A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Admission requirements

Business, Master of Science (M.S.) with a concentration in branding/communications strategy			
Degree: M.S.	Semester(s) of entry: Fall	Deadline dates: April 15 (final deadline for international students) May 15	Test requirements: GMAT or GRE
<b>Special requirements:</b> Contact the VCU Brandcenter for specific admission requirements to the branding program and concentrations: Call (800) 311-3341 toll-free, or visit our website at <a href="http://brandcenter.vcu.edu">brandcenter.vcu.edu</a> .			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the branding/communications strategy concentration must be proficient in Excel, PowerPoint/Keynote and Pages. The admissions committee is looking for a minimum GRE score of around 300 (current scoring) or 1100 (former scoring) or a minimum GMAT score of around 540.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The VCU Brandcenter offers graduate study in advertising and branding. The program provides advanced preparation for creative and strategic advertising development. The branding concentration of the Master of Science in Business with a concentration in branding is divided into five focus areas.

The working environment at the Brandcenter is similar to an advertising agency: Teams of students work together to develop campaigns. After the first year, qualified students are offered internships where they experience ad agency life and foster industry relationships. In their second year, students are given the opportunity to network through a mentoring program in which they are matched with agency professionals who offer advice and assistance.

## Student learning outcomes

1. **Presentation skills:** Students will demonstrate the ability to effectively present/sell their ideas in a clear, concise and compelling manner.
2. **Collaboration:** Students will demonstrate their ability to work together in cross-functional teams/groups (i.e., copywriter, art director, strategist, brand manager, creative technologist) to develop viable business/marketing solutions.
3. **Creative and critical problem-solving:** Students will demonstrate the ability to research consumer culture (via secondary research, syndicated research and qualitative/quantitative research methods) and evaluate consumer media/technology usage habits to develop media-neutral business solutions.
4. **Culture:** Students will demonstrate an appreciation, interest in and openness for different cultures (both national and international) yielding more relevant, culturally savvy business solutions.
5. **Craft:** Students will demonstrate the ability to execute specific skills related to their individual subconcentration. For **communications strategy** these include a solid understanding of consumer behavior, qualitative and quantitative research methods and strategic thinking ability.

## Degree requirements

The M.S. in Business with a concentration in branding requires 42 graduate credit hours beyond the baccalaureate degree. Students devote two years of full-time study to complete the degree requirements. In addition to the [VCU Graduate School graduation requirements](#), all students in the Brandcenter must complete a core curriculum as well as courses required for a specific subconcentration and must present a final major project, in portfolio form, before a committee review panel.

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Science in Business with a concentration in decision analytics provides students with knowledge of the statistical, mathematical and scientific skills and experience necessary to utilize advanced methods of data analysis for business decision-making.

## Student learning outcomes

1. After examining a situation/problem, students will be able to develop appropriate hypotheses along with a method for testing them and be able to draw logical conclusions and make reasonable decisions based on available information.
2. Students will be able to apply quantitative procedures to obtain solutions for real-world problems.
3. Students will be able to appropriately address the target audience, use proper organization, create clear graphical displays and express ideas with clarity and grammatical correctness.
4. Students will be able to show a clear understanding of the ethical nature of the issue and recommend appropriate action.

## Degree requirements

The concentration in decision analytics provides students with knowledge of quantitative skills and experience in analyzing problems and using data for decision-making in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

In addition to the [VCU Graduate School graduation requirements](#):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (0 to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with minimum grade of C.

## Curriculum requirements

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a

formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Other information

School of Business policies and procedures for graduate master's degree students are available on the school's website at [business.vcu.edu/graduate/current.html](http://business.vcu.edu/graduate/current.html).

### Admission requirements

Business, Master of Science (M.S.) with a concentration in decision analytics – professional track			
Degree: M.S.	Semester(s) of entry: Fall	Deadline dates: Apr 15	Test requirements: GMAT or GRE

In addition to the [general admission requirements of the VCU Graduate School](#), applicants should have three years of work experience in an application area. Students without the required work experience may take six credit hours of graduate-level courses in an application area prior to acceptance into the program.

Applicants are expected to have successfully completed an undergraduate or graduate course in statistics, and it is preferable that they have programming experience. Exceptions may be made at the discretion of the program director.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The M.S. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

### Student learning outcomes

1. **Database structures and query:** Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.
2. **Quantitative skills:** Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
3. **Problem formulation:** Students will have the knowledge, skills and practice to taking nonquantitative and perhaps ill-formed problems and issues and determining ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
4. **Analytics applications:** Students will experience various applications of analytics in real situations.
5. **Technical communications:** Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences. This includes informal discussions, formal presentations and written reports.
6. **Teamwork:** Students will develop skills in organizing, interacting and analyzing real problems as members of a team.

### Degree requirements

The Master of Science in Business with a concentration in decision analytics provides students with a breadth of analytical and quantitative skills with experience in analyzing and communicating solutions to problems arising in an organization.

Leading organizations gain competitive advantage through the use of analysis of relevant data to guide and drive strategic and tactical decisions. Increased volumes of data and emphasis on data-driven decision-making create new challenges for decision-makers and provide new employment opportunities for people with deep analytical skills. There is a significant and growing demand for individuals with the ability to work collaboratively within an organization to mine relevant raw data and refine data into a recommended action of value to the enterprise. The

decision analytics concentration equips students with the essential skills to be analytically functional in an organization.

Skills, abilities and knowledge necessary for success in analytics:

1. Work in a collaborative environment
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics concentration focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics
2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, making the program attractive to midcareer professionals who want to gain or increase their analytics skills without interrupting their careers.

In addition to the [VCU Graduate School graduation requirements](#) and credit hour requirements, students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers of foundation courses only occur when a student has completed the required undergraduate equivalent courses with a minimum grade of C.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The goal of the Master of Science in Business with a concentration in finance program is to train students to take on the quantitatively challenging and highly competitive business environment of the financial industry. Students learn skills to effectively analyze, develop and communicate solutions that take into consideration ethical implications.

## Student learning outcomes

1. Graduates will be able to conceptualize and apply quantitative measurement methods, to analyze business problems and to propose solutions.
2. Graduates will be able to analyze a business problem in terms of both quantitative and qualitative aspects, including: (a) a precise statement of the problem and how it relates to the goals of the firm, (b) a consideration of the ethical, policy and/or practicality limitations on any proposed solution strategy, (c) a statement and consideration of proposed solutions strategies and their implementation within the limitations, and (d) a plan for implementation and monitoring of the proposed solution.
3. Graduates will be able to analyze the ethical dimensions of a business situation and relate those dimensions to general ethical standards as well as to professional ethical standards.
4. Graduates will be able to express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

## Degree requirements

The finance concentration prepares students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions, international finance, and derivatives.

In addition to the [VCU Graduate School graduation requirements](#):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (0 to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall Spring Summer	Jul 1 Nov 1 Mar 1	GMAT or GRE

The VCU School of Business and Christ University in Bangalore, India, have partnered to provide students with an opportunity to study at two universities and earn two degrees. Students who have already been admitted to the Christ University Master of Business Administration program are invited to apply to the VCU Master of Science in Business with a concentration in finance. Students satisfy the master's foundation course requirements during the first year while in the Christ University M.B.A. program and then complete the 10 required VCU courses needed for the M.S. in Business with a concentration in finance. These courses are taken primarily at the VCU Monroe Park Campus and are designed to be completed in one calendar year.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the master's program in business must submit an up-to-date resume.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

**General academic regulations for all graduate students in all graduate programs at VCU**

### Program goal

The Master of Science in Business with a concentration in global marketing management offers students the opportunity to combine their studies in international marketing with contemporary issues in marketing management.

### Student learning outcomes

1. Students will evaluate marketing programs.
2. Students will express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

### Degree requirements

The concentration in global marketing management offers students the opportunity to concentrate their studies in two related areas: marketing management and global business management. Students select foundation, core and/or elective courses in accounting, economics, finance or management to complement marketing courses in the program. Students interested in preparing for the increasingly global nature of business will be well-suited for this unique master's degree program. All degree candidates are strongly encouraged to participate in an intensive study program in a foreign language and/or a foreign study program.

In addition to the [VCU Graduate School graduation requirements](#), students must complete up to seven classes (0 to 21 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

Business, Master of Science (M.S.) with a concentration in global marketing management with Christ University in Bangalore, India			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GMAT or GRE
	Spring	Nov 1	
	Summer	Mar 1	

The VCU School of Business and Christ University in Bangalore, India have partnered to provide students with an opportunity to study at two universities and earn two degrees. Students who have already been admitted to the Christ University Master of Business Administration program are invited to apply to the VCU Master of Science in Business with a concentration in global marketing management. Students satisfy the master's foundation course requirements during the first year while in the Christ University M.B.A. program and then complete the 10 required VCU courses needed for the Master of Science in Business with a concentration in global marketing management degree. These courses are taken primarily at the VCU Monroe Park Campus and are designed to be completed in one calendar year.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the master's program in business must submit an up-to-date resume.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The Master of Science in Business with a concentration in global marketing management offers students the opportunity to combine their studies in international marketing with contemporary issues in marketing management.

## Student learning outcomes

1. Students will evaluate marketing programs.
2. Students will express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

## Degree requirements

The concentration in global marketing management offers students the opportunity to concentrate their studies in two related areas: marketing management and global

business management. Students select foundation, core and/or elective courses in accounting, economics, finance or management to complement marketing courses in the program. Students interested in preparing for the increasingly global nature of business will be well-suited for this unique master's degree program. All degree candidates are strongly encouraged to participate in an intensive study program in a foreign language and/or a foreign study program.

In addition to the [VCU Graduate School graduation requirements](#), students must complete up to seven classes (0 to 21 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Science in Business with a concentration in global marketing management offers students the opportunity to combine their studies in international marketing with contemporary issues in marketing management.

## Student learning outcomes

1. Students will evaluate marketing programs.
2. Students will express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

## Degree requirements

Students enrolled in the VCU-Fudan University joint degree program take all required courses at Fudan University in Shanghai and an encouraged practicum course at VCU at the end of the program. The program will be jointly taught by faculty from both VCU and Fudan. The program requires a minimum of 30 credit hours and provides the option to complete a practicum for a total of 33 credits maximum. Upon completion of the requirements, students will receive a Master of Science in Business with a concentration in global marketing management from VCU.

In addition to the [VCU Graduate School graduation requirements](#), students must complete up to seven classes (0 to 21 credit hours) of the following preparatory foundation course work taken at Fudan University.

Preparatory foundation courses taken at Fudan University	0-21
Concepts and Issues in Marketing	3
Statistical Elements of Quantitative Management	3
Fundamentals of Accounting	3
Financial Concepts of Management	3
Concepts of Economics	3
Two-course sequence in a foreign language at the undergraduate or graduate 6 level (or demonstrated proficiency) or two approved cross-cultural courses taken at the undergraduate or graduate level	6

## Curriculum requirements

Courses	Credit hours
<b>Required marketing and strategy courses</b>	<b>15</b>

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

1. To prepare students for successful careers in real estate valuation and lifelong learning by providing education that is firmly grounded in technology, interdisciplinary teamwork and a global perspective
2. To ensure that students understand and can apply appropriate analytical methodologies and technology to the discipline of real estate valuation
3. To prepare students for professional licensing, certification and/or professional designations

## Student learning outcomes

1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate valuation in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze a real estate valuation problem in terms of: 1) development of a precise statement of the problem and how it relates to the goals of the firm and/or client and in conformance to the Uniform Standards of Professional Appraisal Practice; 2) a consideration of the ethical, policy and/or practical limitations on any proposed solution strategy; 3) statement and consideration of proposed solutions strategies and their implementation, including the application and development of the appropriate approaches to value (cost analysis, sales comparison analysis and income capitalization analysis – including direct capitalization and yield capitalization) along with

a proper reconciliation of these approaches; and 4) formulation of a plan for implementation and monitoring of the proposed solution.

4. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards. Specifically, graduates will have an understanding of the Uniform Standards of Professional Appraisal Practice.

## Degree requirements

The real estate valuation concentration is one of only eight programs in the nation that satisfies the rigorous educational requirements of the Appraisal Institute's MAI designation. Students can satisfy most of the Appraisal Institute's education requirements by completing the concentration. This concentration emphasizes real estate valuation while providing comprehensive education in related disciplines so that graduates' analytical skills and abilities to communicate with other professionals are greatly enhanced. Whenever possible, students will be placed in internships with MAIs.

In addition to the [VCU Graduate School graduation requirements](#), students must complete the following undergraduate prerequisite courses:

## Curriculum requirements

### Prerequisite undergraduate courses

FIRE 425 Real Estate Appraisal	3
FIRE 445 Real Estate Investment Analysis	3

Students must also complete up to seven classes (0 to 21 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The post-baccalaureate graduate Certificate in Real Estate and Urban Land Development is designed for professionals who seek an opportunity for advanced study in real estate and are more interested in the focused knowledge obtainable than receipt of a graduate degree. The certificate provides students the ability to advance their careers while receiving recognition for their academic accomplishment in the form of a graduate certificate. Many working professionals, especially those with undergraduate majors in the liberal arts, will find this program attractive since they can concentrate their energies on a tightly focused curriculum without enrolling in a large number of prerequisite courses.

## Student learning outcomes

1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate valuation in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards. Specifically, graduates will have an understanding of the Uniform Standards of Professional Appraisal Practice.

## Degree requirements

/>

In addition to the [VCU Graduate School graduation requirements](#), in order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Eighteen credit hours beyond the bachelor's degree are required for completion of this graduate certificate program. A maximum of one three-hour course taken at another AACSB-accredited institution may be transferred into this program. Students interested in later applying for admission into either the Master of Business Administration program with a concentration in real estate or the Master of Science in Business with a concentration in real estate valuation must do so

through a separate application process. Admission is dependent on the applicant having achieved a 3.0 GPA in the graduate certificate and a satisfactory score on the GMAT examination.

## Curriculum requirements

Courses	Credit hours
FIRE 627 Real Estate Development	3
FIRE 628 Using GIS in Real Estate Decisions	3
FIRE 629 Real Estate Investment Analysis	3
FIRE 638 Real Property Investment Law	3

Supply Chain Management, Master of (M.S.C.M.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.C.M.	Fall	Jul 1	GRE or GMAT
	Spring	Nov 1	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

- Curriculum vitae and personal statement
- Personal interview if requested by the graduate program director

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

**Program goal**

The Master of Supply Chain Management program will educate students on the theory, skills and practices necessary to manage the daily challenges in managing

global supply chains. Students will be introduced to supply management and logistics systems, international logistics, transportation management, enterprise resource planning and innovation processes. In addition, students will learn how to identify problems, gather information, analyze data, interpret solutions, establish contingencies and effectively present results.

Although developed in collaboration with the U.S. Army, the intent of the program is to provide an opportunity for both military officers and civilians to earn a master's degree in supply chain management.

**Student learning outcomes**

Students in the Master of Supply Chain Management program will be able to:

1. Demonstrate how to manage the complexities present in global supply chains
2. Demonstrate the ability to add value in global supply chains
3. Demonstrate how to design, plan and control organizational processes using information technology
4. Demonstrate how to manage data and uncertainty in supply chains
5. Apply cross-disciplinary skills to foster innovative solutions to supply chain challenges and opportunities
6. Develop research and communications skills

**Degree requirements**

In addition to the [VCU Graduate School graduation requirements](#), students must complete a minimum of 30 credit hours. These credit hours consist of seven core courses (21 credit hours) and three elective courses (nine credit hours).

**Curriculum requirements**

Courses	Credit hours
<b>Core courses</b>	<b>21</b>
SCMA 602 Global Supply Chain Management	3
SCMA 603 SAP ERP and Supply Chain Management	3
SCMA 606 Supply Chain Innovation	3
SCMA 645 Management Science	3
SCMA 648 Analytics for Organizational Decision-making	3

<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's

academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

## Other information

School of Business policies and procedures for graduate master's degree students are available on the school's website at [business.vcu.edu/graduate/current.html](http://business.vcu.edu/graduate/current.html).

## Department of Accounting

The future development of the accounting profession depends upon the quality of the educational foundation on which it rests. The Department of Accounting is committed to the support of professional accounting through the delivery of educational experiences directed toward practice and through research that addresses the important policy issues of the day.

The mission of the department is to prepare students for careers in accounting, to interpret and expand accounting knowledge, and to render service to the profession and communities. The department does so by:

1. Providing a learning environment in which students are encouraged to interact with others in identifying and solving accounting and business problems.
2. Investigating, developing and sharing knowledge, which has the potential for significant influence on accounting, business and education.
3. Interacting with the accounting profession, the business community and the community at large.

ACCT 305 Intermediate Accounting III	3
ACCT 306 Cost Accounting	3
ACCT 307 Accounting Systems	3
ACCT 405 Tax Accounting Principles	3
ACCT 406 Auditing	3

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The purpose of the Master of Accountancy program is to provide the skills and knowledge necessary to be future leaders in the professional business community and the public sector for students who wish to specialize in the areas of accounting/information systems, auditing, financial reporting and accounting/other fields of business.

### Student learning outcomes

1. Students are expected to demonstrate current knowledge of financial accounting standards, tax laws and regulations, and other professional guidance that affects the profession. In addition, students should be aware of proposed changes to tax laws and regulations, financial accounting standards, and other professional guidance.
2. Students are expected to demonstrate the ability to effectively communicate accounting information in writing and in oral presentations.
3. Students are expected to demonstrate the ability to effectively analyze comprehensive cases, comprehensive problems and other projects that require in-depth accounting knowledge. The analysis should include a brief statement of the issue, facts bearing on the issue, appropriate professional guidance and a proposed solution to the issue.
4. Students are expected to demonstrate the ability to apply accounting knowledge in a variety of contexts and circumstances.
5. Students must be able to demonstrate their ability to apply ethical principles in a variety of accounting contexts and circumstances.

### Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students in the Master of Accountancy program must complete a minimum of 30 credit hours of graduate course work with at least 15 credit hours in graduate accounting course work.

### Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>15</b>

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The Master of Arts in Economics is designed to enhance the student's abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well-qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

## Student learning outcomes

1. Students will use optimization techniques to develop demand and cost conditions from specifications of underlying utility and technology. Specifically, given a simple functional form for utility, students will be able to solve for optimal individual demand and, given a production technology, students will be able to solve for the firm's cost curves.
2. Students will understand and know how to apply quantitative macroeconomic models.
3. Students will critically evaluate the validity of conclusions drawn from econometric models by others who have access to the primary data. In the AACSB classifications, this is a management-specific goal.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), the M.A. in Economics degree requires a minimum of 30 credit hours of 600-level course work. Under the thesis option, the 30 hours must include eight core courses and one economics elective and one business or economics elective. Under the non-thesis option, the 30 hours must include six core courses, two economics electives and two business or economics electives.

## Curriculum requirements

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

Graduates of the Master of Arts in Economics program will have the knowledge and experience to qualify for a wide and rapidly expanding range of analyst positions in the private or public sectors. Graduates will be particularly well-suited for positions requiring modeling skills and substantial experience in the analysis and interpretation of firm-level, industry or macroeconomic data. A unique feature of the program is a three-course core sequence in applied econometrics. These courses emphasize the application of modeling techniques and data analysis through the introduction of cases and projects. Through these courses, students acquire a working knowledge of up-to-date powerful statistical software and broad experience in working with a variety of real data sets. The concentration in health economics will allow students with particular interest in the health sector and in health policy issues to specialize in health economics, a topic currently quite relevant.

Graduates of the M.A. in Economics with a concentration in health economics, in addition to holding highly competitive terminal credentials as analysts, will find the program to be an outstanding bridge to doctoral work in programs such as the Ph.D. in Healthcare Policy and Research offered in the School of Medicine at VCU.

## Student learning outcomes

1. Students will be able to convey ideas about macroeconomic analysis effectively in oral and written communications.
2. Students will use optimization techniques to develop demand and cost conditions from specifications of underlying utility and technology. Specifically, given a simple functional form for utility, students will be able to solve for optimal individual demand and, given a production technology, students will be able to solve for the firm's cost curves.
3. Students will understand and know how to apply quantitative macroeconomic models.
4. Students will critically evaluate the validity of conclusions drawn from econometric models by others who have access to the primary data.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), the M.A. in Economics with a concentration in health economics requires 33 credit hours of 600-level courses. Under the thesis option, the 33 hours must include eight core courses and three restricted electives. Under the non-thesis option, the 33 hours must include six core courses and five restricted electives.

## Curriculum requirements

Courses	Credit hours
<b>Thesis option</b>	
<b>Required courses</b>	<b>24</b>
ECON 604 Advanced Microeconomic Theory	3
ECON 607 Advanced Macroeconomic Theory	3
ECON 612 Econometrics	3
ECON 614 Mathematical Economics	3
ECON 641 Econometric Time-series Analysis	3
ECON 642 Panel and Nonlinear Methods in Econometrics	3
ECON 798-799 Thesis in Economics	6
<b>Restricted electives</b>	<b>9</b>
Choose three courses from the following list.	
HADM 602 Health System Organization, Financing and Performance	3
HADM/ECON 624 Health Economics	3
HCPR 601 Introduction to Health Policy	3
HCPR 703 Health Economics: Theory and Principles	3
HCPR 733 Statistical Methods in Analysis of Healthcare Research	3
<b>Total graduate credit hours required (minimum)</b>	<b>33</b>
<b>Non-thesis option</b>	
<b>Required courses</b>	<b>18</b>
ECON 604 Advanced Microeconomic Theory	3
ECON 607 Advanced Macroeconomic Theory	3
ECON 612 Econometrics	3
ECON 614 Mathematical Economics	3
ECON 641 Econometric Time-series Analysis	3
ECON 642 Panel and Nonlinear Methods in Econometrics	3
<b>Restricted electives</b>	<b>15</b>
Choose three of the following	
HADM 602 Health System Organization, Financing and Performance	3
HADM/ECON 624 Health Economics	3
HCPR 601 Introduction to Health Policy	3
HCPR 703 Health Economics: Theory and Principles	3
HCPR 733 Statistical Methods in Analysis of Healthcare Research	3
<b>Total graduate credit hours required (minimum)</b>	<b>33</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

School of Business policies and procedures for graduate master's degree students are available on the school's website at [business.vcu.edu/graduate/current.html](http://business.vcu.edu/graduate/current.html).

## Department of Finance, Insurance and Real Estate

The Department of Finance, Insurance and Real Estate delivers knowledge to students in all programs offered by the School of Business and contributes to the expansion of knowledge by engaging in scholarly activity. The department provides core courses as well as majors, minors and concentrations. In addition, the department develops and delivers courses in continuing professional education for practitioners seeking to upgrade their skills and/or attempting to achieve professional certification.

### Areas of study

- Finance (refer to the [B.S. in Business](#) concentrations for more information)
- Real estate (refer to the [B.S. in Real Estate](#) and the [post-baccalaureate certificate](#) for more information)
- Financial technology (refer to the [B.S. in Financial Technology](#) for more information)

## Administration

**Nanda K. Rangan**

Professor and Department Chair

## Finance, insurance and real estate courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to finance, insurance and real estate ([FIRE](#)) courses.

## Department of Information Systems

The Department of Information Systems provides an innovative, high quality curriculum that is recognized nationally and internationally and maintains the ability to rapidly respond to the dynamic, changing needs of the academic discipline, industry and community.

The department offers degree programs at both the undergraduate and graduate level, as well as continuing education programs that support alumni and the community. Additionally, courses in information systems are offered to meet the needs of students in other curricula offered by the university as well as those who are seeking to enhance their knowledge of information systems.

Our faculty offers expertise in information technology and has wide-ranging research and teaching interests. As part of the department, the Information Systems Research Institute provides opportunities for sponsored research, innovative teaching initiatives and faculty development.

## Administration

## Admission requirements

Computer and Information Systems Security, Master of Science (M.S.)			
Degree: M.S.	Semester(s) of entry: Fall Spring	Deadline dates: Jul 1 Nov 1	Test requirements: GRE or GMAT  International students require TOEFL

Applicants must meet all [general admission requirements of the VCU Graduate School](#).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the School of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

For additional information, please [visit the program website](#).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

## Program goal

Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU's program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student's ability to see the larger organizational, social, political, ethical and economic aspects of information security.

## Student learning outcomes

Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component, an elective component and a practice component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science. The practice component, taken near the end of the student's course work, ensures an opportunity for the student to apply principles to practice.

## Curriculum requirements

Prerequisites are determined by the faculty adviser at the time of admission.

Courses	Credit hours
<b>Core component</b>	<b>15</b>
CISS/CMSC 618 Database and Application Security	3
CISS/CMSC 622 Network and Operating Systems Security	3
CISS 624/CMSC 620 Applied Cryptography	3

CISS 634 Ethical, Social and Legal Issues in Computer and Information Systems Security	3
CISS/INFO 644 Principles of Computer and Information Systems Security	3

<b>Elective component</b>	<b>12</b>
Choose 12 credit hours of CISS courses or, with the approval of program co-directors, courses offered by the departments of Computer Science, Information Systems, Criminal Justice or Forensic Science.	
<b>Practice component</b>	<b>3</b>
CISS 693 Practice of Computer and Information Systems Security	3
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

## Student learning outcomes

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

## Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. The required undergraduate courses are: INFO 300, INFO 350, INFO 360, INFO 361, INFO 370, INFO 364 and a course in calculus.

In addition to the [VCU Graduate School graduation requirements](#), students who do not have a business degree must complete a minimum of four 500-level foundation courses (12 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student's background, career interests and the chosen area of specialization. Students applying to the program should consult with the master's program adviser to determine the foundation courses required for a particular area.

The Fast Track Executive Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles. Participants gain a wide range of new skills and knowledge by combining course work with their day-to-day professional activities. The program is targeted to rising business executives, entrepreneurs and information systems professionals. The program differs from the regular M.S. in Information Systems program in that it is offered in a weekend format, with students meeting for classes on alternate weekends throughout the calendar year. The lockstep program consists of 10 required courses.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance with Christ University in Bangalore, India			
Degree: M.S.	Semester(s) of entry: Fall	Deadline dates: Jul 1	Test requirements: GMAT or GRE
	Spring	Nov 1	
	Summer	Mar 1	

The VCU School of Business and Christ University in Bangalore, India have partnered to provide students with an opportunity to study at two universities and earn two degrees. Students who have already been admitted to the Christ University Master of Business Administration program are invited to apply to the VCU Master of Science in Information Systems with a concentration in information risk, security and assurance.

Students satisfy the master's foundation course requirements during the first year while in the Christ University M.B.A. program and then complete the 10 required VCU courses need for the Master of Science in Information Systems with a concentration in information risk, security and assurance. These courses are taken primarily at the VCU Monroe Park Campus and are designed to be completed in one calendar year.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the master's program in business administration must submit an up-to-date resume.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

The information risk, security and assurance concentration within the degree is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the risk, security and assurance community and as strategic partners with the enterprise in which they work. They will stay attuned to and anticipate changes in the risk, security and assurance environment and ensure that security solutions create a sound, competitive and cost-effective advantage for the enterprise.

## Student learning outcomes

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

## Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. The required undergraduate courses are: INFO

300, INFO 350, INFO 360, INFO 361, INFO 370, INFO 364 and a course in calculus.

In addition to the [VCU Graduate School graduation requirements](#), students who do not have a business degree must complete a minimum of four 500-level foundation courses (12 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student's background, career interests and the chosen area of specialization. Students applying to the program should consult with the master's program adviser to determine the foundation courses required for a particular area.

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

Product Innovation, Master of (M.P.I.)			
Degree: M.P.I.	Semester(s) of entry: Fall	Deadline dates: May 31	Test requirements: GRE, GMAT or portfolio depending on area of specialization  International students TOEFL required
Special requirements:			
At the time of application, an applicant declares an area of specialization: arts, business or engineering. The arts specialization requires the submission of a portfolio comprising 20 to 30 examples of representative work; the business specialization requires either the GMAT or GRE; and the engineering specialization requires the GRE.			
A personal interview may be requested.			

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. A bachelor's degree or equivalent from an accredited college or university
2. Except in very unusual cases approved by the graduate dean, a minimum undergraduate GPA of 3.0 on a 4.0 scale for at least the last two years of undergraduate work
3. For applicants whose native language is not English, satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL
4. Three letters of recommendation
5. Applicant's written statement of intent for pursuing graduate study in the product innovation discipline

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and

Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program mission and objectives

The Master of Product Innovation is administered by VCU's da Vinci Center, which is a collaboration of VCU's School of the Arts, College of Humanities and Sciences, School of Business and School of Engineering. Integrating arts, business and engineering principles, students will learn advanced product innovation topics pertaining to conceptualization, development and commercialization of new products. Through unique instruction and experiential learning that culminates with a year-long master's project, students will have a real product innovation experience that could result in true business creation and economic development opportunities. M.P.I. graduates will reflect product innovation and team-working skills that will enable them to serve in key leadership roles to stimulate the creation, development and management of new products and services.

## Student learning outcomes

The M.P.I. program hones competency in the area of product innovation. Students will:

1. Gain an in-depth understanding of and appreciation for cross-disciplinary innovation
2. Develop advanced product innovation skills
3. Hone teamwork and team management skills

## Degree requirements

The Master of Product Innovation requires a minimum of 30 graduate credit hours for completion. In addition to [general VCU Graduate School graduation requirements](#), students must:

1. Complete the boot camp experience prior to the first semester of study in the program
2. Complete the required core curriculum courses (12 or 15 credit hours of specified course work depending on undergraduate degree)
3. Complete two elective courses (6 credit hours) with one of these courses at the 600 level
4. Complete the master's project courses (12 credit hours) (The master's project is mandatory for all students.)

The program can be taken either on a full-time or part-time basis.

## Curriculum requirements

Courses	Credit hours
<b>Core requirements</b>	<b>12 or 15</b>
Students must take at least two of the following courses, depending on which ones do not correspond to the undergraduate degree. If the student does not have an undergraduate degree in an arts, business or engineering discipline, all three courses must be taken. <b>Note:</b> Students are strongly encouraged to take all three courses regardless of undergraduate degree.	
INNO 501 Arts Principles for Product Innovation	3
INNO 502 Business Principles for Product Innovation	3
INNO 503 Technology Principles for Product Innovation	3
All students will enroll in:	
INNO 590 da Vinci Project	3
INNO 600 Integrative Design Studio	3

## Technical electives 6

Students will take technical elective course work which includes the following. All technical electives must be at the graduate level, with at least three credit hours at the 600 level.

INNO 691 Topics in Product Innovation  
INNO 697 Guided Study  
Other approved graduate-level course (Specific courses will be determined by the student with approval by the M.P.I. faculty committee.)

## Master's project 12

INNO 651 Master's Project in Product Innovation I 6  
INNO 652 Master's Project in Product Innovation II 6

## Total number of graduate credit hours required (minimum) 30

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

### **Other information**

All students will be given information on policies and regulations during the first day of the M.P.I. boot camp experience.

**VCU**

## **2014-15 Graduate and Professional Programs Bulletin**

---

**School of Dentistry**

The School of Dentistry was created in 1893 when the University College of Medicine opened with a dental department as one of its original divisions. The Medical College of Virginia inaugurated a dental education program in 1897, and in 1913 the two schools were merged to form the MCV School of Dentistry.

In 1968, by an act of the Virginia General Assembly, MCV was merged with Richmond Professional Institute to form Virginia Commonwealth University. The School of Dentistry is located on VCU's MCV Campus.

The facilities of the School of Dentistry are housed in the Wood Memorial, Lyons and Perkinson buildings and contain clinical facilities, research facilities, classrooms, student laboratories, departmental offices and a computer-learning laboratory.

The school provides opportunities for selected, qualified individuals to study dentistry under the most favorable conditions and in accordance with the standards established by the Commission on Dental Accreditation of the American Dental Association.

The degree of Doctor of Dental Surgery (D.D.S.) is awarded to graduates of the school's professional program and the Bachelor of Science degree to graduates of the Division of Dental Hygiene.

Graduates of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics are awarded the Master of Science in Dentistry degree.

## Mission

The VCU School of Dentistry is a public, urban, research dental school, supported by Virginia to serve the people of the commonwealth and the nation. The school's mission is to provide educational programs that prepare graduates qualified to provide dental care services; generate new knowledge through research and other scholarly activity; and provide quality oral health care to the public and service to the community.

## Philips Institute of Oral and Craniofacial Molecular Biology

**Andrew Yeudall**

Interim Director, The Philips Institute, and Professor of Oral and Craniofacial Molecular Biology and Microbiology and Immunology

The mission of the Philips Institute of Oral and Craniofacial Molecular Biology is to serve the university and the commonwealth of Virginia as a center of educational and research excellence focused on infectious, neoplastic and genetic diseases of the oral cavity, head and neck.

### Dentistry, Doctor of Dental Surgery (D.D.S.)

The Doctor of Dental Surgery is a four-year program in general dentistry leading to the D.D.S. degree and emphasizing study in three broad areas: basic sciences, clinical sciences and social sciences. The academic year begins in July and extends through May.

## Admission requirements

A minimum of 90 semester hours (or equivalent) in an accredited college or university is required and must be documented. Most acceptances have a bachelor's degree and/or four years of college. Required courses are general biology, biochemistry, general chemistry, organic chemistry, physics and English. Laboratory experiences are required for those courses where applicable. Biology courses should emphasize zoology rather than botany. Courses in general microbiology or bacteriology, animal physiology, immunology, histology, genetics, embryology, the behavioral sciences, and courses involving psychomotor skills are strongly recommended. Academic credits presented by an applicant must be acceptable for credit toward a degree in the institution in which the courses are taken. Individuals interested in pursuing a career in dentistry should schedule an appointment in the Office of Admissions for individual guidance.

In order to successfully complete the dental curriculum at VCU, students must meet non-academic criteria for motor, sensory and observation, communication, cognitive and behavioral abilities in the document Technical Standards for Dental Education Programs for VCU School of Dentistry. Accordingly, applicants may be required to prove their proficiency in American English via standardized tests and interviews. An applicant may consider the option of postponing matriculation until such time that he/she can meet these requirements.

Participation in the Dental Admission Test (DAT) of the American Dental Association is required. It is recommended that this test be taken the year before the intended matriculation year. Applicants are encouraged to take the examination more than one time, and the best set of scores is used as the official set. Information about the Dental Admission Test can be obtained from: a) your pre-health advising office of your undergraduate school, b) VCU, School of Dentistry Office of Admissions or c) the American Dental Association, Department of Testing Web site: <http://www.ada.org/prof/ed/testing>.

### Selection factors

VCU is a state-supported, public university and gives admission preference to state residents. All applicants are evaluated by uniform criteria without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran's status, political affiliation or disability. Students are accepted by the Admissions Committee on the basis of excellence of predental education, DAT scores, recommendations, experiences in dentistry and results of personal interviews with members of the committee. The interview process is standardized and designed to determine motivation, knowledge of and interest in the dental profession, and to afford the applicant an opportunity to provide additional information pertaining to his/her application. Selection occurs on a rolling admissions basis, and once the class is complete, an alternate list is created. Members of minority groups underrepresented in dentistry are especially encouraged to apply. Each year a certain number of students who are not accepted into the freshman class are invited to take selected courses with this class. Their performance in these courses plays a vital role in their being considered for the following year's admissions process.

### Admission with advanced standing

The School of Dentistry will consider applicants for admission with advanced standing on an individual basis depending upon positions available and

qualifications of the applicant. Pre-admission evaluation of skills and knowledge by performance testing is required prior to admission consideration.

## Application procedures

The School of Dentistry participates in the American Association of Dental Schools Application Service (AADSAS). All applicants are required to submit credentials through this service. Re-applicants must also reapply through the application service. Application forms can be obtained from AADSAS, 1400 K St. N.W., Suite 1100, Washington, D.C. 20005 (e-mail to [aadsas.appl@adea.org](mailto:aadsas.appl@adea.org) or call (202) 289-7204, preadental advisers in colleges and universities, and the Office of Admissions, School of Dentistry, Virginia Commonwealth University, P.O. Box 980566, Richmond, VA 23298-0566.

Application to the School of Dentistry can be made through AADSAS on or after May 15 and must be received by AADSAS no later than Nov. 1 of the year preceding intended matriculation.

AADSAS compiles academic records and other pertinent information and forwards these with the application to the School of Dentistry. Qualified applicants are then requested to submit supplemental information, such as the VCU supplemental application. The application fee is \$70.

Applicants will be notified of decisions according to guidelines established by the American Association of Dental Schools. The first acceptances are sent out on Dec. 1, and a \$500 deposit (credited to tuition) is required by Jan. 15. After Feb. 1, the deposit must be received within two weeks following notification of acceptance. A second deposit of \$300 credited to tuition is due on May 1. Both deposits are nonrefundable.

A letter of acceptance offers the candidate a position in the class entering for the session cited. Receipt by the Office of Admissions of the initial \$500 nonrefundable tuition deposit within the prescribed period reserves the position in the class. Failure to reserve a position results in that position being offered to another candidate. A second \$300 nonrefundable tuition deposit initiates active administrative processing of matriculation into the first-year class. Failure to send this deposit results in loss of position, and the position is then offered to another candidate. The act of matriculation also implies a willingness on the part of the student to comply with university rules and regulations, to take an interest in maintaining the ideals of the institution and to conduct himself/herself in a manner befitting a member of the dental profession.

For more information please visit the School of Dentistry Web site at [www.dentistry.vcu.edu](http://www.dentistry.vcu.edu).

## Financial assistance

A general description of financial aid based on demonstrated need is contained in the Professional Studies at VCU chapter of this bulletin. Financial need-based aid programs available to dental students include Health Professions Student Loans, Loans for Disadvantaged Students, Virginia Rural Dental Scholarship Program, and federal educational loans. Further information may be obtained from the offices of Admissions, Financial Aid and Student Affairs of the School of Dentistry.

## Honors and awards

The School of Dentistry presents numerous awards, honors and scholarships to students during the academic year. These awards are presented during special school events, including graduation, Student Clinic Day and the Senior Gala. Students who excel in scholarship and leadership also may be eligible for membership in university or school honor societies. In addition, students who meet established criteria may be eligible for scholarships or election to membership in organizations related to dentistry.

**Omicron Kappa Upsilon** is the national honorary dental society. Each year the society selects those students who, in addition to scholarship, have demonstrated exemplary traits of character and potential qualities of future professional growth and attainments.

**Phi Kappa Phi** is a national honor society that recognizes and encourages superior scholarship. It accepts members from applied and professional fields of study, as well as from letters, arts, sciences and humanities. The VCU chapter was installed in 1977.

**Alpha Omega Scholarship Award** is presented to the graduating student who has attained the highest scholastic rating for his/her four years of dental study.

**Harry Lyons Scholarship Award** is awarded to the graduating senior dental student who has attained the highest grade-point average for his/her four years of dental school.

**A. D. Williams Foundation Award** is an annual stipend made to a student in each class who demonstrates, by virtue of high scholastic attainment and professional performance, unusual promise and ability. Character, motivation, intellectual curiosity and realization of the opportunities for intellectual development will be considered in the award, which is made at the end of the academic year.

**O.M. Clough Award** is awarded to a graduating senior dental student for outstanding achievement in restorative dentistry.

**William B. Fitzhugh Scholarship Award** is awarded to an incoming dental student who has demonstrated financial need, preference being given to students who have demonstrated athletic abilities at their undergraduate institution.

**R. Ashton Gay and Henry F. Vaughan Scholarship** is awarded to a student who is a Virginia resident at the VCU School of Dentistry, demonstrates academic excellence and leadership during the D-1 year, and has demonstrable need of financial assistance at the beginning of the D-2 year.

**Edmond T. Glenn Award** is awarded on the basis of financial need to a student ranked in the upper half of the class at the end of the D-3 year and who has been involved in school/class activities.

**International College of Dentists Award** is presented to the graduating dental student who has shown the most professional growth and development during his/her years of dental study.

**Pierre Fauchard Academy** presents an award to the graduating dental student who has exhibited leadership qualities and through his/her accomplishments has demonstrated dedication to the advancement of dental literature.

**The Richmond Dental Study Club Memorial Endowment Scholarship** is awarded annually to a D-3 (junior) dental student based on his/her having a GPA in the top 25 percent of the class and demonstrating exceptional leadership and participation in school and/or community extracurricular activities at the end of the D-2 (sophomore) year.

**Alexander Kaufman Award** is awarded to a junior dental student based on class leadership and financial need.

**P.D. Miller Award** goes to the dental student judged by faculty as having demonstrated excellent understanding of the relationship between restorative dentistry and periodontics.

**Robert M. Saunders Scholarship** is awarded to a junior or senior Virginia resident predoctoral dental student with excellent academic credentials.

## Student learning outcomes

D.D.S. students will demonstrate the mastery of an in-depth study of human anatomy, genetics, material science, microbiology, pathology, pharmacology and physiology; the actual practice of dentistry; exposure to specialties; dental health needs; system of health care delivery; practice management; professional ethics; and behavioral factors. Laboratory, clinical experiences are required throughout four years to develop skills and judgment vital to the practice of general dentistry.

## Curriculum

The curriculum in the dental school is organized into a competency-based, four-year program leading to the Doctor of Dental Surgery (D.D.S.) degree. The academic year begins in July and extends through June. The program emphasizes study in three broad areas: biomedical sciences, clinical sciences and behavioral sciences.

The biomedical sciences include the in-depth study of human anatomy, genetics, material science, microbiology, pathology, pharmacology and physiology.

The clinical sciences prepare the student for the actual practice of dentistry and provide exposure to the various specialties in dentistry.

The behavioral sciences cover such topics as dental health needs, the system of health care delivery, practice management, professional ethics and behavioral factors.

Laboratory and clinical experiences are offered throughout the four years to develop the skills and judgment vital to the practice of general dentistry.

In general, courses offered as part of the curriculum in dentistry are not available to other students in the university. Exceptions may be granted by the dean of the

School of Dentistry to students enrolled in graduate degree programs upon written request of the department chair in which the student is seeking a degree.

\* Continues into second semester.

\*\* Completed first semester senior year.

## Academic performance evaluation

The faculty of the VCU School of Dentistry has the responsibility for evaluating the student's academic performance. It is incumbent on the course directors or their designees to specify, at the time that courses first convene, the criteria to be used in student assessment and the standards by which they will be judged.

The VCU School of Dentistry Guidelines for the Evaluation of Student Performance and Academic Status are distributed to all students at the beginning of their study. They are available upon request from the Office of Academic Affairs, School of Dentistry.

## Advanced Dental Education

**Martha C. Clements**

Director, Continuing Education

### Office of Continuing Education

For every professional person who serves the health sciences, education must be a lifetime commitment.

Graduation from dental school is the beginning of a lifelong educational experience for the serious, conscientious student of dentistry. Regardless of how well prepared a health professional may be at the time of graduation, the adequate knowledge of yesterday is often insufficient information for today and tomorrow. With the rapid advancements made in dental technology and techniques, the professional must constantly seek new knowledge if the health care provider is to improve the health care given to patients.

Although the majority of continuing education courses are presented at the School of Dentistry, some are offered in other locations. The courses, which vary in length from one to four days, are scheduled throughout the year and consist of a variety of instructional methods from didactic to hands-on participation in clinical programs.

The instructional staff is comprised of faculty from the VCU School of Dentistry, guest lecturers from other dental schools, and members of the dental profession and related professions from the United States and other countries.

### Advanced Dental Education programs

The School of Dentistry provides advanced dental education programs in the areas of endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, and advanced education in general dentistry (AEGD). Satisfactory completion of the program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time resident trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

Students enrolling in endodontics, orthodontics, pediatric dentistry and periodontics also are awarded a Master of Science in Dentistry degree upon completion of the requirements for the certificate and successful defense of a thesis. The certificate program and Master of Science in Dentistry degree must be completed concurrently. See the School of Dentistry Graduate Program for more information on the Master of Science in Dentistry degree program.

Applications for admission should be directed to the director of the appropriate program, School of Dentistry, Virginia Commonwealth University, P.O. Box 980566, Richmond, VA 23298-0566. Successful completion of Part II of the National Board Dental Examination is required prior to admittance to the program.

### Advanced Education in General Dentistry

**Debra Haselton**

Professor and Program Director

The purpose of this 12-month Advanced Dental Education residency program is to provide advanced education and clinical experience to prepare dental school graduates for a career in the practice of comprehensive, general dentistry. This program has a strong emphasis on treatment planning, experience with new technology, developing skills in aesthetic dentistry and restoration of dental implants. Graduates of this program will have attained added competency and confidence in all areas of dental care, practice management and professional responsibility. Further, this program provides residents with meaningful experiences in the delivery of dental care to diverse populations and people at high risk for dental disease. A strong affiliation exists between the School of Dentistry and the statewide Virginia Area Health Education Center (AHEC), whose mission is to increase primary health care in underserved areas. The AEGD program works in concert with AHEC to deliver dental care and recruit/train minority health care providers from health professional shortage areas.

The School of Dentistry is committed to advanced dental education. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive training in the art and science of general dentistry. AEGD residents may be required to participate in off-site

clinical experiences outside the city of Richmond, Va. Funds will be provided for travel and lodging when required.

### Eligibility and selection

Dentists with the following qualifications are eligible to apply for the AEGD program: Dental graduates from institutions in the United States accredited by the Commission on Dental Accreditation of the American Dental Association and who have passed Part I of the National Board Examination.

Selection criteria include: didactic and clinical achievements, extramural experience, interpersonal skills and a demonstrated commitment to pursue a career in general dentistry. Every effort is made to recruit qualified applications from minority dentists and dentists from health professional shortage areas or dentists who profess a desire to serve in these areas. A selection committee consisting of the program director, the assistant dean for admissions, members from specialty areas, former residents and current residents will screen all applications. Using the above-mentioned selection criteria, the most promising applicants will be invited for personal interviews. Trainees and alternates will be selected. This program participates in the Postdoctoral Application Support Service Program. Telephone (804) 828-3601; fax (804) 828-3159; e-mail [drhaselton@vcu.edu](mailto:drhaselton@vcu.edu).

### Endodontics

**Karan Replogle**

Professor and Department Chair, Endodontics

The Advanced Dental Education Program in Endodontics offers the student a comprehensive 24-month course of study in clinical, didactic and research endodontics. The program is designed to educate qualified individuals to pursue careers as educators, researchers and practicing clinicians, and meets the educational requirements for limitation of practice to the specialty of endodontics and examination by the American Board of Endodontics. The program is composed of several interrelated phases. The first phase consists of lecture courses that provide the student with a firm biological basis for patient care. The second phase consists of lectures, seminars and clinical training designed to produce clinical mastery of endodontics. The third phase is research experience gained through completion of an individual research project and master's thesis.

Students completing the program earn a specialty certificate in endodontics and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

### Oral and Maxillofacial Surgery

**Robert A. Strauss**

Professor and Program Director

The oral and maxillofacial surgery program is designed to provide extensive didactic and clinical experience in all aspects of the specialty. Those who complete training satisfactorily fulfill the prerequisites for examination and certification by the American Board of Oral and Maxillofacial Surgery.

The didactic portion of the program includes formal courses in oral pathology, anatomy and physical diagnosis, as well as numerous weekly conferences and seminars. Clinical rotations on oral pathology, anesthesia, medicine, surgical oncology, neurosurgery, cardiology, general surgery, emergency room and the trauma services are used to supplement the trainee's surgical experience. Throughout the program there is a constant correlation of the clinical experience with the biomedical sciences.

Through the multiple clinical and didactic facilities of the VCU Medical Center complex, the McGuire Veterans Affairs Medical Center, and St. Mary's Hospital, there is ample material for education in the latest oral and maxillofacial surgical techniques. The oral and maxillofacial surgery service is responsible for diagnosis and management of diseases and injuries related to the oral and facial region. Trainees are involved in all aspects of treatment including simple and complicated oral surgery, anesthesia and pain control, oral and maxillofacial trauma, preprosthetic surgery, orthognathic surgery, head and neck pathology, oral and maxillofacial reconstruction, temporomandibular joint surgery, laser surgery, cosmetic facial surgery, and microneural and microvascular surgery. During the four years, the trainee assumes ever-increasing responsibilities as time and abilities dictate.

Upon satisfactory completion of the four-year residency, the trainee may earn the Doctor of Medicine degree from the School of Medicine by enrolling in the second and third years of that curriculum.

## Orthodontics

### Bhavna Shroff

Professor and Program Director

The Department of Orthodontics at VCU's MCV Campus offers a 24-month advanced education in orthodontics and Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. The goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically. Clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of the program, with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is a requirement of the program. All senior residents present their research at the Virginia Association of Orthodontists meeting. The program qualifies students to take the written portion of the American Board of Orthodontics examination in the senior year. Residents are required to take the written portion of the American Board of Orthodontics examination prior to graduation, and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists meeting.

Students completing the program earn a specialty certificate in orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

## Pediatric Dentistry

### John H. Unkel

Associate Professor and Program Director

The Advanced Education Program in Pediatric Dentistry offers the student a comprehensive 24-month course of study in clinical and didactic pediatric dentistry. The program is designed to meet the educational requirements for limitation of practice to the specialty of pediatric dentistry and examination by the American Board of Pediatric Dentistry. The program emphasizes a diversified educational experience. The program places emphasis on all phases of pediatric dentistry including trauma, preventive dentistry, restorative, endodontics, periodontics, oral surgery, orthodontics and hospital dentistry. The program enables the student to provide comprehensive oral health care for the well child, the medically compromised and children with special needs. There is extensive use of various treatment modalities for pain control and behavioral management, such as sedation, analgesia and general anesthesia. Research experience is gained through completion of an individual research project and master's thesis.

Seminars are held in pediatric dentistry, orthodontic diagnosis and treatment, treatment planning, growth and development, cephalometric analysis, pediatric dentistry literature review, and behavior guidance. Formal courses in biostatistics, principles of pediatrics, pediatric advanced life support, head and neck anatomy, neurodevelopmental disabilities, leadership seminars, basic sciences, and clinical core courses are required. The students participate in undergraduate clinical teaching and supervision.

One-month rotations occur in general anesthesia, and two-week rotations occur in the pediatric emergency room and pediatric medicine. During the year, rotations in cleft palate, craniofacial anomalies and hemophilia occur. Optional elective rotations are available in treating institutionalized handicapped patients (in Lynchburg). Elective didactic courses also are available.

Students completing the program earn a specialty certificate in pediatric dentistry and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

## Periodontics

### Thomas C. Waldrop

Professor and Program Director

The advanced education program in periodontics consists of a 36-month clinical and didactic curriculum leading to a certificate in periodontics. Students are responsible for all materials and make up of lost clinical time. Courses in the basic and clinical sciences, medicine, head and neck anatomy, statistics, and advanced cardiac life support are required. Students are responsible for attending and preparing for lectures, current and periodontal literature, medical-oral medicine, treatment planning, case presentation, and surgical seminars. No grade less than 80 percent or passing is acceptable from any periodontal or basic science course work. Less than passing grades may require retesting or retaking of a course. Students are expected to be able to utilize a computer to prepare lectures and to access Internet resources.

Students are responsible for documentation of clinical and course work data. Specified digital intra-oral camera and documentation of all clinical cases and department archiving is required. Students are responsible to the service for rotations in general medicine, dental anesthesiology and oral pathology. Proficiency and certification in intravenous conscious sedation is required. Students are responsible for clinical and classroom teaching to undergraduate and specialty students. Research on a topic that is reviewed and approved by a faculty committee is required. Upon completion of the research, the student is required to prepare a thesis, defense and manuscript for publication. Certificates are not awarded until completion of the Master of Science in Dentistry requirements. Students are responsible for the purchase of program-required equipment, instruments, books and all associated fees. All students are required to become student members of the American Academy of Periodontology.

## Combined Master of Science (M.S.)/Doctor of Philosophy (Ph.D.) and Doctor of Dental Surgery (D.D.S.)

In cooperation with the School of Dentistry, students in dentistry with an interest in academic and research careers are afforded the opportunity to undergo advanced degree training while in dental school or residency. Admission of students enrolled in the School of Dentistry to combined degree programs is processed through the Office of Graduate Education of the School of Medicine by established procedures. The Dental Aptitude Test may be accepted in lieu of the GRE as an admission requirement. No application fee is required of students already regularly enrolled as degree-seeking graduate students at the university.

The requirements for a combined professional school/graduate school degree in basic health sciences are equivalent to those required of students seeking a graduate degree alone and are determined by the individual departments.

## Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics

### Program accreditation

Commission of Dental Accreditation of the American Dental Association

### Graduate program director

**Program website:** [endodontics.vcu.edu/postgrad](http://endodontics.vcu.edu/postgrad)

Refer to the [program search function of the online VCU Bulletins](#) for a complete listing of all programs, concentrations and related curricular options.

Dentistry, Doctor of Dental Surgery (D.D.S.)

Dentistry, Doctor of Dental Surgery (D.D.S.)/Master of Science (M.S.) [combined]

Dentistry, Doctor of Dental Surgery (D.D.S.)/Doctor of Philosophy (Ph.D.) [combined]

Dentistry, Doctor of Dental Surgery (D.D.S.), advanced dental education

Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics

Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry

Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Aug 15	National Dental Boards, parts 1 and 2
Special requirements: Applicants from countries where English is not the primary and official language must complete the TOEFL with a minimum score of 100.			

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Graduation from an accredited university or its equivalent, with a Doctor of Dental Surgery or Doctor of Medicine in Dentistry or the international equivalent
2. For international students, an external credential evaluation of all international transcripts to complete the application (WES, ECE, and AACRAO are some of the recommended NACES-approved providers.)
3. One "dean's letter" from the academic institution from which the individual received the dental degree that gives class rank, GPA and overall academic recommendation
4. Two letters of recommendation from individuals who are in a position to judge the applicant's ability to engage in graduate study and pursue advanced dental training
5. A written letter of professional intent or biographical statement that reflects the candidate's desire to pursue the specialty and the intent upon receipt of the degree and certificate
6. A resume or curriculum vitae
7. An administrative application fee made payable to the Department of Endodontics, School of Dentistry (See website for details. This fee is in addition to the application fee that has to be paid with the submission of the graduate application. One year of an AEGD, GPR or the private practice equivalent is preferred but not required.)

Admission to the advanced dental specialty program in endodontics is through American Dental Education Association Postdoctoral Application Support Service. PASS historically opens to receive applications mid-May of the year prior to the year for which the candidate wishes to enroll and is open until Aug. 15. Please refer to the VCU School of Dentistry website, Department of Endodontics postgraduate information or ADEA PASS for specific yearly dates of the application period.

Candidates are required to interview in person. Invitations to interview followed by an invitation to accept a position in the residency are extended by the program director in the fall at the close of the application period. For example, the candidate will submit an application through ADEA PASS during the application period (May through August). An invitation will be extended to interview with the advanced dental specialty program in endodontics admission committee in August or September. The candidate will be informed of selection or nonselection by Nov. 15. The resident will start the clinical program the following June and the academic program the following September.

Admission to the Master of Science in Dentistry degree program is made after the candidate has accepted a residency position in the advanced dental specialty program in endodontics.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The advanced dental specialty education program in endodontics offers the resident a comprehensive 24-month course of study in clinical and didactic endodontics. The program is designed to educate qualified individuals to pursue careers as practicing clinical dental specialists in endodontics. The program meets the educational requirements for limitation of practice to the specialty of endodontics and prepares the student for examination by the American Board of Endodontics.

Students completing the program earn a specialty Certificate in Endodontics and a Master of Science in Dentistry degree. The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

## Student learning outcomes

Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based endodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
  - a. Diagnosis, treatment planning and prognosis of pulpal and periradicular disease
  - b. Provision of nonsurgical endodontics, retreatment and surgical endodontics
  - c. Outcome assessment
  - d. Diagnostic imaging technologies
  - e. Management of medically compromised patients
  - f. Emergency management of endodontic conditions
  - g. Management of orofacial pain and dental anxiety
  - h. Use of magnification technologies
  - i. Use of emerging techniques of endodontic treatment
  - j. Management of traumatic dental injuries

11. Be eligible to sit for the Diplomate Boards of the American Board of Endodontists

## Degree requirements

All course work must be completed within the 24-month timeframe for the program. Any extension of the 24-months is at the discretion of the program director. Extensions are approved only in extenuating circumstances.

In addition to general [VCU Graduate School graduation requirements](#), a cumulative GPA of 3.0 must be maintained. Residents must receive a minimum grade of B for all required courses. A student with a grade of C in a required course may be required to repeat the course. A second grade of C in a required course may result in dismissal from the program. At the discretion of the program director, a resident retaking a required course may still be eligible to take the comprehensive written and oral examinations and to start the thesis research process prior to successful completion of the repeat of the course.

In the last semester of the second year the resident will take a written and an oral comprehensive examination designed to evaluate the resident's ability to integrate the didactic and clinical course material, demonstrate critical-thinking skills and demonstrate command of evidence-based endodontics. Both the written and oral examinations must be successfully completed to receive the specialty Certificate in Endodontics.

The Certificate of Endodontics, conferred by the School of Dentistry, is only conferred upon completion and awarding of the Master of Science in Dentistry.

The residents must formulate, complete and defend a research project. The resident will prepare a manuscript in a thesis format or in the publishable format of a refereed journal. The project must be completed, defended and presented in a research forum in order for the resident to qualify for receipt of the Master of Science in Dentistry.

## Curriculum requirements

Courses	Credit hours
DENS 550 Update in Practice Administration	1
DENS 580 Biostatistics and Research Design in Dentistry (2 credits taken twice)	4
DENS 660 Interdisciplinary Care Conference (.5 credits taken four times)*	2
DENS 699 Thesis Guidance (2 credits taken four times)	8
DENS 700 Basic Sciences and Graduate Dentistry	3
ENDO 522 Introduction: Specialty of Endodontics	2.5
ENDO 530 Advanced Oral Pathology (1 credit taken twice)	2
ENDO 532 Management of Medical Emergencies in the Dental Office (1 credit taken twice)	2
ENDO 560 Endodontic Therapy Lectures (2 credits taken three times)	6
ENDO 650 Endodontic Topic Literature Review (2 credits taken four times)	8
ENDO 652 Endodontic Clinical Seminars (2 credits taken four times)	8
ENDO 654 Endodontic Management of the Medically Compromised Patient (1 credit taken twice)	2
ENDO 656 Endodontic Current Literature Review (1 credit taken four times)	4
ENDO 680 Clinical Endodontics (5 credits taken four times)	20
<b>Total graduate credit hours required (minimum)</b>	<b>72.5</b>

### Plan of study

The following illustrates how the course requirements are met during the 24 months of the program. No additional class work or course work is required other than the required courses listed below.

#### Fall semester, year one

DENS 580 Biostatistics and Research Design in Dentistry	2
DENS 660 Interdisciplinary Care Conference*	0.5
DENS 699 Thesis Guidance	2

ENDO 522 Introduction: Specialty of Endodontics	2.5
ENDO 532 Management of Medical Emergencies in the Dental Office	1
ENDO 560 Endodontic Therapy Lectures	2
ENDO 650 Endodontic Topic Literature Review	2
ENDO 652 Endodontic Clinical Seminars	2
ENDO 656 Endodontic Current Literature Review	1
ENDO 680 Clinical Endodontics	5

**Semester total 20**

#### Spring semester, year one

DENS 580 Biostatistics and Research Design in Dentistry	2
DENS 660 Interdisciplinary Care Conference*	0.5
DENS 699 Thesis Guidance	2
DENS 700 Basic Sciences and Graduate Dentistry	3
ENDO 530 Advanced Oral Pathology	1
ENDO 560 Endodontic Therapy Lectures	2
ENDO 650 Endodontic Topic Literature Review	2
ENDO 652 Endodontic Clinical Seminars	2
ENDO 654 Endodontic Management of the Medically Compromised Patient	1
ENDO 656 Endodontic Current Literature Review	1
ENDO 680 Clinical Endodontics	5

**Semester total 21.5**

#### Fall semester, year two

DENS 550 Update in Practice Administration	1
DENS 660 Interdisciplinary Care Conference*	0.5
DENS 699 Thesis Guidance	2
ENDO 532 Management of Medical Emergencies in the Dental Office	1
ENDO 560 Endodontic Therapy Lectures	2
ENDO 650 Endodontic Topic Literature Review	2
ENDO 652 Endodontic Clinical Seminars	2
ENDO 656 Endodontic Current Literature Review	1
ENDO 680 Clinical Endodontics	5

**Semester total 16.5**

#### Spring semester, year two

DENS 660 Interdisciplinary Care Conference*	0.5
DENS 699 Thesis Guidance	2
ENDO 530 Advanced Oral Pathology	1
ENDO 650 Endodontic Topic Literature Review	2
ENDO 652 Endodontic Clinical Seminars	2
ENDO 654 Endodontic Management of the Medically Compromised Patient	1
ENDO 656 Endodontic Current Literature Review	1
ENDO 680 Clinical Endodontics	5

**Semester total 14.5**

**Total graduate credit hours required (minimum) 72.5**

\* Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two one-credit classes.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

For a current copy of the program handbook, contact the VCU School of Dentistry's Department of Endodontics.

## Admission requirements

Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Sep 2	NBDE, GRE, TOEFL or IELTS if international

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Agreement to participate in the Postdoctoral Dental Matching Program
2. Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
3. Graduation or anticipated graduation from dental school
4. Eligibility to obtain a Virginia temporary resident's license from the Virginia Board of Dentistry
5. Completion of National Boards Part I and anticipated completion of Part II
6. Completion of GRE
7. Completion of TOEFL or IELTS (for students whose native language is not English)
8. Application to the orthodontic graduate program through the ADEA PASS program. The PASS application should include the following items:
  - a. Online application form
  - b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in orthodontics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.
  - c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.
  - d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you have attended before dental school.
  - e. Dental school transcripts
  - f. Institution Evaluation Form (completed by the dean of your dental school)
  - g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
  - h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director's letter can count as one). A letter from the chair of orthodontics is not required, but may be included if the chair has personal knowledge of your skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**
9. The following supplementary items are to be submitted directly to the VCU Department of Orthodontics:
  - a. Application cover page
  - b. Application fee of \$50 (U.S. dollars drawn on a U.S. bank) made payable to VCU (Application fee is nonrefundable.)
  - c. Official transcripts from all colleges or universities you have attended after dental school, if any (If you have attended a program without a transcript, such as a residency, we will need a letter from your program director documenting the experience.)
  - d. Additional letters of recommendation may be submitted if you feel they would be beneficial to your application (optional).
  - e. National Board scores: Have an original score report sent directly to the Department of Orthodontics from the National Board office in addition to enclosing a copy in your supplementary materials package/envelope. If you have taken other exams (or if you wish to add to your file), you may send any item of this type for our consideration. The National

Board scores, Part I, are required (even if you are a graduate of a foreign school) no exceptions.

- f. GRE scores: Have an original score report sent directly to the Department of Orthodontics from the Educational Testing Service office in addition to enclosing a copy in your supplementary materials package/envelope. The GRE scores are required (even if you are a graduate of a foreign school) no exceptions.
- g. TOEFL or IELTS scores are required for students whose native language is not English. These scores are not required if you went to dental school or graduate school in an English-speaking environment (U.S.A., Canada, Australia or Great Britain, etc.). Foreign dental school graduates: Graduation from our orthodontic program qualifies you to apply for a dental license in the commonwealth of Virginia; however, other regulations apply. For example, after graduation from our program, you will be required to take and pass a regional testing agency dental examination.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Department of Orthodontics offers a 24-month advanced education Master of Science in Dentistry program. The program teaches the latest in clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. Our goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically.

The program's clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of our program with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is required. All senior residents present their research at the Virginia Association of Orthodontists' meeting. The program makes students educationally qualified to take the written portion of the [American Board of Orthodontics](#) examination in the senior year. Residents are required to pass the written portion of the examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists' meeting.

Students completing the program earn a specialty Certificate in Orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

## Student learning outcomes

Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based orthodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
  - a. Diagnosis, treatment planning, treatment, retention and prognosis of dental malocclusions and
  - b. dento-facial disharmony
  - c. Outcome assessment
  - d. Diagnostic imaging technologies
  - e. Management of patients with craniofacial deformities
  - f. Management of combined orthodontic and surgical cases
  - g. Use of various fixed and removable appliances, aligner technology
  - h. Use of temporary anchorage devices and soft tissue laser
  - i. Use of digital technology for records taking and treatments with aligners
10. Be eligible to sit for the Diplomate Boards of the American Board of Orthodontists

## Degree requirements

1. The 24-month certificate program in orthodontics begins July 1 with two weeks of classes to familiarize students with concepts of growth and development, diagnosis and treatment planning, and basic biomechanical principles. First-year residents see new patients in the clinic in mid-July. In August, first-year residents begin a full clinic schedule that includes a morning and afternoon clinic session on most days.
2. Didactic course work in the department consists primarily of small-group seminar sessions for an average of two hours each day.
3. Clinical work simulates a private-practice environment. Each team consists of one junior and one senior orthodontic resident and a dental assistant whose time is dedicated to that team. The orthodontic clinic has its own business manager, practice manager and receptionist. Patient records are computerized, and billing, scheduling and record storage are accomplished using a commercial orthodontic office management system. The objective is to maximize clinical efficiency so residents fully develop the thought processes necessary to master orthodontic principles and treatment techniques. Graduates are prepared to enter into a successful and busy orthodontic practice.

## Curriculum requirements

Courses	Credit hours
DENS 550 Update in Practice Administration	1
DENS 580 Biostatistics and Research Design in Dentistry (2 credits taken twice)	4
DENS 630 Orthodontic-Periodontic-AEGD Conference (.5 credits taken four times)*	2
DENS 660 Interdisciplinary Care Conference (.5 credits taken four times)*	2
DENS 699.003 Thesis Guidance (2 credits taken four times)	8

**Semester total** **23**

**Total graduate credit hours required (minimum)** **101**

\* Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two one-credit classes.

### Degree candidacy requirements

## Admission requirements

Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Sep 15	National Dental Boards, Part 1 and 2 GRE
Special requirements:			
Applicants from countries where English is not the primary and official language must complete the TOEFL.			
Upon acceptance in the specialty certificate program in pediatric dentistry, applicants must apply to the Graduate School for the M.S.D.			

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. from an American Dental Association-accredited dental school
2. Successful completion of Part I of the National Dental Board Exam at the time of application and completion of Part II by the time of matriculation
3. Minimum grade point average of 3.0 (4.0 scale) or equivalent
4. Ranking in the top 50 percent of the class of the dental school attended
5. Personal interview
6. An externship in pediatric dentistry of at least one week in duration while attending dental school (highly encouraged)
7. Participation status with American Dental Education Association Postdoctoral Application Support Service and the Postdoctoral Dental Matching Program
8. Agreement to participate in the Postdoctoral Dental Matching Program
9. Agreement to participate in the ADEA PASS
10. Graduation or anticipated graduation from a CODA-accredited U.S. or Canadian dental school

11. Eligibility to obtain a Virginia Temporary Resident's License from the Virginia Board of Dentistry
12. Completion of GRE
13. Completion of TOEFL or IELTS for students whose native language is not English
14. Application to the pediatric graduate program is accepted through the ADEA PASS program. The PASS application should include the following items:
  - a. Online application form
  - b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in pediatrics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.
  - c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.
  - d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you attended before dental school.
  - e. Dental school transcripts
  - f. Institution Evaluation Form (completed by the dean of your dental school)
  - g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
  - h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director's letter can count as one). A letter from the chair of pediatrics is not required, but may be included if the chair has personal knowledge of your skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**

## Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU [international admissions](#) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items 1 through 7 above
3. [Test of English as a Foreign Language](#) (minimum score of 600 on paper-based test and 100 on Internet-based test)
4. [International English Language Testing System](#) (score of 6.5 or greater acceptable; test must be taken within two years of application date)

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goals and objectives

The didactic requirements of the Master of Science in Dentistry are combined with the goals of the M.S.D. program to provide the student with a strong clinical background that is supported by a strong background in research methodology.

### Program goals

1. To provide an academic environment in inquiry in which expertise and knowledge in basic sciences and clinical pediatric dentistry can be achieved
2. To provide a sound background in medicine as it applies to the pediatric/adolescent patient and to patients with special health care needs
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply literature associated with the field of pediatric dentistry
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills in the clinic and in the operating room
6. To provide didactic instruction and clinical training in the area of nonpharmacologic and pharmacologic behavior management
7. To provide instruction and training in growth and development to include clinical interceptive orthodontic care
8. To provide methods of pain and anxiety control, including nitrous oxide and oral conscious sedation
9. To provide an environment for the interpretation and implementation of research
10. Enable successful completion of the American Board of Pediatric Dentistry exam
11. To develop sound lifelong didactic and clinical learning skills
12. To provide specialists in pediatric dentistry for community health care, professional service and dental education

### Program objectives

1. To be exposed to the basic sciences and be able to apply concepts to clinical pediatric dentistry
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the pediatric/adolescent patient and patients with special health care needs
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities to include treatment of patients under general anesthesia
5. To become competent in diagnosis and treatment planning
6. To obtain competency and certification in moderate conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the ABPD examination
9. To develop communication and presentation skills and lifelong learners

## Student learning outcomes

Graduates of this program will be competent in:

### Knowledge – concepts, facts and information

1. Knowledge and skills in the areas of pediatric medicine and oral medicine, as well as the delivery of dental care and oral surgery for compromised children and adolescents
2. In-depth knowledge and skills in the use of pharmacologic and nonpharmacologic behavior management techniques
3. Knowledge of hospital protocol, policies, rules, regulations and the ability to treat pediatric dental patients in the hospital environment

4. Ability to evaluate the dental literature and its research findings to the benefit of patients and to engage in scholarly activity which results in completion of a master's degree thesis suitable for publication
5. Knowledge of preventive and corrective dental procedures relating to general and oral health and to growth and development of the stomatognathic system
6. Knowledge and skill in oral and maxillofacial radiology specific to the needs of the child and adolescent
7. Preparation for managing a contemporary pediatric dental practice relative to practice administration, efficient auxiliary utilization and marketing
8. Understanding of the biomedical sciences related to the practice of contemporary pediatric dentistry: biostatistics/epidemiology, pharmacology, microbiology, embryology, genetics, anatomy and oral and medical pathology
9. In-depth knowledge of the physical, psychological and social development of children
10. In-depth knowledge of oral and perioral lesions and anomalies in the pediatric dental patient
11. In-depth knowledge of the management of dental and medical emergencies in the dental setting
12. Understanding of normal and abnormal language development
13. Understanding of jurisprudence, risk management and biomedical ethics
14. Understanding office and practice management including the use of contemporary technologies

### Clinical competency

1. Ability to appropriately manage and guide the behavior of the child patient to accept needed treatment and to provide advice or guidance to the parent to enhance the child's acceptance
2. Expertise in managing and rendering optimal dental care for the medically, emotionally or physically challenged pediatric dental patient
3. Ability to perform evaluations of the physical status of children and adolescents
4. Ability to transform didactic/learned information into appropriate clinical situations
5. Skill in the use of pharmacologic and nonpharmacologic methods for the comprehensive control of pain and anxiety
6. Ability to recognize, refer and treat children who have sustained abuse and neglect
7. Expertise in dental surgical procedures for the restoration of the dentition
8. Skill/dexterity in performing procedures of periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region, including in-depth knowledge of biopsy and adjunctive diagnostic tests
9. Appropriate management of orofacial injuries

### Diagnostic skills

1. Ability to recognize the early signs of child abuse and neglect
2. Ability to diagnose dental trauma
3. Skill in the diagnosis, prevention and treatment planning of pediatric disease in the primary and permanent dentition and periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region
4. Application and understanding of patient monitoring

### Communication skills

1. Competence in the skills required to instruct and motivate children and their caretakers in methods of achieving and maintaining optimum oral health
2. Ability to prepare patients and caretakers for procedures
3. Ability to interact meaningfully with dental and nondental health care providers
4. Ability to work cooperatively with consultants and clinicians of other specialties and health-related fields

### Organizational skills and documentation

1. Coordination of tasks such that diagnosis, case analysis, treatment planning and clinical management of oral-facial health problems of the pediatric dental patient occur in a logical, efficient manner
2. Ability to present an organized treatment plan to the patient, parent, attending and front desk
3. Ability to manage time and tasks and to work effectively with people

**Research**

1. Coordination and implementation of a research project
2. Successful completion of a research project, thesis preparation and thesis defense

**Degree requirements**

In addition to general [VCU Graduate School graduation requirements](#), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained then the examination must be retaken. For research the student must have a thesis defense and present a poster by mid-April of their second year. Extensions may be approved but at the students own expense.

\* Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two one-credit classes.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the

student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics

#### Program accreditation

Commission on Dental Accreditation of the American Dental Association

#### Graduate program director

Thomas C. Waldrop, D.D.S., M.S.  
Professor and director, graduate periodontics  
[tcwaldro@vcu.edu](mailto:tcwaldro@vcu.edu)  
(804) 828-6121

#### Additional contact

Faye T. Miles  
Administrative assistant  
[ftmiles@vcu.edu](mailto:ftmiles@vcu.edu)  
(804) 828-4867  
Fax: (804) 828-0657

**Program website:** [periodontics.vcu.edu/gradprogram](http://periodontics.vcu.edu/gradprogram)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Dentistry, Doctor of Dental Surgery (D.D.S.)  
Dentistry, Doctor of Dental Surgery (D.D.S.)/Master of Science (M.S.)  
[combined]  
Dentistry, Doctor of Dental Surgery (D.D.S.)/Doctor of Philosophy (Ph.D.)  
[combined]  
Dentistry, Doctor of Dental Surgery (D.D.S.), advanced dental education  
Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics  
Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics  
Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Jul 1, a year previous to entry year	National Dental Boards, Part 1 and 2
<b>Special requirements:</b> Applicants from countries where English is not the primary and official language must complete the TOEFL with a score of 100 or higher.  International applicants must include an external credential evaluation of all international transcripts to complete the application. WES, ECE and AACRAO are some of the recommended NACES-approved providers.  Upon acceptance in the specialty certificate program in periodontics, applicants must apply to the Graduate School for the M.S.D.			

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. degree from U.S. or Canadian dental school
2. Part I of the National Dental Board at the time of application and Part II by time of matriculation (official report or certified copy)
3. Transcripts in a sealed envelope from each college/university/dental program attended
4. GPA/class ranking forwarded from the dean's office of the dental school attended
5. Three letters of recommendation addressed to the director of graduate periodontics
6. Curriculum vitae and personal statement
7. Interview upon request from program director

#### Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU [international admissions](#) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items 3 through 7 above
3. An external credential evaluation for international applicants of all international transcripts to complete the application (WES, ECE and AACRAO are some of the recommended NACES-approved providers.)
4. TOEFL with a minimum score of 100 for applicants from countries where English is not the primary and official language

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goals and objectives

The didactic requirements of the M.S.D. are combined with the goals of the M.S.D. program to provide the student with a strong clinical background which is supported by a strong background in research methodology.

### Program goals

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics can be achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply periodontal and associated literature
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research
9. Enable successful completion of the American Board of Periodontology exam
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education

### Program objectives

1. To be exposed to the basic sciences and be able to apply concepts to clinical periodontics
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the periodontal patient
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities
5. To become competent in the treatment planning, site preparation, surgical placement and maintenance of dental implants
6. To obtain competency and certification in enteral and parental conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the American Board of Periodontology examination
9. To develop communication and presentation skills and lifelong learners

## Student learning outcomes

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics are achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology with a 100 percent completion of oral pathology rotation
4. To be able to interpret, critique and apply periodontal and associated literature with a 100 percent completion of periodontal courses measured
5. To develop sound diagnostic clinic, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation

8. To provide an environment for the interpretation and implementation of research with a 100 percent successful completion of biostatistics and research design in dentistry course
9. Enable successful completion of the American Board of Periodontology written and oral examinations
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education with a 100 percent graduate participation in specialty clinical practice

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained, then the examination must be retaken. For research the student must have a thesis defense, present a poster and prepare a manuscript for submission by May 1 of the third year. Extensions may be approved, but students are responsible for the expense.

## Curriculum requirements

## **2014-15 Graduate and Professional Programs Bulletin**

---

**School of Education**

The primary objective of the Virginia Commonwealth University School of Education is to prepare students for careers in education, government, health-related professions, recreation and research. All programs combine comprehensive studies in the liberal arts and sciences with professional preparation and concentration in specialized fields of study. Practical applications and field experiences are an integral part of each academic program. The School of Education is committed to preparing high-quality professionals for service in urban, suburban and rural areas.

## Administration

1015 West Main Street  
P.O. Box 842020  
Richmond, Virginia 23284-2020  
(804) 828-3382  
Fax: (804) 828-1323

**Christine S. Walther-Thomas**  
Professor and Dean

**Henry T. Clark III**  
Professor and Senior Associate Dean for Academic Affairs

**Diane J. Simon**  
Associate Professor and Associate Dean for Student Affairs

## Accreditation

### Education (all degrees)

National Council for Accreditation of Teacher Education (initial licensure and advanced degrees for school personnel), the Virginia Department of Education and the Southern Association of Colleges and Schools.

### Counselor education

Accredited by the Council on Accreditation of Counseling and Related Educational Programs

This accreditation applies to both the K-12 school counseling track and the college student development and counseling track.

The school holds membership in the American and Virginia Association of Colleges of Teacher Education and in the Holmes Partnership.

## Values statement

The VCU School of Education is dedicated to the preparation of professional educators and clinicians, the ideals of academic scholarship, and the worthiness of service. Through our work in these areas, we recognize our responsibilities to students, university colleagues, the community at large, and professional organizations. While all of us share common values, the statements below intentionally allow for a variety of interpretations that may be influenced by our assignments, our experiences, and our philosophical principles within programs and across the School of Education.

The school demonstrates its belief in the value of high quality programs by:

- Attracting high quality students.
- Being responsive to the external standards of accrediting and professional organizations.
- Providing meaningful clinical placements.
- Continually evaluating, assessing and improving programs and services.

The school demonstrates its belief in the value of high quality teaching by:

- Creating an environment that supports student success.
- Demonstrating a variety of effective teaching strategies, including technology integration, universal design for learning and student-centered instruction.
- Fostering curriculum development that ensures familiarity with best practice across all disciplines.

The school demonstrates its belief in the value of diversity by:

- Preparing students to work in culturally and linguistically diverse settings.
- Accommodating students with special learning needs.

- Promoting a diverse student and faculty community.
- Supporting intellectual curiosity.
- Modeling and promoting social justice.

The school demonstrates its belief in the value of high quality scholarship and, in particular, the value of research culture by:

- Conducting relevant, high quality research that is responsive to the metropolitan community and contributes to the disciplines.
- Encouraging collaborative research with colleagues, practitioners and students.
- Supporting the creation, interpretation and dissemination of knowledge.
- Integrating current research into teaching.

The school demonstrates its belief in the value of collaboration and partnerships by:

- Serving as a resource for the development of policy, curriculum, instructional practice and professional standards.
- Providing leadership and professional outreach to organizations, the university and the community at large.
- Maintaining partnerships and shared responsibility for professional preparation.

The school demonstrates its belief in the value of critical reflection by:

- Observing ethical practice and professional honesty.
- Encouraging students to exhibit dispositions consistent with accepted professional practice.
- Fostering a trusting, safe community of scholars.
- Engaging in ongoing professional development.
- Examining professional practices.

## Educator as critically reflective practitioner

The guiding theme of educator preparation programs in the School of Education is educator as critically reflective practitioner. Courses and experiences provide opportunities for individuals to consider means of building on appropriate knowledge to make instructional, assessment, counseling and leadership decisions.

## Organization

The chief administrative office for the School of Education is the Office of the Dean, Room 2090 Oliver Hall. Two associate deans assist in the administrative functions of the school. The associate dean for academic affairs is responsible for the school's Office of Assessment and Technology Services, is responsible for all academic programs offered by the school, assists each department in the administration of the various degree programs and handles administrative areas related to admission, matriculation, graduation and special actions and appeals for graduate students. The associate dean for student affairs is responsible for the school's student services offices and handles the administrative areas related to admissions, matriculation, student appeals and graduation applications for undergraduate students.

The school is organized for the management of instruction and degree programs into six departments: Counselor Education, Educational Leadership, Foundations of Education, Health and Human Performance, Special Education and Disability Policy, and Teaching and Learning. Four of the departments offer undergraduate course work or programs that lead to an undergraduate degree and/or a Master of Teaching (M.T.) degree:

- Foundations of Education
- Health and Human Performance
- Special Education and Disability Policy
- Teaching and Learning

Two departments offer graduate degrees only:

- Counselor Education
- Educational Leadership

## Facilities

The School of Education is housed primarily in Oliver Hall, where classroom, laboratory and activity centers, and faculty and administrative offices can be found. Clinical laboratories are located at 3600 W. Broad St.

---

## Support/resource offices

The School of Education has developed various resources to provide support services to students, faculty and the academic programs. These resources are the Office of Student Services, the Office of Continuing Education and the Instructional Technology Center, which houses state-of-the-art computer laboratories.

### Student Services Center

Basic information on the degree programs in the School of Education, as well as forms needed by students as they advance through the programs, are available in the Student Services Center, located on the third floor of Oliver Hall. Students enrolling in the B.S. program can arrange an appointment with undergraduate advising on the first floor of Oliver Hall.

The Office of Student Services in Oliver Hall receives and processes various School of Education application forms and supplies information on the Praxis I examination, Praxis II specialty area tests, Graduate Record Examination and the Miller Analogies Test. For information on student performance on the Praxis examinations, refer to the School of Education Web site at [www.soe.vcu.edu/ssc/faq.htm](http://www.soe.vcu.edu/ssc/faq.htm).

This office coordinates clinical placements for students in practica, student teaching, internships and externships. Student teachers and graduate intern teachers are placed in school divisions and other educational facilities in the greater Richmond metropolitan area. Students in non-teacher education programs are placed in practica and clinical experiences through the coordinator of undergraduate advising. Placements are secured in schools, agencies, clinics and hospitals in the greater Richmond metropolitan area. Every effort is made to place students in clinical experiences relevant to their intended career path.

Applications and information on scholarships available to School of Education students can be obtained at the Student Services Center. Information on financial aid administered by the university is found in the appropriate level of "Expenses and Financial Aid" sections of this bulletin.

Licensure and endorsement information, materials and applications for Virginia education personnel are available in the Student Services Center. Licensure and endorsement are based, in part, on the successful completion of an approved program that complies with national standards.

For more information about this center, visit [www.soe.vcu.edu/ssc](http://www.soe.vcu.edu/ssc).

### Instructional Technology Center

The Instructional Technology Center, a multimedia facility, is used by faculty and students in the School of Education. The center houses microcomputers with sophisticated graphics capabilities, educational software and many similar resources for the development of instructional materials. It also provides access to the School of Education's Local Area Network, VCU Libraries, the Internet and the Web.

### Computer laboratories

The Instructional Laboratory, housed in the Instructional Technology Center, gives students many opportunities to learn about computer-assisted instruction in the classroom setting. It also lends support to students enrolled in the computer science basic literacy course and other technology courses offered by the school. The laboratory equipment includes Macintosh and IBM-compatible multimedia computers. Laptop computers, laser printers, color laser printers and scanners also are available.

The INFUSIO Distance Learning Technology Laboratory, also housed in the Instructional Technology Center, is a new technology facility designed to provide assistance to faculty, preservice teachers and associates in the School of Education. The lab presently houses a Polycom two-way video conferencing system, interactive Smart and Softboards, and Mimeo digital meeting assistant technology for electronic note taking. There are several high-end multimedia PC stations and a Macintosh computer with a variety of the latest software programs. Computers are equipped with headphones, microphones and digital cams for use in audio and video recording. The INFUSIO Lab includes a number of assistive technologies designed to enhance the concept of universal learning.

A university computer laboratory open to all students is housed in Oliver Hall. The laboratory is equipped with 24 IBM- and Mac-compatible computers that permit students to access the Internet and MS Office software.

### Office of Graduate Studies

The Office of Graduate Studies is responsible for the administration of graduate education from admission through graduation, for master's, doctoral and certificate students. Refer to the Ph.D. in Education section of the bulletin for further information on doctoral programs.

### Center for Professional Growth

The Center for Professional Growth is the contact for conducting School of Education off-campus related degree cohort programs, courses for credit and other professional development in-service workshops. Many off-campus partnerships and grant-funded projects also are coordinated and managed. The major emphasis is serving the community of K-12 administrators, teachers and staff in Central Virginia. Additionally, distance learning using various forms of technologies is being developed and offered by this office.

### Centers and institutes

Programs, resources and scholarly and service endeavors of the school are extended by a number of academies, centers, institutes and programs directed by the faculty. These include:

- Behavioral Intervention Program
- Career Connections Techlink
- Center for School-Community Collaboration
- Center for School Improvement
- Center for Sport Leadership
- Central Virginia Leadership Academy
- Metropolitan Educational Research Consortium
- Metropolitan Educational Training Alliance
- Partnership for Persons with Disabilities
- Professional Opportunities for Developing Excellent Teachers:
  - English Second Language
- Rehabilitation Research and Training Center
- Training and Technical Assistance Center
- Virginia Adult Learning Resource Center

---

## Licensure and reciprocity

Upon completion of degree requirements in any of VCU's teacher preparation programs and with the recommendation of the School of Education, students are eligible to receive initial teacher licensure from the Virginia Department of Education. For additional information on licensure, licensure renewal or an add-on endorsement, contact the School of Education's Student Services Center.

In Virginia, initial licensure requires successful completion of state-mandated tests. Passing scores on these tests are required to progress through different portions of the licensure programs from admission to teacher preparation, admission to student teaching and recommendation for licensure. For a list of testing requirements, please refer to the School of Education website at [www.soe.vcu.edu/ssc](http://www.soe.vcu.edu/ssc).

Students should request that their Praxis I and Praxis II specialty area test scores be reported to VCU and the Virginia Department of Education.

Before a recommendation for licensure can be sent to the Teacher Licensure Division of the Virginia Department of Education, these test scores must be on file with the School of Education's Student Services Center.

### Licensure for education personnel

Licensure and endorsement are based in part on the successful completion of an approved program developed in response to nationally recognized standards. All licensure and endorsement programs offered by the School of Education are approved by the Virginia Department of Education and the National Council for the Accreditation of Teacher Education. The commonwealth of Virginia is a member of the National Association of State Directors of Teacher Education and Certification, which has a national reciprocity agreement for teacher licensure. Therefore, all licensure and endorsement programs in the School of Education have approved program status and are a part of the NASDTEC Certification Reciprocity Agreement. Information about VCU students' performance on the

state-mandated licensure tests (Praxis I Reading, Writing and Mathematics, Praxis II Specialty Area Tests, and other required assessments) is available on the School of Education Web site: [www.soe.vcu.edu/ssc](http://www.soe.vcu.edu/ssc).

## Graduate programs leading to initial teacher licensure

Individuals often decide to pursue a teaching career after they have completed a baccalaureate degree. VCU serves qualified individuals through approved programs leading to a Master of Teaching, Master of Education (special education) or a Post-baccalaureate Certificate in Teaching. Upon completion of a degree program, graduates are eligible for both Virginia licensure and/or endorsement in the specific degree area.

Students seeking initial licensure in Virginia must have earned a liberal arts degree (or its equivalent) and pursue professional studies focusing on a specific area of preparation or licensure. Those without a liberal arts degree who enter a program should expect to take some additional course work prior to the awarding of a degree.

Those planning to teach at the secondary level must possess a major or its equivalent in the discipline in which they wish to teach and for which VCU offers the approved program teaching specialty.

Individuals who wish to obtain licensure in art education, music education or theater education should consult the School of the Arts section of this bulletin.

The Master of Teaching program integrates undergraduate course work for a bachelor's degree in a liberal arts or science major with course work and graduate study leading to a Master of Teaching in a program area.

## Approved programs and certification reciprocity

All of VCU's initial teacher preparation programs are approved by the Virginia Department of Education and accredited by the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU's School of Education also holds membership in the American and Virginia Associations of Colleges for Teacher Education and the Holmes Partnership.

Based on the National Association of State Directors of Teacher Education and Certification agreement, VCU graduates will be eligible for teacher licensure reciprocity with other states. Students interested in licensure reciprocity should contact the School of Education's Office of Student Services.

## Programs

### Master of Teaching (extended programs)

- Biology education
- Chemistry education
- Early and elementary education
- Earth science education
- English education
- History/social studies education
- Mathematics education
- Physics education
- Teaching health and physical education

### Master of Education

- Adult learning
  - Adult literacy
  - Human resource development
  - Teaching and learning with technology
- Counselor education
  - College student development and counseling
  - School counseling
- Curriculum and instruction
  - Instructional technology
  - Teaching and learning
- Educational leadership
  - Administration and supervision
  - Leadership studies
- Reading
  - K-12 reading specialist
  - Reading with TESOL/adult
  - Reading with TESOL/K-12
  - Without concentration
- Special education

- Early childhood
- General education
- Severe disabilities

## Extended Teacher Preparation Program

The School of Education, in cooperation with the College of Humanities and Sciences, offers extended teacher preparation programs in early childhood and elementary education (prekindergarten through grade six), health and physical education (grades six through 12) and secondary education (kindergarten through grade 12). The successful completion of these programs results in the simultaneous awarding of both a bachelor's and a master's degree.

### General degree requirements

- Undergraduate major
- Change of major and transfer students
- Transcript evaluation
- Faculty advisement
- Professional development schools
- Educator as reflective practitioner
- Demographics consideration in teaching
- Standards of learning
- Technology standards
- Extended program in early and elementary or secondary education
- Extended program in health and physical education

### General degree requirements

The successful completion of these programs results in the simultaneous awarding of both a bachelor's and a master's degree. Prospective Master of Teaching students earn their bachelor's degree in a specific field in which they plan to teach. A student generally begins work on the professional studies component in the third or fourth year of academic study.

A student enrolled in any one of the three extended teacher preparation programs must complete a minimum of 153/154 credits. The student must maintain a cumulative GPA of 2.8 for admission to the teacher preparation program. Completion of at least 90 credits with a minimum GPA of 3.0 in the last 60 semester hours of study is required for that student to be admitted to the graduate studies portion of the extended program.

A Post-baccalaureate Graduate Certificate in Teaching is open primarily to those who have already earned a master's degree. The candidate must complete at least 30 additional hours beyond the bachelor's level. Admittance to this program requires a minimum GPA of 3.0 in the last 60 semester hours of study.

### Clinical experiences

All initial licensure programs require clinical experiences throughout the program. During the initial stages of a program, these experiences occur as practica in varied placements in K-12 education relevant to the student's program. Each program also requires a capstone clinical experience in the form of student teaching. For student teaching, those pursuing early and elementary education are placed in two settings, one in early elementary grades (K-2) and one in upper elementary grades (3-5). Those pursuing secondary education receive a single placement in their discipline in a middle school or high school setting.

With the guidance of a mentor, the intern assumes more independence in the field setting. Satisfactory completion of the internship and the preceding training is charted through evaluations made by the university supervisor, colleague-teacher and school administrator.

### Undergraduate major

Freshman students who plan to become early and elementary education teachers are required to enroll in the Bachelor of Interdisciplinary Studies liberal studies for early and elementary education major. Transfer students should meet with a B.I.S. adviser prior to course registration. The B.I.S. degree requirements are outlined in the College of Humanities and Sciences section of this bulletin.

Prospective secondary teachers should major in the discipline they wish to teach. The disciplines in which VCU offers licensure programs are as follows: English, history/social studies, mathematics and science (various specialties). Students should consult with their education adviser to ensure that courses taken to meet major requirements also meet state licensure requirements.

### Change of major and transfer students

Students wishing to enter the Extended Teacher Preparation Program in early and elementary education or secondary education must transfer initially to the College of Humanities and Sciences. They must declare a major in the college and a specialization in the appropriate professional studies sequence in the School of Education. Students who wish to enter the extended program in health and physical education must choose the general health and physical education concentration in the health, physical education and exercise science major within the School of Education.

For admission to teacher preparation, a minimum GPA of 2.8 is required. A minimum GPA of 3.0 in the last 60 semester hours of study is required for admission to the graduate phase of the Extended Teacher Preparation Program.

### Transcript evaluation

The College of Humanities and Sciences evaluates transcripts of students pursuing the extended program in early and elementary education or secondary education; transcripts of students pursuing the extended program in health and physical education are evaluated by the School of Education. Credits are accepted if they conform to specific program guidelines; course equivalents from accredited colleges and universities are accepted if the grade earned is C or better. From the extended program, 60 semester hours of acceptable undergraduate course work are required to be admitted to a teacher preparation program. See specific criteria in the "Admission to the Extended Teacher Preparation Programs" section of this bulletin.

Credits that are accepted from two-year institutions may meet liberal arts and sciences requirements, but will not meet professional requirements for upper-division course work. The VCU Transfer Guide for Virginia Community Colleges lists, in full, credits accepted by VCU that have been earned in the state's community colleges.

After the initial student transcript evaluation, the assigned adviser reviews the accepted transfer credits with the student, determining what additional course work at VCU will be necessary. An adviser is not required to use all the accepted transfer credits in a student's program of study. Only those credits approved for transfer can be applied toward the chosen degree.

### Faculty advisement

An academic adviser is assigned to a student by the department of that student's chosen major in the College of Humanities and Sciences. A professional studies adviser is similarly assigned by the Department of Teaching and Learning or the Department of Health and Human Performance according to the student's proposed teaching endorsement. This adviser-student relationship continues throughout the course of study at VCU. Student and adviser jointly develop the student's individual program. During the planning process, the student identifies, clarifies and explores his or her personal and professional goals.

### Educator as reflective practitioner

The guiding theme of the teacher preparation program is "educator as reflective practitioner." The underlying foundation of instruction in the teacher preparation program is to challenge the prospective teacher to develop skills in critical reflection and to value thoughtful decision making. Candidates demonstrate critical reflection by: being open to and respectful of all stakeholders; taking other perspectives into account; utilizing critical thinking in framing and solving educational problems; making informed, ethical and professional decisions; and taking ethical and professional action.

### Demographics consideration in teaching

The demographics of elementary, middle and high school students are changing. There is an increase in the number of students for whom English is not the first language, of minority students, of students who do not all learn or respond in similar ways and of students who may be identified as possessing a disability.

Future teachers are encouraged to take advantage of opportunities through formal courses and other experiences to gain greater insight and ability in addressing learners from differing cultural backgrounds and considering the needs of learners with different learning styles, participation styles, and special abilities or disabilities.

### Standards of learning

Much of the prekindergarten through grade 12 curriculum is based on the commonwealth of Virginia's current Standards of Learning. Students preparing to be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. The School of Education website has a link to the SOLs.

In some instances the content and concepts associated with one or more SOLs may be incorporated in a course in the College of Humanities and Sciences or in the School of Education, but as the SOLs are for a kindergarten through grade 12 curriculum and not a college curriculum, one may need to study several of these on her or his own.

### Technology standards

The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today's schools. Individuals preparing to teach must be competent on each of the eight standards in Virginia's Technology Standards for Instructional Personnel. These standards may be reached through the School of Education website.

Students are advised to consult with the professional studies adviser regarding the program's requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through Knowledgenet. Please see the [General education requirements for undergraduate study](#) in the "College of Humanities and Sciences" section of this bulletin.

### Extended program in early and elementary or secondary education

In the extended program, a student generally begins work on the professional studies component in the third year of study. Information on specific requirements for all academic majors is available in the Department of Teaching and Learning, in the College of Humanities and Sciences' associate dean's office or through the department of the chosen major. Students may visit [www.soe.vcu.edu/departments/tl](http://www.soe.vcu.edu/departments/tl) for information about programs in the Department of Teaching and Learning. A student in the extended program must maintain a minimum cumulative GPA of 2.8 for admission to teacher preparation and clinical experience and, prior to the fifth year, a minimum GPA of 3.0 for admission to the graduate study portion of the program.

## Extended program in teaching health and physical education

Students who plan to become health and physical education teachers should enroll in the Bachelor of Science in Health, Physical Education and Exercise Science major with a concentration in general health and physical education. Transfer students should consult with a program adviser prior to course registration. The requirements for the B.S. are outlined in the program section of this Bulletin.

In the extended program students pursue an integrated curriculum leading to simultaneous awarding of a B.S. and Master of Teaching. Students begin professional studies early in the program. A student in the extended program must maintain a GPA of at least 2.8 for admission to teacher preparation (generally in the third year) and a minimum GPA of 3.0 to be admitted to the graduate portion of the program. Admission to graduate study typically occurs during the fourth year of study.

