Sixty-first
Annual Meeting

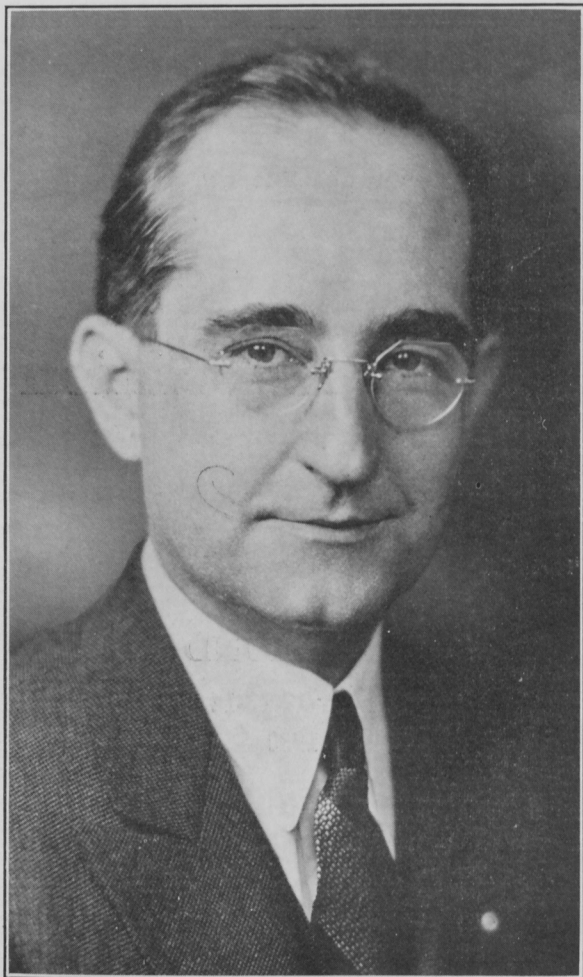

Virginia State
Dental Association

RICHMOND

MAY 12-13-14
1930

Headquarters
THE JEFFERSON

DR. J. E. JOHN

President

ROANOKE

Greetings

*To the Members of The Virginia State Dental
Association and their Guests:*

We bid you welcome to the annual meeting of the Association to be held at the Jefferson Hotel in Richmond, May 12-14 inclusive.

Your committee on hotel arrangements particularly desires you to know that the Jefferson Hotel management was both courteous and generous in placing the necessary facilities at the Association's disposal.

The program committee has been fortunate in securing essayists who are recognized authorities on the various subjects to be presented. The clinic committee has done excellent work, and the entertainment committee promises that all things will be in order for a good time in the Capital city.

The year has been a busy one. Many things of importance, some of grave importance, have come before the officers and committees, which at the proper time will be reported to you for your consideration and disposition. It is our hope that each of you will be present, entertaining a determination to advance the standards of dentistry in the State of Virginia by giving more thought and real work to the creation of a more efficiently working organization.

J. E. JOHN, *President.*

General Information

Registration

The Registration Office will be on the first floor, near the main entrance. It will be open at 8 A. M. Monday, May 12. It is hoped that all members, guests and exhibitors will register immediately upon arrival. Only those with badges will be admitted to the sessions of the Association. Buttons will be issued to members upon presentation of their 1930 membership cards or upon payment of their dues to the Secretary.

Visitors from other States are requested to bring their 1930 cards.

Sessions and Clinics

All sessions and clinics will be held in the ballroom of the hotel.

Exhibits

The manufacturers' and dealers' exhibits will be held on the main floor in the south end of the lobby. The exhibits will be open at all hours.

Dr. W. Tyler Haynes, Richmond, Va., will be in charge of the exhibits. Those exhibitors desiring any information or assistance may call upon him when they reach the hotel.

Notice to Clinicians

You have manifested your interest in the Association and this meeting by promising to present a clinic, for which we are duly thankful. Your name and the title of your clinic appear in the program, and it is proposed to present everything which appears thereon. Consequently, do not be the direct cause of disappointment to your fellow-members by failing to fulfill your promise.

Kindly report one-half hour before schedule time for your clinic to Dr. A. O. James, Chairman of Clinic Committee, who will direct you to your assigned table and, as far as possible, care for your needs. You will thus insure the orderliness of this feature of the program and materially contribute to the success of the meeting.

