RICHMOND, VIRGINIA

73rd
Annual Meeting
Virginia State Dental
Association

Centennial Celebration
of
Organized Dentistry in Virginia

Hotel John Marshall, Richmond, Va.

April 6, 7, 8, 1942

DR. DAN O. VIA
CHARLOTTESVILLE, VIRGINIA
President, Virginia State Dental Association

Greetings

May I cordially invite and gently urge every member to attend the Centennial Convention of our State Dental Association.

It is always pleasant to meet in Richmond and we feel that the Program offers a great deal that will be helpful and instructive. Your Committees have spent considerable time and effort to prepare a program that is different. You will note that we have Progressive Clinics for the first time. This special Centennial Celebration calls for a recounting of some past history and events of dentistry, its development, and what may be expected for the future. We will learn much concerning our duties in the Defense Program. We may anticipate much instruction in the importance of our profession and in the scientific and practical phases of dentistry, so that we will return to our daily work inspired to carry on our activities with more enthusiasm than ever before.

Your presence at this meeting in these critical days will be evidence of your desire to contribute your share to Dentistry's part in our National War Effort.

A little relaxation is essential and that has been provided for. Special entertainment for the ladies has been adequately prepared and we are expecting many.

I wish to sincerely thank all the officers and committeemen, essayists and clinicians, and all who have contributed in any way to make this meeting a fine success.

May I express my sincere appreciation and thanks for the privilege of serving as President of the Virginia State Dental Association and for the fine cooperation from all officers and committees.

Respectfully,

DAN O. VIA, *President.*

General Information

REGISTRATION

The Registration Office will be in the Main Lobby. It will be open at 11 A. M., Sunday, April 5th. It is hoped that all members, guests, and exhibitors will register immediately upon arrival. Only those with badges will be admitted to the sessions of the Association. Badges will be issued to members upon presentation of their 1942 membership cards or upon payment of dues.

SESSIONS AND CLINICS

All scientific and business sessions will be held in the Auditorium. Clinics will be held on the Mezzanine in the Washington and Monroe Rooms.

EXHIBITS

The manufacturers and dealers exhibits will be held on the first floor of the hotel. Dr. L. A. Bowman will be in charge of exhibits. Those exhibitors desiring any information or assistance may call him upon arrival.

GROUP CLINICS

In order to avoid congestion at the clinic sessions, it will be necessary to divide the association membership into two groups. Upon registering you will be assigned to group "A" or group "B," and you are requested to attend only those clinic sessions to which your group is scheduled.

Please be present promptly where scheduled, to avoid confusion and disturbing the clinicians and your fellow members.

Hotel Rates

HOTEL JOHN MARSHALL (Convention Headquarters)

Single room	\$3.00	\$3.50	\$4.00
Two person double room, double bed	5.00	5.50	6.00
Two person double room, twin beds..	6.00	7.00	8.00 \$9.00

HOTELS RICHMOND, MURPHY and WILLIAM BYRD

Single room	\$2.75	\$3.00	\$3.50
Two person double room, double bed	4.50	5.00	5.50
Two person double room, twin beds	5.00	6.00	7.00

All of the above rooms are with private baths.

JEFFERSON HOTEL

Single rooms without bath, running water.....	\$2.00 to \$2.50
Double rooms without bath, running water.....	3.00 to 3.50
Single rooms with bath.....	3.00 to 6.00
Two single rooms, bath between (per person).....	2.50 to 3.50
Rooms with bath, double bed, two persons.....	4.50 to 6.00
Rooms with bath, twin beds, two persons.....	5.50 to 8.00

Members are urged to make their reservations early in order to secure most desirable rooms. Those arriving Saturday or Sunday, please advise.

Entertainment~

GOLF

The annual golf tournament of the Virginia State Dental Association will be held at the Lakeside Country Club on Sunday, April 5, 1942, at 1:30 P. M.

A charge of \$2.00 (two dollars) per person will be made to cover the greens fee, prizes and incidentals. Should there be any money left over, a fund will be created for purchasing prizes the following year.

Your handicap will be calculated from your score on certain holes selected and known only to the local professional, Mr. Brody. Prizes will be offered for low gross, low net, low gross booby, low net booby, grand prize (Blind Bogey) with equal chances for all, and the tee shot which is closest to number fifteen hole. Should there be more than one hole-in-one, duplicate prizes will be given.

The names of the winners will be posted on the bulletin board at Registration Desk of the hotel, with directions as to where they may find their prizes.