[back to top](#)

## Admission information

Any undergraduate admitted to VCU who declares a major in the College of Humanities and Sciences is eligible to declare a specialization in special education or secondary education. Students specializing in early and elementary education must declare liberal studies for early and elementary education as their major in the Bachelor of Interdisciplinary Studies program. Undergraduates admitted to VCU who wish to become teachers of health and physical education must choose the general health and physical education concentration (teacher preparation) in the B.S. in Health, Physical Education and Exercise Science program in the School of Education.

Transfer students and students currently attending VCU who wish to change their majors to this program must have a minimum GPA of 2.0; however, note the much higher GPA requirement for admission to teacher preparation and then to graduate study. All students in the program, upon completion of 60 hours of undergraduate course work and prior to completion of 90 hours, must apply for admission to teacher education. To be accepted, a student must have a minimum GPA of 2.8 and must have achieved the required Commonwealth of Virginia scores on Praxis I tests and must have achieved the established composite score for the three tests.

Students who pursue one of the extended teacher preparation programs follow a series of steps as noted in order to meet all requirements, including the 153/154 credits.

### Step 1: Admission to the university

#### Requirements

- a.) Scores from Scholastic Aptitude Test (SAT) or American College Test (ACT)
- b.) Minimum 2.0 GPA from high school or previous college

#### Procedures

- a.) Declare an undergraduate major in the College of Humanities and Sciences (for early and elementary or secondary education) or a major in health, physical education and exercise science with a general health and physical education concentration in the School of Education (for health and physical education).
- b.) Declare an education specialization in early and elementary education, secondary education or health and physical education.

### Step 2: Admission to teacher preparation

Complete before enrolling in the first practicum (upon completion of 60 credits of liberal arts and prior to completion of 90 credits).

#### Requirements

- a.) 2.8 GPA or better
- b.) Completion of six hours of English, three hours of mathematics, four hours of laboratory science and six hours of social science and/or history.
- c.) Meet Virginia scores required for the mathematics portion of Praxis I and achieve a passing score on the Virginia Communication and Literacy Assessment
- d.) Confirmation of education specialization (Undecided majors must decide.)
- e.) Enroll in or have completed TEDU 101, EDUS 300, EDUS 301 or equivalent course

#### Procedures

- a.) Complete Admission to Teacher Preparation Application Form (obtain in Office of Student Services) and submit a current transcript
- b.) Complete TEDU 101, EDUS 300, EDUS 301 or equivalent course; submit

required Praxis scores

- c.) Register in dean's office for interview upon returning Admission for Teacher Preparation Application Form; complete required interview with education program faculty

Note: Students must be admitted to Teacher Preparation Program to be eligible for practicum placement and accompanying courses. Applications for practicum are available at the Office of Student Services. (In secondary education, such applications may be distributed at the initial class meeting.)

- d.) Register for, take and submit required Praxis I scores

### Step 3: Application to graduate studies

#### Requirements

- a.) 3.0 GPA or better
- b.) Acceptable scores on the Graduate Record Examination (GRE) or Miller Analogies Test (MAT). Generally students are expected to score at least an 800 composite (Verbal and Quantitative) on the GRE or 386 on the MAT.
- c.) Personal statement addressing reasons for seeking graduate education, including career goals; experience working with age group to be taught; reasons for entering teaching; and success in organizing, planning and implementing work with other individuals
- d.) Three references: it is suggested that these be instructors or advisers in the College of Humanities and Sciences and the School of Education; use Graduate Studies Reference Forms

#### Procedures

- a.) Obtain Graduate School Admissions packet from the Office of Student Services in Room 3106, Oliver Hall
- b.) Return completed application packet, along with up-to-date transcripts, to the VCU Graduate School

Note: Students must be admitted to the Graduate School to be eligible to enroll in graduate-level courses. No more than six graduate credits taken prior to admission to graduate study may be accepted toward the degree.

#### Application deadlines for early and elementary or secondary education

- Nov. 1 for spring semester
- March 15 for summer and fall sessions

### Step 4: Internship

All programs require a graduate-level internship (TEDU 672 and TEDU 674) during the fifth year. Applications for internship can be obtained in the Office of Student Services in Room 3106, Oliver Hall. Individuals in early and elementary education are placed in a kindergarten and a grade one through six classroom in the same semester. Individuals in secondary education typically have a single placement, although perhaps with two different teachers. Individuals in health and physical education typically have two placements: one and the elementary level and another at the secondary level.

#### Requirements

- a.) 3.0 GPA or better on graduate courses
- b.) Admission to teacher preparation and to graduate study
- c.) Completed application and transcripts submitted by established deadlines
- d.) Passing scores on applicable Praxis II specialty tests accompanying application

#### Procedures

- a.) Obtain application form from the Office of Student Services.
- b.) Submit copies of transcripts and required statement to a professional studies adviser for review.
- c.) Obtain approval signature of professional studies adviser.
- d.) Submit completed application to Office of Student Services by Sept. 15 for the following spring semester; by March 1 for the following fall semester.

### Step 5: Admission to the profession

(during the final semester of enrollment)

#### Requirements

- a.) Completion of all degree requirements
- b.) Completion of application for initial teacher licensure (obtain from Office of Student Services)

#### Procedures

- a.) Complete applications for undergraduate degree in humanities and sciences or health, physical education and exercise science with academic major adviser, and graduate degree in teaching with professional studies adviser.

b.) Submit application for initial teacher licensure with signature of university supervisor or professional studies adviser to the Office of Student Services.

## Added or add-on endorsements

### Added or add-on endorsements Teaching English as a Second Language

The School of Education offers the Virginia Department of Education ESL preK-12 endorsement for pre-service and in-service teachers. The ESL endorsement program at VCU requires 18 credit hours of ESL course work and 6 credit hours of a modern foreign language. Candidates must complete the following courses:

ESL qualifying courses	Credits
ENGL/LING/ANTH 390 Introduction to Linguistics	3
ENGL/LING/TEDU 552 Teaching English as a Second Language	3
TEDU 561 Reading Foundations	3
TEDU 562 Teaching Reading in the Content Areas	3
TEDU/FRLG 575 Intercultural Communication	3
TEDU 681 Investigations and Trends in Teaching (ESL curriculum and assessment)	3
Foreign language courses (modern languages only)	6
<b>Total</b>	<b>24</b>

### Add-on endorsements in grades 6 through 12, science

Add-on endorsements in science are available in biology, chemistry, earth science and physics. Each add-on requires a first endorsement in one science and at least 18 semester hours in the add-on science that includes preparation in specified areas. The earth science added endorsement is listed below. For information about the added endorsements in biology, chemistry or physics, contact the Department of Teaching and Learning.

#### Earth science

To add an earth science endorsement to an endorsement in another science discipline, the individual must earn at least 18 semester hours in the earth sciences, including preparation in geology, oceanography, meteorology and astronomy. Courses to meet these requirements include:

GEOG/ENVS and GEOZ/ENVZ 105 Physical Geology and Laboratory  
 GEOG/ENVS and GEOZ/ENVZ 335 Environmental Geology and Laboratory  
 GEOG/ENVS 411 Oceanography  
 GEOG/ENVS 401 Meteorology and Climatology  
 PHYS 103 Astronomy  
 Elective courses to complete at least 18 hours include: GEOG 203 and 204 Physical Geography and PHYS 391 Fieldwork and Special Topics.

## School of Education courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

The School of Education offers courses in the following areas:

Use this link to see administration and supervision ([ADMS](#)) courses.

Use this link to see adult education ([ADLT](#)) courses.

Use this link to see athletic training ([ATTR](#)) courses.

Use this link to see counselor education ([CLED](#)) courses.

Use this link to see educational leadership ([EDLP](#)) courses.

Use this link to see educational studies ([EDUS](#)) courses.

Use this link to see emotional disturbance ([EMOD](#)) courses.

Use this link to see English education ([ENED](#)) courses.

Use this link to see health and movement sciences ([HEMS](#)) courses.

Follow these links to health, physical education and exercise science ([HPEX](#)) courses or the ([HPEZ](#)) laboratories.

Use this link to see interdisciplinary developmental disability studies ([IDDS](#)) courses.

Use this link to see mental retardation ([MNRT](#)) courses.

Use this link to see reading ([READ](#)) courses.

Use this link to see reading and study skills ([RDSS](#)) courses.

Use this link to see rehabilitation and movement science ([REMS](#)) courses.

Follow these links to recreation, parks and sport management ([RPSM](#)) courses or the ([RPSZ](#)) laboratories.

Use this link to see special education and disability policy ([SEDP](#)) courses.

Use this link to see special education – learning disabilities ([SELD](#)) courses.

Use this link to see sport leadership ([SPTL](#)) courses.

Use this link to see teacher education ([TEDU](#)) courses.

## Graduate information

### Admission procedures for graduate study

#### Application procedures

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at [www.graduate.vcu.edu](http://www.graduate.vcu.edu). Note that applications cannot be processed until they are complete (including test scores). Admission information specific to each program can be found in the division section of this bulletin.

#### Test scores

Either the GRE, General Aptitude portion, or the MAT is required for the Master of Teaching, the Master of Education, the Master of Science, the Post-master's Certificate for Principals and Supervisors, the Post-master's Certificate in Reading, the Post-baccalaureate Certificate in Teaching and the Post-baccalaureate Certificate in Instructional Technology. The Ph.D. program requires the GRE, General Aptitude portion.

A passing score on Praxis I, although not required for graduate admission, is required for placement in clinical experiences (practica, internships and certain externships) as well as for licensure in Virginia. Contact the Student Services Center for applications for Admission to Teacher Preparation, booklets on Praxis I and Praxis II, and information regarding offerings of the Praxis examinations by paper and pencil or by computer. Information about the tests may be obtained in the Student Services Center as well.

#### Application deadlines

The following application deadlines have been established for the Master of Education, the Master of Science, the Master of Teaching and the Post-baccalaureate Certificate in Teaching.

Mar 15 Summer session or fall semester term of entry

Nov 1 Spring semester term of entry

The Ph.D. in Education has the following application deadline:

Jan 15 Fall semester term of entry

Students who are unable to enroll for the semester for which they are accepted must request a deferment.

#### General admission requirements

The admission decision will be made on an overall analysis of the following for each degree program. See each division section for any additional information.

**Master of Teaching, Master of Education, Master of Science, Post-master's Certificate in Educational Leadership, Post-master's Certificate in Reading,**

### Post-baccalaureate Graduate Certificate in Instructional Technology and Post-baccalaureate Graduate Certificate in Teaching

- A minimum GPA of 3.0 on a 4.0 scale on the last 60 semester hours of study.
- Applicants whose GPA during the last 60 hours of course work falls just below 3.0 may be considered based on the strength of the overall application.
- Acceptable scores on the GRE or the MAT. Normally, students are expected to score at least 290 combined on the Quantitative and Verbal sections of the GRE with neither score falling below the 20th percentile, or at least 386 on the MAT.
- An interview with the applicant may be required by the faculty of the program to which the applicant is seeking admission.

#### Ph.D. in Education

Refer to the Ph.D. in Education program section of this bulletin for admission requirements.

#### Ph.D. in Rehabilitation and Movement Science

Refer to the Ph.D. in Rehabilitation and Movement Science section of this bulletin for admission requirements.

### Advising and student program planning

All students admitted to the School of Education are assigned advisers. Students are expected to work with their adviser to plan their programs of study. Each graduate program agreement, or changes thereto, must be approved by the adviser and the appropriate department chair, or the associate dean for academic programs. Courses taken without approval are taken at the student's risk. Each student is required to complete and file a program plan with the department before the completion of the sixth credit hour.

### Steps to completing M.Ed. and M.S. degrees

Step	When	Where
1. Admission	0-6 hours	Student Services Center
2. Program of studies	0-6 hours	With adviser, approved by department chair
3. Candidacy	12-18 hours	Application approved by adviser, core coordinator, department chair
4. Comprehensive examination*	30 hours	Application to department office
5. Externship or internship	Usually the last semester of course work	Application from Office of Student Services
6. Graduation	Last semester of course work; see current bulletin for deadline	Application from registrar (approved by adviser, department chair, dean's office and returned to registrar)

\* Not required in M.S. in Recreation, Parks and Sport Management, and M.Ed. in Special Education and being phased out in the M.Ed. in Curriculum and Instruction.

The chart outlines the general steps to completing the Master of Education and the Master of Science degrees. All other graduate-level students in the School of Education should refer to the appropriate section of this bulletin for information specific to these programs.

### Admission to candidacy

Admission to graduate study in the Master of Education or Master of Science programs does not constitute candidacy for a degree. Rather, students who have been admitted to graduate study are advanced to degree candidacy upon the recommendation of the adviser, core faculty and department in which the degree is sought.

Advancement to degree candidacy requires that students must have completed at least 12 but no more than 18 semester hours of graduate study with a minimum GPA of 3.0; must have demonstrated clearly the aptitude and ability to pursue graduate study, including independent study; must have exhibited a commitment to their profession; and must have demonstrated promise for a successful career in the field selected in terms of temperament and personality. Specific courses may

be required prior to application for candidacy. Admission to degree candidacy is not an automatic process. Students must file an approved application for candidacy with their departments. Only students who have been admitted to candidacy may pursue additional work toward the degree.

### Comprehensive examination

- Some students in a Master of Education or Master of Science in Health and Movement Science program must take a three-hour written comprehensive examination.
- Written examinations will be given on the first Saturday in November, the fourth Saturday in March, and the second Saturday in July. Students must notify the department in writing of the intention to take the examination at least 30 days prior to the published date. All comprehensive examinations must be taken on dates indicated except for religious or health reasons. Any exceptions must be approved in advance by the department chair.
- A minimum of three faculty members, designated by the core faculty, will evaluate each examination independently. Satisfactory performance on the comprehensive examination requires approval of two of the three evaluators.
- Any student failing the comprehensive examination must have a joint conference with at least two core faculty members, one of whom is the student's adviser, before taking the comprehensive examination again.
- During the conference, the core faculty members may recommend additional academic preparation and/or competencies that must be met by the student prior to retaking the comprehensive examination.
- The student will be notified by letter of the recommendations made by the core faculty in the conference.

The student will have only two opportunities to take the comprehensive examination. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

### Transfer credit

A maximum of six credit hours of acceptable graduate credit may be transferred into a graduate degree program. Course work taken prior to being admitted to a program in the School of Education and not applied to another degree may be applied for transfer. This includes course work taken at VCU.

Course work submitted for transfer is evaluated by the student's adviser and the department head. See the Ph.D. in Education program section of this bulletin for information regarding transfer credit for this program.

As a general rule, continuing education courses taken at institutions other than VCU will not be transferred.

Students seeking to earn credit at other institutions after acceptance to a graduate program in the School of Education must receive prior approval from their advisers and the department chair, or the director for the Ph.D. program. See the Graduate School section of this bulletin for further information regarding transfer credit.

## Center for Sport Leadership at VCU

The Center for Sport Leadership at VCU was developed with the idea of creating an innovative, practical learning environment that would prepare students for a successful career in the sport industry. This new educational paradigm teaches students the necessary skills, while giving them ownership of operational responsibility to the organization and providing access to upper-level administrators and coaches. The Center for Sport Leadership has placed students in every area of the industry, including professional, intercollegiate, Olympic, nonprofit and grassroots organizations. These successful alumni provide a useful tool in establishing a network base for connecting with future leaders in the industry.

 Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership  
 Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology  
 Education, Doctor of Philosophy (Ph.D.) with a concentration in research and evaluation  
 Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership  
 Education, Doctor of Philosophy (Ph.D.) with a concentration in urban services leadership

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Education, Doctor of Philosophy (Ph.D.) with a concentration in sport leadership			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Nov 15 (early consideration)	GRE
Feb 1 (final deadline)			

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The sport leadership concentration is designed for students to research, comprehend and interpret contemporary literature as it relates to leadership in the sport industry and to extend knowledge and understanding of leadership in that industry. Students will have the opportunity to integrate theory and practice in the specific areas of economics, finance, marketing, management, communications and sociology of sport. Upon completion of the doctoral course work and dissertation, students will be prepared for higher education positions in sport management/administration and/or sport leadership programs across the U.S.

### Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

### Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Curriculum requirements

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

Sport Leadership, Master of Education (M.Ed.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Apr 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work

Students should contact the Center for Sport Leadership at VCU at (804) 828-7821 or link directly to [sportleadership.vcu.edu](http://sportleadership.vcu.edu) for information and application materials.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the

University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The Center for Sport Leadership at VCU offers a structured graduate program combining classroom theory with exposure to relevant field experiences. Through the sport leadership program, students will be prepared to assume the responsibilities for developing professional and amateur athletes and managing sports programs in a variety of academic, public and private sectors. The interdisciplinary faculty and curriculum give students the opportunity to concentrate on areas most important to them and most relevant to the sports business. Students of the program are required to complete a comprehensive examination.

The center offers graduate courses online for those students who want to take advantage of educational opportunities via the Internet. Currently, three classes are available each semester.

## Student learning outcomes

1. Content knowledge of sport industry: Students will be able to analyze and synthesize information and develop plans to address issues in sport leadership.
2. Development of interpersonal skills and professionalism: Students will demonstrate interpersonal skills and professionalism appropriate to the fields of sport management and coaching.
3. Development of leadership skills: Students will demonstrate content knowledge of leadership skills and traits, as well as the ability to utilize these skills and traits in a professional setting.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 36 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Examination requirement: Students must pass a comprehensive examination (see below).
4. Externship requirement: Students must complete an externship in the sport field.

## Comprehensive examination:

1. Written comprehensive examinations are required for all graduate students in the VCU Center for Sport Leadership.
2. Comprehensive examinations will take place at the end of the spring semester for each cohort of full-time, on-campus students and at the completion of 30 credit hours of course work for all part-time/distance-learning students.
3. Comprehensive examinations will be evaluated in a pass/fail format.
4. Comprehensive examinations will be independently evaluated by two faculty members; in the case that the faculty members disagree, a third faculty member will be brought in for a final decision.
5. Any student failing the comprehensive examination will have one additional opportunity to pass the exam. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

### Program goal

The dual-degree M.B.A./M.Ed. in Sport Leadership program will prepare students for leadership positions by combining the business teaching of an M.B.A. program with sport industry-specific knowledge gained in the M.Ed. program. This degree combination recognizes the growing complexity of the sport industry and reinforces the Center for Sport Leadership's commitment to preparing students for the leadership challenges of the future. The dual degree offers students course work and knowledge they will need to be successful in a business setting combined with the application and networking skills required in today's sport industry.

The M.B.A. phase of the program will encompass a problem-based learning style, immersing students in collaborative projects and working situations that are commonplace in the business world. Students will learn business concepts in a real-life context and develop skills in communication, collaboration and teamwork that are essential for success, while developing their abilities to be creative, take initiative and accept personal responsibility for their actions.

The M.Ed. program will combine classroom and practical experience to prepare individuals for leadership positions in the sport industry. An interdisciplinary approach gives students the freedom to choose courses of personal interest and build a foundation of knowledge in their desired career fields.

### Student learning outcomes

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to appropriately apply techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
7. Graduates should be able to evaluate marketing programs.
8. Students should be able to think critically and systematically about financial issues in businesses and to develop techniques to analyze these issues numerically.
9. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

### Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students can complete both degrees with two years of study and will receive both degrees at the conclusion of the entire program. Students may enter the program only in the fall semester.

## Department of Counselor Education

The Department of Counselor Education at Virginia Commonwealth University is committed to excellence in the initial preparation and continuing development of professionals in the counseling field. The department, located in an urban setting, provides graduate students with research-based professional studies and clinical experiences necessary for effective counseling, advocacy and leadership in diverse geographic and socioeconomic settings. Specifically, the department prepares counselors with the specialized knowledge and skills required for placement in elementary, middle and high schools, as well as postsecondary educational institutions in the commonwealth of Virginia and throughout the nation. Consistent with this approach are the program goals of graduating students who have knowledge of basic counseling theory and practice, possess competencies in essential counseling services, exhibit scholarly inquiry, have the skills necessary to evaluate relevant research, are committed to evaluating their counseling interventions and participate in a variety of professional development activities.

### College Student Development and Counseling, Certificate (Post-baccalaureate graduate certificate)

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall Spring Summer	Feb 1 Nov 1 Feb 1	GRE or MAT

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree in counseling or counselor education from a CACREP-accredited institution
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Interview may be required

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

Students who possess a master's degree in counseling from a CACREP-accredited program may elect to pursue the Post-baccalaureate Graduate Certificate in College Student Development and Counseling. This 18-hour program will prepare counselors and other student affairs professionals for work in post-secondary educational settings.

## Student learning outcomes

1. Professional orientation/professional identity/continuing education: Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional

identity, and display necessary skills in applying this knowledge and understanding to professional practice.

2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.
4. Helping relationships/group work/career development/wellness: Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
5. Students display knowledge and skills related to responding to crises, emergencies and disasters.
6. Students participate in the design, implementation and evaluation of programs that promote wellness as well as prevention and intervention services.
7. Human development/wellness: Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.
8. Social and cultural diversity/social justice and advocacy: Students display knowledge and understanding of diversity and equity issues and how these issues impact clients' academic, personal and career opportunities.
9. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
10. Students display knowledge and understanding of the relationship between counseling programs and academic achievement including an understanding of factors that promote student success and work to close the achievement gap among disenfranchised groups.
11. Assessment: Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and they possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.
12. Research: Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions; students also display skills and professional practices in appropriate collection, analysis and use of data.
13. Leadership: Students display knowledge of issues that affect student affairs practice and demonstrate an understanding of leadership, organization and management practices that help institutions accomplish their missions.
14. Students advocate for policies, programs and services that are equitable and responsive to the unique needs of postsecondary students.
15. Students use and analyze multiple data sources, including institutional data, to make decisions about improving differentiated student programs and they develop measurable outcomes for student development activities.
16. Students collaborate with the postsecondary community to assist students and use postsecondary community resources to improve student learning and development.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Supervised internship: Students must complete an internship of at least 600 clock hours in an approved setting.

## Curriculum requirements

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The M.Ed. in Counselor Education with a concentration in college student development and counseling is a 48-credit-hour program designed to prepare counselors for higher education and community agencies throughout Virginia and the nation. The college student development and counseling concentration provides students with the specialized knowledge and skills necessary for employment as student affairs professionals in higher education settings. The program is accredited by the Council for Accreditation of Counseling and Related Programs and requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

## Student learning outcomes

Professional orientation/professional identity/continuing education

1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.

3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness

1. Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness

Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy:

1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients' academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

Assessment

Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

Research

Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

Leadership

1. Students display knowledge of issues that affect student affairs practice and demonstrate an understanding of leadership, organization and management practices that help institutions accomplish their missions.
2. Students advocate for policies, programs and services that are equitable and responsive to the unique needs of postsecondary students.
3. Students use and analyze multiple data sources, including institutional data, to make decisions about improving differentiated student programs and students develop measurable outcomes for student development activities.
4. Students collaborate with the postsecondary community to assist students and use postsecondary community resources to improve student learning and development.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirements: Students must complete approved internship.
4. Testing requirements: Students must provide acceptable score on the National Counselor Examination.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

Students accepted into the counselor education program must make satisfactory progress toward their degrees. Students who earn unsatisfactory grades and/or exhibit unprofessional conduct may be terminated from the program. More

specific information about satisfactory academic progress can be found on this website at [www.pubapps.vcu.edu/bulletins/graduate/?uid=10045&iid=30075](http://www.pubapps.vcu.edu/bulletins/graduate/?uid=10045&iid=30075).

### Counselor Education, Master of Education (M.Ed.) with a concentration in school counseling

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall Spring Summer	Feb 1 Nov 1 Feb 1	GRE or MAT

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Personal interview may be required
6. Satisfactory scores on the GRE or MAT

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The M.Ed. in Counselor Education with a concentration in school counseling is a 48-credit-hour program designed to prepare counselors for elementary, middle and high schools. The school counseling concentration leads to school counseling licensure and preparation for advanced graduate work at the post-master's level. The program is accredited by the Council for Accreditation of Counseling and Related Programs and requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

For students who already have a master's degree in education, the 36 credit hours of program core courses in the school counseling concentration also will lead to recommendation for licensure as a school counselor. Students who wish to gain this licensure must meet with the department chair and file a plan of study. Although students holding master's degrees do not apply for admission to the graduate program, they must file the appropriate plan of study in order to qualify for the VCU-approved program of study. No course work taken more than seven years prior to applying for licensure as a school counselor will count toward meeting VCU's approved program course equivalents.

## Student learning outcomes

Professional orientation/professional identity/continuing education

1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness

1. Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness

Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy

1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients' academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

Assessment

Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to

identify, evaluate and implement appropriate needs assessments and consequent interventions.

Research

Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

For school counseling concentration

1. Students display knowledge of the professional models that guide the practice of school counseling and demonstrate the ability to articulate, model and advocate for appropriate school counselor duties and programs.
2. Students display knowledge and understanding of the role of family-school-community collaboration on student development and strategies to enhance collaboration.

Leadership

Students display knowledge and understanding of leadership models and of the school counselor's role in school leadership; students display appropriate skills and dispositions for working in a leadership capacity in school counseling.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The counselor education and supervision concentration is designed to prepare experienced, research-oriented master's-level counselors for academic positions focused on research, service, teaching and counselor education. Doctoral students will integrate theory, research and practice in areas of counselor supervision and training, counselor education and teaching, advanced counseling, diversity and multiculturalism, leadership, advocacy, and social justice.

## Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Department of Educational Leadership

The mission of the department is to prepare reflective instructional leaders for K-12 schools and for literacy programs and corporate training centers. Through course work and other experiences, the program aims to turn out leaders who are able to develop positive school cultures through the use of communications skills and by appropriation of fiscal, material and human resources.

The department offers programs that lead to the M.Ed., Post-master's Certificate and Ph.D. in Education with a track in educational leadership. Individuals who complete one of those programs may qualify for endorsement by the Virginia Department of Education as administrator/supervisor. An optional track M.Ed. is offered for individuals in institutions of higher education and other settings who will benefit from the study of educational leadership but do not wish to seek positions as school administrators.

For more information consult the department's Web site at [www.soe.vcu.edu/departments/el](http://www.soe.vcu.edu/departments/el).

## Admission requirements

Educational Leadership, Certificate in (Post-master's certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 15	GRE or MAT

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Must hold a master's degree in the field of education or a master's degree that meets the requirements to hold a teaching position
2. Have active teacher license
3. Have at least two years of school experience in an instructional personnel position that requires licensure in Virginia
4. Three letters of recommendation addressing the student's potential for graduate study in education
5. Student's written statement concerning career interests
6. Transcripts of all previous college work

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The post-master's certificate is a 21-hour program for individuals who hold a master's degree in the field of education or a master's degree that meets the requirements to hold a teaching position, who have an active teaching license, and

who have at least two years of school experience in an instructional personnel position that requires licensure in Virginia.\*

An end-of-program assessment is required. Individuals must meet technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

This program is delivered through an innovative, competency-based curriculum comprising a combination of face-to-face and online courses offered for one, two or three credits. The program features authentic real-time computer-simulated experiences imbedded in several courses throughout the program.

Please visit the Department of Educational Leadership's auto-advising webpage for program-specific application requirements.

\*Virginia Board of Education licensing regulations require, in part, that applicants for administration/supervision endorsement have three years of successful, full-time experience in a public school or accredited nonpublic school in an instructional personnel position that requires licensure in Virginia.

## Student learning outcomes

1. Candidates demonstrate content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Design, align, evaluate curriculum, guide learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 21 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Must take the School Leaders Licensure Assessment for graduation

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The administration and supervision concentration of the M.Ed. in Educational Leadership is a 33-credit-hour program that prepares individuals to fill positions as reflective leaders for schools. Applicants are expected to have at least two years of experience in a school setting in an instructional personnel position that requires licensure in Virginia. An end-of-program assessment is required. Individuals must meet technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

This program is delivered through an innovative, competency-based curriculum comprising a combination of face-to-face and online courses offered for one, two or three credits. The program features authentic real-time computer-simulated experiences imbedded in several courses throughout the program.

Please visit the Department of Educational Leadership's auto-advising webpage for program-specific application requirements.

## Student learning outcomes

1. Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.

5. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
6. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirement: Students in the administration and supervision concentration must complete an internship sequence.
4. Testing requirements: Students in the administration and supervision concentration must take the School Leaders Licensure Assessment.
5. For endorsement, individuals must meet the technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The leadership studies concentration of the M.Ed. in Educational Leadership is a 30-credit-hour program for individuals who hold or expect to hold leadership positions in educational organizations but who do not wish to obtain the administration/supervision endorsement from the Virginia Department of Education. Applicants are expected to have at least two years of experience in an educational setting. The program includes 15 hours of credit in required courses and 15 hours in a concentrated series of electives chosen with approval of the student's adviser.

This program is delivered through an innovative, competency-based curriculum comprising a combination of face-to-face and online courses offered for one, two or three credits. The program features authentic real-time computer-simulated experiences imbedded in several courses throughout the program.

### Student learning outcomes

1. Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
5. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
6. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

### Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 30 credit hours.

2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Admission requirements

Leadership, Doctor of Education (Ed.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ed.D.	Summer	Feb. 15	MAT

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Professional vita or resume that addresses colleges or universities attended, educational degrees held, including major/minor, work history in chronological order, beginning with current position, leadership experiences, professional involvement, and awards and honors
6. Evidence of at least three years of successful leadership experience including evidence of leadership accomplishment for each of three areas: (1) leadership for learning; (2) leadership for equity and (3) leadership for accountability. [This evidence might be a combination of artifacts, testimonials, reports, newspaper documentation or other evidence that provides a description of your ability to lead for learning, equity and accountability. Evidence can be in hard copy format or on a website specifically created for this purpose. (We are seeking candidates who have successfully addressed the issues of student and/or organizational learning, equitable treatment and outcomes, and accountability to students.)]
7. At least a 50th percentile score on the Miller Analogies Test

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The purpose of the Ed.D. in Leadership program is to provide leaders with authentic experiences, appropriate knowledge and skills, and opportunities for reflection that will enable them to succeed in organizational leadership positions. Three analytic lenses — equity, accountability and learning environments — will guide learning activities and enable students from varying backgrounds to consider learning through common perspectives.

Students will examine cases built around enduring questions in the field and examine these questions through three lenses: learning, equity and accountability. Questions will be explored through contrasting evidence from economic, systems, legal, human relations and political data and perspectives. The program content and assessments will correlate to common curriculum elements across perspectives.

## Program features

The Ed.D. in Leadership is a 48-hour, 36-month program. Based upon principles of adult learning, the program has the following features:

1. Practitioner-oriented
2. Competitive admissions
3. Midcareer entry
4. Prescribed curriculum, with extensive use of case-study approach
5. Learning-community based
6. Problem-oriented pedagogy and curriculum
7. Collaborative instruction involving VCU full-time faculty and area practitioners
8. Applied research dissertation as a culminating project
9. Varied meeting formats: weekends, evenings, monthly, weekday blocks of time, summer full-day institutes, face-to-face and online

## Student learning outcomes

1. At the beginning of the Ed.D. program, participants create an online digital portfolio site that consists of two elements: (a) a blog that provides a venue for reflection on their learning and (b) a collection of artifacts that attest to their learning as a leader, with each artifact specifically related to their involvement in the program. Participants populate both elements of the portfolio at their own discretion throughout the first year. In the concluding month of the first year in the program, participants individually present their portfolios to a review team of two faculty members who rate the quality of the educational experience as reflected in each participant's portfolio.
2. During the second year of the Ed.D. program, participants work in teams to complete evaluations of programs currently in use in their workplaces. Teams confer with workplace supervisors to develop goals and objectives, review literature related to the program they are evaluating, design an evaluation study, collect and analyze data, and develop conclusions and recommendations. The final products include a formal report, an executive summary and two presentations: one to the workplace supervisor and a second to the other program participants.
3. Graduate students must be approved for degree candidacy status by the Graduate School to be eligible to receive a graduate degree. Participants who meet the following criteria are eligible for candidacy status, upon recommendation of their faculty advisers.
4. Capstone project: Candidates collaborate in teams of three or four to design, implement, analyze and defend a study of an issue identified by an organizational client. Participating organizational clients describe the issue that they propose for study, and affinity groups of three or four candidates coalesce around issues of personal academic and professional interest, familiarity and expertise. Under the supervision of a faculty member with appropriate academic credentials, each team of students develops a response to the proposal of that team's preferred organizational client. The team's response contains a projected research design and timeline. If this is accepted on behalf of the organizational client by the appropriate representative (referred to as the client in the following), an informal contract agreement is signed. Candidates commence review of extant literature related to the issue and gather preliminary data utilizing sources identified by the client. This

preliminary phase culminates in the defense of a capstone proposal to the team's committee. Capstone committee members are graduate faculty members. Each committee consists of a chair, who is the supervisor of the team's initial research activities, and two additional members. Once the capstone proposal is defended, the team begins to collect its own current data pertaining to the issue identified by the client. Each capstone committee member independently reviews the work of the team as work proceeds. After one semester of the capstone project, each team presents and defends to the capstone committee and the client separately an interim report, which may include a revised timeline. If this interim report is approved, each team proceeds to complete the collection of data, analyze the data, draw conclusions on the basis of the data analysis and prepares both an executive summary and a full report on the client's issue. Toward the end of the second semester of the capstone project, each team presents and defends both the executive summary and the full report to the capstone committee and the client separately.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program: Courses with a grade below C cannot be used to satisfy degree requirements.
3. Capstone requirements: Students must complete and defend a team-based capstone research project.

## Department of Foundations of Education

The Department of Foundations of Education provides multidisciplinary, liberal education perspectives that undergird all programs in the school. Our contribution is based on the premise that the preparation of effective educational practitioners requires fundamental, deep understanding of the broader perspectives that are represented by research and theory in psychological, cultural, philosophical, historical and ethical areas of inquiry. As such, the department provides an essential link between practice and theory that makes effective reflection and decision making possible. By facilitating a rich contextual understanding of contemporary educational issues and practices, the department enhances the ability of educators to be reflective decision makers who make effective use of complex judgments and critical thinking. Our goal is to prepare educators for intelligent, responsible leadership in a variety of educational careers and settings for teaching, research, administration and policy-making.

The department plays an integral part in the Ph.D. in Education program by teaching required courses in urban education and research methods and other elective courses, by active participation on dissertation committees, and by directing the Research and Evaluation Track of the program. The department also has responsibility for the Metropolitan Educational Research Consortium (MERC), a partnership between VCU and seven Richmond area school divisions to conduct and disseminate action research.

For more information consult the department's Web site at [www.soe.vcu.edu/departments/fe](http://www.soe.vcu.edu/departments/fe).

## Admission requirements

### Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Nov 15 (early consideration)  Feb 1 (final deadline)	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Baccalaureate or master's degree in psychology, educational psychology or related discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The educational psychology concentration is designed to train research-oriented doctoral students who want to promote the success of students in educational

environments. Doctoral students will integrate theory and research in the areas of developmental psychology, cognition, social psychology and motivation, assessment, exceptional learners, and diversity to better study learning in schools or school-like settings.

## Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The research and evaluation concentration is designed primarily for individuals with responsibility for conducting research and evaluation projects in and for agencies and educational organizations. Emphasis in this concentration is placed on developing proficiency in both quantitative and qualitative methods of inquiry, providing students with a breadth of methods to study varied educational and social research questions. Students may select a focus in either research or evaluation.

### Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. ## Department of Special Education and Disability Policy

The mission of the Department of Special Education and Disability Policy is to prepare skilled, effective professionals who can meet the educational needs of children and youth with disabilities and their families through graduate degree programs, discover new instructional and service delivery strategies through an ongoing program of research, and share information on these strategies to a wide audience through collaborative relationships with children and youth with disabilities, their families, educators, local, state and federal government agencies, and other professionals throughout the commonwealth and across the nation.

The department offers extended teacher preparation programs that allow students to prepare for professional roles as teachers of students with emotional disturbance, learning disabilities, or mental retardation. These five-year programs culminate in the simultaneous awarding of both a bachelor's degree from the College of Humanities and Sciences and a Master of Teaching degree from the School of Education.

At the graduate level, the department offers five Master of Education programs. Successful completion of one of the degree programs leads to endorsement in early childhood special education, emotional disturbance, learning disabilities, mental retardation or severe disabilities. In addition, the department offers a Ph.D. in Education with an emphasis on Special Education and Disability Policy.

For more information consult the department's Web site at [www.soe.vcu.edu/departments/sedp](http://www.soe.vcu.edu/departments/sedp).

Autism Spectrum Disorders, Certificate in (Post-baccalaureate graduate certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 15	
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline including education, social work, psychology or human services
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU****Program goal**

The post-baccalaureate graduate Certificate in Autism Spectrum Disorders is designed to prepare personnel to support individuals with autism spectrum disorders in the educational setting from early intervention through adult services. The purpose of the certificate is to provide the wide range of competencies necessary for the provision of effective educational programming. The course sequence enables personnel to develop comprehensive knowledge and experience in assessment, teaching strategies and curriculum development. The certificate is geared toward teachers, potential teachers and related service personnel. However, it is available to all professionals working in the human service setting who wish to gain expertise in this area.

All applicants must hold a bachelor's degree in any area related to education, social work, psychology or human services. Participants are required to earn 12 graduate credit hours as outlined below. Upon successful completion of the certificate program, participants will be able to:

1. Describe the primary and secondary characteristics of ASD and the impact on communication, socialization, sensory responses, patterns of behavior and learning style throughout the lifespan.
2. Understand the concerns of families of individuals with ASD and describe strategies and provide resources to help address these concerns.
3. Understand and apply theories and research that form the basis of curriculum development and instructional practice.
4. Assess student ability and develop individualized programs that use evidence-based practice to support and enhance learning across environments and across areas of development and need.
5. Describe the behavior of individuals with ASD in terms of its function and identify how to provide positive behavioral support in order to replace existing problem behavior or prevent the development of new problem behaviors.
6. Provide environmental supports, structure and technology adaptations to provide optimal learning and independence for individuals with ASD across environments.

The four autism spectrum disorder courses can also be completed by students who do not wish to earn the post-baccalaureate certificate. In this case, admission to the VCU Graduate School is not required. Individual student needs and preferences determine the best way for the student to proceed.

**Student learning outcomes**

1. Participants understand the field as an evolving and changing discipline based on philosophies, evidence-based principles and theories, relevant laws and policies, diverse and historical points of view, and human issues that have historically influenced and continue to influence the field of special education and the education and treatment of individuals with ASD. Participants understand how these influence professional practice, including assessment, instructional planning, implementation and program evaluation.
2. Participants understand the characteristics of those with ASD and the educational implications. This includes an understanding of:
  - a. Core and associated characteristics of individuals with developmental disabilities/autism spectrum disorders
  - b. Medical aspects and implications for learning for individuals with developmental disabilities/autism spectrum disorders
  - c. Co-existing conditions and ranges that exist at a higher rate than in the general population
  - d. Different ways of learning and the impact of academic and social abilities, attitudes, interests and values on instruction
3. Participants demonstrate knowledge of evidence-based practices selecting, adapting and using instructional strategies and materials according to characteristics of the individual with ASD. Participants demonstrate knowledge of evidence-based practices designed to target communication, social, behavior, sensory and academic needs.
4. Participants understand how to develop and implement comprehensive, longitudinal individualized programs in collaboration with team members. Participants demonstrate knowledge of instructional and assistive technology that can be integrated into the educational program. Participants understand how to plan systematic instruction based on learner characteristics, interests and ongoing assessment use.
5. Participants demonstrate knowledge of the components of assessment for individuals with developmental disabilities/autism spectrum disorders including both formal and informal assessments. Participants understand the need to assess individual strengths, skills and learning styles.
6. Participants understand the importance of collaboration with school personnel and families and demonstrate knowledge of related skills. Participants understand how to communicate effectively with families of individuals with ASD. Participants understand the value of observing, evaluating and providing feedback to paraeducators who work under their supervision.

**Degree requirements**

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 12 graduate credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Certificate in Disability Leadership is a 12-hour certificate program designed to prepare health professionals, special educators and other professionals in related disciplines in the field of childhood neurodevelopmental disabilities to be leaders in the health care system. The program provides a 12- to 24-month curriculum of didactic and Web-based courses, interactive seminars, clinical and community-based practica, a family mentorship experience and planned grassroots- and systems-level policy activities.

The certificate is earned by completing the Virginia Leadership Education in Neurodevelopmental Disabilities interdisciplinary training program. Va-LEND is a collaboration among the School of Education (Partnership for People with Disabilities), the VCU School of Medicine (Department of Pediatrics) and the Virginia Department of Health (Title V Program). The LEND curriculum emphasizes all aspects of neurodevelopmental and related disabilities, the social environment (including ethnic and cultural issues), the interdisciplinary approach (systems of care), leadership (advocacy and public policy as well as administration) and research. Following completion of the program, the trainees will be able to serve as leaders in the field of child health and neurodevelopmental disabilities.

## Student learning outcomes

1. Students will demonstrate an understanding of the nature and range of neurodevelopmental disabilities.

- Students will demonstrate an understanding of the team approach to serving individuals with neurodevelopmental disabilities and their families.
- Students will demonstrate an understanding of community services and resources available to individuals with neurodevelopmental disabilities and their families.
- Students will demonstrate an understanding of their role as advocates for individuals with neurodevelopmental disabilities and their families.
- Students will be involved in a leadership role with an organization serving individuals with neurodevelopmental disabilities and their families.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

- Credit hour requirements: Students are required to complete a minimum of 12 credit hours.
- Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Education, Doctor of Philosophy (Ph.D.) with a concentration in urban services leadership

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

### Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Nov 15 (early consideration)  Feb 1 (final deadline)	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

- Master's degree in an appropriate discipline
- Three letters of recommendation addressing the student's potential for graduate study in education
- Student's written statement concerning career interests
- Transcripts of all previous college work
- A personal interview and writing sample (may be requested)
- Professional vitae/resume
- Satisfactory scores on the GRE

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#)

and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The special education and disability leadership concentration is designed primarily for individuals employed in leadership positions in the field of special education. Emphasis in this concentration is placed on developing in-depth knowledge about topics as they pertain to personnel development, research, issues and policies in special education.

## Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

### Special Education, Master of Education (M.Ed.) with a concentration in early childhood

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Mar 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the [Student Services Center](#) section on the School of Education website for current testing requirements.

Applicants who do not have a provisional or professional collegiate teaching license in special education must take SEDP 630 Trends in Special Education as a prerequisite course.

Applicants who hold bachelor's degrees in areas other than special education must complete a review process with program faculty as part of the admissions process.

Admission to clinical experiences in schools requires a background check and fingerprinting.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education or severe disabilities.

The Master of Education in Special Education program with an early childhood concentration is a sequentially planned series of courses and clinical experiences designed to prepare individuals to work with young children, from birth through age 5, with developmental disabilities and their families. The courses are delivered using a hybrid of online and face-to-face formats. The program is learner-centered, innovative, interactive and collaborative. Through online discussions and face-to-face meetings with faculty members, community partners, student peers and program graduates, the ECSE teacher candidates have multiple opportunities to engage in interactive, proactive and dynamic dialogues.

Successful completion of the degree program qualifies students for teacher licensure with endorsement in early childhood special education by the Virginia Department of Education. Students are prepared to intervene with infants and young children representing a wide range of abilities, including those at risk for developmental delays and those at risk for severe disabilities. As a result of training, students will be prepared to serve children and families in diverse and high-need communities in a variety of early intervention roles. The program can be completed in five semesters of full-time study or six semesters of part-time study.

In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education early childhood curriculum.

## Student learning outcomes

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Effect on student learning: Candidates demonstrate effects on student learning as evidenced by the unit plan with curriculum-based measure – secondary.
5. Candidates demonstrate CEC standards proficiency: Candidates further demonstrate proficiency on CEC competencies as evidenced by the assessing a child/IEP assignment, the multicultural poster and paper, and the functional behavior assessment/behavior intervention plan.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 37 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education or severe disabilities.

The online Master of Education in Special Education general education concentration, which can lead to an endorsement in the special education general curriculum is designed to prepare graduates with the professional knowledge and skills needed to work in a variety of settings.

1. General education classrooms (where children with special needs are being collaboratively taught)
2. Resource, modified resource or collaborative resource rooms
3. Self-contained settings or classrooms in varied urban, suburban or rural areas
4. Residential programs
5. Various community environments

Special training is provided in teaching reading and language, behavior management, and the use of interactive strategies that teach positive social skills. Candidates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.

Through online course work, the general education concentration will encompass broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized courses develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in a special education-general education setting, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with high-incidence disabilities. In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education general curriculum.

The program offers candidates the opportunity to complete clinical placements in their own classroom or school with approval from VCU faculty and supervision by trained personnel. Placement opportunities for clinical experiences include a range of public and private schools and mental health programs that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students will have the opportunity to complete a practicum in addition to the externship. When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students enrolled in special education, general curriculum in grades K-12. Candidates are offered the option of taking a full-time or an on-the-job externship for a semester.

## Student learning outcomes

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education or severe disabilities.

The Master of Education in Special Education severe disabilities concentration is designed to prepare teachers to work with students in grades K-12 in public school settings. Throughout the program, emphasis is placed on person-centered planning, school and community inclusion, transdisciplinary teamwork and the role of the family.

Courses address physical and medical management issues, functional assessment strategies, longitudinal curriculum planning, systematic instruction, augmentative and alternative communication systems, assistive technology, transition from school to adulthood, positive behavioral supports and the special needs of students with autism or physical, sensory and health-related disabilities.

All core courses are offered through the Virginia Severe Disabilities Consortium, but are accessed through VCU. Students enrolled in the program complete a field-based externship in their school (if they currently serve students with severe disabilities) or in one of the many public schools in the Richmond area. Six one-credit-hour externship experiences are spread throughout the course of study and are designed to meet the students' needs for professional development.

All candidates are required to submit a final portfolio as the capstone requirement of the program. Successful completion of the 42-credit-hour program results in eligibility for Virginia endorsement in special education, adapted curriculum in addition to the Master of Education degree.

## Student learning outcomes

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.

## Department of Teaching and Learning

The Department of Teaching and Learning is committed to excelling in the initial and continuing preparation of teachers for the commonwealth, with particular emphasis on early childhood through secondary education in diverse settings; to collaborating with colleagues in educational agencies; to applying research about learning in classrooms; to undertaking scholarly endeavors that examine learning and teaching processes; and to providing technical assistance to special populations and service to school divisions and agencies.

The department values:

- Providing the highest quality teaching and opportunities for learning.
- Integrating academic disciplines, professional studies and clinical experiences as program components for student learning.
- Collaborating in the preparation of teachers and in the continuing development of faculty both within the university and in public and private educational settings.
- Enabling teachers and intending teachers to work effectively with students from diverse populations and those with special needs.
- Helping intending teachers become effective decision makers and practicing teachers refine their decision-making skills in the roles for which they are preparing.
- Effectively modeling the use of technology to enhance and foster learning.
- Incorporating, among others, developmental, cognitive and functional approaches and content areas in the preparation of personnel in early, middle, secondary and special education programs.
- Serving the university through faculty participation in institutional committees and task forces, programs, and supportive research and service institutes and centers within the university.
- Serving the community through technical assistance, workshops, consulting education activities, Professional Development Schools and other partnerships.

The Department of Teaching and Learning houses the following degree and certificate granting programs.

Master of Education in Curriculum and Instruction  
 Master of Education in Reading  
 Master of Teaching  
 Post-baccalaureate Graduate Certificate in Instructional Technology  
 Post-baccalaureate Graduate Certificate in Teaching (Secondary)  
 Post-master's Certificate in Reading Specialist  
 Ph.D. in Education

For more information consult the department's website at [www.soe.vcu.edu/departments/tl](http://www.soe.vcu.edu/departments/tl).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

## General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Education in Adult Learning is a 33-credit hour program of study that prepares individuals for a broad range of positions related to the education of adult learners. Students choose one of three elective concentrations in adult literacy, human resource development, or teaching and learning with technology. Graduates are found in major corporations, higher education, health care organizations, state and federal agencies, nonprofit and community-based organizations and human services agencies. Admission to the program is predicated on the “whole person” concept, taking into account life experience, academic record, references and the reasons for the student's interest in the program. An interview with the program adviser is recommended prior to admission. Successful applicants will have sufficient prior work experience with adults as learners to enable them to bring relevant work experience into the classroom learning environment.

The program provides a foundation in educational research methods and a strong core of seven courses in the theory and practice of adult learning, including emphasis in development of facilitation skills, as well as the design and delivery of adult learning programs. Upon completion of the foundation and core courses, students choose one of three concentration areas: adult literacy, human resource development (learning in the workplace) or teaching and learning with technology. The last course in the program, a capstone seminar in action learning, reunites students from all three concentrations for a comprehensive synthesis experience as they work in action learning teams to solve a real problem of strategic importance to an organization in the community.

A unique feature of the program is the learning portfolio, maintained in an online journal (blog) format. The learning portfolio, in combination with the capstone seminar, replaces a comprehensive examination requirement. For the portfolio, students write reflective blog entries during each of the core and concentration courses. During the program, selected assignments are posted to the blog to document personal growth and learning over time. At the end of the program, students create a synthesis of their learning in an essay format or through creation of a digital story. The portfolio serves as a demonstration of the graduate's abilities to a prospective employer and can be added to a student's resume. Throughout, the program utilizes students' experiences in working with adults as learners to unite theory with practice and emphasizes 21st-century technologies for teaching and learning.

## Student learning outcomes

1. In earning the M.Ed. in Adult Learning, students demonstrate the ability to articulate a personal philosophy of adult learning practice that enables them to work effectively as leaders and facilitators to improve adult learning, as evidenced on the final program learning assessment.
2. M.Ed. in Adult Learning students will demonstrate their ability to integrate their knowledge of all facets of adult learning to have a significant impact on the practices, culture and learning environments of the organizations in which they work.
3. Students will demonstrate their knowledge of the nature, function and scope of adult learning during the capstone experience of the program.
4. Students in this program will demonstrate their awareness of the processes of adult learning and development during their capstone experience.
5. Students will acknowledge the influence of technology in adult learning, as evidenced in their final program learning assessment.
6. Student will demonstrate their awareness of educational research in the adult learning field, as evidenced on the research on instructional strategy and organizational change strategy analysis rubrics.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

### Education, Doctor of Philosophy (Ph.D.) with a concentration in curriculum, culture and change

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Nov 15 (early consideration)  Feb 1 (final deadline)	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree in curriculum and instruction, teaching and learning, educational philosophy or related discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests and goals
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The curriculum, culture and change concentration offers a rigorous doctoral-level learning experience in curriculum and instruction with a strong emphasis on advocacy and social justice. The concentration prepares curriculum and instruction leaders for positions in school systems at the building level and above, as well as scholars with a wide range of curricular interests — urban education, rural education, linguistically diverse groups, oppressed groups, critical pedagogy, philosophical and sociocultural foundations of education, etc. In addition to a deep grounding in theoretical, practical and methodological approaches to curriculum and instruction, the concentration prepares instructional leaders to advocate for change across a wide range of institutions, systems and contexts. The concentration offers challenging learning experiences in the field of curriculum and instruction. Its expressed social justice values allow framing of courses in ways that provide critical analyses of contemporary schooling and ground students in the philosophical and historical roots of school change. The program welcomes students with interests in all institutional settings serving students across the life span (early childhood through adulthood) as well as informal and nonformal contexts. It also allows for discipline-specific cohorts in fields such as STEM and literacy.

The concentration distinguishes itself by preparing curriculum and instruction leaders to be change agents capable of working in school systems, higher education and advocacy organizations. It reflects an activist stance toward the education profession — one that views schooling as not only shaped by society but also as an active force for equity and meaningful societal change. It will appeal to a wide range of students: those who are seeking to become instructional leaders in school systems, those preparing to teach in the academy and all those desiring a strong foundation in educational reform.

## Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The urban services leadership concentration has two focal areas with different emphases to develop leaders as scholars and practitioners in adult learning or health promotion and education.

**Adult learning:** Applicants are expected to have experience working with adult learners in organizational, community, government, higher education, health care or nonprofit settings or within the community in roles as faculty, faculty developers, trainers, human resource development and organizational development professionals, adult literacy educators, or other roles in which they are actively involved in the teaching and training of adult learners.

**Health promotion and education:** This focus is designed to prepare future researchers, faculty and practitioners for leadership roles in academic, government (local, state, national and international), voluntary health agencies and community-based and other health-related organizations. Doctoral students will utilize a multidisciplinary approach to develop a broad understanding of the critical issues and challenges in health promotion and health education and subsequently apply that understanding to the planning, implementation and evaluation of health promotion and education programs and initiatives.

## Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. ### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The post-baccalaureate Certificate in Instructional Technology prepares educators to use technology effectively in their schools and to provide instructional leadership and technical support to other educators who use computer technology. Designed for teachers, resource persons and administrators at all grade levels (K-12), the sequence in instructional technology offers a unique opportunity to develop comprehensive knowledge and experience in the educational applications of computers and related technologies. The primary purpose of this certificate program is to meet the growing need for highly qualified core curriculum teachers, instructional technology support teachers and associated administrative personnel.

The program requires six three-credit-hour courses. In addition, prerequisites for the program require that students must be licensed K-12 teachers or administrators with a minimum of two years of classroom experience who have completed TEDU 507 or provide evidence of mastery level of the requirements of that class. The program is committed to providing access to technology so that hands-on experience is offered in every class and participants produce instructional material that can be immediately integrated into the classroom.

## Student learning outcomes

1. Candidates will demonstrate the necessary knowledge and skills to facilitate effective learning experiences using technology.
2. Candidates will demonstrate their skills in visual arts.
3. Candidates will successfully demonstrate searching techniques.
4. Candidates will be able to produce and edit video for education.
5. Candidates will be able to set up online instructional modules incorporating various communication and digital activities for students.
6. Candidates will present at a conference and be able to prepare a professional development class in technology.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Program goal

The post-baccalaureate graduate Certificate in Medical Education is a 12-credit-hour program designed for faculty in the School of Medicine at Virginia Commonwealth University to enhance depth and breadth of faculty expertise in curriculum design and adult learning strategies for teaching, as well as to foster development of a cadre of academic leaders who can model best practices in teaching undergraduate, clinical and graduate programs.

## Student learning outcomes

1. Students will be able to describe applications of curriculum design principles to medical education and adjust current medical education curriculum accordingly.
2. Students will be able to describe the nature of adult learning and how that applies to medical education.
3. Students will be able to apply principles of active engaged learning to medical education.
4. Students will be able to describe research paradigms in the study of teaching and learning.
5. Students will design a study to investigate teaching practices in medical education.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The post-baccalaureate graduate Certificate in Online Teaching for K-12 Educators is a 17-credit-hour certificate designed to prepare candidates to develop and facilitate effective online instruction in K-12 environments. The goals for the certificate are to:

1. Expand on participants' current teaching expertise in instructional strategies, curriculum design, and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

## Student learning outcomes

1. Participants will demonstrate effective electronic communication methods for instruction in the K-12 environment.
2. Participants will reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas.
3. Participants will demonstrate effective virtual systematic instructional design through the development of a virtual learning environment.
4. Participants will demonstrate effective facilitation of virtual instruction, including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning.
5. Participants will demonstrate knowledge of effective strategies for assessment and evaluations in online environments through the development of rubrics and alternative assessment tools.
6. Participants will demonstrate knowledge of TPACK framework in designing instruction with appropriate virtual tools.
7. Participants will demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues and the development of appropriate materials that reflect effective time and course management by the course facilitator.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete a 21-month curriculum of online courses as well as course development and facilitation practica.

## Admission requirements

Reading Specialist, Certificate in (Post-master's certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall Spring Summer	Feb 1 Nov 1 Feb 1	GRE or MAT

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Must hold a master's degree in any specialty area related to education
2. Have active teacher license
3. Have at least three years of teaching experience in a reading-related setting
4. Three letters of recommendation addressing the student's potential for graduate study in education
5. Student's written statement concerning career interests
6. Transcripts of all previous college work
7. Satisfactory scores on the GRE or MAT

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The certificate program is offered for individuals who aspire to become reading specialists. Applicants for the certificate program must hold a master's degree in any specialty area related to education.

The certificate program is designed for students who wish to gain state licensure as a reading specialist in kindergarten through high school settings. Applicants are required to have at least three years of teaching experience in a reading-related field setting if they want to be recommended to the Department of Education for endorsement as a reading specialist in Virginia.

All requirements for admission to graduate school apply to applicants for the Post-master's Certificate in Reading Specialist. All state department requirements for reading specialist (specifically the 12 hours of graduate or undergraduate work in selected areas) must be met.

Students are required to earn a minimum of 24 graduate hours beyond their current master's degree, including the required reading courses, an approved reading selective and an elective in the School of Education that has been approved by the adviser. Advisers will recommend selective courses based upon student experience and goals. During the last semester of course work, students must complete a reading portfolio documenting their work in the program and related work experiences. Candidates must receive a passing score on the Virginia Reading Assessment as a graduation requirement.

Persons completing the program are expected to demonstrate:

1. An understanding of the reading language learning process
2. The ability to critique, adapt and model use of a variety of reading instructional strategies, methods and programs
3. Expertise in developing and providing for continuous assessment of an individual and groups
4. Ability to implement schoolwide developmental, creative and intervention reading/language arts programs
5. Ability to understand and apply theory to practice within a variety of cultural contexts

### Student learning outcomes

1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators/Virginia Reading Assessment scores and the philosophy of reading paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction, or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.

3. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
4. Effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
5. Candidates demonstrate IRA standards proficiency: Candidates further demonstrate proficiency on IRA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

### Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 24 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students must provide a passing score on the Virginia Reading Assessment for graduation.
4. Endorsement requirements: Students must meet all Virginia Department of Education requirements to be recommended for endorsement.

### Curriculum requirements

Courses	Credit hours
READ 600 Analysis and Correction of Reading Problems	3
READ 605 Organizing and Implementing Reading Programs	3
READ 700 Externship	3
TEDU 561 Reading Foundations: Sociological/Psychological Perspectives*	3

TEDU 681 Investigations and Trends in Teaching	3

#### Elective 3

Electives should be used to ensure state regulations for the endorsement are met.

\*These courses may also count as part of the ESL endorsement.

**Total graduate credit hours required (minimum) 24**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences and pass the Virginia Reading Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

### Student learning outcomes

1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators/Virginia Reading Assessment scores and philosophy of reading paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.
3. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
4. Effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
5. Candidates demonstrate IRA standards proficiency: Candidates further demonstrate proficiency on IRA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

### Degree requirements

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

Students who are interested in teaching English as a second language to adults may develop their knowledge and skills in the adult concentration of the TESOL track in the M.Ed. in Reading. Those who are interested in pursuing an endorsement in teaching English as a second language in the adult setting must already have their K-12 initial licensure and adult education endorsement. The following are prerequisites to the concentration: LING/ENGL/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will **not** be endorsed as a K-12 reading specialist.

## Student learning outcomes

1. Demonstrate an understanding of the research methodologies in education with the capacity to read and evaluate the relevance and quality of educational research
2. Demonstrate an understanding of the developmental nature of adult learning
3. Demonstrate an understanding of the methodologies appropriate for teaching literacy skills to adults
4. Demonstrate an understanding of the nature of second language learning

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students in the K-12 reading specialist concentration must present passing scores on state mandated licensure/endorsement assessments.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

Students who already have their K-12 initial licensure and want to pursue an endorsement in teaching English as a second language in the K-12 setting may do so in the K-12 subconcentration of the TESOL concentration in the M.Ed. in Reading. The following are prerequisites to the concentration: LING/ENGL/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will **not** be endorsed as a K-12 reading specialist. Students interested in pursuing both endorsements must take the following nine credit hours in addition to the ones listed below: READ 600, READ 605 and READ 700.

## Student learning outcomes

1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators/Virginia Reading Assessment scores and philosophy of reading paper.
2. Demonstrate content knowledge in teaching English to speakers of other languages: Candidates demonstrate an understanding of the nature of second language learning and the relationship between L1 and L language and content acquisition.

- Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.
- Effectively apply knowledge, skills and dispositions: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
- Effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
- Candidates demonstrate IRA standards proficiency: Candidates further demonstrate proficiency on IRA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

- Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
- Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
- Testing requirements: Students in the K-12 reading specialist concentration must present passing scores on state mandated licensure/endorsement assessments.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)

### Graduate program director

Leila Christenbury, Ed.D.  
Chair, Department of Teaching and Learning  
[lchriste@vcu.edu](mailto:lchriste@vcu.edu)  
(804) 828-1305

### Additional contact

Henry T. Clark, Ph.D.  
Senior associate dean for academic affairs  
[htclark@vcu.edu](mailto:htclark@vcu.edu)  
(804) 828-3382

**Program website:** [soe.vcu.edu](http://soe.vcu.edu)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

## Admission requirements

### Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall Spring Summer	Mar 15 Nov 1 Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

- Bachelor's degree in an appropriate discipline including education, social work, psychology or human services
- Three letters of recommendation addressing the student's potential for graduate study in education

3. Student's written statement concerning career interests
4. Transcripts of all previous college work

**Note:** Endorsement requires a valid Virginia teaching license.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

This program is designed to prepare professionals to work with K-12 students for whom English is not the native language. The course sequence meets the Virginia Department of Education requirements for endorsement in ESL. Note that endorsement requires that individuals have an active teaching license in Virginia.

## Student learning outcomes

1. Demonstrate foundational knowledge needed to support LEP students' literacy learning
2. Effectively plan lessons that attend to linguistic proficiency of learners in various settings
3. Create assessments that assess LEP student competency in communication and content learning
4. Demonstrate a disposition of tolerance and appreciation for linguistic and cultural diversity
5. Demonstrate a range of teaching strategies and approaches that lead to LEP student learning

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 15 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Prerequisite or corequisite requirements: Students must have taken a class in linguistics and six hours of a modern foreign language.
4. Endorsement requires a valid Virginia teaching license.

## Curriculum requirements

As prerequisites or corequisites to the certificate program, students must have taken a class in linguistics and have taken six credit hours of a modern foreign language. These courses are part of the endorsement requirements and may be taken at the undergraduate or graduate level. The certificate program consists of 15 credit hours of graduate course work as follows:

Courses	Credit hours
ENGL/LING/TEDU 552 Teaching English as a Second Language	3
TEDU 561 Reading Foundations: Sociological/Psychological Perspectives	3
TEDU 562 Teaching Reading in the Content Areas	3
TEDU/FRLG 575 Intercultural Communication	3
TEDU 681 Investigations and Trends in Teaching	3

**Total graduate credit hours required (minimum)** 15

## Admission requirements

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in biology education			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in biology
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the [Student Services Center](#) section on the School of Education website for current testing requirements.

**Additional program requirements:** Admission to clinical experiences in schools requires a background check and fingerprinting.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor's degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master's degree is not a priority (applicants already may have earned a master's degree or wish to earn a master's degree in a specialized area of education later). Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor's level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

## Student learning outcomes

Persons completing the program are expected, among other attributes, to:

1. Have an understanding of human development and learning theory appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

Courses	Credit hours
<b>Foundations</b>	<b>6</b>

<b>Total graduate credit hours required (minimum)</b>	<b>33</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Degree candidacy requirements****Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Admission requirements**

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in mathematics education			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in mathematics
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests

4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the [Student Services Center](#) section on the School of Education website for current testing requirements.

**Additional program requirements:** Admission to clinical experiences in schools requires a background check and fingerprinting.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**
**Program goal**

The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor's degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master's degree is not a priority (applicants already may have earned a master's degree or wish to earn a master's degree in a specialized area of education later). Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor's level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

**Student learning outcomes**

Persons completing the program are expected, among other attributes, to:

1. Have an understanding of human development and learning theory appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

**Degree requirements**

In addition to the [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

## Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. [Admission information](#) for the [Extended Teacher Preparation Program](#) is available in the School of Education section of this bulletin.

## Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

### Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Can effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.
6. Preparation for legal, ethical and safety issues: Candidates demonstrate preparation in legal issues, safety and ethical treatment of living things as evidenced by the safety module assessment.
7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.
8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

Courses	Credit hours
<b>Qualifying courses</b> (taken as an undergraduate)	
EDUS 301 Human Development and Learning	3
Major courses (as undergraduate science majors) including genetics/molecular biology, botany, zoology, anatomy/human physiology, ecology, two physics and one earth science	
Admission to teacher preparation is a prerequisite for the following courses:	
TEDU 310 Practicum (secondary; <b>must</b> be taken concurrently with TEDU 537)	1-3

<b>Qualifying courses</b> (taken as an undergraduate)	
EDUS 301 Human Development and Learning	3
Major courses (as undergraduate science majors) including inorganic chemistry, organic chemistry, physical chemistry, analytical chemistry, two physics, two general biology and one earth science	
Admission to teacher preparation is a prerequisite for the following courses:	
TEDU 310 Practicum (secondary; <b>must</b> be taken concurrently with TEDU 537)	1-3
TEDU 537 Secondary School Curriculum	3
TEDU 310 Practicum (science; <b>must</b> be taken concurrently with TEDU 540)	1-3
TEDU 540 Teaching Middle and High School Sciences (fall only)	3
<b>Required courses</b>	
EDUS 617/PSYC 657 Advanced Educational Psychology for Secondary Teachers	3
EDUS 673 Seminar on Educational Issues, Ethics and Policy	3
TEDU 562 Reading Instruction in the Content Areas	3
TEDU 588 Classroom Management	3
<b>Clinical experience</b> (spring only)	
TEDU 672 Internship	1-6
TEDU 674 Internship II	1-6
TEDU 681 Investigation and Trends in Teaching (must be taken concurrently with TEDU 672 and TEDU 674)	1 or 3
<b>Total graduate credit hours required (minimum)</b>	<b>33-34</b>

## Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Teaching, Master of (M.T.) with a concentration in early and elementary education

## Admission requirements

Teaching, Master of (M.T.) with a concentration in early and elementary education			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.T.	Fall	Mar 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor's degree.)
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the [Student Services Center](#) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Early and elementary education

Freshman students bound for the Master of Teaching program with a concentration in early and elementary education are required to enroll in the Bachelor of Interdisciplinary Studies with a liberal studies for early and elementary education

major. This program offers liberal studies curriculum designed through an interdisciplinary collaboration among professors in the College of Humanities and Sciences and the School of Education in consultation with successful area teachers. It targets core knowledge across the four major subject areas represented in Virginia's Standards of Learning (mathematics, sciences, social sciences and language arts/communication) while also providing a university-level skill set and knowledge base. Throughout the undergraduate program, contact with area schools and young learners is programmed into service and experiential learning venues.

Transfer students intending to be elementary teachers (and completing the Master of Teaching with a concentration in early and elementary education) are required to meet with advisers for the LSEEE major prior to registering for courses. Advisers will evaluate all courses successfully completed outside of the LSEEE major prescribed curriculum (from VCU or elsewhere) to determine their transferability to the LSEEE major.

LSEEE majors are encouraged to select at least one minor in order to deepen knowledge and appreciation of a subject area. Philosophy, religious studies, African American studies and international studies have relevance in their understanding of human investigation of knowledge, human behavior and world cultures. A minor in a science area like environmental studies may be more "employable" because of school and societal concerns about our planet and its preservation. In selecting the humanities and sciences minor, the choice should be based on the student's interest and perceived relevance.

Consult with the appropriate professional studies adviser for additional information regarding professional studies and liberal arts requirements.

#### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

#### Early and elementary education

1. Candidates will master content knowledge: Candidates demonstrate content knowledge in the disciplines to be taught in an elementary classroom as evidenced by performance on Praxis II and the liberal arts equivalency GPA.
2. Candidates demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction as evidenced by the read-aloud lesson plan.
3. Measure candidate performance in internship: Candidates demonstrate application of knowledge, skills and dispositions in practice as evidenced by the clinical evaluation continuum.
4. Assess candidate effect on student learning: Assess candidate's effect on student learning as evidenced by success on the practicum B lesson plans in math, science and social studies.
5. Assess candidate success on developmental project: Candidates will demonstrate competence in developing unit lesson plans as evidenced by the TEDU 414 unit plan.
6. Assess candidate success on activity project: Candidates will demonstrate competence in developing student activity plans by success on the health and PE movement experience activity project.
7. Assess ability to integrate the arts in lesson: Demonstrate that candidates know, understand and use basic communication in the arts, can analyze art from structural, historical and cultural perspectives, and has an informed acquaintance with art from varied cultural and historical periods, and further demonstrate that candidates are able to integrate art in a basic content lesson by success on the learning center notebook project

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.

2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

#### Program requirements – mathematics and statistical reasoning

The general education requirement is three to six credit hours; the early childhood/elementary education program requirement is six credit hours, including three credit hours in mathematics at the college algebra level or higher and three credit hours in a statistics course typically taught by a college department of mathematics. Choosing among these courses is recommended:

Courses	Credit hours
MATH 131 Introduction to Contemporary Mathematics	3
STAT 208 Statistical Thinking	3
STAT 210 Basic Practice of Statistics	3

#### Program requirements – natural sciences

The general education requirement is seven to nine credit hours, with one course each from the physical sciences and the biological sciences, with at least one laboratory; the early childhood/elementary education program requirement is 12 credit hours, again with at least one course each in the physical sciences and the biological sciences and two laboratories. Choosing among these courses is recommended:

Courses	Credit hours
<b>Biological sciences</b>	
BIOL and BIOZ 101 Biological Concepts and Laboratory	4
BIOL/ENVS 103 Environmental Science and Laboratory	5

#### Physical sciences

CHEM 110 and CHEZ 110 Chemistry and Society and Laboratory	4
CHEM 112 Chemistry in the News	3
PHYS 101 and PHYZ 101 Foundations of Physics and Laboratory	4
PHYS 107 Wonders of Technology	4

#### Program requirements – applied arts

Two to three credit hours in applied arts to be designated with the professional studies adviser.

Courses	Credit hours
<b>Professional studies requirements</b>	<b>58-59</b>
<b>Undergraduate courses</b>	<b>25-26</b>
EDUS 301 Human Development and Learning or PSYC 301 Child Psychology	3
HPEX 390 Physical Education for the Elementary Teacher	3
TEDU 310 Practicum A (taken with TEDU 414 and TEDU 426)	2
TEDU 310 Practicum B (taken with TEDU 517, 522 and 591)	2
TEDU/ENGL 386 Children's Literature I	3
TEDU 410 Classroom Management in Elementary Schools	3
TEDU 411 Integrating the Arts in Curriculum for Young Children, ARTE 301 Art for Elementary Teachers or other applied arts	2-3
TEDU 414 Curriculum and Methods for Early/Elementary Children	4
TEDU 426 Teaching Reading and Other Language Arts	3

#### Graduate courses

EDUS 607/PSYC 607 Advanced Educational Psychology for Elementary Teachers	3
EDUS 673 Seminar on Educational Issues Ethics and Policy	3
SEDP 505 Theory and Practice of Educating Individuals with Special Needs	3
TEDU 517 Science Education in the Elementary School	3
TEDU 522 Teaching Mathematics for Elementary Education	3
TEDU 566 Diagnosis and Remediation in Reading	4
TEDU 591 Social Studies Education in the Elementary School	3
TEDU 626 Home-School Communication and Collaboration	3
TEDU 672 Internship	4
TEDU 674 Internship II	4
TEDU 681 Investigations and Trends in Teaching	1

**Total graduate credit hours required (minimum)** 34

Note: At least 33 credit hours must be taken at the graduate level.

### Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education

(biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. [Admission information](#) for the [Extended Teacher Preparation Program](#) is available in the School of Education section of this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

### Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Can effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.
6. Preparation for legal, ethical and safety issues: Candidates demonstrate preparation in legal issues, safety and ethical treatment of living things as evidenced by the safety module assessment.
7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.
8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.

2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. [Admission information](#) for the [Extended Teacher Preparation Program](#) is available in the School of Education section of this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

### English education

1. Candidates demonstrate content knowledge in the English: Candidates demonstrate content knowledge in the English language arts as evidenced by Praxis II scores and the undergraduate transcript analysis.
2. Candidates demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instructions evidenced by the lesson plan assessment, lesson plan portion of the portfolio and the clinical evaluation continuum.
3. Measure candidate performance in internship: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Assess candidate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the lesson plan portion of the portfolio.

5. Candidates demonstrate NCTE standards proficiency: Candidates further demonstrate proficiency on NCTE competencies as evidenced by the dispositions assessment.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Admission requirements

Teaching, Master of (M.T.) with a concentration in history/social studies education			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.T.	Fall	Mar 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor's degree.)
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia.

Students should consult the [Student Services Center](#) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. [Admission information](#) for the [Extended Teacher Preparation Program](#) is available in the School of Education section of this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

### History/social studies education

1. Demonstrate content knowledge in social studies: Candidates demonstrate content knowledge in social studies as evidenced by the Praxis II scores and unit plan assessment in TEDU 547.
2. Can effectively plan classroom-based instruction: Candidates demonstrate that they can effectively plan classroom-based instruction as evidenced by the lesson plan assessments in TEDU 547 and TEDU 681.

3. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by clinical evaluations.
4. Demonstrate effects on student learning: Candidates demonstrate effects on student learning as evidenced by the portfolio: student work, reflections, case study and rubric for student teaching.
5. Candidates demonstrate National Council for the Social Studies standards proficiency: Candidates further demonstrate proficiency on NCSS competencies as evidenced by the unit plan assessment in TEDU 547. This objective addresses NCATE Standard 1 – “Candidate Knowledge, Skills and Dispositions.”

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

Courses	Credit hours
<b>Qualifying courses</b> (taken as an undergraduate)	
EDUS 301 Human Development and Learning	3
Major courses ( <b>as undergraduate history majors</b> ) in political science (12 credit hours), including six credit hours 100-level U.S. and international politics and six credit hours 300-level local and international politics; geography (nine credit hours), including three credit hours of physical geography and six credit hours of cultural geography; and economics (six credit hours), including macro- and microeconomics	
<b>or (as undergraduate political science majors)</b> in history (18 credit hours); geography (nine credit hours), including three credit hours of physical geography and six credit hours of cultural geography; and economics (six credit hours), including macro- and microeconomics	
Admission to teacher preparation is a prerequisite for the following courses:	
TEDU 310 Practicum (secondary; <b>must</b> be taken concurrently with TEDU 537)	1-3
TEDU 537 Secondary School Curriculum	3
TEDU 310 Practicum (history/social studies; <b>must</b> be taken concurrently with TEDU 547)	1-3
TEDU 547 Teaching Secondary School Social Studies (fall only)	3
<b>Required courses</b>	
EDUS/PSYC 607 Advanced Educational Psychology for Elementary Teachers	3
EDUS 617/PSYC 657 Advanced Educational Psychology for Secondary Teachers	3
EDUS 673 Seminar on Educational Issues, Ethics and Policy	3
TEDU 562 Reading Instruction in the Content Areas	3
TEDU 588 Classroom Management	3
<b>Elective</b> (choose one of the following courses)	<b>3</b>
EDUS 610 Social Foundations of Education	3
SEDP 505 Theory and Practice of Educating Individuals with Special Needs	3

SEDP 531 Educational Foundations for Collaboration and Universally Designed Learning	3
SEDP 631 Classroom Management and Behavior Support for Students with Disabilities	3
TEDU 556 Advanced Computer Applications in Education	3

**Clinical experience** (spring only)

TEDU 672 Internship	1-6
TEDU 674 Internship II	1-6
TEDU 681 Investigation and Trends in Teaching (must be taken concurrently with TEDU 672 and TEDU 674)	1 or 3

**Total graduate credit hours required (minimum)** 33-34

**Other curricular options**

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Degree candidacy requirements****Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

### Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Can effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.
6. Preparation for legal, ethical and safety issues: Candidates demonstrate preparation in legal issues, safety and ethical treatment of living things as evidenced by the safety module assessment.
7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their

field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.

8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Health and physical education

The Master of Teaching program with a concentration in teaching health and physical education provides advanced course work in the application of health and movement science principles to health and physical education pedagogy. Students seeking an M.T. with the teaching health and physical education concentration are required to complete the Bachelor of Science in Health, Physical Education and Exercise Science. Students with an undergraduate degree in health and physical education or related degrees are encouraged to meet with an adviser prior to applying to graduate school.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

## Student learning outcomes

### Health and physical education

1. Candidates demonstrate content knowledge in health and physical education: Candidates demonstrate content knowledge in health and physical education as evidenced by Praxis II scores and the undergraduate transcript analysis.
2. Candidates demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instructions evidenced by the lesson plan assessment, lesson plan portion of the portfolio and the clinical evaluation continuum.
3. Measure candidate performance in internship: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Assess candidate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the lesson plan portion of the portfolio.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

### Health and physical education

The undergraduate program requires a minimum of 120 credit hours. To view undergraduate requirements, please see the program page for B.S. in Health, Physical Education and Exercise Science with a concentration in exercise science.

TEDU 681 Investigations and Trends in Teaching	3
<b>Total graduate credit hours required (minimum)</b>	<b>33</b>

## Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Degree candidacy requirements**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## **2014-15 Graduate and Professional Programs Bulletin**

---

**School of Engineering**

Through teaching and research, the VCU School of Engineering creates knowledge and transforms ideas in engineering and life sciences into technologies that enhance regional and global prosperity. The school prepares its students for leadership and entrepreneurship through collaborative and interdisciplinary partnerships.

Founded in 1995 and graduating its first class in May 2000, the School of Engineering is the result of collaboration rare in the history of higher education in Virginia. Virginia Commonwealth University has, with the support of Virginia Polytechnic Institute and State University, created a school that brings innovative engineering and computer science education to central Virginia. Building reciprocal relationships with business and industry in the greater Richmond area, contributing to the region's manufacturing enterprises and aggressively developing an international orientation, the school has developed programs of research and study that are sensitive to the unique demands of its time and culture.

In 1998, the undergraduate degree program in biomedical engineering was added to the original engineering disciplines of chemical, electrical and mechanical engineering, which were established in 1996. The long-standing and accredited degree program of computer science was assimilated into the School of Engineering beginning with the fall 2001 semester. In 2004-05, the chemical engineering department added an emphasis in life sciences and changed its name to the Department of Chemical and Life Science Engineering.

Students are offered an integrated and multidisciplinary curriculum in biomedical, chemical and life science, computer, electrical, or mechanical engineering, or computer science. Supported by the internationally recognized strengths of MCV Hospitals and the cutting-edge developments being generated by the Virginia BioTechnology Research Park, the School of Engineering at VCU has innovative curricula that emphasize creativity and imagination. By encouraging their interaction with practicing professionals, students are continually aware of the real-world application of their research and their studies.

Serving the best and the brightest students and supporting VCU's dedication to diversity by opening doors of opportunity to underrepresented populations in the engineering and computer science professions, the school continually strives to enrich the technological and intellectual climate of the metropolitan area.

Discovering new knowledge is the goal of the best of the nation's schools. The School of Engineering at VCU celebrates not only the discovery of knowledge, but also the creative integration and application of that knowledge.

---

## Accreditation

The Accreditation Board for Engineering and Technology is the premier organization in the U.S. that provides accreditation to engineering and computer science programs. Individual programs (i.e., mechanical engineering) are accredited at the bachelor's level.

The Engineering Accreditation Commission of ABET has accredited the Biomedical, Chemical and Life Science, Electrical and Computer, and Mechanical engineering programs at the VCU School of Engineering.

The Computer Accreditation Commission of ABET has provided accreditation to the Computer Science Program for many years.

---

## Degree programs

The School of Engineering offers the following degree programs:

### Bachelor of Science

Biomedical Engineering  
Chemical and Life Science Engineering  
Computer Engineering  
Computer Science  
Electrical Engineering  
Mechanical Engineering

Students also may be admitted under "Undeclared Engineering" for entrance to the School of Engineering. A field of study can be determined after the first semester.

### Master of Science

Biomedical Engineering

Computer Science

Engineering – with tracks in:

- Chemical and Life Science Engineering
- Electrical and Computer Engineering
- Engineering

Mechanical and Nuclear Engineering

### Doctor of Philosophy

Biomedical Engineering

Engineering – with tracks in:

- Chemical and Life Science Engineering
- Computer Science
- Electrical and Computer Engineering
- Engineering
- Mechanical Engineering

### Joint degree

M.D./Ph.D. in Biomedical Engineering in participation with the School of Medicine

### Interdisciplinary and cooperative studies degree

M.S. degree through the Commonwealth Graduate Engineering Program

### Post-baccalaureate certificate

Computer Science

---

## Engineering courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow these links to engineering ([ENGR](#)) courses or the ([ENGZ](#)) laboratories.

---

## Commonwealth Graduate Engineering Program

The Commonwealth Graduate Engineering Program is a collaborative effort of the University of Virginia, Virginia Commonwealth University, Virginia Polytechnic Institute and State University, Old Dominion University, and George Mason University. The University of Mary Washington participates as a funded receive site.

See the School of Engineering Graduate Programs section of this bulletin for information on VCU's graduate programs in engineering.

### Administration

**Rosalyn S. Hobson**  
Associate Dean for Graduate Studies

The VCU Commonwealth Graduate Engineering Program (CGEP) director works closely with the other CGEP directors, the VCU Dean of School of Engineering, and local businesses and industries.

## Program description

Students who have baccalaureate degrees in engineering or strong backgrounds in the sciences may work toward a master's degree in engineering on the Monroe Park Campus of VCU. Graduate engineering courses are available from the CGEP member universities via interactive television, the Web and two-way audio/video conferencing. In addition to the required engineering courses, elective courses are available in applied mathematics, mathematical statistics, chemistry, operations research, and physics in classes at VCU. The following academic programs are available through CGEP:

- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Engineering Management
- Industrial and Systems Engineering
- Manufacturing and Design Engineering
- Materials Sciences and Engineering
- Mechanical and Aerospace Engineering
- Modeling and Simulation

## Degree-seeking students

Students enrolling in the program should apply for admission in a given academic area of study and may select courses from any of the participating institutions, consistent with selected degree requirements.

## Nondegree-seeking students

Qualified individuals may enroll in a particular course without pursuing a formal degree program of study. Admission will be based on the individual's academic preparation and the availability of space.

## Admission requirements

Students should apply for admission to the CGEP University offering the desired degree program. Applicants should have a "B" average, but a successful professional experience may strengthen admission credentials. Three recommendations from persons who are qualified to give information concerning the applicants' probable success in the program and the completion of the Graduate Record Examination (GRE) also are required.

## Graduate information

### Registration for graduate study

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director, approval of the chair and the assistant dean for graduate affairs. Students may begin a course of study in either the fall or spring semesters for the engineering and computer science graduate programs; however, a start in the fall semester is preferred. For the CGEP, students may begin a course of study in either the fall or spring semester.

### Engineering, Doctor of Philosophy (Ph.D.)

#### Graduate program director

Leena Joseph

Director of graduate studies, School of Engineering

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in chemical and life science engineering

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in electrical and computer engineering

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Engineering, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jun 1 (Feb 15 for financial assistance)	GRE – General International students require TOEFL
	Spring	Nov 15	
<b>Special requirements:</b> Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.			

In addition to the [general admission requirements of the VCU Graduate School](#) and the School of Engineering, applicants to the doctoral degree in engineering must have a B.S. degree in engineering or a closely related discipline.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The goal of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge; an in-depth original research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences in order to respond directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications so that engineers, researchers and professors will be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership

- Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems stemming from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

## Student learning outcomes

Graduates of the Ph.D. in Engineering degree program will be able to demonstrate:

- The ability to apply advanced knowledge of mathematics, science or engineering
- The ability to communicate effectively
- The ability to identify, formulate and solve engineering problems
- The ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students entering the doctoral program with a B.S. degree, but not the M.S., will require a minimum of 60 post-baccalaureate credit hours beyond the bachelor's degree, including research credit hours (30 for M.S. level and an additional 30 for Ph.D. level).

Students holding the master's degree must complete a minimum of six credit hours in concentration course work, three credit hours in elective course work and 21 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research credit hours) beyond the master's degree. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credit hours per semester. Students have a maximum of eight calendar years, beginning at the time of first registration to complete the Ph.D. degree program.

### Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

### Admission to degree candidacy

Before admission to doctoral candidacy, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

### Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all

members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

There are three components of each Ph.D. in Engineering curriculum:

- Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.
- Electives component: This component allows the student to take courses in either engineering or science with approval of the student's adviser.
- Directed research component: This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

## Curriculum requirements

### M.S. to Ph.D. in Engineering

Courses	Credit hours
Concentration-specific component: ENGR course work	6
Electives: engineering or science course work	3
Directed research: ENGR 697 Directed Research	21
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

### B.S. to Ph.D. in Engineering

Courses	Credit hours
Concentration-specific component: ENGR course work	18
Electives: engineering or science course work	15
Directed research: ENGR 697 Directed Research	27
<b>Total graduate credit hours required (minimum)</b>	<b>60</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

## General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. **Advanced research skills:** To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

## Student learning outcomes

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.
3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. **Demonstrate abilities in research:** Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor's degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master's degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master's degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

### Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to

theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

#### Admission to candidacy

Before admission to doctoral candidacy, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

#### Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

### Curriculum requirements

#### M.S. to Ph.D. curriculum

Courses	Credit hours
<b>Concentration component:</b> This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.	
<b>Core courses</b>	<b>9</b>
CLSE 654 Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655 Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 656 Advanced Chemical Reaction Engineering	3
<b>Directed research</b>	<b>21</b>
This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.	
CLSE 690 Research Seminar in Chemical and Life Science Engineering	3
CLSE 697 Directed Research in Chemical and Life Science Engineering	3
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

Students entering the doctoral program with a B.S. degree, but not the M.S., will require a minimum of 60 post-baccalaureate credit hours (30 for M.S. level and an additional 30 for Ph.D. level).

#### B.S. to Ph.D. curriculum

Courses	Credit hours
<b>Concentration component – CLSE course work</b>	<b>18</b>

This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.

#### Required

CLSE 654 Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655 Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 656 Advanced Chemical Reaction Engineering	3
<b>Additional CLSE course work at the 500 level or higher</b>	<b>9</b>

#### Option electives – engineering or science course work 15

This component allows the student to take courses in either engineering or science with approval of the student's adviser (e.g. CLSE, ENGR, CHEM courses, 500 level or higher).

#### Directed research 27

This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

CLSE 690 Research Seminar in Chemical and Life Science Engineering
CLSE 697 Directed Research in Chemical and Life Science Engineering

#### Total graduate credit hours required (minimum) 60

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduates will be able to creatively solve the research problems posed.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor's degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master's degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master's degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

A student may choose to pursue a Ph.D. under the guidance of a computer science graduate faculty member. Interdisciplinary programs of study that involve computer science and another discipline are encouraged; however, a core of computer science courses is required. Courses not labeled CMSC must show relevance to the student's program of study and must be submitted for approval by the computer science graduate committee through the student's adviser.

### Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to

theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

#### Admission to candidacy

Before admission to doctoral candidacy, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

#### Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

Students will have to satisfy the following requirements:

1. Take a minimum of 12 credit hours of didactic course work at the graduate level and 18 credit hours of directed research for a minimum of 30 credit hours including a minimum of four courses that should satisfy the following:
  - a. At least two courses at the 600 level or greater
  - b. At least one course from each of the two foundation areas: theory and systems.
2. Take and pass a written comprehensive exam (maximum of two attempts allowed)
  - a. The written comprehensive examination will cover knowledge in three areas and, in order to pass, students must score a minimum of 75 percent in each area.
    - i. The exam must include material based on CMSC 501 from the **theory** area and on at least one course from the **systems** area.
    - ii. The third area will cover the student's specialization based on courses to be decided by the dissertation adviser.
  - b. Students are allowed to take the comprehensives based on courses they may not have taken at VCU; however, they have to satisfy the course requirements as mentioned above.
  - c. Students can contact the lead professor for any area and obtain a list of topics that will be covered in the exam.
  - d. The exam will be conducted a minimum of once a year and will be organized by the graduate director, with prior approval of the exam questions by the graduate committee.
  - e. A student who fails one area of the required three comprehensive exam areas must retake the exam in the failed area. The department will organize and schedule a special comprehensive exam for such students. A student who fails two or more exam areas must retake the entire comprehensive exam at the regularly scheduled comprehensive exam in the following year.
3. Write and defend a dissertation proposal (oral comprehensive exam) on an original research topic.
4. Write and publicly defend the Ph.D. dissertation.

- a. Since the Ph.D. is awarded for completion of work on an original research problem, peer-reviewed evidence of the quality of this work, in terms of at least one accepted journal paper or published high-quality conference paper (publications should be in a student's research area), must be approved by the dissertation committee and the graduate committee before the final dissertation defense can be scheduled.
- b. Specific publication requirements are available at the computer science department website as well as in the School of Engineering graduate handbook.

#### For students with a B.S. degree

Students admitted into the Ph.D. program with a B.S. degree must satisfy the following requirements:

1. Take a minimum of 60 credit hours of course work, including:
  - a. A minimum of 30 didactic credit hours, including
    - i. At least two courses from each of the three foundation areas; CMSC 501 must be one of these courses.
    - ii. At least 15 credit hours at the 600 level or greater
  - b. In addition, a student admitted to this program may need to take other undergraduate computer science courses in order to prepare for the required graduate-level courses. The choice of these courses will be left to the discretion of the student's adviser.
  - c. A minimum of 18 credit hours of directed research is required.
2. Satisfy the comprehensive examination requirements as articulated above.

#### For students without an M.S. in Computer Science

1. Students admitted into the Ph.D. program without an M.S. in Computer Science must satisfy the following:
  - a. Take a minimum of 18 credit hours of course work at the graduate level and 18 credit hours of directed research for a minimum of 36 credit hours including:
    - i. A minimum of two courses from each of the foundation areas: theory and systems; CMSC 501 must be one of these courses
    - ii. At least nine credits at the 600 level or greater
    - iii. In addition, a student admitted to this program may need to take other undergraduate computer science courses in order to prepare for the required graduate-level courses. The choice of these courses will be left to the discretion of the student's adviser.
  - b. Satisfy the comprehensive examination requirements as articulated above.

## Curriculum requirements

### B.S. to Ph.D. curriculum

Courses	Credit hours
<b>Concentration component:</b> This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.	
<b>Foundational area: theory</b>	<b>6</b>
CMSC 501 Advanced Algorithms (required)	3
Choose at least one of the following:	
CMSC 526 Theory of Programming Languages	3
CMSC 620/CISS 624 Applied Cryptography	3
CMSC 621 Theory of Computation	3
<b>Foundational area: systems</b> (choose at least two of the following)	<b>6</b>
CMSC 502 Parallel Algorithms	3
CMSC 506/EGRE 526 Computer Networks and Communications	3
CMSC 608 Advanced Database	3
CMSC/CISS 618 Database and Application Security	3

CMSC 622 Network and Operating Systems Security	3
<b>Foundational area: applied computer science</b> (choose at least two of the following)	6
CMSC/CISS 609 Advanced Computational Intelligence	3
CMSC 630 Applied Signal and Image Analysis	3
CMSC 635 Knowledge Discovery and Data Mining	3
CMSC 678 Statistical Learning and Fuzzy Logic Algorithms	3

**Optional electives component:** This component allows the student to take courses in either engineering or science with approval of the student's adviser.

#### Additional CMSC course work 12

Note: At least 15 credit hours of all CMSC courses must be at the 600 level or greater.

**Directed research component:** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

#### Research 18

CMSC 692 Independent Study or CMSC 697 Directed Research

#### Total graduate credit hours required (minimum) 60

#### M.S. to Ph.D. curriculum

#### Courses Credit hours

**Concentration component:** This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.

CMSC 622 Network and Operating Systems Security	3

**Optional electives component:** This component allows the student to take courses in either engineering or science with approval of the student's adviser.

<b>Additional CMSC course work or other engineering or science courses in MATH/OPER/STAT/EGRE</b> (Non-CMSC courses require approval by Graduate Committee.)	3
--	---

Note: At least six credit hours of all CMSC courses must be at the 600 level or greater. An additional six credit hours is required for students with an M.S. degree in a subject other than computer science.

**Directed research component:** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

#### Research 18

CMSC 697 Directed Research

**Total graduate credit hours required (minimum) 30**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Other information

[Student handbook](#) is available on the School of Engineering website.

Engineering, Master of Science (M. S.) with a concentration in electrical and computer engineering

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in electrical and computer engineering			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jun 1 (Feb 15 for financial assistance)	GRE – General  TOEFL or IELTS is required for international students
	Spring	Nov 15	

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the Ph.D. in Engineering with a concentration in electrical and computer engineering must have a B.S. degree in electrical and computer engineering or a closely related discipline. Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the associate dean for graduate studies.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

## Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.

2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. Demonstrate abilities in research: Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor's degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master's degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master's degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

### Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

### Admission to candidacy

Before admission to doctoral candidacy, students must have: (1) completed required course work, (2) successfully completed the comprehensive examinations and (3) fulfilled all additional departmental requirements. A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

### Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

## Curriculum requirements

### M.S. to Ph.D. curriculum

Courses	Credit hours
<b>Concentration component</b> – EGRE course work (EGRE 500 level or higher, or courses approved by the advisory committee) This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.	6
<b>Option electives</b> – engineering or science course work (including EGRE, ENGR, EGRB, EGRM, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM, 500 level or higher, or courses approved by the advisory committee) This component allows the student to take courses in either engineering or science with approval of the student's adviser.	3
<b>Directed research</b> This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee. EGRE 697 Directed Research in Electrical and Computer Engineering	21

program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goals

The goal of the M.S. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. **Advanced technical skills:** To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences in order to respond directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
2. **Communication:** To produce graduates who possess a facility with both written and oral communications so that engineers will be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems stemming from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

## Student learning outcomes

Graduates of the M.S. in Engineering degree program will be able to demonstrate:

1. The ability to apply advanced knowledge of mathematics, science or engineering
2. The ability to communicate effectively
3. The ability to identify, formulate and solve engineering problems

## Degree requirements

### Thesis option

In addition to the [VCU Graduate School graduation requirements](#), students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours of concentration-specific course work, 12 credit hours in electives and six credit hours in thesis research. The student's adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student's advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student's adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student's advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

There are three components of each M.S. in Engineering thesis curriculum:

1. **Concentration-specific component:** This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline. Students seeking to take course work and conduct their research in the engineering concentration must contact the graduate program coordinator or department chair of engineering for detailed information about that option.
2. **Electives component:** This component allows the student to take courses in either engineering or science with approval of the student's adviser. The option can be tailored to meet the individual student's academic goals and research interests.
3. **Directed research component:** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

### Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student's adviser and the assistant dean for graduate affairs of the School of Engineering. The student's adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student's program must be designated as 600 level or above.

There are two components of each M.S. in Engineering non-thesis curriculum:

**Concentration-specific component:** This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.

**Electives component:** This component allows the student to take courses in either engineering or science with approval of the student's adviser.

The concentration can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the engineering concentration should contact the appropriate graduate program coordinator or department chair of engineering for detailed information about that option.

## Curriculum requirements

### Thesis option

Courses	Credit hours
Concentration-specific component: ENGR course work	12
Electives: engineering or science course work	12
Directed research: ENGR 697 Directed Research	6
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

### Non-thesis option

Courses	Credit hours
Concentration-specific component: ENGR course work	15
Electives: engineering or science course work	15
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Admission requirements

Engineering, Master of Science (M.S.) with a concentration in chemical and life science engineering			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1 (Mar 15 for financial assistance)	GRE – General  International students require TOEFL (A minimum score of 100 in the TOEFL exam is required to be considered for financial assistance.)
	Spring	Nov 15	

In addition to the [general admission requirements of the VCU Graduate School](#) and the School of Engineering, applicants to the chemical and life science engineering concentration must have a B.S. degree in chemical engineering or a closely related discipline.

#### Registration

Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program mission

The mission of the M.S. in Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

### Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

### Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements.

#### Thesis option

Students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours in concentration course work, 12 credit hours in concentration electives course work and six credit hours in thesis research. The

student's adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student's advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student's adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student's advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

#### Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student's adviser and the assistant dean for graduate affairs of the School of Engineering. The student's adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student's program must be designated as 600 level or above.

