To Educate Those Who Would Serve Humanity • To Preserve and Restore Health • To Seek The Cause and Cure of Diseases

VOLUME XII, NO. 10

MEDICAL COLLEGE OF VIRGINIA • RICHMOND, VIRGINIA

JANUARY, 1960

MCV Now Accredited by Southern Association of Colleges & Secondary Schools

Samuel M. Bemiss, chairman of the Board of Visitors, presents resolution on Porter professorship to Dr. W. Taliaferro Thompson, Jr., professor of medicine and chairman of the department.

Professorship of Medicine Named for Dr. William B. Porter

The Board of Visitors of the College on October 9, 1959, in recognition of the long and distinguished service of Dr. William Branch Porter, former professor of medicine, and in token of the high esteem in which he is held by colleagues and former students, designated the professorship of medicine held by the chairman of the department of medicine as *The William Branch Porter Professorship of Medicine*.

A framed copy of the Board's resolution naming the professorship for Doctor Porter will be placed in his room in MCV Hospital, where he has been confined since his stroke in the spring of 1956.

Doctor Porter is an alumnus of MCV and was professor of medicine from 1929 until his illness. He is now an emeritus professor of medicine.

College To Get the Civil War Centennial Building After Celebration Is Over

The Virginia Civil War Centennial building will provide the core for an MCV student activities center after 1965, under an agreement reached between the Civil War Commission and State authorities.

The Centennial visitors' center will be located north of our student residence halls and will be so designed that it can be converted to partially meet the need for a student activities building after the celebration.

The structure, for which the Civil War Commission is requesting funds at this session of the General Assembly, would be completed and opened for the celebration in the spring of 1961. The College has agreed to provide both

(Continued on Page 6)

The College begins the New Year as a member of the Southern Association of Colleges and Secondary Schools, marking the first time such a professional institution has received this accreditation in the South.

A team of eight educators made a four-day visit in October for a thorough inspection, and further information was presented by MCV officials in December to the Association's admissions committee in Atlanta.

Both the Association and the College recognize the accreditation as "ploughing new ground," inasmuch as the Southern Association had not considered professional institutions for membership prior to the MCV application.

The component schools of the College, with the exception of nursing, already have national accreditation from the applicable professional groups. The school of nursing must have the approbation of the regional accrediting agency before national accreditation is given; so the action of the Southern Association is therefore of particular interest to the school of nursing. However, MCV officials have felt for some years it should be an active member of the Southern Association because of mutual benefits that are certain to accrue from this type of affiliation.

Members of the inspection team who laid the groundwork for Southern Association consideration were: Dr. Henry King Sanford, president, Birmingham-Southern College, *chairman*; Dr. Gordon W. Sweet, executive secretary, Southern Association of Colleges and Secondary Schools; Dr. Henry T. Clark, Jr., administrator, Division of Health Affairs, University of North Carolina; Dr. Shailer Peterson, secretary, Council on Dental Education of the American Dental Association; Dr. J. Paul Reynolds, dean, College of Arts and Sciences, Florida State University; Dr. Clyde H. Schuyler, member, Council on Dental Education of the American Dental Association; Miss Dorothy Smith, dean, University of Florida school of nursing; and Dr. Kenneth L. Waters, dean, University of Georgia school of pharmacy.

The Medical Education Building

Favorable action by the current session of the Virginia General Assembly on our requested appropriation for the medical education building will permit a 50 per cent increase in freshman admissions to the school of medicine and provide, for the first time, appropriate teaching and research quarters for the clinical departments.

In addition to accommodating the clinical medical faculty, the departments of pathology, physiology, and biophysics and biometry will be housed in the new building, and additional space will be provided in it for the department of biochemistry. The new accommodations for these departments will of course release space currently occupied by them for expansion of other basic science departments and relieve much of the congestion that has plagued their activities for some years.

Primary consideration is directed to the needs of the student. Convenient study facilities, as well as other facilities to care for individual needs, are incorporated in the building. These are combined in a unique student cubicle arrangement accommodating half of the medical student body. These have never been provided heretofore.

Among other activities to be housed in the new building are visual education, a computing center, the laboratory for human genetics, graduate studies in the medical sciences, and the continuation education department.