REPORT OF COMMITTEES

Monday, April 6th—11 A. M.

SCIENTIFIC SESSION

Auditorium, Main Floor

PARTIAL DENTURE PROSTHESIS

Synopsis

In addition to the topic discussion, the clinician will present a detailed technic for partial denture construction.

WILLIAM JOHN HEALEY, D.D.S.....New Orleans, La.
Formerly on the faculty of Loyola University, School of
Dentistry, New Orleans, La.

Topic Discussion Questions

1. What are the major problems associated with Partial Denture service?
2. What preliminary examination and records should be made prior to taking an impression for a partial denture?
3. Give some practical suggestions for the designing of partials?
4. Is it possible to secure Balanced Occlusion and maintain it in partial denture service?
5. How can possible injury from undue stress to abutment teeth be minimized?
6. How does partial denture service compare in efficiency with other branches of Restorative Dentistry?
7. State some factors which will be an aid in determining the length of service a partial restoration will render?
8. Discuss impression technics for partial dentures.
9. Briefly discuss the retention of partials, giving the desirable requisites of an attachment.
10. Why have partial dentures required greater servicing than any other type of dental restoration?
11. State the major difficulties which develop in partials over a period of time which require service and give method of handling these.
12. When it is necessary to open the bite in partial cases, how can it be successfully done and maintained? What are the limitations?
13. What is the consensus of opinion regarding the base metals for partials and also the substitutes for vulcanite?
14. What are the chief causes for rapid absorption of tissue under partials and how is it possible to somewhat control it?
15. How should a prospective partial denture patient be advised concerning this service?
16. How does the author's partial denture technic utilizing the Fournet-Tuller principles differ from other technics?

Monday, April 6th—2 P. M.

SCIENTIFIC SESSION

Auditorium, Main Floor

OPERATIVE RADIOGRAPHY

Synopsis

The science and practice of producing a dental radiograph with proper angulation and exposure time. This clinic will be a practical demonstration of the technic for periapical and bite-wing radiographs.

J. C. ESELMAN, D.D.S. Pittsburgh, Pa.
Assistant Professor of Dental Radiography, School of
Dentistry, University of Pittsburgh, Pittsburgh, Pa.

Topic Discussion Questions

1. What are the dangers from the use of a dental x-ray machine to the patient and operator?
2. What are the different types of dental radiographic examinations and when are they indicated?
3. What is meant by localization?
4. What are the different methods of eliminating the malar bone and process in radiographing upper molars?
5. What is reduction? Of what value is it? How is it accomplished?
6. What are the limitations of a dental radiograph?
7. Are all radiolucent shadows on the proximal surfaces of teeth indicative of caries?
8. What are the important radiographic differences between a benign and malignant growth?
9. What is an intensifying screen? What is its action and when indicated for use?
10. How would you differentiate between the incisive foramen and peri-apical bone destruction?
11. What does a full mouth radiographic examination include?
12. What properties should a dental radiograph possess to be of diagnostic value?

MOTION PICTURE—The Classification and Removal of Impacted Third Molars.

Topic Discussion—Problems in Exodontia of Interest to the General Practitioner.

1. *A motion picture in two parts.*
 - (a) *A means of determining the probable difficulty to be encountered in the removal of impacted mandibular third molars.*
 - (b) *A method of removing impacted teeth based on the the principle of tooth division and the removal of tooth structure to provide space.*
2. *A clinic using models and enlarged radiographs to demonstrate the principles of the tooth division technique and explain the classification.*

GLENN J. PELL, D.D.S.....Indianapolis, Ind.
Professor of Oral Surgery, School of Dentistry, Indiana University.

Topic Discussion Questions

1. What do you consider the deciding factors in the choice between local and general anesthesia?
2. What preparation should the general practitioner make to meet any emergency of shock following either local or general anesthesia?
3. How do you extract an uncomplicated lower first molar? Do you change your technique when roots are spread with a heavy septum?
4. In your opinion which is the most difficult type of impacted mandibular third molar to remove?
5. What is the best way to remove upper incisor-premolar and molar apices?
6. Under what conditions would you extract a tooth by surgical removal?
7. What is your procedure when extractions are to be followed with immediate dentures?
8. What are the most effective procedures for the treatment of post-operative hemorrhage?

