Recommended Citation
Graduate bulletin for Virginia Commonwealth University for the academic year 2015-2016. It includes information on academic regulations, degree requirements, course offerings, faculty, academic calendar, and tuition and expenses for graduate programs.

This Bulletin is brought to you for free and open access by the VCU University Archives at VCU Scholars Compass. It has been accepted for inclusion in VCU Bulletins by an authorized administrator of VCU Scholars Compass. For more information, please contact libcompass@vcu.edu.
# TABLE OF CONTENTS

Graduate Bulletin ......................................................................................................................... 12
About VCU ........................................................................................................................................ 13
Administration ................................................................................................................................. 13
Accreditation .................................................................................................................................. 13
Mission statement ........................................................................................................................... 13
Oak Ridge Associate Universities Consortium ................................................................................ 14
VCU Health System Authority ......................................................................................................... 14
Board of Visitors ............................................................................................................................. 14
Determination of student classification for in-state tuition purposes ............................................. 14
Rights of students under the Family Educational Rights and Privacy Act .................................... 15
Consumer information .................................................................................................................... 15
Graduate study .................................................................................................................................. 16
Welcome from the graduate dean .................................................................................................. 16
Administration and contact information .......................................................................................... 16
Admission to graduate study .......................................................................................................... 17
Admission requirements ................................................................................................................. 17
Types of admissions ......................................................................................................................... 17
Entrance examinations ..................................................................................................................... 18
Guaranteed admission through The Honors College .................................................................... 18
Multiple admissions ......................................................................................................................... 19
International students ..................................................................................................................... 19
Admissions appeals ........................................................................................................................ 19
Application procedures .................................................................................................................. 20
Financing graduate school .............................................................................................................. 20
Policies and procedures on graduate fellowships and assistantships ........................................ 20
eServices – online records access .................................................................................................. 23
Email – official method of communication ..................................................................................... 23
Identification requirements ............................................................................................................. 24
Eligibility for financial aid .............................................................................................................. 24
Applying for financial aid ................................................................................................................ 24
Priority filing dates .......................................................................................................................... 24
Summer studies ............................................................................................................................... 24
Study abroad ..................................................................................................................................... 24
Quality assurance ............................................................................................................................ 25
University bill ................................................................................................................................... 25
Financial aid appeals ....................................................................................................................... 25
Federal financial aid refund policy .................................................................................................. 25
Graduate students in undergraduate courses .................................................................................. 25
Satisfactory Academic Progress for financial aid purposes .......................................................... 25
Types of financial aid ....................................................................................................................... 26
Veteran and reservist educational benefits .................................................................................... 26
Graduate tuition and student fees .................................................................................................... 27
Student financial responsibilities .................................................................................................... 27
Tuition and fee schedule ................................................................................................................ 27
Student billing .................................................................................................................................... 28
Drop vs. withdraw ............................................................................................................................ 28
Outstanding charges ....................................................................................................................... 29
Military services tuition relief, refund and reinstatement guidelines ........................................... 29
Tuition determination and student classification .......................................................................... 30
General academic regulations for all graduate students ................................................................. 30
University rules and procedures ..................................................................................................... 31
Degree requirements ....................................................................................................................... 31
Academic requirements .................................................................................................................. 31
Exceptions ......................................................................................................................................... 32
Withdrawal from a graduate program ............................................................................................. 32
Appeal process, students dismissed from a VCU graduate program ............................................ 33
Student load ....................................................................................................................................... 33
Attendance and enrollment policies ............................................................................................... 34
Residence for Ph.D. programs ......................................................................................................... 34
Change in registration ..................................................................................................................... 34
Auditing graduate classes ............................................................................................................... 34
Leave of absence and withdrawal policies ...................................................................................... 35
Immunization requirements ............................................................................................................ 36
Change of graduate degree program .............................................................................................. 36
Transfer credit .................................................................................................................................... 36
Degree candidacy ............................................................................................................................. 37
Theses/dissertations ......................................................................................................................... 37
Satisfactory Academic Progress ...................................................................................................... 38
Time limit for completion of requirements and eligibility of courses ........................................... 39
Graduation requirements ............................................................................................................... 39
Grades ................................................................................................................................................. 41
General course information ........................................................................................................... 43
Off-campus graduate instruction .................................................................................................... 44
Undergraduate students in graduate classes ................................................................................. 44
Accelerated bachelor’s-to-master’s programs ............................................................................... 44
College of Humanities and Sciences ............................................................................................... 45
Administration ............................................................................................................................... 45
History ............................................................................................................................................... 45
Accreditation ................................................................. 45
Graduate information .................................................. 46
Richard T. Robertson School of Media and Culture ............. 47
  Mass Communications, Master of Science (M.S.) with a concentration in integrated public relations and advertising with Fudan University [dual degree] ................................................................. 48
  Mass Communications, Master of Science (M.S.) with a concentration in multimedia journalism ................................................................. 49
  Mass Communications, Master of Science (M.S.) with a concentration in strategic public relations ................................................................. 51
  Media, Art, and Text, Doctor of Philosophy (Ph.D.) ............... 53
School of World Studies .................................................. 55
  Applied Social Research, Certificate in (Post-baccalaureate graduate certificate) ................................................................. 56
Interdisciplinary Studies, Master of (M.I.S.) with a concentration in interdisciplinary mathematics and science leadership/K-8 mathematics specialist ................................................................................. 57
Sociology, Master of Science (M.S.) ....................................... 59
Sociology, Master of Science (M.S.), accelerated Bachelor of Science in Sociology (B.S.) to master’s ................................................................. 63
Department of African American Studies ............................. 63
Department of Biology ...................................................... 63
  Biology, Master of Science (M.S.) ............................................. 64
  Integrative Life Sciences, Doctor of Philosophy (Ph.D.) .......... 65
Department of Chemistry .................................................. 68
  Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biochemistry ................................................................. 69
  Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology ................................................................. 70
  Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology of cancer ................................................................. 72
  Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in bioorganic chemistry ................................................................. 74
  Chemistry, Doctor of Philosophy (Ph.D.) ................................... 75
  Chemistry, Doctor of Philosophy (Ph.D.) with a concentration in chemical physics ................................................................. 77
  Chemistry, Master of Science (M.S.) ........................................... 79
  Chemistry, Master of Science (M.S.) with Fudan University [dual degree] ................................................................. 81
  Nanoscience and Nanotechnology, Doctor of Philosophy (Ph.D.) ......................................................................................... 85
Department of English ..................................................... 87
  Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in dual genre ................................................................. 87
Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in fiction ................................................................. 89
Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in poetry ................................................................. 91
English, Master of Arts (M.A.) .............................................. 94
English, Master of Arts (M.A.) with a concentration in research ......................................................................................... 95
  Media, Art, and Text, Doctor of Philosophy (Ph.D.) ............... 97
Department of Forensic Science .......................................... 100
  Forensic Science, Master of Science (M.S.) with a concentration in forensic biology ................................................................. 100
  Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/drugs and toxicology ................................................................. 102
  Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/trace ................................................................. 104
  Forensic Science, Master of Science (M.S.) with a concentration in forensic physical analysis ................................................................. 107
Department of Gender, Sexuality and Women’s Studies .......... 109
  Gender, Sexuality and Women’s Studies, Certificate in (Post-baccalaureate graduate certificate) ................................................................. 109
Department of History ...................................................... 110
History, Master of Arts (M.A.) .............................................. 110
Department of Kinesiology and Health Sciences .................. 112
  Health and Movement Sciences, Master of Science (M.S.) with a concentration in exercise science ................................................................. 113
  Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology ................................................................. 114
  Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in neuromusculoskeletal dynamics ................................................................. 116
Department of Mathematics and Applied Mathematics ......... 118
  Mathematical Sciences, Master of Science (M.S.) with a concentration in applied mathematics ................................................................. 118
  Mathematical Sciences, Master of Science (M.S.) with a concentration in mathematics ................................................................. 120
  Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) ......................................................................................... 122
Department of Philosophy .................................................. 125
Department of Physics ....................................................... 125
  Physics and Applied Physics, Master of Science (M.S.) ........... 125
  Physics and Applied Physics, Master of Science (M.S.), accelerated Bachelor of Science in Physics (B.S.) to master’s ................................................................. 127
Department of Psychology .................................................. 127
  Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in behavioral medicine ................................................................. 129
  Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in clinical child ................................................................. 131
Counseling Psychology, Doctor of Philosophy (Ph.D.) ........... 134
Health Psychology, Doctor of Philosophy (Ph.D.) ............... 136
Psychology, Doctor of Philosophy (Ph.D.) with a concentration in biopsychology ......................................................... 139
Psychology, Doctor of Philosophy (Ph.D.) with a concentration in developmental psychology ........................................ 142
Psychology, Doctor of Philosophy (Ph.D.) with a concentration in social psychology ..................................................... 145
Department of Statistical Sciences and Operations Research ... 148
Mathematical Sciences, Master of Science (M.S.) with a concentration in operations research ......................................... 148
Mathematical Sciences, Master of Science (M.S.) with a concentration in statistics .......................................................... 150
Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) ...................................................................................... 153
Department of Allied Health Professions .............................. 156
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in clinical laboratory sciences ...................... 158
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in gerontology ........................................... 162
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in health care outcomes research .................. 165
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia ....................................... 169
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in occupational therapy ................................ 173
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in patient counseling .................................... 177
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in physical therapy ........................................ 180
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in radiation sciences .................................... 182
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in rehabilitation leadership ....................... 188
Nurse Anesthesia Practice, Doctor of (D.N.A.P.)/Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia [sequential degrees] .................................................... 191
Department of Clinical Laboratory Sciences ............................ 195
Clinical Laboratory Sciences, Master of Science (M.S.), advanced master’s concentration ............................................. 196
Clinical Laboratory Sciences, Master of Science (M.S.), categorical concentration ......................................................... 198
Clinical Laboratory Sciences, Master of Science (M.S.), accelerated Bachelor of Science in Clinical Laboratory Sciences (B.S.) to master’s .......................................................... 201
Department of Gerontology ...................................................... 203
Gerontology, Master of Science (M.S.) ................................. 204
Aging Studies, Certificate in (Post-baccalaureate graduate certificate) ............................................................................... 207
Department of Health Administration ..................................... 208
Health Administration, Master of (M.H.A.) ............................ 209
Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [combined] ......................... 212
Health Administration, Master of (M.H.A.)/Juris Doctor (J.D.) from the University of Richmond or Washington and Lee University [combined] ......................................................... 214
Health Services Organization and Research, Doctor of Philosophy (Ph.D.) ................................................................. 220
Department of Nurse Anesthesia ............................................. 222
Nurse Anesthesia Practice, Doctor of (D.N.A.P.) ..................... 223
Nurse Anesthesia Practice, Doctor of (D.N.A.P.)/Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia [sequential degrees] .................. 226
Nurse Anesthesia Practice, Doctor of (D.N.A.P.)/Nurse Anesthesia, Master of Science in (M.S.N.A.) [combined] ........... 230
Nurse Anesthesia, Master of Science in (M.S.N.A.) ............... 232
Department of Occupational Therapy ................................. 235
Occupational Therapy Doctorate (O.T.D.), entry-level ........... 236
Occupational Therapy Doctorate (O.T.D.), entry-level ........... 238
Occupational Therapy, Master of Science in (M.S.O.T.) .......... 242
Occupational Therapy, Master of Science in (M.S.O.T.) [combined], Certificate in (Post-baccalaureate graduate certificate) [combined] ............................................................... 245
Department of Patient Counseling ........................................ 246
Patient Counseling, Certificate in (Post-baccalaureate graduate certificate) .............................................................. 247
Patient Counseling, Master of Science (M.S.), accelerated chaplain certification concentration ......................................... 248
Patient Counseling, Master of Science (M.S.) with a concentration in chaplain certification ........................................ 249
Patient Counseling, Master of Science (M.S.) with a concentration in supervisory clinical pastoral education .......... 251
Business Administration, Master of (M.B.A.) with a concentration in business analytics ................................................................. 352
Business Administration, Master of (M.B.A.) with a concentration in corporate finance ................................................................. 354
Business Administration, Master of (M.B.A.) with a concentration in entrepreneurship and innovation .......................................... 356
Business Administration, Master of (M.B.A.) with a concentration in global business ................................................................. 358
Business Administration, Master of (M.B.A.) with a concentration in health care management ..................................................... 360
Business Administration, Master of (M.B.A.) with a concentration in human capital ................................................................. 362
Business Administration, Master of (M.B.A.) with a concentration in information resources management ........................................ 364
Business Administration, Master of (M.B.A.) with a concentration in investments ........................................................................ 366
Business Administration, Master of (M.B.A.) with a concentration in real estate ........................................................................ 368
Business Administration, Master of (M.B.A.) with a concentration in supply chain management .................................................. 370
Business Administration, Master of (M.B.A.) with a concentration in information technology management [Fast Track Executive] [combined] ...................................................................................................................................................... 374
Business Administration, Master of (M.B.A.)/Sport Leadership, Master of Education (M.Ed.) [dual degree] ......................................................... 376
Business Administration, Master of (M.B.A.) [Executive] .................................................................................................................. 379
Business Administration, Master of (M.B.A.) [Executive] with a concentration in business analytics ..................................................... 381
Business Administration, Master of (M.B.A.) [Executive] with a concentration in corporate finance ..................................................... 382
Business Administration, Master of (M.B.A.) [Executive] with a concentration in entrepreneurship and innovation ......... 384
Business Administration, Master of (M.B.A.) [Executive] with a concentration in global business ..................................................... 385
Business Administration, Master of (M.B.A.) [Executive] with a concentration in health care management ........................................... 386
Business Administration, Master of (M.B.A.) [Executive] with a concentration in information resources management ..................... 388
Business Administration, Master of (M.B.A.) [Executive] with a concentration in investments ............................................................. 389
Business Administration, Master of (M.B.A.) [Executive] with a concentration in real estate .............................................................. 391
Business Administration, Master of (M.B.A.) [Executive] with a concentration in supply chain management ................................. 392
Business Administration, Master of (M.B.A.) [Executive]/ Information Systems, Master of Science (M.S.) with a concentration in information technology management [Fast Track Executive] [combined] ...................................................................................................................................................... 393
Brandcenter ........................................................................................................................................................................... 395
Business, Master of Science (M.S.) with a concentration in branding/art direction ................................................................. 395
Business, Master of Science (M.S.) with a concentration in branding/communications strategy ..................................................... 397
Business, Master of Science (M.S.) with a concentration in branding/copywriting ......................................................................... 398
Business, Master of Science (M.S.) with a concentration in branding/creative brand management ................................................................. 400
Business, Master of Science (M.S.) with a concentration in branding/creative technology ......................................................................... 401
Department of Accounting ................................................................. 402
Accountancy, Master of (M.Acc.) ...................................................... 403
Department of Economics ................................................................. 404
Economics, Master of Arts (M.A.) ...................................................... 405
Economics, Master of Arts (M.A.) with a concentration in financial economics .................................................. 406
Economics, Master of Arts (M.A.) with a concentration in health economics ......................................................... 407
Economics, Master of Arts (M.A.) with a concentration in statistics ...................................................................... 408
Department of Finance, Insurance and Real Estate ................................. 410
Department of Information Systems .................................................. 410
Computer and Information Systems Security, Master of Science (M.S.C.S.) ................................................................. 411
Information Systems, Master of Science (M.S.) .................................. 412
Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance .... 414
Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance with Christ University in Bangalore, India ........................................... 416
Information Systems, Master of Science (M.S.) with a concentration in information technology management [Fast Track Executive] ................................................................. 417
Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [combined] ......................... 419
Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Fast Track Executive] [combined] ................................................................. 421
Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Fast Track Executive] [combined] ................................................................. 423
Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [combined] ................................. 425

GRADUATE BULLETIN

The Virginia Commonwealth University bulletins are published yearly for each of the student populations served by the institution. The Graduate Bulletin contains information about university policies, course descriptions and academic requirements for the programs offered to graduate students.

Visit our FAQ page (http://bulletin.vcu.edu/about/faq) for additional information.
ABOUT VCU

Located in the heart of Richmond, the capital of Virginia since 1779, Virginia Commonwealth University serves an integral role in the economic health of the city and the state, educating the current and future workforce, reaching out to the community, advancing research and enhancing patient care.

VCU was founded in 1838 as the medical department of Hampden-Sydney College, becoming the Medical College of Virginia in 1854. In 1968, the General Assembly merged MCV with the Richmond Professional Institute, founded in 1917, to create Virginia Commonwealth University.

Today, VCU offers comprehensive undergraduate, master's, doctoral and professional programs and encompasses one of the largest academic health centers in the nation. With a record $262 million in externally funded research awards for the 2014 fiscal year, VCU is one of only 28 public universities in the country with an academic medical center to be designated as a research university with very high research activity as well as a Community Engaged Institution, both by the Carnegie Foundation. Its centers and institutes of excellence support the university's research mission and involve faculty from multiple disciplines in the arts, public policy, biotechnology and health care discoveries.

VCU enrolls more than 31,000 students in 226 degree and certificate programs in the arts, sciences and humanities. Sixty-three of the programs are unique in Virginia, many of them crossing the disciplines of VCU's 13 schools and one college. VCU has a full-time instructional faculty of more than 2,200 who are nationally and internationally recognized for excellence in the arts, business, education, engineering, the humanities, the life sciences, social work and all the health care professions. With more than 21,000 employees, VCU and the VCU Health System also have a significant impact on Central Virginia's economy.

Building on the foundation of VCU’s nationally ranked academic programs and academic medical center, research and scholarly productivity, and engagement with the communities it serves, the university’s strategic plan, Quest for Distinction, launches a new vision for VCU: to elevate its stature and become the nation’s top urban, public research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university. This focused plan capitalizes on the outstanding assets of the VCU experience and truly distinguishes VCU as a major research university.

Quest for Distinction also embodies VCU’s commitment to human health through the VCU Medical Center, which includes the university’s health sciences schools and offers state-of-the-art care in more than 200 specialty areas, many of national and international note, including organ transplantation, head and spinal cord trauma, burn healing and cancer treatment.

VCU and the VCU Health System have been honored with prestigious national and international recognition for top-quality graduate, professional and medical-care programs, reflecting a commitment to be among America’s top research universities focused on student learning.

Administration

VCU administration provides leadership and organizational structure for the university, overseeing its goals and mission. Refer to each unit’s website (http://atoz.vcu.edu/administration) for a current listing of administrators.

Deans

Deans provide leadership for their respective school or college. Refer to each unit’s website (http://atoz.vcu.edu/academic+departments/organizations) for a current listing of its deans, departmental chairs and program heads.

Accreditation

Virginia Commonwealth University is accredited by the Commission on Colleges of the Southern Association of Colleges and Schools to award baccalaureate, master’s, doctoral and first professional degrees. Contact the Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097; telephone: (404) 679-4500. Note: The Commission is to be contacted only if there is evidence that appears to support an institution’s significant noncompliance with a requirement or standard.

Academic program accreditation

See the college/schools for detailed information about program accreditation.

Specialized program accreditation or certification

Campus Police

Police Academy

Certified by the Virginia Department of Criminal Justice Services

Division of Student Affairs and Enrollment Services

University Counseling Services

American Psychological Association

Student Health Services

Joint Commission on Accreditation of Health Care Organizations

Hospital accreditation

VCU Health System

Joint Commission on Accreditation of Health Care Organizations

Mission statement

As the premier urban, public research university in Virginia, VCU’s mission is to advance knowledge and student success through its commitments to:

- An engaged, learner-centered environment that fosters inquiry, discovery and innovation in a global setting
- Research that expands the boundaries of new knowledge and creative expression and promotes translational applications to improve human health
- Interdisciplinary collaborations that bring new perspectives to complex problems and mobilize creative energies that advance innovation and solve global challenges
- Health care that strives to preserve and restore health for all people, to seek the cause and cure of diseases through groundbreaking research, and to educate those who serve humanity.
• Diversity that provides a climate of inclusion, a dedication to addressing disparities wherever they exist, and an opportunity to explore and create in an environment of trust
• Sustainable, university-community partnerships that enhance the educational, economic and cultural vitality of the communities VCU serves in Virginia and around the world

Vision statement

VCU will be a premier urban, public research university distinguished by its commitment to:

• The intellectual and academic success of a diverse student body
• Research and discovery that advances knowledge, inspires creativity and improves human health
• The global engagement of students, faculty and staff that transforms lives and communities

Core values

1. Accountability – committing to the efficient and transparent stewardship of our resources to achieve institutional excellence
2. Achievement – ensuring distinction in learning, research and scholarly pursuits, service, and patient care
3. Collaboration – fostering collegiality and cooperation to advance learning, entrepreneurship and inquiry
4. Freedom – striving for intellectual truth with responsibility and civility, respecting the dignity of all individuals
5. Innovation – cultivating discovery, creativity, originality, inventiveness and talent
6. Service – engaging in the application of learning and discovery to improve the human condition and support the public good at home and abroad
7. Diversity – ensuring a climate of trust, honesty and integrity where all people are valued and differences are recognized as an asset
8. Integrity – adhering to the highest standards of honesty, respect and professional and scholarly ethics

Oak Ridge Associate Universities Consortium

Since 1963, students and faculty have benefited from VCU’s membership in Oak Ridge Associated Universities, a consortium of 115 colleges and universities and a contractor for the U.S. Department of Energy. ORAU works with its member institutions to help students and faculty gain access to federal research facilities, to keep its members informed about opportunities for scholarship and research appointments and to organize research alliances among its members.

Faculty, graduate students and undergraduate students may access a wide range of opportunities for study and research, including the Lindau-Nobel Laureates and Powe Junior Faculty programs. Many of these programs are designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines.

For more information about ORAU and its programs, contact:

• Francis L. Macrina, Ph.D., ORAU Councilor for VCU (804) 827-2262
• Monnie E. Champion, ORAU Corporate Secretary

(865) 576-2206

Or you may visit the ORAU website at orau.org (http://www.orau.org).

VCU Health System Authority

In April 1996, Gov. George Allen signed legislation that established the Medical College of Virginia Hospitals Authority. Effective July 1, 1997, the operations, employees and obligations of MCV Hospitals (formerly a division of VCU) were transferred to the Authority. Three years later, in connection with legislation signed by Gov. James Gilmore, the MCV Hospitals Authority became the Virginia Commonwealth University Health System Authority. The clinical activities of MCV Hospitals, MCV Physicians and the VCU School of Medicine are now coordinated and integrated by and through the VCU Health System.

The VCU Health System Authority is charged by statute with the missions of operating MCV Hospitals as teaching hospitals for the benefit of the health sciences schools of VCU, providing high quality patient care and providing a site for medical and biomedical research, all of which missions are required to be performed in close affiliation with the Office of the Senior Vice President for Health Sciences. VCU’s vice president for health sciences also serves as the CEO of the VCU Health System Authority, and five VCU faculty physicians serve as members of the VCU Health System board of directors.

Board of Visitors

The Board of Visitors is the voting body of Virginia Commonwealth University. Each year, the governor of Virginia appoints members. Refer to Office of the President’s website (http://www.president.vcu.edu/board) for a current listing of board members.

Determination of student classification for in-state tuition purposes

Tuition is determined by the number of credit hours a student is taking, the student’s residency classification, course of study and classification level. For in-state tuition benefits, the student must comply with Section 23-7.4 of the Code of Virginia (http://leg1.state.va.us/cgi-bin/legp504.exe?000+cod+23-7.4).

All applicants to VCU who wish to be considered for in-state tuition rates as Virginia residents must submit the Application for Virginia In-state Tuition Rates. This application is a part of the admissions packet and the nondegree-seeking student enrollment package. The residency determination of the applicant is conveyed at the time of admission as a degree-seeking student or nondegree-seeking student.

New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency determination by completing an Application for Change of Domicile available from the Office of Records and Registration (online). The student must present clear and convincing evidence that he or she is not residing in the state primarily to attend school. The application deadline is 30 days prior to the start of the semester, and it is the responsibility of the student to establish or to file an appeal to change his/her residency classification prior to the start of classes for the semester under consideration. In accordance with the Code of Virginia, applications received after the start of the semester must be considered for the next semester. Submit completed applications with documentation to the university residency appeals officer. Processing may require four to
six weeks; therefore it is strongly recommended that applications be submitted earlier than the stated deadline.

Our service to students is limited to assuring that they understand the procedures for appealing and that they have access to information about the relevant sections of the Code of Virginia. We provide information about the steps of our process and access to the applicable sections of the statute and the associated guidelines. We provide qualified staff to review the appeals and make decisions based on the information students provide. What we cannot do is provide advisement to students as to how to present their case for review; we cannot become the student’s advocate since we must make the decision.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Office of Student Accounting. Students denied this status are also notified by mail. The denial letter informs the student of procedures for appeal of this decision, to include filing an appeal with the University Residency Appeals Committee. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Please note that a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

**Rights of students under the Family Educational Rights and Privacy Act**

Pursuant to a federal statute enacted to protect the privacy rights of students (Family Educational Rights and Privacy Act of 1974 [FERPA], as amended, enacted as Section 438 of the General Education Provisions Act), eligible students of Virginia Commonwealth University are permitted to inspect and review education records of which the student is the subject. A statement of university policy concerning inspection and disclosure of education records has been formulated in compliance with the federal statute. Copies of the policy also are available from the Office of Records and Registration or on the Web at rar.vcu.edu/registration/familyed.html (http://rar.vcu.edu/registration/familyed.html).

Generally, the act provides that no personally identifiable information will be disclosed without the student’s consent, except for directory information and information to other school officials with a legitimate educational interest. When personally identifiable information, other than directory information, is disclosed, a record will be maintained of these disclosures. This record also is available for inspection and review by the student.

If an eligible student feels that his or her education record is inaccurate, misleading or otherwise in violation of the student’s privacy or other rights, the student may request an amendment to the record.

Should the university fail to comply with the requirements of the act, the student has the right to file a complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave., S.W., Washington, D.C. 20202-5901.

**Parental Notification Amendment**

Amendments to FERPA signed into federal law in fall 1998 specifically allow notification to the parents or guardians of students under the age of 21 who violate any law or university rule regarding use or possession of alcohol or other controlled substance. The Virginia Attorney General’s Task Force on Drinking by College Students also recommended such notification in its 1998 report.

In accordance with these documents, a parental notification procedure has been included in the VCU Drug Free Schools and Workplace Policy.

**Consumer information**

The federal Higher Education Opportunity Act of 2008 requires that institutions of higher education disclose certain consumer information to current students, prospective students, current employees and/or prospective employees. This consumer information (http://www.opds.vcu.edu/consumer-info) for VCU is maintained by the Office of Planning and Decision Support.
GRADUATE STUDY

Graduate programs are administered by the individual departments, schools and centers with assistance from the Graduate School. Major coordination of the various degree programs is performed by the University Graduate Council, which is chaired by the dean of the Graduate School. The University Graduate Council is comprised of two elected faculty members from each school and one elected faculty member from VCU Life Sciences.

The Graduate School section of the VCU Bulletins documents the official admission and academic rules and regulations that govern graduate education at the university. The University Graduate Council determines these policies.

Bulletins (catalogs) and course descriptions for the current and past years are now archived in the VCU Scholars Compass (http://scholarscompass.vcu.edu/vcubulletins) hosted by the VCU Libraries. The online Bulletin is updated regularly to reflect changes that occur throughout the academic year.

Graduate programs

In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin. The Graduate School website (graduate.vcu.edu (http://www.graduate.vcu.edu)) provides links and contact information for all graduate programs offered at VCU. The website also provides updates that occur throughout the academic year, as well as the Application to Graduate Study and complete instructions for applying to all graduate programs.

Refer to the Program Search feature of this website for a complete listing of all graduate programs, as well as application deadline dates, and special admission requirements and contact information. Applicants are encouraged to contact the school/department sponsoring the intended program of study at the telephone numbers and/or email addresses provided. Other important contact information is provided on the Graduate School (http://www.vcu.edu/graduate) website as well.

Welcome from the graduate dean

Important information for all graduate students

On behalf of the graduate faculty, I welcome you to graduate study at Virginia Commonwealth University. At VCU you will find a comprehensive array of academic programs, outstanding faculty and a supportive environment conducive to graduate study and research. The university offers nationally and internationally acclaimed graduate and research programs that meet the many needs of the commonwealth of Virginia, the United States and the world.

The University Graduate Council, chaired by the dean of the Graduate School, provides academic and administrative oversight and coordination of all graduate programs in accordance with the Graduate School’s mission: to provide leadership in all matters relating to graduate education at Virginia Commonwealth University in order to create a stimulating environment for teaching, learning, research, creative expression and public service. Academic departments and schools administer individual graduate degree programs with the assistance and support of the VCU Graduate School. In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin.

VCU Graduate Bulletin (catalog)

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the Graduate Bulletin as well as the academic regulations in individual school and department publications and on program websites; however, in all cases, the official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin website and on the Graduate School website, take precedence over individual program policies and guidelines.

Bulletins (catalogs) and course descriptions for the current and past years are now archived in the VCU Scholars Compass (http://scholarscompass.vcu.edu/vcubulletins) hosted by the VCU Libraries. The online Bulletin is updated regularly to reflect changes that occur throughout the academic year.

Students who maintain continuous enrollment are subject to the curricular requirements of the bulletin in effect at the time of admission, and to subsequent policy changes approved by the University Graduate Council for immediate implementation.

Students who do not maintain continuous enrollment must reapply for admission and will be subject to the requirements of the bulletin in effect at the time of readmission, and to subsequent policy changes approved by the University Graduate Council for immediate implementation. (See policy on Exceptions (p. 32).)

Graduate students should contact the Graduate School at any time regarding questions relating to graduate study at VCU.

I commend you for your decision to pursue graduate study, and I wish you every success in the pursuit of your educational goals at Virginia Commonwealth University.

Sincerely,

F. Douglas Boudinot
Dean of the Graduate School

Admission requirements

Minimum admission requirements for graduate study at VCU are outlined below. Individual departments and programs may set more stringent requirements as described in relevant sections of the Graduate Bulletin. Each department/program determines how to evaluate the individual requirements in a holistic assessment of the applicant’s potential for success in graduate study in a particular field. Additional factors, such as prior professional experience, may also be taken into consideration.

1. **Graduation from a regionally accredited college or university or its equivalent.** Departments may admit graduate applicants with three-year bachelor’s degrees provided these three-year degrees allow the students to pursue graduate studies in their countries. Further, the department will require prerequisite/foundation courses as needed to fill in any gaps in the student’s educational background.

2. **Required grade point average.** For admission to graduate study at VCU, the Graduate School requires a minimum undergraduate GPA of 3.0. For students with earned graduate degrees from accredited institutions, the graduate GPA may be the primary basis for consideration.

3. **Test scores.** Submission of standardized graduate-level test scores (fewer than five years old) as may be required by the individual program/department. Note: Not all programs require standardized test scores. See relevant sections of the Graduate Bulletin for individual program requirements.

4. **Letters of recommendation.** Three letters of recommendation from instructors or professional references in the applicant’s intended field of study. Letters should address the applicant’s academic and professional abilities and preparation for graduate study.

5. **Statement of intent.** A statement of the applicant’s reasons for pursuing graduate education in the planned course of study at VCU.

6. **Such additional requirements as may be established by individual programs and schools.** These may include personal interviews, auditions, submission of a portfolio or other materials.

An exception to the general admissions requirements is made for students entering through the Guaranteed Admissions Programs of the VCU Honors College. (See the heading “Guaranteed Admission Through The Honors College” in this section.)

Revised 4/8/2014; 5/12/2015

University Graduate Council

Types of admissions

Students may be admitted to graduate study under one of the following classifications:

**Degree-seeking student**

An applicant who meets all requirements for admission to a degree program and who has been recommended by the department or school in which the applicant proposes to study may be admitted as a degree-seeking student.

In order to finalize admission, an official transcript showing degree awarded and any other required documentation must be provided by the end of the fourth week of the first semester of matriculation in the program. Holds will be placed by the Graduate School on all future registrations for students who do not submit required documentation by this deadline.

Revised 4/8/2014

University Graduate Council

**Nondegree-seeking student**

An individual who wishes to take graduate courses without formal admission to a degree program is classified as a nondegree-seeking student. There is no limit to the total number of credits a nondegree-seeking student may take, as long as the student’s academic performance is credible. In courses where enrollment is limited, first priority is given to students admitted to the program, followed by other VCU graduate degree-seeking students. Nondegree-seeking students are not exempt from any prerequisite that may be specified for a course. A nondegree-seeking student who is later admitted as a degree-seeking student will not be allowed to apply toward a degree more than six credits earned as a nondegree-seeking student.

In order to enroll in graduate courses as a nondegree-seeking student, students must have graduated (or be in final term expecting to graduate) from a regionally accredited college or university or its equivalent. Information and forms certifying eligibility (http://www.vcu.edu/enroll/forms) to take graduate courses are available at VCU Records and Registration service centers or from the Office of Admissions.

Revised 4/8/2014

University Graduate Council
Entrance examinations

To supplement other evidence of preparation for graduate work, most graduate programs at VCU consider the scores from current (fewer than five years old) standardized tests commonly used and deemed appropriate for a given discipline. Applicants should refer to the individual program screens of this website for specific test requirements. Applicants are encouraged to visit individual department and program websites and to contact the school/department sponsoring the intended program of study for additional information about specific test score requirements.

Individual exceptions to this requirement may be considered for students with previous graduate degrees and for students entering graduate study through the Guaranteed Admission Programs of the Honors College (http://www.honors.vcu.edu/guaranteed).

Common examinations used at VCU are the Graduate Record Examination (GRE), the Graduate Management Admissions Test (GMAT), the Law School Admissions Test (LSAT), and the Miller Analogies Test (MAT). These examinations will not replace other records of achievement as a basis for admission to the Graduate School, but will offer additional evidence concerning the qualifications of students wishing to undertake graduate work.

Revised 4/8/2014
University Graduate Council

Guaranteed admission through The Honors College

Active members of The Honors College may apply to The Honors College Guaranteed Admission Program for certain graduate programs either before matriculation at VCU or early in their undergraduate studies. The specific deadline for applying is set by the program. Upon graduation, honors students in the Guaranteed Admission Program may enter the graduate program to which they have applied, provided they have satisfied all of the program requirements.

Interested students should meet with the senior associate dean of The Honors College prior to making application for guaranteed admission to a graduate program. Following that meeting, the student must submit a completed graduate application form with three letters of recommendation to Graduate Admissions. To be accepted into The Honors College Guaranteed Admission Program, a student must be accepted by the university, by the Office of Admissions and by the admissions committee of the program the student wishes to enter. The admissions committee may require an interview. Final notification of guaranteed admission is made by the Office of Admissions.

For additional information, refer to the Honors College section of the Undergraduate Bulletin, or contact The Honors College at P.O. Box 843010, Richmond, VA 23284-3010; (804) 828-1803; or www.honors.vcu.edu (http://www.honors.vcu.edu).

Revised 4/8/2014
University Graduate Council

Programs that offer guaranteed admission through The Honors College include:

Doctor of Dental Surgery
Doctor of Medicine

Doctor of Occupational Therapy
Doctor of Physical Therapy
Doctor of Philosophy

- Anatomy and Neurobiology
- Biochemistry
- Biomedical Engineering
- Biostatistics
- Human Genetics
- Microbiology and Immunology
- Neuroscience
- Nursing
- Pharmacology and Toxicology
- Physiology
- Psychology
- Systems Modeling and Analysis

Master of Accountancy
Master of Arts

- Economics
- History

Master of Bioinformatics
Master of Business Administration
Master of Education

- Adult Learning
- Counselor Education
- Special Education
  - Early Childhood Special Education
  - Emotional Disturbance
  - Mental Retardation
  - Learning Disabilities
  - Severe Disabilities

Master of Environmental Studies
Master of Health Administration
Master of Product Innovation
Master of Public Administration
Master of Public Health
Master of Science

- Anatomy
- Biochemistry
- Bioinformatics
- Biomedical Engineering
- Biostatistics
- Business
- Clinical Laboratory Sciences
- Computer Science
- Criminal Justice
- Environmental Studies
- Forensic Science
- Genetic Counseling
- Gerontology
- Health and Movement Sciences
- Human Genetics
- Information Systems
- Mathematical Sciences
- Microbiology and Immunology
- Nursing
- Pharmacology and Toxicology
- Physics/Applied Physics
- Physiology
- Rehabilitation Counseling
- Sociology

Master of Science in Nurse Anesthesia
Master of Science in Occupational Therapy
Master of Taxation
Master of Teaching
Master of Urban and Regional Planning

Multiple admissions

Students may not be admitted and enrolled in more than one graduate program or in an undergraduate and graduate degree program, except as part of an approved bachelor’s-to-master’s curriculum without petitioning and receiving written permission from the program director of each program in which the student is enrolled and the dean of the Graduate School.

Revised 4/8/2014
University Graduate Council

International students

The university encourages qualified international students to seek admission to VCU. U.S. government regulations and VCU admission policies require nonimmigrant applicants to demonstrate:

- Satisfactory academic achievement.
- Adequate English language proficiency.
- Ability to finance all educational and living expenses.

International students are advised to refer to university and program admission requirements in this bulletin for other information requested of all applicants. An applicant must have earned a bachelor’s degree from an accredited institution in the United States or an equivalent degree from a recognized foreign institution. Official academic records must be submitted.

English language proficiency requirement

To ensure maximum benefit from academic study at VCU, all non-native English-speaking applicants, regardless of immigration status, must provide evidence of English language proficiency before admission and/or enrollment in the university.

An applicant may satisfy university English proficiency requirements by obtaining a satisfactory score on the TOEFL. The university minimum TOEFL score requirement is 550 (paper-based) or 80 (Internet-based). Some graduate programs will accept satisfactory scores on the IELTS as evidence of English proficiency. The university minimum IELTS score requirement is 6.5. The PTE is also accepted with a minimum score of 65. Individual programs may require higher scores. TOEFL, IELTS and PTE scores are valid for two years.

The Office of Admissions reserves the right to require additional testing and study in the VCU English Language Program prior to full-time enrollment in university courses. The university offers a full-time English-as-a-Second-Language noncredit program. For information on the VCU English Language Program, including fees, international students can contact the English Language Program, Virginia Commonwealth University, P.O. Box 843043, Richmond, VA 23284-3043, United States; (804) 828-2551, or by email: oie-elp@vcu.edu; or online at www.global.vcu.edu/elp (http://www.global.vcu.edu/elp).

Nonimmigrants (students with temporary U.S. visas)

Because of the amount of time required to process applications from international students and for international students to obtain their visas, prospective students should apply well in advance of the international application deadlines. The deadlines are April 1 for fall semester, Oct. 1 for spring semester and Feb. 1 for summer session. Students also must meet specific program deadlines. All required admission documents must be submitted no later than eight weeks prior to registration if appropriate immigration documents are to be issued. Applicants who are unable to meet this credential deadline will need to defer the intended semester of entry.

Revised 4/08/2014
University Graduate Council

As VCU does not generally provide financial support for graduate international students, applicants needing a student visa (F-1) or a visiting scholar visa (J-1) also must present documented evidence of available financial support to cover annual living and educational expenses while studying at VCU.

Proof of current visa type must be submitted with the application for applicants who are in the United States on student visas. F-1 students and J-1 visiting scholars admitted to VCU must submit copies of all immigration documents to the VCU International Student Adviser prior to enrolling in classes.

Immigrants (permanent residents, resident aliens and asylum/refugee applicants)

Because immigrant applicants usually are in the United States at the time applications are submitted, these students are required to meet the same application deadlines as U.S. citizens.

If educated in the United States, immigrant students will be considered for admission under the same academic policies as those applied to U.S. citizens. If educated outside the United States, the same academic records are required as those for nonimmigrant students.

VCU requires detailed information concerning U.S. immigration status. Proof of permanent residency or application for permanent residency must be submitted with the admission application.

Admissions appeals

The Office of Admissions will hold denied applicants’ transcripts and test scores for one year. To reapply within this period, applicants should first contact the department or program. Additional materials should be supplied to strengthen the application, such as new test scores, new letters of recommendation or a new statement of intent.
Application procedures

A link to the online application, other supplemental forms and instructions for applying to all graduate programs are available on the Graduate Admissions website at graduate.admissions.vcu.edu/apply (http://graduate.admissions.vcu.edu/apply).

A $65 nonrefundable application fee must accompany each application. This fee will not be credited toward tuition payment.

Completed applications and all supporting materials must be submitted according to the application guidelines provided in this bulletin and before the program deadlines specified throughout this bulletin website. Late applications for some programs may be considered when possible but may require provisional action.

Note: Reference letters, the statement of intent/personal essay and any other supplemental materials such as art portfolios, resume/vita or specific program-required documents should be submitted to the address specific to the program to which you are applying. However, some programs require that all application materials be sent directly to the Graduate School.

Click here for instructions on submitting application materials for graduate programs and a list of program-specific addresses for supplemental materials (http://graduate.admissions.vcu.edu/apply/instructions). All transcripts and test scores must be submitted to Graduate Admissions. Supporting documentation submitted by mail should be addressed to Virginia Commonwealth University, Office of Admissions, P.O. Box 843051, Richmond, VA 23284-3051. Application materials submitted in person may be delivered to the Graduate Admissions office on the third floor of Blair House, 408 W. Franklin St., Richmond, Va.

Graduate students must use the Graduate School’s online graduate application (https://ssb.vcu.edu/proddad/twbkwbsia_P_GenMenu?name=homepage). Supporting materials for online applications must be submitted promptly. An application cannot be given final consideration until all required documentation and the application fee have been received. Applicants are strongly encouraged to pay by credit card when submitting the online application.

Students are encouraged to apply well before the program deadline to ensure receipt of all application materials. Program deadlines are found with degree/program information elsewhere in this Bulletin. Use the search feature located to the right of this page to find the program(s) of interest.

Completed applications and supporting materials are reviewed by the graduate faculty of the intended program, and final official notification of acceptance is made by the dean of the Graduate School.

Admission to a graduate program may be contingent upon the successful completion of undergraduate course work, degrees or other prerequisites that may be specified by the program or school. Remedial course work will not apply toward a graduate degree.

Students who do not apply at least one month prior to the beginning of any semester risk their financial aid eligibility in the event that the admission process is not completed prior to the first day of classes.

Apply (http://graduate.admissions.vcu.edu/apply/instructions)

Financing graduate school

Current information on financial aid programs, policies and procedures are available on the VCU website at finaid.vcu.edu (http://finaid.vcu.edu). To obtain printed materials or additional information, call or visit the appropriate financial aid office listed.

Policies and procedures on graduate fellowships and assistantships

University graduate teaching and research assistantships and fellowships are awarded to continuing and newly admitted graduate students. These awards are provided with funds from the university, government, foundations, industrial sources, alumni and other private sources. Most fellowships and assistantships are granted on a competitive basis to eligible applicants and determined based on scholarly potential and excellence. Awards range from assistance for tuition and fees and research expenses to stipend support for full-time study and research in programs leading to graduate degrees.

The decision to award most stipends is determined by the department or school to which the applicant is seeking admission. Applicants for fellowship and assistantship support are notified by the department or school soon after the decision has been made. Fellowship and assistantship awards for new and continuing students are granted on a competitive basis, normally for a period of one academic year.

Inquiry about such awards should be made directly to the school or department in which the student intends to enroll. Students in the process of applying for admission should indicate their interest in such support. Some programs include a separate application for support with
the application for admission. Refer to the individual chapters in this Bulletin, program websites and the Graduate School website (http://graduate.vcu.edu) for additional information on graduate student support and funding opportunities.

VCU fully subscribes to the following resolution of the Council of Graduate Schools (http://cgsnet.org) in the U.S. and Canada regarding graduate scholars, fellows, trainees and assistants.

“Acceptance of an offer of financial support (such as graduate scholarship, fellowship, traineeship or assistantship) for the next academic year by a prospective or enrolled graduate student completes an agreement that both student and graduate school expect to honor. In that context, the conditions affecting such offers and their acceptance must be defined carefully and understood by all parties.”

The council provides the following comments on the CGS resolution:

“Students are under no obligation to respond to offers of financial support prior to April 15; earlier deadlines for acceptance of such offers violate the intent of this Resolution. In those instances in which the student accepts an offer before April 15 and subsequently desires to withdraw that acceptance, the student may submit in writing a resignation of the appointment at any time through April 15. However, an acceptance given or left in force after April 15 commits the student not to accept another offer without first obtaining a written release from the institution to which commitment has been made. Similarly, an offer by an institution after April 15 is conditional on presentation by the student of the written release from any previously accepted offer. It is further agreed by the institutions and organizations subscribing to this resolution that a copy of this resolution should accompany every scholarship, fellowship, traineeship and assistantship offer.”

**Graduate fellowships**

Fellowships are not work-related and are designed to free students to spend all of their time on graduate studies and research. Fellowships are awarded on the basis of a student’s demonstrated academic achievement, promise and need.

Fellows are required to maintain strong academic records and to remain in residence as full-time students during the fellowship period unless special approval is given by the dean of the Graduate School.

Requests for graduate fellowships from students seeking admission to the university should be included in the personal statement submitted with the application for admission and/or on supplemental forms required by individual departments or programs. To be considered for a fellowship, students must return application forms to the university in accordance with deadlines established by the individual departments or programs.

Fellowships for minority students, such as those provided by the National Science Foundation and Ford Foundation, are made by the sponsoring agencies to individual students. Applications are submitted directly by the students to the sponsor, usually in early fall.

A number of graduate tuition fellowships are funded by the commonwealth of Virginia. Funding for this program is allocated by the Graduate School to individual schools and program directors who, in turn, identify recipients. These fellowships are awarded in most graduate departments with preference given to Virginia residents. Tuition fellowships may range from a minimum of $500 a semester to full tuition and fees for an entire academic year.

Fellowships are awarded for not longer than one calendar year and are not renewed automatically from year to year unless specifically stated in writing. Graduate program directors generally determine eligibility for renewal of fellowship awards in subsequent years.

**Graduate assistantships**

Graduate assistants are typically more effective members of their chosen fields due to formal instruction and close interaction with faculty by assisting faculty in classrooms, research or administrative endeavors. All graduate assistant duties are designed to foster student training and graduate learning experiences.

Although assigned teaching, research or administrative support duties, graduate assistants are regarded by the university as students and not as employees. As such, graduate assistants do not accrue paid sick leave, annual leave or holiday leave.

A number of graduate assistantships are awarded each year on the basis of exceptional scholastic achievement, promise and competence for service in the departments of the university. Assistantships are generally also available in those departments which have government, foundation, business and industrial research grants and contracts.

The duties of graduate assistants require work from 10 to 20 hours per week, depending on the stipend awarded. Graduate assistants must satisfactorily perform the duties assigned by their departments; make satisfactory progress in their programs as defined by the degree requirements and the regulations of their departments; and may not hold any employment or appointment of a remunerative nature during the term of their assistantship.

Additional opportunities for involvement in outside activities may arise in the course of the training period, some of which may provide for additional-supplementary compensation. Involvement and/or participation in such opportunities may assist the department in maintaining the research infrastructure, provide additional experience in instructional activity, assist other units of the university in the delivery of programs consistent with the missions of the institution, involve participation in university organizations and so forth. Such activities may include those for which supplementary compensation is provided. While such activities have the potential for enriching the development of the individual graduate student, they also hold the potential for interfering with the graduate student’s responsibilities to his/her department or program and her/his timely progress toward the completion of his/her educational degree requirements.

Therefore, graduate students must consult with their advisers prior to undertaking additional activities that may detract, or which have the potential for detracting, from their timely progress to degree completion. Advisers are encouraged to provide/encourage opportunities which broaden the training experience for students in preparation for the wide variety of career opportunities now available. The graduate program director should also be made aware of any such activities to ensure that completion of degree requirements is not compromised.

Some graduate assistants are appointed to support faculty when conducting research. Whenever possible, these assistants will be assigned to faculty who are working in a variety of areas to extend the student research experience and professional development. Graduate assistantships that involve research are generally assigned to those students pursuing degrees that require a thesis or a dissertation.
Other graduate assistants are assigned to departments, divisions, institutes, schools and other offices of the university to assist in the administration of these units. Such assignments are generally given to those pursuing professional degrees in the management sciences. These assistants will be exposed to a variety of administrative experiences and tasks as an integral part of their academic endeavors to prepare them for future professional roles as administrators.

Graduate assistantships are awarded for not longer than one calendar year and are not renewed automatically from year to year unless specifically stated in writing. Graduate program directors generally determine eligibility for renewal of graduate assistantship awards in subsequent academic years. Specific work assignments, scheduling and arrangements relating to vacation and personal leave are determined by the department, program or administrative unit to which the graduate student is assigned.

**Doctoral assistants at candidacy**

The Graduate School will provide one-third university tuition only (not fees) for doctoral students who have advanced to candidacy and are being funded as a graduate assistant. The school/department/grant must provide two-thirds of tuition support. Graduate assistants approved for candidacy must register for nine semester hours of graduate course work, for credit, at VCU each fall and spring semester until the degree is awarded (including the semester of graduation). In order to be considered for doctoral tuition support at candidacy, an approved degree candidacy form must be on file with the Graduate School prior to the start of the current semester that funding is being requested and before the student formally begins the final thesis/dissertation/research project.

Doctoral tuition support at candidacy funds are available on a first-come, first-served basis for the academic year. Once all candidacy tuition support funds have been expended, no additional support from the Graduate School will be provided.

**Affordable Care Act as it relates to graduate assistantships**

As noted above, graduate assistantships may require that a graduate student work for up to 20 hours per week. Graduate assistants should not be employed elsewhere, particularly within the university. Graduate students should not hold both an assistantship and an hourly or adjunct instructor position at the same time. In exceptional cases, schools/college may authorize graduate assistants to have additional jobs, but only if they do not exceed 29 hours total in a work week as mandated by the governor of Virginia. At this time, the commonwealth of Virginia has not permitted any agency to provide exceptions to the 29-hour limit. Accordingly, VCU cannot make any exceptions to the limit. The Affordable Care Act requires employers to offer health care coverage to any individual working more than 29 hours per week. At this time, VCU does not offer health benefits to graduate assistants. Therefore, no school/college at VCU can hire a graduate assistant for work that exceeds 29 hours per week (20 hours as a graduate assistant and 9 additional hours) as this action is against state and university policy and exposes VCU (and, ultimately, the school/college) to a large, as yet undetermined fine.

**Eligibility**

Students who are candidates for appointment as graduate fellows and assistants are responsible for meeting the following eligibility requirements and for taking the initiative in ascertaining that all have been fulfilled. The requirements are described here to provide graduate student applicants with an understanding of the usual conditions for awarding fellowships and assistantships; however, individual schools, departments or programs may set more rigorous standards.

An entering student is awarded an assistantship or fellowship on the basis of academic potential. The student is expected to have been admitted fully and without academic provision, having achieved a grade point average of at least 3.0 on a 4.0 scale for the last 60 semester hours of academic credit earned. Another indicator of academic potential is a score on the Graduate Record Examination that places the applicant above the 50th percentile of all students who take this examination. In those disciplines requiring GRE subject tests, an upper 50th percentile achievement is required. An equally high achievement level is expected on the Graduate Management Admissions Test, the Law School Admissions Test or the Miller Analogies Test. Students applying for studio and performing arts must demonstrate potential through the quality and promise of their portfolio or audition.

**Appointment and notification**

Each year the dean of the Graduate School will notify individual department chairs, program directors and deans of the allocation of the university's graduate student support funds. This notification will include detailed award criteria and instructions for processing these funds. It is the responsibility of each awarding unit to provide funded graduate students with award letters which clearly define the amount, term of appointment and conditions of the award, including the job description of assistantships, renewal criteria, associated tuition and fee support, disbursement information and minimum enrollment requirements. Award letters should also be provided to students funded by other sources, such as department funds, grants and overhead accounts.

Notices of awards should include the Graduate School Policy Statement on Graduate Fellowships and Assistantships and the university's student tax guide [PDF](http://www.hr.vcu.edu/media/hr/documents/studenttaxguide.pdf). Graduate students should be instructed to return signed copies of award letters to the awarding unit(s) in order to acknowledge that they have read these documents and to indicate acceptance of the award and its conditions. All newly appointed graduate assistants will be subject to a criminal records check as a condition of employment at VCU.

**Termination of appointments**

Graduate assistantships and fellowships normally end when the period of appointment is concluded and the term of the assistantship or fellowship agreement is fulfilled. An appointment may also end when the grant or contract supporting the student expires, even if that occurs before the end of the student’s current appointment. Otherwise, a graduate fellowship or assistantship may be terminated for the following reasons:

1. Resignation for cause by the student. Such resignation is to be in writing for approval by the department chair or program director, with a copy to the dean of the Graduate School.
2. Failure of the graduate fellow or assistant to perform assigned duties adequately or to behave professionally. Termination of assistantship or fellowship appointments requires written documentation to support the action. Documentation should clearly show that the
Students are responsible for settling their accounts according to the awards that include tuition and fee support do not cover special fees. Class fees is optional and varies from program to program. University the base stipend plus tuition and fees. Payment of special program or awards consist of a basic stipend only. In such cases, students are graduate assistantships varies from year to year and by program. Some Tuition and fee support associated with graduate fellowships and graduate assistantships varies from year to year and by program. Some awards consist of a basic stipend only. In such cases, students are responsible for payment of tuition and fees. Some awards may include the base stipend plus tuition and fees. Payment of special program or class fees is optional and varies from program to program. University awards that include tuition and fee support do not cover special fees. Students are responsible for settling their accounts according to the rules and procedures of the university’s Student Accounting Department (http://www.enrollment.vcu.edu/accounting).

Tuition will be charged according to a student’s official residency status as determined by the university’s residency office (http://www.enrollment.vcu.edu/rar/residency). Questions related to residency status should be directed to that office.

Payments and tax status

The stipend portion of a graduate assistantship package is designated by the Internal Revenue Service as wages for work performed, is processed through the university’s Payroll Office and is subject to withholding taxes. A graduate assistantship stipend is reported to the IRS as earned income. Tuition and fee support, if provided, is processed through the university’s Office of Financial Aid and is applied directly to the student’s account.

A graduate fellowship stipend is not work-related and is not reported to the IRS as earned income. A recipient of a graduate fellowship, however, may be required to report fellowship support as other income and to pay quarterly withholding taxes. Graduate fellowship stipends and tuition and fee support are processed through the university’s Office of Financial Aid (http://www.enrollment.vcu.edu/finaid) and are applied directly to the student’s account. Once all outstanding tuition, fees and other charges are paid, excess funds are refunded to the student.

For additional information about the tax status of student awards, students are referred to the student tax guide [PDF] (http://www.hr.vcu.edu/media/hr/documents/studenttaxguide.pdf) published by the Office of the Vice Provost for Student Affairs and the Office of Payroll Accounting. In all cases, final decisions and interpretations as to the tax status of graduate assistantships or fellowship stipends or tuition and fee awards are made solely by the IRS and, ultimately, it is the student’s responsibility to ensure accurate reporting of such support.

Need-based financial aid

All graduate fellowship and tuition and fee awards are reported to the university’s Office of Financial Aid and are included in any calculation of financial aid need. Fellowship funding impacts need-based financial aid eligibility differently than funding received from graduate teaching and research assistantships. Students with questions about their need-based financial aid packaging should contact their financial aid advisers, graduate program directors or departmental fiscal administrators about the status of their funding before accepting offers.

Revised 7/17/2014; 6/16/2015
University Graduate Council

eServices – online records access

Students are encouraged to use eServices, a password-protected service for viewing VCU student records online, to check the status of their financial aid application and award package. Students also may register for classes, print bills and more. The eServices website is located at eservices.vcu.edu (http://www.eservices.vcu.edu).

Email – official method of communication

Students are required to obtain an official VCU student email account within one week of the beginning of their first semester of enrollment. Students are responsible for reading in a timely fashion university-related communications sent to their official VCU student email account. The Office of Financial Aid uses email to provide financial
aid information, to request documentation to support financial aid application data and to provide financial aid application status and award information. Information on how to set up an account is available online (go to the “Academic” section of “Computer Accounts” at www.vcu.edu/it/computer_accounts.html (http://www.vcu.edu/it/computer_accounts.html)).

Identification requirements

Students must provide picture identification, preferably a VCUCard, for in-person access to financial aid records. For the student’s protection, information provided over the telephone and email may be limited if the financial aid staff member is not confident of the student’s identity.

Eligibility for financial aid

Most students are eligible for some type of financial aid regardless of family financial circumstances. Basically, to receive aid from any of the federal or state student aid programs, students must:

• Submit a Free Application for Federal Student Aid (FAFSA) or Renewal FAFSA designating VCU (school code 003735) to receive FAFSA results.
• Demonstrate financial need, except for some loan programs.
• Have a high school diploma or a General Education Development (GED) Certificate.
• Be enrolled or accepted for enrollment to an eligible degree or certificate program.
• Be enrolled at least half time (five or more graduate credit hours).
• Be a U.S. citizen or eligible noncitizen.
• Have a valid Social Security number (unless from the Republic of the Marshall Islands, the Federated States of Micronesia or the Republic of Palau).
• Meet Satisfactory Academic Progress (SAP) standards as defined by the VCU Office of Financial Aid (the full VCU SAP policy is available on the Web at www.enrollment.vcu.edu/finaid/sap/grad_pro_rqmts.html (http://www.enrollment.vcu.edu/finaid/sap/grad_pro_rqmts.html)).
• Certify that federal and state financial aid will be used for educational purposes only.
• Not be in default on a federal student loan and not owe money on a federal student grant.
• Comply with the Selective Service registration, if required.
• Not be convicted under federal or state law of sale or possession of illegal drugs.

Students admitted as provisional graduate students are eligible for federal loans at the fifth-year undergraduate level.

Detailed information can be found in the federal Student Guide, available in print form from the VCU Office of Financial Aid or electronically (http://studentaid.ed.gov/students/publications/student_guide/index.html) and on the VCU Office of Financial Aid website (www.enrollment.vcu.edu/finaid (http://www.enrollment.vcu.edu/finaid)).

Applying for financial aid

The financial aid application process for the academic year begins Jan. 1. All students are encouraged to complete and submit the FAFSA as soon as possible after Jan. 1, designating VCU (school code 003735) to receive the results. In order to reduce problems, errors and omissions on the FAFSA, students are encouraged to apply electronically using FAFSA on the Web (available online at fafsa.ed.gov (http://www.fafsa.ed.gov)). Once the FAFSA is filed, the federal processor will send the student a Student Aid Report (SAR) or electronic SAR Acknowledgement, and also will electronically send the information to the VCU Office of Financial Aid, if VCU was listed as a school to receive the data. If additional information is needed to complete processing of the application, the VCU Office of Financial Aid will send the student a request for additional information. Responding promptly to such requests will ensure timely processing of the application. Once the review of FAFSA data has been completed, the Office of Financial Aid will send the student a Financial Aid Award Notification.

Please note that health profession students (dentistry, medicine, nursing or pharmacy) must provide both student and parental information on the FAFSA to apply and receive consideration for Title VII grants and loans from the Department of Health and Human Services.

Priority filing dates

The VCU Office of Financial Aid recommends electronically filing the FAFSA by March 1. Students should complete the FAFSA using data from their completed tax returns. If necessary, they may use estimated tax return data in order to meet the VCU priority filing date but should be prepared to submit a copy of their completed tax returns and W2 forms to VCU as soon as possible. Students will receive their Financial Aid Award Notification after their FAFSA application data has been verified. If students have not applied for financial aid in a timely manner, they may want to participate in the VCU Installment Payment Plan, which budgets each semester’s bill over four payments. Information about this plan can be found on the Student Accounting Department’s website (accounting.vcu.edu/installment (http://accounting.vcu.edu/installment)).

Students who do not have access to the Web may apply using the paper FAFSA, available through VCU, high schools, colleges and most public libraries. Those students completing a paper application should mail it to the federal processor by Feb. 1.

Summer studies

Limited financial aid may be available during the summer semester. Students applying for the summer semester must file the FAFSA by March 1. Students also should complete a VCU summer aid application, available on the Financial Aid website under “Forms (http://finaid.vcu.edu/resources/forms.html)”

Students interested in financial aid for the summer semester should obtain a VCU Summer Studies Schedule of Classes (http://www.vcu.edu/schedule) (available in March) for more details.

Study abroad

Financial assistance is available to eligible students enrolled in approved study abroad programs. All study abroad programs must be coordinated through the Global Education Office at (804) 827-7882. Students should work with a financial aid counselor to coordinate aid for their study abroad program. Information about financial aid and study abroad is available online at global.vcu.edu/abroad/students/funding (http://global.vcu.edu/abroad/students/funding).
All study abroad course work is subject to the criteria articulated in the transfer credit policy.

Quality assurance

To ensure that information provided on the FAFSA is accurate, a student’s application may be selected for review at any time during an enrollment period, and the student will be requested to provide documentation that supports the information. By signing the FAFSA, the student (and the student’s parents or spouse, if applicable) agreed to furnish such documentation. If the documentation is not provided when requested, financial aid awards will be canceled and any funds already disbursed may need to be repaid.

University bill

The Student Accounting Department issues online bills for tuition, fees and other university charges. When financial aid awards (grants, scholarships and loans) are not enough to pay university charges, the remaining balance must be paid from personal funds, credit card or the VCU Installment Payment Plan. Federal work-study awards will not be deducted from university charges because those funds are paid directly to the student, based on hours worked. Any outstanding balance owed will prevent a student from registering for courses and receiving official transcripts. Students who fail to pay their balance on time may be assessed a late payment fee and have a financial hold placed on their account. If the balance remains outstanding after the semester ends, their account may be referred to the VCU Collection Unit at which time collection costs will be assessed.

Financial aid appeals

Financial aid eligibility decisions are made using federal, state and institutional regulations and policies. Students may appeal their eligibility if special circumstances warrant a review. Reasons for an appeal might include one of the following documented unusual circumstances:

- Loss or reduction of employment earnings.
- Disability or death of parent or spouse.
- Separation or divorce.
- Loss or reduction of untaxed income.
- Losses due to a natural disaster.
- Unusually high educational program costs.
- Unusual medical expenses.
- Dependent and child care expenses.

Any financial aid staff member can advise a student about the procedures on how to file an appeal.

Federal financial aid refund policy

Students who receive federal Title IV grant or loan assistance and withdraw from VCU before completing 60 percent of the semester (as measured in calendar days) must have their eligibility recalculated based on the federal Return of Title IV Funds formula. This federal formula specifies that a student’s financial aid eligibility must be recalculated based on the aid the student has “earned” (based on the number of days that the student was enrolled or attending VCU prior to withdrawal). Any unearned aid (for the period of enrollment that the student did not complete from the date of withdrawal to the end of the semester) must be returned to the appropriate Title IV programs from which the student was awarded.

For VCU students who withdraw prior to completing 60 percent of the semester, they will have to return or repay all or a portion of the aid funds that had been disbursed to their VCU account. As a result, students who withdraw prior to completing 60 percent of the semester may be responsible for all or a portion of their tuition/fee bill that was previously paid by financial aid sources.

If a student does not officially withdraw from all classes but fails to earn a passing grade in at least one course, federal aid regulations require that the student be considered “unofficially withdrawn,” unless it can be documented that the student completed the enrollment period. Unofficial withdrawals require a Title IV refund calculation at the midpoint of the enrollment period. The reduction of federal aid will create a balance due to the university that must be repaid.

Graduate students in undergraduate courses

Students who are classified as graduate students will be eligible for federal financial aid only if they are enrolled at least half time in courses that can be applied toward their graduate degree. The Office of Financial Aid will identify all graduate students who have applied for financial aid but have registered for less than half-time graduate course work in any given semester. If the undergraduate course work for which the student has registered is considered preparatory to the graduate degree, documentation must be provided by the student’s adviser or program representative to verify which undergraduate courses are required. In these cases, the student will be eligible for federal financial aid, but it will be based on the fifth-year undergraduate loan limits. Students who have been admitted to a dual degree program can take any amount of required undergraduate coursework and will still be eligible for graduate loan limits.

Satisfactory Academic Progress for financial aid purposes

To be eligible to receive financial aid at VCU, students must make Satisfactory Academic Progress. SAP is a combination of qualitative and quantitative components. SAP is measured by:

- GPA. Generally, graduate students are expected to maintain at least a 3.0 GPA as specified by their departments.
- Completion rate. The completion rate is measured by the number of credit hours earned divided by the number of credit hours attempted. All students must successfully complete at least 67 percent of all credit hours attempted (withdrawals, incompletes and repeated courses also are considered attempted credit hours).

The Office of Financial Aid will perform a periodic SAP review for students who receive or apply for financial aid. The reviews are typically performed at the end of the spring semester and must be completed at least once per academic year. Students will be alerted with warning letters, whenever possible, to provide them with notice that their financial aid may be in danger of being suspended. When students fail to meet SAP requirements, they will receive suspension letters indicating that they are ineligible to receive further financial aid. Students whose eligibility for financial aid has been suspended may submit an appeal if mitigating circumstances prevented the student from maintaining SAP.
Types of financial aid

There are three basic types of financial aid: loans, grants and work-study. Each type has different features and advantages.

Loans

In terms of total dollars available, long-term federal loan programs provide the most dollars. Federal loans must be repaid after the grace period and/or deferment periods have expired. Students must generally remain enrolled at least half time (five credit hours for graduate students). Multiple repayment plans may be available for most federal loans. Selected loan programs include:

- Federal Direct Loan (unsubsidized)
- Health Professions Student Loan
- Loan for Disadvantaged Students
- Nursing Student Loan

To ensure that you understand the responsibility and the obligation you are assuming as a Federal Direct Loan borrower, the U.S. Department of Education requires you to participate in entrance counseling prior to receiving a Federal Direct Loan if you have not previously received a Direct Loan, Federal Family Education Loan or Supplemental Loans to Students Loan. The entrance counseling requirement must be satisfied prior to the first loan disbursement. To complete entrance counseling for the Federal Direct Loan Program, go to www.enrollment.vcu.edu/finaid/loans/entrance_interview.html (http://www.enrollment.vcu.edu/finaid/loans/entrance_interview.html).

You will also be required to complete exit counseling before you graduate, withdraw or drop below half-time status. To complete exit counseling for the Federal Direct Loan program, go to www.enrollment.vcu.edu/finaid/programs/loans/exit_counseling.html (http://www.enrollment.vcu.edu/finaid/programs/loans/exit_counseling.html).

Grants

Contact individual academic departments for information about grant or scholarship programs.

Work-study

Work-study is a form of financial aid that pays wages for work performed through employment. Work-study positions are located on-campus and in approved off-campus locations. Hourly wages will vary depending on skills and experience. Job listings are posted online at www.students.vcu.edu/careers (http://www.students.vcu.edu/careers). When interviewing for work-study positions, students should take copies of their Financial Aid Award Notifications to show prospective employers. Graduate students usually work 15 to 25 hours per week.

Veteran and reservist educational benefits

The Veterans Affairs Office for VCU is located in Founders Hall on the Monroe Park Campus. Detailed information about eligibility for the programs listed below is available on the Web at www.enrollment.vcu.edu/rar/veterans_affairs.html (http://www.enrollment.vcu.edu/rar/veterans_affairs.html). You also may contact the office to obtain printed material.

Email: jmcchambl@vcu.edu

Available programs

For details on any of these programs, please visit the Veteran's Affairs page of the Division of Student Affairs and Enrollment Services website using the link provided above.

- Montgomery – GI Bill Active Duty (Chapter 30)
- Vocational Rehabilitation (Voc Rehab, Chapter 31)
- Veterans Education Assistance Program (VEAP, Chapter 32)
- Post 9-11 GI Bill (Chapter 33)
- Survivors’ and Dependents Educational Assistance Program (DEA, Chapter 35)
- Montgomery – GI Bill Selected Reserves (Chapter 1606)
- Reserve Education Assistance Program/Reaup (Chapter 1607)
- Tutorial Assistance Program
- VA Work-Study Program
- Virginia Military Survivors and Dependents Education Program
- Post 9-11 – Active Duty (Chapter 33)/Yellow Ribbon Program
- Yellow Ribbon Program
- Transferability of Benefit

Eligibility requirements

Eligible veterans/spouses/dependents must comply with the following requirements to receive educational benefits as students:

1. The veteran/spouse/dependent must be accepted into a degree or certificate program or be matriculating as a nondegree-seeking student for only two semesters before having to declare a major.
2. The veteran/spouse/dependent must request certification by completing and submitting VCU's VA Education Assistance form after obtaining approval via signature of their academic adviser and registering for courses each semester and each summer session from the Veterans Affairs Office.
3. The veteran/spouse/dependent is eligible to use benefits for only those courses taken toward a degree, certificate program or as prerequisite courses (only two semesters).
4. The veteran/spouse/dependent is not eligible to use benefits for courses taken on an audit basis, or if eliminating a course previously taken and paid for by the VA to remove a punitive grade not counted in GPA calculations via VCU's historical repeat option. The repeated course(s) will be paid for by the VA but the student will incur a debt to the VA for the course(s) eliminated from the student’s GPA. The VA does not pay for courses that earn no credit.
5. The veteran/spouse/dependent is responsible for ensuring that transcripts are evaluated for transfer credits to be accepted by VCU.
Students must submit this information to the Veterans Affairs Office for transmittal to the Veteran’s Administration Regional Office.

6. The Veterans Affairs Office must be notified by the student/veteran/spouse/dependent if they change, add, drop or withdraw from courses originally approved by the student/veteran/spouse/dependent’s academic adviser and certified by VCU’s Veterans Affairs coordinator/ceiifying official.

**Graduate tuition and student fees**

Students must pay all applicable tuition, housing and dining charges, and other fees when due, as described in this section. Students who fail to pay these charges on time may be assessed a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

**Student financial responsibilities**

Students who enroll are responsible for:

- Full payment of tuition and fees generated from their registration.
- Full payment of all charges for housing and dining services, and other applicable miscellaneous charges.
- Keeping a current mailing address on file with Enrollment Services. Refunds and tax forms are not issued to students with inactive mailing addresses.
- Establishing an official VCU email address and reading their email on a regular basis, since email will be used to notify students when their invoices are available in the payment and billing site. Paper bills are not sent to enrolled students. Failure to acknowledge and review the electronic invoice does not relieve responsibility for timely payments. Other important notifications are also sent to the official VCU email address.