### Curriculum requirements

There are three components of each M.S. in Engineering option:

1. **Concentration (option-specific) component:** This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.
2. **Option electives component:** This component allows the student to take courses in either engineering or science with approval of the student's adviser (e.g. CLSE, ENGR, CHEM courses at 500 level or higher)
3. **Directed research component:** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

The option can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the chemical and life science engineering concentration should contact the graduate program coordinator or department chair of chemical and life science engineering for detailed information about that concentration.

#### Thesis option

Courses	Credit hours
<b>Concentration component – CLSE course work</b>	<b>12</b>
Required	
CLSE 654 Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655 Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 656 Advanced Chemical Reaction Engineering	3
Choose additional CLSE course work at the 500 level or higher	3
<b>Option electives – engineering or science course work</b>	<b>12</b>
<b>Directed research</b>	<b>6</b>
CLSE 690 Research Seminar in Chemical and Life Science Engineering	
CLSE 697 Directed Research in Chemical and Life Science Engineering	

**Total graduate credit hours required (minimum)** **30**

#### Non-thesis option

Courses	Credit hours
<b>Concentration component – CLSE course work</b>	<b>15</b>
Required	
CLSE 654 Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655 Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 656 Advanced Chemical Reaction Engineering	3
Choose additional CLSE course work at the 500 level or higher	6
<b>Option electives – engineering or science course work</b>	<b>15</b>

**Total graduate credit hours required (minimum)** **30**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements.

### Thesis option

Students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours in concentration course work, 12 credit hours in concentration electives course work and six credit hours in thesis research. The student's adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student's advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student's adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student's advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

### Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student's adviser and the assistant dean for graduate affairs of the School of Engineering. The student's adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student's program must be designated as 600 level or above.

## Curriculum requirements

### Thesis option

Courses	Credit hours
<b>Concentration component</b> – EGRE course work (EGRE 500 level or higher, or courses approved by the advisory committee)	12
This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.	

**Option electives** – engineering or science course work (including EGRE, 12 ENGR, EGRB, EGRM, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM, 500 level or higher, or courses approved by the advisory committee)

This component allows the student to take courses in either engineering or science with approval of the student's adviser.

**Directed research component:** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee. 6

EGRE 697 Directed Research in Electrical and Computer Engineering

**Total graduate credit hours required (minimum) 30**

The option can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the electrical and computer engineering concentration should contact the graduate program coordinator or department chair of electrical and computer engineering for detailed information about that concentration.

#### Non-thesis option

Courses	Credit hours
---------	--------------

**Concentration component** – EGRE 500 level or higher 15

This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.

**Option electives** – engineering or science course work (including EGRE, 15 ENGR, EGRB, EGRM, EGMN, CMSC, CLSE, 500 level or higher)

This component allows the student to take courses in either engineering or science with approval of the student's adviser.

**Total graduate credit hours required (minimum) 30**

The option can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the electrical and computer engineering concentration should contact the graduate program coordinator or department chair of electrical and computer engineering for detailed information about that concentration.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

## Department of Biomedical Engineering

The Department of Biomedical Engineering offers programs at the baccalaureate, master's and doctoral level.

Biomedical engineering provides in-depth study in a variety of specialization areas including biomedical imaging systems, orthopaedic biomechanics, tissue and cellular engineering, biomaterials, artificial organs, human-computer interfaces, cardiovascular devices and rehabilitation engineering. The programs allow students to participate in cutting-edge research in one of the nations most advanced engineering facilities. The department has ongoing collaborations with numerous industries, federal laboratories, the VCU science departments, the university's MCV Campus, the Hunter Holmes McGuire Veterans Affairs Medical Center, the Virginia BioTechnology Research Park and numerous biomedical and clinical programs throughout the VCU Medical Center's MCV Hospitals.

Biomedical Engineering, Master of Science (M.S.)

Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [combined]

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Biomedical Engineering, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jun 1 (Feb 15 for financial assistance)	GRE – General
	Spring	Nov 15	International students require TOEFL
<b>Special requirements:</b> Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the department chair and the associate dean for graduate studies.			

In addition to the [general admission requirements of the VCU Graduate School](#), biomedical engineering has the following admission criteria for all entering graduate students:

1. Minimum GPA of 3.0 during the previous 60 credit hours (for applicants with a B.S.)
2. Minimum GRE score of 300 (combined verbal reasoning and quantitative reasoning) including a minimum 148 on the quantitative reasoning
3. Minimum TOEFL score of 101 Internet-based for students whose first or native language is not English

Biomedical engineering will accept a maximum of six credit hours for transfer into either the M.S. or Ph.D. program if the original grades for such courses are B or higher (or equivalent).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the Doctor of Philosophy in Biomedical Engineering is to educate biomedical engineering students to be significant contributors in health care and in research and development in biomedicine and bioengineering. The curriculum closely links technical fundamentals in science, engineering and the life sciences, together with the ability to function on multidisciplinary teams, to communicate effectively and to achieve the knowledge tools necessary for lifelong learning.

The purpose of the program is to:

1. Provide students with a graduate education that prepares them for current and future challenges in biomedical engineering
2. Produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences — responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
3. Produce graduates who possess a facility with both written and oral communications — emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership

4. Produce graduates who demonstrate creativity and innovation in solving technological problems — stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Graduates possess the ability to formulate, analyze and solve problems, analytically and/or experimentally, in the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills. Graduates can work effectively in teams to solve biomedical and/or clinical problems including the interconnection of engineering and clinical personnel toward the solution of problems of compelling clinical and biomedical interest and need, with particular reference to the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills.

## Student learning outcomes

1. Fundamentals in math and science: Graduates can analyze and solve problems in the foundation areas of mathematics, the sciences and statistics.
2. Fundamentals in engineering: Graduates can analyze and solve problems in the foundation engineering areas of instrumentation, signal processing, mechanics and materials.
3. Fundamentals in life science: Graduates can analyze and solve problems in the life sciences, including physiology, and understand the relationship between the life sciences, mathematics and engineering.
4. Experimental skills: Graduates can formulate lab experiments, collect and analyze data from physical and simulated systems to solve technical problems, and conduct physiology and life science laboratory experiments to integrate engineering and physiology.
5. Design and analysis: Graduates can design and implement an optimized solution to meet a set of specifications and constraints; graduates can design systems used in biomedical applications which involve the interconnection between engineering and the life sciences; graduates can analyze biomedical problems and develop solutions which are originally open-ended.
6. Innovation and creativity: Graduates can examine technological challenges in biomedical and health-related topics in new ways and develop innovative solutions.
7. Communication skills: Graduates can organize and write well-organized and accurate theses/dissertations/technical reports, including appropriate citations; graduates can deliver oral presentations to peers and supervisors using the latest presentation technologies.
8. Lifelong learning and multidisciplinary teams: Graduates can understand the need for and have an appreciation of multidisciplinary teams in biomedical engineering and related fields; graduates have a recognition of the need for, and an ability to engage in, lifelong learning; graduates have an understanding of the knowledge tools necessary to achieve lifelong learning and career development.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements:

The Ph.D. in Biomedical Engineering program is nominally a three-year program. Prior evidence of completion of physiology and/or statistics may result in a waiver of the requirements for these courses as determined by the graduate program director and/or the department chair. These credit hours would be replaced by other graduate-level didactic course work reflective of the field of study. A period of residence of at least three consecutive terms is required. Residency is defined as registration for at least nine credit hours per term. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Doctor of Philosophy degree.

At the conclusion of the first year of doctoral study (or when the core course requirements have been satisfied), each doctoral student must successfully complete written and oral portions of a comprehensive examination. This examination is designed to test the student on fundamental knowledge in engineering as evidenced by the core (and related elective) courses within the curriculum. Upon completion of this examination, a doctoral student is permitted to initiate a doctoral research project and to complete additional course work consisting of biomedical engineering, clinical and science electives.

Upon completion of all course work and the intended research, a doctoral student must prepare a dissertation describing the completed research. A dissertation defense, under the direction of the advisory committee, will be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge needed to complete the research. Upon successful completion of the defense and dissertation, the doctoral student may apply for graduation from Virginia Commonwealth University with the Doctor of Philosophy in Biomedical Engineering.

## Curriculum requirements

Courses	Credit hours
<b>Required biomedical engineering courses</b>	<b>12</b>
EGRB 507 Biomedical Electronics and Instrumentation	3
EGRB 511 Fundamentals of Biomechanics	3
EGRB 603 Biomedical Signal Processing	3
EGRB 613 Biomaterials	3
<b>Required courses in other departments</b>	<b>8</b>
Physiology and statistics (PHIS 501; BIOS or STAT at 500 level or above)	
<b>Minimum elective courses</b>	<b>15</b>
(e.g. EGRB, EGRM, ENGR, PHYS, MATH, BIOL, PHIS, BIOC at 500 level or above)	
<b>Research</b>	<b>37</b>
EGRB 690 Biomedical Engineering Research Seminar	4
EGRB 697 Directed Research in Biomedical Engineering	33
(required at a level to be determined by each student's graduate advisory committee)	
<b>Total graduate credit hours required (minimum)</b>	<b>72</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Program website:** [biomedical.egr.vcu.edu](http://biomedical.egr.vcu.edu)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Biomedical Engineering, Doctor of Philosophy (Ph.D.)

Biomedical Engineering, Master of Science (M.S.)

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

The M.D./Ph.D. program seeks to train physician-scientists for careers that bridge basic and clinical science. Physician-scientists will translate laboratory discoveries into better patient outcomes. The program begins two months prior to the first year of medical school. These students arrive on campus for orientation and complete two laboratory rotations before the start of medical school classes. They complete the first two years of medical school and, after taking the first part of the U.S. National Medical Licensing Examination, enter a Ph.D.-granting department or program as a graduate student. Graduate-level course work, examinations and research will be guided by the dissertation adviser and the dissertation committee, with oversight by members of the M.D./Ph.D. steering committee. The main undertaking at this phase is laboratory research that leads to the Ph.D. dissertation. After completion of doctoral degree requirements, students move to the clinical year of medical school. Students may begin the clinical year of medical school immediately after completion of doctoral degree requirements, regardless of the time in the calendar year, and, 14 to 16 months later, may complete their medical school requirements. These students are exempt from the major part of the fourth year of medical school.

Prospective students submit applications through the American Medical College Application Service. Upon review of the AMCAS documents, qualified applicants are sent supplemental admission materials, including an application for the M.D./Ph.D. program. Those invited to Richmond for interviews will spend one day in the standard interview for the School of Medicine and will spend a second day interviewing with members of the M.D./Ph.D. steering committee, as well as touring labs of faculty scientists.

Admission of medical students to the Ph.D. phase of training takes place formally following completion of the M-II year of M.D. training. A copy of the student file is transferred to the Office of Graduate Education and the individual is formally accepted to Ph.D. training by the VCU Graduate School.

The requirements for a combined professional school/graduate school degree in the School of Medicine are equivalent to those required of students seeking a graduate degree alone and are determined by the individual program.

For additional information, please see the program Web site at [mdphd.vcu.edu](http://mdphd.vcu.edu).

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of both programs.

Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the department chair and the associate dean for graduate studies.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

**Program goal**

The goal of the Master of Science in Biomedical Engineering program is to educate students to be significant contributors in health care and in research and development in biomedicine and bioengineering. The curriculum closely links technical fundamentals in science, engineering and the life sciences, together with the ability to function on multidisciplinary teams, to communicate effectively and to achieve the knowledge tools necessary for lifelong learning.

**Program purpose**

1. Provide students with a graduate education that prepares them for current and future challenges in biomedical engineering
2. Produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences — responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
3. Produce graduates who possess a facility with both written and oral communications — emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
4. Produce graduates who demonstrate creativity and innovation in solving technological problems — stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Graduates possess the ability to formulate, analyze and solve problems, analytically and/or experimentally, in the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills. Graduates can work effectively in teams to solve biomedical and/or clinical problems including the interconnection of engineering and clinical personnel toward the solution of problems of compelling clinical and biomedical interest and need, with particular reference to the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills.

**Student learning outcomes**

1. Fundamentals in math and science: Graduates can analyze and solve problems in the foundation areas of mathematics, the sciences and statistics.
2. Fundamentals in engineering: Graduates can analyze and solve problems in the foundation engineering areas of instrumentation, signal processing, mechanics and materials.
3. Fundamentals in life science: Graduates can analyze and solve problems in the life sciences, including physiology, and understand the relationship between the life sciences, mathematics and engineering.
4. Experimental skills: Graduates can formulate lab experiments, collect and analyze data from physical and simulated systems to solve technical problems, and conduct physiology and life science laboratory experiments to integrate engineering and physiology.
5. Design and analysis: Graduates can design and implement an optimized solution to meet a set of specifications and constraints; graduates can design systems used in biomedical applications which involve the interconnection between engineering and the life sciences; graduates can analyze biomedical problems and develop solutions which are originally open-ended.
6. Innovation and creativity: Graduates can examine technological challenges in biomedical and health-related topics in new ways and develop innovative solutions.
7. Communication skills: Graduates can organize and write well-organized and accurate theses/dissertations/technical reports, including appropriate citations; graduates can deliver oral presentations to peers and supervisors using the latest presentation technologies.
8. Lifelong learning and multidisciplinary teams: Graduates can understand the need for and have an appreciation of multidisciplinary teams in biomedical engineering and related fields; graduates have a recognition of the need for, and an ability to engage in, lifelong learning; graduates have an understanding of the knowledge tools necessary to achieve lifelong learning and career development.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), this program is nominally a two-year program leading to the M.S. in Biomedical Engineering. Prior evidence of completion of physiology may result in a waiver of the requirements for this course as determined by the graduate program director and/or the department chair. These credit hours should be replaced by other graduate-level didactic course work reflective of the field of study. Each Master of Science student must successfully complete a thesis describing his or her individualized research project. At the completion of the research, the student must present the research to the advisory committee and undergo an examination of the research results, thesis documentation and underlying educational foundation necessary to have successfully completed the research. Upon successful completion of the examination and thesis, the student may apply for graduation from Virginia Commonwealth University with the Master of Science in Biomedical Engineering.

## Curriculum requirements

Courses	Credit hours
<b>Required biomedical engineering courses</b>	<b>9</b>
EGRB 511 Fundamentals of Biomechanics	3
EGRB 603 Biomedical Signal Processing	3
EGRB 613 Biomaterials	3
<b>Required physiology course</b>	<b>5</b>
PHIS 501 Mammalian Physiology	5
<b>Minimum elective courses</b>	<b>9</b>
(e.g. EGRB, EGRM, ENGR, PHYS, MATH, BIOL, PHIS BIOC at 500 level or above)*	
<b>Research</b>	<b>7</b>
EGRB 690 Biomedical Engineering Research Seminar	1
EGRB 697 Directed Research in Biomedical Engineering**	6
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>

\* The nine credit hours listed are minimum elective courses required for graduation. However, a student's advisory committee may require additional electives reflective of the field of study.

\*\* Directed research (EGRB 697) is required at a level to be determined by each student's graduate advisory committee.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

[Student handbook](#) is available on the School of Engineering website.

## Department of Chemical and Life Science Engineering

Chemical and life science engineering represents the formal interaction of chemical engineering with the life sciences. VCU's Department of Chemical and Life Science Engineering is uniquely poised to bring these two premier disciplines together to form a program distinct in the nation. Programs are offered at the undergraduate and graduate levels.

Life science engineering — with interest areas including stem cell and stem cell-derived tissue engineering, biosciences/biotechnology, cellular engineering, biochips and biosensors, bioinformatics and molecular biocomputing, genetic and protein molecular engineering, environmental life science engineering, and molecular- and cellular-based therapeutics — is the fastest growing of all industries that currently employ engineers.

Chemical engineering and life science engineering share a broad range of common foundational knowledge bases, including the principles of mass and energy balances, transport phenomena and thermodynamics, surface and interfacial science, and reaction science and engineering. Strong academic and research programs in chemical and life science engineering will provide a wealth of exciting professional opportunities for successful graduates of the VCU program.

The bachelor's program offers tracks in chemical engineering and life science engineering, and a chemical and life science engineering track is available in the Master of Science in Engineering program, as well as the Ph.D. in Engineering program. The CLSE tracks in the graduate-level programs are designed primarily for students who are interested in applying chemical and engineering principles toward important contemporary topics including process design, metabolic engineering, biosensor and biochip development, high-performance polymers in medicine and energy conversion, polymer surface science, and environmentally benign polymer processing technologies. Major emphasis is placed on chemical and life science engineering fundamentals with additional emphasis on applied chemistry and life sciences.

## Administration

### B. Frank Gupton

Research Professor and Interim Chair

## Chemical and life science engineering courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to chemical and life science engineering ([CLSE](#)) courses.

Follow these links to general engineering ([ENGR](#)) courses or the ([ENGZ](#)) laboratory.

## Department of Computer Science

The Department of Computer Science offers undergraduate and graduate programs. The Bachelor of Science in Computer Science is a rigorous, highly concentrated curriculum of computer science courses. It includes advanced study in several important areas of computer science and provides a strong foundation in this discipline. Every course is taught by full-time faculty members who also serve as advisers to both undergraduate and graduate students.

The master's degree program emphasizes continuing self-development of individuals currently engaged in science-, technology- and engineering-related fields. It prepares persons who have completed undergraduate majors in these fields for entry into careers in areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program. The program offers courses in a wide range of areas in computer science including machine learning, artificial intelligence, cybersecurity and cloud computing, data mining, bioinformatics, and medical informatics.

## Admission requirements

Computer and Information Systems Security, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE or GMAT
	Spring	Nov 1	International students require TOEFL

Applicants must meet all [general admission requirements of the VCU Graduate School](#).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the School of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and

economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

For additional information, please [visit the program website](#).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program mission

The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

## Program goal

Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU's program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student's ability to see the larger organizational, social, political, ethical and economic aspects of information security.

## Student learning outcomes

Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component, an elective component and a practice component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science. The practice component, taken near the end of the student's course work, ensures an opportunity for the student to apply principles to practice.

## Curriculum requirements

Prerequisites are determined by the faculty adviser at the time of admission.

Courses	Credit hours
Core component	15

CISS/CMSC 618 Database and Application Security	3
CISS/CMSC 622 Network and Operating Systems Security	3
CISS 624/CMSC 620 Applied Cryptography	3
CISS 634 Ethical, Social and Legal Issues in Computer and Information Systems Security	3
CISS/INFO 644 Principles of Computer and Information Systems Security	3

#### Elective component 12

Choose 12 credit hours of CISS courses or, with the approval of program co-directors, courses offered by the departments of Computer Science, Information Systems, Criminal Justice or Forensic Science.

#### Practice component 3

CISS 693 Practice of Computer and Information Systems Security	3
--	---

#### Total graduate credit hours required (minimum) 30

### Degree candidacy requirements

### Admission requirements

Computer Science, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jun 1 (Feb 15 for financial assistance)	GRE – General International students require TOEFL
	Spring	Nov 15	

In addition to the [general admission requirements of the VCU Graduate School](#) and the School of Engineering, applicants to the M.S. program in computer science must satisfy the requirements outlined below.

Acceptance of an applicant is based upon the recommendation of the graduate committee with approval of the program chair and the associate dean for graduate studies.

Undergraduate education in computer science or in a related discipline or completion of Post-baccalaureate Undergraduate Certificate in Computer Science is highly preferred.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program mission

The program is designed to develop research skills and educate CS students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic and research courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

### Program goals

The goal of the Master of Science in Computer Science program is to provide students with a graduate education that prepares them for current and future challenges in the field of computer science. The major goal is to educate graduates who will possess the ability to formulate, analyze and solve problems, analytically and/or experimentally (in software and hardware), in computer science and industry. The master's program will:

1. Provide students with training in state-of-the-art on different areas of computer science and the computing industry
2. Provide students with professional preparation for their future careers
3. Prepare students to tackle current and future challenges in the field of computer science

## Student learning outcomes

1. Apply advanced knowledge of mathematics, science and engineering – Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science and/or engineering.
2. Problem analysis, design and implementation on computer systems – Graduates will demonstrate an ability to analyze problems and to design and implement solutions on computer systems.
3. Communicate effectively – Graduates will demonstrate an ability to communicate effectively.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students may choose either a thesis or non-thesis degree program. The thesis option is suggested for students who have a strong research interest or those who wish to pursue a Ph.D. For students not in the accelerated B.S.-M.S. program, at most, six non-CMSC credit hours may be applied toward the degree. Students in the accelerated B.S.-M.S. program should refer to the rules described in the bulletin.

### Non-thesis option

A minimum of 30 credit hours, including:

1. At least two courses from the theory foundation area (CMSC 501, CMSC 526, CMSC 620/CISS 624, CMSC 621), one of which must be CMSC 501; at least two courses from the systems foundation area (CMSC 502, CMSC 506, CMSC 608, CMSC 618, CMSC 622); at least two courses from the applied computer science foundation area (CMSC/CISS 609, CMSC 630, CMSC 635, CMSC 678).
2. At least 15 credit hours of CMSC courses at the 600 level or greater

Up to 30 percent of a student's non-research graduate-level credit hours can be transferred into the M.S. program from another college or university with approval of the program and the Graduate School.

The number of credit hours that may be transferred by students pursuing an M.S. in Computer Science through the Commonwealth Graduate Engineering Program is limited by CGEP policy to 50 percent of the required credit hours. All transfer credit hours must be approved by the graduate committee using the graduate course transfer form.

For students not in the accelerated B.S.-M.S. program, courses that are transferred are subject to the following rules:

1. These credit hours must not have been applied to any other degree; however, they may have been taken as part of a post-baccalaureate graduate certificate program.
2. No more than six credit hours in graduate-level courses taken at VCU before admission to the M.S. program may be counted toward the M.S. degree.

At most, three credit hours of CMSC 697 or CMSC 692 may be applied toward the degree.

### Thesis option

Students will have to satisfy the following:

1. A minimum of 24 non-thesis credit hours, including
  - a. At least two courses from the theory foundation area (CMSC 501, CMSC 526, CMSC 620/CISS 624, CMSC 621), one of which must be CMSC 501; at least two courses from the systems foundation area (CMSC 502, CMSC 506, CMSC 608, CMSC 618, CMSC 622); at least two courses from the applied computer science foundation area (CMSC/CISS 609, CMSC 630, CMSC 635, CMSC 678)
  - b. At least 12 credit hours of CMSC courses at the 600 level or greater
2. Six credit hours of CMSC 697 Directed Research

Up to 30 percent of a student's non-research graduate-level credit hours can be transferred into the M.S. program from another college or university.

The number of credit hours that may be transferred to VCU from other participating institutions by students pursuing an M.S. in Computer Science through the Commonwealth Graduate Engineering Program is limited by CGEP policy to 50 percent of the required credit hours.

All transfer credit hours must be approved by the graduate committee using the graduate course transfer form.

For students not in the accelerated B.S.-M.S. program, courses that are transferred are subject to the following rules:

1. These credit hours must not have been applied to any other degree; however, they may have been taken as part of a post-baccalaureate certificate program.
2. No more than six credit hours of graduate-level courses taken at VCU before admission to the M.S. program may be counted toward the M.S. degree.

Students seeking to take a research credit course [CMSC 692 Independent Study (maximum three credit hours) or CMSC 697 Directed Research (maximum 6 credit hours)] must find a faculty adviser willing to supervise the research.

In order to advance to master's candidacy, the student must have: (1) completed required course work; (2) have a minimum 3.0 GPA in graduate course work; (3) have no more than six semester credit hours or 20 percent of total semester hours attempted (whichever is greater) at C or below level (C, D, F); and (4) be in compliance with the time to degree, which is 6 years for a master's degree.

The student will produce a written thesis in the format specified by the VCU Graduate School and will publicly defend the thesis before a committee consisting of the thesis adviser, at least one other faculty member from the computer science program and a faculty member from outside of the computer science program.

## Curriculum requirements

(804) 828-9671

**Program website:** [computer-science.egr.vcu.edu/graduate](http://computer-science.egr.vcu.edu/graduate)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Computer and Information Systems Security, Master of Science (M.S.)

Computer Science, Master of Science (M.S.)

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

Students accepted into this selective program accomplish both the B.S. and M.S. degrees within five years by taking additional computer science courses within the first four years of the program. Some of these courses will replace general electives in the B.S. program.

#### Program administration and minimum requirements

In order to be accepted students must:

1. Apply to the computer science graduate committee during the first semester after they have completed the last of the following sequence of classes: CMSC 101, 255, 256, 302, 303 and 311. Transfer students who enter with all of these courses (or equivalents) must apply during their first semester at VCU.
2. Have a minimum GPA of 3.4 based on CMSC 101, 255, 256, 302, 303 and 311; all grades in any repeated courses will be included in computing this GPA. Students transferring these courses into the program will have the grades from their previous institution included in computing this GPA only for purposes of determining eligibility for this program.
3. Have a minimum overall GPA of 3.0.

Students accepted into the accelerated B.S. to M.S. program are not required to complete the GRE for admission to the M.S. portion of the program.

#### Minimum requirements for accepted students to fulfill the program

Students accepted into the program are required to follow the curriculum outlined below in order to complete both degrees in five years.

In order to complete the B.S. students must present:

1. All specific general education and major requirements for the B.S. degree
2. Six CMSC 500-level credits beyond those required for the computer science major, which count as general electives toward the B.S. and as CMSC electives toward the M.S.
3. Additional credits to total 120 (including 45 upper-level credits)
4. Six additional CMSC 500-level credits that do not count toward the B.S. degree (required during the first four years in order to be on track to complete the M.S. during the fifth year)
5. 126 credit hours total completed in the first four years.

Upon completion of all requirements for the undergraduate degree, the B.S. may be awarded and the student will formally apply to the master's program. Providing the student has maintained a minimum GPA of 3.2 in the major, acceptance to the

M.S. program is guaranteed. All requirements for the B.S. must be met before students are eligible to take any 600-level course.

In order to complete the M.S.:

1. As listed above (Nos. 2 and 4) and taken during the first four year:
  - a. Six CMSC 500-level credit hours beyond those required for the computer science major, which count as general electives toward the B.S. and as CMSC electives toward the M.S.
  - b. Six additional CMSC 500-level credits that do not count toward the B.S. degree
2. Taken during fifth year:
  - a. 15 CMSC 600-level credits
  - b. Three CMSC graduate-level credits
  - c. 30 credit hours total completed for the M.S. degree.

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of both programs, including application instructions and deadlines, contact information and all degree requirements.

## Department of Electrical and Computer Engineering

The Department of Electrical and Computer Engineering prepares students for highly competitive, national placement in electrical and computer engineering employment and graduate education by providing a thorough grounding in electrical science and design, together with a sound foundation in mathematics, basic sciences and life skills.

The department offers baccalaureate degrees in computer engineering and electrical engineering, in addition to minors in both areas, as well as the option to choose course work appropriate for a pre-medicine or pre-dentistry curriculum. An electrical and computer engineering track is available in the Master of Science in Engineering as well as the Ph.D. in Engineering. The track is designed to prepare students for practice, research and/or teaching of electrical and computer engineering at the advanced level by providing intensive preparation for professional practice in the microelectronics, nanoelectronics, computer engineering and controls and communications aspects of electrical and computer engineering. At the advanced level, this track prepares individuals to perform original, leading edge research in the broad areas of microelectronics, nanoelectronics, controls and communications and computer engineering.

The curricula of the department provide a strong foundation in the fundamentals of the profession, including engineering problem solving, breadth in the major facets of the profession and the opportunity to specialize in today's critical areas of computer engineering, communication systems and microelectronics. Graduates will be well prepared for constant technological change and growth through lifelong learning.

## Administration

## Electrical and computer engineering courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to electrical and computer engineering ([EGRE](#)) courses.

Follow these links to general engineering ([ENGR](#)) courses or the ([ENGZ](#)) laboratory.

## Department of Mechanical and Nuclear Engineering

Mechanical engineering is one of the oldest and broadest engineering disciplines. Mechanical engineers design and analyze machines of all types including

automobiles, airplanes, rockets, submarines, power generation systems, biomedical instrumentation, robots, manufacturing systems, household appliances and many, many more. In addition to well-known areas such as nuclear energy, nuclear propulsion and nuclear medicine, nuclear engineers are involved in many other applications of nuclear science and technology in fields as diverse as agriculture, industry, homeland security, forensics, environmental protection and even art. The Department of Mechanical and Nuclear Engineering provides quality graduate and undergraduate education through the following degree-granting programs:

- B.S. in Mechanical Engineering (general mechanical engineering curriculum)
- B.S. in Mechanical Engineering (nuclear engineering concentration)
- M.S. in Mechanical and Nuclear Engineering (thesis and non-thesis options)
- Ph.D. in Engineering (mechanical engineering track)

Current areas of research within the department include but are not limited to energy conversion systems, smart materials, corrosion, medical devices, aerosol science, sensors, radiation detection and measurement, nuclear reactor design, robotics, fluid mechanics, nanotechnology and biomechanics.

**Program website:** [mechanical-and-nuclear.egr.vcu.edu/academics/graduate](http://mechanical-and-nuclear.egr.vcu.edu/academics/graduate)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Mechanical and Nuclear Engineering, Master of Science (M.S.)

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Mechanical and Nuclear Engineering, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jun 1 (Feb 15 for financial assistance)	GRE – General
	Spring	Nov 15	International students require TOEFL

In addition to the [general admission requirements of the VCU Graduate School](#), the following comprise the admissions requirements for the mechanical and nuclear engineering Ph.D. program:

1. Proof of graduation from an accredited college or university with either a bachelor's or a master's degree in mechanical engineering, nuclear engineering or a related discipline with a minimum grade point average of 3.0.
2. Demonstration of proficiency in spoken and written English. For international students, satisfactory scores on the TOEFL exam are necessary. The University minimum TOEFL score is 550 (paper-based) and 213 (computer-based). The following qualifiers must be submitted to meet the English-language requisite: 100 iBT (graduate) or 6.5 IELTS academic band score.
3. Submission of results of the Graduate Record Examination (minimum score for admission to be established annually by the MNE graduate committee).
4. Submission of at least three letters of recommendation from former instructors or other individuals qualified to evaluate the applicant's ability to engage in graduate study in mechanical and nuclear engineering.
5. Submission of a written statement of purpose that clearly demonstrates commitment to a career in mechanical and nuclear engineering.

The MNE graduate committee may admit students unconditionally or provisionally. Provisional admission may be granted when deficiencies are identified; these deficiencies should be remedied by the time specified by the admissions committee. At the end of the provisional period, the student's progress is evaluated. Failure to meet the goals set forth by the MNE graduate committee at the time of admission results in a show-cause notice. A response to this notice that is deemed unsatisfactory results in a recommendation for dismissal. The student has the right to appeal the recommendation for dismissal following procedures set forth by the School of Engineering and the VCU Graduate School. Remedial courses, or those designed to remove deficiencies, will not be accepted for credit hours toward the fulfillment of the course requirements for the Ph.D.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The Ph.D. curriculum will provide graduate-level training in both mechanical and nuclear engineering. Graduates of the program will be prepared for research and teaching careers in areas such as energy production, nuclear waste transport, storage and disposal, and the development of new mechanical devices for use in nuclear medicine. A set of required interdisciplinary core courses will train students on the interaction of radiation with engineering materials, radiation in heat and mass transfer as well as mathematical modeling and control of mechanical systems incorporating radioactive elements. Technical electives in both mechanical and nuclear engineering will allow students to pursue in-depth study relevant to their selected research topics. Dissertation topics pursued as directed research credit hours will be devoted to open-ended research projects at the intersection of mechanical and nuclear engineering.

1. Advanced technical skills: To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for

effective, productive engineers and of providing economic development for the region, state and nation

2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

## Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), the Ph.D. degree will require a minimum of 68 credit hours beyond the B.S. degree or a minimum of 36 credit hours beyond the M.S. degree. Students may enter the Ph.D. program with either a B.S. or M.S. degree.

### Transfer policy

Transfer courses must be approved by the MNE graduate committee and must fulfill all requirements of the VCU Graduate School as described in the student handbook. For students entering with a B.S. degree, a maximum of nine credit hours of technical electives may be transferred from another VCU program or outside institution and, if not applied previously toward another degree, may be applied toward the Ph.D.

### Qualifying examination

Graduate students must pass a written qualifying exam consisting of five sections. Each section will consist of questions taken from the subject matter covered in one of the five core courses. The QE is to be taken after completion of the 15 credit hours of required core courses and, preferably, within 18 months of enrollment. To be eligible to take the QE exam, students must be accepted into the Ph.D. program and have an overall minimum GPA of 3.0 and the minimum GPA for courses within the MNE program must be 3.0 as well. The QE is held during the spring semester of each academic year, normally during the second week of May. In order to apply to take the QE, the student must complete Form MNE 104 by the first day of classes in the spring semester and submit the signed copies to the adviser and graduate program director, who will make the decision to allow the student to take the QE.

A student must pass all five sections of the QE. A course grade of A in one (and only one) of the core courses may be used to pass the corresponding section of the QE exam. Within two weeks of administration, the student will be notified of their results.

In the event that a student fails any section of the QE, they may retake the failed section(s) one time only. Failure to pass any section of the QE for the second time will result in dismissal from the Ph.D. program.

### Research adviser and graduate dissertation committee

Students will be expected to select a research adviser and dissertation committee within 12 months of enrollment. The dissertation committee will consist of five faculty members, including the primary research adviser and at least two other faculty members from the Department of Mechanical and Nuclear Engineering. This committee reviews and votes to approve or disapprove the student's dissertation research proposal, oral candidacy exam, and the final Ph.D. dissertation and oral defense. This committee also makes the final recommendation to award the Ph.D. degree. All voting members of the committee must be members of the graduate faculty. Additional, nonvoting members may serve on the committee with the approval of the MNE graduate program director.

### Oral candidacy examination

Within nine months after passing the qualifying examination the student will submit one copy of an original dissertation research proposal based upon their proposed research project to each member of his or her dissertation committee. The proposal consists of the research topic and proposed research plan. The proposal should include a thorough literature review of the topic and contain information sufficient to judge the feasibility, scope and potential impact of the research. The dissertation committee will then administer an oral candidacy exam based on the material submitted in the dissertation research proposal. The format of the OCE is an oral presentation by the candidate with questions by the dissertation committee members. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the OCE. If a student fails the OCE, one re-examination may be given with the consent of the dissertation committee. Failure to pass the second OCE will result in dismissal from the program.

### Dissertation defense

No earlier than six months after passing the oral candidacy examination, the student will defend the dissertation in an open forum administered by the dissertation committee. At least two weeks prior to the defense, the candidate will submit a written copy of the dissertation to each committee member and schedule a date for the defense. The defense will be advertised and faculty and student colleagues will be invited to attend. During the defense, the student will present a detailed summary of their research project, which should be the original problem presented and approved during the oral candidacy examination. If a solution of the original problem proves elusive for reasons beyond the student's control, the student may be allowed to redirect the research with permission from the dissertation committee and find an alternate pathway to the solution of a redefined problem. The format of the dissertation defense will be a presentation by the student followed by questions from the dissertation committee and other attendees. After the first round of questions are completed, the non-committee members in attendance will be asked to leave and the dissertation committee members will hold a second round of questions in closed session. After the second round of questions is completed the student will be asked to leave and the committee members will deliberate privately. The problem presented and solved must be of sufficient importance and interest to warrant publication in a peer reviewed journal in the student's area of specialization. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the dissertation defense. If a student fails the dissertation defense, one re-examination may be given. Failure to pass the second dissertation defense will result in dismissal from the program.

Students entering with a B.S. degree who are terminated from the Ph.D. program because of a failure to pass the QE, oral candidacy exam or dissertation defense (but not for other reasons such as academic dishonesty) will have the option to continue toward the M.S. in Mechanical and Nuclear Engineering.

### Time limit

It is anticipated that students entering with a B.S. will complete the program in four years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of one credit hour per semester). All requirements for the Ph.D. degree must be completed within six years of passing the qualifying examination.

It is anticipated that students entering with an M.S. degree will complete the program in three years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of 1 credit hour per semester). All requirements for the Ph.D. must be completed within five years of passing the qualifying examination.

Any student may request a one-year extension of the maximum time for extenuating circumstances such as a medical situation. The graduate program committee will review and approve or deny all such requests. The maximum time cannot be extended longer than one year. Students who do not satisfy the degree requirements within the maximum time will be dismissed from the program.

Because of the maximum time limits imposed on students in the Ph.D. program, the program does not accept part-time students.

### Preparing Future Faculty Program

Students enrolled in the program will have the option and are strongly encouraged to participate in the Preparing Future Faculty Program. The VCU Graduate School provides graduate students with ongoing opportunities for academic and professional development. The PFFP at VCU offers a series of short courses and professional development opportunities for graduate students interested in

pursuing careers in higher education. The series is modeled on the national PFFP created by the Association of American Colleges and Universities. PFFP courses introduce graduate students to the roles and responsibilities of higher education; address teaching, learning and technology issues in the college classroom; and incorporate material on the academic job search and continued professional development. For those students who complete all course requirements, the capstone course is an internship/externship experience during which the student is mentored by a senior faculty member. The program offers access to resources and activities and service-learning experiences while providing networking opportunities with students and faculty from a wide range of disciplines as well as discipline-specific areas of study. Since most courses are one or two credit hours, students are able to add them easily into their academic program schedules.

## Curriculum requirements

### Requirements for students entering with a B.S. degree

Courses	Credit hours
<b>Core courses</b>	<b>15</b>
EGMN 503 Mechanical and Nuclear Engineering Continuum Mechanics*	3
EGMN 504 Mechanical and Nuclear Engineering Analysis*	3
EGMN 603 Mechanical and Nuclear Engineering Dynamic Systems	3
EGMN 604 Mechanical and Nuclear Engineering Materials	3
EGRN 610 Topics in Nuclear Engineering**	3

\*Students entering the Ph.D. program with a B.S. in Mechanical Engineering from VCU who have taken EGMN 503 or EGMN 504 as undergraduate technical electives must take replacement courses approved by the MNE graduate program director.

\*\*Not required for students entering with a B.S. in Nuclear Engineering. A replacement course approved by the MNE graduate program director must be taken and will count toward the required 15 credit hours of core courses.

### Technical elective component

Mechanical and nuclear engineering students, with the aid of their dissertation adviser and dissertation committee, will select technical elective courses with the following requirements:

At least six credit hours from courses under the mechanical engineering list

At least three credit hours from courses under the nuclear engineering list

Remaining nine credit hours selected from either list or other appropriate graduate-level courses approved by the dissertation adviser

### Mechanical engineering courses

ENGR 565 Design Optimization	3
ENGR 630 Technology, Security and Preparedness	3
EGRM 510 Solid Mechanics and Materials Behavior	3
EGRM 515 Vibrations	3
EGRM 525 Feedback Control	3
EGRM 545 Energy Conversion Systems	3
EGRM 551 Experimental Methods for Engineers	3
EGRM 555 Smart Materials	3
EGRM 561 Advanced Fluid Mechanics	3
EGRM 568 Robot Manipulators	3
EGRM 570 Introduction to Computational Fluid Dynamics	3
EGRM 580 Flow Control	3
EGRM 609 Advanced Characterization of Materials	3
EGRM 630 Advanced Biofluid Mechanics	3
EGRM 661 Computational Fluid Dynamics	3
EGRM 662 Advanced Turbomachinery Systems	3

ENGR 591 Special Topics in Engineering 3

#### Nuclear engineering courses

EGRM 602 Convective Heat Transfer 3  
 EGRN 510 Probabilistic Risk Assessment 3  
 EGRN 530 System Analysis of the Nuclear Fuel Cycle 3  
 EGRN 620 Reactor Theory 3  
 EGRN 630 Nuclear Power Plants 3  
 EGRN 640 Nuclear Safety 3  
 EGRN 650 Nuclear Radiation and Shielding 3

#### Directed research component 27

This component consists of dissertation research directed toward completion of Ph.D. degree requirements under the direction of a dissertation adviser and dissertation committee. Students can register for 1 to 15 credit hours of directed research in mechanical and nuclear engineering.

EGMN 697 Directed Research in Mechanical and Nuclear Engineering

#### Seminar component 8

EGMN 690 Mechanical and Nuclear Engineering Seminar

#### Total graduate credit hours required (minimum) 68

#### Notes:

1. A total of 21 credit hours from the core courses, technical electives or seminar (not including directed research credit hours) must be at the 600 level or higher.
2. In certain cases, independent study courses (ENGR 691) are offered by individual faculty members. Up to three credit hours of ENGR 691 may be taken as a technical elective course.

#### Requirements for students entering with an M.S. degree

#### Courses Credit hours

**Core courses 9**  
 EGMN 603 Mechanical and Nuclear Engineering Dynamic Systems\* 3  
 EGMN 604 Mechanical and Nuclear Engineering Materials\* 3  
 EGRN 610 Topics in Nuclear Engineering\* 3

\*Not required for students entering with a B.S. or M.S. in Nuclear Engineering or Mechanical and Nuclear Engineering. A replacement course approved by the MNE graduate program director must be taken and will count toward the required nine credit hours of core courses.

#### Directed research component 24

This component consists of dissertation research directed toward completion of Ph.D. degree requirements under the direction of a dissertation adviser and dissertation committee.

EGMN 697 Directed Research in Mechanical and Nuclear Engineering

#### Seminar component 3

EGMN 690 Mechanical and Nuclear Engineering Seminar

#### Total graduate credit hours required (minimum) 36

#### Notes:

1. A total of nine credit hours of core courses and seminar but not including directed research credit hours must be at the 600 level or higher.

2. Students entering with an M.S. will follow the same curriculum as the students entering with a B.S. with the above noted reduction in required credit hours.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

## Admission requirements

Mechanical and Nuclear Engineering, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1 (Feb 15 for financial assistance)	GRE – General
	Spring	Nov 15	International students require TOEFL

In addition to the [general admission requirements of the VCU Graduate School](#) and the School of Engineering, applicants to the mechanical and nuclear engineering degree must have a B.S. degree in mechanical engineering, nuclear engineering or a closely related discipline.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the M.S. in Mechanical and Nuclear Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. **Advanced technical skills:** To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

## Student learning outcomes

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.

3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), students must meet the following requirements.

The Master of Science in Mechanical and Nuclear Engineering program utilizes the faculty and research facilities of the Department of Mechanical and Nuclear Engineering to expose students to advanced and emerging technologies in mechanical and nuclear engineering. Research thrusts in the department include but are not limited to smart materials, micro/nanotechnology, energy conversion systems, sensors, aerosol science, nuclear engineering, fluid mechanics, medical devices, robotics and biomechanics.

The M.S. degree program offers a thesis or non-thesis option and can be tailored to meet the individual student's academic goals and research interests. Eighteen to 24 months of study usually are necessary to complete the requirements for the thesis-option. The non-thesis option generally requires 12 months of full-time study or up to four years of part-time study. A time limit of six calendar years, beginning at the time of first registration, is placed on work to be credited toward the master's degree. Generally, a maximum of six credit hours of approved graduate course work required for a master's degree may be transferred from another program at VCU or outside institution and applied toward the degree.

The following are the minimum credit hour requirements for the proposed graduate degree program options:

**M.S. thesis option** – minimum 30 credit hours including nine credit hours in core courses, 15 credit hours in technical electives (engineering, science or related areas) and six credit hours in directed research EGMN 697

**M.S. non-thesis option** – minimum 30 credit hours including 15 credit hours in concentration course work (EGRM or EGRN) and 15 credit hours in technical electives (engineering, science or approved courses)

The mechanical and nuclear engineering M.S. degree program contains three curricular components:

1. **Core component:** This component consists of three required core courses that provide the foundation of the M.S. curriculum. See below for specific course requirements.
2. **Technical elective component:** This component allows the student to take courses in either engineering, science or other areas with approval of the student's adviser and graduate program director.
3. **Directed research component:** This component emphasizes research directed toward completion of M.S. degree requirements under the direction of an adviser and thesis committee.

Depending on the option pursued, students will have to take courses from two or all three of the curricular components. Students should select their concentration component courses based upon their concentration areas. Selecting one concentration area over another does not preclude a student from choosing courses from other areas. In fact, students will be encouraged to take courses from both EGRM and EGRN areas. Sample curricula follow.

## Curriculum requirements

Courses	Credit hours
<b>Thesis option</b>	
Core component	9
Technical electives – engineering, science or related course work	15
Directed research	6
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>
<b>Non-thesis option</b>	
Core component	9
Technical electives – engineering, science or related course work	21

**Total graduate credit hours required (minimum)** **30**

### Core requirements

All full-time thesis master's students must register for and attend EGMN 690 Mechanical and Nuclear Engineering Seminar each semester. Part-time and non-thesis students are not required to register for the seminar, but they are encouraged to attend. All thesis students are required to give a research presentation as part of the seminar series at least once prior to graduation; non-thesis students must give a project presentation prior to graduation, based on an extension of work completed in a project-based course (see degree requirements below), as part of the seminar series. Note that EGMN 690 cannot be used to replace courses or research hours.

ENGR 630 Technology, Security and Preparedness	3

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**L. Douglas Wilder School  
of Government and Public Affairs**

The L. Douglas Wilder School of Government and Public Affairs is a creative, interdisciplinary grouping of programs in the social sciences and professional arenas that provides students with the knowledge, skills and experience necessary for success in public service.

The Wilder School brings together faculty from multiple disciplines that share a common interest in public affairs. The faculty includes individuals with strong research and analytical skills and with substantive expertise in such fields as criminal justice, economics, homeland security, public administration, urban planning and community development. These faculty members are committed to producing cutting-edge research and public service that can bridge the gap between theory and practice and to providing high quality, innovative and nationally competitive degree programs for our students.

To achieve this mission, the Wilder School actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs that develop close ties with other related university programs. The Wilder School is an intellectually exciting place committed to having a genuine impact on public policy and providing an intellectually stimulating education for future public affairs professionals who share in our commitment.

## Program offerings

The school offers a variety of educational opportunities. Students may pursue three undergraduate programs and an additional three minors. Graduate programs provide options for full-time students and for practicing professionals interested in enhancing their skills or engaging in graduate-level work on a part-time basis. Current graduate offerings include nationally recognized master's programs and 10 graduate-level certificates, as well as a doctoral degree program administered by the Center for Public Policy. Wilder School programs include:

### Baccalaureate degrees

Bachelor of Science in Criminal Justice  
Bachelor of Arts in Homeland Security and Emergency Preparedness  
Bachelor of Science in Urban and Regional Studies

### Minors

Criminal justice  
Homeland security and emergency preparedness  
Urban and regional studies

### Post-baccalaureate graduate certificates

Certificate in Criminal Justice  
Certificate in Geographic Information Systems  
Certificate in Historic Preservation Planning  
Certificate in Homeland Security and Emergency Preparedness

Certificate in Nonprofit Management  
Certificate in Planning Information Systems  
Certificate in Public Management  
Certificate in Public Safety  
Certificate in Transportation Planning and Analytics  
Certificate in Urban Revitalization

### Master's degrees

Master of Arts in Homeland Security and Emergency Preparedness  
Master of Public Administration  
Master of Science in Criminal Justice  
Master of Urban and Regional Planning

### Doctoral degree

Ph.D. in Public Policy and Administration (through the Center for Public Policy)

The school also offers two dual degree programs with the University of Richmond's T.C. Williams Law School. Through these programs students can simultaneously obtain a law degree (J.D.) and either the Master of Public Administration or the Master of Urban and Regional Planning.

---

## Service-learning and internship opportunities

**Diana Cutchin**  
Director

The educational experience at the L. Douglas Wilder School of Government and Public Affairs extends far beyond the classroom. Many of our students take advantage of [service-learning](#) and [internship](#) opportunities, gaining valuable work experience and enhancing their resume as they contribute in meaningful ways to governmental departments and agencies, legislative offices, nonprofit institutions, community initiatives, and businesses throughout Richmond.

Exceptionally qualified graduate students in the criminal justice, homeland security and emergency preparedness, sociology, public administration, and urban and regional planning programs are selected to be [Wilder Graduate Scholars](#) who undertake yearlong placements in which they benefit from professional work experience and financial support.

At the Wilder School, service is a tradition that is supported and cultivated by a faculty that reflects a tremendous commitment to community-based research. Each semester, VCU faculty offer a diverse selection of credit-bearing service-learning courses that provide students with the privilege of developing hands-on experience within their academic fields while engaging in meaningful projects that benefit local communities.

Guidelines for internships are available on the Wilder School website at <http://www.wilder.vcu.edu/service/intern/guidelines.html>.

---

## Graduate information

### Admission

Admission to programs of the L. Douglas Wilder School of Government and Public Affairs is available to qualified students on a rolling admissions basis. Since the demand for admission to some programs is high and space availability is limited, students are encouraged to apply well in advance of their proposed admission dates.

As outlined below, admission requirements vary by academic program. No application packet will be considered by the relevant program admissions committee until all the required materials have been submitted by the applicant.

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at [www.graduate.vcu.edu](http://www.graduate.vcu.edu).

### Admission to a master's program from the certificate programs

The Graduate Certificate in Public Management and the Graduate Certificate in Nonprofit Management are designed for persons in professional positions who require a limited number of courses in contemporary management theory and skills. However, if a student later decides to pursue the M.P.A. degree, successfully completed certificate courses may be applied toward the degree. Successful completion of either certificate does not guarantee admission into the M.P.A. degree program.

The courses in the Postbaccalaureate Certificate in Criminal Justice program are the same as the master's courses and, with grades of "B" or better and upon

acceptance into the master's degree program, are fully transferable to the Master of Science in Criminal Justice program.

All courses in the Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate program does not guarantee admission into the M.U.R.P. Degree program.

### Provisional admission

- In rare cases, applicants who do not meet the requirements for full admission may be accepted provisionally upon recommendation of the program's admissions committee. The conditions for earning full admission are stated in the provisional acceptance letter sent by the dean of the Graduate School. Conditions usually include the requirement that the student complete the first nine hours of departmental graduate courses with a grade of "B" or better in each course.
- Provisional admission does not constitute a waiver of the requirement to submit a GRE or other standardized test score.

### Continuous enrollment requirements and expectations

To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for approved leaves of absence) until they have completed all requirements. Students who fail to register for two consecutive semesters (summer sessions included) will be dropped automatically from the program and must reapply for admission in order to continue. Exceptions to this policy will be made on an individual basis by petition. Students who reapply after having been dropped for failure to register continuously will be evaluated under the bulletin requirements in effect at the time of readmittance.

A minimum GPA of 3.0 on a 4.0 scale must be maintained. Compliance with other university regulations also is required.

### Part-time students

Since the school schedules many of its courses in the late afternoon or evening, its programs accommodate both full- and part-time students. Students also may take advantage of courses offered in the summer. Thus it is possible for a part-time student taking six credit hours per semester to finish the master's degree in four years or less.

### Nondegree-seeking students

Nondegree-seeking students must have an undergraduate degree from an accredited institution and the written approval of the instructor prior to registering for any graduate-level course. Nondegree-seeking students can take no more than six credit hours without authorization from the appropriate program coordinator.

### Financial aid information

Information and application forms for financial aid may be secured from the VCU Office of Financial Aid, Harris Hall, 1015 Floyd Ave., First Floor, P.O. Box 843026, Richmond, VA 23284-3026.

The L. Douglas Wilder School of Government and Public Affairs also offers a limited amount of financial assistance. Individuals interested in such assistance are urged to apply by March 30. Financial assistance available through the school includes:

**Graduate teaching assistant positions** – Duties involve helping with the instruction of courses. The level of support varies according to the work level, financial need and scholarship.

**Research assistant positions** – The stipend and number of positions depend upon the level of sponsored research carried out by the school each year.

**Tuition fellowships** – There are a limited number of tuition fellowships for full-time students within the three master's degree programs.

**T. Edward Temple Memorial Scholarship Award** – This award of approximately \$500 per year is given to an outstanding graduate student in the Master of Urban and Regional Planning program each year.

**The Senator Edward E. Willey Scholarship, the Virginia City Management Association/University Dr. T. Edward Temple Scholarship and the Leigh E. Grosenick Scholarship** – These

scholarships are available to outstanding students in the Master of Public Administration program. Preference for these three scholarships is given to those who plan public careers in Virginia.

**Internships** – Paid, on-the-job internships are widely available in the Richmond area and elsewhere and are encouraged. VCU graduates also have been successful in obtaining presidential management internships in the federal government, state-government professional positions and local government positions.

### Transfer credit

With the consent of the admission committee or program coordinator, a maximum of six semester hours of appropriate graduate credit may be transferred and applied toward the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning. These hours will not have been credited toward another degree.

### School wide master's-level requirements

In addition to the program specific requirements of the Master of Public Administration, the Master of Science in Criminal Justice, and the Master of Urban and Regional Planning as outlined elsewhere in this bulletin, the Wilder School requires all master's-level graduate degree-seeking students to acquire competence in four broad areas:

1. Research methods
2. Planning and/or policy analysis
3. Public administration
4. Ethics

Competence can be demonstrated by completion of the following:

#### Research methods

GVPA/PADM/URSP/CRJS 623 Research Methods for Government and Public Affairs

#### Planning/policy analysis

GVPA/URSP 632 Planning Theory and Processes

or

GVPA/PADM 625 Public Policy Analysis

#### Public administration

GVPA/PADM 601 Principles of Public Administration

#### Ethics

GVPA/PADM 683 Administrative Ethics

or

A program specific course through which ethical issues are imbedded and discussed within a public sector context. Such courses would include: CRJS 550, PADM 661, PADM 689, URSP 632 and URSP 635.

Selection of courses to meet these competency requirements will be made by the student in consultation with his/her academic adviser. While each graduate of the Wilder School must demonstrate competence in each of the areas outlined above, substitutions for the specific courses may be made with the written approval of the appropriate graduate program coordinator.

### Wilder School courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

The L. Douglas Wilder School of Government and Public Affairs offers courses in the following areas:

Criminal Justice, Master of Science (M.S.)

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Criminal Justice, Certificate in (Post-baccalaureate graduate certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

The Post-baccalaureate Certificate in Criminal Justice program offers an abbreviated graduate-level course sequence of 15 credit hours for individuals with an academic and/or professional background in criminal justice. Applicants must meet all [general admission requirements of the VCU Graduate School](#).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The Certificate in Criminal Justice is a post-baccalaureate graduate program designed to help facilitate career advancement in the criminal justice and/or criminology field. The program seeks to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

This certificate program offers specialization for individuals interested or involved in law enforcement, corrections, juvenile justice or the courts. It combines survey and theory courses with research, management and policy courses on the justice system. The courses in the certificate program are the same as the master's

courses. With minimum grades of B and upon acceptance into the master's degree program, these courses are fully transferable to the Master of Science (M.S.) in Criminal Justice degree program.

## Student learning outcomes

1. Students will identify concepts and issues that are relevant and/or appropriate for the research or content area.
2. Students will demonstrate logical connections in concepts, facts and information identified in the literature.
3. Students will be able to solve a problem, write a research paper or make a line of argument on a particular criminal justice topic.
4. Students will be able to exemplify the trivium of learning.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), five courses are required for the certificate, as specified in the chart list that follows. To receive the certificate, the student must achieve a B average in the five courses, earn no more than one C grade and complete the 15-hour certificate program within three years.

### Curriculum requirements

Courses	Credit hours

### Admission requirements

Criminal Justice, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Apr 1 (Mar 1 for financial aid)	GRE, LSAT or GMAT
	Spring	Oct 1	
<b>Special requirements:</b> These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.			

In addition to the [general admission requirements of the VCU Graduate School](#), admission to the Master of Science in Criminal Justice also will be based on:

1. An undergraduate GPA that exceeds 2.7 overall
2. A satisfactory score on the graduate standardized test (GRE, LSAT or GMAT)
3. Previous evidence of ability to perform graduate-level work (where applicable)
4. Professional experience in criminal justice (where applicable)

The courses in the post-baccalaureate graduate Certificate in Criminal Justice program are the same as the master's courses. With grades B or better and, upon acceptance into the master's degree program, courses from the certificate program are fully transferable to the Master of Science in Criminal Justice degree program.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

## General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The M.S. degree program in criminal justice assists in broadening and refining the understanding of criminal justice and criminological issues to facilitate career success and advancement. The goal of the program is to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

### Student learning outcomes

1. Students will identify concepts and issues that are relevant and/or appropriate for the research or content area.
2. Students will demonstrate logical connections in concepts, facts and information identified in the literature.
3. Students will be able to solve a problem, write a research paper or make a line of argument on a particular criminal justice topic.
4. Students will be able to exemplify the trivium of learning.

## Degree requirements

In addition to the [general VCU Graduate School graduation requirements](#), the Master of Science in Criminal Justice requires a minimum of 36 graduate credit hours of course work, with a minimum overall grade-point average of 3.0. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 36 semester hours.

To complete the M.S. curriculum, students must submit a portfolio of their work before they graduate. Contact the program director for format and submission details.

A maximum of nine semester hours of graduate credit from an accredited institution may be transferred and applied toward the master's degree. All transfer requests require the approval of the graduate program coordinator and the Graduate School and may not have been counted toward another degree.

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The graduate Certificate in Gender Violence Intervention is designed to prepare individuals for positions related to understanding, studying, responding to and preventing sexual and domestic violence in a variety of communities and settings. It provides specialized study in gender violence and can be earned on its own, or in conjunction with another graduate degree in the Wilder School of Government and Public Affairs or the School of Social Work.

## Program goals

1. The program will guide students in the development of strong academic understanding related to gender violence intervention.
2. The program will guide students in the development of skills in applying academic concepts to the practice of gender violence intervention.

## Student learning outcomes

1. Academic understanding
  - a. Students will have knowledge of common types and theoretical perspectives of gender violence.
  - b. Students will have knowledge of gender violence policies.
3. Skills
  - a. Students will have the ability to demonstrate methods of applying concepts to problems, practice and policy.
  - b. Students will develop an understanding of professional behaviors and boundaries while working in GVI settings and with diverse populations.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), a total of 18 graduate credit hours is required to earn the Certificate in Gender Violence Intervention. Four courses (12 credit hours) are required. In addition, an internship course (3 credit hours), which offers the opportunity for involvement in all phases

of work in this field, is required. For the remaining 3 credit hours, students may choose one of several elective options.

## Curriculum requirements

Post-baccalaureate graduate certificate	Spring	Nov 15	

The combined Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. The certificate requires a total of 18 credit hours comprising five required courses and one elective.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to the Graduate Admissions Office; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online admission application and select from the drop down menu "GVI Certificate." Applicants then pay the application fee and attach an essay on why they wish to be in the program. Students should also indicate on the right-hand side of the admission application that they are currently in the M.S.W. program, which will alert the admissions office that the application can be sent directly to the program chair for an admissions decision.

Please arrange for references and transcripts to be forwarded to the Wilder School graduate studies office from the School of Social Work and they will be added to the admission application. **Students should indicate in the "Comments" section of the application form that they are already enrolled in the M.S.W. program.**

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, P.O. Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [ecramer@vcu.edu; (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., associate dean of the Wilder School [sbrubaker@vcu.edu; (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>15</b>
GVPA 623 Research Methods for Government and Public Affairs*	3
GVPA 693 Internship**	3
PADM 650 Principles of Nonprofit Management***	3
SLWK 761 Interpersonal Violence	3
SOCY 635 Theorizing Gender Violence	3
<b>Elective</b>	<b>3</b>

### Total graduate credit hours required (minimum) for the Certificate in Gender Violence Intervention for students in the M.S.W. program 18

Through a cooperative arrangement with the Wilder School, M.S.W. students may simultaneously earn this graduate certificate by completing two required courses: SOCY 635 and SLWK 761.

#### Notes

\*GVPA 623 Research Methods for Government and Public Affairs: satisfied by SLWK 706-707 or SLWK 714-715 [clinical or social work planning, administrative and policy practice research course (3 credit hours)]

\*\*GVPA 693 Internship: satisfied by SLWK 693-694, 695; or SLWK 793-794, 795 [a social work field practicum in an agency providing sexual or domestic violence services (3 credit hours)]

\*\*\*PADM 650 Principles of Nonprofit Management: satisfied by SLWK 602-606 Social Work Policy, Planning and Organizational Practice I and II (3 credit hours)

#### Course schedule

SOCY 635 will be offered every fall; SLWK 761 will be offered every spring. Both courses will be offered on Tuesday from 4-6:40.

#### Field placements

Once students are admitted and enrolled in the certificate program, they should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

### Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)

#### Graduate program director

I-Shian (Ivan) Suen, Ph.D.  
Associate professor and program chair  
[isuen@vcu.edu](mailto:isuen@vcu.edu)  
(804) 828-2721

#### Additional contact

Richard F. Huff, Ph.D.  
Director of graduate studies, Wilder School  
[rrhuff@vcu.edu](mailto:rrhuff@vcu.edu)  
(804) 828-6837

**Program website:** [wilder.vcu.edu/academic/certificate/geographic.html](http://wilder.vcu.edu/academic/certificate/geographic.html)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	
<b>Special requirements:</b> Only applicants with prior GIS training, course work or work experience are considered for spring admissions. Other applicants should apply for fall admission due to course sequencing and prerequisites.			
These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.			

In addition to the [general admission requirements of the VCU Graduate School](#), the prerequisites and general criteria of eligibility for admission to the GIS certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Geographic Information Systems
4. An official transcript showing successful completion of baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

At any time, students in the GIS certificate program may apply for admission into the Master of Urban and Regional Planning, the Master of Public Administration or the Master of Science in Criminal Justice degree programs. If accepted into a master's program, students may then transfer credits earned in the GIS certificate program toward partial fulfillment of the master's degree.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The graduate Certificate in Geographic Information Systems emphasizes the core functions and applications of GIS. It provides specialized training in the operations and techniques related to the creation, analysis, modeling, visualization, interpretation and management of geographic information.

The certificate program is designed to meet the educational needs of both traditional and nontraditional students. The GIS program prepares traditional students to utilize GIS in their major areas of study. Nontraditional students can

also take advantage of the certificate program to learn and/or upgrade GIS knowledge and skills that are applicable and important to their professions.

## Student learning outcomes

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

## Degree requirements

The Certificate in Geographic Information Systems can be completed in one academic year. In addition to general [VCU Graduate School graduation requirements](#), students must complete 12 graduate credit hours of GIS course work that includes two required and two elective courses with a minimum grade-point average of 3.0 (out of 4.0).

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>6</b>
URSP 621 Introduction to Geographic Information Systems (offered in fall semester)	3
URSP 625 Spatial Database Management and GIS Modeling (offered in spring semester)	3
<b>Electives</b>	<b>6</b>
Select two electives (6 credit hours) from the following:	
URSP 622 Community Socioeconomic Analysis Using GIS (offered in fall semester)	3
URSP 626 Transportation Analytics and Modeling (offered in spring semester)	3
URSP 627 GIS Applications in Urban Design (offered in spring semester)	3
<b>Total graduate credit hours required (minimum)</b>	<b>12</b>

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

All credits earned in the certificate program are transferable to the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning programs. However, students must apply to the certificate and master's degree programs separately.

### Sample plan of study

The following schedule is suggested as a means of completing the certificate program:

Courses	Credit hours
<b>Fall semester</b>	
URSP 621 Introduction to Geographic Information Systems	3
One GIS-related elective (see list above) or other approved course	3
<b>Spring semester</b>	
URSP 625 Spatial Database Management and GIS Modeling	3
One GIS-related elective (see list above) or other approved course	3
<b>Total graduate credit hours required (minimum)</b>	<b>12</b>

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	
<b>Special requirements:</b> Admission applications that do not have a decision will automatically carry over to the next semester for consideration.			

Applicants must meet all [general admission requirements of the VCU Graduate School](#).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

This certificate program complements a student's other fields of interest in public and government affairs. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels, as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

### Student learning outcomes

Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information.

### Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), the graduate certificate program requires 15 credit hours, comprising five three-credit-hour graduate courses delivered through a combination of online technology and one on-campus session (three days) as described below. The courses offered in the certificate program are the same as those taken by students in the master's program. With minimum grades of B and upon acceptance into the master's program, these courses are fully transferable to the Master of Arts in Homeland Security and Emergency Preparedness degree program.

### Online study

Web-based course delivery in an asynchronous format is designed around each course's own Blackboard site.

### On-campus study

During the final week of the semester, the class will have a three-day in-class session from Thursday to Saturday. It will feature presentations and discussion of student projects and papers, as well as lectures, seminar sessions and exercises. Exceptions will be made for students who are unable to attend these sessions, such as active-duty military personnel or emergency managers involved in ongoing operations.

### Curriculum requirements

Courses	Credit hours
---------	--------------

HSEP 501 Institutional Challenges of Security Preparedness	3
HSEP 502 Survey of Terrorism	3
HSEP 601 Emergency Management: Response Planning and Incident Command	3
HSEP 602 Government, Industry and Community Strategic Planning	3
HSEP 603 Risk Assessment	3

**Total graduate credit hours required (minimum)** 15

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Homeland Security and Emergency Preparedness, Master of Arts (M.A.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.A.	Fall	Apr 1 (Mar 1 for financial aid)	GRE, GMAT, MAT or LSAT
	Spring	October 1	
<b>Special requirements:</b> These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.			

In addition to the [general admission requirements of the VCU Graduate School](#), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in a field related to homeland security and emergency preparedness. The application for admission requires:

1. A transcript documenting the completion of a bachelor's degree
2. Three letters of reference (including both academic and professional references if possible)
3. A current resume
4. Satisfactory standardized test score (GRE, GMAT, MAT, LSAT)
5. A minimum 2.7 GPA (on a 4.0 scale) in the last 60 semester hours of undergraduate work

Students not meeting these requirements who have demonstrated advanced competency on a professional basis may be admitted to the program provisionally. The provisional period shall consist of the first nine hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Arts in Homeland Security and Emergency Preparedness degree program is designed in the broadest interdisciplinary sense. Students will learn theoretical and practical knowledge that will prepare them for private or public sector employment in the expanding area of homeland security and emergency preparedness and/or further study in numerous areas of public policy. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only

be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

The master's degree is primarily an off-campus, online, distance-learning program. It has both off-campus (online) and on-campus (at VCU) components. VCU's program takes a broad interdisciplinary approach to preparedness that will give students the ability to see the larger organizational, social, political, ethical and economic aspects of disaster studies, in addition to the policy-making and implementation aspects. The scholarly study of homeland security and emergency preparedness rests at the intersection of national defense, emergency management, law enforcement and policy management. With expertise in criminal justice, geography, government (local, state, federal and foreign), international affairs, policy planning and public administration, the Wilder School is particularly well-suited for such a program. Its location in the state capital and situated just 90 minutes from the nation's capital also provides easy access to homeland security institutions and practitioners.

## Student learning outcomes

1. Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information in four key areas: risk and vulnerability analysis, strategic planning dilemmas of disasters and disaster preparedness, institutional coordination, and intelligence operations and legal/constitutional aspects.
2. Students will develop advanced skills in expository writing and oral presentation.
3. Students will achieve comprehension of the theoretical and practical principles of emergency preparedness for both natural disasters and terrorist incidents and be able to analyze key topics related to natural disasters, emergency planning, terrorism and counterterrorism.
4. Students will perform research, policy analysis and risk assessment using several methodological and theoretical approaches to homeland security and emergency preparedness.
5. Students will also be able to evaluate scholarly and practitioner analyses of homeland security and emergency preparedness.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students must complete a minimum of 36 graduate credit hours with a cumulative minimum GPA of 3.0.

## Off-campus study

Web-based course delivery is designed around each course's own web-based site utilizing the Blackboard education system, which provides the following:

1. Course syllabus
2. Course reference materials and links to supporting websites
3. Course lectures
4. Faculty-student and student-student communications via weekly discussion topics
5. Student writing assignments

Participation in online discussions is mandatory and will count for a significant percentage of each student's grades. Written work is submitted, evaluated and returned to students via the Blackboard education system assignment function.

## On-campus study

During the final week of the semester, each class will have a three-day in-class session from Thursday to Saturday. It features presentations and discussion of student projects and papers, as well as lectures, seminar sessions and exercises. These sessions will include the formation of working groups of students from a number of classes in the program. Exceptions will be made for students who are unable to attend these sessions, such as active-duty military personnel or emergency managers involved in ongoing operations with provisions for maximum possible inclusion via electronic means and/or the substitution of additional student assignments equivalent to the on-campus study requirements.

Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [combined]

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	None
	Spring	Oct 1	
<b>Special requirements:</b> Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.			

In addition to the [general admission requirements of the VCU Graduate School](#), admission to the certificate program requires the same procedure used in applying to the M.P.A., except that a standardized examination is not required.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

In the graduate Certificate in Nonprofit Management program, students gain knowledge and skills in nonprofit governance, management, fundraising, and program development and evaluation that they will need to become leaders and change agents in this rapidly growing sector. The school welcomes degree applicants from any undergraduate major, as entry- and top-level employees in nonprofit organizations have a wide range of backgrounds, including the sciences and humanities, social sciences, and technology. Courses are scheduled in the evening and on weekends with the working professional in mind.

### Student learning outcomes

1. To understand the nonprofit sector's relationship to the for-profit and government sectors
2. To know how to build a fundraising and donor communication plan model
3. To understand how to budget and evaluate the financial management practices of nonprofit organizations
4. To have the skills to analyze and implement laws impacting nonprofit organizations and their governance

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), the certificate requires a total of 15 graduate credit hours, comprising four courses in the graduate public administration program and one elective. The elective may be from the public administration curriculum or from elsewhere within the school or university.

## Curriculum requirements

Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)  
Social Work, Master of (M.S.W.) with a concentration in clinical practice  
Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, Master of Social Work students pursuing the

concentration in administration, planning and policy practice may simultaneously earn the post-baccalaureate graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs.

## Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate admissions application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the M.S.W. degree program.

### Certificate requirements for M.S.W. students

Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six credit hours of the certificate's 15 credit-hour requirement. One of these courses is SLWK 712 Social Work Planning and Administrative Practice I. The second course may be SLWK 711 Strategies for Social Work Planning and Administrative Practice or SLWK 713 Social Work Planning and Administrative Practice II.

**Note:** M.S.W. students pursuing the clinical concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

## Curriculum requirements

### Courses

PADM 656 Fund Development for the Nonprofit Sector	3
PADM 659 Financial Management for Nonprofit Organizations	3
PADM 661 Nonprofit Law, Governance and Ethics	3
SLWK 712 Social Work Planning and Administrative Practice I	3
SLWK 711 Strategies for Social Work Planning and Administrative Practice or 3	
SLWK 713 Social Work Planning and Administrative Practice II	

**Total graduate credit hours required (minimum)** for the Certificate in Nonprofit Management for students in the M.S.W. program SWAPPP concentration **15**

## Admission requirements

Public Administration, Master of (M.P.A.) with a concentration in budgeting and financial management			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.A.	Fall	Apr 1 (Mar 1 for financial aid)	GRE, GMAT, MAT or LSAT
	Spring	Oct 1	
	Summer	Feb 1	
<b>Special requirements:</b>			
These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.			

Master of Public Administration students may pursue a generalist curriculum (in which elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration (choose the generalist curriculum from the drop-down list of program options when applying online). Many students will benefit from the depth in a specific area that a concentration provides. For students who pursue a concentration, elective courses must come from the approved list of courses for that concentration (choose the specific M.P.A. concentration from the drop-down list of program options when applying online).

In addition to the [general admission requirements of the VCU Graduate School](#), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor's degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goals

The Master of Public Administration program's mission supports a "generalist" conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

M.P.A. students may pursue a generalist curriculum (in which the four elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration. Many students will benefit from the depth in a specific area that a concentration provides. If a student pursues a concentration, the elective courses must come from the approved list of courses for that concentration area.

The program's mission includes the following goals:

1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

## Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will solve problems and make decisions in public governance.
4. Students will communicate and interact with the workforce and citizenry.
5. Students will articulate and apply a public service perspective.

## Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the [general VCU Graduate School graduation requirements](#), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

## Curriculum requirements

Courses	Credit hours
<b>Core courses (required)</b>	<b>24</b>

GVPA 693 Public Administration Internship	3
<b>Total graduate credit hours required (minimum)</b>	<b>36 or 39</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Admission requirements

### Public Administration, Master of (M.P.A.) with a concentration in nonprofit management

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.A.	Fall	Apr 1 (Mar 1 for financial aid)	GRE, GMAT, MAT, or LSAT
	Spring	Oct 1	
	Summer	Feb 1	

#### Special requirements:

These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

Master of Public Administration students may pursue a generalist curriculum (in which elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration (choose the generalist curriculum from the drop-down list of program options when applying online). Many students will benefit from the depth in a specific area that a concentration provides. For students who pursue a concentration, elective courses must come from the approved list of courses for that concentration (choose the specific M.P.A. concentration from the drop-down list of program options when applying online).

In addition to the [general admission requirements of the VCU Graduate School](#), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor's degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The Master of Public Administration program's mission supports a "generalist" conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

M.P.A. students may pursue a generalist curriculum (in which the four elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration. Many students will benefit from the depth in a specific area that a concentration provides. If a student pursues a concentration, the elective courses must come from the approved list of courses for that concentration area.

The program's mission includes the following goals:

1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

## Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will solve problems and make decisions in public governance.
4. Students will communicate and interact with the workforce and citizenry.
5. Students will articulate and apply a public service perspective.

## Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the [general VCU Graduate School graduation requirements](#), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit

agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).

2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

## Curriculum requirements

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Public Administration, Master of (M.P.A.), accelerated Bachelor of Arts in Political Science (B.A.) to master's

### Program accreditation

National Association of Schools of Public Affairs and Administration

### Graduate program director

Nancy Stutts, Ph.D.

Nonprofit Management, Certificate of (Post-baccalaureate graduate certificate)

Public Administration, Master of (M.P.A.), generalist curriculum

Public Administration, Master of (M.P.A.)/Juris Doctor (J.D.) from the University of Richmond [combined]

Public Administration, Master of (M.P.A.) with a concentration in budgeting and financial management

Public Administration, Master of (M.P.A.) with a concentration in executive leadership

Public Administration, Master of (M.P.A.) with a concentration in human resource management

Public Administration, Master of (M.P.A.) with a concentration in nonprofit management

Public Administration, Master of (M.P.A.) with a concentration in public policy analysis and evaluation

Public Administration, Master of (M.P.A.) with a concentration in state and local government management

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

This program permits selected students to earn the B.A. and M.P.A. in a minimum of five years by taking certain master's-level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in careers in the public or nonprofit sector. To be eligible, students must have completed 90 credit hours of undergraduate course work and have an overall GPA of 3.0, with a GPA of 3.3 in political science

courses. The accelerated program is limited to students majoring in political science who have a minimum of 9 credit hours in political science courses.

To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission. Upon being accepted into the accelerated program, students must meet the same standards of performance as a graduate student that are described in detail in the “Satisfactory academic progress” section of the Graduate Bulletin, must maintain a 3.0 GPA and must satisfactorily complete all of the requirements for the degree, as stated in this bulletin. Guidance to students admitted to the accelerated program is provided by the public administration program director. Students should contact the M.P.A. graduate director for more information about admission procedures.

To graduate with a bachelor’s degree, a student must complete 120 credit hours of course work. Of these credits, 33 must be in political science. Of the 33 political science credit hours, 15 are required (POLI 103 U.S. Government, POLI/INTL 105 International Relations, POLI 107 Political Theory, POLI 109 Comparative Politics and POLI 490 Senior Seminar). Students enrolled in the accelerated program may take up to six credits of graduate public administration courses in each of the final two semesters of their undergraduate course work. These courses are shared credit hours with the graduate program, meaning that they will be applied toward the undergraduate degree requirement and the graduate degree requirement. A maximum of 12 credit hours may be taken prior to the completion of the baccalaureate degree. The bachelor’s degree will be awarded when the student has completed all requirements for the undergraduate degree, which may include the 12 graduate public administration credit hours.

The graduate courses that may be taken in the public administration program once a student is admitted to the accelerated program are as follows: PADM/GVPA 601 Principles of Public Administration, PADM 602 Public Administration Theory, PADM 607 Public Human Resource Management, PADM 609 Financial Management in Government, PADM/GVPA/CRJS/URSP 623 Research Methods for Government and Public Affairs, PADM 624 Quantitative Methods for Public Administration or a PADM elective course, and PADM 650 Principles of Nonprofit Management.

All accelerated program students must have their course schedules approved by the graduate public administration program director prior to registration.

### Admission requirements

Public Administration, Master of (M.P.A.), generalist curriculum			
Degree: M.P.A.	Semester(s) of entry: Fall	Deadline dates: Apr 1 (Mar 1 for financial aid)	Test requirements: GRE, GMAT, MAT or LSAT
	Spring	Oct 1	
	Summer	Feb 1	
<b>Special requirements:</b> These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.			

Master of Public Administration students may pursue a generalist curriculum (in which elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration (choose the generalist curriculum from the drop-down list of program options when applying online). Many students will benefit from the depth in a specific area that a concentration provides. For students who pursue a concentration, elective courses must come from the approved list of courses for that concentration (choose the specific M.P.A. concentration from the drop-down list of program options when applying online).

In addition to the [general admission requirements of the VCU Graduate School](#), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor’s degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goals

The Master of Public Administration program's mission supports a "generalist" conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

M.P.A. students may pursue a generalist curriculum (in which the four elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration. Many students will benefit from the depth in a specific area that a concentration provides. If a student pursues a concentration, the elective courses must come from the approved list of courses for that concentration area.

The program's mission includes the following goals:

1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

## Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will solve problems and make decisions in public governance.
4. Students will communicate and interact with the workforce and citizenry.
5. Students will articulate and apply a public service perspective.

## Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the [general VCU Graduate School graduation requirements](#), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

## Curriculum requirements

Courses	Credit hours
<b>Core courses (required)</b>	<b>24</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

A cooperative arrangement with the T.C. Williams School of Law of the University of Richmond makes it possible for students to receive a law degree from the University of Richmond and the Master of Public Administration from VCU. The dual degree program is designed to provide its graduates with competency in both public administration and law. This competency is applicable to areas of practice drawing upon knowledge and skills from each of these fields. The program brings together persons interested in both the broader aspects of public policy and government affairs and the law. It also brings together two fields that require complementary knowledge and skills that may be directed toward

solving problems that are associated with the affairs of the government and nonprofit sectors. This integration of education in public administration and law draws on the contributions that each discipline can make to a professional knowledge base for practice in both fields.

### Application process

Interested students must apply separately for and be admitted to the T.C. Williams School of Law at the University of Richmond and the Master of Public Administration program at VCU. Students who are accepted into the dual degree program are permitted to apply 12 credit hours of work in the M.P.A. degree program toward meeting the graduation requirements in the T.C. Williams School of Law and up to 12 credit hours of work in the University of Richmond law school toward meeting the graduation requirements for the M.P.A. This credit application enables participants in the dual degree program to complete the requirements for the J.D. and the M.P.A. in an estimated four years of full-time course work. Applicants for this program are required to meet all admission and academic standards of the T.C. Williams School of Law of the University of Richmond, the VCU Graduate School and the M.P.A. program.

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Public Management, Certificate in (Post-baccalaureate graduate certificate)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	
Special requirements: Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.			

In addition to the [general admission requirements of the VCU Graduate School](#), admission to the certificate program requires the same procedure in applying to the M.P.A., except that a standardized examination is not required.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on

program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The graduate certificate in public management is a program designed to enable practitioners in government and nonprofit organizations to acquire knowledge and skills in public administration without pursuing a full master's degree.

## Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will articulate and apply a public service perspective.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), the certificate requires a total of 18 hours of graduate credit hours involving a mix of required and elective courses. The courses are the same as those offered to M.P.A. students.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>9</b>
PADM 601 Principles of Public Administration	3

Urban and Regional Planning, Master of (M.U.R.P.)/Juris Doctor (J.D.) with the University of Richmond [combined]

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in community revitalization

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in environmental planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in metropolitan planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in planning management

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Urban and Regional Planning, Master of (M.U.R.P.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.U.R.P.	Fall	Apr 1 (Mar 1 for assistantship consideration or financial aid)	GRE, GMAT, LSAT or MAT
	Spring	Oct 1	
<b>Special requirements:</b> These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.			

In addition to the [general admission requirements of the VCU Graduate School](#), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goals

The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

## Student learning outcomes

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will display an understanding of the theory and practice of planning for cities and regions.
3. Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
4. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762 Professional Plan. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning

3. Metropolitan planning
4. Planning management

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>27</b>
IDES 500 Art and Design Methods Workshop or elective	3
URSP 622 Community Socioeconomic Analysis Using GIS	3
URSP/GVPA/PADM/URSP 623 Research Methods for Government and Public Affairs	3
URSP/GVPA 632 Planning Theory and Processes	3
URSP 635 Legal and Legislative Foundations of Planning	3
URSP 662 Foundations for Development Planning	3
URSP 761 Planning Studio I	3
URSP 762 Professional Plan or URSP 764 Thesis or Projects	6
<b>Electives</b>	<b>21</b>
Select seven electives (21 credit hours) from the following:	
URSP 502 Global Economic Change and Geography	
URSP 517 Historic Preservation in Planning	
URSP 520 Park Planning	
URSP/GEOG/ENVS 521 Introduction to Geographic Information Systems	
URSP 525 Site Planning and Graphics	
URSP 541 Urban Public Policy-making Processes	
URSP 567 The American Suburb	
URSP 605 Urban Planning History	
URSP 611 Principles of Urban Design	
URSP 621 Introduction to Geographic Information Systems	
URSP 625 Spatial Database Management and GIS Modeling	
URSP 626 Transportation Analytics and Modeling	
URSP 627 GIS Applications in Urban Design	
URSP 628 Land Use Planning	
URSP/PADM 630 Strategic Planning and Management in the Public Sector	
URSP 637 Sustainable Community Development	
URSP 641 Citizen Participation and Negotiation	
URSP 643 Housing Policy	
URSP 645 Sustainable Energy Planning and Policy	
URSP 647 Adaptive Reuse of Buildings	
URSP 650 Natural Resources and Environmental Planning	
URSP 651 Transportation Policy and Planning	
URSP 652 Environmental Analysis	
URSP 653 Transportation Projects	
URSP/ENVS/BIOL 654 Environmental Remote Sensing	
URSP 655 Environmental Policy and Planning	
URSP 658 Transportation Finance	
URSP 659 Transportation Project Development and Evaluation	
URSP 664 Urban Economic Development Policy	
URSP 666 Urban Commercial Revitalization	
URSP 672 Food Systems, Rural Development and Landscape Conservation	
URSP 681 International Urban Policy and Planning	
URSP 691 Topics in Urban and Regional Planning	
URSP 794 Planning Practicum Seminar	
URSP 797 Directed Research	

With the approval of the program chair, other appropriate graduate courses may be applied as electives.

**Total graduate credit hours required (minimum)**

**48**

## Concentrations

If a student chooses to pursue a specific concentration, the concentration courses and corresponding credit hours will take the place of electives in the above list. Refer to the [program search](#) function of the online VCU Bulletins for a complete description of concentration requirements.

## Sample plan of study

Courses	Credit hours
<b>First year, first semester</b>	
URSP 610 Introduction to Planning	3
URSP 622 Community Socioeconomic Analysis using GIS	3
URSP 662 Foundations for Development Planning	3
Elective	3
<b>First year, second semester</b>	
URSP/GVPA/PADM/URSP 623 Research Methods in Government and Public Affairs	3
URSP/GVPA 632 Planning Theory and Processes	3
URSP 635 Legal and Legislative Foundations of Planning	3
Elective	3
<b>Second year, first semester</b>	
URSP 761 Planning Studio I	3
Elective	9
<b>Second year, second semester</b>	
URSP 762 Professional Plan or URSP 764 Thesis or Projects	6
Elective	6

**Total graduate credit hours required (minimum)**

**48**

## Internship

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Urban and Regional Planning, Master of (M.U.R.P.)

Urban and Regional Planning, Master of (M.U.R.P.)/Juris Doctor (J.D.) with the University of Richmond [combined]

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in environmental planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in metropolitan planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in planning management

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

#### Admission requirements

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in community revitalization			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.U.R.P.	Fall	Apr 1 (Mar 1 for assistantship consideration or financial aid)	GRE, GMAT, LSAT or MAT
	Spring	Oct 1	
Special requirements: These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.			

In addition to the [general admission requirements of the VCU Graduate School](#), the following specifications apply:

- Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
- Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

- Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

#### Program goals

The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

- Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
- Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
- Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
- Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

#### Student learning outcomes

- Students should display evidence of having developed a multidisciplinary understanding of urban life.
- Students will display an understanding of the theory and practice of planning for cities and regions.
- Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
- Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

#### Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762 Professional Plan. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning
4. Planning management

In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
- Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

- Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goals

The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

- Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
- Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
- Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
- Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

### Student learning outcomes

- Students should display evidence of having developed a multidisciplinary understanding of urban life.
- Students will display an understanding of the theory and practice of planning for cities and regions.
- Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
- Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

### Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762 Professional Plan. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning
4. Planning management

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>27</b>
URSP 610 Introduction to Planning	3
URSP 622 Community Socioeconomic Analysis Using GIS	3
URSP/GVPA/PADM/URSP 623 Research Methods for Government and Public Affairs	3
URSP/GVPA 632 Planning Theory and Processes	3
URSP 635 Legal and Legislative Foundations of Planning	3
URSP 662 Foundations for Development Planning	3
URSP 761 Planning Studio I	3
URSP 762 Professional Plan or URSP 764 Thesis or Projects	6
<b>Metropolitan planning concentration</b>	<b>12</b>
Required courses	
URSP 628 Land Use Planning	3
URSP 651 Transportation Policy and Planning	3
Concentration electives: Select six credit hours from the following. With the approval of the program chair, other appropriate graduate courses may be applied toward the concentration.	6
FIRE 627 Real Estate Development	3
URSP 520 Park Planning	3
URSP 541 Urban Public Policy-making Processes	3
URSP 611 Principles of Urban Design	3
URSP 621 Introduction to Geographic Information Systems	3
URSP 625 Spatial Database Management and GIS Modeling	3
URSP 626 Transportation Analytics and Modeling	3
URSP 627 GIS Applications in Urban Design	3
URSP 641 Citizen Participation and Negotiation	3
URSP 643 Housing Policy	3
URSP 659 Transportation Project Development and Evaluation	3
URSP 664 Urban Economic Development Policy	3
URSP 672 Food Systems, Rural Development and Landscape Conservation	3
URSP 681 International Urban Policy and Planning	3

URSP 691-902 Topics in Urban and Regional Planning (when the topic is race, gender, ethnicity in planning; digital graphic design and desktop publishing; or fundamentals of design for planners) 3

**Electives:** Select nine credit hours from the list below. With the approval of the program chair, other appropriate courses may be applied as electives. 9

URSP 502 Global Economic Change and Geography	3
URSP 517 Historic Preservation in Planning	3
URSP 521 Introduction to Geographic Information Systems	3
URSP 525 Site Planning and Graphics	3
URSP 567 The American Suburb	3
URSP 605 Urban Planning History	3
URSP/PADM 630 Strategic Planning and Management in the Public Sector	3

URSP 647 Adaptive Reuse of Buildings	3
URSP 650 Natural Resources and Environmental Planning	3
URSP 652 Environmental Analysis	3
URSP 653 Transportation Projects	3
URSP/ENVS/BIOL 654 Environmental Remote Sensing	3
URSP 655 Environmental Policy and Planning	3
URSP 658 Transportation Finance	3
URSP 666 Urban Commercial Revitalization	3
URSP 691 Topics in Urban and Regional Planning	3
URSP 794 Planning Practicum Seminar	3
URSP 797 Directed Research	3

**Total graduate credit hours required (minimum) 48**

## Internship

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in environmental planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in metropolitan planning

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in planning management

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

A cooperative arrangement with the T.C. Williams School of Law of the University of Richmond makes it possible for students to receive a law degree (J.D.) and an urban and regional planning degree (M.U.R.P.) in four years rather than the five years ordinarily required.

The purpose of the program is to integrate the two professional curricula and to provide the expertise necessary to apply legal analytical skills and planning methods and analysis to urban and regional policy issues and problems. The dual degree program is designed to equip graduates for a variety of professional positions, including staff for legislative committees and government agencies and commissions, government legal staff, private consulting, neighborhood advocacy, directorships of planning and related agencies and executive aides to elected officials.

Refer to individual program pages for admission requirements, application deadlines, program goals, student learning outcomes, degree requirements, curriculum requirements and graduation requirements specific to the separate programs and concentrations.

## Application process

Interested students must apply separately for and be admitted to the T.C. Williams School of Law, University of Richmond, and the Master of Urban and Regional Planning program, VCU. Students will spend the entire first year in either the T.C. Williams School of Law or the L. Douglas Wilder School of Government and Public Affairs, and the second year in the program not selected the first year. Twelve credit hours of the planning program will be applied toward meeting the graduation requirements of the law school, and 12 credit hours in the law school will be applied toward meeting requirements of the M.U.R.P. program.

Upon admission to the dual-degree program, every student will be assigned an adviser in each program who will assist in planning a course of study that will include all of the required courses in each program plus such elective courses that will best serve the interests of the individual student.

Students deciding not to complete the dual degree program must meet all of the regular requirements of either the J.D. or M.U.R.P. to receive the degree of their choice.

## Admission requirements

### Urban Revitalization, Certificate in (Post-baccalaureate graduate certificate)

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

### Special requirements:

These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the [general admission requirements of the VCU Graduate School](#), the prerequisites and general criteria of eligibility for admission to the urban revitalization certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Urban Revitalization
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study
5. Demonstration of professional experience in planning or work related to the certificate program (The experience requirement may be waived for candidates who demonstrate professional promise.)

All courses in the graduate Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate

programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The Certificate in Urban Revitalization provides specialized training in the techniques and processes of city and neighborhood revitalization. Topics include adaptive reuse of buildings, historic preservation, real estate market analysis and the role of private-public partnerships in financing development projects. The certificate is useful for midcareer professionals who wish to learn new skills to expand their career options. It also is useful for recent college graduates who desire advanced training beyond the baccalaureate level and accelerated entry into the job market.

At any time, students in the certificate program may apply for admission into the Master of Urban and Regional Planning program and, if accepted, may transfer the certificate credits toward partial fulfillment of the master's degree requirements.

## Student learning outcomes

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), the Certificate in Urban Revitalization program requires 18 graduate credit hours of course work, which blends instruction in planning, urban design, economics and finance.

## Curriculum requirements

Courses	Credit hours
Select six courses (18 credit hours) from the following:	18
FIRE 629 Real Estate Investment Analysis*	3
URSP 517 Historic Preservation in Planning	3
URSP 610 Introduction to Planning	3
URSP 611 Principles of Urban Design	3
URSP 643 Housing Policy	3
URSP 647 Adaptive Reuse of Buildings	3
URSP 664 Urban Economic Development Policy	3
URSP 666 Urban Commercial Revitalization	3
URSP 691 Topics in Urban and Regional Planning (architectural analysis and historical preservation)	3
URSP 691 Topics in Urban and Regional Planning (historical preservation application)	3
Other elective, if approved by the program chair or certificate program coordinator	3

**For students who wish to focus primarily on historic preservation 12 of the program's 18 hours should include:**

URSP 517 Historic Preservation in Planning	3
--	---

URSP 647 Adaptive Reuse of Buildings	3
URSP 691 Topics in Urban and Regional Planning (architectural analysis and historical preservation)	3
URSP 691 Topics in Urban and Regional Planning (historical preservation application)	3

**Total graduate credit hours required (minimum) 18**

\*Either URSP 647 or FIRE 629, but not both, may be applied toward the degree requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Center for Public Policy

The Center for Public Policy focuses the university's multidisciplinary efforts in public policy. As a comprehensive, university-wide center, the center has responsibilities in each area of the university's broader missions: teaching, research and public service. The center houses and administers the Ph.D in Public Policy and Administration.

The center conducts basic and applied research on a number of public policy matters, with special attention to health policy, urban and metropolitan development, and state and local government and politics. And, the center engages in significant service through its training programs, conferences, publications and other contributions to public discourse.

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Public Policy and Administration, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 15 for assistantships	GRE, GMAT, MAT or LSAT
		Jan 30 final date for admission consideration	International applicants TOEFL
<b>Special requirements:</b> master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.			

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

**Admission standards**

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work

2. Standardized examination scores

a. GRE (preferred):

	200-800 scale (old)		130-170 scale (new)
Quantitative	550+	Quantitative	146+
Verbal	550+	Verbal	156+
Minimum total	1100	Minimum total	302

b. GMAT: Total score 600+

c. LSAT: 150+

d. MAT:

e. Scaled score: 400+

f. Percentiles: 70+

g. TOEFL: Total score 90+ International applicants must submit the international application and TOEFL scores.

8. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work

9. Personal statement, resume, curriculum vitae that:

- a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
- b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
- c. Displays enthusiasm for the field of public policy and administration
- d. Is well-written and error-free

5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):

- a. Research methods (equivalent of PADM/GVPA/CRJS/URSP 623)
- b. Statistics (equivalent of PADM 624)
- c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec.15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct.15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis.

Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct.15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from [International Admissions](#).

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and

Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

## Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

## Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general [VCU Graduate School graduation requirements](#), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

## Curriculum requirements

Courses	Credit hours
---------	--------------

### Core courses (required) 15

PPAD 711 Seminar in Public Policy I	3
PPAD 712 Seminar in Public Policy II	3
PPAD 721 Survey of Applied Research Methods in Public Policy	3
PPAD 722 Survey of Data Analysis Techniques in Public Policy	3
PPAD 780 Synthesizing Seminar in Public Policy	3

### Concentration courses 12

All students will select a concentration after the first year of study and after passing the comprehensive examination. They will take four courses in one of the following areas of concentration. Courses will be selected from a list designated by the concentration committee for each area. The concentration committee will approve the program of study for each student in the concentration.

1. Criminal justice policy
2. Public administration
3. Public policy
4. Urban and regional policy

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of concentration requirements.

### Electives outside of the concentration 9

Students will take at least three elective courses outside the concentration with the approval of their advisers. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs, such as homeland security and emergency preparedness, criminal justice, public administration, and urban and regional planning within the Wilder School. In addition, students may choose elective courses from among the following three-credit courses:

BIOS/STAT 543 Statistical Methods I	3
BIOS/STAT 544 Statistical Methods II	3
ECON 501 Introduction to Econometrics	3
ECON 612 Econometrics	3
ECON 641 Econometric Time-series Analysis	3
ECON 642 Panel and Nonlinear Methods in Econometrics	3
EDUS 711 Qualitative Methods and Analysis	3
ENGL 661 Themes in Interdisciplinary Studies	3
EPID 603 Public Health Policy and Politics	3
GSWS 602 Feminist Research Epistemology and Methods	3
GSWS 622 Women and Public Policy	3
HADM 763 Health Program Evaluation	3
HCPR 701 Health Services Research and Policy I	3
HCPR 702 Health Services Research and Policy II	3
INTL/NURS 514 International Perspectives on Community Health in Developing Countries	3
MASC 613 Mass Media and Society	3
MATX 601 Texts and Textuality	3
NURS 770 Quantitative Research Design	3
NURS 772 Qualitative Research Design and Analysis	3
OPER 636/STAT 636 Machine Learning Algorithms	3

### Dissertation research 9 (minimum)

PPAD 898 Dissertation Research	
--------------------------------	--

<b>Total graduate credit hours required (minimum)</b>	<b>45</b>
---	-----------

## Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

## Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies

Test and the Law School Admissions Test. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

## Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores
  - a. GRE (preferred):
 

	200-800 scale (old)		130-170 scale (new)
Quantitative	550+	Quantitative	146+
Verbal	550+	Verbal	156+
Minimum total	1100	Minimum total	302
  - b. GMAT: Total score 600+
  - c. LSAT: 150+
  - d. MAT:
    - i. Scaled score: 400+
    - ii. Percentiles: 70+
  - e. TOEFL: Total score 90+ International applicants must submit the international application and TOEFL scores.
5. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
6. Personal statement, resume, curriculum vitae that:
  - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
  - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
  - c. Displays enthusiasm for the field of public policy and administration
  - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
  - a. Research methods (equivalent of PADM/GVPA/CRJS/URSP 623)
  - b. Statistics (equivalent of PADM 624)
  - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from [International Admissions](#).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

## Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

## Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general [VCU Graduate School graduation requirements](#), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

## Curriculum requirements

Courses	Credit hours
<b>Core courses (required)</b>	<b>15</b>
PPAD 711 Seminar in Public Policy I	3

## Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

## Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Degree candidacy requirements****Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

**Admission standards**

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores
  - a. GRE (preferred):
 

	200-800 scale (old)	130-170 scale (new)
Quantitative	550+	Quantitative 146+
Verbal	550+	Verbal 156+
Minimum total	1100	Minimum total 302
  - b. GMAT: Total score 600+
  - c. LSAT: 150+
  - d. MAT:
    - i. Scaled score: 400+
    - ii. Percentiles: 70+
  - e. TOEFL: Total score 90+ International applicants must submit the international application and TOEFL scores.
5. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
6. Personal statement, resume, curriculum vitae that:
 

some guidelines for a competitive application.

  - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program

- b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
  - c. Displays enthusiasm for the field of public policy and administration
  - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
- a. Research methods (equivalent of PADM/GVPA/CRJS/URSP 623)
  - b. Statistics (equivalent of PADM 624)
  - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from [International Admissions](#).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

## Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

## Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general [VCU Graduate School graduation requirements](#), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

## Curriculum requirements

Courses	Credit hours
<b>Core courses (required)</b>	<b>15</b>
PPAD 711 Seminar in Public Policy I	3
PPAD 712 Seminar in Public Policy II	3
PPAD 721 Survey of Applied Research Methods in Public Policy	3
PPAD 722 Survey of Data Analysis Techniques for Public Policy	3
PPAD 780 Synthesizing Seminar in Public Policy	3
<b>Urban planning and policy concentration</b>	<b>12</b>
Concentration courses (required)	
PPAD 716 Public Policy Economics	3
PPAD 750 Seminar in Urban Policy	3
Concentration electives	6
Select 6 credit hours from the following:	
PPAD 791 Topical Seminar (3)	
URSP/GVPA 632 Planning Theory and Processes (3)	
URSP 637 Sustainable Community Development (3)	
URSP 643 Housing Policy (3)	
URSP 651 Transportation Policy and Planning (3)	

URSP 655 Environmental Policy and Planning (3)  
 URSP 664 Urban Economic Development Policy (3)  
 URSP 672 Food Systems, Rural Development and Landscape Conservation (3)  
 URSP 681 International Urban Policy and Planning (3)

### Electives outside of the concentration 9

Students will take at least three elective courses outside the concentration with the approval of their advisers. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration and urban and regional planning within the Wilder School. In addition, students may choose elective courses from among the following 3-credit courses:

BIOS/STAT 543 Statistical Methods I	3
BIOS/STAT 544 Statistical Methods II	3
ECON 501 Introduction to Econometrics	3
ECON 612 Econometrics	3
ECON 641 Econometric Time-series Analysis	3
ECON 642 Panel and Nonlinear Methods in Econometrics	3
EDUS 711 Qualitative Methods and Analysis	3
ENGL 661 Themes in Interdisciplinary Studies	3
EPID 603 Public Health Policy and Politics	3
GSWS 602 Feminist Research Epistemology and Methods	3
GSWS 622 Women and Public Policy	3
HADM 763 Health Program Evaluation	3

NURS 772 Qualitative Research Design and Analysis	3
OPER 636/STAT 636 Machine Learning Algorithms	3
SWKD 704 Multiparadigmatic Qualitative Methods and Analysis	3
SWKD 705 Multivariate Analysis in Social Work and Human Services Research	3

**Dissertation research** **9 (minimum)**  
 PPAD 898 Dissertation research

**Total graduate credit hours required (minimum)** **45**

### Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the

examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

### Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

### Sample plan of study

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Degree candidacy requirements**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Graduation requirements**

**VCU**

## **2014-15 Graduate and Professional Programs Bulletin**

---

**School of Medicine**

The School of Medicine of the then Medical College of Virginia opened on November 5, 1838, as the medical department of Hampden-Sydney College. Full-time clinical faculty members were first appointed in 1928, and improved facilities became available between 1936 and 1941 with the completion of the 600-bed West Hospital, A. D. Williams Clinic and Hunton Hall dormitory, located on the current site of the Main Hospital building. Growth in faculty students and facilities continued after World War II, leading to the development of today's academic health center.

Hospital facilities on the MCV Campus include both in-patient and out-patient facilities. MCV Hospitals of the VCU Health System is licensed for 902 beds. In addition, the hospital at the McGuire Veterans Affairs Medical Center (600 beds) provides excellent patient care, training and research opportunities for the School of Medicine through its affiliation programs.

In the School of Medicine, advanced degree programs are coordinated through the Office of the Associate Dean for Graduate Education, who acts for the dean on all issues related to administration of advanced degree programs. Each advanced-degree program is represented by a faculty member who serves as director for graduate programs. Directors are appointed either by the chair of the department offering graduate degrees or, in the case of interdisciplinary programs, by the dean in consultation with the chairs of participating departments. The directors of graduate programs act on behalf of the programs and hold the responsibility and authority to represent the respective department(s) and their faculty to the school.

## Mission statement

The mission of the VCU School of Medicine is to provide preeminent education to physicians and scientists in order to improve the quality of health care for humanity. Through innovative, scholarly activity and a diverse educational context, the school seeks to create and apply new knowledge, and to provide and continuously improve systems of medical and science education. Furthermore, the mission includes the development of more effective health care practices to address the needs of diverse populations and to provide distinguished leadership in the advancement of medicine and science.

The primary aim of the School of Medicine is to provide an academic environment appropriate for the education of its students, including undergraduate medical students, advanced-degree (graduate) students and graduate physician house officers, as well as continuing education directed toward the needs of practicing physicians. In the classroom, laboratory, clinic and hospital, the faculty and students are brought together in teaching-learning experiences that promote scientific scholarship and personal growth in knowledge and professional skills applicable to careers in a diverse workplace environment.

The School of Medicine and its faculty have vested responsibilities for the advancement of knowledge through research and for service to the community through application of skills in biomedical knowledge, health care leadership and patient care. Therefore, the school shares with teaching the interdependent and almost inseparable objectives of research and service.

The School of Medicine is located on the MCV Campus of Virginia Commonwealth University.

For comprehensive information on the School of Medicine departments, programs and faculty, please go to the school Web site at [www.medschool.vcu.edu](http://www.medschool.vcu.edu).

## Faculty and facilities

The School of Medicine consists of 700 full-time faculty, including affiliates, assisted by 630 residents and fellows and more than 700 clinical voluntary faculty.

Programs of instruction and research are conducted on campus, at the McGuire Veterans Affairs Medical Center and at affiliated hospitals in an effort to expose the students to the variety of clinical disorders encountered in the eastern U.S. The School of Medicine has established a geographically separate campus at the Inova Fairfax Hospital. Each year, 24 third-year students take all their clinical clerkships at Inova Fairfax Hospital. Their fourth year elective program also is based at the Inova Fairfax Hospital.

## Health policies

Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed prior to the third-year clerkships. For details related to these policies, please visit [www.medschool.vcu.edu/studentactivities](http://www.medschool.vcu.edu/studentactivities).

The School of Medicine requires that all students enrolled in the graduate academic programs administered by the school hold active health insurance coverage. This requirement applies to students at all degree categories: doctoral, master's and certificate. Compliance is monitored by administrative offices of the school and departments. Failure to comply with this requirement is grounds for dismissal.

## Graduate programs

A complete listing of advanced degree programs including links to departments, programs, contact information and application requirements can be found at [www.medschool.vcu.edu/audience/prospective.html](http://www.medschool.vcu.edu/audience/prospective.html).

Graduate programs offering Master of Science and doctoral training in the School of Medicine include:

- Anatomy and Neurobiology
- Biochemistry
- Biostatistics
- Epidemiology (doctoral training only)
- Human genetics
- Medical physics
- Microbiology and immunology
- Pathology (doctoral training only)
- Pharmacology and toxicology
- Physiology

The Department of Human and Molecular Genetics offers a Master of Science in Genetic Counseling (M.S.) and the Department of Epidemiology and Community Health offers the Master of Public Health (M.P.H.) degree. Both of these degree programs are accredited by the appropriate national organizations.

The Department of Human and Molecular Genetics offers a combined degree program that pairs the M.S. in Genetic Counseling and the Ph.D. in Human Genetics. The school partners with the School of Allied Health Professions to offer combined Anatomy and Neurobiology/physical therapy track and Physiology/physical therapy track Ph.D. programs.

Recognizing that graduate education should prepare students for a variety of career options, and that developments in the basic sciences have expanded the breadth of scholarship, the school has developed approaches to interdisciplinary education, particularly in the areas of neuroscience, molecular biology and genetics, immunology, and structural biology.

A two-semester post-baccalaureate certificate program offering training for students seeking admission to professional school (i.e., School of Medicine, School of Dentistry) is available as the Pre-medical Graduate Health Sciences Certificate.

## Application and admission to graduate programs

Application forms and instructions for applying to all graduate programs are available on the Graduate School Web site at [www.graduate.vcu.edu](http://www.graduate.vcu.edu).

1. The purpose of admission requirements and procedures is to ensure selection of competent students whose motivation, ability, education and character qualify them for graduate study in preparation for a career in science.
2. The following credentials constitute an application and should be sent to Virginia Commonwealth University, Graduate School, Richmond, VA 23284-3051.
  - a. Application for admission on a form available to the applicant from either the VCU Graduate School or the VCU Office of International Education. A fee in the form of a check or money order (payable to VCU), must accompany the application. The fee cannot be returned nor credited toward tuition payment.
  - b. Official transcripts of all undergraduate and graduate work sent directly from college or university registrars to the Graduate School.
  - c. Letters of recommendation from three present or former teachers or others the applicant believes to be qualified to evaluate fitness to engage in graduate study for the degree in the field of choice.
  - d. A personal statement from the applicant summarizing motivation, education and aims in pursuing graduate study.
  - e. Verbal, quantitative, and analytical portions of the Graduate Record Examination are required. Medical College Admission Test or Dental Aptitude Test may be acceptable in lieu of the GRE for selected programs.
  - f. International applicants for whom English is a foreign language must meet departmental admission requirements for performance on the TOEFL (Test of English as a Foreign Language). See section on international students in the Graduate Studies at VCU section of this Web site.
3. Acceptance of an applicant is based upon the recommendation of the director of graduate programs of the relevant program.

While most students matriculate in the fall semester, arrangements may be made to initiate graduate work at other times during the academic year.

## Ph.D. programs

### General requirements for graduate degrees

1. All full-time graduate students are expected to register for a minimum of 15 credit hours for the fall and spring semesters and six credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.
2. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
  - a. The assignment of a grade of U, D or F in any course
  - b. Failure to maintain a cumulative GPA of 3.0 or greater
  - c. Failure to pass the written or oral comprehensive examination
  - d. Failure to pass the final examination

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus Graduate Committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student's adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

3. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 3.0 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV

Campus Graduate Committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus Graduate Committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

4. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student's advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus Graduate Committee a minimum of ten working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean's office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.
5. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.
6. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs offered by the School of Medicine.

#### Change in academic program

A student in good standing who is nearing the completion of their degree program may wish to be considered for admission to a more advanced degree administered by the School of Medicine. On more rare occasions, a student may wish to leave (withdraw) from the program in which he/she is currently enrolled and join another program at the same academic level in the School of Medicine.

In all cases the student seeking the change shall submit a hard-copy version of the VCU Application for Graduate School to the Office of Graduate Education in the School of Medicine. The one-page application must be accompanied by a letter written by the student providing the rationale for the change and the program into which the student is seeking admission. The Office of Graduate Education will review the application and the record of the student and then alert the department to the interest of the student if deemed appropriate. Students who are not making satisfactory academic progress (i.e. a student who is not in good academic standing) in a given program would not be considered candidates for a program change. In the absence of prior approval from the Office of the Dean, neither an "application" by a student directly to a program nor the "acceptance" of a student by a program will be valid. Neither students nor programs may initiate admission to a program in the School of Medicine in the absence of the approval by the Office of Graduate Education acting in consultation with the MCV Campus Graduate Committee.

The above applies to all changes in program (e.g. certificate level to master's, master's to Ph.D., program change at the same degree level).

#### The student adviser and advisory committee

Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

1. Each student shall have an adviser and an advisory committee.
2. Appointment of the adviser:
  - a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
  - b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the student's major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the major department.
3. Duties of the adviser:
  - a. The adviser shall, with the student's advisory committee, have responsibility for guiding the student's academic program.
  - b. The adviser shall develop a plan for the student's didactic program with the student.
  - c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student's advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
  - d. The adviser shall supervise the student's research work and dissertation preparation and be one of the examiners of the dissertation (Ph.D.).
  - e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus Graduate Committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.
4. The student's advisory committee:
  - a. The student's advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus Graduate Committee, upon recommendation of the student's adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student's scholarly program are represented in the expertise of the faculty members.
    - i. The committee for the Ph.D. candidate shall consist of a minimum of five members as follows: the student's adviser; two other members of the graduate faculty of the department/program in which the student is enrolled; and at least two other members of the graduate faculty from departments other than the one in which the student is enrolled (where feasible, from two different departments).
    - ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus Graduate Committee. Appointment is made by the dean of the Graduate School.
    - iii. The student adviser is identified as the chair of the Student Advisory Committee as the default option. This creates the potential for a conflict of interest with respect to the management of the research project of the student. As a means of exploring options to existing protocol, the Student Advisory Committee has the option of electing a member of the committee to serve as the chair. Should this be the case, the revised committee structure will be submitted to the graduate program director for review and approval.
  - b. Duties of the student's advisory committee:
    - i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral

qualifying examination and final examination, and as a consultative body to provide scholarly counsel.

- ii. The student's advisory committee shall work with the student's adviser in guiding the student's graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
- iii. The student's advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus Graduate Committee no later than the third semester of study.
- iv. The student's advisory committee shall conduct the oral comprehensive and final examination.

## Doctor of Philosophy

1. Advanced graduate study leading to the Doctor of Philosophy degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Epidemiology and Community Health, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The departments of Radiology and Radiation Oncology administer the Ph.D. degree in medical physics.
2. A minimum of 30 credit hours exclusive of research credits is generally required. In practice, a minimum of four years of study, including research, is necessary to complete all requirements.
3. For all Ph.D. programs, a period of residence of at least two consecutive semesters is required. In the context of Ph.D. training, "residence" refers to full-time enrollment, equivalent to enrollment of nine or more credit hours in a given academic term. The School of Medicine recommends that doctoral students maintain "residency" status for one academic year (fall and spring semesters), usually during the initial year of study. This recommendation is to ensure that the didactic component of training is not prolonged. Students should register in each academic term as a means of ensuring that timely progress toward degree completion is achieved. The specific requirements for residency will be detailed by the individual programs. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the doctor of philosophy degree.

## Admission to candidacy

The development of the individual as an independent research scientist is a critical component of the Ph.D. degree. The potential for such development is assessed on the basis of both mastery of subject matter and research competency as judged in the context of written and oral examinations administered at the level of department or program. Students are admitted to candidacy by the dean on the basis of completing examinations as required and the recommendation of the faculty adviser, student advisory committee and graduate program director.

## Individual Development Plan

In order to assist trainees and advisers in the efficient completion of degree training and considered identification of a strategy for career development once the degree has been awarded, all graduate students will be required to create an Individual Development Plan. The IDP will have two components, both of which are critical to the achievement of a successful career outcome.

The first component will address the action plan for the research project over the next 12-month period. This should take a form analogous to the "Specific Aims" section of an NIH grant proposal, identifying key experimental objectives. In addition, objectives in professional development (e.g. attendance at a national meeting, delivery of a seminar) are also identified. The student adviser works with the student to develop this component of the IDP. The IDP is then used as a resource for consideration and comment by the Student Advisory Committee in the annual meeting with the student.

The second component of the IDP will explore the long-term career objectives of the student. "Career objectives" must look beyond a period of postdoctoral training. The nature of this component of the plan will vary widely depending on the individual. For the individual who has identified a particular career position, the IDP might, for example, seek to gain a more complete understanding of the requirements of such a position or the identification of "soft" skills critical to

success in the position. If undecided, the individual might explore the variety of career options for which the biomedical science degree can serve as a foundation. While the student's research adviser can play a role in developing this component of the plan, students should be encouraged to identify a mentor who can provide critical, concrete and confidential counsel to the student.

The use of the career planning tool distributed by the American Association for the Advancement of Science as "myIDP" to both guide the creation of a plan and convert entries into a report format is strongly recommended. A copy of the IDP will be submitted to the graduate program director in June of each year. The plans will be forwarded to the School of Medicine Office of Graduate Education. A record of the receipt of the IDP is placed in the student file.

## Progress to degree completion

The timely completion of advanced degrees is in the best interests of the student. In order to ensure that impediments to degree completion are addressed at an early stage the Office of Graduate Education in the School of Medicine houses a record of the meetings of the Student Advisory Committee in GradTrak. On an annual basis, programs will provide to the Office of Graduate Education a record of the date(s) on which the Student Advisory Committee has met, a copy of the minutes of the meeting and/or the memorandum provided to the student describing the progress made to degree completion, along with the expression of compliments, concerns and corrective action as appropriate. A copy of the IDP prepared by the student accompanies the report of the actions of the Student Advisory Committee meeting.

While recognizing that the research enterprise is subject to unknowns including unanticipated problems in the successful conduct of experiments, the duration of training should not be unduly extended as a consequence. The adviser and Student Advisory Committee have a responsibility to ensure that the scope of the research project is such that a doctoral degree can be completed in five to six years. The Student Advisory Committee plays a central role to ensure that the treatment of the student is equitable and that the student displays an appropriate effort, commitment and development.

Advisers have an obligation to ensure that in circumstances where student performance is not deemed to be satisfactory, the presence of the potential problem is communicated to the Student Advisory Committee and the program director. The interests of the adviser and student are best served when the evaluation of the situation is made with multiple inputs. In cases where a problem does exist, communication of the substandard performance, along with a course and timeline for remediation, should be formally communicated to the student as soon as possible. Documenting the existence of problem areas should not await the end of a semester or be delayed until a scheduled assessment is to take place.

If the student has not completed all degree requirements at the end of 15 semesters (inclusive of summer terms) of study, the adviser will provide specific information on the timeline for completion of the degree and submit to the Student Advisory Committee and the graduate program director (with a copy forwarded to the Office of Graduate Education) for review and action if warranted.

## Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination(s) generally focus(es) on the subject matter deemed critical as a foundation in the particular program. The written examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the candidate to integrate information and display an appropriate mastery of problem-solving capabilities.

1. To advance to candidacy, the student shall take written and oral examinations designed to determine the potential of the individual for development as an independent research scientist. Advancement to candidacy should preferably take place prior to initiating the third academic year in the program. The written examination is administered by the student's department/program. In the event of failure of the written comprehensive examination, the student, with the approval of the MCV Campus Graduate Committee, may be permitted to repeat the written examination.
2. After passing the written examination(s), the student is eligible for the oral examination. The oral examination is conducted by the student's advisory committee and is chaired by a graduate faculty member representing the MCV Campus Graduate Committee who serves as a voting member of the examining committee. The oral examination is to be administered no later

than six months after passing the written examination. (Departments/ programs may require a shorter interval.)

3. The oral examination is scheduled through the Office of Graduate Education. An announcement of the candidate's name, department/program and the time and place of the examination shall be posted at least 10 working days in advance of the examination. If a written document prepared by the candidate is a component of the examination, the document shall be provided to the members of the examining committee at least 10 working days in advance of the examination. The oral comprehensive examination is open to all members of the faculty. Faculty members in attendance may ask questions of the candidate, but their questions shall not be presented until after the advisory committee has completed its questions. Faculty members other than those on the advisory committee shall not vote on the success or failure of the candidate. If a student fails the oral examination, the student may be reexamined with the approval of the MCV Campus Graduate Committee.
4. A favorable vote of the examining committee (all members of body being required to vote) with no more than one negative vote, is required to pass the examination. Members of the examining committee must vote on the performance as either pass or fail.
5. The oral examination must be completed successfully at least six months before submission of the dissertation.

### Dissertation research

1. The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.
2. The body of experimental work to be incorporated into the dissertation is subject to the approval of the membership of the student advisory committee. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the dissertation. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.
3. The dissertation is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the dissertation document can serve as the basis for the final oral examination (or dissertation defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the dissertation document is distributed to the advisory committee. Distribution of the dissertation document to the advisory committee will usually occur at least ten working days in advance of the final oral examination. The Office of Graduate Education is informed of the scheduling of the final oral examination ten working days in advance of the examination. The Office of Graduate Education will then post an announcement of the final oral examination to include the name and department of the candidate together with the title of the dissertation and the day, place and time of the final oral examination.
4. The final oral examination is conducted by the student advisory committee at a specified time and place, is chaired by the faculty adviser and is open to all members of the faculty. The subject matter of the examination is limited to the content of the candidate's dissertation and related areas. A favorable vote of the advisory committee with no more than one negative vote shall be required to indicate that the candidate has passed the final oral examination. All advisory committee members must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the examination is not passed, the Student Advisory Committee must recommend a course of action for the student. The committee might, for example, recommend that a re-examination be scheduled, or that a major revision of the dissertation (including added data collection and/or analysis) be required prior to rescheduling of the examination, or that the student be terminated from the program or other action as deemed appropriate by the committee. A majority of the committee membership must concur in the recommended course of action. The recommendation must be communicated in writing to the appropriate graduate program director for approval within five working days of the examination. The program, acting through the graduate program director, shall accept the recommendation of the committee or determine an alternative within an additional five working days. The course of action

approved by the program will be communicated in writing to the student by the graduate program director. The graduate program director shall inform the Office of Graduate Education of the School of Medicine in writing as to the action taken.

If a re-examination is the recommended course of action, a representative of the MCV Campus Graduate Committee will be appointed to serve as the chair of the examining committee.

5. The student advisory committee approves the dissertation document as acceptable following the final oral examination. Approval of the dissertation as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the dissertation. Approval of the dissertation by the advisory committee must be unanimous.

### Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus Graduate Committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus Graduate Committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application
2. An act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander)
3. Conviction of a felony involving moral turpitude
4. Plagiarism or other scientific misconduct

### Master's programs

Advanced graduate study leading to the Master of Science degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The Department of Epidemiology and Community Health offers the Master of Public Health degree; the Department of Human and Molecular Genetics also offers the Master of Science degree in genetic counseling; and the departments of Radiology and Radiation Oncology administer the Master of Science degree in medical physics.

### General requirements for graduate degrees

1. All full-time graduate students are expected to register for a minimum of five credit hours for the fall and spring semesters and six credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.
2. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
  - a. The assignment of a grade of U, D or F in any course
  - b. Failure to maintain a cumulative GPA of 2.5 or greater
  - c. Failure to pass the written or oral comprehensive examination
  - d. Failure to pass the final examination

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus Graduate Committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as

appropriate, the student's adviser in making a determination.

Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

3. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 2.5 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus Graduate Committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus Graduate Committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.
4. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student's advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus Graduate Committee a minimum of ten working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean's office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.
5. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.
6. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science and Doctor of Philosophy programs offered by the School of Medicine.

#### Change in academic program

A student in good standing who is nearing the completion of their degree program may wish to be considered for admission to a more advanced degree administered by the School of Medicine. On more rare occasions, a student may wish to leave (withdraw) from the program in which he/she is currently enrolled and join another program at the same academic level in the School of Medicine.

In all cases the student seeking the change shall submit a hard-copy version of the VCU Application for Graduate School to the Office of Graduate Education in the School of Medicine. The one-page application must be accompanied by a letter written by the student providing the rationale for the change and the program into which the student is seeking admission. The Office of Graduate Education will review the application and the record of the student and then alert the department to the interest of the student if deemed appropriate. Students who are not making satisfactory academic progress (i.e. a student who is not in good academic standing) in a given program would not be considered candidates for a program change. In the absence of prior approval from the Office of the Dean, neither an "application" by a student directly to a program nor the "acceptance" of a student by a program will be valid. Neither students nor programs may initiate admission to a program in the School of Medicine in the absence of the approval by the Office of Graduate Education acting in consultation with the MCV Campus Graduate Committee.

The above applies to all changes in program (e.g. certificate level to master's, master's to Ph.D., program change at the same degree level).

## The student adviser and advisory committee

Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

1. Each student shall have an adviser and an advisory committee.
2. Appointment of the adviser:
  - a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
  - b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the student's major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the major department.
3. Duties of the adviser:
  - a. The adviser shall, with the student's advisory committee, have responsibility for guiding the student's academic program.
  - b. The adviser shall develop a plan for the student's didactic program with the student.
  - c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student's advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
  - d. The adviser shall supervise the student's research work and thesis preparation and be one of the examiners of the thesis (M.S.).
  - e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus Graduate Committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.
4. The student's advisory committee:
  - a. The student's advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus Graduate Committee, upon recommendation of the student's adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student's scholarly program are represented in the expertise of the faculty members.
    - i. The committee for the M.S. candidate shall consist of a minimum of three members as follows: the student's adviser (who serves as chair of the committee); one other member of the graduate faculty of the department/program in which the student is enrolled; and one other member of the graduate faculty from a department other than the one in which the student is enrolled.
    - ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus Graduate Committee. Appointment is made by the dean, School of Graduate Studies.
  - b. Duties of the student's advisory committee:
    - i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral

qualifying examination and final examination, and as a consultative body to provide scholarly counsel.

- ii. The student's advisory committee shall work with the student's adviser in guiding the student's graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
- iii. The student's advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus Graduate Committee no later than the third semester of study.
- iv. The student's advisory committee shall conduct the oral comprehensive and final examination.

## Master of Science

1. Advanced graduate study leading to the Master of Science degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The Department of Epidemiology and Community Health offers the Master of Public Health degree; the Department of Human and Molecular Genetics also offers the Master of Science degree in genetic counseling; and the departments of Radiology and Radiation Oncology administer the Master of Science degree in medical physics.
2. A minimum of 24 semester course hours is required, exclusive of research credits. In practice, it is found that two years of study are usually necessary to complete the requirements. A time limit of five calendar years, beginning at the time of first registration, is placed on work to be credited toward the Master of Science degree. Generally a maximum of one-third of the hours required for a master's degree may be transferred from another VCU program or outside institution and applied toward the degree upon recommendation of the student's director of graduate programs with the concurrence by the chair of the MCV Campus Graduate Committee.
3. Each student must conduct an original investigation under the supervision of the permanent adviser, prepare a thesis reporting the results of this research and analyze its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style.
4. The body of experimental work to be incorporated into the thesis is subject to the approval of the student advisory committee members. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the thesis. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.
5. The thesis is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the thesis document can serve as the basis for the final oral examination (or thesis defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the thesis document is distributed to the advisory committee. Distribution of the thesis document to the advisory committee should take place at least ten working days in advance of the final oral examination. The Office of Graduate Education is to be informed of the scheduling of the final oral examination ten working days in advance of the scheduled date. The Office of Graduate Education then identifies a representative of the MCV Campus Graduate Committee to chair the examination, and provides an announcement of the final oral examination, which includes the name and department of the candidate together with the title of the thesis and the day, place and time of the final oral examination.
6. The final oral examination is conducted by the student advisory committee at the designated time and place and is open to the faculty. A representative of the MCV Campus Graduate Committee serves as the chair of the examination committee and is a voting member of the examination committee. The subject matter of the examination includes the subject matter of course work as well as the content of the thesis. A favorable vote of the advisory committee with no more than one negative vote is required to indicate that

the candidate has passed the final oral examination. All members of the examination committee must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the outcome is negative, the final oral examination may be retaken with the approval of the MCV Campus Graduate Committee. Advance approval is requested in writing by the department on behalf of the candidate.

7. The student advisory committee approves the thesis document as acceptable after the final oral examination has been successfully completed. Approval of the thesis as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the thesis. Approval of the thesis by the advisory committee must be unanimous. A thesis is not required for completion of the Master of Genetic Counseling Program. In lieu of the thesis, students in this tract are required to successfully pass comprehensive oral and written examinations.

## Master of Public Health

The M.P.H. degree is offered in three tracks (epidemiology, generalist and social and behavioral science). A minimum of four semesters of full-time study (45 credit hours) is necessary to complete the degree requirements. All M.P.H. students are required to conduct a scientific investigation on a topic relevant to human and public health. The research project is conducted under the guidance of a faculty adviser and a preceptor with expertise in the topic area. The student must prepare a report of the research and give an oral presentation to the department.

## Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus Graduate Committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus Graduate Committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application
2. An act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander)
3. Conviction of a felony involving moral turpitude
4. Plagiarism or other scientific misconduct

## MCV Campus Graduate Committee

The assembled directors of graduate programs and the associate dean for graduate education form the MCV Campus Graduate Committee, with the associate dean serving as chair of the committee. This committee holds the responsibility for ensuring appropriate administration of graduate programs, reviewing modifications of didactic courses, new course offerings and new programs, reviewing proposed modifications of program curricula to ensure maintenance of standards of quality, avoid duplication and comply with the missions of the school, and for recommending action to the dean. The committee members provide the pool of candidates from which the school representatives to the University Graduate Council are chosen.

The School of Medicine follows the policies of the Graduate School with regard to the modification of existing courses, curricula and programs as well as the introduction of new offerings. Proposals will normally come from the faculty acting through departmental bodies charged with the responsibility of monitoring academic training. In the case of offerings in interdisciplinary areas, these will normally require the input and approval of departments whose faculty and students are participants. The associate dean for graduate education in the School of Medicine may assist in the coordination of the proposal process. Proposed changes and additions are, under University guidelines, subject to review by the Curriculum Committee of the school. The MCV Campus Graduate Committee serves as the Curriculum Committee for the School of Medicine. On approval by the MCV Campus Graduate Committee, the approval of the dean of the School of

Medicine is required prior to submission to University Graduate Council for review.

For comprehensive information on the School of Medicine departments, programs and faculty, please go to the school Web site at <http://www.medschool.vcu.edu>.

## Professional programs

The School of Medicine offers the Undergraduate Medical Education, leading to the first-professional Doctor of Medicine degree; as well as Graduate Medical Education and Continuing Medical Education. Refer to each program's description for admission and program requirements.

### Undergraduate Medical Education (M.D.)

The School of Medicine offers the first-professional [Doctor of Medicine \(M.D.\)](#) that develops students' clinical skills, professionalism and critical thinking. For more information about admission standards, curriculum requirements and other policies for the M.D. program, refer to the Medicine, Doctor of (M.D.) section of this bulletin.

### Graduate Medical Education

Graduate Medical Education at Virginia Commonwealth University Health System provides diverse opportunities with very high academic and clinical standards for medical and dental graduates to pursue specialty training. Currently we offer over 70 medical and dental programs. The programs are accredited by either the Accreditation Council for Graduate Medical Education (ACGME) or the American Dental Association (ADA). Most of the programs use the ERAS application and the NRMP Matching program. We have over 700 residents training with the Health System and bring in approximately 200 new residents per year.

We encourage all qualified applicants to apply to our programs. For a detailed description of the qualifications and requirements please go to our Web page at [www.medschool.vcu.edu/gme/residency.html](http://www.medschool.vcu.edu/gme/residency.html).

### Continuing Medical Education

The primary goal of the VCU Office of Medical Education is to provide continuing educational experiences specifically designed to enhance the delivery of high quality patient care by physicians and other health care professionals in Virginia and other states. The philosophy of continuing medical education is based on the belief that learning must be viewed as a lifelong process. In past generations, the graduating physician was able to look upon an acquired knowledge base as a reasonably stable resource for practicing medicine. However, today's rapidly expanding load of scientific information forces a continuing learning effort upon the physician. Undergraduate and graduate medical education alone can no longer offer reasonable assurance that practitioners are armed with the knowledge, attitudes and skills that will enable them to render optimal, achievable patient care throughout their careers. Continuing education is now linked with undergraduate and graduate education to complete the continuum of medical education.

The goal and philosophy stated herein undergird and lend direction to the effort of the Office of Medical Education as it engages in a diversity of educational and education-related activities. Specifically, the Office of Medical Education works in concert with the faculty of the School of Medicine, as well as other individuals and organizations as appropriate, to:

- coordinate a statewide continuing medical education program for several networks of affiliate hospitals,
- organize the Virginia Hospital Television Network and provide continuing education programs for physicians and other health professionals directly into hospitals statewide, using satellite and audio-conferencing,
- develop and deliver a series of short courses, clinical workshops, seminars, international medical study tours and conferences for physicians and other health professionals,
- provide clinical refresher courses and make readily available self-learning materials and methods, conduct research to improve the process of continuing medical education, and
- improve the education of the general public in the proper use of health care resources.

Fostering an appreciation for the concept of lifelong learning in undergraduate and graduate medical school programs is a challenge that is now being confronted by medical schools throughout the nation. During these critical years, the attitudes of medical students toward continuing pursuits of learning are molded and developed. In order to encourage undergraduate and graduate students at VCU to embrace the concept of lifelong learning, the Office of Medical Education actively seeks their involvement in its various programs and activities. Brochures, posters and a yearly catalog are utilized to announce pending events.

Further information may be obtained by writing the Assistant Dean for Continuing Education, School of Medicine, Virginia Commonwealth University, P.O. Box 980048, Richmond, VA 23298-0048.

## Combined degree programs

The School of Medicine offers several combined degree programs:

- M.D./Ph.D. Program
- M.D./M.H.A.
- M.D./M.P.H. Program
- Combined M.S./Ph.D. and D.D.S. degree programs

All programs require review and acceptance by the professional degree program (M.D.) as a condition of entry into the combined degree program. Training for the graduate degree takes place following an initial phase of training in the professional program. Following completion of graduate degree requirements, the final phase of training in the professional degree program is concluded. Consult the appropriate listing for details of the admissions and program requirements.

### Medicine, Doctor of (M.D.)

The program for the M.D. degree is divided into four phases. The Scientific Foundations of Medicine covers the first semester and emphasizes the basic science concepts within a clinical context that every student must master to progress with a medical education. The Applied Medical Sciences integrate basic science principles with pathophysiology and treatment using an organ-system approach. This course runs two semesters. The last two years cover the Clinical Concentrations and Advanced Clinical Concentrations. Students are expected to successfully complete clerkships in seven core areas in addition to advanced training that assesses their competency to practice with supervision. There are also opportunities for students to take electives throughout the clinical concentrations to enrich their medical experience and to assist them in planning a career within a specific field of medicine.

School of Medicine students begin their clinical exposure in the first week of medical school in the Practice of Clinical Medicine course. The first week is a "boot camp" in learning the history and physical examination culminating in performing an H and P on a standardized patient that Friday. This longitudinal experience runs throughout the four years and consists of sessions in a physician's office, small-group sessions, workshops and interacting with standardized patients and simulators, and, finally, care of patients in advanced clinical settings. This course gives students the opportunity to learn the clinical relevance of basic science material and to work with a primary care role model.

## Admissions

### Whitehurst-Cook, Dr. Michelle

Associate Dean of Admissions

[www.medschool.vcu.edu/admissions](http://www.medschool.vcu.edu/admissions)

The School of Medicine participates in the American Medical College Application Service. The AMCAS application forms can be obtained from AMCAS, 2450 N. St., N.W., Washington, D.C. 20037-1126. The electronic application is available at [www.aamc.org/students/amcas](http://www.aamc.org/students/amcas). Updated information is available at the School of Medicine Web site: [www.medschool.vcu.edu](http://www.medschool.vcu.edu). Application for the School of Medicine should be made during the first week of June of the year preceding intended matriculation. Letters of recommendation can now be submitted with the AMCAS application.

The closing date for filing applications for this institution is Oct. 15 of the year preceding the enrollment date. Priority for admissions is given to Virginia residents; however 45 percent of each class is from out of state. Members from disadvantaged populations are encouraged to apply to the School of Medicine. Students previously dismissed from a medical school will not be considered. All applicants must be U.S. citizens, permanent residents of the U.S. or Canadian

citizens at the time of application. Permanent residents must submit their cards prior to file review.

A nonrefundable \$80 application fee and supplemental information, including letters of recommendation, are required with all applications accepted for further consideration. The final date for returning supplemental information is Jan. 31 of the year of possible enrollment in the School of Medicine. Students are given individual deadlines which are 60 days from the date the Supplemental Application is granted.

The School of Medicine will not matriculate students from other health sciences schools at VCU or any other school until such students have completed the degree program for which they are enrolled.

The School of Medicine participates in the Early Decision Plan. This program permits an applicant to file a single application through AMCAS by Aug. 1. All applicants filing under the Early Decision Plan will receive consideration for admission and a response on or before Oct. 1. All applications for the Early Decision Plan must be supported by the results of the new MCAT test at the time the application is made.

The early notification date of this plan ensures that those who are unsuccessful have ample time to request further distribution of their applications to other medical schools. Further information on the Early Decision Plan is available with the AMCAS application.

### Requirements for entrance

The MCAT is required as part of the application. It is necessary that the test be taken no later than September of the year of application. This test is produced by the American College Testing Program, P.O. Box 414, Iowa City, IA 52240, and is administered in colleges and universities throughout the country. Information about the MCAT is available through premedical advisers or directly from the American College Testing Program.

Applicants may be admitted on the basis of 90 semester hours of outstanding achievement. The majority of successful candidates have a college degree at the baccalaureate level or higher. The college major for premedical students should be selected in accordance with the individual student's aptitude and interest. The prerequisites for the School of Medicine have been reduced to a minimum in order to permit the widest possible latitude in preparation for medical education.

Prerequisites for admission include a minimum of 90 semester hours (or the equivalent) in a U.S. or Canadian college or university accredited by the regional accrediting agency. This program of study must include a minimum of:

1. English – two semesters (one semester to include grammar and composition);
2. College mathematics – two semesters;
3. Biological science – eight semester hours, including laboratory experience. This requirement may be satisfied by general biology, general zoology or botany. No more than half may be botany;
4. General or introductory chemistry – eight semester hours, including laboratory. An appropriate portion of this requirement may be met by courses in analytical chemistry or physical chemistry;
5. Organic chemistry – eight semester hours, including laboratory. This course should be equivalent to and acceptable for continued studies in a chemistry major;
6. General or introductory physics – eight semester hours, including laboratory experience.

Students are encouraged to pursue their own intellectual interests in college in order to obtain a broad education consistent with their major program. Courses in medically related science areas will not relieve the student of his/her responsibility for these subjects in the medical curriculum.

### Selection factors

Demonstrated academic ability, as well as attributes of character and personality, are of significance to the admissions committee in the selection process. A review of academic achievement as represented by the standard academic record and summaries, MCAT scores, evaluations and interviews are all sources of information on which the comparative evaluation process is based. A review of the completed application file and interviews with members of the admissions committee are an integral part of the admissions process.

Noncognitive variables also are sought in all candidates. These qualities include, but are not limited to, health care experience, community service and social

concern, communication skills both written and oral, leadership, ethical and moral behavior, creativity, compassion and empathy, altruism, personal maturity, self-confidence without arrogance, appropriate motivation, the ability to realistically self-appraise, and a demonstrated ability to work as a team member. These qualities and characteristics are judged by references within the letters of recommendation and from a careful review of the student's essays and extracurricular activities, as well as the interviewers' assessment during the interview. The School of Medicine hopes to create a learning environment where students will meet colleagues whose life experiences and views differ significantly from their own. A physician must be at home and at ease in a wide variety of environments and with a wide variety of people. Students frequently comment that the aspect of the school they appreciate most is the diversity of their class. The admissions process seeks to foster that diversity of perspective and background by admitting students from a wide range of backgrounds — socioeconomic, cultural, geographic and educational. Health care experience is also examined as a true evaluation of the motivation of the candidate for a career in medicine.

The interview is an opportunity for the applicant to become acquainted with the institution and it offers additional information for the selection process. Only on-campus interviews in Richmond are available. Each year more applicants are interviewed than can be accepted in the class. Therefore, an interview is not an indication of acceptance to the School of Medicine.

Offers for admission are made in the Early Decision Plan on Oct. 1 and on the uniform acceptance date after Oct. 15, with admissions occurring at several points thereafter until the class selections have been completed. The approximate dates for acceptance decisions are Oct. 16, Dec. 15, Feb. 1 and March 15. At the time the class is filled, an alternate list of applicants is compiled from which replacements are drawn for any vacancies that may occur in the selected class between notification and the third week of class attendance.

Since selections are made in advance of actual attendance, all acceptances are made on condition of satisfactory completion of courses planned or in progress. It is expected that candidates will maintain acceptable standards of deportment. Students offered acceptance into a class are expected to respond within two weeks of the offer. If such a response presents a problem, extension of the time for the response should be requested. After March 31, students are selected from a wait list of very good candidates until the first day of orientation in August.

The enrollment of accepted candidates is considered complete only after payment of the \$100 deposit toward the first tuition payment. This deposit will be returned to the candidate should withdrawal occur prior to May 15 of the year of attendance. By the act of matriculation into the School of Medicine, the student accepts the responsibilities related to this opportunity and agrees that during the time that he/she is a registered student he/she will follow the rules and regulations established by the governing bodies of the School of Medicine and the university.

### Transfer in advanced standing

#### Background

It is incumbent upon the School of Medicine to delineate the circumstances under which a student may transfer in advanced standing from another medical school; the number of transfers that will be allowed so as not to encumber educational resources for currently enrolled students; and to assess the qualification of transfer students to assure that they have had a comparable educational experience at the time of matriculation.

#### Policy

1. Medical students may only transfer into the VCU School of Medicine under rare and extraordinary circumstances (e.g., natural disaster that prevents continued education at the student's home institution, loss of accreditation by the home institution).
2. Only students from schools that are currently accredited by the LCME or that have recently lost accreditation will be considered for transfer. Osteopathic and international students and those from off-shore medical schools may not transfer.
3. Only U.S. and Canadian citizens and permanent residents may apply to transfer.
4. Students may only transfer into the clinical concentrations component of the curriculum and must complete all of their required clerkships and advanced clinical experiences at the VCU School of Medicine.

5. The senior associate dean for medical education will determine by January of each academic year if there are positions for transfer that would not impede on current resources.
6. Students seeking transfer must submit the following information by Nov. 1 of the year prior to transfer:
  - a. A letter of interest delineating the specific circumstances for transferring
  - b. A copy of the original AMCAS application
  - c. An official transcript from their current school of medicine
  - d. A letter of support from their school's dean of medical education or student affairs
  - e. A copy of the USMLE Step 1 verifying that that student has passed the examination
  - f. A non-refundable processing fee of \$100
7. Information for transfer should be mailed to:  
 Senior Associate Dean for Medical Education and Student Affairs  
 Virginia Commonwealth University School of Medicine  
 McGlothlin Medical Education Building  
 1201 East Marshall Street, 4th Floor  
 P.O. Box 980565  
 Richmond, VA 23298-0565
8. The senior associate dean for medical education and student affairs or his/her designee shall review the transcript and possibly contact the applicant's home school to determine that the educational experience is comparable to that of one of our students entering the clinical concentrations. In addition, criteria for comparability shall include, but not be limited to, GPA, USMLE scores and MCAT scores.

Applicants that have met the above requirements and who are deemed to add value to the current group of student will be offered interviews by the administrative staff of the School of Medicine. Holistic interviews will be completed similar to those seeking initial admission to the medical school.

Applicants will be notified of a final decision no later than Jan. 31 of the year of transfer.

### Disability Support Services

Virginia Commonwealth University in agreement with Section 504 of the Rehabilitation Act of 1973 and The Americans with Disabilities Act of 1990 provides reasonable accommodation to any individual who advises us of a disability. We wish to provide new and current students who have a disability the opportunity to voluntarily identify themselves.

Early identification permits the Coordinator of Services for Students with Disabilities the opportunity to acquire verification of the disability, if required, and the opportunity to get appropriate accommodations in place as soon as possible. All accommodations request are handled on an individual basis. Examples of some accommodations are; extended test taking time, alternative testing format, note takers, readers, scribes, quiet testing area, sign language interpreters, assistive technology and computer software programs which are located in the library for student use.

If you are an individual with a disability and wish to identify yourself as such, please contact the Office of Disability Support Services. It is important to note that all disclosures are confidential and are released only with your permission. A comprehensive VCU Handbook for Students with Disabilities is available upon request. **Be sure to include your name, address and phone number if you write.** We also are available to answer questions about accommodations and services.

Director, VCU Office of Disability Support Services P.O. Box 980124  
 Richmond, VA 23298-0124 (804) 828-9782 VTDD (804) 828-4608 FAX  
 (804) 828-4609 [www.vcuhealth.org/vp/sassdss](http://www.vcuhealth.org/vp/sassdss)

### Curriculum for students matriculating in 2012 or earlier

**Wood, Dr. Isaac K.**

Senior Associate Dean for Medical Education and Student Affairs  
[iwood@vcu.edu](mailto:iwood@vcu.edu)  
 (804) 828-9791

The program for the M.D. degree is divided into four phases, each of one year's duration. Medicine I, occupying the first year (mid-August to early June), emphasizes normal human structure, function, growth and development. Medicine II, occupying the second year (August to May), stresses pathological conditions. Medicine III occupies the third year (July to July) and consists of clinical education and training. Medicine IV, lasting from August to mid-May, consists of approximately one-fourth required clinical education and training with the remainder open for electives at the Virginia Commonwealth University Medical Center and at approved medical schools elsewhere in the U.S. and abroad. Elective opportunities also are offered in M-I and M-II.

Registration in courses offered by the School of Medicine is restricted to students enrolled in the School of Medicine at Virginia Commonwealth University.

### Medicine I and II

The curriculum is viewed as a dynamic and evolving entity and course titles, content or duration of emphasis may be subject to modification for the sake of improving the learning experience.

Each course in M-I and M-II is designed and implemented by a faculty committee and each phase of the curriculum is supervised by a faculty coordinator.

#### M-I Curriculum

The first year of medical school, from mid-August to early June, focuses on the normal human structure, function, growth and development.

- Foundations of Clinical Medicine – [www.medschool.vcu.edu/admissions/fcm.html](http://www.medschool.vcu.edu/admissions/fcm.html)
- Medical Bioethics
- Population Medicine
- Medical Biochemistry
- Human Genetics
- Gross and Developmental Anatomy
- Physiology
- Histology
- Behavioral Sciences
- Immunology
- Neurosciences

Total courses: 11

#### M-II Curriculum

The second year, from early August to late May, emphasizes the pathologic manifestations in the treatment of diseases. All students participate in the following courses:

- Foundations of Clinical Medicine
- Medical Bioethics
- Pharmacology
- Pathogenesis
- Microbiology
- Hematology-Oncology
- Endocrine
- Renal
- Respiratory
- Cardiovascular
- Behavioral Sciences II
- Central Nervous System
- Women's Health
- Gastrointestinal
- Musculoskeletal

Total courses: 15

## Medicine III

### M-3 Clerkships

During the third year, students receive clinical training by rotating through the various hospitals and ambulatory services. This rich clinical experience is supplemented by didactic presentations on practice-related topics. All students participate in the following clerkships:

- Internal Medicine (12 weeks)
- Surgery (8 weeks)
- Pediatrics (8 weeks)
- Obstetrics/Gynecology (6 weeks)
- Psychiatry (6 weeks)
- Neurology (4 weeks)
- Family Practice (4 weeks)
- M-III Workshop (1 week)

Total required rotations: 8

## Medicine IV

### M-IV Curriculum

M-IV is an elective year, with more than 200 electives offered. Each elective is four weeks long.

The School of Medicine, in an effort to best serve the needs and goals of the individual student, offers M-IV students the option of choosing electives during the majority of their senior year. The elective curriculum has been arranged primarily to allow those students who have definite goals to pursue them logically without adherence to a required curriculum. At the same time, it allows those who have not yet defined their goals an adequate assortment of electives with which to explore career options. Where standard elective choices seem too limiting, students are encouraged to approach individual faculty members relative to the development of unique courses that more closely approach individual needs. A member of the M-IV Advisory Committee is available to advise each student and to approve each student's program.

The year is divided into nine four-week periods. The required rotations, which must be served at the MCV Campus or an affiliated institution such as Inova-Fairfax Hospital or the McGuire VA Medical Center, are an acting internship and an emergent care selective in anesthesia, emergency medicine or one of the intensive care units. All students are required to take the year-end Update of Basic Sciences and Clinical Medicine course.

A description of the creation of the M-IV schedule, including Electives Guidelines and the policy for Visiting Students is presented in the Senior Electives Catalog section of the [School of Medicine website](#).

## U.S. Medical Licensing Examination

All students are required to take the U.S. Medical Licensing Examination Step 1 prior to the start of the M-III year. Students are required to pass Step 1 for promotion to the M-IV year. If a student fails Step 1, he or she will be allowed to complete the current M-III clerkship and be required to take time off during the M-III year in an elective status to study for and retake the exam. The time off will be individualized for each student after discussion with the curriculum office and approval by the Promotions Committee. Failing to pass the exam after three attempts will result in dismissal.

All students are required to take U.S. Medical Licensing Examination Step 2 CK and CS for the first time after completion of their M-III year or by Dec. 1. Students are required to pass USMLE Step 2 CK and CS for graduation. Failure to pass either examination after three attempts will result in dismissal.

## Grading and promotions

Each student's progress toward his/her objectives is evaluated by examination in each area of subject matter and by national board examinations at appropriate times. Grades are assigned as honors, high-pass, pass, marginal or fail. Students receiving marginal or fail grades are counseled. All students are assigned a faculty adviser, available to the student throughout the four years of study.

Students who have attained satisfactory grades in M-I and M-II, but who do not pass U.S. Medical Licensing Examination Step 1, must take time off to study the basic medical sciences during the third school year, prior to their repeating the Step 1 examination. These students will use part of their fourth year to complete the segments omitted during the study time. Students must pass USMLE Step 1 to be promoted to the M-IV year.

At the close of each academic year, the Promotions Committee, composed of department chairs, recommends to the dean which students have achieved the objectives of the year and which students are qualified for either promotion or graduation. The Promotions Committee is charged to give careful individual attention to all aspects of student achievement, effectiveness, behavior and attitude. The Promotions Committee shall not recommend for promotion any student who has failed to meet the requirements of the preceding year or who appears unfit for the practice of medicine. In consideration of one's fitness for the practice of medicine and in recognition of the critical role of professionalism in being an effective physician, the Promotions Committee shall not recommend for promotion any student who has demonstrated a significant lack of either integrity or professionalism as those concepts are outlined in the School of Medicine Standards of Professional Behavior. When the committee determines by majority vote that a student will not be promoted, it then recommends to the dean remedial activities or dismissal in instances where no remedy is perceived. The dean reviews the recommendations and promptly notifies students that they have been promoted, have to repeat a year, require specific remediation or have been dismissed. A student repeating the year is expected to show significant improvement. The Promotions Committee also will meet each January to review the status of all senior students, all third-year students and M.D./Ph.D. candidates. At this meeting, the committee also will review any other students in serious academic difficulty and may choose to take final action, including dismissal, on such students.

An Appeals Committee of three senior faculty members will hear appeals of dismissals when such are filed in writing within 14 days of the student's notice of dismissal. A student also may appeal a decision to repeat a year, but such appeals will be reviewed by the Appeals Committee only when it is found that the student will present information not previously available to the Promotions Committee. A student appealing has the right to appear before the Appeals Committee and to have an adviser participate. The dean of the School of Medicine will act upon the recommendation of the Appeals Committee within 14 days of receipt of the committee's recommendation.

**For classes matriculating in 2012 or earlier, the following guidelines will apply. It should be noted that these only serve as guidelines for the Promotions Committee which may recommend other remediation or dismissal:**

**M1/M2:** If a student does not achieve competency in one course, he/she will be required to take a repeat examination. If the student does not achieve competency on the repeat examination, he/she will be required to repeat the year and pass all courses previously taken. If the student passes the examination, he/she will be promoted to the next year.

If a student does not achieve competencies in two courses, he/she will be required to take a repeat examination in each course. If the student does not pass both examinations, he/she will be required to repeat the year and pass all courses previously taken. If the student passes both examinations, he/she will be promoted to the next year.

If a student does not achieve competencies in three courses, he/she will be required to repeat the year and pass all courses previously taken. If a student does not achieve competency in four courses, he/she will be dismissed.

**M3:** If a student earns a less than passing grade in a core clinical clerkship, his or her file will be reviewed in the Promotions Committee process. If a student has a fail in a clerkship, the student is required to repeat the entire clerkship in his/her fourth year. If the student has three less-than-passing grades on the first attempt in core clinical clerkships, the student is required to repeat the third year. A student repeating the entire year is expected to pass all clerkships taken previously or be immediately dismissed. A marginal grade is not a passing grade. If a student has four less-than-passing grades in core clinical clerkships, he or she may be dismissed. Students are required to pass USMLE Step 1 for promotion to the advanced clinical phase.

**M4:** A student with one grade of Marginal in a non-required M4 elective may be allowed to graduate without remediation. A grade of Fail in any elective or a grade of Marginal in a required experience (e.g., an acting internship or urgent care elective) must be remediated. Appropriate remediation is determined by the

elective director in consultation with the Senior Associate Dean for Medical Education and Student Affairs.

### The appeal process

Students may appeal decisions of dismissal, except for dismissals by the Honor Council (which should be appealed through the appropriate Judicial Affairs procedures). Students also may appeal decisions to repeat a year/semester or to not be graduated. Such appeals will be heard by the Appeals Committee. The Appeals Committee shall consist of three faculty members, elected by the faculty with staggered terms. One of those members shall be designated by the dean as the chair. A student will be granted an appeal hearing only if two senior faculty members selected by the dean agree that any of these situations occurred:

- The Promotions Committee process was conducted unfairly or without regard to prescribed procedure or protocol.
- There is new evidence or relevant information not available at the time of the Promotions Committee meeting that if consequential, would have altered the decision of the Promotions Committee.
- The original decision was not supported by substantial evidence.
- The sanction imposed was disproportionate to the gravity of the situation.

### Procedure

- A student must file an appeal in writing to the dean's office within 14 calendar days of the date of the mailing of the student's notice of action of the Promotions Committee. The student will be notified via email and through the postal service. The date of the email marks the official start of the appeal process.
- The student's appeal will be reviewed by two senior faculty members who will decide if there are sufficient grounds to conduct an appeal hearing. This decision will be made within 14 calendar days of receiving the student's written appeal.
- If a hearing is warranted, the Appeals Committee will meet within 21 calendar days of the review by the senior faculty members.
- The appealing student has the right to appear before the Appeals Committee, but the time available to him/her may be limited by the Appeals Committee chairperson. The time limitation will not be less than one-half hour.
- The student may have anyone who would serve him/her as an adviser present during his/her presentation to the Appeals Committee. The adviser may participate in the student's presentation (within the time limits set forth above) and may address questions to the representative of the Promotions Committee.
- The student may have an attorney present, but the attorney may not participate in this academic hearing nor serve as an adviser to the student.
- The appealing student has the burden of proof. The senior associate dean for medical education and student affairs will present the findings of the Promotions Committee and describe their discussion to the Appeals Committee.
- The student, his/her representative, the senior associate dean for medical education and student affairs, and the dean's representative are not present during the deliberations or voting of the Appeals Committee.
- All components of the appeal process are recorded except the deliberations. The recording represents the sole, official, verbatim record of the hearing and is the property of Virginia Commonwealth University School of Medicine.

The Appeals Committee will send its findings and recommendation and the recorded vote to the dean of the School of Medicine who must act upon the recommendation within 14 calendar days. The dean's decision is final and may not be appealed. Students who have been dismissed may reapply to medical school as a matriculating student.

### Withdrawal

Students may withdraw after meeting with the senior associate dean for medical education and submitting a letter requesting withdrawal.

### Requirements for graduation

The degree of Doctor of Medicine will be conferred by VCU upon candidates who, in the opinion of the medical faculty, have:

- Attained the schools educational objectives as evidenced by satisfactory completion of prescribed courses and examinations, by proven clinical skills and responsibilities, and by ethical standards.
- Passed Step 1, Step 2CK and Step 2CS of the U.S. Medical Licensing Examination before graduation (April of the M-IV year).
- Attended the School of Medicine for a minimum of two years, one of which must be an academic year of clinical rotations.
- Discharged all financial obligations to the university.

It is the policy of the School of Medicine that candidates must be present at commencement exercises unless excused by the dean.

## School of Medicine core competencies and objectives

**Professionalism:** The ability to understand and demonstrate the nature of professional and ethical behavior in the act of medical care. This includes respect, responsibility, accountability, excellence, honor, integrity, altruism, leadership, cultural competency, compassion, maintenance of professional boundaries and confidentiality.

Students who are graduated from Virginia Commonwealth University School of Medicine will:

- Provide compassionate care to patients with respect for their privacy and dignity
- Display honesty, integrity and responsibility in all educational settings and in interactions with patients, their families and colleagues
- Consistently advocate for the patient's best interest
- Practice ethical decision-making
- Be accountable to the patient, society and the profession through a commitment to excellence and ongoing professional development
- Respond appropriately to the conflicts of interest inherent in the various financial and organizational arrangements within the practice of medicine
- Participate as an active member of the learning community and facilitate the learning of peers and other health care professionals
- Describe the psychological and physical risks and stressors of the practice of medicine
- Identify possible impairments in function and practice techniques for harm reduction

**Patient engagement and communication (interpersonal and communication skills):** The ability to engage and communicate with patients, their families and professional associates, using interpersonal skills to build relationships for information gathering, guidance, education, support and collaboration.

Students who are graduated from Virginia Commonwealth University School of Medicine will:

- Create and sustain therapeutic and ethically sound relationships with patients and their families
- Employ effective oral and written communication skills to elicit and convey information while building rapport with patients, their families and professional associates
- Build collaborative relationships across both educational and clinical environments with patients, their families and professional associates
- Engage in shared decision-making with patients and their families or individuals designated to fulfill this responsibility for the patient
- Educate and counsel patients regarding basic lifestyle changes and disease prevention
- Conduct patient handover communications to other providers which are effective, efficient and maximize patient safety

**Application of scientific knowledge and method (medical knowledge):** The ability to discuss the biomedical, epidemiological and social-behavioral aspects of clinical science and apply this knowledge to patient care.

Students who are graduated from Virginia Commonwealth University School of Medicine will:

- Use the scientific method to analyze basic, translational and clinical research

- Describe the molecular basis for the functions of organs and systems in health and disease
- Describe, apply and integrate the normal and pathologic structure and function of each organ system of the body
- Describe, apply and integrate the ways in which organ systems are affected by the various causative mechanisms of disease
- Recognize the clinical, laboratory, radiographic and pathologic manifestations of disease
- Describe, apply and integrate the scientific basis of disease prevention and treatment, including intended and unintended effects
- Apply evidence-based practice in defining and treating disease and when evaluating the efficacy of traditional and nontraditional therapies
- Appraise the impact of social-behavioral factors on health maintenance, causation of disease and therapeutic outcomes

**Patient care:** The ability to provide patient care that is appropriate and effective for the treatment of health problems and the promotion of health.

Students who are graduated from Virginia Commonwealth University School of Medicine will:

- Obtain a complete history and perform a comprehensive physical/mental status examination in an organized fashion without supervision
- Utilize a focused history and physical and mental status examination to obtain relevant clinical information in a prioritized, organized and efficient manner
- Utilize alternative sources (i.e. family members, other health care providers, etc.) to obtain a medical history when necessary
- Recognize patients with immediate life-threatening or serious conditions that require critical care and outline an initial course of management
- Discuss with and provide to patients and their families information and counseling aimed at disease management, prevention and wellness
- Identify the epidemiology of common conditions within a defined population and apply systematic approaches to help reduce the incidence and prevalence of these conditions
- Describe the indications, risks, limitations, complications and interpretation of commonly used diagnostic tests
- Perform routine procedures competently and identify the indications, risks, limitations, justifications, complications and interpretations of these procedures
- Construct appropriate assessments, differential diagnoses and treatment plans for patients across the spectrum of medical presentations
- Gather, interpret and apply ongoing relevant clinical information in the care of patients
- Select appropriate tests for detecting patients at risk for specific diseases and determine strategies for responding appropriately
- Utilize information technology to gather patient data, support patient care decisions and educate patients and their families
- Enter and discuss safe and appropriate orders for patients using written form as well as the electronic medical record
- Compose prescriptions in verbal, written and electronic formats using accepted standards
- Obtain informed consent for interventions, tests and/or procedures which they order and/or perform

**Putting care in practical context (systems-based practice):** The ability to provide clinical care within the practical context of a patient's age, gender, personal values, family, health literacy, culture, religion and social and economic circumstances. This goal includes consideration of relevant ethical, moral and legal perspectives, patient advocacy, public health concerns, and resources and limitations of the health care system.

Students who are graduated from Virginia Commonwealth University School of Medicine will:

- Obtain patient histories including information about patients' culture and other factors that may influence the appropriate course of care

- Perform culturally sensitive physical exams
- Identify cultural barriers that are perceived by patients as impacting health and health care
- Develop plans of care that take into account pertinent cultural attributes of patients and address barriers perceived by patients
- Compare and contrast various approaches to the organization, financing and delivery of health care
- Demonstrate understanding of the legal framework within which physicians function
- Describe the various roles and responsibilities of members of the health care team
- Interact effectively with all members of the health care team to provide the best possible care for patients
- Relate the effect of public policy actions to individual health and health care systems as a whole
- Define the methods used by individuals and systems to improve quality of care
- Practice a commitment to provide care to patients who are unable to pay and to advocate for access to health care for members of underserved populations
- Recognize and appropriately address gender and cultural biases in themselves and others and in the process of health care delivery

#### **Self-directed learning and self-assessment (practice-based learning and improvement):**

The ability to assess and understand one's learning style, to self-identify areas of strength and weakness, to independently identify and evaluate resources to engage in lifelong learning, and to critically appraise the evolving body of medical knowledge.

Students who are graduated from Virginia Commonwealth University School of Medicine will:

- Appreciate the limitations of one's own knowledge and skills and seek to engage in lifelong learning and the advice and teaching of more experienced medical practitioners to address those limitations
- Appreciate the limitations of the role of a physician
- Appreciate the limitations of the evolving body of medical knowledge
- Retrieve, critically review and utilize biomedical and biopsychosocial information
- Identify means to maintain a healthy balance between professional and personal responsibilities to optimize mental, physical and emotional well-being

### **School of Medicine Registrar**

The School of Medicine houses a Registrar's Office to meet the needs of physician trainees and alumni. Visit the School of Medicine Web site for more information at [www.medschool.vcu.edu/registrar](http://www.medschool.vcu.edu/registrar).

### **Criminal background checks**

All applicants to the VCU School of Medicine who receive an acceptance will have a criminal background check performed by Certiphi Screening Inc. If there is a positive finding you will be notified by Certiphi first; this will allow you to make corrections to the report and verify the information. If there is no change in your status Certiphi will then notify VCU of their positive findings. VCU's Criminal Background Committee will meet to discuss your Certiphi report to determine if acceptance is to be withdrawn. We encourage full disclosure at all times on the AMCAS and supplemental applications, as dishonesty will impact the committee's decision. If you have a legal finding or institutional action against you after the supplemental is submitted please notify our admissions office immediately. Once an applicant is matriculated, full disclosure is also required throughout your time in medical school. Criminal background checks are repeated for all students at the end of the second year and for specific program participations throughout medical school.

### **Health policies**

Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to

or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed annually. For details related to these policies, please visit [www.medschool.vcu.edu/studentactivities](http://www.medschool.vcu.edu/studentactivities).

The School of Medicine requires that all students enrolled in the graduate academic programs administered by the school hold active health insurance coverage. This requirement applies to students at all degree categories: doctoral, master's and certificate. Compliance is monitored by administrative offices of the school and departments. Failure to comply with this requirement is grounds for dismissal.

## Student organizations

The School of Medicine, through the Office of Student Affairs, provides oversight to all of the organizations available to medical students. All student organization are required to register with the Office of Student Affairs following established policy and the approved registration format.

For more information, visit the School of Medicine student organizations Web page at [www.medschool.vcu.edu/studentactivities/studentorganizations.htm](http://www.medschool.vcu.edu/studentactivities/studentorganizations.htm).

## Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [combined]

### Graduate program director

Jennifer S. Wayne, Ph.D.

Professor and associate chair, Department of Biomedical Engineering  
[jwayne@vcu.edu](mailto:jwayne@vcu.edu)  
(804) 828-2595

### Additional contact

Gerald E. Miller, Ph.D.

Professor and chair, Department of Biomedical Engineering  
[gemiller@vcu.edu](mailto:gemiller@vcu.edu)  
(804) 828-7263

**Program website:** [biomedical.egr.vcu.edu](http://biomedical.egr.vcu.edu)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Biomedical Engineering, Doctor of Philosophy (Ph.D.)

Biomedical Engineering, Master of Science (M.S.)

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

The M.D./Ph.D. program seeks to train physician-scientists for careers that bridge basic and clinical science. Physician-scientists will translate laboratory discoveries into better patient outcomes. The program begins two months prior to the first year of medical school. These students arrive on campus for orientation and complete two laboratory rotations before the start of medical school classes. They complete the first two years of medical school and, after taking the first part of the U.S. National Medical Licensing Examination, enter a Ph.D.-granting department or program as a graduate student. Graduate-level course work, examinations and research will be guided by the dissertation adviser and the dissertation committee, with oversight by members of the M.D./Ph.D. steering committee. The main undertaking at this phase is laboratory research that leads to the Ph.D. dissertation. After completion of doctoral degree requirements, students move to the clinical year of medical school. Students may begin the clinical year of medical school immediately after completion of doctoral degree requirements, regardless of the time in the calendar year, and, 14 to 16 months later, may complete their medical school requirements. These students are exempt from the major part of the fourth year of medical school.

Prospective students submit applications through the American Medical College Application Service. Upon review of the AMCAS documents, qualified applicants are sent supplemental admission materials, including an application for the M.D./Ph.D. program. Those invited to Richmond for interviews will spend one day in the standard interview for the School of Medicine and will spend a second day interviewing with members of the M.D./Ph.D. steering committee, as well as touring labs of faculty scientists.

Admission of medical students to the Ph.D. phase of training takes place formally following completion of the M-II year of M.D. training. A copy of the student file

is transferred to the Office of Graduate Education and the individual is formally accepted to Ph.D. training by the VCU Graduate School.

The requirements for a combined professional school/graduate school degree in the School of Medicine are equivalent to those required of students seeking a graduate degree alone and are determined by the individual program.

For additional information, please see the program Web site at [mdphd.vcu.edu](http://mdphd.vcu.edu).

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of both programs.

## Medicine, Doctor of (M.D.)/Doctor of Philosophy (Ph.D.) [combined]

### Graduate program director

Gordon L. Archer, M.D.

Senior associate dean for research, School of Medicine

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

**Medicine, Doctor of (M.D.)/Health Administration, Master of (M.H.A.) [combined]**

### Graduate program director

Dolores G. Clement, Ph.D., FACHE  
Professor and director, dual-degree programs

[dclement@vcu.edu](mailto:dclement@vcu.edu)

(804) 828-0719

### Additional contact

Suzanne C. Havasy  
Coordinator, M.H.A. program  
[shavasy@vcu.edu](mailto:shavasy@vcu.edu)  
(804) 828-0719

**Program website:** [had.vcu.edu/prospective/mha](http://had.vcu.edu/prospective/mha)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Health Administration, Master of (M.H.A.)  
Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [combined]  
Health Administration, Master of (M.H.A.)/Juris Doctor (J.D.) from the University of Richmond or Washington and Lee University [combined]  
Health Administration, Master of Science in (M.S.H.A.)

Students may indicate their interest in the combined program prior to matriculation or during the first three years of the M.D. program.

Advanced study in health administration and medicine is available through a dual-degree program co-sponsored by the Department of Health Administration and the VCU School of Medicine. The program leads to the awarding of the Doctor of Medicine and Master of Health Administration degrees. The objective of the M.D./M.H.A. program is to provide highly motivated medical students the expertise for management and leadership competency in complex health care organizations. The program may be completed in five years. Applicants for this program are required to meet the admission requirements of each program.

For the combined degree program, course work for the M.H.A. is initiated following completion of the first two or three years of the M.D. program, occupies a full academic year (fall, spring and summer) and extends into a second year, and is taken during a hiatus from the third or fourth year of the M.D. program.

Students interested in the program may contact the School of Medicine Office of Curriculum or the director of the M.H.A. program in the Department of Health Administration (School of Allied Health Professions). For additional information refer to the School of Medicine handbook available on the school's Web site at [medschool.vcu.edu](http://medschool.vcu.edu).

The M.H.A. curricular sequence of the M.H.A./M.D. degree is shown below. Students take a total of 43 credit hours of M.H.A. course work that includes a three-credit hour internship.

Courses	Credit hours
HADM 602 Health System Organization, Financing and Performance	3
HADM 606 Health Care Managerial Accounting	3
HADM 607 Financial Management in Health Organizations	3
HADM 610 Health Care Management Decision Support Systems	3
HADM 611 Health Care Law and Bioethics	3
HADM 612 Information Systems for Health Care Management	3

HADM 646 Health Care Organization and Leadership	3
HADM 647 Management of Health Care Organizations	3
HADM 648 Strategic Management in Health Care Organizations	3
HADM 649 Human Resources Management in Health Care	3
HADM 682 Executive Skills I	1
HADM 693 Internship in Health Administration	3
<b>Total graduate credit hours required (minimum)</b>	<b>43</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

Human Genetics, Master of Science (M.S.)  
Medicine, Doctor of (M.D.)  
Microbiology and Immunology, Master of Science (M.S.)  
Pharmacology and Toxicology, Master of Science (M.S.)  
Physiology and Biophysics, Master of Science (M.S.)

## Combined Doctor of Medicine and Master of Science

Medical students seeking to expand their competency in the conduct of research may choose the research-intensive, non-thesis curriculum for medical students in one of several master's-level programs within the School of Medicine. This curriculum builds on the core of disciplinary material embedded in the medical

school curriculum in the first two years of training with additional exposure to specialized areas in basic science disciplines. The research experience leads to preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within a period of 12 to 15 months.

Contact the graduate program director for additional information.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. ## Admission requirements

Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.) [combined]			
Degree:	Semester(s) of entry:	Deadline dates: Applications strongly encouraged by Jan 1	Test requirements: MCAT (acceptable in lieu of GRE scores for this combined professional/academic degree program) TOEFL
M.D. and M.P.H.	Fall		

**Refer to the [program search](#) function of the online VCU Bulletins for a complete description of the individual degree programs.**

**Note:** Students applying to the joint M.D./M.P.H. program should be accepted to the VCU School of Medicine prior to applying to the M.D./M.P.H. Program. Students must apply separately to each program. Applications to the M.P.H. program are made to the VCU Office of Graduate Admissions.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must present the following qualifications.

1. Prior degree: Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. Test scores: The M.P.H. program normally requires GRE scores, but for the combined M.D./M.P.H., students may submit MCAT scores provided for admission to the School of Medicine in lieu of GRE scores.
3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement following these guidelines:

- a. The document should be 1.5 or double-spaced with one-inch margins, in a font no smaller than 11 points.
- b. The document should cover the following issues in two to five pages:
  - Description of the applicant's career goals
  - Why the applicant wishes to pursue an M.P.H. degree
  - How an M.P.H. degree will help the applicant achieve her/his career goals
  - Description of applicant's particular areas of interest in public health (e.g., maternal and child health, cancer epidemiology)
  - Why VCU's M.P.H. program best fits the student's public health interests
  - What applicant plans to do in the first few years after graduation

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Division of Epidemiology in the Department of Family Medicine and Population Health in the School of Medicine offers a program for VCU medical students to obtain a Master of Public Health degree in conjunction with their medical training. The M.D./M.P.H. combined-degree program provides an opportunity for medical students who wish to pursue a public health or research career to graduate from medical school trained in both clinical and preventive, population-oriented medicine. Graduates from this program are prepared for positions in preventive medicine, primary care, research, community-based health centers and state and local health departments. Students complete a set of core and required courses plus six credit hours of elective course work and a capstone project.

The objective of the combined program is to provide high quality and in-depth training in public health to qualified medical students. The five-year program includes four years of medical school and one year of study in the M.P.H. program. During the M.P.H. year, students take a minimum of 30 credit hours of didactic courses. To complete the M.P.H. requirements, students receive 12 credit hours for successful academic work during the first two years of medical school and take a minimum of one public health elective during the M-4 year.

**Note:** Students may register for the M.P.H. year either prior to entering medical school or after the M-3 year and prior to M-4 electives. Enrollment in the dual-degree program requires admission into both the School of Medicine and the Graduate School. Students must successfully complete all required course work to receive both degrees at the end of the five years.

The mission of the M.P.H. program is to engage students in an experiential, learner-centered environment, collaborate with public health partners in Central Virginia to promote health equity and community wellness, and foster lifelong inquiry and discovery in interdisciplinary, translational research that improves human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships

and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to positions as public health practitioners in a broad spectrum of positions and settings and who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

## Student learning outcomes

The M.P.H. program trains students to develop the following educational competencies, selected from the Association of Schools of Public Health's "Master's Degree in Public Health Core Competency Model," August 2006.

1. Biostatistics:
  - a. Describe the roles biostatistics serves in the discipline of public health
  - b. Describe basic concepts of probability, random variation and commonly used statistical probability distributions
  - c. Describe preferred methodological alternatives to commonly used statistical methods when assumptions are not met
  - d. Distinguish among the different measurement scales and the implications for selection of statistical methods to be used based on these distinctions
  - e. Apply descriptive techniques commonly used to summarize public health data
  - f. Apply common statistical methods for inference
  - g. Apply descriptive and inferential methodologies according to the type of study design for answering a particular research question
  - h. Apply basic informatics techniques with vital statistics and public health records in the description of public health characteristics and in public health research and evaluation
  - i. Interpret results of statistical analyses found in public health studies
  - j. Develop written and oral presentations based on statistical analyses for both public health professionals and educated lay audiences
11. Environmental health sciences:
  - a. Describe the direct and indirect human, ecological and safety effects of major environmental and occupational agents
  - b. Describe genetic, physiologic and psychosocial factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards
  - c. Describe federal and state regulatory programs, guidelines and authorities that control environmental health issues
  - d. Specify current environmental risk assessment methods
  - e. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety
  - f. Explain the general mechanisms of toxicity in eliciting a toxic response to various environmental exposures
  - g. Discuss various risk management and risk communication approaches in relation to issues of environmental justice and equity
8. Epidemiology:
  - a. Identify key sources of data for epidemiologic purposes
  - b. Describe a public health problem in terms of magnitude, person, time and place
  - c. Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues
  - d. Apply the basic terminology and definitions of epidemiology
  - e. Calculate basic epidemiology measures
  - f. Communicate epidemiologic information to lay and professional audiences
  - g. Draw appropriate inferences from epidemiologic data
  - h. Evaluate the strengths and limitations of epidemiologic reports
9. Health policy and management:
  - a. Identify the main components and issues of the organization, financing and delivery of health services and public health systems in the U.S.
  - b. Describe the legal and ethical bases for public health and health services
  - c. Discuss the policy process for improving the health status of populations
4. Social and behavioral sciences:
  - a. Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice
  - b. Identify the causes of social and behavioral factors that affect health of individuals and populations
  - c. Describe steps and procedures for the planning, implementation and evaluation of public health programs, policies and interventions
  - d. Apply evidence-based approaches in the development and evaluation of social and behavioral science interventions
  - e. Apply ethical principles to public health program planning, implementation and evaluation
6. Communication and informatics:
  - a. Describe how societal, organizational and individual factors influence and are influenced by public health communications
  - b. Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities
3. Diversity and culture:
  - a. Describe the roles of history, power, privilege and structural inequality in producing health disparities
  - b. Explain how professional ethics and practices relate to equity and accountability in diverse community settings
  - c. Differentiate among availability, acceptability and accessibility of health care across diverse populations
4. Leadership:
  - a. Engage in dialogue and learning from others to advance public health goals
  - b. Demonstrate transparency, integrity and honesty in all actions
3. Public health biology:
  - a. Apply biological principles to development and implementation of disease prevention, control or management programs
2. Professionalism:
  - a. Apply basic principles of ethical analysis (e.g. the Public Health Code of Ethics, human rights framework, other moral theories) to issues of public health practice and policy
  - b. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision-making in public health
  - c. Apply the core functions of assessment, policy development and assurance in the analysis of public health problems and their solutions
  - d. Promote high standards of personal and organizational integrity, compassion, honesty and respect for all people
  - e. Distinguish between population and individual ethical considerations in relation to the benefits, costs and burdens of public health programs

- f. Appreciate the importance of working collaboratively with diverse communities and constituencies (e.g. researchers, practitioners, agencies and organizations)
7. Program planning:
  - a. Differentiate among goals, measurable objectives, related activities and expected outcomes for a public health program
  - b. Differentiate the purposes of formative, process and outcome evaluation

## Degree requirements

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. Public health works to prevent health problems in populations before these problems occur. The M.P.H. provides a rigorous curriculum to help students develop the analytic and critical reasoning skills to improve population health. The program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in important projects.

In addition to general [VCU Graduate School graduation requirements](#), students are required to successfully complete minimum of 30 credit hours of formal course work and practicum, a 20-hour community-based learning experience, attendance at 12 public health seminars, and a capstone project. In addition, medical students will complete a public health elective during the M-4 year at a placement approved by the M.P.H. program director, in lieu of the required public health internship.

The M.P.H. program can be individualized to meet the varied needs and interests of students. The program offers many electives, allowing students to tailor the program to meet educational objectives, and it is flexible enough to accommodate students who enter the program with various backgrounds and experiences.

**Capstone project:** The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student's academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report
3. Policy analysis report
4. Health promotion materials (e.g., brochures/posters/fliers, educational video games, website content, etc.) on a specific disease area
5. Needs assessment for a specific population
6. Development and implementation of target population surveys
7. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

### Non-didactic program requirements

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

## Curriculum requirements for the combined M.D./M.P.H. program

<b>Course</b>	<b>Credit hours</b>
---------------	---------------------

<b>Fall semester (after M-3 training)</b>	<b>13.5</b>
BIOS 547 Applied Data Analysis in Public Health I	3
EPID 547 Applied Data Analysis Lab I	1.5
EPID 580 Public Health Ethics	1
EPID 593 MPH Practicum	2
HCPR 601 Introduction to Health Policy	3
Elective (See list below.)	3

<b>Spring semester (after M-3 training)</b>	<b>16.5</b>
BIOS 548 Applied Data Analysis in Public Health II	3
EPID 548 Applied Data Analysis Lab II	1.5
EPID 604 Principles of Environmental Health	3
EPID 694 MPH Capstone Project	3
SBHD 605 Introduction to Social and Behavioral Health	3
Elective (See list below.)	3

### Total graduate credit hours required (minimum) 30

Selected course work completed during the M-1 and M-2 years of study for application toward the M.D. accounts for 12 credit hours toward the M.P.H. degree. This includes a waiver of the core epidemiology course EPID 571, due to training in population health in the M.D. curriculum. The public health internship requirement is fulfilled through completion of a public health elective in the M-4 year, after the student completes the M.P.H. year. This elective occurs at a public health agency that is approved by the M.P.H. program director.

### Electives

Students take a minimum of six credit hours of elective course work selected according to a student's area(s) of interest in public health. These may include the following courses:

BIOS 571 Clinical Trials	3
EPID 600 Introduction to Public Health	3
EPID 601 Contemporary Issues and Controversies in Public Health	3
EPID 603 Public Health Policy and Politics	3
EPID 620 Cancer Epidemiology	3
EPID 622 Maternal and Child Health	3
EPID 624 Chronic Disease Epidemiology	3
EPID 646 Epidemiology of Psychiatric and Substance Use Disorders	3
EPID 648 Behavioral Epidemiology	3
SBHD 608 Health Communication	3
SBHD 632 Health Disparities and Social Justice	3
SBHD 636 Community-based Participatory Research	3

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

The M.P.H. program student handbook is available upon request.

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

### Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in advanced international addiction studies

#### Graduate program director

Mary E. Loos, Ph.D.

Associate professor, Department of Psychology

[meloos@vcu.edu](mailto:meloos@vcu.edu)

(804) 828-8019

Program website: [ipas.vcu.edu](http://ipas.vcu.edu)

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

### Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in advanced international addiction studies

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 13	TOEFL

**Special requirements:** Prospective students will find application materials on the VCU IPAS website. Application forms, reference letters and official university transcripts should be sent to the VCU program director, Mary Loos, Ph.D., as instructed on the website. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

Through a collaborative program between VCU, King's College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain a Certificate in Addiction Studies.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must:

1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor's degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor's degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or grade C or above in GCSE English.

Students who are enrolled in the Certificate in Addiction Studies intermediate concentration and are maintaining a minimum GPA of 3.0 may elect to change their concentration to the advanced concentration at any time during their enrollment with the permission of the program director. Students will be awarded only one certificate, however, which will reflect their highest level of attainment.

Students who have completed the Certificate in Addiction Studies intermediate concentration may also, after a period away from study, choose to apply for the advanced concentration addiction studies certificate. Students wishing to continue their studies through this mechanism may count the earlier courses toward the advanced concentration, as long as they meet all admission requirements of the Graduate School and pending surrender of the lower-level credential before being awarded the more-advanced credential. Courses taken more than four years prior to the time of the student's application will not be considered transferable and will need to be repeated.

Students completing either concentration in the Certificate in Addiction Studies may apply to the Master of Science in Addiction Studies program, also known as the International Programme in Addiction Studies and, if accepted, have their courses count toward that degree as long as they meet all admission requirements of the Graduate School. Courses taken more than four years prior to enrollment in the M.S. program will not be considered current and must be repeated.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The mission of the addiction studies certificate with a concentration in advanced international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of both essential and advanced topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

## Program goals

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.

- Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

## Student learning outcomes

- Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
- Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
- Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students are required to successfully complete 24 credit hours in the six required graduate courses.

## Curriculum requirements

Courses	Credit hours
IPAS 600 The Biological Basis of Addiction	4
IPAS 601 Treatment of Addiction: Psychosocial Interventions	4
IPAS 602 Public Health Issues and Approaches to Addiction	4
IPAS 603 Addiction Policy	4
IPAS 604 Treatment of Addiction: Pharmacotherapies	4
IPAS 605 Treatment of Addiction: Critical Issues	4
<b>Total graduate credit hours (minimum)</b>	<b>24</b>

## Degree candidacy requirements

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The mission of the International Program in Addiction Studies leading to a Master of Science in Addiction Studies degree is to offer students cross-cultural exposure to the critical prevention, treatment, research and policy issues facing the field. Through a collaboration arrangement including VCU, King's College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain the degree. The program is designed to prepare students for local, national and international policy positions, prevention/treatment program management and other leadership positions in the addictions field. This program will speed the dissemination of the latest international addictions-related knowledge, especially to remote locations around the world, and help students compare international perspectives and translate this knowledge into more effective prevention and treatment practices and evidence-based policies within their own countries.

Students in the program will:

1. Demonstrate a detailed knowledge of the field of addiction science (including comparative international policies and practices) to prepare them for leadership roles in a variety of settings (including addiction research, policy and treatment venues).
2. Be able to synthesize and apply addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the advancement of addiction science.
3. Develop the ability to design, implement and interpret experimental approaches which address key questions in addiction science.
4. Communicate both core knowledge of addiction as well as experimental design, result and interpretation in a variety of formats.

## Student learning outcomes

1. Integrated knowledge of addiction science: The student will demonstrate an appropriate level of knowledge of the current elements of addiction science as related to disciplinary specialization and a more detailed understanding of

the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publication.

2. Problem-solving skills: Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in addition research and practice, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
3. Research design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, develop and implement research studies.
4. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students are required to successfully complete a minimum of 36 credit hours, which can be done either full time (12 months) or part time (24 months). Six of the required credit hours are assigned to a final research project examining a relevant addictions-related topic. VCU, King's College London and the University of Adelaide confer degrees jointly through a single diploma.

## Curriculum requirements

Courses	Credit hours
IPAS 600 The Biological Basis of Addiction	4
IPAS 601 Treatment of Addiction: Psychosocial Interventions	4
IPAS 602 Public Health Issues and Approaches to Addiction	4
IPAS 603 Addiction Policy	4
IPAS 604 Treatment of Addiction: Pharmacotherapies	4
IPAS 605 Treatment of Addiction: Critical Issues	4
IPAS 606 Research Methodology in Addictions	6
IPAS 692 Research Project in Addictions	6

**Total graduate credit hours (minimum)** **36**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Program website:** [anatomy.vcu.edu](http://anatomy.vcu.edu)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Anatomy and Neurobiology, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE, MCAT or DAT TOEFL if international
Special requirements: Domestic students apply through the <a href="#">Graduate Admissions office</a> ; international students apply through <a href="#">International Admissions</a> .			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.2
2. Combined GRE scores of at least 300 for the verbal plus quantitative (1200 based on the previous scale) and 4.0 analytical score
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT), or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and upper-level courses in molecular and cellular biology are desirable. Previous research experience or demonstration of a serious interest in a research-oriented career is also desirable. A personal statement describing the applicant's research experience and interests, as well as letters of reference from previous supervisors, are necessary and helpful in determining an applicant's suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty

of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The M.S. in Anatomy and Neurobiology program offers a two-year graduate curriculum of formal instructional activities and research training mentored by the members of the faculty leading to the terminal M.S. degree. The program prepares students for technical careers in neurobiological research laboratories in academic, private and government institutions. The program also provides a strong foundation for students who choose to continue onto doctoral training.

This is a research-oriented degree program comprised of graduate course work and supervised research leading to a master's thesis. The M.S. program involves approximately one year of course work and a research thesis performed under the supervision of a faculty adviser.

## Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers, trainers and technicians in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
2. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences. The program will prepare students to secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

## Student learning outcomes

1. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
2. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids. The candidate will also demonstrate the achievement of an appropriate level of written communication skills with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.
4. General knowledge of neurobiology and biosciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of neurobiology and the biosciences as related to disciplinary specialization and

a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

5. Employment or acceptance to advanced degree program: Degree candidates will secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students must complete a minimum of 66 graduate credit hours. A minimum cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses.

A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

There is no expectation of the time required to complete the master's degree; usually two years of study are necessary to complete the requirements. At the appropriate time in their research, students will prepare a thesis and schedule a final oral defense of the thesis. The final oral examination (defense of the thesis) will cover the subject of the candidate's dissertation and related basic science course work.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>24</b>
ANAT 610 Systems Neuroscience	4
ANAT 690 Anatomy and Neurobiology Seminar (one-credit course taken a minimum of four semesters)	4
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	5
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5
IBMS 600 Laboratory Safety	1
NEUS 609 Cellular and Molecular Neuroscience	4
OVRP 601 Scientific Integrity, OVRP 602 Responsible Scientific Conduct or OVRP 603 Responsible Conduct of Research	1
<b>Directed research</b>	<b>42</b>
ANAT 697 Directed Research (1-15 variable credit course)	42
<b>Total graduate credit hours required (minimum)</b>	<b>66</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Neuroscience, Doctor of Philosophy (Ph.D.)

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Anatomy and Neurobiology, Master of Science (M.S.) with a concentration in molecular biology and genetics			
<b>Degree:</b> M.S.	<b>Semester(s) of entry:</b> Fall	<b>Deadline dates:</b> Deadline date rolling, preference given to applications received by Jan 17	<b>Test requirements:</b> GRE; TOEFL for applicants whose native language is not English
<b>Special requirements:</b> Applications for the program should be submitted to <b>Molecular Biology and Genetics – M.S.</b> selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Anatomy and Neurobiology.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty

of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	
	<b>19</b>
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function*	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism*	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology*	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/ Membranes and Bioenergetics*	1
IBMS 600 Laboratory Safety	1
IBMS 620 Laboratory/Clinical Rotations; sections 004 and 005** (two-credit course taken twice)	4
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least once)	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Other required course work</b>	
	<b>29</b>
Students must select two of the following four courses:	
ANAT 610 Systems Neuroscience	4
ANAT 620 Scientific Writing and Grantsmanship	2
NEUS 609 Cellular and Molecular Neuroscience	4
PHIS 501 Mammalian Physiology	5
PHIS 620 Ion Channels in Membranes	3
Directed research and seminar	
ANAT 697 Directed Research and/or MICR 697 Directed Research in Microbiology (Note: Students must take a minimum of one credit hour of	variable

directed research every semester of enrollment in the program after the first year of study.)

MICR 690 Microbiology Research Seminar (section 002, MBG; one- variable credit course) (Note: Students must take a minimum of one credit hour of research seminar course work every fall and spring semester of enrollment in the program.)

Students may take additional course work with the approval of their graduate program directors.

#### Total graduate credit hours required (minimum) 48

\* This requirement may also be satisfied with BIOC 503 Biochemistry, Cell and Molecular Biology (five credit hours).

\*\* This requirement may also be satisfied, under certain circumstances, with MICR 608 or MICR 609 Introduction to Microbiology and Immunology Research (three credit hours; section 002). Consult with the program director.

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

### Biochemistry, Doctor of Philosophy (Ph.D.)

#### Graduate program director

Tomasz K. Kordula, Ph.D.

Associate professor, Department of Biochemistry and Molecular Biology

[tkordula@vcu.edu](mailto:tkordula@vcu.edu)

(804) 828-0771

Program website: [biochemistry.vcu.edu](http://biochemistry.vcu.edu)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Biochemistry, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Biochemistry, Master of Science (M.S.)

Biochemistry, Master of Science (M.S.) with a concentration in molecular biology and genetics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Biochemistry, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, MCAT or DAT
Special requirements: MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.			
Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. A personal statement that includes: long-term career goals to assess reasons behind the application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to the Ph.D. program and forego the master's degree. However, applicants who are unsure if they want to earn a Ph.D. and desire experience in biomedical research before making this decision will be well-served by the M.S. program. Outstanding performance in the M.S. program can help students gain admittance to a doctoral program at VCU or elsewhere. Master's students who wish to gain admission to the Ph.D. program should submit the following documents to the graduate program director: (1) a letter making this request, which should include justification for the request, career goals, the name of a proposed Ph.D. adviser and a brief description of proposed Ph.D. research project, (2) VCU graduate transcript and (3) a letter of support from proposed Ph.D. adviser. Additional admissions requirements include (1) a grade of A in

BIOC 691 Special Topics in Biochemistry (section 904: Critical Scientific Thinking), (2) a grade of A in BIOC 505 Experimental Biochemistry (laboratory rotation), (3) a final score in the top 50 percent of scores in BIOC 503 and BIOC 504 Biochemistry, Cell and Molecular Biology and (4) minimum GRE scores of 158 (verbal), 158 (quantitative) and 4.0 analytical.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Ph.D. program in biochemistry prepares students for research-oriented careers as independent scientists in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.
5. General knowledge of science: The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 41 graduate credit hours.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories.

### Training in the responsible conduct of research

All Ph.D. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: [research.vcu.edu/human\\_research/citi\\_requirements.htm](https://research.vcu.edu/human_research/citi_requirements.htm)
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Sign in using the following link, which provides access and guidance to the course: <https://www.vcu.edu/research/acup/index.htm>

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>14.5</b>
BIOC 690.901 Biochemistry Seminar (one credit taken twice)	2
BIOC 690.902 Biochemistry Seminar (one credit taken twice)	2
BIOC 691 Special Topics or IBMS 630 Critical Thinking	1
BIOC 691.901 Special Topics (one credit taken twice)	2
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5
IBMS 620 Laboratory/Clinical Rotations (two credits taken twice)	4
IBMS 680 Proposal Preparation	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Electives*</b>	<b>variable</b>
Students enroll for a minimum of two elective courses drawn from the list of recommended electives below.	
<b>Directed research*</b>	<b>variable</b>
BIOC 697 Directed Research in Biochemistry	
<b>Total graduate credit hours required (minimum)</b>	<b>41</b>

\*Students register for a combination of directed research and elective credit hours to amass a minimum of 41 total credit hours.

### Recommended electives

Students select courses from this list, with guidance from their advisers and committees. Ph.D. students must enroll full-time (minimum nine credits) to be eligible for a stipend. Some graduate courses listed above may be taken after the comprehensive examination. Most of this course work should be taken during the first two years of the program. Students are encouraged to take additional courses that relate to their personal research projects.

ANAT 615 Techniques in Neuroscience and Cell Biology	3
BIOC/MICR 503 Biochemistry, Cellular and Molecular Biology	1-5
BIOC/MICR 504 Biochemistry, Cellular and Molecular Biology	1-5
BIOC 601 Membranes and Lipids	3
BIOC 602 Physical Properties of Macromolecules	1-4
BIOC 604 Enzymology	1-3
BIOC 605 Molecular Biology	3
HGEN 501/BIOL 530 Human Genetics	3
IBMS 635 Cellular Signaling	3
MICR 505 Immunobiology	3
MICR 605 Prokaryotic Molecular Genetics	3
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR/BNFO 653 Advanced Molecular Genetics: Bioinformatics	3
PHTX 691.803 Special Topics in Pharmacology	1-4

### Typical plan of study

Many students often take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

### Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 41 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

### Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>variable</b>
BIOC 503-504 Biochemistry, Cell and Molecular Biology	10
BIOC 602 Physical Properties of Macromolecules (modules 1 and 2)	2
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5
IBMS 620 Laboratory/Clinical Rotations (two credits taken for three rotations)	6
IBMS 630 Critical Thinking (or BIOC 691 Special Topics in Biochemistry or HGEN 691 Special Topics in Genetics or equivalents)	1
IBMS 680 Proposal Preparation	1
IBMS 690 Basic Health Sciences Research Seminar (first year only)	1
MICR 605 Prokaryotic Molecular Genetics	3
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 690 Microbiology Research Seminar (section 002, MBG; one-credit course to be taken every semester beginning in the second year)	variable
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least twice)	2
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>A course in eukaryotic molecular biology drawn from the following approved list (or an approved alternative):</b>	<b>3</b>
BIOC 605 Molecular Biology	3
HGEN 602 Genetic Models of Disease	3
HGEN 614 Pathogenesis of Human Genetic Disease	3
IBMS 635 Cellular Signaling	3

MICR 684 Molecular Biology of Cancer	3
PATH 670 Experimental Approaches to Tumor Biology	3

<b>Directed research and elective courses</b>	<b>variable</b>
Students will register for a variable number of credit hours of BIOC 697 Directed Research in Biochemistry and other elective courses to amass the required minimum of at least 41 credit hours.	variable

<b>Total graduate credit hours required (minimum)</b>	<b>41</b>
---	-----------

## Typical plan of study

Many students often take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

### Biochemistry, Master of Science (M.S.)

#### Graduate program director

Tomasz K. Kordula, Ph.D.

Associate professor, Department of Biochemistry and Molecular Biology  
[tkordula@vcu.edu](mailto:tkordula@vcu.edu)  
 (804) 828-0771

Program website: [biochemistry.vcu.edu](http://biochemistry.vcu.edu)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Biochemistry, Doctor of Philosophy (Ph.D.)

Biochemistry, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Biochemistry, Master of Science (M.S.) with a concentration in molecular biology and genetics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Biochemistry, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall preferred	Applications accepted through June; priority given to early applicants	GRE, MCAT or DAT
Special requirements: MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.			

Applicants to the Master of Science in Biochemistry program must meet all [general admission requirements of the VCU Graduate School](#). In addition, applicants must meet the following requirements.

1. Organic chemistry (with a minimum grade of B)
2. Undergraduate biochemistry (not required but recommended)
3. Laboratory experience
4. GRE scores of at least 158 (verbal), 158 (quantitative) and 4.0 analytical

### Continuing for the Ph.D.

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to our Ph.D. program and forego the master's degree. Applicants who are unsure if they want to earn a Ph.D. and who wish to gain experience in biomedical research before making this decision will be well served by our M.S. program. Outstanding performance in our master's program can help students gain admittance to a doctoral program at VCU or elsewhere. Master's students wishing to gain admission to the Ph.D. program should submit the following documents to the graduate program director: (1) a letter making this request which should include justification for the request, career goals, name of proposed Ph.D. adviser and brief description of proposed Ph.D. research project, (2) VCU graduate transcript and (3) a letter of support from proposed Ph.D. adviser. Additional admissions requirements include (1) a grade of A in BIOC 691.904 Critical Scientific Thinking, (2) a grade of A in BIOC 505 Experimental Biochemistry (laboratory rotation), (3) a final score in the top 50 percent of scores in BIOC 503-504 Biochemistry, Cell, and Molecular Biology and (4) GRE scores of at least 158 (verbal), 158 (quantitative) and 4.0 analytical.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The M.S. program in biochemistry prepares students for research-oriented careers in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
2. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.
3. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
4. General knowledge of science: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.
5. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students in the M.S. in Biochemistry program must complete a minimum of 30 credit hours, including at least 24 didactic credits hours (exclusive of research credit hours).