To erect the building, MCV is requesting from the state's general fund the sum of \$4,400,000, which will be supplemented by \$1,378,000 in federal funds (already approved by the Health Research Facilities Branch of the National Institutes of Health from funds to become available July 1, 1960). The site, bounded by Eleventh, Twelfth, and Marshall streets, has been acquired and preliminary plans are complete. Funds for these purposes were made available by the 1958 session of the General Assembly and by action of Governor Almond. Assuming the legislature approves the MCV request, the College will move ahead as rapidly as possible with the hope of advertising the project for bids during the summer of 1960; this would enable construction to get under way in the autumn on a schedule calling for occupancy during the 1962-63 school year.

The building will include ten floors above ground and two basement levels. The laboratory and classroom facilities are planned to permit expansion of the entering class in medicine from 84 to 128. This is of prime importance in meeting the increased need for the education of men and women in Virginia in medicine and in the related health professions. Without the new building, the College could not properly meet its responsibilities for providing these enlarged opportunities for the burgeoning student population.

The most advanced thought and experience in medical education have been applied to the planning of the new structure. Dr. George T. Harrell, Jr., dean of the college of medicine at the University of Florida, who is a recognized authority in this field, has served as consultant to the College and the architects in the development of the plans. State budget and architectural officials have devoted much time to the project, in collaboration with the dean of the school of medicine and heads of departments, with the result that the new facility will represent the composite of the best thinking available on this type of building.

Aside from providing the physical means of enlarging the entering classes in medicine, the school of medicine recognizes that adequate housing for the faculty, never yet achieved at MCV, and improved teaching and research facilities, are

(Continued on Page 6)

Social Security Payments Increased January 1

Your check will be a little smaller after January 1, 1960. Social Security has increased from $2\frac{1}{2}$ per cent to 3 per cent on wages subject to this tax. In effect, this increase means that 3 per cent of the first \$4,800 of your salary will be withheld each payday. The College will increase its matching payments to 3 per cent.

This increase is one of a series of increases scheduled under the Social Security law to keep the program self-supporting and provide for coverage of groups not previously eligible for benefits. One major factor in this additional cost is the growing number of older people qualified for retirement and family benefits.

Proposed tax increases for the future provide $3\frac{1}{2}$ per cent in 1963; 4 per cent in 1966; and $4\frac{1}{2}$ per cent in 1969.

Christmas At Monumental Church Marked Two Anniversaries

Two significant anniversaries were observed in historic Monumental Church at the Christmas services in 1959. It was not only the 148th anniversary of the disastrous theater fire of December 26, 1811, and of a civic ordinance passed the next day to erect a monument "over the remains of the 72 persons who perished in the flames," but also the 60th anniversary of a farewell service on December 27, 1899, for Dr. Rudolf Bolling Teusler, who, with Mrs. Teusler, left Richmond for Japan where Doctor Teusler founded St. Luke's Hospital and Japan's first school of nursing. Thirty years later the massive block of buildings bore the inscription prepared by Doctor Teusler in Japanese and in English:

"ST. LUKE'S INTERNATIONAL MEDICAL CENTER
TO THE GLORY OF GOD AND
THE SERVICE OF HUMANITY."

Rudolf Bolling Teusler, born in Rome, Georgia, February 25, 1876, entered MCV school of medicine in the fall of 1892, was graduated two years later, and began practicing medicine in Richmond at the age of eighteen. In 1896, he was made adjunct professor of histology, pathology, and bacteriology at the College. He resigned December 21, 1899, having accepted a position with the Episcopal church as a medical missionary in the missionary district of North Tokyo. He remained in Japan until his death in 1934. MCV conferred the honorary degree of doctor of science on Doctor Teusler in 1934 before his death.

Teusler Hall, adjoining the Monumental Church, was named for him when the 86-year old Sunday School building was remodeled and renovated last winter. It now serves as a center for MCV students and is the scene of meetings of religious groups organized on the campus. Since October 6, a newly inaugurated series of services (called Campus

Vespers) have been held each Tuesday from 6:30 to 7 p. m. in the Monumental Church. Each service is followed by meetings in Teusler Hall of the Baptist Student Union, the Teusler Fellowship, the Wesley Foundation, and the Westminster Fellowship. Speakers at Campus Vespers are chosen each month to represent the various cooperating denominations. A senior medical student has acted as organist; ushers are provided by the various religious groups.