Tuition and fees are categorized and described on the Student Accounting website at enrollment.vcu.edu/accounting/tuition_fees.html (http://www.enrollment.vcu.edu/accounting/tuition_fees.html). Questions regarding tuition and fees may be directed to the Student Accounting Department at (804) 828-2228, or by emailing stuacctg@vcu.edu. The university reserves the right to revise or alter all fees, regulations pertaining to student fees and fee collection procedures at any time.

**Tuition and fee schedule**

Tuition and fees are categorized and described on the Student Accounting website at www.enrollment.vcu.edu/accounting/tuition_fees.html (http://www.enrollment.vcu.edu/accounting/tuition_fees.html). This fee is used by the university to support student facilities, campus development, intercollegiate athletics and other programs. Full-time students pay a flat-rate university fee each semester. Part-time students pay this fee on a per-credit basis.

**Student activity fee**

This fee is used to support social, cultural and other student activities on the Monroe Park Campus. These activities include concerts, plays, student organizations and publications. Full-time students on the Monroe Park Campus pay a flat-rate student activity fee, while part-time students on the same campus pay this fee on a per-credit basis. Students on the MCV Campus are not charged this fee.

**Student Government Association fee**

This fee is used to support social, cultural and other student activities on the MCV Campus. The fee is charged to all full-time and part-time MCV Campus students. Monroe Park Campus students are not charged this fee.

**Student health fee**

All full-time students on both campuses must pay the student health fee. Part-time students may participate in the University Student Health Services on an elective basis by paying the student health fee. The University Student Health Services offers unlimited office visits for acute and chronic ailments, after-hours phone advice for an urgent medical problem and most laboratory tests associated with acute illnesses ordered by the USHS staff, among other services. The fee does not cover accidents or injuries, emergency room visits or hospitalization. More specific information as to what is covered and not covered by the fee is available on the USHS website (http://www.students.vcu.edu/health/about/eligibility-and-charges).

**Technology fee**

The technology fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. The fee is used to provide for students’ technological needs and to support university-wide technological initiatives.

**Off-campus fees**

The university fee, the student activity fee, the student government association fee (except School of Social Work) and the student health fee are not charged to students taking off-campus classes.

**Capital outlay fee**

This fee is charged to all full-time and part-time non-resident, on-campus students. The fee is mandated by the General Assembly to reimburse the
State for debt service costs attributable to non-resident students related to the financing of buildings and equipment.

**Online course fee**
The online course fee is charged for undergraduate and graduate online courses. The fee covers operational and personnel support to develop and maintain online courses.

**Special fee charges**
Because of specialized programs, various schools and departments may charge each student additional fees to cover special materials, equipment breakage and other costs. For specific information about special fees, refer to the Student Accounting Department website or to the specific school or department section in this bulletin.

**Student billing**
Students must pay all applicable tuition, fees, room and board when due. Students are notified at their official VCU email address when their bills are available on the billing and payment site. No paper bills are sent to enrolled students. Tuition and fees for preregistered students, along with charges for housing and dining plans where applicable, are due by the official start of each semester. After the registration period all other students are sent a notification at their official VCU email address when their electronic bill has been issued and should pay by the payment due date indicated on the electronic invoice. Students who fail to pay these charges on time may be assessed a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and fee collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

The Installment Payment Plan assists students in meeting the cost of their higher education by offering a convenient payment option. The university-administered IPP is offered only during the fall and spring semesters. The plan distributes the cost of tuition, fees, housing and dining charges for a semester into four equal installments.

All students attending the university with current charges of $100 or more are eligible to participate. All prior semester balances must be paid in full to be eligible.

Students who receive financial aid are also eligible for participation in the IPP. These students may deduct their aid to determine the net total due. If it is $100 or more, the remaining amount may be paid in installments.

In some cases, a student may receive a financial aid refund, and then subsequent charges for the semester are added to the student’s account. If the student has received a refund, he or she is ineligible to participate in the IPP unless the refund has been repaid to the university in full. The student must then pay the first installment and follow the instructions to enroll in the IPP.

There is a $25 nonrefundable application fee payable with the first installment of each semester. Interest is not assessed on the outstanding balance; however, installments not paid by the payment due date are subject to a late payment penalty. Information about how to participate in the IPP is available online at www.enrollment.vcu.edu/accounting/payment_plan.html (http://www.enrollment.vcu.edu/accounting/payment_plan.html).

**Drop vs. withdraw**
Drop charges are removed to indicate that the student never attended the class. The student is not eligible to receive financial aid, and any financial aid already credited to the student’s account based on the original course registration will be removed from the student’s account, which may create a balance due to the university.

Withdraw results in the academic grade of W. Charges are assessed and adjusted according to the University Refund Policy. Students may owe a balance to the university.

**Refund of tuition and fees**
The official university tuition and fees refund policy is applicable only for the fall and spring semesters. This table pertains to both complete withdrawals and reduced course loads for standard classes (excluding short/nonstandard courses). The policy is based on the weeks of the semester and not the class meeting days (if the semester begins on a Thursday, the first week of classes is from Thursday through the following Wednesday).

Refunds (reduction of charges) are calculated on a course-by-course, per-credit-hour basis, disregarding the full-time cap amounts and discounted tuition. Charges are recalculated based on the number of credit hours in which the student remains enrolled in addition to the nonrefundable portion of credit hours for the withdrawn course(s). Students who are enrolled and withdraw from courses may not receive a reduction in charges.

- Students dropping/withdrawing from courses through the first week of class will be entitled to a 100 percent refund of tuition and fees.
- Students withdrawing from courses through the second week of class may be entitled to an 80 percent refund of tuition and the university fee.
- Students withdrawing from courses through the third week of class may be entitled to a 60 percent refund of tuition and the university fee.
- Students withdrawing from courses through the fourth week of class may be entitled to a 40 percent refund of tuition and the university fee.
- Students withdrawing from courses after the fourth week of class are not entitled to receive a refund of tuition and fees.

The refund policy and deadlines of the English Language Program are different from the university’s refund policy for academic courses. Details of the policy may be obtained from the English Language Program Office.

A full refund for holiday intersession will be granted if the course is dropped before 4:30 p.m. on the day of the first class meeting. Partial refunds are not granted.

A full refund for a short/nonstandard course's tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. Partial refunds are not granted.

A full refund for summer tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. (This policy also is applicable if the class does not meet on two consecutive days.) Students reducing their academic course loads to less than full-time (12 credits for undergraduates and nine credits for graduates) before the end of the last day to drop a course will be entitled
to a refund of tuition and applicable fees reflecting the reduced course load. Partial refunds are not granted for the summer session.

Students who are financial aid recipients and withdraw from all courses prior to completing 60 percent of the semester are subject to the Federal Return of Title IV Funds Policy. For more details see Federal Financial Aid Refund Policy (p. 25).

Refunds will be computed based on the actual withdrawal date certified by the Office of Records and Registration. Refunds will not be made to students who do not attend classes and have not completed the required withdrawal procedure. Refund processing may take approximately two to three weeks. Exceptions to this refund policy are made only in rare instances. Written application for an exception must be filed in the Student Accounting Department to the Refund Appeals Committee within three years.

Refer to the Residential Housing contract and Dining Services’ “Terms and Conditions” for housing and dining services refunds.

Requests for refunds that are not generated from the overpayment of financial aid should be made in writing to: VCU Student Accounting Department, P.O. Box 843036, Richmond, VA 23284-3036. Refund request forms are available at the Student Services Center, 1015 Floyd Ave. or 1000 E. Marshall St., Room 323, and on the Web at vcu.edu/enroll/forms (http://www.vcu.edu/enroll/forms).

In accordance with credit card regulations, the university will refund any credit balance that may result on a student’s account as the outcome of a credit card payment back to the credit card account. The remaining credit balance, if any, will be refunded to the student.

Students are responsible for paying any increase in charges that may occur after the generation of any refund.

Outstanding charges

Students who fail to meet payments when due will be assessed late payment penalties and will be denied registration for future classes until they have paid all accrued amounts owed. Students with balances owed to the university will not be issued degrees, official transcripts of grades or graduate reports until all charges are paid in full.

Any communication disputing an amount owed, including an instrument tendered as full satisfaction of a debt, must be submitted to the Director of Student Accounting, Student Accounting Department, Virginia Commonwealth University, P.O. Box 843036, Richmond, VA 23284-3036.

Pursuant to Section 2.2-4805 et seq., of the Code of Virginia, and in accordance with rules and regulations promulgated by the State Comptroller and Attorney General of the Commonwealth of Virginia, VCU will charge interest, costs and fees on all accounts past due.

VCU is participating in the Virginia Set-off Debt Collection Act of 1981. Under the provisions of this act, a Virginia individual income tax refund will be subject to the university’s claim for unpaid balances of tuition and fees.

A student who pays a past due balance with a dishonored payment item may be subject to having his or her current and/or future registration cancelled. A charge of $50 is levied for all dishonored payment items.

Military services tuition relief, refund and reinstatement guidelines

These guidelines apply to students whose service in the uniformed services (military) has necessitated their sudden withdrawal or prolonged absence from their enrollment at Virginia Commonwealth University and provides for the required re-enrollment of such students. Students are offered the following enrollment secession options:

1. Drop all courses before the end of the add/drop period and receive a full reduction of tuition and fee charges. Students residing in university housing and participating in a dining plan will be released from their housing and dining service contracts and will receive a prorated refund of these charges. Students will be asked to sign the drop request form with the director of military student services indicating that they are not receiving a financial aid refund. If the reduction of charges results in an overpayment on the account after any financial aid or third party awards have been reduced, the student will be issued a refund.

This option might best meet the needs of students who are called to active duty service during the first week of school and did not receive a financial aid refund check or direct deposit.

2. Receive a grade of Incomplete (IM – incomplete military) in one or all courses. Students residing in university housing will be released from their housing and dining service contracts and will receive a prorated refund of these charges. Students who chose to take a grade of IM will not have tuition and fees reduced for these courses because, upon receipt of an approved change of grade, credits will still be earned for the semester. Students will have 12 months from the date that they return from active service to complete the course work and earn a course grade. If a student received financial aid, the amount recovered to the financial aid accounts will follow the Federal Financial Aid Refund Policy.

This option might best meet the needs of students who have essentially completed all course work in a class for the semester, but have yet to turn in a final project, an exam or other materials. It should be agreed upon between the instructor and the student that the remaining course work can reasonably be completed during the 12-month period.

3. Accept administrative withdrawal (WM – withdrawn military) from all courses as of the effective date of the orders to active duty. If this option is elected, a full refund of all tuition, fees and prorated room and dining charges will be made. If a student received financial aid, the amount recovered to the financial aid accounts will follow the Federal Financial Aid Refund Policy. If the reductions of charges results in an overpayment on the account after any financial aid or third party awards have been reduced, the student will be issued a refund.

This option might best meet the needs of students who are called to national service in the middle of a semester and have not completed 75 percent of their class requirements. This option also might best meet the needs of students who are leaving the university during the first week of class and received a financial aid refund check or direct deposit as a result of their financial aid.

4. Students who have completed 75 percent of the course requirements at the time of military activation and, notwithstanding certain exceptions noted below, who meet requirements as determined and agreed upon by the faculty instructor and the student may receive full course credit.

Students may receive full course credit if 75 percent of course requirements have been completed, under certain circumstances. The
instructor is responsible for determining what percentage of course requirements have been completed based on factors to include but not limited to contact time, examinations, projects, work experience and clinical experience. The awarding of full credit cannot be made where the incomplete requirements are essential components of the course or program required by law or regulatory bodies, required for competency in the workplace, or required to complete licensure examinations.

**Leaving the university**

To initiate this process, the student must provide the Office of Military Student Services with a copy of his or her active duty orders in addition to a printed copy of his or her course registration for that semester and indicate Option 1, 2, 3 or 4 for each course. If Option 4 is selected, the student must provide documentation from the instructor. The director of military student services will forward all documentation to the university registrar to take the appropriate enrollment action, post the appropriate grades and send a copy of the orders and a copy of the student course request statement to the director of financial aid and the director of student accounting.

**Returning to the university**

Students who withdrew from the university as a result of military deployment, mobilizations or duty changes are entitled to return without having to requalify for admission so long as the student (a) returns after a cumulative absence of no more than five years and (b) notifies the appropriate admissions office of the intent to return to the university not later than three years after the completion of military service obligation. The student may return to the university in the same program of study. With the consultation of an adviser, a comparable program of study may be chosen for discontinued programs.

**Tuition determination and student classification**

Tuition is determined by the number of credit hours a student is taking, the student’s residency classification, course of study and classification level.

**In-state residency**

Eligibility for in-state tuition benefits is determined by Section 23-7.4 of the Code of Virginia. Refer to the Determination of student classification for in-state tuition purposes in the About VCU section of this bulletin for the complete code.

All applicants to VCU who want to be classified as Virginia residents must complete the Application for Virginia In-state Tuition Rates included in the graduate application. The residency determination of the applicant will be conveyed at the time of admission. New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency determination by completing an Application for Change of Domicile available from the Office of Records and Registration (online). The student must present clear and convincing evidence that he or she is not residing in the state primarily to attend school. The application deadline is 30 days prior to the start of the semester, and it is the responsibility of the student to establish or to file an appeal to change his/her residency classification prior to the start of classes for the semester under consideration. In accordance with the Code of Virginia, applications received after the start of the semester must be considered for the next semester. Submit completed applications with documentation to the university residency appeals officer. Processing may require four to six weeks; therefore it is strongly recommended that applications be submitted earlier than the stated deadline.

Our service to students is limited to assuring that they understand the procedures for appealing and that they have access to information about the relevant sections of the Code of Virginia. We provide information about the steps of our process and access to the applicable sections of the statute and the associated guidelines. We provide qualified staff to review the appeals and make decisions based on the information students provide. What we cannot do is provide advisement to students as to how to present their case for review; we cannot become the student’s advocate since we must make the decision.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Student Accounting Department. Students denied this status also are notified by mail. The denial letter informs the student of procedures for appeal of this decision, to include filing an appeal with the University Residency Appeals Committee. Students who submit fraudulent applications, falsely documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Please note that a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

**General academic regulations for all graduate students**

**VCU Graduate Bulletin (catalog)**

The VCU Graduate Bulletin (catalog) website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the Graduate Bulletin (catalog) as well as the academic regulations in individual school and department publications and on program websites; however, in all cases, the official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin website and on the Graduate School website, take precedence over individual program policies and guidelines.

The archived (http://bulletin.vcu.edu/archive) copies of current and past bulletins (catalogs) reflect all policies and procedures in effect at the beginning of the stated academic year. The online Bulletin is updated regularly to reflect changes that occur throughout the academic year.

Students who maintain continuous enrollment are subject to the curricular requirements of the Graduate Bulletin (catalog) in effect at the time of admission, and to subsequent policy changes approved by the University Graduate Council for immediate implementation.

Students who do not maintain continuous enrollment must reapply for admission and will be subject to the requirements of the Graduate Bulletin (catalog) in effect at the time of readmission, and to subsequent policy changes approved by the University Graduate Council for immediate implementation. (See policy on Exceptions (p. 32).)
Grade review procedures

Graduate students at VCU have a right to appeal actions of an academic nature. If such action involves a course grade, the Grade Review Procedures as published in the Rules and Procedures should be followed. If such action involves computing, the Computer and Network Resources Use Policy (http://www.ts.vcu.edu/askit/3409.html) should be followed.

Dismissal from a graduate degree program

In addition to those standards of conduct described in VCU Rules and Procedures and the VCU Honor System, students enrolled at the university may be dismissed from the academic programs in which they are enrolled for failure to meet prescribed academic program requirements. Students appealing dismissal from their graduate degree programs should first pursue appeals at the program/department and/or the school level. After receiving the program/department and/or school decision, students have the option of filing an appeal with the graduate dean in the process outlined in the Appeal process for students dismissed from a VCU graduate degree program (p. 33).

Other university policies that might impact graduate students include, but are not limited to, the following:

- Alcohol and Drug Policy
- Care and Ethical Use of Animals in Research and Education at VCU
- Information Security Policy
- Intellectual Property Policy
- Misconduct in Research and Scholarly Activities
- Non-discrimination on the Basis of Disability
- Prohibition of Sexual Harassment
- Responsible Conduct in Research and Scholarship
- VCU IRB Written Policies and Procedures

External agencies with policies that might impact graduate students include, but are not limited to, the following:

- State Council of Higher Education for Virginia (http://www.scchev.edu)
  – SCHEV
- Southern Association of Colleges and Schools Commission on Colleges (http://www.sacscoc.org) – SACS-COC

Revised 5/14/2013
University Graduate Council

Degree requirements

The minimum course requirements, rules of admission to degree candidacy, language requirements, thesis or dissertation requirements, comprehensive examinations, transfer of credits, and the like are specified for each program in the individual program sections on this bulletin website. Additionally, many schools, programs and departments maintain websites and publish special brochures, student manuals and program guides that may be requested from the appropriate dean or program director.

In all cases, the official policies and procedures of the University Graduate Council, as published in the Graduate Bulletin and on the Graduate School website (http://www.graduate.vcu.edu), are fully applicable to all graduate programs and graduate students, both on- and off-campus, and take precedence over individual program policies and guidelines.
guidelines. Graduate students should contact the Graduate School with questions regarding any discrepancies.

The university reserves the right to revoke any degree, certificate or other university recognition for cause. In addition, any time following the award of a degree, certificate or other university recognition, the university reserves the right to take appropriate action, including, but not limited to, the revocation of such degree, certificate or other university recognition, on the basis of academic misconduct discovered subsequent to, but which occurred prior to, the awarding of the degree, certificate or other university recognition. More specifically, when an action that constitutes a violation of the VCU Honor System leads to a finding that invalidates a major piece of work required for a degree, certificate or other university recognition so that the validity of the degree, certificate or other university recognition is jeopardized, the student or former student will be subject to a sanction that may include (a) rejection of a thesis, dissertation or other work, (b) revocation of a certification or other university recognition or (c) revocation of a degree.

Academic advising

Students are responsible for the proper completion of their academic programs. They must be familiar with the Graduate Bulletin (catalog) as well as all additional academic regulations promulgated by individual schools and departments.

The offices of the deans and department chairs, in cooperation with the advisers and faculty, endeavor to follow the academic progress of all students, and students are encouraged to seek counsel whenever there is a need. If advisers are unable to resolve problems satisfactorily, they will refer students to others as deemed appropriate and necessary.

In order to aid advising, students are responsible for maintaining current mailing addresses on file with the Office of Records and Registration (http://rar.vcu.edu), as well as with the schools and departments in which they are enrolled.

Students also are required to obtain an official VCU student e-mail account within one week of the beginning of the first semester of enrollment and are responsible for reading in a timely fashion university-related communications sent to their official VCU student e-mail accounts. Information on how to set up an account is available online at http://mymail.vcu.edu.

The academic advising process requires periodic checks by graduate students, advisers and program directors to ensure the accuracy of students' academic histories. Unofficial academic histories are available on line through eServices (http://www.eservices.vcu.edu), or official transcripts may be obtained for a fee from the Office of Records and Registration (http://rar.vcu.edu).

It is the responsibility of all graduate students to:

1. Check their records no later than the end of the add/drop registration period at the beginning of each semester to ensure that their registrations are correct and
2. Check their records at the end of each semester to ensure that their academic histories are current and correct.

Students who wish to appeal assigned grades must follow the grade review procedure as articulated in the Grades section (p. 41) of this Bulletin (catalog) and as published in VCU Rules and Procedures [PDF](http://www.assurance.vcu.edu/Policy%20Library/VCU%20Rules%20and%20Procedures.pdf).

Requests for any other changes to an academic history must be submitted in writing by students to their graduate program directors no later than 14 calendar days after the beginning of the following semester (for the fall semester, 14 calendar days after the beginning of the spring semester; for the spring or summer semester, 14 calendar days after the beginning of the fall semester).

Graduate students, program directors and academic school deans/designees are required to conduct a final review of all academic histories as part of the application-to-graduate check-out process as articulated in Graduation requirements section (p. 39) of this Bulletin (catalog) and on the Graduate School website. A student’s signature on the application to graduate is acknowledgement that the student has reviewed the academic history and that it is correct. Final approval signatures by graduate program directors and academic school deans/designees on the final application to graduate confirm that the student’s academic history is complete, correct and final and that no future requests for changes to the academic history will be considered once the student has been approved to graduate.

Revised 5/11/2010
University Graduate Council

Exceptions

Exceptions to graduate policies must be approved by the dean of the Graduate School. Requests for exceptions to Graduate School policies are to be made in writing by students to their graduate advisers/program directors. The graduate advisers/program directors will forward their recommendations, along with copies of student requests and supporting documentation, to the school dean/dean’s designee, who will review and approve or disapprove recommendations. Recommendations approved by the school dean/dean’s designee will then be forwarded to the dean of the Graduate School, who represents the University Graduate Council.

Withdrawal from a graduate program

Graduate students in good academic standing, according to the academic rules and regulations articulated in the Graduate Bulletin and by individual graduate programs, may request to withdraw from a graduate program at any time. Students should notify their graduate program directors as soon as possible of the intent to withdraw from the program. The program director will then notify the Graduate School via the Special Action Form procedure. The effective term of withdrawal is recorded as the end of the last term of active registration.

Withdrawal from a program does not constitute a withdrawal from course work. Students who wish to also withdraw from classes should do so according to the procedures in the “Withdrawal from classes (p. 35)” section of the Bulletin.

Students who are not in good academic standing should be reviewed for possible termination from their academic programs as prescribed in the Graduate Bulletin (see Appeal process, students terminated from a VCU graduate program (p. 33)).

Revised 5/8/2012
University Graduate Council
Appeal process, students dismissed from a VCU graduate program

1. Dismissal process
   a. Dismissal is initiated at the program/department level by advisers/graduate program directors/department chairs via a special action form indicating the reason with relevant documentation attached. Reasons for dismissal may include but are not limited to:
      - Academic (D or F in class, too many grades of C, as determined by the student’s academic program in conjunction with Graduate Council policy, GPA below 3.0, failure of comprehensive exams, lack of progress on/ unsuccessful defense of thesis/dissertation),
      - Discontinuous enrollment
      - Exceeding time limit
      - Honor policy violation
      - Academic misconduct
      - Professional misconduct
   b. Request for dismissal is forwarded to the school dean/dean’s designee, who reviews the action, signs the form and forwards it to the graduate dean within 10 business days.
   c. The graduate dean/dean’s designee reviews the action, signs the form, notifies the Office of Records and Registration and sends a dismissal letter to the student via office VCU email. This letter must include a statement of the student’s right to appeal and inform the student that appeals must be initiated at the program/department and/or school level within 10 business days after receipt of the letter.

2. Appeals process

Preamble

Virginia Commonwealth University, through its Graduate School, defines minimum standards for admission and sets general rules governing eligibility for continuation. However, the individual graduate programs, through their respective graduate faculty and graduate program procedures, exercise principal responsibility for evaluating graduate student work. It is assumed that most disputes over evidence of unsatisfactory progress will be reconciled through discussions between faculty and students at the school/department/program level.

It is important that each graduate student be fully informed, not only of the VCU Graduate School Policies and Procedures, but also of any additional departmental program requirements beyond those established by the Graduate School. A copy of each departmental graduate policy statement should be readily available to all graduate students. The department should inform graduate students of degree requirements and associated school/program/department procedures at the time of matriculation.

A student may appeal dismissal from a graduate program under the following procedures.
   a. The student has the burden of proof in all appeals.
   b. The student must initiate the appeal process at the program level within 10 business days after receipt of the graduate dean’s certified dismissal letter and according to the program/department and/or schools/colleges appeal processes. All program/department and/or school/college appeal processes should be exhausted prior to initiating an appeal to the graduate dean.
   c. If all program/department and/or school/college appeal processes fail to resolve the issue, the student must provide the graduate dean with written notification of appeal, to include justification and all supporting documentation (correspondence and other paperwork leading up to the dismissal), within 10 business days of the school/college decision. All documentation must be provided at the time of written notification of appeal.
   d. The graduate dean provides the graduate program director and school/college dean with copies of the student’s appeal and asks the graduate program director/dean/department chair to provide the Graduate School with their response, including copies of correspondence and any other supporting documentation that led to the dismissal. The graduate program director and school dean must respond to the graduate deans request for information within 10 business days.
   e. The graduate dean will review the materials and may refer the matter to the Admissions and Academic Standards Committee of the University Graduate Council. The committee is composed of faculty members from various divisions of the university plus one ex-officio voting member from the Graduate School. AAS members who have direct knowledge of the student’s case will be recused. A minimum of four members must be present to constitute a quorum. The committee will convene to review the documentation and consider the positions of the parties. At its meeting, the committee will hear presentations from and ask questions of the student and representatives of the school/department/program. The student and the school/department /program representative may each bring up to two persons who may provide support and advice but who may not speak for the parties.
   f. After considering the materials submitted and the presentations by the parties, the committee will convene in closed session and decide, by majority vote, whether to recommend that the graduate dean uphold or reverse the dismissal. In the event of a less than unanimous decision, both opinions will be communicated to the graduate dean. The graduate dean renders the final decision and notifies the student in writing within 10 business days by certified mail to the student’s official address on file with the university.
   g. The student may be allowed to register for courses during the pendency of the appeal, understanding that he/she will be dropped retroactively if the dismissal is upheld.

University Graduate Council

Student load

Student load is the total number of credits for which students are enrolled in any semester. Students may be either full time or part time, dependent upon program rules. Students who are fully funded as VCU graduate assistants with tuition remission are classified as “full time” during any semester in which they enroll for nine or more credits (three during the summer if funded on a 12-month stipend). Departmental requirements vary; therefore, funded students should verify expected course loads with their graduate program directors.

The maximum number of credits for which students may enroll in any semester without special permission is 15. More than 15 credits is an overload. More than 15 credits may result in increased tuition.
Permission to enroll for more than 15 credits may be granted upon the written recommendation of the adviser, through departmental governance procedures, to the dean of the Graduate School.

Each summer course is designed to provide the equivalent of one semester's work. With careful scheduling, it is possible for students to earn as many as 15 credits during the summer if course work extends over the full summer semester calendar. Permission to enroll for more than 15 credits in the summer semester may be granted upon the written recommendation of the adviser through departmental governing procedures to the dean of the Graduate School.

Summer success is predicted on the academic standard of one credit per week. Six credits in five weeks or nine credits in eight weeks is considered a normal load, but VCU does not permit six credits in four weeks or nine credits in six weeks. Suggested scheduling combinations are printed in the Summer Schedule of Classes or are available online at vcu.edu/schedule (http://www.vcu.edu/schedule).

Graduate courses are not offered during the winter intersession.

Revised 5/11/2010; 5/10/2011
University Graduate Council

Attendance and enrollment policies

Class attendance

Instructors are responsible for clearly informing students in writing of the attendance requirement for each course and the consequences of poor attendance. Students must abide by the requirements as announced in each separate class even though the requirements may vary widely among courses.

The instructional programs at VCU are based upon a series of class meetings involving lectures, discussions, field experiences, special readings and reporting assignments. Therefore, it is important for each student to be in attendance on a regular basis. A student who misses a class session is responsible for completing all material covered or assignments made during the absence.

Students having attendance problems should contact the instructor to explain the reasons for nonattendance and to discuss the feasibility of continuing in the course. If the student has fallen so far behind that the successful completion of the course is impossible, the student should withdraw from the course before the last day to withdraw from a course as published in the academic calendar.

Religious observances

It is the policy of VCU to accord students, on an individual basis, the opportunity to observe their traditional religious holidays. Students wishing to observe a religious holiday of special importance must provide advance written notification to each instructor by the end of the second week of classes. On these dates, instructors are encouraged to avoid scheduling one-time-only activities that cannot be replicated. Through such strategies as providing alternative assignments or examinations, granting permission for audio or video recordings or the use of the Internet, faculty members are expected to make reasonable academic accommodations for students who are absent because of religious observance.

Mandated short-term military training

Students called to report for mandated military training must provide advance written notification to each instructor several weeks in advance of training. Faculty members are expected to make reasonable academic accommodations for students who are absent because of mandated short-term military training (short-term is defined as several days not to exceed two weeks).

Enrollment

Any person engaged in graduate study at VCU must enroll each semester in which he/she is engaged in any form of study at VCU that involves use of university facilities, laboratories/studios and/or libraries, or who is supervised by or consults with a faculty member concerning graduate work on a project, work of art, thesis or dissertation.

Continuous enrollment for degree-seeking graduate students

Continuous enrollment – Pre-candidate

Once admitted to a degree program, a graduate student is expected to comply with minimum enrollment of one course per 12-month period from the beginning of his/her program.

Continuous enrollment – Candidate

A graduate student who has completed course requirements for a degree must register for at least one credit at VCU each fall and spring semester until the degree is awarded. Students must be enrolled during their graduation semesters.

Revised 5/8/2012
University Graduate Council

Residence for Ph.D. programs

At many universities, doctoral students are required to maintain at least one to two years of continuous full-time enrollment or “residence.” At VCU, each doctoral program will establish its own residency requirements.

Change in registration

Once students have registered for classes, changes in registration must be made according to the procedures listed below. Whenever students make any changes in registration, they should keep copies of their new schedules as verification of the changes. Changes in registration may affect financial aid. Students are advised to consult with a financial aid counselor before making any changes to their enrollment status. See the “Financial Aid” section of this chapter for detailed information.

Cancellation of registration

To cancel registration, students must notify, in writing, the Office of Records and Registration before the end of the “Add-Drop” period, or drop all classes using the Web Registration System. Refunds are issued in accordance with procedures described under the refunds section of this chapter. For readmission guidelines, refer to the admissions section.

Auditing graduate classes

Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in courses, but do not receive academic credit upon completion of the courses. Students who
register on an audit basis are subject to attendance regulations of that class and, unless otherwise specified at the discretion of the instructor, are subject to the same course requirements as other students in the class. Students who register on an audit basis may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar (http://www.vcu.edu/academiccalendars). Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of students’ semester load in terms of classification as full-time students. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships, or university graduate scholarships. Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration. The grade of AU is not included in the calculation of the GPA.

Revised 5/11/2010
University Graduate Council

Leaf of absence and withdrawal policies

Leave of absence

Graduate students may request leaves of absence from their programs through written appeals to their advisers. The graduate advisers/program directors will forward the requests to the appropriate school dean/dean designee who, following departmental governance procedures, will forward their recommendations and any supporting documentation to the dean of the Graduate School who will respond for the university. Students who are out of compliance with continuous enrollment policies (see policy on Continuous enrollment for degree-seeking graduate students (p. 34)) and who have not been granted approved leaves of absence by the graduate dean must reapply for admission to VCU and to their graduate degree programs. Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period. Students should note that while leaves of absence temporarily suspend continuous enrollment requirements, they do not extend time limits for completion of degrees. (See policy on Exceptions (p. 32).)

Leaves of absence are requested and approved before or within a current semester. Requests for retroactive leaves of absence will not be approved.

The posting of the leave of absence on the student’s academic record prevents registration for the approved leave of absence period. If the student wishes to return to academic study before the end of the approved leave of absence period, the Graduate School must be notified via the Special Action Form process so that the leave of absence is cancelled and the registration hold removed.

Withdrawal from classes

To withdraw officially from VCU courses, students must submit complete Official Withdrawal Forms to the Office of Records and Registration by the official withdrawal date as published in the official VCU Calendar (http://www.pubinfo.vcu.edu/calendar/ac_fullViewAll.asp). The Official Withdrawal Form is obtained from the Office of Records and Registration (Monroe Park Campus: Harris Hall, First Floor; MCV Campus: Sanger Hall, Room 1-055). Students may also withdraw on line via VCU E-services.

Failure to complete this process may result in the assignment of failing grades in all or some of the courses.

A grade of withdrawn (W) will be recorded on the permanent student academic record for all courses from which students officially withdraw.

Health-related withdrawals

While graduate students are expected to work toward completion of their degrees without interruption, health-related problems may necessitate an interruption of their studies.

For a protracted illness, a student may choose to ask for an approved leave of absence (see leave of absence policy above).

Some students may experience medical conditions that make them unable to complete their studies once a semester is in progress. If this occurs before the last day of add/drop registration, students should drop their classes via eServices. If an illness occurs after add/drop but before the last day to withdraw, per the academic calendar (http://academiccalendars.vcu.edu), students should withdraw from their classes through the normal withdrawal process via eServices.

After the last day to withdraw but prior to the last day of classes per the academic calendar — and before a final class grade has been assigned and/or posted to the academic history — students with medical problems should petition their academic deans (or dean designees) for a medical withdrawal from all courses. Students must present documentation of their medical condition that establishes a significant degree of impairment in continuing their studies. This documentation must include a letter, written on letterhead, from a licensed health care provider that establishes the dates of treatment, the diagnosis and the degree of impairment that the condition has created. The letter should also provide the date when the student became unable to attend classes, when the impairment was considered significant enough to affect academic performance and the anticipated date of return to school. The medical withdrawal should be submitted to the Graduate School via the Special Action Form process.

The student’s transcript will reflect a grade of W for all courses approved for a medical withdrawal taken that semester. No special designation for medical withdrawals is made on the transcript, and tuition and fees are levied in the same manner as other withdrawals (see withdrawal from courses policy above). Medical withdrawals may impact future financial aid in relation to Satisfactory Academic Progress.

In the event that a student’s health problem poses a danger to the student, to patients or to others with whom the student may come in contact, and the student is unable or refuses to initiate steps to withdraw as stated above, administrative withdrawal of the student may be made by the dean of the Graduate School upon consultation with the appropriate faculty and a qualified physician.

Because curricular and course content changes may occur and a student’s progress toward a degree may be affected adversely because of an extended absence, specific time periods may be imposed by individual schools with respect to the length of time allowed for absence from school. If there is a delay in return beyond the allotted time period without written consent of the dean of the Graduate School, the student may petition for return with advanced standing.

Prior to returning to school, the student must submit a statement from a physician documenting that the condition that necessitated the withdrawal has been corrected to a point where the student can
complete successfully all curriculum requirements with reasonable accommodation including classroom, laboratory, clinical and fieldwork experience.

Revised 5/14/2013
University Graduate Council

Immunization requirements

The commonwealth of Virginia and VCU require that all full-time students supply validated immunization records to University Student Health Services. This requirement must be completed prior to registering for second semester. Failure to meet these requirements will result in a hold placed on the student’s second semester registration. The hold can be removed only upon receipt of the students documented records.

The immunization record must be completed fully and accurately. There are two ways a student may fulfill all requirements:

1. Students may have their health care provider transfer the information from their medical records and sign the form.

or

2. Students may complete the top demographic section of the Certificate of Immunization and attach a copy of official documents from undergraduate institutions, military records, high school or other records that fulfill all requirements to the Certificate of Immunization.

A copy of the Certificate of Immunization, which details the necessary immunizations, is available on the student health website at: students.vcu.edu/health/immunizations (http://www.students.vcu.edu/health/immunizations).

Students who cannot provide documented evidence of all required immunizations must see their health care provider, health department or Student Health Services to complete all requirements.

Change of graduate degree program

Students wishing to change to different graduate degree programs should obtain new application forms from the Graduate School website (http://www.vcu.edu/graduate/ps/apply_options.html). Students will have to submit new applications to the new programs with all materials required of applicants to that program. The dean of the Graduate School will work with the administrators of the two programs to facilitate the admission process for eligible students.

Transfer credit

A maximum of 30 percent of the didactic hours required for a graduate degree or any graduate certificate program may be transferred from another VCU program or outside institution and, if not applied previously toward another degree, may be applied toward a degree. Prerequisite course work that does not count toward the VCU degree may not be transferred.

Transfer grades for course work taken at VCU, either as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded, are included in the calculation of the VCU graduate grade-point average and all other graduate statistics. Transfer grades for course work taken at another institution are not included in the calculation of the VCU graduate grade-point average and other graduate statistics.

Recommendations regarding transfer credit are initiated at the program and academic school levels and reviewed and approved by the Graduate School. All matriculated students must obtain final written approval from the Graduate School for course work approved for transfer before registering for course work at another institution. Individual schools/programs may have more stringent requirements. Requests for transfer of course work must include an official copy of the transcript from the college or university where the course work was taken and a VCU Graduate School Transfer Equivalency form (see Graduate School website/forms).

Graduate credit hours earned toward a VCU certificate may be applied one time to degree requirements for master’s or Ph.D. programs. Graduate credit hours earned toward a VCU certificate may be applied toward only one certificate. The determination of the acceptability of specific courses to be used for both the certificate and the graduate degree will be the responsibility of that master’s or Ph.D. program or school.

All transfer work must be at the A or B grade level from a regionally accredited college or university. “Credit” or “pass” grades can be accepted only if approved by petitioning the Graduate Advisory Committee or equivalent of the student’s school or college. Students must be in good standing both at VCU and at the institutions from which the credits were earned. Some programs will not accept credits earned as a nondegree-seeking graduate student for transfer. VCU will not accept credits that do not apply to a graduate degree at the offering institution for transfer, nor will it accept credits from unaccredited institutions for transfer. These criteria apply to all domestic and international institutions.

Course work taken under the auspices of any study abroad program, including the study abroad program at VCU, is classified as course work taken at an international institution for purposes of determining if the course work may count toward a VCU graduate degree. Registration for such course work does not guarantee that the course work will count toward a VCU graduate degree. All study abroad graduate course work is subject to the same review and approval process if the course work is to count toward a VCU graduate degree.

Revised 5/11/2010; 5/10/2011
University Graduate Council

Credit for military service, career or life experience

The Graduate School does not grant graduate-level credit for any type of military service or career or life experience.

The Graduate School may grant credit for formal military service school graduate-level courses that have received positive recommendation by the Commission on Accreditation of Service Experiences of the American Council on Education as stated in the ACE’s “Guide to the Evaluation of Educational Experiences in the Armed Services.” (http://www.acenet.edu/news-room/Pages/Military-Guide-Online.aspx)

Recommendations regarding the transfer of military course work are initiated at the program and academic school levels and reviewed and approved by the Graduate School and must meet all other criteria for transfer credit as articulated in the transfer credit policy.

Revised 5/10/2011; 5/14/2013
University Graduate Council
Degree candidacy

A graduate student admitted to a program or track requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Degree candidacy requirements vary from program to program and may include but are not limited to such milestones as successful completion of all or a portion of all required didactic course work, the passing of written and/or oral comprehensive examinations, the identification of the thesis/dissertation adviser and/or committee, and/or the successful defense of the thesis/dissertation prospectus.

Upon satisfactory completion of degree candidacy requirements, the graduate student must submit a notice of admission to master’s or doctoral degree candidacy form (available on the Graduate School website (http://www.graduate.vcu.edu/student/candidacy.html)) to his/her program director. The student’s signature acknowledges that he/she has read and understands the policies regarding research involving human or animal subjects (Information on human and animal subjects can be found on the website of the Office of Research and Innovation (http://www.research.vcu.edu/)) as well as continuous enrollment requirements (p. 34). Both the program director and the school’s dean or dean’s designee must sign the form to confirm the student’s eligibility for admission to degree candidacy and forward it to the graduate dean for final approval and recording of admission to degree candidacy. The graduate dean will formally notify the student of admission to degree candidacy.

The degree candidacy form must be submitted before the student formally begins the final thesis/dissertation/research project but no later than the semester preceding the semester in which the student graduates. Failure to submit the degree candidacy form in a timely manner may delay graduation.

A graduate student approved for degree candidacy must register for at least one graduate credit hour at VCU each fall and spring semester until the degree is awarded. Students must be enrolled during their graduation semesters. Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period.

Students should note that while a leave of absence temporarily suspends the continuous enrollment requirement, it does not extend the time limit for completion of the degree.

Revised 5/8/2012
University Graduate Council

Theses/dissertations

Comprehensive examinations

Comprehensive examination requirements and administration of the thesis/dissertation process vary by program and academic school. Graduate students should refer to the guidelines established by their programs regarding specific program requirements. In addition, graduate students should refer to the Thesis and Dissertation Manual found on the Graduate School website (http://www.graduate.vcu.edu/student/thesis.html) for guidelines regarding the preparation and submission of theses and dissertations and for scheduling the final defense.

Master’s degree candidates may have a thesis requirement — or its equivalent in the form of a research project, performance, exhibit or other production. In some programs, master’s degree candidates may elect a non-thesis option. In such cases, the program may allow a candidate to change from the thesis to the non-thesis option, or vice versa, once. Such action requires written approval of the department head and the faculty adviser and/or the student’s advisory committee.

All doctoral candidates are required to prepare dissertations and the associated additional submission requirements as articulated in the Thesis and Dissertation Manual.

At the time of defense, a thesis or dissertation must be approved by members of a student’s advisory committee with no more than one negative vote. A committee member’s approval is given by signing the ETD approval form (http://www.graduatedocuments.com/thesis-dissertation-forms). A disapproving committee member must also sign the approval form as a dissenting member and must provide a written dissenting opinion to be sent to the Graduate School.

Revised 5/8/2012
University Graduate Council

Graduate advisory committees

Graduate advisory committees shall be appointed for each master’s degree candidate for whom there is a requirement to produce a thesis or its equivalent in the form of a research project, performance, exhibit or other production. The committee will coordinate and supervise the preparation of the thesis or its equivalent. The committee shall have a minimum of three faculty members, one of whom should be from a discipline other than the discipline of the candidate. The chair of the committee will be designated as the candidate’s faculty adviser. Departments/program directors will appoint advisers for master’s degree candidates for whom a thesis or its equivalent is not required. Every member of the committee must hold graduate faculty or affiliate graduate faculty appointment. The chair and at least one other committee member must hold VCU graduate faculty status. It is expected that all members of the committee will be present at any thesis proposal and thesis defense. In the event that a single member of the committee is unable to attend, the committee may meet with the written approval of the graduate program director. If more than one member of the committee is unable to attend, the defense must be rescheduled. The chair must be present for the defense of a thesis proposal and the final thesis.

A graduate dissertation committee shall be appointed for each doctoral candidate. The committee will have a minimum of four faculty members, including a chair, who will serve as the candidate’s faculty adviser. At least two members must be from within the candidate’s discipline and at least one from another discipline. Every member of the committee must hold graduate faculty or affiliate graduate faculty appointment. The chair and at least two other committee members must hold VCU graduate faculty status. It is expected that all members of the committee will be present at the dissertation proposal and dissertation defense. In the event that a single member of the committee is unable to attend, the committee may meet with the written approval of the graduate program director. If more than one member of the committee is unable to attend, the defense must be rescheduled. The chair must be present for the defense of a dissertation proposal and the dissertation defense.

Upon satisfactory completion of all program requirements for admission to candidacy, doctoral matriculants will take written and/or oral
comprehensive examinations administered by their major departments or schools. Successful completion of the examinations shall entitle students to advance to doctoral degree candidacy status. Candidates are then allowed to proceed with the research and preparation of their dissertations and any other doctoral degree requirements designated by their departments.

In the event of failure, students may be permitted to retake comprehensive examinations one time only. The re-examination requires the approval of the appropriate graduate program committee.

Revised 5/14/2013
University Graduate Council

Graduate faculty and affiliate graduate faculty roles and responsibilities

VCU Graduate School Bylaws (http://www.graduater.vcu.edu/media/graduate-school/docs/pdf/110401-01GraduateSchoolWebsiteBylawsPDF.pdf) articulate eligibility criteria for membership on the graduate faculty and provisions for affiliate faculty appointments. All members of a graduate advisory or thesis or dissertation committee must be a member of the graduate faculty or hold an appointment as an affiliate graduate faculty member. All graduate faculty may chair thesis committees; however, only graduate faculty holding the Ph.D. or equivalent degree may chair a dissertation committee. An affiliate graduate faculty member may advise and serve, but not chair, thesis or dissertation committees.

Appointment to affiliate graduate faculty status must clearly articulate the roles and responsibilities and the duration of the appointment. Appointment for purposes of serving on a graduate advisory or thesis and dissertation committee authorizes the affiliate graduate faculty member to fully participate in all activities defined for the group by the individual program guidelines, except for chairing the committee. If the administration and evaluation of comprehensive examinations is explicitly articulated as a responsibility of the graduate advisory or thesis or dissertation committee, then any affiliate graduate faculty appointed to the committee may administer and evaluate the comprehensive examination. If comprehensive examinations are administered and evaluated by a different committee, then an affiliate graduate faculty member may administer and evaluate the comprehensive examination only if such a responsibility is articulated clearly in the recommendation for affiliate graduate faculty membership by the academic school dean and approved by the graduate dean.

Revised 5/10/2011
University Graduate Council

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in thesis/dissertation courses

All thesis and dissertation credits are to be graded each semester as satisfactory (S), unsatisfactory (U) or fail (F). There is no limit to the number of these credits a student may take while pursuing completion of the degree. Receipt of the grade of U is formal notification to the student of unsatisfactory progress. A student who receives a final grade of F in the thesis or dissertation will be terminated from the program. A grade of S or U is not included in the calculation of the GPA. A grade of (I) incomplete may not be assigned for a course approved for satisfactory, unsatisfactory or fail (S/U/F) grading. A grade of U is a permanent grade. Future satisfactory performance is reflected in the assignment of the grade of S in subsequent semesters. A student who receives three Us in a thesis/dissertation course will be terminated from the program.

Revised 5/8/2012
University Graduate Council

Electronic theses/dissertations – mandatory

Electronic Theses and Dissertations are digital representations of the traditional work completed by graduate students in partial fulfillment of requirements for graduate degrees. An ETD can be a simple textual document converted to a standard electronic format such as Adobe PDF or a complex combination of images and formats.

The VCU Graduate School Thesis and Dissertation website, as developed by the University Graduate Council and VCU Libraries, serves as a guide for the preparation of electronic graduate theses and dissertations for graduate students in all programs within the university. Information and a video tutorial are available online at guides.library.vcu.edu/etd (http://guides.library.vcu.edu/etd).

Thesis/dissertation submission deadlines

All requirements for theses/dissertations must be completed by the deadline published in the Academic Calendar (http://academiccalendars.vcu.edu) of the semester in which the candidate plans to graduate, including:

- Final defense of thesis/dissertation
- ETD Approval Form with all approval signatures, including the graduate dean’s and, if applicable, documentation of IRB or IACUC approval number
- Submission of the ETD to the VCU Digital Archives according to instructions on the VCU Graduate School Thesis and Dissertation webpage (http://guides.library.vcu.edu/etd) (Candidate should confirm with adviser/program director all internal schedules for submission of copy, defense and approval.)
- Survey of Earned Doctorates [All doctoral students must complete the Survey of Earned Doctorates (SED). In order to complete the survey, go to: https://sed.norc.org/survey. Refer to the Thesis and Dissertation Manual on the VCU Graduate School Thesis and Dissertation webpage (http://guides.library.vcu.edu/etd) for further information.]
- Publication with ProQuest [All doctoral dissertations must be published with ProQuest. Dissertations are submitted directly by the student through the UMI/ProQuest’s ETD Administrator site (http://www.etdadmin.com/cgi-bin/school?siteId=242) for VCU. Submitting to ProQuest does not satisfy the university’s requirement of submission. You must submit to the VCU Digital Archives separately, on the VCU Graduate School Thesis and Dissertation webpage (http://guides.library.vcu.edu/etd), in order to fulfill this requirement for graduation.]

Revised 5/11/2010; 5/10/2011
University Graduate Council

Satisfactory Academic Progress

Students must continue to make satisfactory progress toward their degrees. Unsatisfactory grades and unprofessional conduct are areas that may warrant review for possible termination from their programs.
Degrees are granted at the close of the semester or summer session in
shall satisfy requirements in effect at the time of readmission.
who are readmitted to their programs
school or program and the University Graduate Council. Students failing
Candidates for degrees are eligible for graduation upon completion of
doctoral degrees.
Time limit for completion of requirements
eligibility of courses
The time limit for a graduate degree will not extend beyond a period of six
years for graduate certificates and master's degrees and eight years for
doctoral degrees.
Course work completed before matriculation and applied toward the
degree, including course work at VCU and that transferred from other
institutions, will be evaluated by the program/department to determine
whether it can be used to fulfill degree requirements. For course work
that was taken more than eight years prior to the completion of the
VCU degree, the program/department will evaluate the course work for
acceptability and report those courses deemed acceptable to the dean of
the Graduate School. (See policy on Exceptions (p. 32).)

Graduation requirements
All degrees are conferred by the VCU Board of Visitors upon
recommendation of the graduate faculty.
Candidates for degrees are eligible for graduation upon completion of
all academic requirements in effect at the time of official matriculation
into the program, provided the students are continuously enrolled and
provided the requirements are met within the time limit specified by the
school or program and the University Graduate Council. Students failing
to satisfy the time requirement and who are readmitted to their programs
shall satisfy requirements in effect at the time of readmission.

Degrees are granted at the close of the semester or summer session in
which students complete their work. Degrees will not be granted unless
all financial obligations have been resolved with VCU’s Office of Student
Accounting. Students must be enrolled at the time of application (i.e., the
semester in which students graduate).

No degrees will be conferred unless students make formal application to
graduate.
Degrees will be awarded and diplomas issued in a current semester only.
Students who do not submit complete their applications to graduate
in the semester in which they actually complete their programs will be
awarded their degrees in the semester in which they apply to graduate. In
such cases, a text notation will be added to the transcript to indicate the
date that course work for the degree was completed. Program directors
and academic school deans must submit a special action request to the
Graduate School to this effect that also includes a request for a
waiver of the requirement that the students must be enrolled at the time
of application/reapplication. A request for a waiver of the enrollment
requirement must document that the student has completed all degree
requirements and is not using any university resources (i.e., libraries,
computer labs, faculty advising, etc.)

Graduation applications must be submitted by students to their
advisors or deans no later than the dates indicated in the university’s
academic calendars on the Web at vcu.edu/academiccalendars
(http://www.vcu.edu/academiccalendars). Students should schedule
conferences with their advisers well ahead of the deadline and should
note that the application requires the approval of the adviser, the
department chair or the school director of graduate studies, and the
school dean. Credit is applicable toward only one degree unless students
are admitted to a course of study that allows a defined number of shared
courses. Graduate credit hours earned toward a VCU certificate may be
applied one time to degree requirements for master's or Ph.D. programs.
Graduate credit hours earned toward a VCU certificate may be applied
toward only one certificate. The determination of the acceptability of
specific courses to be used for both the certificate and the graduate
degree will be the responsibility of that masters or Ph.D. program or
school.

Graduation checklist
The total number of semester credits required for graduation depends
upon the degree program. Specific information may be found under
degree program descriptions. In addition to the specific requirements
listed by the department, the following graduation checklist for graduate
students, advisers and program directors summarizes all general
requirements for graduation as determined by the University Graduate
Council.

• All provisional or probationary conditions of admission have been
met.
• Candidates enrolled at time of application/reapplication to graduate
(i.e., semester in which candidates plan to graduate).
• Overall graduate GPA is greater than or equal to 3.0.
• Graduate GPA based on all graduate course work attempted after
acceptance into program.
• For repeated courses, both original grade and repeat grades included
in calculation of graduate GPA.
• No more than six credit hours or 20 percent of total credit hours
attempted (whichever greater) at C or below level (C, D, F). Individual
programs reserve the right to establish more stringent requirements
regarding the acceptance of C grades. Specifically, students may not present courses receiving grades less than C for fulfilling degree requirements.

- No course work approved for transfer below grade of B; no course work approved for transfer included in calculation of GPA.
- Graduate course work only (500 level or higher) may be applied to a graduate degree with at least one half of required course work designated exclusively for graduate students (600 or higher).
- All Incompletes (I) converted to letter grade by last day of class of semester in which candidate plans to graduate.
- All grades of Continued (CO), Progress (PR) and No Grade (NG) converted to letter grades by last day of class of semester in which candidate plans to graduate.
- All course work taken within prescribed time limits (master’s, six years; Ph.D., eight years with any extensions approved by Graduate School).
- All requirements for theses/dissertations must be completed by the deadline published in the Academic Calendar (http://academiccalendars.vcu.edu) of the semester in which the candidate plans to graduate, including:
  - Final defense of thesis/dissertation
  - ETD Approval Form with all approval signatures, including the graduate dean’s and, if applicable, documentation of IRB or IACUC approval number
  - Submission of the ETD to the VCU Digital Archives (https://digarchive.library.vcu.edu) according to instructions on the VCU Graduate School Thesis and Dissertation webpage (http://guides.library.vcu.edu/etd) (Candidate should confirm with adviser/program director all internal schedules for submission of copy, defense and approval.)
  - Survey of Earned Doctorates [All doctoral students must complete the Survey of Earned Doctorates (SED). In order to complete the survey, go to: https://sed.norc.org/survey. Refer to the Thesis and Dissertation Manual on the VCU Graduate School Thesis and Dissertation webpage (http://guides.library.vcu.edu/etd) for further information.]
  - Publication with ProQuest (All doctoral dissertations must be published with ProQuest. Dissertations are submitted directly by the student through the UMI/ProQuest’s ETD Administrator site (http://www.etdadmin.com/cgi-bin/school?siteid=242) for VCU. Submitting to ProQuest does not satisfy the university’s requirement of submission. You must submit to the VCU Digital Archives (http://digarchive.library.vcu.edu/handle/10156/820) separately in order to fulfill this requirement for graduation.)
  - Students must settle all financial obligations with VCU’s Office of Student Accounting.

Revised 5/11/2010; 5/10/2011
University Graduate Council

Application to graduate

At the beginning of each semester, all matriculated graduate students will receive an e-mail reminder from the Office of Records and Registration/Graduation Office to initiate the application-to-graduate process for the current semester. The e-mail notification will be sent to the official VCU student e-mail address and will include submission deadlines and guidelines. (All graduate students in the School of Medicine are asked to complete a preliminary review before initiating the graduation process and are referred to the School of Medicine guidelines or to their advisers/graduate program directors regarding application-to-graduate procedures.) Students planning to graduate in the current semester should proceed as follows:

- Complete the Graduation Survey on e-Services.
- Visit the Graduation webpage (http://graduate.vcu.edu/student/graduation.html) to complete the Graduate School application for graduation according to the instructions provided for the completion and submission of documentation to advisers for review and approval. (These forms are provided in PDF format so that students can complete the forms online and print them. Adobe Acrobat Reader is required.) A separate set of graduation forms must be completed and submitted for each program from which students intend to graduate.

The Graduate School Application to Graduate consists of:

- Instructions for students and advisers regarding submission of documentation and the approval process, including a checklist summarizing academic policies and requirements for graduation as determined by the University Graduate Council and articulated in the Graduate Studies at VCU section of the Graduate Bulletin.
- An approval sheet, requiring both preliminary and final reviews/approvals (and indicating the process by which advisers can notify Records and Registration/Graduation Office if students do not complete their programs of study by the end of the current semester).
- Directions for completing Commencement Program/Diploma Information. (This information must be submitted no later than the deadlines provided in the e-mail notification to students in order to ensure inclusion in the appropriate Commencement Programs.)
- An optional Graduation Worksheet. (Students should check with their advisers/graduate program directors to see if they are required to complete the optional graduation worksheet.)

Graduate students, program directors and academic school deans/designees are required to conduct a final review of all academic histories as part of the application-to-graduate check-out process as articulated in this Bulletin (catalog) and on the Graduate School website. A student’s signature on the application to graduate is acknowledgement that the student has reviewed the academic history and that it is correct. Final approval signatures by graduate program directors and academic school deans/designees on the final application to graduate confirm that the student’s academic history is complete, correct and final and that no future requests for changes to the academic history will be considered once the student has been approved to graduate. Detailed information about the application-to-graduate process for graduate students and guidelines for graduate program directors/advisers are available on the Graduate School website at graduate.vcu.edu/student/graduation.html (http://graduate.vcu.edu/student/graduation.html).

Revised 5/11/2010
University Graduate Council

Reapplying for graduation

Candidates who do not graduate at the end of the semester for which they have applied must reregister and reapply. Students must be enrolled at the time of application/reapplication (i.e., the semester in which the student graduates).

Commencement

Graduate students are encouraged to visit the Graduate School website (http://www.graduate.vcu.edu/student/graduation.html) for information
about university Graduate School events and activities for May and December commencement ceremonies. Students also are encouraged to visit the VCU Commencement website (http://www.vcu.edu/commencement).

**Time limit for completion of requirements and eligibility of courses**

The time limit for a graduate degree will not extend beyond a period of six years for graduate certificates and master’s degrees and eight years for doctoral degrees.

Course work completed before matriculation and applied toward the degree, including course work at VCU and that transferred from other institutions, will be evaluated by the program/department to determine whether it can be used to fulfill degree requirements. For course work that was taken more than eight years prior to the completion of the VCU degree, the graduate program director and school dean/designee will evaluate the course work for acceptability and report those courses deemed acceptable to the dean of the Graduate School. (See policy on Exceptions.)

Revised 5/11/2010; 5/10/2011
University Graduate Council

**Grades**

**Grade reports**

Unofficial academic histories are available online through eServices (http://www.eservices.vcu.edu), or official transcripts may be obtained for a fee from the Office of Records and Registration (http://rar.vcu.edu).

It is the responsibility of all graduate students to:

1. Check their records no later than the end of the add/drop registration period at the beginning of each semester to ensure that their registrations are correct and
2. Check their records at the end of each semester to ensure that their academic histories are current and correct.

Students who wish to appeal assigned grades must follow the Grade Review Procedure as articulated below in this Bulletin (catalog) and as published in VCU Rules and Procedures.

Requests for any other changes to an academic history must be submitted in writing by students to their graduate program directors no later than 14 calendar days after the beginning of the following semester (for the fall semester, 14 calendar days after the beginning of the spring semester; for the spring or summer semester, 14 calendar days after the beginning of the fall semester).

Graduate students, program directors and academic school deans/designees are required to conduct a final review of all academic histories as part of the application-to-graduate check-out process as articulated in this Bulletin (catalog) and on the Graduate School website. A student’s signature on the application to graduate is acknowledgement that the student has reviewed the academic history and that it is correct. Final approval signatures by graduate program directors and academic school deans/designees on the final application to graduate confirm that the student’s academic history is complete, correct and final and that no future requests for changes to the academic history will be considered once the student has been approved to graduate.

Revised 5/14/2013
University Graduate Council

**Grade review procedure**

If a student thinks that a grade is inaccurate, the situation should be discussed with the faculty member. This will allow the faculty member to explain how the final grade was determined and, if an error is detected, to submit a change of grade.

If the student still thinks that the grade was assigned unfairly, a written appeal should be submitted to the department chair. Upon receipt of the written appeal, the department chair shall provide the student with a copy and explanation of the Grade Review Procedure (published in the VCU Insider, available at students.vcu.edu (http://www.students.vcu.edu)), and shall ensure that the requirements of the Grade Review Procedure are followed.

If the department chair is unable to resolve the complaint, then the dean of the school in which the course was offered will form a grade review committee as described in the Grade Review Procedure policy and will submit its decision to the dean of the school. The decision communicated by the dean of the school in which the program resides is the final decision that will be distributed to the student, faculty member(s) and department chair.

In cases concerning grades awarded for the fall semester, the written appeal must be submitted to the department chair no later than 14 calendar days after the beginning of the following spring semester. In cases concerning grades awarded for the spring semester or summer sessions, the written appeal must be submitted no later than 14 calendar days after the beginning of the following fall semester.

**Grading system**

Work quality is measured by the four-point grade system with the following equivalents:

<table>
<thead>
<tr>
<th>Grade symbol and meaning</th>
<th>Grade-point value per semester credit</th>
</tr>
</thead>
<tbody>
<tr>
<td>A</td>
<td>4.0</td>
</tr>
<tr>
<td>B</td>
<td>3.0</td>
</tr>
<tr>
<td>C</td>
<td>2.0</td>
</tr>
<tr>
<td>D</td>
<td>1.0</td>
</tr>
</tbody>
</table>

Revised 5/14/2013
University Graduate Council

**Transcripts**

Official transcripts of students’ academic records will be issued only by the Office of Records and Registration upon written request of the students.

**Repeated courses**

Graduate students receiving grades below B shall repeat a course only upon the advice of their program directors. Both the original grade and the repeat grade shall be included in the calculation of the graduate GPA.

For undergraduate students repeating 500-level graduate courses, the undergraduate historical repeat policy applies only if the course is applied toward the undergraduate degree. A historical repeat may not be processed for 600-level courses. (See policy on undergraduate students in graduate classes.)

Revised 5/14/2013
University Graduate Council

**Exceptions.**
Specifically, students may not present courses receiving less than C for fulfilling degree requirements.

Refer to the grading explanations below for the use of the grades of "satisfactory" and "unsatisfactory" in relation to thesis/dissertation classes.

The number of grade points earned is computed by multiplying the grade-point value for the letter grade by the number of semester credits for the course. As an example, a student receiving an A (i.e., four grade points) in a three-credit course receives 12 grade points.

The grades of accepted transfer courses are not included in the computation of the VCU GPA.

Graduate-level credit is not granted for any type of military service or career or life experience unless it involves course work taken as part of an approved graduate program at a regionally accredited college or university.

Graduate students are not designated as special honors graduates (i.e., cum laude, magna cum laude, summa cum laude) on transcripts or diplomas upon completion of their programs.

No degree credit for remedial work shall be awarded to graduate students. Graduate students advised to take any level course for remedial work should be notified in writing that the course credit shall not apply to the degrees they are pursuing. Other bodies may rule later, should students wish to apply the credit to some other degree.

Grade of audit (AU)

Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in courses, but do not receive academic credit upon completion of the courses. Students who register on an audit basis are subject to attendance regulations of that class and, unless otherwise specified at the discretion of the instructor, are subject to the same course requirements as other students in the class. Students who register on an audit basis may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar (http://www.pubinfo.vcu.edu/calendar/ac_fullViewAll.asp). Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of students’ semester load in terms of classification as full-time students. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships, or university graduate scholarships. Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration. The grade of AU is not included in the calculation of the GPA.

Revised 5/11/2010
University Graduate Council

Grade of continued (CO)
The grade of CO may be assigned as an interim grade for those courses that run over several grade reporting periods. The CO indicates that the course is not expected to be completed in a single semester and that students must reregister for the course. Upon completion of the course, a final grade will be assigned to the current semester, and the previous CO grade(s) will remain. This grade may be assigned only in courses approved for such grading. The grade of CO is not included in the calculation of the GPA.

Grade of incomplete (I)
If, because of circumstances beyond his or her control, a student is unable to meet all the requirements of a course by the end of a semester, the mark of incomplete (I) may be given. The awarding of a mark of I requires an understanding between instructor and student as to when and how the course will be completed. This understanding must be recorded on an Incomplete Grade Assignment Form that is submitted instead of a final course grade. The maximum time limit for submission of all course work necessary for removal of an incomplete is the end of the last day of classes of the next semester following the semester in which the incomplete was incurred (i.e., an incomplete awarded in the fall semester must be converted by the last day of classes in the spring semester, and an incomplete awarded in the spring or summer session must be converted by the last day of classes in the fall semester). At that time, an unremoved grade of incomplete is changed automatically to a failing grade. Individual departments and schools may have more stringent time limits. An extension of the time limit is possible, but must be approved, prior to the expiration date stated above, by the instructor and the dean of the school through which the course is offered. Written approval indicating the new time limit must be filed with the dean of the Graduate School. The temporary grade of I is not included in the calculation of the GPA.

Revised 5/11/2010
University Graduate Council

Grade of pass (P)
This grade is awarded for certain courses to denote satisfactory completion of requirements. The grade of P is not included in the calculation of the GPA.

Grade of progress (PR)
The mark of PR may be assigned only in courses approved for such grading. Unlike the mark of I, PR will not automatically be changed to a failing grade at the end of the succeeding semester. The grade of PR is not included in the calculation of the GPA.

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in thesis and dissertation courses
All thesis and dissertation credits are to be graded each semester as satisfactory (S), unsatisfactory (U) or fail (F). There is no limit to the number of these credits a student may take while pursuing completion of the degree. Receipt of the grade of U is formal notification to the student of unsatisfactory progress. A student who receives a final grade of F in the thesis or dissertation will be terminated from the graduate program. A grade of S or U is not included in the calculation of the GPA. A grade of incomplete (I) may not be assigned for a course approved for satisfactory, unsatisfactory or fail grading. A grade of U is a permanent
grade. Future satisfactory performance is reflected in the assignment of the grade of S in subsequent semesters.

Grade of withdrawal (W)
The grade of W indicates that the student has officially withdrawn from a course or has been administratively withdrawn for nonattendance. No student who has officially withdrawn from a course or who has been administratively withdrawn for nonattendance may attend subsequent meetings of the course. Students may reregister for courses from which they have withdrawn through the normal registration process. A grade of W is not included in the calculation of the GPA. The number of hours recorded for courses from which a student withdraws is not included in the calculation of the “20% C or below” statistic. Withdrawals are, however, included in the Satisfactory Academic Progress evaluation conducted by the Financial Aid Office.

Revised 5/8/2012
University Graduate Council

Note: Difference between drop and withdrawal
A student may drop a class during the add/drop registration period only. When a class is dropped, the registration and associated tuition/fee charges are cancelled. Drop charges are removed to indicate that the student never attended the class or never attended the class beyond the add/drop registration period.

A student may withdraw from a class up to the withdrawal deadline as published in the University academic calendar at vcu.edu/academiccalendars (http://www.vcu.edu/academiccalendars). Withdrawal from a course does not cancel the registration or the associated tuition/fee charges, and results in the assignment of the grade of W. Refunds, if applicable, are issued in accordance with procedures described in the refunds section of the “Graduate tuition and student fees” section of this bulletin.

In both situations, any financial aid already disbursed to the student’s account based on the original course registration will be assessed and adjusted according to the University Refund Policy and may result in a balance due to the university.

Revised 5/11/2010
University Graduate Council

General course information

Credit hour
A credit hour is defined as a reasonable approximation of not less than one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately 15 weeks, or the equivalent amount of work over a different amount of time. Credit is based on at least an equivalent amount of work for other academic activities including laboratory work, internships, practice, studio work and other academic work leading to the award of credit hours and is established by individual programs. This definition represents the minimum standard. Student time commitment per credit hour may be higher in individual programs.

Approved 5/13/2013
University Graduate Council

Course numbering

All schools and programs within VCU use the following course numbering system. All course numbers consist of three digits (XXX). The first digit relates to the course level as follows:

0XX noncredit courses
Courses offered for students to make up deficiencies in previous training or to improve certain basic skills.

1XX and 2XX undergraduate, lower level
Courses with these numbers are offered primarily for undergraduate students and may not be used for graduate credit, although graduate students may be required to register for courses at this level to gain a necessary foundation for other course work.

3XX and 4XX undergraduate, upper level
Courses offered for advanced undergraduates and usually constitute the major portion of specific program work leading to the baccalaureate degree. On occasion, graduate students will be advised by their graduate advisers to enroll in prerequisite 4XX courses. Graduate programs can require that 400-level courses be taken, but credit hours in these courses cannot count toward the graduate degree or in the graduate GPA (effective fall 2004).

5XX introductory graduate courses
Graduate students enroll for credit in these courses through the normal graduate advising system. Departments may limit the number of 500-level courses applicable to a graduate degree program. Advanced undergraduates may enroll in these courses for credit with consent of the offering department. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

5XX professional graduate courses
First year, first professional (medicine, dentistry, pharmacy and physical therapy) courses normally open to students enrolled in the M.D., D.D.S., Pharm.D. and D.P.T. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

6XX, 7XX and 8XX graduate courses
Graduate students enroll for credit in these courses through the normal graduate advising system. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

6XX and 7XX professional graduate courses
6XX Second year, first professional (medicine, dentistry, pharmacy and physical therapy [second and third year]) courses normally open only to students enrolled in the M.D., D.D.S., Pharm.D. and D.P.T. programs. Certain courses of this group may be designated by the department and approved by the Graduate Council for graduate credit.

7XX Third and fourth year, first professional (medicine, dentistry and pharmacy) courses normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the Graduate Council for graduate credit.
Course interpretation
A single number listing for a course, such as MGMT 655, indicates that it is a one-semester course and may be offered each semester or only one semester each year.

Courses listed with a double number, such as THEA 603, THEA 604 and designated as semester courses, consist of two one-semester courses, either semester of which may be taken without the other.

Courses listed with a double number, such as APPM 575-APPM 576, are designated as continuous courses and consist of two one-semester courses, the first of which can be taken without the second, but the second of which cannot be taken without the successful completion of the first.

The university reserves the right to withdraw any course or program.

Off-campus graduate instruction
VCU is dedicated to serving the needs of Virginians by providing off-campus graduate credit instruction when and where it is needed. Courses are offered in response to an expression of need from various locales and groups.

Off-campus instruction features the same course work available on campus, and most off-campus courses are fully degree-applicable within the admission standards of the Graduate School. The official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin website and on the Graduate School website, are fully applicable to all off-campus graduate programs and graduate students.

Tuition for most off-campus classes is the same as other university classes; however, students in off-campus credit classes are not charged university or activity fees.

For additional information on off-campus credit instruction, contact Edward Howard, director of continuing studies, Division of Community Engagement, 920 W. Franklin St., Richmond, VA 23284-3062, telephone (804) 828-8819, or visit the Division of Community Engagement website at www.community.vcu.edu.

Undergraduate students in graduate classes
VCU undergraduates may enroll in 500-level courses with approval of their advisers and consent of the programs offering the courses. Highly qualified undergraduates approaching the last year of study may petition to enroll in a maximum of two 600-level graduate courses during the senior year of undergraduate study. Permission to enroll as an undergraduate in 600-level graduate courses must be obtained from the undergraduate academic adviser and the Graduate School. The total load must not exceed 16 hours of combined credit. Credit for any course is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

Undergraduate students seeking permission to enroll in 600-level courses must have a minimum undergraduate overall and major grade point average of 3.0.