Students in the M.S. program in biochemistry take courses designed for graduate students with an emphasis on research design and experimentation. During the first year of study, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin thesis research. Following completion of the research project and defense of the master's thesis, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, visit [biochemistry.vcu.edu/education/masters/default.htm](http://biochemistry.vcu.edu/education/masters/default.htm).

M.S. students register for BIOC 690 and BIOC 691 for the duration of their tenure in the program. The core set of courses may be supplemented with elective

courses offered by the Department of Biochemistry and Molecular Biology or other departments. Students are encouraged to take additional courses that relate to their personal projects. Electives may include courses in techniques in molecular biology and genetics, bioinformatics, statistics, immunology, microbiology, molecular genetics, mammalian physiology and advanced organic and physical chemistry, among others.

### Training in the responsible conduct of research

All M.S. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: [research.vcu.edu/human\\_research/citi\\_requirements.htm](http://research.vcu.edu/human_research/citi_requirements.htm)
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Sign in using the following link, which provides access and guidance to the course: <https://www.vcu.edu/research/acup/index.htm>

## Curriculum requirements

Courses	Credit hours
<b>Required course work</b>	<b>24</b>
Students must take a minimum of 24 didactic credit hours from the following list of courses.	
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	5
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5
BIOC 505 Experimental biochemistry (research rotation, typically taken in year one)	2
BIOC 602 Physical Properties of Macromolecules and BIOC 604 Enzymology (Students will select modules from BIOC 602, typically year one, and BIOC 604, typically year two, to complete a total of four credit hours, at least one credit hour from each course.)	4
BIOC 690 Biochemistry Seminar (one-credit course in which students must register for the duration of their tenure in the program for a minimum of four credit hours)	4
BIOC 691.901 Special Topics in Biochemistry: Student seminar (one- to four-credit course in which students must register for the duration of their tenure in the program for a minimum of four credit hours)	4
BIOC 691.904 Special Topics in Biochemistry: critical scientific thinking or IBMS 630 Critical Thinking (typically year one)	1-2
IBMS 600 Laboratory Safety	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Directed research</b>	<b>6 (minimum)</b>
BIOC 697 Directed Research in Biochemistry (1-15 variable credit hours; students will register for variable credit hours of BIOC 697 for the duration of the program for a minimum of six credit hours)	variable
<b>Electives</b> (suggested but not required)	<b>(2)</b>
ANAT 615 Techniques in Neuroscience and Cell Biology	3
BIOC 601 Membranes and Lipids	3
HGEN 501/BIOL 530 Human Genetics	3
MICR 505 Immunobiology	3
MICR 605 Prokaryotic Molecular Genetics	3

MICR 653/BNFO 653 Advanced Molecular Genetics: Bioinformatics	3
PHTX 691 Special Topics in Pharmacology: research design analysis	1-4

**Total graduate credit hours required (minimum)** **30**

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Biochemistry, Doctor of Philosophy (Ph.D.)

Biochemistry, Master of Science (M.S.)

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Biochemistry, Master of Science (M.S.) with a concentration in molecular biology and genetics			
Degree: M.S.	Semester(s) of entry: Fall	Deadline dates: Deadline date rolling, preference given to applications received by Jan 17	Test requirements: GRE, TOEFL for applicants whose native language is not English
<b>Special requirements:</b> Applications for the program should be submitted to <b>Molecular Biology and Genetics – M.S.</b> selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Biochemistry.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

- In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
- The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

- Problem-solving skills:** Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
- General knowledge of sciences:** Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
- Communication skills:** Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - Oral communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - Written communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
- Experimental design:** Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	<b>19</b>

BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function*	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism*	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology*	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/ Membranes and Bioenergetics*	1
IBMS 600 Laboratory Safety	1
IBMS 620 Laboratory/Clinical Rotations; sections 004 and 005** (two-credit course taken twice)	4
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least once)	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1

### Other required course work 29

BIOC 697 Directed Research in Biochemistry or MICR 697 Directed Research in Microbiology (Note: Students must take a minimum of one credit hour of directed research every semester of enrollment in the program after the first year of study.)	variable
MICR 690 Microbiology Research Seminar (section 002, MBG; one-credit course) (Note: Students must take a minimum of one credit hour of research seminar course work every fall and spring semester of enrollment in the program.)	variable

Any appropriate graduate-level course offered by the School of Medicine 3 or with the course designations of BIOL, BNFO, CHEB, CHEM, CLSE, EGRB, EPID, MEDC

Students may take additional course work with the approval of their graduate program directors.

### Total graduate credit hours required (minimum) 48

\* This requirement may also be satisfied with BIOC 503 Biochemistry, Cell and Molecular Biology (five credit hours).

\*\* This requirement may also be satisfied, under certain circumstances, with MICR 608 or MICR 609 Introduction to Microbiology and Immunology Research (three credit hours; section 002). Consult with the program director.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

### Admission requirements

Biostatistics, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307 Multivariate Calculus, MATH 309 Introduction to Probability Theory, MATH 310 Linear Algebra and STAT 212 Concepts in Statistics. MATH 507 Measure and Integration Theory and MATH 508 Analysis II are recommended for students interested in completing the Ph.D. program.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with

respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), Ph.D. students must complete a minimum total of 78 credit hours (59 didactic hours, plus eight hours each of seminar and consulting, and at least three credit hours of research). More specifically, required courses include BIOS/STAT 513 and 514, BIOS 524, BIOS 546, BIOS 553, BIOS 554, BIOS 571, BIOS 572, BIOS 615 and 616, BIOS 625, BIOS 631, BIOS 647, and OVPR 601, 602 or 603. In addition, students must take two 600-level BIOS/STAT courses from the list provided; two additional 600-level BIOS, STAT or MATH courses or BIOS 567 or STAT; and one graduate-level non-BIOS, STAT or MATH course. Ph.D. students must also take eight semesters of BIOS 516 Biostatistical Consulting and BIOS 690 Biostatistical Research Seminar. In addition, Ph.D. students will participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.

### Qualifying exam

Students pursuing the Ph.D. must pass a qualifying examination administered at the end of May or the beginning of June after completion of the first year of course work. The examination is an in-class, closed-book exam given over a period of two days and covers material from the following first-year courses:

Part A: Applied covers BIOS 553, 554, 571 and 572.

Part B: Theoretical covers BIOS/STAT 513, BIOS/STAT 514 and BIOS 546.

Each part of the exam is graded as pass/fail. A student who fails Part A or Part B of the exam at the Ph.D. level must retake that part of the qualifying exam. Such a student may petition the examination committee of the Department of Biostatistics for a winter administration of the qualifying exam.

### Comprehensive exam

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a comprehensive exam consisting of two parts.

Part A: Written comprehensive exam

This comprehensive exam is an in-class, closed-book exam administered in June after completion of the advanced years' course work (usually at the end of the third year for full-time students). The exam covers the following material: BIOS 615 and BIOS 616 Advanced Inference, BIOS 625 Categorical Data Analysis and Generalized Linear Models, BIOS 631 Multivariate Analysis I and BIOS 647 Survival Analysis.

Part B: Oral examination: data/analytic/consulting

This exam tests for problem-solving abilities and draws from material presented in BIOS 516 and advanced required and elective courses. Students have two weeks to complete a statistical analysis of a data set and submit a written report describing the analysis. Students will present an oral report defending the analysis a week later. The exam will be written and evaluated by the Ph.D. student's dissertation committee.

The data/analytic/consulting oral exam may not be taken until the student has passed the written comprehensive exam.

### Dissertation

A comprehensive dissertation reporting the results of original research is required for the Ph.D. degree.

### Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student's committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	<b>44</b>
BIOS/STAT 513 Mathematical Statistics I	3

BIOS/STAT 514 Mathematical Statistics II	3
BIOS 524 Biostatistical Computing	3
BIOS 546 Theory of Linear Models	3
BIOS 553 Linear Regression	3
BIOS 554 Analysis of Variance	3
BIOS 571 Clinical Trials	3
BIOS 572 Statistical Analysis of Biomedical Data	3
BIOS 615 Advanced Inference	4
BIOS 616 Advanced Inference	4
BIOS 625 Categorical Data Analysis and Generalized Linear Models	4
BIOS 631 Multivariate Analysis I	4
BIOS 647 Survival Analysis	3
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1

### Four of the courses listed below (at least two must be BIOS courses; at least two must be at the 600-level) or others selected with approval of program director

BIOS 567 Statistical Methods for High-throughput Genomic Data I	3
BIOS 632 Multivariate Analysis II	3
BIOS 638 Statistical Design and Analysis in Toxicology	3
BIOS 639 Statistical Design and Analysis in Toxicology	3
BIOS 667 Statistical Learning and Data Mining	3
BIOS 671 Nonlinear Models	3
BIOS 668 Statistical Methods for High-throughput Genomic Data II	3
BIOS 688 Applied Bayesian Biostatistics	3
BIOS 691 Special Topics in Biostatistics	3
MATH 603 Advanced Probability Theory	3
MATH 640 Mathematical Biology I	3
STAT 503 Introduction to Stochastic Processes	3
STAT 613 Stochastic Processes	3
STAT 614 Stochastic Processes	3
STAT/OPER 636 Machine Learning Algorithms	3
STAT 642 Design and Analysis of Experiments I	3
STAT 645 Bayesian Decision Theory	3
STAT 675 Time Series Analysis I	3

### One additional course (non-BIOS, non-STAT or non-MATH) with approval or program director

Suggested courses include any three-credit 600-level course in epidemiology and community health (EPID), social and behavioral health (SBHD), health care policy and research (HCPR) or bioinformatics (BNFO)

### Consulting and seminar courses

BIOS 516 Biostatistical Consulting (one-credit course taken eight semesters)	8
BIOS 690 Biostatistical Research Seminar (one-credit course taken eight semesters)	8

### Dissertation research

BIOS 697 Directed Research in Biostatistics (minimum of three credit hours)	3 (minimum) variable
---	-------------------------

### Total graduate credit hours required (minimum)

78

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's

academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

Biostatistics, Doctor of Philosophy (Ph.D.)

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307 Multivariate Calculus, MATH 309 Introduction to Probability Theory, MATH 310 Linear Algebra and STAT 212 Concepts in Statistics. MATH 507 Measure and Integration Theory and MATH

508 Analysis II are recommended for students interested in completing the Ph.D. program.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), Ph.D. students in the genomic biostatistics concentration will complete a minimum of 77 graduate credit hours (58 didactic plus eight hours each of consulting and seminar, and at least three credit hours of research). More specifically, required courses include BIOS 513, 514, 524, 546, 553, 554, 567, 571, 572, 615, 616, 625, 632, 647, 668, BIOL 540 (or other relevant course), and OVPR 601, 602 or 603. In addition, students will take one of BIOS 667, BIOS 691 (where the topic is genetic epidemiology or systems biology) or one other 600-level BIOS/STAT/MATH/BNFO course. Ph.D. students must also take eight semesters of BIOS 516 Biostatistical Consulting and BIOS 690 Biostatistical Research Seminar. In addition, Ph.D. students will participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.

### Qualifying exam

Students pursuing the Ph.D. must pass a qualifying examination administered at the end of May or the beginning of June after completion of the first year of course work. The examination is an in-class, closed-book exam given over a period of two days and covers material from the following first-year courses:

Part A: Applied covers BIOS 553, 554, 571 and 572.

Part B: Theoretical covers BIOS 513, 514 and 546.

Each part of the exam is graded as pass/fail. A student who fails Part A or Part B of the exam at the Ph.D. level must retake that part of the qualifying exam. Such a student may petition the examination committee of the Department of Biostatistics for a winter administration of the qualifying exam.

### Comprehensive exam

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a comprehensive exam consisting of two parts.

Part A: Written comprehensive exam

This comprehensive exam is an in-class, closed-book exam administered in June after completion of the advanced years' course work (usually at the end of the third year for full-time students). The exam covers the following material: BIOS 615 and BIOS 616 Advanced Inference, BIOS 625 Categorical Data Analysis and Generalized Linear Models, BIOS 632 Multivariate Analysis II and BIOS 647 Survival Analysis.

Part B: Oral examination: data/analytic/consulting

This exam tests for problem-solving abilities. It is expected that the oral exam will pertain to gene, protein or microRNA expression, as well as metabolite, methylation, genetic or other data arising from molecular assays. Students have two weeks to complete a statistical analysis of a data set and submit a written report describing the analysis. Students will present an oral report defending the analysis a week later. The exam will be written and evaluated by the Ph.D. student's dissertation committee.

The oral examination may not be taken until the student has passed the written comprehensive exam.

### Dissertation

A comprehensive dissertation reporting the results of original research related to genomics topics is required for the Ph.D. with a concentration in genomic biostatistics. It is expected that the dissertation will make use of some high-throughput genomic technology as an application for the methodological development.

### Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student's committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), M.S. students must complete a minimum total of 42 graduate credit hours of course work. Students are required to take BIOS/STAT 513 and 514, BIOS 524, BIOS 546, BIOS 553, BIOS 554, BIOS 571 and BIOS 572. In addition, each student is required to take one of BIOS 615, BIOS 616, BIOS 625, BIOS 631 or 647. Students are also required to take either BIOS 567 and one other 500- or 600-level BIOS or STAT course, or two other 500- or 600-level BIOS or STAT courses. Full-time master's students must take four credit hours each of BIOS 516 Biostatistical Consulting and BIOS 690 Biostatistical Research Seminar. In addition, students will participate in the summer student research program and present at the Biostatistics Student Research Symposium the summer and fall after the first year, which will require one credit hour of BIOS 697 Directed Research in Biostatistics.

### Qualifying exam

Students pursuing the M.S. in Biostatistics must pass a qualifying examination administered at the end of May or the beginning of June after completion of the first year of course work. The examination is an in-class, closed-book exam given over a period of two days and covers material from the following first-year courses:

Part A: Applied covers BIOS 553, 554, 571 and 572.

Part B: Theoretical covers BIOS/STAT 513, BIOS/STAT 514 and BIOS 546.

Each part of the exam is graded as pass/fail. A student who does not pass Part A or Part B of the exam at the M.S. level must retake that part of the qualifying exam. Such a student may petition the examination committee of the Department of Biostatistics for a winter administration of the qualifying exam.

### Thesis

M.S. in Biostatistics students must write a thesis that reports the results of data analysis, or a review or survey. An original research topic is not required.

### Final examination

M.S. in Biostatistics candidates must defend their theses at a final oral examination. While questions are restricted to the topic of the dissertation for the Ph.D. candidate, no such restriction applies for the thesis defense for M.S. candidates.

M.S.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), students applying to the clinical research and biostatistics concentration must hold the M.D., D.D.S., Ph.D., D.P.H., D.O., Pharm.D. or an equivalent health professional terminal degree from an accredited college or university. Applicants with international M.D. degrees are considered on an individual basis. The applicant must have a minimum undergraduate GPA of 3.00. Applicants must also submit a letter detailing career goals and how the M.S. in Biostatistics with a concentration in clinical research and biostatistics applies to those goals, as well as at least three letters of recommendation.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. **Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
2. **Integrated knowledge of mathematics and bioscience:** The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with

respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), M.S. in Biostatistics, clinical research and biostatistics concentration students must complete a minimum total of 34 graduate credit hours. This includes 17 credit hours of core course work, 12 credit hours of elective courses and at least five credit hours of directed independent research.

Students in the clinical research and biostatistics concentration must complete a research project, culminating in an academic manuscript submitted for publication. A research advisory committee must be formed to direct the student's research project. The research advisory committee must consist of two clinicians familiar with the student's area of research and a faculty member of the Department of Biostatistics. The student is primarily responsible for the conceptualization, design, conduct, analysis and interpretation of the research project.

### Final examination

Clinical research and biostatistics concentration students do not defend their research projects at a final oral examination.

## Curriculum requirements

Courses	Credit hours
<b>Core courses</b>	<b>17</b>
BIOS 516 Biostatistical Consulting	1
BIOS 531 Clinical Epidemiology or EPID 571 Principles of Epidemiology	3
BIOS/STAT 543 Statistical Methods I	3
BIOS/STAT 544 Statistical Methods II	3
BIOS 571 Clinical Trials	3
BIOS 572 Statistical Analysis of Biomedical Data	3
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Directed research</b>	<b>5 (minimum)</b>
BIOS 697 Directed Research in Biostatistics	5
<b>Electives</b> (Choose from suggested electives below.)	<b>12</b>
<b>Total graduate credit hours required (minimum)</b>	<b>34</b>
<b>Suggested electives</b>	
<b>Electives in biostatistics</b>	
BIOS 524 Biostatistical Computing	3
BIOS 553 Linear Regression	3
BIOS 554 Analysis of Variance	3
BIOS 610 Research Processes and Methods for the Health Professions	3
BIOS 691 Special Topics: statistical issues in drug research and development	1-4
<b>Electives in epidemiology and public health</b>	
EPID 571 Principles of Epidemiology	3
EPID 600 Introduction to Public Health	3
EPID 601 Contemporary Issues and Controversies in Public Health	3
EPID 603 Public Health Policy and Politics	3
EPID 606 Epidemiologic Methods	3
EPID 607 Nutritional Epidemiology	3
EPID 620 Cancer Epidemiology	3
EPID 648 Behavioral Epidemiology	3

### Electives in social and behavioral health

SBHD 605 Introduction to Social and Behavioral Health	3
SBHD 610 Behavioral Measurement	3
SBHD 632 Health Disparities and Social Justice	3
SBHD 633 Structural Equation Modeling	3

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

### Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics

#### Graduate program director

Roy T. Sabo, Ph.D.  
Associate professor, Department of Biostatistics

Biostatistics, Master of Science (M.S.)

Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the [general admission requirements of the VCU Graduate School](#), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission: MATH 307 Multivariate Calculus, MATH 309 Introduction to Probability Theory, MATH 310 Linear Algebra and STAT 212 Concepts in Statistics. Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), M.S. students will complete a minimum total of 33 credit hours of course work. Required courses include BIOS/STAT 513 and 514, BIOS 524, BIOS 546, BIOS 553, BIOS 554, BIOS 571 and BIOS 572. In addition, each student is required to take BIOS 567 and BIOL/BNFO 540 (or equivalent) and one of BIOS 632, BIOS 667, BIOS 668 and BIOS 691 (the latter when the topic is systems biology or statistical genetics/genetic epidemiology).

Full-time master's students must take four semesters of BIOS 516 Biostatistical Consulting and BIOS 690 Biostatistical Research Seminar. In addition, students will participate once in the student summer teaching program and present at the Biostatistics Student Research Symposium in the fall.

### Qualifying exam

Students pursuing the M.S. in Biostatistics with a concentration in genomic biostatistics must pass a qualifying examination administered at the end of May or the beginning of June after completion of the first year of course work. The examination is an in-class, closed-book exam given over a period of two days and covers material from the following first-year courses:

Part A: Applied covers BIOS 553, 554, 571 and 572.

Part B: Theoretical covers BIOS/STAT 513, BIOS/STAT 514 and BIOS 546.

Each part of the exam is graded as pass/fail. A student who does not pass Part A or Part B of the exam at the M.S. level must retake that part of the qualifying exam. Such a student may petition the examination committee of the Department of Biostatistics for a winter administration of the qualifying exam.

### Thesis

M.S. in Biostatistics with a concentration in genomic biostatistics concentration students must write a thesis that reports the results of data analysis, or a review or survey. An original research topic is not required.

### Final examination

M.S. candidates must defend their theses at a final oral examination. While questions are restricted to the topic of the dissertation for the Ph.D. candidate, no such restriction applies for the thesis defense for M.S. candidates.

## Curriculum requirements

### Admission requirements

Epidemiology, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Application strongly encouraged by Jan 1	GRE TOEFL
<b>Special requirements:</b> Applicants must hold a master's degree, preferably in public health or a related field, and provide test scores as detailed below. Applicants must provide all required materials as described herein and in the VCU Admissions graduate application checklist.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must meet the following minimum qualifications.

1. Prior degree: Master's degree in public health (M.P.H.) or equivalent M.S. degree, (sociology, biology, mathematics) with a minimum GPA of 3.0
2. GRE: Current GRE test results (taken within the past five years) with scores at or above the 75th percentile preferred in all components of the exam (e.g., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing)
3. TOEFL: For non-native speakers of English, recommended minimum scores of either 100iBT, 600 PBT or IELTS scores of 6.5 (academic band score)
4. Personal statement: Applicants must include a personal statement that indicates their reasons for pursuing a doctoral degree in epidemiology, their particular areas of research focus or study, the departmental faculty advisers with whom the students would prefer to work and career goals upon graduation.
5. Reference letters: Students must submit three letters of recommendation from three individuals who can assess the applicant's qualifications for graduate school. Letters from past professors or faculty advisers are most appropriate.
6. Current CV or resume: Students must submit a current CV or resume.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program mission

The mission of the Ph.D. program in epidemiology is to educate and train students to become independent, competent and self-directed research scientists so they can conduct outstanding clinical and population-based research. Students will learn methods for studying disease etiology and prevention in populations and evaluating interventions, diagnostic tests and treatment efficacy; they will implement such methods in an independent research study under the mentorship of an experienced epidemiology researcher.

## Program goals

1. Critical foundation skills: The program is designed to provide students with the critical skills required to advance to positions as epidemiological researchers/trainers in a broad spectrum of positions.
2. Mastery and application of science: The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of epidemiology and ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. Communication: Students will develop skills in the various means of communicating both the core of epidemiological knowledge and the expression of epidemiological methodology, research design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

Students in the doctoral program in epidemiology will develop competencies in the following areas, as described in the lists below.

1. Theory and context
  - a. Demonstrate knowledge of the physiologic processes important in understanding pathogenesis of disease
  - b. Demonstrate an understanding of epidemiologic theories of disease causation, theories of bias in epidemiologic research, as well as general framework and other theories to understand distributions of disease occurrence
  - c. Demonstrate an in-depth understanding of at least one of the theories or frameworks that form the basis for epidemiologic research
  - d. Demonstrate the ability to link theoretical framework to the design, conduct and interpretation of epidemiologic research
5. Study design
  - a. Have proven ability to construct a study question
  - b. Define conceptual definitions of determinants, outcome variables and confounders in ways consistent with the theoretical framework guiding the research
  - c. Create operational expressions of key variables such that misclassification and measurement error are minimized
  - d. Demonstrate proficiency in selecting the most appropriate study designs in epidemiology (e.g., ecological studies, randomized trials, cohort, case-control, time series, difference-in-difference) such that bias is minimized and efficiency maximized
  - e. Demonstrate proficiency in the construction of a primary data collection tool
  - f. Understand the impact of measurement issues (misclassification and measurement error) on validity of the study, ability to use analyses to select the most appropriate measures during the design phase and understanding techniques for adjustment in analysis
  - g. Demonstrate knowledge of what confounding is, how to identify potential confounders, strategies for prioritizing concerns regarding

confounders and ability to minimize confounding through design and analysis

- h. Understand selection bias in the context of cohort and case-control studies, ways to minimize selection bias and know when correction techniques are viable
  - i. Understand required elements to estimate sample size, know how to provide valid estimates of parameters for sample size equations
  - j. Demonstrate knowledge of the impact of bias owing to loss of study participants and methods to minimize such bias, including the ability to devise retention strategies
11. Analysis
    - a. Estimate and interpret measures of disease or event frequency and understand the inter-relationship between measures
    - b. Estimate and interpret crude and model-based measures of association
    - c. Demonstrate proficiency in selecting the appropriate measure of association for the specific study
    - d. Understand statistical reasoning, including distributions, probability, sampling, methods of comparing means and approaches to estimating relationships among variables
    - e. Implement analytic techniques to control for confounding
    - f. Parameterize regression models, evaluate diagnostics of the model and interpret model-based measures of association
    - g. Demonstrate ability to evaluate the extent to which a factor modifies the relationship between determinant and outcome under study
    - h. Demonstrate proficiency in the application of advanced statistical methods appropriate for student research needs (e.g. hierarchical modeling, mixed-effects models, categorical data analysis, analytical techniques for evaluating spatial data)
    - i. Use techniques to estimate causal effects from non-experimental study designs
    - j. Conduct sensitivity analyses to understand the robustness of findings in light of sources of bias
  11. Effective communication
    - a. Understand others by listening and questioning
    - b. Demonstrate proficiency in scientific writing (manuscripts, review of manuscripts, rebuttals to reviewers, grant writing)
    - c. Effectively deliver oral presentations (e.g., scientific presentations to professional audiences, lectures to students and other teaching) including the appropriate use of audio/visual technologies
    - d. Effectively communicate scientific information to multiple audiences (lay audiences and policymakers) for the purpose of translating science into policy and practice
    - e. Demonstrate proficiency in leading discussions (e.g. journal club, seminar, brainstorming sessions)
    - f. Construct and orally pose scientific questions related to research (e.g. discussant, ask questions, etc.)
    - g. Demonstrate the ability to effectively communicate across disciplines
  8. Data management and practical research skills
    - a. Be familiar with the availability, structure and procedures to access contemporary datasets for research in public use form on the Internet and in secure form via request processes
    - b. Demonstrate ability to implement methods for evaluating the strengths and limitations of data sources for evaluating specific study questions
    - c. Demonstrate expertise in the management of complex relational and hierarchical databases including merging, appending, aggregation and transposition of data structures, documentation, recoding of variables, and data conversion across different analysis software
    - d. Apply appropriate weighting schemes to population-based datasets
    - e. Have knowledge of security issues, as well as of HIPAA and other privacy regulations affecting data access and security requirements

- f. Execute methods for processing primary data, including developing systems for data entry and validation, data cleaning, and documentation (internal and external systems)
  - g. Demonstrate proficiency in conducting thorough searches of the medical literature
  - h. Demonstrate proficiency in the use of citation managers, presentation software and spreadsheets
9. Ethical behaviors, administrative skills and personal and professional development
    - a. Demonstrate understanding of federal regulations and guidelines regarding the conduct of research with human subjects
    - b. Know and apply ethical principles and their application to public health research
    - c. Recognize potentially vulnerable populations and develop strategies for protection and advocacy on their behalf
    - d. Understand potential conflicts of interest and roles that may arise in research and develop strategies for addressing and managing these conflicts
    - e. Know guidelines for appropriate publication of findings, including issues of authorship, confidentiality and academic freedom, and provide appropriate citations and credit for the work of others
  6. Leadership skills
    - a. Demonstrate self-awareness of strengths and limitations, values, standards, and preferences on which to form leadership style
    - b. Personify high standards of honesty, integrity, trust, openness, fairness and compassion
    - c. Demonstrate academic decision-making consistent with abilities, values and preferences
    - d. Take ownership of responsibilities and empower others by delegating appropriately
    - e. Demonstrate value of diverse perspectives and treat people equitably
    - f. Demonstrate ability to resolve conflicts with minimal damage to all involved

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students will be required to complete a minimum of 61 graduate credit hours as follows:

1. Five core courses focusing on epidemiological methods (15 credit hours)
2. Four semesters of journal club (four credit hours)
3. Twelve credit hours of biostatistical theory and methods course work, including EPID 691 Special Topics (when the topic is analysis of health datasets)
4. Three courses of substantive area electives, with at least one relating to the biological processes associated with the student's chosen substantive area (nine credit hours)
5. A minimum of two credit hours of practical research skills development
6. At least one course in the responsible conduct of research (one credit hour)
7. At least 18 credit hours of directed dissertation research

Students will also be required to complete the following:

### Comprehensive exams

Comprehensive exams include a written examination that assesses knowledge of completed didactic course work on core epidemiologic and biostatistical methods as well as a tailored substantive section based on the student's research focus and an oral comprehensive exam based upon the student's dissertation proposal.

### Dissertation

1. The dissertation must be a hypothesis-based, analytical epidemiology project designed by the student under the supervision of the faculty adviser and advisory committee members as appropriate.

2. Students develop and submit three manuscripts from the dissertation to peer-reviewed journals. Students should have submitted at least two manuscripts before their final defense.

## Curriculum requirements

Courses	Credit hours
<b>Core courses</b>	<b>19</b>
BIOS 553 Linear Regression	3

<b>Total graduate credit hours required (minimum)</b>	<b>61</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

## Genetic Counseling, Master of Science (M.S.)

### Program accreditation

Accreditation Council of Genetic Counseling

### Graduate program director

Human Genetics, Doctor of Philosophy (Ph.D.)  
Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science in (M.S.) [dual degree]

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Genetic Counseling, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Applications received prior to Jan 15 given priority consideration	GRE within five years of application International applicants must score 100 or greater on the TOEFL.

In addition to the [general admission requirements of the VCU Graduate School](#):

1. Applicants must have successfully completed undergraduate training and hold a baccalaureate degree from an accredited university or college.
2. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion or philosophy) and three credit hours each of biochemistry, statistics and genetics. It is recommended that all prerequisite courses have been completed with 10 years of application.
3. Students accepted to the program are generally drawn from applicants with an undergraduate grade-point average minimum of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students.
4. The Graduate Record Examination is required for admission; there is no MCAT substitution. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section.
5. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.
6. Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crisis hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

Note: The department receives an average of 80 to 100 applications annually. Of those, 25 to 30 are invited for an onsite interview, and five to seven students matriculate.

In the last five certification cycles (2009 to 2013), graduates of the program have an 86% pass rate on the ABGC/ACGC national certification examination.

The program participates in the AGCPD program match. Please see the NSGC website for information for prospective students at [nsgc.org/p/cm/ld/fid=44#accept](http://nsgc.org/p/cm/ld/fid=44#accept).

Note: See also information regarding the Virginia Leadership Education in Neurodevelopmental Disabilities VA-LEND Certificate at [wp.vcu.edu/virginialend](http://wp.vcu.edu/virginialend).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

1. Competency in genetic counseling
2. Eligibility for certification by the American Board of Genetic Counseling.
3. Preparation for careers in genetic counseling and human genetics

Successful candidates will demonstrate competency in all four genetic counseling domains: I – communication skills, II – critical thinking skills, III – interpersonal, counseling and psychosocial assessment skills and IV – professional ethics and values.

## Student learning outcomes

1. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the clinical competencies established by the American Board of Genetic Counseling. This competency is documented with written and oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.
2. General knowledge of sciences: The candidate should demonstrate a general knowledge of the elements of the sciences as related to genetic molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature. The student is evaluated by academic performance, face-to-face and written evaluation of clinical performance in multiple rotations by multiple supervisors and annual written and oral exams.
3. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. This is achieved by evaluations of clinical rotations both written and verbal that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum total of 60 credit hours. The program is a full-time, on-campus program. Students are expected to complete their course work in four semesters (21 consecutive months). To be considered full-time, the VCU School of Medicine requires students to register for 15 credit hours in the fall and spring semesters. Occasionally special circumstances may occur that could require a temporary leave of absence. The VCU Graduate School requires that master's degrees be completed in a maximum of six years.

In order to be considered in good academic standing, a student must maintain a 3.0 GPA. Students who fail to maintain a 3.0 average are permitted one semester to bring their averages up to the required level.

As part of their course work, students begin clinical rotations in the spring semester of the first year and continue through both semesters of the second year. Students are required to engage in clinical experiences during the intervening summer as well.

Students must pass a written comprehensive exam at the conclusion of the first two semesters of study and a written and oral comprehensive exam prior to graduation.

Students are required to complete a research project during their course of study. The purpose of the research project is to give the student hands-on experience in developing a research question or exploring a professional or program problem, reviewing the literature, and attempting to answer the question or problem. Projects will enhance the student's professional development and represent a strong component of the "portfolio" of experience brought to the job interview process. Projects can range from laboratory to clinical and may include development of educational materials, videotapes or patient protocols. All projects are required to have defined goals and/or hypotheses to be tested. Institutional review board application and review is often required for student research. Publication and professional presentation are strongly encouraged.

Students are encouraged to consider projects in the first semester and to choose a project topic by the second semester. The project proposal is due to the program director by the first of June during the student's first year of study. All project proposals must be approved by the faculty member with whom the project will be performed and the program director. Some projects will require review by the Office of Research and Innovation for subject protections, and some projects may require that the student seek grant funding or participate on an existing faculty grant. The student is responsible for preparing documents and meeting these requirements in a timely fashion.

By the beginning of the fall semester of the second year, students must have selected the members of their research committees. The research committee must include at least three faculty members with one outside of the department. Additional members may be added if needed for optimal project advising.

The student's supervisors and the genetic counseling program director work together in mentoring the student. Students are provided ongoing written and verbal evaluation regarding their academic and clinical progress.

In addition to participating in course work and counseling rotations, students in the department also participate in a number of community and education programs.

The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling. Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists and contributing members of commercial genetic testing laboratories and the developing field of human genomic medicine.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>57</b>
ANAT 612 Human Embryology	2
CLED 602 Techniques of Counseling	3
HGEN 501/BIOL 530 Human Genetics	3
HGEN 502 Advanced Human Genetics	3
HGEN 510 Classic Papers in Human Genetics	1
HGEN 525-526 Practice of Genetic Counseling	6
HGEN 527-528 Medical Genetics	6

HGEN 600 Clinical Genetics (placement)	1
HGEN 600 Clinical Genetics (rotation)	9
HGEN 622 Cancer Genetic Counseling	3
HGEN 690 Genetics Research Seminar	4
HGEN 691 Special Topics in Genetics	2
HGEN 697 Directed Research in Genetics	6
IDDS 602 Leadership in Developmental Disability	2
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
PATH 691 Special Topics in Modern Instrumental Methods (diagnostic genetic testing)	2
SLWK 609 Foundations of Research in Social Work Practice	3
<b>Recommended electives</b>	<b>3</b>
ALHP 708 Ethics and Health Care	3
CLED 630 Clinical Supervision in the Counseling Profession	3
ECSE 541 Educational Foundations for Collaboration and Universally Designed Learning	3
EPID 580 Public Health Ethics	1
EPID 600 Introduction to Public Health	3
EPID 603 Public Health Policy and Politics	3
PHIL 602 Biomedical Ethics	3
PHIS 619 Mitochondrial Pathophysiology and Human Diseases	3
PSYC 650 Advanced Child Psychopathology	1 or 3
RHAB 614 Counseling, Death and Loss	3
SBHD 605 Introduction to Social and Behavioral Health	3
SBHD 608 Health Communication	3
SEDP 532 Understanding Autism Spectrum Disorder	3
Other electives may be acceptable with written approval by the program director.	
<b>Total graduate credit hours required (minimum)</b>	<b>60</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

## Admission requirements

Healthcare Policy and Research, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 15 (Applications received prior to this date given priority consideration.)	GRE, TOEFL if international

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must meet the following minimum qualifications.

- Applicants must have completed a college-level course in calculus with a minimum grade of B.
- Applicants must have graduated from an accredited university or its equivalent, with a master's degree in a related discipline (e.g., economics, public health, public policy, health administration, public administration). Applicants must have completed relevant course work (including microeconomics and introductory statistics) or have professional experience in a health-related field (two years minimum) that provides an appropriate background for graduate-level study in healthcare policy and research.
- Applicants must have taken the Graduate Record Exam within the past five years; scores in the 75th percentile preferred.
- Applicants from countries where English is not the primary and official national language must complete one of the following:
  - English proficiency verification through official TOEFL score 550 or higher
  - Graduate with a master's degree following two years of study at a U.S. institution
  - English language proficiency certification through appropriate English training programs at other U.S. institutions, or English language proficiency certification by passing the English Language Proficiency Examination and/or the corresponding English Language Institute

## courses

VCU policy also requires that prospective students who have studied outside of the U.S. must provide an official WES or ECE external credential evaluation as a required part of the admissions process.

5. Applicants must present three letters of recommendation from individuals who are in a position to judge their ability to engage in interdisciplinary graduate study in healthcare policy and research. At least one recommendation must be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or adviser).
6. A written statement of professional intent that includes the proposed area of research interest is required.
7. Applicants must present a curriculum vitae or resume
8. A recent writing sample, such as a first author, peer-reviewed publication; a master's thesis; a book chapter; a policy brief or report; or a graduate course paper is required. An undergraduate course paper may be substituted if none of the above is available.
9. Prospective students must be available to interview either in person or teleconference via technology such as Skype.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The doctoral program in healthcare policy and research will equip students with an understanding of economic, political and social factors that affect access to care and the quality and cost of health care. Graduates of this program will have strong methodological and theoretical skills that will prepare them to make important contributions to the fields of health care policy and public health. Their training will enable them to add to scientific knowledge about how health policy, social factors, financing systems, organizational structures, care processes, health technologies and personal behaviors affect health care outcomes. Program graduates will also be able to formulate and analyze health care policy and to plan, implement and evaluate health programs and policies. Finally, program graduates will have experience working with colleagues in public health, medicine and other disciplines to help them translate research findings into practice rapidly.

### Train students as health policy researchers

Students in the doctoral program in healthcare policy and research will acquire the skills to conduct independent research into economic, political and social factors that affect access to care and the quality and cost of health care. The program will provide students with the training required to advance to positions as health policy researchers in academia, government or the private sector. The structure of the program provides a framework for the progressive development of a mastery of design and implementation of research and the ability to synthesize this information in ways that are policy-relevant.

In addition, students will develop the various means of communicating fundamental economic and policy knowledge and particular study designs, results

and interpretations to a variety of audiences.

The program relates the above framework to the skills needed to address a wide range of issues in the health services research, economics and policy areas.

## Student learning outcomes

1. Knowledge of the development and implementation of health policy: Students will demonstrate an appropriate level of knowledge of the current elements of health care policy and economics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications and theoretical and conceptual models, as measured by rubric.
2. Critical thinking: Students will demonstrate an appropriate level of ability to interpret information relevant to health policy and health services research, to connect theoretical frameworks to study design and evidence, to draw reasonable conclusions, and to generate and evaluate alternate explanations, as measured by rubric.
3. Specialized knowledge: Students will demonstrate knowledge of the issues, research literature, conceptual frameworks and research tools in one or more content domains within the field of health policy and health services research, as measured by rubric.
4. Study design and implementation: Students will demonstrate the ability to design and conduct original health services and health policy research that draws from economic theory, from the initial conception of an idea to research question development, study design, data collection and selection, as measured by rubric.
5. Quantitative skills: Students will demonstrate the application of appropriate analytic methods and interpretation of results, as measured by rubric
6. Oral communication skills: Students will demonstrate the achievement of an appropriate level of skill in the oral communication of health care policy subject matter with respect to content, organization, logical flow, presentation, use of language and incorporation of visual aids to both technical and lay audiences, as measured by rubric.
7. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, vocabulary and use of figures, tables and citations to effectively present health services research and health care policy information, as well as translate research findings into publication-quality manuscripts, as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program. At the discretion of the HCPR committee, a student who is retaking a required course may still be eligible to take the comprehensive examination and to start the dissertation prior to repeating the course.

At the end of the second year of required course work, students will take a written comprehensive examination designed to evaluate the student's ability to:

1. Integrate course material
2. Demonstrate critical thinking and evaluation of the literature in health care policy and research
3. Demonstrate quantitative analysis skills

After passing the written comprehensive examination, the student will schedule the proposal defense within six months. Following successful defense of the proposal, the student will prepare three manuscripts of publishable quality that will comprise the body of the dissertation and will orally defend the dissertation. It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within six years from the date of admission to the degree program. Extensions may be approved in extenuating circumstances.

## Curriculum requirements

### Courses

### Credit hours

<b>Required courses</b>	<b>38</b>
ECON 501 Introduction to Econometrics (BIOS 553 may be substituted with approval)	3
ECON 612 Econometrics	3

Human Genetics, Master of Science (M.S.) with a concentration in molecular biology and genetics

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Human Genetics, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE
<b>Special requirements:</b> International applicants must score 100 or greater on the TOEFL.			
MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs, but not for dual degree academic programs.			
Applications for the program must be submitted to the <b>Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D.</b> selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred

3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student's course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit [gen.vcu.edu/graduate-programs/phd-in-human-genetics](http://gen.vcu.edu/graduate-programs/phd-in-human-genetics).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The program is designed to provide students with training in human and molecular genetics and with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student's knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student's development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	5
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5
BIOS/STAT 543 Statistical Methods I	3

HGEN 501/BIOL 530 Human Genetics	3
HGEN 502 Advanced Human Genetics	3
HGEN 510 Classic Papers in Human Genetics	1
HGEN 606 Introduction to Clinical Genetics	1
HGEN 610 Current Literature in Human Molecular Genetics (one-credit course taken every fall and spring semester)	variable
HGEN 614 Pathogenesis of Human Genetic Disease	3
HGEN 690 Genetics Research Seminar (one-credit course taken every semester beginning in the spring term of the first year of study)	variable
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5
IBMS 620 Laboratory Rotations (two-credit course taken for three rotations)	6
IBMS 680 Proposal Preparation	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
All Ph.D. students are required to take at least two elective courses for a minimum of five credit hours. Electives include PATH 670 and courses at the 500 level or above in ANAT, BIOC, BIOL, BIOS, HGEN, MICR, NEUS, PHTX and PHIS excluding laboratory courses, courses specifically for professional programs (e.g. HGEN 600 Clinical Genetics), directed research, independent study, seminar or current topic courses, BNFO 621, MICR 608 and MICR 609.	5

### Additional elective courses and directed research

Additional elective courses and HGEN 697 Directed Research in Genetics (1-15 variable credit hours) are taken to reach the required minimum of 86 credit hours.

**Total graduate credit hours required (minimum)** **86**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Graduation requirements

## Other information

## School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

### Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

## Graduate program director

Program website: [vcu.edu/mbg](http://vcu.edu/mbg)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics

Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree]

Human Genetics, Master of Science (M.S.)

Human Genetics, Master of Science (M.S.) with a concentration in molecular biology and genetics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

#### Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, MCAT or DAT

Special requirements: MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant

6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said

identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 86 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>variable</b>
BIOC 503-504 Biochemistry, Cell and Molecular Biology	10
BIOC 602 Physical Properties of Macromolecules (modules 1 and 2)	2
HGEN 501/BIOL 530 Human Genetics	3

5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student's course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in

quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit [gen.vcu.edu/graduate-programs/phd-in-human-genetics](http://gen.vcu.edu/graduate-programs/phd-in-human-genetics).

Human Genetics, Doctor of Philosophy (Ph.D.)  
Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics  
Human Genetics, Master of Science (M.S.)  
Human Genetics, Master of Science (M.S.) with a concentration in molecular biology and genetics

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree]			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D. and M.S.	Fall	Jan 15	GRE within five years of application (MCAT or DAT is not acceptable in lieu of GRE.)
Special requirements: Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form. The dual degree box on the application must also be checked.			
International applicants must score 100 or greater on the TOEFL.			
It is recommended that all prerequisite courses have been completed within 10 years of application.			

Applicants must meet all [general admission requirements of the VCU Graduate School](#). In order to be admitted to this dual-degree program, an applicant must apply to and be accepted into both the M.S. and the Ph.D. programs.

#### Human Genetics, Doctor of Philosophy

Successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant

6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student's course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit [gen.vcu.edu/graduate-programs/phd-in-human-genetics](http://gen.vcu.edu/graduate-programs/phd-in-human-genetics).

#### Genetic Counseling, Master of Science (M.S.)

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion and philosophy) and three credit hours each of biochemistry, statistics and genetics. Students accepted to the program are generally drawn from applicants with an undergraduate minimum grade point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students. The Graduate Record Examination is required for admission; VCU does not substitute with the MCAT. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version. (The program participates in the Association of Genetic Counseling Program Directors program match. Please see the National Society of Genetic Counselors website for information for prospective students at [nsgc.org/p/cm/ld/fid=44#accept](http://nsgc.org/p/cm/ld/fid=44#accept).)

Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crises hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

In the last five certification cycles (2007 to 2012) VCU graduates have an 86 percent pass rate on the American Board of Genetic Counseling/Accreditation Council of Genetic Counseling national certification examination.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

### Provide training in human and molecular genetics and competency in genetic counseling

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Eligibility for certification by the American Board of Genetic Counseling

To prepare individuals for careers in genetic counseling and human genetics, successful candidates will demonstrate competency in all four genetic counseling domains: I – communication skills, II – critical thinking skills, III – interpersonal, counseling and psychosocial assessment skills and IV – professional ethics and values.

The Department of Human and Molecular Genetics offers training that combines preparation for a career as a genetic counselor with research-based doctoral training in a coordinated program that integrates the complementary aspects of these two degree categories. In order to be admitted to this dual-degree program, an applicant must be accepted into both the M.S. and Ph.D. programs.

## Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. This is also achieved by evaluations of clinical rotations, both written and verbal, that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
6. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the clinical competencies established by the American Board of Genetic Counseling. This competency is documented with written and oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the Ph.D. degree requires at least three years of study for students entering with a baccalaureate degree and must be completed within eight years. Students in the dual-degree program must complete a minimum of 152.5 graduate credit hours.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student's knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student's development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in Human Genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral comprehensive exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

## Curriculum requirements

Courses	Credit hours
ANAT 612 Human Embryology [G]	2
ANAT 620 Scientific Writing and Grantsmanship [P] <b>or</b>	2 <b>or</b>
HGEN 614 Pathogenesis of Human Genetic Disease (will also fulfill this requirement)	3
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology [P]	5
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology [P]	5
<b>or</b> CCTR 703 Statistics for Genetic Studies II [P]	<b>or</b> 3
BIOS/STAT 543 Statistical Methods I [P] <b>or</b> CCTR 702 Statistics for Genetic Studies I [P]	3
CLED 602 Techniques in Counseling [G]	3
HGEN 501/BIOL 530 Human Genetics [P, G]	3
HGEN 502 Advanced Human Genetics [P, G]	3
HGEN 510 Classic Papers in Human Genetics [P, G]	1
HGEN 525 Practice of Genetic Counseling	3
HGEN 526 Practice of Genetic Counseling [G]	3
HGEN 527 Medical Genetics [G]	3
HGEN 528 Medical Genetics [G]	3
HGEN 600 Clinical Genetics [G] (three credit hours taken a minimum of five semesters)	15
HGEN 610 Current Literature in Human Molecular Genetics [P] (one-credit course taken a minimum of nine semesters)	9
HGEN 614 Pathogenesis of Human Genetic Disease [P] <b>or</b> HGEN 603 Mathematical and Statistical Genetics [P]	3
HGEN 622 Cancer Genetic Counseling [G]	3
HGEN 690 Genetics Research Seminar [P] (one-credit course taken a minimum of 10 semesters)	10
HGEN 697 Directed Research in Genetics [P, G]	63
IBMS 600 Laboratory Safety [P]	1
IBMS 610 Laboratory Opportunities [P]	.5

IBMS 620 Laboratory/Clinical Rotations (two-credit course taken three times)	6
IBMS 680 Proposal Preparation	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct <b>or</b> OVPR 603 Responsible Conduct of Research [P, G]	1
PATH 521 Laboratory Techniques in Diagnostic Pathology [G] This course is divided into two distinct sections — a cytogenetics section and a molecular genetics section. The intent of this rotation is for students to learn the behind-the-scenes wet lab activities that lead to genetic information relevant for clinical counseling. Some dual-degree students may choose a thesis project that specializes in wet lab research, either cytogenetics or molecular genetics. With permission from the adviser and the genetic counseling program director, part or all of this rotation may not be required.	3

### Electives (optional) (0-3)

No electives are required for the dual-degree program. If the student chooses to take electives, however, suggested electives include IDDS 602, PATH 670 and courses at the 500 level or above in ANAT, BIOC, BNFO, BIOL, BIOS, HGEN, MICR, NEUS, PHTX and PHIS, excluding laboratory courses, courses specifically for professional programs, directed research, independent study, seminar or current topic courses, BNFO 621, MICR 608, and MICR 609.

### Total graduate credit hours required (minimum) 152.5

Once students have completed all didactic course work, they will continue to register as follows for all subsequent semesters unless otherwise advised by the program director:

HGEN 600 Clinical Genetics [G]	3
HGEN 610 Current Literature in Human Molecular Genetics [P]	1
HGEN 690 Genetics Research Seminar [P, G]	1
HGEN 697 Directed Research in Genetics [P, G]	10

[G] = M.S. in Genetic Counseling requirement

[P] = Ph.D. in Human Genetics requirement

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Program goal

The goal of the master's program in human genetics is to provide training in human and molecular genetics. The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

## Degree requirements

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Master of Science in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to master's students in the program include clinical and molecular cytogenetics, molecular genetics, developmental

genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling.

In addition to the general [VCU Graduate School graduation requirements](#), the M.S. degree requires at least two years of full-time study for students entering with a B.S. or B.A. degree and must be completed within six years. Students must complete a minimum of 59 graduate credit hours. Students may be required to take an additional six hours of directed research after the second spring semester if needed.

Upon completing their thesis research, master's students must report their results in a thesis that is prepared in an acceptable form and style as detailed by the university Graduate School. A final oral examination is scheduled after the student's thesis has been approved by the student's advisory committee. This examination includes the subject matter of course work the student has completed as well as the thesis. It is administered by the student's graduate advisory committee who will vote on the student's performance in addition to rating them with regard to the rubrics defined by the School of Medicine.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>32 (or 34)</b>
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	5
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology or BIOS/STAT 544 Statistical Methods II	5 or 3
BIOS/STAT 543 Statistical Methods I	3
HGEN 501/BIOL 530 Human Genetics	3
HGEN 502 Advanced Human Genetics	3
HGEN 510 Classic Papers in Human Genetics	1
HGEN 605 Experimental Methods in Human Genetics* (variable credit-hour course to be taken twice for a minimum total of five credits)	5
HGEN 606 Introduction to Clinical Genetics	1
HGEN 610 Current Literature in Human Molecular Genetics (one-credit course to be taken three times)	3
HGEN 690 Genetics Research Seminar	4
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Electives</b>	<b>5</b>
All master's students are required to take at least two elective courses. Electives include PATH 670 and courses at the 500 level or above in ANAT, BIOC, BNFO, BIOL, BIOS, HGEN, MICR, NEUS, PHTX and PHIS excluding laboratory courses, courses specifically for professional programs, directed research, independent study, seminar or current topic courses and excluding BNFO 621, MICR 608 and MICR 609.	
<b>Directed research</b>	<b>22</b>
HGEN 697 Directed Research in Genetics (If needed, six additional credit hours will be taken after the second spring semester)	22 (minimum)
<b>Total graduate credit hours required (minimum)</b>	<b>59 (or 61)</b>

\*For HGEN 605, the student and faculty member will design a project that can reasonably be completed in 12 weeks. The student will spend approximately 12 weeks in that lab for a minimum of eight hours a week. The student's performance in the laboratory will serve as the basis for the grade that is received for this course.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program

websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

## Admission requirements

Human Genetics, Master of Science (M.S.) with a concentration in molecular biology and genetics			
Degree: M.S.	Semester(s) of entry: Fall	Deadline dates: Deadline date rolling, preference given to applications received by Jan 17	Test requirements: GRE; TOEFL for applicants whose native language is not English
<b>Special requirements:</b> Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Human Genetics.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

### Research-intensive, non-thesis curriculum for medical students

Individuals who are participants in Doctor of Medicine program at VCU may be eligible for enrollment in research-intensive, non-thesis study in the program. Please contact the graduate program director for additional information.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

- In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
- The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

- Problem-solving skills:** Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
- General knowledge of sciences:** Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
- Communication skills:** Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - Oral communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - Written communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
- Experimental design:** Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	<b>19</b>

BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function*	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism*	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology*	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/ Membranes and Bioenergetics*	1
IBMS 600 Laboratory Safety	1
IBMS 620 Laboratory/Clinical Rotations; sections 004 and 005** (two-credit course taken twice)	4
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least once)	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1

<b>Other required course work</b>	<b>29</b>
HGEN 501 Human Genetics	3
Directed research and seminar	
BIOC 697 Directed Research in Biochemistry or MICR 697 Directed Research in Microbiology (Note: Students must take a minimum of one credit hour of directed research every semester of enrollment in the program after the first year of study.)	variable
MICR 690 Microbiology Research Seminar (section 002, MBG; one-credit course) (Note: Students must take a minimum of one credit hour of research seminar course work every fall and spring semester of enrollment in the program.)	variable
Students may take additional course work with the approval of their graduate program directors.	

## Total graduate credit hours required (minimum) 48

\* This requirement may also be satisfied with BIOC 503 Biochemistry, Cell and Molecular Biology (five credit hours).

\*\* This requirement may also be satisfied, under certain circumstances, with MICR 608 or MICR 609 Introduction to Microbiology and Immunology Research (three credit hours; section 002). Consult with the program director.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

**Program website:** [medicalphysics.vcu.edu](http://medicalphysics.vcu.edu)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Medical Physics, Master of Science (M.S.)

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Medical Physics, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 15	GRE

In addition to the [general admission requirements of the VCU Graduate School](#) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

- Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism physics.
- Students must submit satisfactory GRE scores.

- Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goals

The Ph.D. in Medical Physics offers students course work and research training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the doctoral program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in both the health care delivery and biomedical research settings. The program will prepare students for careers as independent investigators in the field of medical physics and jointly for careers in university departments, research institutes, laboratories and hospitals as trainee clinical medical physicists. Research areas include molecular imaging, functional imaging using PET and NMR, cone-beam CT image reconstruction, deformable image registration, intensity-modulated radiation therapy, radiation therapy dose calculations, 4D radiation therapy and brachytherapy dose calculations.

**Professional competency:** To develop professional competency in medical physics by providing a framework in which students progressively develop a mastery of the current state of medical physics and an ability to synthesize this information and apply it in research and clinical settings. Additionally, the program aims to develop skills in the various means of communicating both the core of medical physics knowledge and expression of experimental design, results and interpretation to a variety of potential audiences.

**Scientific competency:** To develop scientific competency in medical physics by providing a framework by which candidates develop skills to design, conduct and implement theoretical and clinical research which answers identified questions. The research focus may lead to new and/or improved applications of physics for diagnosis and treatment of disease. Candidate research will focus on medical imaging, radiation therapy, radiation metrology or other burgeoning areas of investigation. In broad terms, candidate research will be directed toward advancing "minimally invasive medicine" through applications of ionizing and non-ionizing radiation.

### Student learning outcomes

- Communication skills:** The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the

achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

2. Experimental design: The candidate should demonstrate an appropriate level of skill in the theoretical and technical design of experimental procedures and the technical conduct of experimentation related to his or her research. This includes demonstration of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
3. Knowledge of medical physics literature: The candidate should demonstrate a general knowledge of medical physics literature and a more detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of meaningful medical physics research problems, including the ability to defend said identifications, and the design and implementation of appropriate problem-solving methods as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students entering the program with an undergraduate degree are required to earn a minimum of 30 credit hours in didactic or laboratory course work. Students entering with a master's degree in medical physics, physics or an appropriate related field are required to earn a minimum of 18 credit hours. In addition to course work, the Ph.D. requires a minimum of 12 credit hours in MEDP 697 Directed Research. At least half of the course work must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new Ph.D. students entering the program will be assigned an adviser. After successful completion of the written comprehensive exam, students and advisers will develop a graduate dissertation committee. The committee will direct the students in their research and subsequent course selection. Advisers will report once a semester to the program director on the academic progress of their students and will administer the oral candidacy and dissertation defense examinations.

The student is required to complete written and oral examinations to be admitted as a Ph.D. candidate. The written comprehensive examination covers core knowledge and applications in medical physics course work, as well as basic concepts in physics, chemistry and biology. The oral examination, administered by the student's graduate dissertation committee, is based upon a written prospectus describing the proposed dissertation research project. Examiners evaluate the adequacy of the proposed project, the student's level of understanding of the project and the likelihood that the dissertation can be completed successfully.

After being approved for degree candidacy, the student must conduct substantial original investigation under the supervision of the advisers and must prepare a dissertation reporting the results of the research in the context of existing scientific knowledge. After the dissertation has been completed and unanimously accepted for defense by the graduate dissertation committee, the candidate will appear before the committee for an oral defense. The oral dissertation defense examines the candidate's research, dissertation documentation and underlying fundamental knowledge. Upon successful completion of the defense and dissertation, the student may apply for graduation with a Ph.D. in Medical Physics.

all graduate students in all graduate programs at VCU

## Program goals

The Master of Science in Medical Physics offers students course work and practical clinical training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the master's program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program will prepare students for careers as qualified and independent clinical medical physicists. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, imaging and health physics.

**Professional competency:** To develop professional competency in medical physics by providing a framework in which students progressively develop mastery of the current state of medical physics and an ability to synthesize this information and apply it in a clinical setting. Additionally, students in the program will develop skills in the various means of communicating the core of medical physics knowledge and clinical applications of that knowledge to a variety of potential audiences.

**Clinical competency:** To develop clinically competent medical physics graduates by providing a framework in which students progress from didactic knowledge to clinical knowledge and demonstrated application of clinical medical physics principles, practices and procedures.

## Student learning outcomes

1. Clinical performance: The candidate should demonstrate an appropriate level of skill in the theoretical, practical and technical conduct of medical physics in the clinical setting. This includes demonstration of an appropriate level of competence in the ability to:
  - a. Design and quality assure radiation therapy treatment plans for both brachytherapy and external beam radiation therapy
  - b. Quality assure radiation therapy delivery devices
  - c. Quality assure radiation therapy treatment charts
  - d. Perform calibration and/or beam delivery commissioning measurements as measured by instructor evaluation in compliance with accepted clinical standards
2. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by course work and performance on the written comprehensive examination. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, chart notation and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by course work and performance on the written comprehensive examination.
3. Medical physics knowledge base: The candidate should demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics. This includes general knowledge of medical physics scientific materials, clinical policies and procedures, and translational scientific literature. The student should demonstrate the ability to evaluate and integrate such knowledge into the solution of clinical problems as measured by course work and performance on the written comprehensive examination.
4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work, annual review and performance on the written comprehensive examination.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students entering the program with an undergraduate degree are required to earn a minimum of 30 credit hours in didactic or laboratory course work. At least 15 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed in the medical physics graduate handbook.

Students are required to complete 20 credit hours of core graduate medical physics course work (MEDP 563, 567, 601, 630, 635, 636 and 637), one credit hour of MEDP 689 and six credit hours of MEDP 682. Additionally, students also must demonstrate competence in anatomy through completion of an undergraduate or graduate anatomy course approved by the medical physics graduate curriculum committee.

Following completion of course work, students will be required to pass a comprehensive examination administered by the medical physics comprehensive examination committee. The comprehensive examination will cover materials from the core medical physics courses and clinical rotations.

## Curriculum requirements

## Admission requirements

Microbiology and Immunology, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE or MCAT
<b>Special requirements:</b> MCAT acceptable in lieu of GRE for combined professional/academic degree programs			
Applications for the program must be submitted to the <b>Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D.</b> selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. GRE scores greater than 153 for quantitative, 156 for verbal (or combined 1250 on previous scale) and 4.0 analytical scores
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)

- Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
- Three letters of recommendation that speak to the scientific competency and experience of the applicant
- The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified.

The Ph.D. program is also designed to develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences

## Student learning outcomes

- Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
- Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
- Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
- Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
- General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 58 graduate credit hours.

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Ph.D. degree is offered, as well as an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings, writing of a grant application and writing of scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser, undergoes a written and oral examination and then carries out an original independent research project under the direction of the adviser. The project falls under the review of an advisory committee, and a written dissertation is defended in a final oral examination.

A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to continue in the program.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics	1

MICR 692 Current Topics in Molecular Pathogenesis, MICR 693 Topics in Molecular Biology and Genetics or MICR 694	variable

Current Topics in Immunology (a journal club course taken for one semester every year)

OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research 1

#### Electives and directed research variable

Students enroll in directed research and additional elective courses from the following list to amass the required minimum of 58 credit hours

MICR 605 Prokaryotic Molecular Genetics	3
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR/BNFO 653 Advanced Molecular Genetics: Bioinformatics	3
MICR 684 Molecular Biology of Cancer*	3
MICR 697 Directed Research in Microbiology (1-15 variable credit hours)	variable

**Total graduate credit hours required (minimum) 58**

\* Offered in alternate years.

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is

available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

**Program website:** [vcu.edu/mbg](http://vcu.edu/mbg)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Microbiology and Immunology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Microbiology and Immunology, Master of Science (M.S.)

Microbiology and Immunology, Master of Science (M.S.) with a concentration in molecular biology and genetics

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

#### Microbiology and Immunology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, MCAT or DAT

**Special requirements:** MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs

Applications for the program must be submitted to the **Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D.** selected from the drop-down menu of programs on the VCU online application form.

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty

of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with

respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

- b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 58 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>variable</b>
BIOC 503-504 Biochemistry, Cell and Molecular Biology	10
BIOC 602 Physical Properties of Macromolecules (modules 1 and 2)	2
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5
IBMS 620 Laboratory/Clinical Rotations (two-credit course taken for three rotations)	6

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Microbiology and Immunology, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, DAT or MCAT
<b>Special requirements:</b> Successful domestic applicants typically have GRE scores of at least 156 for verbal reasoning and 153 for quantitative reasoning, 4.0 for analytical reasoning; DAT score of 18 or greater; or MCAT score of 26 or greater. International applicants should display English language proficiency by achieving a TOEFL score of 100 (iBT) or higher.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must meet the following minimum requirements.

1. Applicants must have earned or expect a baccalaureate or equivalent degree and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics.
2. Laboratory experience is strongly recommended.
3. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals.
4. For combined degree students, the Medical College Admission Test or Dental Aptitude Test is accepted in lieu of the GRE.
5. Foreign applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Complete application portfolio reviews will begin in January and will continue through May 1. International students requiring temporary U.S. visas should apply by April 1 for fall matriculation.

### Research-intensive, non-thesis curriculum for medical students

Individuals who are participants in Doctor of Medicine program at VCU may be eligible for enrollment in research-intensive, non-thesis study in the program. Please contact the graduate program director for additional information.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals

for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. 3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Master of Science degree is offered, as well as a Ph.D. and an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then carries out an original, independent research project under the direction of the adviser. The project falls under the review of an advisory committee and a written dissertation is defended in a final oral examination.

M.S. students will select their permanent advisers after three rotations completed during the first year of study. Research projects will be based on ongoing research in laboratories of the selected permanent adviser. A graduate advisory committee will be developed by the student and adviser. The M.S. student and the GAC will formulate a suitable curriculum of study based on the student's area of research interest.

In addition to the general [VCU Graduate School graduation requirements](#), students in the M.S. degree program must complete a minimum of 41 credit hours (25 credit hours in didactic formal graduate courses, a minimum of four elective credit hours and a minimum of 12 directed research hours). Additional hours may be

completed for successful outcome of the M.S. degree. A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to continue in the program.

An oral defense, consisting of a public presentation of the thesis and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members, students and staff, shall be scheduled to examine the student's underlying fundamental knowledge of the disciplines encompassed by the student's research. Announcement of the oral defense, including the candidate's name, project title, and the day, place and time of the defense, shall be made at least seven working days in advance of the defense.

## Curriculum requirements

Courses	Credit hours

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	<b>19</b>
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function*	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism*	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology*	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics*	1
IBMS 600 Laboratory Safety	1
IBMS 620 Laboratory/Clinical Rotations; sections 004 and 005** (two-credit course taken twice)	4
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least once)	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1

## Other required course work

29

Any appropriate graduate-level course offered by the School of Medicine 3 or with the course designations of BIOL, BNFO, CHEB, CHEM, CLSE, EGRB, EPID, MEDC

Directed research and seminar

BIOC 697 Directed Research in Biochemistry or MICR 697 Directed Research in Microbiology (Note: Students must take a minimum of one credit hour of directed research every semester of enrollment in the program after the first year of study.) variable

MICR 690 Microbiology Research Seminar (section 002, MBG; one-credit course) (Note: Students must take a minimum of one credit hour of research seminar course work every fall and spring semester of enrollment in the program.) variable

Students make take additional course work with the approval of their graduate program directors.

## Total graduate credit hours required (minimum)

48

\* This requirement may also be satisfied with BIOC 503 Biochemistry, Cell and Molecular Biology (five credit hours).

\*\* This requirement may also be satisfied, under certain circumstances, with MICR 608 or MICR 609 Introduction to Microbiology and Immunology Research (three credit hours; section 002). Consult with the program director.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

## Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

### Neuroscience, Doctor of Philosophy (Ph.D.)

#### Graduate program director

John W. Bigbee, Ph.D.

Professor, Department of Anatomy and Neurobiology

(804) 828-0948

Program website: [neuroscience.vcu.edu](http://neuroscience.vcu.edu)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Neuroscience, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, MCAT or DAT TOEFL if international
Special requirements: Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. GRE > 153 quantitative, 156 verbal (or combined 1,250 on previous scale) and 4.0 analytical scores
3. TOEFL score of 600 (pBT), 250 (cBT) or 100 (iBT); or 6.5 on the IELTS for individuals for whom English is a second language
4. Personal statements, including:
  - a. Long-term career goals to assess reasons behind application
  - b. How a Ph.D. in biomedical science helps achieve those goals
  - c. Initial motivating factors for a career in research
  - d. Research experience, including dates, places and duration
5. Equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology or biophysics)

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#)

and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Degree program goals

### Program mission

The program offers an interdepartmental, integrated curriculum for graduate study leading to the Ph.D. in Neuroscience. The program prepares students to teach in the neuroscience disciplines at a university or academic health center and is distinguished by its objective to prepare students to function as independent research investigators.

### Program goals

Upon completion of the Ph.D. in Neuroscience degree program, students will have:

1. Demonstrated a mastery of neuroscience and related bioscience knowledge
2. Developed effective oral, written and electronic communication skills
3. Demonstrated the ability to formulate, design, implement and interpret experimental approaches
4. Reached a level of competency to advance to positions as neuroscience researchers and teachers in a broad spectrum of academic, industrial and government employment venues
5. Successfully obtained employment in a neuroscience-related position

## Student learning outcomes

1. Acquire the core knowledge of neuroscience: Students will demonstrate acquisition of core knowledge presented in required and elective courses.
2. Demonstrate knowledge of the neuroscience scientific literature: Students will demonstrate the ability to integrate and comprehensively review the scientific literature.
3. Acquire competency in oral communication: Students will prepare and deliver effective seminars and poster presentations.
4. Acquire competency in written communication: Students will generate an original dissertation and written comprehensive exam, as well as prepare and publish high quality scientific manuscripts.
5. Demonstrate the ability to design experiments: Students will evaluate existing scientific knowledge related to their project, identify a scientific question and formulate testable hypotheses.
6. Demonstrate the ability to conduct and interpret experiments: Students design experiments to test their hypotheses, carry out those experiments and interpret their results.
7. Obtain employment upon graduation: Student will successfully obtain employment in a neuroscience-related position upon graduation.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students in the Ph.D. program must complete a minimum of 69 graduate credit hours.

Students must maintain a minimum cumulative GPA of 3.0 and must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

At the end of the second year of required and elective course work, students will take written and oral comprehensive examinations. The written examination is an open-book written exam which is designed to: (1) assess the student's ability to integrate course material and (2) demonstrate critical thinking and evaluation of the literature in the basic health sciences related to the student's area of research.

This part is based on a question provided to the student by their adviser and graduate advisory committee. The answer should be 25 to 35 pages in length and must represent the student's unaided work. This section of the exam is graded as pass/fail and must be completed by June 30 of the second year.

After passing the written comprehensive examination, students will schedule the proposal defense within six months. For the proposal defense, students will prepare an NIH-style grant proposal based on their research plans. The proposal will form the basis of the oral candidacy exam. Students are strongly encouraged to submit their proposals for extramural funding (e.g., NIH predoctoral fellowships) where appropriate.

After successful completion of both parts of the written candidacy exam, the student's graduate advisory committee will administer the oral candidacy examination, which entails an oral defense of the student's grant proposal as well as the topics covered in part one of the written candidacy exam. The oral candidacy exam covers: (1) course work related to the student's proposed research; (2) the literature cited in or related to the proposal; and (3) the hypotheses, research techniques and procedures presented in the proposal.

Successful completion of the oral candidacy exam advances the student to candidacy for the doctoral degree. The oral candidacy exam must be completed prior to the beginning of the third year.

Beginning with the spring semester the third year in the graduate program, students will devote their full time to conducting research in their advisers' laboratories. Students also register for neuroscience research seminar and journal club each semester.

At the appropriate time in their research, students will prepare a dissertation and schedule a final oral defense of the thesis. The final oral examination (defense of the dissertation) will be limited to the subject of the candidate's dissertation and related basic science.

It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within eight years from the date of matriculation in the degree program. Extensions may be approved in extenuating circumstances.

## Curriculum requirements

Courses	Credit hours
ANAT 610 Systems Neuroscience	4
ANAT 615 Techniques in Neuroscience and Cell Biology	3
ANAT 620 Scientific Writing and Grantsmanship	2
ANAT 630 Research Presentations (one-credit course repeated)	8
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	5
BIOC 691 Special Topics in Biochemistry (critical thinking)	1
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5
IBMS 620 Laboratory Rotations (two-credit course repeated)	6
IBMS 680 Proposal Preparation	1
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
NEUS 609 Cellular and Molecular Neuroscience	4
NEUS 690 Neuroscience Research Seminar (one-credit course repeated)	8
NEUS 697 Directed Research (variable credit, repeated)	variable
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
Electives (Choose two courses from list below.)	6-8
Students register for the combination of the two electives and NEUS 697 Directed Research to reach the required minimum of 69 credits.	
<b>Total graduate credit hours required (minimum)</b>	<b>69</b>

### Electives

Choose two courses from the following list of electives. Others may be approved by the graduate program director.

ANAT 529 Functional Neuroanatomy	1
----------------------------------	---

ANAT 617 Techniques in Neuroscience and Cell Biology	4
BIOC 605 Molecular Biology	3
BIOS/STAT 543 Statistical Methods I	3
IBMS 635 Cellular Signaling	3
NEUS 619 Synaptic Organization of the Brain	3
PHIS 604 Cell Physiology: From Molecules to Organisms	3
PHIS 606 Cell Physiology: From Molecules to Organisms	3
PHIS 619 Mitochondrial Pathophysiology and Human Diseases	3
PHIS/PHTX 620 Ion Channels in Membranes	3
PHIS 631 Electrophysiology and Photonic Methods	2
PHTX 536 Principles of Pharmacology and Toxicology	5
PHTX 537 Principles of Pharmacology and Toxicology	5
PHTX 548 Drug Dependence	3
PHTX 632 Neurochemical Pharmacology	3

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Pharmacology and Toxicology, Master of Science (M.S.)

Pharmacology and Toxicology, Master of Science (M.S.) with a concentration in molecular biology and genetics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE TOEFL (individuals for whom English is a second language)
Special requirements: Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

## General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

## Degree requirements

The broad base offered in the Ph.D. program in pharmacology and toxicology, together with basic training in physiology and biochemistry, provides the background for a successful career in academic institutions, industry or government. The research program of the department is sufficiently broad to provide an adequate basis for entry into a wide variety of interesting areas of modern biology and medicine.

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 60 graduate credit hours. With few exceptions, Ph.D. students are enrolled in the Biomedical Sciences Doctoral Portal from matriculation until matched with an adviser, usually by the summer semester of the second year. The students are moved into the Ph.D. in Pharmacology and Toxicology major after meeting program requirements. Students customarily complete formal course work in pharmacology and biochemistry during the first year of study. Participation in research also is begun early in the first year. Students interested or committed to pharmacology should take the asterisked (\*) courses listed in the curriculum requirements section during the portal period to assure rapid progress toward the degree.

In the third and subsequent years, the majority of the course load is taken as PHTX 697 Directed Research in Pharmacology. Advanced electives also may be taken as desired and with the approval of the adviser. Students and faculty participate in a seminar program (PHTX 690 Pharmacology Research Seminar) that includes distinguished visiting scientists from the U.S. and abroad. Following completion of a qualifying examination, a degree candidate is required to submit

and defend a thesis embracing an original research project conducted under the guidance and supervision of an adviser and an advisory committee. There is no foreign language requirement. The average time necessary to complete the doctoral program in pharmacology and toxicology is four to five years.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>19</b>
HGEN 692 Special Topics (classical and near class paper)* <b>or</b> IBMS 630 Critical Thinking*	1 (minimum)
IBMS 600 Laboratory Safety*	1
IBMS 610 Laboratory Opportunities	1
IBMS 620 Laboratory Rotations* (two-credit course taken for three rotations)	6
IBMS 680 Proposal Preparation	1
PHTX 536 Principles of Pharmacology and Toxicology	5
PHTX 690 Pharmacology Research Seminar or IBMS 690 Basic Health Sciences Research Seminar*	1
PHTX 691 Special Topics in Pharmacology (basic concepts for graduate students)	3
<b>Recommended electives and directed research</b>	<b>41</b>
Students register for a combination of PHTX 697 Directed Research in Pharmacology and elective courses as indicated below for a total of 41 credit hours to reach the required minimum of 60 credit hours.	
ANAT 610 Systems Neuroscience	4
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	5
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 60 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

## Curriculum requirements

Courses	Credit hours

<b>Directed research and elective courses</b>	<b>variable</b>
Students will register for a variable number of credit hours of PHTX 697 Directed Research in Pharmacology and elective courses to amass the required minimum of 60 credit hours.	variable
<b>Total graduate credit hours required (minimum)</b>	<b>60</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

## Pharmacology and Toxicology, Master of Science (M.S.)

### Graduate program director

Hamid I. Akbarali, Ph.D.

Professor and vice chair, Department of Pharmacology and Toxicology  
[hiakbarali@vcu.edu](mailto:hiakbarali@vcu.edu)  
 (804) 828-7918

### Additional contact

Sheryol W. Cox

Coordinator, graduate programs in pharmacology and toxicology  
[swcox@vcu.edu](mailto:swcox@vcu.edu)  
 (804) 828-8400

**Program website:** [pharmtox.vcu.edu](http://pharmtox.vcu.edu)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)

Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Pharmacology and Toxicology, Master of Science (M.S.) with a concentration in molecular biology and genetics

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Pharmacology and Toxicology, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Apr 15	GRE
			MCAT acceptable in lieu of GRE
Special requirements: See the departmental website for <a href="#">additional information on the application process</a> .			

In addition to the [general admission requirements of the VCU Graduate School](#), qualified applicants to the M.S. degree program typically must have:

1. Baccalaureate degrees with a major in fields such as biology, chemistry, biochemistry, pharmacy and related sciences
2. GRE scores of 1100 (verbal plus quantitative) and 3.5 (analytical) or equivalent scores on the new GRE exam
3. Undergraduate GPA of 3.2

4. Some laboratory research experience

#### Research-intensive, non-thesis curriculum for medical students

Individuals who are participants in Doctor of Medicine program at VCU may be eligible for enrollment in research-intensive, non-thesis study in the program. Please contact the graduate program director for additional information.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goal

The graduate program leading to the Master of Science in Pharmacology and Toxicology prepares individuals for a variety of career objectives in biomedical science. These careers include but are not limited to as industrial scientists and scientists in government regulatory agencies. The M.S. program will be of interest to individuals planning on pursuing technical positions in pharmacology or toxicology research or testing; students interested in the health professions, such as medicine or dentistry, who desire additional research training; and those interested in government positions, such as those in regulatory agencies, that require training in pharmacology and toxicology.

The program incorporates formal instructional activity and research training mentored by members of the graduate faculty. The master's program is distinguished from the Ph.D. degree offered by the department in that the M.S. student is not being prepared for a career as an independent investigator.

### Student learning outcomes

1. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
2. Integrated knowledge of bioscience: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or

create, and implement experimental protocols and to design and develop experiments as measured by rubric.

### Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students in the master's program must complete a minimum of 30 graduate credit hours.

The Master of Science in Pharmacology and Toxicology is a research-oriented degree program comprising graduate course work and supervised research leading to a master's thesis. Students must conduct a substantial original investigation under the supervision of their advisers and must prepare and defend a thesis reporting the results of this research. It is highly recommended that students identify mentors for dissertation research as soon as possible within the first semester to ensure timely progress in their research.

When the thesis has been completed, copies are submitted to the members of the student's graduate advisory committee. The student's GAC decides upon the acceptability of the candidate's thesis. If the committee unanimously accepts the thesis for defense, the candidate appears before them for a final oral examination.

M.S. students are required to present a departmental seminar prior to the final oral thesis defense as a requirement for completion of the thesis.

### Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>10</b>
Substitutions may be approved by the graduate program director.	
IBMS 600 Laboratory Safety	1
PHTX 536 Principles of Pharmacology and Toxicology	5
PHTX 690 Pharmacology Research Seminar (M.S. students are required to present a departmental seminar prior to the final oral thesis defense as a requirement for completion of the thesis.)	1
PHTX 691 Special Topics in Pharmacology	3
<b>Advanced elective</b>	<b>3</b>
Students must take one advanced elective course in their specialty areas in addition to completing the research-based dissertation. (See list below.)	
<b>Directed research</b>	<b>17</b>
PHTX 697 Directed Research in Pharmacology	variable
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>
<b>Recommended advanced electives</b>	
ANAT 610 Systems Neuroscience	4
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology	1-5
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism	1

## Admission requirements

### Pharmacology and Toxicology, Master of Science (M.S.) with a concentration in molecular biology and genetics

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Deadline date rolling, preference given to applications received by Jan 17	GRE; TOEFL for applicants whose native language is not English

#### Special requirements:

Applications for the program should be submitted to **Molecular Biology and Genetics – M.S.** selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Pharmacology and Toxicology.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

### Research-intensive, non-thesis curriculum for medical students

Individuals who are participants in Doctor of Medicine program at VCU may be eligible for enrollment in research-intensive, non-thesis study in the program. Please contact the graduate program director for additional information.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to

advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core

course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	<b>19</b>
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function*	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism*	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology*	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics*	1
IBMS 600 Laboratory Safety	1
IBMS 620 Laboratory/Clinical Rotations; sections 004 and 005** (two-credit course taken twice)	4
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least once)	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Other required course work</b>	<b>29</b>
Any appropriate graduate-level course offered by the School of Medicine 3 or with the course designations of BIOL, BNFO, CHEB, CHEM, CLSE, EGRB, EPID, MEDC	
Directed research and seminar	
MICR 690 Microbiology Research Seminar (section 002, MBG; one-credit course) (Note: Students must take a minimum of one credit hour of research seminar course work every fall and spring semester of enrollment in the program.)	variable
MICR 697 Directed Research in Microbiology (Note: Students must take a minimum of one credit hour of directed research every semester of enrollment in the	variable
Students make take additional course work with the approval of their graduate program directors.	
<b>Total graduate credit hours required (minimum)</b>	<b>48</b>
* This requirement may also be satisfied with BIOC 503 Biochemistry, Cell and Molecular Biology (five credit hours).	
** This requirement may also be satisfied, under certain circumstances, with MICR 608 or MICR 609 Introduction to Microbiology and Immunology Research (three credit hours; section 002). Consult with the program director.	

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the

student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Physiology and Biophysics, Master of Science (M.S.) with a concentration in molecular biology

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Physiology and Biophysics, Doctor of Philosophy (Ph.D.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 17	GRE, MCAT or DAT
Special requirements: Applications for the program must be submitted to the <b>Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D.</b> selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

#### General academic regulations for all graduate students in all graduate programs at VCU

### Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

### Degree requirements

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking, of which required course work is only one component. Each student's program is tailored to meet his or her particular interests, with the primary emphasis on developing research skills and the capacity for scholarship.

Opportunities for research experience begin in the first year, when students spend time working in several faculty laboratories of their choice. These lab rotations enable students to examine current faculty research projects and choose their areas of specialization. In the second and subsequent years, increasingly more time is devoted to independent research under the guidance of a faculty adviser.

Department-sponsored seminars give students opportunities to discuss their research interests with visiting scientists and many students present their work at national professional meetings.

The Ph.D. program in physiology and biophysics normally takes at least four years to complete. The first two years are devoted mainly to course work. The first year consists primarily of required courses, while the second is geared toward electives and research. On satisfactory completion of two years of course work, students must pass written and oral comprehensive examinations to qualify for degree candidacy. Following admission to candidacy, each student must conduct a substantial original research project, prepare a written dissertation and defend it successfully in an oral examination.

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 66 credit hours for the Ph.D., including directed research.

Courses	Credit hours
<b>Required courses</b>	<b>variable</b>
BIOC/MICR 503 Biochemistry, Cell and Molecular Biology (Note: This is a modular course; the full course is five credit	5

hours, but students may choose to take a subset of the modules for fewer hours.)

BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5
BIOC 691 Special Topics in Biochemistry (section-004 critical thinking) (Note: Another critical-thinking course may substitute for this requirement, e.g. HGEN 691 or IBMS 630.)	1
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5

PHIS 692 Special Topics (section-606: seminar for PHIS 606)	1
PHIS 695 Research in Progress (0.5 credit- hour course taken each fall and spring semester)	variable
Electives: Choose courses for a total of six credit hours from selected 500- and 600-level courses in physiology (PHIS) or other basic science departments (ANAT, BIOC, BIOS, HGEN, IBMS, MICR and PHTX) or other courses as approved by the program	6

<b>Directed research and additional courses</b>	<b>variable</b>
PHIS 697 Directed Research in Physiology (1-15 variable credit hour course) and other elective courses approved by the program to amass the required minimum of 66 credit hours	variable

<b>Total graduate credit hours required (minimum)</b>	<b>66</b>
---	-----------

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### Department handbook

Applicants and students may request a handbook with additional information, which is also summarized on the departmental website ([physiology.vcu.edu/education/phd](http://physiology.vcu.edu/education/phd)). Please feel free to contact the graduate program coordinator with any questions.

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

### Physiology and Biophysics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

#### Graduate program director

Gail E. Christie, Ph.D.

Professor, Department of Microbiology and Immunology

[christie@vcu.edu](mailto:christie@vcu.edu)

(804) 828-9093

Program website: [vcu.edu/mbg](http://vcu.edu/mbg)

Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.

Physiology and Biophysics, Doctor of Philosophy (Ph.D.)

Physiology and Biophysics, Master of Science (M.S.)

Physiology and Biophysics, Master of Science (M.S.) with a concentration in molecular biology and genetics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Physiology and Biophysics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, MCAT or DAT
Special requirements: MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs			
Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.			

In addition to the [general admission requirements of the VCU Graduate School](#), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred

3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 66 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>variable</b>
BIOC 503-504 Biochemistry, Cell and Molecular Biology	10
BIOC 602 Physical Properties of Macromolecules (modules 1 and 2)	2
IBMS 600 Laboratory Safety	1
IBMS 610 Laboratory Opportunities	0.5
IBMS 620 Laboratory/Clinical Rotations (two-credit course taken for three rotations)	6
IBMS 630 Critical Thinking (or BIOC 691 or HGEN 691 equivalents)	1
IBMS 680 Proposal Preparation	1
IBMS 690 Basic Health Sciences Research Seminar (first year only)	1
MICR 605 Prokaryotic Molecular Genetics	3
MICR 607 Techniques in Molecular Biology and Genetics	2

MICR 690 Microbiology Research Seminar (section 002 – MBG; one-credit course to be taken every semester beginning in the second year)	variable
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club - must take at least twice)	2
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1

### A course in eukaryotic molecular biology from the following list of approved options (or an approved alternative):

BIOC 605 Molecular Biology	3
HGEN 602 Genetic Models of Disease	3
HGEN 614 Pathogenesis of Human Genetic Disease	3
IBMS 635 Cellular Signaling	3
MICR 684 Molecular Biology of Cancer	3
PATH 670 Experimental Approaches to Tumor Biology	3

### Directed research and electives

Students will register for a variable number of credit hours of PHIS 697 Directed Research in Physiology and elective courses to amass the required minimum of 66 credit hours.

**Total graduate credit hours required (minimum)** **66**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The master's program in physiology and biophysics is designed to provide students with the skills required to advance to positions as physiology and bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of physiology and bioscience, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. **Problem-solving skills:** Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. **General knowledge of sciences:** Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. **Communication skills:** Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. **Oral communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. **Written communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. **Experimental design:** Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

The Department of Physiology and Biophysics offers courses of study leading to the Master of Science and the Doctor of Philosophy. A combined M.D./Ph.D. degree program also is available through this department and the School of Medicine. It is generally recommended that students intending to pursue careers as professional physiologists should attempt to earn the Ph.D. Work done in partial or complete fulfillment of the requirements for the master's degree may be applied toward the Ph.D. provided that it is of adequate quality.

Graduate education in physiology and biophysics is a highly individualized enterprise, of which the formal course requirements comprise only a portion. The degree program described here provides an opportunity for apprenticeship in research and, through this, the development of a capacity for scholarship. The essence of this type of education lies in the development of a close relationship between the student and the faculty adviser. The adviser and the student, jointly and with the approval of the department chair and the associate dean of medicine for graduate education, select the student's graduate advisory committee.

The M.S. degree program includes a year of course work (completed as part of the Certificate in Pre-medical Graduate Health Sciences program) and a second year largely devoted to the completion of an independent research project, writing a

thesis based on this work and a successful oral defense of this thesis and completed course work.

In addition to the general [VCU Graduate School graduation requirements](#), students must complete a minimum of 30 graduate credit hours for the M.S. in Physiology and Biophysics.

### Teaching experience

M.S. students also have the opportunity to acquire teaching experience and financial support by serving as teaching assistants for PHIZ 206 Human Physiology Laboratory for one semester. Teaching assistants must complete PHIS 691-501 Special Topics in Physiology: Physiology 501 Seminar (two credit hours) prior to or concurrent with the assistantship.

## Curriculum requirements

Courses	Credit hours
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct (online) or OVPR 603 Responsible Conduct of Research (hybrid)	1
PHIS 604 Cell Physiology: From Molecules to Organisms	3
PHIS 606-001 Cell Physiology: From Molecules to Organism	3
PHIS 690-901 Physiology Research Seminar	2
PHIS 692-606 Special Topics	1
PHIS 697-801 Directed Research in Physiology	20
<b>Total graduate credit hours required (minimum)</b>	<b>30</b>
Advanced optional elective courses available in the second year include:	
PHIS 612 Cardiovascular Physiology	3
PHIS 615 Signal Detection in Sensory Systems	3
PHIS 619 Mitochondrial Pathophysiology and Human Diseases	3
PHIS/PHTX 620 Ion Channels in Membranes	3
PHIS 630 Methods in Molecular Biophysics: A Practical Approach	2
PHIS 631 Electrophysiology and Photonic Methods	2
PHIS 691-003 Special Topics in Physiology	3

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

Physiology and Biophysics, Master of Science (M.S.) with a concentration in molecular biology and genetics			
<b>Degree:</b> M.S.	<b>Semester(s) of entry:</b> Fall	<b>Deadline dates:</b> Deadline date rolling, preference given to applications received by Jan 17	<b>Test requirements:</b> GRE; TOEFL for applicants whose native language is not English
<b>Special requirements:</b> Applications for the program should be submitted to <b>Molecular Biology and Genetics – M.S.</b> selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Physiology and Biophysics.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

### Research-intensive, non-thesis curriculum for medical students

Individuals who are participants in Doctor of Medicine program at VCU may be eligible for enrollment in research-intensive, non-thesis study in the program. Please contact the graduate program director for additional information.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

## Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
  - b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## Degree requirements

In addition to the general [VCU Graduate School graduation requirements](#), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

## Curriculum requirements

Courses	Credit hours
<b>Required core courses</b>	<b>19</b>
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function*	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism*	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology*	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/ Membranes and Bioenergetics*	1
IBMS 600 Laboratory Safety	1
IBMS 620 Laboratory/Clinical Rotations; sections 004 and 005** (two-credit course taken twice)	4
MICR/BIOC 504 Biochemistry, Cell and Molecular Biology	5
MICR 607 Techniques in Molecular Biology and Genetics	2
MICR 693 Topics in Molecular Biology and Genetics (MBG journal club, must take at least once)	1
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
<b>Other required course work</b>	<b>29</b>
PHIS 510 Mammalian Physiology (0.5-5 credit hours for a minimum of one credit hour)	1
Directed research and seminar	
MICR 690 Microbiology Research Seminar (section 002, MBG; one-credit course) (Note: Students must take a minimum of one credit hour of	variable

research seminar course work every fall and spring semester of enrollment in the program.)

MICR 697 Directed Research in Microbiology (Note: Students must take variable a minimum of one credit hour of directed research every semester of enrollment in the program after the first year of study.)

Students may take additional course work with the approval of their graduate program directors.

#### **Total graduate credit hours required (minimum) 48**

\* This requirement may also be satisfied with BIOC 503 Biochemistry, Cell and Molecular Biology (five credit hours).

\*\* This requirement may also be satisfied, under certain circumstances, with MICR 608 or MICR 609 Introduction to Microbiology and Immunology Research (three credit hours; section 002). Consult with the program director.

### **Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### **Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### **Degree candidacy requirements**

### **Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

### **Admission requirements**

#### **Pre-medical Graduate Health Sciences, Certificate in (Post-baccalaureate graduate certificate)**

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 1	GRE, MCAT or DAT TOEFL for international students

**Special requirements:** While there is no official deadline for applying to the certificate program, the school strongly recommends applicants have all of materials into the graduate admissions office by **July 1** to ensure that the file can be processed in time for the fall semester. The program has rolling admissions for a limited number of positions.

Applicants must meet all [general admission requirements of the VCU Graduate School](#).

### **VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### **General academic regulations for all graduate students in all graduate programs at VCU**

### **Program goal**

The pre-medical graduate health sciences certificate program in the School of Medicine provides an advanced level of didactic training in the biomedical sciences to enhance the preparation of students for a variety of career options,

particularly professional degree training (i.e. Ph.D., M.D. and D.D.S.). The program also provides the opportunity for the development of an informed approach to the admission process in professional and/or advanced degree training to enhance the prospect of advancement.

## Student learning outcomes

1. Achievement of a threshold competency in the basic health sciences: The candidate will achieve/surpass expectations of a threshold-level competency in the basic health sciences, particularly in areas related to gaining admission to professional and/or higher-level degree programs.
2. MCAT/DAT preparation: The candidate will be prepared to take and/or retake standardized tests. The candidate will achieve a score that fulfills medical or dental school admission requirements.
3. Preparation for career advancement: The candidate who meets the threshold competency objective will display an enhanced level of advancement to higher levels of professional and/or advanced degree training.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students must complete a minimum of 27 graduate credit hours of course work with a minimum GPA of 3.0 (4.0 scale), with no more than 20 percent of the total credit hours at the C or below level. The curriculum is composed of six required courses (15 credit hours) and 12 elective credit hours (including for-credit research options) spread over two semesters. The curriculum should be completed in one academic year (fall and spring semester).

Required and elective courses are drawn from departments within the School of Medicine: the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. All courses are held on the MCV Campus.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>15</b>
BIOC/MICR 504 Biochemistry, Cell and Molecular Biology	5
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function	2
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism	1
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology	1
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics	1
PHIS 501 Mammalian Physiology	5
<b>Electives</b>	<b>12</b>
ANAT 611 Histology	5
ANAT 612 Human Embryology	2
BIOL 530/HGEN 501 Human Genetics	3
BIOS/STAT 543 Statistical Methods I	3
HGEN 502 Advanced Human Genetics	3
IBMS 690 Basic Health Sciences Research Seminar (or department-specific 690 course) (Recommended for students planning to apply to the CERT/M.S. program)	1
MEDC 533 Pharmacognosy	2
MICR 505 Immunobiology	3
MICR 616 Mechanisms of Viral and Parasite Pathogens	3
NEUS 609 Cellular and Molecular Neuroscience	4
PHIS 512 Cardiac Function in Health and Disease	3
PHTX 548 Drug Dependence	3
PHTX 536 Principles of Pharmacology and Toxicology	5
XXXX 692 (department-specific topics: basic research)	3
XXXX 697 (department-specific directed research)	3

**Total graduate credit hours required (minimum)**

**27**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Other information

### Applying to professional school and advanced graduate degree programs

Students must follow admission guidelines for applications to the M.S., M.D., D.D.S. and other programs. Completion of the certificate program does not afford a guaranteed admission to professional training programs at VCU. Exceptional performance, 3.5 GPA and a 28 MCAT guarantees an interview at VCU School of Medicine. Similar criteria increase eligibility for an interview at the VCU School of Dentistry.

**Research option:** Upon completion of the one-year certificate program, individuals may apply for admission to advanced degree programs. Certificate students who are admitted to the M.S. degree (CERT/M.S.) will work closely with an individual faculty member on a research project in a particular department. CERT/M.S. students will choose a research seminar elective in their first year, which consists of one-time faculty presentations to inform students of research areas and laboratory opportunities. Research mentorship can begin in the first year, in conjunction with a spring or summer three-credit research rotation that counts toward the 27 credit hours required to graduate.

**Advising:** Students are encouraged to seek opportunities for academic, personal and professional development from the Division for Academic Success, Career Services and the CERT Program Office. For students who choose to take a year off between CERT and professional school, several School of Medicine professors hire students for research positions and area hospitals offer SCRIBE programs that actively recruit VCU graduates. The CERT Program Office can also help identify possibilities.

**Letters of reference:** The CERT program adviser will provide a letter of reference for professional school applications. Students must schedule an appointment to interview with the program adviser for a letter.

## Admission requirements

Public Health, Master of (M.P.H.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.H.	Fall	Jan 1 (strongly recommended)	GRE TOEFL

In addition to the [general admission requirements of the VCU Graduate School](#), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. GRE: Current GRE test results (taken within the past five years), with scores at or above the 75th percentile preferred in all components of the exam (i.e., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing).
3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement following these guidelines:
  - a. The document should be 1.5 or double-spaced with one-inch margins, in a font no smaller than 11 points.
  - b. The document should cover the following issues in two to five pages:
    - Description of the applicant's career goals
    - Why the applicant wishes to pursue an M.P.H. degree
    - How an M.P.H. degree will help the applicant achieve her/his career goals
    - Description of applicant's particular areas of interest in public health (e.g., maternal and child health, cancer epidemiology)
    - Why VCU's M.P.H. program best fits the student's public health interests
    - What applicant plans to do in the first few years after graduation

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate

programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The mission of the VCU M.P.H. program is to engage students in an experiential and learner-centered environment, collaborate with public health partners in Central Virginia to promote health equity and community wellness and foster lifelong inquiry and discovery in interdisciplinary, translational research that improves human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to positions as public health practitioners in a broad spectrum of positions and settings and who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

## Student learning outcomes

The M.P.H. program trains students to develop the following educational competencies, selected from the Association of Schools of Public Health's "Master's Degree in Public Health Core Competency Model," August 2006.

