**Program accreditation**

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

**Program goal**

VCU’s School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today’s complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

**Student learning outcomes**

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://wwwgraduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)
Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student’s advisor will review the student’s educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to VCU Graduate School graduation requirements (p. 39), students seeking a concentration must complete a minimum of 48 graduate credit hours. The program consists of 13 courses that are divided into seven integrated modules plus the concentration electives.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

**Degree requirements**

The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student’s adviser will review the student’s educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to VCU Graduate School graduation requirements (p. 39), students seeking a concentration must complete a minimum of 48 graduate credit hours. The program consists of 13 courses that are divided into seven integrated modules plus the concentration electives.

**Business Administration, Master of (M.B.A.) [Executive] with a concentration in investments**

**Program accreditation**

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

**Program goal**

VCU’s School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today’s complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

**Student learning outcomes**

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the
University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Program goal

Executive M.B.A.

VCU’s School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today’s complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

M.S. in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS using state-of-the-art technologies within organizations.

Student learning outcomes

Executive M.B.A.

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

M.S. in Information Systems

Graduates should be able to:

1. Communicate and network effectively within their professions and organizations; serve the profession by applying this knowledge broadly; and maintain key technical expertise in order to sustain required levels of competitiveness
2. Understand information technology as it applies to business contexts and effectively apply this technology in specific circumstances
3. Develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations
4. Develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students (p. 30).

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements (p. 37).

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements (p. 39).

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission notes regarding deadline: Students in the Executive M.B.A. program have the option to continue with the Fast Track Executive M.S. in Information Systems with a concentration in information technology management program after having completed the requirements for the Executive M.B.A. to earn both degrees.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

Degree requirements

In addition to VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 60 hours of graduate course work. Students pursuing this dual degree option will have four courses in the Fast Track M.S. program waived. These four courses cover the information systems content of the Executive M.B.A. program.

Brandcenter

The VCU Brandcenter offers graduate study in advertising and branding, resulting in a Master of Science in Business. The branding concentration is divided into five focus areas and provides advanced preparation for creative and strategic advertising development.

The working environment at the Brandcenter is similar to an advertising agency. Teams of students work together to develop campaigns. After the first year, qualified students are offered internships where they experience ad agency life and foster industry relationships. In their second year, students have the opportunity to network through a mentoring program in which they are matched with agency professionals who offer advice and assistance.

Business, Master of Science (M.S.) with a concentration in branding/art direction

Program goals

The VCU Brandcenter offers graduate study in advertising and branding. The program provides advanced preparation for creative and strategic advertising development. The branding concentration of the Master of Science in Business with a concentration in branding is divided into five focus areas.

Business, Master of Science (M.S.) with a concentration in branding/art direction

Program goals

The VCU Brandcenter offers graduate study in advertising and branding. The program provides advanced preparation for creative and strategic advertising development. The branding concentration of the Master of Science in Business with a concentration in branding is divided into five focus areas.

The working environment at the Brandcenter is similar to an advertising agency. Teams of students work together to develop campaigns. After the first year, qualified students are offered internships where they experience ad agency life and foster industry relationships. In their
second year, students are given the opportunity to network through a mentoring program in which they are matched with agency professionals who offer advice and assistance.

Student learning outcomes

1. **Presentation skills:** Students will demonstrate the ability to effectively present/sell their ideas in a clear, concise and compelling manner.

2. **Collaboration:** Students will demonstrate their ability to work together in cross-functional teams/groups (i.e., copywriter, art director, strategist, brand manager, creative technologist) to develop viable business/marketing solutions.

3. **Creative and critical problem-solving:** Students will demonstrate the ability to research consumer culture (via secondary research, syndicated research and qualitative/quantitative research methods) and evaluate consumer media/technology usage habits to develop media-neutral business solutions.

4. **Culture:** Students will demonstrate an appreciation, interest in and openness for different cultures (both national and international) yielding more relevant, culturally savvy business solutions.

5. **Craft:** Students will demonstrate the ability to execute specific skills related to their individual subconcentration. For art direction these include solid layout/typography skills and strong conceptual thinking ability.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students (p. 30).

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements (p. 37).

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements (p. 39).

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements: Contact the VCU Brandcenter for specific admission requirements to the branding program and concentrations: Call (800) 311-3341 toll-free, or visit our website at brandcenter.vcu.edu (http://www.brandcenter.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the branding/art direction concentration must have a working knowledge of Photoshop and InDesign and knowledge of layout, design and typography. Applicants must have at least one year of working experience or have taken an undergraduate course or a tutorial in these skills.

Degree requirements

The M.S. in Business with a concentration in branding requires 42 graduate credit hours beyond the baccalaureate degree. Students devote two years of full-time study to complete the degree requirements. In addition to the VCU Graduate School graduation requirements (p. 39), all students in the Brandcenter must complete a core curriculum as well as courses required for a specific subconcentration and must present a final major project, in portfolio form, before a committee review panel.

Special requirements: Contact the VCU Brandcenter for specific admission requirements to the branding program and concentrations: Call (800) 311-3341 toll-free, or visit our website at brandcenter.vcu.edu (http://www.brandcenter.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have a working knowledge of the Adobe Creative Suite and light HTML/CSS knowledge and have a specialty such as video production, animation, 3-D imaging, design, writing, etc.

Degree requirements
The M.S. in Business with a concentration in branding requires 42 graduate credit hours beyond the baccalaureate degree. Students devote two years of full-time study to complete the degree requirements. In addition to the VCU Graduate School graduation requirements (p. 39), all students in the Brandcenter must complete a core curriculum as well as courses required for a specific subconcentration and must present a final major project, in portfolio form, before a committee review panel.

Carolyn S. Norman, Ph.D.
Chair

The future development of the accounting profession depends upon the quality of the educational foundation on which it rests. The Department of Accounting is committed to the support of professional accounting through the delivery of educational experiences directed toward practice.
and through research that addresses the important policy issues of the day.

The mission of the department is to prepare students for careers in accounting, to interpret and expand accounting knowledge, and to render service to the profession and communities. The department does so by:

1. Providing a learning environment in which students are encouraged to interact with others in identifying and solving accounting and business problems.
2. Investigating, developing and sharing knowledge, which has the potential for significant influence on accounting, business and education.
3. Interacting with the accounting profession, the business community and the community at large.

• Accountancy, Master of (M.Acc) (p. 403)

Accountancy, Master of (M.Acc.)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
The purpose of the Master of Accountancy program is to provide the skills and knowledge necessary to be future leaders in the professional business community and the public sector for students who wish to specialize in the areas of accounting/information systems, auditing, financial reporting and accounting/other fields of business.

Student learning outcomes
1. Students are expected to demonstrate current knowledge of financial accounting standards, tax laws and regulations, and other professional guidance that affects the profession. In addition, students should be aware of proposed changes to tax laws and regulations, financial accounting standards, and other professional guidance.
2. Students are expected to demonstrate the ability to effectively communicate accounting information in writing and in oral presentations.
3. Students are expected to demonstrate the ability to effectively analyze comprehensive cases, comprehensive problems and other projects that require in-depth accounting knowledge. The analysis should include a brief statement of the issue, facts bearing on the issue, appropriate professional guidance and a proposed solution to the issue.
4. Students are expected to demonstrate the ability to apply accounting knowledge in a variety of contexts and circumstances.
5. Students must be able to demonstrate their ability to apply ethical principles in a variety of accounting contexts and circumstances.

VCU Graduate Bulletin, VCU Graduate School
and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graoc ситуации, academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Master of Accountancy degree program who do not hold an undergraduate degree in accounting or business may be required to take up to 24 credit hours of business prerequisite courses and 27 credit hours of accounting prerequisite courses. These prerequisite courses may be waived for students who have successfully completed an equivalent course.

**Undergraduate prerequisites**

**Non-accounting business course prerequisites**

Students must complete at least eight non-accounting business courses from the following list. (Equivalent 500-level courses may be substituted.) These courses may be waived if a student has completed the equivalent course in an undergraduate program.

The Department of Economics provides instruction for degree programs at the baccalaureate, master’s and doctoral level. The faculty works to develop in students the ability to use economic reasoning to understand and analyze business and economic phenomena and policies—the skills needed for careers in a rapidly changing world. To enhance the educational process and to broaden the frontiers of knowledge, faculty members conduct basic and applied research and provide academic and professional service to the university and professional communities.

- Economics, Master of Arts (M.A.) (p. 405)
- Economics, Master of Arts (M.A.) with a concentration in:
  - Financial economics (p. 406)
  - Health economics (p. 407)
  - Statistics (p. 408)
Economics, Master of Arts (M.A.)

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
The Master of Arts in Economics is designed to enhance the student’s abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well-qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

Student learning outcomes
1. Students will use optimization techniques to develop demand and cost conditions from specifications of underlying utility and technology. Specifically, given a simple functional form for utility, students will be able to solve for optimal individual demand and, given a production technology, students will be able to solve for the firm’s cost curves.
2. Students will understand and know how to apply quantitative macroeconomic models.
3. Students will critically evaluate the validity of conclusions drawn from econometric models by others who have access to the primary data. In the AACSB classifications, this is a management-specific goal.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Total Hours 30

Program website: business.vcu.edu/graduate-studies/master-of-arts-in-economics

Economics, Master of Arts (M.A.) with a concentration in health economics

Program accreditation

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal

Graduates of the Master of Arts in Economics program will have the knowledge and experience to qualify for a wide and rapidly expanding range of analyst positions in the private or public sectors. Graduates will be particularly well-suited for positions requiring modeling skills and substantial experience in the analysis and interpretation of firm-level, industry or macroeconomic data. A unique feature of the program is a three-course core sequence in applied econometrics. These courses emphasize the application of modeling techniques and data analysis though the introduction of cases and projects. Through these courses, students acquire a working knowledge of up-to-date powerful statistical software and broad experience in working with a variety of real data sets. The concentration in health economics will allow students with particular interest in the health sector and in health policy issues to specialize in health economics, a topic currently quite relevant.

Graduates of the M.A. in Economics with a concentration in health economics, in addition to holding highly competitive terminal credentials as analysts, will find the program to be an outstanding bridge to doctoral work in programs such as the Ph.D. in Healthcare Policy and Research offered in the School of Medicine at VCU.

Student learning outcomes

1. Students will be able to convey ideas about macroeconomic analysis effectively in oral and written communications.
2. Students will use optimization techniques to develop demand and cost conditions from specifications of underlying utility and technology. Specifically, given a simple functional form for utility, students will be able to solve for optimal individual demand and, given a production technology, students will be able to solve for the firm’s cost curves.
3. Students will understand and know how to apply quantitative macroeconomic models.
4. Students will critically evaluate the validity of conclusions drawn from econometric models by others who have access to the primary data.
It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Economics, Master of Arts (M.A.) with a concentration in statistics

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)
Program goal

The Master of Arts in Economics is designed to enhance the student’s abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well-qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

Student learning outcomes

1. Students will use optimization techniques to develop demand and cost conditions from specifications of underlying utility and technology. Specifically, given a simple functional form for utility, students will be able to solve for optimal individual demand and, given a production technology, students will be able to solve for the firm’s cost curves.
2. Students will understand and know how to apply quantitative macroeconomic models.
3. Students will critically evaluate the validity of conclusions drawn from econometric models by others who have access to the primary data. In the AACS classification, this is a management-specific goal.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Master of Arts in Economics degree program with a concentration in statistics must complete one course in each of the following subject areas as a prerequisite for the program: intermediate macroeconomic theory, intermediate microeconomic theory, introductory econometrics and multivariate calculus. The student’s adviser will review the student’s economics and mathematical background to determine the extent to which the student has satisfied prerequisites. Required prerequisites may be taken after admission.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), the M.A. in Economics degree with a concentration in statistics requires a minimum of 30 credit hours of 500- and 600-level courses work. The 30 hours must include eight core courses, one restricted elective and on additional elective.

Department of Finance, Insurance and Real Estate

Daniel P. Salandro, Ph.D.
Associate professor and chair

The Department of Finance, Insurance and Real Estate delivers knowledge to students in all programs offered by the School of Business and contributes to the expansion of knowledge by engaging in scholarly activity. The department provides core courses as well as majors, minors and concentrations. In addition, the department develops and delivers courses in continuing professional education for practitioners seeking to upgrade their skills and/or attempting to achieve professional certification.

Department of Information Systems

Lemuria Carter, Ph.D.
Associate professor and chair

business.vcu.edu/departments-and-centers/information-systems (http://business.vcu.edu/departments-and-centers/information-systems)

The Department of Information Systems provides an innovative, high quality curriculum that is recognized nationally and internationally and maintains the ability to rapidly respond to the dynamic, changing needs of the academic discipline, industry and community.

The department offers degree programs at both the undergraduate and graduate level, as well as continuing education programs that support alumni and the community. Additionally, courses in information systems are offered to meet the needs of students in other curricula offered by the university as well as those who are seeking to enhance their knowledge of information systems.

Our faculty offers expertise in information technology and has wide-ranging research and teaching interests. As part of the department, the Information Systems Research Institute provides opportunities for sponsored research, innovative teaching initiatives and faculty development.

Computer and Information Systems Security, Master of Science (M.S.)

Program mission
The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

Program goal
Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU’s program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student’s ability to see the larger organizational, social, political, ethical, and economic aspects of information security.

Student learning outcomes
Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing, and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the School of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects
of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component, an elective component and a practice component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science. The practice component, taken near the end of the student’s course work, ensures an opportunity for the student to apply principles to practice.

**Curriculum requirements**

Prerequisites are determined by the faculty adviser at the time of admission.

**Core component**

**Information Systems, Master of Science (M.S.)**

**Program accreditation**

Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

**Program goal**

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

**Student learning outcomes**

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Admission requirements

Degree: Semester(s) of Deadline dates: Test requirements:
M.S. Fall Jul 1 GMAT or GRE
Spring Nov 1
Summer Mar 1

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master’s program courses. Students without an accredited bachelor’s degree or post-baccalaureate certificate in fields such as computer science or information systems will likely need to complete several undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

In addition to the VCU Graduate School graduation requirements (p. 39), students who do not have a business degree must complete a minimum of two 500-level foundation courses (6 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student’s background, career interests and the chosen area of specialization.

Students applying to the program should consult with the master’s program adviser to determine the foundation courses required for a particular area.

Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance with Christ University in Bangalore, India

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

The information risk, security and assurance concentration within the degree is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the risk, security and assurance community and as strategic partners with the enterprise in which they work. They will stay attuned to and anticipate changes in the risk, security and assurance environment and ensure that security solutions create a sound, competitive and cost-effective advantage for the enterprise.

Student learning outcomes
1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduates.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

The VCU School of Business and Christ University in Bangalore, India have partnered to provide students with an opportunity to study at two
universities and earn two degrees. Students who have already been admitted to the Christ University Master of Business Administration program are invited to apply to the VCU Master of Science in Information Systems with a concentration in information risk, security and assurance.

Students satisfy the master’s foundation course requirements during the first year while in the Christ University M.B.A. program and then complete the 10 required VCU courses need for the Master of Science in Information Systems with a concentration in information risk, security and assurance. These courses are taken primarily at the VCU Monroe Park Campus and are designed to be completed in one calendar year.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the master’s program in business administration must submit an up-to-date resume.

**Degree requirements**

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master’s program courses. The required undergraduate courses are:

A course in calculus

In addition to the VCU Graduate School graduation requirements (p. 39), students who do not have a business degree must complete a minimum of four 500-level foundation courses (12 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student’s background, career interests and the chosen area of specialization. Students applying to the program should consult with the master’s program adviser to determine the foundation courses required for a particular area.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 30 graduate credit hours.

The Fast Track Executive Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles. Participants gain a wide range of new skills and knowledge by combining course work with their day-to-day professional activities. The program is targeted to rising business executives, entrepreneurs and information systems professionals. The program differs from the regular M.S. in Information Systems program in that it is offered in a weekend format, with students meeting for classes on alternate weekends throughout the calendar year. The lockstep program consists of 10 required courses.

Rachel Kaeser

**Program coordinator**
For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

Program website: business.vcu.edu/graduate/items.html (http://business.vcu.edu/graduate/items.html)

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [combined]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal

Master of Business Administration

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

Student learning outcomes

For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

For M.S. in Information Sciences graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

For M.S. in Information Sciences graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://wwwgraduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.
View the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

View the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

View the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:  
M.S. and M.B.A. Fall Jul 1 GMAT or GRE  
Spring Nov 1  

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the combined Master of Business Administration and Master of Science in Information Systems program must submit an up-to-date resume.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees.

Students in the combined degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A. (unless waived), all nine core courses required for the M.B.A. and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Fast Track Executive] [combined]

Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

Program goal
Master of Business Administration
The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems
The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department’s curriculum is focused on the rapidly emerging area known as enterprise information systems. Students may choose a curriculum with no concentration or a concentration in information risk, security and assurance. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS systems using state-of-the-art technologies within organizations.

Student learning outcomes
For M.B.A. graduates
1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.

10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm’s performance.

For M.S. in Information Sciences graduates

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.

2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.

3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.

4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students (p. 30).

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements (p. 37).

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements (p. 39).

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the combined Master of Business Administration and Fast Track Executive Master of Science in Information Systems with a concentration in information technology management program must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees, thus requiring only 54 credit hours total of advanced course work (not counting foundation courses), rather than the 36 and 30 credit hours normally required for the two degrees.

To obtain both degrees, students will complete the entire 30 credit-hour information system master's program plus six M.B.A. core courses (ECON 610, FIRE 623, ACCT 608, MGMT 642, SCMA 675 and MKTG 671) plus two elective courses. Students must also complete any designated required courses. The course ISTM 671 will substitute for MGMT 641; ISTM 672 will substitute for INFO 661; and ISTM 677 will substitute for INFO 664. ISTM 673 will count toward one of the three required M.B.A. elective courses.

**Total Hours:** 30

### Total graduate credit hours required (minimum) 54

Students in the combined program who wish to have an M.B.A. concentration other than information resources management would need to complete an additional three courses for the concentration area.

---

**Program website:** business.vcu.edu/graduate-studies/combined-mbams-in-information-systems (http://business.vcu.edu/graduate-studies/combined-mbams-in-information-systems)

### Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Fast Track Executive] [combined]

#### Program accreditation
Association to Advance Collegiate Schools of Business (http://www.aacsb.edu)

#### Program goal

**Executive M.B.A.**

VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

### M.S. in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing EIS using state-of-the-art technologies within organizations.

#### Student learning outcomes

**Executive M.B.A.**

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

**M.S. in Information Systems**

Graduates should be able to:

---

**Graduate program director**

Colleen A. Davis

Senior director, master's programs

Email: androvichcm@vcu.edu

Phone: (804) 828-4622

**Additional contact**

William J. Miller

Executive director, business development

Email: wjmille1@vcu.edu
1. Communicate and network effectively within their professions and organizations; serve the profession by applying this knowledge broadly; and maintain key technical expertise in order to sustain required levels of competitiveness
2. Understand information technology as it applies to business contexts and effectively apply this technology in specific circumstances
3. Develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations
4. Develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements (p. 39).

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission notes regarding deadline: Students in the Executive M.B.A. program have the option to continue with the Fast Track Executive M.S. in Information Systems with a concentration in information technology management program after having completed the requirements for the Executive M.B.A. to earn both degrees.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

Degree requirements

In addition to VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 60 hours of graduate coursework. Students pursuing this dual degree option will have four courses in the Fast Track M.S. program waived. These four courses cover the information systems content of the Executive M.B.A. program.

Curriculum requirements

Module 1

| FMBA 601 | Team Building and Leadership (course 1) | 3 |
| FMBA 602 | Team Building and Leadership (course 2) | 3 |

Module 2

| FMBA 603 | Business Foundations (course 1) | 3 |

Module 3

| FMBA 604 | Analysis and Decisions (course 1) | 3 |
| FMBA 605 | Analysis and Decisions (course 2) | 3 |
| FMBA 606 | Analysis and Decisions (course 3) | 3 |

Module 4

| FMBA 607 | Global Challenges (course 1) | 3 |
in the combined degree program will follow the same schedule as regular
M.H.A. students, including the two lockstep years.

Students will take 51 credit hours of health administration courses
required for the M.H.A. and nine additional courses (27 credit hours)
in the M.S. in Information Systems program, including INFO 610,
INFO 620 and INFO 630. Students whose undergraduate degrees
are not in information systems may also be required to take additional
undergraduate prerequisite courses before taking the graduate
information systems courses, as determined by the program adviser.
The HADM 612 course taken for the M.H.A. will substitute for INFO
640, normally required for the M.S. in Information Systems degree,
and one of the additional information systems courses will also count
toward the elective courses in the M.H.A. program. A three-credit-
hour, 10-week internship is required and must have substantial global,
entrepreneurial and/or experiential components related to both degrees.
The six information systems courses to be taken in addition to INFO
610, INFO 620 and INFO 630, must be approved by the program adviser
and would normally be selected to satisfy one of the M.S. in Information
Systems concentrations.

Department of Management

S. Douglas Pugh, Ph.D.
Professor and chair

The Department of Management offers a variety of baccalaureate-, masters- and doctoral-level degrees and certificate programs. Courses offered include organizational behavior, human resource management, entrepreneurship, international management, strategic management,
operations management, organizational communication, and decision sciences.

**Department of Marketing**

Michael W. Little, Ph.D.
Professor and chair

business.vcu.edu/departments-and-centers/marketing (http://business.vcu.edu/departments-and-centers/marketing)

The Department of Marketing provides students with a comprehensive introduction to the many topics and concepts that make up today's marketing professions. Additionally, students have the opportunity to participate in high quality learning experiences that broaden traditional ideas of the classroom in projects, exercises and internship experiences that involve a variety of business organizations as well as state and local government agencies.

**Department of Supply Chain Management and Analytics**

Elliott Minor, Ph.D.
Associate professor and chair

Faculty in the Department of Supply Chain Management and Analytics are passionate about providing impeccable academic instruction and research that advances knowledge related to production, product development and the information systems needed to direct these endeavors. The department’s undergraduate and graduate programs prepare students to immediately take important positions related to supply chain management and business analytics. The department remains involved with the corporate community through a partnership with the Commonwealth Center for Advanced Logistics Systems.

Students interested in production, distribution, and the engineering and finances supporting large-scale operations will be prepared by VCU’s programs in supply chain management and analytics to enter an exciting field with plentiful job opportunities. For additional information contact the department by emailing scma@vcu.edu.

- Supply Chain Management, Master of (M.S.C.M.) (p. 427)

**Supply Chain Management, Master of (M.S.C.M.)**

**Program accreditation**
Association to Advance Collegiate Schools of Business

**Program goal**

The Master of Supply Chain Management program will educate students on the theory, skills and practices necessary to manage the daily challenges in managing global supply chains. Students will be introduced to supply management and logistics systems, international logistics, transportation management, enterprise resource planning and innovation processes. In addition, students will learn how to identify problems, gather information, analyze data, interpret solutions, establish contingencies and effectively present results.

Although developed in collaboration with the U.S. Army, the intent of the program is to provide an opportunity for both military officers and civilians to earn a master’s degree in supply chain management.

**Student learning outcomes**

Students in the Master of Supply Chain Management program will be able to:

1. Demonstrate how to manage the complexities present in global supply chains
2. Demonstrate the ability to add value in global supply chains
3. Demonstrate how to design, plan and control organizational processes using information technology
4. Demonstrate how to manage data and uncertainty in supply chains
5. Apply cross-disciplinary skills to foster innovative solutions to supply chain challenges and opportunities
6. Develop research and communications skills

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)
Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:
M.S.C.M. Fall Jul 1 GRE or GMAT
Spring Nov 1

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

- Curriculum vitae and personal statement
- Personal interview if requested by the graduate program director

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 30 credit hours. These credit hours consist of seven core courses (21 credit hours) and three elective courses (nine credit hours).

SCHOOL OF DENTISTRY

The School of Dentistry was created in 1893 when the University College of Medicine opened with a dental department as one of its original divisions. The Medical College of Virginia inaugurated a dental education program in 1897, and in 1913 the two schools were merged to form the MCV School of Dentistry.

In 1968, by an act of the Virginia General Assembly, MCV was merged with Richmond Professional Institute to form Virginia Commonwealth University. The School of Dentistry is located on VCU’s MCV Campus.

The facilities of the School of Dentistry are housed in the Wood Memorial, Lyons and Perkinson buildings and contain clinical facilities, research facilities, classrooms, student laboratories, departmental offices and a computer-learning laboratory.

The school provides opportunities for selected, qualified individuals to study dentistry under the most favorable conditions and in accordance with the standards established by the Commission on Dental Accreditation of the American Dental Association.

Graduates of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics are awarded the Master of Science in Dentistry degree.

Mission

The VCU School of Dentistry is a public, urban, research dental school, supported by Virginia to serve the people of the commonwealth and the nation. The school’s mission is to provide educational programs that prepare graduates qualified to provide dental care services; generate new knowledge through research and other scholarly activity; and provide quality oral health care to the public and service to the community.

Philips Institute for Oral Health Research

Iain M. Morgan, Ph.D.
Director

The mission of the Philips Institute for Oral Health Research is to serve the university and the commonwealth of Virginia as a center of educational and research excellence focused on infectious, neoplastic and genetic diseases of the oral cavity, head and neck.

Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics

Program accreditation
Commission of Dental Accreditation of the American Dental Association

Program goal

The advanced dental specialty education program in endodontics offers the resident a comprehensive 24-month course of study in clinical and didactic endodontics. The program is designed to educate qualified individuals to pursue careers as practicing clinical dental specialists in endodontics. The program meets the educational requirements for limitation of practice to the specialty of endodontics and prepares the student for examination by the American Board of Endodontics.

Students completing the program earn a specialty Certificate in Endodontics and a Master of Science in Dentistry degree. The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Student learning outcomes

Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master’s thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based endodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
   a. Diagnosis, treatment planning and prognosis of pulpal and periradicular disease
   b. Provision of nonsurgical endodontics, retreatment and surgical endodontics
   c. Outcome assessment
   d. Diagnostic imaging technologies
   e. Management of medically compromised patients
   f. Emergency management of endodontic conditions
   g. Management of orofacial pain and dental anxiety
   h. Use of magnification technologies
   i. Use of emerging techniques of endodontic treatment
   j. Management of traumatic dental injuries
5. Be eligible to sit for the Diplomate Boards of the American Board of Endodontists

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

For a current copy of the program handbook, contact the VCU School of Dentistry's Department of Endodontics.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Special requirements**

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a minimum score of 100.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Graduation from an accredited university or its equivalent, with a Doctor of Dental Surgery or Doctor of Medicine in Dentistry or the international equivalent
2. For international students, an external credential evaluation of all international transcripts to complete the application (WES, ECE, and AACRAO are some of the recommended NACES-approved providers.)
3. One “dean’s letter” from the academic institution from which the individual received the dental degree that gives class rank, GPA and overall academic recommendation
4. Two letters of recommendation from individuals who are in a position to judge the applicant’s ability to engage in graduate study and pursue advanced dental training
5. A written letter of professional intent or biographical statement that reflects the candidate’s desire to pursue the specialty and the intent upon receipt of the degree and certificate
6. A resume or curriculum vitae
7. An administrative application fee made payable to the Department of Endodontics, School of Dentistry (See website for details. This fee is in addition to the application fee that has to be paid with the submission of the graduate application. One year of an AEGD, GPR or the private practice equivalent is preferred but not required.)

Admission to the advanced dental specialty program in endodontics is through American Dental Education Association Postdoctoral Application.
Support Service. PASS historically opens to receive applications mid-May of the year prior to the year for which the candidate wishes to enroll and is open until Aug. 15. Please refer to the VCU School of Dentistry website, Department of Endodontics postgraduate information or ADEA PASS for specific yearly dates of the application period.

Candidates are required to interview in person. Invitations to interview followed by an invitation to accept a position in the residency are extended by the program director in the fall at the close of the application period. For example, the candidate will submit an application through ADEA PASS during the application period (May through August). An invitation will be extended to interview with the advanced dental specialty program in endodontics admission committee in August or September. The candidate will be informed of selection or nonselection by Nov. 15. The resident will start the clinical program the following June and the academic program the following September.

Admission to the Master of Science in Dentistry degree program is made after the candidate has accepted a residency position in the advanced dental specialty program in endodontics.

### Degree requirements

All course work must be completed within the 24-month timeframe for the program. Any extension of the 24-months is at the discretion of the program director. Extensions are approved only in extenuating circumstances.

In addition to general VCU Graduate School graduation requirements (p. 39), a cumulative GPA of 3.0 must be maintained. Residents must receive a minimum grade of B for all required courses. A student with a grade of C in a required course may be required to repeat the course. A second grade of C in a required course may result in dismissal from the program. At the discretion of the program director, a resident retaking a required course may still be eligible to take the comprehensive written and oral examinations and to start the thesis research process prior to successful completion of the repeat of the course.

In the last semester of the second year the resident will take a written and oral comprehensive examination designed to evaluate the resident’s ability to integrate the didactic and clinical course material, demonstrate critical-thinking skills and demonstrate command of evidence-based endodontics. Both the written and oral examinations must be successfully completed to receive the specialty Certificate in Endodontics.

The Certificate of Endodontics, conferred by the School of Dentistry, is only conferred upon completion and awarding of the Master of Science in Dentistry.

The residents must formulate, complete and defend a research project. The resident will prepare a manuscript in a thesis format or in the publishable format of a refereed journal. The project must be completed, defended and presented in a research forum in order for the resident to qualify for receipt of the Master of Science in Dentistry.

Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics

Program accreditation
Commission on Dental Accreditation of the American Dental Association

Program goal
The Department of Orthodontics offers a 24-month advanced education Master of Science in Dentistry program. The program teaches the latest in clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. Our goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically.

The program's clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of our program with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is required. All senior residents present their research at the Virginia Association of Orthodontists' meeting. The program makes students educationally qualified to take the written portion of the American Board of Orthodontics (http://www.americanboardortho.com) examination in the senior year. Residents are required to pass the written portion of the examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists' meeting.

Students completing the program earn a specialty Certificate in Orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Student learning outcomes
Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based orthodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:

<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.D.</td>
<td>Fall (Jul 1 start date)</td>
<td>Sep 2</td>
<td>NBDE, GRE, TOEFL or IELTS if international</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Agreement to participate in the Postdoctoral Dental Matching Program
2. Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
3. Graduation or anticipated graduation from dental school
4. Eligibility to obtain a Virginia temporary resident’s license from the Virginia Board of Dentistry
5. Completion of National Boards Part I and anticipated completion of Part II
6. Completion of GRE
7. Completion of TOEFL or IELTS (for students whose native language is not English)
8. Application to the orthodontic graduate program through the ADEA PASS program. The PASS application should include the following items:
   a. Online application form
   b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in orthodontics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.
   c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.
   d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you have attended before dental school.
   e. Dental school transcripts
   f. Institution Evaluation Form (completed by the dean of your dental school)
   g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
   h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director’s letter can count as one). A letter from the chair of orthodontics is not required, but may be included if the chair has personal knowledge of your
skills. Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU’s program.

9. The following supplementary items are to be submitted directly to the VCU Department of Orthodontics:
   a. Application cover page
   b. Application fee of $50 (U.S. dollars drawn on a U.S. bank) made payable to VCU (Application fee is nonrefundable.)
   c. Official transcripts from all colleges or universities you have attended after dental school, if any (If you have attended a program without a transcript, such as a residency, we will need a letter from your program director documenting the experience.)
   d. Additional letters of recommendation may be submitted if you feel they would be beneficial to your application (optional).
   e. National Board scores: Have an original score report sent directly to the Department of Orthodontics from the National Board office in addition to enclosing a copy in your supplementary materials package/envelope. If you have taken other exams (or if you wish to add to your file), you may send any item of this type for our consideration. The National Board scores, Part I, are required (even if you are a graduate of a foreign school) no exceptions.
   f. GRE scores: Have an original score report sent directly to the Department of Orthodontics from the Educational Testing Service office in addition to enclosing a copy in your supplementary materials package/envelope. The GRE scores are required (even if you are a graduate of a foreign school) no exceptions.
   g. TOEFL or IELTS scores are required for students whose native language is not English. These scores are not required if you went to dental school or graduate school in an English-speaking environment (U.S.A., Canada, Australia or Great Britain, etc.). Foreign dental school graduates: Graduation from our orthodontic program qualifies you to apply for a dental license in the commonwealth of Virginia; however, other regulations apply. For example, after graduation from our program, you will be required to take and pass a regional testing agency dental examination.

Degree requirements

1. The 24-month certificate program in orthodontics begins July 1 with two weeks of classes to familiarize students with concepts of growth and development, diagnosis and treatment planning, and basic biomechanical principles. First-year residents see new patients in the clinic in mid-July. In August, first-year residents begin a full clinic schedule that includes a morning and afternoon clinic session on most days.
2. Didactic course work in the department consists primarily of small-group seminar sessions for an average of two hours each day.
3. Clinical work simulates a private-practice environment. Each team consists of one junior and one senior orthodontic resident and a dental assistant whose time is dedicated to that team. The orthodontic clinic has its own business manager, practice manager and receptionist. Patient records are computerized, and billing, scheduling and record storage are accomplished using a commercial orthodontic office management system. The objective is to maximize clinical efficiency so residents fully develop the thought processes necessary to master orthodontic principles and treatment techniques. Graduates are prepared to enter into a successful and busy orthodontic practice.

**Term Hours:** 26

#### Total Hours: 101

1. Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two one-credit classes.

### Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry

#### Program accreditation

Commission on Dental Accreditation of the American Dental Association

#### Program goals and objectives

The didactic requirements of the Master of Science in Dentistry are combined with the goals of the M.S.D. program to provide the student with a strong clinical background that is supported by a strong background in research methodology.

#### Program goals

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical pediatric dentistry can be achieved
2. To provide a sound background in medicine as it applies to the pediatric/adolescent patient and to patients with special health care needs
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply literature associated with the field of pediatric dentistry
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills in the clinic and in the operating room
6. To provide didactic instruction and clinical training in the area of nonpharmacologic and pharmacologic behavior management
Program objectives
1. To be exposed to the basic sciences and be able to apply concepts to clinical pediatric dentistry
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the pediatric/adolescent patient and patients with special health care needs
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities to include treatment of patients under general anesthesia
5. To become competent in diagnosis and treatment planning
6. To obtain competency and certification in moderate conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the ABPD examination
9. To develop communication and presentation skills and lifelong learners

Student learning outcomes
Graduates of this program will be competent in:

Knowledge – concepts, facts and information
1. Knowledge and skills in the areas of pediatric medicine and oral medicine, as well as the delivery of dental care and oral surgery for compromised children and adolescents
2. In-depth knowledge and skills in the use of pharmacologic and nonpharmacologic behavior management techniques
3. Knowledge of hospital protocol, policies, rules, regulations and the ability to treat pediatric dental patients in the hospital environment
4. Ability to evaluate the dental literature and its research findings to the benefit of patients and to engage in scholarly activity which results in completion of a master’s degree thesis suitable for publication
5. Knowledge of preventive and corrective dental procedures relating to general and oral health and to growth and development of the stomatognathic system
6. Knowledge and skill in oral and maxillofacial radiology specific to the needs of the child and adolescent
7. Preparation for managing a contemporary pediatric dental practice relative to practice administration, efficient auxiliary utilization and marketing
8. Understanding of the biomedical sciences related to the practice of contemporary pediatric dentistry: biostatistics/epidemiology, pharmacology, microbiology, embryology, genetics, anatomy and oral and medical pathology
9. In-depth knowledge of the physical, psychological and social development of children
10. In-depth knowledge of oral and perioral lesions and anomalies in the pediatric dental patient
11. In-depth knowledge of the management of dental and medical emergencies in the dental setting
12. Understanding of normal and abnormal language development
13. Understanding of jurisprudence, risk management and biomedical ethics
14. Understanding office and practice management including the use of contemporary technologies

Clinical competency
1. Ability to appropriately manage and guide the behavior of the child patient to accept needed treatment and to provide advice or guidance to the parent to enhance the child’s acceptance
2. Expertise in managing and rendering optimal dental care for the medically, emotionally or physically challenged pediatric dental patient
3. Ability to perform evaluations of the physical status of children and adolescents
4. Ability to transform didactic/learned information into appropriate clinical situations
5. Skill in the use of pharmacologic and nonpharmacologic methods for the comprehensive control of pain and anxiety
6. Ability to recognize, refer and treat children who have sustained abuse and neglect
7. Expertise in dental surgical procedures for the restoration of the dentition
8. Skill/dexterity in performing procedures of periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region, including in-depth knowledge of biopsy and adjunctive diagnostic tests
9. Appropriate management of orofacial injuries

Diagnostic skills
1. Ability to recognize the early signs of child abuse and neglect
2. Ability to diagnose dental trauma
3. Skill in the diagnosis, prevention and treatment planning of pediatric disease in the primary and permanent dentition and periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region
4. Application and understanding of patient monitoring

Communication skills
1. Competence in the skills required to instruct and motivate children and their caretakers in methods of achieving and maintaining optimum oral health
2. Ability to prepare patients and caretakers for procedures
3. Ability to interact meaningfully with dental and nondental health care providers
4. Ability to work cooperatively with consultants and clinicians of other specialties and health-related fields
Organizational skills and documentation

1. Coordination of tasks such that diagnosis, case analysis, treatment planning and clinical management of oral-facial health problems of the pediatric dental patient occur in a logical, efficient manner
2. Ability to present an organized treatment plan to the patient, parent, attending and front desk
3. Ability to manage time and tasks and to work effectively with people

Research

1. Coordination and implementation of a research project
2. Successful completion of a research project, thesis preparation and thesis defense

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL.
- Upon acceptance in the specialty certificate program in pediatric dentistry, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. from an American Dental Association-accredited dental school
2. Successful completion of Part I of the National Dental Board Exam at the time of application and completion of Part II by the time of matriculation
3. Minimum grade point average of 3.0 (4.0 scale) or equivalent
4. Ranking in the top 50 percent of the class of the dental school attended
5. Personal interview
6. An externship in pediatric dentistry of at least one week in duration while attending dental school (highly encouraged)
7. Participation status with American Dental Education Association Postdoctoral Application Support Service and the Postdoctoral Dental Matching Program
8. Agreement to participate in the Postdoctoral Dental Matching Program
9. Agreement to participate in the ADEA PASS
10. Graduation or anticipated graduation from a CODA-accredited U.S. or Canadian dental school
11. Eligibility to obtain a Virginia Temporary Resident's License from the Virginia Board of Dentistry
12. Completion of GRE
13. Completion of TOEFL or IELTS for students whose native language is not English
14. Application to the pediatric graduate program is accepted through the ADEA PASS program. The PASS application should include the following items:
   a. Online application form
   b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in
pediatrics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.

c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.

d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you attended before dental school.

e. Dental school transcripts

f. Institution Evaluation Form (completed by the dean of your dental school)

g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)

h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director’s letter can count as one). A letter from the chair of pediatrics is not required, but may be included if the chair has personal knowledge of your skills.

**Note:** Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU’s program.

### Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (http://international.admissions.vcu.edu) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items 1 through 7 above
3. Test of English as a Foreign Language (http://www.ets.org/toefl) (minimum score of 600 on paper-based test and 100 on Internet-based test)
4. International English Language Testing System (http://www.ielts.org) (score of 6.5 or greater acceptable; test must be taken within two years of application date)

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained then the examination must be retaken. For research the student must have a thesis defense and present a passing grade. If either is not obtained then the examination must be written and oral examinations and must obtain a minimum grade of B or receive a minimum grade of B for all required courses. Students will take

**Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics**

**Program goals and objectives**

The didactic requirements of the M.S.D. are combined with the goals of the M.S.D. program to provide the student with a strong clinical background which is supported by a strong background in research methodology.

**Program goals**

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics can be achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply periodontal and associated literature
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research
9. Enable successful completion of the American Board of Periodontology exam
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education

**Program objectives**

1. To be exposed to the basic sciences and be able to apply concepts to clinical periodontics
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the periodontal patient
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities
5. To become competent in the treatment planning, site preparation, surgical placement and maintenance of dental implants
6. To obtain competency and certification in enteral and parental conscious sedation

**Graduate program director**

William O. Dahlke, D.M.D.
Assistant professor

**Phone:** (804) 628-4036

**Additional contact**

Kelly Jean Campbell
Residency coordinator
Email: pedsdent@vcu.edu
Phone: (804) 828-1790

**Program website:** pediatricdentistry.vcu.edu (http://www.pediatricdentistry.vcu.edu)
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the American Board of Periodontology examination
9. To develop communication and presentation skills and lifelong learners

**Student learning outcomes**

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics are achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology with a 100 percent completion of oral pathology rotation
4. To be able to interpret, critique and apply periodontal and associated literature with a 100 percent completion of periodontal courses measured
5. To develop sound diagnostic clinic, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research with a 100 percent successful completion of biostatistics and research design in dentistry course
9. Enable successful completion of the American Board of Periodontology written and oral examinations
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education with a 100 percent graduate participation in specialty clinical practice

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements. (p. 39)**

**Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).**

**Special requirements**

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a score of 100 or higher.
- International applicants must include an external credential evaluation of all international transcripts to complete the application. WES, ECE and AACRAO are some of the recommended NACES-approved providers.
- Upon acceptance in the specialty certificate program in periodontics, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. degree from U.S. or Canadian dental school
2. Part I of the National Dental Board at the time of application and Part II by time of matriculation (official report or certified copy)
3. Transcripts in a sealed envelope from each college/university/dental program attended
4. GPA/class ranking forwarded from the dean’s office of the dental school attended
5. Three letters of recommendation addressed to the director of graduate periodontics
6. Curriculum vitae and personal statement
7. Interview upon request from program director

**Special admission requirements**

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (http://international.admissions.vcu.edu) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items three through seven above
3. An external credential evaluation for international applicants of all international transcripts to complete the application (WES, ECE and AACRAO are some of the recommended NACES-approved providers.)
4. TOEFL with a minimum score of 100 for applicants from countries where English is not the primary and official language

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained, then the examination must be retaken. For research the student must have a thesis defense, present a passing grade. If either is not obtained, then the examination must be retaken. Students register for .5 credits for both fall and spring semesters for all years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class the requisite number of times for .5 credits each time, but they are only graded for a single one-credit class each year.

**Total credits required (minimum) 123.5**

1 Students register for .5 credits for both fall and spring semesters for all years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class the requisite number of times for .5 credits each time, but they are only graded for a single one-credit class each year.

1. Students register for .5 credits for both fall and spring semesters for all years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class the requisite number of times for .5 credits each time, but they are only graded for a single one-credit class each year.

2. For DENS 660, students register for .5 credits for both fall and spring semesters for the first two years of the program and for .5 credits for the fall semester of the third year of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year of the first two years (which means they take the class four times for .5 credits each time, but they are only graded for two one-credit classes). Students receive the pass/fail grade on the final .5 credits at the end of the fall semester of the third year of the program, for a program total of 2.5 credits.

---

### Advanced Dental Education

**Graduate program director**
Thomas C. Waldrop, D.D.S., M.S.
Professor and director, graduate periodontics
Email: tcwaldro@vcu.edu
Phone: (804) 828-6121

**Additional contact**
Faye T. Miles
Administrative assistant
Email: ftmiles@vcu.edu
Phone: (804) 828-4867
Fax: (804) 828-0657

**Office of Continuing Education**

For every professional person who serves the health sciences, education must be a lifetime commitment.

Graduation from dental school is the beginning of a lifelong educational experience for the serious, conscientious student of dentistry. Regardless of how well-prepared a health professional may be at the time of graduation, the adequate knowledge of yesterday is often insufficient information for today and tomorrow. With the rapid advancements made in dental technology and techniques, the professional must constantly seek new knowledge if the health care provider is to improve the health care given to patients.

Although the majority of continuing education courses are presented at the School of Dentistry, some are offered in other locations. The courses, which vary in length from one to four days, are scheduled throughout the year and consist of a variety of instructional methods from didactic to hands-on participation in clinical programs.

The instructional staff is comprised of faculty from the VCU School of Dentistry, guest lecturers from other dental schools and members of the dental profession and related professions from the United States and other countries.
Advanced Dental Education programs

The School of Dentistry provides advanced dental education programs in the areas of endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics, and advanced education in general dentistry. Satisfactory completion of the program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time resident trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

Students enrolling in endodontics, orthodontics, pediatric dentistry and periodontics also are awarded a Master of Science in Dentistry degree upon completion of the requirements for the certificate and successful defense of a thesis. The certificate program and Master of Science in Dentistry degree must be completed concurrently. See the School of Dentistry graduate program for more information on the Master of Science in Dentistry degree program.

Applications for admission should be directed to the director of the appropriate program, School of Dentistry, Virginia Commonwealth University, P.O. Box 980566, Richmond, VA 23298-0566. Successful completion of Part II of the National Board Dental Examination is required prior to admittance to the program.

Advanced Education in General Dentistry

Alfred J. Certosimo, D.M.D.
Interim program director

The purpose of this 12-month advanced dental education residency program is to provide advanced education and clinical experience to prepare dental school graduates for a career in the practice of comprehensive, general dentistry. This program has a strong emphasis on treatment planning, experience with new technology, developing skills in aesthetic dentistry and restoration of dental implants. Graduates of this program will have attained added competency and confidence in all areas of dental care, practice management and professional responsibility. Further, this program provides residents with meaningful experiences in the delivery of dental care to diverse populations and people at high risk for dental disease. A strong affiliation exists between the School of Dentistry and the statewide Virginia Area Health Education Center, whose mission is to increase primary health care in underserved areas. The AEGD program works in concert with AHEC to deliver dental care and recruit/train minority health care providers from health professional shortage areas.

The School of Dentistry is committed to advanced dental education. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive training in the art and science of general dentistry. AEGD residents may be required to participate in off-site clinical experiences outside the city of Richmond, Va. Funds will be provided for travel and lodging when required.

Eligibility and selection

Dentists with the following qualifications are eligible to apply for the AEGD program: Dental graduates from institutions in the United States accredited by the Commission on Dental Accreditation of the American Dental Association and who have passed Part I of the National Board Examination.

Selection criteria include: didactic and clinical achievements, extramural experience, interpersonal skills and a demonstrated commitment to pursue a career in general dentistry. Every effort is made to recruit qualified applications from minority dentists and dentists from health professional shortage areas or dentists who profess a desire to serve in these areas. A selection committee consisting of the program director, the assistant dean for admissions, members from specialty areas, former residents and current residents will screen all applications. Using the above-mentioned selection criteria, the most promising applicants will be invited for personal interviews. Trainees and alternates will be selected. This program participates in the Postdoctoral Application Support Service Program. Telephone (804) 828-3601; fax (804) 828-3159; email drhaseltone@vcu.edu.

Endodontics

Garry L. Myers, D.D.S.
Program director

The advanced dental education program in endodontics offers the student a comprehensive 24-month course of study in clinical, didactic and research endodontics. The program is designed to educate qualified individuals to pursue careers as educators, researchers and practicing clinicians, and meets the educational requirements for limitation of practice to the specialty of endodontics and examination by the American Board of Endodontics. The program is composed of several interrelated phases. The first phase consists of lecture courses that provide the student with a firm biological basis for patient care. The second phase consists of lectures, seminars and clinical training designed to produce clinical mastery of endodontics. The third phase is research experience gained through completion of an individual research project and master’s thesis.

Students completing the program earn a specialty certificate in endodontics and a Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Oral and Maxillofacial Surgery

Robert A. Strauss, D.D.S., M.D.
Professor and program director

The oral and maxillofacial surgery program is designed to provide extensive didactic and clinical experience in all aspects of the specialty. Those who complete training satisfactorily fulfill the prerequisites for examination and certification by the American Board of Oral and Maxillofacial Surgery.

The didactic portion of the program includes formal courses in oral pathology, anatomy and physical diagnosis, as well as numerous weekly conferences and seminars. Clinical rotations on oral pathology, anesthesia, medicine, surgical oncology, neurosurgery, cardiology, general surgery, emergency room and the trauma services are used to supplement the trainee’s surgical experience. Throughout the program there is a constant correlation of the clinical experience with the biomedical sciences.

Through the multiple clinical and didactic facilities of the VCU Medical Center complex, the McGuire Veterans Affairs Medical Center and St. Mary’s Hospital, there is ample material for education in the latest oral
and maxillofacial surgical techniques. The oral and maxillofacial surgery service is responsible for diagnosis and management of diseases and injuries related to the oral and facial region. Trainees are involved in all aspects of treatment including simple and complicated oral surgery, anesthesia and pain control, oral and maxillofacial trauma, preprosthetic surgery, orthognathic surgery, head and neck pathology, oral and maxillofacial reconstruction, temporomandibular joint surgery, laser surgery, cosmetic facial surgery, and microneural and microvascular surgery. During the four years, the trainee assumes ever-increasing responsibilities as time and abilities dictate.