For undergraduate students repeating 500-level graduate courses, the undergraduate historical repeat policy (http://bulletin.vcu.edu/undergraduate/undergraduate-study/academic-regulations-general-degree-requirements/grading-marking-system) applies only if the course is applied toward the undergraduate degree. A historical repeat may not be processed for 600-level courses.

Revised 5/11/2010; 5/14/2013
University Graduate Council

Accelerated bachelor’s-to-master’s programs
VCU offers a number of accelerated bachelor’s-to-master’s degree programs in which highly-qualified undergraduate students can earn both degrees in a minimum of five years by taking approved graduate-level courses during the senior year of their undergraduate programs. Accelerated bachelor’s-to-master’s degree programs must be approved by both the University Undergraduate Curriculum Committee and the University Graduate Council. Program descriptions for all accelerated programs are included in the archived bulletin and are also accessible by using the program search function of the online bulletin website.

Undergraduates who are interested and qualified for admission to accelerated programs must apply for admission to graduate study and be accepted before they begin the equivalent of the senior year of undergraduate study. Once accepted, they may enroll in the shared graduate course work identified in the approved curriculum (or in the student’s plan of study that must be approved at the time of admission). Graduate 600-level course work that has not been identified as part of the shared course work should not be taken until the shared graduate course work has been completed and the student’s status has changed from undergraduate to graduate. No 600-level graduate course work may be taken before the senior year. No undergraduate course work may be counted toward the master’s degree.

Students in accelerated bachelor’s-to-master’s programs who receive grades of C or below in the shared graduate course work identified in the approved curriculum (or the student’s plan of study approved at the time of admission) must be reviewed for possible termination from the accelerated program as well as the graduate degree program, if applicable. If allowed to continue in the accelerated program, the grades received in these courses will be counted toward both the undergraduate and graduate degree programs and in the calculation of both the undergraduate and graduate grade-point averages. Substitutions for any of the shared graduate course work must be approved by the undergraduate and graduate advisers before the last day of add/drop registration of the semester in which the student wishes to take the substituted course(s).
The faculty and staff of the College of Humanities and Sciences are dedicated to excellence in teaching, research and public service. The mission of Virginia Commonwealth University provides the framework for this pursuit of excellence.

Teaching and learning are central to the college, and the college is central to educational and intellectual life at VCU. The college meets the educational needs of a diverse student body, provides general education for all undergraduate students of the university, preparatory programs for the health sciences, engineering and law, and educates future teachers in the liberal arts and sciences. The college offers comprehensive undergraduate, graduate and professional programs of study that link a foundation of understanding and knowledge with skills on which students can build careers, become responsible citizens and continue lifelong learning.

Scholarship, creative work and professional accomplishment are essential to teaching and learning. The college is responsible for advancing understanding and increasing knowledge for its own sake, for the educational benefit of its students, and for the good of the larger community.

In both teaching and research, the College of Humanities and Sciences seriously upholds the responsibilities of being part of a public, metropolitan university. Through service and public teaching, the college meets the challenges and opportunities afforded by VCU’s urban environment and by its location in the capital of the commonwealth.

The college achieves national and international recognition through the success of its students, the advancement of the disciplines and professions represented by its programs, and through the individual and collaborative research of its faculty.

Professor and interim executive associate dean

**History**

The College of Humanities and Sciences was organized in 1966 (then the School of Arts and Sciences) as a combination of several existing departments at Richmond Professional Institute: Biology, Chemistry, English, Foreign Languages, and History and Political Science. The departments of Philosophy and Religious Studies, Mathematical Sciences, Physics, Psychology, Sociology and Anthropology, and Political Science were developed or added subsequently.

Arts and Sciences began its first graduate programs in 1969 with master’s programs in psychology and sociology. Master’s programs in biology and mathematical sciences and a doctoral program in clinical psychology were soon to follow in 1971. In 1974, English/English education began a master’s program offered cooperatively by the Department of English and the Division of Teacher Education of the School of Education. In that same year the graduate program in chemistry, a cooperative venture between the departments of Chemistry on the Monroe Park Campus and Pharmaceutical Chemistry on the MCV Campus, was transferred administratively to the School of Arts and Sciences. Beginning in 1976, a master’s degree was created in mass communications, while in 1978, a doctoral program in social policy and social work started in cooperation between the Department of Sociology and Anthropology and the School of Social Work.

In July 1981, the School of Arts and Sciences and the Department of Mass Communications were organized into the College of Humanities and Sciences and the School of Mass Communications. The Master of Fine Arts in Creative Writing commenced in 1983 followed by the M.S. in Physics in 1984. Three years later, the Department of Mathematical Sciences established the M.S. in Computer Science program, and finally, a master’s degree in history was initiated in 1994 through the Department of History.

Effective July 1, 1994, the departments of Criminal Justice, Public Administration and Urban Studies joined the college from the dissolved School of Community and Public Affairs. Each department brought to the college both master’s and post-baccalaureate certificate programs within their disciplines. The Public Administration program was merged with the Political Science program to form the Department of Political Science and Public Administration. The Ph.D. in Public Administration program was initially incorporated into the newly merged department and now resides in the Center for Public Policy.

**Accreditation**

**Chemistry (bachelor’s degree)**

**Psychology (doctoral degrees: clinical, counseling)**

American Psychological Association
Graduate information

Graduate programs
The College of Humanities and Sciences offers the following graduate degree programs:

Biology, M.S.
Chemical Biology, Ph.D.
Chemistry, M.S. and Ph.D.
Clinical Psychology, Ph.D.
Counseling Psychology, Ph.D.
Creative Writing, M.F.A.
English, M.A.
Forensic Science, M.S.
Health and Movement Science, M.S.
Health Psychology, Ph.D.
History, M.A.
Integrative Life Sciences, Ph.D.
Interdisciplinary Studies, M.I.S.
Mass Communications, M.S. (through the Robertson School of Media and Culture)
Mathematical Sciences, M.S.
Media, Art, and Text, Ph.D.
Nanoscience and Nanotechnology, Ph.D.
Physics and Applied Physics, M.S.
Psychology, M.S. and Ph.D.
Rehabilitation and Movement Science, Ph.D.
Sociology, M.S.
Systems Modeling and Analysis, Ph.D.

Post-baccalaureate certificates
Applied Social Research (graduate)
Gender, Sexuality and Women’s Studies (graduate)

In addition to these degree programs, the College of Humanities and Sciences offers selected graduate courses in the Department of Philosophy and the School of World Studies (foreign languages and religious studies), but does not offer graduate degree programs in these areas.

Graduate admission requirements
In addition to the general requirements for admission to graduate studies as stated in the Graduate Studies at VCU chapter of this bulletin, persons seeking admission to any of the graduate programs in humanities and sciences should:

- Have a bachelor’s degree in the discipline in which application for graduate study is made or, in some programs as noted, a bachelor’s degree in some other appropriate area.
- Submit Graduate Record Examination scores (some departments require the scores on the advanced GRE within the discipline; some departments accept LSAT and MAT scores in lieu of GREs).
- Have submitted letters of recommendation that comment on the applicant’s ability to undertake graduate study in the specified area.

All applications will be considered in terms of the specific requirements for admission noted in the description of the individual programs and of the applicant’s ability to perform satisfactorily in the program for which he/she has applied. The judgment of that ability will be based on the supporting material submitted with the application. Some graduate programs must limit enrollment to a fixed number of the best-qualified applicants. Final action on admission is taken by the dean of the Graduate School in consultation with the College of Humanities and Sciences and the program concerned.

Applicants whose applications reach the university after July 1 for the fall semester and after Nov. 15 for the spring semester may not have their applications processed in time for registration. The applicant whose application arrives late may be considered for admission as a special student, but there is no guarantee that the special student later will be accepted into a degree program. Refer to the programs section of the Graduate School website for specific deadlines for all graduate programs.

Graduate registration
Although most students register for the first semester, which begins in August, they may arrange to begin graduate work during the spring semester with the exception of the programs in clinical and counseling psychology.

Scholarships, assistantships, fellowships and other financial assistance for graduate students
The College of Humanities and Sciences seeks to attract and support graduate students of the highest caliber and to prepare them, through research and instruction, to meet local and national needs for highly trained men and women. Recognizing that financial limitations may inhibit some qualified students from applying, the college attempts to inform students of the options of various loans, grants and work-study opportunities that are available to them as well as assist them in financing their education by offering various forms of financial aid and facilitating the process of seeking financial assistance from external sources. Additionally, the college believes that the experience of being a teaching or research assistant reinforces the learning that takes place in the classroom. The value of teaching assistants also is recognized as being beneficial to the college’s undergraduate programs.

Types of financial aid that are available to graduate students fall into three basic categories: aid that does not have to be repaid (grants, scholarships and tuition waivers), aid that does have to be repaid (loans) and aid that enables students to earn a portion of their school costs (work-study, graduate teaching assistantships and graduate research assistantships).

Offers of financial aid are based on financial need and/or skill and competency. Financial need is determined by information contained in the Federal Application for Student Aid (FAFSA) completed by the student. Not all financial aid is based on financial need. To ascertain your eligibility for the different types of financial aid, contact:

VCU Office of Financial Aid
901 W. Franklin St.
P.O. Box 843026
Richmond, VA 23284-3026
(804) 828-6669
and the department to which you will be applying.

The university library has reference books listing other types of scholarships and grants. International students should contact:

Global Education Office
916 W. Franklin St.
P.O. Box 843043
Richmond, VA 23284-3043
(804) 828-6016
Graduate teaching assistantships and graduate research assistantships are forms of financial aid that provide teaching and research positions for graduate students within their field of study. These are not loans and do not have to be repaid because the student is actually earning income for services rendered. Usually graduate assistants must work the equivalent of 20 hours per week. Assistantships are awarded to students who have demonstrated academic excellence. Individual departments award the assistantships, which usually include payment of tuition; the teaching and/or research duties of graduate assistants vary among departments. Graduate students interested in seeking these teaching and research positions are advised to contact the departments to which they will apply for admission.

Graduate students applying for financial assistance should remember the following tips:

• Apply early.
• Use federal tax forms to complete the FAFSA.
• Save copies of all forms completed, including tax returns.
• Check with the specific department for application requirements and deadlines.

Students should assume they are eligible, not ineligible.

The student adviser and the graduate committee

All departments offering graduate degrees in the College of Humanities and Sciences provide graduate students with advising either through a single adviser, the student’s graduate committee or a departmental graduate committee. For details, students should consult the departmental director of graduate studies or the department chair.

Graduate degree requirements

• Full-time graduate status shall consist of a minimum of nine and a maximum of 15 credits per semester. No more than 12 semester credits may be earned in a summer session. See the Graduate Studies at VCU chapter of this bulletin for course load requirements for students awarded graduate assistantships.
• Graduate students are required to maintain an overall GPA of 3.0 (B). Students who do not maintain a B average during the course of their program may be dropped from the program at any time on recommendation of the appropriate department committee to the dean of the Graduate School. If students earn less than a B on 20 percent or more of all attempted credits, their graduate status must be reviewed for continuation by the appropriate department committee.
• At least half of the credits required in the student’s program must be those designated as exclusively for graduate students; that is, those at the 600 level or above.
• Graduate students must have earned an overall GPA of 3.0 (B) in order to receive a degree.

In addition to these requirements and those set forth in the Graduate Studies at VCU chapter of this bulletin, students must meet the requirements for specific degrees set forth in the departmental listings. Students also should consult the Continuous Enrollment Policy stated in the Graduate Studies at VCU section of this bulletin.

VCU requires registration for a defined credit-hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree requiring a thesis or dissertation within the present enrollment framework, the accumulation of 80 credit hours for a master’s degree and 180 credit hours for a doctoral degree can be taken to be reasonable credit maxima. Unless stated otherwise, these figures apply only to programs offered by the College of Humanities and Sciences.

Students are required to submit in advance of the date when they expect to receive a degree a Graduation Application Form to the dean of the College of Humanities and Sciences. Deadlines for the submission of the Graduation Application Form are listed in the academic calendars online at academiccalendars.vcu.edu (http://academiccalendars.vcu.edu); for departmental deadlines the student should consult the departmental adviser. Individual departments may require additional forms.

Appeal procedures

Graduate students in the College of Humanities and Sciences have the right to appeal course grades or other academic actions on the grounds of a breach of due process. See the Graduate Studies at VCU section of this bulletin for a summary of the Grade Review Procedure. An appeal of an academic action other than a grade review is governed by the Graduate Student Academic Appeal Procedure. A copy of this document can be obtained from department offices.

Professor and director of graduate studies

Natasha Long
Coordinator of student services

The Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The school offers a Bachelor of Science in Mass Communications with specialization in one of three sequences: advertising, journalism and public relations. The school also awards the Master of Science in Mass
Communications, with concentrations in the areas of integrated PR and advertising, multimedia journalism, and strategic public relations.

**Graduate information**

**Admission requirements for graduate study**

All areas are open to graduates of accredited colleges and universities. Applicants must satisfy the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences (see the College of Humanities and Sciences guidelines in this bulletin). In addition, they should hold a baccalaureate degree in an area appropriate to the program to which they are applying and a GPA that indicates the ability to pursue graduate work. Although the type of undergraduate degree is not critical to admission, the programs require approved undergraduate curricula or the equivalent in order to grant full admission.

- Mass Communications, Master of Science (M.S.) with a concentration in
  - Integrated public relations and advertising with Fudan University [dual degree] (p. 48)
  - Multimedia journalism (p. 49)
  - Strategic public relations (p. 51)
- Media, Art, and Text, Doctor of Philosophy (Ph.D.) (p. 53)

**Mass Communications, Master of Science (M.S.) with a concentration in integrated public relations and advertising with Fudan University [dual degree]**

**Program goals**

The Richard T. Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The M.S. in Mass Communications with a concentration in integrated public relations and advertising is offered in collaboration with Fudan University in Shanghai, one of VCU’s 16 recognized international partners, and VCU's Richard T. Robertson School of Media and Culture. It is designed to educate Chinese students for the practice, in China, of professional public relations and/or advertising. Because in many agencies and organizations public relations and advertising are integrated, we are integrating the two professional disciplines in one degree program. The program is for Chinese students who have undergraduate degrees from a Chinese institution and who are already working or aspire to work in China for a public relations or advertising agency or an agency that combines the two persuasive communication disciplines. It is also open to students in the U.S. with the same undergraduate education and a desire to work in an internationally active public relations or advertising agency that does business in Asia/China.

The program will prepare its students to function at a higher professional level than they can attain with their current academic and professional credentials.

**Student learning outcomes**

1. Demonstrate higher-level skills of the public relations management function, including strategy development and critical thinking
2. Communicate clearly and effectively in written and spoken forms appropriate for strategic public relations practice, audiences and the purposes they serve
3. Demonstrate ability to conduct research and evaluation to support strategic public relations decision-making
4. Effectively apply tools and technologies appropriate to managing the process for strategic public relations

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research phase, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
The mass communications graduate handbook is available on the Robertson School website at robertson.vcu.edu/about/advising/handbooks-and-worksheets (http://robertson.vcu.edu/about/advising/handbooks-and-worksheets).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Pass the entrance examination for postgraduate studies in the School of Journalism at Fudan University
2. Attain a qualified English proficiency level (i.e., greater than 600 for TOEFL or equivalent for iBT test)
3. Attain a GRE general test level of more than 1050 with no less than 500 for verbal (or equivalent for revised GRE)

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

The dual degree program generally takes three academic years. The first three semesters are typically completed at Fudan. Students will continue their studies in VCU's Richard T. Robertson School of Media and Culture for three semesters (second semester and summer of the second academic year and fall semester of the third academic year). Students return to Fudan for the final semester.

1. Credit hour requirements: This degree requires a minimum of 31 credit hours beyond the baccalaureate, of which 18 credit hours are from VCU and 13 credit hours — preparatory foundation courses and thesis supervision — are taken at Fudan University's School of Journalism. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. Upon completion of all requirements, students in this dual master's degree program will receive both the M.S. in Mass Communications from VCU and the Master of Literature from Fudan University.
2. Other requirements: All students are required to demonstrate proficiency in a suite of software programs commonly used by public relations and advertising practitioners before enrolling in their first VCU course.

Mass Communications, Master of Science (M.S.) with a concentration in multimedia journalism

Program goals
The Richard T. Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The M.S. in Mass Communications with a concentration in multimedia journalism is designed to prepare students to work in a highly competitive and multiple-platform (print, broadcast, online/digital)
news environment. The program is for recent graduates who have an undergraduate degree in journalism or a related field, or for more veteran journalists who want to upgrade their professional skills.

Student learning outcomes
1. Demonstrate higher-level skills in concept building with a focus on critical thinking, and in the design of journalism news stories and packages with a multimedia focus
2. Communicate clearly and effectively in written and multimedia platforms to serve news audiences
3. Demonstrate the ability to conduct basic research that is applicable to journalism and multimedia
4. Effectively apply tools and technologies to multimedia news stories and packages as appropriate for the news industry and other communication workplaces

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Jul 1</td>
<td>GRE - General</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Nov 1</td>
<td></td>
</tr>
</tbody>
</table>

Admission note: The school may admit other student candidates who submit materials beyond the review deadlines, depending on available space.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:
1. An undergraduate degree in journalism or a related field or several years of professional journalism experience
2. An undergraduate GPA that exceeds 2.7 overall
3. A GRE (general test) score that indicates the ability to pursue graduate work
4. A detailed CV showing work experience in journalism or appropriate educational credentials
5. Three recommendations from persons who are qualified to give information concerning the applicant’s ability for the specific program of study proposed
6. A personal statement detailing specific journalism career goals
7. A portfolio of work in journalism

Students who have not completed baccalaureate course work in journalism or who have not had the appropriate professional experience may be required to take undergraduate courses as a foundation. These do not count toward the graduate degree.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: This degree requires 36 credit hours beyond the baccalaureate, 30 of which are in the journalism discipline. Students take an additional six credit hours in a collateral area outside of mass communications. Students in this program learn the theory and practice of journalism in an immersion news environment and can further specialize through graduate electives, projects and stories in any number of “beat” areas. For example, students can focus on coverage of health or the environment or
concentrate on learning about international media coverage. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other: The program is designed so that students will take three courses each semester (fall and spring). During each semester, two of the courses will be offered in the evenings and one will be offered online. Thus, students will be able to complete the course work over two years of study.

Mass Communications, Master of Science (M.S.) with a concentration in strategic public relations

Program goals

The Richard T. Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The M.S. in Mass Communications with a concentration in strategic public relations trains a new generation of communications professionals who are able to function in high-level management positions and apply sophisticated strategic thinking to accomplish organizational objectives.

Student learning outcomes

1. Demonstrate higher-level skills of the public relations management function, including strategy development and critical thinking
2. Communicate clearly and effectively in written and spoken forms appropriate for strategic public relations practice, audiences and the purposes they serve
3. Demonstrate ability to conduct research and evaluation to support strategic public relations decision-making
4. Effectively apply tools and technologies appropriate to managing the process for strategic public relations

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree
candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Note: The school may admit other student candidates who submit materials beyond the review deadlines, depending on available space.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. A current resume
2. Portfolio material from undergraduate and/or graduate course work and/or professional experience
3. An academic background in public relations (university or professional accreditation program) and appropriate public relations experience

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: This degree requires 30 credit hours beyond the baccalaureate, including six hours of approved elective courses in areas such as nonprofit management and marketing. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other: Students take weekend classes (Friday evenings and all day Saturday) as a cohort over four semesters. Continued full-time public relations employment is encouraged during the program. In addition, one of the program’s unique features is a two-week study abroad experience, an expectation of students while they are enrolled in the MASC 683 Strategic PR in a Global Environment. The study tour is led by a full-time faculty member. The cost of the study abroad program is not included in the program’s tuition.

Graduate program director
June O. Nicholson
Professor and director of graduate studies, Richard T. Robertson School of Media and Culture
jnichols@vcu.edu
(804) 257-0251

Program website: robertson.vcu.edu (http://www.Robertson.vcu.edu)
Media, Art, and Text, Doctor of Philosophy (Ph.D.)

Program goal

VCU's interdisciplinary doctoral program in media, art, and text is a joint endeavor of the Department of English, the School of the Arts and the Richard T. Robertson School of Media and Culture. The program prepares students primarily to teach at the college or university level, although some pursue careers in related media fields. MATX emphasizes the historical and theoretical foundations essential to the scholarly study of media, both old and new, broadly defined. It provides an intellectually stimulating environment that encourages students to work both collaboratively and independently, as well as across and between disciplines and media. Students maintain a base in their primary area of research, which is usually but not always the field in which they have done prior graduate work.

Student learning outcomes

1. Develop advanced communication skills in writing, speaking and the use of multimedia
2. Demonstrate broad knowledge of history and theory as the foundation for interdisciplinary work in a specialized facet of media, art, and/or text
3. Develop competence in interdisciplinary and disciplinary research methods and responsible conduct of research
4. Develop specialized knowledge in relevant fields to support dissertation and subsequent research
5. Demonstrate the ability to conduct independent research and produce new, specialized knowledge within the broad parameters of media, art, and text
6. Develop a strong basis for ongoing professional practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published in the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must hold a master's degree (M.A., M.F.A., M.S.) in a relevant field.
2. Submit the following, in the formats indicated via VCU's online application portal:
   a. Writing sample demonstrating the ability to write clearly, analyze effectively and conduct original research in advanced doctoral-level seminars. This may be a master’s thesis, a graduate-level seminar paper or a published essay. Submit as a PDF.
   b. Statement of purpose describing the applicant’s interest, motivation and goals in pursuing this degree. The statement should specifically address the importance of interdisciplinarity to the applicant’s academic goals, and it should also offer evidence of preparation for the study of media, art, and text. The applicant should indicate the specific area of study and research to be pursued at VCU and identify faculty who might potentially direct dissertation research. Submit as a PDF.
   c. Academic curriculum vitae or professional resume listing all colleges and universities attended and degrees earned, all professional and academic positions held, all publications and/or exhibitions, technical skills, and any other relevant information.
Include URLs for personal and/or professional websites. Submit as PDF.

d. Letters of recommendation from three present or former instructors or other individuals qualified to evaluate the applicant’s ability to engage in interdisciplinary study at the doctoral level. Have recommenders submit their letters via the online application portal.

3. Applicants who wish to pursue creative work at VCU must also submit a portfolio. Those with an M.F.A. who do not wish to continue creative work should consult with the MATX director about this requirement. Materials submitted should demonstrate excellence in studio or professional practice and the potential to do graduate-level work in media, art, and text. Portfolios will be reviewed by the MATX admissions committee as well as relevant faculty in the School of the Arts and the Richard T. Robertson School of Media and Culture.

Please observe the following guidelines:
   a. Those working in 2-D or 3-D mediums should provide 20 images of representative work arranged chronologically, beginning with the most recent.
   b. Those working in sound and time-based media, as well as those in the performing arts, should provide clips totaling no more than 10 minutes.
   c. Those working across media may submit a combination of the above.
   d. The portfolio should include title, date, media and dimensions of each work, as well as a brief statement or other information that will help the admissions committee in its evaluation.

Small files illustrating 2-D or 3-D work should be submitted in a single PDF. Sound or video files should be posted to Vimeo or Sound Cloud with a functioning link submitted in a PDF with the required information posted to the portal. Portfolio materials may also be posted to a personal or professional website and the link submitted in a PDF posted to the portal.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the MATX program are required to earn a minimum of 42 graduate-level credit hours beyond the master’s. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. The 42-hour curriculum comprises 36 hours of course work and a minimum of six hours of dissertation research. Course work includes a core of four required courses taken during the first two semesters by all incoming students. Three doctoral seminars provide a shared historical and theoretical foundation for the study of media, art, and text, while a workshop offers the opportunity to develop and expand professional and/or creative skills relevant to the student’s career goals and research focus. In addition, all students will take a research methods course in a field relevant to their anticipated area of dissertation research. Beyond the core, students select 21 hours of elective credit hours from course offerings in disciplines relevant to their research interests and career goals. The program offers a topics seminar focused on the history, theory or practice of media, art, and text. Independent study and internships are also available as electives. While enrollment in courses with the MATX prefix is guaranteed to matriculated MATX students, enrollment in other graduate courses is subject to the conditions established by individual units. Together the core and the electives support the interdisciplinary work of the dissertation, which is an original scholarly examination of some aspect of media, art, and/or text. It may include work in media other than text. It is supervised by a committee consisting of four or five members drawn from disciplines relevant to the research topic.

2. Grade requirements: To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

3. Requirements for admission to candidacy: Before beginning formal dissertation research, students must complete all 36 hours of required course work, both stages of the e-portfolio and the requirements described below. Upon completion of these, the student will apply for degree candidacy.

4. Dissertation committee: The dissertation committee consists of the director (who must hold a Ph.D.) and three or four additional members whose scholarly knowledge and interests are relevant to the project. The committee must have at least one member from each of the sponsoring units (Department of English, School of the Arts, Richard T. Robertson School of Media and Culture). All must be members of VCU’s graduate faculty. Appropriate faculty from outside VCU may serve on committees (but not as director) with the approval of the MATX director and the graduate dean. It is the student’s responsibility to assemble the committee, in consultation with the dissertation director. Committees will not be appointed by the program.

5. E-portfolio: Work on the e-portfolio will begin in MATX 604 in the spring of the first year. There are no technical specifications, and content will include, but is not limited to, work done in the first two years in the program. It will take the form of a website and must demonstrate the technical skills (Web design, audio, video, etc.) relevant to the student’s work on the dissertation and the career sought after VCU. Submission is a two-stage process:
   a. Stage 1 (May of the first year): a three- to five-page design rationale for the portfolio site along with a mock-up or rough structure
   b. Stage 2 (April of the second year): a finished, live site accompanied by a five-page statement relating it to the student’s work inside and outside the program and outlining how it uses media techniques to promote a specific professional and/or creative identity (Note: Each submission is graded pass/fail and may be repeated once. A second failure results in automatic termination from the program.)

6. Competency: Candidates must demonstrate competency in a skill or technique relevant to the dissertation research or planned professional career. The dissertation committee approves and administers the competency portion. Graded pass/fail, the test may be repeated once.

7. Bibliography exam: Candidates will complete an exam on a reading list of 20 to 30 sources relevant to or supportive of the dissertation topic. The dissertation committee approves and administers the bibliography exam. Graded pass/fail, the test may be repeated once.

8. Dissertation prospectus and prospectus defense: The prospectus is a 15- to 20-page document that indicates the significance of the proposed research, gives a short review of relevant literature, states the research question, specifies the proposed methodology and indicates how the project lays the foundation for the anticipated academic or professional career. It also includes a work plan for the completion of research and writing, as well as a complete bibliography. The prospectus is defended orally before the
dissertation committee, which may accept, reject or require revisions. The defense may be repeated once.

9. Dissertation and dissertation defense: The dissertation is an original, interdisciplinary and scholarly examination of a topic relevant to an aspect of media, art, and/or text. It may include work in media other than text. Given the varied nature of doctoral research, there is no set time frame for completion of a dissertation. It is expected, however, that the dissertation will take about two years after attaining candidacy, but it must be defended within the eight-year time limit for completion of the doctoral degree. The dissertation will be defended orally before the dissertation committee. Successful defense of the dissertation completes the requirements for the degree.

The School of World Studies explores what it means to be human and prepares students to participate in the work of building a healthy world community. With training in the humanities, social sciences and...
natural sciences, our faculty complete research on the diversity and universality of human existence and creative expression, generating a rich intellectual understanding of the evolving and dynamic nature of human beings. We consider the development, composition and interaction of language, religion, art, film, literature, poetry and culture. We also consider the relationship between these forms of human life and matters of gender, nationality, race, social justice, human rights and the environment. Our students acquire interdisciplinary knowledge, cross-cultural communication skills and global perspectives on real-world issues, and they graduate from the School of World Studies with the ability to act and live well as global citizens.

Degree programs
The School of World Studies offers baccalaureate degrees in the following fields:

Anthropology – Bachelor of Science
Foreign Language – Bachelor of Arts
- French
- German
- Spanish

International Studies – Bachelor of Arts
Religious Studies – Bachelor of Arts

Minors are awarded in these areas:
African studies
Anthropology
Arabic and Middle Eastern studies
Asian and Chinese studies
Catholic studies
European studies
French
German
International social justice studies
Islamic studies
Italian studies
Judaic studies
Latin American studies
Mediterranean studies
Religious studies
Russian studies
Spanish
World cinema

Undergraduate certificates are awarded in these areas:
- International management studies (in conjunction with the School of Business)
- Spanish/English translation and interpretation

Information regarding curricula is provided on the respective program pages.

Languages
The School of World Studies offers students significant opportunities to broaden their knowledge of diverse cultures through language study, including:

Arabic
Biblical Hebrew
Chinese

French (major and minor)
German (major and minor)
Italian (Italian studies minor)
Latin
Russian (Russian studies minor)
Spanish (major and minor)

In cases where the appropriate level of instruction is unavailable, the School of World Studies Advising Office will assist the student in identifying language study options at other U.S. institutions or abroad.

Study abroad
Summer study-abroad programs provide students with opportunities for short-term immersion in the language, culture and civilization of the countries they visit. A list of current VCU study abroad opportunities can be found at global.vcu.edu/abroad (http://www.global.vcu.edu/abroad). VCU is a member of the International Student Exchange Program, which offers junior year abroad programs at one of 40 universities worldwide. For more information about study abroad visit the School of World Studies website at worldstudies.vcu.edu (http://www.worldstudies.vcu.edu).

Applied Social Research, Certificate in
(Post-baccalaureate graduate certificate)

Program goal
This certificate program is designed to enable practitioners to acquire additional knowledge and skills in applied social research without necessarily pursuing a graduate degree and provide marketable job/career skills for graduate degree-seeking students in sociology as well as other graduate programs. Because the certificate program involves a limited number of credit hours and coordinates with the type of statistics and methods courses offered in a number of graduate degree programs, it may be pursued simultaneously with other graduate programs such as sociology, social work, public administration, social policy and urban services. At the same time, individuals seeking more limited, specialized training may pursue the certificate independently.

Student learning outcomes
1. To enable practitioners to acquire additional knowledge and skills in applied social research
2. To provide marketable job/career skills for graduate degree-seeking students in sociology as well as other graduate programs

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu) and academic regulations in individual school and department publications and on program
websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

Note: Students may not be able to enroll full time or complete the certificate in one year given the limits on course scheduling.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Students possessing a B.A. or B.S. degree and beginning level skills in statistics/research methods are eligible for admission into the certificate program.
2. Relevant course or research experience will be considered in evaluating admission and substitution of courses. Equivalency tests are available for required courses in statistics and methods.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students in the applied social research certificate program are required to earn a minimum of 18 graduate-level credit hours beyond the baccalaureate.
2. Grade requirements: An overall GPA of 3.0 is required for award of the certificate, and no more than three credit hours of C may be earned in the certificate program curriculum.

Interdisciplinary Studies, Master of (M.I.S.) with a concentration in cinema and language with the University of Cordoba in Spain and the University of Messina in Italy
Program goals
The cinema and language concentration in the M.I.S. broadens education and career options and is designed to help develop the crucial analytical and communication skills, knowledge base and international experiences needed to pursue a career in the global marketplace.

Student learning outcomes
1. Students will demonstrate competencies to analyze cinema, as well as other visual media, as a means of cultural and artistic expression, as an audiovisual language and as a frame for complex cultural dynamics.
2. Students will be able to analyze film and other visual media (e.g. Internet in general, social media, documentary films, etc.) from different cultures, drawing on a general frame of intercultural communication.
3. Students will achieve fluency in English, Spanish and Italian, especially in their professional field.
4. Students will prepare for international careers through engaged learning and transatlantic team-building experiences with internships in cultural events such as the Taormina Film Festival, the French Film Festival and the Filmitoteca de Andalusia.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Special requirements
- It is the student’s responsibility to obtain the visas necessary to study in Europe and the United States. However, students accepted in the cinema and language concentration will receive assistance with visa applications.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. For admission, domestic applicants must submit evidence of knowledge of Italian or Spanish at the “intermediate high” level according to American Council on the Teaching of Foreign Languages guidelines. Domestic students must submit evidence of knowledge of the second language at the “intermediate high” level according to ACTFL guidelines before beginning classes in Europe. Before departure for their first semester abroad (the fall semester at Cordoba begins on Oct. 15), domestic students must function on the following minimum level:
   a. Italian: PLIDA (Progetto Lingua Italiana Dante Alighieri) or equivalent, B1 or similar level. The B1 level indicates the capacity to understand spoken and written texts on familiar topics and to interact in the language to express opinions and explanations in an elementary way.
   b. Spanish: DELE or equivalent, intermediate-mid/threshold level B1 or similar level. The “Certificado Inicial de Español” proves candidates have sufficient knowledge of the language to handle situations which require an elementary use of the language.

2. The achievement of superior language proficiency in their field is one of the most important aims of this concentration. VCU students’ proficiency in Spanish and Italian will be assessed by School of World Studies’ foreign language faculty according to the guidelines of the ACTFL. (The proficiency guidelines (http://www.actfl.org/publications/guidelines-and-manuals/actfl-proficiency-guidelines-2012) are available on the ACTFL website.)
3. For admission, European students must submit transcripts showing that they have received satisfactory grades during their undergraduate studies (minimum GPA of 3.0) and in their first year of graduate study (with no grade lower than C). Students must also pass the TOEFL or the ELP administered by VCU (IBT score of 100; CBT score of 600; or IELTS academic band score of 6.5) and submit a satisfactory GRE score before beginning classes at VCU.

4. Upon review of the application and all supporting documentation, the transatlantic curriculum in cinema and language program coordinator will contact applicants and provide further information.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: The cinema and language concentration requires 44 credits (semester hours) of course work, with 20 credits taken at the University of Cordoba in Spain and the University of Messina in Italy and 24 hours taken at VCU. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. Each fall, cohorts of VCU and European students (from University of Messina and University of Cordoba) begin a two-year (four-semester) graduate program. Typically, European students spend the first semester of their first year at the University of Cordoba, second semester at the University of Messina and remaining two semesters at VCU. Domestic students spend their first and second semesters at VCU, third semester at the University of Cordoba and fourth semester at the University of Messina.

2. Other requirements: The final requirement of the program is completion of a directed research project, during which the student is registered for GRAD 697. This is a capstone project culminating in a synthesis of the academic course work and internship experiences as outlined in the student's curriculum plan. Before registration for GRAD 697, a student must have submitted a final project proposal, which has been approved by the concentration graduate program director and the M.I.S. graduate program director. The research project must be graded by a VCU graduate faculty member and a director and the M.I.S. graduate program director. The research project must be submitted and received approval for degree candidacy. Approval of degree candidacy must be obtained before a student can begin the final semester of study. Because of the sequencing of cinema and language course work, approval for the final project and degree candidacy may need to occur simultaneously.

3. Master's-level candidacy: After receiving approval to begin the final directed research project, a student must submit and receive approval for degree candidacy. Approval of degree candidacy must be obtained before a student can begin the final semester of study. Because of the sequencing of cinema and language course work, approval for the final project and degree candidacy may need to occur simultaneously.

**Total Hours** 44

1. Other graduate-level methods courses in the social sciences may be taken with prior permission.

**Total graduate credit hours required (minimum) 44**

**Graduate program director**

Angelina E. Overvold, Ph.D.

Associate director, School of World Studies

Email: aovervold@vcu.edu

Phone: (804) 827-3416

**Program website:** global.vcu.edu/transatlantic (http://global.vcu.edu/transatlantic)

**Interdisciplinary Studies, Master of (M.I.S.), with a concentration in interdisciplinary mathematics and science leadership/K-8 mathematics specialist**

**Program goals**

The interdisciplinary mathematics and science leadership concentration in the M.I.S. program is designed for in-service teachers of mathematics for kindergarten through eighth grades. In designing their individual programs, students, in conjunction with their advisers, may select courses offered by VCU mathematics, science and education departments and courses offered by other collaborating Virginia colleges and universities. The Graduate School, the College of Humanities and Sciences, the School of Education and the departments of Mathematics and Applied Mathematics and Teaching and Learning administer the program.

**Student learning outcomes**

1. Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.

2. Students will solve mathematical problems.

3. Students will use multiple representations to correctly describe mathematical ideas.

4. Students will study K-12 children’s work and use it to demonstrate knowledge of children's thinking.

5. Students will write mathematical proofs clearly, concisely and correctly.

6. Students will collaborate on projects.
7. Students will read and comprehend mathematical works and mathematics education works, including national and state standards.
8. Students will analyze and synthesize mathematics education literature.
9. Students will make effective written and oral presentations to demonstrate their understanding of mathematical ideas and mathematics education ideas.
10. Students will (a) analyze and develop rich mathematical tasks for children and adults, (b) study and implement models of mathematics coaching, (c) study and implement professional development models.
11. Students will study and implement models of formative and summative assessment.
12. Students will study and implement effective methods of communicating with teachers and administrators.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

Special requirements

- Upon review of the application and all supporting documentation, the mathematics/science leadership program coordinator will contact applicants to schedule interviews to develop programs of study that will detail specific courses to be taken and the institutions offering those courses.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. At least three years of successful K-8 mathematics and/or science teaching experience
2. Three recommendations: at least one from an immediate supervisor or principal and at least one that addresses leadership potential
3. Submission of satisfactory scores on either the GRE or MAT from a current test (fewer than five years old) (Provisional admission may be granted pending fulfillment of this requirement.)
4. A written statement of intent that provides evidence of at least three years of experience in teaching mathematics and/or science for kindergarten through eighth grades
5. Interview to develop program of study (Program director will contact student after initial review of application.)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the interdisciplinary mathematics and science leadership concentration are required to earn a minimum of 39 graduate-level credit hours beyond the baccalaureate. The discipline focus areas are required to be in mathematics and either the sciences or mathematics/science education. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: At least 18 of the 39 credits, including the final project, must be granted by VCU. Up to six transfer credits may be approved, and the remainder of the credits must be from consortium partners as approved by the students’ advisers, the VCU Graduate School and the Mathematics and Science Leadership Advisory
Committee. A maximum of six hours may be taken as a nondegree-seeking student before admission to the program.

3. The final project must be supervised by a VCU graduate faculty member, may be in mathematics, science or education and must include an indication of the relationship of the subject of the project to teaching at the kindergarten-through-eighth-grade level.

Total Hours 39

1 One three-credit course must be taken in the area of education.

**Total graduate credit hours required (minimum) 39**

**Graduate program director**
Aimee J. Ellington, Ph.D.
Director, M.I.S. interdisciplinary mathematics and science leadership program
Email: ajellington@vcu.edu
Phone: (804) 828-5521

**Program website:** math.vcu.edu/graduate-programs/education

**Sociology, Master of Science (M.S.)**

**Program goals**

The goal of the graduate program in sociology is to facilitate the development of theoretical, methodological and substantive competence appropriate for students’ interests and career goals. In keeping with VCU’s role as an urban institution, the program focuses on the study of urban social problems, policy alternatives and strategies for change.

**Student learning outcomes**

1. Students will demonstrate an understanding of the key concepts developed by classical and modern sociological theorists.
2. Students will demonstrate an ability to apply a detailed comprehension of diversity and of inequality to the analysis of social issues.

3. Students will demonstrate advanced knowledge of sociological concepts such as culture, roles, norms, social structure, social institution, socialization and stratification.
4. Students will demonstrate knowledge of methodological approaches and data analysis techniques in sociology.
5. Students will demonstrate the ability to use sociological theory in the critical analysis of sociological issues and research questions.
6. Students will demonstrate the ability to present clear, organized and coherent arguments in the analysis of sociological issues.
7. Students will demonstrate the ability to use methodological skills in the critical evaluation of existing sociological research and the discussion of alternative research methods.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

Note: A limited number of assistantships are available for qualified applicants. Applicants for assistantships should have their files complete by April 1. Individuals not applying for assistantships should file their applications for graduate study as early as possible to permit adequate review.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

Preference is given to students who have a substantial background in sociology, such as an undergraduate major or minor or 18 or more college-level credit hours in sociology. Students with an undergraduate or graduate degree in a closely related field will also receive consideration for admission.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the following requirements apply:

1. Credit hour requirements: Students in the M.S. in Sociology program are required to earn a minimum of 36 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Students are required to apply for either the thesis or applied sociology (non-thesis) option by the end of their second semester in the program. The thesis option is completed through on-campus courses, and the applied option may be completed through either on-campus or online courses. Degree requirements for the two options are shown below. Incoming students apply as either on-campus students (both options) or online students (applied option only). Incoming students choosing the online applied option must make that decision prior to beginning the program and continue as such until obtaining the degree. For the thesis option, a master’s thesis will be developed under the guidance of a thesis committee (three faculty members including a thesis adviser) and must be defended publicly.

Program website: sociology.vcu.edu (http://www.sociology.vcu.edu)

Sociology, Master of Science (M.S.), accelerated Bachelor of Science in Sociology (B.S.) to master's

The accelerated B.S. and M.S. program allows qualified students, with a major in sociology, to earn both degrees in a minimum of five years by completing approved graduate courses during the senior year of the undergraduate program. The program will provide students with the opportunity to expand and deepen their knowledge of sociology, enhance their credentials for the job market, and/or prepare for further professional education. Students in the program may count up to 12 hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 hours instead of the 156 required if the degrees are pursued separately.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

The program is restricted to students who have demonstrated a clear interest in sociology. Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours with an overall GPA of 3.0, and a minimum of nine credit hours in sociology with a GPA of 3.3. Prior to being formally considered for admittance and before enrolling in graduate courses, the student must complete the graduate school application, submit GRE general aptitude scores and supply supporting information required for admission. All persons admitted to the program must meet the graduate student standards of performance, e.g., maintain a 3.0 GPA, and satisfactorily complete all requirements for the degree.

The director of graduate studies will provide guidance to students in this program. Students who are interested in this program should consult with the director of graduate studies or the director of undergraduate studies before they have completed 90 credits. Both directors may be contacted for more information about admission procedures.

Requirements for the Bachelor of Science in Sociology include the completion of a minimum of 120 credits. Students in the accelerated program may take up to six graduate sociology credits in each of the final two semesters of their undergraduate course work. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements. A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree.

The B.S. degree will be awarded when the student has completed all requirements for the undergraduate degree, which may include the 12 graduate sociology credits. The graduate sociology courses that may be taken, once a student is admitted to the program, include:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>SOCY 502</td>
<td>Contemporary Sociological Theory</td>
<td>3</td>
</tr>

<td>SOCY 601</td>
<td>Sociological Research Methods</td>
<td>3</td>
</tr>
<tr>
<td>SOCY/STAT 608</td>
<td>Statistics for Social Research</td>
<td>3</td>
</tr>
</tbody>
</table>

Other SOCY graduate courses, with the approval of the director of graduate studies, may also be taken by students who meet the requirements for admittance to the program.

Such courses may serve as an elective requirement for the M.S. degree and an elective for the undergraduate major. All accelerated program students must have their schedules approved by the director of graduate studies prior to registration.

Department of African American Studies

Kimberly Nichelle Brown, Ph.D.
Associate professor and interim chair
afam.vcu.edu (http://www.afam.vcu.edu)

The Department of African American Studies at Virginia Commonwealth University provides an educationally rich environment in which students and scholars research, learn and teach about the past and present realities of people of African descent. Employing a wide range of theories, perspectives, methods and tools, African American Studies faculty explore social, political, economic and cultural realities and connections between the experiences of persons in Africa and throughout the African Diaspora. The department emphasizes experiential learning, offers study abroad opportunities and internships.

Department of Biology

Donald R. Young, Ph.D.
Professor and chair
biology.vcu.edu (http://biology.vcu.edu)

The Department of Biology offers programs leading to baccalaureate, master’s and doctoral degrees; the doctoral degree is offered through the Ph.D. in Integrative Life Sciences program. Students may specialize within many areas, such as molecular and cellular biology,
genetics, aquatic and terrestrial ecology, systematics, physiology, neurobiology, and developmental biology. Students also may develop an interdisciplinary focus to their degree program, for example within areas such as bioinformatics, cancer biology, forensic science and environmental science.

In addition to the courses offered by the Department of Biology, graduate students may enroll in graduate courses offered through VCU Life Sciences and these departments in the VCU School of Medicine: Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pathology, Pharmacology and Toxicology, and Physiology and Biophysics. Visit the Department of Biology’s website: biology.vcu.edu (http://biology.vcu.edu).

- Biology, Master of Science (M.S.) (p. 64)
- Integrative Life Sciences, Doctor of Philosophy (Ph.D.) (p. 65)

**Biology, Master of Science (M.S.)**

**Program goals**
The Department of Biology prepares graduate students to:

1. Acquire training in a chosen subdiscipline of biology
2. Learn research techniques used in the subdiscipline
3. Develop presentation skills
4. Develop publication skills

**Student learning outcomes**
Upon completion of the M.S. in Biology, students will:

1. Demonstrate knowledge of a chosen subfield, including the most recent advances in research
2. Apply appropriate research techniques (i.e., field or lab)
3. Effectively communicate research and findings in a professional context
4. Effectively write papers for publication

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.admissions.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in biological or related science or equivalent
2. Appropriate college-level background in mathematics, chemistry and physics
3. Three letters of recommendation pertaining to the applicant’s potential ability as a graduate student in biology
4. Student's written statement concerning career and research interests
5. Transcripts of all previous college work
6. Satisfactory scores on the GRE (general test)
Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Master of Science degree candidates are required to take a minimum of 30 graduate credit hours. A maximum of six credit hours from graduate course work taken at other institutions may be transferred if they meet approval of the department.

2. Grade requirements: Receipt of a grade of C or lower in two courses constitutes automatic dismissal from the graduate program in biology. Courses with a grade of C or lower cannot be applied to satisfying the degree requirements.

3. Other requirements: All graduate students are required to write a thesis proposal and a formal thesis following a prescribed format. In order to initiate thesis research, the thesis proposal must be approved by the student’s graduate committee and the chair of the department, and the student must be approved for degree candidacy. Each student will be required to pass a final examination, which will be primarily a defense of the thesis. Students may specialize within many areas, such as molecular and cellular biology, genetics, aquatic and terrestrial ecology, systematics, physiology, neurobiology and developmental biology. Students also may develop an interdisciplinary focus to their degree programs, for example, within areas such as bioinformatics, cancer biology, forensic science and environmental science.

Integrative Life Sciences, Doctor of Philosophy (Ph.D.)

Program mission

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with faculty members from departments across VCU campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels with an emphasis on the concepts of systems biology and biological complexity.

Program goals

1. Interdisciplinary knowledge and skills: The core curriculum of the ILS program will effectively assist students in gaining understanding of modern systems biology along with training in the interdisciplinary skills and knowledge increasingly required for doing effective research in the life sciences. It will also foster progressive development of a mastery of the current state of the research in students’ areas of interest as they seek to identify key focus areas for their integrative research.

2. Research skills: The mentored research component of the program, building on the core curriculum and interdisciplinary elective course work, will foster development of an ability to synthesize this learning and identify key focus areas for integrative research. It will support students as they learn how to design, implement and interpret interdisciplinary experimental approaches that will best address their research questions.
3. Communication skills: Students in the program will develop skills in both written and oral communication of life science knowledge, experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations, as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement experimental protocols and to design and develop experiments, as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems, as measured by rubric.

5. Integrated knowledge: The candidate will demonstrate an appropriate level of knowledge of the life sciences and a more detailed understanding of the disciplines most pertinent to their own interdisciplinary research areas, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

<td>Ph.D.</td>
<td>Fall (preferred)</td>
<td>Jan. 10</td>
<td>GRE</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>International students required TOEFL</td>
</tr>
</tbody>
</table>

Note: All application components must be received by Jan. 10 to be competitive.
In addition to the general admission requirements of the VCU Graduate School (p. 17), the Ph.D. in Integrative Life Sciences program requires graduation from an accredited college or university or its equivalent with a degree that is preparative for graduate-level study in the life sciences. Applicants should have a minimum GPA of 3.0 on a 4.0 scale, and scores on the Graduate Record Examination should exceed the 50th percentile in each category. For international applicants, satisfactory scores from a standardized test, such as the TOEFL (above 100), must be submitted along with external evaluation of undergraduate transcripts from nondomestic educational institutions (see Graduate Admissions website [http://graduate.admissions.vcu.edu/apply] for further details).

Letters of recommendation from three present or former professors, advisers or mentors qualified to evaluate the applicant’s ability to engage in graduate study in the life sciences are required, as is a written statement describing the applicant’s research interests, motivation, research experience, education and goals for pursuing graduate study in this particular program, and preferred research adviser(s), official transcripts from all past postsecondary educational institutions, official GRE scores, and current curriculum vita or resume. Applicants are strongly encouraged to contact potential research advisers prior to submitting application materials and to identify potential research advisers in their personal statements.

Students accepted into the program with a 3.4 and higher undergraduate GPA and/or experience of success in graduate course work will be provided with a stipend and tuition and fees for the first year of matriculation. Following satisfactory progress during the first year and the availability of funds, a second year of funding (stipend, tuition and fees) is available. Preference is given to applicants with preidentified research advisers.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the degree must be completed within eight years of the first enrollment.

1. Credit-hour requirements: Students in the program are required to earn a minimum of 64 graduate-level credit hours. At least one-half of the graduate credit hours presented for graduation must be at the 600 level or higher.

2. Grade requirement: Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than two courses. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.

3. Transfer credit: Graduate-level VCU course work taken as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded may be evaluated to determine whether it can be used to fulfill degree requirements of this program in accordance with the VCU Graduate School transfer policy (p. 36). A maximum of six credit hours earned at another institution can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of B is required for credit hours transferred.

4. Research adviser and committee: New students entering the program may be initially advised by the program director to assist with initial course selection and to provide advice concerning the program. Students should select a research adviser prior to matriculation, but no later than the end of the first semester. The research adviser may be chosen from among the many graduate faculty members associated with this program from either VCU campus. Students are required to form a research advisory committee that is headed by the research adviser and that consists of a minimum of five members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary affiliate graduate faculty appointment. The significant areas of the student’s research focus should be represented by the members of the research advisory committee. At least two members of the committee shall have primary appointments in departments other than that of the research adviser, with one of those members being integrally associated with the student’s research to foster the interdisciplinary intent of this degree program. Students should form their committees during the first semester of study and no later than the end of the second semester of study.

5. Written and oral examinations: Before admission to degree candidacy for the Ph.D. degree, students must successfully complete a comprehensive written examination and an oral examination. The student’s research advisory committee will administer both exams. Students should take the written exam upon completion of all required didactic course work, usually at the end of the second year of study. It will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student’s research field. Upon successful completion of the written examination and submission and acceptance of a research proposal, students should take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the written and oral examinations only once. Written evaluations of the written examination, written thesis proposal and oral thesis proposal defense will be completed by research advisory committee members and provided to the chair of the research advisory committee to discuss with the student and to the program director for program assessment.

6. Dissertation research: The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research, incorporating two or more disciplines and with a systems approach. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Projects may encompass multiple scales of study from molecular to ecosystem levels. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, also is required. Written evaluations of the thesis and the oral defense of the thesis will be completed by research advisory committee members and provided to the chair of the research advisory committee to discuss with the student and to the program director for program assessment. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences.

Curriculum requirements

A minimum total of 64 graduate credit hours is required and is distributed as follows:
Core courses

<table>

</tbody>
</table>

Total hours 64

1. Does not count toward three credit-hour restriction for Preparing Future Faculty courses.
2. Depending on the student’s area of research.
3. Students are expected to enter the program proficient in statistics at the introductory level, as exemplified by STAT 543/BIOS 543. Students not at this level, as evidenced by prior course work, will be required to take STAT 543/BIOS 543 or an equivalent course.
4. Based on research interest and approved by research advisory committee.
5. Only three credits of Preparing Future Faculty (GRAD) courses will be accepted toward the nine credit hours of electives (exclusive of OVPR Responsible Conduct of Research).

Total graduate credit hours required (minimum) 64

Department of Chemistry

M. Samy El-Shall, Ph.D.
Professor and chair

Sally S. Hunnicutt, Ph.D.
Associate professor and assistant chair

chemistry.vcu.edu (https://chemistry.vcu.edu)

The Department of Chemistry offers programs leading to the Bachelor of Science, Master of Science and Doctor of Philosophy degrees. For undergraduate students, the Bachelor of Science offers concentrations in chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling.

For graduate students, the Master of Science and Doctor of Philosophy programs provide opportunities for concentrated study in analytical, inorganic, organic or physical chemistry, or chemical physics. A plan of study is worked out for each student to ensure a sound basis for research. In keeping with the university’s commitment as an urban institution, the department also offers part-time programs leading to these degrees.

Refer to the department’s website for more information: chemistry.vcu.edu (https://chemistry.vcu.edu).

Admission requirements for graduate study

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, students are expected to have a bachelor’s degree from an accredited college or university with 30 semester credits in chemistry. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background. Acceptance is based upon undergraduate performance, satisfactory scores on the GRE and letters of recommendation.
Graduate students in the Department of Chemistry may receive financial support via teaching or research assistantships or fellowships. Application forms and instructions for applying to all graduate programs are available on the Graduate School website at graduate.vcu.edu (http://www.graduate.vcu.edu).

General degree requirements for graduate programs

Entering graduate students are required to take proficiency examinations in analytical, inorganic, organic and physical chemistry. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school’s fall and spring semesters. These tests are used to evaluate the student’s strengths and weaknesses, and the student’s program is planned accordingly.

- Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in:
  - Biochemistry (p. 69)
  - Biology (p. 70)
  - Biology of cancer (p. 72)
  - Bioorganic chemistry (p. 74)
- Chemistry, Doctor of Philosophy (Ph.D.) (p. 75)
- Chemistry, Doctor of Philosophy (Ph.D.) with a concentration in chemical physics (p. 77)
- Chemistry, Master of Science (M.S.) (p. 79)
- Chemistry, Master of Science (M.S.) with Fudan University [dual degree] (p. 81)
- Nanoscience and Nanotechnology, Doctor of Philosophy (Ph.D.) (p. 85)

Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biochemistry

Program goal

Chemical biology presents a framework for the modern approach to studying the complexities of biological processes. It is already a leading focal point for research in the 21st century, integrating concepts and information from the molecular to the cellular level. This interdisciplinary degree program has participants from the departments of Chemistry, Biology, Biochemistry and Molecular Biology, Medicinal Chemistry and Pharmacology within the College of Humanities and Sciences and the schools of Medicine and Pharmacy.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemical biology
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Students must present a satisfactory GPA score of a minimum of 3.0 on a 4.0 scale; satisfactory GRE scores (must be less than five years old); a written statement of the candidate's goals; and three letters of recommendation.

2. Students are required to have a bachelor’s degree from an accredited college or university with 30 semester credit hours in chemistry or biology. These credit hours should consist of at least two semesters of organic chemistry and a biology course in cell biology, molecular biology or genetics. A physical chemistry course is desirable.

3. If applicants have outstanding potential but lack specific requirements, they may be accepted as provisional. Provisionally accepted students must complete all conditions within one year of enrollment.

Graduate students in the program may receive financial support via teaching or research assistantships or fellowships available from the "home" department. No part-time students are accepted at this time.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemical Biology program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other requirements: Upon completion of their course work, students will complete their dissertation requirements, which will typically consist of a written and oral dissertation proposal, research and literature seminars, and both a written and oral dissertation defense.

At least 18 credit hours of didactic course work must be completed.

Students are expected to participate in their home department's seminar program.

Students are expected to enroll in CHEM 693 or directed research (one credit minimum) every spring and fall semester.

Students are expected to enroll in CHEM 693 within their first year of matriculation. Other courses may be used to satisfy this requirement in research conduct and ethics in consultation with the graduate program director.

Students may also enroll in BIOC 697 for directed research credit hours.

The list of recommended electives includes some typical courses taken in this concentration, but there is flexibility in designing a program of study in consultation with the adviser and graduate program director.

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemical Biology program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other requirements: Upon completion of their course work, students will complete their dissertation requirements, which will typically consist of a written and oral dissertation proposal, research and literature seminars, and both a written and oral dissertation defense.

Electives

Select four of the following. 6
Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology of cancer

**Program goal**
Chemical biology presents a framework for the modern approach to studying the complexities of biological processes. It is already a leading focal point for research in the 21st century, integrating concepts and information from the molecular to the cellular level. This interdisciplinary degree program has participants from the departments of Chemistry, Biology, Biochemistry and Molecular Biology, Medicinal Chemistry and Pharmacology within the College of Humanities and Sciences and the schools of Medicine and Pharmacy.

**Student learning outcomes**
1. Demonstrate expertise (breadth and depth) in chemical biology
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

1. At least 18 credit hours of didactic course work must be completed.
2. Students are expected to participate in their home department’s seminar program.
3. Students are expected to enroll in CHEB 697 or directed research (one credit minimum) every spring and fall semester.
4. Students are expected to enroll in CHEM 693 within their first year of matriculation. Other courses may be used to satisfy this requirement in research conduct and ethics in consultation with the graduate program director.
5. Students may also enroll in CHEM 697 or PHIS 697 for directed research credit hours.
6. The list of recommended electives includes some typical courses taken in this concentration, but there is flexibility in designing a program of study in consultation with the adviser and graduate program director.

**Total graduate credit hours required (minimum) 72**

**Program website:** chembio.vcu.edu (http://www.chembio.vcu.edu)
Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Admission requirements

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Students must present a satisfactory GPA score of a minimum of 3.0 on a 4.0 scale; satisfactory GRE scores (must be less than five years old); a written statement of the candidate's goals; and three letters of recommendation.

2. Students are required to have a bachelor’s degree from an accredited college or university with 30 semester credit hours in chemistry or biology. These credit hours should consist of at least two semesters of organic chemistry and a biology course in cell biology, molecular biology or genetics. A physical chemistry course is desirable.

3. If applicants have outstanding potential but lack specific requirements, they may be accepted as provisional. Provisionally accepted students must complete all conditions within one year of enrollment.

Graduate students in the program may receive financial support via teaching or research assistantships or fellowships available from the "home" department. No part-time students are accepted at this time.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemical Biology program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other requirements: Upon completion of their course work, students will complete their dissertation requirements, which will typically consist of a written and oral dissertation proposal, research and literature seminars, and both a written and oral dissertation defense.

Chemistry, Doctor of Philosophy (Ph.D.)

Program goal

The Department of Chemistry is committed to the dual mission of teaching and research at the bachelor’s, master’s and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department’s activities.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the
University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

The Department of Chemistry graduate handbook is available at chemistry.vcu.edu/graduate-programs/graduate-handbook (http://chemistry.vcu.edu/graduate-programs/graduate-handbook).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemistry program are required to earn a minimum of 60 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school’s fall and spring semesters. These tests are used to evaluate the student’s strengths and weaknesses, and the student’s program is planned accordingly.

3. Doctoral candidacy: The student is required to complete written and oral examinations in his/her major field to become a doctoral candidate. The written examinations consist of a series of cumulative exams based on the chemistry literature. The oral examination includes the presentation and defense of the proposed dissertation research.

4. Dissertation: Students must conduct a substantial original investigation under the supervision of their adviser. Students who wish to include a chemical education component in their research will choose two advisers, one in the cognate area, and one in the area of chemical education. All formal requirements for the degree are otherwise the same as for any doctoral student. Students must prepare dissertations reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. An oral defense of the dissertation will be held. Full-time students should complete the degree requirements in four to five years.

Curriculum requirements

Required didactic courses

Select three core courses of the following four areas: analytical, inorganic, organic and physical:

- CHEM 504: Advanced Organic Chemistry I
- CHEM 510 or CHEM 511: Atomic and Molecular Structure
- CHEM 620: Advanced Inorganic Chemistry I
- CHEM 63xx or ENGR 691: courses in analytical area

Course completed twice

- CHEM 698: Investigations in Current Chemistry Literature (0.5 credit hour)

Select eight credit hours of the following recommended electives, in consultation with adviser:

- BIOC 500-level (except BIOC 505, BIOC 506 and BIOC 507)
- BIOC 530: Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function
- BIOC 531: Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism
- BIOC 532: Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology

1. Students must earn a minimum of 18 credit hours in eight didactic graduate courses, not including credit for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.
2. One of these courses may be waived upon satisfactory proficiency exam scores. The number of required credit hours for the degree does not change.
3. The ENGR 691 topics course must be materials characterization.
4. In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores.
5. Students are expected to enroll in CHEM 698 (.05 credit hour) twice during their graduate studies, including the semester preceding their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.
6. Students are expected to participate in the department’s seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).
7. Students are expected to enroll in CHEM 693 within the first year of study.
8. Students must enroll in CHEM 697 (one credit hour minimum) every spring and fall semester for a minimum of 30 total credit hours. If the required minimum of 60 credit hours for the degree is not fulfilled after completion of all other course requirements, then additional credit hours of CHEM 697 may satisfy remaining credit hours for the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor’s degree from an accredited college or university with 30 credit hours in chemistry or in physics.
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background or in physics.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemistry program are required to earn a minimum of 60 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students entering the chemical physics concentration must pass proficiency examinations in two areas of chemistry and two areas of physics (mechanics, electricity and magnetism). Students entering with a bachelor’s or master’s degree in chemistry who have not taken the courses previously may satisfy the physics requirement with an A or B in PHYS 301 Classical Mechanics I and PHYS 302 Classical Mechanics II and PHYS 376 Electromagnetism. Students entering with a bachelor’s or master’s degree in physics who have not taken the chemistry courses previously may satisfy the chemistry requirement with an A or B in two of the four courses, CHEM 301 Organic Chemistry-CHEM 302 Organic Chemistry; the two-course sequence counts as one course only), CHEM 406 Inorganic Chemistry II, CHEM 409 Instrumental Analysis or CHEM 510 Atomic and Molecular Structure.
3. Doctoral candidacy: The student is required to complete written and oral examinations in his/her major field to become a doctoral candidate. The written examinations consist of a series of cumulative exams based on the chemistry literature. The oral examination includes the presentation and defense of the proposed dissertation research.
4. Dissertation: The student must conduct a substantial original investigation under the supervision of his/her adviser and must prepare a dissertation reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. An oral defense of the dissertation will be held. Full-time students should complete the degree requirements in four to five years.
Curriculum requirements

Required didactic courses

CHEM 510  Atomic and Molecular Structure  3
or PHYS 580  Quantum Mechanics

CHEM 511  Chemical Thermodynamics and Kinetics  3

CHEM 612  Modern Statistical Mechanics: Fundamentals and Applications  3

PHYS 576  Electromagnetic Theory  3

PHYS 641  Solid State Physics  3

Recommended electives

Select nine credit hours of the following, in consultation with adviser  9

CHEM 512  Applied Molecular Modeling
CHEM 550  Introduction to Polymer Chemistry
CHEM 591  Topics in Chemistry
CHEM 610  Applied Quantum Chemistry
CHEM 611  Molecular Spectroscopy
CHEM 615  Chemical Thermodynamics
CHEM 616  Chemical Kinetics
CHEM 620  Advanced Inorganic Chemistry I
CHEM 634  Surface Science
CHEM 635  Spectrochemical Analysis
CHEM 691  Topics in Chemistry
MATH 532  Ordinary Differential Equations I
MATH 533  Partial Differential Equations I
NANO 650  Experimental Techniques in Nanoscience I
NANO 650  Experimental Techniques in Nanoscience I
PHYS 550  Techniques in Material Research
PHYS 571  Theoretical Mechanics
PHYS 573  Analytical Methods in Physics
PHYS 661  Surface and Materials Physics
PHYS 691  Special Topics

Other required courses

CHEM 690  Research Seminar in Chemistry  1-8
or PHYS 690  Research Seminar

CHEM 692  Chemistry Seminar Presentation  2

CHEM 693  Chemistry Perspectives and Ethics  4

CHEM 697  Directed Research  30
or PHYS 697  Directed Research

1 Students must earn a minimum of 24 credit hours in didactic graduate courses, not including credit for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.

2 At least 12 credit hours of the 24 required didactic course credit hours must be CHEM graduate courses. Therefore, depending on the choice of CHEM 510 or PHYS 580 above, at least 3 to 6 credit hours chosen from the list of recommended electives must be CHEM graduate courses, respectively.

3 Students are expected to participate in the chemistry and/or physics department seminar program by enrolling in CHEM 690, CHEM 692 or PHYS 690 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

4 Students are expected to enroll in CHEM 693 within their first year of enrollment.

5 Students are expected to enroll in CHEM 697 or PHYS 697 (one credit hour minimum) every spring and fall semester. Up to 15 credit hours of PHYS 697 can be used to satisfy the minimum requirement of 30 credit hours of directed research. If the required 60 credit hours for the degree is not fulfilled after completion of all other course requirements, then additional credit hours of CHEM 697 can satisfy the remaining credit hours for the degree.

Total number of graduate credit hours required (minimum) 60

Chemistry, Master of Science (M.S.)

Program goal

The Department of Chemistry is committed to the dual mission of teaching and research at the bachelor’s, master’s and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department’s activities.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

The Department of Chemistry graduate handbook is available at chemistry.vcu.edu/graduate-programs/graduate-handbook (http://chemistry.vcu.edu/graduate-programs/graduate-handbook).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor’s degree from an accredited college or university with 30 credit hours in chemistry
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.S. in Chemistry program are required to earn a minimum of 30 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school’s fall and spring semesters. These tests are used to evaluate the student’s strengths and weaknesses, and the student’s program is planned accordingly.
3. Other requirements: Students are to conduct a research study under the guidance of a thesis adviser. After their first year, students are required to present their research at a poster presentation every fall semester. Once students have completed all required course work (with a 3.0 GPA) and the literature seminar, they must submit the application to candidacy form to the chemistry graduate director. After candidacy, an acceptable research thesis and a final oral examination on the thesis are required. Full-time students should complete these degree requirements in two to three years.

Curriculum requirements

Required didactic courses

Select three core courses of the following four areas:

- CHEM 504 Advanced Organic Chemistry I
- CHEM 510 Atomic and Molecular Structure
- or CHEM 511 Chemical Thermodynamics and Kinetics
- CHEM 620 Advanced Inorganic Chemistry I
- CHEM 63x or ENGR 691 (course in analytical area)

Course completed twice

- CHEM 698 Investigations in Current Chemistry Literature (0.5 credit hour)

Select five credit hours of recommended electives from the following, in consultation with adviser

- BIOC 500-level (except BIOC 505, BIOC 506 and BIOC 507)
BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function
BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism
BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology
BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics
BIOC 602 Physical Properties of Macromolecules
BIOS/STAT 543 Statistical Methods I
BIOS/STAT 544 Statistical Methods II
CHEB 601 Chemical Biology I
CHEB 602 Chemical Biology II
CHEM 500-level
CHEM 604 Advanced Organic Chemistry II
CHEM 605 Physical Organic Chemistry
CHEM 606 Advanced Spectroscopic Methods in Organic Chemistry
CHEM 610 Applied Quantum Chemistry
CHEM 611 Molecular Spectroscopy
CHEM 612 Modern Statistical Mechanics: Fundamentals and Applications
CHEM 615 Chemical Thermodynamics
CHEM 616 Chemical Kinetics
CHEM 620 Advanced Inorganic Chemistry I
CHEM 621 Advanced Inorganic Chemistry II
CHEM 630 Electroanalytical Chemistry
CHEM 631 Separation Science
CHEM 632 Chromatography
CHEM 633 Mass Spectrometry
CHEM 634 Surface Science
CHEM 635 Spectrochemical Analysis
CHEM 691 Topics in Chemistry
CHEM 698 Investigations in Current Chemistry Literature
ENGR 591 Special Topics in Engineering
ENGR 691 Special Topics in Engineering
MEDC 541 Survey of Molecular Modeling Methods
MEDC 670 Advanced Molecular Modeling Theory and Practice
NANO 570 Nanoscale Physics
NANO 571 Nanoscale Chemistry
NANO 650 Experimental Techniques in Nanoscience I
NANO 651 Experimental Techniques in Nanoscience II
NANO 660 Theoretical Studies of Nanostructures
NANO 661 Computational Nanoscience
PHYS 550 Techniques in Material Research
PHYS 573 Analytical Methods in Physics
PHYS 576 Electromagnetic Theory
PHYS 580 Quantum Mechanics
PHYS 591 Topics in Physics
PHYS 661 Surface and Materials Physics
PHYS 691 Special Topics

Other required courses
CHEM 690 Research Seminar in Chemistry (credit hours variable)
CHEM 692 Chemistry Seminar Presentation
CHEM 693 Chemistry Perspectives and Ethics
CHEM 697 Directed Research

Total Hours 30

1 Students must earn a minimum of 15 credit hours in six didactic graduate courses, not including credit hours for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.
2 One of these courses may be waived upon satisfactory proficiency exam scores. The required number of credit hours for the degree does not change.
3 The ENGR 691 topics course must be materials characterization.
4 In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores.
5 Students are expected to enroll in CHEM 690 (0.5 credit hour) twice during their graduate studies, including the semester preceding their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.
6 Students are expected to participate in the department’s seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).
7 Students are expected to enroll in CHEM 693 within their first year of enrollment.
8 Students are expected to enroll in CHEM 697 (one credit hour minimum) every spring and fall semester.

Total graduate credit hours required (minimum) 30

Chemistry, Master of Science (M.S.) with Fudan University [dual degree]

Program goals
The VCU Department of Chemistry is committed to the dual mission of teaching and research at the bachelor’s, master's and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to
students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department’s activities.

