TABLE OF CONTENTS

Table of Contents	2	Theses and dissertations	26
Graduate Bulletin	13	Graduate advisory committees	27
About VCU	14	Graduate faculty roles and responsibilities	27
Administration	14	Transfer credit for graduate students	27
Accreditation	14	Laudatory honors and remedial work	28
Mission statement	14	Change of graduate program	28
Oak Ridge Associate Universities Consortium	15	Dismissal from a graduate program and appeal process	28
VCU Health System Authority	15	Time limit for completion	29
Board of Visitors	15	Repeated courses	29
Determination of student classification for in-state tuition purposes	15	Graduate registration policies	29
Rights of students under the Family Educational Rights and Privacy Act	16	Withdrawal from a graduate program	30
Consumer information	16	Graduate degree requirements	31
Academic regulations	17	Graduate advising and student responsibilities	31
Universitywide regulations	17	Graduation information	31
Current mailing address	17	Graduate study	34
Attendance	17	Welcome from the graduate dean	34
Course drop vs. withdrawal	17	Administration and contact information	34
Student conduct in the classroom	18	Admission to graduate study	35
Grade review procedures	18	Admission requirements	35
VCU Honor System	19	Types of admissions	35
Consumer information	19	Guaranteed admission through The Honors College	36
Immunizations	19	Multiple admissions	36
Transcripts	20	International students	37
Degree requirements	20	Admissions appeals	37
Termination of enrollment	20	Application procedures	37
Course information	20	Financing graduate school	38
Grading and marking	21	Policies and procedures on graduate fellowships and assistantships	38
Posthumous degrees	23	eServices – online records access	41
University right to revocation	23	Email – official method of communication	41
Leave of absence	23	Identification requirements	41
Withdrawal from the university	24	Eligibility for financial aid	41
Effective bulletin	24	Applying for financial aid	42
Degree Works	24	Priority filing dates	42
Graduate-only regulations	24	Summer studies	42
Satisfactory academic progress	25	Study abroad	42
Exceptions to graduate policies	25	Quality assurance	42
Degree definitions	25	University bill	42
Degree candidacy	26	Financial aid appeals	42
		Federal and state financial aid refund policy	43
		Graduate students in undergraduate courses	43
		Satisfactory academic progress for financial aid purposes	43

Types of financial aid	43	Computer Science, Master of Science (M.S.), accelerated Bachelor of Science in Computer Science to master's	85
Veteran and reservist educational benefits	44	Computer and Information Systems Security, Master of Science (M.S.)(College of Engineering)	87
Graduate tuition and student fees	44	Cybersecurity, Certificate in (Post-baccalaureate graduate certificate)	88
Student financial responsibilities	44	Data Science, Certificate in (Post-baccalaureate graduate certificate)	90
Tuition and fee schedule	45	Data Science, Certificate in (Post-baccalaureate graduate certificate)	90
Student billing	45	Department of Electrical and Computer Engineering	93
Drop vs. withdraw	46	Department of Mechanical and Nuclear Engineering	93
Outstanding charges	47	Mechanical and Nuclear Engineering, Doctor of Philosophy (Ph.D.)	94
Military services tuition relief, refund and reinstatement guidelines	47	Mechanical and Nuclear Engineering, Master of Science (M.S.)	98
Tuition determination and student classification	48	College of Health Professions	100
Off-campus graduate instruction	48	Administration	100
Undergraduate students in graduate classes	49	Accreditation	100
Accelerated bachelor's-to-master's programs	49	Philosophy	100
College of Engineering	50	Programs	101
Administration	50	Licensure/certification	101
Accreditation	50	Attendance regulations	101
Degree programs	50	Student performance and behavior	101
Commonwealth Graduate Engineering Program	51	Financial aid	102
Graduate information	51	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in clinical laboratory sciences	102
Engineering, Doctor of Philosophy (Ph.D.)	51	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in gerontology	106
Engineering, Doctor of Philosophy (Ph.D.) with a concentration in chemical and life science engineering	53	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in health administration	110
Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science	56	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia	114
Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science/Computer Science Ph.D. with the University of Cordoba [dual degree]	59	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in occupational therapy	117
Engineering, Doctor of Philosophy (Ph.D.) with a concentration in electrical and computer engineering	63	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in patient counseling	121
Engineering, Master of Science (M.S.)	65	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in physical therapy	125
Engineering, Master of Science (M.S.) with a concentration in chemical and life science engineering	67	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in radiation sciences	129
Engineering, Master of Science (M.S.) with a concentration in electrical and computer engineering	69	Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in rehabilitation leadership	133
Department of Biomedical Engineering	72	Department of Clinical Laboratory Sciences	137
Biomedical Engineering, Doctor of Philosophy (Ph.D.)	72	Clinical Laboratory Sciences, Master of Science (M.S.), advanced master's concentration	137
Biomedical Engineering, Master of Science (M.S.)	75		
Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [dual degree]	77		
Department of Chemical and Life Science Engineering	77		
Chemical and Life Science Engineering, Doctor of Philosophy (Ph.D.)	77		
Department of Computer Science	81		
Computer Science, Master of Science (M.S.)	81		

Clinical Laboratory Sciences, Master of Science (M.S.), categorical concentration	140	Department of Radiation Sciences	196
Clinical Laboratory Sciences, Master of Science (M.S.), accelerated Bachelor of Science in Clinical Laboratory Sciences (B.S.) to master's	143	Department of Rehabilitation Counseling	197
Department of Gerontology	145	Professional Counseling, Certificate in (Post-master's certificate)	197
Gerontology, Master of Science (M.S.)	146	Rehabilitation and Mental Health Counseling, Master of Science (M.S.)	199
Aging Studies, Certificate in (Post-baccalaureate graduate certificate)	149	Virginia Center on Aging	202
Department of Health Administration	150	College of Humanities and Sciences	203
Health Administration, Master of (M.H.A.)	151	Administration	203
Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree]	155	Accreditation	203
Health Administration, Master of (M.H.A.)/Juris Doctor (J.D.) from the University of Richmond or Washington and Lee University [dual degree]	157	Graduate information	203
Medicine, Doctor of (M.D.)/Health Administration, Master of (M.H.A.) [dual degree]	157	Richard T. Robertson School of Media and Culture	205
Health Administration, Master of Science in (M.S.H.A.)	158	Mass Communications, Master of Science (M.S.) with a concentration in integrated public relations and advertising with Fudan University [dual degree]	205
Health Services Organization and Research, Doctor of Philosophy (Ph.D.)	162	Mass Communications, Master of Science (M.S.) with a concentration in multimedia journalism	207
Department of Nurse Anesthesia	165	Mass Communications, Master of Science (M.S.) with a concentration in strategic public relations	209
Nurse Anesthesia Practice, Doctor of (D.N.A.P.)	166	Media, Art, and Text, Doctor of Philosophy (Ph.D.) [Robertson School]	210
Nurse Anesthesia Practice, Doctor of (D.N.A.P.), entry-level	168	School of World Studies	213
Nurse Anesthesia, Master of Science in (M.S.N.A.)	171	Interdisciplinary Studies, Master of (M.I.S.), with a concentration in interdisciplinary mathematics and science leadership/K-8 mathematics specialist	214
Department of Occupational Therapy	173	Department of African American Studies	216
Occupational Therapy Doctorate (O.T.D.), entry-level	174	Department of Biology	216
Department of Patient Counseling	178	Biology, Master of Science (M.S.)	216
Patient Counseling, Certificate in (Post-baccalaureate graduate certificate)	179	Department of Chemistry	218
Patient Counseling, Master of Science (M.S.), accelerated chaplain certification concentration	180	Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biochemistry	218
Patient Counseling, Master of Science (M.S.) with a concentration in chaplain certification	182	Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology	220
Patient Counseling, Master of Science (M.S.) with a concentration in supervisory clinical pastoral education	184	Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology of cancer	222
Patient Counseling, Master of Science (M.S.)/Divinity, Master of (M.Div.) from the Samuel DeWitt Proctor School of Theology at Virginia Union University [dual degree]	186	Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in bioorganic chemistry	223
Department of Physical Therapy	188	Chemistry, Doctor of Philosophy (Ph.D.)	225
Physical Therapy, Doctor of (D.P.T.)	189	Chemistry, Doctor of Philosophy (Ph.D.) with a concentration in chemical physics	227
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology [College of Health Professions]	192	Chemistry, Master of Science (M.S.)	229
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in neuromusculoskeletal dynamics [College of Health Professions]	194	Chemistry, Master of Science (M.S.) with Fudan University [dual degree]	232
		Nanoscience and Nanotechnology, Doctor of Philosophy (Ph.D.)	235
		Department of English	237

Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in dual genre	237	Physics and Applied Physics, Master of Science (M.S.), accelerated Bachelor of Science in Physics (B.S.) to master's	281
Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in fiction	239	Department of Political Science	281
Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in poetry	242	Department of Psychology	282
English, Master of Arts (M.A.)	244	Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in behavioral medicine	283
English, Master of Arts (M.A.) with a concentration in research	245	Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in clinical child	286
Media, Art, and Text, Doctor of Philosophy (Ph.D.) [College of Humanities and Sciences]	247	Counseling Psychology, Doctor of Philosophy (Ph.D.)	288
Department of Forensic Science	250	Health Psychology, Doctor of Philosophy (Ph.D.)	291
Forensic Science, Master of Science (M.S.) with a concentration in forensic biology	250	Psychology, Doctor of Philosophy (Ph.D.) with a concentration in developmental psychology	294
Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/drugs and toxicology	253	Psychology, Doctor of Philosophy (Ph.D.) with a concentration in social psychology	297
Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/trace	255	Department of Sociology	300
Forensic Science, Master of Science (M.S.) with a concentration in forensic physical analysis	257	Sociology, Master of Science (M.S.)	300
Department of Gender, Sexuality and Women's Studies	260	Sociology, Master of Science (M.S.) with a concentration in digital sociology	301
Gender, Sexuality and Women's Studies, Certificate in (Post-baccalaureate graduate certificate)	260	Sociology, Master of Science (M.S.), accelerated Bachelor of Science in Sociology (B.S.) to master's	302
Department of History	261	Applied Social Research, Certificate in (Post-baccalaureate graduate certificate)	303
History, Master of Arts (M.A.)	261	Department of Statistical Sciences and Operations Research	304
Public History, Certificate in (Post-baccalaureate graduate certificate)	263	Mathematical Sciences, Master of Science (M.S.) with a concentration in operations research	305
Department of Kinesiology and Health Sciences	265	Mathematical Sciences, Master of Science (M.S.) with a concentration in statistics	307
Health and Movement Sciences, Master of Science (M.S.) with a concentration in exercise science	265	Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) [Department of Statistical Sciences and Operations Research]	309
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology [College of Humanities and Sciences]	267	Applied Statistics, Certificate in (Graduate certificate)	311
Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in neuromusculoskeletal dynamics [College of Humanities and Sciences]	269	School of the Arts	313
Health Behavior Coaching, Certificate in (Post-baccalaureate graduate certificate)	271	Administration	313
Department of Mathematics and Applied Mathematics	272	Accreditation	313
Mathematical Sciences, Master of Science (M.S.) with a concentration in applied mathematics	273	Programs	313
Mathematical Sciences, Master of Science (M.S.) with a concentration in mathematics	275	School of the Arts Visual Resource Center	314
Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) [Department of Mathematics and Applied Mathematics]	277	Graduate information	314
Department of Philosophy	279	Media, Art, and Text, Doctor of Philosophy (Ph.D.) [School of the Arts]	316
Department of Physics	279	Department of Art Education	319
Physics and Applied Physics, Master of Science (M.S.)	279	Art Education, Master of (M.A.E.)	319
		Department of Art History	321
		Art History, Doctor of Philosophy (Ph.D.) with a concentration in curatorial	321
		Art History, Doctor of Philosophy (Ph.D.) with a concentration in historical studies	324

Art History, Master of Arts (M.A.) with a concentration in historical studies	325	Theatre, Master of Fine Arts (M.F.A.) with a concentration in pedagogy/performance	359
Art History, Master of Arts (M.A.) with a concentration in museum studies	327	Theatre, Master of Fine Arts (M.F.A.) with a concentration in stage design/technical theatre	362
Department of Communication Arts	328	School of the Arts in Qatar	364
Department of Craft and Material Studies	329	Design, Master of Fine Arts (M.F.A.) with a concentration in design studies [VCUQatar Campus]	364
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in ceramics	329	School of Business	368
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in fibers	331	Administration	368
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in furniture design	333	Accreditation	368
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in glassworking	334	Financial aid, scholarships and awards	368
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in jewelry/metalworking	336	Graduate information	368
Department of Dance and Choreography	338	Business Administration, Certificate in (Post-baccalaureate graduate certificate)	370
Department of Fashion Design and Merchandising	338	Business, Doctor of Philosophy (Ph.D.) with a concentration in accounting	371
Department of Graphic Design	338	Business, Doctor of Philosophy (Ph.D.) with a concentration in information systems	373
Design, Master of Fine Arts (M.F.A.) with a concentration in visual communications	339	Business, Doctor of Philosophy (Ph.D.) with a concentration in management	374
Department of Interior Design	340	Business, Master of Science (M.S.) with a concentration in finance	376
Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – post-professional option	341	Business, Master of Science (M.S.) with a concentration in global marketing management	378
Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – professional entry-level option	343	Business, Master of Science (M.S.) with a concentration in real estate	379
Department of Kinetic Imaging	344	Real Estate and Urban Land Development, Certificate in (Post-baccalaureate graduate certificate)	381
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in kinetic imaging	345	Sport Leadership, Master of (M.S.L.)	382
Department of Music	346	M.B.A. programs	384
Music, Master of (M.M.) with a concentration in music education	348	Business Administration, Master of (M.B.A.)	385
Department of Painting and Printmaking	349	Business Administration, Master of (M.B.A.) with a concentration in business analytics	388
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in painting and printmaking	350	Business Administration, Master of (M.B.A.) with a concentration in corporate finance	390
Department of Photography and Film	351	Business Administration, Master of (M.B.A.) with a concentration in entrepreneurship and innovation	392
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in photography and film	352	Business Administration, Master of (M.B.A.) with a concentration in global business	393
Department of Sculpture and Extended Media	353	Business Administration, Master of (M.B.A.) with a concentration in health care management	395
Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in sculpture	353	Business Administration, Master of (M.B.A.) with a concentration in information resources management	396
Department of Theatre	355	Business Administration, Master of (M.B.A.) with a concentration in investments	398
Theatre, Master of Fine Arts (M.F.A.) with a concentration in costume design	355	Business Administration, Master of (M.B.A.) with a concentration in real estate	399
Theatre, Master of Fine Arts (M.F.A.) with a concentration in pedagogy/literature	357		

Business Administration, Master of (M.B.A.) with a concentration in supply chain management	401	Economics, Master of Arts (M.A.) with a concentration in financial economics	434
Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree]	403	Economics, Master of Arts (M.A.) with a concentration in health economics	435
Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Executive] [dual degree]	405	Economics, Master of Arts (M.A.) with a concentration in statistics	437
Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [dual degree]	407	Department of Finance, Insurance and Real Estate	438
Business Administration, Master of (M.B.A.) [Executive]	408	Department of Information Systems	438
Business Administration, Master of (M.B.A.) [Executive] with a concentration in business analytics	409	Computer and Information Systems Security, Master of Science (M.S.) [School of Business]	439
Business Administration, Master of (M.B.A.) [Executive] with a concentration in corporate finance	410	Information Systems, Master of Science (M.S.)	441
Business Administration, Master of (M.B.A.) [Executive] with a concentration in entrepreneurship and innovation	412	Information Systems, Master of Science (M.S.) with a concentration in health care management	443
Business Administration, Master of (M.B.A.) [Executive] with a concentration in global business	413	Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance	445
Business Administration, Master of (M.B.A.) [Executive] with a concentration in health care management	414	Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive]	447
Business Administration, Master of (M.B.A.) [Executive] with a concentration in information resources management	416	Business Administration, Master of (M.B.A.) Information Systems, Master of Science (M.S.) [dual degree]	448
Business Administration, Master of (M.B.A.) [Executive] with a concentration in investments	417	Business Administration, Master of (M.B.A.) Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Executive] [dual degree]	450
Business Administration, Master of (M.B.A.) [Executive] with a concentration in real estate	418	Business Administration, Master of (M.B.A.) [Executive]/ Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree]	452
Business Administration, Master of (M.B.A.) [Executive] with a concentration in supply chain management	420	Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree]	454
Business Administration, Master of (M.B.A.) [Executive]/ Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree]	421	Department of Management and Entrepreneurship	456
Brandcenter	423	Department of Marketing	456
Business, Master of Science (M.S.) with a concentration in branding/art direction	423	Department of Supply Chain Management and Analytics	456
Business, Master of Science (M.S.) with a concentration in branding/copywriting	424	Decision Analytics, Master of (M.D.A.)	456
Business, Master of Science (M.S.) with a concentration in branding/creative brand management	426	Decision Analytics, Master of (M.D.A.) – professional track	458
Business, Master of Science (M.S.) with a concentration in branding/experience design	427	Decision Analytics, Master of (M.D.A.) with a concentration in health care management	460
Business, Master of Science (M.S.) with a concentration in branding/strategy	429	Decision Analytics, Master of (M.D.A.) with a concentration in health care management – professional track	462
Department of Accounting	430	Supply Chain Management, Master of (M.S.C.M.)	464
Accountancy, Master of (M.Acc.) with a concentration in data analytics	430	School of Dentistry	466
Department of Economics	432	Administration	466
Economics, Master of Arts (M.A.)	432	Accreditation	466
		Mission	466
		Philips Institute for Oral Health Research	466
		Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics	466

Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics	469	Special Education, Master of Education (M.Ed.) with a concentration in general education	508
Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry	472	Special Education, Master of Education (M.Ed.) with a concentration in severe disabilities	510
Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics	476	Special Education K-12 Teaching, Certificate in (Post-baccalaureate graduate certificate)	512
Oral Health Research, Doctor of Philosophy (Ph.D.)	479	Department of Educational Leadership	514
Advanced Dental Education	482	Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice	514
Department of Endodontics	484	Educational Leadership, Certificate in (Post-master's certificate)	516
Department of Orthodontics	484	Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision	517
Department of Pediatric Dentistry	484	Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies	519
Department of Periodontics	484	Leadership, Doctor of Education (Ed.D.)	520
School of Education	485	Department of Foundations of Education	522
Administration	485	Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology	522
Accreditation	485	Education, Doctor of Philosophy (Ph.D.) with a concentration in research, assessment and evaluation	524
Organization	485	Department of Teaching and Learning	525
Facilities	485	Adult Learning, Master of Education (M.Ed.) with a concentration in adult literacy	526
Support/resource offices	485	Adult Learning, Master of Education (M.Ed.) with a concentration in human resource development	528
Licensure and reciprocity	486	Adult Learning, Master of Education (M.Ed.) with a concentration in teaching and learning with technology	529
Programs	487	Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in instructional technology	531
Extended Teacher Preparation Program	487	Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in online teaching	532
Added or add-on endorsements	490	Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in teaching and learning	533
Graduate information	491	Education, Doctor of Philosophy (Ph.D.) with a concentration in curriculum, culture and change	534
Education, Doctor of Philosophy (Ph.D.) with a concentration in art education	492	Education, Doctor of Philosophy (Ph.D.) with a concentration in urban services leadership	536
Education, Doctor of Philosophy (Ph.D.) with a concentration in sport leadership	494	Instructional Technology, Certificate in (Post-baccalaureate graduate certificate)	538
Department of Counseling and Special Education	495	Medical Education, Certificate in (Post-baccalaureate graduate certificate)	539
Autism Spectrum Disorder, Certificate in (Post-baccalaureate graduate certificate)	496	Online Teaching for K-12 Educators, Certificate in (Post-baccalaureate graduate certificate)	541
College Student Development and Counseling, Certificate (Post-baccalaureate graduate certificate)	496	Reading Specialist, Certificate in (Post-master's certificate)	542
Counselor Education, Master of Education (M.Ed.) with a concentration in college counseling and student affairs	496	Reading, Master of Education (M.Ed.)	544
Counselor Education, Master of Education (M.Ed.) with a concentration in couples and family counseling	498	Reading, Master of Education (M.Ed.) with a concentration in K-12 reading specialist	545
Counselor Education, Master of Education (M.Ed.) with a concentration in school counseling	500		
Disability Leadership, Certificate in (Post-baccalaureate graduate certificate)	502		
Education, Doctor of Philosophy (Ph.D.) with a concentration in counselor education and supervision	503		
Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership	505		
Special Education, Master of Education (M.Ed.) with a concentration in early childhood	507		

Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/K-12	547	Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree]	587
Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/adult	548	Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)	587
Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)	550	Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)	589
Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in biology education	551	Homeland Security and Emergency Preparedness, Master of Arts (M.A.)	590
Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in chemistry education	552	Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)	592
Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in English education	554	Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree]	594
Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in history/social studies education	556	Public Administration, Master of (M.P.A.), generalist curriculum	595
Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in mathematics education	557	Public Administration, Master of (M.P.A.), accelerated Bachelor of Arts in Political Science (B.A.) to master's	596
Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in physics education	559	Public Administration, Master of (M.P.A.)/Juris Doctor (J.D.) from the University of Richmond [dual degree]	597
Teaching, Master of (M.T.) with a concentration in biology education	560	Public Management, Certificate in (Post-baccalaureate graduate certificate)	598
Teaching, Master of (M.T.) with a concentration in chemistry education	562	Public Policy and Administration, Doctor of Philosophy (Ph.D.) ...	599
Teaching, Master of (M.T.) with a concentration in early and elementary education	564	Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in criminal justice policy	602
Teaching, Master of (M.T.) with a concentration in earth science education	567	Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public administration	605
Teaching, Master of (M.T.) with a concentration in English education	569	Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public policy	607

GRADUATE BULLETIN

The Virginia Commonwealth University bulletins are published yearly for each of the student populations served by the institution. The Graduate Bulletin contains information about university policies, course descriptions and academic requirements for the programs offered to graduate students.

Visit our [FAQ page](#) for additional information.

ABOUT VCU

Located in the heart of Richmond, the capital of Virginia since 1779, Virginia Commonwealth University serves an integral role in the economic health of the city and the state, educating the current and future work force, reaching out to the community, advancing research and enhancing patient care.

VCU was founded in 1838 as the medical department of Hampden-Sydney College, becoming the Medical College of Virginia in 1854. In 1968, the General Assembly merged MCV with the Richmond Professional Institute, founded in 1917, to create Virginia Commonwealth University.

Today, VCU offers comprehensive undergraduate, master's, doctoral and professional programs and encompasses one of the largest academic health centers in the nation. With \$271 million in externally funded research awards for the 2018 fiscal year, VCU is one of only 28 public universities in the country with an academic medical center to be designated as a research university with very high research activity as well as a Community Engaged institution, both by the Carnegie Foundation. Its centers and institutes of excellence support the university's research mission and involve faculty from multiple disciplines in the arts, public policy, biotechnology and health care discoveries.

VCU enrolls more than 31,000 students in more than 200 degree and certificate programs in the arts, sciences and humanities. Thirty-eight of the programs are unique in Virginia, many of them crossing the disciplines of VCU's 11 schools and five colleges. VCU has a full-time instructional faculty of more than 2,500 who are nationally and internationally recognized for excellence in the arts, business, education, engineering, the humanities, the life sciences, social work and all the health care professions. With more than 23,000 employees, VCU and VCU Health also have a significant impact on Central Virginia's economy.

Building on the foundation of VCU's nationally ranked academic programs and academic medical center, research and scholarly productivity, and engagement with the communities it serves, the university's recently completed strategic plan, Quest for Distinction (2012-2018), launched a new vision for VCU: to elevate its stature and become the nation's top urban, public research university. This focused plan capitalized on the outstanding assets of the VCU experience and truly distinguished VCU as a major research university committed to academic quality and student success at all levels.

Quest for Distinction also embodied VCU's commitment to human health through the VCU Medical Center, which includes the university's health sciences schools and offers state-of-the-art care in more than 200 specialty areas, many of national and international note, including organ transplantation, head and spinal cord trauma, burn healing and cancer treatment. A new strategic plan, Quest 2025: Together We Transform, will launch in 2019.

VCU and the VCU Health System have been honored with prestigious national and international recognition for top-quality graduate, professional and medical-care programs, reflecting a commitment to be among America's top research universities focused on student learning.

Nondiscrimination

VCU does not discriminate in admissions, treatment, employment or access to its programs or activities on the basis of race, color, religion, national origin (including ethnicity), age, sex (including pregnancy,

childbirth and related medical conditions), parenting status, marital status, political affiliation, veteran status, genetic information (including family medical history), sexual orientation, gender identity, gender expression or disability, consistent with applicable law.

VCU's notice of nondiscrimination and nondiscrimination policies, with contact information for the office and individuals responsible for enforcement, are in the university's policy library (<https://policy.vcu.edu/>).

Administration

VCU administration provides leadership and organizational structure for the university, overseeing its goals and mission. Refer to each unit's website (<http://atoz.vcu.edu/administration/>) for a current listing of administrators.

Deans

Deans provide leadership for their respective school or college. Refer to each unit's website (<http://atoz.vcu.edu/academic+departments/organizations/>) for a current listing of its deans, departmental chairs and program heads.

Accreditation

Virginia Commonwealth University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate, master's and doctoral degrees. Contact the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, Georgia 30033-4097 or call (404) 679-4500 for questions about the accreditation of Virginia Commonwealth University.