Upon satisfactory completion of the four-year residency, the trainee may earn the Doctor of Medicine degree from the School of Medicine by enrolling in the second and third years of that curriculum.

Orthodontics
Bhavna Shroff, D.D.S.
Professor and program director

The Department of Orthodontics at VCU's MCV Campus offers a 24-month advanced education in orthodontics and Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. The goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically. Clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of the program, with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is a requirement of the program. All senior residents present their research at the Virginia Association of Orthodontists meeting. The program qualifies students to take the written portion of the American Board of Orthodontics examination in the senior year. Residents are required to take the written portion of the American Board of Orthodontics examination prior to graduation, and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists meeting.

Students completing the program earn a specialty certificate in orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master’s degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Periodontics
Thomas C. Waldrop, D.D.S.
Professor and program director

The advanced education program in periodontics consists of a 36-month clinical and didactic curriculum leading to a certificate in periodontics. Students are responsible for all materials and make up of lost clinical time. Courses in the basic and clinical sciences, medicine, head and neck anatomy, statistics, and advanced cardiac life support are required. Students are responsible for attending and preparing for lectures, current and periodontal literature, medical-oral medicine, treatment planning, case presentation, and surgical seminars. No grade less than 80 percent or passing is acceptable from any periodontal or basic science course work. Less than passing grades may require retesting or retaking of a course. Students are expected to be able to utilize a computer to prepare lectures and to access Internet resources.

Students are responsible for documentation of clinical and course work data. Specified digital intra-oral camera and documentation of all clinical cases and department archiving is required. Students are responsible to the service for rotations in general medicine, dental anesthesiology and oral pathology. Proficiency and certification in intravenous conscious sedation is required. Students are responsible for clinical and classroom
teaching to undergraduate and specialty students. Research on a topic that is reviewed and approved by a faculty committee is required. Upon completion of the research, the student is required to prepare a thesis, defense and manuscript for publication. Certificates are not awarded until completion of the Master of Science in Dentistry requirements. Students are responsible for the purchase of program-required equipment, instruments, books and all associated fees. All students are required to become student members of the American Academy of Periodontology.
The primary objective of the Virginia Commonwealth University School of Education is to prepare students for careers in education, government, health-related professions, recreation and research. All programs combine comprehensive studies in the liberal arts and sciences with professional preparation and concentration in specialized fields of study. Practical applications and field experiences are an integral part of each academic program. The School of Education is committed to preparing high-quality professionals for service in urban, suburban and rural areas.

Administration
1015 West Main Street
P.O. Box 842020
Richmond, Virginia 23284-2020
Phone: (804) 828-3382
Fax: (804) 828-1323

Leila Christenbury, Ed.D.
Commonwealth Professor and interim dean
James McMillan, Ph.D.
Professor and interim associate dean for academic affairs
Diane J. Simon, Ph.D.
Associate professor and senior associate dean for student affairs

Accreditation
Education (all degrees)
National Council for Accreditation of Teacher Education (initial licensure and advanced degrees for school personnel), the Virginia Department of Education and the Southern Association of Colleges and Schools.

Counselor education
Accredited by the Council on Accreditation of Counseling and Related Educational Programs

This accreditation applies to both the K-12 school counseling track and the college student development and counseling track.

The school holds membership in the American and Virginia Association of Colleges of Teacher Education and in the Holmes Partnership.

Values statement
The VCU School of Education is dedicated to the preparation of professional educators and clinicians, the ideals of academic scholarship, and the worthiness of service. Through our work in these areas, we recognize our responsibilities to students, university colleagues, the community at large, and professional organizations. While all of us share common values, the statements below intentionally allow for a variety of interpretations that may be influenced by our assignments, our experiences, and our philosophical principles within programs and across the School of Education.

The school demonstrates its belief in the value of high quality programs by:

• Attracting high quality students

The school demonstrates its belief in the value of high quality teaching by:

• Being responsive to the external standards of accrediting and professional organizations
• Providing meaningful clinical placements
• Continually evaluating, assessing and improving programs and services

The school demonstrates its belief in the value of diversity by:

• Creating an environment that supports student success
• Demonstrating a variety of effective teaching strategies, including technology integration, universal design for learning and student-centered instruction
• Fostering curriculum development that ensures familiarity with best practice across all disciplines

The school demonstrates its belief in the value of high quality scholarship and, in particular, the value of research culture by:

• Conducting relevant, high quality research that is responsive to the metropolitan community and contributes to the disciplines
• Encouraging collaborative research with colleagues, practitioners and students
• Supporting the creation, interpretation and dissemination of knowledge
• Integrating current research into teaching

The school demonstrates its belief in the value of collaboration and partnerships by:

• Serving as a resource for the development of policy, curriculum, instructional practice and professional standards
• Providing leadership and professional outreach to organizations, the university and the community at large
• Maintaining partnerships and shared responsibility for professional preparation

The school demonstrates its belief in the value of critical reflection by:

• Observing ethical practice and professional honesty
• Encouraging students to exhibit dispositions consistent with accepted professional practice
• Fostering a trusting, safe community of scholars
• Engaging in ongoing professional development
• Examining professional practices

Educator as critically reflective practitioner
The guiding theme of educator preparation programs in the School of Education is educator as critically reflective practitioner. Courses and experiences provide opportunities for individuals to consider means of
building on appropriate knowledge to make instructional, assessment, counseling and leadership decisions.

Organization

The chief administrative office for the School of Education is the Office of the Dean, Room 2090 Oliver Hall. Two associate deans assist in the administrative functions of the school. The associate dean for academic affairs is responsible for the school's Office of Assessment and Technology Services, is responsible for all academic programs offered by the school, assists each department in the administration of the various degree programs and handles administrative areas related to admission, matriculation, graduation and special actions and appeals for graduate students. The associate dean for student affairs is responsible for the school's student services offices and handles the administrative areas related to admissions, matriculation and student appeals.

The school is organized for the management of instruction and degree programs into five departments: Counselor Education, Educational Leadership, Foundations of Education, Special Education and Disability Policy, and Teaching and Learning.

Facilities

The School of Education is housed primarily in Oliver Hall, where classroom, laboratory and activity centers, and faculty and administrative offices can be found. Clinical laboratories are located at 3600 W. Broad St.

Support/resource offices

The School of Education has developed various resources to provide support services to students, faculty and the academic programs. These resources include the Office of Student Services and the Instructional Technology Center, which houses state-of-the-art computer laboratories.

Student Services Center

Basic information on the degree programs in the School of Education, as well as forms needed by students as they advance through the programs, are available in the Student Services Center, located on the third floor of Oliver Hall. Students enrolling in the B.S. program can arrange an appointment with undergraduate advising on the first floor of Oliver Hall.

The Office of Student Services in Oliver Hall receives and processes various School of Education application forms and supplies information on the Praxis I examination, Praxis II specialty area tests, Graduate Record Examination and the Miller Analogies Test. For information on student performance on the Praxis examinations, refer to the School of Education website at soe.vcu.edu/prospective-students/deadlines (http://www.soe.vcu.edu/prospective-students/deadlines). This office coordinates clinical placements for students in practica, student teaching, internships and externships. Student teachers and graduate intern teachers are placed in school divisions and other educational facilities in the greater Richmond metropolitan area. Students in non-teacher education programs are placed in practica and clinical experiences through the coordinator of undergraduate advising. Placements are secured in schools, agencies, clinics and hospitals in the greater Richmond metropolitan area. Every effort is made to place students in clinical experiences relevant to their intended career path.

Applications and information on scholarships available to School of Education students can be obtained at the Student Services Center.

Information on financial aid administered by the university is found in the appropriate level of “Expenses and Financial Aid” sections of this bulletin.

Licensure and endorsement information, materials and applications for Virginia education personnel are available in the Student Services Center. Licensure and endorsement are based, in part, on the successful completion of an approved program that complies with national standards.

For more information about this center, visit soe.vcu.edu/student-services-center (http://www.soe.vcu.edu/student-services-center).

Instructional Technology Center

The Instructional Technology Center, a multimedia facility, is used by faculty and students in the School of Education. The center houses microcomputers with sophisticated graphics capabilities, educational software and many similar resources for the development of instructional materials. It also provides access to the School of Education's Local Area Network, VCU Libraries, the Internet and the Web.

Computer laboratories

The Instructional Laboratory, housed in the Instructional Technology Center, gives students many opportunities to learn about computer-assisted instruction in the classroom setting. It also lends support to students enrolled in the computer science basic literacy course and other technology courses offered by the school. The laboratory equipment includes Macintosh and IBM-compatible multimedia computers. Laptop computers, laser printers, color laser printers and scanners also are available.

The INFUSIO Distance Learning Technology Laboratory, also housed in the Instructional Technology Center, is a new technology facility designed to provide assistance to faculty, pre-service teachers and associates in the School of Education. The lab presently houses a Polycom two-way video conferencing system, interactive Smart and Softboards, and Mimeo digital meeting assistant technology for electronic note taking. There are several high-end multimedia PC stations and a Macintosh computer with a variety of the latest software programs. Computers are equipped with headphones, microphones and digital cams for use in audio and video recording. The INFUSIO Lab includes a number of assistive technologies designed to enhance the concept of universal learning.

A university computer laboratory open to all students is housed in Oliver Hall. The laboratory is equipped with 24 IBM- and Mac-compatible computers that permit students to access the Internet and MS Office software.

Office of Graduate Studies

The Office of Graduate Studies is responsible for the administration of graduate education from admission through graduation, for master's, doctoral and certificate students. Refer to the Ph.D. in Education section of the bulletin for further information on doctoral programs.

Office of Continuing and Professional Education

The VCU OCPE launched in July 2014, centralizing operations and offering wide-ranging services to the university and the community at large. The office combines the functions of two previous entities — the School of Education’s Center for Professional Growth and the Division of Community Engagement’s Office of Continuing Studies — to create a single, comprehensive hub for delivering and supporting quality learning experiences to individuals and organizations through continuing education and professional development. For more information about
Certification Reciprocity Agreement. Information about VCU students’ Education have approved program status and are a part of the NASDTEC. Therefore, all licensure and endorsement programs in the School of Education are approved by the Virginia Department of Education and recognized standards. All licensure and endorsement programs offered by the School of Education are approved by the Virginia Department of Education and the National Council for the Accreditation of Teacher Education. The commonwealth of Virginia is a member of the National Association of State Directors of Teacher Education and Certification, Association of State Directors of Teacher Education and Certification, and holds membership in the American and Virginia Associations of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU’s School of Education also holds membership in the American and Virginia Associations of Colleges for Teacher Education and the Holmes Partnership.

Licensure and reciprocity

Upon completion of degree requirements in any of VCU’s teacher preparation programs and with the recommendation of the School of Education, students are eligible to receive initial teacher licensure from the Virginia Department of Education. For additional information on licensure, licensure renewal or an add-on endorsement, contact the School of Education’s Student Services Center.

In Virginia, initial licensure requires successful completion of state-mandated tests. Passing scores on these tests are required to progress through different portions of the licensure programs from admission to teacher preparation, admission to student teaching and recommendation for licensure. For a list of testing requirements, please refer to the School of Education website at soe.vcu.edu/student-services-center (http://www.soe.vcu.edu/student-services-center).

Students should request that their Praxis I and Praxis II specialty area test scores be reported to VCU and the Virginia Department of Education. Before a recommendation for licensure can be sent to the Teacher Licensure Division of the Virginia Department of Education, these test scores must be on file with the School of Education’s Student Services Center.

Approved programs and certification reciprocity

All of VCU’s initial teacher preparation programs are approved by the Virginia Department of Education and accredited by the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU’s School of Education also holds membership in the American and Virginia Associations of Colleges for Teacher Education and the Holmes Partnership.

Based on the National Association of State Directors of Teacher Education and Certification agreement, VCU graduates will be eligible for teacher licensure reciprocity with other states. Students interested in licensure reciprocity should contact the School of Education’s Office of Student Services.

Programs

Master of Teaching (extended programs)

- Biology education
- Chemistry education
- Early and elementary education
- Earth science education
- English education
- History/social studies education
- Mathematics education
- Physics education

Licensure for education personnel

Licensure and endorsement are based in part on the successful completion of an approved program developed in response to nationally recognized standards. All licensure and endorsement programs offered by the School of Education are approved by the Virginia Department of Education and the National Council for the Accreditation of Teacher Education. The commonwealth of Virginia is a member of the National Association of State Directors of Teacher Education and Certification, which has a national reciprocity agreement for teacher licensure. Therefore, all licensure and endorsement programs in the School of Education have approved program status and are a part of the NASDTEC Certification Reciprocity Agreement. Information about VCU students’ performance on the state-mandated licensure tests (Praxis I Reading, Writing and Mathematics, Praxis II Specialty Area Tests, and other required assessments) is available on the School of Education website: soe.vcu.edu/student-services-center (http://www.soe.vcu.edu/student-services-center).

Graduate programs leading to initial teacher licensure

Individuals often decide to pursue a teaching career after they have completed a baccalaureate degree. VCU serves qualified individuals through approved programs leading to a Master of Teaching, Master of Education (special education) or a Post-baccalaureate Certificate in Teaching. Upon completion of a degree program, graduates are eligible for both Virginia licensure and/or endorsement in the specific degree area.

Students seeking initial licensure in Virginia must have earned a liberal arts degree (or its equivalent) and pursue professional studies focusing on a specific area of preparation or licensure. Those without a liberal arts degree who enter a program should expect to take some additional course work prior to the awarding of a degree.

Those planning to teach at the secondary level must possess a major or its equivalent in the discipline in which they wish to teach and for which VCU offers the approved program teaching specialty.

Individuals who wish to obtain licensure in art education, music education or theater education should consult the School of the Arts section of this bulletin.

The Master of Teaching program integrates undergraduate course work for a bachelor’s degree in a liberal arts or science major with course work and graduate study leading to a Master of Teaching in a program area.

Centers and institutes

Programs, resources and scholarly and service endeavors of the school are extended by a number of academies, centers, institutes and programs directed by the faculty. These include:

- Behavioral Intervention Program
- Career Connections TechLink
- Center for School-Community Collaboration
- Center for School Improvement
- Center for Sport Leadership
- Central Virginia Leadership Academy
- Metropolitan Educational Research Consortium
- Metropolitan Educational Training Alliance
- Partnership for Persons with Disabilities
- Professional Opportunities for Developing Excellent Teachers:
  - English Second Language
  - Rehabilitation Research and Training Center
  - Training and Technical Assistance Center
- Virginia Adult Learning Resource Center
- Virginia Adult Learning Resource Center
- Virginia Adult Learning Resource Center

• Reading specialist

**Extended Teacher Preparation Program**

The School of Education, in cooperation with the College of Humanities and Sciences, offers extended teacher preparation programs in early childhood and elementary education (prekindergarten through grade six), health and physical education (grades six through 12) and secondary education (kindergarten through grade 12). The successful completion of these programs results in the simultaneous awarding of both a bachelor’s and a master’s degree.

**General degree requirements**

The successful completion of these programs results in the simultaneous awarding of both a bachelor’s and a master’s degree. Prospective Master of Teaching students earn their bachelor’s degree in a specific field in which they plan to teach. A student generally begins work on the professional studies component in the third or fourth year of academic study.

A student enrolled in any one of the three extended teacher preparation programs must complete a minimum of 153/154 credits. The student must maintain a cumulative GPA of 2.8 for admission to the teacher preparation program. Completion of at least 90 credits with a minimum GPA of 3.0 in the last 60 semester hours of study is required for that student to be admitted to the graduate studies portion of the extended program.

A Post-baccalaureate Graduate Certificate in Teaching is open primarily to those who have already earned a master’s degree. The candidate must complete at least 30 additional hours beyond the bachelor’s level. Admittance to this program requires a minimum GPA of 3.0 in the last 60 semester hours of study.

**Clinical experiences**

All initial licensure programs require clinical experiences throughout the program. During the initial stages of a program, these experiences occur as practica in varied placements in K-12 education relevant to the student’s program. Each program also requires a capstone clinical experience in the form of student teaching. For student teaching, those pursuing early and elementary education are placed in two settings, one in early elementary grades (K-2) and one in upper elementary grades (3-5). Those pursuing secondary education receive a single placement in their discipline in a middle school or high school setting.

With the guidance of a mentor, the intern assumes more independence in the field setting. Satisfactory completion of the internship and the preceding training is charted through evaluations made by the university supervisor, colleague-teacher and school administrator.

**Undergraduate major**

Freshman students who plan to become early and elementary education teachers are required to enroll in the Bachelor of Interdisciplinary Studies
liberal studies for early and elementary education major. Transfer students should meet with a B.I.S. adviser prior to course registration. The B.I.S. degree requirements are outlined in the College of Humanities and Sciences section of this bulletin.

Prospective secondary teachers should major in the discipline they wish to teach. The disciplines in which VCU offers licensure programs are as follows: English, history/social studies, mathematics and science (various specialties). Students should consult with their education adviser to ensure that courses taken to meet major requirements also meet state licensure requirements.

Change of major and transfer students
Students wishing to enter the Extended Teacher Preparation Program in early and elementary education or secondary education must transfer initially to the College of Humanities and Sciences. They must declare a major in the college and a specialization in the appropriate professional studies sequence in the School of Education. Students who wish to enter the extended program in health and physical education must choose the general health and physical education concentration in the health, physical education and exercise science major within the School of Education.

For admission to teacher preparation, a minimum GPA of 2.8 is required. A minimum GPA of 3.0 in the last 60 semester hours of study is required for admission to the graduate phase of the Extended Teacher Preparation Program.

Transcript evaluation
The College of Humanities and Sciences evaluates transcripts of students pursuing the extended program in early and elementary education or secondary education; transcripts of students pursuing the extended program in health and physical education are evaluated by the School of Education. Credits are accepted if they conform to specific program guidelines; course equivalents from accredited colleges and universities are accepted if the grade earned is C or better. From the extended program, 60 semester hours of acceptable undergraduate course work are required to be admitted to a teacher preparation program. See specific criteria in the “Admission to the Extended Teacher Preparation Programs” section of this bulletin.

Credits that are accepted from two-year institutions may meet liberal arts and sciences requirements, but will not meet professional requirements for upper-division course work. The VCU Transfer Guide for Virginia Community Colleges lists, in full, credits accepted by VCU that have been earned in the state’s community colleges.

After the initial student transcript evaluation, the assigned adviser reviews the accepted transfer credits with the student, determining what additional course work at VCU will be necessary. An adviser is not required to use all the accepted transfer credits in a student’s program of study. Only those credits approved for transfer can be applied toward the chosen degree.

Faculty advisement
An academic adviser is assigned to a student by the department of that student’s chosen major in the College of Humanities and Sciences. A professional studies adviser is similarly assigned by the Department of Teaching and Learning or the Department of Health and Human Performance according to the student’s proposed teaching endorsement. This adviser-student relationship continues throughout the course of study at VCU. Student and adviser jointly develop the student’s individual program. During the planning process, the student identifies, clarifies and explores his or her personal and professional goals.

Educator as reflective practitioner
The guiding theme of the teacher preparation program is “educator as reflective practitioner.” The underlying foundation of instruction in the teacher preparation program is to challenge the prospective teacher to develop skills in critical reflection and to value thoughtful decision making. Candidates demonstrate critical reflection by: being open to and respectful of all stakeholders; taking other perspectives into account; utilizing critical thinking in framing and solving educational problems; making informed, ethical and professional decisions; and taking ethical and professional action.

Demographics consideration in teaching
The demographics of elementary, middle and high school students are changing. There is an increase in the number of students for whom English is not the first language, of minority students, of students who do not all learn or respond in similar ways and of students who may be identified as possessing a disability.

Future teachers are encouraged to take advantage of opportunities through formal courses and other experiences to gain greater insight and ability in addressing learners from differing cultural backgrounds and considering the needs of learners with different learning styles, participation styles, and special abilities or disabilities.

Standards of learning
Much of the prekindergarten through grade 12 curriculum is based on the commonwealth of Virginia’s current Standards of Learning. Students preparing to be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. The School of Education website has a link to the SOLs.

In some instances the content and concepts associated with one or more SOLs may be incorporated in a course in the College of Humanities and Sciences or in the School of Education, but as the SOLs are for a kindergarten through grade 12 curriculum and not a college curriculum, one may need to study several of these on her or his own.

Technology standards
The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today’s schools. Individuals preparing to teach must be competent on each of the eight technology standards in Virginia’s Technology Standards for Instructional Personnel. These standards may be reached through the School of Education website.

Students are advised to consult with the professional studies adviser regarding the program’s requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through KnowledgeNet. Please see the General education requirements for undergraduate study in the “College of Humanities and Sciences” section of this bulletin.

Extended program in early and elementary or secondary education
In the extended program, a student generally begins work on the professional studies component in the third year of study. Information on specific requirements for all academic majors is available in the
Department of Teaching and Learning, in the College of Humanities and Sciences’ associate dean’s office or through the department of the chosen major. Students may visit soe.vcu.edu/academics_programs/teaching-and-learning (http://www.soe.vcu.edu/academics_programs/teaching-and-learning) for information about programs in the Department of Teaching and Learning. A student in the extended program must maintain a minimum cumulative GPA of 2.8 for admission to teacher preparation and clinical experience and, prior to the fifth year, a minimum GPA of 3.0 for admission to the graduate study portion of the program.

**Admission information**

Any undergraduate admitted to VCU who declares a major in the College of Humanities and Sciences is eligible to declare a specialization in special education or secondary education. Students specializing in early and elementary education must declare liberal studies for early and elementary education as their major in the Bachelor of Interdisciplinary Studies program. Undergraduates admitted to VCU who wish to become teachers of health and physical education must choose the general health and physical education concentration (teacher preparation) in the B.S. in Health, Physical Education and Exercise Science program in the School of Education.

Transfer students and students currently attending VCU who wish to change their majors to this program must have a minimum GPA of 2.0; however, note the much higher GPA requirement for admission to teacher preparation and then to graduate study. All students in the program, upon completion of 60 hours of undergraduate course work and prior to completion of 90 hours, must apply for admission to teacher education. To be accepted, a student must have a minimum GPA of 2.8 and must have achieved the required Commonwealth of Virginia scores on Praxis I tests and must have achieved the established composite score for the three tests.

Students who pursue one of the extended teacher preparation programs follow a series of steps as noted in order to meet all requirements, including the 153/154 credits.

**Step 1: Admission to the university**

**Requirements**

1. Scores from Scholastic Aptitude Test (SAT) or American College Test (ACT)
2. Minimum 2.0 GPA from high school or previous college

**Procedures**

1. Declare an undergraduate major in the College of Humanities and Sciences (for early and elementary or secondary education) or a major in health, physical education and exercise science with a general health and physical education concentration in the School of Education (for health and physical education).
2. Declare an education specialization in early and elementary education, secondary education or health and physical education.

**Step 2: Admission to teacher preparation**

Complete before enrolling in the first practicum (upon completion of 60 credits of liberal arts and prior to completion of 90 credits).

**Requirements**

1. 2.8 GPA or better
2. Completion of six hours of English, three hours of mathematics, four hours of laboratory science and six hours of social science and/or history.

3. Meet Virginia scores required for the mathematics portion of Praxis I and achieve a passing score on the Virginia Communication and Literacy Assessment
4. Confirmation of education specialization (Undecided majors must decide.)
5. Enroll in or have completed TEDU 101, EDUS 300, EDUS 301 or equivalent course

**Procedures**

1. Complete Admission to Teacher Preparation Application Form (obtain in Office of Student Services) and submit a current transcript
2. Complete TEDU 101, EDUS 300, EDUS 301 or equivalent course; submit required Praxis scores
3. Register in dean’s office for interview upon returning Admission for Teacher Preparation Application Form; complete required interview with education program faculty

**Step 3: Application to graduate studies**

**Requirements**

1. 3.0 GPA or better
2. Acceptable scores on the Graduate Record Examination (GRE) or Miller Analogies Test (MAT). Generally students are expected to score at least an 800 composite (Verbal and Quantitative) on the GRE or 386 on the MAT.
3. Personal statement addressing reasons for seeking graduate education, including career goals; experience working with age group to be taught; reasons for entering teaching; and success in organizing, planning and implementing work with other individuals
4. Three references: it is suggested that these be instructors or advisers in the College of Humanities and Sciences and the School of Education; use Graduate Studies Reference Forms

**Procedures**

1. Obtain Graduate School Admissions packet from the Office of Student Services in Room 3106, Oliver Hall
2. Return completed application packet, along with up-to-date transcripts, to the VCU Graduate School

**Application deadlines for early and elementary or secondary education**

- Nov. 1 for spring semester
- March 15 for summer and fall sessions

**Step 4: Internship**

All programs require a graduate-level internship (TEDU 672 and TEDU 674) during the fifth year. Applications for internship can be obtained in the Office of Student Services in Room 3106, Oliver Hall. Individuals in early and elementary education are placed in a kindergarten and a grade one through six classroom in the same semester. Individuals in secondary education typically have a single placement, although perhaps with two different teachers. Individuals in health and physical education
Added or add-on endorsements

Added or add-on endorsements Teaching English as a Second Language

The School of Education offers the Virginia Department of Education ESL preK-12 endorsement for pre-service and in-service teachers. The ESL endorsement program at VCU requires 18 credit hours of ESL course work and six credit hours of a modern foreign language. Candidates must complete the following courses:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>ENGL/LING/ANTH 390</td>
<td>Introduction to Linguistics</td>
<td>3</td>

Foreign language courses (modern languages only) 6

Total Hours 24

Add-on endorsements in grades 6 through 12, science

Add-on endorsements in science are available in biology, chemistry, earth science and physics. Each add-on requires a first endorsement in one science and at least 18 semester hours in the add-on science that includes preparation in specified areas. The earth science added endorsement is listed below. For information about the added endorsements in biology, chemistry or physics, contact the Department of Teaching and Learning.

Earth science

To add an earth science endorsement to an endorsement in another science discipline, the individual must earn at least 18 semester hours in the earth sciences, including preparation in geology, oceanography, meteorology and astronomy. Courses to meet these requirements include:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>

</tr>
</tbody>
</table>

Elective courses to complete at least 18 hours include: URSP 203 and URSP 204 and PHYS 391.

Graduate information

Admission procedures for graduate study

Application procedures

Application forms and instructions for applying to all graduate programs are available on the Graduate School website at graduate.vcu.edu (http://www.graduate.vcu.edu). Note that applications cannot be processed until they are complete (including test scores). Admission information specific to each program can be found in the division section of this bulletin.

Test scores

Either the GRE, General Aptitude portion, or the MAT is required for the Master of Teaching, the Master of Education, post-master’s certificates, the Post-baccalaureate Certificate in Teaching and the Post-baccalaureate Certificate in Instructional Technology. The Ph.D. program requires the GRE, General Aptitude portion.

A passing score on Praxis I, although not required for graduate admission, is required for placement in clinical experiences (practica, internships and certain externships) as well as for licensure in Virginia. Contact the Student Services Center (http://www.soe.vcu.edu/student-services-center) for applications for Admission to Teacher Preparation, booklets on Praxis I and Praxis II, and information regarding offerings of the Praxis examinations by paper and pencil or by computer. Information about the tests may be obtained in the Student Services Center as well.
### Application deadlines

The following application deadlines have been established for the Master of Education, the Master of Teaching and the Post-baccalaureate Certificate in Teaching.

<table>
<thead>
<tr>

<td></td>
</tr>
</tbody>
</table>

Students who are unable to enroll for the semester for which they are accepted must request a deferment.

### General admission requirements

The admission decision will be made on an overall analysis of the following for each degree program. See each program listing for any additional information.

**Master of Teaching, Master of Education, Post-master's Certificate in Educational Leadership, Post-master's Certificate in Reading, Post-baccalaureate Graduate Certificate in Instructional Technology and Post-baccalaureate Graduate Certificate in Teaching**

- A minimum GPA of 3.0 on a 4.0 scale on the last 60 semester hours of study.
- Applicants whose GPA during the last 60 hours of course work falls just below 3.0 may be considered based on the strength of the overall application.
- Acceptable scores on the GRE or the MAT. Normally, students are expected to score at least 290 combined on the Quantitative and Verbal sections of the GRE with neither score falling below the 20th percentile, or at least 386 on the MAT.
- An interview with the applicant may be required by the faculty of the program to which the applicant is seeking admission.

**Ph.D. in Education**

Refer to the Ph.D. in Education concentration pages of this bulletin for admission requirements.

### Advising and student program planning

All students admitted to the School of Education are assigned advisers. Students are expected to work with their adviser to plan their programs of study. Each graduate program agreement, or changes thereto, must be approved by the adviser and the appropriate department chair, or the associate dean for academic programs. Courses taken without approval are taken at the student’s risk. Each student is required to complete and file a program plan with the department before the completion of the sixth credit hour.

### Steps to completing M.Ed. degree

1. Not required in M.Ed in Special Education and M.Ed. in Curriculum and Instruction

The chart outlines the general steps to completing the Master of Education programs. All other graduate-level students in the School of Education should refer to the appropriate section of this bulletin for information specific to these programs.

### Admission to candidacy

Admission to graduate study in the Master of Education programs does not constitute candidacy for a degree. Rather, students who have been admitted to graduate study are advanced to degree candidacy upon the recommendation of the adviser, core faculty and department in which the degree is sought.

Advancement to degree candidacy requires that students must have completed at least 12 but no more than 18 semester hours of graduate study with a minimum GPA of 3.0; must have demonstrated clearly the aptitude and ability to pursue graduate study, including independent study; must have exhibited a commitment to their profession; and must have demonstrated promise for a successful career in the field selected in terms of temperament and personality. Specific courses may be required prior to application for candidacy. Admission to degree candidacy is not an automatic process. Students must file an approved application for candidacy with their departments. Only students who have been admitted to candidacy may pursue additional work toward the degree.

### Comprehensive examination

- Some students in a Master of Education program must take a three-hour written comprehensive examination.
- Written examinations will be given on the first Saturday in November, the fourth Saturday in March, and the second Saturday in July. Students must notify the department in writing of the intention to take the examination at least 30 days prior to the published date. All comprehensive examinations must be taken on dates indicated except for religious or health reasons. Any exceptions must be approved in advance by the department chair.
- A minimum of three faculty members, designated by the core faculty, will evaluate each examination independently. Satisfactory
The Center for Sport Leadership at VCU was developed with the idea of creating an innovative, practical learning environment that would prepare students for a successful career in the sport industry. This new educational paradigm teaches students the necessary skills, while giving them ownership of operational responsibility to the organization and providing access to upper-level administrators and coaches. The Center for Sport Leadership has placed students in every area of the industry, including professional, intercollegiate, Olympic, nonprofit and grassroots organizations. These successful alumni provide a useful tool in establishing a network base for connecting with future leaders in the industry.

- Education, Doctor of Philosophy with a concentration in sport leadership (p. 458)
- Sport Leadership, Master of Education (p. 454)
- Business Administration, Master of Sport Leadership, Master of Education [dual degree] (p. 456)

**Sport Leadership, Master of Education (M.Ed.)**

**Program goal**

The Center for Sport Leadership at VCU offers a structured graduate program combining classroom theory with exposure to relevant field experiences. Through the sport leadership program, students will be prepared to assume the responsibilities for developing professional and amateur athletes and managing sports programs in a variety of academic, public and private sectors. The interdisciplinary faculty and curriculum give students the opportunity to concentrate on areas most important to them and most relevant to the sports business. Students of the program are required to complete a comprehensive examination.

The center offers graduate courses online for those students who want to take advantage of educational opportunities via the Internet. Currently, three classes are available each semester.

**Student learning outcomes**

1. Content knowledge of sport industry: Students will be able to analyze and synthesize information and develop plans to address issues in sport leadership.
2. Development of interpersonal skills and professionalism: Students will demonstrate interpersonal skills and professionalism appropriate to the fields of sport management and coaching.
3. Development of leadership skills: Students will demonstrate content knowledge of leadership skills and traits, as well as the ability to utilize these skills and traits in a professional setting.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://wwwgraduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin.
and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:
M.Ed. Fall Apr 15 GRE or MAT
Spring Nov 1
Summer Mar 15

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:
1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work

Students should contact the Center for Sport Leadership at VCU at (804) 828-7821 or link directly to sportleadership.vcu.edu (http://www.sportleadership.vcu.edu) for information and application materials.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 36 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Examination requirement: Students must pass a comprehensive examination (see below).
4. Externship requirement: Students must complete an externship in the sport field.

Comprehensive examination
1. Written comprehensive examinations are required for all graduate students in the VCU Center for Sport Leadership.
2. Comprehensive examinations will take place at the end of the spring semester for each cohort of full-time, on-campus students and at the completion of 30 credit hours of course work for all part-time/distance-learning students.
3. Comprehensive examinations will be evaluated in a pass/fail format.
4. Comprehensive examinations will be independently evaluated by two faculty members; in the case that the faculty members disagree, a third faculty member will be brought in for a final decision.
5. Any student failing the comprehensive examination will have one additional opportunity to pass the exam. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

---

**Student learning outcomes**

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to appropriately apply techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
7. Graduates should be able to evaluate marketing programs.
8. Students should be able to think critically and systematically about financial issues in businesses and to develop techniques to analyze these issues numerically.
9. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

---

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students (p. 30).

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements (p. 37).

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements (p. 39).

Other information

School of Business policies and procedures for graduate master’s degree students are available on the school’s website at business.vcu.edu/graduate-studies/current-graduate-students (http://business.vcu.edu/graduate-studies/current-graduate-students).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Program website: business.vcu.edu/graduate-studies/combined-med-in-sport-leadershipmba (http://business.vcu.edu/graduate-studies/combined-med-in-sport-leadershipmba)

Education, Doctor of Philosophy (Ph.D.) with a concentration in sport leadership

Program goal
The sport leadership concentration is designed for students to research, comprehend and interpret contemporary literature as it relates to leadership in the sport industry and to extend knowledge and understanding of leadership in that industry. Students will have the opportunity to integrate theory and practice in the specific areas of economics, finance, marketing, management, communications and sociology of sport. Upon completion of the doctoral course work and dissertation, students will be prepared for higher education positions in sport management/administration and/or sport leadership programs across the U.S.

Student learning outcomes
1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he
or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Master’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
Education, Doctor of Philosophy (Ph.D.)
with a concentration in art education

Program goal
The art education concentration allows students to connect contemporary art and education theories and philosophies, practical and professional experiences, and impact research to develop an area of expertise relevant to the field of art education. The program distinguishes itself by integrating urban community engagement, digital and emerging media, and research and assessment in diverse settings. Graduates will be highly qualified to serve in teaching, research and leadership positions at universities and in arts and education organizations.

Student learning outcomes
1. Complete an original research study: dissertation component – Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Department of Counselor Education

Colleen Thoma, Ph.D.
Professor and chair

The Department of Counselor Education at Virginia Commonwealth University is committed to excellence in the initial preparation and continuing development of professionals in the counseling field. The department, located in an urban setting, provides graduate students with research-based professional studies and clinical experiences necessary for effective counseling, advocacy and leadership in diverse geographic and socioeconomic settings. Specifically, the department prepares counselors with the specialized knowledge and skills required for placement in elementary, middle and high schools, as well as postsecondary educational institutions in the commonwealth of Virginia and throughout the nation. Consistent with this approach are the program goals of graduating students who have knowledge of basic counseling theory and practice, possess competencies in essential counseling services, exhibit scholarly inquiry, have the skills necessary to evaluate relevant research, are committed to evaluating their counseling interventions and participate in a variety of professional development activities.

- Counselor Education, Master of Education (M.Ed.) with a concentration in:
  - College student development and counseling (p. 464)
  - School counseling (p. 466)
  - Education, Doctor of Philosophy (Ph.D.) with a concentration in counselor education and supervision (p. 468)
  - College Student Development and Counseling, Certificate (Post-baccalaureate graduate certificate) (p. 462)

College Student Development and Counseling, Certificate (Post-baccalaureate graduate certificate)

Program accreditation

Council for Accreditation of Counseling and Related Academic Programs

program will prepare counselors and other student affairs professionals for work in postsecondary educational settings.

Student learning outcomes

1. Professional orientation/professional identity/continuing education: Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.
4. Helping relationships/group work/career development/wellness: Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
5. Students display knowledge and skills related to responding to crises, emergencies and disasters.
6. Students participate in the design, implementation and evaluation of programs that promote wellness as well as prevention and intervention services.
7. Human development/wellness: Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.
8. Social and cultural diversity/social justice and advocacy: Students display knowledge and understanding of diversity and equity issues and how these issues impact clients’ academic, personal and career opportunities.
9. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
10. Students display knowledge and understanding of the relationship between counseling programs and academic achievement including an understanding of factors that promote student success and work to close the achievement gap among disenfranchised groups.
11. Assessment: Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and they possess knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.
12. Research: Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions; students also display skills and professional practices in appropriate collection, analysis and use of data.
13. Leadership: Students display knowledge of issues that affect student affairs practice and demonstrate an understanding of leadership, organization and management practices that help institutions accomplish their missions.
14. Students advocate for policies, programs and services that are equitable and responsive to the unique needs of postsecondary students.
15. Students use and analyze multiple data sources, including institutional data, to make decisions about improving differentiated student programs and they develop measurable outcomes for student development activities.
16. Students collaborate with the postsecondary community to assist students and use postsecondary community resources to improve student learning and development.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.gradient.admissions.vcu.edu).

Counselor Education, Master of Education (M.Ed.) with a concentration in college student development and counseling

Program accreditation
Council for Accreditation of Counseling and Related Academic Programs

Program goal
The M.Ed. in Counselor Education with a concentration in college student development and counseling is a 48-credit-hour program designed to prepare counselors for higher education and community agencies throughout Virginia and the nation. The college student development and counseling concentration provides students with the specialized knowledge and skills necessary for employment as student affairs professionals in higher education settings. The program is accredited by the Council for Accreditation of Counseling and Related Programs and requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

Student learning outcomes
Professional orientation/professional identity/continuing education
1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness
1. Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness
Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy
1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients’ academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

Assessment
Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

Research
Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

Leadership
1. Students display knowledge of issues that affect student affairs practice and demonstrate an understanding of leadership, organization and management practices that help institutions accomplish their missions.
2. Students advocate for policies, programs and services that are equitable and responsive to the unique needs of postsecondary students.
3. Students use and analyze multiple data sources, including institutional data, to make decisions about improving differentiated student programs and students develop measurable outcomes for student development activities.
4. Students collaborate with the postsecondary community to assist students and use postsecondary community resources to improve student learning and development.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu) and academic regulations in individual school and department publications and on program
websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Students accepted into the counselor education program must make satisfactory progress toward their degrees. Students who earn unsatisfactory grades and/or exhibit unprofessional conduct may be terminated from the program. More specific information about satisfactory academic progress can be found on this website at satisfactory (p. 38)academic progress (p. 38).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline

2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Personal interview may be required
6. Satisfactory scores on the GRE or MAT

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirements: Students must complete approved internship.
4. Testing requirements: Students must provide acceptable score on the National Counselor Examination.

Total Hours: 48

Total graduate credit hours required (minimum) 48

Graduate program director
Colleen Thoma, Ph.D.
Professor and chair, Department of Counselor Education
Email: cathoma@vcu.edu
Counselor Education, Master of Education (M.Ed.) with a concentration in school counseling

Program accreditation
Council for Accreditation of Counseling and Related Academic Programs

Program goal
The M.Ed. in Counselor Education with a concentration in school counseling is a 48-credit-hour program designed to prepare counselors for elementary, middle and high schools. The school counseling concentration leads to school counseling licensure and preparation for advanced graduate work at the post-master’s level. The program is accredited by the Council for Accreditation of Counseling and Related Programs and requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

For students who already have a master’s degree in education, the 36 credit hours of program core courses in the school counseling concentration also will lead to recommendation for licensure as a school counselor. Students who wish to gain this licensure must meet with the department chair and file a plan of study. Although students holding master’s degrees do not apply for admission to the graduate program, they must file the appropriate plan of study in order to qualify for the VCU-approved program of study. No course work taken more than seven years prior to applying for licensure as a school counselor will count toward meeting VCU’s approved program course equivalents.

Student learning outcomes

Professional orientation/professional identity/continuing education
1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

Helping relationships/group work/career development/wellness
1. Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

Human development/wellness
Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

Social and cultural diversity/social justice and advocacy
1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients’ academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

Assessment
Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possess knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

Research
Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

For school counseling concentration
1. Students display knowledge of the professional models that guide the practice of school counseling and demonstrate the ability to articulate, model and advocate for appropriate school counselor duties and programs.
2. Students display knowledge and understanding of the role of family-school-community collaboration on student development and strategies to enhance collaboration.

Leadership
Students display knowledge and understanding of leadership models and of the school counselor’s role in school leadership; students display appropriate skills and dispositions for working in a leadership capacity in school counseling.

The counselor education and supervision concentration is designed to prepare experienced, research-oriented master’s-level counselors for academic positions focused on research, service, teaching and counselor education. Doctoral students will integrate theory, research and practice in areas of counselor supervision and training, counselor education and teaching, advanced counseling, diversity and multiculturalism, leadership, advocacy, and social justice.

Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills: research component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

Department of Educational Leadership

Cheryl Magill, Ph.D.
Interim chair

The mission of the department is to prepare reflective instructional leaders for K-12 schools and for literacy programs and corporate training centers. Through course work and other experiences, the program aims to turn out leaders who are able to develop positive school cultures through the use of communications skills and by appropriation of fiscal, material and human resources.

The department offers programs that lead to the M.Ed., Post-master’s Certificate and Ph.D. in Education with a track in educational leadership. Individuals who complete one of those programs may qualify for endorsement by the Virginia Department of Education as administrator/supervisor. An optional track M.Ed. is offered for individuals in institutions of higher education and other settings who will benefit from...
the study of educational leadership but do not wish to seek positions as school administrators.

For more information consult the department’s website (http://www.soe.vcu.edu/academics_programs/educational-leadership).

- Education, Doctor of Philosophy (Ph.D.) with a concentration in:
  - Educational leadership (p. 470)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in:
  - Administration and supervision (p. 473)
  - Leadership studies (p. 475)
- Leadership, Doctor of Education (Ed.D.) (p. 476)
- Educational Leadership, Certificate in (Post-master's certificate) (p. 471)

**Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership**

**Program goal**

The educational leadership concentration is designed primarily for line administrative personnel in public school units. Emphasis is placed on providing leadership training for superintendents, building principals and assistant principals.

**Student learning outcomes**

1. Complete an original research study: dissertation component – Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student’s work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Educational Leadership, Certificate in (Post-master’s certificate)

Program accreditation
National Council for Accreditation of Teacher Education; Specialized Professional Association

Program goal
The post-master’s certificate is a 21-hour program for individuals who hold a master’s degree in the field of education or a master’s degree that meets the requirements to hold a teaching position, who have an active teaching license, and who have at least two years of school experience in an instructional personnel position that requires licensure in Virginia. An end-of-program assessment is required. Individuals must meet technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

This program is delivered through an innovative, competency-based curriculum comprising a combination of face-to-face and online courses offered for one, two or three credits. The program features authentic
real-time computer-simulated experiences imbedded in several courses throughout the program.

Please visit the Department of Educational Leadership’s auto-advising webpage for program-specific application requirements.

1 Virginia Board of Education licensing regulations require, in part, that applicants for administration/supervision endorsement have three years of successful, full-time experience in a public school or accredited nonpublic school in an instructional personnel position that requires licensure in Virginia.

Student learning outcomes

1. Candidates demonstrate content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Design, align, evaluate curriculum, guide learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/practical clinical: Candidates demonstrate effective applications in internship/practical clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://wwwGraduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the VCU Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://wwwGraduate.admissions.vcu.edu).

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Must hold a master’s degree in the field of education or a master’s degree that meets the requirements to hold a teaching position
2. Have active teacher license
3. Have at least two years of school experience in an instructional personnel position that requires licensure in Virginia
4. Three letters of recommendation addressing the student’s potential for graduate study in education
5. Student’s written statement concerning career interests
6. Transcripts of all previous college work

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 21 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students must take the School Leaders Licensure Assessment for graduation.

**Program website:** soe.vcu.edu (http://www.soec.vcu.edu)
Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies

Program goal
The leadership studies concentration of the M.Ed. in Educational Leadership is a 30-credit-hour program for individuals who hold or expect to hold leadership positions in educational organizations but who do not wish to obtain the administration/supervision endorsement from the Virginia Department of Education. Applicants are expected to have at least two years of experience in an educational setting. The program includes 15 hours of credit in required courses and 15 hours in a concentrated series of electives chosen with approval of the student's adviser.

This program is delivered through an innovative, competency-based curriculum comprising a combination of face-to-face and online courses offered for one, two or three credits. The program features authentic real-time computer-simulated experiences imbedded in several courses throughout the program.

Student learning outcomes
1. Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
5. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
6. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. Leadership, Doctor of Education (Ed.D.)

Program goal

The purpose of the Ed.D. in Leadership program is to provide leaders with authentic experiences, appropriate knowledge and skills, and opportunities for reflection that will enable them to succeed in organizational leadership positions. Three analytic lenses — equity, accountability and learning environments — will guide learning activities and enable students from varying backgrounds to consider learning through common perspectives.

Students will examine cases built around enduring questions in the field and examine these questions through three lenses: learning, equity and accountability. Questions will be explored through contrasting evidence from economic, systems, legal, human relations and political data and perspectives. The program content and assessments will correlate to common curriculum elements across perspectives.

Program features

The Ed.D. in Leadership is a 48-hour, 36-month program. Based upon principles of adult learning, the program has the following features:

1. Practitioner-oriented
2. Competitive admissions
3. Midcareer entry
4. Prescribed curriculum, with extensive use of case-study approach
5. Learning-community based
6. Problem-oriented pedagogy and curriculum
7. Collaborative instruction involving VCU full-time faculty and area practitioners
8. Applied research dissertation as a culminating project
9. Varied meeting formats: weekends, evenings, monthly, weekday blocks of time, summer full-day institutes, face-to-face and online

Student learning outcomes

1. At the beginning of the Ed.D. program, participants create an online digital portfolio site that consists of two elements: a blog that provides a venue for reflection on their learning and a collection of artifacts that attest to their learning as a leader, with each artifact specifically related to their involvement in the program. Participants populate both elements of the portfolio at their own discretion throughout the first year. In the concluding month of the first year in the program, participants individually present their portfolios to a review team of two faculty members who rate the quality of the educational experience as reflected in each participant’s portfolio.
2. During the second year of the Ed.D. program, participants work in teams to complete evaluations of programs currently in use in their workplaces. Teams confer with workplace supervisors to develop goals and objectives, review literature related to the program they are evaluating, design an evaluation study, collect and analyze data, and develop conclusions and recommendations. The final products include a formal report, an executive summary and two presentations: one to the workplace supervisor and a second to the other program participants.
3. Graduate students must be approved for degree candidacy status by the Graduate School to be eligible to receive a graduate degree. Participants who meet the following criteria are eligible for candidacy status, upon recommendation of their faculty advisers.
4. Capstone project: Candidates collaborate in teams of three or four to design, implement, analyze and defend a study of an issue identified by an organizational client. Participating organizational clients describe the issue that they propose for study, and affinity groups of three or four candidates coalesce around issues of personal academic and professional interest, familiarity and expertise. Under the supervision of a faculty member with appropriate academic credentials, each team of students develops a response to the proposal of that team’s preferred organizational client. The team’s response contains a projected research design and timeline. If this is accepted on behalf of the organizational client by the appropriate representative (referred to as the client in the following), an informal
contract agreement is signed. Candidates commence review of extant literature related to the issue and gather preliminary data utilizing sources identified by the client. This preliminary phase culminates in the defense of a capstone proposal to the team’s committee. Capstone committee members are graduate faculty members. Each committee consists of a chair, who is the supervisor of the team’s initial research activities, and two additional members. Once the capstone proposal is defended, the team begins to collect its own current data pertaining to the issue identified by the client. Each capstone committee member independently reviews the work of the team as work proceeds. After one semester of the capstone project, each team presents and defends to the capstone committee and the client separately an interim report, which may include a revised timeline. If this interim report is approved, each team proceeds to complete the collection of data, analyze the data, draw conclusions on the basis of the data analysis and prepares both an executive summary and a full report on the client’s issue. Toward the end of the second semester of the capstone project, each team presents and defends both the executive summary and the full report to the capstone committee and the client separately.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Master’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Professional vita or resume that addresses colleges or universities attended, educational degrees held, including major/minor, work history in chronological order, beginning with current position, leadership experiences, professional involvement, and awards and honors
6. Evidence of at least three years of successful leadership experience including evidence of leadership accomplishment for each of three areas:
   a. leadership for learning
   b. leadership for equity
   c. leadership for accountability
   [This evidence might be a combination of artifacts, testimonials, reports, newspaper documentation or other evidence that provides a description of your ability to lead for learning, equity and accountability. Evidence can be in hard copy format or on a website specifically created for this purpose. (We are seeking candidates who have successfully addressed the issues of student and/or organizational learning, equitable treatment and outcomes, and accountability to students.)]
7. At least a 50th percentile score on the Miller Analogies Test
Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Capstone requirements: Students must complete and defend a team-based capstone research project.