MCV Woman's Club Raises \$140 for Waller Fund

The MCV Woman's Club realized \$140 from its "pot luck" supper on December 2, which was donated to the Robert Waller Memorial Fund for nursing care.

Each year for several years these faculty wives have held the supper, donating all of the food, and asking each person attending the dinner to give a silver offering for the Waller Fund.

The continuing interest of faculty wives in this worthy fund is indeed heartening and greatly appreciated.

MCV Security Force Attend School

Five members of our security force recently attended the Virginia State Capitol Police Training School for 32 hours of classroom work and one 4-hour period on the Virginia State Police Pistol Range. All completed the course and passed the course with flying colors. Those attending, to whom we extend our hearty congratulations, were: Bernard Aczkiewicz, Raymond L. Firth, Charles H. Miller, Alex L. Spencer, and Stephen E. Taylor. A. L. Spencer, chief of our security department, stated that he felt attending this school made our personnel better qualified to perform their duties at the College and that it had also given them a background for attending the Central Police School next spring.

Orientation for Employees Scheduled at New Time

Personnel Director Benjamin T. Cullen, Jr., has announced that in the future orientation periods for new employees will be held on the *second Wednesday of each month at 2 p. m., in the Baruch Auditorium.*

It seemed that the old scheduled hour was inconvenient and often employees could not be spared to attend the orientation period. Mr. Cullen feels these periods serve a two-fold purpose: (1) to officially welcome newcomers to MCV; and (2) to provide general information on the functions and policies of the College.

The personnel department will furnish each department a list of hourly and salaried personnel employed during the previous month approximately one week before each scheduled meeting.

Department of Nursing Service News

MISS SHIRLEY HARTMAN and JOHN ODELL were married in December and will go to California. Miss Hartman, who was head nurse in the MCV Hospital emergency room, will be replaced by MISS MARYBELLE OVERMAN. MARION STONE and WANDA K. STALLARD have returned from New York City where they took a course in cancer nursing at Memorial Hospital. JOAN NUGENT has been appointed head nurse in the recovery room in MCV Hospital. She replaces JOHANNA SMITH, who resigned to be married.

LUCY M. RICE has replaced Mrs. Burnette on 4 South, MCV Hospital.

Annual Service Pin Awards, February 18

Annual service pin award ceremonies will be held in the Baruch Auditorium on February 18 from 10 to 12 noon. These awards are made for 5, 10, 15, 20, 25 and additional years of service at MCV.

Dental School News

DR. HERBERT R. BOYD, associate professor of crown and bridge prosthodontics, was guest speaker at the December meeting of the Southwest Virginia Dental Society in Abingdon on December 2.

DR. F. B. WIEBUSCH, chairman of the department of oral diagnosis and therapeutics, has been appointed to the Council on Dental Therapeutics of the American Dental Association.

News in Microbiology Department

DR. DOYLE E. ROEBUCK, instructor in microbiology, has resigned to accept a position as associate professor in the animal disease department of the Agricultural Experiment Station at Mississippi State University, State College, Mississippi.

DR. J. DOUGLAS REID, professor and chairman of the department of microbiology, attended the Conference on Medical Mycology sponsored by the New York Academy of Sciences, January 11-12.

SHARING SORROW

Doctors Custis and Philip Coleman of our school of medicine in the death of their mother.

Dr. William J. Longan of our dental school and Dr. Coleman Longan of our medical school in the death of their father.

Dr. Sidney S. Negus, chairman of the biochemistry department, in the death of his wife.

Dean of Students Appointed

Dr. Jay H. Ostwalt of Davidson College will become dean of students on July 1.

Doctor Ostwalt, who holds the M.A. and Ph.D. degrees from Duke University, is a native of Statesville, North Carolina. He has been associated with Davidson (where he was graduated with the B.A. degree in 1935) for the past twelve years as director of testing and guidance and associate professor of education. His wife, the former Adeline Hill of Mississippi, holds the master's degree from the Presbyterian Assembly Training School here.