Academic program accreditation

Mission statement

As the premier urban, public research university in Virginia, VCU's mission is to advance knowledge and student success through its commitments to:

- An engaged, learner-centered environment that fosters inquiry, discovery and innovation in a global setting
- Research that expands the boundaries of new knowledge and creative expression and promotes translational applications to improve human health
- Interdisciplinary collaborations that bring new perspectives to complex problems and mobilize creative energies that advance innovation and solve global challenges
- Health care that strives to preserve and restore health for all people, to seek the cause and cure of diseases through groundbreaking research, and to educate those who serve humanity
- Diversity that provides a climate of inclusion, a dedication to addressing disparities wherever they exist, and an opportunity to explore and create in an environment of trust
- Sustainable, university-community partnerships that enhance the educational, economic and cultural vitality of the communities VCU serves in Virginia and around the world

Vision statement

VCU will be a premier urban, public research university distinguished by its commitment to:

- The intellectual and academic success of a diverse student body
- Research and discovery that advances knowledge, inspires creativity and improves human health
- The global engagement of students, faculty and staff that transforms lives and communities

Core values

1. **Accountability** – committing to the efficient and transparent stewardship of our resources to achieve institutional excellence
2. **Achievement** – ensuring distinction in learning, research and scholarly pursuits, service, and patient care
3. **Collaboration** – fostering collegiality and cooperation to advance learning, entrepreneurship and inquiry
4. **Freedom** – striving for intellectual truth with responsibility and civility, respecting the dignity of all individuals
5. **Innovation** – cultivating discovery, creativity, originality, inventiveness and talent
6. **Service** – engaging in the application of learning and discovery to improve the human condition and support the public good at home and abroad
7. **Diversity** – ensuring a climate of trust, honesty and integrity where all people are valued and differences are recognized as an asset
8. **Integrity** – adhering to the highest standards of honesty, respect and professional and scholarly ethics

Oak Ridge Associate Universities Consortium

Since 1963, students and faculty have benefited from VCU's membership in Oak Ridge Associated Universities, a consortium of 115 colleges and universities and a contractor for the U.S. Department of Energy. ORAU works with its member institutions to help students and faculty gain access to federal research facilities, to keep its members informed about opportunities for scholarship and research appointments and to organize research alliances among its members.

Faculty, graduate students and undergraduate students may access a wide range of opportunities for study and research, including the Lindau-Nobel Laureates and Powe Junior Faculty programs. Many of these programs are designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines.

For more information about ORAU and its programs, contact:

- P. Srirama Rao, Ph.D., ORAU Councilor for VCU (804) 827-2262
- Monnie E. Champion, ORAU Corporate Secretary (865) 576-2206

Interested parties may also visit the ORAU website at [orau.org](http://www.orau.org) (<http://www.orau.org>).

VCU Health System Authority

In April 1996, Gov. George Allen signed legislation that established the Medical College of Virginia Hospitals Authority. Effective July 1, 1997, the operations, employees and obligations of MCV Hospitals (formerly a division of VCU) were transferred to the Authority. Three years later, in connection with legislation signed by Gov. James Gilmore, the MCV Hospitals Authority became the Virginia Commonwealth University Health System Authority. The clinical activities of MCV Hospitals, MCV Physicians and the VCU School of Medicine are now coordinated and integrated by and through VCU Health.

The VCU Health System Authority is charged by statute with the missions of operating MCV Hospitals as teaching hospitals for the benefit of the health sciences schools of VCU, providing high quality patient care and providing a site for medical and biomedical research, all of which missions are required to be performed in close affiliation with the Office of the Vice President for Health Sciences. VCU's vice president for health sciences also serves as the CEO of the VCU Health System Authority, and five VCU faculty physicians serve as members of the VCU Health board of directors.

Board of Visitors

The Board of Visitors is the voting body of Virginia Commonwealth University. Each year, the governor of Virginia appoints members. Refer to Office of the President's website (<http://www.president.vcu.edu/board/>) for a current listing of board members.

Determination of student classification for in-state tuition purposes

Tuition is determined by the number of credit hours a student is taking, the student's residency classification, course of study and classification level. For in-state tuition benefits, the student must comply with the Code of Virginia (<https://law.lis.virginia.gov/vacode/title23.1/chapter5/>) regulations relative to in-state tuition and reduced rate tuition eligibility.

All applicants to VCU who wish to be considered for in-state tuition rates as Virginia residents must submit the Application for Virginia In-state Tuition Rates. This application is a part of the admissions packet and the nondegree-seeking student enrollment package. The residency determination of the applicant is conveyed at the time of admission as a degree-seeking student or nondegree-seeking student.

New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency determination by completing an Application for Change of Domicile available from the Office of Records and Registration (online). The student must present clear and convincing evidence that they are not residing in the state primarily to attend school. The application deadline is the end of the add/drop period of the semester, and it is the responsibility of the student to establish or to file an appeal to change their residency classification prior to the start of classes for the semester under consideration. In accordance with the Code of Virginia, applications received after the deadline must be considered for the next semester. Submit completed applications with documentation to the university residency appeals officer. Processing may require four to six weeks; therefore it is strongly recommended that applications be submitted earlier than the stated deadline.

The university's service to students is limited to assuring that they understand the procedures for appealing and that they have access to information about the relevant sections of the Code of Virginia. The university provides information about the steps of the process and access to the applicable sections of the statute and the associated guidelines. The university provides qualified staff to review the appeals and make decisions based on the information students provide. The university representative cannot provide advisement to students as to how to present their case for review; neither can they become the student's advocate since these university representatives must make the decision.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Office of Student Accounting. Students denied this status are also notified by mail. The denial letter informs the student of procedures for appeal of this decision, to include filing an appeal with the university residency appeals committee. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Please note that a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

Rights of students under the Family Educational Rights and Privacy Act

Pursuant to a federal statute enacted to protect the privacy rights of students (Family Educational Rights and Privacy Act of 1974 [FERPA], as amended, enacted as Section 438 of the General Education Provisions Act), eligible students of Virginia Commonwealth University are permitted to inspect and review education records of which the student is the subject. A statement of university policy concerning inspection and disclosure of education records has been formulated in compliance with the federal statute. Copies of the policy also are available from the Office of Records and Registration with additional information on their website (<https://rar.vcu.edu/records/family-educational-rights-and-privacy-act/>).

Generally, the act provides that no personally identifiable information will be disclosed without the student's consent, except for directory information and information to other school officials with a legitimate educational interest. When personally identifiable information, other than directory information, is disclosed, a record will be maintained of these

disclosures. This record also is available for inspection and review by the student.

If an eligible student feels that his or her education record is inaccurate, misleading or otherwise in violation of the student's privacy or other rights, the student may request an amendment to the record.

Should the university fail to comply with the requirements of the act, the student has the right to file a complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave., S.W., Washington, D.C. 20202-5901.

Parental notification amendment

Amendments to FERPA signed into federal law in fall 1998 specifically allow notification to the parents or guardians of students under the age of 21 who violate any law or university rule regarding use or possession of alcohol or other controlled substance. The Virginia Attorney General's Task Force on Drinking by College Students also recommended such notification in its 1998 report.

In accordance with these documents, a parental notification procedure has been included in the VCU Drug Free Schools and Workplace Policy.

Consumer information

The federal Higher Education Opportunity Act of 2008 requires that institutions of higher education disclose certain consumer information to current students, prospective students, current employees and/or prospective employees. This consumer information (<http://www.opds.vcu.edu/consumer-info/>) for VCU is maintained by the Office of Planning and Decision Support.

ACADEMIC REGULATIONS

This section of the Bulletin covers academic regulations and includes universitywide policies, which pertain to all students, as well as those specific to undergraduates and graduate students.

It is the responsibility of all students, both on- and off-campus, to be familiar with the academic regulations in individual school and department publications and on program websites; however, in all cases, the official policies and procedures of the university, as published on this website, take precedence over individual program policies and guidelines.

Students are also subject to any policy changes approved by the university for immediate implementation and published on the Bulletins website for the current academic year.

Universitywide regulations

Regulations presented in this section apply to all VCU students unless otherwise noted. Use the navigation to the left to see additional regulations that are specific to the level of study.

Current mailing address

Every VCU student is responsible for keeping a current mailing address on file with the Office of Records and Registration. Please verify your current address on eServices (<https://my.vcu.edu>).

If a student's mailing address is not accurate, the student should use eServices (<https://my.vcu.edu>) to make changes. Students may also submit any change of address in writing to the Office of Records and Registration, Harris Hall, Box 842520, Richmond, VA 23284-2520 or in person at the Student Services Center in Harris Hall, 1015 Floyd Ave.

All official mailings are sent to the permanent address on file in the Office of Records and Registration.