Total graduate credit hours required (minimum) 48

Graduate program director
Cheryl C. Magill, Ph.D.
Interim chair, Department of Educational Leadership
Phone: (804) 828-1940
Email: ccmagill@vcu.edu

Program website: soe.vcu.edu (http://www.soe.vcu.edu)

Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology

Program goal

The educational psychology concentration is designed to train research-oriented doctoral students who want to promote the success of students in educational environments. Doctoral students will integrate theory and research in the areas of developmental psychology, cognition, social psychology and motivation, assessment, exceptional learners, and diversity to better study learning in schools or school-like settings.

Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design in psychological, cultural, philosophical, historical and ethical areas of inquiry. As such, the department provides an essential link between practice and theory that makes effective reflection and decision making possible. By facilitating a rich contextual understanding of contemporary educational issues and practices, the department enhances the ability of educators to be reflective decision makers who make effective use of complex judgments and critical thinking. Our goal is to prepare educators for intelligent, responsible leadership in a variety of educational careers and settings for teaching, research, administration and policymaking.
research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Baccalaureate or master’s degree in psychology, educational psychology or related discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. A personal interview and writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the VCU Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

**Program website:** soe.vcu.edu (http://www.soe.vcu.edu)

**Department of Special Education and Disability Policy**

Colleen Thoma, Ph.D.

Professor and chair

The mission of the Department of Special Education and Disability Policy is to prepare skilled, effective professionals who can meet the educational needs of children and youth with disabilities and their families through graduate degree programs, discover new instructional and service delivery strategies through an ongoing program of research, and share information on these strategies to a wide audience through collaborative relationships with children and youth with disabilities, their families, educators, local, state and federal government agencies, and other professionals throughout the commonwealth and across the nation.

The department offers extended teacher preparation programs that allow students to prepare for professional roles as teachers of students with emotional disturbance, learning disabilities, or mental retardation. These five-year programs culminate in the simultaneous awarding of both a bachelor’s degree from the College of Humanities and Sciences and a Master of Teaching degree from the School of Education.

At the graduate level, the department offers five Master of Education programs. Successful completion of one of the degree programs leads to endorsement in early childhood special education, emotional disturbance, learning disabilities, mental retardation or severe disabilities. In addition, the department offers a Ph.D. in Education with a concentration in special education and disability policy.

For more information consult the department’s website (http://www.soe.vcu.edu/academics_programs/special-education-and-disability-policy).

- Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership (p. 485)
- Special Education, Master of Education (M.Ed.) with a concentration in:
  - Early childhood (p. 487)
  - General education (p. 489)
  - Severe disabilities (p. 491)
- Autism Spectrum Disorder, Certificate in (Post-baccalaureate graduate certificate) (p. 482)
- Disability Leadership, Certificate in (Post-baccalaureate graduate certificate) (p. 484)

### Autism Spectrum Disorder, Certificate in (Post-baccalaureate graduate certificate)

**Program goal**

The post-baccalaureate graduate Certificate in Autism Spectrum Disorder is designed to prepare personnel to support individuals with autism spectrum disorders in the educational setting from early intervention through adult services. The purpose of the certificate is to provide the wide range of competencies necessary for the provision of effective educational programming. The course sequence enables personnel to develop comprehensive knowledge and experience in assessment, teaching strategies and curriculum development. The certificate is geared toward teachers, potential teachers and related service personnel. However, it is available to all professionals working in the human service setting who wish to gain expertise in this area.

All applicants must hold a bachelor’s degree in any area related to education, social work, psychology or human services. Participants are required to earn 12 graduate credit hours as outlined below. Upon successful completion of the certificate program, participants will be able to:

1. Describe the primary and secondary characteristics of ASD and the impact on communication, socialization, sensory responses, patterns of behavior and learning style throughout the lifespan.
2. Understand the concerns of families of individuals with ASD and describe strategies and provide resources to help address these concerns.
3. Understand and apply theories and research that form the basis of curriculum development and instructional practice.

4. Assess student ability and develop individualized programs that use evidence-based practice to support and enhance learning across environments and across areas of development and need.

5. Describe the behavior of individuals with ASD in terms of its function and identify how to provide positive behavioral support in order to replace existing problem behavior or prevent the development of new problem behaviors.

6. Provide environmental supports, structure and technology adaptations to provide optimal learning and independence for individuals with ASD across environments.

The four autism spectrum disorder courses can also be completed by students who do not wish to earn the post-baccalaureate certificate. In this case, admission to the VCU Graduate School is not required. Individual student needs and preferences determine the best way for the student to proceed.

**Student learning outcomes**

1. Participants understand the field as an evolving and changing discipline based on philosophies, evidence-based principles and theories, relevant laws and policies, diverse and historical points of view, and human issues that have historically influenced and continue to influence the field of special education and the education and treatment of individuals with ASD. Participants understand how these influence professional practice, including assessment, instructional planning, implementation and program evaluation.

2. Participants understand the characteristics of those with ASD and the educational implications. This includes an understanding of:
   a. Core and associated characteristics of individuals with developmental disabilities/autism spectrum disorders
   b. Medical aspects and implications for learning for individuals with developmental disabilities/autism spectrum disorders
   c. Co-existing conditions and ranges that exist at a higher rate than in the general population
   d. Different ways of learning and the impact of academic and social abilities, attitudes, interests and values on instruction

3. Participants demonstrate knowledge of evidence-based practices selecting, adapting and using instructional strategies and materials according to characteristics of the individual with ASD. Participants demonstrate knowledge of evidence-based practices designed to target communication, social, behavior, sensory and academic needs.

4. Participants understand how to develop and implement comprehensive, longitudinal individualized programs in collaboration with team members. Participants demonstrate knowledge of instructional and assistive technology that can be integrated into the educational program. Participants understand how to plan systematic instruction based on learner characteristics, interests and ongoing assessment use.

5. Participants demonstrate knowledge of the components of assessment for individuals with developmental disabilities/autism spectrum disorders including both formal and informal assessments. Participants understand the need to assess individual strengths, skills and learning styles.

6. Participants understand the importance of collaboration with school personnel and families and demonstrate knowledge of related skills. Participants understand how to communicate effectively with families of individuals with ASD. Participants understand the value of observing, evaluating and providing feedback to paraeducators who work under their supervision.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Disability Leadership, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Certificate in Disability Leadership is a 12-hour certificate program designed to prepare health professionals, special educators and other professionals in related disciplines in the field of childhood neurodevelopmental disabilities to be leaders in the health care system. The program provides a 12- to 24-month curriculum of didactic and Web-based courses, interactive seminars, clinical and community-based practica, a family mentorship experience and planned grassroots- and systems-level policy activities.

The certificate is earned by completing the Virginia Leadership Education in Neurodevelopmental Disabilities interdisciplinary training program. Va-LEND is a collaboration among the School of Education (Partnership for People with Disabilities), the VCU School of Medicine (Department of Pediatrics) and the Virginia Department of Health (Title V Program). The LEND curriculum emphasizes all aspects of neurodevelopmental and related disabilities, the social environment (including ethnic and cultural issues), the interdisciplinary approach (systems of care), leadership (advocacy and public policy as well as administration) and research. Following completion of the program, the trainees will be able to serve as leaders in the field of child health and neurodevelopmental disabilities.

Student learning outcomes

1. Students will demonstrate an understanding of the nature and range of neurodevelopmental disabilities.
2. Students will demonstrate an understanding of the team approach to serving individuals with neurodevelopmental disabilities and their families.
3. Students will demonstrate an understanding of community services and resources available to individuals with neurodevelopmental disabilities and their families.
4. Students will demonstrate an understanding of their role as advocates for individuals with neurodevelopmental disabilities and their families.
5. Students will be involved in a leadership role with an organization serving individuals with neurodevelopmental disabilities and their families.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin...
and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Completion of the Va-LEND application and submission to Janet Willis (jhorsely@vcu.edu) by June 1 to begin classes in the fall semester

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 12 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership

Program goal

The special education and disability leadership concentration is designed primarily for individuals employed in leadership positions in the field of special education. Emphasis in this concentration is placed on developing in-depth knowledge about topics as they pertain to personnel development, research, issues and policies in special education.

Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of
the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Total graduate credit hours required (minimum) 48

Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education or severe disabilities.

The Master of Education in Special Education program with an early childhood concentration is a sequentially planned series of courses and clinical experiences designed to prepare individuals to work with young children, from birth through age 5, with developmental disabilities and their families. The courses are delivered using a hybrid of online and face-to-face formats. The program is learner-centered, innovative, interactive and collaborative. Through online discussions and face-to-face meetings with faculty members, community partners, student peers and program graduates, the ECSE teacher candidates have multiple opportunities to engage in interactive, proactive and dynamic dialogues.

Successful completion of the degree program qualifies students for teacher licensure with endorsement in early childhood special education by the Virginia Department of Education. Students are prepared to intervene with infants and young children representing a wide range of abilities, including those at risk for developmental delays and those at risk for severe disabilities. As a result of training, students will be prepared to serve children and families in diverse and high-need communities in a variety of early intervention roles. The program can be completed in five semesters of full-time study or six semesters of part-time study.

In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education early childhood curriculum.

Student learning outcomes

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.

2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.

3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.

4. Effect on student learning: Candidates demonstrate effects on student learning as evidenced by the unit plan with curriculum-based measure — secondary.

5. Candidates demonstrate CEC standards proficiency: Candidates further demonstrate proficiency on CEC competencies as evidenced by the assessing a child/IEP assignment, the multicultural poster and paper, and the functional behavior assessment/behavior intervention plan.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. completing a variety of transitions, such as from special education to social skills. Candidates are prepared to work with students in management, and the use of interactive strategies that teach positive special training is provided in teaching reading and language, behavior professional knowledge and skills needed to work in a variety of settings. education general curriculum is designed to prepare graduates with the concentration, which can lead to an endorsement in the special education general education concentration will encompass broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized courses develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in a special education-general education setting, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with high-incidence disabilities. In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education general curriculum.

The program offers candidates the opportunity to complete clinical placements in their own classroom or school with approval from VCU faculty and supervision by trained personnel. Placement opportunities for clinical experiences include a range of public and private schools and mental health programs that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students will have the opportunity to complete a practicum in addition to the externship. When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students enrolled in special education, general curriculum in grades K-12. Candidates are offered the option of taking a full-time or an on-the-job externship for a semester.

**Student learning outcomes**

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.

**Total graduate credit hours required (minimum) 37**

**Program accreditation**

National Council for Accreditation of Teacher Education; Council for Exceptional Children

**Program goal**

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education or severe disabilities.

The online Master of Education in Special Education general education concentration, which can lead to an endorsement in the special education general curriculum is designed to prepare graduates with the professional knowledge and skills needed to work in a variety of settings.

1. General education classrooms (where children with special needs are being collaboratively taught)
2. Resource, modified resource or collaborative resource rooms
3. Self-contained settings or classrooms in varied urban, suburban or rural areas
4. Residential programs
5. Various community environments

Special training is provided in teaching reading and language, behavior management, and the use of interactive strategies that teach positive social skills. Candidates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.
VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

SERVICES IN THE RICHMOND AREA. SIX ONE-CREDIT HOUR EXTERNALSHIP CURRENTLY SERVE STUDENTS WITH SEVERE DISABILITIES (OR IN ONE OF THE MANY PROGRAMS) COMPLETE A FIELD-BASED EXTERNALSHIP IN THEIR SCHOOL (IF THEY wish). ALL CORE COURSES ARE OFFERED THROUGH THE VIRGINIA SEVERE DISABILITIES CONSORTIUM, BUT ARE ACCESSED THROUGH VCU. STUDENTS ENROLLED IN THE MASTER OF EDUCATION IN SPECIAL EDUCATION SEVERE DISABILITIES OR General education. APPLICANTS WHO DO NOT ALREADY HOLD A TEACHING LICENSE MUST MEET BOTH LICENSURE AND DEGREE REQUIREMENTS PRIOR TO THE AWARDING OF THE MASTER OF EDUCATION DEGREE UNLESS EXEMPTED AS A PROFESSIONAL FROM ANOTHER DISCIPLINE. STUDENTS SHOULD PLAN CAREFULLY WITH THEIR ADVISER TO ENSURE THAT THE APPROPRIATE COURSES AND EXPERIENCES ARE COMPLETED. SUCCESSFUL COMPLETION OF THE DEGREE PROGRAM LEADS TO ENDORSEMENT IN EARLY CHILDHOOD SPECIAL EDUCATION OR SEVERE DISABILITIES.

THE MASTER OF EDUCATION IN SPECIAL EDUCATION SEVERE DISABILITIES CONCENTRATION IS DESIGNED TO PREPARE TEACHERS TO WORK WITH STUDENTS IN GRADES K-12 IN PUBLIC SCHOOL SETTINGS. THROUGHOUT THE PROGRAM, EMPHASIS IS PLACED ON PERSON-CENTERED PLANNING, SCHOOL AND COMMUNITY INCLUSION, TRANSDISCIPLINARY TEAMWORK AND THE ROLE OF THE FAMILY.

COURSES ADDRESS PHYSICAL AND MEDICAL MANAGEMENT ISSUES, FUNCTIONAL ASSESSMENT STRATEGIES, LONGITUDINAL CURRICULUM PLANNING, SYSTEMATIC INSTRUCTION, AUGMENTATIVE AND ALTERNATIVE COMMUNICATION SYSTEMS, ASSISTIVE TECHNOLOGY, TRANSITION FROM SCHOOL TO ADULTHOOD, POSITIVE BEHAVIORAL SUPPORTS AND THE SPECIAL NEEDS OF STUDENTS WITH AUTISM OR PHYSICAL, SENSORY AND HEALTH-RELATED DISABILITIES.

All core courses are offered through the Virginia Severe Disabilities Consortium, but are accessed through VCU. Students enrolled in the program complete a field-based externship in their school (if they currently serve students with severe disabilities) or in one of the many public schools in the Richmond area. Six one-credit-hour externship experiences are spread throughout the course of study and are designed to meet the students’ needs for professional development.

All candidates are required to submit a final portfolio as the capstone requirement of the program. Successful completion of the 42-credit-hour program results in eligibility for Virginia endorsement in special education, adapted curriculum in addition to the Master of Education degree.

### Student learning outcomes

1. Demonstrate content knowledge in special education: Candidates demonstrate content knowledge in special education as evidenced by the final portfolio and case-study paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction or activities for other roles as special educators as evidenced by the UDL/collaboration unit plan.
3. Effectively apply knowledge, skills and dispositions (clinical experience): Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Effect on student learning: Candidates demonstrate effects on student learning as evidenced by the unit plan with curriculum-based measure – secondary.
5. Candidates demonstrate CEC standards proficiency: Candidates further demonstrate proficiency on CEC competencies as evidenced by the assessing a child/IEP assignment, the multicultural poster and paper, and the functional behavior assessment/behavior intervention plan.

Graduate program director
Department of Teaching and Learning

Joan Rhodes, Ph.D.
Associate professor and interim chair

The Department of Teaching and Learning is committed to excelling in the initial and continuing preparation of teachers for the commonwealth, with particular emphasis on early childhood through secondary education in diverse settings; to collaborating with colleagues in educational agencies; to applying research about learning in classrooms; to undertaking scholarly endeavors that examine learning and teaching processes; and to providing technical assistance to special populations and service to school divisions and agencies.

The department values:

- Providing the highest quality teaching and opportunities for learning
- Integrating academic disciplines, professional studies and clinical experiences as program components for student learning
- Collaborating in the preparation of teachers and in the continuing development of faculty both within the university and in public and private educational settings
- Enabling teachers and intending teachers to work effectively with students from diverse populations and those with special needs
- Helping intending teachers become effective decision-makers and practicing teachers refine their decision-making skills in the roles for which they are preparing
- Effectively modeling the use of technology to enhance and foster learning
- Incorporating, among others, developmental, cognitive and functional approaches and content areas in the preparation of personnel in early, middle, secondary and special education programs
- Serving the university through faculty participation in institutional committees and task forces, programs, and supportive research and service institutes and centers within the university
- Serving the community through technical assistance, workshops, consulting education activities, professional development schools and other partnerships

For more information consult the department’s website (http://www.soe.vcu.edu/academics_programs/teaching-and-learning).

Adult Learning, Master of Education (M.Ed.) with a concentration in adult literacy

Program goal

The Master of Education in Adult Learning is a 33-credit hour program of study that prepares individuals for a broad range of positions related to the education of adult learners. Students choose one of three elective concentrations in adult literacy, human resource development, or teaching and learning with technology. Graduates are found in major corporations, higher education, health care organizations, state and federal agencies, nonprofit and community-based organizations and human services agencies. Admission to the program is predicated on the “whole person” concept, taking into account life experience, academic record, references and the reasons for the student’s interest in the program. An interview with the program adviser is recommended prior to admission. Successful applicants will have sufficient prior work experience with adults as learners to enable them to bring relevant work experience into the classroom learning environment.

The program provides a foundation in educational research methods and a strong core of seven courses in the theory and practice of adult learning, including emphasis in development of facilitation skills, as well as the design and delivery of adult learning programs. Upon completion of the foundation and core courses, students choose one of three concentration areas: adult literacy, human resource development (learning in the workplace) or teaching and learning with technology. The last course in the program, a capstone seminar in action learning, reunites students from all three concentrations for a comprehensive synthesis experience as they work in action learning teams to solve a real problem of strategic importance to an organization in the community.

A unique feature of the program is the learning portfolio, maintained in an online journal (blog) format. The learning portfolio, in combination with the capstone seminar, replaces a comprehensive examination requirement. For the portfolio, students write reflective blog entries during each of the core and concentration courses. During the program, selected assignments are posted to the blog to document personal growth and learning over time. At the end of the program, students create a synthesis of their learning in an essay format or through creation of a digital story. The portfolio serves as a demonstration of the graduate’s abilities to a prospective employer and can be added to a student’s resume. Throughout, the program utilizes students’ experiences in working with adults as learners to unite theory with practice and emphasizes 21st-century technologies for teaching and learning.

Student learning outcomes

1. In earning the M.Ed. in Adult Learning, students demonstrate the ability to articulate a personal philosophy of adult learning practice that enables them to work effectively as leaders and facilitators to improve adult learning, as evidenced on the final program learning assessment.

2. M.Ed. in Adult Learning students will demonstrate their ability to integrate their knowledge of all facets of adult learning to have a significant impact on the practices, culture and learning environments of the organizations in which they work.

3. Students will demonstrate their knowledge of the nature, function and scope of adult learning during the capstone experience of the program.

4. Students in this program will demonstrate their awareness of the processes of adult learning and development during their capstone experience.

5. Students will acknowledge the influence of technology in adult learning, as evidenced in their final program learning assessment.

6. Student will demonstrate their awareness of educational research in the adult learning field, as evidenced on the research on instructional strategy and organizational change strategy analysis rubrics.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Program goal**

The Master of Education in Curriculum and Instruction program is designed to provide professional and cognate experiences for experienced educators seeking to develop additional skills in the use of technology in support of teaching and learning.

**Student learning outcomes**

1. Students will demonstrate an understanding of research designs and an ability to read research studies critically.
2. Students will demonstrate an understanding of the historical, philosophical, sociological and ethical foundations of education and the impact that these have on public education.
3. Students will demonstrate an understanding of the use of technology in support of student learning and the instructional process.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Three letters of recommendation addressing the student's potential for graduate study in education
2. Student's written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in online teaching

Program mission

The online teaching concentration of the Master of Education in Curriculum and Instruction is designed to prepare K-12 teachers and administrators to develop and facilitate effective online instruction in K-12 environments.

Program goals

1. Expand on participants’ current teaching expertise in instructional strategies, curriculum design and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

Student learning outcomes

1. Participants will demonstrate effective electronic communication methods for instruction in the K-12 environment.
2. Participants will reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas.
3. Participants will demonstrate effective virtual systematic instructional design though the development of a virtual learning environment.
4. Participants will demonstrate effective facilitation of virtual instruction including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning.
5. Participants will demonstrate knowledge of effective strategies for assessment and evaluation in online environments through the development of rubrics and alternative assessment tools.
6. Participants will demonstrate knowledge of the TPACK framework in designing instruction with appropriate virtual tools.
7. Participants will demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues, and the development of appropriate materials that reflect effective time and course management by the course facilitator.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Three letters of recommendation addressing the student’s potential for graduate study in education
2. Student’s written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the VCU Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Student learning outcomes

1. Students will demonstrate an understanding of research designs and an ability to read research studies critically.

2. Students will demonstrate an understanding of the historical, philosophical, sociological and ethical foundations of education and the impact that these have on public education.

3. Students will demonstrate an understanding of the use of technology in support of student learning and the instructional process

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, the nature of research being conducted by a student, or in the enrollment or funding status of the student. Students should refer to the program website and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in teaching and learning

Program goal

The Master of Education in Curriculum and Instruction program is designed to provide professional and cognate experiences for students who have been admitted to the Master of Teaching program but choose not to complete licensure. Enrollment in the teaching and learning concentration requires recommendation from the student’s adviser and approval by the department chair. Content courses within the program are selected in consultation with an adviser.
Admission requirements
This concentration is intended for students who initially pursue a licensure program, but for whom that is no longer appropriate. Admission is by special action approved by the dean. Students may not apply directly to this concentration.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Education, Doctor of Philosophy (Ph.D.) with a concentration in curriculum, culture and change

Program goal
The curriculum, culture and change concentration offers a rigorous doctoral-level learning experience in curriculum and instruction with a strong emphasis on advocacy and social justice. The concentration prepares curriculum and instruction leaders for positions in school systems at the building level and above, as well as scholars with a wide range of curricular interests — urban education, rural education, linguistically diverse groups, oppressed groups, critical pedagogy, philosophical and sociocultural foundations of education, etc. In addition to a deep grounding in theoretical, practical and methodological approaches to curriculum and instruction, the concentration prepares instructional leaders to advocate for change across a wide range of institutions, systems and contexts. The concentration offers challenging learning experiences in the field of curriculum and instruction. Its expressed social justice values allow framing of courses in ways that provide critical analyses of contemporary schooling and ground students in the philosophical and historical roots of school change. The program welcomes students with interests in all institutional settings serving students across the life span (early childhood through adulthood) as well as informal and nonformal contexts. It also allows for discipline-specific cohorts in fields such as STEM and literacy.

The concentration distinguishes itself by preparing curriculum and instruction leaders to be change agents capable of working in school systems, higher education and advocacy organizations. It reflects an activist stance toward the education profession— one that views schooling as not only shaped by society but also as an active force for equity and meaningful societal change. It will appeal to a wide range of students: those who are seeking to become instructional leaders in school systems, those preparing to teach in the academy and all those desiring a strong foundation in educational reform.

Student learning outcomes
1. Complete an original research study: dissertation component — Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student’s work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.

2. Apply skills in external setting: externship component — Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

3. Develop research knowledge and skills: research component — Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student’s level of knowledge, a third faculty member is called in to evaluate the student’s responses on the qualifying examination. This exam is also graded “blindly,” meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study: concentration component — Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or
projected career goals. Content will differ according to chosen concentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

---

**Program goal**

The urban services leadership concentration has two focal areas with different emphases to develop leaders as scholars and practitioners in adult learning or health promotion and education.

**Adult learning**

Applicants are expected to have experience working with adult learners in organizational, community, government, higher education, health care or nonprofit settings or within the community in roles as faculty, faculty developers, trainers, human resource development and organizational development professionals, adult literacy educators, or other roles in which they are actively involved in the teaching and training of adult learners.

**Health promotion and education**

This focus is designed to prepare future researchers, faculty and practitioners for leadership roles in academic, government (local, state, national and international), voluntary health agencies and community-based and other health-related organizations. Doctoral students will utilize a multidisciplinary approach to develop a broad understanding of the critical issues and challenges in health promotion and health education and subsequently apply that understanding to the planning, implementation and evaluation of health promotion and education programs and initiatives.
continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Instructional Technology, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The post-baccalaureate Certificate in Instructional Technology prepares educators to use technology effectively in their schools and to provide instructional leadership and technical support to other educators who use computer technology. Designed for teachers, resource persons and administrators at all grade levels (K-12), the sequence in instructional technology offers a unique opportunity to develop comprehensive knowledge and experience in the educational applications of computers and related technologies. The primary purpose of this certificate program is to meet the growing need for highly qualified core curriculum teachers, instructional technology support teachers and associated administrative personnel. The program requires six three-credit-hour courses. In addition, prerequisites for the program require that students must be licensed K-12 teachers or administrators with a minimum of two years of classroom experience who have a basic knowledge of instructional media. The program is committed to providing access to technology so that hands-on experience is offered in every class and participants produce instructional material that can be immediately integrated into the classroom.

Student learning outcomes
1. Candidates will demonstrate the necessary knowledge and skills to facilitate effective learning experiences using technology.
2. Candidates will demonstrate their skills in visual arts.
3. Candidates will successfully demonstrate searching techniques.
4. Candidates will be able to produce and edit video for education.
5. Candidates will be able to set up online instructional modules incorporating various communication and digital activities for students.
6. Candidates will present at a conference and be able to prepare a professional development class in technology.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Medical Education, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The post-baccalaureate graduate Certificate in Medical Education is a 12-credit-hour program designed for faculty in the School of Medicine at Virginia Commonwealth University to enhance depth and breadth of faculty expertise in curriculum design and adult learning strategies for teaching, as well as to foster development of a cadre of academic leaders who can model best practices in teaching undergraduate, clinical and graduate programs.

Student learning outcomes
1. Students will be able to describe applications of curriculum design principles to medical education and adjust current medical education curriculum accordingly.
2. Students will be able to describe the nature of adult learning and how that applies to medical education.
3. Students will be able to apply principles of active engaged learning to medical education.
4. Students will be able to describe research paradigms in the study of teaching and learning.
5. Students will design a study to investigate teaching practices in medical education.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://wwwgraduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. Online Teaching for K-12 Educators, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The post-baccalaureate graduate Certificate in Online Teaching for K-12 Educators is a 17-credit-hour certificate designed to prepare candidates to develop and facilitate effective online instruction in K-12 environments. The goals for the certificate are to:

1. Expand on participants’ current teaching expertise in instructional strategies, curriculum design, and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

Student learning outcomes

1. Participants will demonstrate effective electronic communication methods for instruction in the K-12 environment.
2. Participants will reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas.
3. Participants will demonstrate effective virtual systematic instructional design through the development of a virtual learning environment.
4. Participants will demonstrate effective facilitation of virtual instruction, including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning.
5. Participants will demonstrate knowledge of effective strategies for assessment and evaluations in online environments through the development of rubrics and alternative assessment tools.
6. Participants will demonstrate knowledge of TPACK framework in designing instruction with appropriate virtual tools.
7. Participants will demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues and the development of appropriate materials that reflect effective time and course management by the course facilitator.

Reading, Master of Education (M.Ed.)

Program accreditation
National Council for Accreditation of Teacher Education; International Reading Association

Program goal
The Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences and pass the Virginia Reading Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

This program is offered in both traditional and online formats.
**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

### Endorsement in teaching English as a second language

Students who want to pursue an endorsement in teaching English as a second language may do so in conjunction with the M.Ed. in Reading. The endorsement requires 24 credit hours of study, none of which may be part of the master’s degree if TEDU 552 is selected as the restricted elective. Nine additional hours of ESL core work and six hours of a modern foreign language are also required. For additional information, see the school’s Added or add-on endorsements (p. 452) page in this bulletin or contact Valerie Robnolt, Ph.D. at vjobnolt@vcu.edu.

Reading, Master of Education (M.Ed.) with a concentration in K-12 reading specialist

Program accreditation
National Council for Accreditation of Teacher Education; International Reading Association

Program goal
The K-12 reading specialist concentration in the Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences and pass the Virginia Reading Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

A cooperative agreement has been established with Virginia State University to permit selected, qualified students to complete the M.Ed. in Reading program. Up to 12 credit hours from an approved list may be transferred from the cooperating institution. Interested students should contact the Department of Teaching and Learning.

Student learning outcomes
1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators/Virginia Reading Assessment scores and philosophy of reading paper.
2. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction or fulfill other professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.
3. Effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the internship evaluation.
4. Effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.
5. Candidates demonstrate IRA standards proficiency: Candidates further demonstrate proficiency on IRA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduated.vcu.edu).

5. Satisfactory scores on the GRE or MAT

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students in the K-12 reading specialist concentration must present passing scores on state mandated licensure/endorsement assessments.

Curriculum requirements

Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/K-12

Program accreditation
National Council for Accreditation of Teacher Education; International Reading Association

Program goal
Students who already have their K-12 initial licensure and want to pursue an endorsement in teaching English as a second language in the K-12 setting may do so in the K-12 subconcentration of the TESOL concentration in the M.Ed. in Reading. The following are prerequisites to the concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will not be endorsed as a K-12 reading specialist. Students interested in pursuing both endorsements must take the following nine credit hours in addition to the ones listed below: READ 600, READ 605 and READ 700.

Student learning outcomes
1. Demonstrate content knowledge in reading education: Candidates demonstrate content knowledge in reading education as evidenced by the Reading for Virginia Educators/Virginia Reading Assessment scores and philosophy of reading paper.
2. Demonstrate content knowledge in teaching English to speakers of other languages: Candidates demonstrate an understanding of the nature of second language learning and the relationship between L1 and L2 language and content acquisition.
3. Effectively plan instruction: Candidates demonstrate that they can effectively plan reading and literacy instruction or fulfill other
professional responsibilities in reading education as evidenced by the organizing and implementing reading programs assessment.

4. Effectively apply knowledge, skills and dispositions: Candidates demonstrate that knowledge, skills, and dispositions are applied effectively in practice as evidenced by the internship evaluation.

5. Effect on student learning: Candidates demonstrate effects on student learning and provision of supportive learning environments for student learning as evidenced by the internship progress report.

6. Candidates demonstrate IRA standards proficiency: Candidates further demonstrate proficiency on IRA competencies as evidenced by the portfolio assessment and the externship action research report and presentation assessment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/adult

Program goal
Students who are interested in teaching English as a second language to adults may develop their knowledge and skills in the adult concentration of the TESOL track in the M.Ed. in Reading. Those who are interested in pursuing an endorsement in teaching English as a second language in the adult setting must already have their K-12 initial licensure and adult education endorsement. The following are prerequisites to the concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will not be endorsed as a K-12 reading specialist.

Student learning outcomes
1. Demonstrate an understanding of the research methodologies in education with the capacity to read and evaluate the relevance and quality of educational research
2. Demonstrate an understanding of the developmental nature of adult learning
3. Demonstrate an understanding of the methodologies appropriate for teaching literacy skills to adults

4. Demonstrate an understanding of the nature of second language learning

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)

Program goal
This program is designed to prepare professionals to work with K-12 students for whom English is not the native language. The course sequence meets the Virginia Department of Education requirements for endorsement in ESL. Note that endorsement requires that individuals have an active teaching license in Virginia.

Student learning outcomes

1. Demonstrate foundational knowledge needed to support LEP students’ literacy learning
2. Effectively plan lessons that attend to linguistic proficiency of learners in various settings
3. Create assessments that assess LEP student competency in communication and content learning
4. Demonstrate a disposition of tolerance and appreciation for linguistic and cultural diversity
5. Demonstrate a range of teaching strategies and approaches that lead to LEP student learning

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program
Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Admission requirements
In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree in an appropriate discipline including education, social work, psychology or human services
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work

Note: Endorsement requires a valid Virginia teaching license.
education, who wish to become teachers in secondary schools in one
or more subjects and for whom a master’s degree is not a priority
(applicants already may have earned a master’s degree or wish to earn
a master’s degree in a specialized area of education later). Applicants must
have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the
bachelor’s level, including the courses listed below. Equivalent courses
taken within the past five years may transfer; however, a minimum of 27
credit hours, including clinical experiences, must be taken at VCU after
admission to the program.

Student learning outcomes
Persons completing the program are expected, among other attributes,
to:

1. Have an understanding of human development and learning theory
   appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible
   philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in
   cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development
   and learning

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in chemistry education

Program accreditation

National Council for Accreditation of Teacher Education
Program goal
The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor’s degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master’s degree is not a priority (applicants already may have earned a master’s degree or wish to earn a master’s degree in a specialized area of education later). Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor’s level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

Student learning outcomes
Persons completing the program are expected, among other attributes, to:

1. Have an understanding of human development and learning theory appropriate to the age group they will teach
2. Demonstrate knowledge of the subjects they will teach
3. Develop an understanding of purposes for education and a defensible philosophical approach toward teaching
4. Acquire awareness of the diversity of the school-age population in cultural background and styles of learning
5. Demonstrate an ability to plan and implement effective teaching
6. Measure student learning in ways that lead to sustained development and learning

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

</tbody>
</table>

Special requirements
- Admission to clinical experiences in schools requires a background check and fingerprinting.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree with a major, or equivalent, in chemistry
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center) section on the School of Education website for current testing requirements.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

3. Student teaching requirements: Students must successfully complete approved student teaching experience.

4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Teaching, Master of (M.T.) with a concentration in English education

Program accreditation
National Council for Accreditation of Teacher Education; Specialty Program Associations
Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 449) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

English education

1. Candidates demonstrate content knowledge in the English:
   Candidates demonstrate content knowledge in the English language arts as evidenced by Praxis II scores and the undergraduate transcript analysis.
2. Candidates demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instructions evidenced by the lesson plan assessment, lesson plan portion of the portfolio and the clinical evaluation continuum.
3. Measure candidate performance in internship: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.
4. Assess candidate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the lesson plan portion of the portfolio.
5. Candidates demonstrate NCTE standards proficiency: Candidates further demonstrate proficiency on NCTE competencies as evidenced by the dispositions assessment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gradschool.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.gradschool.vcu.edu).

Admission requirements

<table>

<td>GRE or MAT</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Nov 1</td>
<td></td>
</tr>
</tbody>
</table>
In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor’s degree.)
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

**Degree requirements**
In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

</tbody>
</table>

**Total graduate credit hours required (minimum) 33-34**

**Other curricular options**

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

**Graduate program director**
Joan Rhodes, Ph.D.
Associate professor and interim chair, Department of Teaching and Learning
Email: jarhodes2@vcu.edu
Phone: (804) 828-1305

**Program website:** soe.vcu.edu (http://www.soe.vcu.edu)

**Teaching, Master of (M.T.) with a concentration in biology education**

**Program accreditation**
National Council for Accreditation of Teacher Education; Specialty Program Associations

**Program goal**
The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

**Secondary education**
The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 449) is available in this bulletin.

**Student teaching requirements**
All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and
Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

**Student learning outcomes**

**Science education**

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Can effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.
7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.
8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Teaching, Master of (M.T.) with a concentration in early and elementary education

Program accreditation

National Council for Accreditation of Teacher Education; Specialty Program Associations

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Early and elementary education

Freshman students bound for the Master of Teaching program with a concentration in early and elementary education are required to enroll in the Bachelor of Interdisciplinary Studies with a liberal studies for early and elementary education major. This program offers liberal studies curriculum designed through an interdisciplinary collaboration among professors in the College of Humanities and Sciences and the School of Education in consultation with successful area teachers. It targets core knowledge across the four major subject areas represented in Virginia’s Standards of Learning (mathematics, sciences, social sciences and language arts/communication) while also providing a university-level skill set and knowledge base. Throughout the undergraduate program, contact with area schools and young learners is programmed into service and experiential learning venues.

Transfer students intending to be elementary teachers (and completing the Master of Teaching with a concentration in early and elementary education) are required to meet with advisers for the LSEEE major prior to registering for courses. Advisers will evaluate all courses successfully completed outside of the LSEEE major prescribed curriculum (from VCU or elsewhere) to determine their transferability to the LSEEE major.

LSEEE majors are encouraged to select at least one minor in order to deepen knowledge and appreciation of a subject area. Philosophy, religious studies, African American studies and international studies have relevance in their understanding of human investigation of knowledge, human behavior and world cultures. A minor in a science area like environmental studies may be more “employable” because of school and societal concerns about our planet and its preservation. In selecting the humanities and sciences minor, the choice should be based on the student’s interest and perceived relevance.

Consult with the appropriate professional studies adviser for additional information regarding professional studies and liberal arts requirements.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and
Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

**Student learning outcomes**

**Early and elementary education**

1. Candidates will master content knowledge: Candidates demonstrate content knowledge in the disciplines to be taught in an elementary classroom as evidenced by performance on Praxis II and the liberal arts equivalency GPA.
2. Candidates demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instruction as evidenced by the read-aloud lesson plan.
3. Measure candidate performance in internship: Candidates demonstrate application of knowledge, skills, and dispositions in practice as evidenced by the clinical evaluation continuum.
4. Assess candidate effect on student learning: Assess candidate’s effect on student learning as evidenced by success on the practicum B lesson plans in math, science, and social studies.
5. Assess candidate success on developmental project: Candidates will demonstrate competence in developing unit lesson plans as evidenced by the TEDU 414 unit plan.
6. Assess candidate success on activity project: Candidates will demonstrate competence in developing student activity plans by success on the health and PE movement experience activity project.
7. Assess ability to integrate the arts in lesson: Demonstrate that candidates know, understand, and use basic communication in the arts, can analyze art from structural, historical, and cultural perspectives, and has an informed acquaintance with art from varied cultural and historical periods, and further demonstrate that candidates are able to integrate art in a basic content lesson by success on the learning center notebook project.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements. (p. 39)**

**Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).**

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor’s degree.)
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.
Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Curriculum requirements

Program requirements – mathematics and statistical reasoning

The general education requirement is three to six credit hours; the early childhood/elementary education program requirement is six credit hours, including three credit hours in mathematics at the college algebra level or higher and three credit hours in a statistics course typically taught by a college department of mathematics. Choosing among these courses is recommended:

- MATH 131 Introduction to Contemporary Mathematics
- STAT 208 Statistical Thinking
- STAT 210 Basic Practice of Statistics

Program requirements – natural sciences

The general education requirement is seven to nine credit hours, with one course each from the physical sciences and the biological sciences, with at least one laboratory; the early childhood/elementary education program requirement is 12 credit hours, again with at least one course each in the physical sciences and the biological sciences and two laboratories. Choosing among these courses is recommended:

- Biological sciences
  - BIOL 101 Biological Concepts
  - BIOL/ENVS 103 Environmental Science
- Physical sciences
  - CHEM 110 Chemistry and Society
  - CHEM 112 Chemistry in the News
  - PHYS 101 Foundations of Physics
  - PHYS 107 Wonders of Technology

Program requirements – applied arts

Two to three credit hours in applied arts to be designated with the professional studies adviser.

Professional studies requirements

Undergraduate courses
- EDUS 301 Human Development and Learning

or PSYC 301 Child Psychology
- TEDU 310 Practicum (taken with TEDU 414 and TEDU 426) 2
- TEDU 310 Practicum (taken with TEDU 517, TEDU 522 and TEDU 591) 2
- TEDU/ENGL 386 Children's Literature I 3
- TEDU 390 Physical Education for the Elementary Teacher 3
- TEDU 410 Classroom Management in Elementary Schools 3
- TEDU 411 Intergrating the Arts in Curriculum for Young Children 2-3
- or ARTE 301 Art for Elementary Teachers
- TEDU 414 Curriculum and Methods for Early/Elementary Children 4
- TEDU 426 Teaching Reading and Other Language Arts 3

Total Hours 25-26

Students may choose another applied arts course.

Graduate courses
- EDUS/PSYC 607 Advanced Educational Psychology for Elementary Teachers 3
- EDUS 673 Seminar on Educational Issues, Ethics and Policy 3
- SEDP 505 Theory and Practice of Educating Individuals with Special Needs 3
- TEDU 517 Science Education in the Elementary School 3
- TEDU 522 Teaching Mathematics for Elementary Education 3
- TEDU 566 Diagnosis and Remediation in Reading 4
- TEDU 591 Social Studies Education in the Elementary School 3
- TEDU 626 Home-School Communication and Collaboration 3
- TEDU 672 Internship 4
- TEDU 674 Internship II 4
- TEDU 681 Investigations and Trends in Teaching 1

Total Hours 34

Total graduate credit hours required (minimum) 34

Note: At least 33 credit hours must be taken at the graduate level.

Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

Graduate program director
Joan Rhodes, Ph.D.
Associate professor and interim chair, Department of Teaching and Learning
Email: jarhodes2@vcu.edu
Phone: (804) 828-1305

Program website: soe.vcu.edu (http://www.soe.vcu.edu)
Teaching, Master of (M.T.) with a concentration in earth science education

Program accreditation
National Council for Accreditation of Teacher Education; Specialty Program Associations

Program goal
The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education
The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 449) is available in this bulletin.

Student teaching requirements
All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes
Science education
1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.
2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.
3. Can effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.
4. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.
5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.
7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.
8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)
Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
---|---|---|---|
M.T. | Fall | Mar 15 | GRE or MAT |
| Spring | Nov 1 |
| Summer | Mar 15 |

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor’s degree.)
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Student’s written statement concerning career interests
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center (http://www.soe.vcu.edu/student-services-center) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Curriculum requirements

Qualifying courses (taken as an undergraduate)

EDUS 301 Human Development and Learning 3

Major courses (as undergraduate science majors) including oceanography, meteorology/climatology, astronomy, geology, ecology, two general biology, two physics and two general chemistry

Admission to teacher preparation is a prerequisite for the following courses:

TEDU 310 Practicum (secondary; must be taken concurrently with TEDU 537) 1-3
TEDU 537 Secondary School Curriculum 3
TEDU 310 Practicum (science; must be taken concurrently with TEDU 540) 1-3
TEDU 540 Teaching Middle and High School Sciences (fall only) 3

Required courses

EDUS 617/PSYC 657 Advanced Educational Psychology for Secondary Teachers 3
EDUS 673 Seminar on Educational Issues, Ethics and Policy 3
TEDU 562 Reading Instruction in the Content Areas 3
TEDU 588 Classroom Management 3

Clinical experience (spring only)

TEDU 672 Internship 1-6
TEDU 674 Internship II 1-6
TEDU 681 Investigations and Trends in Teaching (must be taken concurrently with TEDU 672 and TEDU 674) 1,3

Total graduate credit hours required (minimum) 33-34

Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

Graduate program director

Joan Rhodes, Ph.D.
Associate professor and interim chair, Department of Teaching and Learning

Student learning outcomes

Science education

1. Demonstrate content knowledge in science: Candidates demonstrate content knowledge in science as evidenced by the Praxis II scores.

2. Demonstrate conceptual content knowledge: Candidates demonstrate knowledge of the conceptual science to be taught and related fields, and that they are well-prepared in the breadth of knowledge needed to teach in their fields of licensure as evidenced by GPA in major courses.

3. Can effectively plan classroom-based instruction: Candidates demonstrate the ability to plan effective classroom-based instruction and design assessments, consistent with goals of the National Science Education Standards as evidenced by the unit plan assessment.

4. Student teaching – effectively apply knowledge, skills and dispositions: Candidates demonstrate knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation.

5. Demonstrate effects on student learning: Candidates demonstrate positive effects on student learning of major concepts, principles, theories, laws; the unifying concepts of science; the nature of science; the practice of inquiry (including student engagement in inquiry); analysis of issues related to science and technology; and the impact of science on themselves and their community as evidenced by the assessing student learning portion of the clinical evaluation.

7. Knowledge of research and investigation in science: Candidates demonstrate knowledge of research and investigation in science and understand multiple forms of scientific inquiry; can design, conduct and report research in their field; and can use mathematics and appropriate technology to collect, process and explain data as evidenced by the student-generated research assessment.

8. Knowledge of the contextual content of science: Candidates demonstrate knowledge of the contextual content of science and have a strong understanding of the socially relevant issues, social context, history, philosophy and applications of science as evidenced by the nature of science reflection assignment.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Degree: Semester(s) of entry: Deadline dates: Test requirements:

<table>
<thead>
<tr>

</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor’s degree with a major, or equivalent, in the subject the student wishes to teach (for secondary) or an appropriate liberal arts major (for early/elementary) (Students in the five-year extended program must be pursuing an appropriate bachelor’s degree.)

2. Three letters of recommendation addressing the student’s potential for graduate study in education

3. Student’s written statement concerning career interests

4. Transcripts of all previous college work

5. Satisfactory scores on the GRE or MAT

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Student Services Center.
Graduate program director
for secondary education may pursue a post-baccalaureate certificate. Students who already possess a content major in a discipline appropriate to education may pursue a post-baccalaureate certificate.

**Total graduate credit hours required (minimum) 33-34**

**Other curricular options**

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

[www.soe.vcu.edu/student-services-center](http://www.soe.vcu.edu/student-services-center) section on the School of Education website for current testing requirements.

Admission to clinical experiences in schools requires a background check and fingerprinting.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

**Program website:** [soe.vcu.edu](http://www.soe.vcu.edu)

Teaching, Master of (M.T.) with a concentration in teaching health and physical education

**Program accreditation**

National Council for Accreditation of Teacher Education; Specialty Program Associations

**Program goal**

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics, physics) or health and physical education.

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

**Health and physical education**

The Master of Teaching program with a concentration in teaching health and physical education provides advanced course work in the application of health and movement science principles to health and physical education pedagogy. Students seeking an M.T. with the teaching health and physical education concentration are required to complete the Bachelor of Science in Health, Physical Education and Exercise Science. Students with an undergraduate degree in health and physical education or related degrees are encouraged to meet with an adviser prior to applying to graduate school.

**Student teaching requirements**

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

**Student learning outcomes**

**Health and physical education**

1. Candidates demonstrate content knowledge in health and physical education: Candidates demonstrate content knowledge in health and physical education as evidenced by Praxis II scores and the undergraduate transcript analysis.
2. Candidates demonstrate ability to plan instruction: Candidates demonstrate that they can effectively plan classroom-based instructions evidenced by the lesson plan assessment, lesson plan portion of the portfolio and the clinical evaluation continuum.
3. Measure candidate performance in internship: Candidates demonstrate that knowledge, skills and dispositions are applied effectively in practice as evidenced by the clinical evaluation continuum.

4. Assess candidate effect on student learning: Candidates demonstrate effect on student learning as evidenced by success on the lesson plan portion of the portfolio.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

SCHOOL OF ENGINEERING

Through teaching and research, the VCU School of Engineering creates knowledge and transforms ideas in engineering and life sciences into technologies that enhance regional and global prosperity. The school prepares its students for leadership and entrepreneurship through collaborative and interdisciplinary partnerships.

Founded in 1995 and graduating its first class in May 2000, the School of Engineering is the result of collaboration rare in the history of higher education in Virginia. Virginia Commonwealth University has, with the support of Virginia Polytechnic Institute and State University, created a school that brings innovative engineering and computer science education to central Virginia. Building reciprocal relationships with business and industry in the greater Richmond area, contributing to the region’s manufacturing enterprises and aggressively developing an international orientation, the school has developed programs of research and study that are sensitive to the unique demands of its time and culture.

In 1998, the undergraduate degree program in biomedical engineering was added to the original engineering disciplines of chemical, electrical and mechanical engineering, which were established in 1996. The long-standing and accredited degree program of computer science was assimilated into the School of Engineering beginning with the fall 2001 semester. In 2004-05, the chemical engineering department added an emphasis in life sciences and changed its name to the Department of Chemical and Life Science Engineering.

Students are offered an integrated and multidisciplinary curriculum in biomedical, chemical and life science, computer, electrical, or mechanical engineering, or computer science. Supported by the internationally recognized strengths of MCV Hospitals and the cutting-edge developments being generated by the Virginia BioTechnology Research Park, the School of Engineering at VCU has innovative curricula that emphasize creativity and imagination. By encouraging their interaction with practicing professionals, students are continually aware of the real-world application of their research and their studies.

Serving the best and the brightest students and supporting VCU’s dedication to diversity by opening doors of opportunity to underrepresented populations in the engineering and computer science professions, the school continually strives to enrich the technological and intellectual climate of the metropolitan area.

Discovering new knowledge is the goal of the best of the nation’s schools. The School of Engineering at VCU celebrates not only the discovery of knowledge, but also the creative integration and application of that knowledge.