9. What are the most effective methods for the control of post-operative pain?
10. What is your procedure of the management of an acutely infected upper cuspid tooth when there is pronounced swelling with edema of the lip and face?
11. How do you manage acute pericoronal infections about impacted mandibular third molars?
12. What is your opinion of the etiology and treatment of "dry socket"?

ACRYLICS FOR DENTURES AND INLAYS

Synopsis

A practical demonstration will be presented illustrating the correct technic involved for the manipulation of acrylics for dentures and inlays.

E. HOWELL SMITH, D.D.S.....Philadelphia, Pa.
Assistant Professor of Prosthetic Dentistry, School of
Dentistry, University of Pennsylvania, Philadelphia, Pa.

Topic Discussion Questions

1. What is an acrylic resin?
2. What is the proper technique of curing acrylic resin as a denture base?
3. What are the chief advantages and disadvantages of acrylic resin as a denture base?

4. Does the cavity preparation for inlays to be made of acrylic resin vary from that for gold?
5. Does the preparation of a tooth for a jacket crown, made of acrylic resin, vary from that prepared for a porcelain jacket?
6. What is the proper curing technique of acrylic resin when used for inlays and jackets?
7. What physical and chemical changes take place during the curing process?
8. What results could be expected by varying the proportion of liquid and powder for denture bases, inlays and jackets?
9. What can be used to thin the liquid? Is this advisable?
10. What are the comparisons of crushing strength, cold flow of gold, amalgam and acrylic resins? What relation has this to cavity preparation?
11. What type of cement do you recommend for acrylic inlays and jackets?
12. Does the resilient properties of the acrylics make it difficult to retain fixed restorations in position under the stresses of mastication?
13. Are shades difficult to reproduce and are they changed following cementation?
14. What are the trade names of the acrylic materials for jacket and inlay work that will satisfactorily meet our requirements?

HYDRO-COLLOIDS FOR INLAYS AND FIXED BRIDGES

Synopsis

An illustrated lecture using kodachrome slides; will embrace the answers to the questions as listed below. The Clinic will consist of practical demonstrations of the technics involved.

KARL W. KNAPP, D.D.S.....New York, N. Y.
Consulting Dentist, St. John's Hospital, Long Island City,
New York; Former Professor of Crown and Bridge
Prosthesis, New York College of Dentistry, New York,
N. Y.

Topic Discussion Questions

1. Is there a difference in the working properties of the various hydro-colloids, and if so, what are they?
2. Does the bulk of hydro-colloid used make a difference in fit?
3. How should the hydro-colloid be prepared for best results?
4. What are the advantages of using a modelling compound preliminary impression?
5. How should these preliminary impressions be prepared for best results?
6. How can accurate impressions of gingival and sub-gingival terminations of cavity preparations be obtained with hydro-colloids?
7. Do cavity preparations have to be changed for hydro-colloid impressions?
8. May cavity preparations containing grooves and pin holes be accurately reproduced—and how?
9. How may impressions of cases with wide gingival, and narrow occlusal interproximal spaces be secured?
10. Does the time at which hydro-colloid impressions are "poured" affect the resultant accuracy—and how?
11. What is the best method for pouring dies into hydro-colloid impressions to avoid distortions?
12. What die stones have been found accurate for working casts?
13. How may individual dies be secured, if desired?
14. How may impressions of multiple cavities on both sides of the dental arch be secured in "opening-bite" cases?

15. Give some "hints and helps" for waxing the dies.
16. How are hydro-colloid impressions employed in crown and bridge repair cases?
17. How may hydro-colloid impressions be used in porcelain jacket and acrylic technics?
18. How may hydro-colloid impressions be used to restore missing and excessive recession of labial gum cases?
19. What are the relative merits of hydro-colloid and modeling compound band impressions for complex cavities?
20. What improvements may be hoped for in hydro-colloid technics?

UNFINISHED BUSINESS

Exhibitors

The Exhibitors and those placing advertisements in our BULLETIN assist us in financing our program and upon the reports of the representatives at this meeting, to their respective firms of their success or failure in reaching our members, depends whether the exhibiting firms might think it worth while to continue attendance at our meetings. To the representatives is due the courtesy of an opportunity to exhibit and demonstrate their products to our membership.

Consequently, both for the advantages accruing to the Association and in fairness to our exhibitors, members are urged to spend as much time as possible with the representatives and show them every possible consideration.

Your committee has striven to be liberal in the time reserved for the use of exhibitors and believes that the time spent in attendance at the various demonstrations will be well worth while.