Email is considered an official method for communication at VCU because it delivers information in a convenient, timely, cost-effective and environmentally aware manner. Mail sent to a student's VCU email address may include notification of university-related actions, including disciplinary action. Students who use email addresses other than their required name@vcu.edu email address also must check their name@vcu.edu address frequently for official messages from the university.

Attendance

The instructional programs at VCU are based upon a series of class meetings involving lectures, discussions, field experiences, special readings and reporting assignments. Therefore it is important for each student to be in attendance on a regular basis. A student who misses a class session is responsible for completing all material covered or assignments made during the absence.

Students must be informed in writing of the attendance requirements and the corresponding consequences of poor attendance for the courses and/or program in which they are enrolled. Though the attendance requirements may vary widely from one course to another, students must abide by these requirements. Students cannot enroll in two courses that meet concurrently without written approval from the chair of each department involved.

Consequences of poor attendance

Students having attendance problems should contact the instructor to explain the reasons for nonattendance and to discuss the feasibility of continuing in the course. If the student has fallen so far behind that the successful completion of the course is impossible, the student should withdraw from the course before the end of the first 10 weeks of classes.

If the student continues to miss class and does not officially withdraw from the course, the instructor may withdraw the student for nonattendance with a mark of W before the end of the first 10 weeks of classes or may assign an academic grade at the end. Withdrawals are not permitted after the end of the first 10 weeks of classes. For classes that do not conform to the semester calendar, the final withdrawal date occurs when half of the course has been completed. Withdrawal dates for summer session classes are provided on the Summer Studies Calendar (<http://www.summer.vcu.edu/calendar/>).

Religious observances

It is the policy of VCU to accord students, on an individual basis, the opportunity to observe their traditional religious holidays. Students wishing to observe a religious holiday of special importance must provide advance written notification to each instructor by the end of the second week of classes. On these dates, instructors are encouraged to avoid scheduling one-time-only activities that cannot be replicated. Through such strategies as providing alternative assignments or examinations, granting permission for audio or video recordings or the use of the Internet, faculty members are expected to make reasonable academic accommodations for students who are absent because of religious observance.

Mandated short-term military training

Students called to report for mandated military training must provide advance written notification to each instructor several weeks in advance of training. Faculty members are expected to make reasonable academic accommodations for students who are absent because of mandated short-term military training (short-term is defined as several days not to exceed two weeks).

Course drop vs. withdrawal

A student may drop a class through the end of the add/drop registration period. When a class is dropped, the registration and associated tuition/fee charges are cancelled. Drop charges are removed to indicate that the student never attended the class or never attended the class beyond the add/drop registration period.

A student may withdraw from a class up to the withdrawal deadline as published in the university academic calendar (<http://www.vcu.edu/academiccalendars/>). Withdrawal from a course does not cancel the registration or the associated tuition/fee charges and results in the assignment of the grade of W. Refunds, if applicable, are issued in accordance with procedures described in the refunds section of the tuition and student fees (p. 46) section of this bulletin.

In both situations, any financial aid already disbursed to the student's account based on the original course registration will be assessed and adjusted according to the university refund policy and may result in a balance due to the university.

Student conduct in the classroom

The instructional program at VCU is based upon the premise that students enrolled in a class or clinic are entitled to receive instruction free from interference by other students. Accordingly, in classrooms, laboratories, studios and other learning areas, students are expected to conduct themselves in an orderly and cooperative manner so that the faculty member can proceed with customary instruction. Faculty members (including graduate teaching assistants) may set reasonable standards for classroom behavior in order to meet these objectives. If a student believes that the behavior of another student is disruptive, the faculty member should be informed.

If a faculty member believes that a student's behavior is disrupting the class and interfering with normal instruction, the faculty member may direct the student to leave the class or clinic for the remainder of the class period. In such circumstances, the faculty member is the sole judge that the student's behavior is sufficiently disruptive to warrant a temporary dismissal from the classroom or clinic. Disruptive behavior on the part of the student may result in the filing of formal charges under the university's Rules and Procedures document (<https://www.policy.vcu.edu/sites/default/files/Rules%20and%20Procedures.pdf>).

Grade review procedures

Students have a right to appeal course grades they consider to have been arbitrarily or capriciously assigned or assigned without regard for the criteria, requirements and procedures of the course stated in the syllabus or guidelines for assignments. Grades determined by actions under authority of the VCU Honor System may not be appealed through this procedure, nor may dismissals that have occurred as a result of correctly derived course grades.

Though the faculty has the responsibility for assigning grades on the basis of academic criteria, such grade designations can sometimes raise conflicts. Thus, while affirming the importance of maintaining standards of excellence and the integrity of the teaching/learning process, the university and its faculty also recognize that, on occasion, grades may be inappropriately assigned. Should such conflicts occur, students have a right to be fairly heard. When discrepancies occur concerning the grading process, the welfare and integrity of both faculty and students are equally important. This document is in no way intended to compromise the work of the faculty.

The faculty member (or members, in the case of a jointly taught course) bear the responsibility for specifying in writing at the beginning of each class section the formal requirements of the course and the weights that will be employed in determining the final course grade. The faculty member(s) shall apply relevant grading criteria uniformly to all members of the class.

Grades received through the grade review procedure are final and may not be appealed.

Initiating an appeal

When a student has evidence that a final grade has not been assigned in accordance with the stated criteria, the student shall discuss it first with the faculty member. The faculty member will explain how the final grade was determined. If the student continues to feel that the grade was incorrectly assigned, a written appeal may be submitted to the chair of the department in which the course was taught. Students appealing

grades assume the burden of proof. The appeal shall state and support with all available evidence the reasons why the student believes the grade should be changed. For grades awarded for the fall semester, the written intent to appeal must be submitted no later than 14 calendar days after the beginning of the spring semester. For grades awarded for the spring semester or summer sessions, the written intent to appeal must be submitted no later than 14 calendar days after the first day of the fall semester. For schools that have a summer session or other less common sessions, school policies may specify other deadlines to ensure a timely appeal. Appeals submitted after the deadline will be heard only in exceptional cases, as determined by the appropriate vice president.

The grade issued by the faculty member shall remain in effect throughout the appeal procedure. In instances in which the failing grade is in a prerequisite course in which safety or well-being of clients, patients or the public is involved, the student shall not be allowed to enroll in the subsequent courses in which safety and well-being may be at issue until and unless the appeal is resolved in the student's favor. In these cases, the student who wishes to appeal is advised to do so as soon as possible and it is the responsibility of the school to move the appeal process expeditiously.

Mediation

The chair of the department shall attempt to mediate an amicable solution within two weeks of receipt of the written appeal. If the complaint is not resolved, the chair shall forward the student's appeal to the dean (or appropriate associate/assistant dean)¹ of the school in which the course was taught. The chair also shall submit to the dean in writing the recommendation made to the two parties regarding the appropriateness of the grade. If the grade being appealed was assigned by the chair of the department, the dean shall assume the mediation responsibility. If the grade being appealed was assigned by the dean, the mediation responsibility will fall to the appropriate vice president.

¹In instances in which the dean of the school chooses for the appropriate associate/assistant dean to manage the grade appeal, the term "associate/assistant dean" may be substituted for the term "dean" throughout this document.

Grade review committee

The dean shall form a grade review committee and designate the chair. The committee has the option of either raising the grade or leaving the grade unchanged.

The committee shall consist of one nonvoting faculty chair, two faculty members and two students selected by the dean from disciplines whose methods and techniques of teaching and testing are as similar as possible to those of the discipline of the course in question. If the course is multidisciplinary and the instructor(s) whose grade is being appealed does not belong administratively in the school in which the course was taught, the committee shall have at least one of the faculty members from the instructor's school.

Either party may challenge the committee's membership for cause within a week of being informed of the membership. The dean shall determine if there is sufficient cause to remove the challenged committee member.

The committee shall meet initially to examine the written appeal and the department chair's recommendation. It can require the faculty member(s) to turn over to the committee grade records for that class or section and any tests, papers and examinations by students of that class that they may possess. The committee may require the student bringing the

appeal to turn over all tests, papers or other evaluations that have been returned and all existing evidence that an improper grade was awarded. The committee shall disregard any claim that a test or paper that has been returned to a student was unjustly graded unless that test or paper is produced for the committee's inspection.

After examining the materials, the committee may, by a majority vote, decline to hear an appeal that it judges to be patently without merit. Otherwise, the committee will authorize its chair to arrange a date for a hearing. The chair of the committee shall meet with each party prior to the hearing to explain the rules and procedures of the hearing.

Grade review hearing

Grade appeal hearings will be open, closed or partially open (i.e., a few close associates of each party may attend) by agreement of the appealing student and the faculty member(s) and the chair of the committee of the appealing student. In case of disagreement, the committee shall decide. The chair has the option to declare closed an open or partially open hearing in cases of disruption or in order to ensure necessary confidentiality.