Accreditation

The Accreditation Board for Engineering and Technology is the premier organization in the U.S. that provides accreditation to engineering and computer science programs. Individual programs (i.e., mechanical engineering) are accredited at the bachelor’s level.

The Engineering Accreditation Commission of ABET has accredited the biomedical, chemical and life science, electrical and computer, and mechanical engineering programs at the VCU School of Engineering.

The Computer Accreditation Commission of ABET has provided accreditation to the computer science program for many years.

Degree programs

The School of Engineering offers the following degree programs:

Bachelor of Science
Biomedical Engineering
Chemical and Life Science Engineering
Computer Engineering
Computer Science
Electrical Engineering
Mechanical Engineering

Students also may be admitted under “undeclared engineering” for entrance to the School of Engineering. A field of study can be determined after the first semester.

Master of Science
Biomedical Engineering
Computer Science

Engineering – with tracks in:
• Chemical and Life Science Engineering
• Electrical and Computer Engineering
• Engineering

Mechanical and Nuclear Engineering

Doctor of Philosophy

Biomedical Engineering

Engineering – with tracks in:
• Chemical and Life Science Engineering
• Computer Science
• Electrical and Computer Engineering
Mechanical and Nuclear Engineering

Joint degree
M.D./Ph.D. in Biomedical Engineering in participation with the School of Medicine

Interdisciplinary and cooperative studies degree
M.S. degree through the Commonwealth Graduate Engineering Program

Post-baccalaureate certificate
Computer Science

Commonwealth Graduate Engineering Program

The Commonwealth Graduate Engineering Program is a collaborative effort of the University of Virginia, Virginia Commonwealth University, Virginia Polytechnic Institute and State University, Old Dominion University, and George Mason University. The University of Mary Washington participates as a funded receive site.

See the School of Engineering Graduate Programs section of this bulletin for information on VCU's graduate programs in engineering.

Administration
Rosalyn S. Hobson
Associate Dean for Graduate Studies

The VCU Commonwealth Graduate Engineering Program (CGEP) director works closely with the other CGEP directors, the VCU Dean of School of Engineering, and local businesses and industries.

Program description

Students who have baccalaureate degrees in engineering or strong backgrounds in the sciences may work toward a master's degree in engineering on the Monroe Park Campus of VCU. Graduate engineering courses are available from the CGEP member universities via interactive television, the Web and two-way audio/video teleconferencing. In addition to the required engineering courses, elective courses are available in applied mathematics, mathematical statistics, chemistry, operations research, and physics in classes at VCU. The following academic programs are available through CGEP:

- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Engineering Management
- Industrial and Systems Engineering
- Manufacturing and Design Engineering
- Materials Sciences and Engineering
- Mechanical and Aerospace Engineering
- Modeling and Simulation

Degree-seeking students

Students enrolling in the program should apply for admission in a given academic area of study and may select courses from any of the participating institutions, consistent with selected degree requirements.

Nondegree-seeking students

Qualified individuals may enroll in a particular course without pursuing a formal degree program of study. Admission will be based on the individual's academic preparation and the availability of space.

Admission requirements

Students should apply for admission to the CGEP University offering the desired degree program. Applicants should have a “B” average, but a successful professional experience may strengthen admission credentials. Three recommendations from persons who are qualified to give information concerning the applicants' probable success in the program and the completion of the Graduate Record Examination (GRE) also are required.

Graduate information

Registration for graduate study

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director, approval of the chair and the assistant dean for graduate affairs. Students may begin a course of study in either the fall or spring semesters for the engineering and computer science graduate programs; however, a start in the fall semester is preferred. For the CGEP, students may begin a course of study in either the fall or spring semester.

Engineering, Doctor of Philosophy (Ph.D.)

Note: Admission to this program is temporarily suspended.

Program goal

The goal of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge; an in-depth original research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences in order to respond directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications so that engineers, researchers and professors will be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems stemming from the realization that new knowledge and new solutions to
existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

**Student learning outcomes**

Graduates of the Ph.D. in Engineering degree program will be able to demonstrate:

1. The ability to apply advanced knowledge of mathematics, science or engineering
2. The ability to communicate effectively
3. The ability to identify, formulate and solve engineering problems
4. The ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

**Note: Admission to this program is temporarily suspended.**

**Admission requirements**

<table>
<thead>

<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Jun 1 (Feb 15 for financial assistance)</td>
<td>GRE-General</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Nov 15</td>
<td>TOEFL required for international students</td>
</tr>
</tbody>
</table>

**Special requirements**

Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the doctoral degree in engineering must have a B.S. degree in engineering or a closely related discipline.

**Note: Admission to this program is temporarily suspended.**

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), students entering the doctoral program with a B.S. degree, but not the M.S., will require a minimum of 60 post-baccalaureate credit hours beyond the bachelor’s degree, including research credit hours (30 for M.S. level and an additional 30 for Ph.D. level).

Students holding the master’s degree must complete a minimum of six credit hours in concentration course work, three credit hours in elective course work and 21 credit hours in dissertation research. The student’s adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research credit hours) beyond the master’s degree. At least half of the credit hours required in the student’s program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence at
least three consecutive semesters is required. Residency is defined as registration for at least nine credit hours per semester. Students have a maximum of eight calendar years, beginning at the time of first registration to complete the Ph.D. degree program.

Comprehensive examinations
In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to degree candidacy
Before admission to doctoral candidacy, students must have:

1. Completed required course work
2. Successfully completed the comprehensive examinations
3. Fulfilled all additional departmental requirements

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research
The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate’s dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

There are three components of each Ph.D. in Engineering curriculum:

1. Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.
2. Electives component: This component allows the student to take courses in either engineering or science with approval of the student’s adviser.
3. Directed research component: This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

(http://www.egr.vcu.edu/future-students/graduate-programs)

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in chemical and life science engineering

Program mission
The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes
1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. Demonstrate abilities in research: Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the chemical and life science engineering concentration must have a B.S. degree in chemical engineering or a closely related discipline.

Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the School of Engineering’s associate dean for graduate studies.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor’s degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master’s degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student’s adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master’s degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the
student’s program must be those designated as exclusively for graduate students, that is, at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Comprehensive examinations
In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to candidacy
Before admission to doctoral candidacy, students must have:

1. Completed required course work
2. Successfully completed the comprehensive examinations
3. Fulfilled all additional departmental requirements

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research
The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

<tr>
<td></td>
<td>Spring</td>
<td>Nov 15</td>
<td>TOEFL required for international students</td>
</tr>
</tbody>
</table>

Special requirements

- Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the associate dean for graduate studies.
- Students may begin a course of study in either the fall or spring semesters for the engineering graduate programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 17), and the School of Engineering, applicants must meet the following requirements:

Applicants to the Ph.D. in Engineering with a concentration in computer science must have a B.S. and master’s degree in engineering, computer science or a closely related discipline.

Students with an M.S. degree in a field closely related to computer science, such as mathematics, physics, engineering or bioinformatics, can be accepted directly into the Ph.D. program. However, only outstanding students (preferably with a B.S. degree in computer science) can be admitted directly into the Ph.D. program with just the baccalaureate degree.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor’s degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master’s degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student’s adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master’s degree. No elective courses may be used for both M.S. and Ph.D. degrees.

A student may choose to pursue a Ph.D. under the guidance of a computer science graduate faculty member. Interdisciplinary programs of study that involve computer science and another discipline are encouraged; however, a core of computer science courses is required. Courses not labeled CMSC must show relevance to the student’s program of study and must be submitted for approval by the computer science graduate committee through the student’s adviser.

Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to candidacy

Before admission to doctoral candidacy, students must have:

1. Completed required course work
2. Successfully completed the comprehensive examinations
3. Fulfilled all additional departmental requirements.

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate’s dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for
passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

Students will have to satisfy the following requirements:

1. Take a minimum of 12 credit hours of didactic course work at the graduate level and 18 credit hours of directed research for a minimum of 30 credit hours including a minimum of four courses that should satisfy the following:
   a. At least two courses at the 600 level or greater
   b. At least one course from each of the two foundation areas: theory and systems.
2. Take and pass a written comprehensive exam (maximum of two attempts allowed)
   a. The written comprehensive examination will cover knowledge in three areas and, in order to pass, students must score a minimum of 75 percent in each area.
      i. The exam must include material based on CMSC 501 from the theory area and on at least one course from the systems area.
      ii. The third area will cover the student’s specialization based on courses to be decided by the dissertation adviser.
   b. Students are allowed to take the comprehensives based on courses they may not have taken at VCU; however, they have to satisfy the course requirements as mentioned above.
   c. Students can contact the lead professor for any area and obtain a list of topics that will be covered in the exam.
   d. The exam will be conducted a minimum of once a year and will be organized by the graduate director, with prior approval of the exam questions by the graduate committee.
   e. A student who fails one area of the required three comprehensive exam areas must retake the exam in the failed area. The department will organize and schedule a special comprehensive exam for such students. A student who fails two or more exam areas must retake the entire comprehensive exam at the regularly scheduled comprehensive exam in the following year.
3. Write and defend a dissertation proposal (oral comprehensive exam) on an original research topic.
   a. Since the Ph.D. is awarded for completion of work on an original research problem, peer-reviewed evidence of the quality of this work, in terms of at least one accepted journal paper or published high-quality conference paper (publications should be in a student’s research area), must be approved by the dissertation committee and the graduate committee before the final dissertation defense can be scheduled.
   b. Specific publication requirements are available at the computer science department website as well as in the School of Engineering graduate handbook.

For students with a B.S. degree

Students admitted into the Ph.D. program with a B.S. degree must satisfy the following requirements:

1. Take a minimum of 60 credit hours of course work, including:
   a. A minimum of 33 didactic credit hours, including
      i. At least two courses from each of the three foundation areas; CMSC 501 must be one of these courses.
   b. In addition, a student admitted to this program may need to take other undergraduate computer science courses in order to prepare for the required graduate-level courses. The choice of these courses will be left to the discretion of the student’s adviser.
   c. A minimum of 18 credit hours of directed research is required.
2. Satisfy the comprehensive examination requirements as articulated above.

For students without an M.S. in Computer Science

1. Students admitted into the Ph.D. program without an M.S. in Computer Science must satisfy the following:
   a. Take a minimum of 18 credit hours of course work at the graduate level and 18 credit hours of directed research for a minimum of 36 credit hours including:
      i. A minimum of two courses from each of the foundation areas: theory and systems; CMSC 501 must be one of these courses
      ii. At least nine credits at the 600 level or greater
   ii. At least 17 credit hours at the 600 level or greater
   iii. In addition, a student admitted to this program may need to take other undergraduate computer science courses in order to prepare for the required graduate-level courses. The choice of these courses will be left to the discretion of the student’s adviser.
   b. Satisfy the comprehensive examination requirements as articulated above.

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science/Computer Science Ph.D. with the University of Cordoba [dual degree]

Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

Program goals

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers

2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership

3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life
Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. Demonstrate abilities in research: Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

All applicants to the dual-degree Ph.D. program with VCU and the University of Córdoba must meet all general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering. Applicants to the dual-degree Ph.D. program are selected from among the students already enrolled in either VCU’s Ph.D. in Engineering computer science concentration or in the University of Cordoba’s Ph.D. in Computer Science. The selection will be performed by the dual-degree Ph.D. program steering committee consisting of the chair and graduate program director of computer science at VCU and the chair and graduate program director of computer science at UCO.

Students need to apply to the dual-degree program after already being enrolled in the doctoral program at either VCU or UCO and before passing the oral comprehensive examination. Students must have identified a dissertation adviser (and a co-adviser from the other institution).

To be admitted to the dual-degree program, VCU students must hold an M.S. degree in computer science with a minimum GPA of 3.0. To be admitted to the UCO Ph.D. program and into the dual-degree program, UCO students must fulfill the following requirements with regard to academic qualifications:

1. Applicants with degrees in engineering or architecture or any degree with 240 ECTS credits must have completed a research master’s degree, including at least 16 ECTS credits for training in methodology and research, as well as a research dissertation.
2. Applicants with degrees in engineering or architecture or any degree with 240 ECTS credits who have completed a non-research master’s degree (i.e. professional master’s degree) must have completed additional training at the doctoral level in methodology and research equivalent to 16 ECTS credits, as well as a research project equivalent to 16 ECTS credits.
3. Graduates who have completed degrees, in accordance with EU law, worth a minimum of 300 ECTS credits, must have completed
additional training at the doctoral level in methodology and research equivalent to 16 ECTS credits, as well as a research project equivalent to 16 ECTS credits.

4. Applicants with university qualifications who, prior to obtaining a place on a specialized health training course, have successfully completed at least two years of training as part of a program leading to an official qualification in any health sciences specialty, may be admitted directly or may be required to complete additional doctoral training as established by the academic committee for the doctoral program.

5. Applicants already holding doctorates under earlier university regulations or holding diplomas in advanced studies in accordance with the provisions of Royal Decree 778/1998 of 30 April, or who have demonstrated sufficient research ability in terms of Royal Decree 185/1985 of 23 January, may be admitted directly or may be required to complete additional doctoral training as established by the academic committee for the doctoral program.

6. Applicants holding master’s degrees awarded in foreign education systems may be admitted to doctoral study without needing to have their degrees officially recognized, once the University of Córdoba has established that their degrees demonstrate a level of training equivalent to that provided by Spanish master’s degrees, including the research training required under the present regulations, and entitles the holder to be admitted to doctoral studies in the country of issue. Admission does not, under any circumstances, imply official recognition of any previous degree held by the applicant, nor recognition for any purposes other than that of admission to doctoral study.

7. VCU students must complete all VCU Ph.D. degree requirements before the Ph.D. degree from the University of Córdoba may be awarded.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

A minimum of 30 graduate credit hours beyond the M.S. degree, including research credit, is required at VCU for the Ph.D. in Engineering with a concentration in computer science. Students must complete a minimum of 12 graduate credits hours (i.e., four courses) of didactic course work and 18 graduate credit hours of dissertation research. At least half of the 12 didactic credits required must be at the 600 level or above. No elective courses may be used for both M.S. and Ph.D. degrees. The student adviser must approve all course work.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Students admitted into the Ph.D. program with a B.S. degree should refer to the program page for information on the Ph.D. in Engineering with a concentration in computer science (p. 552).

Didactic course work

VCU and UCO students in the dual-degree Ph.D. program will take four graduate courses: three from VCU (offered by VCU computer science faculty) and one from UCO (offered by UCO computer science faculty) as determined by the steering committee. The VCU courses include all approved graduate-level courses available to VCU computer science doctoral students. The following course is currently offered by UCO. The list of UCO courses will be updated every year by the steering committee.

54-22092014 Evolutionary Algorithms in Data Mining, 3 credit hour

The objective of this course is to introduce students to the field of evolutionary computation, as well as its applications to data mining problems. Genetic algorithms and genetic programming as well as evolutionary programming and evolutionary strategies will be covered. The second part of the course will focus on solving relevant problems in the field of data mining such as classification, regression, clustering, association rule mining, subgroup discovery and feature selection with EC approaches. Prerequisites: graduate standing. The course will be offered as an online course.

Foundation areas for computer science graduate studies include theory, systems and applied computer science. By the time of graduation, students must have completed at least one course from each of the following two foundation areas of theory and systems.

VCU faculty will deliver the courses for both VCU and UCO students (to the latter by synchronous broadcasting used currently for delivering M.S. programs to the Naval Surface Warfare Center at Dahlgren, while UCO will deliver its courses (one or more) to UCO and VCU students as asynchronous online course(s).

The courses will have identical names and will be cross-listed in the VCU and UCO bulletins and will be open to all VCU and UCO computer science students as long as there is at least one student from the dual-degree Ph.D. program enrolled in the course.

Students will register for the four required graduate courses at their universities and will pay their university tuition and fees, in spite of the fact that some will be delivered by the other university.

Dissertation committee

The dual-degree Ph.D. program dissertation committee will consist of the main adviser (from one university) and one co-adviser (from the other university) plus six members, three from VCU and three from UCO, for a total of eight members. The committee will be formed during the semester in which the student is admitted to the dual-degree program.

Admission to candidacy

Before admission to doctoral candidacy, students must have: (1) completed required course work, (2) successfully passed both written and oral comprehensive examinations and (3) fulfilled all additional departmental requirements.

Qualifying comprehensive examination

1. The qualifying comprehensive exam focuses on the subject matter deemed critical as a foundation in the program and is largely based on material covered in courses and its application to theoretical and practical problems.

2. The qualifying comprehensive examination will cover knowledge in three areas and, in order to pass, students must score a minimum of 75 percent in each area.
   a. The exam must include material based on CMSC 501 from the theory area and on at least one course from the systems area.
   b. The third is the area of specialization based on courses to be decided by the dissertation adviser.
3. Students are allowed to take the exam based on courses they may not have taken, however, they still have to satisfy the course requirements as mentioned above.

4. Students may contact the lead professor for any area and obtain a list of topics that will be covered in the exam.

5. The exam will be conducted on a minimum of once a year and will be organized by the VCU graduate program director, with prior approval of the exam questions by the graduate committee. The exam will be organized at the same date and time for VCU and UCO students. Students will be taking the exam in their home universities.

6. Students who fail the qualifying comprehensive exam are allowed one additional attempt to pass it. Students who fail one area of the required three qualifying comprehensive exam areas must retake the exam in the failed area within the following year. The department may organize and schedule, no earlier than 60 days after the failed exam, a special comprehensive exam for such students. Students who fail two or more exam areas must retake the entire qualifying comprehensive exam at the regularly scheduled comprehensive exam within the following year.

7. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. They also must have a minimum GPA of 3.0 on the courses covering the exam areas.

**Oral comprehensive examination**

The oral comprehensive exam requires students to prepare a written proposal of original research and to defend it in front of the dissertation committee. The oral comprehensive exam may be taken only after successful completion of the qualifying comprehensive exam.

**Dissertation research and defense**

During their studies, students must complete 18 credit hours of research at their own institutions. The student must conduct a substantial original investigation under the supervision of the advisers and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation, and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance. The UCO doctoral committee must approve/disapprove the defended dissertation.

**International experience**

Students, after passing comprehensive exams, will spend six months conducting research at the co-adviser’s university. While abroad, the students must maintain full-time student status (to keep benefits such as a stipend) at their home institutions by registering for dissertation research credit hours. They will also need to register for one graduate credit hour at the co-adviser’s university. (The UCO student would register for one VCU graduate credit hour while at VCU, and a VCU student for one UCO graduate credit hour while at UCO.) The hosting department is responsible for covering the cost of the one graduate credit-hour registration of the visiting student, in order for the student to qualify for health insurance.

**Publication requirement**

Students must publish at least one journal paper before the final defense takes place. Since the Ph.D. is awarded for completion of work on an original research problem, peer-reviewed evidence of the quality of this work, in terms of at least one journal paper (in a student’s research area), must be approved by the dual-degree program dissertation committee and the graduate committee before the final dissertation defense may be scheduled. Specific publication requirements are available on the Department of Computer Science website as well as in the School of Engineering graduate handbook.

**Curriculum requirements**

**VCU didactic course work**

Select nine credits from the three areas.

**Foundational area: theory**

Select at least one of the following: 3

<table>
<thead>
<tr>

<tbody>
<tr>
<td>CMSC 697</td>
<td>Directed Research</td>
</tr>
</tbody>
</table>

**Total Hours** 30

**Total graduate credit hours required (minimum) 30**

**Typical plan of study**

Students must apply to the dual program after being enrolled at either the VCU or UCO doctoral program and before passing the oral comprehensive examination, and must have a dissertation adviser (and a co-adviser from the other institution). The oral comprehensive exam should be completed by the end of the third year. Students must pass the qualifying comprehensive exam before taking the oral comprehensive exam. The
plan of study is developed with the student adviser and co-adviser, taking into consideration the student’s area of research.

**Graduate program director**
Tom J. Arodz, Ph.D.
Assistant professor
tarodz@vcu.edu
(804) 827-3989

**Additional contact**
Krzysztof J. Cios, Ph.D.
Professor and chair, Department of Computer Science
kcios@vcu.edu
(804) 829-9671

**Program website:** computer-science.egr.vcu.edu/graduate (http://computer-science.egr.vcu.edu/graduate)

**Engineering, Doctor of Philosophy (Ph.D.) with a concentration in electrical and computer engineering**

**Program mission**
The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academia and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

**Student learning outcomes**

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. Demonstrate abilities in research: Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**
Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the Ph.D. in Engineering with a concentration in electrical and computer engineering must have a B.S. degree in electrical and computer engineering or a closely related discipline. Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the associate dean for graduate studies.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor’s degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master’s degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student’s adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master’s degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student’s program must be those designated as exclusively for graduate students, that is, at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to candidacy

Before admission to doctoral candidacy, students must have:

1. Completed required course work
2. Successfully completed the comprehensive examinations
3. Fulfilled all additional departmental requirements

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate’s dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate’s dissertation and related matters. A favorable vote of the candidate’s advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate’s name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

Program website: electrical-and-computer.egr.vcu.edu/graduate (http://electrical-and-computer.egr.vcu.edu/graduate)

Engineering, Master of Science (M.S.)
Note: Admission to this program is temporarily suspended.

Program goals
The goal of the M.S. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. Advanced technical skills: To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences in order to respond directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
2. Communication: To produce graduates who possess a facility with both written and oral communications so that engineers will be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems stemming from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes
Graduates of the M.S. in Engineering degree program will be able to demonstrate:

1. The ability to apply advanced knowledge of mathematics, science or engineering
2. The ability to communicate effectively
3. The ability to identify, formulate and solve engineering problems

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduateschool.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to
In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the master’s degree in engineering must have a B.S. degree in engineering or a closely related discipline.

Note: Admission to this program is temporarily suspended.

Note: Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

In addition to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Note: Admission to this program is temporarily suspended.

Degree requirements

Thesis option

In addition to the VCU Graduate School graduation requirements (p. 39), students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours of concentration-specific course work, 12 credit hours in electives and six credit hours in thesis research. The student’s adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student’s program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student’s advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student’s adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student’s advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

There are three components of each M.S. in Engineering thesis curriculum:

1. Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline. Students seeking to take course work and conduct their research in the engineering concentration must contact the graduate program coordinator or department chair of engineering for detailed information about that option.

2. Electives component: This component allows the student to take courses in either engineering or science with approval of the student’s adviser. The option can be tailored to meet the individual student’s academic goals and research interests.

3. Directed research component: This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student’s adviser and the assistant dean for graduate affairs of the School of Engineering. The student’s adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student’s program must be designated as 600 level or above.

There are two components of each M.S. in Engineering non-thesis curriculum:

Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.

Electives component: This component allows the student to take courses in either engineering or science with approval of the student’s adviser.

The concentration can be tailored to meet the individual student’s academic goals and research interests. Students seeking to take course work and conduct their research in the engineering concentration should contact the appropriate graduate program coordinator or department chair of engineering for detailed information about that option.

Curriculum requirements

Thesis option

Concentration-specific component: ENGR course work 12

Electives: engineering or science course work 12
Student learning outcomes
1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.
Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Admission requirements
Engineering, Master of Science (M.S.) with a concentration in chemical and life science engineering

<table>
<thead>
<tr>
<th>Degree:</th>

<td>GRE-General</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Nov 15</td>
<td>International students require TOEFL (A minimum score of 100 in the TOEFL exam is required to be considered for financial assistance.)</td>
</tr>
</tbody>
</table>

Note: Students may begin a course of study in either the fall or spring semester for the engineering programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the chemical and life science engineering concentration must have a B.S. degree in chemical engineering or a closely related discipline.

Degree requirements
In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

Thesis option
Students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved courses (including research). Each student must complete 12 credit hours in concentration course work, 12 credit hours in concentration electives course work and six credit hours in thesis research. The student’s adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student’s advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student’s adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student’s advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

Non-thesis option
Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student’s adviser and the assistant dean for graduate affairs of the School of Engineering. The student’s adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student’s program must be designated as 600 level or above.

Curriculum requirements
There are three components of each M.S. in Engineering option:

1. Concentration (option-specific) component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.
2. Option electives component: This component allows the student to take courses in either engineering or science with approval of the student’s adviser (e.g. CLSE, ENGR, CHEM courses at 500 level or higher)
3. Directed research component: This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

The option can be tailored to meet the individual student’s academic goals and research interests. Students seeking to take course work and conduct their research in the chemical and life science engineering concentration should contact the graduate program coordinator or department chair of chemical and life science engineering for detailed information about that concentration.

Thesis option

The mission of the M.S. in Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

**Program mission**

The mission of the M.S. in Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academy and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

**Student learning outcomes**

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the electrical and computer engineering option must have a B.S. degree in electrical engineering, computer engineering or a closely related discipline.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

Thesis option

Students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours in concentration course work, 12 credit hours in concentration electives course work and six credit hours in thesis research. The student’s adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student’s program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student’s advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student’s adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student’s advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student’s adviser and the assistant dean for graduate affairs of the School of Engineering. The student’s adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student’s program must be designated as 600 level or above.

Curriculum requirements

Thesis option

Concentration component

EGRE course work (EGRE 500 level or higher, or courses approved by the advisory committee) This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student’s primary engineering discipline.

Option electives

Engineering or science course work (including EGRE, ENGR, EGRB, EGRM, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM, 500 level or higher, or courses approved by the advisory committee) This component allows the student to take courses in either engineering or science with approval of the student’s adviser.

Directed research component

This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

EGRE 697 Directed Research in Electrical and Computer Engineering 6

Total Hours 30

The option can be tailored to meet the individual student’s academic goals and research interests. Students seeking to take course work and conduct their research in the electrical and computer engineering concentration should contact the graduate program coordinator or department chair of electrical and computer engineering for detailed information about that concentration.

Department of Biomedical Engineering

Gerald E. Miller, Ph.D.
Professor and chair

biomedical.egr.vcu.edu (http://biomedical.egr.vcu.edu)

The Department of Biomedical Engineering offers programs at the baccalaureate, master’s and doctoral level.

Biomedical engineering provides in-depth study in a variety of specialization areas including biomedical imaging systems, orthopaedic biomechanics, tissue and cellular engineering, biomaterials, artificial organs, human-computer interfaces, cardiovascular devices and rehabilitation engineering. The programs allow students to participate in cutting-edge research in one of the nations most advanced engineering facilities. The department has ongoing collaborations with numerous industries, federal laboratories, the VCU science departments, the university’s MCV Campus, the Hunter Holmes McGuire Veterans Affairs Medical Center, the Virginia BioTechnology Research Park and numerous biomedical and clinical programs throughout the VCU Medical Center’s MCV Hospitals.

• Biomedical Engineering, Doctor of Philosophy (Ph.D.) (p. 567)
• Biomedical Engineering, Master of Science (M.S.) (p. 569)
• Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [combined] (p. 571)

Biomedical Engineering, Doctor of Philosophy (Ph.D.)

Program mission
The mission of the Doctor of Philosophy in Biomedical Engineering is to educate biomedical engineering students to be significant contributors in health care and in research and development in biomedicine and bioengineering. The curriculum closely links technical fundamentals in science, engineering and the life sciences, together with the ability to function on multidisciplinary teams, to communicate effectively and to achieve the knowledge tools necessary for lifelong learning.

The purpose of the program is to:

1. Provide students with a graduate education that prepares them for current and future challenges in biomedical engineering
2. Produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences — responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
3. Produce graduates who possess a facility with both written and oral communications — emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
4. Produce graduates who demonstrate creativity and innovation in solving technological problems — stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Graduates possess the ability to formulate, analyze and solve problems, analytically and/or experimentally, in the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills. Graduates can work effectively in teams to solve biomedical and/or clinical problems including the interconnection of engineering and clinical personnel toward the solution of problems of compelling clinical and biomedical interest and need, with particular reference to the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills.

Student learning outcomes

1. Fundamentals in math and science: Graduates can analyze and solve problems in the foundation areas of mathematics, the sciences and statistics.
2. Fundamentals in engineering: Graduates can analyze and solve problems in the foundation engineering areas of instrumentation, signal processing, mechanics and materials.
3. Fundamentals in life science: Graduates can analyze and solve problems in the life sciences, including physiology, and understand the relationship between the life sciences, mathematics and engineering.
4. Experimental skills: Graduates can formulate lab experiments, collect and analyze data from physical and simulated systems to solve technical problems, and conduct physiology and life science laboratory experiments to integrate engineering and physiology.
5. Design and analysis: Graduates can design and implement an optimized solution to meet a set of specifications and constraints; graduates can design systems used in biomedical applications which involve the interconnection between engineering and the life sciences; graduates can analyze biomedical problems and develop solutions which are originally open-ended.

6. Innovation and creativity: Graduates can examine technological challenges in biomedical and health-related topics in new ways and develop innovative solutions.

7. Communication skills: Graduates can organize and write well-organized and accurate theses/dissertations/technical reports, including appropriate citations; graduates can deliver oral presentations to peers and supervisors using the latest presentation technologies.

8. Lifelong learning and multidisciplinary teams: Graduates can understand the need for and have an appreciation of multidisciplinary teams in biomedical engineering and related fields; graduates have a recognition of the need for, and an ability to engage in, lifelong learning; graduates have an understanding of the knowledge tools necessary to achieve lifelong learning and career development.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

<td>Jun 1 (Feb 15 for financial assistance)</td>
<td>GRE-General</td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Nov 15</td>
<td>International students require TOEFL</td>
</tr>
</tbody>
</table>

Special requirements

- Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the department chair and the associate dean for graduate studies.

In addition to the general admission requirements of the VCU Graduate School (p. 17), biomedical engineering has the following admission criteria for all entering graduate students:

1. Minimum GPA of 3.0 during the previous 60 credit hours (for applicants with a B.S.)
2. Minimum GRE score of 300 (combined verbal reasoning and quantitative reasoning) including a minimum 148 on the quantitative reasoning
3. Minimum TOEFL score of 101 Internet-based for students whose first or native language is not English

Biomedical engineering will accept a maximum of six credit hours for transfer into either the M.S. or Ph.D. program if the original grades for such courses are B or higher (or equivalent).

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements:

The Ph.D. in Biomedical Engineering program is nominally a three-year program. Prior evidence of completion of physiology and/or statistics may result in a waiver of the requirements for these courses as determined by the graduate program director and/or the department
chair. These credit hours would be replaced by other graduate-level didactic course work reflective of the field of study. A period of residence of at least three consecutive terms is required. Residency is defined as registration for at least nine credit hours per term. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Doctor of Philosophy degree.

At the conclusion of the first year of doctoral study (or when the core course requirements have been satisfied), each doctoral student must successfully complete written and oral portions of a comprehensive examination. This examination is designed to test the student on fundamental knowledge in engineering as evidenced by the core (and related elective) courses within the curriculum. Upon completion of this examination, a doctoral student is permitted to initiate a doctoral research project and to complete additional course work consisting of biomedical engineering, clinical and science electives.

Upon completion of all course work and the intended research, a doctoral student must prepare a dissertation describing the completed research. A dissertation defense, under the direction of the advisory committee, will be scheduled to examine the student’s research, dissertation documentation and underlying fundamental knowledge needed to complete the research. Upon successful completion of the defense and dissertation, the doctoral student may apply for graduation from Virginia Commonwealth University with the Doctor of Philosophy in Biomedical Engineering.

Biomedical Engineering, Master of Science (M.S.)

Program goal

The goal of the Master of Science in Biomedical Engineering program is to educate students to be significant contributors in health care and in research and development in biomedicine and bioengineering. The curriculum closely links technical fundamentals in science, engineering and the life sciences, together with the ability to function on multidisciplinary teams, to communicate effectively and to achieve the knowledge tools necessary for lifelong learning.

Program purpose

1. Provide students with a graduate education that prepares them for current and future challenges in biomedical engineering
2. Produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences — responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
3. Produce graduates who possess a facility with both written and oral communications — emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
4. Produce graduates who demonstrate creativity and innovation in solving technological problems — stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Graduates possess the ability to formulate, analyze and solve problems, analytically and/or experimentally, in the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills. Graduates can work effectively in teams to solve biomedical and/or clinical problems including the interconnection of engineering and clinical personnel toward the solution of problems of compelling clinical and biomedical interest and need, with particular reference to the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills.

Student learning outcomes

1. Fundamentals in math and science: Graduates can analyze and solve problems in the foundation areas of mathematics, the sciences and statistics.
2. Fundamentals in engineering: Graduates can analyze and solve problems in the foundation engineering areas of instrumentation, signal processing, mechanics and materials.
3. Fundamentals in life science: Graduates can analyze and solve problems in the life sciences, including physiology, and understand the relationship between the life sciences, mathematics and engineering.
4. Experimental skills: Graduates can formulate lab experiments, collect and analyze data from physical and simulated systems to solve technical problems, and conduct physiology and life science laboratory experiments to integrate engineering and physiology.

5. Design and analysis: Graduates can design and implement an optimized solution to meet a set of specifications and constraints; graduates can design systems used in biomedical applications which involve the interconnection between engineering and the life sciences; graduates can analyze biomedical problems and develop solutions which are originally open-ended.

6. Innovation and creativity: Graduates can examine technological challenges in biomedical and health-related topics in new ways and develop innovative solutions.

7. Communication skills: Graduates can organize and write well-organized and accurate theses/dissertations/technical reports, including appropriate citations; graduates can deliver oral presentations to peers and supervisors using the latest presentation technologies.

8. Lifelong learning and multidisciplinary teams: Graduates can understand the need for and have an appreciation of multidisciplinary teams in biomedical engineering and related fields; graduates have a recognition of the need for, and an ability to engage in, lifelong learning; graduates have an understanding of the knowledge tools necessary to achieve lifelong learning and career development.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall (preferred)</td>
<td>Jun 1 (Feb 15 for financial assistance)</td>
<td>GRE-General</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), biomedical engineering has the following admission criteria for all entering graduate students:

1. Minimum GPA of 3.0 during the previous 60 credit hours (for applicants with a B.S.)
2. Minimum GRE score of 300 (combined verbal reasoning and quantitative reasoning) including a minimum 148 on the quantitative reasoning
3. Minimum TOEFL score of 101 Internet-based for students whose first or native language is not English

Biomedical engineering will accept a maximum of six credit hours for transfer into the M.S. program if the original grades for such courses are B or higher (or equivalent).

Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the department chair and the associate dean for graduate studies.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), this program is nominally a two-year program leading to the M.S. in Biomedical Engineering. Prior evidence of completion of physiology may result in a waiver of the requirements for this course as determined by the graduate program director and/or the department chair. These credit hours should be replaced by other graduate-level didactic course
work reflective of the field of study. Each Master of Science student must successfully complete a thesis describing his or her individualized research project. At the completion of the research, the student must present the research to the advisory committee and undergo an examination of the research results, thesis documentation and underlying educational foundation necessary to have successfully completed the research. Upon successful completion of the examination and thesis, the student may apply for graduation from Virginia Commonwealth University with the Master of Science in Biomedical Engineering.

Curriculum requirements

Required biomedical engineering courses

Program website: biomedical.evr.vcu.edu (http://biomedical.evr.vcu.edu)

Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [combined]
The M.D./Ph.D. program seeks to train physician-scientists for careers that bridge basic and clinical science. Physician-scientists will translate laboratory discoveries into better patient outcomes. The program begins two months prior to the first year of medical school. These students arrive on campus for orientation and complete two laboratory rotations before the start of medical school classes. They complete the first two years of medical school and, after taking the first part of the U.S. National Medical Licensing Examination, enter a Ph.D.-granting department or program as a graduate student. Graduate-level course work, examinations and research will be guided by the dissertation adviser and the dissertation committee, with oversight by members of the M.D./Ph.D. steering committee. The main undertaking at this phase is laboratory research that leads to the Ph.D. dissertation. After completion of doctoral degree requirements, students move to the clinical year of medical school. Students may begin the clinical year of medical school immediately after completion of doctoral degree requirements, regardless of the time in the calendar year, and, 14 to 16 months later, may complete their medical school requirements. These students are exempt from the major part of the fourth year of medical school.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Prospective students submit applications through the American Medical College Application Service. Upon review of the AMCAS documents, qualified applicants are sent supplemental admission materials, including an application for the M.D./Ph.D. program. Those invited to Richmond for interviews will spend one day in the standard interview for the School of Medicine and will spend a second day interviewing with members of the M.D./Ph.D. steering committee, as well as touring labs of faculty scientists.

Admission of medical students to the Ph.D. phase of training takes place formally following completion of the M-II year of M.D. training. A copy of the student file is transferred to the Office of Graduate Education and the individual is formally accepted to Ph.D. training by the VCU Graduate School.

The requirements for a combined professional school/graduate school degree in the School of Medicine are equivalent to those required of students seeking a graduate degree alone and are determined by the individual program.

For additional information, please see the program website at mdphd.vcu.edu (http://www.mdphd.vcu.edu).

Department of Chemical and Life Science Engineering
B. Frank Gupton, Ph.D.
Research professor and chair
Chemical and life science engineering represents the formal interaction of chemical engineering with the life sciences. VCU's Department of Chemical and Life Science Engineering is uniquely poised to bring these two premier disciplines together to form a program distinct in the nation. Programs are offered at the undergraduate and graduate levels.

Life science engineering — with interest areas including stem cell and stem cell-derived tissue engineering, biosciences/biotechnology, cellular engineering, biosensors and biosensors, bioinformatics and molecular biocomputing, genetic and protein molecular engineering, environmental life science engineering, and molecular- and cellular-based therapeutics — is the fastest growing of all industries that currently employ engineers.

Chemical engineering and life science engineering share a broad range of common foundational knowledge bases, including the principles of mass and energy balances, transport phenomena and thermodynamics, surface and interfacial science, and reaction science and engineering. Strong academic and research programs in chemical and life science engineering will provide a wealth of exciting professional opportunities for successful graduates of the VCU program.

The bachelor’s program offers tracks in chemical engineering and life science engineering, and a chemical and life science engineering track is available in the Master of Science in Engineering program, as well as the Ph.D. in Engineering program. The CLSE tracks in the graduate-level programs are designed primarily for students who are interested in applying chemical and engineering principles toward important contemporary topics including process design, metabolic engineering, biosensor and biochip development, high-performance polymers in medicine and energy conversion, polymer surface science, and environmentally benign polymer processing technologies. Major emphasis is placed on chemical and life science engineering fundamentals with additional emphasis on applied chemistry and life sciences.

### Department of Computer Science

**Krzystof J. Cios, Ph.D.**
Professor and chair

[chemical.egr.vcu.edu](http://chemical.egr.vcu.edu)

The Department of Computer Science offers undergraduate and graduate programs. The Bachelor of Science in Computer Science is a rigorous, highly concentrated curriculum of computer science courses. It includes advanced study in several important areas of computer science and provides a strong foundation in this discipline. Every course is taught by full-time faculty members who also serve as advisers to both undergraduate and graduate students.

The master's degree program emphasizes continuing self-development of individuals currently engaged in science-, technology- and engineering-related fields. It prepares persons who have completed undergraduate majors in these fields for entry into careers in areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program. The program offers courses in a wide range of areas in computer science including machine learning, artificial intelligence, cybersecurity and cloud computing, data mining, bioinformatics, and medical informatics.

- Computer Science, Master of Science (M.S.) (p. 572)
- Computer Science, Master of Science (M.S.), accelerated Bachelor of Science in Computer Science to master’s (p. 574)

### Computer Science, Master of Science (M.S.)

#### Program mission

The program is designed to develop skills and educate CS students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

#### Program goals

1. **Advanced software design skills**: To produce graduates who possess the necessary advanced analytical and technical skills in computer science — responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers.

2. **Advanced problem-solving skills**: To produce graduates who demonstrate creativity and innovation in solving technological problems — stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life.

#### Student learning outcomes

1. **Computer science theory and concepts**: Graduates will demonstrate a solid understanding of the advanced theory and concepts underlying computer science.

2. **System design and implementation**: Graduates will demonstrate the ability, knowledge and technical skills to design and implement a computer-based system, process, component or program.

3. **Applications of computer science in multiple domains**: Graduates will demonstrate the ability to use the knowledge of computer science in order to solve problems in other domains.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website ([http://www.graduate.vcu.edu](http://www.graduate.vcu.edu)) and academic regulations in individual school and department publications and on program
Degree candidacy requirements (thesis option only)

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

<td>TOEFL required for international students</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the M.S. program in computer science must satisfy the requirements outlined below.

Acceptance of an applicant is based upon the recommendation of the graduate committee with approval of the program chair and the associate dean for graduate studies.

Undergraduate education in computer science or in a related discipline or completion of Post-baccalaureate Undergraduate Certificate in Computer Science is highly preferred.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 30 credit hours at the graduate level. Students may choose either a thesis or non-thesis degree program option. The thesis option is suggested for students who have a strong research interest or those who wish to pursue a Ph.D.

Up to 30 percent of a student’s required non-research graduate-level credits can be transferred into the M.S. program from another college or university. No more than 30 percent of student’s required non-research credits in graduate-level courses taken at VCU before admission to the M.S. program may be counted toward the M.S. degree (see bulletin for the accelerated B.S-M.S. in Computer Science program for exception to this rule). The number of credits that may be transferred by students pursuing an M.S. in Computer Science through the Commonwealth Graduate Engineering Program is limited by CGEP policy to 50 percent of the required credits.

All transfer credits must be approved by the graduate committee and the Graduate School using the graduate course transfer form. These credits must not have been applied to any other degree (see bulletin for the accelerated B.S-M.S. in Computer Science program for exception to this rule); however, they may have been taken as part of a post-baccalaureate graduate certificate program.

Students must satisfy breadth requirements by taking two courses from each of the foundational areas. There are three foundational areas for computer science graduate studies: theory, systems and applied computer science.

- CMSC 610  Algorithmic Foundations of Bioinformatics
- CMSC 612  Game Theory and Security
- CMSC 623  Cloud Computing
- CMSC 630  Applied Signal and Image Analysis
- CMSC 635  Knowledge Discovery and Data Mining

**Additional course work**
Select 12 additional credit hours with adviser approval. 12

Total Hours 30

1 Students must complete at least 12 credit hours of CMSC courses at the 600 or greater level.

**Total graduate credit hours required (minimum) 30**

**Thesis option**

**Theory foundational area**
- CMSC 501  Advanced Algorithms 3
- Select at least one course from the following: 3
  - CMSC 526  Theory of Programming Languages
  - CMSC 620/CISS 624  Applied Cryptography
- CMSC 621  Theory of Computation
- CMSC 624  Software Quality Assurance
- CMSC 678  Statistical Learning and Fuzzy Logic Algorithms

**Systems foundational area**
Select at least two of the following: 6
- CMSC 502  Parallel Algorithms
- CMSC 506  Computer Networks and Communications
- CMSC 605  Advanced Computer Architecture
- CMSC 608  Advanced Database
- CMSC 618  Database and Application Security
- CMSC 622  Network and Operating Systems Security

**Applied computer science foundational area**
Select at least two of the following: 6
- CMSC/CISS 609  Advanced Computational Intelligence
- CMSC 610  Algorithmic Foundations of Bioinformatics
- CMSC 612  Game Theory and Security
- CMSC 623  Cloud Computing
- CMSC 630  Applied Signal and Image Analysis
- CMSC 635  Knowledge Discovery and Data Mining

**Additional course work**
Select six additional credit hours with adviser approval. 6

**Research**

CMSC 697  Directed Research 2

Total Hours 30

1 Students must complete at least 12 credit hours of CMSC courses at the 600 or greater level.

2 Students seeking to take a research credit course must find a faculty adviser willing to supervise the research.

**Total graduate credit hours required (minimum) 30**

**Degree candidacy requirements (thesis option only)**
In order to advance to master’s candidacy, the student must have:

1. Completed required course work
2. Have a minimum 3.0 GPA in graduate course work
3. Have no more than six semester credit hours or 20 percent of total semester hours attempted (whichever is greater) at C or below level (C, D, F)
4. Be in compliance with the time to degree, which is six years for a master’s degree

The student will produce a written thesis in the format specified by the VCU Graduate School and will publicly defend the thesis before a committee consisting of the thesis adviser, at least one other faculty member from the computer science program and a faculty member from outside of the computer science program.

**Typical plan of study**
Students should choose thesis or non-thesis option during their first semester of study. The non-thesis option is the default.

The typical plan of study for non-thesis option students involves doing between nine and 15 credit hours per semester and fulfilling the requirements of the program typically in three semesters.

A plan of study for thesis option students should be designed with the research adviser of the student to take into account the direction of thesis research.

<tr>
<td></td>
<td>Spring</td>
<td>Nov 1</td>
<td>TOEFL required for international students</td>
</tr>
</tbody>
</table>

Students are selected from those already enrolled in B.S. in Computer Science program at VCU.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following requirements represent the minimum acceptable standards for admission:

In order to be accepted students must:
1. Apply to the computer science graduate committee during the first semester after they have completed the last of the following sequence of classes:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>CMSC 101</td>
<td>Introduction to Computer Science</td>
<td>3</td>
</tr>
<tr>

<tr>
<td>CMSC 303</td>
<td>Introduction to the Theory of Computation</td>
<td>3</td>
</tr>
<tr>
<td>CMSC 311</td>
<td>Computer Organization</td>
<td>3</td>
</tr>
</tbody>
</table>

Transfer students who enter with all of these courses (or equivalents) must apply during their first semester at VCU.

2. Have a minimum GPA of 3.4 based on CMSC 101, CMSC 255, CMSC 256, CMSC 302, CMSC 303 and CMSC 311; all grades in any repeated courses will be included in computing this GPA. Students transferring these courses into the program will have the grades from their previous institution included in computing this GPA only for purposes of determining eligibility for this program.

3. Have a minimum overall GPA of 3.0.

In the last semester before graduating with the B.S. degree, the student will formally apply to the master’s program. Providing the student has maintained a minimum GPA of 3.2 in the major, acceptance to the M.S. program is guaranteed. Accepted students are not required to complete the GRE for admission to the M.S. portion of the program.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 30 credit hours at the graduate level to graduate with the M.S. degree. Students must also complete the requirements for the B.S. degree in Computer Science.

Students accepted into this selective program accomplish both the B.S. and M.S. degrees within five years by taking additional graduate courses within the first four years of the program. Up to six credit hours will count as open electives in the B.S. program and as didactic course work in the M.S. program.

A student may choose either a thesis or non-thesis M.S. degree program. The thesis option is suggested for students who have a strong research interest or those who wish to pursue a Ph.D.

Curriculum requirements

Students accepted into the B.S.-M.S. program are allowed to transfer up to 12 graduate-level credits into the M.S. program, including up to six credit hours that were counted as open electives toward requirements for the B.S. degree.

After meeting all requirements for the B.S. degree, students in the program are eligible to take 600-level courses.

Apart from the exceptions above, all regulations outlined in the B.S. in Computer Science and M.S. in Computer Science bulletins apply toward the respective degrees.

Typical program of study

Before graduating with the B.S. degree, students in the program are expected to:

- Take six graduate-level didactic credits that will count as open electives toward their B.S. degree (that is, toward the requirements on total number of credits, upper-level credits and toward graduation GPA, but not as the required three CMSC technical electives) and as didactic credits toward their M.S. degree.
- Take an additional six graduate-level didactic credit hours that will count toward their M.S. degree but not toward the B.S. degree. In particular, these cannot be used to satisfy the total and upper-level credit requirements in the B.S. degree nor in calculating the B.S. graduation GPA.

Students cannot count more than six credit hours of non-CMSC courses toward the M.S. degree. Any non-CMSC graduate credits require approval of the graduate committee.

The typical full program of study in the accelerated B.S.-M.S. program is as follows:

Years 1-3

- Regular undergraduate program course work

Year 3

- Application to the accelerated B.S.-M.S. program

Year 4

- Remaining regular undergraduate program course work
- Six credit hours of CMSC 500-level courses, counted toward B.S. and M.S.
- Six credit hours of CMSC 500-level courses, counted toward M.S. only
- Application to the M.S. program

Year 5

Regular graduate program course work: 18 credits of CMCS 500-level and 600-level courses, counted toward M.S. only

Students must complete at least 50 percent of their graduate-level didactic credits at the 600-level for the M.S. degree; additional restrictions apply based on thesis and non-thesis study options as specified in the M.S. in Computer Science bulletin.

Program website: computer-science.egr.vcu.edu/graduate (http://computer-science.egr.vcu.edu/graduate)
### Computer and Information Systems Security, Master of Science (M.S.)

#### Program mission
The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

#### Program goal
Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU's program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student's ability to see the larger organizational, social, political, ethical and economic aspects of information security.

#### Student learning outcomes
Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

#### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

#### Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

#### Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</table>

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the School of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

#### Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component, an elective component and a practice component. The elective component consists of three courses chosen by the student and selected from
The Department of Electrical and Computer Engineering prepares students for highly competitive, national placement in electrical and computer engineering employment and graduate education by providing a thorough grounding in electrical science and design, together with a sound foundation in mathematics, basic sciences and life skills.