"On-Patient Identification" Bands Now in Use

The "on-patient" identification band method has been put into use in College hospitals. The band, which is attached to the patient's wrist in the admitting departments, shows his name and identification number. The identification number is a special number assigned by the admitting departments.

In MCV Hospital, the number is preceded by the letters IM—in St. Philip Hospital by IS—in the Ennion G. Williams Hospital by IE.

It is felt that this system of identification, with the name and number in plain view on the patient's wrist, will lower considerably any chance of misidentification.

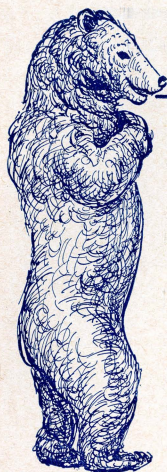

THE GATE OF THE YEAR

*I said to a man
Who stood at the gate—
The gate of the coming year:
"Give me a light
That I may safely tread
Into the dark
And unknown land;*

*Give me a light to banish fear.
Take from my heart
This haunting dread."
He said to me,
This man who stood
At the gate of the coming year:
"Go into the dark*

*And unknown land,
And place in God's
Your trembling hand.
Far better than the light of day
Far safer than any man-known way!"
At the open gate—
The gate of the coming year.*

—From Baylor Progress

HAVE
YOU HEARD

A SINCERE "THANK YOU"

MRS. ARLENE JONES of the elevator staff wants to thank everyone for so many kindnesses and gifts during the illness of her husband.

A. D. WILLIAMS MEMORIAL CLINIC

On December 17, the first floor of the clinic was the scene of our Christmas party. MRS. WHEELER, housekeeper, played the piano for our carol singing. After the singing, refreshments were served and everyone had a good time.

MRS. AVERY GOODMAN, clerk, spent the holidays in New York City visiting her daughter. MRS. THELMA BOWERS, supervisor, entertained at a party at her home on December 22. A good time was had by all. MRS. ALINE MILES, clerk, is now convalescing at her home following surgery. We miss her and wish her a speedy recovery. We are happy to have MRS. EVELYN PACE, clerk, back with us after several months absence due to illness. It is good to know that MRS. VELMA MORGAN, nurse, is recovering nicely from her recent operation and will soon be back with us.

ENNION G. WILLIAMS HOSPITAL

Congratulations to MRS. ANNE WHITMORE (MRS. ROBERT L. WHITMORE), former clerk in our business office, on the birth of a second son. MRS. DOROTHY DICKINSON, clerk at the information desk on the first floor, visited Doctor and Mrs. Whitmore and her grandchildren during the Christmas holidays at their new home in Kempsville Colony, Princess Anne County, Virginia. We were sorry to lose MRS. SYLVIA LONGEST, clerk in the business office, who resigned on December 15. We welcome MISS NANCY SUE ENOCHS, who transferred to us on December 16 from Memorial Hospital to fill Mrs. Longest's place.

Looking over the rim of the volcano's crater, one American tourist said to another:

"Really something huge, isn't it? Reminds one of Hades, doesn't it?"

One of the natives who overheard the remark, shrugged his shoulders, threw up his hands and exclaimed:

"These Americans. They've been everywhere."

* * * * *

Out with the old habits—was our motto for this year . . . So far, not much luck.

* * * * *

A clerk was handed a pay envelope which, by error, contained a blank check.

The astonished clerk looked at it and moaned: "Just what I thought would happen. My deductions have at last caught up with my salary."—*Tit-Bits*, London.

Reporters' Roundup

LAUNDRY AND SEWING DEPARTMENTS

Our annual Christmas party was held on December 4 at the Hot Shoppe with nineteen of our group present. After a delicious dinner, gifts were exchanged and each departed for home feeling more in the Yuletide spirit.

We wish to give special commendation to DANIEL ALSTON, who by his quick thinking may have saved the arm of an employee of the P. L. Thomas Coal Company. The man's sleeve became caught while unloading coal at the MCV power plant. When he called for help, some of the boys from the soiled linen room nearby ran to his aid. Daniel quickly slit the man's sleeve with his pocket knife, releasing his arm that was being pulled into the machinery.