Both parties may have with them an adviser of their choice (who may not be an attorney), with whom they may consult but who will not participate in the questioning of witnesses and presentation of evidence unless the opposing party and chair agree to it. The committee shall ask any member of the VCU community whose testimony it deems relevant to be available at an agreed-upon time to give testimony.

Either party may present additional witnesses as long as they remain within their allotted time and their testimony is directly relevant to the course at issue. Performance in other courses is not relevant. Witnesses other than the appealing student and the faculty member(s) shall be excluded from the hearing except when testifying. A hearing shall begin with the student outlining the reasons for the appeal and all evidence that exists of an improper grade. The faculty member(s) shall then explain the criteria used for the original grade assigned. Each party will have a time period not to exceed two hours in which to present a position.

The committee shall determine in executive session whether the grade was justified according to the course in which the grade was given. If the evidence is that the grade was determined according to the stated objectives, criteria and grading procedures of the course, the committee shall uphold the grade. The committee should also take into account that purposes, methods, requirements and grading criteria differ from course to course and that difference is a legitimate characteristic of a university and its faculty. Further, the grade in some courses may be partly or solely determined by a faculty member's professional judgment, which in itself cannot be overturned without evidence that the judgment was arbitrarily or capriciously rendered. The committee shall consider (a) whether the faculty member(s) articulated the criteria to be used (some criteria may be implicit within the discipline), (b) whether those criteria were actually used to determine the final grade and (c) whether the results of the evaluation were communicated to the student.

No grade may be changed except by a vote of at least three out of four voting members. When the committee has reached a decision, the committee chair shall submit to the dean in writing the decision and the reasons for it. The dean shall communicate in writing the decision of the committee to the appealing student, faculty member(s) and the department chair. If the grade has been changed, the dean also shall notify the registrar.

The evidence, proceedings and the final decision of the committee shall remain confidential. All documents shall be held in a confidential file by the dean for one year. The party from whom a document was obtained may request that it be returned at the end of the year. All documentation not returned shall be destroyed by the dean one year later.

Approved by the University Assembly Dec. 3, 1981.
Effective Feb. 15, 1982.
Revised September 1996. Effective Aug. 15, 1997.

Please note: Any student who has questions about initiating an appeal using the grade review procedure should call the office of the dean of his or her school or college.

VCU Honor System

VCU recognizes that honesty, truth and integrity are values central to its mission as an institution of higher education. Therefore, all students are subject to the **VCU Honor System**. All VCU students are responsible for being familiar with provisions of this document.

Academic dishonesty is the giving, taking or presenting of information or material by students with the intent of unethically or fraudulently aiding themselves or others on any work that is to be considered in the determination of a grade or the completion of academic requirements. Students in doubt regarding any matter related to the standards of academic integrity in a given course or on a given assignment should consult with the faculty member responsible for the course before presenting the work.

Consumer information

The federal Higher Education Act of 1965, as amended, requires that institutions of higher education disclose certain consumer information to current students, prospective students, current employees and/or prospective employees. This consumer information can be found on the Office of Planning and Decision Support website (<http://www.opds.vcu.edu/consumer-info/>) and includes information about:

- Financial aid
- General information about VCU
- Student Right-to-know Act – completion and graduation rates for general student body and student athletes
- Equity in Athletics Disclosure Act – athletically related expenses and student aid
- Drug and alcohol abuse prevention
- Campus security
- Family Educational Rights and Privacy Act – student rights with respect to educational records

Paper copies of all of the information listed on the consumer information website are available upon request.

Immunization requirements

The Code of Virginia and VCU require that all full-time students submit validated immunization records to University Student Health Services. This requirement must be completed prior to registering for a second full-time semester. Failure to meet immunization requirements will result in a hold placed on the student's second-semester registration. The hold can be removed only upon receipt of the student's documented records.

Acceptable records include the VCU Certificate of Immunization (Monroe Park Campus), the VCU Health Sciences Certificate of Immunization (only students from the schools of Allied Health Professions, Dentistry, Medicine, Nursing and Pharmacy) or an immunization record from the student's doctor's office, high school, local health department, previous university/college or the U.S. military.

Students who cannot provide documented evidence of all required immunizations must see their health care provider, health department or USHS to complete all requirements.

Students are encouraged to use the online system to submit immunization records. Students should complete an electronic Certificate of Immunization and upload supporting documentation through the USHS web portal. See the USHS website (<https://health.students.vcu.edu/immunizations/>) for more information.

Transcripts

A transcript is a copy of the student's academic record. All official transcripts are embossed with the university seal.

Official transcripts of student academic records are issued by the Office of Records and Registration only upon the written request of the student. Due to federal privacy laws, a signature is required to release a transcript; therefore the office cannot fulfill email or telephone requests for transcripts. The request should be made at least one week before the transcript is needed. All transcripts are \$5 each. Currently enrolled students can obtain unofficial copies of transcripts via eServices (<https://my.vcu.edu/>).

An official transcript is issued only after the student has paid all university bills.

Transcript requests signed by the student may be submitted in person at the Student Services Center in Harris Hall, 1015 Floyd Ave., in Room 1100; or requests may be submitted by mail to the Office of Records and Registration, Box 842520, Richmond, VA 23284-2520. Students and recent alumni may request an official transcript and pay by credit card by logging in to eServices and following the links to "Student/Student Records."

Degree requirements

The minimum course requirements, rules of admission to degree candidacy (as appropriate to degree level), language requirements, thesis or dissertation requirements for graduate degrees, comprehensive examinations, transfer of credits and the like are specified for each program on the individual program pages on this website. Additionally, many schools, programs and departments maintain websites and publish special brochures, student manuals and program guides that may be requested from the appropriate dean or program director.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct, or for persistent failure to fulfill the purposes for which he or she was matriculated. Any students whose relations are so severed forfeit all rights and claims with respect to the institution.

In addition to dismissal for failure to comply with standards of conduct described in the Rules and Procedures of VCU (<https://www.policy.vcu.edu/sites/default/files/Rules%20and%20Procedures.pdf>)

and the VCU Honor System (<https://conduct.students.vcu.edu/vcu-honor-system/>), a student may be dismissed from the academic unit in which he or she is enrolled for failure to meet academic requirements prescribed by his or her academic unit or failure to exhibit the attitudes and skills deemed necessary to function within the chosen professional practice. Therefore any action by a student considered to be unprofessional conduct according to the code of ethics and the laws and regulations governing the student's chosen profession shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admissions application
2. An act that violates the established standards regarding conduct of one person toward society, as stated in the VCU Code of Conduct (<https://acs.vcu.edu/integrity-and-compliance-office/vcu-code-of-conduct/>)
3. Conviction of a felony involving moral turpitude

Course information

Credit hour

A credit hour is defined as a reasonable approximation of one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately 15 weeks, or the equivalent amount of work over a different amount of time. Credit is based on at least an equivalent amount of work for other academic activities including laboratory work, internships, practica, studio work and other academic work leading to the award of credit hours and is established by individual programs. This definition represents the minimum standard. Student time commitment per credit hour may be higher in individual programs.

Course numbering system

All schools and programs within VCU use the following course numbering system. All course numbers consist of three digits (XXX). The first digit relates to the course level as follows:

0XX – Noncredit courses

Courses with these numbers are offered for students to make up deficiencies in previous training or to improve certain basic skills.

1XX and 2XX – Undergraduate, lower-level

These courses are offered primarily for undergraduate students and may not be used for graduate credit, although graduate students may be required to register for courses at this level to gain a necessary foundation for other course work.

3XX and 4XX – Undergraduate, upper-level

These courses are offered for advanced undergraduates and usually constitute the major portion of specific program work leading to the baccalaureate degree. On occasion, students will be advised by their graduate advisers to enroll in prerequisite 400-level courses. Graduate programs can require that 300- or 400-level courses be taken, but credit in these courses cannot count toward the graduate degree or in the graduate GPA.

5XX – Introductory graduate courses

Graduate students enroll for credit in these courses through the normal graduate advising system. Departments may limit the number of 500-level courses applicable to a graduate degree program. Advanced undergraduates may enroll in these courses for credit with consent of the offering department. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

5XX – Professional graduate courses

These first-year, first-professional (medicine, dentistry and pharmacy) courses are normally open to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

6XX, 7XX and 8XX – Graduate courses

Graduate students enroll for credit in these courses through the normal graduate advising system. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

6XX and 7XX – Professional graduate courses

6XX: These second-year first-professional courses are normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

7XX: These third- and fourth-year first-professional courses are normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

Grading and marking system

VCU course work is measured both in terms of quantity (semester hours of credit) and quality (grades). Grades are assigned according to a letter system. Each letter is assigned a grade-point value. The scale used is known as a four-point grading system since 4.0 is the highest grade point assigned. The number of grade points earned is computed by multiplying the grade-point value for the letter grade times the number of semester credits for the course. For example, a student who receives an A (four grade points) in a three-credit course earns 12 grade points.