The department offers baccalaureate degrees in computer engineering and electrical engineering, in addition to minors in both areas, as well as the option to choose course work appropriate for a pre-medicine or pre-dentistry curriculum. An electrical and computer engineering track is available in the Master of Science in Engineering as well as the Ph.D. in Engineering. The track is designed to prepare students for practice, research and/or teaching of electrical and computer engineering at the advanced level by providing intensive preparation for professional practice in the microelectronics, nanoelectronics, computer engineering and controls and communications aspects of electrical and computer engineering. At the advanced level, this track prepares individuals to perform original, leading edge research in the broad areas of microelectronics, nanoelectronics, controls and communications and computer engineering.

The curricula of the department provide a strong foundation in the fundamentals of the profession, including engineering problem solving, breadth in the major facets of the profession and the opportunity to specialize in today’s critical areas of computer engineering, communication systems and microelectronics. Graduates will be well prepared for constant technological change and growth through lifelong learning.

### Department of Mechanical and Nuclear Engineering

**Gary Tepper, Ph.D.**
Professor and chair
mechanical-and-nuclear.egr.vcu.edu (http://mechanical-and-nuclear.egr.vcu.edu)

Mechanical engineering is one of the oldest and broadest engineering disciplines. Mechanical engineers design and analyze machines of all types including automobiles, airplanes, rockets, submarines, power generation systems, biomedical instrumentation, robots, manufacturing systems, household appliances and many, many more. In addition to well-known areas such as nuclear energy, nuclear propulsion and nuclear medicine, nuclear engineers are involved in many other applications of nuclear science and technology in fields as diverse as agriculture, industry, homeland security, forensics, environmental protection and even art. The Department of Mechanical and Nuclear Engineering provides quality graduate and undergraduate education through the following degree-granting programs:

- B.S. in Mechanical Engineering (general mechanical engineering curriculum)
- B.S. in Mechanical Engineering (nuclear engineering concentration)
- M.S. in Mechanical and Nuclear Engineering (thesis and non-thesis options)
- Ph.D. in Mechanical and Nuclear Engineering

Current areas of research within the department include but are not limited to energy conversion systems, smart materials, corrosion, medical devices, aerosol science, sensors, radiation detection and measurement,
nuclear reactor design, robotics, fluid mechanics, nanotechnology and biomechanics.

- Mechanical and Nuclear Engineering, Doctor of Philosophy (Ph.D.)
  (p. 579)
- Mechanical and Nuclear Engineering, Master of Science (M.S.)
  (p. 582)

**Mechanical and Nuclear Engineering, Doctor of Philosophy (Ph.D.)**

**Program mission**

The Ph.D. curriculum will provide graduate-level training in both mechanical and nuclear engineering. Graduates of the program will be prepared for research and teaching careers in areas such as energy production, nuclear waste transport, storage and disposal, and the development of new mechanical devices for use in nuclear medicine. A set of required interdisciplinary core courses will train students on the interaction of radiation with engineering materials, radiation in heat and mass transfer as well as mathematical modeling and control of mechanical systems incorporating radioactive elements. Technical electives in both mechanical and nuclear engineering will allow students to pursue in-depth study relevant to their selected research topics. Dissertation topics pursued as directed research credit hours will be devoted to open-ended research projects at the intersection of mechanical and nuclear engineering.

1. **Advanced technical skills:** To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation

2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership

3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

**Student learning outcomes**

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.

2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.

3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<tr>
<td></td>
<td>Spring</td>
<td>Nov 15</td>
<td>TOEFL required for international students</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following comprise the admissions requirements for the mechanical and nuclear engineering Ph.D. program:

1. Proof of graduation from an accredited college or university with either a bachelor’s or a master’s degree in mechanical engineering, nuclear engineering or a related discipline with a minimum grade point average of 3.0.
2. Demonstration of proficiency in spoken and written English. For international students, satisfactory scores on the TOEFL exam are necessary. The University requires a score of at least 550 (paper-based) and 213 (computer-based). The following qualifications must be submitted to meet the English-language requirement: 100 iBT (graduate) or 6.5 IELTS academic band score.
3. Submission of results of the Graduate Record Examination (minimum score for admission to be established annually by the MNE graduate committee).
4. Submission of at least three letters of recommendation from former instructors or other individuals qualified to evaluate the applicant’s ability to engage in graduate study in mechanical and nuclear engineering.
5. Submission of a written statement of purpose that clearly demonstrates commitment to a career in mechanical and nuclear engineering.

The MNE graduate committee may admit students unconditionally or provisionally. Provisional admission may be granted when deficiencies are identified; these deficiencies should be remedied by the time specified by the admissions committee. At the end of the provisional period, the student’s progress is evaluated. Failure to meet the goals set forth by the MNE graduate committee at the time of admission results in a show-cause notice. A response to this notice that is deemed unsatisfactory results in a recommendation for dismissal. The student has the right to appeal the recommendation for dismissal. Following these procedures set forth by the School of Engineering and the VCU Graduate School, remedial courses, or those designed to remove deficiencies, will not be accepted for credit hours toward the fulfillment of the course requirements for the Ph.D.

**Degree requirements**

In addition to the VCU Graduate School graduation requirements (p. 39), the Ph.D. degree will require a minimum of 68 credit hours beyond the B.S. degree or a minimum of 36 credit hours beyond the M.S. degree. Students may enter the Ph.D. program with either a B.S. or M.S. degree.

**Transfer policy**

Transfer courses must be approved by the MNE graduate committee and must fulfill all requirements of the VCU Graduate School as described in the student handbook. For students entering with a B.S. degree, a maximum of nine credit hours of technical electives may be transferred from another VCU program or outside institution and, if not applied previously toward another degree, may be applied toward the Ph.D.

**Qualifying examination**

Graduate students must pass a written qualifying exam consisting of five sections. Each section will consist of questions taken from the subject matter covered in one of the five core courses. The QE is to be taken after completion of the 15 credit hours of required core courses and, preferably, within 18 months of enrollment. To be eligible to take the QE exam, students must be accepted into the Ph.D. program and have an overall minimum GPA of 3.0 and the minimum GPA for courses within the MNE program must be 3.0 as well. The QE is held during the spring semester of each academic year, normally during the second week of May. In order to apply to take the QE, the student must complete Form MNE 104 by the first day of classes in the spring semester and submit the signed copies to the adviser and graduate program director, who will make the decision to allow the student to take the QE.

A student must pass all five sections of the QE. A course grade of A in one (and only one) of the core courses may be used to pass the corresponding section of the QE exam. Within two weeks of administration, the student will be notified of their results.

In the event that a student fails any section of the QE, they may retake the failed section(s) one time only. Failure to pass any section of the QE for the second time will result in dismissal from the Ph.D. program.

**Research adviser and graduate dissertation committee**

Students will be expected to select a research adviser and dissertation committee within 12 months of enrollment. The dissertation committee will consist of five faculty members, including the primary research adviser and at least two other faculty members from the Department of Mechanical and Nuclear Engineering. This committee reviews and votes to approve or disapprove the student’s dissertation research proposal, oral candidacy exam, and the final Ph.D. dissertation and oral defense. This committee also makes the final recommendation to award the Ph.D. degree. All voting members of the committee must be members of the graduate faculty. Additional, nonvoting members may serve on the committee with approval of the MNE graduate program director.

**Oral candidacy examination**

Within nine months after passing the qualifying examination, the student will submit one copy of an original dissertation research proposal based upon their proposed research project to each member of his or her dissertation committee. The proposal consists of the research topic and proposed research plan. The proposal should include a thorough literature review of the topic and contain information sufficient to judge the feasibility, scope and potential impact of the research. The dissertation committee will then administer an oral candidacy exam based on the material submitted in the dissertation research proposal. The format of the OCE is an oral presentation by the candidate with questions by the dissertation committee members. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the OCE. If a student fails the OCE, one re-examination may be given with the consent of the dissertation committee. Failure to pass the second OCE will result in dismissal from the program.

**Dissertation defense**

No earlier than six months after passing the oral candidacy examination, the student will defend the dissertation in an open forum administered by the dissertation committee. At least two weeks prior to the defense,
the candidate will submit a written copy of the dissertation to each committee member and schedule a date for the defense. The defense will be advertised and faculty and student colleagues will be invited to attend. During the defense, the student will present a detailed summary of their research project, which should be the original problem presented and approved during the oral candidacy examination. If a solution of the original problem proves elusive for reasons beyond the student’s control, the student may be allowed to redirect the research with permission from the dissertation committee and find an alternate pathway to the solution of a redefined problem. The format of the dissertation defense will be a presentation by the student followed by questions from the dissertation committee and other attendees. After the first round of questions are completed, the non-committee members in attendance will be asked to leave and the dissertation committee members will hold a second round of questions in closed session. After the second round of questions is completed the student will be asked to leave and the committee members will deliberate privately. The problem presented and solved must be of sufficient importance and interest to warrant publication in a peer-reviewed journal in the student’s area of specialization. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the dissertation defense. If a student fails the dissertation defense, one re-examination may be given. Failure to pass the second dissertation defense will result in dismissal from the program.

Students entering with a B.S. degree who are terminated from the Ph.D. program because of a failure to pass the QE, oral candidacy exam or dissertation defense (but not for other reasons such as academic dishonesty) will have the option to continue toward the M.S. in Mechanical and Nuclear Engineering.

Time limit

It is anticipated that students entering with a B.S. will complete the program in four years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of one credit hour per semester). All requirements for the Ph.D. degree must be completed within six years of passing the qualifying examination.

It is anticipated that students entering with an M.S. degree will complete the program in three years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of 1 credit hour per semester). All requirements for the Ph.D. must be completed within five years of passing the qualifying examination.

Any student may request a one-year extension of the maximum time for extenuating circumstances such as a medical situation. The graduate program committee will review and approve or deny all such requests. The maximum time cannot be extended longer than one year. Students who do not satisfy the degree requirements within the maximum time will be dismissed from the program.

Because of the maximum time limits imposed on students in the Ph.D. program, the program does not accept part-time students.

Preparing Future Faculty Program

Students enrolled in the program will have the option and are strongly encouraged to participate in the Preparing Future Faculty Program. The VCU Graduate School provides graduate students with ongoing opportunities for academic and professional development. The PFFP at VCU offers a series of short courses and professional development opportunities for graduate students interested in pursuing careers in higher education. The series is modeled on the national PFFP created by the Association of American Colleges and Universities. PFFP courses introduce graduate students to the roles and responsibilities of higher education; address teaching, learning and technology issues in the college classroom; and incorporate material on the academic job search and continued professional development. For those students who complete all course requirements, the capstone course is an internship/externship experience during which the student is mentored by a senior faculty member. The program offers access to resources and activities and service-learning experiences while providing networking opportunities with students and faculty from a wide range of disciplines as well as discipline-specific areas of study. Since most courses are one or two credit hours, students are able to add them easily into their academic program schedules.

### PROGRAM MISSION

The mission of the M.S. in Mechanical and Nuclear Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

#### 1. Advanced technical skills
- To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation.

#### 2. Communication
- To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership.

#### 3. Advanced problem-solving
- To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to...

existing problems are necessary to meet the needs of our changing society and to advance the quality of human life.

Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for the student’s program according to the degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Student handbook (http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms) is available on the School of Engineering website.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

Mechanical and Nuclear Engineering, Master of Science (M.S.)

<td>Spring</td>
<td>Nov 15</td>
<td>TOEFL required for international students</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Engineering, applicants to the mechanical and nuclear engineering degree must have a B.S. degree in mechanical engineering, nuclear engineering or a closely related discipline.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 39), students must meet the following requirements.

The Master of Science in Mechanical and Nuclear Engineering program utilizes the faculty and research facilities of the Department of Mechanical and Nuclear Engineering to expose students to advanced and emerging technologies in mechanical and nuclear engineering. Research thrusts in the department include but are not limited to smart materials, micro/nanotechnology, energy conversion systems, sensors, aerosol science, nuclear engineering, fluid mechanics, medical devices, robotics and biomechanics.

The M.S. degree program offers a thesis or non-thesis option and can be tailored to meet the individual student's academic goals and research interests. Eighteen to 24 months of study usually are necessary to complete the requirements for the thesis-option. The non-thesis option generally requires 12 months of full-time study or up to four years of part-time study. A time limit of six calendar years, beginning at the time of first registration, is placed on work to be credited toward the master's degree. Generally, a maximum of six credit hours of approved graduate course work required for a master's degree may be transferred from another program at VCU or outside institution and applied toward the degree.

The following are the minimum credit hour requirements for the proposed graduate degree program options:

M.S. thesis option – minimum 30 credit hours including nine credit hours in core courses, 15 credit hours in technical electives (engineering,
science or related areas) and six credit hours in directed research EGMN 697

**M.S. non-thesis option** – minimum 30 credit hours including 15 credit hours in concentration course work (EGRM or EGRN) and 15 credit hours in technical electives (engineering, science or approved courses)

The mechanical and nuclear engineering M.S. degree program contains three curricular components:

1. **Core component**: This component consists of three required core courses that provide the foundation of the M.S. curriculum. See below for specific course requirements.
2. **Technical elective component**: This component allows the student to take courses in either engineering, science or other areas with approval of the student’s adviser and graduate program director.
3. **Directed research component**: This component emphasizes research directed toward completion of M.S. degree requirements under the direction of an adviser and thesis committee.

Depending on the option pursued, students will have to take courses from two or all three of the curricular components. Students should select their concentration component courses based upon their concentration areas. Selecting one concentration area over another does not preclude a student from choosing courses from other areas. In fact, students will be encouraged to take courses from both EGRM and EGRN areas. Sample curricula follow.

### Curriculum requirements

**Core requirements**

All full-time thesis master’s students must register for and attend EGMN 690 Mechanical and Nuclear Engineering Seminar each semester. Part-time and non-thesis students are not required to register for the seminar, but they are encouraged to attend. All thesis students are required to give a research presentation as part of the seminar series at least once prior to graduation; non-thesis students must give a project presentation prior to graduation, based on an extension of work completed in a project-based course (see degree requirements below), as part of the seminar series. Note that EGMN 690 cannot be used to replace courses or research hours.

**Thesis option**

Core courses, seminar and directed research

Select nine credit hours from the following:

L. DOUGLAS WILDER SCHOOL OF GOVERNMENT AND PUBLIC AFFAIRS

The L. Douglas Wilder School of Government and Public Affairs is a creative, interdisciplinary grouping of programs in the social sciences and professional arenas that provides students with the knowledge, skills and experience necessary for success in public service.

The Wilder School brings together faculty from multiple disciplines that share a common interest in public affairs. The faculty includes individuals with strong research and analytical skills and with substantive expertise in such fields as criminal justice, economics, homeland security, public administration, urban planning and community development. These faculty members are committed to producing cutting-edge research and public service that can bridge the gap between theory and practice and to providing high quality, innovative and nationally competitive degree programs for our students.

To achieve this mission, the Wilder School actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs that develop close ties with other related university programs. The Wilder School is an intellectually exciting place committed to having a genuine impact on public policy and providing an intellectually stimulating education for future public affairs professionals who share in our commitment.

Program offerings

The school offers a variety of educational opportunities. Students may pursue three undergraduate programs and an additional three minors. Graduate programs provide options for full-time students and for practicing professionals interested in enhancing their skills or engaging in graduate-level work on a part-time basis. Current graduate offerings include nationally recognized master’s programs and 10 graduate-level certificates, as well as a doctoral degree program administered by the Center for Public Policy. Wilder School programs include:

Baccalaureate degrees
Bachelor of Science in Criminal Justice
Bachelor of Arts in Homeland Security and Emergency Preparedness
Bachelor of Science in Urban and Regional Studies

Minors
Criminal justice
Homeland security and emergency preparedness
Urban and regional studies

Post-baccalaureate graduate certificates
Certificate in Criminal Justice
Certificate in Geographic Information Systems
Certificate in Historic Preservation Planning
Certificate in Homeland Security and Emergency Preparedness
Certificate in Nonprofit Management
Certificate in Planning Information Systems
Certificate in Public Management
Certificate in Public Safety
Certificate in Transportation Planning and Analytics
Certificate in Urban Revitalization

Master’s degrees
Master of Arts in Homeland Security and Emergency Preparedness
Master of Public Administration
Master of Science in Criminal Justice
Master of Urban and Regional Planning

Doctoral degree
Ph.D. in Public Policy and Administration (through the Center for Public Policy)

The school also offers two dual degree programs with the University of Richmond’s T.C. Williams Law School. Through these programs students can simultaneously obtain a law degree (J.D.) and either the Master of Public Administration or the Master of Urban and Regional Planning.

Service-learning and internship opportunities

Diana Cutchin
Director

The educational experience at the L. Douglas Wilder School of Government and Public Affairs extends far beyond the classroom. Many of our students take advantage of service-learning (http://www.wilder.vcu.edu/service/servicelearning) and internship (http://www.wilder.vcu.edu/service/intern) opportunities, gaining valuable work experience and enhancing their resume as they contribute in meaningful ways to governmental departments and agencies, legislative offices,
nonprofit institutions, community initiatives, and businesses throughout Richmond.

Exceptionally qualified graduate students in the criminal justice, homeland security and emergency preparedness, sociology, public administration, and urban and regional planning programs are selected to be Wilder Graduate Scholars (http://www.wilder.vcu.edu/service/scholars) who undertake yearlong placements in which they benefit from professional work experience and financial support.

At the Wilder School, service is a tradition that is supported and cultivated by a faculty that reflects a tremendous commitment to community-based research. Each semester, VCU faculty offer a diverse selection of credit-bearing service-learning courses that provide students with the privilege of developing hands-on experience within their academic fields while engaging in meaningful projects that benefit local communities.

Guidelines for internships are available on the Wilder School website at wilder.vcu.edu/service/intern/guidelines.html (http://www.wilder.vcu.edu/service/intern/guidelines.html).

Graduate information

Admission

Admission to programs of the L. Douglas Wilder School of Government and Public Affairs is available to qualified applicants on a rolling admissions basis. Since the demand for admission to some programs is high and space availability is limited, students are encouraged to apply well in advance of their proposed admission dates.

As outlined below, admission requirements vary by academic program. No application packet will be considered by the relevant program admissions committee until all the required materials have been submitted by the applicant.

Application forms and instructions for applying to all graduate programs are available on the Graduate School website at graduate.vcu.edu (http://www.graduate.vcu.edu).

Admission to a master’s program from the certificate programs

The Graduate Certificate in Public Management and the Graduate Certificate in Nonprofit Management are designed for persons in professional positions who require a limited number of courses in contemporary management theory and skills. However, if a student later decides to pursue the M.P.A. degree, successfully completed certificate courses may be applied toward the degree. Successful completion of either certificate does not guarantee admission into the M.P.A. degree program.

The courses in the Post-baccalaureate Certificate in Criminal Justice program are the same as the master’s courses and, with grades of B or better and upon acceptance into the master’s degree program, are fully transferable to the Master of Science in Criminal Justice program.

All courses in the Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate program does not guarantee admission into the M.U.R.P. Degree program.

Provisional admission

In rare cases, applicants who do not meet the requirements for full admission may be accepted provisionally upon recommendation of the program’s admissions committee. The conditions for earning full admission are stated in the provisional acceptance letter sent by the dean of the Graduate School. Conditions usually include the requirement that the student complete the first nine hours of departmental graduate courses with a grade of B or better in each course.

Provisional admission does not constitute a waiver of the requirement to submit a GRE or other standardized test score.

Continuous enrollment requirements and expectations

To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for approved leaves of absence) until they have completed all requirements. Students who fail to register for two consecutive semesters (summer sessions included) will be dropped automatically from the program and must reapply for admission in order to continue. Exceptions to this policy will be made on an individual basis by petition. Students who reapply after having been dropped for failure to register continuously will be evaluated under the bulletin requirements in effect at the time of readmittance.

A minimum GPA of 3.0 on a 4.0 scale must be maintained. Compliance with other university regulations also is required.

Part-time students

Since the school schedules many of its courses in the late afternoon or evening, its programs accommodate both full- and part-time students. Students also may take advantage of courses offered in the summer. Thus it is possible for a part-time student taking six credit hours per semester to finish the master’s degree in four years or less.

Nondegree-seeking students

Nondegree-seeking students must have an undergraduate degree from an accredited institution and the written approval of the instructor prior to registering for any graduate-level course. Nondegree-seeking students can take no more than six credit hours without authorization from the appropriate program coordinator.

Financial aid information

Information and application forms for financial aid may be secured from the VCU Office of Financial Aid, Harris Hall, 1015 Floyd Ave., First Floor, P.O. Box 843026, Richmond, VA 23284-3026.

The L. Douglas Wilder School of Government and Public Affairs also offers a limited amount of financial assistance. Individuals interested in such assistance are urged to apply by March 30. Financial assistance available through the school includes:

- **Graduate teaching assistant positions** – Duties involve helping with the instruction of courses. The level of support varies according to the work level, financial need and scholarship.
- **Research assistant positions** – The stipend and number of positions depend upon the level of sponsored research carried out by the school each year.
- **Tuition fellowships** – There are a limited number of tuition fellowships for full-time students within the three master’s degree programs.
- **T. Edward Temple Memorial Scholarship Award** – This award of approximately $500 per year is given to an outstanding graduate student in the Master of Urban and Regional Planning program each year.
• The Senator Edward E. Willey Scholarship, the Virginia City Management Association/University Dr. T. Edward Temple Scholarship and the Leigh E. Grosenick Scholarship – These scholarships are available to outstanding students in the Master of Public Administration program. Preference for these three scholarships is given to those who plan public careers in Virginia.

• Internships – Paid, on-the-job internships are widely available in the Richmond area and elsewhere and are encouraged. VCU graduates also have been successful in obtaining presidential management internships in the federal government, state-government professional positions and local government positions.

Transfer credit
With the consent of the admission committee or program coordinator, a maximum of six semester hours of appropriate graduate credit may be transferred and applied toward the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning. These hours will not have been credited toward another degree.

Schoolwide master’s-level requirements
In addition to the program specific requirements of the Master of Public Administration, the Master of Science in Criminal Justice, and the Master of Urban and Regional Planning as outlined elsewhere in this bulletin, the Wilder School requires all master’s-level graduate degree-seeking students to acquire competence in four broad areas:

1. Research methods
2. Planning and/or policy analysis
3. Public administration
4. Ethics

Competence can be demonstrated by completion of the following:

Research methods

GVPA/PADM/URSP/3
CRJS 623 Research Methods for Government and Public Affairs

Planning/policy analysis

Select one of the following: 3

GVPD/URSP 632 Planning Theory and Processes
GVPA/PADM 625 Public Policy Analysis

Public administration

GVPA/PADM 601 Principles of Public Administration

Ethics

Select one of the following options: 3

Option A:
GVPA/PADM 683 Administrative Ethics

Option B:
A program specific course through which ethical issues are imbedded and discussed within a public sector context.

Such courses would include:

CRJS 550 Professional Ethics and Liability
PADM 661 Nonprofit Law, Governance and Ethics
PADM 689 Seminar in Public Administration: Integration of Theory and Practice
URSP 632 Planning Theory and Processes
URSP 635 Legal and Legislative Foundations of Planning

Selection of courses to meet these competency requirements will be made by the student in consultation with his/her academic adviser. While each graduate of the Wilder School must demonstrate competence in each of the areas outlined above, substitutions for the specific courses may be made with the written approval of the appropriate graduate program coordinator.

Criminal Justice, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The Certificate in Criminal Justice is a post-baccalaureate graduate program designed to help facilitate career advancement in the criminal justice and/or criminology field. The program seeks to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

This certificate program offers specialization for individuals interested or involved in law enforcement, corrections, juvenile justice or the courts.

It combines survey and theory courses with research, management and policy courses on the justice system. The courses in the certificate program are the same as the master’s courses. With minimum grades of B and upon acceptance into the master’s degree program, these courses are fully transferable to the Master of Science (M.S.) in Criminal Justice degree program.

Student learning outcomes

1. Students will identify concepts and issues that are relevant and/or appropriate for the research or content area.
2. Students will demonstrate logical connections in concepts, facts and information identified in the literature.
3. Students will be able to solve a problem, write a research paper or make a line of argument on a particular criminal justice topic.
4. Students will be able to exemplify the trivium of learning.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)
Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

The Post-baccalaureate Certificate in Criminal Justice program offers an abbreviated graduate-level course sequence of 15 credit hours for individuals with an academic and/or professional background in criminal justice. Applicants must meet all general admission requirements of the VCU Graduate School. (p. 17)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), five courses are required for the certificate, as specified in the chart list that follows. To receive the certificate, the student must achieve a B average in the five courses, earn no more than one C grade and complete the 15-hour certificate program within three years.

Criminal Justice, Master of Science (M.S.)

Program goal

The M.S. degree program in criminal justice assists in broadening and refining the understanding of criminal justice and criminological issues to facilitate career success and advancement. The goal of the program is to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

Student learning outcomes

1. Students will identify concepts and issues that are relevant and/or appropriate for the research or content area.
2. Students will demonstrate logical connections in concepts, facts and information identified in the literature.
3. Students will be able to solve a problem, write a research paper or make a line of argument on a particular criminal justice topic.
4. Students will be able to exemplify the trivium of learning.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program...
also will be based on: School (p. 17), admission to the Master of Science in Criminal Justice. In addition to the general admission requirements of the VCU Graduate School (p. 30), the Master of Science in Criminal Justice requires a minimum of 36 graduate credit hours of course work, with a minimum overall grade-point average of 3.0. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 36 semester hours.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

In addition to the general admission requirements of the VCU Graduate School (p. 17), admission to the Master of Science in Criminal Justice will also be based on:

1. An undergraduate GPA that exceeds 2.7 overall
2. A satisfactory score on the graduate standardized test (GRE, LSAT or GMAT)
3. Previous evidence of ability to perform graduate-level work (where applicable)
4. Professional experience in criminal justice (where applicable)

The courses in the post-baccalaureate graduate Certificate in Criminal Justice program are the same as the master’s courses. With grades B or better and, upon acceptance into the master’s degree program, courses from the certificate program are fully transferable to the Master of Science in Criminal Justice degree program.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), the Master of Science in Criminal Justice requires a minimum of 36 graduate credit hours of course work, with a minimum overall grade-point average of 3.0. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 36 semester hours.

To complete the M.S. curriculum, students must submit a portfolio of their work before they graduate. Contact the program director for format and submission details.

A maximum of nine semester hours of graduate credit from an accredited institution may be transferred and applied toward the master’s degree. All transfer requests require the approval of the graduate program coordinator and the Graduate School and may not have been counted toward another degree.

Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate)

Program mission
The graduate Certificate in Gender Violence Intervention is designed to prepare individuals for positions related to understanding, studying, responding to and preventing sexual and domestic violence in a variety of communities and settings. It provides specialized study in gender violence and can be earned on its own, or in conjunction with another graduate degree in the Wilder School of Government and Public Affairs or the School of Social Work.

Program goals
1. The program will guide students in the development of strong academic understanding related to gender violence intervention.
2. The program will guide students in the development of skills in applying academic concepts to the practice of gender violence intervention.

Student learning outcomes
1. Academic understanding
   a. Students will have knowledge of common types and theoretical perspectives of gender violence.
   b. Students will have knowledge of gender violence policies.
2. Skills
   a. Students will have the ability to demonstrate methods of applying concepts to problems, practice and policy.

b. Students will develop an understanding of professional behaviors and boundaries while working in GVI settings and with diverse populations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), a total of 18 graduate credit hours is required to earn the Certificate in Gender Violence Intervention. Four courses (12 credit hours) are required. In addition, an internship course (three credit hours), which offers the opportunity for involvement in all phases of work in this field, is required. For the remaining three credit hours, students may choose one of several elective options.

Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [combined]

The combined Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. The certificate requires a total of 18 credit hours comprising five required courses and one elective.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to the Graduate Admissions Office; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online admission application and select from the drop down menu “GVI Certificate.” Applicants then pay the application fee and attach an essay on why they wish to be in the program. Students should also indicate on the right-hand side of the admission application that they are currently in the M.S.W. program, which will alert the admissions office that the application can be sent directly to the program chair for an admissions decision.

Please arrange for references and transcripts to be forwarded to the Wilder School graduate studies office from the School of Social Work and they will be added to the admission application. Students should indicate in the “Comments” section of the application form that they are already enrolled in the M.S.W. program.

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, P.O. Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [ecramer@vcu.edu; (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., associate dean of the Wilder School [sbrubaker@vcu.edu; (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

¹ GVPA 623: satisfied by SLWK 706-SLWK 707 or SLWK 714-SLWK 715 [clinical or social work planning, administrative and policy practice research course (three credit hours)].
² GVPA 693: satisfied by SLWK 693-SLWK 694, SLWK 695; or SLWK 793-SLWK 794, SLWK 795 [a social work field practicum in an agency providing sexual or domestic violence services (three credit hours)].
³ PADM 650: satisfied by SLWK 602-SLWK 606 (three credit hours).

Total graduate credit hours required (minimum) for the Certificate in Gender Violence Intervention for students in the M.S.W. program 18

Course schedule

SOCY 635 will be offered every fall; SLWK 761 will be offered every spring. Both courses will be offered on Tuesday from 4-6:40.

Field placements

Once students are admitted and enrolled in the certificate program, they should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

Graduate program director
Melissa L. Abell, Ph.D.

Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The graduate Certificate in Geographic Information Systems emphasizes the core functions and applications of GIS. It provides specialized training in the operations and techniques related to the creation, analysis, modeling, visualization, interpretation and management of geographic information.

The certificate program is designed to meet the educational needs of both traditional and nontraditional students. The GIS program prepares traditional students to utilize GIS in their major areas of study. Nontraditional students can also take advantage of the certificate program to learn and/or upgrade GIS knowledge and skills that are applicable and important to their professions.

Student learning outcomes

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

<td>Fall</td>
<td>Apr 1 (Mar 1 for financial aid)</td>
<td></td>
</tr>
<tr>
<td>Certificate</td>
<td>Spring</td>
<td>Oct 1</td>
<td></td>
</tr>
</tbody>
</table>

**Special requirements**

- Only applicants with prior GIS training, course work or work experience are considered for spring admissions. Other applicants should apply for fall admission due to course sequencing and prerequisites.
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the prerequisites and general criteria of eligibility for admission to the GIS certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Geographic Information Systems
4. An official transcript showing successful completion of baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

At any time, students in the GIS certificate program may apply for admission into the Master of Urban and Regional Planning, the Master of Public Administration or the Master of Science in Criminal Justice degree programs. If accepted into a master's program, students may then transfer credits earned in the GIS certificate program toward partial fulfillment of the master's degree.

**Degree requirements**

The Certificate in Geographic Information Systems can be completed in one academic year. In addition to general VCU Graduate School graduation requirements (p. 39), students must complete 12 graduate credit hours of GIS course work that includes two required and two elective courses with a minimum grade-point average of 3.0 (out of 4.0).

**Curriculum requirements**

**Required courses**

<table>

<td>Spatial Database Management and GIS Modeling (offered in spring semester)</td>
<td>3</td>
</tr>
</tbody>
</table>

**Total Hours**: 6

**Electives**

Select two of the following: 6

**URSP 622** Community Socioeconomic Analysis Using GIS (offered in fall semester)

**URSP 626** Transportation Analytics and Modeling (offered in spring semester)

**URSP 627** GIS Applications in Urban Design (offered in spring semester)

**Total Hours**: 6

**Total graduate credit hours required (minimum) 12**

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

All credits earned in the certificate program are transferable to the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning programs. However, students must apply to the certificate and master's degree programs separately.

**Sample plan of study**

The following schedule is suggested as a means of completing the certificate program:

**Fall semester**

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>URSP 621</td>
<td>Introduction to Geographic Information Systems</td>
<td>3</td>
</tr>
<tr>

Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)

Program goal
This certificate program complements a student’s other fields of interest in public and government affairs. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels, as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

Student learning outcomes
Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

<td>Fall</td>
<td>Apr 1 (Mar 1 for financial aid)</td>
<td></td>
</tr>
<tr>
<td></td>
<td>Spring</td>
<td>Oct 1</td>
<td></td>
</tr>
</tbody>
</table>

Special requirements
- Admission applications that do not have a decision will automatically carry over to the next semester for consideration.

Applicants must meet all general admission requirements of the VCU Graduate School. (p. 17)

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), the graduate certificate program requires 15 credit hours, comprising five three-credit-hour graduate courses delivered through a combination of online technology and one on-campus session (three days) as described below. The courses offered in the certificate program are the same as those taken by students in the master’s program. With minimum grades of B and upon acceptance into the master’s program, these courses are fully transferable to the Master of Arts in Homeland Security and Emergency Preparedness degree program.

Online study
Web-based course delivery in an asynchronous format is designed around each course’s own Blackboard site.

On-campus study
During the final week of the semester, the class will have a three-day in-class session from Thursday to Saturday. It will feature presentations and discussion of student projects and papers, as well as lectures, seminar sessions and exercises. Exceptions will be made for students who are unable to attend these sessions, such as active-duty military personnel or emergency managers involved in ongoing operations.

Curriculum requirements

| HSEP 501 | Institutional Challenges of Security Preparedness | 3 |
provide easy access to homeland security institutions and practitioners. State capital and situated just 90 minutes from the nation's capital also inspires the Wilder School to actively contribute to the international and national dialogues of homeland security and emergency preparedness, which rests at the intersection of national defense, emergency management, law enforcement and policy management. With expertise in criminal justice, geography, government (local, state, federal and foreign), international affairs, policy planning and public administration, the Wilder School is particularly well-suited for such a program. Its location in the state capital and situated just 90 minutes from the nation's capital also provides easy access to homeland security institutions and practitioners.

Student learning outcomes
1. Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information in four key areas: risk and vulnerability analysis, strategic planning dilemmas of disasters and disaster preparedness, institutional coordination, and intelligence operations and legal/constitutional aspects.

2. Students will develop advanced skills in expository writing and oral presentation.

3. Students will achieve comprehension of the theoretical and practical principles of emergency preparedness for both natural disasters and terrorist incidents and be able to analyze key topics related to natural disasters, emergency planning, terrorism and counterterrorism.

4. Students will perform research, policy analysis and risk assessment using several methodological and theoretical approaches to homeland security and emergency preparedness.

5. Students will also be able to evaluate scholarly and practitioner analyses of homeland security and emergency preparedness.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student and/ or the student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following guidelines for degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)
Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

<td>October 1</td>
<td></td>
</tr>
</tbody>
</table>

Special requirements

• These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in a field related to homeland security and emergency preparedness. The application for admission requires:

1. A transcript documenting the completion of a bachelor’s degree
2. Three letters of reference (including both academic and professional references if possible)
3. A current resume
4. Satisfactory standardized test score (GRE, GMAT, MAT, LSAT)
5. A minimum 2.7 GPA (on a 4.0 scale) in the last 60 semester hours of undergraduate work

Students not meeting these requirements who have demonstrated advanced competency on a professional basis may be admitted to the program provisionally. The provisional period shall consist of the first nine hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 36 graduate credit hours with a cumulative minimum GPA of 3.0.

Off-campus study

Web-based course delivery is designed around each course’s own web-based site utilizing the Blackboard education system, which provides the following:

1. Course syllabus
2. Course reference materials and links to supporting websites
3. Course lectures
4. Faculty-student and student-student communications via weekly discussion topics
5. Student writing assignments

Participation in online discussions is mandatory and will count for a significant percentage of each student’s grades. Written work is submitted, evaluated and returned to students via the Blackboard education system assignment function.

On-campus study

During the final week of the semester, each class will have a three-day in-class session from Thursday to Saturday. It features presentations and discussion of student projects and papers, as well as lectures, seminar sessions and exercises. These sessions will include the formation of working groups of students from a number of classes in the program. Exceptions will be made for students who are unable to attend these sessions, such as active-duty military personnel or emergency managers involved in ongoing operations with provisions for maximum possible inclusion via electronic means and/or the substitution of additional student assignments equivalent to the on-campus study requirements.

Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)

Program goal
The program mission is to empower community leaders with the knowledge, theory, research and real-world applications needed to creatively solve public issues and shape public policy. The program equips current and future executives, boards, staff and volunteers to lead, govern and manage nonprofit organizations collaboratively, thoughtfully and ethically.

In the graduate Certificate in Nonprofit Management program, students gain knowledge and skills in nonprofit governance, management, fundraising, and program development and evaluation that they will need to become leaders and change agents in this rapidly growing sector. The school welcomes degree applicants from any undergraduate major, as entry- and top-level employees in nonprofit organizations have a wide range of backgrounds, including the sciences and humanities, social sciences, and technology. Courses are scheduled in the evening and on weekends with the working professional in mind.

Student learning outcomes
1. To understand the nonprofit sector’s relationship to the for-profit and government sectors
2. To know how to build a fundraising and donor communication plan model
3. To understand how to budget and evaluate the financial management practices of nonprofit organizations
4. To have the skills to analyze and implement laws impacting nonprofit organizations and their governance

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Special requirements

• Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 17), admission to the certificate program requires the same procedure used in applying to the M.P.A., except that a standardized examination is not required.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the certificate requires a total of 15 graduate credit hours, comprising four courses in the graduate public administration program.
and one elective. The elective may be from the public administration curriculum or from elsewhere within the school or university.

Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [combined]

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, Master of Social Work students pursuing the concentration in administration, planning and policy practice may simultaneously earn the post-baccalaureate graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs.

Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate admissions application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the M.S.W. degree program.

Certificate requirements for M.S.W. students

Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six credit hours.
of the certificate’s 15 credit-hour requirement. One of these courses is SLWK 712. The second course may be SLWK 711 or SLWK 713.

**Note:** M.S.W. students pursuing the clinical concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

**Total Hours** 15

**Total graduate credit hours required (minimum) for the Certificate in Nonprofit Management for students in the M.S.W. program SWAPPP concentration 15**

**Program goals**

The mission of the Master of Public Administration Program is to develop creative, principled leaders who understand the demands placed upon local, national and global public and nonprofit institutions and are equipped with skills in program management and policy analysis. Applying theory and practice, the program addresses complex social problems while advancing collaborative, effective, equitable, and ethical democratic governance.

The Master of Public Administration program’s mission supports a “generalist” conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

M.P.A. students may pursue a generalist curriculum (in which the four elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration. Many students will benefit from the depth in a specific area that a concentration provides. If a student pursues a concentration, the elective courses must come from the approved list of courses for that concentration area.

**Student learning outcomes**

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will solve problems and make decisions in public governance.
4. Students will communicate and interact with the workforce and citizenry.
5. Students will articulate and apply a public service perspective.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s
faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

</tr>
</tbody>
</table>

**Special requirements**

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.
- Please contact the program chair with specific application questions.

Master of Public Administration students may pursue a generalist curriculum (in which elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration (choose the generalist curriculum from the drop-down list of program options when applying online). Many students will benefit from the depth in a specific area that a concentration provides. For students who pursue a concentration, elective courses must come from the approved list of courses for that concentration (choose the specific M.P.A. concentration from the drop-down list of program options when applying online).

In addition to the general admission requirements of the VCU Graduate School (p. 17), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor’s degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

**Degree requirements**

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate School graduation requirements (p. 39), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

Program goals
The mission of the Master of Public Administration Program is to develop creative, principled leaders who understand the demands placed upon local, national and global public and nonprofit institutions and are equipped with skills in program management and policy analysis. Applying theory and practice, the program addresses complex social problems while advancing collaborative, effective, equitable, and ethical democratic governance.

The Master of Public Administration program’s mission supports a “generalist” conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

M.P.A. students may pursue a generalist curriculum (in which the four elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration. Many students will benefit from the depth in a specific area that a concentration provides. If a student pursues a concentration, the elective courses must come from the approved list of courses for that concentration area.

Student learning outcomes
1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will solve problems and make decisions in public governance.
4. Students will communicate and interact with the workforce and citizenry.
5. Students will articulate and apply a public service perspective.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s...
faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://wwwgraduate.admissions.vcu.edu).

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

Please contact the program chair with specific application questions.

Master of Public Administration students may pursue a generalist curriculum (in which elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration (choose the generalist curriculum from the drop-down list of program options when applying online). Many students will benefit from the depth in a specific area that a concentration provides. For students who pursue a concentration, elective courses must come from the approved list of courses for that concentration (choose the specific M.P.A. concentration from the drop-down list of program options when applying online).

In addition to the general admission requirements of the VCU Graduate School (p. 17), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor’s degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate School graduation requirements (p. 39), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).

2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.

3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.

4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

Degree requirements
The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate School graduation requirements (p. 39), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).

2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.

3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.

4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

Curriculum requirements

Core courses (required)
- PADM/GVPA 601 Principles of Public Administration 3
- PADM 602 Public Administration Theory 3
- PADM 607 Public Human Resource Management 3
- PADM 609 Financial Management in Government 3
- PADM/GVPA/CRJS/URSP 623 Research Methods for Government and Public Affairs 3
- PADM 624 Quantitative Methods for Public Administration 3
- PADM/GVPA 625 Public Policy Analysis 3
- PADM 689 Seminar in Public Administration: Integration of Theory and Practice (capstone) 3
- or PADM 690 Reading Seminar

Total Hours 24

State and local government management concentration

Required concentration course
- PADM 664 Local Government Administration 3
of 3.0, with a GPA of 3.3 in political science courses. The accelerated program is limited to students majoring in political science who have a minimum of 9 credit hours in political science courses.

To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission. Upon being accepted into the accelerated program, students must meet the same standards of performance as a graduate student that are described in detail in the "Satisfactory academic progress (p. 38)" section of the Graduate Bulletin, must maintain a 3.0 GPA and must satisfactorily complete all of the requirements for the degree, as stated in this bulletin. Guidance to students admitted to the accelerated program is provided by the public administration program director. Students should contact the M.P.A. graduate director for more information about admission procedures.

To graduate with a bachelor’s degree, a student must complete 120 credit hours of course work. Of these credits, 33 must be in political science. Of the 33 political science credit hours, the following 15 are required:

- POLI 103 U.S. Government 3
- POLI/INTL 105 International Relations 3
- POLI 107 Political Theory 3
- POLI 109 Comparative Politics 3
- POLI 490 Senior Seminar 3

Total Hours 15

Students enrolled in the accelerated program may take up to six credits of graduate public administration courses in each of the final two semesters of their undergraduate course work. These courses are shared credit hours with the graduate program, meaning that they will be applied toward the undergraduate degree requirement and the graduate degree requirement. A maximum of 12 credit hours may be taken prior to the completion of the baccalaureate degree. The bachelor’s degree will be awarded when the student has completed all requirements for the undergraduate degree, which may include the 12 graduate public administration credit hours.

The graduate courses that may be taken in the public administration program once a student is admitted to the accelerated program are as follows:

- PADM/GVPA 601 Principles of Public Administration 3
- PADM 602 Public Administration Theory 3
- PADM 607 Public Human Resource Management 3
- PADM 609 Financial Management in Government 3
- PADM/GVPA/CRJS/URSP 623 Research Methods for Government and Public Affairs 3
- PADM 624 Quantitative Methods for Public Administration (or a PADM elective course) 3
- PADM 650 Principles of Nonprofit Management 3

All accelerated program students must have their course schedules approved by the graduate public administration program director prior to registration.

**Program website:** wilder.vcu.edu/academic/pubadmin.html (http://wilder.vcu.edu/academic/pubadmin.html)

This program permits selected students to earn the B.A. and M.P.A. in a minimum of five years by taking certain master’s-level courses during the senior year of their undergraduate program. The program is restricted to students with strong credentials and a clear interest in careers in the public or nonprofit sector. To be eligible, students must have completed 90 credit hours of undergraduate course work and have an overall GPA of 3.0, with a GPA of 3.3 in political science courses. The accelerated program is limited to students majoring in political science who have a minimum of 9 credit hours in political science courses.

To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission. Upon being accepted into the accelerated program, students must meet the same standards of performance as a graduate student that are described in detail in the "Satisfactory academic progress (p. 38)" section of the Graduate Bulletin, must maintain a 3.0 GPA and must satisfactorily complete all of the requirements for the degree, as stated in this bulletin. Guidance to students admitted to the accelerated program is provided by the public administration program director. Students should contact the M.P.A. graduate director for more information about admission procedures.

To graduate with a bachelor’s degree, a student must complete 120 credit hours of course work. Of these credits, 33 must be in political science. Of the 33 political science credit hours, the following 15 are required:

- POLI 103 U.S. Government 3
- POLI/INTL 105 International Relations 3
- POLI 107 Political Theory 3
- POLI 109 Comparative Politics 3
- POLI 490 Senior Seminar 3

Total Hours 15

Students enrolled in the accelerated program may take up to six credits of graduate public administration courses in each of the final two semesters of their undergraduate course work. These courses are shared credit hours with the graduate program, meaning that they will be applied toward the undergraduate degree requirement and the graduate degree requirement. A maximum of 12 credit hours may be taken prior to the completion of the baccalaureate degree. The bachelor’s degree will be awarded when the student has completed all requirements for the undergraduate degree, which may include the 12 graduate public administration credit hours.

The graduate courses that may be taken in the public administration program once a student is admitted to the accelerated program are as follows:

- PADM/GVPA 601 Principles of Public Administration 3
- PADM 602 Public Administration Theory 3
- PADM 607 Public Human Resource Management 3
- PADM 609 Financial Management in Government 3
- PADM/GVPA/CRJS/URSP 623 Research Methods for Government and Public Affairs 3
- PADM 624 Quantitative Methods for Public Administration (or a PADM elective course) 3
- PADM 650 Principles of Nonprofit Management 3

All accelerated program students must have their course schedules approved by the graduate public administration program director prior to registration.

Public Administration, Master of (M.P.A.), generalist curriculum

Program accreditation
National Association of Schools of Public Affairs and Administration

Program goals
The Master of Public Administration program’s mission supports a “generalist” conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

M.P.A. students may pursue a generalist curriculum (in which the four elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration. Many students will benefit from the depth in a specific area that a concentration provides. If a student pursues a concentration, the elective courses must come from the approved list of courses for that concentration area.

The program’s mission includes the following goals:

1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

Student learning outcomes
1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will solve problems and make decisions in public governance.
4. Students will communicate and interact with the workforce and citizenry.
5. Students will articulate and apply a public service perspective.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduation.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http:// www.graduation.vcu.edu).

<tr>
<td></td>
<td>Summer</td>
<td>Feb 1</td>
<td></td>
</tr>
</tbody>
</table>

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current
semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

Master of Public Administration students may pursue a generalist curriculum (in which elective courses are selected from the M.P.A. program or any department or school at VCU) or an area of concentration (choose the generalist curriculum from the drop-down list of program options when applying online). Many students will benefit from the depth in a specific area that a concentration provides. For students who pursue a concentration, elective courses must come from the approved list of courses for that concentration (choose the specific M.P.A. concentration from the drop-down list of program options when applying online).

In addition to the general admission requirements of the VCU Graduate School (p. 17), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor’s degree, three letters of reference (including both academic and professional references if possible), a current resume and a satisfactory standardized test score (GRE, GMAT, MAT or LSAT). Students submitting LSAT scores must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate School graduation requirements (p. 39), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

**Public Administration, Master of (M.P.A.)/Juris Doctor (J.D.) from the University of Richmond [combined]**

**Program accreditation**

National Association of Schools of Public Affairs and Administration

A cooperative arrangement with the T.C. Williams School of Law of the University of Richmond makes it possible for students to receive a law degree from the University of Richmond and the Master of Public Administration from VCU. The dual degree program is designed to provide its graduates with competency in both public administration and law. This competency is applicable to areas of practice drawing upon knowledge and skills from each of these fields. The program brings together persons interested in both the broader aspects of public policy and government affairs and the law. It also brings together two fields that require complementary knowledge and skills that may be directed toward solving problems that are associated with the affairs of the government and nonprofit sectors. This integration of education in public administration and law draws on the contributions that each discipline can make to a professional knowledge base for practice in both fields.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Application process**

Interested students must apply separately for and be admitted to the T.C. Williams School of Law at the University of Richmond and the Master of Public Administration program at VCU. Students who are accepted into the dual degree program are permitted to apply 12 credit hours of work in the M.P.A. degree program toward meeting the graduation requirements in the T.C. Williams School of Law and up to 12 credit hours of work in the University of Richmond law school toward meeting the graduation requirements for the M.P.A. This credit application enables participants in the dual degree program to complete the requirements for the J.D. and the M.P.A. in an estimated four years of full-time course work. Applicants for this program are required to meet all admission and academic standards of the T.C. Williams School of Law of the University of Richmond, the VCU Graduate School and the M.P.A. program.