Student learning outcomes
Graduates of the program must:

1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Spring Oct 15

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Applicants must have a bachelor’s degree from an accredited college or university with 30 credit hours in chemistry. (Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.)
2. Graduate students in the Department of Chemistry may receive financial support via teaching or research assistantships or fellowships. Application forms and instructions for applying to all graduate programs are available on the Graduate School website at graduate.vcu.edu (http://www.graduate.vcu.edu).
3. Fudan University students participating in this dual degree program will be full-time students in good standing in Fudan University’s Department of Chemistry.
4. Fudan University students will be required to (a) successfully pass an interview at Fudan University conducted by an identified faculty member of VCU’s Chemistry Department and (b) successfully pass an English proficiency exam before the application to VCU will be processed.
5. Fudan University students’ program will be required to submit formal applications to the VCU International Admissions Office. The VCU Department of Chemistry is responsible for admitting these students to VCU.
6. Fudan University students will be required to submit to VCU their Fudan transcripts and grade-related information before their applications to VCU will be processed.
7. Fudan University students are classified as full-time, out-of-state graduate students and will assume all tuition, fees, housing and cost-of-living expenses while at VCU.
8. Students must receive a positive evaluation from both the Fudan and VCU chemistry departments to receive admission into the program.
As part of the admission process, a member of VCU’s Department of Chemistry will interview applicants in Shanghai prior to admission into the program.

9. Fudan University students are required to maintain the equivalent of a VCU B average including their first year at Fudan University.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.S. in Chemistry program are required to earn a minimum of 30 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school’s fall and spring semesters. These tests are used to evaluate the student’s strengths and weaknesses, and the student’s program is planned accordingly.

3. Other requirements: Students are to conduct a research study under the guidance of a thesis adviser. After their first year, students are required to present their research at a poster presentation every fall semester. Once students have completed all required course work (with a 3.0 GPA) and the literature seminar, they must submit the application to candidacy form to the chemistry graduate director. After candidacy, an acceptable research thesis and a final oral examination on the thesis are required. Full-time students should complete these degree requirements in two to three years.

**Program schedule**

1. In the first year (two semesters) at Fudan University, the Fudan student will successfully complete core courses required of all graduate students in the VCU M.S. in Chemistry program. The Department of Chemistry at VCU requires an M.S. student to earn a minimum of 15 credit hours in six graduate courses. A further minimum of 20 credit hours must be earned in seminar, seminar discussion, a mandatory course on chemistry perspectives and ethics and directed research courses. A departmental committee, composed of the VCU graduate program director, the VCU graduate admissions director and the Fudan program director, will determine the transferability and correspondence of Fudan courses to VCU courses and credit hours before the student enters VCU. This committee will advise the individual student on course work and credits eligible for transfer to meet the 15-credit didactic course requirement and what, if any, further course work should be taken.

2. In the second year (two semesters) at VCU, the student will immediately begin laboratory research (CHEM 697). The student will also identify a thesis adviser no later than the beginning of enrollment at VCU (third semester of program). A co-adviser from Fudan University will also be appointed at this time. The student will enroll in didactic courses offered by the Department of Chemistry at the discretion of the VCU adviser. It is envisaged that the core courses will have been taken at Fudan and that specialized and topics courses will be taken at VCU. The Department of Chemistry will not create new courses for Fudan students.

3. In the third year, the Fudan student will remain at VCU to complete the fifth semester of the program. The student will continue to select from the department’s regular course offerings and will continue to work on the thesis with the VCU thesis adviser. All research data should be obtained by the end of the third semester at VCU.

4. In the sixth and final semester, the Fudan student will return to Fudan University to complete the writing of the thesis and will enroll in final elective courses (if necessary) pertinent to the student’s area of concentration. The two thesis advisers (one from VCU and one from Fudan) will oversee the completion of the thesis. The formal thesis will be written in Chinese with an English translation.

### Virginia Commonwealth University

#### Required didactic courses

1. Select three core courses of the following four areas: 
   - analytical, inorganic, organic and physical  
   - CHEM 504 Advanced Organic Chemistry I
   - CHEM 510 Atomic and Molecular Structure
   - CHEM 511 Chemical Thermodynamics and Kinetics
   - CHEM 620 Advanced Inorganic Chemistry I
   - CHEM 63x or ENGR 691 (courses in analytical area)  

   **Course completed twice:** 1

2. CHEM 698 Investigations in Current Chemistry Literature (0.5 credit hour)  

3. Select five credit hours of recommended electives of the following, in consultation with adviser: 
   - BIOC 500-level (except BIOC 505, BIOC 506 and BIOC 507)  
   - BIOC 530 Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function  
   - BIOC 531 Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism  
   - BIOC 532 Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology  
   - BIOC 533 Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics  
   - BIOC 602 Physical Properties of Macromolecules  
   - BIOS 543 Statistical Methods I  
   - BIOS 544 Statistical Methods II  
   - CHEB 601 Chemical Biology I  
   - CHEB 602 Chemical Biology II  
   - CHEM 604 Advanced Organic Chemistry II  
   - CHEM 605 Physical Organic Chemistry  
   - CHEM 606 Advanced Spectroscopic Methods in Organic Chemistry  
   - CHEM 610 Applied Quantum Chemistry  
   - CHEM 611 Molecular Spectroscopy  
   - CHEM 612 Modern Statistical Mechanics: Fundamentals and Applications  
   - CHEM 615 Chemical Thermodynamics  
   - CHEM 616 Chemical Kinetics  
   - CHEM 620 Advanced Inorganic Chemistry I  
   - CHEM 621 Advanced Inorganic Chemistry II  
   - CHEM 630 Electroanalytical Chemistry  
   - CHEM 631 Separation Science  
   - CHEM 632 Chemometrics  
   - CHEM 633 Mass Spectrometry  
   - CHEM 634 Surface Science  
   - CHEM 635 Spectrochemical Analysis  
   - CHEM 691 Topics in Chemistry  
   - CHEM 698 Investigations in Current Chemistry Literature  
   - ENGR 591 Special Topics in Engineering  
   - ENGR 691 Special Topics in Engineering  
   - MEDC 541 Survey of Molecular Modeling Methods  
   - MEDC 670 Advanced Molecular Modeling Theory and Practice  
   - NANO 570 Nanoscale Physics  
   - NANO 571 Nanoscale Chemistry  
   - NANO 650 Experimental Techniques in Nanoscience I  
   - NANO 651 Experimental Techniques in Nanoscience II  
   - NANO 660 Theoretical Studies of Nanostructures  
   - NANO 661 Computational Nanoscience  
   - PHYS 550 Techniques in Material Research  
   - PHYS 573 Analytical Methods in Physics  
   - PHYS 576 Electromagnetic Theory  
   - PHYS 580 Quantum Mechanics  
   - PHYS 591 Topics in Physics  
   - PHYS 661 Surface and Materials Physics  
   - PHYS 691 Special Topics  

#### Other required courses

- CHEM 690 Research Seminar in Chemistry (credit hours variable)  
- CHEM 692 Chemistry Seminar Presentation  
- CHEM 693 Chemistry Perspectives and Ethics  
- CHEM 697 Directed Research  

**Total Hours:** 30

---

1. Students must earn a minimum of 15 credit hours in six didactic graduate courses, not including credit hours for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.

2. One of these courses may be waived upon satisfactory proficiency exam scores. The required number of credit hours for the degree does not change.

3. The ENGR 691 topics course must be materials characterization.

4. In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores.
Students are expected to enroll in CHEM 698 (0.5 credit hour) twice during their graduate studies, including the semester preceding their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.

Students are expected to participate in the department’s seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

Students are expected to enroll in CHEM 693 within their first year of enrollment.

Students are expected to enroll in CHEM 697 (one credit hour minimum) every spring and fall semester.

**Total graduate credit hours required (minimum) at VCU**

30

**Graduate program director**

Sarah C. Rutan, Ph.D.
Professor and graduate coordinator, Department of Chemistry
srutan@vcu.edu
(804) 828-7517

**Additional contacts**

Maryanne M. Collinson, Ph.D.
Professor and chair of graduate recruiting and admissions committee, Department of Chemistry
mmcollinson@vcu.edu
(804) 828-7509

Nicholas Farrell, Ph.D.
Coordinator, Fudan dual-degree program, Department of Chemistry
npfarrell@vcu.edu
(804) 828-6320

**Program website:** chemistry.vcu.edu (http://chemistry.vcu.edu)

**Nanoscience and Nanotechnology, Doctor of Philosophy (Ph.D.)**

**Program goals**

1. In teaching, the purpose is to provide high quality education in chemistry and/or physics in preparation for professional careers in nanoscience and nanotechnology.
2. In research, the goals are to advance nanoscience research, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline.

**Student learning outcomes**

1. Develop effective oral and written communication skills
2. Demonstrate expertise (breadth and depth) in nanoscience
3. Demonstrate appropriate ability to design and conduct experimental research
4. Demonstrate ability to analyze data critically and to design experiments independently
5. Develop competency in the responsible conduct of research

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>
In addition to the general admission requirements of the VCU Graduate School (p. 17) and the College of Humanities and Sciences, students are expected to have a bachelor’s degree from an accredited college or university with 30 credit hours in chemistry, physics or engineering.

Admission on a provisional basis is possible for a student temporarily lacking the expected background. Acceptance is based upon undergraduate performance, satisfactory scores on the GRE and letters of recommendation.

Graduate students in the nanoscience and nanotechnology Ph.D. program may receive financial support via teaching or research assistantships or fellowships available from the home department.

### Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students preparing for the Doctor of Philosophy degree in nanoscience and nanotechnology must earn a minimum of 72 credit hours consisting of core courses (nine credit hours), elective courses (nine credit hours), seminar (eight credit hours) and research (46 credit hours).

Before admission to candidacy for the Ph.D. degree, students must have

1. completed at least 12 credit hours of their required course work,
2. successfully completed cumulative exams and
3. successfully completed an oral candidacy examination based on a research proposal

The student will be required to complete a series of cumulative exams in the area of nanoscience and nanotechnology, which will normally occur during the student’s second year in residence. After completion of the cumulative exams, an oral candidacy examination is then required to become a Ph.D. candidate. The oral examination, which is administered by the student's graduate dissertation committee, is based upon a written proposal describing the proposed dissertation research project. It is intended to evaluate the adequacy of the proposed project, the student’s level of understanding of the project and the likelihood that the dissertation can be completed successfully.

Students must conduct a substantial original investigation under the supervision of their advisers and must submit to the graduate dissertation committee a written dissertation reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. The oral dissertation defense, conducted under the direction of the dissertation committee, will examine the candidate’s research, dissertation documentation and underlying fundamental knowledge encompassed by the candidate’s research. Upon successful completion of the defense and the dissertation, the student may apply for graduation with the Ph.D. in Nanoscience and Nanotechnology. Full-time students should complete the degree requirements in four to five years.

### Total graduate credit hours required (minimum) 72

Students will attend NANO 690 Research Seminar in Nanoscience and Nanotechnology throughout their degree programs, receiving an S (satisfactory) or U (unsatisfactory) grade based on attendance and participation. Students will also give two seminar presentations, one on a literature topic and one on their dissertation research, which will be graded on the A/B/C/D/F scale.

#### Additional contact

Maryanne M. Collinson, Ph.D.
Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in dual genre

Program goals
Our selective and academically rigorous 48-credit-hour, three-year program is designed to provide talented writers with the opportunity to work closely with both outstanding faculty and gifted peers to strengthen their craft, develop their literary aesthetics, enrich their understanding of existing traditions as well as compositional possibilities, and to participate actively in the life of the literary community at large.

The primary areas of study are poetry and fiction, and admission is highly competitive. In addition to the poetry and fiction workshops, there are courses available that focus on writing drama, nonfiction and screenplays, as well as courses that provide practical experience in editing.

Student learning outcomes
Students in the M.F.A. in Creative Writing program will:

1. Develop and refine their individual writerly voices, produce literary work of a high quality and demonstrate a comprehensive understanding of their own aesthetics, as well as the literary models and cultural sources of those aesthetics
2. Actively engage in a wider literary culture and community at the local, regional, national or international level
3. Develop constructive workshop practices and demonstrate the ability to read closely and respond perceptively and critically to the writing of their fellow M.F.A. students
4. Develop an advanced comprehension of editing and revision techniques and strategies, which include synthesizing challenges, advice and critiques from professors and fellow M.F.A. students
5. Develop, hone and articulate a keen sense of their artistic and career goals

Student learning outcomes specific to fiction
1. Demonstrate the use or knowledge of effective approaches for creating sustained works of fiction distinguished by a nuanced use of appropriate narrative elements, techniques and conventions
2. Demonstrate a highly developed proficiency in understanding and creating story structures appropriate to their purpose and audience, as well as to their chosen literary modes and styles
3. In a statement of purpose or aesthetics that is part of their thesis manuscripts, as well as in an exit interviews/thesis defense, appraise and locate their own work within literary and cultural contexts

Student learning outcomes specific to poetry
1. Demonstrate a skillful use or knowledge of major poetic devices, such as metaphor, imagery, lineation, persona, types of rhythm, rhyme and other sonic effect.
2. Demonstrate the use or knowledge of classic poetic forms, such as the sonnet, the ode and the elegy, as well as other contemporary, experimental or avant-garde forms.
3. In a statement of purpose or aesthetics that is part of their thesis manuscript, as well as in an exit interview/thesis defense, appraise and locate their own work within literary and cultural contexts
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Special requirements

- Portfolio (see below)

The Master of Fine Arts in Creative Writing program is designed to attract students from diverse undergraduate backgrounds who are writers of promise. The program is suited particularly to those interested primarily in the writing of fiction and poetry; however, some emphasis also is placed on nonfiction writing, playwriting and screenwriting.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. A portfolio of promising fiction or poetry, possibly with drama (as a minimum, approximately eight to 10 poems, or 20 or more pages of fiction or some combination of these; in all cases, applicants should submit only their strongest creative writing samples) to be submitted directly to the M.F.A. program
2. Three recommendations from persons who are qualified to give information concerning the applicant’s probable success in graduate school, especially in a creative writing program
3. A scholastic record that is indicative of the applicant’s ability to pursue a graduate degree successfully
4. A baccalaureate degree or its equivalent from an accredited institution
5. Completion of the general Graduate Record Examination (The subject test in literature is not required for M.F.A. applicants.)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.F.A. in Creative Writing program are required to earn a minimum of 48 graduate-level credit hours beyond the baccalaureate. At least half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Beyond the required courses, students should select elective courses, in conjunction with the program director or their thesis advisers, which are appropriate to their aims and interests. The thesis work gives students the opportunity to produce manuscripts of publishable quality. Course work also is available in the techniques of teaching creative writing, and the program is flexible enough to include studies undertaken in other departments of the university as well, including the departments of Art History, Theatre and Philosophy and the Richard T. Robertson School of Media and Culture.

Curriculum requirements

Workshops

Select four of the following (majority of course work should be in the student’s genre):
Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in fiction

Program goals

## Curriculum requirements

### Workshops

Select four of the following (majority of course work should be in the student's genre):

- ENGL 666 Creative Writing: Fiction
- ENGL 667 Creating Writing: Poetry
- ENGL 668 Creative Writing: Drama
- ENGL 671 Film and Television Scripts
- ENGL 672 Writing Nonfiction

### Elective courses in literature

Select four of the following:

- ENGL/TEDU 528 Children's Literature II
- ENGL 560 Studies in British Literature and Culture
- ENGL 570 Special Topics in American Literature and Culture
- ENGL/ENED 601 Young Adult Literature
- ENGL 605 Introduction to Scholarship in English Studies
- ENGL 606 Literary Criticism
- ENGL 611 Authors
- ENGL 614 Cultural Discourses
- ENGL 620 Intertextuality
- ENGL 624 Texts and Contexts
- ENGL 627 Genres
- ENGL 629 Form and Theory of Poetry
- ENGL 630 Form and Theory of Fiction
- ENGL 631 Form and Theory of Creative Nonfiction
- ENGL 692 Independent Study

### Additional recommended electives

Select 18 credit hours of the following (may include up to three additional credit hours of thesis):

- ENGL/TEDU 528 Children's Literature II
- ENGL/ENED 532 Applied English Linguistics
- ENGL 550 Studies in Linguistics
- ENGL/TEDU/LING 552 Teaching English as a Second Language
- ENGL 560 Studies in British Literature and Culture
- ENGL 570 Special Topics in American Literature and Culture
- ENGL/ENED 601 Young Adult Literature

**Special requirements**

- Portfolio (see below)

The Master of Fine Arts in Creative Writing program is designed to attract students from diverse undergraduate backgrounds who are writers of promise. The program is suited particularly to those interested primarily in the writing of fiction and poetry; however, some emphasis also is placed on nonfiction writing, playwriting and screenwriting.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. A portfolio of promising fiction or poetry, possibly with drama (as a minimum, approximately eight to 10 poems, or 20 or more pages of
fiction or some combination of these; in all cases, applicants should submit only their strongest creative writing samples) to be submitted directly to the M.F.A. program

2. Three recommendations from persons who are qualified to give information concerning the applicant’s probable success in graduate school, especially in a creative writing program

3. A scholastic record that is indicative of the applicant’s ability to pursue a graduate degree successfully

4. A baccalaureate degree or its equivalent from an accredited institution

5. Completion of the general Graduate Record Examination (The subject test in literature is not required for M.F.A. applicants.)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.F.A. in Creative Writing program are required to earn a minimum of 48 graduate-level credit hours beyond the baccalaureate. At least half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other requirements: Beyond the required courses, students should select elective courses, in conjunction with the program director or their thesis advisers, which are appropriate to their aims and interests. The thesis work gives students the opportunity to produce manuscripts of publishable quality. Course work also is available in the techniques of teaching creative writing, and the program is flexible enough to include studies undertaken in other departments of the university as well, including the departments of Art History, Theatre and Philosophy and the Richard T. Robertson School of Media and Culture.

Curriculum requirements

Workshops

Select four of the following (majority of course work should be in the student’s genre):

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL 666</td>
<td>Creative Writing: Fiction</td>
</tr>
<tr>
<td>ENGL 667</td>
<td>Creating Writing: Poetry</td>
</tr>
<tr>
<td>ENGL 668</td>
<td>Creative Writing: Drama</td>
</tr>
<tr>
<td>ENGL 671</td>
<td>Film and Television Scripts</td>
</tr>
<tr>
<td>ENGL 672</td>
<td>Writing Nonfiction</td>
</tr>
</tbody>
</table>

Elective courses in literature

Select four of the following:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL/TEDU 528</td>
<td>Children’s Literature II</td>

Program website: english.vcu.edu/mfa (http://english.vcu.edu/mfa)

English, Master of Arts (M.A.)

Program goals
The Department of English offers an M.A. degree for students seeking study beyond a bachelor’s degree which prepares graduates to pursue a doctorate, to teach in secondary or higher education or to obtain other positions in the public and private sector. The M.A. in English is designed for students pursuing advanced English studies, and students may choose to focus their course work in either literature or writing and rhetoric. The M.A. in English with a research concentration is designed for students pursuing advanced English studies with an emphasis on research, criticism and methodology.

Student learning outcomes
1. Develop advanced reading and writing skills
2. Engage in theoretical and/or textual/bibliographical scholarship
3. Conduct original research and advance an original argument under faculty direction
4. Explain and defend original research in a formal presentation or defense
5. Survey the professional and academic work to which the degree leads

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. A baccalaureate degree in an area appropriate to the study of literature or writing
2. A GPA that indicates the applicant can successfully pursue a graduate degree
3. Three letters of recommendation from former instructors
4. Completion of the GRE (Applicants for the literature track may, but are not required to, submit scores for the GRE subject test in literature.)
5. A writing sample, optimally ranging from 10-15 double-spaced pages

Applicants may also indicate whether they intend to write a thesis and with which faculty members they hope to study.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.
1. Credit hour requirements: Students in the M.A. in English program are required to earn a minimum of 30 graduate credit hours beyond the baccalaureate. At least half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other requirements: Students must complete one of two final projects: either a directed study, under the supervision of a faculty member with a public presentation; or a thesis in consultation with a faculty committee, which culminates in an oral defense. Students must obtain approval for their final projects from their supervising faculty and the M.A. committee.

Media, Art, and Text, Doctor of Philosophy (Ph.D.)

Program goal
VCU’s interdisciplinary doctoral program in media, art, and text is a joint endeavor of the Department of English, the School of the Arts and the Richard T. Robertson School of Media and Culture. The program prepares students primarily to teach at the college or university level, although some pursue careers in related media fields. MATX emphasizes the historical and theoretical foundations essential to the scholarly study of media, both old and new, broadly defined. It provides an intellectually stimulating environment that encourages students to work both collaboratively and independently, as well as across and between disciplines and media. Students maintain a base in their primary area of research, which is usually but not always the field in which they have done prior graduate work.

Student learning outcomes
1. Develop advanced communication skills in writing, speaking and the use of multimedia
2. Demonstrate broad knowledge of history and theory as the foundation for interdisciplinary work in a specialized facet of media, art, and/or text
3. Develop competence in interdisciplinary and disciplinary research methods and responsible conduct of research
4. Develop specialized knowledge in relevant fields to support dissertation and subsequent research
5. Demonstrate the ability to conduct independent research and produce new, specialized knowledge within the broad parameters of media, art, and text

6. Develop a strong basis for ongoing professional practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Admission requirements

**Degree:** Ph.D.  
**Semester(s) of entry:** Fall  
**Deadline dates:** Jan 2  
**Test requirements:**

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must hold a master’s degree (M.A., M.F.A., M.S.) in a relevant field.

2. Submit the following, in the formats indicated via VCU’s online application portal:
   a. Writing sample demonstrating the ability to write clearly, analyze effectively and conduct original research in advanced doctoral-level seminars. This may be a master’s thesis, a graduate-level seminar paper or a published essay. Submit as a PDF.
   b. Statement of purpose describing the applicant’s interest, motivation and goals in pursuing this degree. The statement should specifically address the importance of interdisciplinary to the applicant’s academic goals, and it should also offer evidence of preparation for the study of media, art, and text. The applicant should indicate the specific area of study and research to be pursued at VCU and identify faculty who might potentially direct dissertation research. Submit as a PDF.
   c. Academic curriculum vitae or professional resume listing all colleges and universities attended and degrees earned, all professional and academic positions held, all publications and/or exhibitions, technical skills, and any other relevant information. Include URLs for personal and/or professional websites. Submit as a PDF.
   d. Letters of recommendation from three present or former instructors or other individuals qualified to evaluate the applicant’s ability to engage in interdisciplinary study at the doctoral level. Have recommenders submit their letters via the online application portal.

3. Applicants who wish to pursue creative work at VCU must also submit a portfolio. Those with an M.F.A. who do not wish to continue creative work should consult with the MATX director about this requirement. Materials submitted should demonstrate excellence in studio or professional practice and the potential to do graduate-level work in media, art, and text. Portfolios will be reviewed by the MATX admissions committee as well as relevant faculty in the School of the Arts and the Richard T. Robertson School of Media and Culture. Please observe the following guidelines:
   a. Those working in 2-D or 3-D mediums should provide 20 images of representative work arranged chronologically, beginning with the most recent.
   b. Those working in sound and time-based media, as well as those in the performing arts, should provide clips totaling no more than 10 minutes.
   c. Those working across media may submit a combination of the above.
   d. The portfolio should include title, date, media and dimensions of each work, as well as a brief statement or other information that will help the admissions committee in its evaluation.

Small files illustrating 2-D or 3-D work should be submitted in a single PDF. Sound or video files should be posted to Vimeo or Sound Cloud with a functioning link submitted in a PDF.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the MATX program are required to earn a minimum of 42 graduate-level credit hours beyond the master’s. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. The 42-hour curriculum comprises 36 hours of course work and a minimum of six hours of dissertation research. Course work includes a core of four required courses taken during the first two semesters by all incoming students. Three doctoral seminars provide a shared historical and theoretical foundation for the study of media, art, and text, while a workshop offers the opportunity to develop and expand professional and/or creative skills relevant to the student’s career goals and research focus. In addition, all students will take a research methods course in a field relevant to their anticipated area of dissertation research. Beyond the core, students select 21 hours of elective credit hours from course offerings in disciplines relevant to their research interests and career goals. The program offers a topics seminar focused on the history, theory or practice of media, art, and text. Independent study and internships are also available as electives. While enrollment in courses with the MATX prefix is guaranteed to matriculated MATX students, enrollment in other graduate courses is subject to the conditions established by individual units. Together the core and the electives support the interdisciplinary work of the dissertation, which is an original scholarly examination of some aspect of media, art, and/or text. It may include work in media other than text. It is supervised by a committee consisting of four or five members drawn from disciplines relevant to the research topic.

2. Grade requirements: To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

3. Requirements for admission to candidacy: Before beginning formal dissertation research, students must complete all 36 hours of required course work, both stages of the e-portfolio and the requirements described below. Upon completion of these, the student will apply for degree candidacy.

4. Dissertation committee: The dissertation committee consists of the director (who must hold a Ph.D.) and three or four additional members whose scholarly knowledge and interests are relevant to the project. The committee must have at least one member from each of the sponsoring units (Department of English, School of the Arts, Richard T. Robertson School of Media and Culture). All must be members of VCU’s graduate faculty. Appropriate faculty from outside VCU may serve on committees (but not as director) with the approval of the MATX director and the graduate dean. It is the student’s responsibility to assemble the committee, in consultation with the dissertation director. Committees will not be appointed by the program.

5. E-portfolio: Work on the e-portfolio will begin in MATX 604 in the spring of the first year. There are no technical specifications, and content will include, but is not limited to, work done in the first two years in the program. It will take the form of a website and must demonstrate the technical skills (Web design, audio, video, etc.)
relevant to the student's work on the dissertation and the career sought after VCU. Submission is a two-stage process:

a. Stage 1 (May of the first year): a three- to five-page design rationale for the portfolio site along with a mock-up or rough structure

b. Stage 2 (April of the second year): a finished, live site accompanied by a five-page statement relating it to the student's work inside and outside the program and outlining how it uses media techniques to promote a specific professional and/or creative identity (Note: Each submission is graded pass/fail and may be repeated once. A second failure results in automatic termination from the program.)

6. Competency: Candidates must demonstrate competency in a skill or technique relevant to the dissertation research or planned professional career. The dissertation committee approves and administers the competency portion. Graded pass/fail, the test may be repeated once.

7. Bibliography exam: Candidates will complete an exam on a reading list of 20 to 30 sources relevant to or supportive of the dissertation topic. The dissertation committee approves and administers the bibliography exam. Graded pass/fail, the test may be repeated once.

8. Dissertation prospectus and prospectus defense: The prospectus is a 15- to 20-page document that indicates the significance of the proposed research, gives a short review of relevant literature, states the research question, specifies the proposed methodology and indicates how the project lays the foundation for the anticipated academic or professional career. It also includes a work plan for the completion of research and writing, as well as a complete bibliography. The prospectus is defended orally before the dissertation committee, which may accept, reject or require revisions. The defense may be repeated once.

9. Dissertation and dissertation defense: The dissertation is an original, interdisciplinary and scholarly examination of a topic relevant to an aspect of media, art, and/or text. It may include work in media other than text. Given the varied nature of doctoral research, there is no set time frame for completion of a dissertation. It is expected, however, that the dissertation will take about two years after attaining candidacy, but it must be defended within the eight-year time limit for completion of the doctoral degree. The dissertation will be defended orally before the dissertation committee. Successful defense of the dissertation completes the requirements for the degree.

Department of Forensic Science

Tal Simmons, Ph.D.
Professor, chair and graduate program director

Eric J. Hazelrigg
Assistant professor and undergraduate program director

forensicscience.vcu.edu (http://forensicscience.vcu.edu)

The Department of Forensic Science offers programs leading to bachelor’s and master’s degrees.

The Bachelor of Science is for students who plan a career or graduate study in the forensic sciences. The forensic science program provides students with fundamental learning in forensic laboratory analyses and crime scene investigation, with academic emphasis in biology, chemistry and criminal justice. The program offers three concentrations: forensic biology, forensic chemistry and physical evidence. Students will select one of the three concentrations prior to the second semester of their sophomore year. The B.S. in Forensic Science supplies students with the necessary skills for professional careers in forensic laboratories, public and private, basic research laboratories, clinical laboratories, and/or to pursue graduate studies. Students also will be prepared to pursue advanced degrees in the physical sciences, biological sciences, forensic science, law, allied health and medicine, to name a few.

The Master of Science in Forensic Science prepares students for careers as forensic scientists in government and private laboratories. Students receive in-depth exposure to specializations within the field, including drug analysis, DNA analysis, trace evidence, criminalistics and legal issues.

For more information visit forensicscience.vcu.edu (http://forensicscience.vcu.edu).

- Forensic Science, Master of Science (M.S.) with a concentration in:
  - Forensic biology (p. 100)
  - Forensic chemistry/drugs and toxicology (p. 102)
  - Forensic chemistry/trace (p. 104)
  - Forensic physical analysis (p. 107)

Forensic Science, Master of Science (M.S.) with a concentration in forensic biology

Program accreditation
Forensic Science Education Programs Accreditation Commission

Program goal
The Master of Science in Forensic Science is one of only a few of its kind in the U.S. The mission of the program is to prepare students for careers as forensic scientists in government and private forensic laboratories. In addition, students will be prepared to pursue further graduate and/or professional academic degrees.

Core courses in the forensic science curriculum offer broad exposure to forensic laboray equipment and instrumentation, as well as legal issues, expert testimony, forensic biology, forensic chemistry, trace evidence, physical evidence, professional ethics, quality assurance and current topics in research and development within the forensic sciences. Students entering the program will be required to select a concentration by the end of the first semester. Concentrations offered include forensic biology, forensic chemistry/drugs and toxicology, forensic chemistry/trace and forensic physical analysis. A strong emphasis is placed on laboratory course work, providing students with significant laboratory and research experience. Several of the laboratory courses are taught by practicing professional forensic scientists at the Virginia Division of Forensic Science Central Laboratory, which is nationally accredited by the American Society of Crime Laboratory Directors/Laboratory Accreditation Board.

Student learning outcomes
1. Students will be able to apply basic principles and laboratory procedures of biology and chemistry to forensic science through focused study in the available concentration options.
2. Students will demonstrate capabilities, use, potential and limitations of forensic laboratory theory and techniques.
3. Students will demonstrate the ability to perform (report and orally present) independent research in an area of forensic science.
4. Students will demonstrate an understanding of legal procedure, rules of evidence, ethical and professional duties and responsibilities of the forensic scientist.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the
University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

The forensic science graduate student handbook is available at forensiscience.vcu.edu/grad/handbook.html (http://forensiscience.vcu.edu/grad/handbook.html).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Mar 1</td>
<td>GRE</td>
</tr>
</tbody>
</table>

Note: Review of application and offers of admission will begin Jan. 15 and proceed until enrollment openings are filled.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in a natural science discipline, including forensic science, or a degree with equivalent course work
2. An undergraduate GPA that exceeds 2.9 on a 4.0 scale (Most students entering the forensic science graduate program have a minimum GPA of 3.0 on undergraduate work and a combined score of 300 or more on the verbal and quantitative sections of the GRE
3. Completion of eight credit hours (two semesters or equivalent) of organic chemistry with laboratories and eight credit hours (two semesters or equivalent) of general biology with laboratories
4. Assessment of prior graduate course work and/or relevant laboratory experience (where applicable)
5. Three letters of recommendation pertaining specifically to the student’s potential ability as a graduate student in forensic science
6. Personal statement
7. Satisfactory scores on GRE

Applicants are required to select a concentration and will be considered only for that concentration. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those required for the concentration.

Additional admission requirements for concentration in forensic biology

In addition to the M.S. in Forensic Science general admission requirements, applicants to the forensic biology concentration must have completed a minimum of nine credit hours or equivalent of upper-level course work in the biological or biochemical sciences. This may include, but is not limited to, course work in cell biology, general biochemistry, genetics and/or molecular biology.

Degree requirements

The graduate program is a full-time, two-year program. Courses will vary depending on the concentration selected. Required and elective courses are offered at various times, day and night, throughout the week. The M.S. in Forensic Science requires 42 graduate credit hours of course work, including 27 credit hours of required core course work and 15 credit hours of specialized course work designed for each concentration (including electives). The required course work includes a directed research project, which is an extensive research experience conducted within a forensic laboratory setting.

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students must complete a minimum of 42 graduate-level credit hours as outlined in the list of core and concentration requirements, including electives.
2. Grade requirements: Students must maintain an ongoing, cumulative minimum GPA of 3.0. Receipt of a grade of C in two or more courses will constitute an automatic dismissal from the graduate program in forensic science. Receipt of a grade of D or lower in any one course will constitute an automatic dismissal from the graduate program in forensic science.
3. Other requirements: Students must maintain continuous, full-time enrollment. Interruption in continuous enrollment or full-time status for any reason without a leave of absence approved by the forensic science graduate committee will require that students reapply to the program. Request for credit for graduate course work taken at other institutions must be submitted to the director of graduate studies in forensic science and will be considered on a case-by-case basis by the forensic science graduate committee. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those listed below. These will not count toward the 42 required credit hours.

Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/trace

Program accreditation
Forensic Science Education Programs Accreditation Commission
Program goal

The Master of Science in Forensic Science is one of only a few of its kind in the U.S. The mission of the program is to prepare students for careers as forensic scientists in government and private forensic laboratories. In addition, students will be prepared to pursue further graduate and/or professional academic degrees.

Core courses in the forensic science curriculum offer broad exposure to forensic laboratory equipment and instrumentation, as well as legal issues, expert testimony, forensic biology, forensic chemistry, trace evidence, physical evidence, professional ethics, quality assurance and current topics in research and development within the forensic sciences. Students entering the program will be required to select a concentration by the end of the first semester. Concentrations offered include forensic biology, forensic chemistry/drugs and toxicology, forensic chemistry/trace and forensic physical analysis. A strong emphasis is placed on laboratory course work, providing students with significant laboratory and research experience. Several of the laboratory courses are taught by practicing professional forensic scientists at the Virginia Division of Forensic Science Central Laboratory, which is nationally accredited by the American Society of Crime Laboratory Directors/Laboratory Accreditation Board.

Student learning outcomes

1. Students will be able to apply basic principles and laboratory procedures of biology and chemistry to forensic science through focused study in the available concentration options.
2. Students will demonstrate capabilities, use, potential and limitations of forensic laboratory theory and techniques.
3. Students will demonstrate the ability to perform (report and orally present) independent research in an area of forensic science.
4. Students will demonstrate an understanding of legal procedure, rules of evidence, ethical and professional duties and responsibilities of the forensic scientist.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

The forensic science graduate student handbook is available at forensicscience.vcu.edu/grad/handbook.html (http://forensicscience.vcu.edu/grad/handbook.html).

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

Note: Review of application and offers of admission will begin Jan. 15 and proceed until enrollment openings are filled.

In addition to the general admission requirements of the VCU Graduate School (http://www.pubapps.vcu.edu/Bulletins/prog_search/?uid=10045&iid=30033&did=20062), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in a natural science discipline, including forensic science, or a degree with equivalent course work
2. An undergraduate GPA that exceeds 2.9 on a 4.0 scale (Most students entering the forensic science graduate program have a minimum GPA of 3.0 on undergraduate work and a combined score of 300 or more on the verbal and quantitative sections of the GRE
3. Completion of eight credit hours (two semesters or equivalent) of organic chemistry with laboratories and eight credit hours (two semesters or equivalent) of general biology with laboratories
4. Assessment of prior graduate course work and/or relevant laboratory experience (where applicable)
5. Three letters of recommendation pertaining specifically to the student’s potential ability as a graduate student in forensic science
6. Personal statement
7. Satisfactory scores on GRE

Applicants are required to select a concentration and will be considered only for that concentration. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those required for the concentration.

Additional admission requirements for concentration in forensic chemistry/trace

In addition to the M.S. in Forensic Science general admission requirements, applicants to the forensic chemistry/trace concentration must have completed a minimum of nine semester credit hours or equivalent of upper-level chemistry course work. This may include, but is not limited to, course work in physical chemistry, instrumental analysis, quantitative analysis and/or inorganic chemistry.

Degree requirements

The graduate program is a full-time, two-year program. Courses will vary depending on the concentration selected. Required and elective courses are offered at various times, day and night, throughout the week. The M.S. in Forensic Science requires 42 graduate credit hours of course work, including 27 credit hours of required core course work and 15 credit hours of specialized course work designed for each concentration (including electives). The required course work includes a directed research project, which is an extensive research experience conducted within a forensic laboratory setting.

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students must complete a minimum of 42 graduate-level credit hours as outlined in the list of core and concentration requirements, including electives.
2. Grade requirements: Students must maintain an ongoing, cumulative minimum GPA of 3.0. Receipt of a grade of C in two or more courses will constitute an automatic dismissal from the graduate program in forensic science. Receipt of a grade of D or lower in any one course will constitute an automatic dismissal from the graduate program in forensic science.
3. Other requirements: Students must maintain continuous, full-time enrollment. Interruption in continuous enrollment or full-time status for any reason without a leave of absence approved by the forensic science graduate committee will require that students reapply to the program. Request for credit for graduate course work taken at other institutions must be submitted to the director of graduate studies in forensic science and will be considered on a case-by-case basis by the forensic science graduate committee. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those listed below. These will not count toward the 42 required credit hours.

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:

M.S. Fall Mar 1 GRE

Note: Review of application and offers of admission will begin Jan. 15 and proceed until enrollment openings are filled.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in a natural science discipline, including forensic science, or a degree with equivalent course work.
2. An undergraduate GPA that exceeds 2.9 on a 4.0 scale (Most students entering the forensic science graduate program have a minimum GPA of 3.0 on undergraduate work and a combined score of 300 or more on the verbal and quantitative sections of the GRE).
3. Completion of eight credit hours (two semesters or equivalent) of organic chemistry with laboratories and eight credit hours (two semesters or equivalent) of general biology with laboratories.
4. Assessment of prior graduate course work and/or relevant laboratory experience (where applicable).
5. Three letters of recommendation pertaining specifically to the student’s potential ability as a graduate student in forensic science.
6. Personal statement.
7. Satisfactory scores on GRE.

Applicants are required to select a concentration and will be considered only for that concentration. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those required for the concentration.

Additional admission requirements for concentration in forensic physical analysis

In addition to the M.S. in Forensic Science general admission requirements, applicants to the forensic physical analysis concentration must have completed a minimum of nine credit hours or equivalent of upper-level science course work. This may include, but is not limited to, course work in the areas of biology, chemistry, physics or biochemistry.

Degree requirements

The graduate program is a full-time, two-year program. Courses will vary depending on the concentration selected. Required and elective courses are offered at various times, day and night, throughout the week. The M.S. in Forensic Science requires 42 graduate credit hours of course work, including 27 credit hours of required core course work and 15 credit hours of specialized course work designed for each concentration (including electives). The required course work includes a directed research project, which is an extensive research experience conducted within a forensic laboratory setting.

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

Gender, Sexuality and Women’s Studies, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The Department of Gender, Sexuality and Women’s Studies is devoted to the interdisciplinary, multicultural study of the achievements, contributions, perspectives, experiences, roles and status of women encompassing the intersectionality of race, class, age, ethnicity, disability status, nationality and sexual identity.

Student learning outcomes
1. Have a firm grasp of the feminist paradigm, including feminist theories and the theoretical frameworks that inform the analysis of social, cultural, historical, economic and political forces that shape the experiences of women
2. Demonstrate facility for problem-solving and critical-thinking
3. Demonstrate facility for intersectional analysis as it relates to diversity
4. Be grounded in and understand the linkages between the liberal arts and sciences including commonalities, differences and contributions of each to the field of gender, sexuality and women’s studies

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Special requirements**

- Fall semester entrance is required for students without prior course work in gender, sexuality or women's studies (graduate or undergraduate).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission: Students possessing a B.A. or B.S. degree are eligible for admission into this certificate program.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students in the Certificate in Gender, Sexuality and Women's Studies program are required to earn a minimum of 15 graduate-level credit hours beyond the baccalaureate.

2. Grade requirements: An overall GPA of 3.0 is required for award of the certificate, and no more than three credit hours of C may be earned in the certificate program curriculum.

**Curriculum requirements**

**Required courses**

- GSWS 501 Feminist Theory 3
- GSWS 602 Feminist Research Epistemology and Methods 3
- GSWS 620 Theorizing Sexuality 3

**Recommended electives**

Select two of the following: 1
- GSWS 622 Women and Public Policy
- GSWS 624 Gender and Cultural Production

1 Courses outside departmental GSWS offerings required prior approval.

**Total graduate credit hours required (minimum) 15**

**Sarah Meacham, Ph.D.**
Associate professor and director of graduate studies

**Kathleen Murphy**
Administrative coordinator

The Department of History offers programs at the graduate and undergraduate levels, specializing in a multidimensional analysis of the human past. Faculty research interests vary among thematic, topical, national or chronological emphases. For more information regarding the department and its specialty areas, visit the web at history.vcu.edu (http://history.vcu.edu).

- History, Master of Arts (M.A.) (p. 110)

**History, Master of Arts (M.A.)**

**Program goals**

The master's program in history draws on faculty expertise and the wealth of historical resources available in the Richmond area to support the extended exploration of the human past and the craft of history. It prepares students for the successful practice of historical scholarship in a variety of fields including archives, libraries, historical sites, museums, government agencies, businesses, publishing and secondary education, as well as for advanced study in doctoral programs.
Student learning outcomes
Graduates of the program will:

1. Develop the ability to understand the processes and methodologies historians use to study the past
2. Develop the ability to understand and think critically about scholarly works of history
3. Develop the ability to do historical research and present interpretations in writing
4. Develop the ability to understand the myriad of forces that shape human experiences and critically weigh change and continuity over time

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements
Degree: Semester(s) of entry: Deadline dates: Test requirements:
M.A. Fall Jul 1 GRE
Spring Dec 1

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Normally, 30 credit hours of undergraduate history courses, of which 18 credit hours should be at the upper-division level
2. A GPA indicative of the ability to successfully pursue a graduate degree
3. Three letters of recommendation from persons qualified to provide information concerning the applicant’s probable success in graduate school
4. Satisfactory completion of the Graduate Record Examination
5. Submission of a written statement of intent, indicating why the applicant wishes to pursue a graduate degree in history

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. The Master of Arts in History may be achieved through one of two options:
   a. The thesis option requires 30 graduate credit hours with six credit hours of HIST 698.
   b. The non-thesis option requires 36 graduate credit hours with a minimum of six credits in research-level courses and an oral comprehensive exam.
2. At least half of the credit hours presented for graduation must be at the 600 level or higher.
3. Students may take up to six credits of non-history electives from an approved list of elective courses. In addition, students who wish to pursue specific areas of study may, with the approval of the graduate director, substitute other courses when appropriate, but in no case shall be able to count more than six credit hours of non-history courses.

Curriculum requirements
Thesis option
Required courses
HIST 601 Historiography and Methodology 3
HIST 698 M.A. Thesis 6
Electives
Select seven of the following: 21
HIST 511  Studies in American History
HIST 515  Studies in European History
HIST 519  Studies in Ethnic and Social History
HIST 523  Studies in Virginia and Southern History

or HIST 693  Internship in History
TEDU 627  Exploring Historical Consciousness

Total Hours 30

1  With prior approval, a student may take up to six graduate credit hours from outside of the history department.
2  Six credits maximum allowed for independent study or internship.

Program website: history.vcu.edu (http://history.vcu.edu)

Department of Kinesiology and Health Sciences

Edmund O. Acevedo, Ph.D.
Associate professor and chair
khs.vcu.edu (http://khs.vcu.edu)

The Department of Kinesiology and Health Sciences offers programs that prepare students to pursue careers in community health, careers that employ exercise interventions for both healthy and diseased populations and/or careers designed for students who wish to enter a health care-related field (that does not require licensure, certification or registry status). The department offers one undergraduate degree program: the Bachelor of Science in Health, Physical Education and Exercise Science. There are three concentrations within the B.S. in Health, Physical Education and Exercise Science: community health education, exercise science and health science.

Along with the undergraduate program, the department also offers a Master of Science in Health and Movement Sciences and Doctor of Philosophy in Rehabilitation and Movement Science.

The M.S. in Health and Movement Sciences program provides advanced course work for students interested in the application of health and movement science principles to exercise science, teaching and sports medicine. This program has a central focus on the sciences and is
Health and Movement Sciences, Master of Science (M.S.) with a concentration in exercise science

Program goal
This program provides advanced course work for students interested in the application of health and movement science principles to exercise science, teaching and sports medicine. Applicants planning to enter the teaching profession should hold a valid teaching endorsement. Students admitted to this program typically have backgrounds in exercise science, life science or related fields. This program does not provide opportunities for initial licensure in health and physical education.

Student learning outcomes
1. Demonstrate an understanding of research design and statistical applications relative to the disciplines comprising the health and movement sciences.
2. Demonstrate mastery of essential knowledge in health and movement science.
3. Demonstrate a comprehensive or advanced knowledge of the field of health and movement science.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

In addition to the general admission requirements of the VCU Graduate School (p. 30), applicants must have received a bachelor's degree in exercise science or a related field from an accredited university or college.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.S. in Health and Movement Sciences program are required to earn a minimum of 36 graduate-level credit hours beyond the baccalaureate. At least one-
Choosing a concentration preparedness for graduate work.

2. Master’s-level candidacy and requirements: The Master of Science in Health and Movement Sciences program offers a thesis and non-thesis option. After completing at least 12 graduate credit hours and not more than 18 credit hours, with a minimum GPA of 3.0, all students must apply for advancement to candidacy. In the thesis option, students must complete HEMS 798 Thesis for six credit hours and 30 hours of prescribed course work. Students enrolling in this option will not be required to complete a comprehensive examination. In the non-thesis option, students must complete 36 hours of prescribed course work and must pass a comprehensive examination, which is taken after completing 30 hours of course work.

Graduate program director
Ronald K. Evans, Ph.D.
Associate professor and director of graduate studies, Department of Kinesiology and Health Sciences
rkevans@vcu.edu
(804) 828-1948

Program website: khs.vcu.edu (http://www.khs.vcu.edu)

Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology

Program goal

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity’s impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.
Student learning outcomes
At the completion of the program students will:
1. Demonstrate teaching effectiveness in the classroom, clinical environment or both
2. Have disseminated research findings at an appropriate regional, national or international conference
3. Demonstrate the ability to independently collect research data, analyze research data and synthesize conclusions from research data

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must:
1. Have completed at least one of a master’s degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
2. Provide official GRE score
3. Submit a curriculum vitae or professional resume indicating an applicant’s educational and career experience as well as evidence of research potential

Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:
1. A minimum of 50 credit hours developed in conjunction with their adviser(s)
2. Written and oral comprehensive examinations
3. All other university requirements of qualification for degree candidacy
4. Written dissertation based on a focused line of research
5. Oral defense of the dissertation

Department of Mathematics and Applied Mathematics

Glenn Hurlbert, Ph.D.
Professor and chair
math.vcu.edu (http://www.math.vcu.edu)

The Department of Mathematics and Applied Mathematics offers an undergraduate program leading to a Bachelor of Science in Mathematical Sciences with concentrations in applied mathematics, biomathematics, mathematics and secondary mathematics teacher preparation. The department administers the Master of Science in Mathematical Sciences concentrations in applied mathematics or mathematics and is involved in administering the Doctor of Philosophy in Systems Modeling and Analysis. The curricula of these programs are run jointly with additional concentrations offered by the Department of Statistical Sciences and Operations Research.

- Mathematical Sciences, Master of Science (M.S.) with a concentration in:
  - Applied mathematics (p. 118)
  - Mathematics (p. 120)
  - Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) (p. 122)

Mathematical Sciences, Master of Science (M.S.) with a concentration in applied mathematics

Program goal

The Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research jointly offer the M.S. in Mathematical Sciences.

The mission of the Department of Mathematics and Applied Mathematics is to foster excellence in mathematical research and to offer a strong undergraduate and graduate education that will prepare students for stimulating and rewarding employment, career and lifelong learning opportunities. In addition, the department strives to help all VCU students achieve a level of quantitative literacy and analytical skills enabling them to deal effectively with the quantitative issues that they will encounter throughout their lives.

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. Students may obtain a designation on their transcripts indicating that their graduate study has emphasized the applied mathematics concentration by completing the requirements that are listed here. A student who has not satisfied the requirements for one of the program concentrations offered, but who has otherwise fulfilled all the requirements for a master’s degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

Student learning outcomes

1. Students will develop creative-thinking skills to apply to mathematical problems and proofs.
2. Students will be able to analyze mathematical arguments and write their own arguments and proofs.
3. Students will be able to read and interpret mathematical literature including technical articles within their chosen mathematical subfield.
4. Students will be able to use technology, including specialized computational and graphics software, to test the validity of certain conjectures, to solve problems, to conduct mathematical experiments and do mathematical research.
**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry</th>
<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Mar 1</td>
<td>GRE – general</td>
</tr>
</tbody>
</table>

**Special requirements**

- Students should follow priority deadlines for funding consideration.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
2. Three letters of recommendation pertaining to the student’s potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master’s degree.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to meet the following requirements.

1. Credit hour requirements. Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements. For the non-thesis option, students must pass a comprehensive exam in the 600-level sequence (six credit hours) in the core and a comprehensive exam in two additional MATH courses (three credit hours each) of their choice.

2. Students will be able to analyze mathematical arguments and write their own arguments and proofs.
3. Students will be able to read and interpret mathematical literature including technical articles within their chosen mathematical subfield.
4. Students will be able to use technology, including specialized computational and graphics software, to test the validity of certain conjectures, to solve problems, to conduct mathematical experiments and do mathematical research.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

</tbody>
</table>

**Special requirements**

- Students should follow priority deadlines for funding consideration.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
2. Three letters of recommendation pertaining to the student’s potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master's degree.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to meet the following requirements.

1. Credit hour requirements. Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements. For the non-thesis option, students must pass a comprehensive exam in the 600-level sequence (six credit hours) in the core and a comprehensive exam in two additional MATH courses (three credit hours each) of their choice.

Graduate program director

Richard H. Hammack, Ph.D.
Graduate coordinator, concentrations in mathematics and applied mathematics
Email: rhammack@vcu.edu
Phone: (804) 828-6237

Program website: math.vcu.edu (http://www.math.vcu.edu)

Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.)

Program goal

The Ph.D. in Systems Modeling and Analysis is offered jointly by the Department of Statistical Sciences and Operations Research and the Department of Mathematics and Applied Mathematics. The program focuses on the development of the mathematical and computational skills used to conceptualize and analyze real-world systems. Faculty and students will engage and collaborate to contribute to the knowledge base used in the fields of science, medicine, business and engineering. The continued development of operations research, statistics and applied mathematics is critical to scientific advancement in the 21st century. The curriculum enables students to expand the frontiers of knowledge through original, relevant research involving quantitative and qualitative complex systems derived from real, contemporary problems facing our world.

Student learning outcomes

1. Gain a solid foundation in the theory and application of optimization, stochastic process, simulation, decision analysis and biomathematics, and demonstrate a comprehensive understanding of these concepts
2. Learn to perform appropriate collection, modeling and analysis of data using statistical methods
3. Demonstrate the ability to identify situations in which mathematics, operations research or statistics can be applied and model the situation
4. Demonstrate the ability to solve a wide variety of mathematics, operations research or statistics problems using the software commonly used in industry
5. Demonstrate the ability to write code using appropriate research programming environments to implement research ideas
6. Learn how to interpret the analysis from mathematics, operations research or statistics models to draw meaningful conclusions about the systems being studied
7. Gain the ability to successfully communicate research ideas through writing and presentations
8. Gain the skills needed to successfully participate in research under the guidance of faculty

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>Jul 1</td>
<td></td>
</tr>
</tbody>
</table>

Note: Assistantships are only available starting in the fall semester. Spring and summer semester admission deadlines are only for students not seeking an assistantship.

In addition to general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Have completed an undergraduate degree with at least 30 credit hours of undergraduate-level mathematics, including calculus I and II, multivariate calculus, linear algebra, probability and statistics
2. Have completed 18 credit hours in the following six graduate courses: optimization, stochastic simulation, mathematical statistics I and II, differential equations and real analysis, or they can be conditionally admitted to the program pending completion of these six courses with a minimum grade of B in each course

Students who received their previous degree more than three years prior to entering this program and who have not taken additional courses in mathematics, operations research or statistics in the past three years will be required to take an entrance exam covering the six graduate courses listed in item 2 above.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the systems modeling and analysis Ph.D. program are required to earn a minimum of 57 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Doctoral candidacy: Admission to candidacy is made by evaluation of a qualifying portfolio, including exams and project work from courses; writing samples from the research seminars (SYSM 681, SYSM 682 and SYSM 683); research products from systems research projects (SYSM 697); and statements from faculty advisers and instructors. The portfolio can be submitted after all course work has been completed, as well as any additional preparatory course work required at admission. The candidacy committee will evaluate the
student’s readiness to begin their dissertation work. Supplementary examination may be required by the committee.

3. Dissertation proposal: After admission to candidacy and the completion of all course work, the student will prepare a written and oral proposal of the intended dissertation research area, including a complete literature review. A successful proposal must be completed at least nine months prior to the dissertation defense.

4. Dissertation defense: The student must complete 18 credit hours in SYSM 798 resulting in a publishable dissertation and a successful oral defense. The student also must have submitted at least one paper to a refereed academic journal and prepared a second manuscript or given a conference presentation on the research prior to the defense.

**Total graduate credit hours required (minimum) 57**

1. Students are required to take SYSM 697 with a faculty adviser before admission to candidacy.

2. Students must complete at least 12 credit hours at the 700-level and must complete courses in at least two of the following subject areas: mathematics, operations research and statistics. If students choose to take electives in two subject areas, they must take at least six credit hours in each area. If students choose to take electives in three subject areas, they must take at least three credit hours in each area. Electives will be determined based on a student’s research interests and in consultation with their advisers and the graduate program director.

Department of Philosophy
Anthony Ellis
Professor and chair
philosophy.vcu.edu (http://philosophy.vcu.edu)

Philosophy aims at a deeper understanding of matters that should most concern the human race. Philosophical questions crop up in science, religion, art, morality, politics, medicine and in everyday life. Students enrolled in philosophy are encouraged to think seriously about fundamental issues in all these domains and to formulate coherent and well-grounded points of view. Because of its extensive use of critical and analytical reasoning, philosophy equips students for careers in medicine, law, business and other fields that require careful thought and the clear expression of ideas.

The Department of Philosophy offers a Bachelor of Arts in Philosophy. The department offers courses for students in other programs, as well as for those majoring in philosophy or religious studies.

Department of Physics
Robert Gowdy, Ph.D.
Associate professor and chair
physics.vcu.edu (http://www.physics.vcu.edu)

The Department of Physics offers programs leading to the Bachelor of Science in Physics and the Master of Science in Physics and Applied Physics. The department also offers an accelerated B.S.-M.S. program that allows students in the baccalaureate program to take graduate courses that will count toward the M.S. in Physics degree.

- Physics and Applied Physics, Master of Science (M.S.) (p. 125)
- Physics and Applied Physics, Master of Science (M.S.), accelerated Bachelor of Science in Physics (B.S.) to master's (p. 127)

Physics and Applied Physics, Master of Science (M.S.)

Program goal
The Department of Physics teaches graduate students advanced concepts, applications and skills that reach to the frontiers of current research in physics. The master’s program offers traditional core physics courses and a variety of specialized electives emphasizing the department’s strengths in theoretical and experimental physics. Research interests include theoretical and experimental condensed matter physics, general relativity, and cosmology and physics education.

Student learning outcomes
1. Students will achieve a broad knowledge of the principles of physics.
2. Students will demonstrate analytical problem-solving skills.
3. Students will demonstrate mastery of a topic at the frontier of physics research.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Students must have a minimum of 30 credit hours in undergraduate physics or engineering, of which at least 18 credit hours must be at the upper-level in physics.
2. Students must present satisfactory GRE scores.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence or its part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit toward the graduate degree.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students are required to earn a minimum of 30 graduate credit hours with at least 15 credit hours at the 600 level. PHYS 690 and PHYS 697 may not exceed 15 of the required 30 credit hours.
2. M.S. plan of study: Students will choose a primary adviser during the first semester of study. At the end of the first semester, the student and adviser will propose an M.S. plan of study to the physics graduate curriculum committee. This plan will include the graduate courses and research subject matter to fulfill the student’s individual career goals. Normally, students will select courses for their individual M.S. plans of study from the list of graduate courses in physics. The courses selected will include no fewer than nine credits of traditional physics core courses, such as PHYS 576 and PHYS 580, to provide a solid foundation in fundamental physics. However, students also may select graduate courses in chemistry, mathematics, computer science and engineering, as well as courses from the School of Medicine and the School of Education, when such courses are consistent with the student’s career goals. The M.S. plan of study must be approved by the physics graduate curriculum committee. Courses taken outside this plan will not count toward the above general course requirements.
3. Thesis or non-thesis option: Each student must select either the thesis option or non-thesis option. Students selecting the thesis option must take at least nine credit hours of PHYS 697. No more than nine credit hours of directed research may be counted toward the 15 credit-hour, 600-level requirement. Students selecting the non-thesis option may take no more than three credit hours of PHYS 697. A student who elects the non-thesis option must pass a written comprehensive exam administered by the physics graduate curriculum committee.

**Physics and Applied Physics, Master of Science (M.S.), accelerated Bachelor of Science in Physics (B.S.) to master’s**

Students who are enrolled in the B.S. in Physics program may elect to take graduate courses that will count toward the M.S. in Physics and Applied Physics degree. Up to six hours of graduate credit may be earned in this way without any special provision. In order to offer more than six hours of pre-admission graduate credit toward the graduate degree, a student must apply to the Department of Physics graduate admission committee for admission to the accelerated B.S.-M.S. program.

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Persons applying for admission to this program should (1) submit a curricular plan for completing the bachelor’s degree within two years or its part-time equivalent, (2) indicate which graduate courses they intend to offer toward the physics master’s degree and (3) have a B average or better. The M.S. degree completion form must include a memo from the Department of Physics graduate admission committee to indicate which graduate courses were taken under the accelerated B.S.-M.S. program.

psychology.vcu.edu (http://www.psychology.vcu.edu)

In addition to the Bachelor of Science in Psychology, the Department of Psychology offers instruction in clinical, counseling, health and general psychology leading to the Doctor of Philosophy degree. Students in all doctoral degree programs are educated first as psychologists and then helped to develop competence in a more specialized area relevant to their scholarly and professional objectives. In addition, special training and experience in college teaching is available.

**Admission requirements for doctoral programs**

In addition to the general requirements for admission to the graduate programs in the Graduate School (in the Graduate study section of this bulletin), the following requirements represent the minimum acceptable standards for admission:

- Graduation with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.
- 18 semester hours of undergraduate course work in psychology is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete

---

Graduation with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Persons applying for admission to this program should (1) submit a curricular plan for completing the bachelor's degree within two years or its part-time equivalent, (2) indicate which graduate courses they intend to offer toward the physics master's degree and (3) have a B average or better. The M.S. degree completion form must include a memo from the Department of Physics graduate admission committee to indicate which graduate courses were taken under the accelerated B.S.-M.S. program.
some additional undergraduate courses at the beginning of their graduate study program.

- An undergraduate record indicating superior academic potential.
- Satisfactory performance on the GRE.
- Three letters of recommendation from previous instructors.
- A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed. See the admission requirements summary tables to view admission deadlines for each of the Ph.D. programs: clinical psychology, counseling psychology, general psychology (biopsychology, developmental psychology, social psychology) and health psychology.

Applicants to the general psychology program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social).

Transfer credits for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

### Degree requirements for doctoral programs

The following requirements are in addition to those described for the graduate programs in the Graduate School (the Graduate study section of this bulletin) and the College of Humanities and Sciences section of this bulletin.

All students are required to complete a core curriculum of 15 credits (or its equivalent for students entering with a master’s degree).

Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor), or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program.

Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty advisor and graduate program committee.

Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credits of psychology courses, constitutes automatic dismissal of a student from the program.

All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee.

The residence requirement for the master’s degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six semester credits in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application for a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student’s request and approves or disapproves the request.

The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs.

With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major.

Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit will vary depending on the program. Internship will be one-half credit per semester.

A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 semester credits in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree.

Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology’s Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (http://www.psychology.vcu.edu).

Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in behavioral medicine

Program accreditation
American Psychological Association

Program goal
The Doctor of Philosophy in Clinical Psychology offered by VCU is accredited by the American Psychological Association. The program emphasizes the scientist-practitioner model and prepares students for research and service in professional psychology, including positions in university academic and medical school departments, counseling centers, mental health agencies and hospitals, physical health facilities, and other organizational settings.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes
1. Students will know, integrate and critically evaluate the literature in the breadth of scientific and clinical psychology.
2. Students will be able to contribute to the scientific literature and disseminate the information from their contributions.
3. Students will know and be able to apply the scientific, methodological and theoretical foundations of practice in the substantive areas of professional psychology.
4. Students will know the available empirically supported treatment techniques and be competent in their use.
5. Students will know how to operationalize treatment outcome goals and will consistently evaluate treatment outcome with all clinical cases.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate coursework in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate
work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.

3. Applicants must present an undergraduate record indicating superior academic potential.

4. Students must show proof of satisfactory performance on the GRE.

5. Three letters of recommendation from previous instructors are required.

6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the clinical psychology Ph.D. program are required to earn a minimum of 87.5 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.

3. Master’s-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master’s degree. Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty adviser and graduate program committee. All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master’s degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student’s request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. 5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the clinical psychology Ph.D. program are required to earn a minimum of 87.5 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master’s-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master’s degree. Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty adviser and graduate program committee. All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The

Counseling Psychology, Doctor of Philosophy (Ph.D.)

Program accreditation
American Psychological Association

Program goal
The Doctor of Philosophy in Counseling Psychology offered at VCU is accredited by the American Psychological Association. The program emphasizes the scientist-practitioner model and prepares students for research and service in professional psychology, including positions in university academic and medical school departments, counseling centers, mental health agencies and hospitals, physical health facilities, and other organizational settings.

The counseling psychology program emphasizes the enhancement of life skills and personal competence. Typical subspecializations include disease prevention and health promotion, career and life planning, work with medical populations, college students, community outreach, interpersonal processes, group counseling, marriage and family counseling, multiculturalism, and sport psychology.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes
1. Students will gain a thorough grounding in research strategies, theories and content of psychology that provides a foundation for mastering the applied knowledge and skills of the profession.
2. Students will demonstrate competence in the provision of cutting-edge empirically informed professional practice, an ability to communicate about clinical case material, and will obtain and complete an APA-approved internship.
3. Students will become knowledgeable about the principles of leadership and their own approach and orientation to becoming a leader in counseling psychology.
4. Students must demonstrate that they have been exposed to a variety of cultures, have made an effort to become aware of their own culturally based values and attitudes and have developed skills as part of an ongoing commitment to increasing their multicultural competence.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

| Degree: Ph.D. | Semester(s) of entry: Fall | Deadline dates: Dec 1 | Test requirements: GRE-General |
In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.

2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.

3. Applicants must present an undergraduate record indicating superior academic potential.

4. Students must show proof of satisfactory performance on the GRE.

5. Three letters of recommendation from previous instructors are required.

6. A personal interview may be required at the discretion of the department

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

The finalists for admission will be interviewed on site (or by phone) by counseling faculty.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the counseling psychology Ph.D. program are required to earn a minimum of 90.5 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.

3. Master’s-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (14 credit hours) or its equivalent for students entering with a master’s degree. Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty adviser and graduate program committee. All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master’s degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student’s request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology’s Graduate Student Handbook, which is provided to each incoming graduate student.
Visit the website for more information: psychology.vcu.edu (http://www.psychology.vcu.edu).

## Health Psychology, Doctor of Philosophy (Ph.D.)

### Program goal

The Doctor of Philosophy in Health Psychology offered by VCU is an experimental program that is designed to train students to contribute to the knowledge of psychological contributions to health and illness via training in basic and clinical research. Students completing the Ph.D. in Health Psychology will not be eligible for licensure. Research in health psychology examines the causes and development of illness, methods to help individuals develop healthy lifestyles to promote good health and prevent illness, the treatment individuals receive for their medical problems, the effectiveness with which individuals cope with and reduce stress and pain, biopsychosocial connections with immune functioning, and factors in the recovery, rehabilitation and psychosocial adjustment of patients with serious health problems. Thus, graduates from the Ph.D. program in Health Psychology are prepared for work in a variety of settings including colleges and universities, medical centers, research centers, nonprofit agencies and local, state and national government.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

### Student learning outcomes

1. Students will demonstrate their understanding of the models, theories and processes of health psychology; the biological, cognitive, attitudinal, social and cultural underpinnings of health psychology; primary and secondary prevention of disease in a diverse range of communities; and community applications of health psychology.
2. Students will use scientifically sound research methodologies, univariate and multivariate statistics and ethical practices in their conduct of research.

3. Students will adhere to the highest standards of ethics in their research, teaching and applied practice. Students will follow standards set by the University and the American Psychological Association.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Applicants must have graduated with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.

2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.

3. Applicants must present an undergraduate record indicating superior academic potential.

4. Students must show proof of satisfactory performance on the GRE.

5. Three letters of recommendation from previous instructors are required.

6. A personal interview may be required at the discretion of the department

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the health psychology Ph.D. program are required to earn a minimum of 80 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.

3. Master’s-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master’s degree. Students who receive grades of B or better in each of the department core courses are considered
to have fulfilled the university requirements of a master's-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program.

Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee. All students are required to complete a master's thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master's degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master's level will be evaluated by the appropriate program committee after completion of all requirements for the master's degree. The program committee reviews the student's request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology's Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (http://www.psychology.vcu.edu).

**Curriculum requirements**

### Department core courses

Phone: (804) 828-0133

**Program website:** psychology.vcu.edu/health (http://www.psychology.vcu.edu/health/index.shtml)

**Psychology, Doctor of Philosophy (Ph.D.) with a concentration in biopsychology**

**Program goal**

The Doctor of Philosophy in Psychology offered by VCU prepares students for basic or applied research and includes three specialty areas: biopsychology, developmental psychology and social psychology. The concentration in developmental psychology trains students for work in either college or university academic departments or applied settings. Applied developmentalists work in a variety of settings and programs (violence prevention, community intervention, schools, family service agencies, nonprofit agencies, health care settings, disability agencies) with a variety of human populations (infants and young children, school-age children, adolescents, at-risk youth, incarcerated youth and adults, parents, older adults, persons with disabilities); they do not offer counseling/therapy services.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.
Student learning outcomes

1. Students will acquire an accurate, comprehensive and up-to-date understanding of biopsychological concepts, principles and findings in the key domains of the field, including physiology, learning and memory, and current neuroscience principles.
2. Students will develop the intellectual skills required to generate theories, do research, communicate ideas and information to others, evaluate conclusions statistically, locate the information needed for these intellectual pursuits and prepare scientific reports.
3. Students will strive to expand the conceptual and empirical foundations of the field by conducting original research utilizing sound research methodologies. The results of these studies are presented at scientific conferences and published in scientific journals. This research is, in some cases, supported by extramural grants to biopsychology faculty or students.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Jan 10</td>
<td>GRE-General</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Applicants to the psychology doctoral program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social).

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the psychology Ph.D. program are required to earn a minimum of 72 graduate-level credit hours...
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.

3. Master's-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master's degree. Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master's-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee. All students are required to complete a master's thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student's request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology’s Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (http://www.psychology.vcu.edu).

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will demonstrate their understanding of the models, theories and processes of developmental psychology; the biological, cognitive, social and cultural underpinnings of human development; processes of normative developmental change across the lifespan; atypical development as found in psychopathology and disabilities; and community applications of developmental science.

2. Students will use scientifically sound research methodologies, univariate and multivariate statistics and ethical practices in their conduct of research.

3. Students will adhere to the highest standards of ethics in their research, teaching and applied practice. Students will follow standards set by the university, the American Psychological Association and the Society for Research in Child Development.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.
Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.granduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Applicants to the psychology doctoral program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social).

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the psychology Ph.D. program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master’s-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master’s degree. Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in one of the department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty adviser and graduate program committee. All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master’s degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.
4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student’s request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in
the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology’s Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (http://www.psychology.vcu.edu).

Curriculum requirements

### Department core courses
- **PSYC 619** Learning and Cognition  
- **PSYC 629** Biological Basis of Behavior  
- **PSYC 680** Statistics in Psychological Research I  
- **PSYC 681** Statistics in Psychological Research II  
- **Responsible conduct or research course**  

Select one of the following:  
- **GRTY 606** Aging and Human Values  
- **OVPR 601** Scientific Integrity  
- **OVPR 602** Responsible Scientific Conduct  
- **OVPR 603** Responsible Conduct of Research  
- **PSYC 675** Ethical Principles of Psychology  

### Developmental psychology concentration core courses
- **PSYC 603** Developmental Processes  
- **PSYC 613** Cognitive Development  
- **PSYC 636** Research Methods in Developmental Psychology  
- **PSYC 643** Principles of Psychological Measurement  
- **PSYC 671** Readings and Research  
- **PSYC 690** Research Practicum  

### Age-stage courses
Select nine credit hours from the following (three credit hours for M.S.):  
- **PSYC/GRTY 602** Psychology of Aging  
- **PSYC 606** Development in Middle Childhood  
- **PSYC 614** Development in Infancy and Early Childhood  
- **PSYC 628** Psychology of Adolescence  

### Cultural/individual diversity course
Select three credit hours from the following:  
- **PSYC 677** Minority Issues in Mental Health  
- **PSYC 679** Culture, Ethnicity and Health  
- **PSYC 691** Special Topics (African-American family)  

### Applied courses
Select six credit hours (three credit hours for M.S.) from the following or other applied-related course approved by adviser:  
- **IDDS 600** Interdisciplinary Studies in Developmental Disabilities: Teamwork in Serving Persons with Developmental Disabilities  
- **IDDS 691** Special Topics in Developmental Disabilities  
- **IDDS 692** Directed Study in Developmental Disabilities  
- **PSYC 631** Evaluation Research: Psychological Perspectives  
- **PSYC/GRTY 642** Practicum in Clinical Geropsychology  
- **PSYC 700** Grant Writing  
- **PSYC 795** Practicum in the Teaching of College Psychology  

### Psychopathology or disability course
Select three credit hours from the following or other relevant psychopathology or disability-related course approved by adviser:  
- **IDDS 600** Interdisciplinary Studies in Developmental Disabilities: Teamwork in Serving Persons with Developmental Disabilities  
- **IDDS 691** Special Topics in Developmental Disabilities  
- **IDDS 692** Directed Study in Developmental Disabilities  
- **PSYC/GRTY 615** Aging and Mental Disorders  
- **PSYC 616** Psychopathology  
- **PSYC 650** Advanced Child Psychopathology  
- **SEDP 705** Seminar on Disability Policy  

### Methodology/statistics course
Select three credit hours from the following or other relevant methodology/statistics-related course approved by adviser:  
- **BIOS/STAT 543** Statistical Methods I  
- **BIOS/STAT 544** Statistical Methods II  
- **EDUS 651** Topics in Education  
- **HADM 762** Health Services Research Methods II  
- **NURS 772** Qualitative Research Design and Analysis  
- **PSYC/MGMT 702** Causal Analysis for Organizational Studies  
- **SCMA 643** Applied Multivariate Methods  
- **SOCY/PADM 605** Survey Research Methods  
- **SWKD 704** Multiparadigmatic Qualitative Methods and Analysis
Certificate in Aging Studies from the Department of Gerontology.