Entertainment

Banquet and Dance

6:00 P. M.

The Annual Banquet of the Association will be held in the Ballroom of the Jefferson Monday evening, beginning at 6:00 P. M. The Banquet must begin on time so that it will be over by 8:00 o'clock in order that our members may attend a lecture at the John Marshall High School Auditorium by Dr. Mayo (for details, see program for Monday evening). This banquet is to be the chief social function of the convention and everyone is urged to make every effort to be present. It is open to all members of the Association and their guests, and also the guests of the Association.

There will be a charge of \$2.50, which is the actual cover charge of the banquet. The Association bears all the rest of the expense, including that of the dance.

Tickets may be purchased at the registration desk. Please attend to this early, so that we may know how many to prepare for.

At 11:00 o'clock (after the lecture) there will be a dance given by the Association in the Ballroom of the Jefferson. Admission to this will also be by ticket, which may be gotten at the registration desk without cost. The dance is open to the members of the Association and their guests, and also to the guests of the Association.

Golf

The annual golf tournament of the Association, a thirty-six hole blind handicap, will be played on the course of the Lakeside Country Club. The management of this club has very kindly extended the courtesy of the Club to our membership during the entire meeting. There will, of course, be a greens fee charge for all those who play golf.

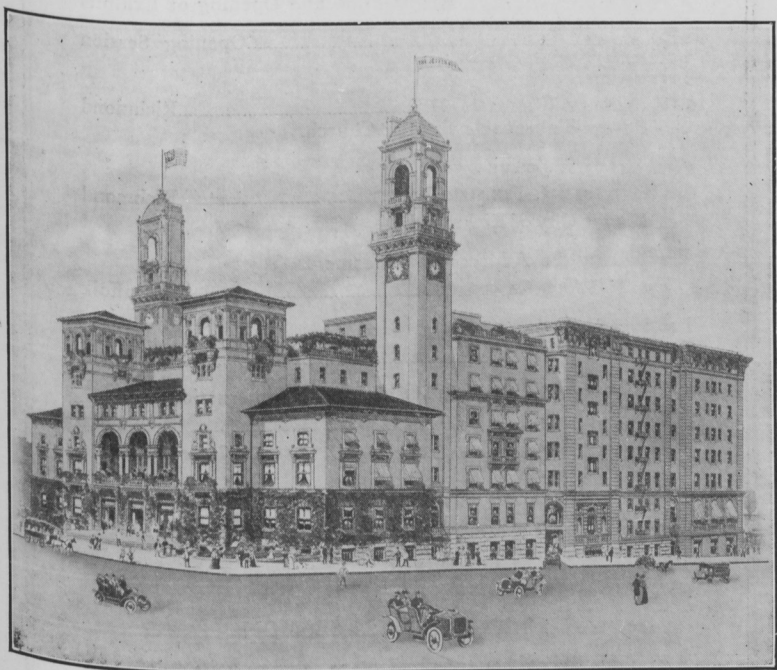

All who desire to enter this tournament should send in their handicap at once to Dr. R. I. Pusey, 321 W. Franklin Street, Richmond, Va.

Many attractive prizes have been secured for this event.

LADIES' ENTERTAINMENT

A bridge luncheon will be given for the ladies at the Country Club of Virginia. This will be in charge of Mrs. W. H. Street.

Notice of the time will be posted at or near the registration desk.

HEADQUARTERS
THE JEFFERSON

Program

Virginia State Dental Association

MONDAY MORNING

8:00-10:00.....Registration and Opening of Exhibits

9:30.....Opening Session

Invocation

R. AUBREY WILLIAMS, D.D.....Richmond
Pastor Tabernacle Baptist Church.

Address of Welcome

HONORABLE J. FULMER BRIGHT.....Richmond
Mayor City of Richmond.

Response to the Address of Welcome

DR. T. WOOD CAMPBELL.....Suffolk

EXHIBITORS

It is largely through the exhibitors that our meetings are financed, and upon the reports of the representatives at this meeting to their respective firms of their success or failure in reaching our members depends whether the exhibiting firms might think it worth while to continue attendance at our meetings. To the representatives is due the courtesy of an opportunity to exhibit and demonstrate their products to our membership.