---

**Public Management, Certificate in (Post-baccalaureate graduate certificate)**

**Program goal**

The graduate certificate in public management is a program designed to enable practitioners in government and nonprofit organizations to acquire knowledge and skills in public administration without pursuing a full master’s degree.

**Student learning outcomes**

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will articulate and apply a public service perspective.

Special requirements

- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 17), admission to the certificate program requires the same procedure in applying to the M.P.A., except that a standardized examination is not required.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), the certificate requires a total of 18 hours of graduate credit hours involving a mix of required and elective courses. The courses are the same as those offered to M.P.A. students.

- PADM 654 Program Design and Evaluation in the Nonprofit Sector
and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

**Student learning outcomes**

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will display an understanding of the theory and practice of planning for cities and regions.
3. Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
4. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduation.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

<td></td>
<td></td>
</tr>
</tbody>
</table>

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.
3. Generally, at least two of the three letters of reference should come from former faculty.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

With the approval of the program chair, other appropriate graduate courses may be applied as electives.

Total graduate credit hours required (minimum) 48

Concentrations
If a student chooses to pursue a specific concentration, the concentration courses and corresponding credit hours will take the place of electives in the above list.

Internship
The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in community revitalization

Program accreditation
Planning Accreditation Board

Program goals
The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

Student learning outcomes
1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will display an understanding of the theory and practice of planning for cities and regions.
3. Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
4. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Spring | Oct 1

Special requirements
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist
Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.

2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning
4. Planning management

</tbody>
</table>

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.

2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.

2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning
4. Planning management

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in metropolitan planning

Program accreditation
Planning Accreditation Board

Program goals

The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

**Student learning outcomes**

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will display an understanding of the theory and practice of planning for cities and regions.
3. Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
4. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Special requirements**

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 27 of these credit hours; the remaining 21 are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a six-credit professional plan project through the professional plan course (URSP...
Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning
4. Planning management

Curriculum requirements

Required courses
- URSP 610 Introduction to Planning 3
- URSP 622 Community Socioeconomic Analysis 3
- URSP/GVPA/PADM/URSP 623 Research Methods for Government and Public Affairs 3
- URSP/GVPA 632 Planning Theory and Processes 3
- URSP 635 Legal and Legislative Foundations of Planning 3
- URSP 662 Foundations for Development Planning 3
- URSP 761 Planning Studio 3
- URSP 762 Professional Plan 6
- or URSP 764 Thesis or Projects

Total Hours 27

Metropolitan planning concentration

Required courses
- URSP 628 Land Use Planning 3
- URSP 651 Transportation Policy and Planning 3

Concentration electives
Select six credit hours from the following: 1
- FIRE 627 Real Estate Development 6
- URSP 520 Park Planning
- URSP 541 Urban Public Policy-making Processes
- URSP 611 Principles of Urban Design
- URSP 621 Introduction to Geographic Information Systems
- URSP 625 Spatial Database Management and GIS Modeling
- URSP 626 Transportation Analytics and Modeling
- URSP 627 GIS Applications in Urban Design
- URSP 641 Citizen Participation and Negotiation
- URSP 643 Housing Policy

Total Hours 12

1 With the approval of the program chair, other appropriate graduate courses may be applied toward the concentration.

2 URSP 691-902 when the topic is race, gender, ethnicity in planning; digital graphic design and desktop publishing; or fundamentals of design for planners.

Electives
Select nine credit hours from the following: 1
- URSP 502 Global Economic Change and Geography
- URSP 517 Historic Preservation in Planning
- URSP 521 Introduction to Geographic Information Systems
- URSP 525 Site Planning and Graphics
- URSP 567 The American Suburb
- URSP 605 Urban Planning History
- URSP/PADM 630 Strategic Planning and Management in the Public Sector
- URSP 637 Sustainable Community Development
- URSP 645 Sustainable Energy Planning and Policy
- URSP 647 Adaptive Reuse of Buildings
- URSP 650 Natural Resources and Environmental Planning
- URSP 652 Environmental Analysis
- URSP 653 Transportation Projects
- URSP/ENVS/BIOL 654 Environmental Remote Sensing
- URSP 655 Environmental Policy and Planning
- URSP 658 Transportation Finance
- URSP 666 Urban Commercial Revitalization
- URSP 691 Topics in Urban and Regional Planning
- URSP 794 Planning Practicum Seminar
- URSP 797 Directed Research

Total Hours 9

1 With the approval of the program chair, other appropriate courses may be applied as electives.

Total graduate credit hours required (minimum) 48

Internship
The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship
requirement may be waived for students with substantial planning-related professional experience.

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in planning management

Program accreditation
Planning Accreditation Board

Program goals
The Master of Urban and Regional Planning degree program envisions a better future by enhancing the quality of life in mature communities and regions, particularly in Virginia, but also elsewhere in the United States and abroad, through strong planning education, high-quality scholarship and professional planning practices. The goals for the program are to:

1. Create a diverse learning environment that cultivates engagement of diverse participants — both students and faculty — in the program.
2. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work.
3. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development.
4. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate.

Student learning outcomes
1. Students should display evidence of having developed a multidisciplinary understanding of urban life.
2. Students will display an understanding of the theory and practice of planning for cities and regions.
3. Students will display the skills necessary to work effectively and competently as planners in a variety of settings.
4. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional planner, as well as the social and environmental responsibilities of planners.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student's academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.
- Students who wish to pursue this concentration must contact the program chair for additional information.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the following specifications apply:

1. Students must have a minimum 2.7 GPA (on a 4.0 scale) in their last 60 semester hours of undergraduate work. In addition, a minimum GPA of 3.0 must have been maintained in their undergraduate majors. Finally, applicants are expected to receive satisfactory scores on each of the categories in the GRE, LSAT, GMAT or MAT examinations.
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the post-baccalaureate graduate Certificate in Urban Revitalization and the post-baccalaureate graduate Certificate in Geographic Information Systems may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

Urban and Regional Planning, Master of (M.U.R.P.)/Juris Doctor (J.D.) with the University of Richmond [combined]

Program accreditation
Planning Accreditation Board

A cooperative arrangement with the T.C. Williams School of Law of the University of Richmond makes it possible for students to receive a law degree (J.D.) and an urban and regional planning degree (M.U.R.P.) in four years rather than the five years ordinarily required.

The purpose of the program is to integrate the two professional curricula and to provide the expertise necessary to apply legal analytical skills and planning methods and analysis to urban and regional policy issues and problems. The dual degree program is designed to equip graduates for a variety of professional positions, including staff for legislative committees and government agencies and commissions, government legal staff, private consulting, neighborhood advocacy, directorships of planning and related agencies and executive aides to elected officials.

Refer to individual program pages for admission requirements, application deadlines, program goals, student learning outcomes, degree requirements, curriculum requirements and graduation requirements specific to the separate programs and concentrations.

Apply online at graduate.admissions.vcu.edu (http://graduate.admissions.vcu.edu).

Application process

Interested students must apply separately for and be admitted to the T.C. Williams School of Law of the University of Richmond, and the Master of Urban and Regional Planning program, VCU. Students will spend the entire first year in either the T.C. Williams School of Law or the L. Douglas Wilder School of Government and Public Affairs, and the second year in the program not selected the first year. Twelve credit hours of the planning program will be applied toward meeting the graduation requirements of the law school, and 12 credit hours in the law school will be applied toward meeting requirements of the M.U.R.P. program.

Upon admission to the dual-degree program, every student will be assigned an adviser in each program who will assist in planning a course of study that will include all of the required courses in each program plus such elective courses that will best serve the interests of the individual student.

Students deciding not to complete the dual degree program must meet all of the regular requirements of either the J.D. or M.U.R.P. to receive the degree of their choice.

Graduate program director
Meghan Z. Gough, Ph.D.
Urban Revitalization, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation
Planning Accreditation Board

Program goal
The Certificate in Urban Revitalization provides specialized training in the techniques and processes of city and neighborhood revitalization. Topics include adaptive reuse of buildings, historic preservation, real estate market analysis and the role of private-public partnerships in financing development projects. The certificate is useful for midcareer professionals who wish to learn new skills to expand their career options. It also is useful for recent college graduates who desire advanced training beyond the baccalaureate level and accelerated entry into the job market.

At any time, students in the certificate program may apply for admission into the Master of Urban and Regional Planning program and, if accepted, may transfer the certificate credits toward partial fulfillment of the master’s degree requirements.

Student learning outcomes
1. Students will demonstrate an understanding of having developed a multidisciplinary understanding of urban life.
2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Special requirements
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 17), the prerequisites and general criteria of eligibility for admission to the urban revitalization certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Urban Revitalization
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or
university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study.

5. Demonstration of professional experience in planning or work related to the certificate program (The experience requirement may be waived for candidates who demonstrate professional promise.)

All courses in the graduate Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

**Degree requirements**

In addition to general VCU Graduate School graduation requirements (p. 39), the Certificate in Urban Revitalization program requires 18 graduate credit hours of course work, which blends instruction in planning, urban design, economics and finance.

**Curriculum requirements**

Interim director

The Center for Public Policy focuses the university’s multidisciplinary efforts in public policy. As a comprehensive, university-wide center, the center has responsibilities in each area of the university’s broader missions: teaching, research and public service. The center houses and administers the Ph.D. in Public Policy and Administration.

The center conducts basic and applied research on a number of public policy matters, with special attention to health policy, urban and metropolitan development, and state and local government and politics. And, the center engages in significant service through its training programs, conferences, publications and other contributions to public discourse.

- Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in urban and regional policy (p. 643)

---

**Public Policy and Administration, Doctor of Philosophy (Ph.D.)**

**Program mission**

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant...
atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes
1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Dec 15 for assistantships</td>
<td>GRE, GMAT, MAT or LSAT</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Jan 30 final date for admission consideration</td>
<td>International applicants TOEFL</td>
</tr>
</tbody>
</table>

Special requirements
- Master’s degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student’s professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the program must hold a master’s degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:
1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

Admission standards
Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (http://international.admissions.vcu.edu).

Degree requirements
The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 39), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Total Hours 15

Concentration courses
All students will select a concentration after the first year of study and after passing the comprehensive examination. They will take four courses in one of the following areas of concentration. Courses will be selected from a list designated by the concentration committee for each area. The concentration committee will approve the program of study for each student in the concentration.

Select four courses in one of the following concentrations: 12

| Criminal justice policy |
| Public administration  |
| Public policy          |
| Urban and regional policy |

Total Hours 12

Refer to the program search function of the online VCU Bulletins for a complete description of concentration requirements.

Electives outside of the concentration
Students will take at least three elective courses outside the concentration with the approval of their advisers. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs, such as homeland security and emergency preparedness, criminal justice, public administration and urban and regional planning within the Wilder School.
In addition, students may choose elective courses from among the following three-credit courses:

Dissertation research

PPAD 898 Dissertation Research (minimum nine credits)

Total graduate credit hours required (minimum) 45

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in criminal justice policy

Program mission
The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes
1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.

3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.granduate.admissions.vcu.edu).

Special requirements

- Master’s degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the program must hold a master’s degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (http://international.admissions.vcu.edu).

Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 39), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based
analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public administration

Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.
It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships.
A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (http://international.admissions.vcu.edu).

**Degree requirements**

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 39), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a written or oral comprehensive examination in the concentration. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Program website: wilder.vcu.edu/academic/pubpolicy.html (http://wilder.vcu.edu/academic/pubpolicy.html)
Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public policy

Program mission
The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes
1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>GRE, GMAT, MAT or LSAT</td>
</tr>
<tr>
<td></td>
<td></td>
<td>Jan 30 final date for admission consideration</td>
<td>International applicants TOEFL</td>
</tr>
</tbody>
</table>

Special requirements
- Master’s degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student’s professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants to the program must hold a master’s degree or
a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

**Admission standards**

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct.15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

**Degree requirements**

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 39), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in urban and regional policy

Program mission
The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals
1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes
1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s...
In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
   a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
   b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
   c. Displays enthusiasm for the field of public policy and administration
   d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
   b. Statistics (equivalent of PADM 624)
   c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information
and materials are available from International Admissions (http://international.admissions.vcu.edu).

**Degree requirements**

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 39), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining three electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

**Electives outside of the concentration**

Students will take at least three elective courses outside the concentration with the approval of their advisers. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration and urban and regional planning within the Wilder School. In addition, students may choose elective courses from among the following three-credit courses:

**Qualifying examinations**

After completing all of the core courses in the Ph.D. program, each student takes a comprehensive qualifying examination on the core. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to...
material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a written or oral comprehensive examination in the concentration. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

**Dissertation**

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

The School of Medicine of the then Medical College of Virginia opened on November 5, 1838, as the medical department of Hampden-Sydney College. Full-time clinical faculty members were first appointed in 1928, and improved facilities became available between 1936 and 1941 with the completion of the 600-bed West Hospital, A. D. Williams Clinic and Hunton Hall dormitory, located on the current site of the Main Hospital building. Growth in faculty students and facilities continued after World War II, leading to the development of today's academic health center.

Hospital facilities on the MCV Campus include both in-patient and out-patient facilities. MCV Hospitals of the VCU Health System is licensed for 902 beds. In addition, the hospital at the McGuire Veterans Affairs Medical Center (600 beds) provides excellent patient care, training and research opportunities for the School of Medicine through its affiliation programs.

In the School of Medicine, advanced degree programs are coordinated through the Office of the Associate Dean for Graduate Education, who acts for the dean on all issues related to administration of advanced degree programs. Each advanced-degree program is represented by a faculty member who serves as director for graduate programs. Directors are appointed either by the chair of the department offering graduate degrees or, in the case of interdisciplinary programs, by the dean in consultation with the chairs of participating departments. The directors of graduate programs act on behalf of the programs and hold the responsibility and authority to represent the respective department(s) and their faculty to the school.

Mission statement

The mission of the VCU School of Medicine is to provide preeminent education to physicians and scientists in order to improve the quality of health care for humanity. Through innovative, scholarly activity and a diverse educational context, the school seeks to create and apply new knowledge, and to provide and continuously improve systems of medical and science education. Furthermore, the mission includes the development of more effective health care practices to address the needs of diverse populations and to provide distinguished leadership in the advancement of medicine and science.

The primary aim of the School of Medicine is to provide an academic environment appropriate for the education of its students, including undergraduate medical students, advanced-degree (graduate) students and graduate physician house officers, as well as continuing education directed toward the needs of practicing physicians. In the classroom, laboratory, clinic and hospital, the faculty and students are brought together in teaching-learning experiences that promote scientific scholarship and personal growth in knowledge and professional skills applicable to careers in a diverse workplace environment.

The School of Medicine and its faculty have vested responsibilities for the advancement of knowledge through research and for service to the community through application of skills in biomedical knowledge, health care leadership and patient care. Therefore, the school shares with teaching the interdependent and almost inseparable objectives of research and service.

The School of Medicine is located on the MCV Campus of Virginia Commonwealth University.

For comprehensive information on the School of Medicine departments, programs and faculty, please go to the school website at medschool.vcu.edu (http://www.medschool.vcu.edu).

Faculty and facilities

The School of Medicine consists of 700 full-time faculty, including affiliates, assisted by 630 residents and fellows and more than 700 clinical voluntary faculty. Programs of instruction and research are conducted on campus, at the McGuire Veterans Affairs Medical Center and at affiliated hospitals in an effort to expose the students to the variety of clinical disorders encountered in the eastern U.S. The School of Medicine has established a geographically separate campus at the Inova Fairfax Hospital. Each year, 24 third-year students take all their clinical clerkships at Inova Fairfax Hospital. Their fourth year elective program also is based at the Inova Fairfax Hospital.

Health policies

Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed prior to the third-year clerkships. For details related to these policies, please visit medschool.vcu.edu (http://www.medschool.vcu.edu).

The School of Medicine requires that all students enrolled in the graduate academic programs administered by the school hold active health insurance coverage. This requirement applies to students at all degree categories: doctoral, master’s and certificate. Compliance is monitored by administrative offices of the school and departments. Failure to comply with this requirement is grounds for dismissal.

Graduate programs

A complete listing of advanced degree programs including links to departments, programs, contact information and application requirements can be found at medschool.vcu.edu/audience/prospective.html (http://www.medschool.vcu.edu/audience/prospective.html).

Graduate programs offering Master of Science and doctoral training in the School of Medicine include:

- Anatomy and neurobiology
- Biochemistry
- Biostatistics
- Epidemiology (doctoral training only)
- Healthcare policy and research (doctoral training only)
- Human genetics
- Medical physics
- Microbiology and immunology
- Neuroscience (doctoral training only)
- Pharmacology and toxicology
- Physiology
- Social and behavioral health (doctoral training only)

The Department of Human and Molecular Genetics offers a Master of Science in Genetic Counseling and the Division of Epidemiology in the Department of Family Medicine and Community Health offers the Master of Public Health (M.P.H.) degree. Both of these degree programs are accredited by the appropriate national organizations.

The Department of Human and Molecular Genetics offers a combined degree program that pairs the M.S. in Genetic Counseling and the Ph.D. in Human Genetics. The school partners with the School of Allied Health Professions to offer combined Anatomy and Neurobiology/physical therapy track and Physiology/physical therapy track Ph.D. programs.

Recognizing that graduate education should prepare students for a variety of career options, and that developments in the basic sciences have expanded the breadth of scholarship, the school has developed approaches to interdisciplinary education, particularly in the areas of neuroscience, molecular biology and genetics, immunology, and structural biology.

A two-semester post-baccalaureate certificate program offering training for students seeking admission to professional school (i.e., School of Medicine, School of Dentistry) is available as the Pre-medical Graduate Health Sciences Certificate.
Application and admission to graduate programs

Application forms and instructions for applying to all graduate programs are available on the VCU Office of Admissions' Graduate Admissions website at graduate.admissions.vcu.edu/apply (http://graduate.admissions.vcu.edu/apply). International applicants should access materials at international.admissions.vcu.edu/apply/graduate (http://international.admissions.vcu.edu/apply/graduate).

1. The purpose of admission requirements and procedures is to ensure selection of competent students whose motivation, ability, education and character qualify them for graduate study in preparation for a career in science.

2. The following credentials constitute an application and should be sent to the VCU Office of Admissions as described on the Graduate Admissions website.
   a. Application for admission including the Application for Virginia in-state tuition
   b. Payment for the application fee
   c. Official transcripts of all undergraduate and graduate work sent directly from college or university registrars to the Graduate School.
   d. Letters of recommendation from three present or former teachers or others the applicant believes to be qualified to evaluate fitness to engage in graduate study for the degree in the field of choice.
   e. A personal statement from the applicant summarizing motivation, education and aims in pursuing graduate study.
   f. Verbal, quantitative and analytical portions of the Graduate Record Examination (required) (Medical College Admission Test or Dental Aptitude Test may be acceptable in lieu of the GRE for selected programs.)
   g. Transcripts from all institutions of higher learning attended
   h. International applicants for whom English is a foreign language must meet program expectations for performance on the Test of English as a Foreign Language or IELTS examination. Please note that required academic record documents submitted in the native language must be accompanied by an official English translation. Please see the Admissions website for detailed information.
   i. Acceptance of an applicant is based upon the recommendation of the director of graduate programs of the relevant program.

While most students matriculate in the fall semester, arrangements may be made to initiate graduate work at other times during the academic year.

Ph.D. programs

Advanced graduate study leading to a Doctor of Philosophy degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Family Medicine and Population Health (Epidemiology Division), Healthcare Policy and Research, Human and Molecular Genetics, Radiation Oncology (medical physics), Microbiology and Immunology, Pharmacology and Toxicology, Physiology and Biophysics, and Social and Behavioral Health, as well as an interdisciplinary neuroscience degree and molecular biology and genetics curricula in a number of disciplines.

General requirements for graduate degrees

1. All full-time graduate students are expected to register for a minimum of 15 credit hours for the fall and spring semesters and three credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.

2. Students enrolled in all Master of Science and doctoral programs are required to receive training in the responsible conduct of research in accord with federal guidelines.

3. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
   a. The assignment of a grade of U, D or F in any course
   b. Failure to maintain a cumulative GPA of 3.0 or greater
   c. Failure to pass the written or oral comprehensive examination
   d. Failure to pass the final examination

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus Graduate Committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student’s adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

4. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 3.0 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus Graduate Committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus Graduate Committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

5. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student’s advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus Graduate Committee a minimum of ten working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean’s office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.
6. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.

7. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science (M.S.) and Doctor of Philosophy (Ph.D.) programs offered by the School of Medicine.

Change in academic program

A student in good standing who is nearing the completion of their degree program may wish to be considered for admission to a more advanced degree administered by the School of Medicine. On more rare occasions, a student may wish to leave (withdraw) from the program in which he/she is currently enrolled and join another program at the same academic level in the School of Medicine.

In all cases the student seeking the change shall submit a hard-copy version of the VCU Application for Graduate School to the Office of Graduate Education in the School of Medicine. The one-page application must be accompanied by a letter written by the student providing the rationale for the change and the program into which the student is seeking admission. The Office of Graduate Education will review the application and the record of the student and then alert the department to the interest of the student if deemed appropriate. Students who are not making satisfactory academic progress (i.e. a student who is not in good academic standing) in a given program would not be considered candidates for a program change. In the absence of prior approval from the Office of the Dean, neither an “application” by a student directly to a program nor the “acceptance” of a student by a program will be valid. Neither students nor programs may initiate admission to a program in the School of Medicine in the absence of the approval by the Office of Graduate Education acting in consultation with the MCV Campus Graduate Committee.

The above applies to all changes in program (e.g. certificate level to master’s, master’s to Ph.D., program change at the same degree level).

The student adviser and advisory committee

Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

1. Each student shall have an adviser and an advisory committee.
2. Appointment of the adviser:
   a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
   b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the student’s major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the major department.

3. Duties of the adviser:
   a. The adviser shall, with the student’s advisory committee, have responsibility for guiding the student’s academic program.
   b. The adviser shall develop a plan for the student’s didactic program with the student.
   c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student’s advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
   d. The adviser shall supervise the student’s research work and dissertation preparation and be one of the examiners of the dissertation (Ph.D.).
   e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus Graduate Committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.

4. The student’s advisory committee:
   a. The student’s advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus Graduate Committee, upon recommendation of the student’s adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser.
   b. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student’s scholarly program are represented in the expertise of the faculty members.
   i. The committee for the Ph.D. candidate shall consist of a minimum of five members as follows: the student’s adviser; two other members of the graduate faculty of the department/program in which the student is enrolled; and at least two other members of the graduate faculty from departments other than the one in which the student is enrolled (where feasible, from two different departments).
   ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus Graduate Committee.
   iii. Appointment is made by the dean of the Graduate School.
   iv. The student adviser is identified as the chair of the Student Advisory Committee as the default option. This creates the potential for a conflict of interest with respect to the management of the research project of the student. As a means of exploring options to existing protocol, the Student Advisory Committee has the option of electing a member of the committee to serve as the chair. Should this be the
case, the revised committee structure will be submitted to the graduate program director for review and approval.

b. Duties of the student’s advisory committee:
   i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral qualifying examination and final examination, and as a consultative body to provide scholarly counsel.
   ii. The student’s advisory committee shall work with the student’s adviser in guiding the student’s graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
   iii. The student’s advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus Graduate Committee no later than the third semester of study.
   iv. The student’s advisory committee shall conduct the oral comprehensive and final examination.

**Doctor of Philosophy**

1. A minimum of 30 credit hours exclusive of research credits is generally required. In practice, a minimum of four years of study, including research, is necessary to complete all requirements.

2. For all Ph.D. programs, a period of residence of at least two consecutive semesters is required. In the context of Ph.D. training, “residence” refers to full-time enrollment, equivalent to enrollment of nine or more credit hours in a given academic term. The School of Medicine recommends that doctoral students maintain “residency” status for one academic year (fall and spring semesters), usually during the initial year of study. This recommendation is to ensure that the didactic component of training is not prolonged. Students should register in each academic term as a means of ensuring that timely progress toward degree completion is achieved. The specific requirements for residency will be detailed by the individual programs. A time limit of seven calendar years, beginning at the time of first registration, is placed on work to be credited toward the doctor of philosophy degree.

**Admission to candidacy**

The development of the individual as an independent research scientist is a critical component of the Ph.D. degree. The potential for such development is assessed on the basis of both mastery of subject matter and research competency as judged in the context of written and oral examinations administered at the level of department or program. Students are admitted to candidacy by the dean on the basis of completing examinations as required and the recommendation of the faculty adviser, student advisory committee and graduate program director.

**Individual Development Plan**

In order to assist trainees and advisers in the efficient completion of degree training and considered identification of a strategy for career development once the degree has been awarded, all graduate students will be required to create an Individual Development Plan. The IDP will have two components, both of which are critical to the achievement of a successful career outcome.

The first component will address the action plan for the research project over the next 12-month period. This should take a form analogous to the “Specific Aims” section of an NIH grant proposal, identifying key experimental objectives. In addition, objectives in professional development (e.g. attendance at a national meeting, delivery of a seminar) are also identified. The student adviser works with the student to develop this component of the IDP. The IDP is then used as a resource for consideration and comment by the Student Advisory Committee in the annual meeting with the student.

The second component of the IDP will explore the long-term career objectives of the student. “Career objectives” must look beyond a period of postdoctoral training. The nature of this component of the plan will vary widely depending on the individual. For the individual who has identified a particular career position, the IDP might, for example, seek to gain a more complete understanding of the requirements of such a position or the identification of “soft” skills critical to success in the position. If undecided, the individual might explore the variety of career options for which the biomedical science degree can serve as a foundation. While the student’s research adviser can play a role in developing this component of the plan, students should be encouraged to identify a mentor who can provide critical, concrete and confidential counsel to the student.

The use of the career planning tool distributed by the American Association for the Advancement of Science as “myIDP” to both guide the creation of a plan and convert entries into a report format is strongly recommended. A copy of the IDP will be submitted to the graduate program director in June of each year. The plans will be forwarded to the School of Medicine Office of Graduate Education. A record of the receipt of the IDP is placed in the student file.

**Progress to degree completion**

The timely completion of advanced degrees is in the best interests of the student. In order to ensure that impediments to degree completion are addressed at an early stage the Office of Graduate Education in the School of Medicine houses a record of the meetings of the Student Advisory Committee in GradTrak. On an annual basis, programs will provide to the Office of Graduate Education a record of the date(s) on which the Student Advisory Committee has met, a copy of the minutes of the meeting and/or the memorandum provided to the student describing the progress made to degree completion, along with the expression of compliments, concerns and corrective action as appropriate. A copy of the IDP prepared by the student accompanies the report of the actions of the Student Advisory Committee meeting.

While recognizing that the research enterprise is subject to unknowns including unanticipated problems in the successful conduct of experiments, the duration of training should not be unduly extended as a consequence. The adviser and Student Advisory Committee have a responsibility to ensure that the scope of the research project is such that a doctoral degree can be completed in five to six years. The Student Advisory Committee plays a central role to ensure that the treatment of the student is equitable and that the student displays an appropriate effort, commitment and development.

Advisers have an obligation to ensure that in circumstances where student performance is not deemed to be satisfactory, the presence of the potential problem is communicated to the Student Advisory Committee and the program director. The interests of the adviser and
student are best served when the evaluation of the situation is made with multiple inputs. In cases where a problem does exist, communication of the substandard performance, along with a course and timeline for remediation, should be formally communicated to the student as soon as possible. Documenting the existence of problem areas should not await the end of a semester or be delayed until a scheduled assessment is to take place.

If the student has not completed all degree requirements at the end of 15 semesters (inclusive of summer terms) of study, the adviser will provide specific information on the timeline for completion of the degree and submit to the Student Advisory Committee and the graduate program director (with a copy forwarded to the Office of Graduate Education) for review and action if warranted.

**Comprehensive examinations**

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination(s) generally focus(es) on the subject matter deemed critical as a foundation in the particular program. The written examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the candidate to integrate information and display an appropriate mastery of problem-solving capabilities.

1. To advance to candidacy, the student shall take written and oral examinations designed to determine the potential of the individual for development as an independent research scientist. Advancement to candidacy should preferably take place prior to initiating the third academic year in the program. The written examination is administered by the student’s department/program. In the event of failure of the written comprehensive examination, the student, with the approval of the MCV Campus Graduate Committee, may be permitted to repeat the written examination.

2. After passing the written examination(s), the student is eligible for the oral examination. The oral examination is conducted by the student’s advisory committee and is chaired by a graduate faculty member representing the MCV Campus Graduate Committee who serves as a voting member of the examining committee. The oral examination is to be administered no later than six months after passing the written examination. (Departments/programs may require a shorter interval.)

3. The oral examination is scheduled through the Office of Graduate Education. An announcement of the candidate’s name, department/program and the time and place of the examination shall be posted at least 10 working days in advance of the examination. If a written document prepared by the candidate is a component of the examination, the document shall be provided to the members of the examining committee at least 10 working days in advance of the examination. The oral comprehensive examination is open to all members of the faculty. Faculty members in attendance may ask questions of the candidate, but their questions shall not be presented until after the advisory committee has completed its questions. Faculty members other than those on the advisory committee shall not vote on the success or failure of the candidate. If a student fails the oral examination, the student may be reexamined with the approval of the MCV Campus Graduate Committee.

4. A favorable vote of the examining committee (all members of body being required to vote) with no more than one negative vote, is required to pass the examination. Members of the examining committee must vote on the performance as either pass or fail.

5. The oral examination must be completed successfully at least six months before submission of the dissertation.

**Dissertation research**

1. The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

2. The body of experimental work to be incorporated into the dissertation is subject to the approval of the membership of the student advisory committee. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the dissertation. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.

3. The dissertation is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the dissertation document can serve as the basis for the final oral examination (or dissertation defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the dissertation document is distributed to the advisory committee. Distribution of the dissertation document to the advisory committee will usually occur at least ten working days in advance of the final oral examination. The Office of Graduate Education is informed of the scheduling of the final oral examination ten working days in advance of the examination. The Office of Graduate Education will then post an announcement of the final oral examination to include the name and department of the candidate together with the title of the dissertation and the day, place and time of the final oral examination.

4. The final oral examination is conducted by the student advisory committee at a specified time and place, is chaired by the faculty adviser and is open to all members of the faculty. The subject matter of the examination is limited to the content of the candidate’s dissertation and related areas. A favorable vote of the advisory committee with no more than one negative vote shall be required to indicate that the candidate has passed the final oral examination. All advisory committee members must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the examination is not passed, the Student Advisory Committee must recommend a course of action for the student. The committee might, for example, recommend that a re-examination be scheduled, or that a major revision of the dissertation (including added data collection and/or analysis) be required prior to rescheduling of the examination, or that the student be terminated from the program or other action as deemed appropriate by the committee. A majority of the committee membership must concur in the recommended course of action. The recommendation must be communicated in writing to the appropriate graduate program director for approval within five working days of the examination. The program, acting through the graduate program director, shall accept the recommendation of the committee or determine an alternative within an additional five working days. The course of action approved by the program will be communicated in writing to the student by the graduate program director. The graduate program director shall inform the Office of Graduate Education of the School of Medicine in writing as to the action taken.
If a re-examination is the recommended course of action, a representative of the MCV Campus Graduate Committee will be appointed to serve as the chair of the examining committee.

5. The student advisory committee approves the dissertation document as acceptable following the final oral examination. Approval of the dissertation as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the dissertation. Approval of the dissertation by the advisory committee must be unanimous.

**Termination of enrollment**
The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus Graduate Committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus Graduate Committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application
2. An act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander)
3. Conviction of a felony involving moral turpitude
4. Plagiarism or other scientific misconduct

**Master’s programs**
Advanced graduate study leading to the Master of Science degree is offered in the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. The Department of Family Medicine and Population Health through the Division of Epidemiology offers the Master of Public Health degree, the Department of Human and Molecular Genetics offers the Master of Science degree in Genetic Counseling and the department of Radiation Oncology administers the Master of Science degree in Medical Physics.

**General requirements for graduate degrees**
1. All full-time graduate students are expected to register for a minimum of five credit hours for the fall and spring semesters and six credit hours for the summer session. This requirement includes research. As an example, when students are registered for 10 credits in formal courses, they are expected to undertake five credits of research under the direction of their adviser or any approved faculty member. Research courses shall be graded as S (satisfactory), U (unsatisfactory) or F (fail). Registration for one credit hour is permitted only with prior permission.
2. Students are required to remain in good academic standing through the course of their degree program. Unsatisfactory student performance includes:
   a. The assignment of a grade of U, D or F in any course
   b. Failure to maintain a cumulative GPA of 2.5 or greater
   c. Failure to pass the written or oral comprehensive examination
   d. Failure to pass the final examination

A student whose performance is unsatisfactory must obtain the approval of the MCV Campus Graduate Committee to gain permission for continuing in the graduate program. The committee elicits the recommendation of the department/program (as represented by the director of graduate studies of the appropriate program) and, as appropriate, the student’s adviser in making a determination. Unsatisfactory performance also constitutes grounds for the termination of financial assistance to the student.

3. Students may not take the comprehensive examination for the Ph.D. degree if their overall GPA is less than 2.5 or if the GPA for courses within the major department is below 3.0. Students may not take the final oral examination for the M.S. or Ph.D. degree if their overall GPA is below 3.0. The examining body for the administration of the comprehensive examinations and the final examination is the student advisory committee. For the oral comprehensive examination for Ph.D. students and the final examinations for M.S. students, the body is supplemented by the addition of a representative of the MCV Campus Graduate Committee who chairs the examining body. The representative must be a member of the graduate faculty and is appointed by the chair of the MCV Campus Graduate Committee. The representative holds the responsibility for compliance with protocols appropriate to the examination, including the equitable treatment of the candidate.

4. Copies of the thesis/dissertation consistent with university standards shall be provided to the members of the student’s advisory committee three weeks or more before the date of the defense of the thesis/dissertation. Following acceptance of the thesis/dissertation defense schedule by the committee, the student must submit a complete copy of the thesis/dissertation and a request for scheduling of the final examination to the chair of the MCV Campus Graduate Committee a minimum of ten working days in advance of the examination date. After passing the final examination, it shall be the responsibility of the candidate to present to the dean’s office the approved original thesis/dissertation plus the minimum required number of copies (three for M.S., four for Ph.D.) in final form suitable for binding. In consultation with the office staff, the candidate shall be responsible for the binding and the processing of the thesis through VCU Libraries and for the payment of all charges for these services.

5. A degree is granted only after all requirements have been fulfilled, including payment of all fees to the university, and after submission of the copies of the thesis for binding.

6. VCU currently requires registration for a defined credit hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is therefore no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree within the present enrollment framework, the accumulation of 80 credit hours for a M.S. degree and 180 credit hours for a Ph.D. degree can be taken as a reasonable measure. These credit hour totals refer to degree programs requiring the preparation of a thesis or dissertation. Unless explicitly stated, the figures cited above apply to Master of Science and Doctor of Philosophy programs offered by the School of Medicine.
Change in academic program
A student in good standing who is nearing the completion of their degree program may wish to be considered for admission to a more advanced degree administered by the School of Medicine. On rare occasions, a student may wish to leave (withdraw) from the program in which he/she is currently enrolled and join another program at the same academic level in the School of Medicine.

In all cases the student seeking the change shall submit a hard-copy version of the VCU Application for Graduate School to the Office of Graduate Education in the School of Medicine. The one-page application must be accompanied by a letter written by the student providing the rationale for the change and the program into which the student is seeking admission. The Office of Graduate Education will review the application and the record of the student and then alert the department to the interest of the student if deemed appropriate. Students who are not making satisfactory academic progress (i.e. a student who is not in good academic standing) in a given program would not be considered candidates for a program change. In the absence of prior approval from the Office of the Dean, neither an “application” by a student directly to a program nor the “acceptance” of a student by a program will be valid. Neither students nor programs may initiate admission to a program in the School of Medicine in the absence of the approval by the Office of Graduate Education acting in consultation with the MCV Campus Graduate Committee.

The above applies to all changes in program (e.g. certificate level to master’s, master’s to Ph.D., program change at the same degree level).

The student adviser and advisory committee
Students receive guidance and counsel from the director of graduate programs for the appropriate program prior to appointment of the permanent adviser. The permanent adviser holds the primary responsibility for monitoring the development of the student in the program and providing the appropriate guidance and counsel essential to the scholarly development of the student.

An advisory committee, appointed shortly after the permanent adviser is appointed, serves as both an examining and consultative body, functioning to assist the development of the student. Committee members hold a special responsibility as a source of counsel for each student.

1. Each student shall have an adviser and an advisory committee.
2. Appointment of the adviser:
   a. The initial adviser will be the director of the graduate program or his/her designee prior to appointment of the permanent adviser.
   b. A permanent adviser shall be appointed from the graduate faculty by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the student’s major department. Appointment should be made no later than the beginning of the fall semester following matriculation. A change in the permanent adviser may be made by the chair of the MCV Campus Graduate Committee upon recommendation of the chair of the major department.
3. Duties of the adviser:
   a. The adviser shall, with the student’s advisory committee, have responsibility for guiding the student’s academic program.
   b. The adviser shall develop a plan for the student’s didactic program with the student.
   c. The adviser shall, on the basis of the proposed didactic and scholarly program for the student, identify members of the faculty to comprise the student’s advisory committee and elicit their agreement to serve, the adviser serving as the chair of the committee.
   d. The adviser shall supervise the student’s research work and thesis preparation and be one of the examiners of the thesis (M.S.).
   e. At the close of the spring semester, the adviser shall submit to the program director or the chair of the MCV Campus Graduate Committee a report covering the progress of the student. Copies of the report should be provided to the student and the membership of the student advisory committee by the adviser.
4. The student’s advisory committee:
   a. The student’s advisory committee shall be appointed no later than the end of the fall semester of the second year after matriculation by the chair of the MCV Campus Graduate Committee, upon recommendation of the student’s adviser, review by the graduate program director and recommendation of the chair of the department of the permanent adviser. Appointment of the student advisory committee must be done within three months of the appointment of the permanent adviser and prior to the administration of comprehensive (or final) examinations. The composition of the advisory committee shall be such that significant areas of the student’s scholarly program are represented in the expertise of the faculty members.
      i. The committee for the M.S. candidate shall consist of a minimum of three members as follows: the student’s adviser (who serves as chair of the committee); one other member of the graduate faculty of the department/program in which the student is enrolled; and one other member of the graduate faculty from a department other than the one in which the student is enrolled.
      ii. A faculty member who is not a member of the graduate faculty may be appointed to a student advisory committee if approved by the MCV Campus Graduate Committee. Appointment is made by the dean, School of Graduate Studies.
   b. Duties of the student’s advisory committee:
      i. The advisory committee functions as an advisory body to ensure that timely progress toward degree completion is being achieved, as an examining body participating as appropriate for the intended degree in written qualifying examinations and conducting the oral qualifying examination and final examination, and as a consultative body to provide scholarly counsel.
      ii. The student’s advisory committee shall work with the student’s adviser in guiding the student’s graduate program and shall meet at least annually. It is strongly recommended that the advisory committee meet with the student prior to administration of the comprehensive examination(s) by the committee.
      iii. The student’s advisory committee shall recommend and approve a degree program (including foreign language if applicable) for the student as soon as it is practical. The proposed program should be filed with the chair of the MCV Campus Graduate Committee no later than the third semester of study.
      iv. The student’s advisory committee shall conduct the oral comprehensive and final examination.
Master of Science

1. A minimum of 24 semester course hours is required, exclusive of research credits. In practice, it is found that two years of study are usually necessary to complete the requirements. A time limit of five calendar years, beginning at the time of first registration, is placed on work to be credited toward the Master of Science degree. Generally a maximum of one-third of the hours required for a master’s degree may be transferred from another VCU program or outside institution and applied toward the degree upon recommendation of the student’s director of graduate programs with the concurrence by the chair of the MCV Campus Graduate Committee.

2. Each student must conduct an original investigation under the supervision of the permanent adviser, prepare a thesis reporting the results of this research and analyze its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style.

3. The body of experimental work to be incorporated into the thesis is subject to the approval of the student advisory committee members. The advisory committee should, therefore, be formally consulted as the research project nears completion to ensure that there is agreement with respect to the material deemed necessary and sufficient for incorporation into the thesis. Such consultation will normally occur in the form of a meeting of the advisory committee with the student. The faculty adviser has a responsibility to advise the student when the meeting of the advisory committee for this purpose should take place.

4. The thesis is prepared in an acceptable form and style with the counsel of the faculty adviser. The faculty adviser determines when the thesis document can serve as the basis for the final oral examination (or thesis defense). With the approval of the faculty adviser, the final oral examination by the advisory committee is scheduled and the thesis document is distributed to the advisory committee. Distribution of the thesis document to the advisory committee should take place at least ten working days in advance of the final oral examination. The Office of Graduate Education is to be informed of the scheduling of the final oral examination ten working days in advance of the scheduled date. The Office of Graduate Education then identifies a representative of the MCV Campus Graduate Committee to chair the examination, and provides an announcement of the final oral examination, which includes the name and department of the candidate together with the title of the thesis and the day, place and time of the final oral examination.

5. The final oral examination is conducted by the student advisory committee at the designated time and place and is open to the faculty. A representative of the MCV Campus Graduate Committee serves as the chair of the examination committee and is a voting member of the examination committee. The subject matter of the examination includes the subject matter of course work as well as the content of the thesis. A favorable vote of the advisory committee with no more than one negative vote is required to indicate that the candidate has passed the final oral examination. All members of the examination committee must vote. The outcome of the final oral examination is reported to the Office of Graduate Education. If the outcome is negative, the final oral examination may be retaken with the approval of the MCV Campus Graduate Committee. Advance approval is requested in writing by the department on behalf of the candidate.

6. The student advisory committee approves the thesis document as acceptable after the final oral examination has been successfully completed. Approval of the thesis as acceptable is indicated by the signature of all members of the advisory committee on the signature page of the thesis. Approval of the thesis by the advisory committee must be unanimous. A thesis is not required for completion of the Master of Genetic Counseling Program. In lieu of the thesis, students in this tract are required to successfully pass comprehensive oral and written examinations.

Master of Public Health

The M.P.H. degree is a generalist program that allows students to focus on research or public health practice through course electives. A minimum of four semesters of full-time study (45 credit hours) is necessary to complete the degree requirements. All M.P.H. students are required to conduct a scientific investigation on a topic relevant to human and public health. The research project is conducted under the guidance of a faculty adviser and a preceptor with expertise in the topic area. The student must prepare a report of the research and give an oral presentation to the department.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct or for persistent failure to fulfill the purposes for which he or she was matriculated.

A student enrolled in a graduate program under the supervision of the MCV Campus Graduate Committee may be dismissed from the school in which he is enrolled for failure to meet academic requirements prescribed by his school or failure to exhibit the attitudes and skills deemed necessary to function within his chosen scientific discipline.

Any action by a graduate student in a program under the supervision of the MCV Campus Graduate Committee considered to be unprofessional conduct shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admission application
2. An act that violates the established legal standards regarding conduct of one person toward society (i.e., stealing, lying, cheating and slander)
3. Conviction of a felony involving moral turpitude
4. Plagiarism or other scientific misconduct

MCV Campus Graduate Committee

The assembled directors of graduate programs and the associate dean for graduate education form the MCV Campus Graduate Committee, with the associate dean serving as chair of the committee. This committee holds the responsibility for ensuring appropriate administration of graduate programs, reviewing modifications of didactic courses, new course offerings and new programs, reviewing proposed modifications of program curricula to ensure maintenance of standards of quality, avoid duplication and comply with the missions of the school, and for recommending action to the dean. The committee members provide the pool of candidates from which the school representatives to the University Graduate Council are chosen.

The School of Medicine follows the policies of the Graduate School with regard to the modification of existing courses, curricula and programs as well as the introduction of new offerings. Proposals will normally come from the faculty acting through departmental bodies charged with the responsibility of monitoring academic training. In the case
of offerings in interdisciplinary areas, these will normally require the input and approval of departments whose faculty and students are participants. The associate dean for graduate education in the School of Medicine may assist in the coordination of the proposal process. Proposed changes and additions are, under University guidelines, subject to review by the Curriculum Committee of the school. The MCV Campus Graduate Committee serves as the Curriculum Committee for the School of Medicine. On approval by the MCV Campus Graduate Committee, the approval of the dean of the School of Medicine is required prior to submission to University Graduate Council for review.

For comprehensive information on the School of Medicine departments, programs and faculty, please go to the school website at medschool.vcu.edu (http://www.medschool.vcu.edu).

Monitoring Satisfactory Academic Progress

The School of Medicine employs an electronic system given the trivial name “GradTrak” as a means of consolidating student records and the achievement of milestones in the progress to degree completion in a convenient and appropriately accessible format. Nomination and approvals of the permanent adviser and student advisory committee members are performed in this system as are the announcements of the scheduling of comprehensive and final program examinations and their outcomes. The system incorporates the continuing record of the student transcript and provides a repository for the archiving of documents associated with the matriculation of the individual as well as progress reports and other relevant documents. Access to the electronic student file is password-protected and restricted to faculty with program oversight or participation on the student advisory committee.

School of Medicine Registrar

The School of Medicine houses a registrar’s office to meet the needs of physician trainees and alumni. Visit the School of Medicine website for more information at medschool.vcu.edu/studentaffairs/registrar (http://www.medschool.vcu.edu/studentaffairs/registrar).

Criminal background checks

All applicants to the VCU School of Medicine who receive an acceptance will have a criminal background check performed by Certiphi Screening Inc. If there is a positive finding you will be notified by Certiphi first; this will allow you to make corrections to the report and verify the information. If there is no change in your status Certiphi will then notify VCU of their positive findings. VCU’s Criminal Background Committee will meet to discuss your Certiphi report to determine if acceptance is to be withdrawn. We encourage full disclosure at all times on the AMCAS and supplemental applications, as dishonesty will impact the committee’s decision. If you have a legal finding or institutional action against you after the supplemental is submitted please notify our admissions office immediately. Once an applicant is matriculated, full disclosure is also required throughout your time in medical school. Criminal background checks are repeated for all students at the end of the second year and for specific program participations throughout medical school.

Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in advanced international addiction studies

Program mission

The mission of the addiction studies certificate with a concentration in advanced international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of both essential and advanced topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

Program goals

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

Student learning outcomes

1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are
established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Certificate</td>
<td>Fall</td>
<td>Jul 13</td>
<td>TOEFL</td>
</tr>
</tbody>
</table>

Special requirements
• Prospective students will find application materials on the VCU IPAS website. Application forms, reference letters and official university transcripts should be sent to the VCU program director, Mary Loos, Ph.D., as instructed on the website. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

Through a collaborative program between VCU, King’s College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain a Certificate in Addiction Studies.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must:
1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor’s degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor’s degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or grade C or above in GCSE English.

Students who are enrolled in the Certificate in Addiction Studies intermediate concentration and are maintaining a minimum GPA of 3.0 may elect to change their concentration to the advanced concentration at any time during their enrollment with the permission of the program director. Students will be awarded only one certificate, however, which will reflect their highest level of attainment.

Students who have completed the Certificate in Addiction Studies intermediate concentration may also, after a period away from study, choose to apply for the advanced concentration addiction studies certificate. Students wishing to continue their studies through this mechanism may count the earlier courses toward the advanced concentration, as long as they meet all admission requirements of the Graduate School and pending surrender of the lower-level credential before being awarded the more-advanced credential. Courses taken more than four years prior to the time of the student’s application will not be considered transferable and will need to be repeated.

Students completing either concentration in the Certificate in Addiction Studies may apply to the Master of Science in Addiction Studies program, also known as the International Programme in Addiction Studies and, if accepted, have their courses count toward that degree as long as they meet all admission requirements of the Graduate School. Courses taken more than four years prior to enrollment in the M.S. program will not be considered current and must be repeated.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 39), students are required to successfully complete 24 credit hours in the six required graduate courses.

Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in intermediate international addiction studies

Program mission
The mission of the addiction studies certificate with a concentration in intermediate international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of both essential and advanced topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

Program goals
1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

Student learning outcomes
1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

### Addiction Studies, Master of Science (M.S.)

#### Program goal

The mission of the International Program in Addiction Studies leading to a Master of Science in Addiction Studies degree is to offer students cross-cultural exposure to the critical prevention, treatment, research and policy issues facing the field. Through a collaboration arrangement including VCU, King's College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain the degree. The program is designed to prepare students for local, national and international policy positions, prevention/treatment program management and other leadership positions in the addictions field. This program will speed the dissemination of the latest international addictions-related knowledge, especially to remote locations around the world, and help students compare international perspectives and translate this knowledge into more effective prevention and treatment practices and evidence-based policies within their own countries.