Required courses (27 credit hours)

GRTY 601 Biological and Physiological Aging
GRTY 602 Psychology of Aging
GRTY 605 Social Science Research Methods Applied to Gerontology
GRTY 606 Aging and Human Values
HGEN 620 Principles of Human Behavioral Genetics
PSYC 630 Social Psychology
PSYC 635/GRTY 627 Psychology of Health and Health Care in the Elderly
PSYC 640 Parenting
PSYC/GRTY 641 Survey of Psychological Assessment and Treatment of the Older Adult
PSYC 644 Individual Tests of Intelligence
PSYC 645 Assessment of Personality
PSYC 655 Community Interventions: Development, Implementation and Evaluation
PSYC 659 Seminar in Consultation Psychology
PSYC 660 Health Psychology
PSYC 671 Readings and Research
PSYC 690 Research Practicum
PSYC 691 Special Topics (child health, African-American family, school mental health)
SED 705 Seminar on Disability Policy

Recommended electives
Select from the following:  

1. GRTY 601 Biological and Physiological Aging
2. GRTY 602 Psychology of Aging
3. GRTY 605 Social Science Research Methods Applied to Gerontology
4. GRTY 606 Aging and Human Values
5. HGEN 620 Principles of Human Behavioral Genetics
6. PSYC 630 Social Psychology
7. PSYC 635/GRTY 627 Psychology of Health and Health Care in the Elderly
8. PSYC 640 Parenting
9. PSYC/GRTY 641 Survey of Psychological Assessment and Treatment of the Older Adult
10. PSYC 644 Individual Tests of Intelligence
11. PSYC 645 Assessment of Personality
12. PSYC 655 Community Interventions: Development, Implementation and Evaluation
13. PSYC 659 Seminar in Consultation Psychology
14. PSYC 660 Health Psychology
15. PSYC 671 Readings and Research
16. PSYC 690 Research Practicum
17. PSYC 691 Special Topics (child health, African-American family, school mental health)
18. SED 705 Seminar on Disability Policy

Thesis/dissertation

PSYC 798 M.S. Thesis
PSYC 898 Doctoral Dissertation

Total graduate credit hours required (minimum) 72

Note: Students specializing in lifespan development and gerontology must take the following set of gerontology courses in addition to other developmental and core requirements. These courses will result in a Certificate in Aging Studies from the Department of Gerontology.

GRTY 601 Biological and Physiological Aging
GRTY 602 Psychology of Aging
GRTY 605 Social Science Research Methods Applied to Gerontology
GRTY 692 Independent Studies

Six additional hours of gerontology electives, chosen with adviser

Graduate program director
Michael A. Southam-Gerow, Ph.D.
Associate professor and director of graduate studies
Email: masouthamger@vcu.edu
Phone: (804) 827-0585

Additional contact
Barbara J. Myers, Ph.D.
Director, developmental psychology division
Email: bmyers@vcu.edu
Phone: (804) 828-6752

Program website: psychology.vcu.edu/developmental (http://www.psychology.vcu.edu/developmental)

Psychology, Doctor of Philosophy (Ph.D.) with a concentration in social psychology

Program goal

The Doctor of Philosophy in Psychology offered by VCU prepares students for basic or applied research and includes three specialty areas: biopsychology, developmental psychology and social psychology. The concentration in developmental psychology trains students for work in either college or university academic departments or applied settings. Applied developmentalists work in a variety of settings and programs (violence prevention, community intervention, schools, family service agencies, nonprofit agencies, health care settings, disability agencies) with a variety of human populations (infants and young children, school-age children, adolescents, at-risk youth, incarcerated youth and adults, parents, older adults, persons with disabilities); they do not offer counseling/therapy services.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will achieve competency in their knowledge of all basic areas of the field, including social psychology, psychobiology, learning/cognition and statistics/research.
2. Students will have learned all the basic principles, theories and findings of the field of social psychology, including social thought and cognition, group processes, and personality and individual differences.
3. Students will have the intellectual skills required to generate theories, do research, communicate ideas and information to others, evaluate conclusions statistically, locate the information needed for these intellectual pursuits and prepare scientific reports.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are
established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Dec 15</td>
<td>GRE-General</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor’s degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Applicants to the psychology doctoral program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social).

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the psychology Ph.D. program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master’s-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master’s degree. Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master’s-level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course.
material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student’s faculty adviser and graduate program committee. All students are required to complete a master’s thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master’s thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master’s degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master’s degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master’s level will be evaluated by the appropriate program committee after completion of all requirements for the master’s degree. The program committee reviews the student’s request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology’s Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (http://www.psychology.vcu.edu).

Mathematical Sciences, Master of Science (M.S.) with a concentration in operations research

Program goal
The Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research jointly offer the M.S. in Mathematical Sciences.

The mission of the Department of Statistical Sciences and Operations Research is to offer a strong undergraduate and graduate education, with an increasing focus on the development of cross-disciplinary efforts that will prepare students for real-world applications and stimulating employment and career opportunities.

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. Students may obtain a designation on their transcripts indicating that their graduate study has emphasized the mathematics concentration by completing the requirements that are listed here. A student who has not satisfied the requirements for one of the program concentrations offered, but who has otherwise fulfilled all the requirements for a master's degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

Student learning outcomes
1. Students will demonstrate a comprehensive understanding of basic mathematical programming methods, stochastic models and decision analysis.
2. Students will be able to obtain, analyze and interpret the data necessary to perform operations research projects.
3. Students will be able to solve a wide variety of operations research problems using the software commonly used in industry.
4. Students will know how to clearly and concisely present technical information in writing and through oral presentations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
2. Three letters of recommendation pertaining to the student’s potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master’s degree.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to meet the following requirements.

1. Credit hour requirements: Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: All students must pass two comprehensive examinations: foundations of operations research, covering OPER 527 and OPER 528 and methods of operations research, covering OPER 639, OPER 643 and STAT 613. All students will be given two attempts to pass each exam.

Mathematical Sciences, Master of Science (M.S.) with a concentration in statistics

Program goal

The Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research jointly offer the M.S. in Mathematical Sciences.

The mission of the Department of Statistical Sciences and Operations Research is to offer a strong undergraduate and graduate education, with an increasing focus on the development of cross-disciplinary efforts that will prepare students for real-world applications and stimulating employment and career opportunities.

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. Students may obtain a designation on their transcripts indicating that their graduate study has emphasized the mathematics concentration by completing the requirements that are listed here. A student who has not satisfied the requirements for one of the program concentrations offered, but who has otherwise fulfilled all the requirements for a master's degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

Student learning outcomes
1. Students will demonstrate a comprehensive understanding of basic statistical concepts, probability and interference, general linear modeling, calculus, and linear algebra.
2. Students will know how to select appropriate samples and conduct appropriate experimental data collection methods.
3. Students will be able to perform appropriate analysis of data, including knowledge of the assumptions associated with the procedures and how to determine the appropriate procedure to use.
4. Students will be able to use statistical software packages to solve various problems.
5. Students will know how to clearly and concisely present technical information in writing and through oral presentations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin...
and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must form full application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
2. Three letters of recommendation pertaining to the student’s potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master’s degree.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to meet the following requirements.

1. Credit hour requirements: Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: All students must pass two comprehensive examinations: statistical theory (covering STAT 513 Mathematical Statistics I and STAT 514 Mathematical Statistics II) and statistical application (covering STAT 546 Linear Models, STAT 642 Design and Analysis of Experiments I and STAT 643 Applied Linear Regression). All students will be given two attempts to pass each exam.

Program website: stat.vcu.edu (http://www.stat.vcu.edu)
Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.)

Program goal

The Ph.D. in Systems Modeling and Analysis is offered jointly by the Department of Statistical Sciences and Operations Research and the Department of Mathematics and Applied Mathematics. The program focuses on the development of the mathematical and computational skills used to conceptualize and analyze real-world systems. Faculty and students will engage and collaborate to contribute to the knowledge base used in the fields of science, medicine, business and engineering. The continued development of operations research, statistics and applied mathematics is critical to scientific advancement in the 21st century. The curriculum enables students to expand the frontiers of knowledge through original, relevant research involving quantitative and qualitative complex systems derived from real, contemporary problems facing our world.

Student learning outcomes

1. Gain a solid foundation in the theory and application of optimization, stochastic process, simulation, decision analysis and biomathematics, and demonstrate a comprehensive understanding of these concepts
2. Learn to perform appropriate collection, modeling and analysis of data using statistical methods
3. Demonstrate the ability to identify situations in which mathematics, operations research or statistics can be applied and model the situation
4. Demonstrate the ability to solve a wide variety of mathematics, operations research or statistics problems using the software commonly used in industry
5. Demonstrate the ability to write code using appropriate research programming environments to implement research ideas
6. Learn how to interpret the analysis from mathematics, operations research or statistics models to draw meaningful conclusions about the systems being studied
7. Gain the ability to successfully communicate research ideas through writing and presentations
8. Gain the skills needed to successfully participate in research under the guidance of faculty

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

Note: Assistantships are only available starting in the fall semester. Spring and summer semester admission deadlines are only for students not seeking an assistantship.

In addition to general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Have completed an undergraduate degree with at least 30 credit hours of undergraduate-level mathematics, including calculus I and II, multivariate calculus, linear algebra, probability and statistics
2. Have completed 18 credit hours in the following six graduate courses: optimization, stochastic simulation, mathematical statistics I and II, differential equations and real analysis, or they can be conditionally admitted to the program pending completion of these six courses with a minimum grade of B in each course
Students who received their previous degree more than three years prior to entering this program and who have not taken additional courses in mathematics, operations research or statistics in the past three years will be required to take an entrance exam covering the six graduate courses listed in item 2 above.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the systems modeling and analysis Ph.D. program are required to earn a minimum of 57 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Doctoral candidacy: Admission to candidacy is made by evaluation of a qualifying portfolio, including exams and project work from courses; writing samples from the research seminars (SYSM 681, SYSM 682 and SYSM 683); research products from systems research projects (SYSM 697); and statements from faculty advisers and instructors. The portfolio can be submitted after all course work has been completed, as well as any additional preparatory course work required at admission. The candidacy committee will evaluate the student’s readiness to begin their dissertation work. Supplementary examination may be required by the committee.

3. Dissertation proposal: After admission to candidacy and the completion of all course work, the student will prepare a written and oral proposal of the intended dissertation research area, including a complete literature review. A successful proposal must be completed at least nine months prior to the dissertation defense.

4. Dissertation defense: The student must complete 18 credit hours in SYSM 798 resulting in a publishable dissertation and a successful oral defense. The student also must have submitted at least one paper to a refereed academic journal and prepared a second manuscript or given a conference presentation on the research prior to the defense.

</tr>
</tbody>
</table>

**Total Hours**: 57

1. Students are required to take SYSM 697 with a faculty adviser before admission to candidacy.

2. Students must complete at least 12 credit hours at the 700-level and must complete courses in at least two of the following subject areas: mathematics, operations research and statistics. If students choose to take electives in two subject areas, they must take at least six credit hours in each area. If students choose to take electives in three subject areas, they must take at least three credit hours in each area. Electives will be determined based on a student’s research interests and in consultation with their advisers and the graduate program director.

The School of Allied Health Professions was established on Jan. 1, 1969, to provide an administrative structure for existing educational programs in allied health disciplines and to direct the development of new programs in response to the growing need for allied health manpower. At the outset, the school incorporated existing educational programs for hospital administration, medical technology, physical therapy and radiologic technology and X-ray technicians.

In the years since its establishment, the school has grown significantly — developing unique, cutting-edge curricula and degree offerings in both traditional and nontraditional formats — to meet the increasing demand for allied health teachers, researchers and practitioners. Considered a leader in distance education, VCU’s School of Allied Health Professions offers the only interdisciplinary, Internet-based doctoral program in allied health in the country: the Ph.D. in Health Related Sciences. The school currently incorporates nine departments and offers programs at the baccalaureate, certificate, master’s, doctoral and professional levels.

### Administration

1200 East Broad Street

Cecil B. Drain, Ph.D., CRNA, FAAN, FASAHP  
Dean

Alexander F. Tartaglia, D.Min.  
Associate dean

Angela Duncan, Ph.D.  
Assistant dean for student affairs and community engagement

Brian T. McMahon, Ph.D., CRC, NCC, CCM  
Associate dean for research

Debra A. Ropelewski  
Associate dean for fiscal affairs

Jessica F. Gurganus  
Assistant dean for development

Jeffrey R. Lodge  
Director of information technology

Monica White  
Coordinator of student affairs and Ph.D. program

### Philosophy

The faculty of the school is committed to offering, through the establishment and maintenance of rigorous standards of excellence, educational programs that will prepare students for professional careers in the allied health disciplines. Development of professional attitudes, emotional maturity and ethical behavior of students is a vital component of the educational process. It is essential that students gain a deep respect for the dignity of human beings and the inherent rights of patients and others who receive services. The programs are designed to include not only the development of skills to assure excellence in quality of health care, but also factual knowledge and experiences that will provide the basis for continuing intellectual and professional growth.

Community services of the school and faculty include continuing education, consultative resources and participation in all pertinent areas of health care. An integral part of these efforts is to stimulate and sponsor research activities in the allied health disciplines represented within the school and to encourage interdisciplinary research.

### Accreditation

The School of Allied Health Professions is an institutional member of the American Society of Allied Health Professions and the Virginia Association of Allied Health Professions. All of its programs are approved or accredited by the appropriate national professional or educational organizations.

### Clinical laboratory sciences (bachelor’s degree)

National Accrediting Agency for Clinical Laboratory Sciences  
5600 N. River Road, Suite 720, Rosemont, IL 60018-5519; (847) 939-3597, (773) 714-8880 or (773) 714-8886 (fax); infor@naacls.org;  
www.naacls.org (http://www.naacls.org). Upon graduation the student is eligible to take the national examination for MLS given by the Board of Certification of the American Society for Clinical Pathology.

### Health administration (master’s and executive master’s degrees)

Commission on Accreditation of Healthcare Management Education

### Nuclear medicine technology (bachelor’s degree in Clinical Radiation Sciences)

Joint Review Committee on Educational Programs in Nuclear Medicine Technology

### Nurse anesthesia (master’s, doctorate)

Council on Accreditation of Nurse Anesthesia Educational Programs  
(COA, 222 South Prospect Avenue, Park Ridge, Illinois, 847-692-7050).

The COA is recognized by the U.S. Department of Education and the Council on Higher Education Accreditation to accredit programs of nurse anesthesia at the master’s, post-master’s and doctoral levels.

Graduates of the master’s program are eligible to take the examination for certification conducted by the Council on Certification of Nurse Anesthetists.

### Occupational therapy (master’s degree)

Accreditation Council for Occupational Therapy Education

### Patient counseling (certificate)

Association for Clinical Pastoral Education

### Physical therapy (D.P.T.)

Commission on Accreditation in Physical Therapy Education
Radiation therapy technology (bachelor’s degree in Clinical Radiation Sciences)
Joint Review Committee on Education in Radiologic Technology

Radiography (bachelor’s degree in Clinical Radiation Sciences)
Joint Review Committee on Education in Radiologic Technology

Rehabilitation counseling (master’s degree)
Council on Rehabilitation Education

Programs

Both entry- and advanced-level undergraduate, graduate, professional and certificate programs are offered by the School of Allied Health Professions. University and accreditation requirements for the individual programs guide the establishment of general admission prerequisites and course and degree requirements. Regulations and procedures for each program are outlined in these bulletins and are intended to ensure the selection of applicants whose motivation, ability, character and health status qualify them to pursue their program of study successfully.

Programs currently offered by this school and the degrees conferred on their graduates are:

School of Allied Health Professions – Dean’s Office
• Ph.D. in Health Related Sciences

Department of Clinical Laboratory Sciences
• Bachelor of Science
• Master of Science

Department of Gerontology
• Post-baccalaureate graduate certificate in aging studies
• Post-baccalaureate graduate certificate in aging studies and Master of Social Work (offered jointly with the VCU School of Social Work)
• Master of Science

Department of Health Administration
• Master of Health Administration
• Master of Health Administration and Doctor of Medicine (offered jointly with the VCU School of Medicine)
• Master of Health Administration and Juris Doctor (offered jointly by the T. C. Williams School of Law at the University of Richmond and the Washington and Lee University School of Law)
• Master of Health Administration and Master of Science in Information Systems (offered jointly with the VCU School of Business)
• Master of Science in Health Administration (Professional M.S.H.A. Program – Online)
• Ph.D. in Health Services Organization and Research

Department of Nurse Anesthesia
• Doctor of Nurse Anesthesia Practice
• Master of Science in Nurse Anesthesia

Department of Occupational Therapy
• Master of Science in Occupational Therapy
• Master of Science in Occupational Therapy and certificate in aging studies
• Occupational Therapy Doctorate

Department of Patient Counseling
• Post-baccalaureate graduate certificate in patient counseling
• Master of Science
• Master of Science and Master of Divinity (offered jointly by the School of Theology at Virginia Union University and the Baptist Theological Seminary)

Department of Physical Therapy
• Doctor of Physical Therapy
• Ph.D. in Rehabilitation and Movement Science

Department of Radiation Sciences
• Bachelor of Science

Department of Rehabilitation Counseling
• Master of Science
• Master of Science in Rehabilitation Counseling and certificate in aging studies
• Post-master’s certificate in professional counseling

Licensure/certification

Graduates of most of the programs offered in the School of Allied Health Professions are required or eligible to take national and/or state certification or licensure examinations. Requirements of licensing and certifying agencies vary. Some licensure and certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For information, prospective students should contact the licensure or certification agency for the specific allied health discipline.

Attendance regulations

The faculty considers attendance at lectures, laboratories and other functions a requisite to the successful acquisition of the knowledge and skills required of the professional. Hence, the faculty cannot condone absence without good reason from any regularly scheduled educational experience. At the beginning of each course, instructors relate to their classes the policy of the department concerning the attendance regulations for that semester. The nature of make-up work in the event of absence will be the prerogative of the instructor.

Student performance and behavior

The goals and objectives of the School of Allied Health Professions and its component departments and programs relate to the education of persons preparing for professional careers in the allied health disciplines. An integral requisite of students and practitioners is an undeviating acceptance of a professional attitude and pride that will motivate them to adhere to a code of professional ethics and to develop fully their competencies for practice.

The suitability of student performance and behavior relating to these professions and to the consumers of health care is a paramount concern of the administration and faculty of this school. To assure a quality of educational and clinical preparation for its graduates, the following statement is promulgated:
• If, in the judgment of the faculty and administration of the School of Allied Health Professions, a student is not considered suitable for emotional, professional or related reasons, the student’s academic status may be appropriately altered.

If any questions arise regarding the standards of performance or behavior, it is the responsibility of students to apprise themselves of acceptable character and conduct requirements prior to matriculation in the designated department or program.

Standards of professional behavior

These standards describe behaviors expected from the faculty and students of the School of Allied Health Professions. They are in addition to those standards of behavior and ethical conduct required by the school’s departments and professional organizations. They are supplemental to the university statement regarding conduct in the classroom.

• Recognize one’s position as a role model of your profession for other members of the health care team.
• Carry out academic, clinical and research responsibilities in a conscientious manner, making every effort to exceed expectations and demonstrating a commitment to lifelong learning.
• Treat patients, faculty and students with respect, demonstrating sensitivity to diversity regarding ethnicity, culture, age, gender, disability, social and economic status, sexual orientation, etc., without discrimination, bias or harassment.
• Maintain patient/client confidentiality.
• Respect the privacy of all members of the campus community and avoid promoting gossip and rumor.
• Interact with all members of the health care team in a collaborative and supportive fashion, with respect and recognition of the roles played by each individual.
• Provide help or seek assistance for any member of the health care team who is recognized as impaired in his/her ability to perform his/her professional obligations.
• Be mindful of the limits of one’s knowledge and abilities and seek help from others whenever appropriate.
• Abide by accepted ethical standards in the scholarship, research and practice of patient/client care.
• Abide by the guidelines of the VCU Honor System.

Financial aid

Financial aid is available for all students meeting the criteria for financial assistance. For details of the programs available contact the Financial Aid Office, P.O. Box 980244, Richmond, VA 23298-0244 or telephone (804) 828-9800.

The school and departments also offer financial awards, honors and scholarships. Details may be found on the school’s and individual departments’ websites at sahp.vcu.edu (http://www.sahp.vcu.edu).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in clinical laboratory sciences

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are
established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Admission to candidacy
Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement
Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements
Dissertation/research committee
After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information
Student handbook
A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.
Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT</td>
</tr>
<tr>
<td></td>
<td></td>
<td></td>
<td>Tests must have been taken within the past five years.</td>
</tr>
</tbody>
</table>

Special requirements

- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.
Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods

2. Demonstrate an in-depth knowledge in the area of specialization

3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills

4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice

5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective

6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions

7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission
to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

**Enrollment requirement**
Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

**Dissertation and published research requirements**

**Dissertation/research committee**
After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

**Dissertation/research standards**
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

**Graduation requirements**
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Program completion requirements**
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

**Other information**

**Student handbook**
A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

**Facilities**
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

**Advising**
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

**Computer requirements**
All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www.gaussian.vcu.edu).

**Admission requirements**

</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT</td>
</tr>
</tbody>
</table>

Tests must have been taken within the past five years.

**Special requirements**
- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

**Continuation requirements**

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

**Course transfer or waiver**

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

**Comprehensive examination**

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing...
a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

**Program website:** sahp.vcu.edu/phd (http://www.sahp.vcu.edu/phd)

**Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in health care outcomes research**

**Program mission/purpose**
The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research,
nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

**Program goals**

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

**Student learning outcomes**

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Admission to candidacy**

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

**Enrollment requirement**

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

**Dissertation and published research requirements**

**Dissertation/research committee**

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

**Dissertation/research standards**

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information
Student handbook
A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

Total Hours: 51

Graduate program director
Paula K. Kupstas, Ph.D.
Associate professor and director
Graduate faculty members, one of whom will be outside the student’s dissertation/research director submits the nominations in writing to the student nominates a dissertation/research committee, and the After successful completion of the comprehensive exam, the dissertation and published research requirements until completion of the requirements, including the defense process. Students are required to maintain continuous enrollment in ALHP 899 Enrollment requirement Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements Dissertation/research committee After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized. Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information Student handbook A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty. Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)
appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
</table>
| Ph.D.   | Fall (begins end of Jun) | Mar 15 | GRE or MAT

Tests must have been taken within the past five years.

Special requirements

- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements
After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver
A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with
appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods.
2. Demonstrate an in-depth knowledge in the area of specialization.
3. Exhibit competency in translating research knowledge and principles applied into practice perspectives and skills.
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice.
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective.
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions.
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)
Admission to candidacy
 Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement
 Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee
 After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards
 The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements
 As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements
 The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook
 A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities
 The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising
 Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
 All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www_graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3
on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)

2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

**Continuation requirements**

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

**Course transfer or waiver**

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

**Comprehensive examination**

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.
Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Phone: (804) 828-1914

Additional contact
Monica L. White
Program coordinator
Email: mlwhite1@vcu.edu
Phone: (804) 828-3273

Program website: sahp.vcu.edu/phd (http://www.sahp.vcu.edu/phd)
Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in patient counseling

Program mission/purpose
The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals
1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes
Students completing this doctoral program will:
1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Admission to candidacy
Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement
Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements
Dissertation/research committee
After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research,
adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT</td>
</tr>
</tbody>
</table>

Tests must have been taken within the past five years.

Special requirements

- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores
Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

### Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in physical therapy

Program mission/purpose
The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals
1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes
Students completing this doctoral program will:
1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods.
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.
Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT</td>
</tr>
</tbody>
</table>

Tests must have been taken within the past five years.

Special requirements
- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements
After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0,
a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

**Course transfer or waiver**

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

**Comprehensive examination**

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in radiation sciences

Program mission/purpose
The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals
1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes
Students completing this doctoral program will:
1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Admission to candidacy
Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement
Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements
Dissertation/research committee
After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information
Student handbook
A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements

- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C.

Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director.
Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Paula K. Kupstas, Ph.D.

Associate professor and director
Students completing this doctoral program will:

Student learning outcomes
Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in rehabilitation leadership

Program mission/purpose
The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s
concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Program completion requirements
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information
Student handbook
A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

Admission requirements

<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT</td>
</tr>
</tbody>
</table>

Tests must have been taken within the past five years.

Special requirements
- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements
After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver
A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination
The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

**Nurse Anesthesia Practice, Doctor of (D.N.A.P.)/Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia [sequential degrees]**

**Program mission/purpose**
The Ph.D. in Health Related Sciences program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

The sequential D.N.A.P. to Ph.D. concentration meets the growing interest and needs of those D.N.A.P. students who require a research doctorate. The program integrates content specific to the clinical doctorate with content specific to the research doctorate where the Ph.D. portion of the program begins following successful completion of the D.N.A.P. The objective of the program is to prepare certified registered nurse anesthetists holding master’s degrees for careers in nurse anesthesia leadership, education and research. Students in this concentration will benefit from taking three courses that are shared...
between the two individual programs and are able to satisfy program requirements, in part, through distance technology while continuing to maintain their current family and employment obligations.

**Student learning outcomes**

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gv.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students.

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements.

**Program completion requirements**

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student’s research adviser. All three articles must be approved by the internal research committee prior to submission.

**Other information**

**Student handbook**

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

**Facilities**

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Apply online at graduate.admissions.vcu.edu (http://www.gv.vcu.edu).

**Admission requirements**

<table>

</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT</td>
</tr>
</tbody>
</table>

Tests must have been taken within the past five years.

**Special requirements**

- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.
Students interested in the sequential Doctor of Nurse Anesthesia Practice to Ph.D. in Health Related Sciences concentration must first be admitted to the D.N.A.P. program. Matriculated D.N.A.P. students who wish to enter the combined concentration may apply to the Ph.D. program during the semester preceding graduation from the D.N.A.P. program. Applicants must meet the admission requirements and prerequisites of both programs, be enrolled in the D.N.A.P. program and have demonstrated satisfactory academic performance and professionalism.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Ph.D. program must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

### Degree requirements

Students in the D.N.A.P. program apply to the Ph.D. in Health Related Sciences program during the last semester in the D.N.A.P. program. Once accepted into the Ph.D. program, students continue with the curriculum as described.

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 75 credit hours (33 credit hours from the D.N.A.P. program and 51 credit hours from the Ph.D. program minus nine credit hours for three shared courses). The Ph.D. curriculum includes 18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of specialty track (courses shared with the D.N.A.P. program), 12 credit hours of dissertation research, two comprehensive examinations, a research proposal defense and the final dissertation defense.

### Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

### Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the degree requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable, unless approved as part of a combined degree program. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite credit hours needed for degree completion.

### Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive
examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum structure

The Ph.D. program curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have access to a personal computer and a DSL or cable modem. Once admitted to the program, it is recommended that students who do not feel proficient in computer skills enroll in a basic computer course to become comfortable with use of the Internet and with the basics of document processing software.

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

The Department of Clinical Laboratory Sciences supports the philosophy and mission of the university and the School of Allied Health Professions, and provides an environment that nurtures excellence in education, research and service. The programs offered by the department are dedicated to enhancing and promoting clinical laboratory science. The department fosters fair and equitable educational experiences for students of all ages and diverse backgrounds. Strong affiliations with clinical educators and the integration of innovative technology in the academic setting facilitate both the education and research goals of the department.

The department provides students with superior studies in clinical laboratory science, including both theoretical and applied clinical education, and develops problem-solving expertise, leadership capabilities and communication skills. By providing advanced theoretical and technical education, the graduate program serves to maintain and update the competency of laboratory professionals and to prepare students to assume roles as laboratory supervisors, university educators and researchers. A mature, responsible approach to the acquisition
of knowledge is cultivated in order to establish continuing intellectual growth and an enthusiasm for the profession.

The department meets the growing health care needs of the community by providing highly competent and professional clinical laboratory scientists who will be able to function effectively upon entrance into the field and be prepared to explore future scientific and technological advances in laboratory science. And the department promotes continued professional development and personal growth for the faculty and staff to fulfill and balance the individual’s abilities and aspirations with the departmental, school and institutional mission and needs. Members of the department conduct themselves in a forthright, ethical manner and practice the highest standard of quality performance.

The objectives of the Department of Clinical Laboratory Sciences are:

- To provide an educational program that prepares students to accurately perform and evaluate analytical tests on body fluids, cells and products.
- To foster the development of professional conduct, interpersonal communication skills and ethical principles.
- To develop and promote strategies for lifelong learning and to encourage continued professional growth through research, continued education and active participation in professional societies.

History

Clinical laboratory scientists have been trained on the MCV Campus since 1927. However, the Department (formerly school) of Medical Technology was not formally established until 1952, at which time the curriculum included six months of didactic experience with lectures and laboratory sessions held in the department, followed by a six-month rotation through the clinical laboratories. The school offered a certificate and/or bachelor's degree program; the certificate program was discontinued during the 1961-62 school year.

In 1974 the curriculum was expanded to the current two-plus-two year program in which students complete 60 semester hours of prerequisites followed by two years of professional course work. The graduate program in clinical laboratory sciences was started in 1967 to provide advanced education for certified medical technologists/clinical laboratory scientists. In 1985 the program was modified to allow candidates holding a degree in another area of science to obtain graduate education in clinical laboratory sciences.

In 1994, the department name was changed to the Department of Clinical Laboratory Sciences. In 2003, an accelerated track was initiated to integrate the undergraduate and graduate programs, which requires completion of two years of prerequisites and three years of full-time professional course work, and leads to the simultaneous awarding of both the bachelor’s and master’s degrees.

Facilities

The Department of Clinical Laboratory Sciences is located in the Randolph Minor Hall on the MCV Campus. All faculty and clerical offices are located in this facility, as well as student classrooms, general teaching laboratory, computer facilities and a student lounge/reading room.

- Clinical Laboratory Sciences, Master of Science (M.S.), advanced master’s concentration (p. 196)
Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

All students will be given a handbook on policies and regulations at orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements

- Applicants holding baccalaureate degrees in clinical laboratory sciences/medical technology and generalist certification by the Board of Certification of the American Society for Clinical Pathology are eligible for the advanced master’s concentration.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), students in the advanced master’s concentration are required to complete:

1. A minimum of 34 graduate credit hours
2. A research study in the form of a thesis or project related to clinical laboratory sciences
   a. Students selecting the thesis option must complete a minimum of 15 graduate credit hours of discipline-specific sciences and six hours of research.
   b. Students selecting the project option must complete 18 graduate credit hours of discipline-specific sciences and four hours of research.
3. In addition to the basic science requirement, each student may choose an area of secondary emphasis in biomedical research, education, management or business.
   a. In lieu of 14 credit hours of discipline-specific courses, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas.
   b. No more than 14 graduate credit hours in the area of the secondary emphasis may be applied toward the required curriculum minimum.

Curriculum requirements

Core

| BIOS/STAT 543 | Statistical Methods I | 3 |
| Complete course three times | 3 |
| CLLS 690 | Clinical Laboratory Sciences Seminar (one-credit course) | 3 |
| CLLS 761 | Research Methodology in Clinical Laboratory Sciences | 3 |
| CLLS 790 | Research in Clinical Laboratory Sciences | 4 |

Discipline-specific courses

Select 18 credit hours of the following: 1

| BIOC 503 | Biochemistry, Cell and Molecular Biology |
| BIOC 504 | Biochemistry, Cell and Molecular Biology |
| BIOL/BNFO 540 | Fundamentals of Molecular Genetics |
| CHEM 633 | Mass Spectrometry |
| CLLS 601 | Theoretical Blood Banking |
| CLLS 602 | Molecular Diagnostics in Clinical Laboratory Sciences |
| CLLS 605 | Advanced Hematology |

In addition to the general admission requirements of the VCU Graduate School (p. 17), the general entrance requirements for the Master of Science (M.S.) in Clinical Laboratory Sciences for the advanced master’s concentration are:

1. Baccalaureate degree from an accredited college or university with a major in clinical laboratory sciences (medical technology)
2. National certification as a medical laboratory scientist or equivalent level
3. Minimum undergraduate GPA of 3.0 on a 4.0 scale for at least the last two years of undergraduate work
4. Three letters of recommendation from employers or recent instructors addressing academic potential

5. Satisfactory interview
Clinical Laboratory Sciences, Master of Science (M.S.), categorical concentration

Program goals
The Department of Clinical Laboratory Sciences provides students with advanced theoretical and technical education and prepares them to assume roles as laboratory supervisors, educators and researchers.

Student learning outcomes
1. Demonstrated knowledge and proficiency of laboratory tests in specialized area of study
2. Demonstrated professional and leadership conduct
3. Demonstrated ability to research and evaluate laboratory issues

Total graduate credit hours required (minimum) 34

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
All students will be given a handbook on policies and regulations at orientation.

**Apply online at** [graduate.admissions.vcu.edu](http://www.graduate.admissions.vcu.edu).

### Special requirements

- Applicants must possess the essential technical abilities and skills described below.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the general entrance requirements for the Master of Science in Clinical Laboratory Sciences for the categorical concentration are:

1. Baccalaureate degree from an accredited college or university with a major in biology or chemistry (Other majors may be approved with 12 credits of biology and 12 credits of chemistry completed.)
2. Minimum undergraduate GPA of 3.0 on a 4.0 scale for at least the last two years of undergraduate work
3. Three letters of recommendation from recent instructors or professional references from the applicant’s intended field of study addressing the applicant’s academic and professional abilities and preparation for graduate study
4. Satisfactory interview
5. Essential functions in clinical laboratory sciences
   - The VCU Department of Clinical Laboratory Sciences is responsible for providing education without regard to disability while assuring that academic and technical standards are met.
     a. Academic standards are met by successfully completing the curriculum for the M.S. in Clinical Laboratory Sciences degree.
     b. Technical standards represent the essential nonacademic requirements that a student must demonstrate to successfully participate in the M.S. in Clinical Laboratory Sciences degree program. The technical standards for each category identified below are consistent with the expectations of Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 and the ADA Amendments Act of 2008. Applicants must possess the following essential technical abilities and skills for admission consideration:
   - i. Manual dexterity: Ability to use hand(s) or prosthetic devices with coordination
   - ii. Fine motor: Ability to manipulate small objects with fingertips or adaptive devices
   - iii. Mobility: Ability to maneuver in the laboratory and around instruments and in patient-care settings
   - iv. Vision: Ability to distinguish red, yellow and blue colors; to distinguish clear from cloudy; and to distinguish objects through a microscope
   - v. Hearing: Ability to hear with assistive devices (i.e., phone receivers, hearing aid, etc.)
   - vi. Speech: Ability to verbally communicate in English
   - vii. Writing: Ability to communicate effectively in written form in English
   - viii. Reading: Ability to read, understand and follow directions printed in English
   - ix. Emotional and physical stability: Ability to work accurately and safely under stress, adapt to changing environments and prioritize tasks
   - x. Personal attributes: Must demonstrate integrity, responsibility, tolerance and respect

### Degree requirements

The categorical concentration of the Master of Science program provides specialized study, including a clinical practicum, in one of the following areas: clinical chemistry, hematology, microbiology or immunohematology.

In addition to the general VCU Graduate School graduation requirements (p. 39), students in the categorical concentration are required to complete:

1. A minimum of 34 credit hours of graduate course work while completing undergraduate courses specific to their specializations
2. A six-week clinical practicum in their specialty areas
3. A research study in the form of a thesis or project related to clinical laboratory sciences
4. Students selecting the thesis option must complete a minimum of 15 semester hours of discipline-specific sciences and six hours of research.
5. Students selecting the project option must complete 18 semester hours of discipline-specific sciences and four hours of research.
6. In addition to the basic science requirement, each student may choose an area of secondary emphasis in biomedical research, education, management or business.
7. In lieu of 14 credit hours of discipline-specific courses, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas.
8. No more than 14 credit hours in the area of the secondary emphasis may be applied toward the required curriculum minimum.
Upon completion of the curriculum, students are eligible to take a national certification examination in the area in which they performed their concentrated study.

Full-time candidates require a minimum of two academic years to complete the program. Part-time students must complete all work requirements within six years. An interruption in registration in excess of one semester requires prior approval of the department.

## Curriculum requirements

**Special requirements**
- Applicants pursing the accelerated B.S. to M.S. degree program must initially qualify for admission to the B.S. in Clinical Laboratory Sciences degree program.

The accelerated bachelor’s-to-master’s-degree program integrates graduate and undergraduate course work and leads to the simultaneous awarding of the Bachelor of Science and Master of Science degrees in clinical laboratory sciences.
In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must:

1. Initially qualify for admission to the Bachelor of Science in Clinical Laboratory Sciences program
2. Complete a minimum of 112.5 undergraduate credit hours, including 60 prerequisite undergraduate credit hours (see admission requirements for the baccalaureate degree program in clinical laboratory sciences in the Undergraduate Bulletin for a list of the specific courses) and 52.5 credit hours of undergraduate professional course work in clinical laboratory sciences
3. Have a minimum undergraduate GPA of 3.0 on a 4.0 scale in undergraduate clinical laboratory course work
4. Receive a positive recommendation from the Department of Clinical Laboratory Sciences faculty
5. Have a satisfactory interview

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students in the accelerated B.S.-to-M.S.-degree program are required to complete:

1. A minimum 40 hours of graduate credit hours
2. A research study in the form of a thesis or project related to clinical laboratory sciences
3. In addition to the basic science requirement, each student may choose an area of secondary emphasis in biomedical research, education, management or business.
   a. In lieu of 14 credit hours of discipline-specific courses, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas.
   b. No more than 14 graduate credit hours in the area of the secondary emphasis may be applied toward the required curriculum minimum.

Beginning with the first semester of the Bachelor of Science in Clinical Laboratory Sciences program, candidates for the accelerated curriculum are expected to be full-time students and complete both the B.S. and M.S. requirements in three years.

Upon completion of the curriculum, students are eligible to take the ASCP BOC national certification examination for a Medical Laboratory Scientist generalist.

**Curriculum requirements**

**Undergraduate**

**Prerequisite requirement**

60 credit hours of course work prior to entrance into the Bachelor of Science program in clinical laboratory sciences (Refer to the VCU Undergraduate Bulletin for details of the required courses.)

**Professional studies requirement**

Total undergraduate credit hours required (minimum) 112.5

Total Hours 112.5
The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs, including the Master of Science in Occupational Therapy, Master of Science in Rehabilitation Counseling, Master of Social Work and Doctor of Pharmacy. Students must apply separately to the participating programs and must meet all admission and degree requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

### Opportunities for combined study

The Department of Gerontology was founded in 1976. The Master of Science in Gerontology, as well as a postgraduate Certificate in Aging Studies, is offered. The Department of Gerontology became a part of the School of Allied Health Professions in January 1985. As part of the department, the Geriatric Education Center was established Oct. 1, 1985. This center is a multidisciplinary effort involving cooperation of all the health-related professional schools and the College of Humanities and Sciences; the major focus is to promote education in geriatrics and gerontological health care.

### Objectives

The purpose of this program is threefold: (1) to train qualified professionals to work in administrative, planning, service delivery and instructional and staff development positions in programs and services for the elderly at the national, state and local levels, (2) to provide an opportunity for those studying in other disciplines, and whose work will encompass service to the aged, to integrate their own training with a comprehensive knowledge and understanding of the aging process and (3) to stimulate the design and execution of gerontological research across the multiple disciplines.

### Facilities

Offices of the Department of Gerontology are located in the Theater Row building at 730 E. Broad St. The Virginia Geriatric Education Center is housed in West Hospital, 1200 E. Broad St., 4th Floor, West Wing.

### Programs

Seven courses of study are offered:

- A Master of Science in Gerontology degree
- A Certificate in Aging Studies program to meet the needs of persons working with the elderly, but who have no academic training in gerontology
- A combination of the Certificate in Aging Studies program and the Doctor of Physical Therapy degree, offered jointly with the Department of Physical Therapy
- A combination of the Certificate in Aging Studies program and an Master of Social Work degree, offered jointly with the School of Social Work
- A combination of the Certificate in Aging Studies with the Doctor of Pharmacy degree, offered with the School of Pharmacy
- A combination of the Certificate in Aging Studies and a Master of Science in Rehabilitation Counseling, offered jointly with the Department of Rehabilitation Counseling
- A combination of the Certificate in Aging Studies and either the Post-professional Master of Science in Occupational Therapy (M.S.), the Master of Science in Occupational Therapy (M.S.O.T.) or the Post-professional Occupational Therapy Doctorate (O.T.D.)
- Gerontology, Master of Science (M.S.) (p. 204)
- Aging Studies, Certificate in (Post-baccalaureate graduate certificate) (p. 207)

### Department of Gerontology

**E. Ayn Welleford, Ph.D.**

Associate professor and chair

The mission of the Department of Gerontology is to improve elder care through education.

The basic philosophy of the department is to improve the overall well-being of elders through the development of educational programs that are responsive to the changing psychological, physical, social and political needs of our elderly population. Research, community service and continuing education in gerontology and geriatrics are integral parts of this educational effort.

### History

The Department of Gerontology was founded in 1976. The Master of Science in Gerontology, as well as a postgraduate Certificate in Aging Studies, is offered. The Department of Gerontology became a part of the School of Allied Health Professions in January 1985. As part of the department, the Geriatric Education Center was established Oct. 1, 1985. This center is a multidisciplinary effort involving cooperation of all the...
Gerontology, Master of Science (M.S.)

Program goal

The Department of Gerontology serves the people of the commonwealth of Virginia and the nation by providing educational programs related to the understanding of aging and promoting successful aging. The department encourages education through discovery of new knowledge, interdisciplinary interaction, professional behavior and service to the aging network. The department’s primary focus is to prepare individuals for positions in the network of aging services. These gerontologists are educated to serve as supporters of optimal aging for older persons and families and caregivers. The master’s program provides quality education leading to careers as services providers, educators and researchers. The department also provides assistance and services to the community and engages in research and scholarly activities related to gerontology.

The goal of the program is to ensure that students in the program will:

1. Understand the biological, psychological and sociological underpinnings of aging in U.S. society as established by the Association for Gerontology in Higher Education core competencies.
2. Gain understanding and respect for the interdisciplinary team process in effective gerontological practice.
3. Through a lifespan biopsychosocial/spiritual approach, gain understanding of empirically and theoretically based components contributing to optimal quality of life and performance in late life as well as knowledge and skills in best practices to promote optimal aging across the life span.
4. Gain understanding of the existing aging network across federal, state and local levels. Thorough understanding will enable students to successfully identify their niche in the aging network, contribute to a growing field and deliver effective eldercare services.

Student learning outcomes

1. Using the Association for Gerontology in Higher Education core content as the foundation of study, students will learn to apply the biological (e.g., wear and tear, programmed senescence, caloric restriction), psychological (e.g., Erikson’s developmental theory, gerotranscendence, selective optimization with compensation) and sociological theories (e.g., continuity, life course, modernization) of aging to gerontology practice.
2. As students develop a clearer understanding of effective eldercare through the biopsychosocial approach, lifespan perspective and numerous theories within the field (as implicit in AGHE’s core competencies), the necessity of geriatric interdisciplinary care becomes more apparent. Students will gain understanding and respect for the interdisciplinary team process in effective gerontological practice and essential role of various disciplines on the care team.
3. Students will demonstrate a thorough understanding of the multiple paths, methods and techniques of optimal aging in order to assist older persons, their families, program providers and policymakers toward the goal of optimal aging. A comprehensive understanding of gerontology core concepts is essential to this goal.
4. Students will demonstrate an understanding of the aging network and will be able to make contributions to community-identified needs through the successful delivery of services in the aging network. Community engagement will take the form of field work, research, grant writing, service learning opportunities, education and training.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduated.admissions.vcu.edu).

</tr>
</tbody>
</table>
In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

The program is open to qualified students who have earned a baccalaureate degree from an accredited college or university or the equivalent, maintained a minimum GPA of 3.0 and have satisfactory scores on the GRE or MAT. A successful work experience may strengthen the admission credentials of applicants with marginal records.

Because of the diversity of undergraduate majors, candidates for the gerontology program must present evidence of successful completion of undergraduate courses in the following areas:

1. Biological science – minimum of six credit hours
2. Psychology – minimum of three credit hours
3. Sociology, anthropology or social work – minimum of three credit hours
4. Statistics, research methods or equivalent – minimum of three credit hours (Topics covered in this undergraduate course should be equivalent to those outlined for STAT 212 in the VCU courses database.)

Candidates for admission who do not meet these requirements will be expected to complete the required undergraduate course work or to pass challenge examinations by the end of the first year.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete a 30-credit hour curriculum based on the core curriculum to include either a generalist area of study or one of the following optional specialty areas of study:

Education: This specialty area is designed for students interested in teaching or training careers in gerontology. Students electing this specialty area will be prepared to provide instruction to university or community college students, the lay public, professional service providers and older people.

Health care organization and planning: (in conjunction with the Department of Health Administration) Upon completing this area of study, students will have a foundation of knowledge in health care organization, health planning, health policy and a macro perspective on the financing of health care. In addition, students will have developed skills in policy analysis and the use of economic tools. Finally, students will broaden their understanding of the political, legal and ethical issues involved in health care organization and planning.

Psychogeriatrics: This specialty area, developed jointly with the Department of Psychology, is designed for students interested in working with those older adults and their families who are experiencing psychological difficulty. Students electing this option will be prepared to provide assistance directly to the elderly and their families as well as to consult and train professionals and paraprofessionals to provide more effective mental health services. Training is provided through a combination of specialized didactic instruction and structured field experience in providing direct services, consultation and education.

Public administration: Students who elect to pursue courses in the public administration area, developed jointly with the L. Douglas Wilder School of Government and Public Affairs, will, after completion of course work, be able to plan, organize, report and budget for public programs in aging. Grant writing and program evaluation skills will be developed as well. Students choosing the public administration option may wish to complete the Certificate in Public Management program or the Certificate in Nonprofit Management program.

Research: This specialty area is designed for students who would ultimately like to pursue a doctoral degree in the social or behavioral sciences or in one of the health-related sciences in the School of Allied Health Professions. Students who elect the research option must complete a thesis or a paper of publishable quality. Students will obtain a strong background in experimental psychology research design and methodology and a broad background in life-span developmental theory.

Social services: This option concentrates on developing specialized knowledge and skills in the provision of services to the elderly, basic understanding and skills in at least one method of social work practice, commitment and ability to participate in the development of strategies and policies relevant to amelioration of social problems of the elderly, and the ability to integrate and use in practice knowledge of individual behavior and social structure with particular reference to the needs of the elderly.

Students should consult with their advisers for guidance with scheduling. It is required that students seek advising to determine how they will complete their five practice elective credit hours.

Graduate program director
E. Ayn Welleford, Ph.D.
Chair, Department of Gerontology
Email: ewellefo@vcu.edu
Phone: (804) 828-1565

Program website: sahp.vcu.edu/gerontology (http://www.sahp.vcu.edu/gerontology)
Aging Studies, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The Department of Gerontology serves the people of the commonwealth of Virginia and the nation by providing educational programs related to understanding of aging and promoting successful aging. The department encourages education through discovery of new knowledge, interdisciplinary interaction, professional behavior and service to the aging network. The department's primary focus is to prepare individuals for positions in the network of aging services. These gerontologists are educated to serve as supporters of optimal aging for older persons and families and caregivers. The certificate program provides quality education to those who are already working with older adults and wish to enhance their services with formal academic training in gerontology or individuals with training in other professions.

The program's goal is to ensure that graduates will be able to demonstrate the ability to apply core gerontological concepts according to Association for Gerontology in Higher Education Core Concepts.

Student learning outcomes
1. Students will understand the biological, psychological and sociological underpinnings of aging in U.S. society.
2. Students will demonstrate understanding of methods and techniques to assist older persons and their families to achieve a successful response to aging.
3. Students will be demonstrate an ability to combine their knowledge of gerontology with experience in the aging network and with knowledge of their core professional discipline so as to contribute to the successful delivery of services in the aging network.
4. Students will develop understanding of and will engage in interdisciplinary approaches to issues and problems of aging.
5. Students enrolled in a dual program will engage in interdisciplinary practice in their core disciplines with special emphasis on gerontology.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Opportunities for combined study
The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs, including the Master of Science in Occupational Therapy, Master of Science in Rehabilitation Counseling, Master of Social Work and Doctor of Pharmacy. Students must apply separately to the participating programs and must meet all admission and degree requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

Other information
The program’s student handbook is available on the student Blackboard site.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

The Certificate in Aging Studies program is open to qualified students who have earned a baccalaureate degree from an accredited college or university or the equivalent and who have met all general admission requirements of the VCU Graduate School (p. 17).
Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students in the Certificate in Aging Studies program must complete 21 credit hours of work, including 15 credit hours of core courses and six elective credit hours, comprising the following courses offered in the gerontology graduate curriculum:

1. The biology of aging, psychology of aging, social gerontology and research methods form the basic core of the certificate program.
2. Following the completion of these gerontology courses, students may choose two elective gerontology courses after consultation with their faculty advisers. Advisers counsel students as to the courses that would best suit their educational training needs. Students may choose from aging and human values; topical seminars; independent studies; problems, issues and trends in gerontology; recreation, leisure and aging; and other elective courses.
3. In addition to the completion of these prescribed courses, each candidate for a Certificate of Aging Studies is required to satisfactorily complete a project in gerontology on a subject approved by the faculty. This project may be a comprehensive literature review, a research project or a training or demonstration project. Students register for a three-credit hour course in independent studies (GRTY 692) for this project.

Department of Health Administration

Carolyn A. Watts, Ph.D.
Richard M. Bracken Chair
Health Administration, Master of (M.H.A.)

Program goal

The specific mission of the Master of Health Administration program is to prepare early careerists for management and leadership positions within complex health care organizations.

The overall purpose of the Department of Health Administration is to provide educational programs and service related to the organization and administration of health services. In achieving that purpose, the department’s principal functions are to provide high-quality education leading to careers in the administration of health care institutions, agencies and systems and to provide advanced training and education for persons who will teach, plan, evaluate and investigate health care policies and medical care systems. Corollary functions are to provide assistance and other service for community organization and to conduct health services and health policy research.

The mission of the Department of Health Administration is:

1. Educating the next generation of health administrators and enhancing the skills of the present generation
2. Preparing a new generation of health services researchers and educators
3. Creating and disseminating basic and applied knowledge about the management, organization, financing, function and performance of the health care system
4. Serving people in the public and private sectors of the health care system

These activities, when mutually reinforced among all key people — faculty, staff, students, alumni/ae — elevate the department to a premier status among similar departments in the United States.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements. (p. 39)**

**Other information**

All enrolled students will be provided a handbook at orientation. Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>GRE/GMAT scores on verbal and quantitative at or above the 50th percentile</td>
</tr>
</tbody>
</table>

Applications received by Dec 1 are given priority for funding. For international students: a TOEFL score of 600 (paper-based), 250 (computer-based) minimum
In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. Baccalaureate degree from an accredited institution with a 3.0 GPA for all undergraduate work completed
2. Prerequisite course work in microeconomics, financial accounting and business statistics
3. A working knowledge of college-level algebra
4. Transcripts and VCU application forms
5. GRE/GMAT scores on verbal and quantitative at or above the 50th percentile
6. TOEFL scores required for international students
7. Professional resume
8. Three letters of reference
9. Present evidence of personal achievement, scholarship, intellectual ability and professional promise (personal statement)
10. Invited interview with M.H.A. admissions committee

The prerequisite requirements may be met by completing specified courses with a minimum grade of C within the past five years at any accredited college or university.

International applicants must submit evidence of a preapproved residency site in the home country and evidence of financial responsibility.

VCU Honors students are eligible to apply for admission to the M.H.A. program during the junior or senior year of undergraduate study. The application process is the same as for other applicants with the following exceptions: (1) requirements for the GRE or GMAT are waived, (2) application fee is waived and (3) official transcript is not needed (as grades can be accessed in the VCU system). The admission decision will be made by the M.H.A. admissions committee, at which time a place will be reserved for the student, provided the student graduates with honors and completes the prerequisite course work.

Candidates with one to two years of experience are preferred.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete a total of 59 credit hours (including transfer credit hours, if any) to qualify for the Master of Health Administration degree. This requirement includes 48 credit hours of core course work plus at least three credit hours of elective studies in health administration and related disciplines, such as business administration, urban and regional planning, public health and gerontology. In addition, eight credit hours of practicum course work are required as a part of the administrative residency. The graduate program is designed to provide a balanced combination of academic studies and field experience to enable students to achieve the program’s educational goals and become well-prepared to enter the field of health administration.

**Overview and philosophy**

The Master of Health Administration program is designed to prepare persons for administrative roles ultimately leading to top-level executive positions in complex health services organizations. The curriculum emphasizes strategic and operational management, thus orienting students toward the broad spectrum of managerial problems and functions likely to be encountered by health services organizations.

The program’s educational objectives and content are based upon the premise that a large number of students who select this curriculum aspire to become senior executives of health care organizations at some point in their careers. The graduate M.H.A. program is designed for full-time students.

The M.H.A. program was accredited initially in 1968, one of the first programs in the United States to achieve that status. It has continuously maintained its national accreditation status and in 2011 the program was awarded a six-year accreditation.

The administrative residency/internship is an integral part of VCU's M.H.A. program. The basic purpose of the residency/internship is to provide students opportunities to apply and further develop their administrative knowledge and skills through a period of applied experience in an operational setting. The administrative residency/internship is supervised directly by experienced executives who serve as the students’ preceptors.

Through a carefully selected and organized residency/internship experience, students strengthen the foundation of general knowledge and skills gained through the core curriculum and develop further insight and expertise in their selected concentrations. Students serve their residency/internship in the type of health care organization in which they wish to gain specialized knowledge, skills and experience. Overall policies and guidance for the administrative residency/internship are established by the Department of Health Administration and are included in the Handbook for the Administrative Practica: Residencies and Internships.

Students become eligible for entrance into the administrative residency/internship after completing specified course work and achieving an overall GPA of 3.0. Students on academic probation or with any incomplete grades during their final on-campus semester prior to their residency may be, at the discretion of the faculty, prevented from entering their residency although their overall GPA is 3.0 or higher. In addition to meeting the academic requirements, the student must, in the judgment of the faculty, present evidence of readiness for a clinical experience by demonstrating sufficient academic proficiency in the core areas of the curriculum and by demonstrating professional maturity. The director of the M.H.A. program or designee has the responsibility to coordinate residency placements. In making these assignments, the director will consider the preferences of the students, the preferences of the preceptors and the recommendations of faculty advisers.

**Program website:** had.vcu.edu (http://www.had.vcu.edu)

**Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [combined]**

Advanced study in health administration and information systems is also available through combined degree programs co-sponsored by the Department of Health Administration and the School of Business.

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).
The proposed curriculum allows students to earn both the M.H.A. and the M.S. in Information Systems with a total of 78 credit hours rather than the 89 credit hours that would be required to obtain the degrees separately. The dual-degree option offers this credit-hour efficiency by taking advantage of curricular similarities in the two programs and allowing some courses to count toward both sets of requirements. A total of 12 credit hours will count toward both degrees and the M.H.A. foundation courses will be substituted for the business school foundation course requirements for combined degree students. Students in the combined degree program will follow the same schedule as regular M.H.A. students, including the two lockstep years.

Students will take 51 credit hours of health administration courses required for the M.H.A. and nine additional courses (27 credit hours) in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The HADM 612 course taken for the M.H.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and one of the additional information systems courses will also count toward the elective courses in the M.H.A. program. A three-credit-hour, 10-week internship is required and must have substantial global, entrepreneurial and/or experiential components related to both degrees. The six information systems courses to be taken in addition to INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees in the M.S. in Information Systems program, including INFO 610, must be approved by the program adviser.

---

The tables and course lists are included to provide a clear and organized view of the curriculum and course options available to students pursuing the dual-degree program. This approach ensures that students can efficiently meet the requirements of both degrees while taking advantage of the overlapping curricula. The sample plan of study demonstrates how students can navigate the requirements of the combined program, exemplifying the strategic planning and flexibility that are key components of such educational endeavors.
Advanced study in health administration and law is available through dual-degree programs co-sponsored by the department and the schools of law at the University of Richmond and at Washington and Lee University. The program leads to the awarding of the Master of Health Administration and Juris Doctor degrees.

Participants are provided the necessary expertise either to represent clients within the health care industry or to function as legal policymakers or administrators who fully appreciate the legal environment of the health care field. Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual-degree program, contact the director of the program.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

The M.H.A. curriculum sequence of the M.H.A./J.D. degree is shown below. Students take a total of 48 credit hours of M.H.A. course work that includes a three-credit-hour internship.

**Medicine, Doctor of (M.D.)/Health Administration, Master of (M.H.A.) [combined]**

Students may indicate their interest in the combined program prior to matriculation or during the first three years of the M.D. program.

Advanced study in health administration and medicine is available through a dual-degree program co-sponsored by the Department of Health Administration and the VCU School of Medicine. The program leads to the awarding of the Doctor of Medicine and Master of Health Administration degrees. The objective of the M.D./M.H.A. program is to provide highly motivated medical students the expertise for management and leadership competency in complex health care organizations. The program may be completed in five years. Applicants for this program are required to meet the admission requirements of each program.

For the combined degree program, course work for the M.H.A. is initiated following completion of the first two or three years of the M.D. program, occupies a full academic year (fall, spring and summer) and extends into a second year, and is taken during a hiatus from the third or fourth year of the M.D. program.

Students interested in the program may contact the School of Medicine Office of Curriculum or the director of the M.H.A. program in the Department of Health Administration (School of Allied Health Professions). For additional information refer to the School of Medicine handbook available on the school's website at medschool.vcu.edu (http://www.medschool.vcu.edu).

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)
The M.H.A. curricular sequence of the M.H.A./M.D. degree is shown below. Students take a total of 43 credit hours of M.H.A. course work that includes a three-credit hour internship.

**Total Hours** 43

**Total graduate credit hours required (minimum) 43**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Health Administration, Master of Science in (M.S.H.A.)**

**Program accreditation**

Commission on Accreditation of Health Management Education

**Program goal**

The M.S.H.A. program mission is to prepare practicing professionals for management and leadership positions within complex health care organizations.

The overall purpose of the Department of Health Administration is to provide educational programs and service related to the organization and administration of health services. In achieving that purpose, the department’s principal functions are to provide high-quality education leading to careers in the administration of health care institutions, agencies and systems and to provide advanced training and education for persons who will teach, plan, evaluate and investigate health care policies and medical care systems. Corollary functions are to provide assistance and other service for community organization and to conduct health services and health policy research.

The mission of the Department of Health Administration is:

1. Educating the next generation of health administrators and enhancing the skills of the present generation
2. Preparing a new generation of health services researchers and educators
3. Creating and disseminating basic and applied knowledge about the management, organization, financing, function and performance of the health care system
4. Serving people in the public and private sectors of the health care system

These activities, when mutually reinforced among all key people — faculty, staff, students, alumni/ae — elevate the department to a premier status among similar departments in the United States.

The M.S.H.A. program is designed for self-motivated, mature and experienced professionals who are seeking advanced preparation in management and administrative roles that ultimately lead to executive positions in complex health services organizations. The curriculum emphasizes leadership in career progression as well as strategic and operational management of health care organizations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

All enrolled students will receive a student handbook at orientation.

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.H.A.</td>
<td>Fall</td>
<td>Mar 1</td>
<td>GRE/GMAT scores on verbal and quantitative at or above the 50th percentile</td>
</tr>
</tbody>
</table>

Applicants who have taken the GRE or GMAT in the past five years may submit previous scores. Those applicants holding certain graduate or professional doctoral degrees (M.D., D.D.S., Pharm.D., Ph.D.) may have the testing requirement waived upon petition.

TOEFL scores for international students: score of 600 (paper-based), 250 (computer-based) or 100 (Internet-based) minimum

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. Baccalaureate degree from an accredited institution of higher education with a 2.75 GPA for all undergraduate work completed
2. Transcripts and VCU application forms
3. Five years of professional/managerial/health care experience
4. Employed in the health care field
5. Professional resume
6. Three letters of reference
7. Interview with M.S.H.A. admissions committee

Applicants with less than a 2.75 undergraduate GPA who have exceptional professional experience will be considered for admission on provisional status. If the applicant has completed any graduate studies (even if a degree was not awarded), performance in such course work will be considered in the admission decision.

Prerequisites: No specific previous course work is required for application. Upon formal acceptance, students will be provided, at cost, independent-study modules in three areas (microeconomics, accounting and statistics) to be completed prior to beginning the program. Applicants having acceptable previous course work in microeconomics, accounting and statistics may not be required to complete these modules. Generally, courses must be completed within.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).
five years of starting the program. The M.S.H.A. program begins in July for the fall semester.

**Degree requirements**

The M.S.H.A. program is designed to meet the distinctive needs of the experienced health care professional. Courses develop business skills for the unique health care environment so that students are prepared to meet the challenges of the health care marketplace. Classes draw upon the knowledge of the faculty and the diverse group of experienced professionals enrolled.

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete 14 courses, a total of 41 credit hours (including transfer credit hours, if any), to qualify for the Master of Science in Health Administration degree. Each semester is composed of both on-campus and off-campus sessions. During the six, approximately week-long, on-campus sessions, students attend professional program classes on the MCV Campus. During off-campus sessions, students continue studies at their homes or work sites, employing a variety of online technologies. Students must successfully complete an integrative capstone case to complete the degree. The competency model utilized by the M.S.H.A. program is operationalized in curricular offerings in the development of learning objectives for individual courses.

**Part-time enrollment**

Recognizing the challenge that full-time enrollment brings to busy careers and personal lives, the department offers a part-time enrollment option in the M.S.H.A. program. Part-time students generally enroll in six or eight credit hours per semester and spend an additional 10 months in classes in the program. The recommended part-time schedule is shown below.

**Program website:** had.vcu.edu/prospective/msha (http://www.had.vcu.edu/prospective/msha)

**Health Services Organization and Research, Doctor of Philosophy (Ph.D.)**

**Program goal**
The Ph.D. in Health Services Organization and Research program is designed to prepare individuals for careers in teaching, research and consulting at the highest level of capability in the field of health care organizational analysis and health services research. Graduates will be competitive for positions at the nation’s top research and teaching institutions, governmental agencies and health care organizations.

**Student learning outcomes**

<table>
<thead>
<tr>
<th>Dimension</th>
<th>Outcomes</th>
</tr>
</thead>
<tbody>
<tr>
<td>Foundational knowledge of health care</td>
<td>Display comprehensive knowledge of the context of health care systems, institutions, actors and environment</td>
</tr>
</tbody>
</table>

**Theoretical knowledge**
Apply organizational theoretical and conceptual models relevant to health services research

Generate research questions and hypotheses
Review, critique and synthesize a body of research, identifying significant gaps in knowledge, methods and study subjects to develop research questions and testable hypotheses

**Study design**
Select appropriate interventional (experimental and quasi-experimental) or observational (quantitative, qualitative or mixed) study designs to address health services research questions Use a conceptual model to specify study constructs and develop valid and reliable variables to measure the constructs

**Data collection and management**
Sample and collect primary health and health care data and/or assemble and manage existing data from public or private sources

**Ethical conduct of research**
Describe procedures that ensure the ethical and responsible conduct and dissemination of research

**Data analysis and interpretation**
Apply rigorous quantitative and qualitative analytical strategies to specific research questions Demonstrate ability to interpret results of data analysis

**Communication and knowledge transfer**
Effectively communicate issues, research findings and implications of health services research verbally and in writing to appropriate professional, scientific, student, policy and lay audiences

**Integration**
Develop and conduct original research that includes identifying the research question, selecting the theoretical framework, developing a study design, using appropriate methodologies, conducting the analysis and interpreting the results

The doctoral program is designed to meet the professional development needs of:

1. Researchers, educators and policy analysts who want to develop in-depth theoretical and research capabilities about health services organizations
2. Clinical professionals who want to acquire a broader perspective on health care organizations and systems and to develop applied research skills in health services organization
3. Administrative professionals who want to prepare for positions as consultants or researchers in complex health organizations
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

All enrolled students will be provided a handbook at orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Special requirements

- Candidates with one to two years' experience in the health care industry preferred.
- A part-time enrollment option, which requires three years of course work prior to the dissertation research, is also available.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum acceptable standards for admission:

1. Graduate degree (in an academic or professional field) with a minimum GPA of B
2. Working knowledge of college-level algebra
3. Advanced courses in statistics and economics
4. GRE/GMAT scores on verbal and quantitative at or above the 50th percentile
5. TOEFL scores required for international students
6. Transcripts and VCU application forms
7. Three letters of reference
8. Interview with HSOR admissions committee

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 57 credit hours of course work. This includes 48 hours in four major areas of study and nine hours of dissertation study. Students take two written comprehensive examinations, covering health services organization and theory and health services research methods. Eleven credit hours of foundation course work are required. The program director and admissions committee may waive some of these courses. However, the credit hours required for the program are not reduced.

Department of Nurse Anesthesia

Michael D. Fallacaro, D.N.P., CRNA
Professor and chair

The program was first organized in 1969 as the School of Nurse Anesthetists, thus becoming the first academic program to be implemented in the newly organized School of Allied Health Professions on the MCV Campus.

A letter of intent for a proposed Master of Science in Nurse Anesthesia program was submitted to the commonwealth’s Council on Higher Education in 1977. When approved in May 1978, the graduate degree in nurse anesthesia became the first such offering within the profession of nurse anesthesia. While of major importance to the university, it marked a significant milestone for the profession of nurse anesthesia. The first class of graduate students was admitted in the fall of 1979 and graduated in the fall of 1981. A second hallmark was achieved in 2007 with approval of the Doctor of Nurse Anesthesia Practice program. The DNAP program is the first post-master’s practice doctorate for Certified Registered Nurse Anesthetists. A separate combined-degree track is available for students enrolled in the Master of Science in Nurse Anesthesia program. The first students matriculated in the combined degree MSNA-DNAP program in 2007 and the first CRNAs entered the post-master’s DNAP program in January 2008.
Mission and philosophy

Mission

The mission of Virginia Commonwealth University is to provide a fertile and stimulating environment for learning, teaching, research, creative expression and public service. Essential to the life of the university is a faculty actively engaged in scholarship and creative exploration — activities that increase knowledge and understanding of the world and that inspire and enrich teaching.

The university is dedicated the educating full- and part-time students of all ages and diverse backgrounds in an atmosphere of free inquiry and scholarship so that they may realize their full potential as informed, productive citizens with a lifelong commitment to learning and service.

The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department will achieve this mission by establishing an environment that values excellence, stimulates creativity and recognizes achievement.

Philosophy

The philosophy of the department reflects the core values of the faculty and provides the foundation for the curriculum. The department’s philosophy is synergistic with the mission and goals of VCU and the School of Allied Health Professions.

The department is a social agency dedicated to the education and development of health care professionals in the specialty of nurse anesthesia. Consequently, the faculty recognizes and accepts the responsibility entrusted to it for the learning experiences for its graduate students.

The philosophical orientation of the faculty subscribes to the belief that learning is a developmental process through which cognitive, affective and psychomotor behaviors are developed and modified. This process includes the acquisition of information, the transfer and application of knowledge, the evaluation of new skills, and the development of a professional attitude and bearing.

The faculty subscribes to the belief that the learning process is both positive and rewarding for the student; that it is a transaction between the student and teacher executed through formal and informal processes with an objective to prepare knowledgeable and skillful graduates. Hence, learning is a lifelong process that results in a change in thinking, valuing and behaving. The educational process includes teacher-learner interaction in setting goals, selecting and assessing learning experiences, determining instructional methods, and evaluating the learner’s progress.

Learning experiences are designed to facilitate continuity in attainment of knowledge, skills and attitudes consistent with educational objectives, the individual needs of students and safe patient care. Students are respected as unique individuals possessing dignity, worth and the right to equity in educational opportunities. Faculty and students share the responsibility for creating an educational climate that reflects democratic values, fosters intellectual inquiry and creativity, and encourages the maximum development of each individual’s potential.

The American health care system is becoming progressively complex. Technological advances and changing economic patterns foster competition for scarce resources while the patient population is becoming quite diverse. As a result, the role of the CRNA is becoming increasingly collaborative and complementary with other health professionals. In this environment, CRNAs have more responsibility and authority for coordination, decision-making and leadership of the multidisciplinary team, as well as for research, planning and development of health resources.

Graduate education in nurse anesthesia at the master’s level builds upon baccalaureate education with a nursing focus. It is designed to allow graduates the opportunity to become leaders and make significant contributions with the intended outcome of improving health care and advancing nurse anesthesia theory and practice through research. Consequently, the program prepares CRNAs through a team concept of a joint practice of anesthesia care composed of both nursing and medical components to meet the current and emerging health needs of society.