Grade letter	Meaning	Grade-point values per semester credit
A		4.0
B		3.0
C		2.0
D		1.0
F		0.0
FI	Incomplete changed to fail	0.0
AP	Advanced Placement	(-)
AU	Audit	(-)
CO	Continued	(-)
CR	Credit	(-)
H	Honors	(-)
HP	High Pass	(-)

I	Incomplete	(-)
IB	International Baccalaureate	(-)
IM	Incomplete Military	(-)
M	Marginal	(-)
NC	Administrative grade with no credit	(-)
NR/NG	Administrative grade assigned when no grade is submitted by the instructor	(-)
P	Pass	(-)
PR	Progress	(-)
TR	Transfer Credit	(-)
W	Withdrawn	(-)
WM	Withdrawn Military	(-)
DN	D grade excluded from GPA	(-)
FN	F grade excluded from GPA	(-)

Grades designated by a blank, (-), in the grade-point column are not considered in the computation of grade points earned or GPA.

Further explanation of grades/marks above Grade of pass (P)

This grade is awarded for certain courses to denote satisfactory completion of requirements. The grade of P is not included in the calculation of the GPA.

Grade of progress (PR)

The mark of PR may be assigned only in courses approved for such grading. Unlike the mark of I, PR will not automatically be changed to a failing grade at the end of the succeeding semester. The grade of PR is not included in the calculation of the GPA.

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in thesis and dissertation courses

All thesis and dissertation credits are to be graded each semester as satisfactory (S), unsatisfactory (U) or fail (F). There is no limit to the number of these credits a student may take while pursuing completion of the degree. Receipt of the grade of U is formal notification to the student of unsatisfactory progress. A grade of U is a permanent grade and associated credits do not count toward a degree. Future satisfactory performance following a grade of U is reflected in the assignment of the grade of S in subsequent semesters. A grade of S or U is not included in the calculation of the GPA. A student who receives a final grade of F in the thesis or dissertation will be dismissed from the graduate program. A student who receives three grades of U in a thesis/dissertation course will be dismissed from the program.

Mark of audit (AU)

Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in a course but do not receive academic credit upon completion of the course. Students who register on an audit basis are subject to attendance regulations of that class and, unless otherwise specified, at the discretion of the instructor, are subject to the same course requirements as other students in the class.

Students who register on an audit basis may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar (<http://academiccalendars.vcu.edu/>).

Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of the student's semester load in terms of classification as a full-time student. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships or university graduate scholarships.

Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration.

Courses assigned the AU mark will not be computed into the GPA and do not result in earned credit hours.

Mark of continued (CO)

The mark of CO may be assigned as an interim mark for those courses that run over more than one grade reporting period. The CO mark indicates the course is not expected to be completed in a single semester and that the student must re-register for the course in the following semester. Upon departmental notification, CO marks for courses not re-registered for in the following semester are converted to F grades. Upon completion of the course, a final grade is assigned for that semester and the previous CO mark(s) remain. This mark may be assigned only in courses approved for such grading. Courses assigned the CO mark will not be computed into the GPA and do not result in earned credit hours.

Mark of credit (CR)

Courses assigned the CR mark will not be computed into the GPA.

Mark of honors (H)

Courses assigned the H mark will not be computed into the GPA.

Mark of high pass (HP)

Courses assigned the HP grade will not be computed into the GPA.

Mark of incomplete (I)

When circumstances beyond a student's control prevent the student from meeting course requirements by the end of the semester, the student may request the instructor to assign the mark of I for that semester. The awarding of a mark of I requires an agreement between instructor and student as to when and how the course will be completed. Once the agreement is reached, the instructor fills out an incomplete grade assignment form bearing the student's signature; the form is submitted instead of a final course grade. A grade cannot be changed to I after the deadline for grade submissions.

The maximum time limit for submission of all course work necessary for removal of an incomplete is the end of the last day of classes of the next semester following the semester in which the incomplete was incurred (i.e., an incomplete awarded in the fall semester must be converted by the last day of classes in the spring semester, and an incomplete awarded in the spring or summer session must be converted by the last day of classes in the fall semester). At that time, an un-removed grade of incomplete is changed automatically to a failing grade. Individual departments and schools may have more stringent time limits. An extension of the time limit is possible, but must be approved, prior to the expiration date stated above, by the instructor and the dean of the school through which the course is offered. For undergraduate and professional students, written approval indicating the new time limit must be filed with the dean of the school through which the course is offered. For graduate

students, written approval indicating the new time limit must be filed with the dean of the Graduate School.

Courses assigned the I mark will not be computed into the GPA.

Mark of incomplete military (IM)

See the "Military services crisis tuition relief, refund and reinstatement guidelines" in the Tuition, fees and expenses (<http://bulletin.vcu.edu/undergraduate/undergraduate-study/tuition-fees-expenses/>) section of this bulletin. Courses assigned the IM mark will not be computed into the GPA.

Mark of marginal (M)

Courses assigned the M mark will not be computed into the GPA.

Mark of withdrawn (W)

The mark of W indicates the student has officially withdrawn from the course or has been withdrawn for a violation of the course attendance policy or nonattendance. A student who has officially withdrawn from a course or who has been administratively withdrawn for nonattendance may not attend subsequent meetings of the course.

Students should refer to any school- or course-specific policies related to withdrawal dates. The last day to withdraw for the fall and spring semesters is the end of the 10th week of classes. Summer session students should check the Summer Studies Calendar (<http://www.summer.vcu.edu/calendar/>).

Courses assigned the W will not be computed into the GPA. For further information see the Withdrawal from the university (p. 24) entry in this section of this bulletin.

Mark of withdrawn military (WM)

Courses assigned the WM mark will not be computed into the GPA. See the "Military services crisis tuition relief, refund and reinstatement guidelines" in the Tuition, fees and expenses (<http://bulletin.vcu.edu/undergraduate/undergraduate-study/tuition-fees-expenses/>) section of this bulletin.

Grade-point average

The GPA is computed by dividing the number of grade points earned at VCU by the number of credit hours attempted at VCU. The grades of accepted transfer courses are not included in the computation of the VCU GPA. However, transfer grades are included in the computation of laudatory graduation honors for undergraduate students.

VCU has three program levels: undergraduate, graduate and professional. Each program level has a cumulative GPA. For students who enroll in multiple programs at the same degree level, the GPA for the multiple programs will be merged. For example, a student who graduates from an undergraduate program at VCU and pursues a second undergraduate program at VCU will have one continuous GPA.

Reading the transcript

The E notation, when following a letter grade, means that the course has been repeated and the grade and earned hours are excluded from the GPA.

The A notation, when following a letter grade, means that course is duplicate credit and the grade and hours are included in the GPA, but the hours have been removed from earned hours total.

The I notation, when following a letter grade, means that the grade and earned hours are included in the GPA.

Letter grades preceded by an X are not computed in the GPA.

Grades of D or F may be assigned by the Honor Council and the grade is computed in the GPA. However, a grade of W may be assigned by the Honor Council and is not computed in the GPA. In both cases a notation will be made on the academic transcript detailing the Honor Council assignment.

Change of grade

A final grade may be corrected by the faculty member with proper submission of the change of grade form (for undergraduates) or special action form (for graduate students) to the chair of the department in which the course was taught. The chair will forward the form to the school's dean, who will send it to the Office of Records and Registration or Graduate School, as appropriate. For grades awarded in the fall semester, the change of grade must be submitted by the department chair no later than 30 calendar days after the beginning of the following spring semester. For grades awarded in the spring semester or summer, the change must be submitted no later than 30 days after the beginning of the following fall semester. However, a change of grade that affects the student's academic eligibility to enroll must be made during the add/drop period in the semester or summer session in which the student plans to continue attendance.

Evaluation and final grade reports

University policy requires faculty to provide students with feedback about their academic performance before the semester or class withdrawal date. Although such feedback does not always take the form of a letter grade, grades do provide a clear indication of class progress. Students are encouraged to discuss their progress in courses with their instructors, especially before the withdrawal deadline.

Students who do not attend class are responsible for dropping or withdrawing from class during the established dates. Exceptions to this policy are made only in rare instances. Requests for an exception should begin with a discussion with the academic adviser and must be filed with the appropriate body within three years of the semester of enrollment..

