Mandatory

Template Outline

- Types of data produced
- Data and metadata standards
- Policies for access and sharing
- Policies for reuse, distribution
- Data storage & preservation

Using LibGuides allows for easy set up, reuse of assets, navigation, and searching.

Information will be tagged with eagle-i ontology for use in VIVO.

Boilerplate Language

For many grant applications, standard language about the university environment, research capacity, and resources will be required. However, to make your proposal competitive, this language should be **revised** - if allowed to be revised, as much as possible, the better opportunity and the project being proposed.

The Office of Research and Innovation can provide boilerplate language for your grant proposals. Complete and submit the form below no less than **2 weeks** prior to your application submission deadline. Late requests may not be filed. Contact Jessica Venable at jvenable@vcu.edu for additional information.

Required

Existing Boilerplate Language [1]

- Core Laboratories
- HECCE
- School of Education
- VCU Grant Awards Received
- VCU Research Statistics
- VCU Responsible Conduct of Research training for NIH proposals
- VCU Technology Services

PURDUE e-Pubs

UNIVERSITY RESEARCH CORE FACILITY
BOILERPLATE DESCRIPTIONS

While confirming some data boilerplate wording with the Research Analyst, we agreed to collaborate on an updated boilerplate library. Purdue's use of the IR for their library is a good model.