Students in the program will:

1. Demonstrate a detailed knowledge of the field of addiction science (including comparative international policies and practices) to prepare them for leadership roles in a variety of settings (including addiction research, policy and treatment venues).
2. Be able to synthesize and apply addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the advancement of addiction science.
3. Develop the ability to design, implement and interpret experimental approaches which address key questions in addiction science.
4. Communicate both core knowledge of addiction as well as experimental design, result and interpretation in a variety of formats.
Student learning outcomes

1. Integrated knowledge of addiction science: The student will demonstrate an appropriate level of knowledge of the current elements of addiction science as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publication.

2. Problem-solving skills: Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in addiction research and practice, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

3. Research design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, develop and implement research studies.

4. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Total Hours: 36

Total graduate credit hours (minimum) 36

Student learning outcomes

1. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
2. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids. The candidate will also demonstrate the achievement of an appropriate level of written communication skills with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.
4. General knowledge of neurobiology and biosciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of neurobiology and the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.
5. Employment or acceptance to advanced degree program: Degree candidates will secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for...
continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

</tbody>
</table>

Special requirements
• Domestic students apply through the Graduate Admissions office (http://graduate.admissions.vcu.edu); international students apply through International Admissions (http://international.admissions.vcu.edu).

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.2
2. Combined GRE scores of at least 300 for the verbal plus quantitative (1200 based on the previous scale) and 4.0 analytical score
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT), or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and upper-level courses in molecular and cellular biology are desirable. Previous research experience or demonstration of a serious interest in a research-oriented career is also desirable. A personal statement describing the applicant’s research experience and interests, as well as letters of reference from previous supervisors, are necessary and helpful in determining an applicant’s suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

Degree requirements
In addition to general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 66 graduate credit hours. A minimum cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses.

A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

There is no expectation of the time required to complete the master’s degree; usually two years of study are necessary to complete the requirements. At the appropriate time in their research, students will prepare a thesis and schedule a final oral defense of the thesis. The final oral examination (defense of the thesis) will cover the subject of the candidate’s dissertation and related basic science course work.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Anatomy and Neurobiology, Master of Science (M.S.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master’s curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master’s thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.

   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the
University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Deadline date rolling, preference given to applications received by Jan 17</td>
<td>GRE, TOEFL for applicants whose native language is not English</td>
</tr>
</tbody>
</table>

Special requirements
- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Anatomy and Neurobiology.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 39), the interdisciplinary master's curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

- MICR 607

1. The Program Director for Molecular Biology and Genetics must approve all substituted courses.
2. All laboratory courses require a laboratory component.
Biochemistry, Doctor of Philosophy (Ph.D.)

Program goal
The Ph.D. program in biochemistry prepares students for research-oriented careers as independent scientists in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes
1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

5. General knowledge of science: The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

### Total graduate credit hours required (minimum) 48

#### Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

Special requirements

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. A personal statement that includes: long-term career goals to assess reasons behind the application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to the Ph.D. program and forego the master’s degree. However, applicants who are unsure if they want to earn a Ph.D. and desire experience in biomedical research before making this decision will be well-served by the M.S. program. Outstanding performance in the M.S. program can help students gain admittance to a doctoral program at VCU or elsewhere. Master’s students who wish to gain admission to the Ph.D. program should submit the following documents to the graduate program director: (1) a letter making this request, which should include justification for the request, career goals, the name of a proposed Ph.D. adviser and a brief description of proposed Ph.D. research project, (2) VCU graduate transcript and (3) a letter of support from proposed Ph.D. adviser. Additional admissions requirements include (1) a grade of A in BIOC 691 (section 904: Critical Scientific Thinking), (2) a grade of A in BIOC 505 (laboratory rotation), (3) a final score in the top 50 percent of scores in BIOC 503 and BIOC 504 and (4) minimum GRE scores of 158 (verbal), 158 (quantitative) and 4.0 analytical.
Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 41 graduate credit hours.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories.

Training in the responsible conduct of research
All Ph.D. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: research.vcu.edu/human_research/citi_requirements.htm (http://www.research.vcu.edu/human_research/citi_requirements.htm)
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Sign in using the following link, which provides access and guidance to the course: https://www.vcu.edu/research/acup/index.htm

Graduate program director
Tomasz K. Kordula, Ph.D.
Associate professor, Department of Biochemistry and Molecular Biology
tkordula@vcu.edu
(804) 828-0771
Program website: biochemistry.vcu.edu (http://www.biochemistry.vcu.edu)

Biochemistry, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

5. **Problem-solving skills**: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

**Typical plan of study**

Many students often take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

**Program website**: vcu.edu/mbg (http://www.vcu.edu/mbg)

**Biochemistry, Master of Science (M.S.)**

**Program goal**

The M.S. program in biochemistry prepares students for research-oriented careers in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of
faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall preferred</td>
<td>Applications accepted through June; priority given to early applicants</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

Special requirements
- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

Applicants to the Master of Science in Biochemistry program must meet all general admission requirements of the VCU Graduate School (p. 17). In addition, applicants must meet the following requirements.

1. Organic chemistry (with a minimum grade of B)
2. Undergraduate biochemistry (not required but recommended)
3. Laboratory experience
4. GRE scores of at least 158 (verbal), 158 (quantitative) and 4.0 analytical

Continuing for the Ph.D.
Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to our Ph.D. program and forego the master’s degree. Applicants who are unsure if they want to earn a Ph.D. and who wish to gain experience in biomedical research before making this decision will be well served by our M.S. program.

Outstanding performance in our master’s program can help students gain admittance to a doctoral program at VCU or elsewhere. Master’s students wishing to gain admission to the Ph.D. program should submit the following documents to the graduate program director: (1) a letter making this request which should include justification for the request, career goals, name of proposed Ph.D. adviser and brief description of proposed Ph.D. research project, (2) VCU graduate transcript and (3) a letter of support from proposed Ph.D. adviser. Additional admissions requirements include (1) a grade of A in BIOC 691, (2) a grade of A in BIOC 505 (laboratory rotation), (3) a final score in the top 50 percent of scores in BIOC 503-BIOC 504 and (4) GRE scores of at least 158 (verbal), 158 (quantitative) and 4.0 analytical.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 39), students in the M.S. in Biochemistry program must complete a minimum of 30 credit hours, including at least 24 didactic credits hours (exclusive of research credit hours).

Students in the M.S. program in biochemistry take courses designed for graduate students with an emphasis on research design and experimentation. During the first year of study, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin thesis research. Following completion of the research project and defense of the master’s thesis, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, visit biochemistry.vcu.edu/education/masters/default.htm (http://www.biochemistry.vcu.edu/education/masters/default.htm).

M.S. students register for BIOC 690 and BIOC 691 for the duration of their tenure in the program. The core set of courses may be supplemented with elective courses offered by the Department of Biochemistry and Molecular Biology or other departments. Students are encouraged to take additional courses that relate to their personal projects. Electives may include courses in techniques in molecular biology and genetics, bioinformatics, statistics, immunology, microbiology, molecular genetics, mammalian physiology and advanced organic and physical chemistry, among others.

Training in the responsible conduct of research
All M.S. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: research.vcu.edu/human_research/citi_requirements.htm (http://www.research.vcu.edu/human_research/citi_requirements.htm)
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Sign in using the following
link, which provides access and guidance to the course: https://
www.vcu.edu/research/acup/index.htm

Curriculum requirements

Required course work
Students must take a minimum of 24 didactic credit hours from the
following list of courses.

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOC 503</td>
<td>Biochemistry, Cell and Molecular Biology</td>
<td>5</td>

Total graduate credit hours required (minimum) 30

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
Tomasz K. Kordula, Ph.D.
Associate professor, Department of Biochemistry and Molecular Biology
tkordula@vcu.edu
(804) 828-0771

Program website: biochemistry.vcu.edu (http:// www.biochemistry.vcu.edu)

Biochemistry, Master of Science (M.S.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master’s curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master’s thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU
Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the Graduate study section for additional information on academic regulations for graduate students.** (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements.** (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements.** (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).
**Admission requirements**

| Degree: M.S. | Semester(s) of entry: | Deadline dates: Deadline date rolling, preference given to applications received by Jan 17 | Test requirements: GRE, TOEFL for applicants whose native language is not English |

**Special requirements**

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Biochemistry.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student's graduate advisory committee completes the requirements leading to the M.S. degree.

**Curriculum requirements**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Program goal**

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department’s educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and
communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 309, MATH 310 and STAT 212. MATH 507 and
MATH 508 are recommended for students interested in completing the Ph.D. program.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), Ph.D. students must complete a minimum total of 78 credit hours (59 didactic hours, plus eight hours each of seminar and consulting, and at least three credit hours of research). More specifically, required courses include:

<table>
<thead>
<tr>
<th>Course Code</th>

</tr>
</tbody>
</table>

In addition, students must take two 600-level BIOS/STAT courses from the list provided; two additional 600-level BIOS, STAT or MATH courses or BIOS 567; and one graduate-level non-BIOS, STAT or MATH course. Ph.D. students must also take eight semesters of BIOS 516 and BIOS 690. In addition, Ph.D. students will participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.

**Qualifying exam**

Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) is an in-class, closed-book examination administered in one day and covers material from the following first-year courses: BIOS 513, BIOS 514 and BIOS 546. Part B (the applied examination) is a take-home, open-book examination administered over one week and covers material from the following first-year courses: BIOS 553, BIOS 554, BIOS 571 and BIOS 572.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying examination at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

**Dissertation proposal defense**

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for a M.S. degree.

**Admission to candidacy**

A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

**Dissertation**

A comprehensive dissertation reporting the results of original research is required for the Ph.D. degree.

**Final examination**

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student’s committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

Total Hours: 12

Additional course

Select one additional course (non-BIOS, non-STAT or non-MATH) with approval or program director. Suggested courses include:

- Any three-credit 600-level course in epidemiology and community health (EPID)
- Social and behavioral health (SBHD)
- Health care policy and research (HCPR)
- Bioinformatics (BNFO)

Consulting and seminar courses

Take the following one-credit course for eight semesters:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOS 516</td>
<td>Biostatistical Consulting</td>
</tr>
</tbody>

<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOS 690</td>
<td>Biostatistical Research Seminar</td>
</tr>
</tbody>
</table>

Dissertation research

Take a minimum of three credits in the following dissertation variable research course:

<table>
<thead>
<tr>
<th>Course</th>
<th>Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>BIOS 697</td>
<td>Directed Research in Biostatistics</td>
</tr>
</tbody>
</table>

Total graduate credit hours required (minimum) 78

Graduate program director

Roy T. Sabo, Ph.D.
Associate professor, Department of Biostatistics
rsabo@vcu.edu
(804) 828-3047

Additional contact

Russell M. Boyle
Associate director, graduate programs in biostatistics
boyle@vcu.edu
(804) 827-2049

Program website: biostatistics.vcu.edu (http://www.biostatistics.vcu.edu)

Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability
to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall preferred</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 309, MATH 310 and STAT 212. MATH 507 and MATH 508 are recommended for students interested in completing the Ph.D. program.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), Ph.D. students in the genomic biostatistics concentration will complete a minimum of 77 graduate credit hours (58 didactic plus eight hours each of consulting and seminar, and at least three credit hours of research). More specifically, required courses include:

BIOS 513 & BIOS 514 Mathematical Statistics I and Mathematical Statistics II
BIOS 524 Biostatistical Computing
BIOS 546 Theory of Linear Models
BIOS 553 Linear Regression
BIOS 554 Analysis of Variance
BIOS 571 Clinical Trials
BIOS 572 Statistical Analysis of Biomedical Data
BIOS 615 Advanced Inference
BIOS 625 Categorical Data Analysis and Generalized Linear Models
BIOS 631 Multivariate Analysis I
BIOS 647 Survival Analysis

Select one of the following:

OVPR 601 Scientific Integrity
OVPR 602 Responsible Scientific Conduct
OVPR 603 Responsible Conduct of Research

In addition, students will take one of BIOS 667, BIOS 691 (where the topic is genetic epidemiology or systems biology) or any other 600-level BIOS/STAT/MATH/BINFO course. Ph.D. students must also take eight semesters of BIOS 516 and BIOS 690. In addition, Ph.D. students will participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.
Qualifying exam
Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) is an in-class, closed-book examination administered in one day and covers material from the following first-year courses: BIOS 513, BIOS 514 and BIOS 546. Part B (the applied examination) is a take-home, open-book examination administered over one week and covers material from the following first-year courses: BIOS 553, BIOS 554, BIOS 571 and BIOS 572.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

Dissertation proposal defense
Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for a M.S. degree.

Admission to candidacy
A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

Dissertation
A comprehensive dissertation reporting the results of original research related to genomics topics is required for the Ph.D. with a concentration in genomic biostatistics. It is expected that the dissertation will make use of some high-throughput genomic technology as an application for the methodological development.

Final examination
All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student’s committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

</tr>
</tbody>
</table>

Students are also required to take either BIOS 567 and one other 500- or 600-level BIOS or STAT course, or two other 500- or 600-level BIOS or STAT courses. Full-time master’s student’s must take four credit hours each of BIOS 516 and BIOS 690. In addition, students will participate in the summer student research program and present at the Biostatistics Student Research Symposium the summer and fall after the first year, which will require one credit hour of BIOS 697.

Qualifying exam
Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) is an in-class, closed-book examination administered in one day and covers material from the following first-year courses: BIOS 513, BIOS 514 and BIOS 546. Part B (the applied examination) is a take-home, open-book examination administered over one week and covers material from the following first-year courses: BIOS 553, BIOS 554, BIOS 571 and BIOS 572.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the M.S. level to continue in the M.S. program. A student who does not pass either Part A or Part B of the qualifying examination at the M.S. level will have one opportunity to retake that part of the qualifying examination.

Thesis
M.S. in Biostatistics students must write a thesis that reports the results of data analysis, or a review or survey. An original research topic is not required.

Final examination
M.S. in Biostatistics candidates must defend their theses at a final oral examination. While questions are restricted to the topic of the dissertation for the Ph.D. candidate, no such restriction applies for the thesis defense for M.S. candidates.

Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department’s educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

Total graduate credit hours required (minimum) 42

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director

Additional course
Select one of the following (minimum three credits):
BIOS 615 Advanced Inference 4
BIOS 616 Advanced Inference 4
BIOS 625 Categorical Data Analysis and Generalized Linear Models 4
BIOS 631 Multivariate Analysis I 4
BIOS 647 Survival Analysis 3

Total Hours 14

Additional combination
BIOS 567 Statistical Methods for High-throughput Genomics Data I 3

Select one or two (with program director approval) of the following (minimum three credits):
BIOS 632 Multivariate Analysis II 3
BIOS 638 Statistical Design and Analysis in Toxicology 3
BIOS 639 Statistical Design and Analysis in Toxicology 3
BIOS/STAT 650 Design and Analysis of Response Surface Experiments 3
BIOS 667 Statistical Learning and Data Mining 3
BIOS 688 Applied Bayesian Biostatistics 3
STAT 613 Stochastic Processes 3
STAT 614 Stochastic Processes 3
STAT 625 Applied Multivariate Analysis 3

Total Hours 18

Consulting and seminar
Take the following one-credit course for four semesters:
BIOS 516 Biostatistical Consulting 4

Take the following one-credit course for four semesters:
BIOS 690 Biostatistical Research Seminar 4

Total Hours 8

Summer student research program
BIOS 697 Directed Research in Biostatistics (minimum one credit) 1

Total graduate credit hours required (minimum) 42
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17), students applying to the clinical research and biostatistics concentration must hold the M.D., D.D.S., Ph.D., D.P.H., D.O., Pharm.D. or an equivalent health professional terminal degree from an accredited college or university. Applicants with international M.D. degrees are considered on an individual basis. The applicant must have a minimum undergraduate GPA of 3.00. Applicants must also submit a letter detailing career goals and how the M.S. in Biostatistics with a concentration in clinical research and biostatistics applies to those goals, as well as at least three letters of recommendation.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), M.S. in Biostatistics, clinical research and biostatistics concentration students must complete a minimum total of 34 graduate credit hours. This includes 17 credit hours of core course work, 12 credit hours of elective courses and at least five credit hours of directed independent research.

Students in the clinical research and biostatistics concentration must complete a research project, culminating in an academic manuscript submitted for publication. A research advisory committee must be formed to direct the student’s research project. The research advisory committee must consist of two clinicians familiar with the student’s area of research and a faculty member of the Department of Biostatistics. The student is be primarily responsible for the conceptualization, design, conduct, analysis and interpretation of the research project.

Final examination

Clinical research and biostatistics concentration students do not defend their research projects at a final oral examination.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)
Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics

Russell M. Boyle
Associate director, graduate programs in biostatistics
boyle@vcu.edu
(804) 827-2049

Program website: biostatistics.vcu.edu (http://www.biostatistics.vcu.edu)

Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics

Program goal
The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department’s educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes
1. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
2. Integrated knowledge of mathematics and bioscience: The candidate will demonstrate an appropriate level of knowledge of the current elements of mathematics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability
to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

<td>Ph.D.</td>
<td>Fall preferred</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

- MATH 307 Multivariate Calculus 4
- MATH 309 Introduction to Probability Theory 3
- MATH 310 Linear Algebra 3
- STAT 212 Concepts of Statistics 3

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), M.S. students will complete a minimum total of 33 credit hours of course work. Required courses include BIOS 513/STAT 513 and BIOS 514/STAT 514, BIOS 524,BIOS 546, BIOS 553,BIOS 554, BIOS 571 and BIOS 572. In addition, each student is required to take BIOS 567 and BIOL 540B/540 (or equivalent) and one of BIOS 632, BIOS 667,BIOS 668 and BIOS 691 (the latter when the topic is systems biology or statistical genetics/genetic epidemiology).

Full-time master’s students must take four semesters of BIOS 516 and BIOS 690. In addition, students will participate once in the student summer teaching program and present at the Biostatistics Student Research Symposium in the fall.

Qualifying exam

Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) is an in-class, closed-book examination administered in one day and covers material from the following first-year courses: BIOS 513, BIOS 514 and BIOS 546. Part B (the applied examination) is a take-home, open-book examination administered over one week and covers material from the following first-year courses: BIOS 553, BIOS 554, BIOS 571 and BIOS 572.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the M.S. level to continue in
the M.S. program. A student who does not pass either Part A or Part B of the qualifying examination at the M.S. level will have one opportunity to retake that part of the qualifying examination.

**Thesis**

M.S. in Biostatistics with a concentration in genomic biostatistics concentration students must write a thesis that reports the results of data analysis, or a review or survey. An original research topic is not required.

**Final examination**

M.S. candidates must defend their theses at a final oral examination. While questions are restricted to the topic of the dissertation for the Ph.D. candidate, no such restriction applies for the thesis defense for M.S. candidates.

**Total graduate credit hours required (minimum) 33**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Roy T. Sabo, Ph.D.
Associate professor, Department of Biostatistics
rsabo@vcu.edu
(804) 828-3047

**Additional contact**

Russell M. Boyle

boyle@vcu.edu
(804) 827-2049

**Program website:** biostatistics.vcu.edu (http://www.biostatistics.vcu.edu)

**Combined Master of Science (M.S.)/Doctor of Philosophy (Ph.D.) and Doctor of Dental Surgery (D.D.S.)**

In cooperation with the School of Dentistry, students in dentistry with an interest in academic and research careers are afforded the opportunity to undergo advanced degree training while in dental school or residency. Admission of students enrolled in the School of Dentistry to combined degree programs is processed through the Office of Graduate Education of the School of Medicine by established procedures. The Dental Aptitude Test may be accepted in lieu of the GRE as an admission requirement. No application fee is required of students already regularly enrolled as degree-seeking graduate students at the university.

The requirements for a combined professional school/graduate school degree in basic health sciences are equivalent to those required of students seeking a graduate degree alone and are determined by the individual departments.

**Epidemiology, Doctor of Philosophy (Ph.D.)**

**Program mission**

The mission of the Ph.D. program in epidemiology is to educate and train students to become independent, competent and self-directed research scientists so they can conduct outstanding clinical and population-based research. Students will learn methods for studying disease etiology and prevention in populations and evaluating interventions, diagnostic tests and treatment efficacy; they will implement such methods in an independent research study under the mentorship of an experienced epidemiology researcher.

**Program goals**

1. **Critical foundation skills:** The program is designed to provide students with the critical skills required to advance to positions as epidemiological researchers/trainers in a broad spectrum of positions.
2. **Mastery and application of science:** The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of epidemiology and ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. **Communication:** Students will develop skills in the various means of communicating both the core of epidemiological knowledge and the expression of epidemiological methodology, research design, results and interpretation to a variety of potential audiences.
**Student learning outcomes**

Students in the doctoral program in epidemiology will develop competencies in the following areas, as described below.

1. Integrated knowledge of epidemiology: Students will demonstrate an appropriate level of knowledge of theories of disease causation as well as bias in epidemiologic research and demonstrate in-depth understanding of one or more substantive theories related to research. Students will be able to appropriately link theoretical frameworks to the design, conduct and interpretation of epidemiologic research and demonstrate familiarity with the research literature and the ability to evaluate and critique publications appropriate to an independent research scientist.

2. Problem-solving skills: Students will be able to appropriately apply epidemiologic and statistical methods for research needs, demonstrating proficiency in selecting the appropriate measures of association for the research at hand and correctly implementing analytic techniques, including addressing issues such as confounding and effect modification. Students will be able to evaluate and interpret results, explaining relationships between determinant(s) and outcome(s) under study.

3. Research design: Students will construct and develop novel epidemiologic research questions, demonstrating proficiency in selecting the most appropriate study designs such that bias is minimized and efficiency maximized. Students will understand the required elements to estimate sample size, know how to identify and minimize bias and confounders through study design and analysis, and demonstrate knowledge of the impact of measurement issues on study validity.

4. Written communication skills: Students will demonstrate proficiency in scientific writing, including manuscript development, grant writing and writing for multiple audiences, including lay audiences and policy-makers. Students will demonstrate an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations.

5. Oral communication skills: Students will demonstrate effective oral communication skills across disciplines, framing questions appropriately and implementing active listening skills in delivering oral presentations to professional audiences, lecturing to students or leading discussions. Students will appropriately use audio/visual technologies to develop effective presentations with respect to content, organization and appropriate use of language.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at sophas.org (http://www.sophas.org).

</tr>
</tbody>
</table>

**Special requirements**

- Applicants must hold a master’s degree, preferably in public health or a related field, and provide test scores as detailed below. Applicants must provide all required materials as described herein and in the VCU Admissions graduate application checklist.
In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum qualifications.

1. Prior degree: Master’s degree in public health (M.P.H.) or equivalent M.S. degree, (sociology, biology, mathematics) with a minimum GPA of 3.0
2. GRE: Current GRE test results (taken within the past five years) with scores at or above the 75th percentile preferred in all components of the exam (e.g., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing)
3. TOEFL: For non-native speakers of English, recommended minimum scores of either 100iBT, 600 PBT or IELTS scores of 6.5 (academic band score)
4. Personal statement: Applicants must include a personal statement that indicates their reasons for pursuing a doctoral degree in epidemiology, their particular areas of research focus or study, the departmental faculty advisers with whom the students would prefer to work and career goals upon graduation.
5. Reference letters: Students must submit three letters of recommendation from three individuals who can assess the applicant’s qualifications for graduate school. Letters from past professors or faculty advisers are most appropriate.
6. Current CV or resume: Students must submit a current CV or resume.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students will be required to complete a minimum of 61 graduate credit hours as follows:

1. Three core courses focusing on epidemiological methods (nine credit hours)
2. Two core courses focusing on biostatistical theory and methods (six credit hours)
3. Four semesters of journal club (four credit hours)
4. Four courses of methodological electives, including EPID 649 (12 credit hours)
5. Three courses of substantive area electives, with at least one relating to the biological processes associated with the student’s chosen substantive area (nine credit hours)
6. A minimum of two credit hours of practical research skills development
7. At least one course in the responsible conduct of research (one credit hour)
8. At least 18 credit hours of directed dissertation research

Students will also be required to complete the following:

**Practical experience**

1. Teaching experience: All doctoral students are required to serve as a teaching assistant for at least one semester before graduation. The student and her/his adviser discuss which course would be best-suited for the teaching assistantship.
2. Seminar attendance: All students are expected to attend all Division of Epidemiology seminars during their tenure in the program. These seminars are generally held every other week during fall and spring semesters. In addition, students must attend health seminars, which occur one to two times each semester.

3. Grant application submission: All students are required to submit at least one grant application related to their dissertation to a federal or nongovernmental funder to gain grantsmanship experience.

**Comprehensive exams**

Comprehensive exams include a written examination that assesses knowledge of completed didactic course work on core epidemiologic and biostatistical methods as well as a tailored substantive section based on the student’s research focus and an oral comprehensive exam based upon the student’s dissertation proposal.

**Dissertation**

1. The dissertation must be a hypothesis-based, analytical epidemiology project designed by the student under the supervision of the faculty adviser and advisory committee members as appropriate.
2. Students develop and submit three manuscripts from the dissertation to peer-reviewed journals. Students should have submitted at least two manuscripts before their final defense.

**Total graduate credit hours required (minimum) 61**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Resa M. Jones, M.P.H., Ph.D.
Associate professor, Department of Family Medicine and Population Health
rmjones2@vcu.edu
(804) 628-2519

**Additional contact**

Lisa Anderson, M.P.H.
Director of educational programs, Master of Public Health program
lsanders@vcu.edu
(804) 628-2512

**Program website:** [familymedicine.vcu.edu/epidemiology/phd/](http://www.familymedicine.vcu.edu/epidemiology/phd)

**Genetic Counseling, Master of Science (M.S.)**

**Program goals**

1. Competency in genetic counseling
2. Eligibility for certification by the American Board of Genetic Counseling.
3. Preparation for careers in genetic counseling and human genetics

Successful candidates will demonstrate competency in all four genetic counseling domains: I – communication skills, II – critical thinking skills,
III – interpersonal, counseling and psychosocial assessment skills and IV – professional ethics and values.

**Student learning outcomes**

1. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the clinical competencies established by the American Board of Genetic Counseling. This competency is documented with written and/or oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.

2. General knowledge of sciences: The candidate should demonstrate a general knowledge of the elements of the sciences as related to genetic molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature. The student is evaluated by academic performance, face-to-face and written evaluation of clinical performance in multiple rotations by multiple supervisors and annual written and oral exams.

3. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. This is achieved by evaluations of clinical rotations both written and verbal that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<table>

<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE within five years of application International applicants must score 100 or greater on the TOEFL</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17):

1. Applicants must have successfully completed undergraduate training and hold a baccalaureate degree from an accredited university or college.

2. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion or philosophy) and three credit hours each of biochemistry, statistics and genetics. It is recommended that all prerequisite courses have been completed with 10 years of application.

3. Students accepted to the program are generally drawn from applicants with an undergraduate grade-point average minimum of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students.

4. The Graduate Record Examination is required for admission; there is no MCAT substitution. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section.
Institutional review board application and review is often required for projects. Projects can range from laboratory to clinical and may include development of educational materials, videotapes or patient protocols. All projects can have defined goals and/or hypotheses to be tested. Projects will enhance the student’s professional or program problem, reviewing the literature, and attempting to answer the question or problem. Projects will give the student an opportunity to apply knowledge and skills learned in coursework and clinical rotations. Projects will offer a hands-on experience in developing a research question or exploring a professional or program problem, reviewing the literature, and attempting to answer the question or problem. Projects will enhance the student’s professional development and represent a strong component of the “portfolio” of experience brought to the job interview process. Projects can range from laboratory to clinical and may include development of educational materials, videotapes or patient protocols. All projects are required to have defined goals and/or hypotheses to be tested. Institutional review board application and review is often required for student research. Publication and professional presentation are strongly encouraged.

Students are encouraged to consider projects in the first semester and to choose a project topic by the second semester. The project proposal is due to the program director by the first of June during the student’s first year of study. All project proposals must be approved by the faculty member with whom the project will be performed and the program director. Some projects will require review by the Office of Research and Innovation for subject protections, and some projects may require that the student seek grant funding or participate on an existing faculty grant. The student is responsible for preparing documents and meeting these requirements in a timely fashion.

By the beginning of the fall semester of the second year, students must have selected the members of their research committees. The research committee must include at least three faculty members with one outside of the department. Additional members may be added if needed for optimal project advising.

The student’s supervisors and the genetic counseling program director work together in mentoring the student. Students are provided ongoing written and verbal evaluation regarding their academic and clinical progress.

In addition to participating in coursework and counseling rotations, students in the department also participate in a number of community and education programs. The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling.

Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists and contributing members of commercial genetic testing laboratories and the developing field of human genonomic medicine.

Healthcare Policy and Research, Doctor of Philosophy (Ph.D.)

Program goal

The doctoral program in healthcare policy and research will equip students with an understanding of economic, political and social factors that affect access to care and the quality and cost of health care. Graduates of this program will have strong methodological and theoretical skills that will prepare them to make important contributions to the fields of health care policy and public health. Their training will enable them to add to scientific knowledge about how health policy, social factors, financing systems, organizational structures, care processes, health technologies and personal behaviors affect health care outcomes. Program graduates will also be able to formulate and analyze health care policy and to plan, implement and evaluate health programs and policies. Finally, program graduates will have experience working with colleagues in public health, medicine and other disciplines to help them translate research findings into practice rapidly.

Train students as health policy researchers

Students in the doctoral program in healthcare policy and research will acquire the skills to conduct independent research into economic, political and social factors that affect access to care and the quality and cost of health care. The program will provide students with the training required to advance to positions as health policy researchers in academia, government or the private sector. The structure of the program provides a framework for the progressive development of a mastery of design and implementation of research and the ability to synthesize this information in ways that are policy-relevant. In addition, students will develop the various means of communicating fundamental economic and policy knowledge and particular study designs, results and interpretations to a variety of audiences. The program relates the above framework to the skills needed to address a wide range of issues in the health services research, economics and policy areas.

Student learning outcomes

1. Knowledge of the development and implementation of health policy: Students will demonstrate an appropriate level of knowledge of the current elements of health care policy and economics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications and theoretical and conceptual models, as measured by rubric.

2. Critical thinking: Students will demonstrate an appropriate level of ability to interpret information relevant to health policy and health services research, to connect theoretical frameworks to study design and evidence, to draw reasonable conclusions, and to generate and evaluate alternate explanations, as measured by rubric.

3. Specialized knowledge: Students will demonstrate knowledge of the issues, research literature, conceptual frameworks and research tools in one or more content domains within the field of health policy and health services research, as measured by rubric.

4. Study design and implementation: Students will demonstrate the ability to design and conduct original health services and health

3. Specialized knowledge: Students will demonstrate knowledge of the issues, research literature, conceptual frameworks and research tools in one or more content domains within the field of health policy and health services research, as measured by rubric.

4. Study design and implementation: Students will demonstrate the ability to design and conduct original health services and health
policy research that draws from economic theory, from the initial conception of an idea to research question development, study design, data collection and selection, as measured by rubric.

5. Quantitative skills: Students will demonstrate the application of appropriate analytic methods and interpretation of results, as measured by rubric.

6. Oral communication skills: Students will demonstrate the achievement of an appropriate level of skill in the oral communication of health care policy subject matter with respect to content, organization, logical flow, presentation, use of language and incorporation of visual aids to both technical and lay audiences, as measured by rubric.

7. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, vocabulary and use of figures, tables and citations to effectively present health services research and health care policy information, as well as translate research findings into publication-quality manuscripts, as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum qualifications.

1. Applicants must have completed a college-level course in calculus with a minimum grade of B.
2. Applicants must have graduated from an accredited university or its equivalent, with a master’s degree in a related discipline (e.g., economics, public health, public policy, health administration, public administration). Applicants must have completed relevant course work (including microeconomics and introductory statistics) or have professional experience in a health-related field (two years minimum) that provides an appropriate background for graduate-level study in healthcare policy and research.
3. Applicants must have taken the Graduate Record Exam within the past five years; scores in the 75th percentile preferred.
4. Applicants from countries where English is not the primary and official national language must complete one of the following:
   a. English proficiency verification through official TOEFL score 550 or higher
   b. Graduate with a master’s degree following two years of study at a U.S. institution
   c. English language proficiency certification through appropriate English training programs at other U.S. institutions, or English language proficiency certification by passing the English Language Proficiency Examination and/or the corresponding English Language Institute courses.
Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program. At the discretion of the HCPR committee, a student who is retaking a required course may still be eligible to take the comprehensive examination and to start the dissertation prior to repeating the course.

At the end of the second year of required course work, students will take a written comprehensive examination designed to evaluate the student’s ability to:

1. Integrate course material
2. Demonstrate critical thinking and evaluation of the literature in health care policy and research
3. Demonstrate quantitative analysis skills

After passing the written comprehensive examination, the student will schedule the proposal defense within six months. Following successful defense of the proposal, the student will prepare three manuscripts of publishable quality that will comprise the body of the dissertation and will orally defend the dissertation. It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within six years from the date of admission to the degree program. Extensions may be approved in extenuating circumstances.

**Total graduate credit hours required (minimum) 59**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**
Andrew Barnes, Ph.D.
Assistant professor, Department of Healthcare Policy and Research
abarnes3@vcu.edu

**Additional contact**
Kate A. Grant
Education coordinator
kagrant@vcu.edu
(804) 828-5329

**Program website:** healthpolicy.vcu.edu (http://healthpolicy.vcu.edu)

**Human Genetics, Doctor of Philosophy (Ph.D.)**

**Program goal**

The program is designed to provide students with training in human and molecular genetics and with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Student learning outcomes**

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

3. **Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduat educate.vcu.edu).

Admission requirements

<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE</td>
</tr>
</tbody>
</table>

Special requirements

- International applicants must score 100 or greater on the TOEFL.
- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs, but not for dual degree academic programs.
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics,
genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit gen.vcu.edu/graduate-programs/phd-in-human-genetics (http://gen.vcu.edu/graduate-programs/phd-in-human-genetics).

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student’s knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student’s graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student’s development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student’s graduate committee. Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

Take the following one-credit course every fall and spring semester:

- HGEN 610: Current Literature in Human Molecular Genetics
- HGEN 614: Pathogenesis of Human Genetic Disease

Take the following one-credit course every semester beginning in the spring term of the first year of study:

- HGEN 690: Genetics Research Seminar
- IBMS 600: Laboratory Safety
- IBMS 610: Laboratory Opportunities

Take the following two-credit course taken for three rotations:

- IBMS 620: Laboratory/ Clinical Rotations
- IBMS 680: Proposal Preparation

Select one of the following:

- OVPR 601: Scientific Integrity
- OVPR 602: Responsible Scientific Conduct
- OVPR 603: Responsible Conduct of Research

Select at least two elective courses for a minimum of five credit hours from the following:

- PATH 670: Experimental Approaches to Tumor Biology
- Courses at the 500 level or above in ANAT, BIOL, BIOS, HGEN, MICR, NEUS, PHTX and PHIS excluding laboratory courses
- Courses specifically for professional programs (e.g. HGEN 600 Clinical Genetics)

**Directed research**

**Independent study**

**Seminar or current topic courses**

- BNFO 621: Business and Entrepreneurship Essentials for Life Scientists
- MICR 608: Introduction to Microbiology and Immunology Research
- MICR 609: Introduction to Microbiology and Immunology Research

**Additional elective courses and directed research**

Select credits from the following to reach the required minimum of 86 credit hours:

**Additional elective courses**

- HGEN 697: Directed Research in Genetics (1-15 variable credit hours)

**Total graduate credit hours required (minimum) 86**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Rita Shiang, Ph.D.

Associate professor, Department of Human and Molecular Genetics
Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.
Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Special requirements
• MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
• Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

Basic science, research-intensive, non-thesis curriculum for medical students
Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements
In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 86 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit gen.vcu.edu/graduate-programs/phd-in-human-genetics.

**Degree requirements**
In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student’s knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's
graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student’s development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student’s graduate committee. Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

<tr>
<th>Course</th>
<th>Title</th>
<th>Credits</th>
</tr>
</thead>
<tbody>
<tr>
<td>HGEN 697</td>
<td>Directed Research in Genetics</td>
<td>variable</td>
</tr>
</tbody>
</table>

### Total graduate credit hours required (minimum) 86

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree]

#### Program accreditation

Accreditation Council of Genetic Counseling
Program goal

Provide training in human and molecular genetics and competency in genetic counseling

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Eligibility for certification by the American Board of Genetic Counseling

To prepare individuals for careers in genetic counseling and human genetics, successful candidates will demonstrate competency in all four genetic counseling domains: I – communication skills, II – critical thinking skills, III – interpersonal, counseling and psychosocial assessment skills and IV – professional ethics and values.

The Department of Human and Molecular Genetics offers training that combines preparation for a career as a genetic counselor with research-based doctoral training in a coordinated program that integrates the complementary aspects of these two degree categories. In order to be admitted to this dual-degree program, an applicant must be accepted into both the M.S. and Ph.D. programs.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. This is also achieved by evaluations of clinical rotations, both written and verbal, that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
6. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the clinical competencies established by the American Board of Genetic Counseling. This competency is documented with written and oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines. Please visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Please visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available in the Graduate Bulletin at Master’s programs (p. 653); information on doctoral programs can be found at P (http://www.pubapps.vcu.edu/Bulletins/about/?uid=10046&iid=30114)h.D. programs (p. 649).

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<td>GRE within five years of application (MCAT or DAT is not acceptable in lieu of GRE.)</td>
</tr>
</tbody>
</table>

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form. The dual degree box on the application must also be checked.
- International applicants must score 100 or greater on the TOEFL.
- It is recommended that all prerequisite courses have been completed within 10 years of application.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17). In order to be admitted to this dual-degree program, an applicant must apply to and be accepted into both the M.S. and the Ph.D. programs.

Human Genetics, Doctor of Philosophy

Successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit gen.vcu.edu/graduate-programs/phd-in-human-genetics (http://gen.vcu.edu/graduate-programs/phd-in-human-genetics).

Genetic Counseling, Master of Science (M.S.)

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion and philosophy) and three credit hours each of biochemistry, statistics and genetics. Students accepted to the program are generally drawn from applicants with an undergraduate minimum grade point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students. The Graduate Record Examination is required for admission; VCU does not substitute with the MCAT. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version. (The program participates in the Association of Genetic Counseling Program Directors program match. Please see the National Society of Genetic Counselors website for information for prospective students at nsgc.org/p/cm/id/fid=44#accept.)

Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crises hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

In the last five certification cycles (2007 to 2012) VCU graduates have an 86 percent pass rate on the American Board of Genetic Counseling/Accreditation Council of Genetic Counseling national certification examination.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), the Ph.D. degree requires at least three years of study for
students entering with a baccalaureate degree and must be completed within eight years. Students in the dual-degree program must complete a minimum of 152.5 graduate credit hours.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student’s knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student’s development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in Human Genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student’s graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student’s development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student’s graduate committee. Upon successfully completing the departmental comprehensive and the oral comprehensive examination and a written NIH-style application with an oral examination, the student is admitted to Ph.D. candidacy.

Students in the dual-degree program must complete a minimum of 152.5 graduate credit hours.

</tr>
</tbody>
</table>

1. M.S. in Genetic Counseling requirement.
2. Ph.D. in Human Genetics requirement.
3. This course is divided into two distinct sections — a cytogenetics section and a molecular genetics section. The intent of this rotation is for students to learn the behind-the-scenes wet lab activities that lead to genetic information relevant for clinical counseling. Some dual-degree students may choose a thesis project that specializes in wet lab research, either cytogenetics or molecular genetics. With permission from the adviser and the genetic counseling program director, part or all of this rotation may not be required.

Total Hours: 152.5-155.5
Total graduate credit hours required (minimum) 152.5

Once students have completed all didactic course work, they will continue to register as follows for all subsequent semesters unless otherwise advised by the program director:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
<th>Hours</th>
</tr>
</thead>
<tbody>
<tr>

Human Genetics, Master of Science (M.S.)

Program goal
The goal of the master’s program in human genetics is to provide training in human and molecular genetics. The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes
1. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education.
for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

<th>Deadline dates</th>
<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>May 1</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

Special requirements
- International applicants must score 100 or greater on the TOEFL.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants wishing to specialize in human genetics should have courses in biology, chemistry through organic chemistry, genetics and mathematics through calculus.

Basic science, research-intensive, non-thesis curriculum for medical students
Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements
The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Master of Science in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to master’s students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling.

In addition to the general VCU Graduate School graduation requirements (p. 39), the M.S. degree requires at least two years of full-time study for students entering with a B.S. or B.A. degree and must be completed within six years. Students must complete a minimum of 59 graduate credit hours. Students may be required to take an additional six hours of directed research after the second spring semester if needed.

Upon completing their thesis research, master’s students must report their results in a thesis that is prepared in an acceptable form and style as detailed by the university Graduate School. A final oral examination is scheduled after the student’s thesis has been approved by the student’s advisory committee. This examination includes the subject matter of course work the student has completed as well as the thesis. It is administered by the student’s graduate advisory committee who will vote on the student’s performance in addition to rating them with regard to the rubrics defined by the School of Medicine.

Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
Rita Shiang, Ph.D.
Associate professor, Department of Human and Molecular Genetics
rshiag@vcu.edu
(804) 628-4083

Additional contact
Michael S. Grotewiel, Ph.D.
Director of admissions
msgrotewiel@vcu.edu
(804) 628-4086

Program website: gen.vcu.edu (http://www.gen.vcu.edu)

Human Genetics, Master of Science (M.S.) with a concentration in molecular biology and genetics

Program goals
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master’s curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master’s thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU
Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. **Problem-solving skills**: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. **General knowledge of sciences**: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. **Communication skills**: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. **Oral communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. **Written communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. **Experimental design**: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the Graduate study section for additional information on academic regulations for graduate students.** (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements.** (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements.** (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).**

</tr>
</tbody>
</table>

Special requirements

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Human Genetics.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Research-intensive, non-thesis curriculum for medical students

Individuals who are participants in Doctor of Medicine program at VCU may be eligible for enrollment in research-intensive, non-thesis study in the program. Please contact the graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.

Medical Physics, Certificate in (Post-baccalaureate graduate certificate)

Program goals
The graduate certificate in medical physics offers course work in physics as it is applied to the diagnosis and treatment of human diseases. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, imaging and health physics. The goal of the program is to provide a career path in medical physics as an alternative to a terminal degree in medical physics. The program is primarily designed for retraining those who possess a doctoral degree in physics or a related field.

The mission of the medical physics graduate certificate program is to serve the Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program is intended for postdoctoral individuals seeking to enhance their credentials for admission into a medical physics residency position.

Student learning goals
To develop core competency in medical physics by:
1. Enhancing clinically-relevant communication skills
2. Obtaining a medical physics knowledge base
3. Enhancing medical physics-specific problem-solving skills

Student learning outcomes
1. Demonstrate appropriate written communication skills
2. Demonstrate appropriate oral and visual communication skills
3. Demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics
4. Demonstrate the ability to evaluate and integrate such knowledge into the solution of clinically relevant problems as measured by the course work
5. Demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism physics.
2. Students must submit satisfactory GRE scores.
3. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree
4. Doctorate degree in physics, engineering, or other area of physical science

Students are required to complete the 23 credit hours of the core graduate medical physics course work (MEDP 561, MEDP 563, MEDP 567, MEDP 601, MEDP 630, MEDP 635, MEDP 636) plus one credit hour of MEDP 689.

(804) 628-7780

**Program website:** medicalphysics.vcu.edu (http://www.medicalphysics.vcu.edu)

**Medical Physics, Doctor of Philosophy (Ph.D.)**

**Program accreditation**
Commission on Accreditation of Medical Physics Educational Programs

**Program goals**

The Ph.D. in Medical Physics offers students course work and research training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the doctoral program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in both the health care delivery and biomedical research settings. The program will prepare students for careers as independent investigators in the field of medical physics and jointly for careers in university departments, research institutes, laboratories and hospitals as trainee clinical medical physicists.

Research areas include molecular imaging, functional imaging using PET and NMR, cone-beam CT image reconstruction, deformable image registration, intensity-modulated radiation therapy, radiation therapy dose calculations, 4D radiation therapy and brachytherapy dose calculations.

**Professional competency:** To develop professional competency in medical physics by providing a framework in which students progressively develop a mastery of the current state of medical physics and an ability to synthesize this information and apply it in research and clinical settings. Additionally, the program aims to develop skills in the various means of communicating both the core of medical physics knowledge and expression of experimental design, results and interpretation to a variety of potential audiences.

**Scientific competency:** To develop scientific competency in medical physics by providing a framework by which candidates develop skills to design, conduct and implement theoretical and clinical research which answers identified questions. The research focus may lead to new and/or improved applications of physics for diagnosis and treatment of disease. Candidate research will focus on medical imaging, radiation therapy, radiation metrology or other burgeoning areas of investigation. In broad terms, candidate research will be directed toward advancing “minimally invasive medicine” through applications of ionizing and non-ionizing radiation.

**Student learning outcomes**

1. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

2. Experimental design: The candidate should demonstrate an appropriate level of skill in the theoretical and technical design of experimental procedures and the technical conduct of experimentation related to his or her research. This includes demonstration of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

3. Knowledge of medical physics literature: The candidate should demonstrate a general knowledge of medical physics literature and a more detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of meaningful medical physics research problems, including the ability to defend said identifications, and the design and implementation of appropriate problem-solving methods as measured by rubric.

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

<td>Ph.D.</td>
<td>Fall</td>
<td>Jan 15</td>
<td>GRE</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism physics.
2. Students must submit satisfactory GRE scores.
3. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students entering the program with an undergraduate degree are required to earn a minimum of 30 credit hours in didactic or laboratory course work. Students entering with a master's degree in medical physics, physics or an appropriate related field are required to earn a minimum of 18 credit hours. In addition to course work, the Ph.D. requires a minimum of 12 credit hours in MEDP 697 Directed Research. At least half of the course work must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new Ph.D. students entering the program will be assigned an adviser. After successful completion of the written comprehensive exam, students and advisers will develop a graduate dissertation committee. The committee will direct the students in their research and subsequent course selection. Advisers will report once a semester to the program director on the academic progress of their students and will administer the oral candidacy and dissertation defense examinations.

The student is required to complete written and oral examinations to be admitted as a Ph.D. candidate. The written comprehensive examination covers core knowledge and applications in medical physics course work, as well as basic concepts in physics, chemistry and biology. The oral examination, administered by the student’s graduate dissertation committee, is based upon a written prospectus describing the proposed dissertation research project. Examiners evaluate the adequacy of the
proposed project, the student’s level of understanding of the project and the likelihood that the dissertation can be completed successfully.

After being approved for degree candidacy, the student must conduct substantial original investigation under the supervision of the advisers and must prepare a dissertation reporting the results of the research in the context of existing scientific knowledge. After the dissertation has been completed and unanimously accepted for defense by the graduate dissertation committee, the candidate will appear before the committee for an oral defense. The oral dissertation defense examines the candidate’s research, dissertation documentation and underlying fundamental knowledge. Upon successful completion of the defense and dissertation, the student may apply for graduation with a Ph.D. in Medical Physics.

Medical Physics, Master of Science (M.S.)

Program accreditation
Commission on Accreditation of Medical Physics Educational Programs

Program goals

The Master of Science in Medical Physics offers students course work and practical clinical training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the master’s program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program will prepare students for careers as qualified and independent clinical medical physicists. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, imaging and health physics.

Professional competency: To develop professional competency in medical physics by providing a framework in which students progressively develop mastery of the current state of medical physics and an ability to synthesize this information and apply it in a clinical setting. Additionally, students in the program will develop skills in the various means of communicating the core of medical physics knowledge and clinical applications of that knowledge to a variety of potential audiences.

Clinical competency: To develop clinically competent medical physics graduates by providing a framework in which students progress from didactic knowledge to clinical knowledge and demonstrated application of clinical medical physics principles, practices and procedures.

Student learning outcomes

1. Clinical performance: The candidate should demonstrate an appropriate level of skill in the theoretical, practical and technical conduct of medical physics in the clinical setting. This includes demonstration of an appropriate level of competence in the ability to:
   a. Design and quality assure radiation therapy treatment plans for both brachytherapy and external beam radiation therapy
   b. Quality assure radiation therapy delivery devices
   c. Quality assure radiation therapy treatment charts
   d. Perform calibration and/or beam delivery commissioning measurements as measured by instructor evaluation in compliance with accepted clinical standards

2. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to
the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by course work and performance on the written comprehensive examination. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, chart notation and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by course work and performance on the written comprehensive examination.

