Pilot Inventory of Community Partnerships: IARSLCE Conference 2013

Abstract
Partnerships with community organizations create increased opportunities for universities to promote community-engaged research, teaching, and service. Virginia Commonwealth University's (VCU) mission states that the university is committed to "sustainable, university-community partnerships that enhance the educational, economic, and cultural vitality of the communities VCU serves." In recognition of its efforts, VCU is among a small number of institutions to be designated as very high research activity and community-engaged by the Carnegie Foundation. It is also a recipient of a NIH-funded Center for Translational and Sciences Award, which promotes community-engaged research.

In pursuit of the university's goal to become a national model for community engagement and regional impact, the Division of Community Engagement (DCE) and Office of Planning and Decision Support (OPDS) – with representatives from across the university - sought to identify current community-university partnerships during 2012-13. The team developed a Pilot Inventory of Community Partnerships (PICP) to test a university-wide data collection process. The findings are presented along with recommendations for improving the long-term ability to count and describe the university’s partnerships. (This effort parallels the VCU Health System's plans for a similar pilot to identify and document outreach efforts.) The resulting baseline information presented here helps to achieve the University Level Initiative 4 strategy, "Define and collate community partnerships and determine measures to leverage assets." The information gathered will provide a resource to our VCU and Health System communities to collaborate, build on existing efforts, and identify gaps.

Pilot Inventory of Community Partnerships

IARSLCE Conference 2013
Virginia Commonwealth University

- Urban, research university
- 31,000 students
- Academic medical center
- #1 public art school
Recognition for Community Engagement

Recognized as 1 of 40 top community-engaged institutions by the Carnegie foundation

President’s Higher Education Service Honor Roll, with highest distinction

Recipient of a NIH’s CTSA grant
VCU’s Quest for Distinction

Theme IV: Become a national model for community engagement and regional impact

• Expand community engaged scholarship and service learning.
• Create university-community partnerships with a focus on the key targeted areas of:
  • K-12 Education
  • Access to Health
  • Economic Development
  • Sustainability
• Provide strategic leadership in addressing sustainability challenges through curricular and service innovations and green facilities and operations.
Division of Community Engagement

Vision

- VCU is a community of engaged citizens, working together changing lives.

Mission

- The VCU Division of Community Engagement mobilizes university-community partnerships that generate innovative solutions to societal challenges and prepares the engaged citizens of tomorrow.
Purpose and Aims

• Identify key partnerships across the university
• Use standard definition and instrumentation
• Estimate the total number of partnerships
• Describe how partnerships are established, monitored, and evaluated across the university.

• These findings will lead to
  – improved methods for gathering these data on an annual basis.
  – support university allocation of resources to foster collaboration and strategic partnerships.
Methodology

• Deans and research center and institute directors at VCU were asked to identify one person in their unit to participate in the pilot (n=54).
• Web-based questionnaire (n=33)
• Interviews (n=20)
Questionnaire

• Estimate of the total number of partnerships within their unit
• Brief description of the process used for establishing, monitoring and evaluating partnerships.
• More detailed information about 5 “significant” partnerships (with at least one focused on teaching, service, research, and —where applicable—patient care):
  – geographic focus of the partnership,
  – connection to themes in the university’s strategic plan,
  – degree of formalization i.e. presence of MOUs/MOAs, and
  – resources exchanged.
Interviews

The interview schedule included the following questions:

• In the inventory, it was noted that your unit [does/does not] have a formal process for establishing partnerships, and that it [does/does not] have a formal process for monitoring or evaluating partnerships. Please tell us more about that.

• Based on what we asked you to provide, did you have some of this information readily available? What did you have to do to collect this information?

• [The strategic plan] states that VCU will “[C]ontribute to the economic, cultural and civic vitality of the region and the world through collaborative efforts …” How do you, and how might we, consider measuring impact?

• Does your unit have the infrastructure necessary to systematically identify and describe community-university partnerships? If yes, please describe. If no, what resources would you need? What steps would need to be taken?

• As we make recommendations for how to systematically identify community-university partnerships, and ultimately tell the story of VCU’s involvement with the community, what further thoughts or recommendations do you have?
Definitions

A **partnership** is a sustained collaboration between institutions of higher education and communities for the mutually beneficial exchange, exploration, and application of knowledge, information, and resources. Examples are research, capacity building, or economic development.

A significant partnership is one that “enabled [their] unit to make significant contributions to strategic objectives that support the [university’s strategic plan].”
Key Findings

• VCU has well-over 1,100 university-community partnerships.

• There is little existing unit- or university-level infrastructure available for documenting partnerships.

• Most units do not have formal processes for establishing, monitoring or evaluating partnerships.
Key Findings: Significant Partners

Among VCU’s most significant partnerships identified in this effort:

• 46% are focused on **Metro Richmond**
• 56% focus on **education** and 34% on **access to health**
• 71% involve **more than one element of VCU’s mission**: 32% incorporate service, 31% teaching, 26% research, and 11% patient care.

The **mutual investment of people** is most common.

– VCU units most frequently indicated that they share or provide community partners with faculty and staff time (26%) and access to faculty, staff, students and alumni (23%).
– Community partners most frequently share or provide access to employees and volunteers (23%) and access to community members (19%).
Geographic Focus Area of Significant Partnerships (n=118)

- **Metro Richmond**: 46%
- **Statewide**: 29%
- **National**: 8%
- **International**: 5%
- **Other**: 12%
Number Of Significant Partnerships In Metro Richmond By Geographic Focus Area
Quest Focus Area of Significant Partnerships (n=119)

- Education: 56%
- Access to Health: 34%
- Economic Development: 6%
- Sustainability: 4%
Elements of VCU’s Mission Served by the Significant Partnerships (n=259)

- Service: 32%
- Teaching: 31%
- Research: 26%
- Patient Care: 11%
Resources Exchanged Between VCU and the Main Community Partner, # of Significant Partnerships

- Resources the VCU unit provided/exchanged with the main community partner
- Resources the main community partner shared/exchanged with the VCU unit

Using the Information Gathered

• Interactive map
• VIVO
• Telling the story
• Process for MOUs
• Collaboration opportunities
• Carnegie re-classification
Recommendations

• Establish a workgroup to:
  – explore how data can be collected systematically and regularly using current resources, and
  – determine impact measures for inclusion in data collection processes.

• Coordinate collection of partnership data with other university efforts.

• Explore with General Counsel the need for university-wide procedures for developing, reviewing and approving partnership MOUs.