- Nurse Anesthesia, Master of Science in (M.S.N.A.) (p. 232)

Nurse Anesthesia Practice, Doctor of (D.N.A.P.)

Program accreditation
Council on Accreditation of Nurse Anesthesia Educational Programs

Program goal

The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that values excellence, stimulates creativity and recognizes achievement.

Student learning outcomes

The overall objective of the Doctor of Nurse Anesthesia Practice program is to prepare graduates who have acquired knowledge, skills and competencies in patient safety, perianesthetic management, critical thinking and communication to fulfill their professional responsibility as certified nurse anesthetists.

Upon completion of the program, the graduate will:

1. Apply physiological, safety and organizational theories to promote patient safety, enhance quality care and improve nurse anesthesia practice
2. Analyze and synthesize relevant scientific literature and apply results to improve nurse anesthesia practice and patient care outcomes in a culturally sensitive manner
3. Communicate effectively with patients, families, the public and other health professionals
4. Demonstrate leadership skills to meet the challenges of increasingly complex health care and educational environments impacting nurse anesthetists

5. Develop effective strategies for managing ethical dilemmas inherent in anesthesia patient care and the workplace

6. Employ teaching and learning principles for the nurse anesthetist in educating and counseling individuals, families, students-in-training and groups

7. Demonstrate nurse anesthesia scholarship through presentations, publications, leadership activities and collaboration with other disciplines

8. Utilize technology and information systems to analyze, manage and present data

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbooks are made available to students upon enrollment through a secure link on the department website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

</tr>
</tbody>
</table>

Note: Review of applications is ongoing. Preference is given to those received prior to March 1 for fall entry.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must present the following minimum qualifications:

1. A graduate degree from an accredited university

2. Graduation from a nurse anesthesia educational program accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs

3. Certification by the National Board of Certification and Recertification for Nurse Anesthetists

4. Recertification by the National Board of Certification and Recertification for Nurse Anesthetists (if applicable)

5. Current licensure as a registered nurse and advanced practice nurse (as applicable)

6. A minimum cumulative graduate GPA of 3.0 on a 4.0 scale

7. Graduate Record Examination General Test within five years of application

8. Personal statement including:
   a. Reasons for seeking this educational opportunity
   b. Career goals and how this degree will aid in that process
   c. Prior lifework experience that will contribute to your success in the program
   d. Potential areas of interest for the capstone project

9. Completed Graduate School application

10. Three professional references
11. Personal interview (by invitation)

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), candidates for the degree of Doctor of Nurse Anesthesia Practice must be recommended by the faculty and:

1. Complete all requirements for the prescribed curriculum
2. Complete a capstone project
3. Earn a minimum GPA of 3.0 in all courses
4. Earn a minimum cumulative GPA of 3.0 in all work presented for graduation

Nurse Anesthesia Practice, Doctor of (D.N.A.P.)/Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia [sequential degrees]

Program mission/purpose
The Ph.D. in Health Related Sciences program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health care outcomes research, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

The sequential D.N.A.P. to Ph.D. concentration meets the growing interest and needs of those D.N.A.P. students who require a research doctorate. The program integrates content specific to the clinical doctorate with content specific to the research doctorate where the Ph.D. portion of the program begins following successful completion of the D.N.A.P. The objective of the program is to prepare certified registered nurse anesthetists holding master’s degrees for careers in nurse anesthesia leadership, education and research. Students in this concentration will benefit from taking three courses that are shared between the two individual programs and are able to satisfy program requirements, in part, through distance technology while continuing to maintain their current family and employment obligations.

Student learning outcomes
Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements.

Program completion requirements
The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's
research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook
A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities
The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree</th>

</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall (begins end of Jun)</td>
<td>Mar 15</td>
<td>GRE or MAT Tests must have been taken within the past five years.</td>
</tr>
</tbody>
</table>

Special requirements

- When applicable, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.
- Students interested in the sequential Doctor of Nurse Anesthesia Practice to Ph.D. in Health Related Sciences concentration must first be admitted to the D.N.A.P. program. Matriculated D.N.A.P. students who wish to enter the combined concentration may apply to the Ph.D. program during the semester preceding graduation from the D.N.A.P. program. Applicants must meet the admission requirements and prerequisites of both programs, be enrolled in the D.N.A.P. program and have demonstrated satisfactory academic performance and professionalism.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Ph.D. program must meet the following criteria:

1. Have an earned master’s degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master’s-level work (The master’s degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years
3. Have completed a graduate course in statistics with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentrations

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
   a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate’s academic potential
   b. A written essay that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
   c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master’s degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Incomplete packages may not be reviewed. Materials are sent to the Graduate Admissions office for processing and then forwarded to the School of Allied Health Professions. Once received in the school, the application is reviewed for completeness. Applicants with incomplete files will be contacted regarding the missing materials. Incomplete files will be held in the director’s office until all materials are received.

Completed folders will be sent to the respective departmental representative of the School of Allied Health Professions Doctoral Program Advisory Committee. Departments will then rank qualified applicants and, based on a review of the file, a personal interview will be scheduled at the department’s discretion for the top candidates. Following the departmental ranking, all files will be returned to the director’s office.

The DPAC will meet to select and recommend the incoming class. The director and the dean of the School of Allied Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision and of the deadline for their acceptance of the offer and holding fee.

Degree requirements

Students in the D.N.A.P. program apply to the Ph.D. in Health Related Sciences program during the last semester in the D.N.A.P. program. Once accepted into the Ph.D. program, students continue with the curriculum as described.

In addition to general VCU Graduate School graduation requirements (p. 39), students must successfully complete a total of 75 credit hours (33 credit hours from the D.N.A.P. program and 51 credit hours from the Ph.D. program minus nine credit hours for three shared courses). The Ph.D. curriculum includes 18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of specialty track (courses shared with the D.N.A.P. program), 12 credit hours of dissertation research, two comprehensive examinations, a research proposal defense and the final dissertation defense.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at
VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver
A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the degree requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable, unless approved as part of a combined degree program. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite credit hours needed for degree completion.

Comprehensive examination
The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core advisory committee and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum structure
The Ph.D. program curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Advising
Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university’s graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration areas must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements
All students admitted to the program must have access to a personal computer and a DSL or cable modem. Once admitted to the program, it is recommended that students who do not feel proficient in computer skills enroll in a basic computer course to become comfortable with use of the Internet and with the basics of document processing software.

Admission to candidacy
Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student’s formal program adviser and the dean of the School of Allied Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement
Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation/research committee
After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student’s
concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

**Dissertation/research standards**
The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student’s ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Nurse Anesthesia Practice, Doctor of (D.N.A.P.)/Nurse Anesthesia, Master of Science in (M.S.N.A.) [combined]

Program website: sahp.vcu.edu/phd (http://www.sahp.vcu.edu/phd)

Program accreditation
Council on Accreditation of Nurse Anesthesia Educational Programs

Program goal
The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that values excellence, stimulates creativity and recognizes achievement.

Student learning outcomes
In addition to the learning outcomes of the individual M.S.N.A. and D.N.A.P programs, graduates of the combined M.S.N.A./D.N.A.P. program will be able to:

1. Apply physiological, safety and organizational theories to promote patient safety, enhance quality care and improve nurse anesthesia practice
2. Analyze and synthesize relevant scientific literature and apply results to improve nurse anesthesia practice and patient care outcomes in a culturally sensitive manner
3. Communicate effectively with patients, families, the public and other health professionals
4. Develop effective strategies for managing ethical dilemmas inherent in anesthesia patient care and the workplace
5. Employ teaching and learning principles in educating and counseling individuals, families, students-in-training and groups
6. Demonstrate leadership skills to meet the challenges of complex health care and educational environments
7. Demonstrate scholarship through presentations, publications, leadership activities and collaboration with other disciplines
8. Utilize technology and information systems to analyze, manage and present data.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Upon enrollment, student handbooks are made available to admitted students through a secure link on the department website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

Note: Review of applications is ongoing. Preference is given to applications received prior to June 1 for fall entry.

Master of Nurse Anesthesia students with a minimum GPA of 3.25 are eligible to apply to the combined M.S.N.A. and D.N.A.P. program during the third semester of study. Students enrolled in the M.S.N.A./D.N.A.P. combined degree option will graduate with the master’s degree in nurse anesthesia at the end of the seven-semester, 28-month master’s
curriculum and take the national certification exam. These students will then continue their doctoral studies (largely via distance) in the eighth semester (spring) to graduate with the Doctor of Nurse Anesthesia Practice degree at the end of the eighth semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. Currently enrolled and in good academic standing in VCU’s M.S.N.A. program
2. Current licensure as a registered nurse and advanced practice nurse (as applicable)
3. A cumulative minimum graduate GPA of 3.25 on a 4.0 scale
4. Graduate Record Examination general test within five years of application
5. Personal statement including:
   a. Reasons for seeking this educational opportunity
   b. Career goals and how this degree will aid in that process
   c. Prior lifework experience that will contribute to your success in the program
   d. Potential areas of interest for the capstone project
6. Completed Graduate School application to D.N.A.P. program by July 1 of year graduating from M.S.N.A. program
7. Three professional references
8. Personal interview (by invitation)
9. M.S.N.A./D.N.A.P. students must pass the National Certification Examination to be eligible for graduation from the D.N.A.P. component of the M.S.N.A./D.N.A.P. program.

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students in the combined program must complete a minimum of 97 credit hours (98 with elective).

Nurse Anesthesia, Master of Science in (M.S.N.A.)

Program accreditation
Council on Accreditation of Nurse Anesthesia Educational Programs

Program goal
The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that values excellence, stimulates creativity and recognizes achievement.

Student learning outcomes
The overall objective of the Master of Science in Nurse Anesthesia degree program is to prepare graduates who have acquired knowledge, skills and competencies in patient safety, perianesthetic management, critical thinking and communication to fulfill their professional responsibility as certified nurse anesthetists.

Upon completion of the program, the graduate will:

1. Plan, organize, deliver and evaluate safe anesthesia care

2. Design, implement and evaluate perianesthetic care
3. Incorporate critical thinking into ongoing professional practice
4. Evaluate the postoperative course of a patient
5. Assimilate into practice effective and culturally competent written, verbal and nonverbal communication with patients and families, other individuals involved in patient care, and the public
6. Assume responsibility for professional behavior

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

Upon enrollment, student handbooks are made available to admitted students through a secure link on the department website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Note: Review of applications is ongoing. Preference is given to applications received prior to Oct. 1 for fall entry.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. Baccalaureate degree in nursing or related science
2. Current licensure as a registered professional nurse in Virginia (by completion of the first semester)
3. Cumulative minimum undergraduate grade point average of 3.0 on a 4.0 scale (preferred)
4. Upper-division undergraduate organic chemistry course or a Web-based medicinal chemistry prep course offered through VCU's Department of Chemistry [Contact (804) 828-9808 to register.]
5. A minimum of one year’s experience in an area of acute/critical care nursing (recent)
6. Personal interview with members of the admissions committee (by invitation)
7. Three professional references (One must be from the immediate supervisor who is responsible for applicant’s performance evaluations with contact phone number attached.)

Contact the department (804) 828-9808 for specific admission requirements

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), candidates for the M.S.N.A. degree must be recommended by the faculty and:

1. Complete all requirements for the prescribed curriculum
2. Earn a minimum GPA of 3.0 in all NRSA courses
3. Earn a minimum cumulative GPA of 3.0 in all work presented for graduation
4. Meet all clinical requirements as specified by the National Board on Certification and Recertification for Nurse Anesthetists
5. Successfully complete the Self Evaluation Examination offered by the National Board of Certification and Recertification for
Nurse Anesthetists and a two-part (didactic/research) written comprehensive examination

---

Graduate program director
In pursuit of this mission, the department:

- Fosters student commitment to scientific inquiry and professional competence, and promotes personal growth, balance and dedication to lifelong learning
- Promotes faculty excellence and collaboration in teaching, scholarship and research that models integrity and competence
- Collaborates with the community through education, consultation and the development of strong linkages with clinical educators and the community
- Interacts dynamically with the occupational therapy profession and stakeholders, contributing proactively to the evolution of the profession

Facilities

The educational facilities of the Department of Occupational Therapy are located in the Theater Row building at 730 E. Broad St. During the professional master’s degree program, fieldwork assignments are made for students in a wide range of clinics and agencies in the Richmond metropolitan area. A 24-week extended fieldwork requirement will be arranged in approved clinical education facilities throughout the United States.

Academic regulations

Students are admitted to the occupational therapy programs with the expectation that they will direct maximum time and effort to the learning process. Outside activities must be scheduled by students for such dates and hours as permit full compliance with the time requirements for course work. Tardiness, lack of regular attendance or failure to meet deadlines for course assignments will not be excused because of employment or other outside activities.

To continue in the graduate curriculum, students are expected to maintain a cumulative GPA of 3.0 based on course work following matriculation.

- Graduate students who fail to maintain a 3.0 cumulative GPA or receive a grade of D (regardless of the cumulative GPA) will automatically be placed on probation and will be notified of probationary status.
- Conditions of probation: students must earn a quality point average during the semester of probation sufficient to result in a cumulative GPA of 3.0 in order to be removed from probationary status. Students who are on probation due to receiving a D grade must retake that course, achieving a grade of C or better while also meeting all other academic standards.
- Conditions of probation also may include recommendations for academic counseling, assignments by individual instructors and other requirements identified by the Committee on Academic Standing and Student Progress. Conditions of probation will be detailed in a letter of notification of probation prepared by this committee.

Only one semester of academic probation is permitted in the program. If probationary students fail to meet academic standards (GPA of 3.0) in a second semester or do not successfully complete deficient courses, they will be considered for dismissal.

- As courses usually are offered only once a year and because early courses serve as prerequisites for later courses, students retaking a course or taking a reduced course load will have to continue under an adjusted curriculum plan. This will result in extending the student’s time in the program.
- Students who receive an F grade in any required course will be considered for dismissal by the committee.
- University standards require that a graduate student must not have more than six semester hours or 20 percent of semester hours attempted, whichever is greater, with a grade of C. Students who receive a grade of C on more than the allowable number of semester hours will be reviewed for possible academic termination by the Committee on Academic Standing and Student Progress. Students who are not terminated for this criterion will be placed on automatic probation.
• If a student withdraws or is terminated by the clinical faculty before the completion of the Level II Fieldwork course, the student will receive an U grade for the course. If the student withdraws, is terminated or fails a fieldwork experience, the course may be repeated only upon approval by the Committee on Academic Standing and Student Progress in consultation with the department chair and the fieldwork coordinator. Students may be dismissed from the program or be allowed to continue contingent upon fulfilling remedial activities based on a plan prepared by the fieldwork coordinator and ratified by the committee. No more than one additional fieldwork experience will be rescheduled. The opportunity to re-register and repeat the fieldwork course is contingent upon the fieldwork coordinator’s ability to locate another facility willing to offer a fieldwork experience to the student and upon the support of the committee. Level II Fieldwork must be completed no later than 24 months subsequent to the completion of the academic phase.

• To continue in good standing, students also are expected to:
  • Pay all fees
  • Maintain personal attributes and ethical behaviors consistent with professional practice as defined in the Occupational Therapy Department Student Handbook
  • Complete fieldwork requirements to the satisfaction of clinical and academic faculty

• Although arrangements are made in advance, each student is reviewed prior to placement in the Level II Fieldwork education. Students must have satisfactorily completed courses prerequisite to that fieldwork experience and be recommended by the faculty. They must demonstrate professional behavior as specified in the ethical behaviors listed in the Occupational Therapy Department Student Handbook. Medical problems may delay or prevent fieldwork placement.

• Occupational Therapy Doctorate (O.T.D.), entry-level (p. 236)
• Occupational Therapy Doctorate (O.T.D.), post-professional (p. 240)
• Occupational Therapy, Master of Science in (M.S.O.T.) (p. 242)
• Occupational Therapy, Master of Science in (M.S.O.T.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined] (p. 245)

**Occupational Therapy Doctorate (O.T.D.), entry-level**

**Program accreditation**
Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association

The O.T.D. program prepares students for entry-level practice while also providing advanced training in evidence-based practice, interprofessional and collaborative care and program and career development. In April 2014, the Board of Directors of the American Occupational Therapy Association, responding to changes seen in higher education, health care and the profession, issued a statement in support of a doctoral-level single point of entry for occupational therapists. The recommended target date for completion of the transition is 2025. The Board’s rationale included:

• Greater demands for practice-based scholarship and research
• A need to prepare graduates with professional autonomy and avoid de-professionalization
• An increased focus on primary care, interprofessional care teams and specialization in practice
• Trends in health care professions to transition to the entry-level doctorate
• Creation of an unambiguous entry level that reflects equivalent preparation of all practitioners entering the profession

The entry-level O.T.D. program is designed to prepare students for careers in a wide range of occupational therapy practice settings. Graduates will be eligible to apply for licensure to practice in any state.

**Program goal**
The primary mission of the Department of Occupational Therapy is the preparation of excellent, innovative, adaptable and responsible occupational therapists as professional leaders for the state, the nation and the world. Our mission represents an integration of the missions of the university and the School of Allied Health Professions. In pursuit of this mission, the department:

• Fosters student commitment to scientific inquiry and professional competence and promotes growth, balance and dedication to lifelong learning
• Promotes faculty excellence and collaboration in teaching, scholarship, research and service that models integrity and competence
• Collaborates with the community through education, consultation and the development of strong linkages with clinical educators and the community
• Interacts dynamically with the OT profession and stakeholders, contributing proactively to the evolution of the profession.

**Student learning outcomes**

1. **Meet foundational requirements**: As part of a broad foundation in liberal arts and sciences, including biological, physical, social and behavioral sciences, to meet the needs of individuals and communities, students will be able to employ logical thinking, critical analysis, clinical reasoning and problem-solving to demonstrate oral and written communication skills, innovative use of computer technology, knowledge of human structure and function, awareness of social development and apply the use of statistics to interpret tests and measurements. (Objectives B.1.1-B.1.11 in ACOTE Standards)

2. **Basic tenets of occupational therapy**: Students will be able to explain the meaning and impact of occupation in meeting society’s current and future occupational needs, including articulating the historical and philosophical base of the profession, its role as a central construct in OT theory development, its relationship to the promotion of health and wellness and prevention of disease and disability. Recognizing the importance of activity analysis in the process of formulating intervention plans will be an emphasis for student learning. (Objectives B.2.1-B.2.11 in ACOTE Standards)

3. **OT theories, models and frames of reference**: Students will be able to describe, integrate and apply a variety of occupational therapy theories, models of practice and frames of reference in evaluation and intervention and will articulate the process of theory development and its desired impact and influence on the individual and society. Students will be able to discuss how practice influences and is influenced by history, theory and sociopolitical climate.
Occupational therapy theories and models covered in the curriculum will include but not be limited to: the model of human occupation, sensory integration, biomechanical and rehabilitation models, motor control and movement recovery models. (Objectives B.3.1-B.3.6 in ACOTE Standards)

4. **OT screening, evaluation and referral:** To analyze, synthesize, evaluate and diagnose problems related to occupational performance and participation, students will be able to use evidence-based reasoning to select appropriate tools, both standardized and non-standardized; analyze psychometric properties of assessment tools; evaluate occupational performance across all areas of occupation; distinguish between roles of occupational therapists and occupational therapy assistants; make appropriate client referrals; interpret test results; and document services to assure accountability, reimbursement and need for services. (Objectives B.4.1-B.4.11 in ACOTE Standards)

5. **Intervention planning:** In accordance with the Occupational Therapy Practice Framework, students will learn to develop occupation-based intervention plans and strategies from the level of individual to population-based interventions in traditional and emerging practice environments. Intervention planning will be based on appropriate theoretical approaches, information acquired via occupational profiles, evaluation of client factors — body function and structure strengths/weaknesses, performance patterns, contextual issues, activity demands, and performance skills. Students will be able to choose appropriate therapeutic activities, learn the value of therapeutic use of self, modify environments, incorporate assistive technologies, fabricate needed orthotics and train clients in areas of mobility and transfer, feeding and eating, and activities of daily living. Students will educate clients as needed and safely use superficial thermal and mechanical modalities as preparatory measures to improving occupational performance. (Objectives B.5.1-B.5.28 in ACOTE Standards)

6. **Context of service delivery:** Students will demonstrate knowledge of the variety of contexts that affect and are affected by occupational therapy service delivery. They will be able to compare and contrast differences in service delivery systems, including health care, education, community and social systems. They will be able to discuss the impact of socioeconomic and political influences on occupational therapy and advocate for changes in policies and systems to address society’s occupational needs. They will integrate national and international resources in education, research, practice and policy development. (Objectives B.6.1-B.6.6 in ACOTE Standards)

7. **Leadership and management:** Students will be able to identify and evaluate how contextual factors affect service delivery and management of services; awareness of how federal and state laws guide service delivery, understanding of the requirements for licensing and certification, documentation and reimbursement; and the essential nature of competency-based procedures for legal and ethical supervision of occupational therapy personnel, non-occupational therapy personnel and fieldwork students. Students will demonstrate the ability to design and write program development plans for the provision of occupational therapy services to individuals and populations. (Objectives B.7.1-B.7.12 in ACOTE Standards)

8. **Scholarship:** Students will be able to articulate the importance of knowledge development for the profession; locate, critique and interpret research evidence; apply research literature to make evidence-based practice decisions; use and interpret basic descriptive, correlational and inferential quantitative statistics and code; analyze and synthesize qualitative data; and demonstrate an understanding of the grant process. Students will complete a culminating project that involves the design of a scholarly proposal, implementation and documentation of the study. (Objectives B.8.1-B.8.10 in ACOTE Standards)

9. **Professional ethics, values and responsibilities:** Students will be able to demonstrate knowledge and understanding of the American OT Association Code of Ethics and Ethics Standards and AOTA Standards of Practice; the importance of membership in professional organizations; the value of supporting and educating other professions about OT; identification and development of strategies for ongoing professional development; responsibilities related to liability; conflict resolution; contractual service provision; and ethical supervision. Students will discuss and justify the varied roles of occupational therapists, including program and policy development, advocate, administrator and leader. (Objectives B.9.1-B.9.13 in ACOTE Standards)

10. **Fieldwork:** Through a carefully coordinated process of fieldwork, students will be able to apply concepts learned in the classroom to practice settings under careful supervision of trained and qualified occupational therapy practitioners. Gradation of time spent, responsibilities and expectations placed on students will be provided through assignment, first to fieldwork level I and then to fieldwork level II experiences across a wide range of settings and practice areas. (Objectives C.1.1-C.1.19 in ACOTE Standards)

11. **Doctoral experiential component:** Through completion of a professional portfolio, a doctoral experiential component, and evaluation and dissemination, students will demonstrate leadership and advanced skills in one or more of the following areas: clinical practice, administration, research, program or policy development, advocacy, education or theory development. Upon completion of all course work, fieldwork and doctoral experiential requirements, students will be prepared to take the National Board for Certification in Occupational Therapy examination, thereby qualifying them for state licensure and practice of occupational therapy at the entry level. (Objectives C.2.1-2.5 in ACOTE Standards)

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for
School (p. 17), applicants must meet the following requirements:

In addition to the general admission requirements of the VCU Graduate School (https://www.graduate.admissions.vcu.edu) Apply online at graduate.admissions.vcu.edu for occupational therapy.

felony ineligible for licensure or certification. For specific information, licensure or certification agencies consider individuals convicted of a felony ineligible for licensure or certification. Some boards certification as a registered occupational therapist. Some requirements have been established by all 50 states, the District of Columbia, Guam and Puerto Rico. Most licensure requirements include requirements.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

All graduates of an occupational therapy program are required to take the national certification examination to become a registered occupational therapist and use the credentials OTR. The national certifying organization for occupational therapy is the National Board for Certification in Occupational Therapy. Other licensure or certification requirements have been established by all 50 states, the District of Columbia, Guam and Puerto Rico. Most licensure requirements include board certification as a registered occupational therapist. Some licensure or certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For specific information, prospective students should contact the licensure or certification agency for occupational therapy.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. A bachelor's degree from an accredited college or university
2. A minimum grade-point average in all college courses of 2.7 (based on a 4.0 system)
3. A minimum grade-point average in prerequisite courses of 3.0 (without rounding)
4. A one-page, "value-added" essay submitted as a PDF file to otentrylevel@vcu.edu
5. An Occupational Therapy Centralized Application Service application (https://portal.otcas.org) including these items:
   a. A personal statement that addresses:
      i. Why applicant is selecting OT as a career
      ii. How a master's degree in OT relates to immediate and long-term professional goals
      iii. How the applicant's personal, educational and professional background will help achieve these goals
   b. Evidence of completion of a minimum of 30 observation hours in one or more settings under the supervision of a licensed OTR or COTA
   c. Three letters of recommendation (One letter from an occupational therapist is preferred, but it is not essential.)
   d. Ten prerequisite (http://www.sahp.vcu.edu/departments/occu/programs/entry-level/prerequisite-courses) courses (30-32 semester credit hours)
6. A course on medical terminology (strongly recommended, but not required)
7. For non-native English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language iBT score of greater than 102, a TOEFL CBT score of greater than 253, a TOEFL PBT score of greater than 610 or an International English Language Testing System score of greater than 6.5

The VCU entry-level occupational therapy doctorate is a 104 credit program that spans three years (nine semesters). Applicants apply for the program between July and Dec. 1 of the year preceding enrollment. Orientation and summer semester classes begin the first week of June. The first semester is a seven-credit part-time semester and the second summer semester is a five-credit part-time semester. All other semesters, including the last year of two semesters of Level II fieldwork and the final semester of doctoral practicum are full-time semesters. Five courses in the curriculum (OCCT 780, OCCT 781, OCCT 782, OCCT 783 and OCCT 784) taken during the second summer and the second and third spring semesters will be taught in a hybrid format, which will require some on-campus hours with the remainder taught using the Blackboard course management system. Students will be required to have a computer or tablet with access to the Internet.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete all School of Allied Health Professions requirements and successfully complete 104 credit hours.

Occupational Therapy Doctorate (O.T.D.), post-professional

Note: As part of the transition from the entry-level program from the M.S.O.T. to the O.T.D. degree, the Department of Occupational Therapy has suspended admissions to the post-professional O.T.D. until summer 2016. The post-professional O.T.D. curriculum is being adjusted to bring that program in synch with the entry-level O.T.D. The department’s goal is to provide the best overall program at both levels. Plans continue to evolve, so please be in touch if you are interested in a post-professional O.T.D. Prospective students can visit the department’s website (http:// www.sahp.vcu.edu/departments/occu/programs/postprofessional-otd) or call directly at (804) 828-2220.

Program goal
The primary mission of the Department of Occupational Therapy is the preparation of excellent, innovative, adaptable and responsible occupational therapists as professional leaders for the state, the nation and the world. Our mission represents an integration of the missions of the university and the School of Allied Health Professions. In pursuit of this mission, the department:

1. Prepares students to become client-centered practitioners who utilize up-to-date evidence, theory and technology to facilitate their clients’ health and well-being through the use of occupation
2. Seeds the development of new occupational therapy leaders in research, teaching and service through educational, community and research expectations and opportunities
3. Fosters student commitment to scientific inquiry and professional competence and promotes personal growth, balance and dedication to lifelong learning and service
4. Promotes faculty excellence, collaboration and leadership in teaching, scholarship, research and service that models integrity, competence and evidence-based practice
5. Collaborates with the community through education, consultation and the development of strong linkages with practitioners, clinical educators and the community
6. Interacts dynamically with the OT profession and stakeholders, contributing proactively to the evolution and recognition of the profession and the use of occupation to meet society’s needs for health and quality life

Student learning outcomes
1. The student will articulate knowledge of leadership theories and models, critically analyze current leadership abilities and apply leadership skill in professional contexts.
2. The student will identify and use professional, data-driven evidence to support professional programs and initiatives through proposal writing for grant funding and program development.
3. The student will demonstrate advanced skill in developing and implementing new programs/projects designed to advance the field of occupational therapy.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://wwwgraduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Student manuals are distributed to new students every August at the on-campus meeting.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Note: As part of the transition from the entry-level program from the M.S.O.T. to the O.T.D. degree, the Department of Occupational Therapy has suspended admissions to the post-professional O.T.D. until summer 2016. The post-professional O.T.D. curriculum is being adjusted to bring that program in synch with the entry-level O.T.D. The department's goal is to provide the best overall program at both levels. Plans continue to evolve, so please be in touch if you are interested in a post-professional O.T.D. Prospective students can visit the department's website (http://http://www.sahp.vcu.edu/departments/occu/programs/postprofessional-otd) or call directly at (804) 828-2220.

Admission requirements

</tr>
</thead>
<tbody>
<tr>
<td>O.T.D.</td>
<td>Fall</td>
<td>May 1</td>
<td>GRE (if applying with a bachelor’s degree in occupational therapy)</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum acceptable standards for admission:

1. Bachelor’s or master’s degree in occupational therapy from an accredited college or university
2. Cumulative minimum GPA of 3.0 from prior course work
3. Current (within 5 years) GRE scores if applying with a bachelor’s degree (The GRE is not required if applying with a master’s degree.)
4. Official transcripts in sealed envelopes and signed by university official across seal
5. A leadership essay describing how earning an O.T.D. and completing a capstone leadership project will enhance personal career goals and how the applicant may use advanced leadership skills developed in this program to advance the profession of occupational therapy
6. Curriculum vitae or resume that details professional leadership experience
7. Three letters of recommendation

Note: As part of the transition from the entry-level program from the M.S.O.T. to the O.T.D. degree, the Department of Occupational Therapy has suspended admissions to the post-professional O.T.D. until summer 2016. The post-professional O.T.D. curriculum is being adjusted to bring that program in synch with the entry-level O.T.D. The department’s goal is to provide the best overall program at both levels. Plans continue to evolve, so please be in touch if you are interested in a post-professional O.T.D. Prospective students can visit the department’s website (http://http://www.sahp.vcu.edu/departments/occu/programs/postprofessional-otd) or call directly at (804) 828-2220.

Degree requirements
The Occupational Therapy Doctorate is a part-time, distance education, post-professional program for students with an occupational therapy degree. It combines Web-based instruction with on-campus meetings twice a year, in August and January. The program follows the traditional fall and spring semester schedule. Summer courses are required for students entering with a bachelor’s degree and are optional for students entering with a master’s degree. The curriculum consists of leadership, research/scientific foundation and theory practice foundation core courses, along with electives for concentrated study.

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete all university and School of Allied Health Professions requirements. Students must successfully complete all credit hours appropriate to the curriculum into which students enter. The curriculum for an occupational therapist entering with a master’s degree from VCU requires a minimum of 21 credit hours. The curriculum for an occupational therapist entering with a master’s degree from another university or college requires a minimum of 32 credit hours. The curriculum for an occupational therapist entering with a baccalaureate degree requires a minimum of 47 credit hours of courses.

Curriculum requirements

Students entering with an M.S. from VCU
Research and scientific foundations core
OCCT 735 Evidence Bases for Occupational Therapy Practice 3

Leadership core
OCCT 736 Developing Fundable Projects 3
OCCT 739 Program Development and Evaluation 3
OCCT 740 Concepts in Disability Leadership for Occupational Therapists 3
OCCT 741 Disability Leadership Applications for Occupational Therapists 3
OCCT 742 Practicum in Leadership for Occupational Therapists 4
OCCT 743 Synthesis and Evaluation of Capstone Leadership Project 2

Total Hours 21

Total graduate credit hours required (minimum) 21

Students entering with an M.S. from another university/college
OCCT 671 Advanced Theory in Occupational Therapy 4
OCCT 673 Health Care Delivery and Occupational Therapy Practice Models 3
OCCT 710 Quantitative Research Processes 4
OCCT 735 Evidence Bases for Occupational Therapy Practice 3
OCCT 736 Developing Fundable Projects 3
OCCT 739 Program Development and Evaluation 3
OCCT 740 Concepts in Disability Leadership for Occupational Therapists 3
OCCT 741 Disability Leadership Applications for Occupational Therapists 3
OCCT 742 Practicum in Leadership for Occupational Therapists 4
Total graduate credit hours required (minimum) 32

Students entering with a B.S.

Occupational Therapy, Master of Science in (M.S.O.T.)

Program accreditation
Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association

Note: Starting summer 2016, the M.S.O.T. program will be replaced with an entry-level occupational therapy doctorate, or O.T.D. The last class of M.S.O.T. students, enrolled in summer 2015, will graduate in December 2017. Students with a bachelor's degree who meet all prerequisite requirements may apply to the entry-level OTD program from mid-July to December of 2015 and yearly thereon. Prospective students may visit the department’s website (http://www.sahp.vcu.edu/departments/occu/programs/entry-level-otd) for details on the entry-level O.T.D.

Program goal
The primary mission of the Department of Occupational Therapy is the preparation of excellent, innovative, adaptable and responsible occupational therapists as professional leaders for the state, the nation and the world. Our mission represents an integration of the missions of the university and the School of Allied Health Professions. In pursuit of this mission, the department:

1. Prepares students to become client-centered practitioners who utilize up-to-date evidence, theory and technology to facilitate their clients' health and well-being through the use of occupation
2. Seeds the development of new occupational therapy leaders in research, teaching and service through educational, community and research expectations and opportunities
3. Fosters student commitment to scientific inquiry and professional competence and promotes personal growth, balance and dedication to lifelong learning and service
4. Promotes faculty excellence, collaboration and leadership in teaching, scholarship, research and service that models integrity, competence and evidence-based practice
5. Collaborates with the community through education, consultation and the development of strong linkages with practitioners, clinical educators and the community
6. Interacts dynamically with the OT profession and stakeholders, contributing proactively to the evolution and recognition of the profession and the use of occupation to meet society's needs for health and quality life
Student learning outcomes

1. **Meet foundational requirements:** As part of a broad foundation in liberal arts and sciences, including biological, physical, social and behavioral sciences, students will be able to employ logical thinking, critical analysis, clinical reasoning and problem solving to demonstrate oral and written communication skills, innovative use of computer technology, knowledge of human structure and function, awareness of social development and use of statistics to interpret tests and measurements. (Objectives B.1.1-B.1.11 in ACOTE Standards)

2. **Basic tenets of occupational therapy:** Students will be able to understand and articulate the meaning and impact of occupation, its historical and philosophical significance to the profession, its role as a central construct in OT theory development, its relationship to the promotion of health and wellness and prevention of disease and disability. Recognizing the importance of activity analysis in the process of formulating intervention plans will be an emphasis for student learning. (Objectives B.2.1-B.2.11 in ACOTE Standards)

3. **OT theories, models and frames of reference:** Students will be able to describe and apply occupational therapy theories and models to these and other theoretical foundations of evaluation and intervention and will demonstrate appreciation for the process of development of theoretical principles. Occupational therapy theories and models covered in the curriculum will include but not be limited to: the model of human occupation sensory integration, biomechanical and rehabilitation models, motor control and movement recovery models. (Objectives B.3.1-B.3.6 in ACOTE Standards)

4. **OT screening, evaluation and referral:** Students will be able to select appropriate tools, both standardized and nonstandardized, for effective evaluation; analyze psychometric properties of assessment tools; evaluate occupational performance across all areas of occupation; distinguish between roles of occupational therapists and occupational therapy assistants; make appropriate client referrals; interpret test results; and document services to assure accountability, reimbursement and need for services. (Objectives B.4.1-B.4.11 in ACOTE Standards)

5. **Intervention planning:** In accordance with the occupational therapy practice framework, students will learn to develop occupation-based intervention plans and strategies. Intervention planning will be based on information acquired via occupational profiles, evaluation of client factors – body function and structure strengths/weaknesses, performance patterns, contextual issues, activity demands, and performance skills. Students will be able to choose appropriate therapeutic activities, learn the value of therapeutic use of self, modify environments, incorporate assistive technologies, fabricate needed orthotics, and train clients in areas of mobility and transfer, feeding and eating, and activities of daily living. Students will educate clients as needed and safely use superficial thermal and mechanical modalities as preparatory measures to improving occupational performance. (Objectives B.5.1-B.5.28 in ACOTE Standards)

6. **Context of service delivery:** Students will demonstrate knowledge of the variety of contexts that affect and are affected by occupational therapy service delivery. They will be able to compare and contrast differences in service delivery systems, including health care, education, community and social systems. They will be able to discuss the impact of socioeconomic and political influences on occupational therapy and the need to respond to system changes to create opportunities and avoid pitfalls in education, research and practice. (Objectives B.6.1-B.6.6 in ACOTE Standards)

7. **OT management:** Students will be able to describe and demonstrate how practice settings affect service delivery and management of services; awareness of how federal and state laws guide service delivery; understanding of the requirements for licensing and certification, documentation, and reimbursement; and the essential nature of competency-based procedures for legal and ethical supervision of personnel and fieldwork students. Understanding of program needs, service delivery, optional and effective staffing procedures will be discussed. (Objectives B.7.1-B.7.10 in ACOTE Standards)

8. **Understanding and consuming research:** Students will be able to articulate the importance of knowledge development for the profession; locate, critique and interpret research evidence; apply research literature to practice; use basic statistics and qualitative research methods; demonstrate knowledge of the research process; and implement some aspect of research methodology. Discussion of grant writing, proposal development, research dissemination, and translation and research report writing will be included. (Objectives B.8.1-B.8.9 in ACOTE Standards)

9. **Professional ethics:** Students will be able to demonstrate knowledge and understanding of the American OT Association’s code of ethics; the importance of membership in professional organizations; the value of supporting and educating other professions about OT; the importance of ongoing professional development; the threat and avoidance of liability issues; conflict resolution; contractual service provision; and ethical supervision. (Objectives B.9.1-B.9.13 in ACOTE Standards)

10. **Fieldwork:** Through a carefully coordinated process of fieldwork, students will be able to apply concepts learned in the classroom to practice settings under careful supervision of trained and qualified occupational therapy practitioners. Gradation of time spent, responsibilities and expectations placed on students will be provided through assignment, first to fieldwork level 1 and then to fieldwork level 2 experiences across a wide range of settings and practice areas. Upon completion of all fieldwork requirements, students will be prepared to take the National Board for Certification in Occupational Therapy examination, thereby qualifying them for state licensure and practice of occupational therapy at the entry level. (Objectives B.10.1-B.1.22 in ACOTE Standards)

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.
Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student manual distributed to new students every June during orientation.

All graduates of an occupational therapy program are required to take the national certification examination to become a registered occupational therapist and use the credentials OTR. The national certifying organization for occupational therapy is the National Board for Certification in Occupational Therapy. Other licensure or certification requirements have been established by all 50 states, the District of Columbia, Guam and Puerto Rico. Most licensure requirements include board certification as a registered occupational therapist. Some licensure or certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For specific information, prospective students should contact the licensure or certification agency for occupational therapy.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Note: Starting summer 2016, the M.S.O.T. program will be replaced with an entry-level occupational therapy doctorate, or O.T.D. The last class of M.S.O.T. students, enrolled in summer 2015, will graduate in December 2017. Students with a bachelor's degree who meet all prerequisite requirements may apply to the entry-level OTD program from mid-July to December of 2015 and yearly thereon. Prospective students may visit the department's website (http://www.sahp.vcu.edu/departments/occu/programs/entry-level-otd) for details on the entry-level O.T.D.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. A bachelor's degree from an accredited college or university
2. A minimum grade-point average in all college courses of 2.7 (based on a 4.0 system)
3. A minimum grade-point average in prerequisite courses of 3.0. (without rounding)
4. A one-page, “value-added” essay submitted as a PDF file to otentrylevel@vcu.edu
5. An official report of GRE scores to VCU (Institution Code 5570)
6. An Occupational Therapy Centralized Application Service application (https://portal.otcas.org) including these items:
   a. A personal statement that addresses:
      i. Why applicant is selecting OT as a career
      ii. How a master’s degree in OT relates to immediate and long-term professional goals
      iii. How the applicant’s personal, educational and professional background will help achieve these goals
   b. Evidence of completion of a minimum of 30 observation hours in one or more settings under the supervision of a licensed OTR or COTA
   c. Three letters of recommendation (One letter from an occupational therapist is preferred, but it is not essential.)
   d. Ten prerequisite (http://www.sahp.vcu.edu/departments/occu/programs/entry-level/prerequisite-courses) courses (30-32 semester credit hours)
7. For non-native English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language iBT score of greater than 102, a TOEFL CBT score of greater than 253, a TOEFL PBT score of greater than 610 or an International English Language Testing System score of greater than 6.5

Note: Starting summer 2016, the M.S.O.T. program will be replaced with an entry-level occupational therapy doctorate, or O.T.D. The last class of M.S.O.T. students, enrolled in summer 2015, will graduate in December 2017. Students with a bachelor's degree who meet all prerequisite requirements may apply to the entry-level OTD program from mid-July to December of 2015 and yearly thereon. Prospective students may visit the department's website (http://www.sahp.vcu.edu/departments/occu/programs/entry-level-otd) for details on the entry-level O.T.D.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete all School of Allied Health Professions requirements and successfully complete 82 credit hours consisting of 60 credit hours in course work and 22 in fieldwork.

Curriculum requirements

Courses
ANAT 525  Advanced Functional Anatomy (Occupational Therapy) (Occupational Therapy) 5
OCCT 520  Occupational Therapy Applications: Kinesiology 2

**Occupational Therapy, Master of Science in (M.S.O.T.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]**

The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs. Students must apply separately to the participating programs and must meet all admission and degree requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

The departments of Occupational Therapy and Gerontology have developed a specialized version of the Certificate in Aging Studies program for students completing the Master of Science in Occupational Therapy.

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Students must meet admission requirements for the occupational therapy degree and the aging studies certificate programs.

Department of Patient Counseling
Russell Davis, Ph.D.
Professor and chair

Patient counseling is the practice of communicating emphatic concern, support and sensitive spiritual counsel to the physically or emotionally troubled person in the traumas of life. There is a long history of a concerted effort toward this end at the VCU Health System. With the appointment of Dr. George D. Ossman as chaplain in 1943, the administration gave clear evidence of its awareness of the need for a specialized caring ministry to hospitalized patients and their families.

The chaplaincy program was significantly expanded in 1958 and was accredited to begin the education and clinical training of persons in patient counseling. Since then, a continuous program has been in existence and has evolved into the present program in patient counseling. Patient counseling, as it exists today, became an integrated program in the School of Allied Health Professions in 1970. A comprehensive curriculum review was completed in 1999.

With the rapid growth of health care and the increasingly complex problems of medical ethics and viable delivery systems, it is very important to educate qualified persons to deal with the human dimensions of illness as well as the personal and family stressors related to it. Through this program, VCU has an opportunity to make an impact upon health care education by emphasizing the spiritual dimension of human needs in life crises. By so doing, this university has a significant role to play in the important task of keeping health care holistic and utilizing technical and scientific methodology in the context of a deep respect for the total life of persons.

Accreditation
The program is accredited by the Association for Clinical Pastoral Education, Incorporated. It is offered in collaboration with the VCU Health System.

Objectives
The programs in patient counseling are designed to assist an individual to work in the health field as one skilled in dealing with the whole person in the context of life’s crises and in a cooperative interprofessional team approach. The programs are offered to persons who have an existing identity in a helping or counseling profession. This includes clergy, social workers, institutional counselors, education specialists, psychologists, community health workers and others in the health care professions.

Facilities
West Hospital (W2S) is the base for the educational program, and limited space is available in clinical areas to work with persons and families in crisis. The Main Hospital, mezzanine level, contains the chapel, family consultation room and administrative offices.

Code of ethics
The professional behavior of the student is expected to be in accordance with the Code of Professional Ethics, as adopted by the Association for Clinical Pastoral Education, Inc. and the Code of Ethics of the Association of Professional Chaplains.

Student responsibilities
Students serve in the dual capacity of providing pastoral care service while learning. Extensive clinical involvement, including night and weekend responsibilities, is required for selected courses and clinical pastoral education credit. Each student receives individual supervision by a member of the faculty.

Students who are unsuccessful in demonstrating completion of designated clinical pastoral education outcomes in any program will be required to develop with a faculty mentor an individualized plan of study toward their completion. Typically, this plan will be accomplished through additional course work or a directed independent study.

Continuation requirements, advising, transfer and part-time status
A student must maintain a minimum GPA of 3.0 in all course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency.

A student must register for at least one credit hour each academic year for continuation in the program. Any student who fails to register must have prior approval to do so or be dropped from the program and must reapply for reinstatement.

There is a five calendar-year maximum for students to complete the Master of Science degree and a seven calendar-year maximum for the dual degree. The graduate certificate program must be completed within a four calendar-year maximum. Part-time students who wish to accumulate concurrent ACPE credit need to be sure that course work is completed in accordance with ACPE standards.

A maximum of eight credits may be transferred from another university toward the Master of Science course requirements provided these credits have not been applied to a previous degree. A maximum of one-third of the didactic hours may be transferred from another VCU program. Dual degree candidates may apply six credits from their seminary studies to the VCU degree. Transfer is given at the discretion of the chair after consultation with the faculty, subject to university approval. Credits are not transferable to either of the certificate programs.

Students who have been admitted to the graduate certificate program may be admitted to the master of science degree with advanced standing after the completion of at least 18 credits with a B or better. All credits of a B or better will transfer to the degree program.

Upon admission to all programs students will be assigned a faculty adviser.

- Patient Counseling, Master of Science (M.S.) with a concentration in:
  - Accelerated chaplain certification (p. 248)
  - Chaplain certification (p. 249)
  - Supervisory clinical pastoral education (p. 251)
Program accreditation
Association for Clinical Pastoral Education

Program goal
To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context

Student learning outcomes
1. Students will articulate the central themes of their religious heritage and the theological understanding that informs their ministry (ACPE Standard 311, Outcome 311.1).
2. Students will identify and discuss major life events, relationships and cultural contexts that influence personal identity as expressed in pastoral functioning (ACPE Standard 311, Outcome 311.2).
3. Students will initiate peer group and supervisory consultation and receive critique about one's ministry practice (ACPE Standard 311, Outcome 311.3).
4. Students will risk offering appropriate and timely critique (ACPE Standard 311, Outcome 311.4).
5. Students will recognize relational dynamics within group contexts (ACPE Standard 311, Outcome 311.5).
6. Students will demonstrate integration of conceptual understandings presented in the curriculum into pastoral practice (ACPE Standard 311, Outcome 311.6).
7. Students will initiate helping relationships within and across diverse populations (ACPE Standard 311, Outcome 311.7).
8. Students will use the clinical methods of learning to achieve their educational goals (ACPE Standard 311, Outcome 311.8).
9. Students will formulate clear and specific goals for continuing pastoral formation with reference to personal strengths and weaknesses (ACPE Standard 311, Outcome 311.9).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Students receive a Department of Patient Counseling student handbook during orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have successfully completed undergraduate training and hold a bachelor’s degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level. Students must apply and be accepted to VCU’s Graduate School to participate in our Clinical Pastoral Education program. This program also requires the submission of a resume, the Association of Clinical Pastoral Education application materials and a personal interview with faculty.
ACPE application fact sheets and narrative instructions can be found at http://s531162813.onlinehome.us/forms.

Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. Ability to communicate orally and in writing must be presented to the Department of Patient Counseling Admissions Committee.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete 12 credit hours of study according to one of the established curricula. Course substitutions require faculty approval.

**Curriculum requirements**

- **Core requirements**
  - PATC 515 Basic Patient Counseling 9

Association for Clinical Pastoral Education

**Program goal**

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context.

**Student learning outcomes**

1. Graduates will demonstrate awareness of self with congruence in the care of patients, families and staff (ACPE Standard 312, Outcome 312.1).
2. Graduates will demonstrate ability to provide care with sensitivity and respect in a diverse patient, family and staff environment (ACPE Standard 312, Outcome 312.2).
3. Graduates will demonstrate the knowledge and provision of intensive and extensive pastoral/spiritual care to persons in crisis (ACPE Standard 312, Outcome 312.3).
4. Graduates will demonstrate incorporation of theological understanding and knowledge of the behavioral sciences in care of patients, families and staff (ACPE Standard 312, Outcome 312.4).
5. Graduates will demonstrate effective participation as members of a comprehensive health care team (ACPE Standard 312, Outcome 312.5).
6. Graduates will demonstrate responsible care and professional boundaries (ACPE Standard 312, Outcome 312.6).
7. Graduates will demonstrate the utilization of individual and group supervision for personal and professional development as well as ongoing evaluation of clinical practice (ACPE Standard 312, Outcome 312.7).
8. Graduates will demonstrate awareness of professional standards in chaplaincy (ACPE Standard 312, Outcome 312.8).
9. Graduates will demonstrate ability to self-supervise and critically reflect on their own pastoral encounters (ACPE Standard 312, Outcome 312.9).

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have successfully completed undergraduate training and hold a bachelor’s degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level; graduate degree in a health-related field; or two years of graduate theological education. Students must apply and be accepted to VCU’s Graduate School to participate in the clinical pastoral education program.

This program also requires submission of the following supplemental material: a current resume, the Association of Clinical Pastoral Education Inc. application materials, copies of all previous self- and supervisor’s CPE evaluations and two verbatim case studies of clinical work. An interview with the faculty admission committee will be granted based on application material.

ACPE application fact sheets and narrative instructions can be found at http://s531162813.onlinehome.us/forms.
Chaplain certification concentration

1. The chaplain certification concentration is available to individuals who have a previous graduate degree or who have at least two years of graduate education in theology, the behavioral sciences or the health-related sciences. It is assumed that completion of this 44-credit-hour concentration will take four to five semesters.

2. Students admitted to this option must have a minimum GPA of 3.0. Submission of the Graduate Examination Record is required when this GPA requirement is not met.

3. Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. Ability to communicate orally and in writing must be presented to the Department of Patient Counseling admissions committee.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must:

1. Complete a minimum of 44 credit hours in accordance with the approved curriculum
2. Complete all core courses
3. Complete all required elective course hours

Patient Counseling, Master of Science (M.S.) with a concentration in supervisory clinical pastoral education

Program accreditation
Association for Clinical Pastoral Education

Program goal
To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context

Student learning outcomes

1. Student maintains personal integrity and a deepening pastoral identity (ACPE Standard 315, Outcome 315.1).
2. Student demonstrates emotional and spiritual maturity (ACPE Standard 315, Outcome 315.2).
3. Student forms meaningful pastoral relationships (ACPE Standard 315, Outcome 315.3).
4. Student self-supervises their own ongoing pastoral practice (ACPE Standard 315, Outcome 315.4).
5. Student refines their professional identity as a clinical pastoral educator (ACPE Standard 315, Outcome 315.5).
6. Student demonstrates awareness of how their own culture affects professional and personal identity, pastoral practice, the supervisory relationship and student learning (ACPE Standard 315, Outcome 315.6).
7. Student articulates understanding of and methodology for clinical pastoral supervision based on a critical grasp of the professional literature relating to the field of clinical supervision (Standard 315, Outcome 316.1).
8. Student articulates and implements a philosophy of CPE based on an educational model integrating the theory and practice of CPE, which is based on and congruent with their own theology (Standard 316, Outcome 316.2).
9. Student articulates rationale for multicultural competence, integrating the theory and practice of CPE, which is based on and congruent with their own theology (Standard 316, Outcome 316.3).
10. Student assesses an individual student’s learning patterns, personality, religious history and cultural values as a basis for supervisory strategies (ACPE Standard 317.1, Outcome 317.1.1).
11. Student supervises students’ pastoral work, giving attention to unique patterns of personal and professional development, including the ability to assist students’ movement toward pastoral identity (ACPE Standard 317.1, Outcome 317.1.2).
12. Student defines and evaluates students’ pastoral and personal resources, and uses supervisory strategies and interventions to facilitate students’ learning and development in pastoral care (ACPE Standard 317.1, Outcome 317.1.3).

13. Student assists students in taking responsibility for formulating a learning process and evaluating the results of the learning experience (ACPE Standard 317.1, Outcome 317.1.4).

14. Student uses their own personality and personal, religious and cultural history as a teaching resource in shaping a personal supervisory style (ACPE Standard 317.1, Outcome 317.1.5).

15. Student facilitates development of group interpersonal interaction (ACPE Standard 317.2, Outcome 317.2.1).

16. Student enables students to use their responses to the program as a learning experience (ACPE Standard 317.2, Outcome, 317.2.2).

17. Student develops and organizes programs of CPE based on program educational principles appropriate to experiential learning (ACPE Standard 318, Outcome 318.1).

18. Student manages CPE programs effectively (ACPE Standard 318, Outcome 318.2).

19. Student develops a variety of CPE program resources (ACPE Standard 318, Outcome 318.3).

20. Student uses diverse clinical educational methods (ACPE Standard 318, Outcome 318.4).

21. Student works with the theological implications of the ministry context (ACPE Standard 318, Outcome 318.5).

22. Student understands and applies professional organizational ethics as they relate to CPE and pastoral practice (ACPE Standard 318, Outcome 318.6).

23. Student uses appropriate clinical skills and teaching methods that integrate the role of context and culture in pastoral practice and education (ACPE Standard 318, Outcome 318.7).

24. Student advocates for students based on awareness of how persons’ social locations, systems and structures affect their ministry, learning and the educational context (ACPE Standard 318, Outcome 318.8).

25. Student considers cultural factors in the use of learning assessments, educational strategies, curriculum resources and evaluation procedures (ACPE Standard 318, Outcome 318.9).

26. Student integrates educational theory, knowledge of behavioral science, professional and organizational ethics, theology and pastoral identity into supervisory function (ACPE Standard 319, Outcome 319.1).

27. Student demonstrates awareness of the cultural contexts of diverse student groups and clinical populations that integrates and articulates ethnic identity development and its implications for pastoral practice and supervisory relationships (ACPE Standard 319, Outcome 319.2).

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Students receive a Department of Patient Counseling student handbook during orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have successfully completed undergraduate training and hold a bachelor’s degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level.
level; graduate degree in a health-related field; or two years of graduate theological education. Students must apply and be accepted to VCU's Graduate School to participate in the clinical pastoral education program.

This program also requires submission of the following supplemental material: a current resume, the Association of Clinical Pastoral Education Inc. application materials, a copy of all previous self- and supervisor's CPE evaluations and two verbatim case studies of clinical work. An interview with the faculty admission committee will be granted based on application material.

ACPE application fact sheets and narrative instructions can be found at http://s531162813.onlinehome.us/forms.

**Supervisory clinical pastoral education concentration**

1. The supervisory clinical pastoral education concentration is offered to persons seeking certification as supervisors according to the Standards of the Association for Clinical Pastoral Education Inc.

2. This degree concentration is available to students who hold a master's degree or equivalency and who have completed a minimum of four units of ACPE clinical pastoral education.

3. Students admitted to this option must have a minimum GPA of 3.0. Submission of the Graduate Examination Record is required when this GPA requirement is not met.

4. Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. The ability to communicate orally and in writing must be presented to the Department of Patient Counseling admissions committee.

5. Each full-time semester at VCU is designed to meet the requirements for one unit of supervisory CPE as accredited by the Association for Clinical Pastoral Education, Inc.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students must:

1. Follow, under faculty guidance, the procedures outlined in ACPE’s Manual on Certification

2. Meet with faculty annually for review of progress and continuation in the program

3. Complete a minimum of 44 credit hours in accordance with the approved curriculum

4. Complete all core courses

5. Complete all required elective course hours

Students who have completed degree requirements may continue to enroll as special students if completing residency requirements at VCU Medical Center or certification requirements with the ACPE.

**Curriculum requirements**

Only students admitted to this concentration are eligible to take courses numbered 653 through 696.

**Program accreditation**

Association for Clinical Pastoral Education

**Program goal**

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context.
Student learning outcomes
1. Graduates will demonstrate awareness of self with congruence in the care of patients, families and staff (ACPE Standard 312, Outcome 312.1).
2. Graduates will demonstrate ability to provide care with sensitivity and respect in a diverse patient, family and staff environment (ACPE Standard 312, Outcome 312.2).
3. Graduates will demonstrate the knowledge and provision of intensive and extensive pastoral/spiritual care to persons in crisis (ACPE Standard 312, Outcome 312.3).
4. Graduates will demonstrate incorporation of theological understanding and knowledge of the behavioral sciences in care of patients, families and staff (ACPE Standard 312, Outcome 312.4).
5. Graduates will demonstrate effective participation as a member of a comprehensive health care team (ACPE Standard 312, Outcome 312.5).
6. Graduates will demonstrate responsible care and professional boundaries (ACPE Standard 312, Outcome 312.6).
7. Graduates will demonstrate the utilization of individual and group supervision for personal and professional development as well as ongoing evaluation of clinical practice (ACPE Standard 312, Outcome 312.7).
8. Graduates will demonstrate awareness of professional standards in chaplaincy (ACPE Standard 312, Outcome 312.8).
9. Graduates will demonstrate ability to self-supervise and critically reflect on their own pastoral encounters (ACPE Standard 312, Outcome 312.9).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Other information
Students receive a Department of Patient Counseling student handbook during orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have successfully completed undergraduate training and hold a bachelor’s degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level; graduate degree in a health-related field; or two years of graduate theological education. Students must apply and be accepted to VCU’s Graduate School to participate in the clinical pastoral education program.

ACPE application fact sheets and narrative instructions can be found at http://s531162813.onlinehome.us/forms.

Combined Master of Science in Patient Counseling and Master of Divinity
1. The dual degree (M.S./M.Div.) option is offered cooperatively with two Richmond-area graduate institutions of theological education (the Baptist Theological Seminary at Richmond and the Samuel DeWitt Proctor School of Theology of Virginia Union University).
2. The program is designed as a four-year program with four full semesters spent in residence at VCU. Typically, students apply to the Department of Patient Counseling during the first semester of seminary enrollment.
3. Students admitted to this option must have a minimum GPA of 3.0. Submission of the Graduate Examination Record is required when this GPA requirement is not met.
4. Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. The ability to communicate orally and in writing must be presented to the Department of Patient Counseling admissions committee.
5. Students enrolled in the dual-degree program will remain in good standing at VCU while enrolled in their seminary studies. Each sponsoring institution will grant its respective degree.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students must:
1. Complete a minimum of 44 credit hours in accordance with the approved curriculum
2. Complete all core courses
3. Complete all required elective course hours
4. Submit official seminary transcript with VCU Application to Graduate

Final granting of the Master of Science degree requires an oral review with the faculty demonstrating completion of outcomes for Level II Clinical Pastoral Education or Supervisory Clinical Pastoral Education as determined by the chosen track of study.
The Department of Physical Therapy was established in 1945 to provide basic preparation for the practice of physical therapy. Between 1945 and 1954, the program consisted of a 12-month professional course designed to train students for entry into the profession. This program was based upon at least three years of college work or the possession of a registered nurse certificate. A two-year professional program after two years of preparatory college work was initiated in 1954. This program led to the degree of Bachelor of Science in Physical Therapy. In 1968, the Department of Physical Therapy became part of the School of Allied Health Professions. The two-year professional program leading to the Bachelor of Science degree continued through the 1988-89 academic year.

In August 1989, the Department of Physical Therapy, School of Allied Health Professions, began a three-year professional program based on three years of previous college work that leads to a Master of Science degree. On Feb. 8, 2001 the VCU Board of Visitors approved a proposal to offer a Doctor of Physical Therapy as the entry-level professional degree. The State Council of Higher Education in Virginia gave its final approval for the proposal on June 20, 2001. The first class to study the professional program began in July 2002.

In addition to the professional program, the department participates in four collaborative and interdisciplinary Ph.D. programs.

**Mission**

The Department of Physical Therapy serves the people of the commonwealth of Virginia and the nation by providing educational programs related to physical therapy. The department provides an environment that encourages education through problem solving, free inquiry, professional behavior and scholarship. The department’s primary focus is to prepare individuals for general physical therapy practice. These practitioners are educated to serve as an entry point into the health care system for consumers. Post-professional programs provide quality education leading to careers in teaching and research. The department also provides assistance and services to the community and engages in research and scholarly activities related to the practice of physical therapy.

**Philosophy**

Physical therapy is an integral part of the health care system. Expanding knowledge in the basic and clinical sciences, and changes in the needs and mandates of society, continually place new demands on the physical therapy profession. The faculty of the Department of Physical Therapy is committed to providing educational programs responsive to expanding knowledge and the needs of society.

The primary principle directing the activities of the department is the faculty’s commitment to optimal patient care through physical therapy education, research and practice. The faculty strongly believes that physical therapists must have a thorough understanding of the theoretical bases for treatment and skills in problem solving, evaluation and communication.

The faculty also believes that physical therapists have a responsibility to develop skills for lifelong learning (e.g., the ability to find information and to critically analyze that information).

The faculty also is committed to the development and sharing of new knowledge in the field of physical therapy through scholarship and research.

**Objectives**

The objectives of the Department of Physical Therapy, in concert with the mission of the university and the School of Allied Health Professions, are to:

- Provide an entry-level postbaccalaureate educational program for full-time students with diverse backgrounds and experiences.
• Contribute to interdisciplinary post-professional doctoral programs that prepare physical therapists to contribute to the understanding and application of therapeutic procedures through basic and applied research and to teach both clinical and didactic physical therapy on all academic levels
• Provide an atmosphere that fosters critical thinking, intellectual curiosity and integrity, freedom of expression, personal growth and professional competence, and a commitment to learning for faculty and students
• Provide an environment that facilitates research and scholarship directed toward optimizing patient care
• Provide services to the public and professional communities

Facilities
The educational facilities for the Department of Physical Therapy are located on the basement floor of A.D. Williams/West Hospital. These buildings, located on the northeast corner of 12th and Broad streets, house administrative and faculty offices, classrooms, physical therapy instructional, computer and research laboratories, and student locker rooms. Classrooms in other buildings on the MCV Campus are used as needed.

Clinical education experiences for professional students are offered in physical therapy clinics throughout Virginia and the country.

Graduate (postprofessional) programs in physical therapy
The Department of Physical Therapy is committed to improving physical therapy services through graduate education and research. The department participates in several cooperative and interdisciplinary doctoral programs. A physical therapy track is offered in the Ph.D. program of the Department of Physiology and Biophysics. An interdisciplinary Ph.D. in Rehabilitation and Movement Science is offered in conjunction with two other departments at VCU: Department of Health and Human Performance in the School of Education and the Department of Physical Medicine and Rehabilitation in the School of Medicine. Also, the department participates in the School of Allied Health Professions’ Ph.D. in Health Related Sciences.

Education at the Ph.D. level is a highly independent adventure. The curricula offered by the Department of Physical Therapy through joint ventures with other departments allow students the opportunity to focus on highly divergent aspects of research related to physical therapy. Each of the programs also offers students opportunity to hone teaching skills in preparation for a well-rounded academic career.

Regardless of the chosen program or track, each Ph.D. student conducts a substantial original research project. Individuals interested in doctoral education are encouraged to examine the research interest areas of faculty in each of the participating departments and to consult with the program directors before submitting their application to a specific program.

Admission requirements
Applications are encouraged from individuals who are practicing physical therapists. Applicants must have graduated from a physical therapy educational program approved by the American Physical Therapy Association. International students must have an equivalent level of education as determined by the Office of International Admissions.

Individuals who are not physical therapists are not accepted into the advanced degree programs.

Additional admission requirements for graduate study in the Department of Physical Therapy are as follows:
1. A minimum GPA of 2.7 on a 4.0 scale for entry-level professional education
2. Satisfactory score on the general test of the GRE (taken no more than five years prior to admission)
3. Three satisfactory letters of recommendation
4. Applicant’s written statement of intent for pursuing graduate studies in a particular program
5. Such additional requirements as established for each specific program

International students also must score a 600 or above on the Test of English as a Foreign Language (250 on computer-based test).

Financial assistance
Some teaching and research assistantships are available from the Department of Physical Therapy. These assistantships are competitive. Part-time employment as a physical therapy clinician is available in Richmond and surrounding areas. Doctoral students receiving stipends must receive approval of outside employment.

VCU provides three types of student assistance: scholarships, loans, and work study. For information on these types of financial assistance, write to the Office of Financial Aid, Virginia Commonwealth University, MCV Campus, Richmond, VA 23298-0244.

Priority consideration is given to applications received by Jan. 7.

• Physical Therapy, Doctor of (D.P.T.) (p. 256)
• Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in:
  • Exercise physiology (p. 260)
  • Neuromusculoskeletal dynamics (p. 261)

Physical Therapy, Doctor of (D.P.T.)

Program accreditation
Commission on Accreditation in Physical Therapy Education

Program goal
The Department of Physical Therapy serves the people of the commonwealth of Virginia and the nation by providing educational programs related to physical therapy. The department provides an environment that encourages education through problem solving, free inquiry, professional behavior and scholarship. The department’s primary focus is to prepare individuals for general physical therapy practice. These practitioners are educated to serve as an entry point into the health care system for consumers. Post-professional programs provide quality education leading to careers in teaching and research. The department also provides assistance and services to the community and engages in research and scholarly activities related to the practice of physical therapy.
Preparation of physical therapists
The goal of this program is to provide a quality educational program that prepares students for entry into the profession of physical therapy. The program prepares students to evaluate and manage patients with physical therapy problems effectively and in accordance with ethical principles. The program also provides students with strategies to continually define and meet their own educational needs in order to keep skills and knowledge current throughout their professional careers.

Student learning outcomes
1. Examine, diagnose individuals with disabilities: Effectively examine, evaluate, diagnose and determine the prognosis of individuals with impairments, functional limitations and disabilities
2. Apply health promotion principles and practices: Apply health promotion principles and practices in primary, secondary and tertiary prevention
3. Manage PT problems in a safe, ethical manner: Manage physical therapy problems in a safe, ethical, legal and professional manner
4. Use appropriate educational principles: Use appropriate educational principles to design methods to teach patients/clients, caregivers, colleagues and other health care professionals
5. Manage changes in physical function: Effectively manage changes in the physical function and health status of patients/clients
6. Select and implement safe PT interventions: Select and implement safe and effective physical therapy interventions and assess the subsequent outcomes
7. Determine the need for further examination or consultation: Determine the need for further examination or consultation by another physical therapist or for referral to another health care professional
8. Manage human and material resources: Manage human and material resources and services to provide high-quality and cost-effective physical therapy services in diverse settings
9. Apply concepts and principles of management: Apply concepts and principles of management to effectively supervise support personnel to whom tasks have been delegated
10. Effectively document patient information: Effectively document patient information and physical therapy services to colleagues in an organized, logical and concise manner
11. Integrate principles of critical inquiry to evaluate, interpret and utilize professional literature in clinical practice: Participate in clinical research activities and critically analyze new concepts in the application of physical therapy practice
12. Effectively communicate with patients: Effectively communicate, verbally and nonverbally, with patients and their caregivers, health care personnel, and members of the community
13. Demonstrate awareness of social, economic factors: Demonstrate an awareness of the influence of social, economic, legislative and demographic factors on the delivery of health care
14. Demonstrate understanding of lifelong learning: Demonstrate an understanding of the importance of lifelong learning and a commitment to the physical therapy profession

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduat e.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
A hard copy of the VCU D.P.T. program student handbook and policies and procedures manual is distributed to each entering physical therapy student at orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

For non-native English-speaking applicants, regardless of immigration status, a TOEFL score of at least 600 (score of 250 on computerized exam) is required; scores should be reported directly to Virginia Commonwealth University.

The program of study necessary to be considered for admission to the professional Doctor of Physical Therapy program must include a minimum of the following subject areas and credits:

**Biological sciences** – 12 credit hours including laboratory experiences
- Must include four credit hours of college-level biology
- Must include four credit hours of anatomy and four credit hours of human physiology, or eight credit hours of anatomy/physiology (An exercise physiology course is not an acceptable substitute for a human physiology course.)
- Cell biology and histology highly recommended but not required

**Chemistry** – eight credit hours including laboratory experiences

**Mathematics** – three credit hours (must be in pre-calculus or a more advanced mathematics course)

**Physics** – eight credit hours of general physics with laboratory (Courses that emphasize mechanics, electricity, heat and light are highly recommended.)

**Psychology** – six credit hours (One introductory course and one course in human growth and development or abnormal psychology is required.)

**Statistics** – three credit hours

In order to complete the total requirements, students are encouraged to elect courses from the following categories: computer science, embryology, histology, cell biology, comparative anatomy, kinesiology, exercise physiology, foreign languages and courses in physical education dealing with an analytical approach to human movement or motor learning.

Students must also present a minimum of 100 volunteer hours in at least two physical therapy practice settings.

Students are required to have current CPR certification.

One of the three required letters of recommendation must be from a physical therapist.

Special requirements

- The VCU Department of Physical Therapy participates in the American Physical Therapy Association-sponsored physical therapy centralized application service for applicants to the D.P.T. program. All students interested in applying to this program must submit their application materials directly to PTCA. Applicants who apply through PTCA will submit a completed Web-based application comprising biographical data, colleges and universities attended, academic course history, physical therapy observation hours, list of reference providers, work experience, extracurricular activities, honors, professional licenses and a personal essay. It is the applicant’s responsibility to read and follow all PTCA and program-specific instructions. Please visit the Department of Physical Therapy website for application deadlines.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

1. A Bachelor of Arts or Bachelor of Science degree from an accredited college or university
2. A minimum grade-point average of 2.7 (in a 4.0 system)
3. A minimum total of 100 volunteer hours in at least two physical therapy practice settings
4. Three recommendations, at least one of which is from a physical therapist

Prerequisites for admission to the professional Doctor of Physical Therapy program include a Bachelor of Arts or Bachelor of Science degree from an accredited college or university. If the applicant has received college credit hours for AP courses and/or exams, and those hours are listed on the university transcript, those credit hours will be accepted. A grade of D in any required prerequisite course is not acceptable. A minimum GPA of 2.7 (in a 4.0 system) is required to be considered for admission. The GRE is required; the scores should be reported directly to Virginia Commonwealth University. For non-native English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language score of at least 600 (score of 250 on computerized exam) is required; scores should be reported directly to Virginia Commonwealth University.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), every professional physical therapy program student must maintain a minimum cumulative grade point average of 3.0. At the end of each semester, the faculty reviews the academic performance of all students. All students must have a GPA of 3.0 by the end of the second academic year in order to matriculate into PHTY 680 in the third academic year. Physical therapy students must complete all clinical education experiences to the satisfaction of the clinical and academic faculty.