3. Medical physics knowledge base: The candidate should demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics. This includes general knowledge of medical physics scientific materials, clinical policies and procedures, and translational scientific literature. The student should demonstrate the ability to evaluate and integrate such knowledge into the solution of clinical problems as measured by course work and performance on the written comprehensive examination.

4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work, annual review and performance on the written comprehensive examination.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs (p. 653) is available in the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism physics.
2. Students must submit satisfactory GRE scores.
3. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student’s application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), students entering the program with an undergraduate degree are required to earn a minimum of 30 credit hours in didactic or laboratory course work. At least 15 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed in the medical physics graduate handbook.
Students are required to complete 21 credit hours of core graduate medical physics course work

Additionally, students also must demonstrate competence in anatomy through completion of an undergraduate or graduate anatomy course approved by the medical physics graduate curriculum committee.

Following completion of course work, students will be required to pass a comprehensive examination administered by the medical physics comprehensive examination committee. The comprehensive examination will cover materials from the core medical physics courses and clinical rotations.

**Total Hours**: 1

**Total graduate course credit hours required (minimum):** 30

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

---

**Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.) [combined]**

**Program accreditation**

Liaison Committee on Medical Education (M.D.)
Council on Education for Public Health (M.P.H.)

**Program goal**

The Division of Epidemiology in the Department of Family Medicine and Population Health in the School of Medicine offers a program for VCU medical students to obtain a Master of Public Health degree in conjunction with their medical training. The M.D./M.P.H. combined-degree program provides an opportunity for medical students who wish to pursue a public health or research career to graduate from medical school trained in both clinical and preventive, population-oriented medicine. Graduates from this program are prepared for positions in preventive medicine, primary care, research, community-based health centers and state and local health departments. To meet degree requirements, students complete:

- 12 credits of core courses
- Nine credits of required courses
- 12 credits of electives
- Three credits of a capstone project

The objective of the combined program is to provide high quality and in-depth training in public health to qualified medical students. The five-year program includes four years of medical school and one year of study in the M.P.H. program. During the M.P.H. year, students take a minimum of 36 credit hours of course work. Students receive three credit hours for successful completion of the "Population Health” course in medical school and take a minimum of one public health elective during the M-4 year to satisfy the public health internship requirement. In addition, a
waiver of nine credits that applies to M.P.H. students who hold a terminal or first professional degree is enacted.

Note: Students may register for the M.P.H. year either prior to entering medical school or after the M-3 year and prior to M-4 electives. Enrollment in the dual-degree program requires admission into both the School of Medicine and the Graduate School. Students must successfully complete all required course work to receive both degrees at the end of the five years.

The mission of the M.P.H. program is to engage students in an experiential, learner-centered environment, collaborate with public health partners in Central Virginia to promote health equity and community wellness, and foster lifelong inquiry and discovery in interdisciplinary, translational research that improves human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to positions as public health practitioners in a broad spectrum of positions and settings and who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

Student learning outcomes

The M.P.H. program trains students to develop the following educational competencies, selected from the Association of Schools of Public Health’s “Master’s Degree in Public Health Core Competency Model,” August 2006.

1. Biostatistics:
   a. Describe the roles biostatistics serves in the discipline of public health
   b. Describe basic concepts of probability, random variation and commonly used statistical probability distributions
   c. Describe preferred methodological alternatives to commonly used statistical methods when assumptions are not met
   d. Distinguish among the different measurement scales and the implications for selection of statistical methods to be used based on these distinctions
   e. Apply descriptive techniques commonly used to summarize public health data
   f. Apply common statistical methods for inference
   g. Apply descriptive and inferential methodologies according to the type of study design for answering a particular research question
   h. Apply basic informatics techniques with vital statistics and public health records in the description of public health characteristics and in public health research and evaluation
   i. Interpret results of statistical analyses found in public health studies
   j. Develop written and oral presentations based on statistical analyses for both public health professionals and educated lay audiences

2. Environmental health sciences:
   a. Describe the direct and indirect human, ecological and safety effects of major environmental and occupational agents
   b. Describe genetic, physiologic and psychosocial factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards
   c. Describe federal and state regulatory programs, guidelines and authorities that control environmental health issues
   d. Specify current environmental risk assessment methods
   e. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety
   f. Explain the general mechanisms of toxicity in eliciting a toxic response to various environmental exposures
   g. Discuss various risk management and risk communication approaches in relation to issues of environmental justice and equity

3. Epidemiology:
   a. Identify key sources of data for epidemiologic purposes
   b. Describe a public health problem in terms of magnitude, person, time and place
   c. Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues
   d. Apply the basic terminology and definitions of epidemiology
   e. Calculate basic epidemiology measures
   f. Communicate epidemiologic information to lay and professional audiences
   g. Draw appropriate inferences from epidemiologic data
   h. Evaluate the strengths and limitations of epidemiologic reports

4. Health policy and management:
   a. Identify the main components and issues of the organization, financing and delivery of health services and public health systems in the U.S.
   b. Describe the legal and ethical bases for public health and health services
   c. Discuss the policy process for improving the health status of populations

5. Social and behavioral sciences:
   a. Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice
   b. Identify the causes of social and behavioral factors that affect health of individuals and populations
   c. Describe steps and procedures for the planning, implementation and evaluation of public health programs, policies and interventions
d. Apply evidence-based approaches in the development and evaluation of social and behavioral science interventions  
e. Apply ethical principles to public health program planning, implementation and evaluation

6. Communication and informatics:  
a. Describe how societal, organizational and individual factors influence and are influenced by public health communications  
b. Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities

7. Diversity and culture:  
a. Describe the roles of history, power, privilege and structural inequality in producing health disparities  
b. Explain how professional ethics and practices relate to equity and accountability in diverse community settings  
c. Differentiate among availability, acceptability and accessibility of health care across diverse populations

8. Leadership:  
a. Engage in dialogue and learning from others to advance public health goals  
b. Demonstrate transparency, integrity and honesty in all actions

9. Public health biology:  
a. Apply biological principles to development and implementation of disease prevention, control or management programs

10. Professionalism:  
a. Apply basic principles of ethical analysis (e.g. the Public Health Code of Ethics, human rights framework, other moral theories) to issues of public health practice and policy  
b. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision-making in public health  
c. Apply the core functions of assessment, policy development and assurance in the analysis of public health problems and their solutions  
d. Promote high standards of personal and organizational integrity, compassion, honesty and respect for all people  
e. Distinguish between population and individual ethical considerations in relation to the benefits, costs and burdens of public health programs  
f. Appreciate the importance of working collaboratively with diverse communities and constituencies (e.g. researchers, practitioners, agencies and organizations)

11. Program planning:  
a. Differentiate among goals, measurable objectives, related activities and expected outcomes for a public health program  
b. Differentiate the purposes of formative, process and outcome evaluation

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

The M.P.H. program student handbook is available upon request.

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

For the M.P.H., apply online at sophas.org (http://www.sophas.org).

</thead>
<tbody>
<tr>
<td>M.D. and M.P.H.</td>
<td>Fall</td>
<td>Applications strongly encouraged by Jan 1</td>
<td>MCAT (acceptable in lieu of GRE scores for this combined professional/academic degree program) TOEFL</td>
</tr>
</tbody>
</table>

Note: Students applying to the joint M.D./M.P.H. program should be accepted to the VCU School of Medicine prior to applying to the M.D./M.P.H. Program. Students must apply separately to each program. Applications to the M.P.H. program are made to the VCU Office of Graduate Admissions.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must present the following qualifications:

1. Prior degree: Students must hold a bachelor’s degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.

2. Test scores: The M.P.H. program normally requires GRE scores, but for the combined M.D./M.P.H., students may submit MCAT scores provided for admission to the School of Medicine in lieu of GRE scores.

3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.

2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.

3. Personal statement following these guidelines:
   a. The document should be 1.5 or double-spaced with one-inch margins, in a font no smaller than 11 points.
   b. The document should cover the following issues in two to five pages:
      • Description of the applicant’s career goals
      • Why the applicant wishes to pursue an M.P.H. degree
      • How an M.P.H. degree will help the applicant achieve her/his career goals
      • Description of applicant’s particular areas of interest in public health (e.g., maternal and child health, cancer epidemiology)
      • Why VCU’s M.P.H. program best fits the student’s public health interests

   • What applicant plans to do in the first few years after graduation

Degree requirements

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. Public health works to prevent health problems in populations before these problems occur. The M.P.H. provides a rigorous curriculum to help students develop the analytic and critical reasoning skills to improve population health. The program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in important projects.

In addition to general VCU Graduate School graduation requirements (p. 39), students are required to successfully complete minimum of 36 credit hours of formal course work and practicum, a 20-hour community-based learning experience, attendance at 12 public health seminars, and a capstone project. In addition, medical students will complete a public health elective during the M-4 year at a placement approved by the M.P.H. program director, in lieu of the required public health internship.

The M.P.H. program can be individualized to meet the varied needs and interests of students. The program offers many electives, allowing students to tailor the program to meet educational objectives, and it is flexible enough to accommodate students who enter the program with various backgrounds and experiences.

Capstone project: The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student’s academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report
3. Policy analysis report
4. Health promotion materials (e.g., brochures/posters/fliers, educational video games, website content, etc.) on a specific disease area
5. Needs assessment for a specific population
6. Development and implementation of target population surveys
7. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) successfully complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.
Non-didactic program requirements
In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

Term Hours: 19.5

Total Hours: 36

1 Student may elect to complete 1-3 credits of EPID 694 in summer.

Total graduate credit hours required (minimum) 36
Selected course work completed during the M-1 and M-2 years of study for application toward the M.D. accounts for 12 credit hours toward the M.P.H. degree. This includes a waiver of the core epidemiology course EPID 571, due to training in population health in the M.D. curriculum. The public health internship requirement is fulfilled through completion of a public health elective in the M-4 year, after the student completes the M.P.H. year. This elective occurs at a public health agency that is approved by the M.P.H. program director.

Microbiology and Immunology, Doctor of Philosophy (Ph.D.)

Program goal
The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master’s and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a
broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified.

The Ph.D. program is also designed to develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Student learning outcomes**

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)**

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)**

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements. (p. 39)**

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).**

**Admission requirements**

<table>

<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE or MCAT</td>
</tr>
</tbody>
</table>

**Special requirements**

- MCAT acceptable in lieu of GRE for combined professional/ academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.
In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. GRE scores greater than 153 for quantitative, 156 for verbal (or combined 1250 on previous scale) and 4.0 analytical scores
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 58 graduate credit hours.

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Ph.D. degree is offered, as well as an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings, writing of a grant application and writing of scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser, undergoes a written and oral examination and then carries out an original independent research project under the direction of the adviser. The project falls under the review of an advisory committee, and a written dissertation is defended in a final oral examination.

A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to continue in the program.

Total graduate credit hours required (minimum) 58

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Microbiology and Immunology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.
Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

#### Admission requirements

**Special requirements**

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

#### Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 58 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

</tr>
</tbody>
</table>

Special requirements

- Successful domestic applicants typically have GRE scores of at least 156 for verbal reasoning and 153 for quantitative reasoning, 4.0 for analytical reasoning; DAT score of 18 or greater; or MCAT score of 26 or greater. International applicants should display English language proficiency by achieving a TOEFL score of 100 (IBT) or higher.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum requirements.

1. Applicants must have earned or expect a baccalaureate or equivalent degree and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics.
2. Laboratory experience is strongly recommended.
3. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals.
4. For combined degree students, the Medical College Admission Test or Dental Aptitude Test is accepted in lieu of the GRE.
5. Foreign applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Complete application portfolio reviews will begin in January and will continue through May 1. International students requiring temporary U.S. visas should apply by April 1 for fall matriculation.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and

726 Microbiology and Immunology, Master of Science (M.S.)
oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Master of Science degree is offered, as well as a Ph.D. and an M.D./Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then carries out an original, independent research project under the direction of the adviser. The project falls under the review of an advisory committee and a written dissertation is defended in a final oral examination.

M.S. students will select their permanent advisers after three rotations completed during the first year of study. Research projects will be based on ongoing research in laboratories of the selected permanent adviser. A graduate advisory committee will be developed by the student and adviser. The M.S. student and the GAC will formulate a suitable curriculum of study based on the student's area of research interest.

In addition to the general VCU Graduate School graduation requirements (p. 39), students in the M.S. degree program must complete a minimum of 41 credit hours (25 credit hours in didactic formal graduate courses, a minimum of four elective credit hours and a minimum of 12 directed research hours). Additional hours may be completed for successful outcome of the M.S. degree. A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to continue in the program.

An oral defense, consisting of a public presentation of the thesis and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members, students and staff, shall be scheduled to examine the student's underlying fundamental knowledge of the disciplines encompassed by the student's research. Announcement of the oral defense, including the candidate's name, project title, and the day, place and time of the defense, shall be made at least seven working days in advance of the defense.

Microbiology and Immunology, Master of Science (M.S.) with a concentration in molecular biology and genetics

Program goals
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master's curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master's thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes
1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skills with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student's knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will
be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the Graduate study section for additional information on degree candidacy requirements.** (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the Graduate study section for additional information on graduation requirements.** (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry</th>

</thead>
<tbody>
<tr>
<td>M.S.</td>
<td>Fall</td>
<td>Deadline date rolling, preference given to applications received by Jan 17</td>
<td>GRE; TOEFL for applicants whose native language is not English</td>
</tr>
</tbody>
</table>

**Special requirements**

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Microbiology and Immunology.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

**Basic science, research-intensive, non-thesis curriculum for medical students**

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Microbiology and Immunology.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.
Program goals

Upon completion of the Ph.D. in Neuroscience degree program, students will have:

1. Demonstrated a mastery of neuroscience and related bioscience knowledge
2. Developed effective oral, written and electronic communication skills
3. Demonstrated the ability to formulate, design, implement and interpret experimental approaches
4. Reached a level of competency to advance to positions as neuroscience researchers and teachers in a broad spectrum of academic, industrial and government employment venues
5. Successfully obtained employment in a neuroscience-related position

Student learning outcomes

1. Acquire the core knowledge of neuroscience: Students will demonstrate acquisition of core knowledge presented in required and elective courses.
2. Demonstrate knowledge of the neuroscience scientific literature: Students will demonstrate the ability to integrate and comprehensively review the scientific literature.
3. Acquire competency in oral communication: Students will prepare and deliver effective seminars and poster presentations.
4. Acquire competency in written communication: Students will generate an original dissertation and written comprehensive exam, as well as prepare and publish high quality scientific manuscripts.
5. Demonstrate the ability to design experiments: Students will evaluate existing scientific knowledge related to their project, identify a scientific question and formulate testable hypotheses.
6. Demonstrate the ability to conduct and interpret experiments: Students design experiments to test their hypotheses, carry out those experiments and interpret their results.
7. Obtain employment upon graduation: Student will successfully obtain employment in a neuroscience-related position upon graduation.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)
Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Admission requirements

<table>
<thead>
<tr>
<th>Degree:</th>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT TOEFL if international</td>
</tr>
</tbody>
</table>

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. GRE > 153 quantitative, 156 verbal (or combined 1,250 on previous scale) and 4.0 analytical scores
3. TOEFL score of 600 (pBT), 250 (cBT) or 100 (iBT; or 6.5 on the IELTS for individuals for whom English is a second language
4. Personal statements, including:
   a. Long-term career goals to assess reasons behind application
   b. How a Ph.D. in biomedical science helps achieve those goals
   c. Initial motivating factors for a career in research
   d. Research experience, including dates, places and duration
5. Equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology or biophysics)

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), students in the Ph.D. program must complete a minimum of 69 graduate credit hours.

Students must maintain a minimum cumulative GPA of 3.0 and must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

At the end of the second year of required and elective course work, students will take written and oral comprehensive examinations. The written examination is an open-book written exam which is designed to: (1) assess the student’s ability to integrate course material and (2) demonstrate critical thinking and evaluation of the literature in the basic health sciences related to the student’s area of research. This part is based on a question provided to the student by their adviser and graduate advisory committee. The answer should be 25 to 35 pages in length and must represent the student’s unaided work. This section of the exam is graded as pass/fail and must be completed by June 30 of the second year.

After passing the written comprehensive examination, students will schedule the proposal defense within six months. For the proposal defense, students will prepare an NIH-style grant proposal based on their research plans. The proposal will form the basis of the oral candidacy exam. Students are strongly encouraged to submit their proposals for extramural funding (e.g., NIH predoctoral fellowships) where appropriate.

After successful completion of both parts of the written candidacy exam, the student’s graduate advisory committee will administer the oral candidacy examination, which entails an oral defense of the student’s grant proposal as well as the topics covered in part one of the written candidacy exam. The oral candidacy exam covers: (1) course work related to the student’s proposed research; (2) the literature cited in or related to the proposal; and (3) the hypotheses, research techniques and procedures presented in the proposal.

Successful completion of the oral candidacy exam advances the student to candidacy for the doctoral degree. The oral candidacy exam must be completed prior to the beginning of the third year. Beginning with the spring semester the third year in the graduate program, students will devote their full time to conducting research in their advisers’ laboratories. Students also register for neuroscience research seminar and journal club each semester.

At the appropriate time in their research, students will prepare a dissertation and schedule a final oral defense of the thesis. The final oral
examination (defense of the dissertation) will be limited to the subject of the candidate’s dissertation and related basic science.

It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within eight years from the date of matriculation in the degree program. Extensions may be approved in extenuating circumstances.

**Total Hours: 6-8**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

John W. Bigbee, Ph.D.
Professor, Department of Anatomy and Neurobiology
jbigbee@vcu.edu
(804) 828-0948

**Program website:** neuroscience.vcu.edu (http://www.neuroscience.vcu.edu)

---

**Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)**

**Program goal**

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Student learning outcomes**

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to
effectively present information including the use of figures, tables and citations as measured by rubric.

3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Students wishing to matriculate into the Department of Pharmacology and Toxicology can contact the program director for further advice on course requirements and advising.

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
Degree requirements
The broad base offered in the PhD. program in pharmacology and toxicology, together with basic training in physiology and biochemistry, provides the background for a successful career in academic institutions, industry or government. The research program of the department is sufficiently broad to provide an adequate basis for entry into a wide variety of interesting areas of modern biology and medicine.

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 60 graduate credit hours. With few exceptions, Ph.D. students are enrolled in the Biomedical Sciences Doctoral Portal from matriculation until matched with an adviser, usually by the summer semester of the second year. The students are moved into the Ph.D. in Pharmacology and Toxicology major after meeting program requirements. Students customarily complete formal course work in pharmacology and biochemistry during the first year of study. Participation in research also is begun early in the first year. Students interested or committed to pharmacology should take the footnoted (1) courses listed in the curriculum requirements section during the portal period to assure rapid progress toward the degree.

In the third and subsequent years, the majority of the course load is taken as PHTX 697. Advanced electives also may be taken as desired and with the approval of the adviser. Students and faculty participate in a seminar program (PHTX 690) that includes distinguished visiting scientists from the U.S. and abroad. Following completion of a qualifying examination, a degree candidate is required to submit and defend a thesis embracing an original research project conducted under the guidance and supervision of an adviser and an advisory committee. There is no foreign language requirement. The average time necessary to complete the doctoral program in pharmacology and toxicology is four to five years.

Curriculum requirements
Required courses
Select a minimum of one credit from the following: 1

<table>
<thead>
<tr>
<th>Course Code</th>

Total graduate credit hours required (minimum) 60

Typical plan of study
Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director
Hamid I. Akbarali, Ph.D.
Professor and vice chair, Department of Pharmacology and Toxicology
hiakbarali@vcu.edu
(804) 828-7918

Additional contact

Coordinator, graduate programs in pharmacology and toxicology
swcox@vcu.edu
(804) 828-8400

Program website: pharmtox.vcu.edu (https://pharmtox.vcu.edu)
Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics

Program goals
The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes
1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.
Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>

<th>Test requirements</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td>Applications received prior to Jan 15 given priority consideration</td>
<td>GRE, MCAT or DAT</td>
</tr>
</tbody>
</table>

Special requirements

• MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
• Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 60 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists.

By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.

</tbody>
</table>
Student learning outcomes

1. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

2. Integrated knowledge of bioscience: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to
graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist. Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Admission requirements

**Degree:** M.S.

<table>
<thead>
<tr>
<th>Semester(s) of entry:</th>
<th>Deadline dates:</th>
<th>Test requirements:</th>
</tr>
</thead>
<tbody>
<tr>
<td>Fall</td>
<td>Apr 15</td>
<td>GRE (MCAT acceptable in lieu of GRE)</td>
</tr>
</tbody>
</table>

Special requirements

- See the departmental website for additional information on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 17), qualified applicants to the M.S. degree program typically must have:

1. Baccalaureate degrees with a major in fields such as biology, chemistry, biochemistry, pharmacy and related sciences
2. GRE scores of 1100 (verbal plus quantitative) and 3.5 (analytical) or equivalent scores on the new GRE exam
3. Undergraduate GPA of 3.2
4. Some laboratory research experience

**Basic science, research-intensive, non-thesis curriculum for medical students**

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students in the master’s program must complete a minimum of 30 graduate credit hours.

The Master of Science in Pharmacology and Toxicology is a research-oriented degree program comprising graduate course work and supervised research leading to a master's thesis. Students must conduct a substantial original investigation under the supervision of their advisers and must prepare and defend a thesis reporting the results of this research. It is highly recommended that students identify mentors for dissertation research as soon as possible within the first semester to ensure timely progress in their research.

When the thesis has been completed, copies are submitted to the members of the student’s graduate advisory committee. The student’s GAC decides upon the acceptability of the candidate’s thesis. If the committee unanimously accepts the thesis for defense, the candidate appears before them for a final oral examination.

M.S. students are required to present a departmental seminar prior to the final oral thesis defense as a requirement for completion of the thesis.

**Curriculum requirements**

**Required courses**

Substitutions may be approved by the graduate program director.

Pharmacology and Toxicology, Master of Science (M.S.) with a concentration in molecular biology and genetics

Program goals

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master’s curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The final three semesters include a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a master’s thesis.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Special requirements

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Pharmacology and Toxicology.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and an essay summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.
Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.

</tbody>
</table>

Students make take additional course work with the approval of their graduate program directors.

Total graduate credit hours required (minimum) 48

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program director

Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

Program website: vcu.edu/mbg (http://www.vcu.edu/mbg)

Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [combined]

The School of Pharmacy and the Division of Epidemiology in the Department of Family Medicine and Population Health in VCU’s School of Medicine offer a dual-degree program through which students earn both Pharm.D. and M.P.H. degrees. This dual-degree program offers students the opportunity to achieve a Doctor of Pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend the fourth year of the Pharm.D. program pursuing the M.P.H. degree, after which they transition back to pharmacy for advanced practice experiences.

Students are required to take 36 of the 45 credits required for the M.P.H. The M.P.H. field study (internship) requirement will be satisfied by
PharmD. special advanced practice experiences in community health during the fifth year of the program.

Students complete two credits of practical skills work during the P3 year, followed by full immersion in the M.P.H. curriculum in the P4 year. The required M.P.H. capstone project will be completed in a community setting during the P5 year; it will involve a comprehensive project that serves the needs of a professional public health organization and typically involves the development of one or more deliverables. Examples include a disease surveillance project, a needs assessment or program evaluation, or development of a comprehensive suite of patient health education or medication safety materials.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Physiology and Biophysics, Doctor of Philosophy (Ph.D.)

Program goals
1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes
1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.grad.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

Department handbook

Applicants and students may request a handbook with additional information, which is also summarized on the departmental website (physiology.vcu.edu/education/phd (http://www.physiology.vcu.edu/education/phd)). Please feel free to contact the graduate program coordinator with any questions.
School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Special requirements

• Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Degree requirements

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking, of which required course work is only one component. Each student’s program is tailored to meet his or her particular interests, with the primary emphasis on developing research skills and the capacity for scholarship.

Opportunities for research experience begin in the first year, when students spend time working in several faculty laboratories of their choice. These lab rotations enable students to examine current faculty research projects and choose their areas of specialization. In the second and subsequent years, increasingly more time is devoted to independent research under the guidance of a faculty adviser. Department-sponsored seminars give students opportunities to discuss their research interests with visiting scientists and many students present their work at national professional meetings.

The Ph.D. program in physiology and biophysics normally takes at least four years to complete. The first two years are devoted mainly to course work. The first year consists primarily of required courses, while the second is geared toward electives and research. On satisfactory completion of two years of course work, students must pass written and oral comprehensive examinations to qualify for degree candidacy. Following admission to candidacy, each student must conduct a substantial original research project, prepare a written dissertation and defend it successfully in an oral examination.

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 66 credit hours for the Ph.D., including directed research.

Select six credits in elective courses from the following:

Selected 500- and 600-level courses in physiology (PHIS)
Other basic science departments (ANAT, BIOC, BIOS, HGEN, IBMS, MICR and PHTX)
Other courses as approved by the program

Note: This is a modular course; the full course is five credit hours, but students may choose to take a subset of the modules for fewer hours.
Note: Another critical-thinking course may substitute for this requirement, e.g., HGEN 691 or IBMS 630.)

**Directed research and additional courses (variable credits)**

Select additional credits in the following to amass the required minimum of 66 credit hours:

<table>
<thead>
<tr>
<th>Course Code</th>
<th>Course Title</th>
</tr>
</thead>
<tbody>
<tr>
<td>PHIS 697</td>
<td>Directed Research in Physiology</td>
</tr>
</tbody>
</table>

Other elective courses approved by the program.

**Total graduate credit hours required (minimum) 66**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**

Roland Pittman, Ph.D.

pittman@vcu.edu
(804) 828-9545

**Additional contacts**

Carlos Escalante, Ph.D.
Graduate program assistant director
cescalante@vcu.edu
(804) 628-1202

Christina Kyrus, M.B.A.
Graduate program coordinator
cikyrus@vcu.edu
(804) 628-5506

**Program website:** physiology.vcu.edu (http://physiology.vcu.edu)

**Physiology and Biophysics, Doctor of Philosophy (Ph.D.) with a concentration in molecular biology and genetics**

**Program goals**

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The doctoral curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

4. The program centers on a research project conducted under the guidance of a selected faculty mentor and culminates in the presentation and defense of a doctoral dissertation.

Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. **Problem-solving skills:** Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. **General knowledge of sciences:** Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. **Communication skills:** Degree candidates will demonstrate an appropriate level of oral, written and visual communication skills have been acquired.
   a. **Oral communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. **Written communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. **Experimental design:** Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.granduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.granduate.admissions.vcu.edu).

---

**Admission requirements**

<table>
<thead>
<tr>
<th>Degree</th>
<th>Semester(s) of entry</th>
<th>Deadline dates: Applications received prior to Jan 15 given priority consideration</th>
<th>Test requirements: GRE, MCAT or DAT</th>
</tr>
</thead>
<tbody>
<tr>
<td>Ph.D.</td>
<td>Fall</td>
<td></td>
<td></td>
</tr>
</tbody>
</table>

**Special requirements**

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 17), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)
7. Laboratory experience also strongly recommended

**Degree requirements**

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 66 graduate credit hours.

During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Prior to the beginning of the third year of study, students should successfully pass written and oral candidacy examinations. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in a broad range of current biomedical research areas.
## Curriculum requirements

### Required courses (variable credits)

<table>

<td>0.5</td>
</tr>
</tbody>
</table>

Take the following two-credit course for three rotations:
- IBMS 620 Laboratory/Clinical Rotations (variable)

Select one of the following (or equivalents):
- IBMS 630 Critical Thinking
- BIOC 691 Special Topics in Biochemistry
- HGEN 691 Special Topics in Genetics

IBMS 680 Proposal Preparation 1
IBMS 690 Basic Health Sciences Research Seminar (first year only) 1
MICR 605 Prokaryotic Molecular Genetics 3
MICR 607 Techniques in Molecular Biology and Genetics 2

Take the following one-credit course every semester beginning in the second year:
- MICR 690 Microbiology Research Seminar (section 002 – MBG)

Take the following course at least twice:
- MICR 693 Topics in Molecular Biology and Genetics (MBG journal club)

Select one of the following:
- OVPR 601 Scientific Integrity
- OVPR 602 Responsible Scientific Conduct
- OVPR 603 Responsible Conduct of Research

### Eukaryotic molecular biology course

Select a course in eukaryotic molecular biology from the following list of approved options (or an approved alternative):
- BIOC 605 Molecular Biology
- HGEN 602 Genetic Models of Disease
- HGEN 614 Pathogenesis of Human Genetic Disease
- IBMS 635 Cellular Signalling
- MICR 684 Molecular Biology of Cancer
- PATH 670 Experimental Approaches to Tumor Biology

### Directed research and electives (variable credits)

Select a variable number of credit hours to amass the required minimum of 66 credit hours from the following:
- PHIS 697 Directed Research in Physiology

## Total graduate credit hours required (minimum) 66

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

### Graduate program director
Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
c Christie@vcu.edu
(804) 828-9093

### Program website
vcu.edu/mbg (http://www.vcu.edu/mbg)

## Physiology and Biophysics, Master of Science (M.S.)

### Program goal
The master’s program in physiology and biophysics is designed to provide students with the skills required to advance to positions as physiology and bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of physiology and bioscience, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. **Problem-solving skills**: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. **General knowledge of sciences**: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.
3. **Communication skills**: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   - **Oral communication skills**: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
b. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master's programs is available elsewhere in this chapter of the Graduate Bulletin.

Special requirements

- Students admitted through the Certificate in Pre-medical Graduate Health Sciences program only.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must meet the following minimum requirements: baccalaureate degree or its equivalent at the time of enrollment and successful completion of the Certificate in Pre-medical Graduate Health Sciences.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Physiology and Biophysics offers courses of study leading to the Master of Science and the Doctor of Philosophy. A combined M.D./Ph.D. degree program also is available through this department and the School of Medicine. It is generally recommended that students intending to pursue careers as professional physiologists should attempt to earn the Ph.D. Work done in partial or complete fulfillment of the requirements for the master’s degree may be applied toward the Ph.D. provided that it is of adequate quality.

Graduate education in physiology and biophysics is a highly individualized enterprise, of which the formal course requirements comprise only a portion. The degree program described here provides
an opportunity for apprenticeship in research and, through this, the development of a capacity for scholarship. The essence of this type of education lies in the development of a close relationship between the student and the faculty adviser. The adviser and the student, jointly and with the approval of the department chair and the associate dean of medicine for graduate education, select the student's graduate advisory committee.

The M.S. degree program includes a year of course work (completed as part of the Certificate in Pre-medical Graduate Health Sciences program) and a second year largely devoted to the completion of an independent research project, writing a thesis based on this work and a successful oral defense of this thesis and completed course work.

In addition to the general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 30 graduate credit hours for the M.S. in Physiology and Biophysics.

**Teaching experience**

M.S. students also have the opportunity to acquire teaching experience and financial support by serving as teaching assistants for PHIZ 206 Human Physiology Laboratory for one semester. Teaching assistants must complete PHIS 691-PHIS 501: PHIS 501 (two credit hours) prior to or concurrent with the assistantship.

**Physiology and Biophysics, Master of Science (M.S.) with a concentration in molecular biology and genetics**

**Program goals**

The molecular biology and genetics curriculum is an integrated interdisciplinary program of study that builds on the graduate programs of participating departments in the School of Medicine. The master’s curriculum is designed to be an intensive course of study that will provide students with the skills required to advance to research-oriented careers in biotechnology or provide the foundation for further graduate study toward a Ph.D.

It is expected that the program should be completed in approximately two to two-and-one-half years.

1. The curriculum includes core, specialization and elective courses. Electives drawn from various departments allow individual specialization.

2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.

3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.
Participating faculty are associated not only with programs and departments within the School of Medicine, but also with the VCU Massey Cancer Center, the Philips Institute for Oral and Craniofacial Molecular Biology (School of Dentistry), the Institute of Structural Biology and Drug Discovery (School of Pharmacy) and the VCU Center for the Study of Biological Complexity (VCU Life Sciences).

The interdisciplinary approach to the solution of biological problems provided by this training is designed to develop in students the flexibility and problem-solving skills necessary for success in a variety of scientific career opportunities or further graduate study.

**Student learning outcomes**

1. **Problem-solving skills:** Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. **General knowledge of sciences:** Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

3. **Communication skills:** Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
   a. **Oral communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
   b. **Written communication skills:** Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

4. **Experimental design:** Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduated.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

M.S. students in the MBG curriculum must prepare a formal written research plan and make an oral presentation of their thesis research proposals and progress reports to their graduate advisory committees prior to the beginning of the second year of residency. The student’s knowledge in the area of the proposed research, current research accomplishments and the feasibility of the proposed research project will be evaluated by the GAC. Successful completion of this review is required for continuance in the program and constitutes admission to candidacy.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tr>
</tbody>
</table>

Special requirements

- Applications for the program should be submitted to Molecular Biology and Genetics – M.S. selected from the drop-down menu of programs of the VCU online graduate application form. The degree awarded will be a Master of Science in Physiology and Biophysics.

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must have earned or expect to earn a baccalaureate or equivalent degree, and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics. Laboratory experience is also strongly recommended. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant’s goals. International applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 39), the interdisciplinary master’s curriculum in molecular biology and genetics requires a minimum of 48 credit hours, at least half of which must be course work restricted to graduate students. The curriculum includes 19 credit hours of required core course work and 29 additional credit hours of required course work, directed research and research seminar course work, and additional approved course work, as listed below. M.S. candidates must pass a final oral examination. A written thesis approved by the student’s graduate advisory committee completes the requirements leading to the M.S. degree.

</tr>
</tbody>
</table>

Students may take additional course work with the approval of their graduate program directors.

**Total graduate credit hours required (minimum) 48**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary.
depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Graduate program director**
Gail E. Christie, Ph.D.
Professor, Department of Microbiology and Immunology
christie@vcu.edu
(804) 828-9093

**Program website:** vcu.edu/mbg (http://www.vcu.edu/mbg)

**Pre-medical Graduate Health Sciences (Post-baccalaureate graduate certificate)**

**Program goal**
The pre-medical graduate health sciences certificate program in the School of Medicine provides an advanced level of didactic training in the biomedical sciences to enhance the preparation of students for a variety of career options, particularly professional degree training (i.e. Ph.D., M.D. and D.D.S.). The program also provides the opportunity for the development of an informed approach to the admission process in professional and/or advanced degree training to enhance the prospect of advancement.

**Student learning outcomes**
1. Achievement of a threshold competency in the basic health sciences: The candidate will achieve/surpass expectations of a threshold-level competency in the basic health sciences, particularly in areas related to gaining admission to professional and/or higher-level degree programs.
2. MCAT/DAT preparation: The candidate will be prepared to take and/or retake standardized tests. The candidate will achieve a score that fulfills medical or dental school admission requirements.
3. Preparation for career advancement: The candidate who meets the threshold competency objective will display an enhanced level of advancement to higher levels of professional and/or advanced degree training.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**
The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduatedu.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Graduation requirements**
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

**Applying to professional school and advanced graduate degree programs**
Students must follow admission guidelines for applications to the M.S., M.D., D.D.S. and other programs. Completion of the certificate program does not afford a guaranteed admission to professional training programs at VCU. Exceptional performance, 3.5 GPA and a 28 MCAT guarantees an interview at VCU School of Medicine. Similar criteria increase eligibility for an interview at the VCU School of Dentistry.

**Research option:** Upon completion of the one-year certificate program, individuals may apply for admission to advanced degree programs. Certificate students who are admitted to the M.S. degree (CERT/M.S.) will work closely with an individual faculty member on a research project in a particular department. CERT/M.S. students will choose a research seminar elective in their first year, which consists of one-time faculty presentations to inform students of research areas and laboratory opportunities. Research mentorship can begin in the first year, in conjunction with a spring or summer three-credit research rotation that counts toward the 27 credit hours required to graduate.

**Advising:** Students are encouraged to seek opportunities for academic, personal and professional development from the Division for Academic Success, Career Services and the CERT Program Office. For students who choose to take a year off between CERT and professional school, several School of Medicine professors hire students for research positions and area hospitals offer SCRIBE programs that actively recruit VCU graduates. The CERT Program Office can also help identify possibilities.

**Letters of reference:** The CERT program adviser will provide a letter of reference for professional school applications. Students must schedule an appointment to interview with the program adviser for a letter.

**Apply online at** graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

</tbody>
</table>
Special requirements

- While there is no official deadline for applying to the certificate program, the school strongly recommends applicants have all of their materials into the graduate admissions office by July 1 to ensure that the file can be processed in time for the fall semester. The program has rolling admissions for a limited number of positions.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 17).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 39), students must complete a minimum of 27 graduate credit hours of course work with a minimum GPA of 3.0 (4.0 scale), with no more than 20 percent of the total credit hours at the C or below level. The curriculum is composed of six required courses (15 credit hours) and 12 elective credit hours (including for-credit research options) spread over two semesters. The curriculum should be completed in one academic year (fall and spring semester).

Required and elective courses are drawn from departments within the School of Medicine: the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. All courses are held on the MCV Campus.

Public Health, Master of (M.P.H.)

Program accreditation
Council on Education for Public Health

Program goal

The mission of the VCU M.P.H. program is to engage students in an experiential and learner-centered environment, collaborate with public health partners in Central Virginia to promote health equity and community wellness and foster lifelong inquiry and discovery in interdisciplinary, translational research that improves human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to positions as public health practitioners in a broad spectrum of positions and settings and who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public
health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

**Student learning outcomes**

The M.P.H. program trains students to develop the following educational competencies, selected from the Association of Schools of Public Health’s “Master’s Degree in Public Health Core Competency Model,” August 2006.

1. Biostatistics:
   a. Describe the roles biostatistics serves in the discipline of public health
   b. Describe basic concepts of probability, random variation and commonly used statistical probability distributions
   c. Describe preferred methodological alternatives to commonly used statistical methods when assumptions are not met
   d. Distinguish among the different measurement scales and the implications for selection of statistical methods to be used based on these distinctions
   e. Apply descriptive techniques commonly used to summarize public health data
   f. Apply common statistical methods for inference
   g. Apply descriptive and inferential methodologies according to the type of study design for answering a particular research question
   h. Apply basic informatics techniques with vital statistics and public health records in the description of public health characteristics and in public health research and evaluation
   i. Interpret results of statistical analyses found in public health studies
   j. Develop written and oral presentations based on statistical analyses for both public health professionals and educated lay audiences

2. Environmental health sciences:
   a. Describe the direct and indirect human, ecological and safety effects of major environmental and occupational agents
   b. Describe genetic, physiologic and psychosocial factors that affect susceptibility to adverse health outcomes following exposure to environmental hazards
   c. Describe federal and state regulatory programs, guidelines and authorities that control environmental health issues
   d. Specify current environmental risk assessment methods
   e. Specify approaches for assessing, preventing and controlling environmental hazards that pose risks to human health and safety
   f. Explain the general mechanisms of toxicity in eliciting a toxic response to various environmental exposures
   g. Discuss various risk management and risk communication approaches in relation to issues of environmental justice and equity

3. Epidemiology:
   a. Identify key sources of data for epidemiologic purposes
   b. Describe a public health problem in terms of magnitude, person, time and place
   c. Explain the importance of epidemiology for informing scientific, ethical, economic and political discussion of health issues
   d. Apply the basic terminology and definitions of epidemiology
   e. Calculate basic epidemiology measures
   f. Communicate epidemiologic information to lay and professional audiences
   g. Draw appropriate inferences from epidemiologic data
   h. Evaluate the strengths and limitations of epidemiologic reports

4. Health policy and management:
   a. Identify the main components and issues of the organization, financing and delivery of health services and public health systems in the U.S.
   b. Describe the legal and ethical bases for public health and health services
   c. Discuss the policy process for improving the health status of populations

5. Social and behavioral sciences:
   a. Identify basic theories, concepts and models from a range of social and behavioral disciplines that are used in public health research and practice
   b. Identify the causes of social and behavioral factors that affect health of individuals and populations
   c. Describe steps and procedures for the planning, implementation and evaluation of public health programs, policies and interventions
   d. Apply evidence-based approaches in the development and evaluation of social and behavioral science interventions
   e. Apply ethical principles to public health program planning, implementation and evaluation

6. Communication and informatics:
   a. Describe how societal, organizational and individual factors influence and are influenced by public health communications
   b. Demonstrate effective written and oral skills for communicating with different audiences in the context of professional public health activities

7. Diversity and culture:
   a. Describe the roles of history, power, privilege and structural inequality in producing health disparities
   b. Explain how professional ethics and practices relate to equity and accountability in diverse community settings
   c. Differentiate among availability, acceptability and accessibility of health care across diverse populations

8. Leadership:
   a. Engage in dialogue and learning from others to advance public health goals
   b. Demonstrate transparency, integrity and honesty in all actions

9. Public health biology:
   a. Apply biological principles to development and implementation of disease prevention, control or management programs

10. Professionalism:
    a. Apply basic principles of ethical analysis (e.g. the Public Health Code of Ethics, human rights framework, other moral theories) to issues of public health practice and policy
    b. Apply evidence-based principles and the scientific knowledge base to critical evaluation and decision-making in public health
**c. Apply the core functions of assessment, policy development and assurance in the analysis of public health problems and their solutions**

d. Promote high standards of personal and organizational integrity, compassion, honesty and respect for all people

e. Distinguish between population and individual ethical considerations in relation to the benefits, costs and burdens of public health programs

f. Appreciate the importance of working collaboratively with diverse communities and constituencies (e.g. researchers, practitioners, agencies and organizations)

11. Program planning:

   a. Differentiate among goals, measurable objectives, related activities and expected outcomes for a public health program
   b. Differentiate the purposes of formative, process and outcome evaluation

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

**Other information**

The M.P.H. program student handbook is available upon request.

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at sophas.org (http://www.sophas.org).

**Admission requirements**

<table>

<td>Fall</td>
<td>Jan 1 (strongly recommended)</td>
<td>GRE, TOEFL</td>
</tr>
</tbody>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor’s degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.

2. GRE: Current GRE test results (taken within the past five years), with scores at or above the 75th percentile preferred in all components of the exam (i.e., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing).

3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.

2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.

3. Personal statement following these guidelines:
   a. The document should be 1.5 or double-spaced with one-inch margins, in a font no smaller than 11 points.
   b. The document should cover the following issues in two to five pages:
      - Description of the applicant’s career goals
      - Why the applicant wishes to pursue an M.P.H. degree
• How an M.P.H. degree will help the applicant achieve her/his career goals
• Description of applicant’s particular areas of interest in public health (e.g., maternal and child health, cancer epidemiology)
• Why VCU’s M.P.H. program best fits the student’s public health interests
• What applicant plans to do in the first few years after graduation

Degree requirements

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. Public health works to prevent health problems in populations before these problems occur. The M.P.H. program provides a rigorous curriculum to help students develop the analytic and critical reasoning skills to improve population health. The program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in important projects.

In addition to general VCU Graduate School graduation requirements (p. 39), a minimum of 45 credit hours of formal course work is required, including

1. A practicum in year one
2. An internship, typically conducted in the summer between the first and second year
3. A 20-hour community-based learning experience
4. Attendance at public health seminars in years one and two
5. A capstone project planned and implemented in the second year of the program.

The M.P.H. program can be individualized to meet the varied needs and interests of students. The program offers many electives, allowing students to tailor the program to meet educational objectives, and it is flexible enough to accommodate students who enter the program with various backgrounds and experiences.

Curriculum requirements

Core courses

| BIOS 547  | Applied Data Analysis in Public Health I | 3 |
| EPID 571  | Principles of Epidemiology               | 3 |
| EPID 604  | Principles of Environmental Health       | 3 |
| HPCR 601  | Introduction to Health Policy            | 3 |
| SBHD 605  | Introduction to Social and Behavioral Health | 3 |

Total Hours: 15

Program requirements

| BIOS 548  | Applied Data Analysis in Public Health II | 3 |
| EPID 547  | Applied Data Analysis Lab I               | 1.5 |
| EPID 548  | Applied Data Analysis Lab II              | 1.5 |
| EPID 580  | Public Health Ethics                     | 1 |
| EPID 593  | MPH Practicum                             | 2 |

Total Hours: 9

Electives

Select a minimum of 15 credit hours of elective course work selected according to the area(s) of interest in public health. These may include the following courses:

| BIOS 571  | Clinical Trials                          |
| EPID 600  | Introduction to Public Health            |
| EPID 601  | Contemporary Issues and Controversies in Public Health |
| EPID 603  | Public Health Policy and Politics        |
| EPID 620  | Cancer Health Policy and Politics        |
| EPID 622  | Maternal and Child Health                |
| EPID 624  | Chronic Epidemiology                     |
| EPID 646  | Epidemiology of Psychiatric and Substance Use Disorders |
| EPID 648  | Behavioral Epidemiology                  |
| SBHD 608  | Health Communication                     |
| SBHD 632  | Health Disparities and Social Justice    |
| SBHD 636  | Community-based Participatory Research   |

Total Hours: 15

Integrative program requirements

| EPID 693  | Public Health Internship                 | 3 |
| EPID 694  | MPH Capstone Project                     | 3 |

Total Hours: 6

Total graduate credit hours required (minimum) 45

Public health internship: The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student’s progress. Students work a minimum of 180 hours in a professional public health organization.

Capstone project: The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student’s academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report
3. Policy analysis report
4. Health promotion materials (e.g., brochures/posters/fliers, educational video games, website content, etc.) on a specific disease area
5. Needs assessment for a specific population  
6. Development and implementation of target population surveys  
7. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

**Non-didactic program requirements**  
In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars  
2. Twenty hours of community-based service-learning

**Graduate program director**  
Lisa S. Anderson, M.P.H.

---

**Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [combined]**

**Program accreditation**  
Council on Education for Public Health (M.P.H.)  
Council on Social Work Education (M.S.W.)

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the School of Medicine’s Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual-degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the Graduate Admissions Office and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual-degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study.

Students are required to complete a minimum of 45 M.S.W. credit hours and a minimum of 36 M.P.H. credit hours, for a total of 81 semester credit hours. In the M.P.H. program, this includes 24 credit hours of core and required courses, a minimum nine credit hours of elective courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. During the third and last year of study, dual-degree students are placed in internships through the School of Social Work that focus on public health; the internship placement is approved by both the M.P.H. program director and the director of the M.S.W. field instruction. With adviser approval, the student may develop a capstone project based on work in this public health/social work placement.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.gsu.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

**Graduation requirements**

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)
Other information

School of Medicine graduate program policies
The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on master’s programs is available elsewhere in this chapter of the Graduate Bulletin.

For the M.P.H., apply online at sophas.org (http://www.sophas.org); for the M.S.W., apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Total graduate credit hours required (minimum) for combined M.P.H./M.S.W. 81

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Graduate program directors
Lisa S. Anderson, M.P.H.
Director of educational programs, Master of Public Health program
lsanders@vcu.edu
(804) 628-2512

Sarah K. Price, Ph.D.
M.S.W./M.P.H. combined program coordinator
skprice@vcu.edu
(804) 828-0579

Additional contact
Anna P. Rose
Graduate Programs Coordinator, Master of Public Health program
aprose@vcu.edu
(804) 828-9785

Program websites: familymedicine.vcu.edu/education/graduate/dual-degrees (http://familymedicine.vcu.edu/education/graduate/dual-degrees) and socialwork.vcu.edu (http://www.socialwork.vcu.edu)
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology

Program goal
The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity’s impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.

Student learning outcomes
At the completion of the program students will:

1. Demonstrate teaching effectiveness in the classroom, clinical environment or both
2. Have disseminated research findings at an appropriate regional, national or international conference
3. Demonstrate the ability to independently collect research data, analyze research data and synthesize conclusions from research data

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (http://www.graduate.vcu.edu) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the Graduate study section for additional information on academic regulations for graduate students. (p. 30)

Degree candidacy requirements
A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the Graduate study section for additional information on degree candidacy requirements. (p. 37)

Graduation requirements
As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the Graduate study section for additional information on graduation requirements. (p. 39)

Apply online at graduate.admissions.vcu.edu (http://www.graduate.admissions.vcu.edu).

Admission requirements

<table>
<thead>
<tr>
<th>Degree: Ph.D.</th>
<th>Semester(s) of entry: Fall preferred</th>
<th>Deadline dates: Applications received prior to Jan. 9 will be given priority consideration.</th>
<th>Test requirements: GRE</th>
</tr>
</thead>
</table>

In addition to the general admission requirements of the VCU Graduate School (p. 17), applicants must:

1. Have completed at least one of a master’s degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
2. Provide official GRE score
3. Submit a curriculum vitae or professional resume indicating an applicant’s educational and career experience as well as evidence of research potential
Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

**Degree requirements**
In addition to general VCU Graduate School graduation requirements (p. 39), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:

1. A minimum of 50 credit hours developed in conjunction with their advisers
2. Written and oral comprehensive examinations
