

Volume One

SUBJECT INDEX*

* *The italic number indicates the issue, and the number after the hyphen indicates the page on which the article appears.*

- Alloxan and ninhydrin reactions, application to tissue sections, 4-26
- Anti-globulin antibodies, γ -globulin administration and, in children, 3-26
- Arteriosclerosis, panel discussion, 2-36
- Blood
 determination of leukoagglutinin specificity, 4-15
 effect of γ -guanidinobutyric acid on clotting time of normal plasma and on euglobulin lysis time of fibrinolytically active plasma, 1-4
 γ -globulin administration and anti-globulin antibodies in children, 3-26
 hemodynamics of toxemia, 2-32
 inhibition of clot formation and lysis by γ -guanidinobutyric acid, 1-2
- Blood pressure
 central nervous control of in man, 2-24
 treatment of hypertension, 2-28
- Book reviews, 1-56, 4-45
- Breathing, *see* Respiration
- Cancer, oral, radiotherapy, 2-14
- Cell
 cultured human, effects of densely ionizing radiations on reproductive capacity of, 4-2
 metabolism, resistance to tuberculosis and, studies on mononuclear peritoneal exudate cells, 4-21
- Central nervous system, control of blood pressure in man, 2-24
- Clinicopathological conference
 abnormal sex characteristics and intracranial mass, 4-46
- Contributors, 1-58, 2-49, 3-30, 4-54
- Cornea, effect of idoxuridine on stromal cells in tissue culture, 1-30
- Diagnosis, medical, mathematical basis, 1-22
- Editorials, 1-1, 2-2
- Education, medical
 Medical College of Virginia School of Medicine curriculum, 2-3
 need for change, 2-2
- Electron microscopy, appearance of human leucocytes in naturally occurring fevers, 1-6
- Electrophoretic patterns and oxygen affinities of hemoglobins in Virginia trout and bass, 1-16
- Emphysema
 pulmonary
 challenge of, 1-34
 relative incidence among Negroes and whites, 1-50
- Energy requirements of breathing, 1-48
- Ethics, medical, 3-19
- Eye, effect of idoxuridine on corneal stromal cells in tissue culture, 1-30
- Fever, naturally occurring, electron microscopic appearance of human leucocytes in, 1-6
- Gastric secretion, mediation by extravagal neural influences, 1-28
- γ -Globulin administration and anti-globulin antibodies in children, 3-26
- γ -Guanidinobutyric acid
 effect on clotting time of normal plasma and on euglobulin lysis time of fibrinolytically active plasma, 1-4
 inhibitor of clot formation and lysis, 1-2
- Heart defects, congenital radiologic diagnosis, 2-44
- Hemodialysis in acute renal failure, chronic renal disease with reversible features, and in conjunction with renal homotransplants, 3-7
- Hemodynamics of toxemia, 2-32
- Hemoglobins, oxygen affinities and electrophoretic patterns in Virginia trout and bass, 1-16
- Homotransplants, renal, hemodialysis, 3-7
- Hypertension, treatment, 2-28
- Idoxuridine, effect on corneal stromal cells in tissue culture, 1-30
- Infection, urinary tract, frequency and natural history in children, 3-24
- Kidney
 hemodialysis in acute renal failure, chronic renal disease with reversible features, and in conjunction with renal homotransplants, 3-7
 radioisotope renogram, physiological basis, 2-8
- Kidney diseases
 transplants, ethics in, 3-19
 uremia
 maintenance of life in, 3-12
 treatment of chronic, 3-2
- Laser in clinical ophthalmology, 2-17
- Leucocytes, human, electron microscopic appearance in naturally occurring fevers, 1-6
- Leukoagglutinin specificity determination by studies *in vivo* and *in vitro*, 4-15
- Lung
 interdependence of pulmonary structure and function, 1-46
- Lung diseases
 pulmonary emphysema
 challenge of, 1-34
 relative incidence among Negroes and whites, 1-50
 relation of pulmonary surfactant to disease, 1-52
- Marriage counseling, systematic approach to evaluation and treatment, 4-36
- Mathematics in medical diagnosis, 1-22
- Medical College of Virginia Quarterly*, editorial, 1-1
- Medicine
 doctor-patient relationship, 4-30
 role of modern physician, 2-21
- Metabolism, cell, resistance to tuberculosis and, studies on mononuclear peritoneal exudate cells, 4-21
- Mouth, cancer, radiotherapy, 2-14
- Ninhydrin and alloxan reactions, application to tissue sections, 4-26
- Neural influences, extravagal, mediation of gastric secretion, 1-28
- Ophthalmology, applications, limitations, and hazards of the laser, 2-17
- Oxygen affinities and electrophoretic