Under no circumstances are physical therapy students permitted to participate in graduation ceremonies if they have not satisfactorily completed all the requirements of the professional physical therapy program curriculum.

Graduate program director
Mary S. Shall, P.T., Ph.D.
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology

Program goal
The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity’s impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.

Student learning outcomes
At the completion of the program students will:

1. Demonstrate teaching effectiveness in the classroom, clinical environment or both
2. Have disseminated research findings at an appropriate regional, national or international conference
3. Demonstrate the ability to independently collect research data, analyze research data and synthesize conclusions from research data

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.
In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must:

1. Have completed at least one of a master’s degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
2. Provide official GRE score
3. Submit a curriculum vitae or professional resume indicating an applicant’s educational and career experience as well as evidence of research potential

Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:

1. A minimum of 50 credit hours developed in conjunction with their advisers
2. Written and oral comprehensive examinations
3. All other university requirements of qualification for degree candidacy
4. Written dissertation based on a focused line of research
5. Oral defense of the dissertation

Department of Radiation Sciences

Jeffrey S. Legg, Ph.D., RT(R)(CT)(QM)
Associate professor and chair

The Department of Radiation Sciences is an integral part of the School of Allied Health Professions and shares its values. The department serves as a national leader in the education of students in the radiation sciences and provides learning opportunities that are innovative and educationally sound. Strong linkages with clinical affiliates and their staffs are vital to the department’s success. Faculty and staff work in a cooperative spirit in an environment conducive to inquisitiveness and independent learning to help a diverse student body develop to its fullest potential. The faculty is committed to the concept of lifelong learning and promotes standards of clinical practice that will serve students throughout their professional careers. Faculty members serve as resources for professionals in practice and contribute to an expanded knowledge base in the field of clinical radiation sciences.

The mission of the Department of Radiation Sciences is to enable a diverse student body to develop its fullest potential and to graduate baccalaureate-level radiologic health professionals who demonstrate outstanding technical, communication and critical-thinking skills.

Department of Radiation Sciences’ goals

1. For entry-level and second modality programs, students will be clinically competent.
   a. Students will attain clinical competence.
   b. Graduates will demonstrate clinical competence while employed in the radiation sciences.

2. Students will communicate effectively.
   a. Students will demonstrate effective communication during their clinical experience.
b. Students will demonstrate effective communication through the research project.

c. Graduates will demonstrate effective communication while employed in the radiation sciences.

3. Students will demonstrate critical-thinking skills.
   a. Students will demonstrate critical-thinking skills during their clinical experience.
   b. Students will demonstrate critical-thinking skills in developing their research project.

4. Students will model professionalism.
   a. Students will demonstrate professionalism during their clinical experience.
   b. Graduates will demonstrate professionalism while employed in the radiation sciences.

5. The department will assure program effectiveness.

History

Radiologic technology education began at the Medical College of Virginia in the 1930s with a one-year training program in radiography. This program has undergone a number of changes through the years to evolve into the current baccalaureate educational program.

A concentration in nuclear medicine technology was added in 1984 and in radiation therapy in 1992. Degree-completion programs have been added to provide an opportunity for certified technologists and therapists to complete requirements for the baccalaureate degree.

Facilities

The educational facilities for the Department of Radiation Sciences are located at 701 W. Grace St., Suite 2100. These facilities include energized laboratories in radiography, nuclear medicine, radiation therapy and mammography. The radiography laboratory includes a digital imaging system. In addition, the radiation therapy laboratory has a 3-D treatment planning system.

During the various phases of the curriculum, students will be assigned to one or more of the following affiliate institutions: VCU Health System’s MCV Hospitals, McGuire Veterans Affairs Medical Center, CJW Medical Center, Southside Regional Medical Center and Henrico Doctors’ Hospitals.

Department of Rehabilitation Counseling

Amy J. Armstrong, Ph.D.
Associate professor and chair

sahp.vcu.edu/rehab (http://sahp.vcu.edu/departments/rehab)

Founded in 1955, the Department of Rehabilitation Counseling serves as a national leader in the professional preparation of certified rehabilitation counselors who exercise skill and competence on a high ethical level and with personal integrity. Accessible, innovative, research-based educational experiences that encourage the use of a critical and exploratory attitude are emphasized. The department seeks to perpetuate active programs of research and service, and maintain high levels of teaching competence. In partnership with students, community agencies and consumer and professional organizations, the department endeavors to advance the personal, social and economic independence of individuals with disabilities.

The Department of Rehabilitation Counseling is fully accredited by the Council on Rehabilitation Education, and is the only such program in the commonwealth of Virginia. The purpose of accreditation is to promote the effective delivery of rehabilitation services to people with disabilities by fostering ongoing review and improvements of rehabilitation education programs. CORE has developed a field-based research accreditation process that has gained widespread acceptance in the professional accreditation movement. With more than 2,000 alumni, the department also enjoys solid relationships with many community organizations that serve as excellent sites for clinical training.

Faculty adviser

Every student must have a faculty adviser to guide the student regarding course selection and scheduling, to supervise his/her research and to act as a channel of communication with the department, to other departments, and to the Graduate School. When the student receives notification of admission to the department, it is his/her responsibility to contact the faculty adviser to plan the program of study. Students consult with faculty advisers on a regular basis to ensure orderly progress through the entire program of study, choose clinical placement sites, select electives and plan their careers.

Pathways

Pathways, initiated in the spring of 1996, is a unique interdisciplinary program concentration designed for undergraduate students from a wide variety of academic departments who are interested in pursuing alcohol and drug rehabilitation studies. A sequence of recommended courses is offered to students who are majoring in psychology, criminal justice, social work, pharmacy, nursing, rehabilitation counseling and other academic and professional disciplines. The sequence of course work depends upon the level of intensity sought by the student, and it may range from only a single introductory course to a complete specialization. Pathways enables students to select a curricular path that matches their substance abuse rehabilitation interest regardless of their discipline. The program is available to undergraduates and is arranged in collaboration with the students major adviser and/or the director of the rehabilitation substance abuse counselor education concentration.

- Rehabilitation Counseling, Master of Science (M.S.) (p. 266)
- Rehabilitation Counseling, Master of Science (M.S.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined] (p. 268)
- Professional Counseling, Certificate in (Post-master’s certificate) (p. 264)

Professional Counseling, Certificate in (Post-master’s certificate)

Program goals

The post-master’s certificate program in professional counseling is designed for persons who hold the Master of Science or Master of Arts degree in counseling from VCU or other accredited institutions. The intent is to assist students in meeting the educational requirements for the Licensed Professional Counselor, the Licensed Substance Abuse Practitioner and the Certified Substance Abuse Counselor credentials in Virginia and other states.

The certificate program also may be pursued to fulfill preservice or continuing education requirements for various national certifications,
such as National Certified Counselor or Certified Rehabilitation Counselor. Specialization requirements may exceed the minimum number of required credit hours for the certificate program as a whole.

Courses are selected from course offerings of the Master of Science in Rehabilitation Counseling program based on individualized need and in conjunction with a faculty adviser.

Specific goals include but are not limited to:

1. The encouragement of advanced graduate education in counseling
2. The facilitation of the professional counselor’s career development efforts and goals
3. The facilitation of the acquisition or maintenance of professional state licenses or national certificates
4. The expansion of the student’s awareness and expertise in specialized counselor roles and functions

Student learning outcomes

Upon completion of the program, the graduate will be able to:

1. Develop and maintain confidential counseling relationships with individuals using established skills and techniques
2. Establish, in collaboration with the consumer, individual counseling goals and objectives
3. Apply advanced counseling and interviewing skills
4. Employ consultation skills with and on behalf of the consumer

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Post-master’s certificate</td>
<td>Fall, Spring</td>
<td>Apr 1, Oct 1</td>

</tr>
</tbody>
</table>

Special requirements

- Statement of academic and professional goals and of previous work or volunteer experience
- Three letters of reference from professors, employers or others who can assess applicant’s capabilities (nonfamily members)
- Personal interview (may be required)

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have completed a master’s degree in rehabilitation counseling or a related discipline.

Upon admission to the program, students must meet with an academic adviser to design an approved course of study that leads to the completion of the educational requirements for licensure or certification as a professional counselor.

Degree requirements

In addition to general Graduate School graduation requirements (p. 39),

1. Students must complete a minimum of 15 graduate credit hours of course work in professional counseling that leads to the completion of the educational requirements for licensure or certification as a professional counselor, as prescribed in their approved courses of study. Specialization requirements may exceed the minimum number of required credit hours for the certificate program as a whole.
2. Students must maintain an overall minimum grade point average of 3.0.
3. The 15 graduate credit hours must not duplicate previous graduate course work completed at VCU or other institutions.
4. The 15 graduate credit hours must include six graduate credit hours in advanced counseling skills.
5. Transfer credits are not accepted.

Curriculum requirements

Upon admission to the program, students must meet with an academic adviser to design an approved course of study that leads to the completion of the educational requirements for licensure or certification as a professional counselor. Each plan of study is individualized, but may include courses from the following list, if approved by the faculty adviser.

License Professional Counselor credential

<table>
<thead>
<tr>
<th>RHAB 613</th>
<th>Advanced Rehabilitation Counseling Seminar (three-credit course; may be repeated for a total of nine credit hours)</th>
</tr>
</thead>
<tbody>
<tr>
<td>RHAB 614</td>
<td>Counseling, Death and Loss</td>
</tr>
</tbody>
</table>

1. For students completing a master’s degree in Rehabilitation Counseling or a related discipline.

2. For students completing the Certificate in Counseling, Death and Loss.

3. Represents one credit hour for the certificate program as a whole.

4. Represents one credit hour for the certificate program as a whole.
**Student learning outcomes**

Upon completion of the program, the graduate will be able to:

- Satisfactorily practice in a legal and ethical manner
- Satisfactorily practice with individuals and groups
- Satisfactorily practice rehabilitation case management
- Satisfactorily show knowledge of career development
- Satisfactorily identify/use assessment information
- Satisfactorily practice job development/placement
- Satisfactorily use information from rehabilitation research

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
A student handbook is made available to students through a closed electronic system (Blackboard) and at new student orientation.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements
- Full- and part-time students can be accommodated by the program. Applications are reviewed on an ongoing basis. To be considered, all pertinent materials must be received in the department by March 1.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:
- An undergraduate GPA of 3.0 on a 4.0 scale; or 3.0 in the last 60 semester credit hours (based upon transcripts provided to the Graduate School)
- Three positive letters of reference (on reference form provided by the Graduate School) from professors, employers or someone who knows the applicant’s capabilities (not family member)
- Satisfactory performance on either the GRE or the MAT
- A relevant and clear statement of goals for graduate study and career
- Statement of previous work or volunteer experience

A personal interview with a faculty member may also be required.

A complete set of application materials is available from the Graduate Admissions website (http://www.graduate.admissions.vcu.edu).

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), the minimum degree requirement is 48 graduate credit hours, including 33 credit hours of didactic course work, 100 hours of fieldwork, 600 hours of internship and three credit hours of electives.

Graduates from accredited rehabilitation counseling programs are typically trained in counseling theory and techniques; individual, group and environmental assessment; psychosocial and medical aspects of disability; human development; cultural diversity; principles of psychiatric rehabilitation, case management and rehabilitation planning; issues and ethics in rehabilitation service delivery; technological adaptation; vocational evaluation and work adjustment; career counseling; implementation of the Americans with Disabilities Act; job development; and placement.

The on-campus Master of Science in Rehabilitation Counseling degree has been available since 1955. The program consists of 48 graduate credit hours. Currently, 90 full- and part-time graduate students are enrolled on campus. In addition, the same degree has been made available on a distance-learning basis since July 1999. Ten required courses and the one elective are available online according to a predetermined schedule. Two clinical counseling courses also are available on site in a compressed schedule (typically one to two weeks) at various locations. Alternately, up to 12 hours may be taken at an accredited graduate counseling program and accepted as transfer credit hours with prior approval. Approved internships with appropriate faculty and agency supervision are negotiated by the department, student and the local community organization.

Transfer credit
A maximum of 12 graduate credit hours may be transferred from another VCU graduate program or outside institution if not applied previously to another degree. Transfer credit hours must carry a minimum grade of B from an accredited institution. Acceptance of transfer credit hours is made at the level of the department chair and dean of the School of Allied Health Professions. Transfer credit hours earned as a nondegree-seeking graduate student are limited to six credit hours. Credit hours earned as deficiency hours or to demonstrate the ability to compete at the graduate level, though transferable, may not be applied to the 48-credit-hour program of study.

Rehabilitation Counseling, Master of Science (M.S.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [combined]

The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs. Students must apply separately to the participating programs and must meet all admission and degree requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

The Department of Rehabilitation Counseling, in cooperation with the Department of Gerontology, provides its degree-seeking students with the opportunity to earn the Certificate in Aging Studies while concurrently completing the requirements for the Master of Science in Rehabilitation Counseling.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Students must meet admission requirements for both the rehabilitation counseling degree and the aging studies certificate program, and admission into one is independent of the other.

Virginia Center on Aging

The Virginia Center on Aging, established at VCU by the Virginia General Assembly in 1978, is a statewide resource for aging-related research, education, service, training and technical assistance. It serves as a focal point for the collection, assessment and maintenance of data on elders in the commonwealth; designs and tests innovative demonstration projects in education and service delivery; and assists public and private organizations in meeting the needs of older citizens.

The Virginia Center on Aging and the Department of Gerontology maintain the Information Resources Center, a broad collection of print and audiovisual materials on aging that is available on loan. Short reports and training manuals may be obtained at cost. The Virginia Center on Aging also administers the Alzheimer’s and Related Diseases Research Award Fund that provides seed grants of $25,000 each to researchers in Virginia in order to investigate biomedical, psychosocial, clinical, public policy and other aspects of dementing illness.

The Virginia Center on Aging regularly partners with other units of VCU in developing, conducting and evaluating research and training projects related to aging, disabilities, lifelong learning and health problems. The center is located in the Theater Row building at 730 E. Broad St.
SCHOOL OF THE ARTS

The School of the Arts offers 25 degree programs and comprises more than 3,000 students. With the inclusion of our campus in Qatar come an additional four programs. It all began as one night class taught by Theresa Pollak in the fall of 1928.

The school strives to be a stimulating community of students and teachers who cross the boundaries of conventional art and design disciplines, apply aesthetic and intellectual vision to the expression of complex ideas, value artistic tradition and experimentation in the search for creative solutions, connect international experience with professional education, integrate technical skills with theoretical understanding and care about the impact of their work on people.

Accreditation

VCU School of the Arts is accredited by the National Association of Schools of Art and Design, the National Association of Schools of Dance, the National Association of Schools of Music, and the National Association of Schools of Theatre.

Visual arts

Visual arts degree programs: art education, art history, cinema, communication arts, craft and material studies, fashion (design and fashion merchandising), graphic design, interior design, kinetic imaging, painting and printmaking, and sculpture

National Association of Schools of Art and Design

Art education (bachelor’s and master’s degrees)

Performing arts

Dance and choreography (bachelor’s degree)

Music (bachelor’s and master’s degrees)

Theatre (bachelor’s and master’s degrees)

Programs

The School of the Arts offers degrees in the following areas of study:

Advanced Media Production Technology

• Post-baccalaureate undergraduate certificate

Art Education

• Bachelor of Fine Arts

• Master of Art Education

Art History

• Bachelor of Arts

• Master of Arts

• Doctor of Philosophy

Cinema

• Bachelor of Arts

Communication Arts

• Bachelor of Fine Arts

Craft and Material Studies

• Bachelor of Fine Arts

• See Fine Arts concentrations

Dance and Choreography

• Bachelor of Fine Arts

Design

• Master of Fine Arts (with concentrations in interior environments and visual communications)

Fashion

• Bachelor of Arts

• Bachelor of Fine Arts

Fine Arts

• Master of Fine Arts (with concentrations in ceramics, fibers, furniture design, glassworking and jewelry/metalworking; kinetic imaging; painting or printmaking; photography and film; sculpture)
Graphic Design
• Bachelor of Fine Arts

Interior Design
• Bachelor of Fine Arts

Kinetic Imaging
• Bachelor of Fine Arts
• See Fine Arts

Music
• Bachelor of Arts
• Bachelor of Music
• Master of Music

Painting and Printmaking
• Bachelor of Fine Arts
• See Fine Arts

Photography and Film
• Bachelor of Fine Arts
• See Fine Arts

Sculpture
• Bachelor of Fine Arts
• See Fine Arts

Theatre
• Bachelor of Arts
• Bachelor of Fine Arts
• Master of Fine Arts

School of the Arts Visual Resource Center

VCU’s Cabell Library houses an extensive collection of books, publications and magazines on the visual and performing arts. VCU subscribes to ARTstor, the largest online image bank for the arts.

VCU is a short distance from Washington, D.C., Baltimore, Philadelphia and New York and the museums, libraries and research facilities in those urban areas.

Graduate information

Graduate admission

Admission procedures
Application forms and instructions for applying to all graduate programs in the School of the Arts are available on the School of the Arts website at arts.vcu.edu (http://arts.vcu.edu).

General information about admission to graduate study and application procedures can be found in the Graduate School section of this bulletin or on the Graduate School website (http://www.graduate.vcu.edu).

Admission requirements
For Ph.D. degree, see Ph.D. in Art History section.

For all other degrees (M.A., M.A.E., M.F.A. and M.M.):
• Applicants should hold the baccalaureate degree from an accredited institution.
• It is expected that applicants will have a 3.0 (B) average on the last 60 semester hours of undergraduate work.

The prospective student should consult the appropriate section of this bulletin for additional admission requirements for a particular degree program. Such requirements include:

• The Graduate Record Examination for applicants to art history.
• An audition and examination for music applicants, as described in the program description for the M.M. degree.
• An audition or presentation of portfolio, as well as a personal interview, for applicants for the M.F.A. in Theatre.
• A portfolio review for all applicants to the visual arts M.F.A. degrees (a personal interview is encouraged).

Graduate student status

The School of the Arts has two categories of graduate students — full time or part time. Full- or part-time graduate students are accepted either provisionally or as students with full standing into the graduate degree programs of the various departmental areas. These students may matriculate full time or part time except for the residence limitation discussed elsewhere in this bulletin.

Most graduate programs in the school require full-time status, including the concentrations in the Master of Fine Arts in Fine Arts degree (photography and film, painting and printmaking, sculpture, kinetic imaging and ceramics, fibers, furniture design, glassworking and jewelry/metalworking) and the visual communication track of the M.F.A. in Design. Check with the individual departments to confirm whether full-time status is required or part-time status is permitted.

Holders of the baccalaureate degree from recognized institutions may enroll in graduate courses as nondegree-seeking special graduate students, but such courses are not applicable toward a graduate degree from this institution unless the student is accepted into a graduate degree program prior to the conclusion of the semester in which the student registered as a nondegree-seeking graduate student.

A nondegree-seeking student who is later admitted as a degree-seeking student will not be allowed to apply toward a degree more than six credits earned as a nondegree-seeking student.

The second type of nondegree-seeking graduate student is the student who holds a baccalaureate degree, who wishes to take graduate courses for personal enrichment, and who does not intend to work toward a graduate degree. There is no limit to the number of credits that students in this category may take, as long as the academic performance is credible.

All nondegree-seeking (“special”) graduate students must have written permission from the chair of the appropriate department in order to enroll in classes.

Registration for graduate students

Graduate art students are urged to plan their schedules and register during advanced registration. Registration materials for students accepted into advanced degree programs are available in the department during the advance registration and registration periods. The advantage
of advanced registration is that of securing places in classes before they are closed and of obtaining proper counsel from advisers. All graduate students must see their assigned advisers for schedule planning and signature approval. New nondegree-seeking graduate students, or those contemplating registration as such, must secure written permission to register from the departmental chair.

Continuous enrollment policy for graduate students

Graduate students in the School of the Arts must observe the University Continuous Enrollment Policy as explained in the Graduate Studies at VCU chapter of this bulletin.

Candidates for all advanced degree programs, after completing all formal course work, must register for at least one semester hour of credit each semester, except summer, until the culminating graduate project (dissertation, thesis, creative project, exhibition, recital, etc.) is completed and the student is ready to graduate. Also, if candidates intend to graduate in August, they must be enrolled for at least one semester hour in the summer session.

Transfer credit and graduate study

A maximum of nine graduate credits may be transferred from other accredited institutions and applied to any of the graduate degree programs in the School of the Arts. However, transfer credit is not typically granted to incoming students and is approved at the discretion of the department chair.

Graduate advising

All students accepted into advanced degree programs must make an appointment with the chair of the department or the graduate adviser prior to registration for their first semester of course work. Normally, the student’s initial adviser will be the chair of the department; but students may be assigned an adviser more directly related to their areas of concentration.

Students also are encouraged to consult faculty members outside their major area and arrange with the appropriate departmental chair to use facilities and equipment available in other departments.

Finances for graduate students

Special charges

All degree-seeking graduate students are charged an art comprehensive fee. The art comprehensive fee is not charged to students who are registered only in course work to complete a dissertation/thesis/ creative project or who are enrolled in order to satisfy the one-credit requirement for continuous enrollment. Nondegree-seeking graduate students enrolled in any of the courses that require an additional outlay for materials will be billed for those individual fees by the Student Accounting Department.

In addition to the comprehensive fee for all majors in the School of the Arts, all students registering for private music lessons pay an applied music fee.

Financial support

The School of the Arts awards a limited number of graduate assistantships and scholarships to full-time students. Please see the specific program requirements for more information and application deadlines.

Advanced degree candidacy

Students seeking an advanced degree in all programs must apply for advanced degree candidacy. Those seeking the M.A.E. and the M.M. must submit the application during or after the completion of the first nine semester credits of graduate work and prior to the completion of 18 semester credits. Students pursuing the M.F.A. Degree must submit the application during or after the completion of the first 15 semester credits of graduate work and prior to the completion of 30 semester credits. Applications for candidacy are available in the departmental offices and the Office of Graduate Studies, School of the Arts.

Admission to a degree program does not constitute candidacy, and admission to degree candidacy is not an automatic process. Departments carefully review applicants for candidacy on such basis as examination or review of creative work or performance. Upon certification by the department that the applicant has met all departmental expectations, including the minimum 3.0 GPA and is adequately prepared to continue pursuing the degree program, the School of the Arts will admit the applicant to degree candidacy.

Students who are found to be inadequately prepared to continue their graduate programs, but who demonstrate the potential to ultimately fulfill degree requirements will be advised as to what additional work will be needed in order to meet departmental expectations. Candidacy, in such instances, will be postponed until departmental expectations are satisfied; postponement of candidacy may result in termination of financial assistance. Students whose academic or creative work demonstrate no likelihood of successful completion of a graduate program will be denied candidacy by the School of the Arts.

Advanced degree requirements

- Students must achieve candidacy (with the exception of art history students).
- Students must complete all formal course work.
- Students must maintain a minimum 3.0 cumulative GPA. No grade below B will count toward graduation for students in the art history and the visual communications degree programs. For all students in the theatre program, any grade below B in any course will result in termination from the degree program. Students in all programs in the Department of Music must not have more than six hours or 20 percent of semester hours attempted — whichever is greater — with a grade of C. For all other degree programs in the School of the Arts, no grade below B is acceptable for any course within the student’s major department, and a grade below B in a course in the student’s major department will result in termination from the degree program.
- All students must complete the culminating project (dissertation, thesis, final examination, creative project, recital, etc.) as outlined in departmental guidelines. The thesis, or other written documentation related to the culminating project, must be done in a form that can be retained by the university and in accordance with departmental guidelines. Students preparing a thesis must use the guidelines set forth in the Preparation of Thesis, available in departmental offices or the Office of Graduate Studies, School of the Arts.
Residency requirements for graduate study
Candidates for the master of fine arts degree in the fine arts and theatre must complete a minimum of one-third of their degree program semester-hour credits within one calendar year.

Candidates for all master’s degrees in the School of the Arts have five years plus two possible extensions of one year each to complete all degree requirements. The above limitations apply to both full-time and part-time students. A petition for an extension is initiated with the academic or thesis adviser.

Media, Art, and Text, Doctor of Philosophy (Ph.D.)

Program goal
VCU’s interdisciplinary doctoral program in media, art, and text is a joint endeavor of the Department of English, the School of the Arts and the Richard T. Robertson School of Media and Culture. The program prepares students primarily to teach at the college or university level, although some pursue careers in related media fields. MATX emphasizes the historical and theoretical foundations essential to the scholarly study of media, both old and new, broadly defined. It provides an intellectually stimulating environment that encourages students to work both collaboratively and independently, as well as across and between disciplines and media. Students maintain a base in their primary area of research, which is usually but not always the field in which they have done prior graduate work.

Student learning outcomes
1. Develop advanced communication skills in writing, speaking and the use of multimedia
2. Demonstrate broad knowledge of history and theory as the foundation for interdisciplinary work in a specialized facet of media, art, and/or text
3. Develop competence in interdisciplinary and disciplinary research methods and responsible conduct of research
4. Develop specialized knowledge in relevant fields to support dissertation and subsequent research
5. Demonstrate the ability to conduct independent research and produce new, specialized knowledge within the broad parameters of media, art, and text
6. Develop a strong basis for ongoing professional practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
The MATX student handbook is available at matx.vcu.edu/program/handbook.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Jan 2</td>
<td></td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must hold a master’s degree (M.A., M.F.A., M.S.) in a relevant field.
2. Submit the following, in the formats indicated via VCU’s online application portal:
   a. Writing sample demonstrating the ability to write clearly, analyze effectively and conduct original research in advanced doctoral-level seminars. This may be a master’s thesis, a graduate-level seminar paper or a published essay. Submit as a PDF.
b. Statement of purpose describing the applicant’s interest, motivation and goals in pursuing this degree. The statement should specifically address the importance of interdisciplinarity to the applicant’s academic goals, and it should also offer evidence of preparation for the study of media, art, and text. The applicant should indicate the specific area of study and research to be pursued at VCU and identify faculty who might potentially direct dissertation research. Submit as a PDF.

c. Academic curriculum vitae or professional resume listing all colleges and universities attended and degrees earned, all professional and academic positions held, all publications and/or exhibitions, technical skills, and any other relevant information. Include URLs for personal and/or professional websites. Submit as PDF.

d. Letters of recommendation from three present or former instructors or other individuals qualified to evaluate the applicant’s ability to engage in interdisciplinary study at the doctoral level. Have recommenders submit their letters via the online application portal.

3. Applicants who wish to pursue creative work at VCU must also submit a portfolio. Those with an M.F.A. who do not wish to continue creative work should consult with the MATX director about this requirement. Materials submitted should demonstrate excellence in studio or professional practice and the potential to do graduate-level work in media, art, and text. Portfolios will be reviewed by the MATX admissions committee as well as relevant faculty in the School of the Arts and the Richard T. Robertson School of Media and Culture. Please observe the following guidelines:

   a. Those working in 2-D or 3-D mediums should provide 20 images of representative work arranged chronologically, beginning with the most recent.

   b. Those working in sound and time-based media, as well as those in the performing arts, should provide clips totaling no more than 10 minutes.

   c. Those working across media may submit a combination of the above.

   d. The portfolio should include title, date, media and dimensions of each work, as well as a brief statement or other information that will help the admissions committee in its evaluation.

Small files illustrating 2-D or 3-D work should be submitted in a single PDF. Sound or video files should be posted to Vimeo or Sound Cloud with a functioning link submitted in a PDF with the required information posted to the portal. Portfolio materials may also be posted to a personal or professional website and the link submitted in a PDF posted to the portal.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the MATX program are required to earn a minimum of 42 graduate-level credit hours beyond the master’s. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. The 42-hour curriculum comprises 36 hours of course work and a minimum of six hours of dissertation research. Course work includes a core of four required courses taken during the first two semesters by all incoming students. Three doctoral seminars provide a shared historical and theoretical foundation for the study of media, art, and text, while a workshop offers the opportunity to develop and expand professional and/or creative skills relevant to the student’s career goals and research focus. In addition, all students will take a research methods course in a field relevant to their anticipated area of dissertation research. Beyond the core, students select 21 hours of elective credit hours from course offerings in disciplines relevant to their research interests and career goals. The program offers a topics seminar focused on the history, theory or practice of media, art, and text. Independent study and internships are also available as electives. While enrollment in courses with the MATX prefix is guaranteed to matriculated MATX students, enrollment in other graduate courses is subject to the conditions established by individual units. Together the core and the electives support the interdisciplinary work of the dissertation, which is an original scholarly examination of some aspect of media, art, and/or text. It may include work in media other than text. It is supervised by a committee consisting of four or five members drawn from disciplines relevant to the research topic.

2. Grade requirements: To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

3. Requirements for admission to candidacy: Before beginning formal dissertation research, students must complete all 36 hours of required course work, both stages of the e-portfolio and the requirements described below. Upon completion of these, the student will apply for degree candidacy.

4. Dissertation committee: The dissertation committee consists of the director (who must hold a Ph.D.) and three or four additional members whose scholarly knowledge and interests are relevant to the project. The committee must have at least one member from each of the sponsoring units (Department of English, School of the Arts, Richard T. Robertson School of Media and Culture). All must be members of VCU’s graduate faculty. Appropriate faculty from outside VCU may serve on committees (but not as director) with the approval of the MATX director and the graduate dean. It is the student’s responsibility to assemble the committee, in consultation with the dissertation director. Committees will not be appointed by the program.

5. E-portfolio: Work on the e-portfolio will begin in MATX 604 in the spring of the first year. There are no technical specifications, and content will include, but is not limited to, work done in the first two years in the program. It will take the form of a website and must demonstrate the technical skills (Web design, audio, video, etc.) relevant to the student’s work on the dissertation and the career sought after VCU. Submission is a two-stage process:

   a. Stage 1 (May of the first year): a three- to five-page design rationale for the portfolio site along with a mock-up or rough structure

   b. Stage 2 (April of the second year): a finished, live site accompanied by a five-page statement relating it to the student’s work inside and outside the program and outlining how it uses media techniques to promote a specific professional and/or creative identity (Note: Each submission is graded pass/fail and may be repeated once. A second failure results in automatic termination from the program.)

6. Competency: Candidates must demonstrate competency in a skill or technique relevant to the dissertation research or planned professional career. The dissertation committee approves and
administrates the competency portion. Graded pass/fail, the test may be repeated once.

7. Bibliography exam: Candidates will complete an exam on a reading list of 20 to 30 sources relevant to or supportive of the dissertation topic. The dissertation committee approves and administers the bibliography exam. Graded pass/fail, the test may be repeated once.

8. Dissertation prospectus and prospectus defense: The prospectus is a 15- to 20-page document that indicates the significance of the proposed research, gives a short review of relevant literature, states the research question, specifies the proposed methodology and indicates how the project lays the foundation for the anticipated academic or professional career. It also includes a work plan for the completion of research and writing, as well as a complete bibliography. The prospectus is defended orally before the dissertation committee, which may accept, reject or require revisions. The defense may be repeated once.

9. Dissertation and dissertation defense: The dissertation is an original, interdisciplinary and scholarly examination of a topic relevant to an aspect of media, art, and/or text. It may include work in media other than text. Given the varied nature of doctoral research, there is no set time frame for completion of a dissertation. It is expected, however, that the dissertation will take about two years after attaining candidacy, but it must be defended within the eight-year time limit for completion of the doctoral degree. The dissertation will be defended orally before the dissertation committee. Successful defense of the dissertation completes the requirements for the degree.

Program website: matx.vcu.edu (http://matx.vcu.edu)
Department of Art Education

Sara Wilson McKay, Ph.D.
Associate professor and chair

arts.vcu.edu/arteducation (http://arts.vcu.edu/arteducation)

The Department of Art Education supports instruction in art that encourages the construction of meaning. Faculty and students are actively involved with the art world, education and local and global communities through art-based service-learning, visual culture studies, critical thinking, exhibition, assessment, curriculum, critical theory and emerging digital technologies (virtual and interactive).

The department emphasizes interdisciplinary connections throughout the School of the Arts and the university as a whole. Through their own research and instruction, art teacher candidates engage their students and themselves in traditional and nontraditional forms of inquiry to contribute to the continuing growth and strength of the profession.

- Art Education, Master of (M.A.E.) (p. 275)

Art Education, Master of (M.A.E.)

Program accreditation
National Association of Schools of Art and Design
National Council for Accreditation of Teacher Education

Program goal

Through engagement with theory, research and emerging technologies, the Master of Art Education program prepares art educators to be mindful professionals who are active in the field of art education.

The program offers two specific options:

1. One option is for teachers who are already licensed and who wish to deepen their understanding of art education.
2. The second is for people who hold baccalaureate degrees and wish to earn a master’s degree that may include a teaching license.

The program includes required and elective courses and allows students to pursue an area of interest. All students are expected to work at a high level of independence, be self-motivated, respect peers and instructors and participate in the opportunities that the Department of Art Education and the School of the Arts offer. With the assistance of the adviser, the student determines a viable structure for the content and sequence of a program of graduate study. Such a program can utilize the collective expertise of the art education faculty as well as appropriate community resources. Graduate course work, therefore, could include both on-campus and off-campus involvement.

Opportunities for personal growth through the M.A.E. program also include the rich resources of other graduate departments in the university in the visual and performing arts, education (including supervision, administration and specialty areas), the natural and social sciences and the humanities. Alternative approaches to traditional thesis methods are also encouraged within the program.

Student learning outcomes

1. **Theoretical foundations:** Students will demonstrate an ability to analyze varying points of view regarding art education theories.

2. **Research competencies:** Students will demonstrate the ability to apply research methods and methodologies to write a realistic proposal.

3. **Skills with and knowledge of emerging technologies:** Students will demonstrate knowledge of emerging technologies for teaching, research or art-making.

4. **Command of literature and practice in art education:** Students will demonstrate historical and current knowledge of theoretical and practical issues in art education.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)
Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Admission requirements

Degree: M.A.E. Semester(s) of entry: Fall Deadline dates: Jan 15 Test requirements: GRE required if undergraduate GPA is below 3.2; optional if 3.2 or higher.

Special requirements

- See the School of the Arts admissions page for the specific directions about the portfolio, letters of reference, etc.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following requirements:

- Thirty-six undergraduate credit hours of art and art history course work (Students who do not have these credit hours from the undergraduate degree are welcome to take undergraduate courses to earn these credit hours before applying to VCU. These can be taken at any accredited undergraduate institution.)
- An undergraduate degree in art education, studio art, art history or a related field

It is desired, though not required, for students to have some teaching experience before applying.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the M.A.E. program requires a minimum of 36 graduate credit hours, including required art education and approved elective courses.

Licensure

For students who also pursuing teaching licensure, there are additional requirements, including:

EDUS 301 Human Development and Learning 3
ARTE 404 Clinical Internship Seminar 1
ARTE 550 or SEDP 505 Art for the Exceptional Learner 3
Theory and Practice of Educating Individuals with Special Needs
ARTE 501 Art Education Elementary Materials and Practicum 3
ARTE 502 Art Education Secondary Materials and Practicum 3

A semester of student teaching

The electives in the following curricular requirements account for some of these courses. The M.A.E. plus licensure requires a minimum of 36 graduate credit hours plus 13-16 of undergraduate credit hours.

Students who wish to be considered for a teaching license are required to complete a series of tests as mandated by the Virginia Department of Education. See arts.vcu.edu/arteducation/mae/testing (http://arts.vcu.edu/arteducation/mae/testing) for additional information.

Written examination

After completing nine credit hours, including ARTE 611, and before completing 18 credit hours, all students are required to submit a written exam. This exam will determine whether a student is approved for degree candidacy and is ready to proceed to the final stages of the degree program. Failure to submit this required exam may result in dismissal from the program. Students who fail the exam will have a second chance the following semester. Students who fail on the second attempt will be dismissed from the program.

Thesis option

A thesis or project option may develop from graduate course work or professional involvement. Projects are those endeavors of thesis proportion that do not fit the traditional thesis format. A thesis or project may be explored by descriptive research, historical research, empirical/statistical research, design of learning packages, philosophical study, curriculum development, action research or other methodologies if deemed appropriate by the adviser and committee.

Comprehensive exam option

In lieu of the thesis, students complete six credit hours of graduate seminar work (ARTE 600 taken twice with different topics and different faculty members) in the Department of Art Education. In addition, students must successfully pass a written and oral comprehensive examination in the later stages of their course work. The examination will pertain to the course work, to contemporary issues in the field and to students’ particular areas of expertise. This option is suggested for students pursuing the track that results in the M.A.E. and simultaneous teaching licensure.

Students who do not pass all portions of the comprehensive exam will have one opportunity to retake the exam the following semester. Students who fail the exam on the second attempt will be dismissed from the program. Failure to submit this required exam may result in dismissal from the program.

After completing nine credit hours, including ARTE 611, and before completing 18 credit hours, all students are required to submit a written exam. This exam will determine whether a student is approved for degree candidacy and is ready to proceed to the final stages of the degree program. Failure to submit this required exam may result in dismissal from the program. Students who fail the exam will have a second chance the following semester. Students who fail on the second attempt will be dismissed from the program.

2 Taken twice with different topics and different faculty members, after which students are required to take and pass the comprehensive exam.

Art History, Doctor of Philosophy (Ph.D.) with a concentration in curatorial

Program goal

The Ph.D. in Art History is a research-oriented degree designed to train critical and productive scholars, college and university professors, and curators and museum professionals who are well-grounded in the literature, methodology and major art historical and/or museological problems in their selected areas of study.

All doctoral students establish a program of study that includes a major field of study and a minor field of study shared by a full-time faculty member. Students in the curatorial concentration select museum studies as either the major or minor field of study.

Student learning outcomes

1. Students apply critical and analytical concepts, frameworks and methods.
2. Students contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate.
3. Students write effectively for audiences of scholarly and non-specialist readers.
4. Students speak effectively to scholarly and non-specialist audiences.
5. Students demonstrate ability to translate art historical scholarship written in a language or languages relevant to their research.
6. Students conduct scholarly inquiry that makes a scholarly professional contribution.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

The Department of Art History offers programs that acquaint students with the humanistic discipline of art historical inquiry. While providing students with the opportunity for a broad education drawing on the liberal arts and humanities, the department also emphasizes a close bond with the studio and performing arts and enjoys a close relationship with the other departments in the School of the Arts.

The department offers a broad-based education in the humanistic discipline of art history at the baccalaureate, master’s and doctoral levels.

Overseas studies are available through university-sponsored programs abroad in Europe and Asia. Graduate assistantships and fellowships are available to full-time graduate students.

- Art History, Doctor of Philosophy (Ph.D.) with a concentration in:
  - Curatorial (p. 277)
  - Historical studies (p. 279)
- Art History, Master of Arts (M.A.) with a concentration in:
  - Architectural history (p. 281)
  - Historical studies (p. 283)
  - Museum studies (p. 284)
It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

For more information about the programs of study, go to arts.vcu.edu/arthistory (http://arts.vcu.edu/arthistory)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

**Admission requirements**

| Degree: Ph.D. | Semester(s) of entry: Fall only | Deadline dates: Jan 15 | Test requirements: GRE |

**Special requirements**

- Writing sample

Prospective students holding a master's degree in art history or a related field from VCU or any other accredited institution may apply directly to the doctoral program. Prospective students who hold only a bachelor's degree in art history or a related field also may apply directly to the Ph.D. program; if admitted, they select one of the three M.A. curriculum concentrations and complete 27 of the required 30 credit hours for the M.A. degree before beginning Ph.D. course work.

Applicants are encouraged to speak with a prospective dissertation adviser (the full-time faculty member whose research area corresponds to an applicant's interests).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Ph.D. in Art History must meet the following requirements:

1. A statement of purpose, 750-1000 words in length, that briefly recounts applicant's academic background, describes an avenue of inquiry that the applicant expects to explore, notes applicant’s professional goals beyond graduate study and explains why VCU’s Ph.D. in Art History program is suited to applicant's interests
2. A research/writing sample that has a clearly articulated thesis statement, identifies and interprets primary and/or secondary sources in support of a well-argued thesis, and offers a coherent, cohesive narrative
3. Three letters of recommendation, at least two of which are from faculty members who can assess the applicant's preparation and promise for graduate work (Some applicants may choose to solicit the third letter from a museum professional who has supervised the applicant's professional work in a museum setting.)
4. Official transcripts from schools where applicant completed course work applied toward the baccalaureate or master's degree
5. An official report of GRE scores

Applications are reviewed by the program's full-time faculty members, who assess an applicant's overall package of materials with particular attention to the statement of interest and writing sample. Applicants are encouraged to correspond with individual faculty members who share their areas of research interests.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), the program of study for students who have an M.A. degree upon applying for the Ph.D. program is determined on a case-by-case basis, to include at least 30 credit hours in the concentration area. Students may also be required to also complete ARTH 690, ARTH 694 and/or selected art history seminars if they have not completed equivalent courses in their master's programs and/or if their degrees were awarded in fields other than art history. Students in the curatorial concentration may also be required to take one or more museum studies course (ARTH 681-ARTH 684, ARTH 691) if their M.A. programs did not include equivalent courses.

Students who matriculate into the concentration in historical studies with only a baccalaureate degree initially complete the requirements in either the concentration in historical studies or the concentration in architectural history in the M.A. program; they then proceed to complete the following 30 credit hours.

**Major and minor art historical field of study**

Students complete a major and a minor art historical field of study of their choosing. The major area requires three seminars, while the minor requires two seminars. M.A./Ph.D. students may complete some of these courses while at the master's stage.
Language proficiency

Doctoral students must demonstrate competency in two foreign languages relevant to their areas of research and approved by the departmental graduate committee before admission to candidacy. Foreign language competency demonstrated for an M.A. may be applied to this requirement. The Department of Art History administers language exams and offers a course in German for art history.

Admission to candidacy

Doctoral students are admitted to candidacy after demonstrating proficiency in two foreign languages, passing the major and minor field exams administered in ARTH 772 and ARTH 773 and orally defending a dissertation prospectus previously approved by the dissertation adviser. Only after candidacy is granted may a student enroll for dissertation credits.

Dissertation

After admission to candidacy, doctoral students proceed to complete and defend a dissertation. They work under the supervision of the dissertation director, and they are required to maintain continuous enrollment of at least three credit hours per semester (excluding summer) until they have attained six hours of dissertation credit, after which they may enroll for as few as one credit per semester. The dissertation must represent independent research that is devoted to an original question or hypothesis with the appropriate development, analysis and interpretation. Successful defense of the dissertation completes the requirements for the degree. All degree requirements must be completed within eight years of the first semester of enrollment in the doctoral program (either M.A./Ph.D. or Ph.D.).

Art History, Doctor of Philosophy (Ph.D.) with a concentration in historical studies

Program goal

The Ph.D. in Art History is a research-oriented degree designed to train critical and productive scholars, college and university professors, and curators and museum professionals who are well-grounded in the literature, methodology and major art historical and/or museological problems in their selected areas of study.

All doctoral students establish a program of study that includes a major field of study and a minor field of study shared by a full-time faculty member. Students in the curatorial concentration select museum studies as either the major or minor field of study.

Student learning outcomes

1. Students apply critical and analytical concepts, frameworks and methods.
2. Students contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate.
3. Students write effectively for audiences of scholarly and non-specialist readers.
4. Students speak effectively to scholarly and non-specialist audiences.
5. Students demonstrate ability to translate art historical scholarship written in a language or languages relevant to their research.
6. Students conduct scholarly inquiry that makes a scholarly professional contribution.

Special requirements

- Writing sample

Prospective students holding a master's degree in art history or a related field from VCU or any other accredited institution may apply directly to the doctoral program. Prospective students who hold only a bachelor's degree in art history or a related field also may apply directly to the Ph.D. program; if admitted, they select one of the three M.A. curriculum concentrations and complete 27 of the required 30 credit hours for the M.A. degree before beginning Ph.D. course work.

Applicants are encouraged to speak with a prospective dissertation adviser (the full-time faculty member whose research area corresponds to an applicant's interests).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Ph.D. in Art History must meet the following requirements:

1. A statement of purpose, 750-1000 words in length, that briefly recounts applicant's academic background, describes an avenue of inquiry that the applicant expects to explore, notes applicant's professional goals beyond graduate study and explains why VCU's Ph.D. in Art History program is suited to applicant's interests.
2. A research/writing sample that has a clearly articulated thesis statement, identifies and interprets primary and/or secondary sources in support of a well-argued thesis, and offers a coherent, cohesive narrative.
3. Three letters of recommendation, at least two of which are from faculty members who can assess the applicant's preparation and promise for graduate work (Some applicants may choose to solicit the third letter from a museum professional who has supervised the applicant's professional work in a museum setting.)
4. Official transcripts from schools where applicant completed course work applied toward the baccalaureate or master's degree.
5. An official report of GRE scores.

Applications are reviewed by the program's full-time faculty members, who assess an applicant's overall package of materials with particular attention to the statement of interest and writing sample. Applicants are encouraged to correspond with individual faculty members who share their areas of research interests.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the program of study for students who have an M.A. degree upon applying for the Ph.D. program is determined on a case-by-case basis, to include at least 30 credit hours in the concentration area. Students may also be required to also complete ARTH 690, ARTH 694 and/or selected art history seminars if they have not completed equivalent courses in their master's programs and/or if their degrees were awarded in fields other than art history. Students in the curatorial concentration may also be required to take one or more museum studies course (ARTH...

Program website: arts.vcu.edu/arthistory (http://arts.vcu.edu/arthistory)

**Art History, Master of Arts (M.A.) with a concentration in architectural history**

**Note: Admission to this program is temporarily suspended.**

**Program goal**

The mission of the graduate program in art history is to equip students with requisite knowledge, skills and theoretical foundation to embark on successful careers in academia and/or museums.

The M.A. curriculum concentrations provide students with a general background in the research methods and teachings of art history in preparation for careers in museums, collections care or arts organizations. It also prepares students for the more rigorous research demands of the Ph.D., which is the required degree for academic and curatorial careers.

**Student learning outcomes**

1. Students apply critical and analytical concepts, frameworks and methods.
2. Students contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate.
3. Students write effectively for audiences of scholarly and non-specialist readers.
4. Students speak effectively to scholarly and non-specialist audiences.
5. Students demonstrate ability to translate art historical scholarship written in a language or languages relevant to their research.
6. Students conduct scholarly inquiry that makes a scholarly professional contribution.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are
established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Note: Admission to this program is temporarily suspended.**

**Admission requirements**

|--------------|---------------------------------|------------------------|-----------------------|---------------------|------------------|

**Special requirement**

- Writing sample

Students with a bachelor’s degree in art history or in a related field (e.g., history, anthropology, literary studies, religious studies or philosophy) are invited to apply to VCU Department of Art History graduate programs.

Applicants who have completed at least 18 undergraduate semester credit hours in art history are preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Master of Arts in Art History must meet the following requirements:

1. A statement of purpose, 750-1000 words in length, that briefly recounts applicant’s academic background, describes an avenue of inquiry that the applicant expects to explore, notes applicant’s professional goals beyond graduate study and explains why VCU art history is suited to applicant’s interests.

2. A research/writing sample that has a clearly articulated thesis statement, identifies and interprets primary and/or secondary sources in support of a well-argued thesis, and offers a coherent, cohesive narrative.

3. Three letters of recommendation, at least two of which are from faculty members who can assess the applicant’s preparation and promise for graduate work (Some applicants may choose to solicit the third letter from a museum professional who has supervised the applicant’s professional work in a museum setting.)

4. Official transcripts from schools where applicant completed course work applied toward the baccalaureate degree.

5. An official report of GRE scores.

Applications are reviewed by full-time faculty members who assess an applicant’s overall package of materials, with particular attention to the statement of interest and writing sample.

See arts.vcu.edu/admissions/how-to-apply/graduate (http://www.arts.vcu.edu/admissions/how-to-apply/graduate) for specific information regarding the online application process.

**Note: Admission to this program is temporarily suspended.**

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39) students must complete 30 credit hours of course work, variously distributed according to the curriculum concentration.

**Curriculum requirements**

| ARTH 621 | Historical Preservation and Architectural History | 3 |

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete 30 credit hours of course work, variously distributed according to curriculum concentration.

Curriculum requirements

| ARTH 690 | Historiography and Methodology of Art History | 3 |
| ARTH 693 | Graduate Museum Internship | 3 |
| ARTH 694 | Art History and Pedagogy | 3 |
| ARTH 695 | Writing Seminar I | 3 |
| ARTH 771 | Writing Seminar II | 3 |

Select three art history seminars from the following: 9

| ARTH 721 | Seminar in Early Modern Art |
| ARTH 722 | Seminar in 19th-century Art |
| ARTH 723 | Seminar in 20th-century Art |
| ARTH 725 | Seminar in Pre-Columbian Art and Architecture |
| ARTH 727 | Seminar in Latin American Art |
| ARTH 728 | Seminar in Asian Art |
| ARTH 741 | Seminar in Art and Theory |
| ARTH 742 | Seminar in Trans-millennial Art and Ideas |
| ARTH 743 | Seminar in Art and Representation |
| ARTH 749 | Seminar in Diasporic Art |
| ARTH 791 | Special Topics in Art History |
| ARTH 797 | Directed Research Project |

Select two of the following museum studies seminars: 6

| ARTH 681 | Museums and Communities |
| ARTH 682 | The Museum as Educational Institution |
| ARTH 683 | Museum Collections |
| ARTH 684 | Curating Museum Exhibitions |
| ARTH 691 | Special Topics in Museum Studies |

Total Hours 30

Total graduate credit hours required (minimum) 30
Students must earn a minimum grade of B in ARTH 690 in order to enroll in subsequent graduate-level art history courses. Students must also demonstrate an ability to translate art historical scholarship published in a language relevant to their research interests and approved by the departmental graduate committee. The Department of Art History administers language exams and it offers a course in German for art history.

For more information about the programs of study, go to arts.vcu.edu/arhistory (http://arts.vcu.edu/arhistory).
Department of Communication Arts

Robert Meganck
Professor and chair
arts.vcu.edu/communicationarts

Communication arts is the study and exploration of the qualities, disciplines and technologies that enable us to create and communicate with insight and vision. Our studies are firmly rooted in understanding the power of image and art to communicate.

Communication arts includes studies in:

- Drawing, which is the fundamental means to articulate ideas; it is elemental to everything we do.
- Illustration, a discipline with a rich history in drawing, painting, design and print media, which is being expanded by powerful new tools and technologies.
- Visual studies, which encompasses studio, historical, conceptual and theoretical issues that include analysis and exploration of image, media, content and context.

Study leads to a Bachelor of Fine Arts and students may choose an emphasis in either communication arts or scientific and preparatory medical illustration.

Department of Craft and Material Studies

Sonya Clark
Professor and chair
arts.vcu.edu/craft

The Department of Craft and Material Studies is housed in the new Fine Arts Building that includes private and semi-private graduate studios. These new facilities provide a safe and excellent physical environment in which to work. Students have access to well-equipped studios in each of the five media areas along with a computer lab and wood shop. The building also houses the facilities for sculpture, painting and printmaking, and kinetic imaging. Interaction among departments is encouraged.

In addition to the Bachelor of Fine Arts in Craft and Material Studies, the department offers graduate course work leading to the Master of Fine Arts in Fine Arts degree in five disciplines: ceramics, fiber, furniture design, glassworking and jewelry/metalworking.

The M.F.A. is the terminal degree in the studio areas and is a requirement for most university teaching positions. Every effort is made to assist students in gaining valuable teaching experience while they are in the program. The department aids the students financially through a variety of scholarships and graduate assistantships. Opportunities exist for qualified students to teach courses during the academic year and in summer school.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in:
  - Ceramics (p. 286)
  - Fibers (p. 288)
  - Furniture design (p. 289)
  - Glassworking (p. 291)
  - Jewelry/metalworking (p. 293)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in ceramics

Program accreditation
National Association of Schools of Art and Design

Program goal
The program comprises a community of makers/artists who advance the conceptual, historical, technical and haptic aspects of clay, fiber, glass, metal and wood. The program promotes an artistic practice rooted in the values of craft. Students will investigate craft’s inherent relationship to the world with fearless innovation.

Student learning outcomes
1. Aesthetic and cross-cultural understanding: The students will demonstrate mastery in aesthetic and cross-cultural understanding.
2. Understanding of the contemporary of their field: The curriculum of craft and material studies is designed to provide students with a comprehensive and up-to-date understanding of their field.
3. Critique information interpretation: The students will be able to use knowledge gained from critique to improve creative work.
4. Technique development: The students will demonstrate mastery of advanced craft techniques within their field.
5. Professional practice: The students will demonstrate leadership in their field in teaching and/or studio management.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for
continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.F.A.</td>
<td>Fall</td>
<td>Jan 15</td>
<td>None</td>
</tr>
</tbody>
</table>

Special requirements
- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of the Arts admission requirements, applicants in the visual arts must have completed a minimum of 36 credit hours in art at the undergraduate level. Applicants should also present:

1. Curriculum vitae/resume: If applicant has a website, please include a link in CV/resume.
2. Statement of purpose: Please submit with university application and upload as PDF.
3. References: Provide the names and contact information for three references from professional associates such as instructors, supervisors or colleagues who can comment on the applicant’s ability to succeed in a graduate program. Letters of recommendation will be submitted electronically by recommenders.
4. Portfolio: Provide 20 still and/or moving images. Present work in reverse chronological order with the newest work first and the oldest work last. Images are reviewed one at a time. Please include any additional information to help reviewers understand the image.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), the M.F.A. program requires 60 credit hours, which students usually complete in two years of full-time study. The majority of credit hours are taken in the student’s area of specialization. Graduate seminars, art history courses and other studio/academic electives round out the graduate student’s individualized program. Studio visits and critiques with visiting artists are an important aspect of the program.

Within the studio concentration, emphasis is placed on self-motivation, individual investigation and the development of professional attitudes and skills. Graduate students are expected to demonstrate a serious commitment to their work and to develop mature ideas and forms of expression. Admission to the graduate program is highly selective and competitive.

Graduate students interact formally and informally with the faculty in their areas and with other faculty members in the School of the Arts. Each graduate student works closely with a faculty committee that meets twice a semester for critiques and discussions. At the end of the first year, students present their work to their committee and departmental faculty in a candidacy review. At the successful completion of the 60 credit hours, a thesis exhibition is mounted at the university’s Anderson Gallery or at an alternative venue. A written thesis is also required.

Curriculum requirements

Take 30 credits in the following course: 30
- Craf 641 Graduate Studies in Clay

Take six credits in the following course: 6
- Craf 681 Candidacy Research

Total Hours: 60

1. Graduate open electives: any 500-level or higher graduate course (Permission of instructor or program may apply.)
2. Art history: any graduate-level (500 to 799) ARTH course

Student learning outcomes

1. Aesthetic and cross-cultural understanding: The students will demonstrate mastery in aesthetic and cross-cultural understanding.
2. Understanding of the contemporary of their field: The curriculum of craft and material studies is designed to provide students with a comprehensive and up-to-date understanding of their field.
3. Critique information interpretation: The students will be able to use knowledge gained from critique to improve creative work.
4. Technique development: The students will demonstrate mastery of advanced craft techniques within their field.
5. Professional practice: The students will demonstrate leadership in their field in teaching and/or studio management.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in jewelry/metalworking

Program accreditation

National Association of Schools of Art and Design

Program goal

The program comprises a community of makers/artists who advance the conceptual, historical, technical and haptic aspects of clay, fiber, glass, metal and wood. The program promotes an artistic practice rooted in the values of craft. Students will investigate craft’s inherent relationship to the world with fearless innovation.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

</tbody>
</table>

Special requirements
- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of the Arts admission requirements, applicants in the visual arts must have completed a minimum of 36 credit hours in art at the undergraduate level. Applicants should also present:

1. Curriculum vitae/resume: If applicant has a website, please include a link in CV/resume.
2. Statement of purpose: Please submit with university application and upload as PDF.
3. References: Provide the names and contact information for three references from professional associates such as instructors, supervisors or colleagues who can comment on the applicant’s ability to succeed in a graduate program. Letters of recommendation will be submitted electronically by recommenders.
4. Portfolio: Provide 20 still and/or moving images. Present work in reverse chronological order with the newest work first and the oldest work last. Images are reviewed one at a time. Please include any additional information to help reviewers understand the image.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the M.F.A. program requires 60 credit hours, which students usually complete in two years of full-time study. The majority of credit hours are taken in the student’s area of specialization. Graduate seminars, art history courses and other studio/academic electives round out the graduate student’s individualized program. Studio visits and critiques with visiting artists are an important aspect of the program.

Within the studio concentration, emphasis is placed on self-motivation, individual investigation and the development of professional attitudes and skills. Graduate students are expected to demonstrate a serious commitment to their work and to develop mature ideas and forms of expression. Admission to the graduate program is highly selective and competitive.

Graduate students interact formally and informally with the faculty in their areas and with other faculty members in the School of the Arts. Each graduate student works closely with a faculty committee that meets twice a semester for critiques and discussions. At the end of the first year, students present their work to their committee and departmental faculty in a candidacy review. At the successful completion of the 60 credit hours, a thesis exhibition is mounted at the university’s Anderson Gallery or at an alternative venue. A written thesis is also required.

Curriculum requirements

Take 30 credits in the following course: 30
- Craf 601 Graduate Studies in Metal
- Craf 681 Candidacy Research
- Craf 690 Graduate Seminar
- Graduate art history elective 1 3
- Graduate open electives 2 6

Total Hours: 60

1 Graduate open electives: any 500-level or higher graduate course (Permission of instructor or program may apply.)
Art history: any graduate-level (500 to 799) ARTH course

Graduate program director
Sonya Y.S. Clark
Chair, Department of Craft and Material Studies
syclark@vcu.edu
(804) 828-1750

Program website: arts.vcu.edu/craft (http://arts.vcu.edu/craft)

Department of Dance and Choreography
E. Gaynell Sherrod, Ed.D.
Chair
arts.vcu.edu/dance (http://arts.vcu.edu/dance)

The mission of the Department of Dance and Choreography is to create an environment where the student experiences the demands and challenges of the professional dancer/choreographer. In a community setting where communication, mutual respect and self-motivation are encouraged, classes provide students with disciplined training that will maximize their potential to become dancers of technical excellence, choreographers with original and powerful voices and thinkers with high academic standards.

Students are trained to be performers, choreographers and teachers in this curriculum, which emphasizes modern dance and offers dance courses in modern, improvisation, composition, choreography, music, and dance forms and dance history, as well as ballet, jazz, tap, hip-hop, ballroom, contact improvisation, dance science, anatomy for dancers, video/choreography and teaching methods for dance. Additionally, the program provides a variety of experiences in performance, choreography and production. These offerings enable students to develop as savvy, expressive artists with professional training in dance technique, knowledge of dance philosophies and a foundation in history, enabling them to function as independent and creative artists in the field of dance. VCU Dance is an accredited member of the National Association of Schools of Dance.

Department of Fashion Design and Merchandising
Patricia Brown
Associate professor and chair
arts.vcu.edu/fashion (http://arts.vcu.edu/fashion)

The Department of Fashion Design and Merchandising offers two programs: the fashion design track leads to a Bachelor of Fine Arts degree and the fashion merchandising track leads to a Bachelor of Arts degree.

Both tracks are extremely time consuming. Students are expected to put class attendance and study time above other campus activities or employment.

All students are required to have a laptop computer. The department can provide specifications.

Students must take classes in the sequence prescribed by the department and adhere to all prerequisites. Failure to comply can lengthen the number of semesters necessary for completion of degree requirements.

Internships provide not only experience but industry contacts, and are strongly recommended. They may be conducted primarily during the summer semester.

Department of Graphic Design
David Shields
Associate professor and chair
arts.vcu.edu/graphicdesign (http://arts.vcu.edu/graphicdesign)

Graphic design is a creative and analytical process that integrates art and technology to communicate ideas and information. The goal of the Department of Graphic Design at VCU is to educate students to become innovators and leaders in three related areas of professional practice: print design, sequential design and interaction design.

Mission statement
The Department of Graphic Design encourages the exploration of diverse problem-solving methodologies, innovative investigations and creative research in all forms of communication. It is dedicated to excellence in teaching, scholarship, academic and creative research and professional practice. The Department of Graphic Design provides both an undergraduate and graduate education stressing creative and intellectual thinking; awareness of individual, social, cultural and communicative issues; the integration of new technology; and a concern for ethical implications and the natural environment. The program actively contributes to the university, local, state, national and international communities through its scholarly and creative activities, educational programs and service efforts.

Design, Master of Fine Arts (M.F.A.) with a concentration in visual communications (p. 295)

Program accreditation
National Association of Schools of Art and Design

Program goal
The graduate program in design with a concentration in visual communications is oriented toward individuals interested in pursuing a career in design education and/or furthering their professional practices, in conducting visual or theoretical research, and in investigating the intersections of function and expression in design problem solving.

Student learning outcomes
1. Students will be able to present fluent verbal and written explanations of research and studio activities.
2. Students will develop a personal vocabulary, approach and vision in creative work.
3. Students will demonstrate knowledge of historical, social and cultural perspectives in relation to visual communications and clarify how they influence work.
4. Students will develop the ability to create expressive forms and use them to communicate appropriately.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate is submitted by the last day of classes of the final semester of matriculation, they must make formal application to graduate.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>Jan 15</td>
<td></td>
</tr>
</tbody>
</table>

Special requirements

- International applicants should apply by Dec. 15 to ensure that application materials are received by the deadline.

• See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process, including portfolio, resume, statement of purpose, letters of reference, transcripts and scores.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have taken 36 undergraduate credit hours in studio art that should include a minimum of 20 credit hours in visual communications and/or related fields. Under special circumstances, these requirements may be waived.

Interview

The department will contact selected applicants regarding the interview (may be via Skype, telephone or in person).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the M.F.A. is an intensive two-year, 60 credit-hour full-time program with courses only scheduled during the day. Courses are often integrated with each other during the semester.

Program website: arts.vcu.edu/graphicdesign/mfa (http://arts.vcu.edu/graphicdesign/mfa)

Design program prepares students for careers in interior design or entry into programs of advanced study.

The department also offers a Master of Fine Arts in Design with a concentration in interior environments with a first-professional track and a postprofessional track. These tracks seek to produce competent creative designers whose design solutions are based on human response in the contemporary environment. Mastery of design skills, development of productive habits, knowledge of resources and an awareness of interrelated disciplines equip the student with the tools and expertise necessary to pursue creative design positions.

The department relates with the professional interior design community through a variety of activities. The faculty invites featured speakers to share experiences, participate in the annual ASID EXPO, facilitate mentorships with professional designers and support student internships. An active student chapter of the American Society of Interior Designers provides additional enriching opportunities for student involvement.

The department offers limited accelerated undergraduate preparation for those individuals who lack full preparation. Assessment of the individual candidate’s needs will determine the scope of the preparatory course work. This is an opportunity to gain the skills and design experiences required to qualify for admission to the graduate degree program.

The department has a very comprehensive website with extensive information about the program, interior design in general, faculty, student work and the department newsletter. In advance of scheduling a meeting for department advising or for application to the program, students should review the website at arts.vcu.edu/interiordesign (http://arts.vcu.edu/interiordesign).

• Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments:
  • Post-professional option (p. 297)
  • Professional entry-level option (p. 299)

Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – post-professional option

Program accreditation
Council for Interior Design Accreditation

Program goal
The mission of the Department of Interior Design in VCU’s School of the Arts is to provide an intellectually rigorous, studio-based experience grounded in the issues of interior architecture. The department develops in its students an enduring passion and curiosity for their work, a determination to continually seek quality in their endeavors, an ability to reflect constructively upon their actions as individuals, and a responsibility for their lifelong education. The department focuses a student’s professional activities while encouraging connections between these activities and a larger forum of ideas that enrich their culture and environment.

Student learning outcomes
1. Students will demonstrate professional values.
2. Student work will demonstrate advanced design theory.
3. Student work will demonstrate advanced knowledge of interior design.
4. Student work will demonstrate effective communication.
5. Students will demonstrate a foundation in business and professional practices.

Concentration in interior environments – post-professional option
The post-professional option is a subconcentration of the interior environments concentration, one of about 10 available nationally, that allows students who already have undergraduate degrees in interior design or architecture the opportunity to develop an individualized direction in scholarship. Admission is highly selective and open only to students who have demonstrated a high caliber of work at the undergraduate and/or master’s level.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

<td>TOEFL or IELTS scores for international students only</td>
</tr>
</tbody>
</table>

Special requirements
- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process and TOEFL score requirements.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum requirements:
1. An interview (recommended, but not required)
2. Previous university/college transcripts (one official copy)
3. Three letters of recommendation to be submitted electronically through the online application process
4. Essay: three-to-five page (minimum) sample of academic writing
5. Written personal statement (one to two pages)
6. A resume
7. TOEFL score (international students only) – 600 paper/2500 computer/100 Internet
8. A portfolio with samples of design work (Applicants will be directed to upload portfolio images and/or video after they start the application process.)

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), a minimum of 60 credit hours is required within prescribed courses. A research-design project is required to complete the program of study. This project is undertaken and developed within the context of IDES 699 and must consist of the testing of an original idea that is supported by research. This information will be synthesized through the design development process and culminate in an individual creative project of complex scale and scope. Documentation must follow established guidelines and be presented in a form that can be retained by the department and the university. On completion of the thesis, students participate in an oral examination and a graduate exhibition.

Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – professional entry-level option

Program accreditation
Council for Interior Design Accreditation

Program goal

The mission of the Department of Interior Design in VCU’s School of the Arts is to provide an intellectually rigorous, studio-based experience grounded in the issues of interior architecture. The department develops in its students an enduring passion and curiosity for their work, a determination to continually seek quality in their endeavors, an ability to reflect constructively upon their actions as individuals, and a responsibility for their lifelong education. The department focuses a student’s professional activities while encouraging connections between these activities and a larger forum of ideas that enrich their culture and their environment.

Student learning outcomes

1. Students will demonstrate professional values.
2. Student work will demonstrate advanced design theory.
3. Student work will demonstrate advanced knowledge of interior design.
4. Student work will demonstrate effective communication.
5. Students will demonstrate a foundation in business and professional practices.

Concentration in interior environments – professional entry-level option

The professional entry-level track is a 60-72 credit-hour program for second-degree seekers who have a proven record of academic excellence in a field other than architecture or interior design and are interested in pursuing a career in interior design. The structure of the track echoes the B.F.A. in Interior Design program in content, but advances the student at an accelerated rate during the first year and summer, bringing students parallel with the curriculum of the post-professional track by the second year.

The curriculum is highly sequenced, and students are admitted to the program for the fall semester only. All incoming students are required to take part in an intensive workshop in the summer that introduces and develops drawing, presentation skills and an understanding of two- and three-dimensional design methods. Students must successfully pass the workshop with a minimum grade of B to begin the professional entry-level track. Applicants who have an art or design background are strongly
encouraged to submit a portfolio for review with their application. PowerPoint is the preferred format for the portfolio. Applicants are also required to submit three letters of recommendation and a three-to-five page writing sample.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum requirements:

1. An interview (recommended, but not required)
2. Previous university/college transcripts (one official copy)
3. Three letters of recommendation to be submitted electronically through the online application process
4. Essay: three-to-five page (minimum) sample of academic writing
5. Written personal statement (one to two pages)
6. A resume
7. TOEFL score (international students only) – 600 paper/2500 computer/100 Internet
8. A portfolio with samples of design work (Applicants will be directed to upload portfolio images and/or video after they start the application process.)

**Special requirements**

- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process and TOEFL score requirements.

**Curriculum requirements**

**Prerequisite**

Students with no art or design background must successfully complete this class with a minimum grade of B as a prerequisite for enrolling in the program.

Take 2-12 credits in the following: 2-12

| IDES 500 | Art and Design Methods Workshop |

**Required courses**

| IDES 501 | Introductory Graduate Design Studio I | 6 |
| IDES 502 | Introductory Graduate Design Studio II | 6 |
| IDES 511 | Introductory Graduate Graphics I, II | 3 |
| IDES 512 | Introductory Graduate Graphics I, II | 3 |
The Department of Kinetic Imaging prepares students to use video, animation and sound for the purpose of art-making, self-expression and experimentation. The kinetic imaging programs are designed for students who want to study video art, sound design and experimental two-dimensional and three-dimensional animation. Emphasis is placed on artistic uses of the media.

The department offers an undergraduate curriculum leading to a Bachelor of Fine Arts in Kinetic Imaging as well as a graduate level program that results in a Master of Fine Arts in Fine Arts.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in kinetic imaging (p. 301)

**Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in kinetic imaging**

**Program accreditation**
National Association of Schools of Art and Design

**Program goals**
The Department of Kinetic Imaging is committed to the artistic exploration of video, animation and sound. The M.F.A. program emphasizes the extension of these practices into the arts and their connection to contemporary issues in visual culture.

Graduate students in the M.F.A. program are exposed to a vigorous visiting artist schedule. Through studio reviews, seminars and research, the students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work. In addition to their own investigations, graduate students participate in and contribute to the undergraduate program.

While the graduate program is generally a two-year, four-semester in-residence program, students are expected to continue pursuits either on campus or at an alternative site throughout the calendar year.