1. Biostatistics:
  - a. Describe the roles biostatistics serves in the discipline of public health
  - b. Describe basic concepts of probability, random variation and commonly used statistical probability distributions
  - c. Describe preferred methodological alternatives to commonly used statistical methods when assumptions are not met
  - d. Distinguish among the different measurement scales and the implications for selection of statistical methods to be used based on these distinctions
  - e. Apply descriptive techniques commonly used to summarize public health data
  - f. Apply common statistical methods for inference
  - g. Apply descriptive and inferential methodologies according to the type of study design for answering a particular research question

- h. Apply basic informatics techniques with vital statistics and public health records in the description of public health characteristics and in public health research and evaluation
  - i. Interpret results of statistical analyses found in public health studies
  - j. Develop written and oral presentations based on statistical analyses for both public health professionals and educated lay audiences
11. Environmental health sciences:
- a. Describe the direct and indirect human, ecological and safety effects of major environmental and occupational agents
  - b. Describe genetic, physiologic and psychosocial factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards
  - c. Describe federal and state regulatory programs, guidelines and authorities that control environmental health issues
  - d. Specify current environmental risk assessment methods
  - e. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety
  - f. Explain the general mechanisms of toxicity in eliciting a toxic response to various environmental exposures
  - g. Discuss various risk management and risk communication approaches in relation to issues of environmental justice and equity
8. Epidemiology:
- a. Identify key sources of data for epidemiologic purposes
  - b. Describe a public health problem in terms of magnitude, person, time and place
  - c. Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues
  - d. Apply the basic terminology and definitions of epidemiology
  - e. Calculate basic epidemiology measures
  - f. Communicate epidemiologic information to lay and professional audiences
  - g. Draw appropriate inferences from epidemiologic data
  - h. Evaluate the strengths and limitations of epidemiologic reports
9. Health policy and management:
- a. Identify the main components and issues of the organization, financing and delivery of health services and public health systems in the U.S.
  - b. Describe the legal and ethical bases for public health and health services
  - c. Discuss the policy process for improving the health status of populations
4. Social and behavioral sciences:
- a. Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice
  - b. Identify the causes of social and behavioral factors that affect health of individuals and populations
  - c. Describe steps and procedures for the planning, implementation and evaluation of public health programs, policies and interventions
  - d. Apply evidence-based approaches in the development and evaluation of social and behavioral science interventions
  - e. Apply ethical principles to public health program planning, implementation and evaluation
6. Communication and informatics:
- a. Describe how societal, organizational and individual factors influence and are influenced by public health communications
  - b. Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities
3. Diversity and culture:
- a. Describe the roles of history, power, privilege and structural inequality in producing health disparities

- b. Explain how professional ethics and practices relate to equity and accountability in diverse community settings
  - c. Differentiate among availability, acceptability and accessibility of health care across diverse populations
4. Leadership:
- a. Engage in dialogue and learning from others to advance public health goals
  - b. Demonstrate transparency, integrity and honesty in all actions
3. Public health biology:
- a. Apply biological principles to development and implementation of disease prevention, control or management programs
2. Professionalism:
- a. Apply basic principles of ethical analysis (e.g. the Public Health Code of Ethics, human rights framework, other moral theories) to issues of public health practice and policy
  - b. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision-making in public health
  - c. Apply the core functions of assessment, policy development and assurance in the analysis of public health problems and their solutions
  - d. Promote high standards of personal and organizational integrity, compassion, honesty and respect for all people
  - e. Distinguish between population and individual ethical considerations in relation to the benefits, costs and burdens of public health programs
  - f. Appreciate the importance of working collaboratively with diverse communities and constituencies (e.g. researchers, practitioners, agencies and organizations)
7. Program planning:
- a. Differentiate among goals, measurable objectives, related activities and expected outcomes for a public health program
  - b. Differentiate the purposes of formative, process and outcome evaluation

## Degree requirements

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. Public health works to prevent health problems in populations before these problems occur. The M.P.H. program provides a rigorous curriculum to help students develop the analytic and critical reasoning skills to improve population health. The program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in important projects.

In addition to general [VCU Graduate School graduation requirements](#), a minimum of 45 credit hours of formal course work is required, including

1. A practicum in year one
2. An internship, typically conducted in the summer between the first and second year
3. A 20-hour community-based learning experience
4. Attendance at public health seminars in years one and two
5. A capstone project planned and implemented in the second year of the program.

The M.P.H. program can be individualized to meet the varied needs and interests of students. The program offers many electives, allowing students to tailor the program to meet educational objectives, and it is flexible enough to accommodate students who enter the program with various backgrounds and experiences.

## Curriculum requirements

Courses	Credit hours
<b>Core courses</b>	<b>15</b>
BIOS 547 Applied Data Analysis in Public Health I	3
EPID 571 Principles of Epidemiology	3
EPID 604 Principles of Environmental Health	3

HCPR 601 Introduction to Health Policy	3
SBHD 605 Introduction to Social and Behavioral Health	3

#### **Program requirements** **9**

BIOS 548 Applied Data Analysis in Public Health II	3
EPID 547 Applied Data Analysis Lab I	1.5
EPID 548 Applied Data Analysis Lab II	1.5
EPID 580 Public Health Ethics	1
EPID 593 MPH Practicum	2

#### **Electives** **15**

Students take a minimum of 15 credit hours of elective course work selected according to the area(s) of interest in public health. These may include the following courses:

BIOS 571 Clinical Trials	3
EPID 600 Introduction to Public Health	3
EPID 601 Contemporary Issues and Controversies in Public Health	3
EPID 603 Public Health Policy and Politics	3
EPID 620 Cancer Epidemiology	3
EPID 622 Maternal and Child Health	3
EPID 624 Chronic Disease Epidemiology	3
EPID 646 Epidemiology of Psychiatric and Substance Use Disorders	3
EPID 648 Behavioral Epidemiology	3
SBHD 608 Health Communication	3
SBHD 632 Health Disparities and Social Justice	3
SBHD 636 Community-based Participatory Research	3

#### **Integrative program requirements** **6**

EPID 693 Public Health Internship	3
EPID 694 MPH Capstone Project	3

#### **Total graduate credit hours required (minimum)** **45**

**Public health internship:** The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student's progress. Students work a minimum of 180 hours in a professional public health organization.

**Capstone project:** The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student's academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report
3. Policy analysis report
4. Health promotion materials (e.g., brochures/posters/fliers, educational video games, website content, etc.) on a specific disease area
5. Needs assessment for a specific population
6. Development and implementation of target population surveys
7. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

#### **Non-didactic program requirements**

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

#### **Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

##### **Degree candidacy requirements**

#### **Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

##### **Graduation requirements**

 Pharmacy, Doctor of (Pharm.D.)/ Master of Science (M.S.) [combined]

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

The School of Pharmacy and the Division of Epidemiology in the Department of Family Medicine and Population Health in VCU's School of Medicine offer a dual-degree program through which students earn both Pharm.D. and M.P.H. degrees. This dual-degree program offers students the opportunity to achieve a Doctor of Pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend the fourth year of the Pharm.D. program pursuing the M.P.H. degree, after which they transition back to pharmacy for advanced practice experiences.

Students are required to take 36 of the 45 credits required for the M.P.H. The M.P.H. field study (internship) requirement will be satisfied by Pharm.D. special advanced practice experiences in community health during the fifth year of the program.

Students complete two credits of practical skills work during the P3 year, followed by full immersion in the M.P.H. curriculum in the P4 year. The required M.P.H. capstone project will be completed in a community setting during the P5 year; it will involve a comprehensive project that serves the needs of a professional public health organization and typically involves the development of one or more deliverables. Examples include a disease surveillance project, a needs assessment or program evaluation, or development of a comprehensive suite of patient health education or medication safety materials.

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of the curriculum for both programs.

<b>Total graduate credit hours required (minimum)</b>	<b>191</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

Social Work, Master of (M.S.W.) with a concentration in clinical practice  
Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice  
Social Work, Master of (M.S.W.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]  
Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [combined]  
Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [combined]  
Social Work, Master of (M.S.W.)/school social work practice certification [combined]  
Social Work, Master of (M.S.W.)/Juris Doctor (J.D.) with the University of Richmond [combined]  
Social Work, Master of (M.S.W.)/Divinity, Master of (M.Div.) from the Baptist

Theological Seminary at Richmond or the Samuel DeWitt Proctor School of Theology at Virginia Union University [combined]

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual-degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the Graduate Admissions Office and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual-degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study.

Students are required to complete a minimum of 45 M.S.W. credit hours and a minimum of 33 M.P.H. credit hours, for a total of 78 semester credit hours. In the M.P.H. program, this includes 24 credit hours of core and required courses, a minimum six credit hours of elective courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. During the third and last year of study, dual-degree students are placed in internships through the School of Social Work that focus on public health; the internship placement is approved by both the M.P.H. program director and the director of the M.S.W. field instruction. With adviser approval, the student may develop a capstone project based on work in this public health/social work placement.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.P.H. and M.S.W. degrees.

Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in neuromusculoskeletal dynamics

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology			
Degree: Ph.D.	Semester(s) of entry: Fall preferred	Deadline dates: Applications received prior to Jan 9 will be given priority consideration	Test requirements: GRE
Special requirements: Applications received following the deadline may be considered if space and resources are available.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must:

1. Have completed at least one of a master's degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
2. Provide official GRE score
3. Submit a curriculum vitae or professional resume indicating an applicant's educational and career experience as well as evidence of research potential

Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity's impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.

## Student learning outcomes

At the completion of the program students will:

1. Demonstrate teaching effectiveness in the classroom, clinical environment or both
2. Have disseminated research findings at an appropriate regional, national or international conference
3. Demonstrate the ability to independently collect research data, analyze research data and synthesize conclusions from research data

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:

1. A minimum of 50 credit hours developed in conjunction with their advisers
2. Written and oral comprehensive examinations
3. All other university requirements of qualification for degree candidacy
4. Written dissertation based on a focused line of research
5. Oral defense of the dissertation

However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

**Training to be social and behavioral scientists**

Students in the doctoral program in social and behavioral health will acquire the skills to become scientists, educators and scientists/administrators in a broad spectrum of positions and settings. Students will gain a progressive mastery of the current state of the subject matter in the social and behavioral sciences, an ability to synthesize the information and apply this foundation to the identification of key areas of investigation/experimentation and the ability to design and interpret studies that address the questions identified. In addition, students will develop the

various means of communicating core social and behavioral science knowledge and particular study designs, results and interpretations to a variety of audiences.

## Student learning outcomes

1. Analytical thinking: Students will demonstrate an appropriate level of ability to interpret information relevant to social and behavioral science, to connect rationales to procedures and evidence to findings, to draw reasonable conclusions, and to generate and evaluate alternate explanations.
2. Integrated knowledge of social and behavioral science: Students will demonstrate an appropriate level of knowledge of the current elements of the social and behavioral sciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique.
3. Oral communication skills: Students will demonstrate the achievement of an appropriate level of skill in the oral communication of social and behavioral science subject matter with respect to content, organization, logical flow, presentation, use of language and incorporation of visual aids in formal and collaborative communication.
4. Study design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement study protocols and to design and develop studies.
5. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, vocabulary and use of figures, tables and citations to effectively present social and behavioral science information.

## Degree requirements

The Ph.D. program in social and behavioral health, the only one of its kind in Virginia, prepares students to conduct theoretically based research and interventions on the social and behavioral determinants of health and disease. In addition to the general [VCU Graduate School graduation requirements](#), a minimum of 50 post-master's credit hours is required for the doctoral degree, which is expected to involve four years of full-time study. Requirements include 12 credit hours of courses in research methods, nine credit hours of courses in the behavioral and social sciences, one credit hour of responsible conduct of research, four credit hours of departmental seminar and at least six credit hours of elective courses that reflect a student's research interests. In addition, required research experience includes nine hours of applied research practicum and nine dissertation credit hours. Students who work as graduate research assistants for two years may substitute some or all of the nine credit hours of applied research practicum with electives.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114).

**VCU**

## **2014-15 Graduate and Professional Programs Bulletin**

---

**School of Nursing**

The School of Nursing originated in 1893 as part of the University College of Medicine. Since then, the educational program has evolved from a basic diploma program to multiple programs at the baccalaureate-, master's- and doctoral-degree levels. Additionally, the School of Nursing offers post-master's certificate programs. The School of Nursing takes pride in its long history of service to the profession of nursing and continues to be a leader in nursing education in Virginia.

## Administration

1100 East Leigh Street  
P.O. Box 980567  
Richmond, Virginia 23298-0567  
(804) 828-0724  
Fax: (804) 828-7743  
[www.nursing.vcu.edu](http://www.nursing.vcu.edu)

**Jean Giddens**  
Dean

**Ann B. Hamric**  
Associate Dean for Academic Programs

**Deborah B. McGuire**  
Associate Dean for Research

**David W. Allen**  
Associate Dean for Business and Administration

**Susan L. Lipp**  
Assistant Dean for Enrollment and Student Services

**Suzanne McGinnis**  
Director of Systems and Academic and Administrative Technology

**Carla Nye**  
Director of the Clinical Learning Center

## Accreditation

The baccalaureate and master's degree programs in nursing, as well as the post-master's certificate program, are accredited by the National League for Nursing Accrediting Commission, 3343 Peachtree Road NE, Suite 500, Atlanta, GA 30326. The undergraduate program is approved by the Virginia Board of Nursing, and graduates are eligible to take the NCLEX RN registered nurse licensing examination.

## Programs

The School of Nursing offers Bachelor of Science, Master of Science, Post-Master's Certificate and Doctor of Philosophy programs. Curricula and admissions information pertaining to all of these programs is available on this Web site and may be accessed using the Program search feature at the top of this page.

Further information may be obtained by visiting the School of Nursing Web site at [www.nursing.vcu.edu](http://www.nursing.vcu.edu) or by writing to Virginia Commonwealth University, School of Nursing, Office of Enrollment and Student Services, P.O. Box 980567, Richmond, VA 23298-0567.

## Facilities and resources

The faculty and administrative offices of the school are housed at 1100 E. Leigh St. Additionally, this building has a nursing clinical resource laboratory, computer laboratory and classrooms equipped with a full range of audiovisual equipment. Both graduate and undergraduate courses are also scheduled in other classrooms on campus.

The clinical laboratories for nursing courses are conducted at the VCU Medical Center and in numerous other urban and rural hospitals and health agencies in the area, including community medical centers and state hospitals, public health services, private clinics and offices, and federal and state centers and departments. These facilities provide generalized and specialized inpatient and ambulatory services. Students are given a range of diverse experiences in hospital and community-oriented nursing. Selection of specific facilities for student experience is based upon curricular and advanced-practice certification requirements, the educational needs of the individual student and the services available.

## School honors, scholarships and awards

Applications for financial assistance must be filed for all forms of financial assistance, including traineeships. A Free Application for Federal Student Aid may be obtained from the Office of Financial Aid, Virginia Commonwealth University, Richmond, VA 23298-0244.

Limited financial assistance is available through traineeships and scholarships administered by the School of Nursing. An application for financial assistance from School of Nursing sources will be made available to applicants and enrolled students. The school form must be completed in addition to the FAFSA submitted to the Office of Financial Aid.

## Departments

### Department of Adult Health and Nursing Systems

**Angela Starkweather**  
Associate Professor and Department Chair

### Department of Family and Community Health Nursing

**Leigh Small**  
Associate Professor and Department Chair

## Nursing courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to nursing ([NURS](#)) courses.

## Graduate information

### Nondegree-seeking students

Students who have not been admitted to a graduate program in nursing may be admitted to individual courses. Permission to register for courses is granted at the discretion of the School of Nursing. Only six credits earned as a nondegree-seeking student can be applied to the master's degree. Only three credits may be earned by post-master's students prior to admission.

### Enrollment

Students may begin study during the fall semester. Students will have an academic adviser appointed and will follow the standard program of study. Once admitted, students are expected to abide by enrollment policies of the Graduate School.

### Transfer credit

Students may take 12 of the required credits for the respective program at another institution and transfer them to VCU. The School of Nursing will determine the acceptability of courses for transfer credit. Transcript evidence and description of courses are required for review of transfer credit.

**Nursing, Certificate in (Post-master's certificate) with a concentration in adult-gerontology acute care nurse practitioner**

### Program accreditation

Accreditation Commission for Education in Nursing

### Graduate program director

Ann B. Hamric, Ph.D., R.N., F.A.A.N.  
Professor and associate dean of academic programs  
[abhamric@vcu.edu](mailto:abhamric@vcu.edu)  
(804) 828-3968

### Additional contact

Refer to the [program search function of the online VCU Bulletins](#) for a complete listing of all programs, concentrations and related curricular options.

Nursing, Certificate in (Post-master's certificate) with a concentration in adult-gerontology primary care nurse practitioner

Nursing, Certificate in (Post-master's certificate) with a concentration in family nurse practitioner

Nursing, Certificate in (Post-master's certificate) with a concentration in nursing administration and leadership

Nursing, Certificate in (Post-master's certificate) with a concentration in psychiatric-mental health nurse practitioner

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Nursing, Certificate in (Post-master's certificate) with a concentration in adult-gerontology acute care nurse practitioner			
Degree: Certificate	Semester(s) of entry: Fall	Deadline dates: Mar 15	Test requirements: None
Special requirements: A personal interview may be requested.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must:

1. Have a master's or doctoral degree in nursing from a U.S. program accredited by ACEN or CCNE or an international equivalent [Applicants to the post-master's certificate nurse practitioner concentrations must hold a master's or doctoral degree as an advanced practiced registered nurse (NP or CNS) from an accredited (ACEN or CCNE) program.]
2. Have a current unencumbered R.N. license or an authorization to practice as an R.N. in Virginia, the District of Columbia or a U.S. possession or territory
3. Submit three references from the applicant's graduate program and from employers/supervisors
4. Complete the electronic submission of the online [VCU Graduate Application](#), School of Nursing supplemental application materials and all required documents by the listed deadline

**Note:** A personal interview may be requested.

When an individual is admitted, an evaluation of the transcript is completed. Each required course in the relevant concentration is compared to the entering student's transcript. Upon admission, the school determines whether those course objectives have been fully or partially met in prior master's or doctoral work. Prior courses that are accepted as evidence of full or partial completion are listed on the individual plan of study. This plan will be signed by the entering student and the adviser before the individual actually enrolls. Thus, the plan of study is agreed upon in advance.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

General academic regulations for  
all graduate students in all graduate programs at VCU

## Program goals

The mission of the School of Nursing is to improve health and the human condition through leadership in nursing research, education and service. Therefore we will:

1. Sustain our tradition of leadership in educational excellence by preparing future scholars and leaders for nursing and health care
2. Be a nationally influential center in the development, translation and dissemination of science in biobehavioral clinical research
3. Be a national model for collaboration and partnerships between nursing education and nursing service in academic medical centers
4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

Ranked in the top 10 percent of graduate nursing programs by U.S. News and World Report, the VCU School of Nursing post-master's degree program provides a world-class learning experience that prepares nurses to become leaders in advanced nursing practice. The post-master's program provides nurses with a solid foundation in the specialized knowledge and advanced practice skills that are needed to care for diverse patient populations with complex health problems across the health-illness continuum. In addition, students partner with interprofessional groups to develop expertise in team-based, patient-centered health care, while also gaining valuable leadership and collaborative skills. The curriculum at VCU prepares graduates who can engage in transformative nursing, not only as leaders who are committed to nursing excellence, but also as practitioners who are committed to the health and well-being of the patients they serve.

VCU School of Nursing offers both direct and indirect patient care concentrations. Our direct patient care concentrations include adult-gerontology acute care NP, adult-gerontology primary care NP, family NP, and psychiatric-mental health NP. One indirect patient care concentration is offered in nursing administration and leadership.

## Student learning outcomes

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

## Adult-gerontology acute care nurse practitioner concentration

Students in the adult-gerontology acute care nurse practitioner concentration will develop the advanced knowledge and skills needed to manage acutely ill patients through all phases of their hospitalization and post-hospitalization follow-up. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of

evidence-based treatment strategies. Graduates of the VCU School of Nursing ACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The adult-gerontology acute care nurse practitioner generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

## Degree requirements

Twenty-six graduate credit hours are required for the post-master's certificate in nursing with a concentration in adult-gerontology acute care nurse practitioner.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

### Adult-gerontology primary care nurse practitioner concentration

The VCU School of Nursing adult-gerontology primary care nurse practitioner concentration prepares nurses to diagnose and manage common acute and chronic health problems in adults, ranging from adolescents to the elderly, through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The PCNP role focuses on the provision of advanced independent nursing care integrated with delegated medical diagnostic and management activities. The PCNP has a practice located in an ambulatory care setting and focuses on health promotion, risk reduction and evidence-based primary care to individual patients.

## Degree requirements

Twenty-two graduate credit hours are required for the post-master's certificate in nursing with a concentration in adult-gerontology primary care nurse practitioner.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

### Family nurse practitioner concentration

For registered nurses interested in providing primary health care to patients of all ages, the family nurse practitioner program offers a flexible and rewarding career path. First launched as a certificate program in 1974, the VCU School of Nursing FNP concentration within the Post-master's Certificate in Nursing program prepares graduates to assess, diagnose and manage common health problems as well as maximize the health and well-being of individuals and families across the

life span. Using comprehensive physical and psychosocial assessments, diagnostic reasoning, advanced-practice skills and procedures, and evidence-based treatment strategies, VCU School of Nursing graduates with the FNP concentration are prepared to provide direct care to individuals and families in a variety of primary care settings.

Students who successfully complete the FNP concentration within the post-master's certificate program are eligible to apply for certification as a family nurse practitioner by both national certifying bodies: the American Nurses Credentialing Center and the American Academy of Nurse Practitioners.

### Degree requirements

Twenty-seven graduate credit hours are required for the Post-master's Certificate in Nursing with a concentration in family nurse practitioner.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Curriculum requirements

Courses	Credit hours
Students in nurse practitioner certification concentrations are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses.	
NURS 611 Primary Care Advanced Practice Clinical Procedures	1
NURS 627 Foundational Perspectives of Family-centered Care	2
NURS 629 Common Health Problems in Primary Care Across the Lifespan I	4
NURS 630 Common Health Problems in Primary Care Across the Lifespan II	4
NURS 631 Primary Care of Select Populations	2
NURS 643 Family Primary Care Practicum I	6
NURS 644 Family Primary Care Seminar	1
NURS 645 Family Primary Care Practicum II	6
NURS 646 Family Primary Care Final Synthesis	1
<b>Total graduate credit hours required (minimum)</b>	<b>60</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Admission requirements

### Nursing, Certificate in (Post-master's certificate) with a concentration in nursing administration and leadership

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 15	None

#### Special requirements:

A personal interview may be requested.

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must:

1. Have a master's or doctoral degree in nursing from a U.S. program accredited by ACEN or CCNE or an international equivalent [Applicants to the post-master's certificate nurse practitioner concentrations must hold a master's or doctoral degree as an advanced practiced registered nurse (NP or CNS) from an accredited (ACEN or CCNE) program.]

2. Have a current unencumbered R.N. license or an authorization to practice as an R.N. in Virginia, the District of Columbia or a U.S. possession or territory
3. Submit three references from the applicant's graduate program and from employers/supervisors
4. Complete the electronic submission of the online [VCU Graduate Application](#), School of Nursing supplemental application materials and all required documents by the listed deadline

**Note:** A personal interview may be requested.

When an individual is admitted, an evaluation of the transcript is completed. Each required course in the relevant concentration is compared to the entering student's transcript. Upon admission, the school determines whether those course objectives have been fully or partially met in prior master's or doctoral work. Prior courses that are accepted as evidence of full or partial completion are listed on the individual plan of study. This plan will be signed by the entering student and the adviser before the individual actually enrolls. Thus, the plan of study is agreed upon in advance.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The mission of the School of Nursing is to improve health and the human condition through leadership in nursing research, education and service. Therefore we will:

1. Sustain our tradition of leadership in educational excellence by preparing future scholars and leaders for nursing and health care
2. Be a nationally influential center in the development, translation and dissemination of science in biobehavioral clinical research
3. Be a national model for collaboration and partnerships between nursing education and nursing service in academic medical centers
4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

Ranked in the top 10 percent of graduate nursing programs by U.S. News and World Report, the VCU School of Nursing post-master's degree program provides a world-class learning experience that prepares nurses to become leaders in advanced nursing practice. The post-master's program provides nurses with a solid foundation in the specialized knowledge and advanced practice skills that are needed to care for diverse patient populations with complex health problems across the health-illness continuum. In addition, students partner with interprofessional groups to develop expertise in team-based, patient-centered health care, while also gaining valuable leadership and collaborative skills. The curriculum at VCU prepares graduates who can engage in transformative nursing, not only as leaders who are committed to nursing excellence, but also as

practitioners who are committed to the health and well-being of the patients they serve.

VCU School of Nursing offers both direct and indirect patient care concentrations. Our direct patient care concentrations include adult-gerontology acute care NP, adult-gerontology primary care NP, family NP, and psychiatric-mental health NP. One indirect patient care concentration is offered in nursing administration and leadership.

## Student learning outcomes

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

## Nursing administration and leadership concentration

For advanced practice registered nurses interested in a leadership role in a health care organization, the nursing administration and leadership concentration offers a flexible and rewarding career path. Over the past three decades, this concentration has gained a reputation for educating some of the nation's top nursing leaders.

With a vision of shaping the future of health care through innovative nursing leadership, the NAL concentration prepares nurses to play an essential systems-level role in promoting and sustaining high-quality and safe patient care. Students gain advanced knowledge and skills in the areas of leadership, administration, management, health care finance, budgeting, outcomes management and evidence-based organizational practices in health care.

Students who successfully complete the NAL concentration within the certificate program are prepared to succeed in a nursing leadership position and are eligible, depending on employment role, to apply for several different nursing administration certification exams offered through the American Nurses Credentialing Center of the American Nurses Association or the American Organization of Nurse Executives.

## Degree requirements

Twenty-eight graduate credit hours are required for the Post-master's Certificate in Nursing with a concentration in nursing administration and leadership.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation

#### Psychiatric-mental health nurse practitioner concentration

The psychiatric-mental health nurse practitioner concentration prepares graduates for roles as nurse practitioners in psychiatric-mental health nursing. This concentration focuses on psychopharmacologic and psychotherapeutic management and treatment of common mental health problems and psychiatric disorders seen across the lifespan. Graduates use evidence-based guidelines to assess and intervene in response to the psychiatric, psychosocial and psychoeducational needs of individuals, families and groups. Students who successfully complete the psychiatric-mental health nurse practitioner program are eligible to apply for the psychiatric and mental health nurse practitioner certification exam administered by the American Nurses Credentialing Center. Psychiatric-mental health nurse practitioners are prepared to diagnose and treat individuals with psychiatric and/or substance abuse disorders, as well as address the mental health problems that often go along with medical illness.

#### Degree requirements

Twenty-three graduate credit hours are required for the Post-master's Certificate in Nursing with a concentration in psychiatric-mental health nurse practitioner.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Admission requirements

Nursing, Doctor of Philosophy (Ph.D.)			
Degree: Ph.D.	Semester(s) of entry: Fall, odd years (part-time and B.S.-Ph.D. students) Fall, even years (full- and part-time students)	Deadline dates: Feb 1  Note: Applications may be accepted after the deadline on a space-available basis.	Test requirements: GRE
Special requirements: A personal interview is required			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must present:

1. Both a baccalaureate and a master's degree, one of which must be in nursing (The degree in nursing must be from an NLNAC- or CCNE-accredited school or international equivalent.)
2. Minimum GPA of 3.0 on a 4.0 scale
3. Minimum total Graduate Record Exam score of 800 on verbal and quantitative
4. Three-credit undergraduate-level statistics course or equivalent with a passing grade of B or better
5. Licensure as an R.N. (International applicants must have an equivalent credential.)

Applicants must complete and submit the following materials:

1. A VCU application for graduate studies ([Application forms and instructions for applying](#) to all graduate programs are available on the Graduate Admissions website.)
2. Official transcripts from all previous universities and colleges attended for all graduate and undergraduate work
3. Official GRE score report
4. A typed personal statement, thoughtfully and scholarly answering the following questions:
  - a. What are your career goals, and how do you see this doctoral program contributing to meeting them?
  - b. Within your particular area of interest, identify some problems you see as offering promise for research.
  - c. What particular strengths do you believe you bring to this program that would enrich the learning environment of your peers?
  - d. What do you perceive as major contemporary issues in nursing, and what are your views on at least one of them?
  - e. Identify one or two potential advisers from the School of Nursing Ph.D. faculty who may be a good match for your research interests, and provide a rationale for your choice.
6. A resume that includes name and address, past educational degrees, past work experiences, professional affiliations, certifications, honors and awards, presentations, and publications
7. References from three persons who can knowledgeably comment upon applicant's ability to succeed in an academic program (e.g., former faculty) or who can evaluate applicant's ability to be successful in nursing research (Avoid references from ministers or others who are not familiar with professional and academic abilities; from friends, either professional or personal; or from personal health care providers.)

**Note:** A personal interview is required.

School of Nursing B.S. graduates of the VCU Honors College are eligible for automatic admission to the master's program or the post-B.S. to Ph.D. program upon submission of an application form and personal statement. Requirements for GRE scores and references are waived.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The mission of the School of Nursing is to improve health and the human condition through leadership in nursing research, education and service. Therefore we will:

1. Sustain our tradition of leadership in educational excellence by preparing future scholars and leaders for nursing and health care
2. Be a nationally influential center in the development, translation and dissemination of science in biobehavioral clinical research
3. Be a national model for collaboration and partnerships between nursing education and nursing service in academic medical centers
4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

The goal of the doctoral program in nursing is the preparation of scholars to develop knowledge in the discipline of nursing. The program examines knowledge development in nursing through an understanding of the impact of a wide range of historical influences on the discipline and through analysis of how emerging societal issues influence knowledge development. Knowledge in the humanities and social sciences and an understanding of knowledge development in other disciplines is viewed as foundational to a full understanding of knowledge development in nursing. Methodologic competency (i.e., knowledge of research designs, methodologies and tools) is also essential to a full understanding of the scope, range and path of knowledge development and the relevance to nursing practice.

The VCU School of Nursing has enhanced its Ph.D. program by incorporating a hybrid instructional format. The program includes a combination of online courses and traditional classroom experiences to offer students a dynamic, interactive learning experience that will prepare them to become nurse scholars and scientists. This format is designed to expand the Ph.D. program's reach to a wider range of highly motivated, independent students who aspire to become scholars, make a significant difference in the field of nursing and study with nationally recognized nurse scientists who conduct biobehavioral clinical research.

## Student learning outcomes

The VCU Ph.D. program prepares students to become teacher-scholars or pioneering researchers committed to the highest ideals of nursing excellence. Program activities are designed to be consistent with the School of Nursing's mission to improve health and the human condition through leadership in nursing research, education and service. With a research focus on biobehavioral approaches to symptom management, the Ph.D. program prepares graduates for lifelong scholarship and innovation in nursing.

At the completion of the doctoral program, the student will be able to:

1. Apply, transmit and generate knowledge in the discipline of nursing
2. Construct, test and modify theories for nursing in the context of social, ethical, scientific, cultural and economic influences
3. Analyze and synthesize knowledge from related disciplines for use in nursing
4. Exhibit scientific integrity in scholarly inquiry
5. Engage in interdisciplinary collaboration in knowledge development and dissemination

## Degree requirements

A minimum of sixty-one graduate credit hours are required for the Ph.D. in Nursing program.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the doctoral degree in nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled, all fees to the university have been paid and electronic copies of the dissertation have been submitted. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

### Electives

\*Choose courses designed to support the area of study.

NEXus cluster courses (NEXS 600, 601, 602, 603, 604, 605, 606, 607, 608, 609, 610, 611, 612, 613, 614, 615)

NURS 792 Directed Study in Nursing

NURS 796 Directed Research

Other courses approved by your adviser

### Comprehensive examination requirements

The purpose of the comprehensive examination is to test synthesis of foundational knowledge in preparation for launching a program of scholarship as a beginning scientist. Three knowledge domains are critical: a) theory and philosophy, b) qualitative and c) quantitative methodological approaches. The student's area of study is incorporated into these three domains. The comprehensive exam consists of two components, a written and an oral component, both of which must be passed. The oral exam will be conducted with the student either in person or via video conference.

### Dissertation requirements

The student must conduct a substantial independent investigation and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. Satisfactory completion of the comprehensive examination and a satisfactory oral defense of the dissertation proposal are required prior to commencement of actual work outlined in the proposal. Once approved, the dissertation proposal is similar to a formal contract between the student and dissertation committee about the nature of the dissertation.

The dissertation committee must consist of a minimum of four members. A member of the graduate faculty of the School of Nursing who has an established program of research and prior experience on dissertation committees must chair a student's dissertation committee. Other committee members must include one faculty member from the student's focus area and one member from outside the School of Nursing. The dissertation committee is approved by the associate dean for academic programs in the School of Nursing. An oral defense of the dissertation is conducted by the student's dissertation committee. The student is responsible for preparing the dissertation in accordance with the most current version of the [Graduate School Thesis and Dissertation Manual](#).

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Admission requirements

### Nursing, Master of Science (M.S.) with a concentration in adult-gerontology acute care nurse practitioner

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 15	GRE scores are required if cumulative undergraduate GPA is less than 3.25

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must:

1. Be eligible for readmission or in good standing at the last college attended
2. Have a baccalaureate degree in nursing from a U.S. ACEN- or CCNE-accredited program or an international equivalent
3. Have a current unencumbered R.N. license or an authorization to practice as an R.N. in Virginia, the District of Columbia, or a U.S. possession or territory
4. Have a minimum cumulative GPA of 2.7 on all college course work
5. Complete an undergraduate statistics course
6. Provide GRE scores if cumulative undergraduate GPA is less than 3.25
7. Submit online VCU Graduate Application (electronically), School of Nursing supplemental application materials and all required documents by posted deadline

School of Nursing B.S. graduates of the VCU Honors College are eligible for automatic admission to the master's program or the post-B.S. to Ph.D. program upon submission of an application form and personal statement. Requirements for GRE scores and references are waived.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The mission of the School of Nursing is to improve health and the human condition through leadership in nursing research, education and service. Therefore we will:

1. Sustain our tradition of leadership in educational excellence by preparing future scholars and leaders for nursing and health care
2. Be a nationally influential center in the development, translation and dissemination of science in biobehavioral clinical research
3. Be a national model for collaboration and partnerships between nursing education and nursing service in academic medical centers
4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

Ranked in the top 10 percent of graduate nursing programs by U.S. News and World Report, the VCU School of Nursing master's degree program provides a world-class learning experience that prepares nurses to become leaders in advanced nursing practice. The master's program provides nurses with a solid foundation in the specialized knowledge and advanced practice skills that are needed to care for diverse patient populations with complex health problems across the health-illness continuum. In addition, students partner with interprofessional groups to develop expertise in team-based, patient-centered health care, while also gaining valuable leadership and collaborative skills. The curriculum at VCU prepares graduates who can engage in transformative nursing, not only as leaders who are committed to nursing excellence, but also as practitioners who are committed to the health and well-being of the patients they serve.

VCU School of Nursing offers both direct and indirect patient care concentrations. Our direct patient care concentrations include adult-gerontology acute care NP, adult-gerontology primary care NP, family NP, and psychiatric-mental health NP. One indirect patient care concentration is offered in nursing administration and leadership.

## Student learning outcomes

Master's students will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

#### Adult-gerontology acute care nurse practitioner concentration

Students in the adult-gerontology acute care nurse practitioner concentration will develop the advanced knowledge and skills needed to manage acutely ill patients through all phases of their hospitalization and post-hospitalization follow-up. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies. Graduates of the VCU School of Nursing ACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The adult-gerontology acute care nurse practitioner generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

### Degree requirements

**Forty-eight graduate credit hours are required for the adult-gerontology acute care nurse practitioner concentration.**

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

### Adult-gerontology primary care nurse practitioner concentration

The VCU School of Nursing adult-gerontology primary care nurse practitioner concentration prepares nurses to diagnose and manage common acute and chronic health problems in adults, ranging from adolescents to the elderly, through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and

procedures, and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The PCNP role focuses on the provision of advanced independent nursing care integrated with delegated medical diagnostic and management activities. The PCNP has a practice located in an ambulatory care setting and focuses on health promotion, risk reduction and evidence-based primary care to individual patients.

## Degree requirements

Forty-five graduate credit hours are required for the adult-gerontology primary care nurse practitioner concentration.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

Ranked in the top 10 percent of graduate nursing programs by U.S. News and World Report, the VCU School of Nursing master's degree program provides a world-class learning experience that prepares nurses to become leaders in advanced nursing practice. The master's program provides nurses with a solid foundation in the specialized knowledge and advanced practice skills that are needed to care for diverse patient populations with complex health problems across the health-illness continuum. In addition, students partner with interprofessional groups to develop expertise in team-based, patient-centered

health care, while also gaining valuable leadership and collaborative skills. The curriculum at VCU prepares graduates who can engage in transformative nursing, not only as leaders who are committed to nursing excellence, but also as practitioners who are committed to the health and well-being of the patients they serve.

VCU School of Nursing offers both direct and indirect patient care concentrations. Our direct patient care concentrations include adult-gerontology acute care NP, adult-gerontology primary care NP, family NP, and psychiatric-mental health NP. One indirect patient care concentration is offered in nursing administration and leadership.

### **Student learning outcomes**

Master's students will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

### **Family nurse practitioner concentration**

For registered nurses interested in providing primary health care to patients of all ages, the family nurse practitioner program offers a flexible and rewarding career path. First launched as a certificate program in 1974, the VCU School of Nursing FNP concentration within the Post-master's Certificate in Nursing program prepares graduates to assess, diagnose and manage common health problems as well as maximize the health and well-being of individuals and families across the life span. Using comprehensive physical and psychosocial assessments, diagnostic reasoning, advanced-practice skills and procedures, and evidence-based treatment strategies, VCU School of Nursing graduates with the FNP concentration are prepared to provide direct care to individuals and families in a variety of primary care settings.

Students who successfully complete the FNP concentration within the master's program are eligible to apply for certification as a family nurse practitioner by both national certifying bodies: the American Nurses Credentialing Center and the American Academy of Nurse Practitioners.

### **Degree requirements**

Fifty-five credit hours are required for the family nurse practitioner concentration.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation

5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Graduation requirements

## Admission requirements

Nursing, Master of Science (M.S.) with a concentration in nursing administration and leadership			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 15	GRE scores are required if cumulative undergraduate GPA is less than 3.25
	Spring	Sep 15	

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must:

1. Be eligible for readmission or in good standing at the last college attended
2. Have a baccalaureate degree in nursing from a U.S. ACEN- or CCNE-accredited program or an international equivalent
3. Have a current unencumbered R.N. license or an authorization to practice as an R.N. in Virginia, the District of Columbia, or a U.S. possession or territory
4. Have a minimum cumulative GPA of 2.7 on all college course work
5. Complete an undergraduate statistics course
6. Provide GRE scores if cumulative undergraduate GPA is less than 3.25
7. Submit online VCU Graduate Application (electronically), School of Nursing supplemental application materials and all required documents by posted deadline

School of Nursing B.S. graduates of the VCU Honors College are eligible for automatic admission to the master's program or the post-B.S. to Ph.D. program

upon submission of an application form and personal statement. Requirements for GRE scores and references are waived.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The mission of the School of Nursing is to improve health and the human condition through leadership in nursing research, education and service. Therefore we will:

1. Sustain our tradition of leadership in educational excellence by preparing future scholars and leaders for nursing and health care
2. Be a nationally influential center in the development, translation and dissemination of science in biobehavioral clinical research
3. Be a national model for collaboration and partnerships between nursing education and nursing service in academic medical centers
4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

Ranked in the top 10 percent of graduate nursing programs by U.S. News and World Report, the VCU School of Nursing master's degree program provides a world-class learning experience that prepares nurses to become leaders in advanced nursing practice. The master's program provides nurses with a solid foundation in the specialized knowledge and advanced practice skills that are needed to care for diverse patient populations with complex health problems across the health-illness continuum. In addition, students partner with interprofessional groups to develop expertise in team-based, patient-centered health care, while also gaining valuable leadership and collaborative skills. The curriculum at VCU prepares graduates who can engage in transformative nursing, not only as leaders who are committed to nursing excellence, but also as practitioners who are committed to the health and well-being of the patients they serve.

VCU School of Nursing offers both direct and indirect patient care concentrations. Our direct patient care concentrations include adult-gerontology acute care NP, adult-gerontology primary care NP, family NP, and psychiatric-mental health NP. One indirect patient care concentration is offered in nursing administration and leadership.

### Student learning outcomes

Master's students will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology

4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

### Nursing administration and leadership concentration

For registered nurses interested in a leadership role in a health care organization, the nursing administration and leadership concentration offers a flexible and rewarding career path. Over the past three decades, this concentration has gained a reputation for educating some of the nation's top nursing leaders. With a vision of shaping the future of health care through innovative nursing leadership, the NAL concentration prepares nurses to play an essential systems-level role in promoting and sustaining high-quality and safe patient care. Students gain advanced knowledge and skills in the areas of leadership, administration, management, health care finance, budgeting, outcomes management and evidence-based organizational practices in health care.

Students who successfully complete the NAL concentration within the master's program are prepared to succeed in a nursing leadership position and are eligible, depending on employment role, to apply for several different nursing administration certification exams offered through the American Nurses Credentialing Center of the American Nurses Association or the American Organization of Nurse Executives.

## Degree requirements

Thirty-seven graduate credit hours are required for the nurse administration and leadership concentration.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goals

The mission of the School of Nursing is to improve health and the human condition through leadership in nursing research, education and service. Therefore we will:

1. Sustain our tradition of leadership in educational excellence by preparing future scholars and leaders for nursing and health care
2. Be a nationally influential center in the development, translation and dissemination of science in biobehavioral clinical research
3. Be a national model for collaboration and partnerships between nursing education and nursing service in academic medical centers
4. Be a national model for clinical scholarship (development and dissemination) in the use of simulation, technology and innovation for best practices in education and practice
5. Provide services that benefit the profession and promote the health and well-being of diverse individuals, families and communities

Ranked in the top 10 percent of graduate nursing programs by U.S. News and World Report, the VCU School of Nursing master's degree program provides a world-class learning experience that prepares nurses to become leaders in advanced nursing practice. The master's program provides nurses with a solid foundation in the specialized knowledge and advanced practice skills that are needed to care for diverse patient populations with complex health problems across the health-illness continuum. In addition, students partner with interprofessional groups to develop expertise in team-based, patient-centered health care, while also gaining valuable leadership and collaborative skills. The curriculum at VCU prepares graduates who can engage in transformative nursing, not only as leaders who are committed to nursing excellence, but also as practitioners who are committed to the health and well-being of the patients they serve.

VCU School of Nursing offers both direct and indirect patient care concentrations. Our direct patient care concentrations include adult-gerontology acute care NP, adult-gerontology primary care NP, family NP, and psychiatric-mental health NP. One indirect patient care concentration is offered in nursing administration and leadership.

## Student learning outcomes

Master's students will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Graduates will be able to:

1. Demonstrate core competencies in their advanced practice specialties
2. Integrate nursing and related sciences into the delivery of advanced nursing care to diverse populations and systems of health care delivery
3. Apply ethical analysis and clinical reasoning to assess, intervene and evaluate advanced nursing care delivery
4. Understand the implications of social, cultural, economic, policy and organizational systems that impact practice and outcomes
5. Synthesize evidence for practice to determine appropriate application of interventions across diverse populations and settings
6. Use quality processes and improvement science to evaluate care and ensure patient safety for individuals, populations and systems
7. Integrate organizational science and technology to make changes in the care environment to improve health outcomes and practice efficiency

### Psychiatric-mental health nurse practitioner concentration

The psychiatric-mental health nurse practitioner concentration prepares graduates for roles as nurse practitioners in psychiatric-mental health nursing. This concentration focuses on psychopharmacologic and psychotherapeutic management and treatment of common mental health problems and psychiatric disorders seen across the lifespan. Graduates use evidence-based guidelines to

assess and intervene in response to the psychiatric, psychosocial and psychoeducational needs of individuals, families and groups. Students who successfully complete the psychiatric-mental health nurse practitioner program are eligible to apply for the psychiatric and mental health nurse practitioner certification exam administered by the American Nurses Credentialing Center. Psychiatric-mental health nurse practitioners are prepared to diagnose and treat individuals with psychiatric and/or substance abuse disorders, as well as address the mental health problems that often go along with medical illness.

## Degree requirements

Forty-seven graduate credit hours are required for the psychiatric-mental health nurse practitioner concentration.

In addition to [general VCU Graduate School graduation requirements](#), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## **2014-15 Graduate and Professional Programs Bulletin**

---

**School of Pharmacy**

The School of Pharmacy was established officially in 1898; the University College of Medicine had a school of pharmacy when it opened in 1893. The two-year curriculum gave way to a three-year program in 1925, and in 1932 the school required four years of college work and a Bachelor of Science degree was awarded. In 1960, the program lengthened to a five-year course leading to a Bachelor of Science in Pharmacy degree. In 1975, authority was granted to offer to selected students a six-year program leading to the Doctor of Pharmacy degree and this program was adopted as the only professional offering by the school in 1995. The School of Pharmacy currently enrolls students in a four-year professional Doctor of Pharmacy program curriculum following completion of at least three years of pre-professional studies taken at VCU or elsewhere. In 1996 a part-time program was offered that permits current Bachelor of Science in Pharmacy degree holders to earn the Doctor of Pharmacy degree in a nontraditional format requiring students to come to campus infrequently. This program is in the process of being phased out and no longer accepts students for enrollment. Since 1971, all pharmacy students have participated in a clerkship program (now referred to as advanced pharmacy practice experiences) during the final year of the curriculum. Beginning 2008, the school added introductory pharmacy practice experiences during the first three years of the program to gradually transition the student from the academic classroom setting into the practice arena. Students spend their final year in a variety of practice settings under the supervision of highly qualified faculty preceptors.

The authority to award graduate degrees in the pharmaceutical sciences was granted by the Graduate Council in 1952. Departments in the school have the responsibility for administering a graduate program leading to the M.S. and Ph.D. in Pharmaceutical Sciences. This program includes areas of specialization in medicinal chemistry, pharmaceuticals, pharmacotherapy and pharmacy administration. These programs provide the preparation and research experience for academic, governmental and industrial careers. Graduate degrees in pharmaceutical sciences do not provide eligibility for licensure as a pharmacist.

Students may elect to pursue a joint Pharm.D./M.S., Pharm.D./Ph.D., Pharm.D./M.B.A. or Pharm.D./M.P.H. program. Such students must apply to, and be accepted by, both programs separately.

## Accreditation and Complainant policy

### Pharmacy (Pharm.D.) accreditation

The Doctor of Pharmacy degree program at the Virginia Commonwealth University School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), 20 N. Clark St., Suite 2500, Chicago, IL 60602-5109. Accreditation standards are available in the school's Office of Admissions and Student Services and via the ACPE website at [www.acpe-accredit.org](http://www.acpe-accredit.org). Additionally, the school is a member of the American Association of Colleges of Pharmacy.

---

## Complainant policy

ACPE has an obligation to assure itself that any institution that seeks accreditation status for its professional degree program conducts its affairs with honesty and frankness. Students who have complaints about the school's ability to meet accreditation standards or adhere to ACPE policies and procedures shall be submitted in writing to the Associate Dean for Admissions and Student Services, VCU School of Pharmacy, 410 N. 12th St., Room 500, Richmond, VA 23298-0581. The complainant is welcome to make an appointment to meet with school administrators to discuss his or her complaints and options for resolution. If they are not satisfied with the response by the school's representative/s, then complainants may contact ACPE at 135 S. LaSalle St., Suite 4100, Chicago, IL 60603 or [www.acpe-accredit.org/complaints](http://www.acpe-accredit.org/complaints) with a complaint. A record of written complaints about the school's adherence to ACPE accreditation standards or policies and procedures will be maintained for ACPE to review at the time of an accreditation site visit.

---

## Statement of purpose

The School of Pharmacy at Virginia Commonwealth University exists to provide exceptional programs benefiting the commonwealth of Virginia and society by offering the highest quality education and training for the development of health care practitioners, scientists, professional leaders and responsible citizens. These individuals are committed to shaping the health care world of tomorrow while serving society's health care needs today.

---

## Mission statement

The mission of the VCU School of Pharmacy fully supports the mission and goals of the university and the Medical College of Virginia Campus. The school's mission is to provide professional, graduate and postgraduate education, conduct pharmaceutical and biomedical research, and provide patient care and public service.

The school strives to provide an educational environment that encourages the following:

- Excellence in scholarship
- Excellence in teaching
- Diversity and respect among students and faculty
- Commitment to the various needs of students
- Commitment to service within the school, the university, the profession and the community
- Quality direct patient care experiences within the curriculum
- Commitment to fostering the concept and importance of lifelong learning

Therefore, the school shares with teaching, the interdependent and almost inseparable objectives of research, service and patient care.

---

## Philosophy

In developing the curriculum of the School of Pharmacy, the faculty recognizes that an educated person should be prepared to assume a responsible and rewarding role in society. The new paradigm of pharmaceutical care guides the school's curriculum committee and faculty in the design and implementation of the curriculum. Pharmaceutical care is the responsible provision of drug therapy by the pharmacist for the purpose of achieving definite outcomes that improve a patient's quality of life. In professional practice pharmaceutical care focuses on the pharmacist's attitudes, behaviors, commitment, concerns, ethics, functions, knowledge, responsibilities and skills in the provision of drug therapy, which achieve outcomes that yield improvement in a patient's quality of life. The educational program is designed to provide a sound, scientific and professional background for both those who will enter the practice of pharmacy directly and those who wish to continue graduate education in the pharmaceutical sciences. It also includes courses in the arts and humanities in order to provide the student with a broad educational base that will permit participation in community life, not only as a professional, but also as an informed, concerned citizen. The professional curriculum is rigorous and highly demanding of the student's time; employment must not be allowed to interfere with the educational process. The faculty has adopted a document entitled "Expected Competencies of Doctor of Pharmacy Graduates" and has expanded these competencies into knowledge, skills and attitudes that have been implemented in the curriculum.

## Career opportunities

Graduation from the School of Pharmacy with a professional degree affords the opportunity to pursue one of several career paths. The most familiar role is as a provider of pharmaceutical care to ambulatory patients in a community setting. In this setting the pharmacist may be self-employed or may be an employee of an organization such as an independent pharmacy, a corporate chain of pharmacies or a managed care pharmacy in a health maintenance organization.

Many pharmacists also practice in institutional settings such as hospitals or other health care institutions.

The pharmaceutical industry also employs pharmacists in several areas including manufacturing, quality control, research, sales and as medical service representatives who call on physicians. Opportunities also are available in various government services, such as public health and veterans affairs, as well as in government-operated laboratories.

In most cases, those who aspire to engage in independent research or to teach seek graduate degrees in the pharmaceutical sciences or in specialty fields related to pharmacy, or they complete pharmacy residency or fellowship program.

The American Pharmacists Association Pathway Evaluation Program provides information about the many areas of pharmacy practice. The program offers an interactive assessment tool and extensive background information about the pharmacy profession. Individuals interested in learning more about the profession are encouraged to select the Careers menu on the APHA website at [www.pharmacist.com](http://www.pharmacist.com).

## Facilities

The School of Pharmacy is located in the Robert Blackwell Smith Building at 12th and East Clay streets. This building — named in honor of a distinguished former dean of pharmacy, former president of the Medical College of Virginia and former provost of the MCV Campus — was completed in 1984 with the help of contributions from many alumni and friends of the School of Pharmacy. Additional classrooms, offices and laboratories are located in McGuire Hall and the Virginia BioTechnology Research Park, both located within a few blocks of the Smith Building.

Classes for students in pharmacy also are conducted in Sanger Hall, located between 11th and 12th streets on East Marshall Street, and McGuire Hall, located at the corner of 12th and Clay streets. In conjunction with the VCU Health System, students receive clinical experience in the VCUHS's MCV Hospitals and clinics. Other facilities available for teaching include area hospitals and pharmacies. The major library holdings are in the Tompkins-McCaw Library at 12th and East Clay streets.

Location in a major health sciences center provides excellent opportunities for interdisciplinary research and access to clinical facilities. The school is well equipped for graduate research and provides leadership to the VCU Institute for Structural Biology and Drug Discovery at the Virginia BioTechnology Research Park. The institute makes use of synthetic medicinal chemistry, X-ray crystallography, NMR, protein and nucleic acid chemistry, bacterial enzymology, and molecular pharmacology to promote drug development. Several businesses have been spawned through the institute and two new drugs have entered clinical trials.

The Department of Pharmacy supports the Center for Drug Studies (CDS), a fully staffed facility for conducting Phase I-III research in humans.

## Organizations for graduate students

### Student chapter of the International Society for Pharmacoeconomics and Outcomes Research

This organization fosters interest among professional and graduate students in pharmacoeconomics and health outcomes assessment.

### American Association of Pharmaceutical Scientists Virginia Commonwealth University Chapter

The AAPS-Virginia Commonwealth University Student Chapter was established in April 2004. Since its start, student membership has grown tremendously, with the chapter attracting students from various biological and related health fields. The chapter's mission is to provide an educational outreach program for VCU students with an interest in the pharmaceutical sciences.

## Organizations for professional degree students

### Virginia Academy of Students of Pharmacy

Students in the School of Pharmacy have an opportunity to become members of this organization that is affiliated with the Virginia Pharmacists Association and the American Pharmacists Association. The group meets regularly presenting programs of interest to the student body.

### Student Chapter Virginia Society of Health-System Pharmacists

Pharmacy students who are interested in the practice of pharmacy in organized health care settings may become members.

### Student National Pharmaceutical Association

This student subdivision of the National Pharmaceutical Association works to define the future role of minority health professionals in the community.

### Student Association of Community Pharmacists

This student organization focuses on issues of interest to students who plan to pursue careers in community pharmacy. It is affiliated with the National Community Pharmacists Association.

### Student Association of Consultant and Geriatric Pharmacists

This organization is for students interested in geriatric pharmacy and/or long-term care and consultant pharmacy.

### Student Chapter of the International Society for Pharmacoeconomics and Outcomes Research

This organization fosters interest among professional and graduate students in pharmacoeconomics and health outcomes assessment.

### Christian Pharmacists Fellowship International

This student organization focuses on helping student pharmacists to grow spiritually and promote fellowship within the profession.

## Fraternities for professional degree students

Chapters of Kappa Epsilon, Kappa Psi, and Phi Delta Chi are active within the student body. These fraternities extend invitations, according to the rules of the Interfraternity Council, to pharmacy students to become members. Eligibility for consideration is based upon academic achievement as determined by the Interfraternity Council and the dean's office.

Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)

Pharmacy, Doctor of (Pharm.D.)

Pharmacy, Doctor of (Pharm.D.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]

Pharmacy, Doctor of (Pharm.D.)/Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) [combined]

Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [combined]

Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [combined]

Pharmacy, Doctor of (Pharm.D.)/Pharmaceutical Sciences, Master of Science (M.S.) [combined]

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in medicinal chemistry			
Degree: Ph.D.	Semester(s) of entry: Fall	Deadline dates: Jan 1	Test requirements: GRE TOEFL (international applicants)
Special requirements: Pharm.D. or bachelor's degree in a related area			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

General academic regulations for  
all graduate students in all graduate programs at VCU

## Program goal

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the doctoral level.

## Student learning outcomes

- Knowledge of research in pharmaceutical sciences**  
The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.
- Design experiments in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.
- Demonstrate appropriate communication skills**  
The candidate should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.
- Identify problems in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), Ph.D. students in pharmaceutical sciences must complete a minimum of 30 graduate credit hours beyond the master's degree of required (both school and department core) and elective hours. All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

All School of Pharmacy graduate students must fulfill curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. Course work taken as part of a master's degree program may be waived; however, students must replace those courses with additional course work or directed research to meet the minimum 30 credit hour requirement for the Ph.D.

## Curriculum requirements

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC 526 Research Techniques in Medicinal Chemistry (variable credit)	1 (minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	1 (minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

<b>Concentration</b>	
CHEM 504 Advanced Organic Chemistry I	3
MEDC 526 Research Techniques in Medicinal Chemistry	1-4

MEDC 541 Survey of Molecular Modeling Methods or CHEM 510 Atomic and Molecular Structure	1-3
MEDC 591 Special Topics in Medicinal Chemistry	1-6.5
MEDC 601 Advanced Medicinal Chemistry I	1

### Electives

A minimum 12 elective credit hours is recommended for the Ph.D. 12  
The elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student. These electives may include courses outside the department.

### Research

Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived, students must still complete minimum number of hours required for the degree.

MEDC 697 Directed Research in Medicinal Chemistry (variable credit)	30 (minimum)
---	-----------------

**Total graduate credit hours required (minimum) 60**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), Ph.D. students in pharmaceutical sciences must complete a minimum of 30 graduate credit hours beyond the master's degree of required (both school and department core) and elective hours. All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

All School of Pharmacy graduate students must fulfill curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. Course work taken as part of a master's degree program may be waived; however, students must replace those courses with additional course work or directed research to meet the minimum 30 credit hour requirement for the Ph.D.

## Curriculum requirements

### Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required

for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

CHEM and 409 Instrumental Analysis*	3
CHEZ 409 Instrumental Analysis Laboratory*	2
PCEU 508 Pharmacokinetics	3
PCEU 509 Pharmaceutics and Biopharmaceutics II	3

\* Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

## Curriculum requirements

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC 526 Research Techniques in Medicinal Chemistry (variable credit)	1 (minimum)

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate

programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

**Program goal**

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the doctoral level.

**Student learning outcomes**

- Knowledge of research in pharmaceutical sciences**  
The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.
- Design experiments in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.
- Demonstrate appropriate communication skills**  
The candidate should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.
- Identify problems in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

**Degree requirements**

In addition to [general VCU Graduate School graduation requirements](#), Ph.D. students in pharmaceutical sciences must complete a minimum of 30 graduate credit hours beyond the master's degree of required (both school and department core) and elective hours. All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

All School of Pharmacy graduate students must fulfill curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. Course work taken as part of a master's degree program may be waived; however, students must replace those courses with additional course work or directed research to meet the minimum 30 credit hour requirement for the Ph.D.

**Curriculum requirements**

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1

OVRP 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC526 Research Techniques (variable credit)	1 (minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	1 (minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

#### Concentration

BIOS/STAT 544 Statistical Methods II or equivalent	3
PHAR 626 Advanced Pharmacotherapy Research Methods	3
PHAR 637 Introduction to Research Methods in Pharmaceutical Sciences	3

#### Electives

In addition to the core curriculum above, a minimum 12 elective credit hours are recommended for the Ph.D. These courses will be selected based upon the mutual consent of the student and major adviser.

#### Research

Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived, students must still complete minimum number of hours required for the degree.

PHAR 697 Directed Research in Pharmacy (variable credit)	30 (minimum)
--	-----------------

**Total graduate credit hours required (minimum) 60**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in medicinal chemistry			
Degree: M.P.S.	Semester(s) of entry: Fall	Deadline dates: Jan 1	Test requirements: GRE TOEFL (international applicants)
Special requirements: Pharm.D. or bachelor's degree in a related area			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have received a Doctor of Pharmacy (Pharm.D.) or a bachelor's degree in a related area from an accredited college or university.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the Master of Pharmaceutical Sciences level.

## Student learning outcomes

- Knowledge of research in pharmaceutical sciences**  
Candidates should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of their areas of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their fields.
- Design experiments in pharmaceutical sciences**  
Candidates should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to their research.
- Demonstrate appropriate communication skills**  
Candidates should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.
- Identify problems in pharmaceutical sciences**  
Candidates should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), all School of Pharmacy graduate students must fulfill the curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. In order to graduate, M.P.S. students must complete a minimum of 30 graduate credit hours of required and elective course work and must pass the project review and defense in each department.

## Curriculum requirements

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC 526 Research Techniques in Medicinal Chemistry (variable credit)	1 (minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	1 (minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

<b>Concentration</b>	
CHEM 504 Advanced Organic Chemistry I	3
MEDC 526 Research Techniques in Medicinal Chemistry	1-4
MEDC 541 Survey of Molecular Modeling Methods or CHEM 510 Atomic and Molecular Structure	1-3
MEDC 591 Special Topics in Medicinal Chemistry	1-3.5
MEDC 601 Advanced Medicinal Chemistry I	1

<b>Electives</b>	
A minimum of six elective credit hours is recommended for the M.P.S. The elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student. Electives may include courses outside the department.	6

<b>Research</b>	
Students are required to complete a project. The six credit-hour minimum directed research requirement may be waived for circumstances such as a prior related degree. If waived, students must still complete minimum number of hours required for the degree.	
PHAR 697 Directed Research in Pharmacy, MEDC 697 Directed Research in Medicinal Chemistry or PCEU 697 Directed Research in Pharmaceutics (variable credit)	6 (minimum)

**Total graduate credit hours required (minimum) 30**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Admission requirements

Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in pharmaceuticals			
Degree: M.P.S.	Semester(s) of entry: Fall	Deadline dates: May 1 (priority consideration for financial aid Feb 1)	Test requirements: GRE TOEFL (international applicants)
	Spring	Oct 1	
Special requirements: Pharm.D. or bachelor's degree in a related area			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level.

Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the Master of Pharmaceutical Sciences level.

## Student learning outcomes

### 1. Knowledge of research in pharmaceutical sciences

Candidates should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of their areas of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their fields.

### 2. Design experiments in pharmaceutical sciences

Candidates should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to their research.

**3. Demonstrate appropriate communication skills**

Candidates should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.

**4. Identify problems in pharmaceutical sciences**

Candidates should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

**Degree requirements**

In addition to [general VCU Graduate School graduation requirements](#), all School of Pharmacy graduate students must fulfill the curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. In order to graduate, M.P.S. students must complete a minimum of 30 graduate credit hours of required and elective course work and must pass the project review and defense in each department.

**Prerequisites**

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

CHEM and 409 Instrumental Analysis*	3
CHEZ 409 Instrumental Analysis Laboratory*	2
PCEU 507 Pharmaceutics and Biopharmaceutics I (except pharmaceutical calculus)	3
PCEU 508 Pharmacokinetics	3
PCEU 509 Pharmaceutics and Biopharmaceutics II	3

\* Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

**Curriculum requirements**

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC 526 Research Techniques in Medicinal Chemistry (variable credit)	(minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	(minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

**Concentration**

BIOS/STAT 543 Statistical Methods I	3
PCEU 612 Advanced Physical Pharmacy and Biopharmaceutics	3
PCEU 625 Pharmaceutical Analysis	2
PCEU 690 Pharmaceutics Research Seminar	1

**Electives**

A minimum of six elective credit hours is recommended for the M.P.S. The elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student. These electives may include courses outside the department.

**Research**

Students are required to complete a project. The six credit-hour minimum directed research requirement may be waived for circumstances such as a prior related degree. If waived, students must still complete minimum number of hours required for the degree.

PCEU 697 Directed Research in Pharmaceutics (variable credit)	6 (minimum)
---	----------------

**Total graduate credit hours required (minimum) 30**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

## Admission requirements

<b>Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in pharmacotherapy</b>			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.S.	Fall	May 1 (priority consideration for financial aid Feb 1)	GRE TOEFL (international applicants)
	Spring	Oct 1	
<b>Special requirements:</b>			
Pharm.D. or bachelor's degree in a related area			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level.

Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the Master of Pharmaceutical Sciences level.

## Student learning outcomes

- Knowledge of research in pharmaceutical sciences**  
Candidates should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of their areas of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their fields.
- Design experiments in pharmaceutical sciences**  
Candidates should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to their research.
- Demonstrate appropriate communication skills**  
Candidates should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.
- Identify problems in pharmaceutical sciences**  
Candidates should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), all School of Pharmacy graduate students must fulfill the curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. In order to graduate, M.P.S. students must complete a minimum of 30 graduate credit hours of required and elective course work and must pass the project review and defense in each department.

## Curriculum requirements

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3

IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC526 Research Techniques (variable credit)	1 (minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	1 (minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

### Concentration

BIOS/STAT 544 Statistical Methods II or equivalent	3
PHAR 626 Advanced Pharmacotherapy Research Methods	3
PHAR 637 Introduction to Research Methods in Pharmaceutical Sciences	3

### Electives

A minimum of six elective credit hours is required for the M.P.S. The 6 elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student.

### Research

Students are required to complete a project. The six credit-hour minimum directed research requirement may be waived for circumstances such as a prior related degree. If waived, students must still complete minimum number of hours required for the degree.

PHAR 697 Directed Research in Pharmacy (variable credit)	6 (minimum)
--	-------------

**Total graduate credit hours required (minimum) 30**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the Master of Science level.

## Student learning outcomes

### 1. Knowledge of research in pharmaceutical sciences

The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.

### 2. Design experiments in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

### 3. Demonstrate appropriate communication skills

The candidate should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.

### 4. Identify problems in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate.

## Curriculum requirements

### Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

CHEM and 409 Instrumental Analysis*	3
CHEZ 409 Instrumental Analysis Laboratory*	2
PCEU 507 Pharmaceutics and Biopharmaceutics I (except pharmaceutical calculus)	3
PCEU 508 Pharmacokinetics	3
PCEU 509 Pharmaceutics and Biopharmaceutics II	3

\* Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

## Curriculum requirements

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1
PCEU/MEDC/PHAR 614 Research Techniques or MEDC 526 Research Techniques in Medicinal Chemistry (variable credit)	1 (minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	1 (minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

### Concentration

BIOS/STAT 543 Statistical Methods I	3
PCEU 612 Advanced Physical Pharmacy and Biopharmaceutics	3
PCEU 625 Pharmaceutical Analysis	2
PCEU 690 Pharmaceutics Research Seminar	1

### Electives

A minimum of six elective credit hours is recommended for the M.S. 6  
These courses will be selected based upon individual research  
program needs and will be chosen through mutual consultation with  
the student and major adviser.

### Research

Students are required to complete a thesis. The six credit-hour  
minimum may be waived for circumstances such as a prior related  
degree. If waived, students must still complete minimum number of  
hours required for the degree.

PCEU 697 Directed Research in Pharmaceutics (variable credit)	6 (minimum)
---	----------------

**Total graduate credit hours required (minimum) 30**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final  
research project, work of art, thesis or dissertation, must qualify for continuing  
master's or doctoral status according to the degree candidacy requirements of the  
student's graduate program. Admission to degree candidacy, if applicable, is a  
formal statement by the graduate student's faculty regarding the student's  
academic achievements and the student's readiness to proceed to the final research  
phase of the degree program.

Graduate students and program directors should refer to the following degree  
candidacy policy as published in the VCU Graduate Bulletin for complete  
information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final  
semester of matriculation, they must make formal application to graduate. No  
degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation  
requirements as published in the Graduate Bulletin for a complete list of  
instructions and a graduation checklist.

Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in medicinal chemistry

Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in pharmaceutics

Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in pharmacoeconomics and health outcomes

Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in pharmacotherapy

Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in medicinal chemistry

Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in pharmaceutics

Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in pharmacoeconomics and health outcomes

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in medicinal chemistry

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in pharmaceutics

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in pharmacoeconomics and health outcomes

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in pharmacotherapy

Pharmacology and Toxicology, Master of Science (M.S.)

Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)

Pharmacy, Doctor of (Pharm.D.)

Pharmacy, Doctor of (Pharm.D.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]

Pharmacy, Doctor of (Pharm.D.)/Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) [combined]

Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [combined]

Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [combined]

Pharmacy, Doctor of (Pharm.D.)/Pharmaceutical Sciences, Master of Science (M.S.) [combined]

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

**Admission requirements**

Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in pharmacotherapy			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	May 1 (priority consideration for financial aid Feb 1)	GRE TOEFL (international applicants)
	Spring	Oct 1	
Special requirements: Pharm.D. or bachelor's degree in a related area			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level.

Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

**Program goal**

The School of Pharmacy endeavors to provide the highest quality teaching and research in the pharmaceutical sciences graduate program at the Master of Science level.

**Student learning outcomes**

- Knowledge of research in pharmaceutical sciences**  
The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.
- Design experiments in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.
- Demonstrate appropriate communication skills**  
The candidate should demonstrate that an appropriate level of oral, written and visual communication skills has been acquired.
- Identify problems in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

**Degree requirements**

In addition to [general VCU Graduate School graduation requirements](#), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate.

**Curriculum requirements**

Courses	Credit hours
<b>School of Pharmacy core curriculum</b>	
BIOS/STAT 543 Statistical Methods I or MEDC 541 Survey of Molecular Modeling Methods (1 credit repeated) or MEDC 601 Advanced Medicinal Chemistry I (1 credit repeated)	3
IBMS 600 Laboratory Safety or equivalent	1
OVPR 601 Scientific Integrity or equivalent	1

PCEU/MEDC/PHAR 614 Research Techniques or MEDC526 Research Techniques (variable credit)	1 (minimum)
PCEU 690 Pharmaceutics Research Seminar, MEDC 690 Departmental Research Seminar or PHAR 690 Pharmacy Research Seminar (variable credit)	1 (minimum)
PSCI 607-608 Introduction to Pharmaceutical Sciences From Bench to Shelf	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

#### Concentration

BIOS/STAT 544 Statistical Methods II or equivalent	3
PHAR 626 Advanced Pharmacotherapy Research Methods	3
PHAR 637 Introduction to Research Methods in Pharmaceutical Sciences	3

#### Electives

A minimum of six elective credit hours is recommended for the M.S. 6  
The elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student.

#### Research

Students are required to complete a thesis. The six credit-hour minimum directed research requirement may be waived for circumstances such as prior related degree. If waived, students must still complete minimum number of hours required for the degree.

PHAR 697 Directed Research in Pharmacy (variable credit)	6 (minimum)
--	----------------

**Total graduate credit hours required (minimum) 30**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Other information

School of Pharmacy policies and procedures for graduate students  
[pharmacy.vcu.edu/programs/pharmd/current/statements\\_and\\_policies](http://pharmacy.vcu.edu/programs/pharmd/current/statements_and_policies)  
Website for current students:  
[pharmacy.vcu.edu/programs/graduate/current-students](http://pharmacy.vcu.edu/programs/graduate/current-students)  
Website for prospective students:  
[pharmacy.vcu.edu/programs/graduate/prospective-students](http://pharmacy.vcu.edu/programs/graduate/prospective-students)

### Pharmacy, Doctor of (Pharm.D.)

The school offers the Doctor of Pharmacy degree as a professional degree program. Students must complete a minimum of three years of prerequisite course work prior to admission. The Doctor of Pharmacy degree is awarded after four years of study.

### Accreditation and Complainant policy

The Doctor of Pharmacy degree program at the Virginia Commonwealth University School of Pharmacy is fully accredited by the Accreditation Council for Pharmacy Education (ACPE), 20 N. Clark St., Suite 2500, Chicago, IL 60602-5109. Accreditation standards are available in the school's Office of Admissions and Student Services and via the ACPE website at [www.acpe-accredit.org](http://www.acpe-accredit.org). Additionally, the school is a member of the American Association of Colleges of Pharmacy.

#### Complainant policy

ACPE has an obligation to assure itself that any institution that seeks accreditation status for its professional degree program conducts its affairs with honesty and frankness. Students who have complaints about the school's ability to meet accreditation standards or adhere to ACPE policies and procedures shall be submitted in writing to the Associate Dean for Admissions and Student Services, VCU School of Pharmacy, 410 N. 12th St., Room 500, Richmond, VA 23298-0581. The complainant is welcome to make an appointment to meet with school administrators to discuss his or her complaints and options for resolution. If they are not satisfied with the response by the school's representative/s, then complainants may contact ACPE at 135 S. LaSalle St., Suite 4100, Chicago, IL 60603 or [www.acpe-accredit.org/complaints](http://www.acpe-accredit.org/complaints) with a complaint. A record of written complaints about the school's adherence to ACPE accreditation standards or policies and procedures will be maintained for ACPE to review at the time of an accreditation site visit.

### Licensing and reciprocity

The Virginia Board of Pharmacy holds qualifying examinations for licensure on an ongoing basis throughout the year. Applicants for the examination must present evidence that their first professional degree was granted by a school of pharmacy recognized by the board. This school is among those recognized. Applicants must also present evidence of completion of 1,500 hours of practical experience. Completion of the school's Pharm.D. program satisfies this requirement. APPE rotations completed outside of the United States may not be counted toward the 1,500-hour requirement.

Those students who intend to be licensed in Virginia should contact the Virginia Board of Pharmacy, 9960 Mayland Dr., Suite 300, Richmond, VA 23233-1463.

### Admission requirements

Applicants for admission to the School of Pharmacy must attend an accredited college for at least three academic years (nine quarters or six semesters) and complete the specified course requirements prior to admission.

Students planning to seek a degree in pharmacy upon high school graduation should plan their high school program to meet the requirements for admission in the college where they will take the prerequisite work for admission into the VCU School of Pharmacy.

The minimal admission requirements are listed. (Meeting these requirements does not, however, guarantee acceptance into the VCU School of Pharmacy.)

- A. Three letters of reference are required. These include a reference from a science professor, a health professional (pharmacist preferred) and an employer.

- B. An official transcript from the student's primary college and all colleges attended must be supplied. Applications are considered by the Admissions Committee only after transcripts on file show completion of no less than four semesters or six quarters of college work. When offered, an acceptance is contingent upon satisfactory completion of specific work that may be in progress.
- C. Applicants must present the required credits in the following subject areas for a total of at least 90 semester hours.

	Semester hours
General biology (lecture and laboratory)	8
College chemistry (lecture and laboratory)	8
Organic chemistry (lecture and laboratory)	8
Physics (lecture and laboratory)	4
Human anatomy*	3
Human physiology	3
Microbiology*	3
Biochemistry	3
English	6
Calculus	3
Statistics	3
Public speaking	3
Biomedical science foundation and elective courses	35

**Minimum 90**

\* One hour of lab in these subjects also preferred

- D. Due to the importance of a strong biomedical science foundation for success in the Doctor of Pharmacy program, some or all of the courses listed below are recommended.

Genetics or molecular biology	3
Immunology	3
Cell biology	3

- E. The electives will comprise a balanced program in social sciences, arts and humanities. Electives in computer science, economics, psychology and sociology are highly recommended. Others include political science, anthropology, history, foreign languages, philosophy and religious studies.
- F. Credits earned through Advanced Placement Tests of the College Board or International Baccalaureate are not acceptable in meeting the total semester-hours requirement. Such AP credits may excuse a student from taking a specific non-science course such as English, but the credits must be made up through additional electives. AP credits in science (e.g., biology, chemistry) or mathematics (e.g., calculus) must be made up with courses in kind. Generally, this requirement is achieved by taking advanced-level courses (e.g., physical chemistry as a substitute for AP/IB credit in general chemistry).
- G. Dual-credit courses taken during high school may be considered acceptable for transfer credit pending review of college transcripts.
- H. Applicants must have earned a creditable average (C or better) overall, and in the courses specified, to meet minimum academic requirements for admission.
- I. Applicants for admission must apply online through PharmCAS, a centralized application service for pharmacy schools. The PharmCAS Web site at [www.pharmcas.org](http://www.pharmcas.org) provides further details.
- J. An on-campus interview is mandatory for admission consideration.
- K. Applicants are required to take the Pharmacy College Admission Test (PCAT) before admission.
- L. Applicants whose first language is not English and who have not lived in the U.S. for at least 10 years should submit scores from the Test of English as a Foreign Language, the Test of Spoken English or other proof that their command of English is sufficient to allow successful completion of all requirements of the program.

- M. Students are admitted only at the start of the academic year. An applicant must complete two full years of the academic prerequisites before an application can be reviewed. The Admissions Committee begins reviewing applications during September of the year preceding admission. It is to the applicant's advantage to apply during the fall of the year before expected enrollment in the School of Pharmacy. Applicants are accepted pending satisfactory completion of all prerequisite courses. Notification usually occurs in early spring.
- N. Prior to enrolling, successful applicants must meet the [immunization requirements](#) set forth in the "Professional study" section of this bulletin. Prior to entering the fourth professional year, students must satisfy all university and APPE site immunization requirements.
- O. Applicants exercising the early decision option for admission to the VCU School of Pharmacy must submit their fee and official transcript from all postsecondary institutions ever attended to PharmCAS by the specified deadline. Applicants whose materials are not received or whose applications are incomplete by these deadlines will be ineligible for the early decision option, and they will be deferred to regular admission status. Applicants exercising the early decision option are expected to make a commitment to attend the VCU School of Pharmacy if accepted. If an acceptance offer is not made under the early decision option, the applicant is then moved to regular admission status and continues to be evaluated for admission during the remainder of the admission cycle. The applicant is then free to apply to other schools of pharmacy under the regular admission procedure.
- P. Applicants pursuing "regular admission" to the VCU School of Pharmacy must submit the electronic application, letters of reference and transcripts to PharmCAS by the specified deadline. Applicants who do not meet these PharmCAS deadlines will be ineligible for admission to the VCU Doctor of Pharmacy degree program.
- Q. Applicants to the program must be U.S. citizens or permanent residents of the U.S.

The following criteria are considered in judging applicants:

- College attended
- Academic workload carried
- College overall GPA
- Chemistry, biology and math proficiency
- Outside activities and achievements in high school and college
- PCAT scores
- Written and oral communication skills
- Extent of exposure to pharmacy practice
- Extent of exposure to other health disciplines
- Personal interview

Time demands for this full-time program are rigorous. In general, the first three years require a Monday–Friday (8 a.m.–6 p.m.) commitment for lectures, conferences, laboratories and off-campus visits to area pharmacy practice sites. The fourth year is devoted to experiential learning at sites located throughout Virginia. Students enrolling in the four-year professional degree program must agree to the possibility of being assigned to sites beyond the Richmond metropolitan area (e.g., eastern, northern or western Virginia). Candidates must assess personal obligations prior to seeking application.

VCU does not discriminate against qualified applicants for admission who have disabilities, and seeks to provide reasonable accommodation to applicants and admitted students who identify themselves as having disabilities. Academic requirements essential to the program or to directly related licensing requirements will not be substituted. Upon acceptance into the program, students in need of accommodation may contact the MCV Campus coordinator for students with disabilities at (804) 828-9782 to discuss their needs.

Further information may be obtained by writing to the Chair, Admissions Committee, School of Pharmacy, Virginia Commonwealth University, P.O. Box 980581, Richmond, VA 23298-0581. Applicants also may call a toll-free telephone number, (800) 330-0519 for assistance.

## Student learning outcomes

Pharm.D. students will demonstrate competencies in appropriate medication use and quality improvement; communication abilities; critical-thinking; decision-making; evidence-based practice; inter-professional collaborative practice; medication distribution and control systems management; patient-centered care; patient pharmacotherapy assessment; pharmacotherapy planning and decision-making; pharmacotherapy practice management; professionalism; responsible use of values; ethical principles; self-direction; lifelong learning; social awareness and responsibility; and appropriate NAPLEX scores.

## Curriculum

### P1 year

	Credits
<b>Fall</b>	
MEDC 527 Basic Pharmaceutical Principles for the Practicing Pharmacist	3.0
MEDC 533 Pharmacognosy	2.0
PCEU 507 Pharmaceutics and Biopharmaceutics I	3.0
PHAR 509 Evidence-based Pharmacy I: Introduction to Pharmacy Information Skills	2.0
PHAR 512 Health Promotion and Disease Prevention	2.0
PHAR 523 Foundations I	1.5
PHAR 525 Communications in Pharmacy Practice	2.0
PHAR 545 The U.S. Health Care System	2.0
PHAR 547 Managing Professional Patient-centered Practice	1.5
PHAR 771 Student Pharmacist Professionalism	continues
<b>Total</b>	<b>19.0</b>

### Spring

MEDC 553 Clinical Therapeutics Module: Introduction to Medicinal Chemistry*	1.0
PCEU 508 Pharmacokinetics*	3.0
PCEU 509 Pharmaceutics and Biopharmaceutics II	3.0
PHAR 513 Contemporary Pharmacy Practice	2.0
PHAR 524 Foundations II	1.5
PHAR 526 Community Pharmacy Practice Management I	2.0
PHAR 529 Clinical Therapeutics Module: Introduction to Special Populations*	2.0
PHAR 530 Introductory Pharmacy Practice Experience: Community Practice	4.0
PHAR 771 Student Pharmacist Professionalism	continues
PHTX 606 Clinical Therapeutics: Introduction to Pharmacology (Pharmacy)*	1.0
<b>Total</b>	<b>19.5</b>

### P2 year

#### Fall

MEDC 543 Clinical Chemistry for the Pharmacist	2.0
PHAR 534 Foundations III	1.0
PHAR 543 Scholarship I	continues
PHAR 541 Patient Assessment in Pharmacy Practice	2.0
PHAR 544 Clinical Therapeutics Module: Cardiovascular*	4.5
PHAR 555 Clinical Therapeutics Module: Endocrinology*	2.5
PHAR 603 Clinical Therapeutics Module: Respiratory/Immunology*	3.0
PHAR 565 Evidence-based Pharmacy II: Research Methods and Statistics*	2.5
PHAR 622 Epidemiology for Pharmacy Practice*	2.0
PHAR 771 Student Pharmacist Professionalism	continues
<b>Total</b>	<b>19.5</b>

#### Spring

MEDC 542 Biotechnology-derived Therapeutic Agents	1.0
PCEU 615 Applied Pharmacokinetics	2.5

PHAR 532 Introductory Pharmacy Practice Experience: Hospital Practice	3.0
PHAR 535 Foundations IV	1.0
PHAR 543 Scholarship I	1.0
PHAR 566 Evidence-based Pharmacy III: Drug Literature Evaluation	2.0
PHAR 604 Clinical Therapeutics Module: Infectious Diseases*	4.5
PHAR 606 Clinical Therapeutics Module: Nephrology/Urology*	2.0
PHAR 661 Institutional Pharmacy Management	2.0
PHAR 623 Patient Medication Safety*	2.0
PHAR 771 Student Pharmacist Professionalism	continues
<b>Total</b>	<b>21.0</b>

### P3 year

#### Fall

PHAR 550 Scholarship III	continues
PHAR 540 Self-Care and Alternative and Complementary Treatments	2.5
PHAR 549 Pharmacogenetics and Pharmacogenomics*	1.0
PHAR 602 Clinical Therapeutics Module: Psychiatry*	3.0
PHAR 605 Clinical Therapeutics Module: Hematology/Oncology*	2.5
PHAR 607 Clinical Therapeutics Module: Dermatology, EENT*	1.5
PHAR 619 Clinical Therapeutics Module: Women's Health/Bone and Joint*	2.5
PHAR 640 Foundations V	1.0
PHAR 660 Community Pharmacy Practice Management II	2.0
PHAR 771 Student Pharmacist Professionalism	continues
Elective	2.0-3.0
<b>Total</b>	<b>18.0-19.0</b>

#### Spring

PHAR 533 Introductory Pharmacy Practice Experience: Service-learning	0.5
PHAR 550 Scholarship II	2.0
PHAR 621 Pharmacoeconomics	2.0
PHAR 556 Clinical Therapeutics Module: Neurology	4.0
PHAR 618 Clinical Therapeutics Module: Gastrointestinal/Nutrition*	2.5
PHAR 620 Clinical Therapeutics Module: Critical Care/Toxicology*	1.5
PHAR 721 Clinical Therapeutics Module: Integrated Medication Management*	1.0
PHAR 645 Foundations VI	1.0
PHAR 724 Pharmacy Law	2.5
PHAR 771 Student Pharmacist Professionalism	continues
Elective	2.0-3.0
<b>Total</b>	<b>19.0-20.0</b>

### P4 year (over 45 weeks)

PHAR 760 Acute Care Pharmacy Practice I	5.0
PHAR 761 Advanced Hospital Pharmacy Practice	5.0
PHAR 762 Geriatrics Pharmacy Practice	5.0
PHAR 763 Ambulatory Care Pharmacy Practice	5.0
PHAR 765 Elective I	5.0
PHAR 766 Elective II	5.0
PHAR 768 Advanced Community Pharmacy Practice	5.0
PHAR 771 Student Pharmacist Professionalism	1.0
PHAR 773 Acute Care Pharmacy Practice II	5.0
<b>Total</b>	<b>41.0</b>

\* Course will be taught as a module.

## Academic regulations

Matriculation in the School of Pharmacy implies a willingness on the part of students to comply with university rules and regulations and to conduct themselves in a manner befitting members of the profession the students seek to enter. The program of study and regulations regarding courses of study, student conduct, etc. are subject to modification without notice. All rules and regulations set forth in this bulletin, as well as other statements issued by administrative officers of the university, apply until further notice.

### Probation

Students may be placed on probation by either the Admissions Committee or the Academic Performance Committee. Probation is a status indicating that the student's scholarship is deficient and is expected to be improved to a level considered to be satisfactory by the faculty. Students who fail to meet probationary stipulations may expect to have their normal progress through school interrupted. They may be required to repeat a year or to withdraw. Students on probation during the first three years of the professional program are neither allowed to hold an elected office in a student association nor be eligible for nomination as an officer in a student association. Students are not permitted to represent the school in extracurricular activities (e.g., representation at a local, regional or national association meeting, or other professional event). Students are expected to discontinue any outside employment during the academic year. Students are not eligible to pledge a professional fraternity. Students are encouraged to avail themselves of special tutoring and counseling services for improving their academic performance. Additionally, students during the fourth year of the professional program must complete all required and elective advanced pharmacy practice experiential rotations at sites within the VCU School of Pharmacy system and the preceptor must have a current faculty appointment. Students are expected to discontinue any outside employment while completing advanced pharmacy practice experiential rotations. Expiration of probationary status occurs following the equivalent of an academic year (i.e., two consecutive semesters of successful academic performance during the first three professional years and upon the successful completion of all advanced pharmacy practice experiential rotations in the fourth year.

### Outside work

In general, the faculty believes that students should give first priority to their school work. Students able to maintain academic standing are not restricted with respect to outside employment. Students in academic difficulty will be advised to cease or drastically curtail any outside employment.

### Honor code

All students are governed by the honor code and regulations of the VCU Honor System. The VCU Honor System is based on the foundation that Virginia Commonwealth University recognizes that honesty, truth and integrity are values central to its mission as an institution of higher education. In a community devoted to learning, a foundation of honor must exist if that community is to thrive with respect and harmony. Therefore, members of the academic community are required to conduct themselves in accordance with the highest standards of academic honesty and integrity. Additional information is available at [www.students.vcu.edu/judicialaffairs/honorfaqs](http://www.students.vcu.edu/judicialaffairs/honorfaqs).

### Advising program

Students in the School of Pharmacy seek assistance with academic and personal problems through the school's Office of Admissions and Student Services. Students are provided with information about accessing resources within the school, university and professional community. Also, faculty members serve as mentors to students throughout the four year curriculum.

There is a faculty adviser to the Interfraternity Council as well as an adviser for each of the professional pharmacy fraternities. Each of the student chapters of professional pharmacy organizations within the school also has a designated faculty adviser.

### Attendance regulations

The following regulations apply specifically to students enrolled in the Doctor of Pharmacy program in all of their required and elective courses offered by departments in the School of Pharmacy.

1. The faculty considers class attendance at lectures to be an important component in the successful acquisition of knowledge and skills required of the Doctor of Pharmacy candidate. Students are strongly encouraged to attend all classes and conferences. An individual faculty member may require

attendance in his or her course and establish penalties for those who are absent without an excuse from the dean's office.

2. Attendance at laboratory and prelaboratory classes is mandatory. Students must complete all laboratory assignments before a passing grade can be assigned. An excused absence from the dean's office is required for missing a laboratory or prelaboratory class with the ability to make up the work with credit. Students without an approved absence are still required to make up the work but will not receive credit toward their course grade.
3. Students must take tests (e.g., quizzes, laboratory practicals, examinations) and complete all other assignments at the time designated by the course coordinator. Students must recognize that faculty may give unannounced tests at any time during a course, consistent with documentation in a course syllabus. Students who miss any test in any course without an excused absence from the dean's office will receive a grade of zero for the specific test.
4. Attendance during each assigned clerkship period is mandatory. If a student is unable to attend to required clerkship responsibilities because of illness or other exceptional circumstances, the preceptor must be notified immediately. It is the responsibility of the student to also notify the clerkship director concerning a plan to make up the absence, with the approval of the preceptor. Documentation of the absence and approval to make up the absent time will be maintained in the student's record.
5. Absences may be excused under certain conditions. Requests for excuses for unavoidable absences must be submitted to the dean's office, on an Absence Record form, within 24 hours of returning to the School of Pharmacy. The student must complete the Absence Record form with an explanation for the absence. Further explanation, if necessary, may be provided to the associate dean for admissions and student services. It is a violation of the honor code to make false or misleading statements on the Absence Record form. In the event of an unexcused absence, the student is responsible for all work missed.
6. A guiding principle in determining whether or not an absence will be excused is that the absence is caused by circumstances beyond the student's control. The following are considered valid excuses for being absent from a class or clerkship.
  - a. Illness, a medical emergency, a dental emergency. The school normally accepts the student's judgment that the condition was serious enough to justify the absence from class; however, the school reserves the right to require a medical opinion, particularly if the period of absence is prolonged or is repetitive. The school will require a written medical opinion when a student is absent from taking a scheduled test or final examination. If the absence is a result of a medical emergency, the student will be required to sign a written release for the school to obtain documentation from their physician describing the exact nature of the illness or emergency. This record will be submitted to the associate dean for admissions and student services as a confidential document.
  - b. Death of a relative or friend. Students will be excused from class to attend funerals. Absence beyond the day of the funeral will be excused for periods of mourning required by a student's religious or cultural tradition, or when a student is too grief-stricken to return immediately to class.
  - c. Mandatory court appearance.
  - d. Mandatory religious observances. Students who anticipate absences from class because of religious obligations should submit a list of their anticipated absences at the beginning of each semester to the dean's office. The student must also submit an absence form following each absence.
  - e. Failure of private, public or university transportation. Students are expected to take reasonable precautions to assure that the transportation method used is fully functional (e.g., maintaining personal automobile, avoiding the last possible return airline flight to Richmond). Proof of transportation failure will be required.
  - f. Attendance at professional meetings. Students in good academic standing may receive an excused absence from class to attend a meeting of a professional pharmacy organization. The student must complete an Absence Record form in advance of attending a professional meeting. A policy statement containing eligibility criteria is distributed to all students.

Tardiness is a form of absence that also may be excused using the criteria mentioned above. Students arriving late for a test may be given the test without an excused absence but will not be allowed extra time beyond the scheduled termination of the test. Once a student has completed the test and left the room, late-arriving students will not be permitted to take the test unless the absence is excused.

Absences that are not reported within 24 hours after the student returns to school will be considered unexcused. It is not the responsibility of a faculty member to determine whether an absence is excused. This determination will be made by the dean's office.

Students are expected to make every effort to keep abreast of their assignments during an absence. They should also be prepared to take tests upon their return to the school or at the discretion of the faculty member after considering the student's academic schedule. If, in the opinion of the dean's office, the nature of a student's absence made it impossible for that student to prepare for a test, the student will be granted an extension for taking the test.

A faculty member should not give a make-up test before confirming that a student's absence has been excused. The faculty member usually provides an equivalent make-up test within a reasonable period of time. The type and format of the make-up exam will be determined by the faculty member. Within the framework of the honor code, it may be possible to administer the same examination no more than 48 to 72 hours after the originally scheduled examination. Any make-up examination should be scheduled as soon as possible to avoid impeding the student's academic progress.

### Promotion

Attending pharmacy school is not a right acquired simply by conforming with the entrance requirements and paying tuition and fees. For this reason the dean and the Academic Performance Committee require that marginal or failing performance be improved or that the student withdraw from school. D grades are indicative of marginal performance. Careful consideration is given during the promotions process not only to the student's grades but also to his or her probity, industry and scholastic ability.

These guidelines delineate the course of action to be taken by the committee. Decisions regarding individual students will be made in accordance with these guidelines. Consideration will be given to pertinent information and extenuating circumstances for individual cases. The following statements present the prominent features of the promotions process.

1. Students are evaluated for progress at the end of each semester. The Academic Performance Committee assesses student progress for each of these periods. At the end of the fourth year the entire faculty will decide whether or not students have satisfied all requirements for graduation. Promotion decisions are based on achievement during the year under review and on the student's overall progress.
2. Students who have passed the work of an academic year with grades of C or better in all courses will ordinarily be advanced to the next higher class.
3. The Academic Performance Committee thoroughly reviews the academic record of each student who fails to pass a course, receives a D grade, does not maintain a GPA of 2.0 or better for the year or semester in question, or is on probation. Following this review, the committee may recommend promotion on a probationary basis, require a repeat of all or a part of previous work, or terminate the student's enrollment.
4. Students who fail two or more courses during the program will be dismissed.
5. A student who earns D grades for six credits or more of class work in any year and/or a GPA of less than 2.0 in any year will be subject to academic probation, dismissal or may be asked to repeat the year.

Students will be subject to academic probation, dismissal or may be asked to repeat the year if they earn more than one D or F grade in any one of the following sequences of related courses: basic health sciences, medicinal chemistry, pharmacy and pharmaceuticals, pharmacotherapeutics, and pharmacy administration.

Students who fail to meet conditions of probation will be required to withdraw or repeat a year's work. Students will not be allowed to repeat more than one year of the curriculum.

A student must have passed all courses from the first three years of the curriculum to qualify for entry into the final year of the program.

### Withdrawal

Students finding it necessary to withdraw from the School of Pharmacy must comply with the provisions for withdrawal set by the university.

The dean of the School of Pharmacy will not approve a request for withdrawal until the student has submitted a letter of resignation.

Students withdrawing without approval and failing to check out laboratory lockers will be assessed a fee and any charges resulting from the need to replenish the contents of the lockers.

### Readmission

Students seeking readmission to the School of Pharmacy will be evaluated on their total academic record. Applicants for readmission to the first professional year will not be given priority over new applicants but must compete with them on an equal basis. Readmission in advanced standing will be considered on a space-available basis.

### Graduation

Students are recommended and approved for the Doctor of Pharmacy degree by the faculty of the School of Pharmacy. Candidates must meet the following requirements:

1. Be of good moral character
2. Satisfactorily complete all the required work in a timely fashion, which will not normally exceed five years from the date of initial enrollment
3. Pay all fees
4. Complete the last year's work for the degree in residence in this school
5. Be present at the commencement-related exercises unless excused in writing and in advance by the dean
6. Satisfactorily complete the minimum number of required advanced practice experience rotations and demonstrate the attainment of minimum competencies

### Financial aid

See the [Professional studies](#) section of this bulletin.

### Courses of instruction

Enrollment in courses included in the Doctor of Pharmacy curricula summarized on the preceding pages requires the approval of the dean of the School of Pharmacy unless the student has been admitted to the Doctor of Pharmacy Program.

### Pharmacy, Doctor of (Pharm.D.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]

#### Graduate program director

E. Ayn Welleford, Ph.D.

Chair, Department of Gerontology

Occupational Therapy, Master of Science in (M.S.O.T.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]  
 Rehabilitation Counseling, Master of Science in (M.S.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]  
 Social Work, Master of (M.S.W.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs. Students must apply separately to the participating programs and must meet all admission and degree

requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

In cooperation with the School of Pharmacy, the department provides an opportunity for students in the Doctor of Pharmacy program to complete the certificate. The 21-credit-hour program is designed to integrate the required independent study project in gerontology into the Pharm.D. curriculum's clerkship assignment. The student is required to complete the following courses:

## Curriculum requirements

Courses	Credit hours
GRTY 601 Biological and Physiological Aging	3
GRTY/PSYC 602 Psychology of Aging	3
GRTY 603 Social Gerontology	3
GRTY 692 Independent Study	1
GRTY elective(s)	3
PHAR 529 Clinical Therapeutics Module: Introduction to Special Populations	2
PHAR 533 Introductory Pharmacy Practice Experience: Service-learning	.5
PHAR 565 Evidence-based Pharmacy II: Research Methods and Statistics	2.5
PHAR 566 Evidence-based Pharmacy III: Drug Literature Evaluation	2
PHAR 721 Clinical Therapeutics Module XVII: Special Populations	1
<b>Total graduate credit hours required (minimum)</b>	<b>21</b>

The Pharm.D./M.B.A. program seeks to prepare pharmacists for careers that encompass pharmacy and business theories and principles. The program is designed to take advantage of efficiencies and electives in both the Pharm.D. and M.B.A. programs. Students in the combined program can earn both degrees and save as much as one year or more over the time required for completing the programs separately.

Students may be admitted into the program during the first year of enrollment in the Pharm.D. program. Applicants must be enrolled in the Pharm.D. program, have demonstrated a good academic record and have successfully completed the Graduate Management Admission Test.

To obtain both degrees, students will take all pharmacy courses unless waived, the seven business foundation courses, the nine M.B.A. core courses and three elective courses. The elective M.B.A. courses may be taken from pharmacy administration courses at the 600 level and a combination of a business seminar course and an elective advanced pharmacy practice experience in pharmacy management. The business foundation courses can be taken during the first two years in the pharmacy program with summer session(s). The M.B.A. core courses can be taken during the third and fourth years in the pharmacy program. The business electives can be taken during the fourth and fifth years in the combined program.

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of the curriculum of both programs.

#### Application to Pharm.D./M.B.A. program

Students interested in pursuing the Pharm.D./M.B.A. program must first obtain admission to the Pharm.D. program. Admitted Pharm.D. students who wish to add the M.B.A. degree must then apply to the M.B.A. program. Upon admission to the M.B.A. program, a Pharm.D. student will be considered a dual-degree-seeking student. Students generally will register for a mix of School of Business courses and School of Pharmacy courses in the fourth, fifth and sixth semesters of the pharmacy program.

A student categorized as a Pharm.D. student will be charged tuition and fees from the School of Pharmacy and will be eligible to receive financial aid awards as a Pharm.D. student. Students categorized as M.B.A. students will be charged tuition and fee rates as graduate students and be eligible to receive financial awards as graduate students.