Consequently, both for the advantages accruing to the Association and in fairness to our exhibitors, members are urged to spend as much time as possible with the representatives and show them every possible consideration.

Your committee has striven to be liberal in the time reserved for the use of exhibitors and believes that the time spent in attendance at the various demonstrations will be well worth while.

Will You Listen, Doctor, Then Give Us Your Suggestions?

*We Broadcast Nightly (Except Sunday) to
Thirty Million People. Facts Helpful to
Them and Beneficial to the Dental Pro-
fession Are Earnestly Requested*

You know of Amos 'n' Andy?
They have become characters of
national importance, so to speak.

The Pepsodent Company is
using the Amos 'n' Andy feature
as a vehicle to disseminate in-
formation of benefit to the public,
the profession and Pepsodent.

We know what to say about
Pepsodent. You may have sug-
gestions on what to say, in the in-
terest of the dentist and patient.

In a panel on this page is re-
printed a typical message. Others
you may hear nightly—at stations
and time below.

After listening for a few nights
we shall welcome your opinions.

PEPSODENT Typical Radio Continuity

Typical Radio Continuity

"It is a mistake to allow baby
teeth to decay simply because
they will soon come out. Have
your dentist examine them at
once. If cavities are not re-
paired, an abscess may form
at the root of the tooth, send-
ing poisons through the entire
body. Your physician knows
how often this results in swol-
len glands and many other
childhood disturbances. Often
the permanent tooth to follow
is affected and its enamel
rough and unsightly. Have
your children use Pepsodent
tooth paste twice a day, and
see your dentist at least twice
a year."

ROACH REMOVABLE RESTORATIONS CONSTRUCTION

by

DR. ROACH'S TRAINED TECHNICIANS

is the

SERVICE WE OFFER YOU

The advantages on the Roach Principle are very numerous. Some of the outstanding features are:

1. A more flexible, yet firm means of retention.
2. Permits both mesio-distal and bucco-lingual adjustment.
3. Gives support to, rather than a strain upon, the anchor tooth.
4. Is more open and can be cleansed more easily with the ordinary tooth brush.
5. The three point mesio-distal grip permits normal functional movement of the tooth.
6. Covers far less tooth surface and is not so conspicuous as the ordinary horseshoe clasp.
7. Is more adaptable to malposed teeth and is therefore more nearly universal in application.
8. Its length and relation to the tooth permits individual adjustment of the clasp contacts.
9. Its greater flexibility permits clasp to pass over excess contour of tooth and return to a firm grip.
10. The very nature of its design results in a mesio-distal, rather than a bucco-lingual grip on the tooth.

ROTHSTEIN DENTAL LABORATORIES

After Twenty Years....

In 1910, we started out with a definite aim in mind. Today, that aim has been realized. With the opening of our new laboratory, completely equipped with all modern facilities, we offer the dental profession the best, in every respect, that wide experience can produce.

Our master technicians will construct for you—with superior results:

Certified Akers Restorations
Davies Process Dentures
Coedal (Davies Process) Dentures
Coecast Dentures
Roach Cases
Porcelain Restorations
Trupontic Bridges

We are satisfactorily serving a large out-of-town clientele, and bespeak the kindness of a trial. Our branch office at Norfolk, Va., is at your service at all times.

Germicidal Kryptex

*The Only Translucent, Non-Discoloring
Germicidal Cementing Medium*

Think for a moment of the numerous applications that a good, strong, translucent, non-discoloring cement with positive germicidal action, will have in your practice. Under jacket crowns, porcelain inlays and facings, are only a few of the operations where the beneficence of an antiseptic is offered in Germicidal Kryptex.

It is twice as strong as the best germicidal cementing medium ever offered in points of resistance to masticatory stress and retentive properties.

It is constant in volume, is unaffected by oral fluids, and permanent.

Esthetic restoration and the repair of defective fissures in deciduous teeth are now possible because the vexing problem of discoloration is an annoyance of the past. Made in six colors, and having a beautiful translucence, Germicidal Kryptex can be used in any location.

Hundreds of orthodontic bands have been cemented with Germicidal Kryptex, and upon removal nine months later revealed no decalcified areas. The margins were perfect.