**Student learning outcomes**
1. Through studio reviews, seminars and research, students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work.
2. Students will demonstrate critical thinking and conceptual problem-solving, with the ability to contribute to and challenge the rapidly evolving dialogue in media arts.
3. Students? creative work will demonstrate an engagement with critical inquiry to professional platforms such as public exhibitions, performance and/or scholarly publication. This includes knowledge of the various venues available to support and enhance their professional careers and the ability to accurately communicate what their work is addressing and who they are as artists.
4. Students will demonstrate the ability to carry their work and critical inquiry to professional platforms such as public exhibitions, performance and/or scholarly publication. This includes knowledge of the various venues available to support and enhance their professional careers and the ability to accurately communicate what their work is addressing and who they are as artists.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program
through the kinetic imaging program, these credit hours can include other courses from within the fine arts degree program with the approval of the graduate program director. Additional elective courses are drawn from approved courses in participating units.

To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

The M.F.A. in Fine Arts with a concentration in kinetic imaging will be a 60-credit hour program consisting of eight credit hours of graduate studio, four credit hours of graduate seminar and three credit hours of electives\(^1\) (15 credit hours) each semester. The program will typically take two years of full-time study to complete.

The M.F.A. in Fine Arts with a concentration in kinetic imaging is consistent with national standards established by the accrediting National Association of Schools of Art and Design.

The curriculum for the M.F.A. in Fine Arts with a concentration in kinetic imaging is built on the understanding that incoming students will exhibit high levels of ability and quickly demonstrate a serious commitment to their work and artistic development. Students accepted into the graduate program will possess a competitive portfolio and a minimum 3.0 grade point average, with a B.A., B.F.A., B.S. or M.A. from an accredited university. Due to the interdisciplinary nature of these media arts disciplines, applicants with degrees in other disciplines will be encouraged to apply. At the end of the first year, students will go through an advanced candidacy review, where they will present and defend their work before their graduate committee, which will be composed of members from the Department of Kinetic Imaging and other fine arts departments, following the current M.F.A. model. During the final semester, graduates will be required to complete a body of work resulting in an M.F.A. exhibition and written thesis, which will serve as the capstone elements of the degree program and be evaluated by the student’s graduate committee.

\(^1\) Electives may be chosen from among all university courses listed as 500-level or greater and require approval from a faculty adviser.

**Curriculum requirements**

| Take 32 credits in the following course: | 32 |
| KINE 600 Graduate Studio \(^1\) | |
| Take 16 credits in the following course: | 16 |
| KINE 692 Graduate Seminar \(^2\) | |
| Select 12 credits of approved graduate electives \(^3\) | 12 |

**Total Hours**

| 60 |

\(^1\) An exhibition will be required as a prerequisite for graduation.

\(^2\) Enrollment in the graduate seminar is mandatory for the duration of the student’s study in the graduate program.

\(^3\) Electives may be chosen from among all university courses listed as 500-level or greater and require approval from a faculty adviser.

**Department electives**

| KINE 510 Foundations in Media | 3 |
| KINE 591 Topics in Contemporary Media | 3 |
| KINE 691 Independent Study | 1-4 |
| KINE 695 Advanced Sound | 3 |
Total graduate credit hours required (minimum) 60

Program website: arts.vcu.edu/kineticimaging/mfa-program

Department of Music

Darryl Harper, D.M.A.
Associate professor and chair
arts.vcu.edu/music

The Department of Music is committed to the advancement of Western art music and jazz as academic disciplines, as fields of professional endeavor and as a viable presence in the community. Entrance and graduation requirements comply with the National Association of Schools of Music guidelines. The department offers degree programs at the baccalaureate and master’s levels, and each of them are described in detail on individual program pages within the Bulletins website.

Participating in the VCU musical community means involvement in a musically rich environment of studio lessons, small classes, independent study and participation in performing organizations, as well as hearing outstanding professional performers in the classical and jazz traditions. On-campus master classes with major touring artists are an important addition to the regular instructional program. Student soloists also may appear with regional and university ensembles. Through the Mary Anne Rennolds Chamber Concerts and other events, the department is one of the region’s major sponsors of music performances.

Approximately 330 students choose to major in music, with many other students from throughout the university taking courses and participating in ensembles. There are 20 full-time faculty, more than half of whom hold doctorates, in addition to 45 part-time instructors. Among the faculty are internationally recognized performers, composers, researchers and teachers – musician-educators who are active in all facets of the professional music world. The faculty includes members and regular performers with ensembles that include the Richmond and Virginia Symphonies, the New York Philharmonic, the Virginia Opera, Rhythm and Brass, the Great American Music Ensemble and National Chamber Players. The faculty maintains a high level of recognition through each individual’s publications, recordings, international performances and lectures.

The department is housed in two buildings. The principal facility is the W.E. Singleton Center for the Performing Arts, which includes the 502-seat Sonia Vlahcevic Concert Hall, faculty offices, rehearsal rooms and special studios for organ, percussion and piano. The James W. Black Music Center has a 347-seat recital hall, classrooms, practice rooms, rehearsal spaces, faculty offices and studios.

Admission and auditions

An audition/interview as well as both written and aural general musicianship examinations are necessary for admission to programs in the Department of Music. Students must also meet the general admission requirements of the university. For audition information contact Virginia Commonwealth University, Department of Music, 922 Park Ave., P.O. Box 842004, Richmond, VA 23284-2004; phone (804) 828-1166 or email music@vcu.edu.

Grades and achievement levels

All music majors are required to maintain a cumulative GPA of 2.0 and pass at least one applied achievement level within any two-semester period (not including summers) in order to continue as music majors. Jazz studies majors must pass one applied achievement level of classical instrument study per two-semester period (not including summers) and at least one jazz applied music level within the first three semesters in order to maintain a jazz studies concentration. All music students also must pass MHIS 145-MHIS 146 by the end of the fourth semester. Any student who fails to meet or maintain these standards will not be allowed to continue as a music major. A student may audition for readmission into the department as a music major only with permission from the Department of Music.

A cumulative GPA of 2.8 is required for music education students to qualify for student teaching placement. Music education students who do not maintain a cumulative 2.8 GPA will not be allowed to continue in the music education track, but may continue in the Bachelor of Arts program or the Bachelor of Music performance track if they meet the minimum requirements that apply to those respective degree programs.

Electives in music

Students majoring in a field other than music may register for ensembles, private lessons and a variety of classroom courses in music. Classes in music appreciation, African-American music, introduction to writing music, basic music skills and special offerings in music are specifically designed for the non-music major.

Internship in music

Interested students should consult with a faculty member closely associated with the appropriate field. As the student approaches junior academic standing, he or she may apply to the department for participation in APPM 493. Applications will be reviewed on the basis of academic GPA, instructor recommendation(s), professional promise, and demonstrated interest and competence in the area of study. The student must possess a minimum 2.5 overall GPA with a minimum 3.0 GPA in major course work in music. All students (including transfers) must have completed a minimum of 60 credits.

All internships for credit are approved by the Department of Music. The experience may also be coordinated by VCU’s Cooperative Education/Internship Program. The latter office requires completion of an application and resume.

Fees

All students registering for APPL 200 pay an applied music fee. This fee is additional to the comprehensive fee charged only to majors in the School of the Arts. Current fee rates for music lessons can be found on

Recital/convocation attendance
All undergraduate majors are required to pass four semesters of recital/convocation attendance for graduation. During each semester of enrollment, the student must attend a minimum number of concerts or recitals plus departmental convocations in order to pass the requirement.

Master class
This requirement consists of participation in weekly master classes in the student's applied major area. For students in the Bachelor of Music program, enrollment in master class is required for each semester that students enroll for a two-credit lesson on their principal performing instrument. A minimum of eight semesters in the performance concentration (jazz studies majors take four semesters classical and four semesters jazz) and six semesters for the music education concentration are required. Students in the Bachelor of Arts in Music program must also enroll in master class each semester they take a two-credit lesson until they complete a minimum of four semesters of master class on the same instrument.

Ensemble requirements
To ensure consistent skill development in ensemble settings, only one large ensemble credit per semester will be counted toward a student’s large ensemble requirements. Students whose principal instrument is a band or orchestral instrument must satisfy the large ensemble requirement by performing in a large ensemble on that instrument. Students whose principal instrument is voice must satisfy the requirement by performing in a large choral ensemble on voice. Those whose principal instrument is piano must complete four of their six elective credits by playing the piano in ensembles. Jazz studies majors must have ensembles approved in advance by their adviser or program director. Bachelor of Arts students must earn six credits in either large or small ensembles.

- Music, Master of (M.M.) with a concentration in music education (p. 304)

Music, Master of (M.M.) with a concentration in music education

Program accreditation
National Association of Schools of Music

Program goal
The Master of Music with a concentration in music education program at VCU is designed to provide the opportunity for advanced, graduate study for the practicing professional music educator. It is the goal of the Department of Music that successful graduates emerge as leaders and innovators in the profession.

The curricular goal of the program is to provide flexibility in addressing the individual pedagogical interests of each student as well as the framework and foundations needed for continued advanced study in music education at the doctoral level. As part of this design, the degree is offered exclusively as a three-summer program, with continuous enrollment required following admittance to degree candidacy (fall and spring semesters prior to third summer). This design provides a "real-world" option for the practicing music educator to enter graduate study.

Student learning outcomes
1. Understand research in music education
2. Understand current issues in music education
3. Develop advanced pedagogical skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)
Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Baccalaureate degree in music or music education from an accredited institution
2. Virginia teaching certification in PK-12 music education (or same from a reciprocal state)
3. Written statement of personal philosophy of music education – used to assess thoughtful reflection on larger issues of the profession, ability to express thought in clearly written English and as diagnosis for specific deficiencies in this area
4. Three letters of recommendation – must include letter from persons who have directly observed applicant’s teaching
5. Interview with the director of music education

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), the Master of Music program requires a minimum of 30 graduate credit hours. The summer program is intended to be completed in three consecutive summer sessions and is structured into three cognate areas: music education, music pedagogy and professional education. Music education and music pedagogy cognate courses are offered on a rotating basis, with electives in music pedagogy developed and offered on an ongoing basis. This structure permits the student to enter the program at any given point in the sequence. The student will apply for degree candidacy following the completion of 18 credit hours. It is recommended that students enroll in eight to nine credit hours each summer. Final project credit hours are earned through online enrollment during the fall/spring semester and in residency during the final summer session following admittance to degree candidacy.

**Curriculum requirements**

**Cognate areas**

**Music education**

- MUED 600 Seminar in Music Education 3
- MUED 610 Psychology of Music 3
- MUED 620 Introduction to Research in Music Education 3

Take three credits in the following course: 3

- MUED 783 Final Project in Music Education

**Music pedagogy**

Select a minimum of 12 credit hours from either the instrumental focus or choral focus areas:

**Instrumental focus:**

- MUED 614 Instrumental Conducting Techniques
- MUED 616 Researching the Wind Band: Strategies and Resources
- MUED 618 History and Literature of the Wind Band

**Choral focus:**

- MUED 604 Choral Conducting and Rehearsal Techniques
- MUED 606 Choral Literature and Style
- MUED 608 Teaching the Adolescent Singer
- MUED 583 Special Workshop in Music Education (MUED electives)
- MUED 591 Topics in Music Education

**Professional education**

A focus on areas of education of interest to student: to be determined by student and adviser, with adviser approval. May include the following:

- EDUS 605 Child and Adolescent Development
- EDUS 607 Advanced Educational Psychology for Elementary Teachers
- EDUS 662 Educational Measurement and Evaluation
- EDUS 673 Seminar on Educational Issues, Ethics and Policy
- EDUS 701 Urban Education
- ADMS 600 Public School Administration
- ADMS 606 Organizational Behavior and Change in Educational Settings
- ADMS 611 School Law

Other graduate-level School of Education offerings

**Total Hours** 30

**Total graduate credit hours required (minimum) 30**

**Program website:** arts.vcu.edu/music/areas-of-study/music-education/graduate-program (http://arts.vcu.edu/music/areas-of-study/music-education/graduate-program)

**Department of Painting and Printmaking**

Arnold Kemp
Associate professor and chair
arts.vcu.edu/paintingprintmaking (http://arts.vcu.edu/paintingprintmaking)

The Department of Painting and Printmaking offers an undergraduate program that earns a Bachelor of Fine Arts in Painting and Printmaking,
as well as a graduate program of study that leads to the Master of Fine Arts in Fine Arts. Students admitted to the programs are expected to have a high level of competence in either painting or printmaking. The graduate program is designed to encourage the development of professional attitudes and skills, with an emphasis on individual investigation.

The department is housed in the new Fine Arts Building with 15 individual graduate studios plus a large graduate printmaking area in addition four state-of-the-art undergraduate printmaking studios: etching, lithography, screenprinting and digital. These new facilities provide an excellent physical environment for the programs with easy access to the other fine art areas of sculpture and crafts. Established in 1928, the Department of Painting and Printmaking was the first department in what has become the School of the Arts. For nearly 70 years, the department has made significant contributions to the development of the School of the Arts’ reputation as one of the premier art schools in the country.

The department supports an active and ambitious program of visiting artists and lecturers. Leading figures in the world of contemporary art visit to discuss their work, critique, visit studios, conduct workshops and meet with students throughout the year.

The Master of Fine Arts degree is the terminal degree in the studio areas of fine arts and is a requirement for most college and university teaching positions. Many graduate students have gained teaching experience in the department as part of their assistantship responsibilities, teaching classes in painting, drawing and printmaking. The department assists graduate students financially through a variety of teaching assistantships, graduate assistantships and scholarships.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in
  - Painting (p. 306)
  - Printmaking (p. 308)

**Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in painting**

**Program accreditation**
National Association of Schools of Art and Design

**Program goals**

The graduate program advances the development of:

1. Individual studio and scholarly talents, interests and philosophies, used creatively to both expand and preserve our cultural heritage
2. Professional studio competence as exemplified by a significant body of work
3. Individuals with the potential to solve contemporary problems in all aspects of the visual arts and to explore and address new questions and issues
4. Professional competence in the dissemination of knowledge, including logical, clear verbal and written presentation of aesthetic ideas in teaching and other contexts
5. Scholarly competence in the organization, evaluation and interpretation of knowledge
6. Students will achieve technical proficiency in relation to the tools, techniques and materials used in their field and the expertise to visually articulate their ideas.

7. Students will achieve proficiency regarding critical thinking and conceptual problem-solving with particular focus on the context and practice of painting and printmaking.

**Student learning outcomes**

1. Define work in relation to history and practice
2. Engage fully in critical discourse
3. Increase knowledge of materials and techniques
4. Develop professional practice: engage in opportunities that develop the experience required to manage a creative professional career

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the requirements listed on the website above.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the M.F.A. in Fine Arts with a concentration in painting or printmaking requires 60 credit hours and is usually completed in two years of full-time study. Most of these credit hours are in studio areas and are augmented by related courses in specialized academic fields. A graduate seminar meets weekly and addresses topics related to contemporary art and theory. Two required semesters of art and critical theory are presented in a course that surveys the major themes of contemporary art criticism.

Graduate students meet with individual committees composed of three faculty members. Each committee and student conducts an ongoing dialogue and critique. At the end of the second semester students discuss their work at a candidacy critique comprising their committee and additional faculty members. M.F.A. recipients mount a comprehensive exhibition of their work at the university’s Anderson Gallery at the successful conclusion of the program’s second year.

The Master of Fine Arts program is based on intensive studio practice at an advanced level in the areas of painting and printmaking. The program is highly selective and is presently limited to 15 participants.

Graduate program director
Holly Morrison
Associate professor, Department of Painting and Printmaking
hmorrison@vcu.edu
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in printmaking

Program accreditation
National Association of Schools of Art and Design

Program goals
The graduate program advances the development of:

1. Individual studio and scholarly talents, interests and philosophies, used creatively to both expand and preserve our cultural heritage
2. Professional studio competence as exemplified by a significant body of work
3. Individuals with the potential to solve contemporary problems in all aspects of the visual arts and to explore and address new questions and issues
4. Professional competence in the dissemination of knowledge, including logical, clear verbal and written presentation of aesthetic ideas in teaching and other contexts
5. Scholarly competence in the organization, evaluation and interpretation of knowledge
6. Students will achieve technical proficiency in relation to the tools, techniques and materials used in their field and the expertise to visually articulate their ideas.
7. Students will achieve proficiency regarding critical thinking and conceptual problem-solving with particular focus on the context and practice of painting and printmaking.

Student learning outcomes
1. Define work in relation to history and practice
2. Engage fully in critical discourse
3. Increase knowledge of materials and techniques
4. Develop professional practice: engage in opportunities that develop the experience required to manage a creative professional career

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Department of Photography and Film

Sasha Waters Freyer
Associate professor and chair
arts.vcu.edu/photofilm (http://arts.vcu.edu/photofilm)

The Department of Photography and Film seeks to advance the highest standards of the media of photography and filmmaking by encouraging the creative and professional growth of both its students and faculty. The goal is to provide a forum for the development and exchange of visual ideas and to encourage its members to translate these ideas with a high degree of sensitivity and proficiency. The department fosters a pluralistic approach that allows both faculty and students to expand the traditional boundaries of the respective media, explore a broad range of conceptual orientations and engage in multidisciplinary practice.

The department offers undergraduate concentrations in photography and filmmaking resulting in a Bachelor of Fine Arts in Photography and Film,
as well as a graduate program that leads to a Master of Fine Arts in Fine Arts with a concentration in photography and film.

To promote student development and research of contemporary art practice and theory, the Department of Photography and Film presents a diverse and active visiting artist program. Through lectures, critiques and research courses, students are exposed to the valuable insights of respected international artists, scholars and critics. In addition, the visiting artists teach topics courses exploring the current artistic and conceptual foundations found in their own work. Graduate students are encouraged to establish an individual critical dialogue with the visiting artists and faculty and attain a strong critical and historical basis for their work.

The facilities include several critique and screening rooms; a large black-and-white darkroom; a large state-of-the-art digital photography and film editing lab; a shooting studio; a student checkout center with a wide range of still photography and film cameras, professional lights and sound recording equipment; a professionally staffed graphics lab located in the same building that provides student with digital services on several high-tech imaging devices; and two large graduate workrooms.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in photography and film (p. 310)

**Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in photography and film**

**Program accreditation**
National Association of Schools of Art and Design

**Program goal**
The mission of the M.F.A. in Fine Arts with a concentration in photography and film is to facilitate a comprehensive, advanced, intellectual and artistic understanding and use of the mediums of photography and filmmaking. The specific goals of the program are as follows: to foster a climate that inspires creativity, intellectual curiosity, freedom of expression and critical thinking; to attract and sustain a faculty of the highest quality by providing an environment conducive to their achieving and maintaining national and international stature; and to attract highly artistic and intelligent individuals interested in advanced study of the medium.

**Student learning outcomes**
1. Students will demonstrate a familiarity with contemporary critical theory and an ability to apply and investigate those ideas in their work.
2. Students will gain and display advanced skills in conceptual and technical use of the medium.
3. Students will be able to create photographs and films that display an advanced level of intelligence and artistic vision.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graude.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

</tbody>
</table>

**Special requirements**
- A portfolio is required for admission to this program. See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.
In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the requirements listed on the website above.

**Degree requirements**

The advanced study of photography and film is both broad and varied. Therefore, the program’s requirements are flexible and determined by the needs of each student on an individual basis. There are, however, a few definite requirements. In addition to general VCU Graduate School graduation requirements (p. 39), on completion of the program, students must have knowledge of contemporary art history, a more in-depth knowledge of the history of their disciplines and an understanding of the critical dialogue that is connected with their medium. Courses are suggested for students to meet these requirements, based on their backgrounds.

**Department of Sculpture and Extended Media**

Matt King  
Associate professor and acting chair  
arts.vcu.edu/sculpture (http://arts.vcu.edu/sculpture)

The Department of Sculpture and Extended Media’s eight full-time faculty members and various part-time and technical faculty represent a spectrum of directions and philosophical attitudes. Faculty interests range from formal to conceptual, from the concrete to the evanescent. This breadth of interests is presented to students and contributes to the comprehensive nature of our department. Students are not only exposed to traditional sculpture media, but encouraged to explore technology’s parameters and to pursue interdisciplinary activity.

We encourage sculpture students to broaden their experience in other areas. By promoting a curriculum that encourages students to take a wide range of courses throughout the university, we stress links between art, science, the humanities and the world. As a consequence, sculpture students have rich, productive associations with professors in many fields.

Sculpture students are challenged to exploit their full potential by questioning notions of contemporary art. Our goal is to provide students with the vocabulary, the seeds of discernment and the skills of both analysis and synthesis in order to become participants in the dialogue of our time. All of this takes place in an environment of high expectation regarding self-motivation, intellectual capacity and responsibility.

The sculpture program is housed in a state-of-the-art facility. Sculpture majors are provided with semi-private, locked studio spaces and are given time, support and encouragement to pursue their independently determined goals.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in sculpture (p. 311)

**Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in sculpture**

**Program accreditation**
National Association of Schools of Art and Design

Program goal
Formal and informal contact with faculty is designed into the program. Along with the Department of Sculpture’s faculty, graduate students are exposed to a vigorous visiting artist schedule. Through studio reviews, seminars and research, students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work. In addition to their own investigations, graduate students participate in and contribute to the undergraduate program.

While the graduate program is generally a two-year, four-semester in-residence program, students are expected to continue studio pursuits either on campus or at an alternative site throughout the calendar year.

Student learning outcomes
1. Define work in relation to history
2. Take full advantage program resources
3. Develop knowledge of equipment and techniques
4. Develop professional practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www_graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Special requirements
• See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the requirements listed on the website above. Additionally:

1. Applicants should hold a baccalaureate degree from an accredited institution.
2. It is expected that applicants will have a 3.0 (B) average on the last 60 semester hours of undergraduate work.
3. A portfolio review is required. A personal interview is encouraged.
4. Applicants must have completed a minimum of 36 credit hours of art at the undergraduate level.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), the M.F.A. in Fine Arts with a concentration in sculpture requires 60 credit hours and is usually completed in two years of full-time study. Most of these credit hours are in studio areas and are augmented by related courses in specialized academic fields. A graduate seminar meets weekly and addresses topics related to contemporary art and theory. Two required semesters of art and critical theory are presented in a course that surveys the major themes of contemporary art criticism.

Graduate students meet with individual committees composed of three faculty members. Each committee and student conducts an ongoing dialogue and critique. At the end of the second semester, students discuss their work at a candidacy critique comprising their committee and additional faculty members. M.F.A. recipients mount a comprehensive exhibition of their work at the university’s Anderson Gallery at the successful conclusion of the program’s second year.

The Master of Fine Arts program is based on intensive studio practice at an advanced level in the area of sculpture. The program is highly selective and is presently limited to 15 participants.
## Curriculum requirements

Take 16 credits in the following course:

<table>

**Program website:** arts.vcu.edu/sculpture

**Department of Theatre**

Ron Keller
Professor and interim chair

Aaron Anderson, Ph.D.
Associate chair and director of undergraduate studies

**Program website:** arts.vcu.edu/theatre

The mission of the Department of Theatre is to educate and train students as theatre professionals and/or academicians in the field of performance, design/technology or theatre pedagogy.

In fulfilling its mission, the Department of Theatre provides students with the professional and cultural foundations essential for achieving the highest standards of the art. The department offers three degrees — a Bachelor of Arts, a Bachelor of Fine Arts and a Master of Fine Arts — to which applicants are admitted based on demonstration of ability, genuine interest determined during an interview, and audition and/or portfolio presentation.

In addition to introductory theatre and acting courses for non-majors, the department also serves students throughout the university with offerings in speech communication.

The Department of Theatre employs 23 faculty and staff and enrolls 230 undergraduate and 40 to 50 full-time graduate students. Theatre VCU produces four mainstage productions and numerous graduate and undergraduate directing projects each year.

- Theatre, Master of Fine Arts (M.F.A.) with a concentration in:
  - Costume design (p. 313)
  - Pedagogy/literature (p. 315)
  - Pedagogy/performance (p. 317)
  - Stage design/technical theatre (p. 320)

**Theatre, Master of Fine Arts (M.F.A.) with a concentration in costume design**

**Program accreditation**

National Association of Schools of Theatre

**Program goal**

The M.F.A. in Theatre offers concentrations in stage design/technical theatre and costume design, which comprise the professional option, and in literature and performance, which make up the pedagogy option. Focus areas in pedagogy include movement, performance, and voice and speech.

**Student learning outcomes**

The M.F.A. degree prepares students to either enter the professional field of design or to teach at the college or university level. Students will demonstrate theoretical and practical knowledge in their areas of focus, as well as in the core courses in history, literature and theory; and in teaching performance or production. They will be evaluated on their
ability to teach undergraduates, a final thesis project and approval of a professional-quality design, presentation or publishable article.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements
- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must possess a bachelor’s degree (theatre preferred). Students must present a portfolio of design work (both project and realized designs) as part of their application to the program. Professional experience will be considered. The program provides preparation for early to midcareer professionals to enter the field of either professional design or teaching theatre at the college/university level.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to take 60 credit hours of graduate-level course work distributed among core courses, area of concentration and electives, including special topics courses. The program is usually completed within two to three years.

Costume design concentration
The costume design concentration’s degree requirements include 12 credit hours in core courses, 12 to 18 credit hours in (level-appropriate) design studio and three to six credit hours of thesis/thesis project. The balance of credit hours will be in approved electives, which may include additional practica, research and production, or professional internships. Students will take practical courses and assist faculty in teaching and design projects. They may be advised to take additional history or drawing courses to ensure that they possess the background required for advanced design projects. Their design skills and professional preparation will be evaluated by the faculty through portfolio presentations and participation at professional conferences.

Theatre, Master of Fine Arts (M.F.A.) with a concentration in stage design/technical theatre

Program accreditation
National Association of Schools of Theatre

Program goal
The M.F.A. in Theatre offers concentrations in stage design/technical theatre and costume design, which comprise the professional option, and in literature and performance, which make up the pedagogy option. Focus areas in pedagogy include movement, performance, and voice and speech.

Student learning outcomes
The M.F.A. degree prepares students to either enter the professional field of design or to teach at the college or university level. Students will demonstrate theoretical and practical knowledge in their areas of focus, as well as in the core courses in history, literature and theory, and in teaching performance or production. They will be evaluated on their ability to teach undergraduates, a final thesis project and approval of a professional-quality design, presentation or publishable article.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradient.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Special requirements
- See arts.vcu.edu/admissions/how-to-apply (http://arts.vcu.edu/admissions/how-to-apply) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must possess a bachelor’s degree (theatre preferred). Students must present a portfolio of design work (both project and realized designs) as part of their application to the program. Professional experience will be considered. The program provides preparation for early to midcareer professionals to enter the field of either professional design or teaching theatre at the college/university level.

Degree requirements
In addition to general Graduate School graduation requirements (p. 39), students are required to take 60 credit hours of graduate-level coursework distributed among core courses, area of concentration and electives, including special topics courses. The program is usually completed within two to three years.

Stage design/technical theatre concentration
The stage design/technical theatre concentration’s degree requirements include 12 credit hours in core courses, 12 to 18 credit hours in (level-appropriate) design studio and three to six credit hours of thesis/project. The balance of credit hours will be in approved electives, which may include additional practica, research and production, or professional internships. Students will take practical courses and assist faculty in teaching and design projects. They may be advised to take additional history or drawing courses to ensure that they possess the background required for advanced design projects. Their design skills and professional preparation will be evaluated by the faculty through portfolio presentations and participation at professional conferences.

Founded in 1998 as a collaboration between the Qatar Foundation for Education, Science and Community Development and Virginia Commonwealth University School of the Arts, the School of the Arts in Qatar offers the baccalaureate degrees in art history, fashion design, graphic design, interior design, and painting and printmaking. Its purpose is to provide special educational opportunities preparing graduates for leadership roles in the design professions. Courses emulate those offered on VCU’s Monroe Park Campus. Graduates are prepared for exciting careers in these growing fields.

VCU School of the Arts obtained the appropriate approvals from the VCU Board of Visitors and the State Council of Higher Education for Virginia and admitted the first class to what would become VCU School of the Arts in Qatar in fall 1998. The State Council of Higher Education for Virginia approved the request in April 2001 and forwarded its recommendation to the Governor and General Assembly. The 2002 General Assembly adopted legislation authorizing VCU to establish a campus in Qatar.

- Design, Master of Fine Arts (M.F.A.) with a concentration in design studies [VCUQatar Campus] (p. 322)

Design, Master of Fine Arts (M.F.A.) with a concentration in design studies [VCUQatar Campus]

Program accreditation
National Association of Schools of Art and Design

Mission statement
The M.F.A. in Design with a concentration in design studies defines and inhabits an area between design disciplines. The purpose of the program is to produce designers who are experts at negotiating and utilizing elements of many different fields to construct new tailored experiences.

Tomorrow’s designers must be able to understand their audiences, collaborators and patrons in original and authentic ways. Global cultures already experience design in a singular fashion. The practices at VCUQ combine graphics, interaction, engineering, systems, architecture, fashion and product design into a merged experience. Designers who are able to work outside their individual discipline will be at an advantage. The designers of the future will need to navigate between forms of practice, combining elements and skills to create new products, visuals, environments and interactions.

VCUQ is looking for creative, motivated, hardworking, self-directed individuals willing to engage with challenging topics. The program sets high demands on its students, requiring them to familiarize and grasp the myriad of variables involved in meaningful design, while simultaneously having the discipline and rigor to formulate their own assessment of what being a designer — in all its guises — entails today.

Students in this program should be able to question; be open to explore and experiment; stay true to ethical foundations; lead and be bold, while being open and flexible to adjust to shifting paradigms. The school strives to expose students to a variety of tools, materials and methods, while providing the theoretical background and research methodologies that will allow each student to develop their own unique ideas.

The M.F.A. in Design with a concentration in design studies celebrates the amorphous notion of what is called “empirical vagueness,” a term that encapsulates the simultaneously analytical, yet intuitive, fashion in which a design endeavor is developed. Students, alumni and faculty all play a role in exploring and fostering this as an essential, if inherently open-ended, calling.

Program goals
1. Creative leadership: Students will achieve mastery in creative leadership, with the skills and knowledge needed to achieve success as design professionals and entrepreneurs, educators, and researchers, and they will be able to creatively engage with the broad design community to bring added value to the regional economy, society and culture.
2. Integrated research: Students will integrate practice and theory to ensure the highest level of critical knowledge and to make meaningful contributions to pedagogy and teaching in the design disciplines. The program provides increased focus and visibility for individual and collaborative research activity that has an applied focus.
3. Interdisciplinary emphasis: Students will achieve high levels of creativity, literacy and knowledge across the design disciplines.
4. Community impact: Students will engage and raise social awareness.
5. Career development: The program will develop graduates with skills and knowledge to make meaningful contributions to pedagogy and teaching in the design disciplines. It also will provide opportunities that encourage students to engage and present their work in connection with the professional world.

Student learning outcomes
1. Students will demonstrate the ability to effectively communicate in speech about their research and studio activities.
2. Students will demonstrate the ability to effectively communicate in writing about their research and studio activities.
3. Students will demonstrate the ability to practice lifelong learning by dealing with new forms of design practice and other changes in the discipline.
4. Students will demonstrate the ability to integrate ideas from historical, social and cultural movements; from policies and theories; and from the dynamics of historical, social and cultural change.
5. Students will demonstrate the ability to apply appropriate technologies to projects in their field.
6. Students will demonstrate the ability to synthesize knowledge from different disciplines to solve design problems.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

<td>TOEFL: 570 (paper-based), 230 (computer-based) or 88 (Internet-based)</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must submit the following documentation and meet the following requirements:

1. A brief statement of intent that addresses:
   a. The reason for graduate study in design studies
   b. How previous studies and experiences have prepared the applicant for the M.F.A. program
   c. Career objectives and how the M.F.A. program relates to them

2. A digital portfolio of visual or written work that includes:
   a. Samples of relevant work that show creative thinking, idea development and visualization skills
   b. Works that support the ideas shared in the statement of intent
   c. No more than 20 individual works

3. A prepared presentation (for individuals selected for the interview)

4. A resume that highlights the applicant’s previous experiences and studies as they relate to graduate study at VCUQatar

5. Three letters of recommendation from former professors, teachers, mentors or supervisors familiar with the applicant’s academic and/or professional ability and aptitude toward graduate study

   **Note:** In the VCUQatar portfolio system, applicants are able to send an online form to each recommender. Alternatively, the applicant can deliver a printed recommendation letter to the Admissions Office. Download a recommendation template to use.

6. Official academic transcripts (secondary and postsecondary) for all university studies
   a. Submit officially certified copies of all academic diplomas, certificates, national and other major examination results.
   Transcripts in languages other than English must also include a certified English translation. Transcript(s) must be properly sealed and stamped by the issuing institution and must be delivered to VCUQatar Admissions Office either by hand or post.
   b. The address on the official online application Confirmation Page will list a Richmond, VA address for supporting materials, but all documents should be sent to the VCUQatar Admissions Office.

7. For applicants whose first language is a language other than English, an English language proficiency test with the following minimum requirements:
   a. TOEFL: 570 (paper-based), 230 (computer-based) or 88 (Internet-based)
   b. IELTS: 6.5

   **Note:** Test scores must be sent electronically by the testing center. The TOEFL code for admission testing to VCUQatar is 5570. There is no code for IELTS.

   The English language proficiency tests and standardized testing (TOEFL, SAT, ACT and IELTS) can be taken at the QF Test Center.

---

**Apply online** at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).
in Education City. Please visit the test center’s website to see the latest dates.

8. A legible copy of the applicant’s passports uploaded using the online application

9. A non-refundable application fee of $50 (US) or QAR183 for each M.F.A. application (This can be paid by credit card when submitting the online application form or at the VCUQatar’s Cashier Office.)

Important reminders
1. All admission supporting materials (excluding exam scores and transcripts) must be uploaded electronically using the VCUQatar online application process at https://ssb.vcu.edu.
2. Original, official TOEFL/IELTS score reports must be sent to VCUQatar via courier or delivered in person to the Admissions Office.
3. Applicants must ensure that letters of recommendation reach the office using either the VCUQatar portfolio application system or the downloadable template.
4. Only complete applications will be considered for assessment.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students must meet the following minimum requirements:
1. Total of 60 credit hours
2. Publication/documentation as specified
3. Qualification for degree candidacy
4. Thesis and final research project, exhibition and oral defense

Total Hours: 60

1 Approved electives (six credit hours) may be selected from a variety of 500- and 600-level courses offered at VCUQatar and VCU in Richmond. In addition, students are encouraged to enroll in 500- and 600-level elective courses offered by other accredited universities within Hamad bin Khalifa University in Qatar or any other internationally accredited university. Before taking a course outside of VCU, the student must submit a course syllabus to the M.F.A. in Design program director for approval.

Total graduate credit hours required (minimum) 60

Sample plan of study
Probationary course work may be required prior to gaining full admission to the program. The amount and type of undergraduate course work will be determined at the time of application, and no graduate credit hours will be awarded for this probationary course work. The decision to grant full admission will be based upon successful completion of the required course work.

Program website: qatar.vcu.edu/mfa (http://qatar.vcu.edu/mfa)
Virginia Commonwealth University's School of Business can be traced back to 1917 when a board of private citizens organized the Richmond School of Social Economy for Social Workers and Public Health Nurses. By 1937 the school was called the Richmond Professional Institute, was affiliated with The College of William and Mary, and had added business courses to the curriculum. The school began offering a graduate program in 1962. Since then, the program has continued to develop and mature to meet the needs of the future.

Vision
The vision of the VCU School of Business is to be nationally recognized as the leading technologically focused school of business in the commonwealth of Virginia.

Mission
The mission of the VCU School of Business is to prepare students for successful careers and lifelong learning by providing management education firmly grounded in technology, interdisciplinary teamwork and global perspectives. Essential to achieving this mission is striving to excel in teaching and scholarly research, and to build effective, value-based relationships with the external community.

Accreditation
The School of Business is accredited by the Association to Advance Collegiate Schools of Business, which accredits programs of professional education in business at the collegiate level. AACSB International accreditation represents the highest standard of achievement for business schools, worldwide. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. AACSB International accreditation is the hallmark of excellence in management education.

The School of Business is the first school of business in the nation to gain accreditation from the Accreditation Board for Engineering and Technology for its undergraduate program in information systems.

Financial aid, scholarships and awards

Scholarships and awards
In addition to university scholarships, business students may apply and compete for scholarships awarded through School of Business endowed scholarship funds or through the various School of Business academic programs. For detailed information on scholarships and awards, visit the School of Business website.

Cooperative education and internships
Business students are eligible for the university's cooperative education program. Qualified students placed with an employer will either alternate one semester of full-time study with one semester of full-time work or combine study with part-time work during the same semester. The School of Business also offers internships, allowing advanced students to pursue part-time work assignments with area employers.

Assistantships
The School of Business offers a limited number of graduate assistantships to full-time students for the academic year. For further information, write to the Graduate Studies in Business Office.

Graduate information

Graduate programs
The School of Business offers degree programs leading to the Master of Arts in Economics, Master of Accountancy, Master of Business Administration, Master of Business Administration/Master of Science in Information Systems, Master of Science in Business, Master of Science in Information Systems, Master of Taxation, and the Ph.D. in Business and Pharm.D./M.B.A.

Graduate policies

Enrollment in graduate courses
Students may not enroll in any graduate business courses (except SCMA 500) for credit without first being admitted formally to a graduate degree or graduate certificate program.

Exceptions may be granted by the director of graduate studies in business to students with superior academic records. No credit will be given for graduate classes taken prior to acceptance into a graduate degree program in business or economics unless such an exception has been granted. A form to request such an exception is available from the Graduate Studies in Business Office.

A “graduate transient” classification may be granted to a student in good standing in any graduate school accredited by the Association to Advance Collegiate Schools of Business (AACSB) who desires to enroll in the School of Business for any one semester or summer session. Students will be required to present certificates of graduate standing but will not have to submit the data normally required for an admission
decision. A form is available from the Graduate Studies in Business Office to facilitate transient enrollment.

Transfer credit
A maximum of six semester hours of acceptable graduate credit earned in a degree program at an AACSB-accredited institution may be transferred and applied toward the graduate degree. Acceptance of transfer credit is made at the discretion of the director of graduate studies in business.

All transfer work must be at the A or B grade level. Students must be in good standing both at VCU and at the institution from which the credits were earned. Additionally, students must have had full admission during the time these credits were earned at that college or university. Transfer credit shall not be older than seven years at the time the degree is awarded.

Credit to be earned at other institutions after acceptance in the graduate program must be approved in advance, and approval is granted at the discretion of the director of graduate studies in business. Such work is approved only under unusual circumstances such as job transfers or other extenuating circumstances.

Advising program
All students admitted to graduate programs are assigned advisers. Students are expected to work with their advisers to plan their graduate programs. Each student is required to complete an approved program form and file it with the Graduate Studies in Business Office no later than the end of the first semester in which the student is admitted. The curriculum plan described on the form must be approved by both the adviser and the director of graduate studies in business. Courses taken without approval are taken at the student’s own risk.

Students are responsible for knowing and fulfilling all general and specific requirements relating to the completion of their degree programs. Answers to specific questions may be obtained from the Graduate Studies in Business Office, (804) 828-4622.

Change in program or concentrations
Students who wish to change their graduate programs or areas of concentration within the school must make that request in writing to the director of graduate studies in business. The director will advise them of the necessary requirements and whether the change is possible. The student must be in good standing at the time of change.

Notification
The student should notify in writing both Records and Registration and Graduate Studies in Business, 301 W. Franklin St., P.O. Box 844000, Richmond, VA 23284-4000, of any address changes. Students who do not wish to register in any given semester must notify in writing the Graduate Studies in Business Office of their intent not to register and their plans for continuation in the program.

Student appeals
Appeals for exceptions to policies or academic standards may be made in writing to the Graduate Studies in Business Office, School of Business, Virginia Commonwealth University, 301 W. Franklin St., Richmond, VA 23284-4000.

Individual research projects
Various opportunities exist for students to work closely with faculty on individual research projects. Courses in the School of Business numbered 690, 693 and 697 are suitable for this purpose. No more than one research course may be taken as part of a master’s program.

Registration in all research courses requires approval of both the student’s adviser and the director of graduate studies in business. Forms for this purpose are available upon request from the Graduate Studies in Business Office. Students are expected to seek permission to register in research courses by the end of the semester or summer session preceding the semester or summer session for which registration is desired. The written research report is required to be filed at the Graduate Studies in Business Office no later than the last day of classes of the semester or summer session in which the course is taken.

General requirements for master’s degrees
In addition to the general academic regulations stated in the Graduate Studies at VCU chapter of this bulletin and the regulations listed earlier in this section, master’s students in the School of Business are subject to the following requirements:

1. A course for which a passing grade was received cannot be repeated without prior written permission of the director of graduate programs in business. An appeal to the School of Business Master’s Committee is required.
2. Students who satisfy all requirements except the 3.0 average may be allowed to take a maximum of six additional credit hours to raise the average. Students are required to appeal to the School of Business Master’s Committee for permission.
3. A foundation course may be waived by the director of graduate studies in business, based on satisfactory completion of equivalent undergraduate work prior to acceptance in the program. CLEP credit at the “B” or higher level may be accepted in lieu of foundation courses with permission. The waiver of courses is at the discretion of the School of Business.
4. A maximum of two one-year extensions may be granted by the director of graduate studies in business in the time allowed to complete a degree if satisfactory progress has been demonstrated on the part of the student requesting an extension. For extensions, write to the director of graduate programs in business.
5. Students are not permitted to take undergraduate courses equivalent to foundation courses once they are admitted to the graduate program without the written permission of the director of graduate studies in business.
6. Grades received for undergraduate courses are not included in the calculation of the cumulative graduate GPA.
7. All students admitted into a program must have earned a bachelor’s degree or its equivalent. To be accepted in the graduate program, in addition to other requirements, applicants must be in good standing at the college or university they previously attended.

Business Administration, Certificate in
(Post-baccalaureate graduate certificate)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)
Program goal
The post-baccalaureate graduate Certificate in Business Administration is designed for professionals with little or no prior business course work who seek an opportunity for advanced study in core business function areas. The certificate provides students the ability to advance their careers while receiving recognition for academic accomplishment in the form of a graduate certificate. By completing the curriculum for the certificate, students will have satisfied the foundation course requirements in the M.B.A. and other master’s programs in business.

Student learning outcomes
1. To apply communication skills in new and unfamiliar circumstances in a form that can be readily communicated to entry-level, midlevel and senior-level managers
2. To analyze the ethical dimensions of a business situation, to relate those dimensions to professional ethical standards, and to formulate and defend possible resolutions from the perspective of entry-level managers
3. To select, conceptualize and apply appropriate quantitative techniques or approaches in order to analyze business problems for the purpose of decision-making by entry-level managers
4. To critically evaluate and use accounting and/or other financial information for the purpose of decision-making by entry-level managers

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned a baccalaureate degree or its equivalent from an accredited college or university. This program is intended for students with an undergraduate degree in an area other than business management. Other admission requirements include a minimum undergraduate GPA of 2.7 in at least 60 hours of course work. Work experience is preferred.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses. In order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Completion of this graduate certificate program requires 21 credit hours beyond the bachelor’s degree. The director of graduate studies in the School of Business may waive up to 12 credit hours based upon equivalent course work completed in the past five years with a minimum grades of B presented. In the event that courses are waived, students must take additional course work to meet the minimum 21 credit-hour requirement. Successful completion of the graduate certificate program does not guarantee admission to a master’s-level program. Students interested in applying at a later date to either the M.B.A. or other master’s programs must do so through a separate application process.

Business, Doctor of Philosophy (Ph.D.)
with a concentration in accounting

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal

The Ph.D. in Business program is designed specifically for individuals intending to fill positions at institutions that require a balance of scholarly training, teaching and practical application of the appropriate field of study. With its small size, the program allows for extensive one-to-one interaction between students and faculty. Three concentrations are offered: accounting, information systems and management.

A basic tenet of the Ph.D. in Business program is that the classic trilogy of research, teaching and service typically invoked in university mission statements is synergistic. The program strives to develop graduates who share this perspective and aspire to well-rounded individual roles within universities, colleges and other learning organizations. For this reason, the program provides instruction in both research and teaching.

Instruction in basic and applied research is the cornerstone of the program. To fulfill the requirements for the degree, students must demonstrate successful completion of prerequisite and advanced courses, comprehensive examinations, and completion and defense of a dissertation. The advanced courses provide coverage in basic theories, methodologies and techniques needed to conduct research. The dissertation demonstrates the student’s competence in conducting independent research.

Enhancement of teaching skills is emphasized in the program. It provides students with mentoring and teaching experience. Formal instruction designed to augment student teaching skills is also required. Mentoring involves teaming a student with a faculty member with the goal of augmenting student self-awareness and self-confidence in the classroom. Classroom experience is required to ensure that the Ph.D. graduate enters the job market with certifiable teaching experience. The formal courses are designed to provide substantive instruction on teaching the adult learner.

A third aspect of the Ph.D. program is its emphasis on practical application in the area of study for students concentrating in accounting. In accounting emphasis is placed on projects based on real-world experience, and students are encouraged to develop papers around topics that address practical application of accounting concepts.

Student learning outcomes

1. Students will demonstrate the ability to apply general principles of scientific research and methodologies to critically review published research papers.
2. Students will demonstrate the ability to (a) design a research study, (b) select the appropriate methodology and (c) develop the study into a research proposal.
3. Students will demonstrate the ability to identify ethical dilemmas in the major area of study and know how to respond ethically to such issues.
4. Students will demonstrate an understanding of current knowledge in the major area of study.
5. Students will demonstrate the ability to effectively communicate in the major area of study.
6. Students will demonstrate the ability to develop and conduct research in the major area of study (i.e., complete an independent doctoral-level research project pertaining to the state of the art of the student’s major area).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graude.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Note: Accounting majors are admitted for the fall of odd-numbered years.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the doctoral program in business must submit an up-to-date resume.

Degree requirements
Upon admission to the Ph.D. program, faculty will evaluate students to determine if they have attained a basic competency level in general business disciplines. Students who have already completed a master’s degree in business will likely have met all foundation/prerequisite requirements.

Students who enter the Ph.D. in Business without an education in business will be expected to meet the foundation requirements for the intended concentration area of study as determined by their advisers.

In addition to the VCU Graduate School graduation requirements (p. 39), Ph.D. in Business students must complete a minimum of 53 graduate credit hours, including research tools, concentration and elective course work and a minimum of 12 credit hours of dissertation research. Each student must also take GRAD 602, complete a teaching portfolio and take a written comprehensive examination in the concentration area.

Students who enter the Ph.D. in Business without an education in business will be expected to meet the foundation requirements for the intended concentration area of study as determined by their advisers.

In addition to the VCU Graduate School graduation requirements (p. 39), Ph.D. in Business students must complete a minimum of 56 graduate credit hours, including research tools, concentration and elective course work and a minimum of 12 credit hours of dissertation research. Each student must also take GRAD 602, complete a teaching portfolio and take a written comprehensive examination in the concentration area.

Business, Master of Science (M.S.) with a concentration in decision analytics

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Note: Contact the Graduate Studies in Business office at gsib@vcu.edu or (804) 828-4622 for admission information about this program.

Program goal
The Master of Science in Business with a concentration in decision analytics provides students with knowledge of the statistical, mathematical and scientific skills and experience necessary to utilize advanced methods of data analysis for business decision-making.

Student learning outcomes
1. After examining a situation/problem, students will be able to develop appropriate hypotheses along with a method for testing them and be able to draw logical conclusions and make reasonable decisions based on available information.
2. Students will be able to apply quantitative procedures to obtain solutions for real-world problems.
3. Students will be able to appropriately address the target audience, use proper organization, create clear graphical displays and express ideas with clarity and grammatical correctness.
4. Students will be able to show a clear understanding of the ethical nature of the issue and recommend appropriate action.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).
Note: Contact the Graduate Studies in Business office at gsib@vcu.edu or (804) 828-4622 for admission information into this program.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business must submit an up-to-date resume.

Note: Contact the Graduate Studies in Business office at gsib@vcu.edu or (804) 828-4622 for admission information into this program.

Degree requirements

The concentration in decision analytics provides students with knowledge of quantitative skills and experience in analyzing problems and using data for decision-making in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

In addition to the VCU Graduate School graduation requirements (p. 39):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with minimum grade of C.

Business, Master of Science (M.S.) with a concentration in decision analytics – professional track

Program website: business.vcu.edu/graduate/dsba.html

Business, Master of Science (M.S.) with a concentration in decision analytics – professional track

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Note: Contact the Graduate Studies in Business office at gsib@vcu.edu or (804) 828-4622 for admission information about this program.

Program goal
The M.S. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

Student learning outcomes
1. Database structures and query: Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.
2. Quantitative skills: Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
3. Problem formulation: Students will have the knowledge, skills and practice to taking nonquantitative and perhaps ill-formed problems and issues and determining ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
4. Analytics applications: Students will experience various applications of analytics in real situations.
5. Technical communications: Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences. This includes informal discussions, formal presentations and written reports.
6. Teamwork: Students will develop skills in organizing, interacting and analyzing real problems as members of a team.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Note: Contact the Graduate Studies in Business office at gsib@vcu.edu or (804) 828-4622 for admission information into this program.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants should have three years of work experience in an application area. Students without the required work experience may take six credit hours of graduate-level courses in an application
area prior to acceptance into the program. Applicants are expected to have successfully completed an undergraduate or graduate course in statistics, and it is preferable that they have programming experience. Exceptions may be made at the discretion of the program director.

Note: Contact the Graduate Studies in Business office at gsib@vcu.edu or (804) 828-4622 for admission information into this program.

Degree requirements

The Master of Science in Business with a concentration in decision analytics provides students with a breadth of analytical and quantitative skills with experience in analyzing and communicating solutions to problems arising in an organization.

Leading organizations gain competitive advantage through the use of analysis of relevant data to guide and drive strategic and tactical decisions. Increased volumes of data and emphasis on data-driven decision-making create new challenges for decision-makers and provide new employment opportunities for people with deep analytical skills. There is a significant and growing demand for individuals with the ability to work collaboratively within an organization to mine relevant raw data and refine data into a recommended action of value to the enterprise. The decision analytics concentration equips students with the essential skills to be analytically functional in an organization.

Skills, abilities and knowledge necessary for success in analytics:

1. Work in a collaborative environment
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics concentration focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics
2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, giving students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues to analyze specific business problems
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics concentration focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics
2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, making the program attractive to midcareer professionals who want to gain or increase their analytics skills without interrupting their careers.

In addition to the VCU Graduate School graduation requirements (p. 39) and credit hour requirements, students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers of foundation courses only occur when a student has completed the required undergraduate equivalent courses with a minimum grade of C.

Business, Master of Science (M.S.) with a concentration in finance

Program accreditation
Program goal
The goal of the Master of Science in Business with a concentration in finance program is to train students to take on the quantitatively challenging and highly competitive business environment of the financial industry. Students learn skills to effectively analyze, develop and communicate solutions that take into consideration ethical implications.

Student learning outcomes
1. Graduates will be able to conceptualize and apply quantitative measurement methods, to analyze business problems and to propose solutions.
2. Graduates will be able to analyze a business problem in terms of both quantitative and qualitative aspects, including:
   a. a precise statement of the problem and how it relates to the goals of the firm
   b. a consideration of the ethical, policy and/or practicality limitations on any proposed solution strategy
   c. a statement and consideration of proposed solutions strategies and their implementation within the limitations
   d. a plan for implementation and monitoring of the proposed solution
3. Graduates will be able to analyze the ethical dimensions of a business situation and relate those dimensions to general ethical standards as well as to professional ethical standards.
4. Graduates will be able to express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master's degree students are available on the school's website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students). Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business must submit an up-to-date resume.

Degree requirements
The finance concentration prepares students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions, international finance, and derivatives.

In addition to the VCU Graduate School graduation requirements (p. 39):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent
knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

**Total Hours** 45

1. FIRE 693 is recommended for full-time students. The department will work closely with full-time students and prospective employers in order to achieve this goal. Students may not use both FIRE 693 and FIRE 697 toward degree requirements.

2. A student may substitute a free elective for one of the FIRE electives with the approval of the director of the concentration in finance.

3. Students may choose any free elective approved by the director of the M.S. program in finance. Students are encouraged to select accounting, economics, math, or statistics courses. These courses are pre-approved electives and therefore do not require further approval.

**Total graduate credit hours required (minimum) 45 (30 if prerequisite and all foundation courses are waived)**

**Business, Master of Science (M.S.) with a concentration in finance with Christ University in Bangalore, India**

**Program accreditation**

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

**Program goal**

The goal of the Master of Science in Business with a concentration in finance program is to train students to take on the quantitatively challenging and highly competitive business environment of the financial industry. Students learn skills to effectively analyze, develop and communicate solutions that take into consideration ethical implications.

**Student learning outcomes**

1. Graduates will be able to conceptualize and apply quantitative measurement methods, to analyze business problems and to propose solutions.

2. Graduates will be able to analyze a business problem in terms of both quantitative and qualitative aspects, including:
   a. a precise statement of the problem and how it relates to the goals of the firm.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

The VCU School of Business and Christ University in Bangalore, India, have partnered to provide students with an opportunity to study at two universities and earn two degrees. Students who have already been admitted to the Christ University Master of Business Administration program are invited to apply to the VCU Master of Science in Business with a concentration in finance. Students satisfy the master’s foundation course requirements during the first year while in the Christ University M.B.A. program and then complete the 10 required VCU courses needed for the M.S. in Business with a concentration in finance. These courses are taken primarily at the VCU Monroe Park Campus and are designed to be completed in one calendar year.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business must submit an up-to-date resume.

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

b. a consideration of the ethical, policy and/or practicality limitations on any proposed solution strategy
c. a statement and consideration of proposed solutions strategies and their implementation within the limitations
d. a plan for implementation and monitoring of the proposed solution

3. Graduates will be able to analyze the ethical dimensions of a business situation and relate those dimensions to general ethical standards as well as to professional ethical standards.
4. Graduates will be able to express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree requirements
The finance concentration prepares students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions. The finance concentration prepares students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions.

In addition to the VCU Graduate School graduation requirements (p. 39):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.
Curriculum requirements

Prerequisite and foundation course work are taken as part of the M.B.A. program at Christ University

Total Hours: 30

1 FIRE 693 is recommended for full-time students. The department will work closely with full-time students and prospective employers in order to achieve this goal. Students may not use both FIRE 693 and FIRE 697 toward degree requirements.

2 A student may substitute a free elective for one of the FIRE electives with the approval of the director of the concentration in finance.

3 Students may choose any free elective approved by the director of the M.S. program in finance. Students are encouraged to select accounting, economics, math, or statistics courses. These courses are preapproved electives and therefore do not require further approval.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business must submit an up-to-date resume.

Degree requirements

Students enrolled in the VCU-Fudan University joint degree program take all required courses at Fudan University in Shanghai and an encouraged practicum course at VCU at the end of the program. The program will be jointly taught by faculty from both VCU and Fudan. The program requires a minimum of 30 credit hours and provides the option to complete a practicum for a total of 33 credits maximum. Upon completion of the requirements, students will receive a Master of Science in Business with a concentration in global marketing management from VCU.

The global marketing management concentration provides the opportunity to focus on conceptual and experiential dimensions of marketing management. Students interested in the increasingly global nature of business will be well-suited for this unique graduate degree program. Core courses provide a framework for understanding the role of marketing in diverse organizations. Electives add knowledge in areas of growing importance to the profession and provide the flexibility for students to consider emerging topics in the global marketing environment. Client projects and global applications prepare students for marketing careers. Study abroad is available and encouraged.

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete up to seven classes (zero to 21 credit hours) of the following preparatory foundation course work taken at Fudan University.

Business, Master of Science (M.S.) with a concentration in real estate

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
1. To prepare students for successful careers in real estate and lifelong learning by providing education that is firmly grounded in technology, interdisciplinary teamwork and a global perspective
2. To ensure that students understand and can apply appropriate analytical methodologies and technology to the discipline of real estate
3. To prepare students for professional licensing, certification and/or professional designations

Student learning outcomes
1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze a real estate problem in terms of:
   a. Development of a precise statement of the problem and how it relates to the goals of the firm and/or client
   b. A consideration of the ethical, policy and/or practical limitations on any proposed solution strategy
   c. Statement and consideration of proposed solutions strategies and their implementation
   d. Formulation of a plan for implementation and monitoring of the proposed solution
4. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards.

**VCU Graduate Bulletin, VCU Graduate School**

**and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

**Admission requirements**

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business must submit an up-to-date resume.

**Degree requirements**

The real estate concentration satisfies the rigorous educational requirements of the Appraisal Institute’s MAI designation. Students can satisfy most of the Appraisal Institute’s education requirements by completing the concentration. This concentration provides comprehensive education in related disciplines so that graduates’ analytical skills and abilities to communicate with other professionals are greatly enhanced.

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete the following undergraduate prerequisite courses:

**Curriculum requirements**

**Prerequisite undergraduate courses**

undergraduate majors in the liberal arts, will find this program attractive.

Many working professionals, especially those with recognition for their academic accomplishment in the form of a graduate certificate, provide students the ability to advance their careers while receiving knowledge obtainable than receipt of a graduate degree. The certificate for advanced study in real estate and are more interested in the focused Land Development is designed for professionals who seek an opportunity.

Program goal

The post-baccalaureate graduate Certificate in Real Estate and Urban Land Development is designed for professionals who seek an opportunity for advanced study in real estate and are more interested in the focused knowledge obtainable than receipt of a graduate degree. The certificate provides students the ability to advance their careers while receiving recognition for their academic accomplishment in the form of a graduate certificate. Many working professionals, especially those with undergraduate majors in the liberal arts, will find this program attractive since they can concentrate their energies on a tightly focused curriculum without enrolling in a large number of prerequisite courses.

Student learning outcomes

1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate valuation in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards. Specifically, graduates will have an understanding of the Uniform Standards of Professional Appraisal Practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduatertiary.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Admission requirements
Degree: Semester(s) of entry: Deadline dates: Test requirements:
Certificate Fall Jul 1
Spring Nov 1
Summer Mar 1

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), in order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Eighteen credit hours beyond the bachelor’s degree are required for completion of this graduate certificate program. A maximum of one three-hour course taken at another AACSB-accredited institution may be transferred into this program. Students interested in later applying for admission into either the Master of Business Administration program with a concentration in real estate or the Master of Science in Business with a concentration in real estate valuation must do so through a separate application process. Admission is dependent on the applicant having achieved a 3.0 GPA in the graduate certificate and a satisfactory score on the GMAT examination.

M.B.A. programs
The School of Business allows students to complete requirements for an M.B.A. using two distinct modalities.

The curriculum for the evening M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations are available in business analytics, corporate finance, entrepreneurship and innovation, global business, health care management, human capital, information resources management, investments, real estate, and supply chain management. Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba).

The Executive M.B.A. curriculum takes advantage of students’ midlevel and executive professional experience by using it as a foundation on which to build a more sophisticated understanding of business. Core program components and differentiators include its integrated structure, experiential exercises and real-world application, which enable students to transition easily between the business world and their studies.

The program’s innovative, integrated modular structure enables students to approach issues by module topic, which accurately reflects the multidisciplinary demands of the real business world. The program is targeted to rising business executives, entrepreneurs, nonprofit managers and service professionals. It differs from other master’s programs at VCU because of its unique modular curriculum, which integrates components of communication, technology, service/quality, globalization and strategy.

The Executive M.B.A. program is a lockstep program that meets alternating weekends, Fridays from 12:30 to 6:15 p.m. and Saturdays from 8 a.m. to 2:15 p.m. The program can be completed in approximately 20 months.

Traditional program options
Business Administration, Master of (M.B.A.) (p. 350)

Business Administration, Master of (M.B.A.) with a concentration in:

- Business analytics (p. 352)
- Corporate finance (p. 354)
- Entrepreneurship and innovation (p. 356)
- Global business (p. 358)
- Health care management (p. 360)
- Human capital (p. 362)
- Information resources management (p. 364)
• Investments (p. 366)
• Real estate (p. 368)
• Supply chain management (p. 370)

Executive program options
Business Administration, Master of (M.B.A.) [Executive] (p. 379)
Business Administration, Master of (M.B.A.) [Executive] with a concentration in:
• Business analytics (p. 381)
• Corporate finance (p. 382)
• Entrepreneurship and innovation (p. 384)
• Global business (p. 385)
• Health care management (p. 386)
• Information resources management (p. 388)
• Investments (p. 389)
• Real estate (p. 391)
• Supply chain management (p. 392)

Combined/dual degree programs
Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [combined] (p. 372)
Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Fast Track Executive] [combined] (p. 374)
Business Administration, Master of (M.B.A.)/Sport Leadership, Master of Education (M.Ed.) [dual degree] (p. 376)
Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [combined] (p. 379)
Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Fast Track Executive] [combined] (p. 393)

Business Administration, Master of (M.B.A.)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes
1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree
candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students in the M.B.A. program must complete a minimum of 36 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

The program also includes four foundation courses. These courses may be waived for students who have taken the equivalent material at the undergraduate level within the past five years and received a minimum grade of B. After a student has been admitted, courses which have not been waived must be completed at the graduate level.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

**Curriculum requirements**

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations areas are noted in the related curricular options above.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba).

**Foundation courses**

0-12 credits; courses may be waived for demonstrated equivalence.

*ACCT 507* Fundamentals of Accounting  
*ECON 500* Concepts in Economics  
*FIRE 520* Financial Concepts of Management  
*SCMA 524* Statistical Fundamentals for Business Management

**Advanced courses**

Each student must begin the advanced portion of the program with the courses below in each of the first two semesters. Full-time students will take additional courses from the remainder of the advanced program. Semester one (to be taken at the same time)

*ECON 610* Managerial Economics 3  
*MGMT 641* Organizational Leadership and Project Team Management 3

Semester two  
*FIRE 623* Financial Management 3

**Core courses**

*ACCT 608* Managerial Accounting Concepts 3

**Total Hours**: 36

**Total graduate credit hours required (minimum) 36 (48 if all foundation courses are taken)**

**Electives and concentrations**

Project courses (693), topics courses (691) and guided studies (697) may be available for use toward concentration electives. These courses must be preapproved by the director of graduate studies.

Electives from the School of Business must be 600-level courses and students must satisfy the necessary prerequisites. Courses at the 500- or 600-level taken outside of the School of Business may be used with the permission of the director of graduate studies in business. Students must satisfy the necessary prerequisites for all electives.

---

**Business Administration, Master of (M.B.A.) with a concentration in business analytics**

**Program accreditation**
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

**Program goal**
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the
key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

**Student learning outcomes**

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

*Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)*

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

*Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)*

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

*Visit the Graduate study section for additional information on graduation requirements. (p. 39)*

**Other information**

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

*Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).*

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students in the M.B.A. program must complete a minimum of 36 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

The program also includes four foundation courses. These courses may be waived for students who have taken the equivalent material at the undergraduate level within the past five years and received a minimum grade of B. After a student has been admitted, courses which have not been waived must be completed at the graduate level.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate...
Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

**Curriculum requirements**

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may select an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations areas are noted in the related curricular options above.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit [vcu.edu/mba](http://www.vcu.edu/mba).

Total Hours 36

Total graduate credit hours required (minimum) 36 (48 if all foundation courses are taken)

Electives and concentrations
Project courses (693), topics courses (691) and guided studies (697) may be available for use toward concentration electives. These courses must be preapproved by the director of graduate studies.

Electives from the School of Business must be 600-level courses and students must satisfy the necessary prerequisites. Courses at the 500- or 600-level taken outside of the School of Business may be used with the permission of the director of graduate studies in business. Students must satisfy the necessary prerequisites for all electives.

Business Administration, Master of (M.B.A.) with a concentration in global business

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes
1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.

10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students in the M.B.A. program must complete a minimum of 36 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

The program also includes four foundation courses. These courses may be waived for students who have taken the equivalent material at the undergraduate level within the past five years and received a minimum grade of B. After a student has been admitted, courses which have not been waived must be completed at the graduate level.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations areas are noted in the related curricular options above.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba).

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin, are the governing policies.
and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://wwwgraduateadmissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students in the M.B.A. program must complete a minimum of 36 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

The program also includes four foundation courses. These courses may be waived for students who have taken the equivalent material at the undergraduate level within the past five years and received a minimum grade of B. After a student has been admitted, courses which have not been waived must be completed at the graduate level.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements
The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations areas are noted in the related curricular options above.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba).

Foundation courses
0-12 credits; courses may be waived for demonstrated equivalence.

Business Administration, Master of (M.B.A.) with a concentration in investments

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes
1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students in the M.B.A. program must complete a minimum of 36 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

The program also includes four foundation courses. These courses may be waived for students who have taken the equivalent material at the undergraduate level within the past five years and received a minimum grade of B. After a student has been admitted, courses which have not been waived must be completed at the graduate level.

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations areas are noted in the related curricular options above.

Most classes are held in the evening to accommodate working students’ schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (http://www.vcu.edu/mba).

Electives and concentrations

Electives from the School of Business must be 600-level courses and students must satisfy the necessary prerequisites. Courses at the 500- or 600-level taken outside of the School of Business may be used with the permission of the director of graduate studies in business. Students must satisfy the necessary prerequisites for all electives.

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [combined]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal

Master of Business Administration
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems
The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems to solve real-world problems. The department's curriculum is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems to solve real-world problems.

Student learning outcomes

For M.B.A. graduates
1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

For M.S. in Information Sciences graduates
1. Graduates must be able to develop and incorporate changes in the advantages to organizations.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

View the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s
faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

View the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

View the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the combined Master of Business Administration and Master of Science in Information Systems program must submit an up-to-date resume.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees.

Students in the combined degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A. (unless waived), all nine core courses required for the M.B.A. and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

**Curriculum requirements**

**Foundation courses (Not included in 54 hours required for combined degree program.)**

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the combined Master of Business Administration and Fast Track Executive Master of Science in Information Systems with a concentration in information technology management program must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees, thus requiring only 54 credit hours total of advanced course work (not counting foundation courses), rather than the 36 and 30 credit hours normally required for the two degrees.

To obtain both degrees, students will complete the entire 30 credit-hour information system master's program plus six M.B.A. core courses (ECON 610, FIRE 623, ACCT 608, MGMT 642, SCMA 675 and MKTG 671) plus two elective courses. Students must also complete any designated required courses. The course ISTM 671 will substitute for MGMT 641; ISTM 672 will substitute for INFO 661; and ISTM 677 will substitute for INFO 664. ISTM 673 will count toward one of the three required M.B.A. elective courses.

### Business Administration, Master of (M.B.A.)/Sport Leadership, Master of Education (M.Ed.) [dual degree]

#### Program accreditation

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

#### Program goal

The dual-degree M.B.A./M.Ed. in Sport Leadership program will prepare students for leadership positions by combining the business teaching of an M.B.A. program with sport industry-specific knowledge gained in the M.Ed. program. This degree combination recognizes the growing complexity of the sport industry and reinforces the Center for Sport Leadership's commitment to preparing students for the leadership challenges of the future. The dual degree offers students course work and knowledge they will need to be successful in a business setting combined with the application and networking skills required in today's sport industry.

The M.B.A. phase of the program will encompass a problem-based learning style, immersing students in collaborative projects and working situations that are commonplace in the business world. Students will learn business concepts in a real-life context and develop skills in communication, collaboration and teamwork that are essential for success, while developing their abilities to be creative, take initiative and accept personal responsibility for their actions.

The M.Ed. program will combine classroom and practical experience to prepare individuals for leadership positions in the sport industry. An interdisciplinary approach gives students the freedom to choose courses of personal interest and build a foundation of knowledge in their desired career fields.

#### Student learning outcomes

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to appropriately apply techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
7. Graduates should be able to evaluate marketing programs.
8. Students should be able to think critically and systematically about financial issues in businesses and to develop techniques to analyze these issues numerically.
9. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [combined]

The Pharm.D./M.B.A. program seeks to prepare pharmacists for careers that encompass pharmacy and business theories and principles. The program is designed to take advantage of efficiencies and electives in both the Pharm.D. and M.B.A. programs. Students in the combined program can earn both degrees and save as much as one year or more over the time required for completing the programs separately.

Students may be admitted into the program during the first year of enrollment in the Pharm.D. program. Applicants must be enrolled in the Pharm.D. program, have demonstrated a good academic record and have successfully completed the Graduate Management Admission Test.

To obtain both degrees, students will take all pharmacy courses unless waived, the seven business foundation courses, the nine M.B.A. core courses and three elective courses. The elective M.B.A. courses may be taken from pharmacy administration courses at the 600 level and a combination of a business seminar course and an elective advanced pharmacy practice experience in pharmacy management. The business foundation courses can be taken during the first two years in the pharmacy program with summer session(s). The M.B.A. core courses can be taken during the third and fourth years in the pharmacy program. The business electives can be taken during the fourth and fifth years in the combined program.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Application to Pharm.D./M.B.A. program
Students interested in pursuing the Pharm.D./M.B.A. program must first obtain admission to the Pharm.D. program. Admitted Pharm.D. students who wish to add the M.B.A. degree must then apply to the M.B.A. program. Upon admission to the M.B.A. program, a Pharm.D. student will be considered a dual-degree-seeking student. Students generally will register for a mix of School of Business courses and School of Pharmacy courses in the fourth, fifth and sixth semesters of the pharmacy program.

A student categorized as a Pharm.D. student will be charged tuition and fees from the School of Pharmacy and will be eligible to receive financial aid awards as a Pharm.D. student. Students categorized as M.B.A. students will be charged tuition and fee rates as graduate students and be eligible to receive financial aid awards as graduate students.

Business Administration, Master of (M.B.A.) [Executive]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today’s complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes
1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student’s adviser will review the student’s educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 39 graduate credit hours. The program consists of 13 courses that are divided into seven integrated modules.

Curriculum requirements

Module 1
- FMBA 601 Team Building and Leadership (course 1) 3
- FMBA 602 Team Building and Leadership (course 2) 3

Module 2
- FMBA 603 Business Foundations (course 1) 3

Module 3