The combined Pharm.D./Ph.D. program in the School of Pharmacy is a full-time program of professional education that offers an opportunity for advanced study in pharmaceutical sciences. The program recognizes the need for pharmacy practitioners with excellent research skills in clinical, academic, industrial and regulatory environments. The program is designed to take advantage of efficiencies in both the Pharm.D. and Ph.D. curricula and to allow Pharm.D./Ph.D. students to complete the program requirements of both programs after approximately six years, with both degrees being awarded at the same graduation ceremony.

Pharm.D./Ph.D. students can focus on the following research areas within the School of Pharmacy: pharmacotherapy and health outcomes, pharmacokinetics/pharmacodynamics, biopharmaceutical analysis, pharmaceuticals/physical pharmacy, and medicinal chemistry. Students also may focus on pharmacology and toxicology within the School of Medicine. The choice of research area determines the required graduate course requirements.

During their P-2 through P-4 years, Pharm.D./Ph.D. students will complete the required Pharm.D. curriculum using graduate courses in lieu of required Pharm.D. courses and Pharm.D. electives. In addition, Pharm.D./Ph.D. students will engage in graduate research during the summer semesters following the P-2 and P-4 years. After the P-4 year and beyond (G-1 and G-2), Pharm.D./Ph.D. students will complete both their graduate course requirements and Ph.D. dissertation research project as full-time graduate students. Stipends and tuition reimbursement may be provided for Pharm.D./Ph.D. students serving as graduate teaching or research assistants.

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of the curricular requirements for both programs.

**Application to the combined program**

Students may be admitted into the combined Pharm.D./Ph.D. program during the first or second year (P-1 and P-2) of enrollment in the Pharm.D. program. Applicants must demonstrate a good academic record, experience in research (e.g., during summer research fellowships after the P-1 year with one of the School of Pharmacy's graduate faculty) and successful completion of the Graduate Record Examination. Additionally, the application must be sponsored by a graduate faculty member as the prospective major graduate adviser. Appropriate progress of Pharm.D./Ph.D. students in the program will be assessed by the Pharm.D./Ph.D. subcommittee after each semester until successful completion of the comprehensive examinations.

The School of Pharmacy offers a Pharm.D./Master of Science (M.S.) in Pharmaceutical Sciences as a combined graduate/professional degree program that

teaches individuals to analyze and solve problems of interest to pharmacists. Students develop a broad range of skills by taking classes and working closely with faculty. Since the degree is offered concurrently with the professional pharmacy degree, certain efficiencies can be realized that permit students to graduate sooner than might be expected; although, this degree may require up to two years of study beyond the Pharm.D. program depending on the student's educational background and chosen area of study. Students will take the required Pharm.D. curriculum, with selected substitutions of required courses with graduate-level courses, in addition to the graduate curriculum.

In their first two years (P-1 and P-2), the Pharm.D./M.S. students will complete the required Pharm.D. curriculum while attending research seminars and possibly pursuing graduate courses as electives. After admission into the graduate program, students will take required graduate courses in lieu of Pharm.D. courses during the P-3 (G-1) year followed by graduate research during the summer. During the G-2 through G-4 years, students will complete the graduate course requirements and the required Pharm.D. clerkships and work on their graduate research projects. Stipends and tuition may be provided for students serving as graduate teaching or research assistants. During that period, the student will follow procedures prescribed for students in the pharmaceutical sciences.

Students can focus on the following research areas within the School of Pharmacy: pharmacotherapy, pharmacokinetics, biopharmaceutical analysis, pharmaceutics/physical pharmacy, pharmacy administration and medicinal chemistry. Also, students may focus on the following research areas within the School of Medicine: pharmacology and toxicology. The choice of research area determines the required graduate course work.

The combined Pharm.D./M.S. program in the School of Pharmacy is a full-time program of professional education that offers an opportunity for advanced study in pharmaceutical sciences. The program recognizes the need for pharmacy practitioners with excellent research skills in clinical, academic, industrial and regulatory environments. The combined program is designed to take advantage of efficiencies in both the Pharm.D. and the M.S. programs and allows students to complete the program requirements of both programs after five or six years. Both degrees are awarded at the same graduation ceremony.

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of the curriculum of both programs.

#### Application to the Pharm.D./M.S. program

Students may be admitted into the combined program before or during their first two years of enrollment in the Pharm.D. program. Applicants must demonstrate a good academic record, experience in research (e.g., during summer research fellowships with the school's graduate faculty) and successful completion of the Graduate Record Examination. Additionally, each applicant must be sponsored by a graduate faculty member.

The School of Pharmacy and the Division of Epidemiology in the Department of Family Medicine and Population Health in VCU's School of Medicine offer a dual-degree program through which students earn both Pharm.D. and M.P.H. degrees. This dual-degree program offers students the opportunity to achieve a Doctor of Pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend the fourth year of the Pharm.D. program pursuing the M.P.H. degree, after which they transition back to pharmacy for advanced practice experiences.

Students are required to take 36 of the 45 credits required for the M.P.H. The M.P.H. field study (internship) requirement will be satisfied by Pharm.D. special advanced practice experiences in community health during the fifth year of the program.

Students complete two credits of practical skills work during the P3 year, followed by full immersion in the M.P.H. curriculum in the P4 year. The required M.P.H. capstone project will be completed in a community setting during the P5 year; it will involve a comprehensive project that serves the needs of a professional public health organization and typically involves the development of one or more deliverables. Examples include a disease surveillance project, a needs assessment or program evaluation, or development of a comprehensive suite of patient health education or medication safety materials.

Refer to the [program search](#) function of the online VCU Bulletins for a complete description of the curriculum for both programs.

### Curriculum requirements

Courses	Credit hours
<b>M.P.H. courses</b>	<b>36</b>
Required	
BIOS 547 Applied Data Analysis in Public Health I	3
BIOS 548 Applied Data Analysis in Public Health II	3
EPID 547 Applied Data Analysis Lab I	1.5
EPID 548 Applied Data Analysis Lab II	1.5
EPID 571 Principles of Epidemiology	3
EPID 580 Public Health Ethics	1

**Total graduate credit hours required (minimum) 191**

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

## Department of Medicinal Chemistry

The Department of Medicinal Chemistry applies the latest strategies and concepts from several broad scientific disciplines including synthetic chemistry, molecular modeling, computational biology, structural genomics, and pharmacology.

## Administration

**Richard A. Glennon**

Professor and Department Chair

## Department of Pharmaceutics

The Department of Pharmaceutics offers graduate study leading to the degrees of Master of Science and Doctor of Philosophy in Pharmaceutical Sciences. In addition, students may elect to pursue a joint Pharm.D./Ph.D. program. These programs provide the preparation and research experience for academic, federal and industrial careers.

## Administration

**Peter R. Byron**

Professor and Department Chair

## Department of Pharmacotherapy and Outcomes Science

The Department of Pharmacotherapy and Outcomes Science is the largest of the three departments at the VCU School of Pharmacy. The focus of the department is pharmacotherapy (the safe and effective use of drugs in humans), and pharmacy administration (evaluation of the social and economic impact of drug therapy in humans and in health care systems).

## Administration

**School of Social Work**

The oldest of its kind in the South, Virginia Commonwealth University's School of Social Work was established in 1917 as the Richmond School of Social Economy. Later renamed the School of Social Work and Public Health, it became the first unit of Richmond Professional Institute. The school was created initially in response to community needs in working with World War I veterans and their social and health problems. Subsequent development of the school has expanded activity into all areas of human service.

With the creation of VCU in 1968, the School of Social Work became a unit of what is now the university's Monroe Park Campus. The school offers baccalaureate-, master's- and doctoral-level programs in Richmond, and the capital provides educational opportunities in many state government agencies. Through 2012 VCU's School of Social Work also offers an off-campus M.S.W. program in Northern Virginia. Located in Alexandria, its proximity to Washington, D.C. allows additional field opportunities with federal agencies and national organizations.

Social work education at VCU is highly individualized and is characterized by a close relationship between faculty and students. Faculty members help students learn the form and method of social work practice, and students are encouraged to discover their own unique style of helping others. The school's educational programs are designed to prepare students for practice in many different kinds of social agencies. A combination of classroom courses and concurrent fieldwork experiences facilitates integration of knowledge, attitudes and skills necessary for professional practice. The integrated class and fieldwork curriculum offers students the opportunity to acquire a substantial base in social work practice, patterns of human behavior and development, organization and operation of social welfare programs and policies, the methods of scientific inquiry in social work, and the needs of special populations.

#### **The profession of social work**

The goals of the profession of social work are to provide services to persons who are vulnerable due to a lack of personal, social and/or institutional resources to meet their emotional, health and economic needs. Social work practice is the application of professional knowledge, skills and values across a range of settings and populations. The focus of practice is on individuals, couples, families, groups and communities. In addition to direct clinical social work practice, social workers are involved in the administration of human service programs, social planning, the development of social policies, research and evaluation, and teaching.

In order to achieve the goals of promoting social justice and enhancing well-being for individuals, families, groups and communities, social workers provide a variety of services primarily in public and nonprofit organizational contexts. Examples of the range of settings in which social workers practice include community centers, public social services, child welfare, residential treatment facilities, schools, community mental health agencies, family and children's service agencies, psychiatric and acute care hospitals, substance abuse treatment facilities, services for the elderly, court services and adult and juvenile rehabilitation facilities.

Professional education for social work practice dates to the early 1900s. The contributions of the profession are evidenced in health and mental health care, the well-being of children and families, the development and implementation of social policies, the planning, delivery and evaluation of human services, and a broad base of research on the human condition. The knowledge base of the profession and the integration of related social, behavioral and biological sciences acquired through professional education facilitates the contributions of social workers in multidisciplinary contexts.

Social work practice is designed to enrich quality of life by enabling individuals, groups, communities and organizations to achieve their greatest potential development. The goal of the School of Social Work at VCU is to provide professional education in response to these needs.

---

## **Accreditation**

VCU's Bachelor of Social Work and Master of Social Work programs are accredited by the Commission on Accreditation of the Council on Social Work Education — the accrediting body for all schools of social work at both the baccalaureate and master's levels. Copies of the Accreditation Standards and Curriculum Policy Statement are available in the Office of the Dean.

---

## **Financial assistance**

Although financial assistance is limited, some funds are available from a variety of sources. No prospective student should refrain from seeking admission to the school for financial reasons alone. Besides the federal financial aid programs outlined in the undergraduate or graduate study areas of the bulletins, the university and the school also offer scholarships and/or teaching assistantships at all degree levels.

The H. H. Hibbs Loan Fund was established by the School of Social Work Alumni Association for short-term emergency needs. Enrolled students who wish to apply for a loan should discuss this with their faculty adviser and the associate dean.

For more information on these financial aid opportunities, visit the School of Social Work Web site at [www.vcu.edu/slwweb/currentstudents/financial\\_support.html](http://www.vcu.edu/slwweb/currentstudents/financial_support.html).

---

## **Continuing education**

Continuing education is a vital part of professional development. The School of Social Work offers institutes and workshops as part of the school's commitment to enhance social work practice and broaden educational experiences for students, social workers, field instructors and others in social service delivery systems.

State, regional and local agencies and institutions frequently identify educational and training needs in content or skill areas for selected staff members. The school, through contractual arrangements, contributes expertise in designing and implementing short-term training courses and materials.

Offerings are planned throughout the year. For further information about specific continuing education courses, visit the School of Social Work Web site at [www.vcu.edu/slwweb/alumni/continuinged.html](http://www.vcu.edu/slwweb/alumni/continuinged.html) or address inquiries to the Director of Continuing Education, School of Social Work, Virginia Commonwealth University, 1001 W. Franklin St., Richmond, VA 23284-2027.

---

## **Associations and student interest groups**

### **Alumni Association**

The School of Social Work Alumni Association supports the school, its students and faculty. All graduates of the School of Social Work are members of the alumni association. The association falls under the umbrella of the VCU Alumni Association.

### **B.S.W. Student Association**

The Baccalaureate Social Work Student Association, an organization of students in the Bachelor of Social Work Program, was established to facilitate communication among students and between the student body and the school faculty and staff. This organization plays a vital role in the educational process. Through student representation on committees within the school, BSWA members participate in

decision-making processes. In addition, the association enables students to conduct a variety of social and professional activities throughout the year.

### M.S.W. Student Association

The Master of Social Work Student Association is the organization of M.S.W. students enrolled in the school. Established for the purposes of facilitating communication among students and between the student body and the school, the association provides a means by which student concerns and ideas can be formulated and acted upon. It also enables students to conduct a variety of social, civic and educational activities throughout the year.

This organization plays a vital role in the educational process. Student contributions to the governance and curriculum of the school are of value to both the institution and the students. Participation in the decision-making process is accomplished through student representation on committees. Faculty and students work closely together throughout the year to meet the needs of graduate social work education. Students participate as full members of committees within the school.

### Association of Black Social Workers – VCU Chapter

The Association of Black Social Workers was established to create and maintain an atmosphere of unity and support among black students in the School of Social Work. It serves to assist students in their personal and professional growth and development. Membership in this organization helps students to develop a keen awareness of the acute needs of the black community and the active role that must be assumed by the dedicated black professional social worker in promoting the general welfare of black citizens. To attain these goals, the organization utilizes the educational process and related experiences of students at the school and in fieldwork. Students are encouraged to participate in all phases of the academic environment.

### International Student Association (Northern Virginia Campus)

The International Student Association provides a forum for discussion and serves as a resource for information regarding all aspects of international social work. The association sponsors lectures, speakers and open discussions. All students, faculty or alumni who are interested in international social work are invited to become members or to attend meetings.

### Doctoral Student Association

The Doctoral Student Association is a collegial association available to all doctoral students regardless of full- or part-time status. Its primary purpose is to provide information, resources, advocacy and support to students throughout the doctoral program experience. Governance of the association is conducted on a rotating leadership and consensual basis. The Doctoral Student Association provides doctoral student representatives to various committees of the school governance structure.

### Other student interest groups

The School of Social Work supports the development of groups that address a variety of student needs and interests.

### Social work courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to [undergraduate- and master's-level social work \(SLWK\) courses](#).

This link will take you to a list [doctoral-level courses in social work \(SWKD\)](#).

## M.S.W. Program

**Elizabeth Dungee-Anderson**  
Director, M.S.W. Program  
[edungee@vcu.edu](mailto:edungee@vcu.edu)  
(804) 828-1043

Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [combined]  
Social Work, Doctor of Philosophy (Ph.D.)  
Social Work, Master of (M.S.W.) with a concentration in clinical practice  
Social Work, Master of (M.S.W.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]  
Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [combined]  
Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [combined]  
Social Work, Master of (M.S.W.)/school social work practice certification [combined]  
Social Work, Master of (M.S.W.)/Juris Doctor (J.D.) with the University of Richmond [combined]  
Social Work, Master of (M.S.W.)/Divinity, Master of (M.Div.) from the Baptist Theological Seminary at Richmond or the Samuel DeWitt Proctor School of Theology at Virginia Union University [combined]

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W.	Summer (advanced standing format)	Dec 1	
	Fall (regular standing formats – all on-campus part- and full-time and distance education)	Jan 16	
Special requirements:			
The School of Social Work requires a specific outline for the personal statement that is different from what is shown in the graduate admissions website and also requires that a checklist be submitted with application materials. Please visit the <a href="#">School of Social Work website</a> for this specific information.			

Full-time, part-time and distance education format applicants are admitted to begin study in the fall semester only. Advanced standing format applicants are admitted for the summer session only. At the time of application, applicants may apply for only one of the following: full-time on-campus Richmond, part-time on-campus Richmond, part-time distance education or advanced standing. Application forms and instructions for applying to all graduate programs are available on the [Graduate Admissions website](#).

In addition to the [general admission requirements of the VCU Graduate School](#), the School of Social Work has established the following minimum criteria for admission to the 60-credit hour full-time or part-time format:

1. A bachelor's degree from an accredited college or university
2. A cumulative GPA of 3.0 on a 4.0 scale for all undergraduate course work and a 3.0 (B) for the last 60 credit hours
3. A broad liberal arts background. Applicants must have completed a minimum of 30 semester credit hours in the liberal arts. Applicants must have completed at least one course (unless otherwise specified) in each of the following four areas:
  - a. Mathematics/computer sciences: math, logic, statistics, computer sciences
  - b. Humanities: English composition, literature, art history, music appreciation, philosophy, languages, religious studies, multicultural studies
  - c. Social and behavioral sciences: psychology, sociology, anthropology, history, political science, economics (with at least three credit hours in psychology and three credit hours in sociology)
  - d. Biology and physical sciences: anatomy/physiology, botany, general biology, zoology, chemistry, ecology, physics, geology, astronomy (with a minimum of three credit hours in human biology content)

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the personal statement and (2) the applicant's academic background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

#### General admission procedures

Applications will only be reviewed when they are complete and received by the deadline. This includes the application form, three letters of reference (such as from faculty, employers and/or colleagues who know the applicant's academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, including VCU transcripts from those who are VCU graduates, [a personal statement based upon the outline provided on the M.S.W. website](#) and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline.

#### Admission to the advanced standing format

The advanced standing format leads to a Master of Social Work degree upon completion of 42 credit hours. This format begins in late May, continues through the summer and culminates with graduation the following May. The advanced standing format is offered full-time only and cannot be pursued on a part-time basis. Admission to the advanced standing format is available to a select group of students with a bachelor's degree (B.S.W.) from an undergraduate social work program accredited by the Council on Social Work Education, completed no more than five years prior to the date of application to the M.S.W. program. The minimum requirement for admission to the advanced standing format is a 3.2 GPA on a 4.0 scale for all undergraduate course work. As part of the application packet, applicants must submit their field practicum evaluation(s) and a reference letter from the field practicum faculty. Applicants who meet these criteria will be scheduled for a structured on-campus interview, which includes a written case assessment. Refer to the [M.S.W. website](#) for more information.

#### Transfer admits

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a statement of good standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, personal statement, resume and reference letters. No more than 30 credit hours will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants from non-social work graduate programs must submit course syllabi for transfer evaluation. A maximum of six credit hours of elective course work may be accepted in transfer from non-social work graduate programs in accordance with Graduate School policies governing transfer credit and time limits for degree completion. No course credit is given for life or work experience.

#### Course waiver information for new M.S.W. students

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an A or B grade in the courses that are the basis for the waiver request; these courses must have been completed within the past five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs (but not in the advanced standing format), and from B.A., B.S. or other undergraduate programs may be waived from no more than three of the following foundation courses:

SLWK 601 and 610 Human Behavior in the Social Environment I and II  
SLWK 609 Foundations of Research in Social Work Practice

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are granted waivers but not transfer credit hours must take elective courses to fulfill the number of credit hours that have been waived. Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. program office to request the Equivalency Portfolio Form(s) and instructions.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

#### General academic regulations for all graduate students in all graduate programs at VCU

#### Program goal

The VCU School of Social Work offers a graduate professional curriculum accredited by the Council on Social Work Education leading to the Master of Social Work degree. The purpose of the M.S.W. program at VCU is to educate persons for advanced practice in either clinical social work or social work administration, planning and policy practice. The guiding principle in educating students is the promotion of a more just society that includes a commitment to the value of diversity and social work practice in a multicultural society. The VCU School of Social Work emphasizes critical thinking, self-awareness, data-based decision-making and ethical integrity. Graduates of this program will be able to address personal and social problems; formulate, implement and evaluate policies and programs; engage in knowledge development for the profession; and influence community decision-making. The educational program focuses on service to and empowerment of people who experience oppression or vulnerability due to inadequate or inequitable distribution of personal, social or institutional resources. Within this context, social work practice is defined as the application of professional knowledge, skills and values across a range of settings and populations for the prevention and amelioration of personal and social problems. The interactions among persons and their environments are the primary targets of social work practice. Services provided by social workers include the restoration, rehabilitation, maintenance and enhancement of optimal functioning of individuals, families, groups, communities and organizations. Knowledge for social work practice is based on analysis and critical application of qualitative and quantitative research from within the profession and related social, behavioral and biological sciences. Skill in professional practice is based on the differential application of theories and research findings about people in their sociocultural

and organizational contexts. Skill is developed by the social worker through the educational process, self-critical practice and the use of supervision and consultation. Values in social work practice are articulated in the profession's code of ethics and reflect the core values of service, social justice, dignity and worth of each individual, importance of human relationships, integrity, and competence.

## Student learning outcomes

1. A foundation of knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations
2. A concentration that prepares students for advanced practice in clinical social work or social work administration, planning and policy practice in a range of settings
3. To apply the profession's values and ethical principles
4. The implications of diversity by through education on identifying cultural strengths and ways to counteract individual and institutional prejudice, oppression and discrimination
5. To use research methods to analyze and critically evaluate professional practice, programs and service delivery systems
6. Advocacy and involvement in advocacy to affect social and economic justice

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), the regular standing format for the M.S.W. degree requires the completion of 60 credit hours of graduate study (two years of full-time study). The first 30 credit hours (foundation curriculum) may be taken in one academic year on a full-time basis or may be extended to a maximum of two years in the structured part-time format. To earn the M.S.W. degree in the advanced standing format requires 42 credits of full-time graduate study. Students in the advanced standing format do not complete the foundation curriculum but instead take 12 credit hours during the summer prior to entering the concentration curriculum.

All students select an area of concentration for the last 30 credit hours, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time format. Students are usually in a field instruction practicum two days each week during the foundation curriculum and three days each week during the concentration curriculum. Course credit for work or life experience is not granted in lieu of M.S.W. course credit hours.

The purpose of the Master of Social Work program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society.

The foundation curriculum comprises the first 30 credit hours of the M.S.W. program. The purpose of the foundation practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Foundation practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision-making, multicultural competency and social and economic justice. The foundation curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

### Concentration options

After completion of the foundation year of study or summer studies for advanced standing, M.S.W. students choose an advanced concentration in clinical practice or in administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

### Administration, planning and policy practice concentration (SWAPP)

The concentration in administration, planning and policy practice prepares graduates to become leaders skilled in analyzing, formulating, implementing and evaluating policies, plans and programs. The knowledge, values and skills that are taught emphasize current theory and research through classroom and field-based experiences. Practice takes place in the context of a complex, changing environment in which communities and governmental, legislative, nonprofit and for-profit organizations advocate for, plan and deliver social services and advocate for social change. The major themes within the integrated curriculum are social

and economic justice, diversity, leadership and advocacy. This concentration is not available to distance education students at this time.

## Curriculum requirements

Courses	Credit hours
<b>Foundation courses</b>	<b>30</b>
SLWK 601 Human Behavior in the Social Environment I	3
SLWK 602 Policy, Community and Organizational Practice I	3
SLWK 603 Social Work and Social Justice	3
SLWK 604 Social Work Practice with Individuals, Families and Groups I	3
SLWK 605 Social Work Practice with Individuals, Families and Groups II	3
SLWK 606 Policy, Community and Organizational Practice II	3
SLWK 609 Foundations of Research in Social Work Practice	3
SLWK 610 Human Behavior in the Social Environment II	3
SLWK 693 and 694 Foundation Field Instruction I and II or SLWK 695 Block Foundation Field Instruction*	6
*Part-time students may choose a block field placement in lieu of SLWK 693 and SLWK 694. Only one field placement can be a block placement	
In the advanced standing format students do not take foundation courses outlined above, but instead take 12 credit hours in the summer prior to their concentration year that include courses in practice/human behavior, policy, and research, in addition to completing a field education course with a field placement that will extend throughout their concentration year of study. The purpose of this curriculum is to enhance and restore understanding of the foundation curriculum content for entering BSW students prior to entering the concentration year.	
<b>Advanced standing format</b>	
Summer semester prior to concentration	
SLWK 607 Social Work Practice with Individuals, Families and Groups for Advanced-standing Students	3
SLWK 608 Social Work Practice in Organizations and Communities for Advanced-standing Students	3
SLWK 611 Social Work Research for Advanced-standing Students	3
SLWK 612 Advanced-standing Field Instruction	3
<b>Required administration, planning and policy concentration courses</b>	<b>24</b>
SLWK 710 Concentration Social Policy	3
SLWK 711 Strategies for Social Work Planning and Administrative Practice	3

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's

academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

### Social Work, Master of (M.S.W.) with a concentration in clinical practice

Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [combined]  
Social Work, Doctor of Philosophy (Ph.D.)

Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice

Social Work, Master of (M.S.W.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]

Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [combined]

Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [combined]

Social Work, Master of (M.S.W.)/school social work practice certification [combined]

Social Work, Master of (M.S.W.)/Juris Doctor (J.D.) with the University of Richmond [combined]

Social Work, Master of (M.S.W.)/Divinity, Master of (M.Div.) from the Baptist Theological Seminary at Richmond or the Samuel DeWitt Proctor School of Theology at Virginia Union University [combined]

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

## Admission requirements

Social Work, Master of (M.S.W.) with a concentration in clinical practice			
Degree: M.S.W.	Semester(s) of entry:	Deadline dates:	Test requirements:
	Summer (advanced standing format)	Dec 1	
	Fall (regular standing formats – all on- campus part- and full-time and distance education)	Jan 16	
<b>Special requirements:</b> The School of Social Work requires a specific outline for the personal statement that is different from what is shown in the graduate admissions website and also requires that a checklist be submitted with application materials. Please visit the <a href="#">School of Social Work website</a> for this specific information.			

Full-time, part-time and distance education format applicants are admitted to begin study in the fall semester only. Advanced standing format applicants are admitted for the summer session only. At the time of application, applicants may apply for only one of the following: full-time on-campus Richmond, part-time on-campus Richmond, part-time distance education or advanced standing. Application forms and instructions for applying to all graduate programs are available on the [Graduate Admissions website](#).

In addition to the [general admission requirements of the VCU Graduate School](#), the School of Social Work has established the following minimum criteria for admission to the 60-credit hour full-time or part-time format:

1. A bachelor's degree from an accredited college or university
2. A cumulative GPA of 3.0 on a 4.0 scale for all undergraduate course work and a 3.0 (B) for the last 60 credit hours
3. A broad liberal arts background. Applicants must have completed a minimum of 30 semester credit hours in the liberal arts. Applicants must have completed at least one course (unless otherwise specified) in each of the following four areas:
  - a. Mathematics/computer sciences: math, logic, statistics, computer sciences
  - b. Humanities: English composition, literature, art history, music appreciation, philosophy, languages, religious studies, multicultural studies
  - c. Social and behavioral sciences: psychology, sociology, anthropology, history, political science, economics (with at least three credit hours in psychology and three credit hours in sociology)
  - d. Biology and physical sciences: anatomy/physiology, botany, general biology, zoology, chemistry, ecology, physics, geology, astronomy (with a minimum of three credit hours in human biology content)

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the personal statement and (2) the applicant's academic background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

### General admission procedures

Applications will only be reviewed when they are complete and received by the deadline. This includes the application form, three letters of reference (such as from faculty, employers and/or colleagues who know the applicant's academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, including VCU transcripts from those who are VCU graduates, [a personal statement based upon the outline provided on the M.S.W. website](#) and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline.

### Admission to the advanced standing format

The advanced standing format leads to a Master of Social Work degree upon completion of 42 credit hours. This format begins in late May, continues through the summer and culminates with graduation the following May. The advanced standing format is offered full-time only and cannot be pursued on a part-time basis. Admission to the advanced standing format is available to a select group of students with a bachelor's degree (B.S.W.) from an undergraduate social work program accredited by the Council on Social Work Education, completed no more than five years prior to the date of application to the M.S.W. program. The minimum requirement for admission to the advanced standing format is a 3.2 GPA on a 4.0 scale for all undergraduate course work. As part of the application packet, applicants must submit their field practicum evaluation(s) and a reference letter from the field practicum faculty. Applicants who meet these criteria will be scheduled for a structured on-campus interview, which includes a written case assessment. Refer to the [M.S.W. website](#) for more information.

### Transfer admits

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a statement of good standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, personal statement, resume and reference letters. No more than 30 credit hours will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants from non-social work graduate programs must submit course syllabi for transfer evaluation. A maximum of six credit hours of elective course work may be accepted in transfer from non-social work graduate programs in accordance with Graduate School policies governing transfer credit and time limits for degree completion. No course credit is given for life or work experience.

### Course waiver information for new M.S.W. students

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an A or B grade in the courses that are the basis for the waiver request; these courses must have been completed within the past five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs (but not in the advanced standing format), and from B.A., B.S. or other undergraduate programs may be waived from no more than three of the following foundation courses:

SLWK 601 and 610 Human Behavior in the Social Environment I and II  
SLWK 609 Foundations of Research in Social Work Practice

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are granted waivers but not transfer credit hours must take elective courses to fulfill the number of credit hours that have been waived. Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. program office to request the Equivalency Portfolio Form(s) and instructions.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The VCU School of Social Work offers a graduate professional curriculum accredited by the Council on Social Work Education leading to the Master of Social Work degree. The purpose of the M.S.W. program at VCU is to educate persons for advanced practice in either clinical social work or social work administration, planning and policy practice. The guiding principle in educating students is the promotion of a more just society that includes a commitment to the value of diversity and social work practice in a multicultural society. The VCU School of Social Work emphasizes critical thinking, self-awareness, data-based decision-making and ethical integrity. Graduates of this program will be able to address personal and social problems; formulate, implement and evaluate policies and programs; engage in knowledge development for the profession; and influence community decision-making. The educational program focuses on service to and empowerment of people who experience oppression or vulnerability due to inadequate or inequitable distribution of personal, social or institutional resources. Within this context, social work practice is defined as the application of professional knowledge, skills and values across a range of settings and populations for the prevention and amelioration of personal and social problems. The interactions among persons and their environments are the primary targets of social work practice. Services provided by social workers include the restoration, rehabilitation, maintenance and enhancement of optimal functioning of individuals, families, groups, communities and organizations. Knowledge for social work practice is based on analysis and critical application of qualitative and quantitative research from within the profession and related social, behavioral and biological sciences. Skill in professional practice is based on the differential application of theories and research findings about people in their sociocultural and organizational contexts. Skill is developed by the social worker through the educational process, self-critical practice and the use of supervision and consultation. Values in social work practice are articulated in the profession's code of ethics and reflect the core values of service, social justice, dignity and worth of each individual, importance of human relationships, integrity, and competence.

## Student learning outcomes

1. A foundation of knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations
2. A concentration that prepares students for advanced practice in clinical social work or social work administration, planning and policy practice in a range of settings
3. To apply the profession's values and ethical principles
4. The implications of diversity by through education on identifying cultural strengths and ways to counteract individual and institutional prejudice, oppression and discrimination
5. To use research methods to analyze and critically evaluate professional practice, programs and service delivery systems
6. Advocacy and involvement in advocacy to affect social and economic justice

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), the regular standing format for the M.S.W. degree requires the completion of 60 credit hours of graduate study (two years of full-time study). The first 30 credit hours (foundation curriculum) may be taken in one academic year on a full-time basis or may be extended to a maximum of two years in the structured part-time format. To earn the M.S.W. degree in the advanced standing format requires 42 credits of full-time graduate study. Students in the advanced standing format do not complete the foundation curriculum but instead take 12 credit hours during the summer prior to entering the concentration curriculum.

All students select an area of concentration for the last 30 credit hours, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time format. Students are usually in a field instruction practicum two days each week during the foundation curriculum and three days each week during the concentration curriculum. Course credit for work or life experience is not granted in lieu of M.S.W. course credit hours.

The purpose of the Master of Social Work program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society.

The foundation curriculum comprises the first 30 credit hours of the M.S.W. program. The purpose of the foundation practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Foundation practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision-making, multicultural competency and social and economic justice. The foundation curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

### Concentration options

After completion of the foundation year of study or summer studies for advanced standing, M.S.W. students choose an advanced concentration in clinical practice or in administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

### Clinical practice concentration

Clinical social work practice involves a mutual problem-solving process in which multidimensional assessment, goal setting, planned intervention and evaluation are prominent components, all of which are informed by current scientific knowledge. All clinical practice is grounded in the values and purposes of the social work profession. The goal of clinical social work is to promote effective coping with life challenges and transitions. This is achieved by helping people solve problems, change dysfunctional behavior, resolve emotional and interpersonal conflicts, develop and use social networks and resources, and maintain achieved capacities and strengths. This goal rests on the fundamental belief in the dignity of all human beings and in communal responsibility for all members of the multicultural society.

Clinical social work practice takes place in the context of a purposeful relationship. The conscious use of the professional self is central in building and maintaining such relationships. Interventions may involve therapeutic, supportive, educational and resource-management activities. These interventions are based on a process of strengthening and reordering organizational structures in the lives of clients: intrapersonal (including intrapsychic), interpersonal, institutional and/or social.

## Curriculum requirements

Courses	Credit hours
<b>Foundation courses</b>	<b>30</b>
SLWK 601 Human Behavior in the Social Environment I	3
SLWK 602 Policy, Community and Organizational Practice I	3
SLWK 603 Social Work and Social Justice	3
SLWK 604 Social Work Practice with Individuals, Families and Groups I	3
SLWK 605 Social Work Practice with Individuals, Families and Groups II	3
SLWK 606 Policy, Community and Organizational Practice II	3
SLWK 609 Foundations of Research in Social Work Practice	3
SLWK 610 Human Behavior in the Social Environment II	3
SLWK 693 and 694 Foundation Field Instruction I and II or SLWK 695 Block Foundation Field Instruction*	6

\*Part-time students may choose a block field placement in lieu of SLWK 693 and SLWK 694. Only one field placement can be a block placement

In the advanced standing format students do not take foundation courses outlined above, but instead take 12 credit hours in the summer prior to their concentration year that include courses in practice/human behavior, policy, and research, in addition to completing a field education course with a field placement that will extend throughout their concentration year of study. The purpose of this curriculum is to enhance and restore understanding of the foundation curriculum content for entering BSW students prior to entering the concentration year.

### Advanced standing format

## Summer semester prior to concentration

SLWK 607 Social Work Practice with Individuals, Families and Groups for Advanced-standing Students	3
SLWK 608 Social Work Practice in Organizations and Communities for Advanced-standing Students	3
SLWK 611 Social Work Research for Advanced-standing Students	3
SLWK 612 Advanced-standing Field Instruction	3

**Required clinical concentration courses** **24**

SLWK 703 Mental, Emotional and Behavioral Disorders	3
SLWK 704 Clinical Social Work Practice I	3
SLWK 705 Clinical Social Work Practice II	3
SLWK 706 Research for Clinical Social Work Practice I	3
SLWK 707 Research for Clinical Social Work Practice II	3
SLWK 710 Concentration Social Policy	3
SLWK 793 and 794 Concentration Field Instruction or SLWK 795 Concentration Block Field Instruction*	6

\*Part-time students may choose a block field placement in lieu of SLWK 793 and SLWK 794. Only one field placement can be a block placement

**Electives** **6**

A variety of electives are offered every semester and in the summer. The following courses have been approved as electives by the university; however elective offerings for any particular semester are limited. In addition, electives from outside of the School of Social Work are accepted as part of our combined offerings for dual degrees and certificates. Other electives from outside of the School of Social Work may be accepted with prior approval from the M.S.W. program director.

SLWK 716 Concentration Social Policy for Social Work Administration, Planning and Policy Practice	3
SLWK 719 Gender and Substance Abuse: Social Work Practice Issues	3
SLWK 726 Social Work Practice and Health Care	3
SKWK 727 Trauma and Social Work Practice: Theory, Assessment and Intervention	3
SLWK 728 The Interdisciplinary Team in Social Work Practice	3
SLWK 739 Social Work and the Law	3
SLWK 741 Social Work Practice and the Neurosciences	3
SLWK 745 Social Work Practice in Community Mental Health	3
SLWK 746 Social Work Practice and Psychopharmacology	3
SLWK 747 Social Work Intervention with Children and Adolescents	3
SLWK 748 Group Methods in Social Work Practice	3
SLWK 749 Social Work Intervention in Substance Abuse	3
SLWK 755 Social Work Practice in Organizing for Social Change	3
SLWK 759 Art Therapy in Social Work Practice	3
SLWK 761 Interpersonal Violence	3
SLWK 770 International Social Work Study Abroad	3
SLWK 791 Topical Seminar	1-3

**Total graduate credit hours required (minimum)** **60**

**Sample plan of study**

Courses	Credit hours
<b>First year, fall semester</b>	<b>15</b>

Elective	3

**Total graduate credit hours required (minimum)** **60**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Degree candidacy requirements****Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Graduation requirements**

**Social Work, Master of (M.S.W.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]**

**Program accreditation**

Council on Social Work Education (M.S.W.)

(804) 828-1565

**Program websites:** [socialwork.vcu.edu](http://socialwork.vcu.edu) and [sahp.vcu.edu/gerontology](http://sahp.vcu.edu/gerontology)**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Gerontology, Master of Science (M.S.)

Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [combined]

Social Work, Doctor of Philosophy (Ph.D.)

Social Work, Master of (M.S.W.) with a concentration in clinical practice

Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice

Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [combined]

Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [combined]

Social Work, Master of (M.S.W.)/school social work practice certification [combined]

Social Work, Master of (M.S.W.)/Juris Doctor (J.D.) with the University of Richmond [combined]

Social Work, Master of (M.S.W.)/Divinity, Master of (M.Div.) from the Baptist Theological Seminary at Richmond or the Samuel DeWitt Proctor School of Theology at Virginia Union University [combined]

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

The School of Social Work in cooperation with the Department of Gerontology of the School of Allied Health Professions at VCU provides students with a unique educational opportunity in social work and gerontology. Master of Social Work students interested in work with elders or in gerontological programs may earn a Certificate in Aging Studies while completing the master's degree requirements.

In order to meet the requirements of the M.S.W. degree and the Certificate in Aging Studies, students complete a total of 65 graduate credit hours. All foundation and concentration courses of the Master of Social Work Program are completed, and core courses (nine credit hours) of the Certificate in Aging Studies Program are completed. Other requirements are met by (1) completion of M.S.W. research courses in which students undertake a project focused on aging, (2) completion of second-year field instruction practicum requirements (six credit hours) in a social work setting related to aging and (3) completion of an independent study course in gerontology, which integrates research and practicum courses.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Aging Studies degree programs.

**Application process**

Students must meet the admission requirements of the Master of Social Work program of the School of Social Work and of the Certificate in Aging Studies program in the Department of Gerontology. Admission into one program does not guarantee admission into the other.

The combined Master of Social Work and Master of Divinity program is a four-year professional degree program offered by Virginia Commonwealth University in cooperation with Richmond Theological Consortium schools that include

Baptist Theological Seminary at Richmond and Samuel DeWitt Proctor School of Theology at Virginia Union University. The purpose of the dual-degree program is to prepare students for service in occupations where social work and the church's ministries intersect; to enable social workers to perform and evaluate social work practices as they relate to biblical, theological, ethical, educational and pastoral perspectives; and to equip graduates for various forms of ministry in which clinical and administrative skills in social work are critical.

This program requires four continuous years of study and leads to a Master of Social Work degree conferred by VCU and a Master of Divinity degree conferred by the chosen RTC school. Permission for part-time study must be given by the dual-degree adviser at VCU and the appropriate theological school dean of faculty. All degree requirements must be completed within seven years of matriculation. Students need to apply and be accepted both programs and may begin study at either institution following the approved curriculum plan. Or, a student may begin at either VCU or the seminary and then apply for admission to the other school during the first year of study in accordance with application deadline dates.

The M.S.W. requires 60 credit hours that do not include the required integrative seminar and one course transferred from the seminary to satisfy a three-credit hour M.S.W. elective requirement. The integrative seminar is taken in the final year of study and is co-taught by a member of the VCU School of Social Work faculty and a member of a faculty of an RTC school. The seminar enables the student to integrate theoretical, social justice, empirical, ethical and practical dimensions of social work with biblical, theological, educational and pastoral perspectives.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. degree program.

#### Application process

Prospective students apply to the VCU School of Social Work and one of the participating theological schools, must meet both sets of admission standards and must be accepted into both programs. For the M.S.W. program, refer to the "Admission to the master's degree program" section. For information about admission to an RTC Master of Divinity program, contact one of the following schools:

Baptist Theological Seminary at Richmond  
3400 Brook Road  
Richmond, VA 23286-3446  
(804) 345- 2877

Samuel DeWitt Proctor School of Theology  
1500 N. Lombardy St.  
Richmond, VA 23220  
(804) 257-5715

M.S.W. program applications can be obtained from the VCU Graduate Admissions website at [www.graduate.admissions.vcu.edu](http://www.graduate.admissions.vcu.edu).

### Admission requirements

Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [combined]			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W. and	Fall	Jul 15	
Post-baccalaureate graduate certificate	Spring	Nov 15	

The combined Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. The certificate requires a total of 18 credit hours comprising five required courses and one elective.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to the Graduate Admissions Office; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online admission application and select from the drop down menu "GVI Certificate." Applicants then pay the application fee and attach an essay on why they wish to be in the program. Students should also indicate on the right-hand side of the admission application that they are currently in the M.S.W. program, which will alert the admissions office that the application can be sent directly to the program chair for an admissions decision.

Please arrange for references and transcripts to be forwarded to the Wilder School graduate studies office from the School of Social Work and they will be added to the admission application. **Students should indicate in the "Comments" section of the application form that they are already enrolled in the M.S.W. program.**

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, P.O. Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [[ecramer@vcu.edu](mailto:ecramer@vcu.edu); (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., associate dean of the Wilder School [[sbrubaker@vcu.edu](mailto:sbrubaker@vcu.edu); (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

### Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>15</b>
GVPA 623 Research Methods for Government and Public Affairs*	3
GVPA 693 Internship**	3
PADM 650 Principles of Nonprofit Management***	3
SLWK 761 Interpersonal Violence	3
SOCY 635 Theorizing Gender Violence	3
<b>Elective</b>	<b>3</b>

### Total graduate credit hours required (minimum) for the Certificate in Gender Violence Intervention for students in the M.S.W. program 18

Through a cooperative arrangement with the Wilder School, M.S.W. students may simultaneously earn this graduate certificate by completing two required courses: SOCY 635 and SLWK 761.

#### Notes

\*GVPA 623 Research Methods for Government and Public Affairs: satisfied by SLWK 706-707 or SLWK 714-715 [clinical or social work planning, administrative and policy practice research course (3 credit hours)]

\*\*GVPA 693 Internship: satisfied by SLWK 693-694, 695; or SLWK 793-794, 795 [a social work field practicum in an agency providing sexual or domestic violence services (3 credit hours)]

\*\*\*PADM 650 Principles of Nonprofit Management: satisfied by SLWK 602-606 Social Work Policy, Planning and Organizational Practice I and II (3 credit hours)

#### Course schedule

SOCY 635 will be offered every fall; SLWK 761 will be offered every spring. Both courses will be offered on Tuesday from 4-6:40.

#### Field placements

Once students are admitted and enrolled in the certificate program, they should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

Through a cooperative arrangement with the University of Richmond T.C. Williams Law School, selected students in either school may pursue a combined four-year curriculum of graduate study leading to the degrees of Master of Social Work and Juris Doctor. The program is established in recognition of the role of public law in social and economic life. The dual-degree program prepares professionals versed in the values, knowledge and skills of both fields, bringing an

integrated base of competency to the resolution of human and social problems. The time normally required for completion of the integrated four-year curriculum is one academic year less than if each degree were taken separately. Elective courses will enable students to select areas in law and in social work which meet their particular interests.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. degree program and its concentrations.

### Application process

Applicants must successfully meet the admission requirements of both schools and upon admission are assigned an adviser in each school. Students in dual-degree study may begin the course work in either school, with the sequence of courses being determined by the point of entry.

Application for admission must be made to each institution separately. Those interested should contact both the Admissions Office of the T.C. Williams Law School, University of Richmond, VA 23173 and the VCU Graduate Admissions Office at [www.graduate.admissions.vcu.edu](http://www.graduate.admissions.vcu.edu)

Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)  
Social Work, Master of (M.S.W.) with a concentration in clinical practice  
Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, Master of Social Work students pursuing the concentration in administration, planning and policy practice may simultaneously earn the post-baccalaureate graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs.

### Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate admissions application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the M.S.W. degree program.

#### Certificate requirements for M.S.W. students

Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six credit hours of the certificate's 15 credit-hour requirement. One of these courses is SLWK 712 Social Work Planning and Administrative Practice I. The second course may be SLWK 711 Strategies for Social Work Planning and Administrative Practice or SLWK 713 Social Work Planning and Administrative Practice II.

**Note:** M.S.W. students pursuing the clinical concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual-degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the Graduate Admissions Office and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual-degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study.

Students are required to complete a minimum of 45 M.S.W. credit hours and a minimum of 33 M.P.H. credit hours, for a total of 78 semester credit hours. In the M.P.H. program, this includes 24 credit hours of core and required courses, a minimum six credit hours of elective courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. During the third and last year of study, dual-degree students are placed in internships through the School of Social Work that focus on public health; the internship placement is approved by both the M.P.H. program director and the director of the M.S.W. field instruction. With adviser approval, the student may develop a capstone project based on work in this public health/social work placement.

Refer to the [program search](#) function for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.P.H. and M.S.W. degrees.

EPID 648 Behavioral Epidemiology 3

SBHD 632 Health Disparities and Social Justice 3

SBHD 636 Community-based Participatory Research 3

**Total graduate credit hours required (minimum) for combined M.P.H./M.S.W. 78**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available in the Graduate Bulletin at [pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113](http://pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30113).

## Admission requirements

### Social Work, Master of (M.S.W.)/school social work practice certification [combined]

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W.	Summer (advanced standing format)	Dec 1	
Certification (Note: does not result in the awarding of a VCU certificate degree or diploma)	Fall (regular standing formats – all on-campus part- and full-time and distance education)	Jan 16	

#### Special requirements:

The School of Social Work requires a specific outline for the personal statement that is different from what is shown in the graduate admissions website and also requires that a checklist be submitted with application materials. Please visit the [School of Social Work website](#) for this specific information.

Through a collaborative program with the VCU School of Education, students may meet Virginia Department of Education standards for certification as school social workers in Virginia in addition to meeting requirements for the M.S.W. degree.

In order to meet the requirements of the M.S.W. and the School Social Work certification option, students complete the clinical concentration and earn a total of 63 graduate credit hours, including six credit hours of approved graduate courses in the School of Education. Students must enroll in SLWK 717 Social Work Practice in the School Setting and take two additional courses from the School of Education.

Students interested in certification in school social work should contact their advisers during the first semester of the M.S.W. program.

Additional information may be obtained from the [School of Social Work website](#) or by writing:

## Admission requirements

Social Work, Doctor of Philosophy (Ph.D.)			
<b>Degree:</b> Ph.D.	<b>Semester(s) of entry:</b> Fall only	<b>Deadline dates:</b> Jan 15 for early consideration; Mar 1 for standard review	<b>Test requirements:</b> GRE-General
<b>Special requirements:</b> Submit all additional application materials (personal statement, reference letters, writing sample and resume/curriculum vita) through the Graduate Admissions Office. If desired, an additional copy may be sent directly to the School of Social Work c/o Leslie Choplin, Ph.D., program assistant.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must meet the following minimum requirements.

Applicants to the program must have an earned master's degree in social work or a closely related discipline, as well as professional experience relevant to their career goals. The relationship between the applicants' professional experiences and their career objectives should be clearly articulated in the personal statements submitted with the application materials.

Applicants whose career goals include teaching in a bachelor's- and/or master's-level social work program should be aware that an M.S.W. degree and social work practice experience, along with the Ph.D., are often considered to be minimal job requirements. In addition, Council on Social Work Education accreditation standards currently require that individuals who want to teach practice courses, in particular, must have an M.S.W. and at least two years of post-M.S.W. practice experience.

The Graduate Record Examination taken within the past five years is required of all applicants. A combined score of 1,000 or more on the verbal and quantitative sections on the older version of the GRE or a comparable combined score on the revised GRE is expected. Applicants with combined scores of less than 1,000 may wish to retake the GRE before submitting their scores. However, applicants should

also be aware that GREs are only part of the application folder and are weighed along with other aspects of the applicant's credentials.

The normal course of study is full-time. While it is possible, in some cases, to combine a limited amount of course work with outside employment, all students must complete at least one year of full-time study prior to admission to candidacy.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

VCU's Ph.D. in Social Work program is a research-oriented educational enterprise with a mission to develop scholars and leaders for education and practice in human services. Its vision is a program that builds and nurtures students' intellectual curiosity, creativity and courage, as well as their desire to "make a difference." The program is built around excellence in teaching, mentorship and socialization of students, as well as collaborative involvement in the program by its diverse faculty. Graduates of the program become active in teaching, consultation, research, practice and program evaluation, staff and program development, policy analysis and advocacy. They are employed in universities and colleges and in human service organizations and agencies at the local, state, national and international levels. In all the program's activities and events, emphasis is placed on the following areas:

1. The development of an intellectual community that values critical and creative thinking
2. The connections among the philosophy of science, theory, research and practice
3. The analysis and integration of knowledge and values, especially their relevance to diverse populations and issues of social justice

## Student learning outcomes

1. A critical understanding of multiple paradigms in the philosophy of science and the implications of these for contemporary research
2. Mastery of a range of research methodologies and data analysis strategies and competence in conducting independent inquiry on issues of importance to the field
3. Competence in the analysis and application of a wide range of social, behavioral and practice theories
4. An ability to design and propose theoretically and empirically grounded models of social work intervention for coping with personal transitions and challenges, addressing social problems and promoting equity and social justice
5. A critical understanding of the historical place of social work and social welfare in the evolution of social thought and cultural values
6. Expertise in a chosen substantive area related to social work, including skills related to dissemination of this knowledge

7. Familiarity and beginning expertise about the exchange and dissemination of professional knowledge via submissions and presentations to meetings, journals and other professional outlets

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), students must meet the following requirements.

A minimum of 54 graduate credit hours is required, which comprises 27 hours of core course work common for all students, 12 credit hours of electives selected individually to suit the student's course of study, three credit hours of directed research and a minimum of 12 credit hours of dissertation research. The Graduate School requirements for candidacy exams and dissertation committees apply to students in this program. Up to six credit hours may be granted for courses completed at another university. Full-time students ordinarily complete 18 to 20 credit hours per academic year.

The Ph.D. curriculum is designed for students to specialize in a substantive area and increase their relevant research skills. Students take three hours of directed research (SWKD 797) in preparation for their independent dissertation research and 12 hours of elective credit, which includes three credit hours of advanced statistics and/or research courses, and another nine credit hours of elective courses or independent study customized to their areas of interest. In addition to elective courses offered by the program, students may enroll in appropriate courses in other schools and departments at VCU with approval of their advisers. A minimum of 39 credit hours of course work, as outlined above, is required before admission to candidacy.

## Curriculum requirements

Courses	Credit hours
<b>Core curriculum</b>	<b>27</b>
SWKD 701 Quantitative Research Methods and Analysis I	4
SWKD 702 Quantitative Research Methods and Analysis II	3
SWKD 703 Philosophical Issues in Social Work Knowledge Building	3
SWKD 704 Multiparadigmatic Qualitative Methods and Analysis	4
SWKD 705 Multivariate Analysis in Social Work and Human Services Research	3
SWKD 708 Social Science Foundations for Social Work	3
SWKD 710 Social Work, Social Welfare and Social Thought	3
SWKD 715 Development and Evaluation of Social Work Practice Theories and Models	3
SWKD 798 Integrative Seminar	1
<b>Electives</b>	<b>12</b>
Advanced statistics and/or research course (Choose one of the following.)	3

STAT 626 Complex Sampling Designs and Variance Estimation	
STAT 642 Design and Analysis of Experiments I	

STAT 643 Applied Linear Regression  
 STAT 675 Time Series Analysis I  
 STAT 744 Regression II  
 SWKD 722 Evaluation of Human Service Programs  
 SWKD 724 Constructivist Research  
 SWKD 791 Topical Seminar  
 URSP 621 Introduction to Geographic Information Systems  
 URSP 622 Community Socioeconomic Analysis Using GIS

Additional elective courses or independent study customized to student's area of interest 9

In addition to elective courses offered by the program, students may enroll in appropriate courses in other schools and departments at VCU with approval of their advisers. Outside elective courses may be selected from classes at the 500 level or higher in BIOS, CCTR, CMSC, CLED, CRJS, ECSE, ECON, EDUS, ENVS, EPID, GSWS, GRDY, GVPA, GRAD, HADM, HCPR, HSEP, HGEN, HUMS, INFO, IDAS, IDDS, MASC, MATX, NURS, OVPR, PHAR, PSYC, PADM, PPAD, SBHD, SLWK, SWKD, SOCY, SEDP, STAT, SYSM, TEDU AND USRP.

<b>Research</b>	<b>15</b>
SWKD 797 Directed Research	3
SWKD 898 Dissertation Research	12
	(minimum)

**Total graduate credit hours required (minimum) 54**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Comprehensive exam/admission to candidacy

Upon completion of all required course work, students are required to take a comprehensive exam under the supervision of a comprehensive examination committee. Through the comprehensive examination, students must demonstrate the ability to integrate the whole of their educational experience by adequately addressing complex questions pertinent to the current and developing knowledge base of the human service field. Students must register for a minimum of one credit hour of independent study (SWKD 792) in the semester in which they take the comprehensive examination.

Upon successful completion of all portions of the comprehensive exam, students are approved for degree candidacy and for registration for a minimum of one credit hour of dissertation research.

If one or more portions of the examination are not passed upon the first attempt, the student receives a mark of I in the independent study course and the following semester reattempts all (or portions) of the comprehensive examination one additional time. The grade of I is changed to A upon successful completion of the comprehensive exam on the second attempt and results in approval of degree candidacy and registration for dissertation research. If a student fails to pass all portions of the comprehensive examination a second time the grade of I is changed to F in the independent study course and the student is dismissed from the program. If a student chooses not to attempt the failed portion(s) of the

comprehensive examination a second time, the grade of I is changed to F in the independent study course and the student is dismissed from the program.

## Dissertation

After admission to candidacy, students proceed to propose, complete and defend their dissertations. The dissertation is completed under the supervision of a dissertation committee. A cumulative total of at least 15 credit hours of dissertation research must be completed in order to receive the Ph.D.; however, students may register for as many credits as needed/desired. Students are required to maintain continuous enrollment of at least three credit hours per semester (excluding summer) until they have attained 12 hours of dissertation credit, after which they may enroll for as few as one credit per semester. The dissertation must represent independent research and should be based on an original question or hypothesis relevant to social work. Successful defense of the dissertation, after the completion of 54 hours of course work and dissertation credits, completes the requirements for the degree.

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

**VCU**

## **2014-15 Graduate and Professional Programs Bulletin**

---

**VCU Life Sciences**

VCU entered a new era when it implemented, as one of its highest priorities, a new university-wide matrix academic organization called VCU Life Sciences, created in response to the need to prepare students for the anticipated growth in new life sciences jobs in the coming decades. The skills identified for these jobs require highly interdisciplinary or multidisciplinary approaches, often falling between the boundaries of traditional academic disciplines. The way that the life sciences are understood and taught is likely to be fundamentally different, with increasing emphasis on systems biosciences as an important complement to more traditional, purely reductive approaches. The objective of Phase II of VCU's strategic plan specifically outlines the need to bring VCU's major academic and administrative divisions together to work on mutual initiatives that will accomplish VCU's goal of national leadership. VCU Life Sciences is a response to that objective.

## Faculty

VCU Life Sciences faculty members are drawn from departments across the university. Lists of participating faculty and academic affiliations are available on the [VCU Life Sciences Web site](#) for each program.

## Facilities

VCU Life Sciences comprises the resources and interests not only of the Monroe Park Campus and the VCU Medical Center, but also the [Virginia BioTechnology Research Park](#) and the [Inger and Walter Rice Center for Environmental Life Sciences](#), a property of 342 acres overlooking the James River in Charles City County. The \$27 million Eugene P. and Lois E. Trani Center for Life Sciences houses administrative offices, the Center for Environmental Studies, state-of-the-art laboratories and classrooms, and a climate-controlled greenhouse. The Center for the Study of Biological Complexity, including the Center for High Performance Computing at VCU, is housed in Grace E. Harris Hall.

VCU Life Sciences supports two university centers for its research and teaching efforts: the [Center for Environmental Studies](#) and the [Center for the Study of Biological Complexity](#).

## VCU Life Sciences courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Undergraduate and graduate Bioinformatics [BNFO course descriptions](#).

Undergraduate and graduate Environmental Studies [ENVS course descriptions](#).

Undergraduate and graduate Environmental Studies Laboratories [ENVZ course descriptions](#).

Undergraduate and graduate Life Sciences [LFSC course descriptions](#).

## Graduate information

## Transfer credit

Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. There is no limit to the number of credits that can be transferred from another program at VCU as long as they have not been previously applied toward another degree. A maximum of six credit hours earned at an institution other than VCU can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of B is required for transfer of credits.

## Grade requirements

Degree candidates must maintain a GPA of 3.0 or greater. GPAs shall be based on all graduate courses attempted after acceptance into the program. The academic standing of any student who receives multiple grades of C, or a grade of D or F will be reviewed for possible termination from the program.

Environmental Studies, Master of (M.Envs.)  
Environmental Studies, Master of (M.Envs.), accelerated Bachelor of Science in Environmental Studies (B.S.) to master's

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Environmental Studies, Master of Science (M.S.)			
Degree: Ph.D.	Semester(s) of entry: Fall (preferred)	Deadline dates: Jan 10	Test requirements: GRE  International students require TOEFL
Special requirements: All application components must be received by Jan. 10 to be competitive.			

In addition to the [general admission requirements of the VCU Graduate School](#), the Ph.D. in Integrative Life Sciences program requires graduation from an accredited college or university or its equivalent with a degree that is preparative for graduate-level study in the life sciences. Applicants should have a minimum GPA of 3.0 on a 4.0 scale, and scores on the Graduate Record Examination should exceed the 50th percentile in each category. For international applicants, satisfactory scores from a standardized test, such as the TOEFL (above 100), must be submitted along with external evaluation of undergraduate transcripts from nondomestic educational institutions ([see Graduate Admissions website](#) for further details).

Letters of recommendation from three present or former professors, advisers or mentors qualified to evaluate the applicant's ability to engage in graduate study in the life sciences are required, as is a written statement describing the applicant's research interests, motivation, research experience, education and goals for pursuing graduate study in this particular program, and preferred research adviser(s), official transcripts from all past postsecondary educational institutions, official GRE scores, and current curriculum vita or resume. Applicants are **strongly** encouraged to contact potential research advisers prior to submitting application materials and to identify potential research advisers in their personal statements.

Students accepted into the program with a 3.4 and higher undergraduate GPA and/or experience of success in graduate course work will be provided with a stipend and tuition and fees for the first year of matriculation. Following satisfactory progress during the first year and the availability of funds, a second year of funding (stipend, tuition and fees) is available. Preference is given to applicants with preidentified research advisers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program mission

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with faculty members from departments across VCU campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels with an emphasis on the concepts of systems biology and biological complexity.

## Program goals

1. **Interdisciplinary knowledge and skills:** The core curriculum of the ILS program will effectively assist students in gaining understanding of modern systems biology along with training in the interdisciplinary skills and knowledge increasingly required for doing effective research in the life sciences. It will also foster progressive development of a mastery of the current state of the research in students' areas of interest as they seek to identify key focus areas for their integrative research.
2. **Research skills:** The mentored research component of the program, building on the core curriculum and interdisciplinary elective course work, will foster development of an ability to synthesize this learning and identify key focus areas for integrative research. It will support students as they learn how to design, implement and interpret interdisciplinary experimental approaches that will best address their research questions.
3. **Communication skills:** Students in the program will develop skills in both written and oral communication of life science knowledge, experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations, as measured by rubric.

3. **Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement experimental protocols and to design and develop experiments, as measured by rubric.
4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems, as measured by rubric.
5. **Integrated knowledge:** The candidate will demonstrate an appropriate level of knowledge of the life sciences and a more detailed understanding of the disciplines most pertinent to their own interdisciplinary research areas, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

## Degree requirements

In addition to general [VCU Graduate School graduation requirements](#), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the degree must be completed within eight years of the first enrollment.

1. **Credit-hour requirements:** Students in the program are required to earn a minimum of 64 graduate-level credit hours. At least one-half of the graduate credit hours presented for graduation must be at the 600 level or higher.
2. **Grade requirement:** Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than two courses. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.
3. **Transfer credit:** Graduate-level VCU course work taken as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded may be evaluated to determine whether it can be used to fulfill degree requirements of this program in accordance with the [VCU Graduate School transfer policy](#). A maximum of six credit hours earned at another institution can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of B is required for credit hours transferred.
4. **Research adviser and committee:** New students entering the program may be initially advised by the program director to assist with initial course selection and to provide advice concerning the program. Students should select a research adviser prior to matriculation, but no later than the end of the first semester. The research adviser may be chosen from among the many graduate faculty members associated with this program from either VCU campus.

Students are required to form a research advisory committee that is headed by the research adviser and that consists of a minimum of five members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary affiliate graduate faculty appointment. The significant areas of the student's research focus should be represented by the members of the research advisory committee. At least two members of the committee shall have primary appointments in departments other than that of the research adviser, with one of those members being integrally associated with the student's research to foster the interdisciplinary intent of this degree program. Students should form their committees during the first semester of study and no later than the end of the second semester of study.

5. **Written and oral examinations:** Before admission to degree candidacy for the Ph.D. degree, students must successfully complete a comprehensive written examination and an oral examination. The student's research advisory committee will administer both exams. Students should take the written exam upon completion of all required didactic course work, usually at the end of the second year of study. It will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student's research field. Upon successful completion of the written examination and submission and acceptance of a research proposal, students should take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the written and oral examinations only once. Written evaluations of the written examination, written thesis proposal and oral thesis proposal defense will be completed by research advisory committee members and provided to the chair of the research advisory

committee to discuss with the student and to the program director for program assessment.

6. **Dissertation research:** The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research, incorporating two or more disciplines and with a systems approach. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Projects may encompass multiple scales of study from molecular to ecosystem levels. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, also is required. Written evaluations of the thesis and the oral defense of the thesis will be completed by research advisory committee members and provided to the chair of the research advisory committee to discuss with the student and to the program director for program assessment. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences.

## Curriculum requirements

A minimum total of 64 graduate credit hours is required and is distributed as follows:

Courses	Credit hours
<b>Core courses (12 credit hours)</b>	
LFSC 510/BIOL 545 Biological Complexity	3
LFSC 630 Integrative Life Sciences Research	2
LFSC 690 Research Seminar in Integrative Life Sciences (1 credit hour; 4 semesters)	4
Scientific integrity	1
OVPR 601 Scientific Integrity	
OVPR 602 Responsible Scientific Conduct	
OVPR 603 Responsible Conduct of Research (does not count toward 3 credit-hour restriction for Preparing Future Faculty courses)	
Technologies course (recommended options; choice depends on student's specialty)	2
ANAT 615 Techniques in Neuroscience and Cell Biology	
BNFO/BIOL 541 Laboratory in Molecular Genetics	
BNFO 650 Sequence Analysis in Biological Systems	
ENVS 602 Environmental Technology	
MICR 607 Techniques in Molecular Biology and Genetics	
MICR/BNFO 653 Advanced Molecular Genetics: Bioinformatics	
<b>Advanced statistics, advanced mathematics or experimental design course (depending on the student's area of research) (minimum 3 credit hours)</b>	<b>3</b>

**Note:** Students are expected to enter the program proficient in statistics at the introductory level, as exemplified by STAT/BIOS 543 Statistical Methods I. Students not at this level, as evidenced by prior course work, will be required to take STAT/BIOS 543 or an equivalent course.

BIOL 606 Quantitative Ecology  
 BIOS/STAT 523 Nonparametric Statistical Methods  
 BIOS 524 Biostatistical Computing  
 BIOS 572 Statistical Analysis of Biomedical Data  
 BNFO/BIOL 601 Integrated Bioinformatics  
 ENVS 603 Environmental Research Methods  
 LFSC 610 Analytical Methods in Biocomplexity Analysis  
 MATH 591 Topics in Mathematics (mathematical biology)  
 STAT/BIOS 544 Statistical Methods II  
 STAT 623 Discrete Multivariate Analysis  
 STAT 643 Applied Linear Regression

Other courses based on approval of research advisory committee

## Elective courses (based on research interest and approved by research advisory committee) (minimum 9 credit hours) 9

500-level or higher courses in ANAT, ANTH, BIOC, BIOL, BIOS, BNFO, CHEM, CLSE, CMSC, EDUS, EGRB, EPID, FRSC, HGEN, MATH, MEDC, MEDP, MICR, NANO, NEUS, OPER, PATH, PCEU, PHAR, PHIS, PHTX, PSCI, PSYC or STAT

**Note:** Only 3 credits of Preparing Future Faculty (GRAD) courses will be accepted toward the 9 credit hours of electives (exclusive of OVPR Responsible Conduct of Research)

## Directed research (minimum 40 credit hours) 40

LFSC 697 Directed Research in Integrative Life Sciences

## Total number of graduate credit hours required (minimum) 64

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Center for Environmental Studies

The undergraduate and graduate programs in environmental studies are interdisciplinary in nature, exposing students to the critical links between the areas of environmental life sciences, technology and policy.

At the undergraduate level, students gain the necessary skills for entry-level field and research positions. Class lectures and guest speakers introduce the importance of policy-making and awareness in the environmental field, while laboratory and internship experiences provide a working knowledge of the latest in environmental technology and field practices.

The graduate programs provide two options for students to further their studies in the environmental life sciences. The Master of Science in Environmental Studies is a thesis-based program designed for those individuals interested pursuing research in the environmental field. The Master of Environmental Studies (the non-thesis program) is a terminal, two-year professional degree for individuals working in the private/public sector of the environmental field.

Environmental Studies, Master of Science (M.S.)

Environmental Studies, Master of (M.Envs.), accelerated Bachelor of Science in Environmental Studies (B.S.) to master's

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Environmental Studies, Master of (M.Envs.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Envs. (non-thesis degree)	Fall	Jul 1	GRE
	Spring	Dec 1	TOEFL for international students
	Summer	May 1	
Special requirements: For students seeking fall admission, preference is given to applications received before March 15. Students wishing to be considered for funding must apply by April 1. See <a href="#">program website</a> .			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have successfully completed undergraduate training and hold a bachelor's degree from an accredited institution reflecting ability to perform at the graduate level.

While qualified students from any baccalaureate program will be considered for admission to the M.S., due to the program goal of linking science and policy, students with narrow training in one field or the other may be required to complete some basic education in the alternate field prior to full admission.

Students admitted to the program are generally drawn from applicants with a minimum undergraduate GPA of 3.0 (on a 4.0 scale or equivalent) and satisfactory scores on a current standardized graduate admissions test (normally the GRE). Applicants holding an undergraduate degree from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 600 on the TOEFL paper-based examination or 100 on the Internet-based examination.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty

of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The goal of the Master of Environmental Studies (M.Envs.) degree program is to provide an interdisciplinary master's degree program in environmental studies that emphasizes the critical links between environmental life sciences and public policy. This goal necessitates training that crosses disciplinary boundaries.

Through a program of study combining environmental science, environmental technology and environmental policy, the successful graduate will gain a range of skills designed to facilitate a science-based understanding of the natural world and human interactions with it. The M.Envs. is specifically designed to provide students with professional training to prepare them for careers involving leadership in environmental science and policy.

## Student learning outcomes

1. Graduates will be able to use emerging environmental technologies and apply them under real-world conditions.
2. Graduates will be able to conduct objective research and/or interpret research findings, and apply scientific concepts and information to the decision-making process for environmental regulations and policies.
3. Graduates will be able to effectively bridge the realms of policy and science on critical environmental issues and be able to make significant contributions in an interdisciplinary professional and academic environment.
4. Graduates will possess a sophisticated and practical understanding of methods for collection, analysis, presentation and critical interpretation of environmental data using appropriate statistical and quantitative tools.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), students must:

1. Complete a minimum of 33 graduate credit hours, approved by the program director, with an overall minimum GPA of 3.0 on all graduate course work attempted after acceptance into the program (At least one-half of required course work must be at the 600 level or higher.)
2. Complete three required core courses (9 credit hours)
3. Complete an additional 21 credit hours of approved graduate electives
4. Complete 3 credit hours of practical experience (either 3 credit hours of internship or independent study)
5. Successfully complete a comprehensive oral examination administered by three faculty members

## Curriculum requirements

ENVS 691 Topics in Environmental Studies (environmental applications of geographic information systems) 3

**Total number of graduate credit hours required (minimum) 33**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

Environmental Studies, Master of (M.Envs.)

Environmental Studies, Master of Science (M.S.)

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

### Admission requirements

Environmental Studies, Master of (M.Envs.), accelerated Bachelor of Science in Environmental Studies (B.S.) to master's			
<b>Degree:</b> M.Envs. (non-thesis degree)	<b>Semester(s) of entry:</b> Fall Spring Summer	<b>Deadline dates:</b>	<b>Test requirements:</b> International students require TOEFL
<b>Special requirements:</b> See <a href="#">program website</a> .			

The accelerated Bachelor of Science and Master of Environmental Studies is restricted to students who have demonstrated strong interest and success in environmental studies. The minimum qualification for admittance to the program is the completion of 90 undergraduate credit hours with an overall GPA of 3.0 and a GPA of 3.3 in the environmental studies major concentration. Students also are required to provide a letter of recommendation from at least one of their major professors attesting to their interest and competence in environmental studies.

Students may apply to the accelerated program after completing a total of 70 credit hours, either by transfer or VCU completion. Students begin accelerated graduate classes after completing a total of 90 undergraduate credits, either by transfer or VCU completion.

#### Special admission requirements

Students failing to meet the minimum standards for admission to the accelerated program due to exceptional circumstances will be allowed to appeal to the environmental studies graduate admissions committee for special admission. However, under no circumstances will students who fail to meet the graduate student standards of performance outlined in the Graduate Bulletin be admitted to the accelerated program.

The environmental studies undergraduate and graduate studies program directors jointly will provide guidance for students who are accepted into the accelerated program. This guidance will include a review of all of the program degree requirements, both graduate and undergraduate, and the development of an appropriate plan of study.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The goal of the Master of Environmental Studies (M.Envs.) degree program is to provide an interdisciplinary master's degree program in environmental studies that emphasizes the critical links between environmental life sciences and public policy. This goal necessitates training that crosses disciplinary boundaries. Through a program of study combining environmental science, environmental technology and environmental policy, the successful graduate will gain a range of skills designed to facilitate a science-based understanding of the natural world and human interactions with it. The M.Envs. is specifically designed to provide students with professional training to prepare them for careers involving leadership in environmental science and policy.

## Student learning outcomes

1. Graduates will be able to use emerging environmental technologies and apply them under real-world conditions.
2. Graduates will be able to conduct objective research and/or interpret research findings, and apply scientific concepts and information to the decision-making process for environmental regulations and policies.
3. Graduates will be able to effectively bridge the realms of policy and science on critical environmental issues and be able to make significant contributions in an interdisciplinary professional and academic environment.
4. Graduates will possess a sophisticated and practical understanding of methods for collection, analysis, presentation and critical interpretation of environmental data using appropriate statistical and quantitative tools.

## Degree requirements

The requirements for the B.S. in Environmental Studies and the Master of Environmental Studies (M.Envs.) are not reduced by the accelerated program. However, 12 credit hours of graduate course work may be applied toward both degrees for qualified students in the program.

Refer to the VCU Undergraduate Bulletin for a complete listing of requirements for the B.S. in Environmental Studies degree program. The following table outlines the undergraduate requirements that would be fulfilled by the corresponding graduate courses. Where special circumstances exist (e.g., student has already completed a fulfilled course prior to applying to the accelerated program), another undergraduate requirement may be fulfilled by the listed graduate course with the approval of both the graduate and undergraduate program directors.

Shared graduate course	Undergraduate course requirement	Credit hours
ENVS 550 Ecological Risk Assessment or ENVS 670 Pollution Physiology	ENVS 330 Environmental Pollution	3
ENVS 601 Survey in Environmental Studies	SOCY/POLI 320 Research Methods in the Social Sciences	3
ENVS elective*	ENVS elective	3
STAT 543 Statistical Methods I	STAT 314 Applications of Statistics	3

**Total number of shared graduate credit hours** **12**

### \*Approved graduate electives

ENVS/URSP/GEOG 521 Introduction to Geographic Information Systems	3
ENVS 591 or ENVS 691 Topics in Environmental Studies	1-3
ENVS 602 Environmental Technology	3
ENVS/PADM 628 Environmental Policy and Administration	3

Following the completion of the undergraduate requirements, the student may complete the master's degree within one year. The recommended approach would be to complete the hands-on component of the degree (internship or independent study) during the summer following completion of the undergraduate requirements. All additional requirements could then be completed in two nine-hour semesters. However, students may also opt to postpone the hands-on component of the degree until the summer following the completion of all graduate course work.

In addition to [general VCU Graduate School graduation requirements](#), students must:

1. Complete a minimum of 33 graduate credit hours, approved by the program director, with an overall minimum GPA of 3.0 on all graduate course work attempted after acceptance into the program (At least one-half of required course work must be at the 600 level or higher.)
2. Complete three required core courses (9 credit hours)
3. Complete an additional 21 credit hours of approved graduate electives
4. Complete 3 credit hours of practical experience (either 3 credit hours of internship or independent study)
5. Successfully complete a comprehensive oral examination administered by three faculty members

## Curriculum requirements

Courses	Credit hours
<b>Core requirements</b>	<b>9</b>
ENVS 601 Survey in Environmental Studies	3
ENVS 603 Environmental Research Methods	3
STAT 543 Statistical Methods I (or equivalent)	3
<b>Practical experience</b> (Students may not apply more than a total of 3 credits of ENVS 692 and/or ENVS 693 to the degree without prior approval of the major adviser and program director.)	<b>3</b>
ENVS 692 Independent Study	1-3
ENVS 693 Internship in Environmental Studies	1-3
<b>Electives</b> (21 credit hours from at least two of the disciplines below. Listed courses are options and are not comprehensive of all electives. Other electives may be allowed with prior permission of major adviser and program director.)	<b>21</b>

## Environmental Studies, Master of Science (M.S.)

#### Graduate program director

J. Clifford Fox, J.D., Ph.D.

Associate Director, Center for Environmental Studies

[cfox@vcu.edu](mailto:cfox@vcu.edu)

(804) 828-7202

**Program website:** [vcu.edu/cesweb](http://vcu.edu/cesweb)

**Refer to the [program search](#) function of the online VCU Bulletins for a complete listing of all programs, concentrations and related curricular options.**

Environmental Studies, Master of (M.Envs.)

Environmental Studies, Master of (M.Envs.), accelerated Bachelor of Science in Environmental Studies (B.S.) to master's

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Environmental Studies, Master of Science (M.S.)			
<b>Degree:</b> M.S.	<b>Semester(s) of entry:</b> Fall Spring Summer	<b>Deadline dates:</b> Jul 1 Dec 1 May 1	<b>Test requirements:</b> GRE  International students require TOEFL
<b>Special requirements:</b> For students seeking fall admission, preference is given to applications received before March 15. Students wishing to be considered for funding must apply by April 1. See <a href="#">program website</a> .			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants must have successfully completed undergraduate training and hold a bachelor's degree from an accredited institution reflecting ability to perform at the graduate level.

While qualified students from any baccalaureate program will be considered for admission to the Master of Science in Environmental Studies (M.S.) program, due to the program goal of linking science and policy, students with narrow training in one field or the other may be required to complete some basic education in the alternate field prior to full admission. Moreover, admission to the M.S. program requires a sponsoring faculty adviser, who will function as a thesis adviser for the admitted student. Students without such sponsorship will be considered for admission to the Master of Environmental Studies (M.Envs.) degree program. If an appropriate adviser is identified following admission, the student's program may be changed to the M.S. program.

Students admitted to the program are generally drawn from applicants with a minimum undergraduate GPA of 3.0 (on a 4.0 scale or equivalent) and satisfactory scores on a current standardized graduate admissions test (normally the GRE). Applicants holding an undergraduate degree from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 600 on the TOEFL paper-based examination or 100 on the Internet-based examination.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for all graduate students in all graduate programs at VCU**

## Program goal

The goal of the M.S. in Environmental Studies is to provide an interdisciplinary master's degree program in environmental studies that emphasizes the critical links between environmental life sciences and public policy. This goal necessitates training that crosses disciplinary boundaries. Through a program of study combining environmental science, environmental technology and environmental policy, the successful graduate will gain a range of skills designed to facilitate a science-based understanding of the natural world and human interactions with it. The M.S. is specifically designed to prepare students for careers involving science and policy research through the completion of a culminating thesis project.

## Student learning outcomes

1. Graduates will be able to use emerging environmental technologies and apply them under real-world conditions.
2. Graduates will be able to conduct objective research and/or interpret research findings, and apply scientific concepts and information to the decision-making process for environmental regulations and policies.
3. Graduates will be able to effectively bridge the realms of policy and science on critical environmental issues and be able to make significant contributions in an interdisciplinary professional and academic environment.
4. Graduates will possess a sophisticated and practical understanding of methods for collection, analysis, presentation and critical interpretation of environmental data using appropriate statistical and quantitative tools.

## Degree requirements

In addition to [general VCU Graduate School graduation requirements](#), students must:

1. Complete a minimum of 33 graduate credit hours, approved by the program director, with an overall minimum GPA of 3.0 on all graduate course work attempted after acceptance into the program (At least one-half of required course work must be at the 600 level or higher).
2. Complete three required core courses (9 credit hours)
3. Complete an additional 18 credit hours of approved graduate electives
4. Develop a research proposal approved by a committee of three faculty members
5. Qualify for degree candidacy based upon satisfactory completion of the above requirements
6. Complete the proposed research culminating in a publication-quality thesis (6 research credit hours)
7. Successfully defend the research thesis

## Curriculum requirements

Courses	Credit hours
<b>Core requirements</b>	<b>9</b>
ENVS 601 Survey in Environmental Studies	3
ENVS 603 Environmental Research Methods	3
STAT 543 Statistical Methods I (or equivalent)	3
<b>Thesis (maximum of 6 credit hours; M.S. degree only)</b>	<b>6</b>
ENVS 697 Research	3
ENVS 698 Thesis	3
<b>Electives</b> (Courses must represent at least two of the disciplines below. Listed courses are options and are not comprehensive of all electives.)	<b>18</b>

Other electives may be allowed with prior permission of the major adviser and program director.)

**Note:** Students may not apply more than 3 credit hours (total) of ENVS 692 and/or ENVS 693 to the degree without prior approval of the major adviser and program director.

### Environmental studies

Bioinformatics, Master of (M.Bin.), accelerated Bachelor of Science in Bioinformatics (B.S.) to master's

Bioinformatics, Master of Science (M.S.)

Bioinformatics, Master of Sciences (M.S.), accelerated Bachelor of Science in Bioinformatics (B.S.) to master's

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

## Admission requirements

Bioinformatics, Master of (M.Bin.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Bin.	Fall Spring Summer	Jul 1 Nov 15 May 1	GRE
<b>Special requirements:</b> International students requiring temporary U.S. visas should apply by April 1 for fall admission, Oct. 1 for spring admission or Feb. 1 for summer admission.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants are encouraged to include in their personal statements, and request that their referees also discuss, one or more examples of creative and analytical contributions they have made to a recent research project (preferred) or to a challenging course assignment.

Because of the interdisciplinary nature of bioinformatics, applications are welcomed from students with various academic backgrounds, such as biology, biotechnology, molecular biology, computer science, mathematics or statistics. Our program provides "bridge curricula" to strengthen students' preparation for graduate study in bioinformatics.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

Established and administered by the VCU Center for the Study of Biological Complexity, the Master of Bioinformatics (M.Bin.) degree program provides a "professional science master's" option for students desiring maximally efficient graduate training toward a career in industry or elsewhere. Students enter the program from a variety of academic backgrounds (biology, chemistry, computer science, mathematics/statistics, etc.), assisted by flexible "bridge curricula" designed to help them meet program prerequisites. This P.S.M. program is expected to attract capable students who might otherwise not undertake graduate training. The program replaces thesis research with a summer-long professional externship and associated training. Students will have an effective exposure to the biotech industry and other career options and to real-life applications of their learning.

The Master of Bioinformatics degree program will prepare students to:

1. **Synthesize and apply interdisciplinary subject matter:** The M.Bin. degree program seeks to provide students with the skills and knowledge required to advance into Ph.D. training programs or research positions. The program provides a framework for the progressive development of a mastery of the interdisciplinary subject matter pertinent to bioinformatics and an ability to synthesize this information and apply it to key areas of investigation and experimentation in bioinformatics.

- Design, implement and interpret experimental approaches:** The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches.
- Develop communication skills:** In addition, the program will develop skills in oral and written communication of interdisciplinary science concepts, experimental design, results and interpretation.

## Student learning outcomes

- Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
- Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations, as measured by rubric.
- Experimental design competency:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement bioinformatics experimental protocols and to design and develop experiments, as measured by rubric.
- Problem-solving skills:** The candidate will demonstrate an appropriate level of ability to analyze scientific problems including pertinent datasets and design and develop appropriate methods to solve said problems, as measured by rubric.
- Integrated knowledge of bioinformatics:** The candidate will demonstrate an appropriate level of knowledge of fundamentals of molecular biology, computational science, statistics and a more detailed understanding of an individual area of internship research, including an appropriate familiarity with the research literature, as measured by rubric.

## Degree requirements

### Prerequisites and bridge curricula for master's programs

While an ideal preparation for the bioinformatics master's programs would include substantial work in molecular biology, computer science, mathematics and statistics, the program has been designed to provide "bridge curricula" to accommodate academically strong students with majors in any one of these or related disciplines. These students would develop with the assistance of their advisers a "bridge curriculum" of largely undergraduate courses to meet the prerequisites for the program and prepare them for graduate-level work.

Program prerequisites are listed below. In general, students will not need to address the set corresponding to their undergraduate majors, but will usually need to address the other two sets. It is expected that all bridge course work will be completed during the first year. While bridge courses may be completed prior to initiating the graduate program, this is not required, and most students are able, through advising, to complete bridge courses alongside graduate course work during the first year of the program.

- Biology/genomic prerequisites:** an introductory knowledge of biochemistry and molecular biology, one semester of organic chemistry (e.g. CHEM 301), cell biology (e.g. BIOL 218) and Essentials of Molecular Biology in Bioinformatics (two-credit module: BNFO 507)
- Computational science prerequisites:** an introductory knowledge of discrete mathematics (e.g. MATH 211) and an introductory knowledge of computer science, including at least one general computer programming language, met by taking structured programming (e.g. CMSC 255) and data structures and advanced programming (e.g. CMSC 256)
- Quantitative/statistical prerequisites:** an introductory knowledge of mathematics/statistics, met by taking calculus with analytic geometry I (e.g. MATH 201) and Introduction to Statistical Computing (STAT 321) or Applied Statistics for Engineers and Scientists (STAT 541)

### Bioinformatics externship

In addition to general [VCU Graduate School graduation requirements](#), students enrolled in the M.Bin. degree program complete a 10- to 12-week full-time externship at an industrial, government or academic site, usually during the summer between the first and second years of the bioinformatics program. In preparation for this externship, students will enroll in BNFO 620 Bioinformatics

Practicum in the semester preceding their externships. Under the supervision of their major advisers and Graduate Advisory Committee, the external supervisor, and the coordinator of the bioinformatics practicum course, each student must develop and write a short proposal outlining the plans for the externship. The project must be approved by the student's GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project, including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses. Research projects will be based on ongoing research in the laboratories of the participating external advisers. Students in the program may perform research on a broad range of subjects, from molecules to ecosystems, encompassing the field of bioinformatics.

In the semester following the externship experience, M.Bin. students shall prepare written papers describing the completed research performed during their externships following the format of the [Graduate School's Thesis and Dissertation Manual](#). An oral defense, consisting of a public presentation of the paper and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members and the adviser of the externship, shall be scheduled to examine the student's underlying fundamental knowledge of the disciplines encompassed by the student's research. Announcement of the oral defense, including the candidate's name, project title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

## Curriculum requirements

Courses	Credit hours
<b>Core</b>	<b>22</b>
BNFO 501 Introduction to Physical Implementation of Databases	1
BNFO/BIOL 540 Fundamentals of Molecular Genetics	3

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

## Admission requirements

Bioinformatics, Master of (M.Bin.), accelerated Bachelor of Science in Bioinformatics (B.S.) to master's			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Bin. (non-thesis degree)	Fall Spring Summer	Jul 1 Nov 15 May 1	GRE
<b>Special requirements:</b> Applicants must have junior or senior status in VCU's Bachelor of Science (B.S.) in Bioinformatics program and should discuss their interests with the bioinformatics coordinator during the junior year in order to plan the graduate courses to be taken during the senior year and shared between the two degrees.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants are encouraged to include in their personal statements, and to request that their referees also discuss, one or more examples of creative and analytical contributions they have made to a recent research project (preferred) or to a challenging course assignment.

The accelerated bachelor's to master's program in bioinformatics permits selected students majoring in bioinformatics to earn the bachelor's and master's degrees in a minimum of five years by taking certain graduate-level courses during the senior year of the undergraduate program. The program is restricted to students with strong credentials and a clear interest in a career in the field of bioinformatics.

In order to be admitted into the program, a student must be a VCU bioinformatics major, must have completed 90 undergraduate credit hours with an overall GPA of 3.0, including a substantial amount of collateral and core course work within the major and evidence of strong academic achievement. An application must be submitted to [Graduate Admissions](#). Students also are required to provide at least two letters of recommendation from their major professors attesting to their interest and competence in bioinformatics. Most students will be able to initiate the application process during the second semester of the junior year.

Following acceptance into the accelerated program, students must continue to meet the requirements stated above throughout the senior year, as well as the graduate standards of performance specified in this bulletin, in order to be awarded formal acceptance into the graduate program, which typically takes place just prior to the fall semester of the fifth year.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

Established and administered by the VCU Center for the Study of Biological Complexity, the Master of Bioinformatics (M.Bin.) degree program provides a "professional science master's" option for students desiring maximally efficient graduate training toward a career in industry or elsewhere. Students enter the program from a variety of academic backgrounds (biology, chemistry, computer science, mathematics/statistics, etc.), assisted by flexible "bridge curricula" designed to help them meet program prerequisites. This P.S.M. program is expected to attract capable students who might otherwise not undertake graduate training. The program replaces thesis research with a summer-long professional externship and associated training. Students will have an effective exposure to the biotech industry and other career options and to real-life applications of their learning.

The Master of Bioinformatics degree program will prepare students to:

1. **Synthesize and apply interdisciplinary subject matter:** The M.Bin. degree program seeks to provide students with the skills and knowledge required to advance into Ph.D. training programs or research positions. The program provides a framework for the progressive development of a mastery of the interdisciplinary subject matter pertinent to bioinformatics and an ability to synthesize this information and apply it to key areas of investigation and experimentation in bioinformatics.

2. **Design, implement and interpret experimental approaches:** The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches.
3. **Develop communication skills:** In addition, the program will develop skills in oral and written communication of interdisciplinary science concepts, experimental design, results and interpretation.

## Student learning outcomes

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations, as measured by rubric.
3. **Experimental design competency:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement bioinformatics experimental protocols and to design and develop experiments, as measured by rubric.
4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of ability to analyze scientific problems including pertinent datasets and design and develop appropriate methods to solve said problems, as measured by rubric.
5. **Integrated knowledge of bioinformatics:** The candidate will demonstrate an appropriate level of knowledge of fundamentals of molecular biology, computational science, statistics and a more detailed understanding of an individual area of internship research, including an appropriate familiarity with the research literature, as measured by rubric.

## Degree requirements

Accelerating students take as many as 12 graduate credits during the senior year. These credits may be applied to both the B.S. and M.Bin. degrees. These courses must be chosen in consultation with their undergraduate academic advisers. A sample set of shared credits is provided below.

1. BNFO 620 Bioinformatics Practicum may replace BNFO 420 Applications in Bioinformatics 3
2. Course work taken to meet master's requirements replaces undergraduate program electives or helps student meet general degree requirements for the B.S. degree (e.g. upper-level credits, total credits). 4
3. BIOL/BNFO 540 Foundations of Molecular Genetics and BIOL/BNFO 541 Laboratory in Molecular Genetics may be counted toward both degrees. 5

**Total shared graduate credit hours 12**

### Prerequisites and bridge curricula for master's programs

Program prerequisites are listed below. In general, bioinformatics undergraduate students will meet most prerequisite requirements while completing the undergraduate major. It is expected that any remaining bridge course work will be completed during the first year of the graduate program.

1. **Biology/genomic prerequisites:** an introductory knowledge of biochemistry and molecular biology, one semester of organic chemistry (e.g. CHEM 301), cell biology (e.g. BIOL 218) and Essentials of Molecular Biology in Bioinformatics (two-credit module: BNFO 507)
2. **Computational science prerequisites:** an introductory knowledge of discrete mathematics (e.g. MATH 211) and an introductory knowledge of computer science, including at least one general computer programming language, met by taking structured programming (e.g. CMSC 255) and data structures and advanced programming (e.g. CMSC 256)
3. **Quantitative/statistical prerequisites:** an introductory knowledge of mathematics/statistics, met by taking calculus with analytic geometry I (e.g. MATH 201) and Introduction to Statistical Computing (STAT 321) or Applied Statistics for Engineers and Scientists (STAT 541)

### Bioinformatics externship

In addition to general [VCU Graduate School graduation requirements](#), students enrolled in the M.Bin. degree program complete a 10- to 12-week full-time

externship at an industrial, government or academic site, usually during the summer between the first and second years of the bioinformatics program. In preparation for this externship, students will enroll in BNFO 620 Bioinformatics Practicum in the semester preceding their externships. Under the supervision of their major advisers and Graduate Advisory Committee, the external supervisor, and the coordinator of the bioinformatics practicum course, each student must develop and write a short proposal outlining the plans for the externship. The project must be approved by the student's GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project, including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses. Research projects will be based on ongoing research in the laboratories of the participating external advisers. Students in the program may perform research on a broad range of subjects, from molecules to ecosystems, encompassing the field of bioinformatics.

In the semester following the externship experience, M.Bin. students shall prepare written papers describing the completed research performed during their externships following the format of the [Graduate School's Thesis and Dissertation Manual](#). An oral defense, consisting of a public presentation of the paper and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members and the adviser of the externship, shall be scheduled to examine the student's underlying fundamental knowledge of the disciplines encompassed by the student's research. Announcement of the oral defense, including the candidate's name, project title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

## Curriculum requirements

Courses	Credit hours
<b>Core</b>	<b>22</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Admission requirements

Bioinformatics, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE
	Spring	Nov 15	
	Summer	May 1	
<b>Special requirements:</b> International students requiring temporary U.S. visas should apply by April 1 for fall admission, Oct. 1 for spring admission or Feb. 1 for summer admission.			

In addition to the [general admission requirements of the VCU Graduate School](#), applicants are encouraged to include in their personal statements, and request that their referees also discuss, one or more examples of creative and analytical contributions they have made to a recent research project (preferred) or to a challenging course assignment.

Because of the interdisciplinary nature of bioinformatics, applications are welcomed from students with various academic backgrounds, such as biology, biotechnology, molecular biology, computer science, mathematics or statistics. Our program provides "bridge curricula" to strengthen students' preparation for graduate study in bioinformatics.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goals

The VCU Center for the Study of Biological Complexity created and administers the Master of Science (M.S.) in Bioinformatics degree program to provide interested students with the traditional "thesis master's," including the development, implementation, writing and presentation of a coherent research project under the supervision of a graduate faculty member. This degree is most appropriate for students committed to initiating research careers in a variety of settings, including students considering pursuing later work toward a Ph.D. Students enter the program from a variety of academic backgrounds (biology, chemistry, computer science, mathematics/statistics, etc.) assisted by flexible "bridge curricula" designed to help them meet program prerequisites. Students will have an effective exposure to the biotech industry and other career options and to real-life applications of their learning.

The Master of Science (M.S.) in Bioinformatics degree program will prepare students to:

1. **Synthesize and apply interdisciplinary subject matter:** The M.Bin. degree program seeks to provide students with the skills and knowledge required to advance into Ph.D. training programs or research positions. The program provides a framework for the progressive development of a mastery of the interdisciplinary subject matter pertinent to bioinformatics and an ability to synthesize this information and apply it to key areas of investigation and experimentation in bioinformatics.
2. **Design, implement and interpret experimental approaches:** The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches.
3. **Develop communication skills:** In addition, the program will develop skills in oral and written communication of interdisciplinary science concepts, experimental design, results and interpretation.

## Student learning outcomes

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

- Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations, as measured by rubric.
- Experimental design competency:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement bioinformatics experimental protocols and to design and develop experiments, as measured by rubric.
- Problem-solving skills:** The candidate will demonstrate an appropriate level of ability to analyze scientific problems including pertinent datasets and design and develop appropriate methods to solve said problems, as measured by rubric.
- Integrated knowledge of bioinformatics:** The candidate will demonstrate an appropriate level of knowledge of fundamentals of molecular biology, computational science, statistics and a more detailed understanding of an individual area of internship research, including an appropriate familiarity with the research literature, as measured by rubric.

## Degree requirements

### Prerequisites and bridge curricula for master's programs

While an ideal preparation for the bioinformatics master's programs would include substantial work in molecular biology, computer science, mathematics and statistics, the program has been designed to provide "bridge curricula" to accommodate academically strong students with majors in any one of these or related disciplines. These students would develop with the assistance of their advisers a "bridge curriculum" of largely undergraduate courses to meet the prerequisites for the program and prepare them for graduate-level work.

Program prerequisites are listed below. In general, students will not need to address the set corresponding to their undergraduate majors, but will usually need to address the other two sets. It is expected that all bridge course work will be completed during the first year. While bridge courses may be completed prior to initiating the graduate program, this is not required, and most students are able, through advising, to complete bridge courses alongside graduate course work during the first year of the program.

- Biology/genomic prerequisites:** an introductory knowledge of biochemistry and molecular biology, one semester of organic chemistry (e.g. CHEM 301), cell biology (e.g. BIOL 218) and Essentials of Molecular Biology in Bioinformatics (two-credit module: BNFO 507)
- Computational science prerequisites:** an introductory knowledge of discrete mathematics (e.g. MATH 211) and an introductory knowledge of computer science, including at least one general computer programming language, met by taking structured programming (e.g. CMSC 255) and data structures and advanced programming (e.g. CMSC 256)
- Quantitative/statistical prerequisites:** an introductory knowledge of mathematics/statistics, met by taking calculus with analytic geometry I (e.g. MATH 201) and Introduction to Statistical Computing (STAT 321) or Applied Statistics for Engineers and Scientists (STAT 541)

### Thesis research

In addition to general [VCU Graduate School graduation requirements](#), students in the M.S. program must perform a credible original investigation under the supervision of their major advisers and the Graduate Advisory Committee. Students must develop and write short proposals in consultation with their major advisers and GAC. The project must be approved by the student's GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project, including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses.

Research projects will be based on ongoing research in the laboratories of faculty in the CSBC and across both campuses of VCU and the Virginia BioTechnology Research Park. Students in the program may perform research on the broad range of subjects, from molecules to ecosystems, studied by CSBC faculty.

Students shall prepare a written thesis describing the completed research performed during their tenure in the M.S. in Bioinformatics program following the format of the [Graduate School Thesis and Dissertation Manual](#). An oral defense, consisting of a public presentation of the thesis and a committee meeting to

discuss the thesis, under the direction of the GAC but open to all faculty members, shall be scheduled to examine the student's research, thesis and underlying fundamental knowledge of the discipline encompassed by the student's research. Announcement of the oral defense, including the candidate's name, thesis title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

### Thesis research

In addition to general [VCU Graduate School graduation requirements](#), students in the M.S. program must perform a credible original investigation under the supervision of their major advisers and the Graduate Advisory Committee. Students must develop and write short proposals in consultation with their major advisers and GAC. The project must be approved by the student's GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project, including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses.

Research projects will be based on ongoing research in the laboratories of faculty in the CSBC and across both campuses of VCU and the Virginia BioTechnology Research Park. Students in the program may perform research on the broad range of subjects, from molecules to ecosystems, studied by CSBC faculty.