We are glad to have some of our people back on the job who have been out with the flu, and MARIE MINES, who has been confined to bed from a spine injury received on December 8 when a car backed into her.

The Christmas holidays were spent in various ways . . . some of us stayed at home and had our families and friends in. MRS. REBECCA AKERS visited her sister, Mrs. Bessie Jett in Brookvale, Virginia. Mr. and Mrs. J. F. Long and children of Newport News were the guests of MRS. SARAH TYLER. MRS. EDMONIA WILLIS had as her guests her daughter and son-in-law, Mr. and Mrs. Walter Bratton of Roanoke, and her son Carl Willis and family of Washington. MISS BESSIE BARDEN spent the holidays with her nephew, T. Ashby Newby and family of Bon Air. Captain A. F. Fischer, son-in-law of MRS. ELMER HENRY, returned home on December 13 after fourteen months in Korea. He will now be stationed at Fort Campbell, Kentucky.

THE OLD YEAR

What is the Old Year? 'Tis a book on which we backward sadly look,

Not willing quite to see it close,

For leaves of violet and rose

Within its heart are thickly strewn,

Marking love's dawn and golden noon;

And turned-down pages, noting days

Dimly recalled through Memory's haze;

And tear-stained pages, too, that tell

Of starless nights and mournful knell

Of bells tolling through trouble's air

The De Profundis of despair—

The laugh, the tear, the shine, the

Shade, all 'twixt the covers gently

laid;

No uncut leaves; no pages unscanned;

Close it and lay it in God's hand.

* * * * *

THE NEW YEAR

And as the Old Year slips away,

He kindly with him takes

The pages we have blurred and

marred

With failures and mistakes.

The blighted hopes and

needless fears

Are gone beyond re-

call,

And ours once more the

fair, clean page

The New Year

brings to all.

The Medical Education Building

(Continued from Page 2)

essential to the continuing effort to recruit and to retain the corps of instructors required to maintain an educational program of high quality. The medical education building will fulfill these needs for the departments to be housed there.

The building will be the most significant addition to the physical plant since the erection of MCV Hospital. Incidentally, it will tie in perfectly with the City of Richmond's long-range plans for the mid-town civic center, a project of inestimable value to the whole metropolitan area.

College To Get Civil War Centennial

(Continued from Page 1)

the land for the site and for visitors' parking in the vicinity. The land and improvements will revert to full use of MCV after the centennial.

The arrangement to have the building erected in the College area so that it would serve a useful and much needed purpose subsequently was worked out at the suggestion of Governor Almond and Budget Director L. M. Kulm. The College has needed a student activities center for some years, but other pressing needs have continued to take higher priorities in the allocation of available funds. The proposed arrangement will conserve State monies by providing a centrally located celebration center without any land costs and at the same time will provide a structure of long-term usefulness to the College.

Heart Surgery for Parents, Plus 'New Miracle'

HEART RESEARCH speeded by the Heart Fund saved the lives of Mr. and Mrs. Richard Benoit of Worcester, Mass., both of whom underwent successful heart operations before their marriage. Now, a "new miracle" has been added — their happy and healthy 11-month-old daughter named Patricia Ann. Mr. and Mrs. Benoit will be among the 1,500,000 Americans collecting for the Heart Fund on Heart Sunday, February 28.

Help the Heart Fund . . . Help Your Heart

HEART MONTH will be launched with heart research day and heart fund campaign kick-off day on February 2, Ed. P. Phillips, president of the Virginia Heart Association, has announced.

The research phase of the day's program will give to the public some of the highlights of the research that is bringing hope and help to heart patients.

The Virginia Heart Association supports a number of heart research projects and medical traineeships at the Medical College of Virginia and at the University of Virginia's department of medicine and various educational and community service activities throughout the state.

The Heart Fund campaign kick-off will launch the month's drive for \$450,000 to continue and to expand programs of research, lay and professional education, and community service designed to combat our nation's number one health enemy . . . diseases of the heart and circulatory system. This enemy is responsible for approximately 54 per cent of all deaths in this country. In Virginia, the rate is a little over 53 per cent.