Students shall prepare a written thesis describing the completed research performed during their tenure in the M.S. in Bioinformatics program following the format of the [Graduate School Thesis and Dissertation Manual](#). An oral defense, consisting of a public presentation of the thesis and a committee meeting to discuss the thesis, under the direction of the GAC but open to all faculty members, shall be scheduled to examine the student's research, thesis and underlying fundamental knowledge of the discipline encompassed by the student's research. Announcement of the oral defense, including the candidate's name, thesis title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

## Curriculum requirements

Courses	Credit hours
<b>Core</b>	<b>22</b>
BNFO 501 Introduction to Physical Implementation of Databases	1
BNFO 508 Introduction to Bioinformatics Research	2
BNFO/BIOL 540 Fundamentals of Molecular Genetics	3
BNFO 600 Basic Scripting Languages	2
BNFO/BIOL 601 Integrated Bioinformatics	3
BNFO 690 Seminars in Bioinformatics	1
BNFO 697 Directed Research in Bioinformatics	6
	(minimum)
CMSC 508 Database Theory	3
OVPR 601 Scientific Integrity	1
<b>Recommended electives</b>	<b>12</b>
BIOS 567 Statistical Methods for High-throughput Genomics Data I	3
BNFO/BIOL 541 Laboratory in Molecular Genetics	2

CLSE 562 Advanced Systems Biology Engineering	3
CMSC 501 Advanced Algorithms	3
MATH 580 Methods of Applied Mathematics for the Life Sciences: Discrete	3
MATH 581 Methods of Applied Mathematics for the Life Sciences: ODE	3
MATH 582 Methods of Applied Mathematics for the Life Sciences: PDE	3
PHYS 591 Topics in Physics (modeling, computing and biocomplexity)	3
<b>Total graduate credit hours required (minimum)</b>	<b>34</b>

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements

**Division of Community Engagement**

817 South Cathedral Place  
P.O. Box 843062  
Richmond, Virginia 23284-3062  
Phone: (804) 828-8848  
Fax: (804) 828-2756  
[www.community.vcu.edu](http://www.community.vcu.edu)

**Catherine W. Howard, Ph.D.**

Vice Provost, Division of Community Engagement, and associate professor of psychology

The Division of Community Engagement provides Virginia Commonwealth University with a centralized administrative unit focused on community engagement and nontraditional programs. In keeping with VCU's mission, the office:

- Facilitates and coordinates innovative academic programs, on and off campus, to enhance the community's access to VCU.
- Supports the involvement of faculty and students on the Monroe Park Campus and MCV Campus in community partnerships.
- Creates opportunities for interdisciplinary, community-based collaborations that integrate research, teaching and service.

The Division of Community Engagement consists of the Office of Continuing Studies and Special Programs and VCU Community Solutions. The division resides within the Office of the Provost and Vice President for Academic Affairs and assumes administrative responsibility for academic programs including off-campus courses, off-campus graduate art courses and the Master of Interdisciplinary Studies in Interdisciplinary Art, service-learning courses and the Service-Learning Associates Program, Nonprofit Learning Point, and the Retired Faculty Council. Additionally, the division administers various university-community partnerships that address pressing social concerns in the community including the Carver-VCU Partnership, Lobs & Lessons, VCU AmeriCorps, America Reads and the Virginia Mentoring Partnership.

## Office of Continuing Studies and Special Programs

The university provides numerous opportunities for adult education, off-campus instruction and professional development through the Office of Continuing Studies and Special Programs. Continuing studies programs offer the same course work and academic credit as traditional university courses and are fully degree-applicable within the normal standards of VCU's college and schools.

The office attempts to address the educational and professional training needs of the community by providing flexible, cost-effective instruction that returns valued and needed knowledge into the community.

Program examples include the Nonprofit Learning Point certificate program, profession-specific and introductory Spanish courses, specialization and recertification programs for teachers, off-campus degree programs including the R.N. to B.S.N. program, the NOVA M.S.W. program, and advanced-study courses for gifted high school students.

For more information, call (804) 828-8819 or visit [www.community.vcu.edu](http://www.community.vcu.edu).

[Off-Campus Graduate Art](#)  
[Master of Interdisciplinary Studies in Interdisciplinary Art](#)  
[Nonprofit Learning Point](#)

## Off-Campus Graduate Art

Since 1993, VCU has offered off-campus graduate art classes in locations from the Washington, D.C., area to Tidewater. Classes are open to all qualified students (persons with undergraduate degrees in art or equivalent experience), but are particularly designed for art teachers interested in license renewal, a graduate degree program or personal enrichment. During the fall and spring semesters, classes meet one evening per week, usually from 4:30 to 8:30 p.m. In the summer semester, classes are scheduled for 10 all-day workshops over a two- or three-week period. A degree program, the Master of Interdisciplinary Studies in Interdisciplinary Art, is offered, but students need not be in a degree program in order to take classes. For more information, call (804) 592-2600 or visit [www.community.vcu.edu](http://www.community.vcu.edu).

## Master of Interdisciplinary Studies in Interdisciplinary Art

The Master of Interdisciplinary Studies in Interdisciplinary Art degree is jointly administered by the School of the Arts and the Division of Community Engagement. It is not the equivalent of a Master of Fine Arts degree, but is an additional option for qualified persons, especially art teachers, who are interested in studio art classes. Classes are offered in public school art rooms from Fairfax County to Virginia Beach, in the late afternoon during the regular school year and in all-day workshops during the summer. The M.I.S. degree requires the completion of 39 graduate credits, including at least nine and no more than 15 credits in each of two focus areas. Focus areas include, but are not limited to, crafts, computers and the arts, mixed media, painting, photography, printmaking, drawing, and sculpture. In addition, the student must complete from three to 15 credits of art electives and six credits of an approved final project, including a graduate exhibition and a final paper. For more information, call (804) 828-8819 or visit [www.community.vcu.edu](http://www.community.vcu.edu).

## Nonprofit Learning Point

Since 1997 the university has been a leading partner in a community collaborative that sponsors Nonprofit Learning Point (formerly the Especially for Nonprofit Organizations Program). In addition to being a sponsoring partner, VCU also manages the program, which provides educational and networking opportunities as well as capacity-building for the vast network of nonprofit organizations in the greater-Richmond area. The program is open to any paid or volunteer staff member of a nonprofit organization and offers the chance to earn both academic credit and a certificate of achievement in nonprofit management (after 12 courses). Classes usually meet for two days, one week apart, from 9 a.m. to 3 p.m., throughout the city of Richmond. An annual conference and certificate awards ceremony are held each fall. Class and conference topics include, but are not limited to, strategic management, communications, legal issues for nonprofits, and technology skills. For more information, call (804) 827-0246 or visit [www.nonprofitlearningpoint.org](http://www.nonprofitlearningpoint.org).

## Office of VCU Community Solutions

The primary mission of VCU Community Solutions is to connect the university with the community to create opportunities for social change. Campus and community partners create a unique synergy of collaborative research, teaching and service. An interdisciplinary team of faculty and community partners is responsible for the generation and implementation of community-based projects. Students become involved through service-learning courses and participation on community-based research teams. For more information, call (804) 828-8824 or visit [www.community.vcu.edu](http://www.community.vcu.edu).

[Service-Learning](#)  
[VCU America Reads Program](#)  
[VCU AmeriCorps](#)  
[Carver-VCU Partnership](#)

## Service-Learning

Service-learning integrates community service with traditional academic courses in order to enhance academic learning, facilitate the development of students into responsible citizens and meet community-identified needs. Each student participates in an organized community service project that directly relates to the subject matter of the course and which meets community-identified needs. The students then participate in reflection activities, which are facilitated in such a way so as to increase their understanding and application of course content and enhance their sense of civic responsibility. The community organization defines the service need and the students learn and grow from their service through reflection on their experience. A listing of service-learning courses is provided in the [Schedule of Classes](#) each semester. For more information, call (804) 827-8215 or visit [www.servicelearning.vcu.edu](http://www.servicelearning.vcu.edu).

## VCU America Reads Program

The VCU America Reads Program places college work-study students in local elementary schools to provide comprehensive reading support to students who are below grade level in reading. The program works in partnership with Richmond City Schools as well as schools in the surrounding counties to identify elementary school children who are in need of extra assistance. Reading support is provided at

partner schools during the normal school day as well as during academically focused after-school programs. Program applications are available throughout the year at the following locations:

- Community Programs Office located at 1103 W. Marshall St.
- VCU [Career Center](#) and [Student Activities Center](#) located in the University Student Commons, 907 Floyd Ave.
- VCU Office of Financial Aid located at 1015 Floyd Ave.

For more information, visit [www.community.vcu.edu](http://www.community.vcu.edu). Applications may also be downloaded at the America Reads Web site at [www.ed.gov/inits/americanreads](http://www.ed.gov/inits/americanreads) or they can be mailed upon request by calling (804) 828-1907.

## VCU AmeriCorps

Established in 1995, the AmeriCorps program at VCU has an educational focus with the goal of helping improve the literacy skills of local children and families. Reading by third grade has been identified by the Richmond community as a critical preventive strategy in addressing the health and safety needs of children in the metro area. VCU AmeriCorps members address this need by providing comprehensive reading support to elementary school students who are struggling academically. Members also enhance family literacy skills and parent involvement at partner schools by lending support to existing services as well as developing new programs to meet specific needs. Applications are available beginning in March at the following locations:

- Community Programs Office located at 1103 W. Marshall St.
- VCU [Career Center](#) and [Student Activities Center](#) located in the University Student Commons, 907 Floyd Ave.
- VCU Office of Financial Aid located at 1015 Floyd Ave.

For more information, visit [www.community.vcu.edu](http://www.community.vcu.edu). Applications can also be downloaded at the AmeriCorps Web site at [www.americorps.gov](http://www.americorps.gov), or applications can be mailed upon request by calling (804) 828-1907.

## Carver-VCU Partnership

In the spirit that partnerships, not fences, promote safe and nurturing communities, VCU has created a partnership with its northern-boundary neighbor, the Carver community. The Carver-VCU Partnership strives to create a shared urban community with a commitment to improving the neighborhood's quality of life including its health, community development, youth development, and safety while extending the experience of the community into the classroom and the university. For more information, call (804) 827-1904 or visit [www.community.vcu.edu](http://www.community.vcu.edu).

**Luke Schultheis, Ph.D.**

Vice Provost, Division of Strategic Enrollment Management

The [Division of Strategic Enrollment Management](#) provides primary oversight for the recruitment, retention and graduation of students at all levels. The purpose of the division is to ensure academic quality and student success, which is dependent upon the recruitment, retention and timely graduation of a talented and diverse student body. Our goals and aspirations are clearly articulated in the university's strategic plan, and a primary component of our vision is to ensure that we attract and retain students who will graduate at a higher rate and who will contribute to a highly skilled 21st-century workforce.

Within the division there are several operational areas: Admissions, Degree Audit, Financial Aid, Military Student Services, New Student Programs, Records and Registration, Student Accounting, the Student Services Center and the Transfer Center. The Office of Admissions manages the recruitment and application processes for all graduate, international and undergraduate applicants. Military Student Services works with veterans, active service members, spouses and dependents to ease the transition from military life to the world of academics. The offices of Degree Audit, Financial Aid, Records and Registration, Student Accounting and the Student Services Center oversee and manage the matriculation, financial aid, billing and graduation processes for all new and continuing VCU students. The Office of New Student Programs provides new students and their families with resources and programming to support the academic experience, while the VCU Transfer Center offers resources to transfer students to ensure a smooth and seamless transition to the university and support for successful progress toward graduation.

For more information, please visit the [Division of Strategic Enrollment Management](#) website.

[Office of the Associate Vice Provost and Dean of Student Affairs](#)  
[Office of the Associate Vice Provost for Student Affairs](#)  
[Office of the Associate Dean of Student Affairs, MCV Campus](#)

## Office of the Vice Provost for Student Affairs

**Henry G. Rhone**  
Vice Provost for Student Affairs

The Office of the Vice Provost provides leadership and direction for the Division of Student Affairs. The Division of Student Affairs is a dynamic division promoting academic success and development of the whole person. The division seeks to create a student-centered culture promoting community, encouraging engagement and developing students to be contributing citizens in a global and diverse society through its programs, services, facilities and activities.

The Division of Student Affairs comprises departments promoting the intellectual, cultural, personal, social, moral, financial, physical and psychological development of Virginia Commonwealth University students. Departments in the division include: Office of the Associate Vice Provost and Dean of Student Affairs, Monroe Park Campus; the Office of the Associate Dean of Student Affairs, MCV Campus; the Office of the Associate Vice Provost of Student Affairs; University Student Commons and Activities; the University Career Center; University Counseling Services; Disability Support Services; University Student Health Services; Office of Multicultural Student Affairs; Recreational Sports; Office of Student Conduct and Academic Integrity; Student Media; Financial Management and Technology; and Residential Life and Housing.

The division provides administrative support for key policies of the university, including the VCU Honor System and the Rules and Procedures. Most Division of Student Affairs publications are available on the Web at [www.students.vcu.edu](http://www.students.vcu.edu).

The Office of the Vice Provost for Student Affairs is located in the Sitterding House at 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 828-1244.

[back to top](#)

## Office of the Associate Vice Provost and Dean of Student Affairs

**Reuban B. Rodriguez**  
Associate Vice Provost and Dean of Student Affairs

The Office of the Associate Vice Provost and Dean of Student Affairs is actively involved in understanding the needs of students, improving the quality of student life, supporting student success, promoting leadership development and disseminating important information for students. The office provides services and support to students through a wide range of programs, activities and resources. The office assists students in solving problems and advocates for students when appropriate. The office provides information and referral to students, faculty, staff and parents on a variety of student-related issues. The office provides oversight for the administration of the university's disciplinary procedures and the honor system.

The dean sits on a number of university committees, participates in orientation activities, provides supervision for several departments of the Division of Student Affairs and serves as a key administrator for several major policy statements of the university including the VCU Honor System.

Students, parents of students and staff who have issues they wish to discuss or who are interested in various programs and opportunities should visit the dean's office, located in the Sitterding House, 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 828-8940; email: [vcudean@vcu.edu](mailto:vcudean@vcu.edu).

[back to top](#)

## Office of the Associate Vice Provost for Student Affairs

**Charles Klink**  
Associate Vice Provost for Student Affairs

The Office of the Associate Vice Provost for Student Affairs provides assistance to the vice provost for student affairs in the overall administration of the Division of Student Affairs. This office is actively involved in understanding students and their needs, improving the quality of student life, and collecting and disseminating information important to students and to the university.

The associate vice provost serves as the division ombudsman in addressing and resolving student issues and concerns inhibiting success at the university, provides leadership for assessment and professional development activities for the division, and oversees a number of initiatives focused on utilizing external and internal resources to support and recognize student success. The associate vice provost provides supervision for several departments in the division including the University Career Center, Disability Support Services, University Counseling Services and Student Media.

The Office of the Associate Vice Provost for Student Affairs is located in the Sitterding House at 901 Floyd Ave., P.O. Box 843017, Richmond, VA 23284-3017; telephone: (804) 828-7525; email: [cjklink@vcu.edu](mailto:cjklink@vcu.edu).

[back to top](#)

## Office of the Associate Dean of Student Affairs, MCV Campus

**Napoleon Peoples**  
Associate Dean of Student Affairs, MCV Campus

The Office of the Associate Dean works closely with the Office of the Associate Vice Provost and Dean of Student Affairs in serving as a resource for students, parents, faculty and staff. The associate dean serves as the primary liaison between the organized student body on the MCV Campus and the university, providing coordination and leadership for student affairs and related staff.

The associate dean serves as the faculty adviser to the MCV Campus Student Government Association. The associate dean represents the Division of Student Affairs on several universitywide committees and also participates in the general orientation sessions for each school on the MCV Campus. The associate dean maintains an open-door policy and will advise students, parents, faculty and staff on university-related issues or procedures.

The associate dean's office is located in the Hunton Student Center, Suite 205, 1110 E. Broad St., P.O. Box 980004; telephone: (804) 828-0525; email: [npeoples@vcu.edu](mailto:npeoples@vcu.edu).

[back to top](#)

## University Student Commons and Activities

**Reuban Rodriguez**  
Interim Director  
[www.usca.vcu.edu](http://www.usca.vcu.edu)

The facilities, services and programs of University Student Commons and Activities (USC&A) are designed and implemented to bring together all members of the Virginia Commonwealth University community — students, faculty, staff, alumni and guests — thereby contributing to intellectual, emotional and social growth through informal interaction.

[Facilities](#)  
[Programs](#)  
[Services](#)

## Facilities

USC&A manages three student centers on the Monroe Park and MCV Campuses of VCU.

The University Student Commons is the main student-life facility for the Monroe Park Campus. The Commons, located in the heart of VCU's Monroe Park Campus, is a great place to meet friends, host an event, get involved, or study. The Park Place Food Court, Commons Café and Commons Convenience provide a wide variety of dining options. Break Point, located in the Lower Level of the Commons, is the university's game room with pool tables, arcades and Thunder Bowl. The Commons is home to the Student Organization Center, Off-campus Student Services, University Career Center, University Counseling Services, Disability Support Services, the Office of Multicultural Student Affairs, and the Student Government Association.

The Hunton Student Center and the Jonah L. Larrick Student Center are both located on the MCV Campus. Hunton Student Center is a great place to study or grab a bite to eat between classes. The renovated 1841 church building has a state-of-the-art learning center, managed by VCU Libraries, along with spacious study areas on two floors including private group-study rooms. Also located in Hunton are the offices for the Associate Dean of Students, MCV Student Government Association, the Hideaway Café, and a student recreation area. Larrick is a multipurpose room used for dances, lectures, receptions, and other functions. The first floor of Larrick Student Center also serves as a student dining facility.

Information centers can be found at both the Commons and Hunton Student Center. A complete list of services and programs that these facilities offer is available online at [www.usca.vcu.edu](http://www.usca.vcu.edu).

[Back to top](#)

## Programs

USC&A offers a wide variety of programs and leadership opportunities for students on both the Monroe Park Campus and MCV Campus. The following programming offices are included in the USC&A: Monroe Park Campus and MCV Campus Programs Office, Fraternity and Sorority Life, Leadership Development, Student Organization Services, and Volunteer Services. Through these offices, several university traditions and major events are coordinated. These events include: Welcome Week, Student Organization-Volunteer Organization Fair, Jazz on the Green, Fraternity and Sorority Recruitment, RamMadness, Fall Fest, Homecoming, Speak from the Heart Speaker Series, Greek Week, STRUT Fashion Show, Student Organization Awards Ceremony, Saturday Volunteer Specials, and Leadership and Service.

Students are encouraged to participate in these university traditions along with participating in other programs and events offered during the week and weekends. A complete listing of programs and events is available online at [www.usca.vcu.edu](http://www.usca.vcu.edu).

[Back to top](#)

## Services

USC&A offers a wide variety of services for students and the entire VCU community including Information Services, Off Campus Student Services, Student Organization Services, and Volunteer Services.

Information Services staff provide campus directions and information about programs or events. More information can be obtained by calling (804) 828-1981 or visiting the Web at [www.usca.vcu.edu/information](http://www.usca.vcu.edu/information).

Off Campus Student Services offer a variety of ways to assist and educate those who drive, ride, walk or bus to campus. OCSS provides a Web-based housing search system, ride-share assistance, a care emergency tool kit for check-out, bicycle registration, educational programs and coin operated rental lockers. More information on Off Campus Student Services is available online at [www.usca.vcu.edu/offcampus](http://www.usca.vcu.edu/offcampus).

The Student Organization Service Center offers mail boxes, computer work stations, storage, work rooms, financial assistance for student organizations, general planning, and advising for all student organizations. SOSC staff assist students in identifying student organizations of interest. Volunteer Services provides information on opportunities to serve the greater Richmond community through volunteer experience. More information on volunteer opportunities is available online at [www.usca.vcu.edu/studentorgs/volunteer.htm](http://www.usca.vcu.edu/studentorgs/volunteer.htm).

## University Career Center

**Joe Testani**

Director

[www.students.vcu.edu/careers](http://www.students.vcu.edu/careers)

The University Career Center assists students and recent alumni to identify and achieve their career goals. Career Center staff work with students to help them explore career options, decide on career directions and develop sound strategies for realizing their career goals.

The Career Center offers a career library of more than 600 books and publications. Students have access to employer literature, recruiting brochures and graduate and professional school publications.

Career counseling sessions are offered by appointment using assessment tools such as the Strong Interest Inventory, the Self-Directed Search and the Myers-Briggs Type Indicator. Students may receive assistance with resume development, job search skills and interviewing techniques.

The Career Center maintains job postings of full-time, part-time, internship and co-op positions for students who are eligible. These postings may be accessed 24 hours a day through an account with the Career Center. Both on- and off-campus work-study positions for eligible students can be viewed online at [www.students.vcu.edu/careers](http://www.students.vcu.edu/careers).

The Career Center also offers a comprehensive Cooperative Education Program that blends traditional academics with paid work assignments in industry, business, government and nonprofit organizations. For additional information, including eligibility, go to [www.students.vcu.edu/careers](http://www.students.vcu.edu/careers) and the "Co-op" link.

Graduating students use the Career Center to interview with business, industry, government and education representatives who visit the campus to recruit prospective graduates for permanent positions in their respective organizations. Students are encouraged to sign up as participants in the Career Center's Web-based resume referral system called RamsRecruiting in order to be referred to employers and have access to job listings.

The University Career Center is located in the Student Commons, Room 143, 907 Floyd Ave., P.O. Box 8432007, Richmond, VA 23284-2007; telephone: (804) 828-1645.

## University Counseling Services

**Jihad Aziz**

Director

[www.students.vcu.edu/counseling](http://www.students.vcu.edu/counseling)

University Counseling Services provides psychological services to the university community. The mission of UCS is to create an environment that fosters student growth, development and psychological well-being.

Members of UCS' professional staff include clinical psychologists, licensed clinical social workers, a consulting psychiatrist, psychology and social work interns, and advanced graduate students. UCS provides free brief psychotherapy to currently enrolled students as available. UCS adheres to professional, legal and ethical guidelines established by professional organizations and state law to protect student confidentiality.

University Counseling Services include:

- **Counseling and psychotherapy.** Individual and couples work is designed to deal with personal and interpersonal issues.
- **Group counseling.** Ongoing psychotherapy groups focus on personal and social concerns.
- **Psychiatric services.** Limited services include medical evaluation, diagnosis and treatment with psychotropic medication.
- **Crisis services.** Walk-in crisis services during office hours (828-6200) and on-call crisis services after hours and on weekends (828-1234).
- **Consultation and outreach.** Presentations, workshops and staff consultation are available to student organizations, academic departments and other groups on issues relevant to each group's needs.
- **Safe zone.** Workshops for faculty and staff designed to reduce homophobia and heterosexism.

UCS has office locations on both campuses. The Monroe Park Campus office is located in University Student Commons, Room 238, 907 Floyd Ave., P.O. Box 842525, Richmond, VA 23284-2525; telephone: (804) 828-6200. The MCV Campus office is located in the basement of Grant House, 1008 E. Clay St., P.O. Box 980238, Richmond, VA 23298-0238; telephone: (804) 828-3964.

---

## University Student Health Services

### Margaret Roberson

Medical Director

[www.students.vcu.edu/health](http://www.students.vcu.edu/health)

University Student Health Services offers quality primary health care for treatment of acute and chronic illness. In addition to diagnosis and treatment, the service emphasizes prevention of illness through screening, counseling and health promotion/public health programs. All full-time undergraduate and graduate students are required to pay the student health fee each semester. Part-time students enrolled in at least three credit hours have the option of paying the health fee. The summer fee is optional for all students who will be enrolled the following fall semester.

USHS professional staff includes physicians, psychiatrists, physician assistants, nurse practitioners, registered nurses, pharmacists, health educators and registered dietitians. Services offered include primary care clinics, allergy clinics (administration of allergy injections ordered and supplied by outside physicians), women's clinics, pharmacy and laboratory services, immunization services, health education/public health programs and an after-hours phone triage service provided for urgent medical advice.

USHS has office locations on both campuses. The Monroe Park Campus office is located in the Sports Medicine Building, 1300 W. Broad St., Suite 2200, P.O. Box 842022, Richmond, VA 23284-2022; telephone: (804) 828-8828; fax: (804) 828-1093. The MCV Campus office is located in the VMI Building, 1000 E. Marshall St., Room 305, P.O. Box 980201, Richmond, VA 23298-0201; telephone: (804) 828-9220.

### Immunization requirements

Virginia law requires all full-time students to submit an official certification of immunization to USHS prior to registration. These immunization requirements, along with the necessary forms, can be found at [www.students.vcu.edu/health/immunization.html](http://www.students.vcu.edu/health/immunization.html) and in the Handbook for Admitted Students.

All students regardless of enrollment status, whose birth country is not the U.S. or Canada, are required to complete the tuberculosis screening in the U.S. within the last year.

Students enrolled in health career programs may be required to submit additional immunization information and should contact their school for additional requirements.

### Health insurance

The university is not responsible for accidents occurring to students in connection with class, laboratory, shop, fieldwork, athletics, student activities, travel or any other activity.

The university offers its students an approved insurance plan providing substantial benefits at group rates. The insurance extends for a 12-month period beginning in August, or from the beginning of the second semester to the next August, and includes coverage for accidents, hospitalization, medical, surgical and other benefits for illnesses. Married students may enroll spouses and children. The university strongly recommends that all students enroll in student group health insurance.

Complete information about enrolling is available from USHS and on the Web at [www.students.vcu.edu/health/health\\_insurance.html](http://www.students.vcu.edu/health/health_insurance.html).

### The Wellness Resource Center

(804) 828-9355

[www.thewell.vcu.edu](http://www.thewell.vcu.edu)

The Wellness Resource Center (aka “The Well”) is located at 815 S. Cathedral Place and is the prevention education outreach component of Student Health. The Wellness Resource Center is engaged in the science of empowering all students to move toward optimal health — a balance of physical, emotional, social, intellectual and spiritual health. The center’s staff is committed to helping VCU students learn more about health through individual sessions, group presentations and awareness events. Most services are free to VCU students. There are many volunteer opportunities for students at the center, including several peer health educator groups.

### Alcohol and other drug prevention education

(804) 828-2086

If you are concerned about your use or someone else's use, please feel free to call our office for resource information. Education programming is available upon request. A free online anonymous self-assessment is available at [www.thewell.vcu.edu](http://www.thewell.vcu.edu) (code word is vcrams).

### Smoking cessation

(804) 828-7815

Free Quit Kits, information and individual appointments are available to help students quit tobacco use. Email [quit@vcu.edu](mailto:quit@vcu.edu) for additional information and resources.

### Nutrition, eating disorders and body image

(804) 828-9355

Education on healthy eating or eating disorder recovery is available through confidential individual nutrition sessions. Programs on nutrition, body image and eating disorders are available to student groups and classes.

### Sexual assault and domestic violence

(804) 828-2085

Confidential services are available for students with concerns surrounding sexual assault, stalking, sexual harassment and relationship violence. Staff help students identify needs (medical, legal, counseling, academic) and refer to appropriate campus and/or community resources.

### Stress management

(804) 828-0231

Individual stress management consultations are available. Stress management workshops are available upon request to student groups and classes.

### Sexual health

(804) 828-9355

Education concerning sexually transmitted infections, including HIV, and contraception is provided to individual students or student groups as requested.

---

## Residential Life and Housing

### Reuban Rodriguez

Interim Director

[www.housing.vcu.edu](http://www.housing.vcu.edu)

VCU’s diverse on-campus housing options are designed to meet the needs of any student who chooses to experience residential living. The VCU Residential Life and Housing Office operates a variety of 9- and 12-month living facilities, including traditional residential rooms, suite- and apartment-style buildings, and high-rise residence halls. Approximately 5,000 students choose to live on campus each year.

Residential life at VCU offers many rewards and provides students with the opportunity to gain personal experiences that supplement and complement the formal education gained in classrooms and laboratories. The Residential Life and Housing program offers students the chance to make new friends, meet like-minded academic peers, and develop leadership skills through participation in social, academic, governmental and judicial organizations.

The staff of the VCU Residential Life and Housing Office is dedicated to providing community living situations that support each student’s academic, personal and extracurricular pursuits, and its goal is to offer a sense of belonging

for every residential student. Each residence hall is staffed with a coordinator of residence education, a housing manager, at least one resident director, and many in-house resident and community assistants.

New freshman students who submit a housing application by June 1 are guaranteed residential housing. Housing contracts for freshman residence halls are based on the nine-month academic calendar; housing contracts for residence facilities specified for upperclassmen are a combination of 9- and 12-month agreements. Single-semester contracts are available only to new students who enter the university in the spring semester. (See [Room fees and housing costs](#) section in “Tuition, fees and expenses.”)

All residence hall rooms are furnished and are wired for Internet, cable and telephone service. For detailed information regarding all VCU residence halls, including features and furnishings, visit the Residential Life and Housing Web site at [www.housing.vcu.edu](http://www.housing.vcu.edu), or contact the Central Housing Office, Gladding Residence Center Room 159, 711 W. Main St., P.O. Box 842517, Richmond, VA 23284-2517; telephone: (804) 828-7666.

## Recreational Sports

**Tom Diehl**

Director

[www.recsports.vcu.edu](http://www.recsports.vcu.edu)

Recreational Sports provides a variety of programs, services and facilities designed to meet the leisure and health needs of the VCU community. All currently enrolled students with valid identification are eligible to use all facilities. VCU and VCUHS staff, VCU faculty, alumni, retirees and selected contract employees are also eligible to join as members; details and fees are available in the membership section of the Recreational Sports website.

## Recreational sports programs

### Informal recreation

Available at all facilities and includes drop-in use of the fitness centers, gymnasiums, swimming pools, court space and the Cary Street Field.

### Intramural sports

Leagues and tournaments offered throughout the year at various skill levels, as well as men's, women's and corecreational divisions. Sports include basketball, flag football, softball, racquet sports, volleyball, soccer, ultimate Frisbee and dodgeball.

### Fitness programs

Programs include free group exercise classes, personal fitness training services, fitness incentive programs and instructional programs.

### Outdoor Adventure Program

The OAP provides reasonably priced outdoor recreational trips. Activities such as camping, kayaking, climbing, cross-country skiing and more are offered throughout the year and facilitated by experienced trip leaders. For those planning their own outdoor activities, the Outing Rental Center offers equipment such as canoes, tents, backpacks, sleeping bags and trail guides at nominal cost. For additional information, call (804) 828-6004.

### Sport clubs

Clubs give students the opportunity to train and compete against other colleges in a variety of sports. Clubs vary in focus and programming as student members manage the operation of the club and decide on club activities.

### Aquatics programs

Programs are held at both Cary Street Gym and MCV Campus Recreation and Aquatic Center. Members can take advantage of learn-to-swim programs for adults and children, water exercise and incentive programs, and aquatic certification programs.

## Recreational Sports facilities

Recreational Sports operates five facilities encompassing two fitness centers; two gyms with courts for basketball, volleyball, badminton and table tennis;

racquetball and squash courts; three swimming pools; a climbing wall and a bouldering wall; an artificial-turf indoor multipurpose activity center; group exercise studios; cycling studios; martial arts room; lighted, artificial-turf field; a tennis center; and a lighted outdoor basketball court. Both fitness centers offer free weights, selectorized equipment and cardiovascular equipment, as well as televisions that feature Comcast cable. Student organizations may make reservation requests for facility space when available.

Facilities include:

- Cary Street Gym, (804) 827-1100
- Cary Street Field, (804) 827-2526/827-2527
- The Outing Rental Center, (804) 828-6004.
- MCV Campus Recreation and Aquatic Center, (804) 828-6100.
- Thalhimer Tennis Center, (804) 828-1458.

## Student media

**Greg Weatherford**

Student Media Director

[www.vcustudentmedia.com](http://www.vcustudentmedia.com)

Student Media encourages involvement of students in variety of student publication and broadcasting opportunities including: The Commonwealth Times (independent student press of VCU), Ink (news-features magazine), Poictesme (literary fiction journal), Amendment (literary journal), and WVCW (radio station). All media are student run enterprises.

The Student Media Center is home to these student publications and the radio station. The center is located at 817 W. Broad St., P.O. Box 842010, Richmond, VA 23284-2010; telephone: (804) 828-1058.

## Student and university governance

The University Council, an advisory board to the university president, is the highest internal governance body at VCU. The council is made up of 27 faculty members, 10 students, 10 administrators, 10 classified staff members and four subcommittees: the Committee on Student Affairs, the Committee on Academic Affairs, the Committee on Faculty Affairs and the Committee on Classified Staff Affairs.

The Student Governance structure includes the Monroe Park Campus Student Government Association, the MCV Campus Student Government Association, the Programming Commission and the Student Media Commission.

The Monroe Park Campus Student Government Association is an elected body of students from the Monroe Park Campus who are organized into three branches — executive, legislative and judicial — with various committees. Legislative standing committees include academic affairs, appointments, appropriations, elections, human relations, legislative issues and civic action, publicity, and student life. The executive branch has cabinet positions that mirror legislative committees. Nonelected, at-large members are encouraged to join most of these committees. All meetings of the senate are open to the public.

The MCV Campus Student Government Association Executive officers are elected by the organization. Representatives are elected from each class in each of the health science schools on the basis of one representative per 40 students. MCV Campus SGA meetings are held monthly from September through April and are open to all MCV Campus students. The MCV Campus SGA sponsors several social functions including the MCV Campus Winter Ball and study breaks.

Additional information about the Monroe Park Campus and MCV Campus Student Government Associations may be found at [www.vcu.edu/sga](http://www.vcu.edu/sga).

The Programming Commission coordinates programs and events planned by student organizations that specialize in major event planning. Members of the Programming Commission include: Activities Programming Board, Fall Block Step Show Planning Committee, Homecoming Planning Committee, and the InterCultural Festival Planning Committee.

The UCSC administrative office is located in University Student Commons, Room 104, 907 Floyd Ave., P.O. Box 842032, Richmond, VA 23284-2032; telephone: (804) 828-6500.

## Office of Student Conduct and Academic Integrity

**Karen Belanger**

Director

[www.students.vcu.edu/studentconduct](http://www.students.vcu.edu/studentconduct)

The Office of Student Conduct and Academic Integrity supports the educational mission of the university by educating students about appropriate behavior and fostering a community supporting academic success. The office takes the lead in the enforcement of university policies, as outlined in the “Virginia Commonwealth University Rules and Procedures” and the “VCU Honor System,” providing a fair and impartial process for the adjudication of matters of student discipline. The Office of Student Conduct and Academic Integrity works in conjunction with university offices to administer the policies for Residence Hall Students and Student Off-campus Conduct, the VCU Alcohol and Drug Policy, the Student Sexual Misconduct Policy, and the Computer and Network Resources Use Policy. Rules and Procedures and the VCU Honor System, are available online at [www.provost.vcu.edu/policies](http://www.provost.vcu.edu/policies).

The Office of Student Conduct and Academic Integrity is located in University Student Commons, Suite 106, P.O. Box 843071; telephone: (804) 828-1963.

---

## University policies and procedures

A number of policies and regulations at VCU affect students, and many of these are printed in the general information chapters of this bulletin. Three policy documents are of particular interest to students.

The VCU Rules and Procedures document outlines the rights, responsibilities and privileges of each member of the university community and describes cases when disciplinary action, including separation from the university, may be taken against a member of this community as a result of prohibited behavior as outlined in this document. The VCU Honor System defines academic dishonesty and provides a procedure for judging alleged violators of academic integrity. The Grade Review Procedure outlines the process whereby students may appeal grades that they feel have been assigned unfairly.

Each student is responsible for being familiar with the provisions of all university policies and regulations. The three policy documents described above are printed in full along with the VCU Insider Student Handbook and Resource Guide, which is made available on the Web at [www.students.vcu.edu/insider.html](http://www.students.vcu.edu/insider.html).

## VCU Honor System

VCU recognizes that honesty, truth and integrity are values central to its mission as an institution of higher learning.

The VCU Honor System describes the responsibilities of students, faculty and administration in upholding academic integrity, while respecting the rights of individuals to the due process offered by administrative hearings and appeals. All people enrolled in any course or program at VCU and all people supervising the learning of any student are responsible for acting in accordance with the provisions of the VCU Honor System.

The honor system gives definitions and illustrative examples of five acts which are violations of the policy, namely: cheating, plagiarism, facilitating academic dishonesty, stealing and lying. There are six penalties for students found guilty of these honor system violations. They are honor probation, assignment of grades, suspension, expulsion, revocation and other relevant sanctions.

See the VCU Honor System, published in full in the VCU Insider, [www.students.vcu.edu/insider.html](http://www.students.vcu.edu/insider.html).

---

## Office of Multicultural Student Affairs

**Faith A. Wilkerson**

Interim Director

[www.omsa.vcu.edu](http://www.omsa.vcu.edu)

The Office of Multicultural Student Affairs is a resource for students, faculty and staff. The primary mission of OMSA is to assist traditionally underserved and/or underrepresented student populations (race, ethnicity, sexual orientation, gender) through advising, support, program development, retention efforts and promoting an appreciation of diversity throughout the campus community.

OMSA service and program components include diversity training, leadership development, referral services, cultural programming, discussion groups, collaboration and partnership development, multicultural resources and scholarship information.

The staff members of OMSA are dedicated to serving as advocates for multicultural students' concerns and interests while providing advice to a wide array of multicultural groups.

All students are urged to visit the Office of Multicultural Student Affairs located in the University Student Commons, 907 Floyd Ave., Room 215, P.O. Box 843080, Richmond, VA 23284-3080; telephone: (804) 828-6672.

---

## Disability Support Services

**Joyce Knight**

Coordinator

[www.students.vcu.edu/dss](http://www.students.vcu.edu/dss)

VCU is committed to providing students with disabilities equal opportunities to benefit from all programs, services and activities offered.

Disability Support Services provides:

- Support services including, but not limited to, advocacy, adapted materials, alternative testing, academic and career advising.
- Recommendations for appropriate academic adjustments including exam modifications, classroom accommodations, and auxiliary aids supported by recent documentation.
- Assistance to the VCU community in complying with the provisions of the Americans with Disabilities Act and Section 504 of the Rehabilitation Act of 1974.
- Liaison services between faculty and students with disabilities.
- Technical assistance to university departments.
- Current and accurate information regarding disability-related products, programs and services to current and prospective students, faculty and staff.
- Consultation with secondary schools, special educators, rehabilitation or high school counselors, parents and prospective students concerning university services for students with disabilities.
- A welcoming place for students to meet, share, study, and obtain information concerning disability related issues and opportunities.

Students with disabilities are responsible for self-identification prior to requesting services/accommodations. Students are strongly encouraged to request accommodations at least four weeks prior to the first day of classes; however, students may request accommodations at any time during enrollment at VCU. For additional information visit [www.students.vcu.edu/dss](http://www.students.vcu.edu/dss).

The Disability Support Services office is located in the Student Commons, Room 102, PO Box 842529, Richmond, VA 23284-2253; telephone/TDD: (804) 828-2253; fax: (804) 828-1944.

---

## Division of Student Affairs courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to cooperative education ([COOP](#)) courses

## **2014-15 Graduate and Professional Programs Bulletin**

---

**Global Education Office**

817 West Franklin Street  
P.O. Box 843043  
Richmond, Virginia 23284-3043  
Phone: (804) 828-8471  
Fax: (804) 828-2552  
[www.global.vcu.edu](http://www.global.vcu.edu)

**R. McKenna Brown**  
Executive Director

The Virginia Commonwealth University Global Education Office promotes a variety of faculty and student activities in a global context. GEO's mission is to advance the internationalization of the University in cooperation with the VCU academic programs, as well as with other administrative offices. GEO currently offers programs and services in faculty exchanges, university overseas linkages and agreements of cooperation, education abroad and student exchanges, international student and scholar advising, and international student recruitment and admissions. Additionally GEO offers an intensive English Language Program.

The executive director advises faculty, departments, schools and the college in their efforts to expand their international activities and linkages. The executive director also serves as the initial contact for off-campus groups and agencies requesting information on international activities at the university as well in drafting agreements with overseas institutions, in consultation with the appropriate VCU constituencies.

---

## Education Abroad

**Stephanie Davenport**  
Director

Founded in the belief that an international and multicultural perspective is invaluable to university students today, VCU Education Abroad encourages students from all majors and fields of interest to include study abroad and international exchange as part of their educational career. The benefits of education abroad are many. Students will learn to understand and function in different cultures, thereby developing a broader understanding of the ways the world works; increase knowledge of and facility in a foreign language; understand differences in educational styles and systems; and increase employment marketability upon graduation.

To accomplish these goals successfully, students are encouraged to study in another cultural setting for a summer, semester or full academic year as part of their degree program. VCU Education Abroad was established to assist students in accomplishing these goals by providing information, advising and by administering study abroad programs. VCU offers the programs listed below to encourage students to participate in overseas and external study.

Participants must be in good standing with the university with two full semesters of consecutive, successful full-time enrollment prior to participation. Please note that individual program requirements may vary.

## Program offerings

### VCU Summer Study Abroad

Each year faculty members lead short-term summer study with intensive instruction in an international context. Students may elect courses ranging from an intensive foreign language experience to art, business, and humanities programs. New programs are created every year in countries as diverse as Barbados, Spain, Guatemala, Peru, Italy, Germany, Mexico, France and China.

### International Student Exchange Program

International Student Exchange Program is a network of 275 colleges and universities in 39 countries and provides exchange opportunities for a summer, semester or academic year. ISEP is well-suited for mature, independent students who wish to be fully immersed into the host culture. Students usually enroll directly into their host university and take classes in the host language. A wide variety of options to study in English is also available. ISEP offers an affordable option to study abroad — many of its locations' charges are based on VCU tuition, fees, and room and board.

### Departmental exchanges

VCU has negotiated a number of direct student exchange agreements arising out of specific interest in the university community. Students pay their tuition and fees at VCU, and enroll directly in the chosen host university.

### Independent study abroad

Independent study abroad is for students who wish to study in a field not covered by any of the above study-abroad options. Students may elect to participate in a program offered by another university or organization. VCU Education Abroad will assist students in identifying and applying to the program, maintaining their VCU status while away, and securing financial aid where appropriate. All programs must be approved by VCU.

Except for summer programs offered for VCU credit, all credit received through study abroad will appear on the students' transcripts as transfer credit. Students must earn the equivalent of a "C" or higher for credit to be awarded. Grades are not calculated into the GPA, unless a student is attempting to graduate with honors.

---

## English Language Program

**Lisse Hildebrandt**  
Interim Director

The English Language Program offers an intensive university-preparation language program for nonnative speakers of English and serves international students, U.S. citizens, permanent residents and refugees.

Core courses are offered at 10 levels of instruction — beginning through advanced — in five eight-week sessions per year. Core courses include: writing and grammar, reading and vocabulary, listening, speaking and pronunciation. Additional elective courses in American language and culture, as well as extracurricular learning opportunities, such as conversation partners and cultural/educational activities, are available to students.

Admission to the ELP may be recommended by the VCU Office of Undergraduate Admissions and International Admissions Office at the time of the application review. Students who want only English-as-a-second-language courses may apply directly to the program.

Placement in the ELP is based on the results of the English Language Placement Examination, a three-hour test in four parts: listening, reading, writing and an oral interview. Students receive their test results by meeting individually with an adviser, who makes recommendations, answers questions and registers students in the appropriate ELP course(s).

### More information

For more information, students may contact the English Language Program Office at 817 W. Franklin St.; by phone at (804) 828-2551; by fax at (804) 828-2552 or by e-mail at [geo@vcu.edu](mailto:geo@vcu.edu).

---

## Immigration Services

**Ingrid A. Mercer**  
Director

Immigration Services serves international students and scholars by keeping them informed of all U.S. immigration laws and regulations. This unit provides assistance in obtaining appropriate visas and information and counseling to guide students (F-1), scholars, researchers, visitors (J-1), temporary specialized employees (H1B and TN), and all dependents within the university community so that they can successfully pursue and complete their academic goals.

---

## International Admissions

**Blair W. Brown**  
Director

VCU encourages qualified international students to seek admission to the university through the International Admissions Office. For complete information and application materials, students should write, fax, e-mail or download the application from the Web and contact International Admissions, Virginia Commonwealth University, 817 W. Franklin St., P.O. Box 843043, Richmond, VA 23284-3043, USA; call (804) 828-6016, e-mail [vcuia@vcu.edu](mailto:vcuia@vcu.edu) or access the Web at [www.global.vcu.edu/students/admissions](http://www.global.vcu.edu/students/admissions).

Applicants must complete the International Application for Undergraduate Admission form and submit academic records that demonstrate successful completion of secondary school education — usually 12 years of pre-university study in their own country.

As required by U.S. regulations and by VCU admission policies, nonimmigrant applicants must demonstrate satisfactory academic achievement, adequate English proficiency, and the ability to finance all educational and living expenses.

Applicants can refer to the freshman admission guidelines, transfer admission guidelines and admission procedures in the “[Admission to the University](#)” section of this bulletin for specific program requirements.

VCU is unable to provide financial support for international undergraduate students. Therefore, an applicant who needs a student visa must present documented evidence of available financial support to cover living and educational expenses while studying at VCU.

#### English language proficiency requirements

To ensure maximum benefits from academic study at VCU, all nonnative English-speaking applicants, regardless of immigration status, must provide evidence of English language proficiency before admission and/or before enrollment in the university. English language proficiency is evaluated on factors such as amount and type of formal American education, TOEFL scores and Scholastic Aptitude Test scores.

In general, VCU requires a minimum score of 550 (paper-based), 213 (computer-based) or 80 (Internet based) on TOEFL for admission for undergraduate students. The university reserves the right to require additional testing and study in the VCU English Language Program prior to full-time enrollment in university courses.

#### Nonimmigrants (students with temporary U.S. visas)

Because of time constraints involved in processing international applications and obtaining visas, prospective international undergraduate applicants should submit all required admission and financial credentials at least three months before they plan to enroll. Applicants who are unable to meet the document submission deadline may not have time to obtain the necessary visa for study at VCU.

Proof of current visa type must be submitted to the International Admissions office before enrollment, unless the applicant is requesting an F-1 or J-1 visa. Students possessing F-1 or J-1 visas admitted to VCU must submit copies of all immigration documents to the VCU International Student Adviser before enrolling in classes.

#### Immigrants (permanent residents, refugees and asylees)

Since immigrant applicants usually are in the U.S. at the time an application is submitted, these students must meet the same application deadlines as American citizens. Immigrants should submit their applications to the Office of Undergraduate Admissions. If educated in the U.S., immigrant applicants are considered under the same academic policies applicable to U.S. citizens. If educated outside this country, the same academic records are required as those for nonimmigrant applicants.

VCU requires detailed information about U.S. immigration status. Proof of permanent residency or of refugee and asylee status must be submitted with the admission application.

## International Student Recruitment

**Robert A. Wood**  
Associate Director

Empowered by presidential initiatives and strong institutional commitment to internationalize Virginia Commonwealth University, the Global Education Office recruitment staff has embarked upon a proven in-depth international student and scholar recruiting effort. The four-year-old recruiting initiative has been successful, resulting in a 67 percent increase in the university's international student enrollment from 640 students in 2004 to more than 1,100 in the fall of 2006.

VCU representatives travel overseas to attend educational fairs, and visit secondary schools and advanced degree institutions to recruit highly qualified undergraduate and graduate students for all disciplines. The quality and scope of majors in VCU's liberal arts college and 15 schools, as well as the welcoming nature of the international admissions policy, make VCU a strong and attractive choice for American education for many students. GEO international recruiting also engages students via the VCU websites and other electronic and media outlets. Ongoing contacts with school and university counselors and private education admissions are a priority.

Focus for travel has been to the emerging international student markets in the areas of the Middle East and Gulf regions, the Far East and Pacific Rim countries, southern Asia and Latin America. The office also takes advantage of the university's close proximity to Washington, D.C., to visit and contact embassy educational ministries for access to scholarship students. International recruiting

by the Global Education Office plays a vital role in diversifying and enhancing the international community at VCU and in the greater-Richmond area.

## International Student and Scholar Services

**Pamela O. Haney**  
Director

**Robert A. Wood**

Coordinator of Student and Scholar Services and Associate Director of International Recruitment

International students face many challenges when entering a new country. GEO's International Student and Scholar Services offers assistance and guidance to students as they adjust to a different culture and pursue their educational goals. Student and Scholar coordinators help with pre- and post-arrival concerns, such as airport pick-ups, housing, banking, health insurance and other orientation activities.

Support continues throughout an international student's stay at VCU. The Student and Scholar Services staff assists, advises and refers students with nonacademic issues, including personal, legal, health and cultural. Academic and immigration matters are referred to appropriate advisers. The coordinators also confer with VCU faculty, staff and university officials regarding student concerns.

A student's American experience extends beyond the classroom. Student and Scholar Services offers educational, cultural and social activities that promote international understanding and community. The weekly International Student Coffee Hour is a casual gathering where students meet and make friends, practice spoken English and learn about upcoming VCU activities. Students are encouraged to participate in other monthly GEO-sponsored activities, such as camping, skiing, visiting historical sites and tours of Washington, D.C., or New York City.

GEO also recognizes the importance of a support network, particularly when students are far from family and friends. In addition to the International Student Coffee Hour and monthly activities, Student and Scholar Services also provides opportunities for students to develop relationships with those in the VCU and Richmond communities. American volunteers extend the hand of friendship as conversation partners, friendship partners and hosts for holiday visits.

For information or assistance, please contact International Student and Scholar Services, Global Education Office, 817 W. Franklin St., at (804) 828-0808, by fax at (804) 828-2552, or by e-mail at [rawood@vcu.edu](mailto:rawood@vcu.edu) or [pohaney@vcu.edu](mailto:pohaney@vcu.edu).

## **2014-15 Graduate and Professional Programs Bulletin**

---

**Office of Research**

800 East Leigh Street  
P.O. Box 980568  
Richmond, Virginia 23298-0568  
Phone: (804) 827-2262  
Fax: (804) 828-2051  
[www.research.vcu.edu](http://www.research.vcu.edu)

**Francis L. Macrina, Ph.D.**  
Vice President for Research

The mission of the Virginia Commonwealth University Office of Research is to create an environment that enables our investigators to: 1) effectively compete for research funding, 2) responsibly conduct research in compliance with mandated policies and 3) broadly disseminate knowledge gained and discoveries made.

Research universities provide the nexus of discovery, education and service. The research process evolves into scholarly publication, enlightening histories, interpretative arts, lifesaving drugs and remarkable innovations ranging from nanotechnology to macroeconomics. Each day VCU researchers make progress toward improving our quality of life and our understanding of the world around us.

Research at VCU provides an incubator for training new scholars and a new generation of students who understand where and how knowledge is formed. No matter their chosen career, all researchers benefit from the curiosity instilled and the recognition that learning is a lifelong process.

The research enterprise at VCU has made substantial forward steps in recent years, doubling the sponsored award base, renovating laboratories, rebuilding the research subjects' protection program and investing in state-of-the-art animal care equipment and facilities.

The VCU Office of Research seeks to partner with faculty in all schools and departments as they seek funding, plan studies, establish collaborations, calculate budgets, submit grant applications, negotiate industry contracts and secure patents and licensing agreements. Skilled staff within each of the major divisions — sponsored programs administration, research subjects protection, animal research, technology transfer, industry partnerships, and education and oversight — look forward to helping VCU faculty in all realms of the research process.

Affiliated research institutes include the Center for Clinical and Translational Research (and its Research Incubator), the Institute for Drug and Alcohol Studies; the Philips Institute of Oral and Craniofacial Molecular Biology; the Virginia Institute for Psychiatric and Behavioral Genetics; the Institute for Structural Biology and Drug Discovery; and the Institute for Women's Health.

## Center for Clinical and Translational Research

1200 East Clay Street  
P.O. Box 980261  
Richmond, Virginia 23298-0261  
Phone: (804) 827-1531  
Fax: (804) 827-1510  
[www.cctr.vcu.edu](http://www.cctr.vcu.edu)

**John N. Clore, M.D.**  
Director

The Center for Clinical and Translational Research at Virginia Commonwealth University provides the necessary longitudinal and cross-disciplinary network, culture and infrastructure for identifying promising discoveries made in the laboratory, testing them in animals and developing trials and studies for humans.

Joint participation of researchers from across the university is critical to this mission. Partnerships with foundations and industry — particularly the support of the Virginia BioTechnology Research Park — is also crucial for moving these discoveries to the clinic. At the same time, mutually beneficial partnerships with community practitioners, community organizations and patients enhance the adoption of evidence-based best practices in general clinical practice and thus deliver improved medical care to the region.

The center offers a corridor in which participants in the translational research continuum can meet, interact and advance each others' missions. Bench and computer scientists will learn from animal models and clinician observations. Clinical researchers will recognize the need for communication with basic scientists to direct experimental design. Community practitioners will better understand their role in informing the clinical research process and participating in

pragmatic clinical trials. Patients will develop a higher comfort level with "medical research."

The center also serves as the administrative unit for the interdisciplinary graduate degrees in clinical and translational sciences.

## Research Incubator

The Clinical and Translational Research Incubator is designed to serve as a hub for resources and networking opportunities for established researchers and junior clinical investigators who are working on novel, interdisciplinary and collaborative clinical research at VCU. The RI will support its investigators by coordinating and optimizing current resources and by developing innovative new resources to facilitate the research process. It is anticipated that faculty researchers from the schools of Allied Health Professions, Dentistry, Education, Engineering, Medicine, Nursing, Pharmacy and Social Work, as well as the College of Humanities and Sciences, will access services at the RI.

## Clinical and translational research courses

Descriptions for all courses offered by the university may be accessed through the online courses database at [www.pubapps.vcu.edu/vcucourses](http://www.pubapps.vcu.edu/vcucourses). You may search by unit, subject or keyword, as well as by degree level.

Follow this link to [clinical and translational research \(CCTR\) courses](#).

Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.), general curriculum

Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.), with a concentration in psychiatric, behavioral and statistical genetics

Clinical and Translational Sciences, Master of Science (M.S.)

**Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).**

## Admission requirements

### Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.) with a concentration in cancer and molecular medicine

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred); rolling admissions	Applications received by Jan 10 receive priority	GRE, TOEFL if relevant

In addition to the [general admission requirements of the VCU Graduate School](#) all applicants must provide the following:

1. A statement of purpose for application to the program. The document should be 1.5 or double-spaced with one-inch margins, in a font height no smaller than 11 points. The statement of purpose should cover the following issues in two to five pages:

- a. Why the applicant wishes to pursue a Ph.D. in the Clinical and Translational Sciences with a concentration in cancer and molecular medicine
  - b. Background experience relevant to pursuing a Ph.D. in the concentration in cancer and molecular medicine
  - c. Research interests and potential faculty mentors with whom the individual would want to work
  - d. Description of the applicant's career goals
5. Scores from the Graduate Record Examination (GRE). Applicants **must** score at the 75th percentile or above in all sections of the GRE.
  6. International applicants must also provide, to the VCU Global Education Office scores from the Test of English as a Foreign Language or International English Language Testing System
  7. Please submit curriculum vitae or resume to:

Susan E. Simmons  
Center for Clinical and Translational Research  
P.O. Box 980261  
Richmond, VA 23298-0261

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

#### Program goal

The doctoral program in clinical and translational sciences offers a general curriculum, an interdisciplinary concentration in psychiatric, behavioral and statistical genetics and a concentration in cancer and molecular medicine.

Students who pursue the doctoral program in clinical and translational sciences will be grounded in a relative substantive area and be prepared to integrate data from multiple disciplines, have strong communication and computational skills and be sufficiently flexible to easily move among different projects and research venues.

#### Student learning outcomes

Students who complete the program should achieve the following core competencies:

1. Understand, integrate and apply relevant biomedical biobehavioral concepts and theoretical frameworks to research
2. Comprehend, select and apply the appropriate study design to address specific health issues
3. Critically review the scientific literature by applying sound research knowledge and principles to the review
4. Apply data collection processes and information technology to create, maintain and secure databases and other information
5. Apply ethical principles to study design, data collection and dissemination
6. Devise an analysis plan (statistical methodology) and analyze data using methods appropriate for the study design and type of data to be obtained
7. Identify, interpret and implement relevant laws, regulations and policies related to specific studies and/or programs
8. Plan, incorporate and use appropriate methods for the dissemination and adoption of clinical research findings
9. Manage as a clinical translational research team leader the fiscal, personnel, facilities, regulatory assets and scientific integrity of a funded clinical research program
10. Use knowledge and skills related to leadership, team-building, negotiation, conflict resolution, group process and principles of ethical decision-making to manage a research team and build transdisciplinary collaboration
11. Identify and coordinate institutional resources needed to carry out theoretically based and scientifically sound high-quality funded research
12. Effectively communicate specialist-to-specialist
13. Effectively communicate specialist knowledge to nonspecialists and laypersons

#### Degree requirements

All students are expected to be actively engaged in research throughout the duration of the Ph.D. program. Students are generally admitted under a mentorship model, meaning that they will begin research under the supervision of faculty advisers to whom their research interests most closely align. Other didactic experiences include the weekly seminar series (both at the VIPBG and in external departments) as well as participation in workshops and scientific meetings of relevance to the student's research area.

The curriculum provides a strong grounding in fundamental concepts while emphasizing aspects of research design and technology that are broadly applicable across disciplines in industrial, government and academic settings. A series of elective courses will then provide an advanced base of knowledge focused on a student's areas of interest.

In addition to general [VCU Graduate School graduation requirements](#), students are required to meet the following:

1. Credit hour requirements: Students are required to complete course work in core and elective courses and to conduct significant research. In order to earn the Ph.D., students must complete a minimum of 54 credit hours: 32 core and elective courses as well as 22 in directed and dissertation research that provide a sound foundation in clinical and translational research principles. Students will also participate in seminar and workshop experiences that place them in the midst of the research process from theoretically based hypothesis generation through grant writing, study conduction, and, ultimately, data analysis and manuscript preparation. This program also includes a rigorous interdisciplinary research component comprising directed research and dissertation hours.
2. Transfer and M.S. credit hours: Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. Transfer of credit hours will be limited to those allowed by the university. A minimum grade of B is required for credit hours to transfer.
3. Grade requirements: Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than two courses per the VCU Graduate Bulletin. The GPA for graduation shall be based on all graduate courses attempted after acceptance into the program. Students who receive a grade lower than a B in any of the required core courses will be subject to remedial action as determined by their advisory committee in conjunction with the program director to ensure that there is adequate mastery of the material. All remedial action must be undertaken and completed to the committee's satisfaction before the student is eligible to begin their qualifying exams.
4. Research advisers and committee: The director of the CCTR education program or the director's designee will assist the student with initial course selection and provide advice concerning the program. All students should select their master's or doctoral co-advisers and finalize the composition of their research advisory committee prior to the end of the second semester of study.

5. The student's co-advisers shall provide each student enrolled in the master's or doctoral program with individualized recommendations regarding course work selection, workshop experiences and the direction of their research. It is essential that each student be comprehensively assessed in the area of their methodological and research background. Particularly in the case of those pursuing the Ph.D., recommendations will be made to ensure that each student has acquired the needed substantive research background necessary for doctoral-level work. Thus, the total credit hours required for graduation will be determined on a case-by-case basis by the individual student's research advisory committee.
6. The committee will consist of a minimum of five members, all of whom must be members of the VCU graduate faculty. Note: Individuals who are not already graduate faculty members must apply to the dean of the Graduate School for temporary affiliate membership. The composition of the research advisory committee shall be such that the significant areas of the student's research focus are represented. To foster the interdisciplinary intent of this degree program, at least one member of the committee shall be from a school other than those of the student's co-advisers. Final approval of each student's advisory committee membership shall rest with the CCTR Education Program committee.
7. Admission to candidacy for the Ph.D. Before admission to candidacy for the Ph.D., students must have:
  - a. Completed all required course work (as noted above, through a comprehensive screening process students will have been evaluated to assure that they have grounding in a relevant substantive content area and have taken the needed course work in statistics, methodology and research so that they are able to pursue doctoral-level research)
  - b. Successfully completed an oral examination
3. Oral examination: Upon successful completion of all required didactic course work, not including seminars and workshops and submission and acceptance of a research proposal, students shall take an oral examination administered by the student's research advisory committee. The exam shall be based on a defense of the student's proposed dissertation research project, which shall be constructed in the format of an NIH grant submission and all other subject areas deemed appropriate by the committee. All advisory committee members must vote on the student's performance as either Pass or Fail. A student may pass the exam with no more than one negative vote. Upon successful completion of the oral examination, the student is officially entered into candidacy and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below). An unsuccessful oral examination shall require re-examination within a time period determined by the committee. Only one oral re-examination is permitted.
4. Dissertation research/proposal: Students must propose and conduct a substantial original clinical and/or translational investigation under the supervision of the research advisers and advisory committee. The student can refine the research proposal which served as the foundation of their oral examination in consultation with the research advisers and advisory committee or propose a new novel research proposal. The proposal, which shall be constructed in the format of an NIH grant submission, should include information on the general purpose of the research, background information on the research topic (including a review of the relevant literature), a rationale for the project, a statement of the hypotheses to be investigated or research questions to be answered, and proposed methods and statistical analyses. Once the student has received the committee's approval, they can initiate their dissertation research.
5. Dissertation research project: The research project should represent a significant contribution to the body of knowledge in its field and should be deemed publishable in refereed journals. The emphasis of the research conducted by students in this program shall be on clinical and translational interdisciplinary research, incorporating two or more disciplines as well as a systems approach. This emphasis will be fostered by the requirement of having at least one faculty member on the research advisory committee from a school or college different from that of the research advisers, thereby exposing students to different perspectives on the same problem and assisting students in developing multidisciplinary approaches to their research.
6. Dissertation defense: Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the

research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense. Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences.

#### Research advisers and committee

Each student in the program will have both a research and a clinical mentor (these could be the same or different faculty members). This team-based mentoring approach will facilitate the translational aspects of the Ph.D. students' projects and may actually serve to stimulate new translational projects and collaborations at VCU. The research mentors in the program will be chosen based on demonstrated research expertise in the area of cancer or molecular medicine, excellent mentoring skills, and research funding to support the Ph.D. student. Clinical mentors will be chosen based on clinical expertise and mentoring excellence. Through the clinical mentor, the trainee will have opportunities to be exposed to clinical practice, including clinics and surgeries, clinical laboratories, the complexities of clinical trials, and other clinical activities. The clinical activities are expected to consist of approximately one hour/week on average for Ph.D. students, but would be more intensive for M.D./Ph.D. students, in keeping with the existing requirements for that program. Both the research and clinical mentor would be on the thesis committee, which would comprise a total of five faculty members, at least three of whom are CMM faculty members. For M.D./Ph.D. students, their clinical mentors will be the same faculty member serving as their Foundations of Clinical Medicine preceptors. The students' mentors and thesis committee will advise the students as they prepare career development plans in the second year in the program. The career development plan will be required because translational science is by definition an interdisciplinary and novel career path for students.

#### Qualifying examination

Students in good academic standing who have completed all of their required academic core course work will spend the summer after the second year preparing for the qualifying exam. The qualifying exam will consist of writing a review paper of no more than 30 double-spaced pages, excluding references. In keeping with the interdisciplinary nature of the program, the review paper must demonstrate mastery across the core areas represented in CCM. The topic of the review paper should be developed by students in consultation with their advisers. The title of the review paper, along with a short abstract (no longer than one single-spaced page) describing the proposed content should be submitted to the concentration program director by June 15 for review by the qualifying exam committee. The QEC will review the proposal to ensure that the topic of the review paper is appropriate in that it allows the student to demonstrate command of the literature and interdisciplinary breadth. The committee will make decisions about adequacy of the review paper and, if necessary, work with the student to make revisions within approximately 14 days. Once the topic has been approved by the QEC, the student may begin writing. The review paper must be the student's own work. Drafts may not be reviewed by the student's adviser or other faculty, fellows or students. The final review paper must be submitted to the advisory committee by Aug. 1.

An oral examination of the paper administered by the student's advisory committee and the QEC must be scheduled to take place approximately two weeks after submission to evaluate the student's command of the material and to give the committee opportunity to ask questions and provide feedback. A pass/fail decision will be made at that time. Unsuccessful completion of the qualifying exam will require re-examination within a period of time determined by the committee and the program director. The content of the re-examination will also be determined by the committee and program director on an individual basis. In some cases this could involve a revision of the review paper or particular sections; in other cases, it may involve a repeat of the entire process including selection of a new topic and submission of a new review paper and/or repeat of the oral defense. Only one reattempt to pass qualifying exams is permitted. Students who do not pass their qualifying exams upon their second attempt will be dismissed from the program. Upon successful completion of the oral examination, the student is then officially

entered into candidacy for the Ph.D. and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below).

#### Admission to Ph.D. candidacy

Students will have written and oral qualifying examinations, based on writing a grant proposal describing their proposed thesis research and orally defending the proposal with their thesis committee. Before admission to candidacy for the Ph.D., students must have (1) completed all required course work as described above and (2) successfully completed a qualifying exam.

#### Dissertation proposal defense

Students who have completed the qualifying exam and the second year project are eligible to propose and defend their dissertation. The proposal should be constructed in the format of an NIH grant submission. The proposal must consist of an original research idea generated by the student in consultation with their adviser. The dissertation proposal defense should generally be completed during the fall semester of the third year. Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences with a concentration in cancer and molecular medicine.

#### Time limit

All requirements for the Ph.D. must be completed within eight years from the date of admission to the degree program.

#### Concentration in cancer and molecular medicine

The concentration in cancer and molecular medicine is a translational and interdisciplinary Ph.D. curriculum in the Center for Clinical and Translational Research. The goal of the program is to train students to perform translational research in cancer and molecular medicine. This requires a background and the necessary vocabulary to communicate with both scientists and clinicians and the research skills to be able to bridge bench science and clinical science. The marriage of cancer and molecular medicine blends established cancer biology with an emerging field, molecular medicine. The CMM concentration serves as an educational program for Ph.D. as well as M.D./Ph.D. students encompassing the research objectives of the VCU Massey Cancer Center, the VCU Institute of Molecular Medicine and the CCTR.

In addition to the core courses, elective courses will be recommended to Ph.D. students based on their research. Students will develop an individualized curriculum with the guidance of the program director, based on their research interests and career goals. By the end of the first semester, each student will develop a complete curriculum plan, to be approved by the program director. This will be reviewed by the student's thesis committee in the second fall semester.

#### Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>24</b>
BIOS/STAT 543 Statistical Methods I	3
BIOS 571 Clinical Trials	3

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

**Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.) with a concentration in psychiatric, behavioral and statistical genetics**

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and

Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The doctoral program in clinical and translational sciences offers a general curriculum, an interdisciplinary concentration in psychiatric, behavioral and statistical genetics and a concentration in cancer and molecular medicine.

Students who pursue the doctoral program in clinical and translational sciences will be grounded in a relative substantive area and be prepared to integrate data from multiple disciplines, have strong communication and computational skills and be sufficiently flexible to easily move among different projects and research venues.

## Student learning outcomes

Students who complete the program should achieve the following core competencies:

1. Understand, integrate and apply relevant biomedical biobehavioral concepts and theoretical frameworks to research
2. Comprehend, select and apply the appropriate study design to address specific health issues
3. Critically review the scientific literature by applying sound research knowledge and principles to the review
4. Apply data collection processes and information technology to create, maintain and secure databases and other information
5. Apply ethical principles to study design, data collection and dissemination
6. Devise an analysis plan (statistical methodology) and analyze data using methods appropriate for the study design and type of data to be obtained
7. Identify, interpret and implement relevant laws, regulations and policies related to specific studies and/or programs
8. Plan, incorporate and use appropriate methods for the dissemination and adoption of clinical research findings
9. Manage as a clinical translational research team leader the fiscal, personnel, facilities, regulatory assets and scientific integrity of a funded clinical research program
10. Use knowledge and skills related to leadership, team-building, negotiation, conflict resolution, group process and principles of ethical decision-making to manage a research team and build transdisciplinary collaboration
11. Identify and coordinate institutional resources needed to carry out theoretically based and scientifically sound high-quality funded research
12. Effectively communicate specialist-to-specialist
13. Effectively communicate specialist knowledge to nonspecialists and laypersons

## Degree requirements

All students are expected to be actively engaged in research throughout the duration of the Ph.D. program. Students are generally admitted under a mentorship model, meaning that they will begin research under the supervision of faculty advisers to whom their research interests most closely align. Other didactic experiences include the weekly seminar series (both at the VIPBG and in external departments) as well as participation in workshops and scientific meetings of relevance to the student's research area.

The curriculum provides a strong grounding in fundamental concepts while emphasizing aspects of research design and technology that are broadly applicable across disciplines in industrial, government and academic settings. A series of elective courses will then provide an advanced base of knowledge focused on a student's areas of interest.

In addition to general [VCU Graduate School graduation requirements](#), students are required to meet the following:

1. Credit hour requirements: Students are required to complete course work in core and elective courses and to conduct significant research. In order to earn the Ph.D., students must complete a minimum of 54 credit hours: 32 core and elective courses as well as 22 in directed and dissertation research that provide a sound foundation in clinical and translational research principles. Students will also participate in seminar and workshop experiences that place them in the midst of the research process from theoretically based hypothesis generation through grant writing, study conduction, and, ultimately, data analysis and manuscript preparation. This program also includes a rigorous interdisciplinary research component comprising directed research and dissertation hours.
2. Transfer and M.S. credit hours: Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. Transfer of credit hours will be limited to those allowed by the university. A minimum grade of B is required for credit hours to transfer.
3. Grade requirements: Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than two courses per the VCU Graduate Bulletin. The GPA for graduation shall be based on all graduate courses attempted after acceptance into the program. Students who receive a grade lower than a B in any of the required PBSG core courses will be subject to remedial action as determined by their advisory committee in conjunction with the PBSG program director to ensure that there is adequate mastery of the material. All remedial action must be undertaken and completed to the committee's satisfaction before the student is eligible to begin their qualifying exams.
4. Research advisers and committee: The director of the CCTR education program or the director's assigned designee will assist the student with initial course selection and provide advice concerning the program. All students should select their master's or doctoral co-advisers and finalize the composition of their research advisory committee prior to the end of the second semester of study.
5. The student's co-advisers shall provide each student enrolled in the master's or doctoral program with individualized recommendations regarding course work selection, workshop experiences and the direction of their research. It is essential that each student be comprehensively assessed in the area of their methodological and research background. Particularly in the case of those pursuing the Ph.D., recommendations will be made to ensure that each student has acquired the needed substantive research background necessary for doctoral-level work. Thus, the total credit hours required for graduation will be determined on a case-by-case basis by the individual student's research advisory committee.
6. The committee will consist of a minimum of five members, all of whom must be members of the VCU graduate faculty. Note: Individuals who are not already graduate faculty members must apply to the dean of the Graduate School for temporary affiliate membership. The composition of the research advisory committee shall be such that the significant areas of the student's research focus are represented. To foster the interdisciplinary intent of this degree program, at least one member of the committee shall be from a school other than those of the student's co-advisers. Final approval of each student's advisory committee membership shall rest with the CCTR Education Program committee.
7. Admission to candidacy for the Ph.D. Before admission to candidacy for the Ph.D., students must have:
  - a. Completed all required course work (as noted above, through a comprehensive screening process students will have been evaluated to assure that they have grounding in a relevant substantive content area and have taken the needed course work in statistics, methodology and research so that they are able to pursue doctoral-level research)
  - b. Successfully completed an oral examination
3. Oral examination: Upon successful completion of all required didactic course work, not including seminars and workshops and submission and acceptance of a research proposal, students shall take an oral examination administered by the student's research advisory committee. The exam shall be based on a defense of the student's proposed dissertation research project, which shall be constructed in the format of an NIH grant submission and all other subject areas deemed appropriate by the committee. All advisory committee members must vote on the student's performance as either Pass or Fail. A student may pass the exam with no more than one negative vote. Upon successful completion of the oral examination, the student is officially entered into candidacy and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below). An unsuccessful oral examination shall require re-examination within a time period determined by the committee. Only one oral re-examination is permitted.
4. Dissertation research/proposal: Students must propose and conduct a substantial original clinical and/or translational investigation under the supervision of the research advisers and advisory committee. The student can refine the research proposal which served as the foundation of their oral examination in consultation with the research advisers and advisory committee or propose a new novel research proposal. The proposal, which shall be constructed in the format of an NIH grant submission, should include information on the general purpose of the research, background information on the research topic (including a review of the relevant literature), a rationale for the project, a statement of the hypotheses to be investigated or research questions to be answered, and proposed methods and statistical analyses. Once the student has received the committee's approval, they can initiate their dissertation research.
5. Dissertation research project: The research project should represent a significant contribution to the body of knowledge in its field and should be deemed publishable in refereed journals. The emphasis of the research conducted by students in this program shall be on clinical and translational interdisciplinary research, incorporating two or more disciplines as well as a systems approach. This emphasis will be fostered by the requirement of having at least one faculty member on the research advisory committee from a school or college different from that of the research advisers, thereby exposing students to different perspectives on the same problem and assisting students in developing multidisciplinary approaches to their research.
6. Dissertation defense: Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense. Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences with a concentration in psychiatric, behavioral and statistical genetics.

## Research advisers and committee

Each student in the program will have both a research and a clinical mentor (these could be the same or different faculty members). This team-based mentoring approach will facilitate the translational aspects of the Ph.D. students' projects and may actually serve to stimulate new translational projects and collaborations at VCU. The research mentors in the program will be chosen based on demonstrated research expertise in the area of cancer or molecular medicine, excellent mentoring skills, and research funding to support the Ph.D. student. Clinical mentors will be chosen based on clinical expertise and mentoring excellence. Through the clinical mentor, the trainee will have opportunities to be exposed to clinical practice, including clinics and surgeries, clinical laboratories, the complexities of clinical trials, and other clinical activities. The clinical activities are expected to consist of approximately one hour/week on average for Ph.D. students, but would be more intensive for M.D./Ph.D. students, in keeping with the existing requirements for that program. Both the research and clinical mentor would be on the thesis committee, which would comprise a total of five faculty members, at least three of whom are CMM faculty members. For M.D./Ph.D. students, their clinical mentors will be the same faculty member serving as their Foundations of Clinical Medicine preceptors. The students' mentors and thesis

committee will advise the students as they prepare career development plans in the second year in the program. The career development plan will be required because translational science is by definition an interdisciplinary and novel career path for students.

### Qualifying exam

Students in good academic standing who have completed all of their required academic core course work will spend the summer after the second year preparing for the qualifying exam. The qualifying exam will consist of writing a review paper of no more than 30 double-spaced pages, excluding references. In keeping with the interdisciplinary nature of the program, the review paper must demonstrate mastery across the core areas represented in PBSG (genetics, phenotyping, methods). The topic of the review paper should be developed by the students in consultation with their advisers. The title of the review paper, along with a short abstract (no longer than one single-spaced page) describing the proposed content should be submitted to the PBSG program director by June 15 for review by the qualifying exam committee. The QEC will review the proposal to ensure that the topic of the review paper is appropriate in that it allows the student to demonstrate command of the literature and interdisciplinary breadth. The committee will make decisions about adequacy of the review paper and, if necessary, work with the student to make revisions within approximately 14 days. Once the topic has been approved by the QEC, the student may begin writing. The review paper must be the student's own work. Drafts may not be reviewed by the student's adviser or other faculty, fellows or students. The final review paper must be submitted to the advisory committee by Aug. 1.

An oral examination of the paper administered by the student's advisory committee and the QEC must be scheduled to take place approximately two weeks after submission to evaluate the student's command of the material and to give the committee opportunity to ask questions and provide feedback. A pass/fail decision will be made at that time. Unsuccessful completion of the qualifying exam will require re-examination within a period of time determined by the committee and PBSG program director. The content of the re-examination will also be determined by the committee and PBSG program director on an individual basis. In some cases this could involve a revision of the review paper or particular sections; in other cases, it may involve a repeat of the entire process including selection of a new topic and submission of a new review paper and/or repeat of the oral defense. Only one reattempt to pass qualifying exams is permitted. Students who do not pass their qualifying exams upon their second attempt will be dismissed from the program. Upon successful completion of the oral examination, the student is then officially entered into candidacy for the Ph.D. and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below).

### Admission to Ph.D. candidacy

Students will have written and oral qualifying examinations, based on writing a grant proposal describing their proposed thesis research and orally defending the proposal with their thesis committee. Before admission to candidacy for the Ph.D., students must have (1) completed all required course work as described above and (2) successfully completed a qualifying exam.

### Dissertation proposal defense

Students who have completed the qualifying exam and the second year project are eligible to propose and defend their dissertation. The proposal should be constructed in the format of an NIH grant submission. The proposal must consist of an original research idea generated by the student in consultation with their adviser. The dissertation proposal defense should generally be completed during the fall semester of the third year. Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may

apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences with a concentration in psychiatric, behavioral and statistical genetics.

### Time limit

All requirements for the Ph.D. must be completed within eight years from the date of admission to the degree program.

### Concentration in psychiatric, behavioral and statistical genetics

The concentration in psychiatric, behavioral and statistical genetics was designed by faculty at the Virginia Institute for Psychiatric and Behavioral Genetics. This interdisciplinary institute brings together faculty with a wide range of scientific backgrounds ranging from statistical and molecular genetics to epidemiology, psychology and psychiatry, all with the joint focus of understanding how genetic and environmental factors impact the development of psychiatric and substance use disorders and related behavioral outcomes.

Faculty members work across twin and family studies, gene identification projects and genetically informative longitudinal, community-based samples. Faculties also are involved in statistical methods development for these projects. Students in the PBSG concentration obtain interdisciplinary training with course work in human genetics, psychology/psychiatry, biostatistics and epidemiology. Students can tailor their training and research experience to their particular career goals by selecting electives in their focused area of interest.

### First-year project

All students are required to conduct a first-year research project. The nature of the first-year project will vary according to the area of the student's research. This project must be written up by the student and submitted to the PBSG program director and it must follow a scientific paper format and include an abstract, introduction, methods, results and discussion sections. The depth of the individual sections of the project will vary according to the nature of the project. Although the write-up of the first-year project is not required to be of publication quality, it should demonstrate a basic command of the research process and an ability to integrate relevant literature and nascent data into testable hypotheses. The adviser and PBSG program director will review, consult and make a decision about the adequacy of the submitted first-year project write-up. Feedback will generally be given within 14 days of receipt of the write-up. Students cannot move on to the second-year project until the first-year project has been signed off on by the adviser and PBSG program director. Students must give a presentation as part of the VIPBG seminar series on their first-year projects at some point during the spring semester of the first year. Students should aim to submit their written first-year projects prior to the start of the fall semester of the second year of graduate study.

### Second-year project

The second-year research project can be a continuation/extension of the first-year project or consist of a new research question. The second-year project should be developed in collaboration with the student's advisory committee. This should happen soon after the first-year project has been signed off on (if not before). Students must give a presentation on their second-year projects at some point during the spring semester of the second year. Second-year projects are expected to be of publication quality and should follow a scientific paper format, which includes an abstract, introduction, methods, results and discussion sections. The advisory committee and PBSG program director will review, consult and make a decision about the adequacy of the second-year project, generally within 14 days of its receipt. Students cannot progress to the oral defense of the dissertation proposal until the second-year-project has been signed off on by the advisory committee and PBSG program director. Students should aim to have their second-year projects completed early in the fall semester of their third year of graduate study.

### Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>29-32</b>
BIOS/STAT 543 Statistical Methods I	3
BIOS/STAT 544 Statistical Methods II	3

CCTR 690 Research Seminar in Clinical and Translational Sciences (concentration-specific section)	1
CCTR 815 The NIH Proposal Challenge or PSYC 700 Grant Writing	2 or 3
EPID 571 Principles of Epidemiology	3
HGEN 501/BIOL 530 Human Genetics	3
HGEN 502 Advanced Human Genetics	3
HGEN 603 Mathematical and Statistical Genetics	3
HGEN 620 Principles of Human Behavioral Genetics	3
OVPR 601 Scientific Integrity, OVPR 602 Responsible Scientific Conduct or OVPR 603 Responsible Conduct of Research	1
PSYC 616 Psychopathology	3
PSYC 691 Special Topics (research methods)	1-3

#### Electives variable

A minimum of three elective courses must be taken and can be selected from the range of classes available across VCU departments, including the departments of Psychology, Human and Molecular Genetics, Biostatistics and/or any other relevant course that fits with the student's primary focus and interests, in consultation with the student's research advisory committee.

#### Research variable

CCTR 697 Directed Research in Clinical and Translational Sciences	variable
CCTR 898 Dissertation Research in Clinical and Translational Sciences	variable

**Total graduate credit hours required (minimum)** **54**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

#### Degree candidacy requirements

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

#### Graduation requirements

#### Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.), general curriculum

##### Graduate program director

Teraya M. Donaldson, Ph.D.

Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.) with a concentration in cancer and molecular medicine

Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.) with a concentration in psychiatric, behavioral and statistical genetics

Clinical and Translational Sciences, Master of Science (M.S.)

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu).

### Admission requirements

Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.), general curriculum			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred); rolling admissions	Applications received by Jan 10 receive priority	GRE, TOEFL if relevant

In addition to the [general admission requirements of the VCU Graduate School](#), all applicants must provide the following:

- A statement of purpose for application to the program. The document should be 1.5 or double-spaced with one-inch margins, in a font size no smaller than 11 points. The statement of purpose should cover the below issues in two to five pages:
  - Why the applicant wishes to pursue a Ph.D. in clinical and translational sciences
  - Background experience relevant to pursuing a Ph.D. in clinical and translational sciences
  - Research interests and potential faculty mentors with whom the individual would want to work
  - Description of the applicant's career goals
- Scores from the Graduate Record Examination (GRE). Applicants **must** score at the 75th percentile or above in all sections of the GRE.
- International applicants must also provide, to the VCU Global Education Office scores from the Test of English as a Foreign Language or International English Language Testing System
- Please submit curriculum vitae or resume to:

Susan E. Simmons

Richmond, VA 23298-0261

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the

University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**General academic regulations for  
all graduate students in all graduate programs at VCU**

## Program goal

The doctoral program in clinical and translational sciences offers a general curriculum, an interdisciplinary concentration in psychiatric, behavioral and statistical genetics and a concentration in cancer and molecular medicine.

Students who pursue the doctoral program in clinical and translational sciences will be grounded in a relative substantive area and be prepared to integrate data from multiple disciplines, have strong communication and computational skills and be sufficiently flexible to easily move among different projects and research venues.

## Student learning outcomes

Students who complete the program should achieve the following core competencies:

1. Understand, integrate and apply relevant biomedical biobehavioral concepts and theoretical frameworks to research
2. Comprehend, select and apply the appropriate study design to address specific health issues
3. Critically review the scientific literature by applying sound research knowledge and principles to the review
4. Apply data collection processes and information technology to create, maintain and secure databases and other information
5. Apply ethical principles to study design, data collection and dissemination
6. Devise an analysis plan (statistical methodology) and analyze data using methods appropriate for the study design and type of data to be obtained
7. Identify, interpret and implement relevant laws, regulations and policies related to specific studies and/or programs
8. Plan, incorporate and use appropriate methods for the dissemination and adoption of clinical research findings
9. Manage as a clinical translational research team leader the fiscal, personnel, facilities, regulatory assets and scientific integrity of a funded clinical research program
10. Use knowledge and skills related to leadership, team-building, negotiation, conflict resolution, group process and principles of ethical decision-making to manage a research team and build transdisciplinary collaboration
11. Identify and coordinate institutional resources needed to carry out theoretically based and scientifically sound high-quality funded research
12. Effectively communicate specialist-to-specialist
13. Effectively communicate specialist knowledge to nonspecialists and laypersons

## Degree requirements

All students are expected to be actively engaged in research throughout the duration of the Ph.D. program. Students are generally admitted under a mentorship model, meaning that they will begin research under the supervision of faculty advisers to whom their research interests most closely align. Other didactic experiences include the weekly seminar series (both at the VIPBG and in external departments) as well as participation in workshops and scientific meetings of relevance to the student's research area.

The curriculum provides a strong grounding in fundamental concepts while emphasizing aspects of research design and technology that are broadly applicable across disciplines in industrial, government and academic settings. A series of elective courses will then provide an advanced base of knowledge focused on a student's areas of interest.

In addition to general [VCU Graduate School graduation requirements](#), students are required to meet the following:

1. Credit hour requirements: Students are required to complete course work in core and elective courses and to conduct significant research. In order to earn the Ph.D., students must complete a minimum of 54 credit hours: 32 core and elective courses as well as 22 in directed and dissertation research that provide a sound foundation in clinical and translational research principles. Students will also participate in seminar and workshop experiences that place them in the midst of the research process from theoretically based hypothesis generation through grant writing, study conduction, and, ultimately, data analysis and manuscript preparation. This program also includes a rigorous interdisciplinary research component comprising directed research and dissertation hours.
2. Transfer and M.S. credit hours: Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. Transfer of credit hours will be limited to those allowed by the university. A minimum grade of B is required for credit hours to transfer.
3. Grade requirements: Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than two courses per the VCU Graduate Bulletin. The GPA for graduation shall be based on all graduate courses attempted after acceptance into the program. Students who receive a grade lower than a B in any of the required core courses will be subject to remedial action as determined by their advisory committee in conjunction with the program director to ensure that there is adequate mastery of the material. All remedial action must be undertaken and completed to the committee's satisfaction before the student is eligible to begin their qualifying exams.
4. Research advisers and committee: The director of the CCTR education program or the director's assigned designee will assist the student with initial course selection and provide advice concerning the program. All students should select their master's or doctoral co-advisers and finalize the composition of their research advisory committee prior to the end of the second semester of study.
5. The student's co-advisers shall provide each student enrolled in the master's or doctoral program with individualized recommendations regarding course work selection, workshop experiences and the direction of their research. It is essential that each student be comprehensively assessed in the area of their methodological and research background. Particularly in the case of those pursuing the Ph.D., recommendations will be made to ensure that each student has acquired the needed substantive research background necessary for doctoral-level work. Thus, the total credit hours required for graduation will be determined on a case-by-case basis by the individual student's research advisory committee.
6. The committee will consist of a minimum of five members, all of whom must be members of the VCU graduate faculty. Note: Individuals who are not already graduate faculty members must apply to the dean of the Graduate School for temporary affiliate membership. The composition of the research advisory committee shall be such that the significant areas of the student's research focus are represented. To foster the interdisciplinary intent of this degree program, at least one member of the committee shall be from a school other than those of the student's co-advisers. Final approval of each student's advisory committee membership shall rest with the CCTR Education Program committee.
7. Admission to candidacy for the Ph.D. Before admission to candidacy for the Ph.D., students must have:
  - a. Completed all required course work (as noted above, through a comprehensive screening process students will have been evaluated to assure that they have grounding in a relevant substantive content area and have taken the needed course work in statistics, methodology and research so that they are able to pursue doctoral-level research)
  - b. Successfully completed an oral examination
3. Oral examination: Upon successful completion of all required didactic course work, not including seminars and workshops and submission and acceptance of a research proposal, students shall take an oral examination administered by the student's research advisory committee. The exam shall be based on a defense of the student's proposed dissertation research project, which shall be constructed in the format of an NIH grant submission and all other subject

areas deemed appropriate by the committee. All advisory committee members must vote on the student's performance as either Pass or Fail. A student may pass the exam with no more than one negative vote. Upon successful completion of the oral examination, the student is officially entered into candidacy and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below). An unsuccessful oral examination shall require re-examination within a time period determined by the committee. Only one oral re-examination is permitted.

4. Dissertation research/proposal: Students must propose and conduct a substantial original clinical and/or translational investigation under the supervision of the research advisers and advisory committee. The student can refine the research proposal which served as the foundation of their oral examination in consultation with the research advisers and advisory committee or propose a new novel research proposal. The proposal, which shall be constructed in the format of an NIH grant submission, should include information on the general purpose of the research, background information on the research topic (including a review of the relevant literature), a rationale for the project, a statement of the hypotheses to be investigated or research questions to be answered, and proposed methods and statistical analyses. Once the student has received the committee's approval, they can initiate their dissertation research.
5. Dissertation research project: The research project should represent a significant contribution to the body of knowledge in its field and should be deemed publishable in refereed journals. The emphasis of the research conducted by students in this program shall be on clinical and translational interdisciplinary research, incorporating two or more disciplines as well as a systems approach. This emphasis will be fostered by the requirement of having at least one faculty member on the research advisory committee from a school or college different from that of the research advisers, thereby exposing students to different perspectives on the same problem and assisting students in developing multidisciplinary approaches to their research.
6. Dissertation defense: Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense. Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences.

## Research advisers and committee

Each student in the program will have both a research and a clinical mentor (these could be the same or different faculty members). This team-based mentoring approach will facilitate the translational aspects of the Ph.D. students' projects and may actually serve to stimulate new translational projects and collaborations at VCU. The research mentors in the program will be chosen based on demonstrated research expertise in the area of cancer or molecular medicine, excellent mentoring skills, and research funding to support the Ph.D. student. Clinical mentors will be chosen based on clinical expertise and mentoring excellence. Through the clinical mentor, the trainee will have opportunities to be exposed to clinical practice, including clinics and surgeries, clinical laboratories, the complexities of clinical trials, and other clinical activities. The clinical activities are expected to consist of approximately one hour/week on average for Ph.D. students, but would be more intensive for M.D./Ph.D. students, in keeping with the existing requirements for that program. Both the research and clinical mentor would be on the thesis committee, which would comprise a total of five faculty members, at least three of whom are CMM faculty members. For M.D./Ph.D. students, their clinical mentors will be the same faculty member serving as their Foundations of Clinical Medicine preceptors. The students' mentors and thesis committee will advise the students as they prepare career development plans in the second year in the program. The career development plan will be required because

translational science is by definition an interdisciplinary and novel career path for students.

## Qualifying exam

Students in good academic standing who have completed all of their required academic core course work will spend the summer after the second year preparing for the qualifying exam. The qualifying exam will consist of writing a review paper of no more than 30 double-spaced pages, excluding references. In keeping with the interdisciplinary nature of the program, the review paper must demonstrate mastery across the core areas represented. The topic of the review paper should be developed by students in consultation with their advisers. The title of the review paper, along with a short abstract (no longer than one single-spaced page) describing the proposed content should be submitted to the concentration program director by June 15 for review by the qualifying exam committee. The QEC will review the proposal to ensure that the topic of the review paper is appropriate in that it allows the student to demonstrate command of the literature and interdisciplinary breadth. The committee will make decisions about adequacy of the review paper and, if necessary, work with the student to make revisions within approximately 14 days. Once the topic has been approved by the QEC, the student may begin writing. The review paper must be the student's own work. Drafts may not be reviewed by the student's adviser or other faculty, fellows or students. The final review paper must be submitted to the advisory committee by Aug. 1.

An oral examination of the paper administered by the student's advisory committee and the QEC must be scheduled to take place approximately two weeks after submission to evaluate the student's command of the material and to give the committee opportunity to ask questions and provide feedback. A pass/fail decision will be made at that time. Unsuccessful completion of the qualifying exam will require re-examination within a period of time determined by the committee and the program director. The content of the re-examination will also be determined by the committee and program director on an individual basis. In some cases this could involve a revision of the review paper or particular sections; in other cases, it may involve a repeat of the entire process including selection of a new topic and submission of a new review paper and/or repeat of the oral defense. Only one reattempt to pass qualifying exams is permitted. Students who do not pass their qualifying exams upon their second attempt will be dismissed from the program. Upon successful completion of the oral examination, the student is then officially entered into candidacy for the Ph.D. and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below).

## Admission to Ph.D. Candidacy

Students will have written and oral qualifying examinations, based on writing a grant proposal describing their proposed thesis research and orally defending the proposal with their thesis committee.

## Dissertation proposal defense

Students who have completed the qualifying exam and the second year project are eligible to propose and defend their dissertation. The proposal should be constructed in the format of an NIH grant submission. The proposal must consist of an original research idea generated by the student in consultation with their adviser. The dissertation proposal defense should generally be completed during the fall semester of the third year. Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences.

## Time limit

All requirements for the Ph.D. must be completed within eight years from the date of admission to the degree program.

## Admission requirements summary

**Admission to this program will reopen for fall 2015.**

Clinical and Translational Sciences, Master of Science (M.S.)			
Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jun 15	None

In addition to the [general admission requirements of the VCU Graduate School](#), please note the following:

1. Enrollment is open to VCU junior faculty only.
2. Applicants should be early stage investigators with terminal degrees (e.g. M.D., Ph.D., D.D.S., Sc.D., D.V.M., Ed.D, Pharm.D.).
3. Applicants should have a targeted research interest that is explained in a personal statement accompanying the graduate application.
4. A letter of support from the applicant's department chair is mandatory.
5. A letter of commitment from an academic adviser is mandatory.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The [VCU Graduate Bulletin website](#) documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the [Graduate School website](#) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### General academic regulations for all graduate students in all graduate programs at VCU

## Program goal

The Master of Science in Clinical and Translational Sciences program provides training and mentoring for a new generation of investigators who, regardless of

primary areas of interest, will be able to understand the methods and techniques used along the pathway from the bench to the bedside, to the community and beyond. The program emphasizes the importance of interdisciplinary approaches to research.

## Student learning outcomes

1. Understand, integrate and apply relevant biomedical biobehavioral concepts and theoretical frameworks to research
2. Comprehend, select and apply the appropriate study design to address specific health issues
3. Critically review the scientific literature by applying sound research knowledge and principles to the review
4. Apply data collection processes and information technology to create, maintain and secure databases and other information
5. Apply ethical principles to study design, data collection and dissemination
6. Devise an analysis plan (statistical methodology) and analyze data using methods appropriate for the study design and type of data to be obtained
7. Identify, interpret and implement relevant laws, regulations and policies related to specific studies and/or programs
8. Plan, incorporate and use appropriate methods for the dissemination and adoption of clinical research findings
9. Manage as a clinical translational research team leader, including the fiscal, personnel, facilities, regulatory assets and scientific integrity of a funded clinical research program
10. Effectively communicate specialist-to-specialist
11. Effectively communicate specialist knowledge to nonspecialists and laypersons

## Degree requirements

In addition to the [VCU Graduate School graduation requirements](#), the master's degree can be earned upon completion of 30 credit hours that combine didactic course work and directed research, including a master's capstone project in the form of a peer-reviewed journal article or a grant proposal.

The program provides a sound foundation in clinical and translational research principles and thereby prepares the student to engage in many components of investigative processes. Students are expected to attend the research seminar course each semester they are in the program (and register for the course a minimum of three times) in order to stay abreast of current health and human services research and to develop their communication skills. Additionally, students must complete a course on responsible conduct of research and scientific integrity, which will ensure that students understand the broad ethical implications of biobehavioral and biomedical research, understand what constitutes scientific fraud and misconduct and are aware of their responsibilities as scientists.

When students have reached 27 credit hours of didactic and research course work, they must register for CCTR 700 Master's Capstone Project, which may be in one of two forms: an NIH-style grant proposal or a peer-reviewed journal article ready for submission.

This project will be overseen and reviewed by the student's research advisory committee. Students are expected to present their final projects to the committee for acceptance.

## Curriculum requirements

Courses	Credit hours
<b>Required courses</b>	<b>18</b>
CCTR 520 Fundamentals of Research Regulation	2
CCTR 690 Research Seminar in Translational Sciences (one credit, taken for three semesters)	3
CCTR 697 Directed Research in Clinical and Translational Sciences	9
CCTR 700 Master's Capstone Project	3
OVRP 601 Scientific Integrity, OVRP 602 Responsible Scientific Conduct or OVRP 603 Responsible Conduct of Research	1

## Electives

12

Examples of potential electives include but are not limited to:

ANAT 615 Techniques in Neuroscience and Cell Biology	3
ANAT 620 Scientific Writing and Grantsmanship	2
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function	2
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology	2
BIOS 668 Statistical Methods for High-throughput Genomic Data II	3
BNFO 621 Business and Entrepreneurship Essentials for Life Scientists	3
CCTR 801, 802, 803 Research Practicum I, II, III	3
EPID 620 Cancer Epidemiology	3
MEDC 530 Bioinformatics and Genomics in Drug Research	3
NURS 773 Perspectives on Research Design	3
At least three credit hours of elective course work must be in biostatistics (e.g. BIOS 543, BIOS 571, CCTR 702, CCTR 703, DENS 580).	

## Total graduate credit hours required (minimum)

30

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

### Degree candidacy requirements

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

### Graduation requirements