Grades and unofficial academic histories are available online through **eServices**; official transcripts may be obtained for a fee from the **Office of Records and Registration**.

Additional information about appealing grades can be found on the Grade review procedures (p. 18) page.

Posthumous degrees

Recipients of posthumous degrees should meet the following conditions:

- The student was in good academic standing at the time of his or her death.
- The degree must be awarded within three years of the last day of enrollment.
- There were no disciplinary actions pending against the student.
- The death was not a result of illegal behavior on the part of the student.
- The student earned at least 30 credits at VCU and was within the last 30 credits of graduating (if an undergraduate student).

Graduate and professional programs will determine equivalent progress of students toward their graduate or professional degrees.

A notation that the degree was awarded posthumously will be made in the commencement program and on the transcript, but not on the diploma.

University right to revocation

The university reserves the right to revoke any degree, certificate or other university recognition for cause. In addition, any time following the award of a degree, certificate or other university recognition, the university reserves the right to take appropriate action, including, but not limited to, the revocation of such degree, certificate or other university recognition, on the basis of academic misconduct discovered subsequent to, but which occurred prior to, the awarding of the degree, certificate or other university recognition. More specifically, when an action that constitutes a violation of the VCU Honor System leads to a finding that invalidates a major piece of work required for a degree, certificate or other university recognition so that the validity of the degree, certificate or other university recognition is jeopardized, the student or former student will be subject to a sanction that may include (a) rejection of a thesis, dissertation or other work, (b) revocation of a certification or other university recognition or (c) revocation of a degree.

Leave of absence

Note: This leave of absence regulation applies only to graduate and first-professional students; it does not apply to undergraduate students.

Graduate and first-professional students may request a leave of absence from a program through written appeal to their program director. The program director will forward the request to the appropriate school dean/dean designee who, following departmental governance procedures, will forward their recommendations and any supporting documentation for final approval as necessary.

Students who are out of compliance with continuous enrollment policies (see Graduate registration policies (p. 29)) and who have not been granted approved leaves of absence by the appropriate dean must reapply for admission to VCU and to their degree programs.

Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period. Students should note that while leaves of absence temporarily suspend continuous enrollment requirements, they do not extend time limits for completion of degrees. (See policy on Exceptions (p. 25).)

Leaves of absence must be requested and approved before or during the first term of leave. Requests for retroactive leaves of absence will not be approved.

The leave of absence prevents registration for the approved leave of absence period. If the student wishes to return to academic study before the end of the approved leave of absence period, they should notify the appropriate school or college to request that the leave of absence be shortened and the registration hold removed.

Because curricular and course content changes may occur and a student's progress toward a degree may be adversely affected because of an extended absence, specific limits may be imposed by individual schools and colleges with respect to the length of time allowed for absences. Extended leaves of absence may also impact financial aid; students should consult the Office of Financial Aid to understand the

potential impact of a leave of absence. If there is a delay in return beyond the allotted time period without written consent of the dean of the school or college, the student may be required to reapply for admission.

Students on leave are eligible for reinstatement of their enrollment through the end of their approved leave period, and many students who take a leave will have no requirements attached to their reinstatement. The dean of the student's school or college may establish specific requirements for reinstatement if the circumstances of the student's departure warrant it. The goal of such conditions is to prepare the student for a successful return to the university; for example, a student may be asked to complete preapproved course work at an outside institution in order to demonstrate readiness to return to rigorous academic work or to participate in a reinstatement consultation with Student Accessibility and Educational Opportunity, Division for Academic Success, University Student Health Services, or University Counseling Services, to facilitate a successful return. If the leave is health-related, any conditions or requirements for reinstatement will be based on an individualized assessment of each student, including consideration of current medical knowledge and/or the best available objective evidence of the student's ability to function academically at the university with or without accommodations. Careful consideration will be given to the opinions and recommendations of a qualified health care professional who treated the student, if available.

Withdrawal from the university

Students may withdraw from any or all courses before the relevant deadlines published in the **VCU Academic Calendars**. Failure to complete this process may result in the assignment of failing grades in any course in which the student is enrolled and does not complete all course requirements.

A mark of W (withdrawn) will be recorded on the permanent student academic record for all courses from which students withdraw. Charges are assessed and adjusted according to the university refund policy, which is published in the tuition and fees section of each level-specific bulletin. Students should consult with the Office of Financial Aid to understand how a withdrawal may impact future financial aid in relation to satisfactory progress.

Whenever possible, students should consult their academic or program adviser prior to any withdrawals. Certain academic programs have specific continuance standards; students in those programs should consult their program adviser to understand how withdrawal may affect continuance in the program.

Additional information about cancellation of registration may be found in the level-specific registration policies sections of this Bulletin. Leave of absence (p. 23) (for graduate and professional students) and medical leave of absence (<http://bulletin.vcu.edu/academic-regs/ugrad/medical-leave-absence/>) (for undergraduates) are also addressed elsewhere in this Bulletin.

Effective bulletin

The bulletin for the academic year a student enters or re-enters a degree program identifies the curriculum degree requirements for that student. Students in continuous enrollment may fulfill the curriculum degree requirements of the bulletin for the year they entered VCU or choose to be subject to the curriculum degree requirements articulated in a subsequent bulletin. Subsequent bulletins can be chosen throughout

a student's academic career. In either case, students must fulfill all curriculum degree requirements listed in the bulletin they choose.

A student's effective bulletin will remain in effect until the degree is awarded. Change in academic program (major, concentration, minor) will not result in a change in effective bulletin unless the student chooses to be subject to the curriculum degree requirements articulated in a subsequent bulletin.

Students readmitted to the university will fall under the bulletin in effect at the time of readmission. At the discretion of the school dean, department chair or program head, degree requirements may be waived and/or previously taken courses may be substituted for requirements in effect at the time of readmission.

Note: This policy may not apply to first-professional students.

Degree Works

Degree Works is a web-based degree audit tool that helps students and advisers monitor progress toward degree completion. It produces a report that outlines the components and requirements for a student's degree program and tracks the student's progress in completing those requirements.

The report is not intended to replace regular contact with academic/faculty advisers, but provides accurate information to assist students and advisers in making appropriate academic choices based on information in Banner, the university's student information system.

All degree requirements are based on the official curriculum as approved by the university-level curriculum committees and as published in the effective VCU Bulletin of record. While Degree Works is a self-service tool for students and advisers, it is the official means used to confirm that students have completed requirements for graduation.

Note: This policy may not apply to first-professional students.

Graduate-only regulations

Regulations presented in this section apply in particular to graduate students. Use the navigation to the left to see additional regulations that apply to all students or specifically to undergraduate students.

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the Graduate Bulletin as well as the academic regulations in individual school and department publications and on program websites; however, in all cases, the official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin website and on the Graduate School website, take precedence over individual program policies and guidelines.

The archived (<http://bulletin.vcu.edu/archive/>) copies of current and past bulletins (catalogs) reflect all policies and procedures in effect at the beginning of the stated academic year.

Students who maintain continuous enrollment are subject to the curricular requirements of the Graduate Bulletin (catalog) in effect at the

time of admission, and to subsequent policy changes approved by the University Graduate Council for immediate implementation.

Students who do not maintain continuous enrollment must reapply for admission and will be subject to the requirements of the Graduate Bulletin (catalog) in effect at the time of readmission, and to subsequent policy changes approved by the University Graduate Council for immediate implementation. (See policy on exceptions (p. 25).)

Graduate students should contact the Graduate School at any time regarding questions relating to graduate study at VCU.

Revised 5/11/2010
University Graduate Council

Satisfactory academic progress

To remain in good academic standing students must continue to make satisfactory progress toward their degrees. Unsatisfactory grades and/or a GPA below 3.0 may warrant review for possible dismissal from their programs. Specifically, students may not present courses receiving less than a C for fulfilling degree requirements.

Further grounds for lack of satisfactory academic standing may include:

- Failure to secure a major adviser, failure of comprehensive exams, lack of progress on/unsuccessful defense of thesis/dissertation
- Discontinuous enrollment
- Exceeding time limit
- Honor policy violation
- Academic misconduct
- Professional misconduct

At the end of each semester, graduate faculty advisers and program directors will review the academic progress of all graduate students in their programs. The academic standing of any graduate students who receive multiple grades of C or grades of D or F will be reviewed for possible dismissal from their programs. Although the grade of U is not included in the calculation of the graduate GPA, graduate students who receive one or more grades of U will be considered for possible dismissal.

Students who have completed all minimum degree requirements but who are out of compliance with minimum graduation requirements (i.e., graduate grade-point average, 50 percent 500-/600-level course work, etc.), may be allowed, with the permission of their graduate faculty advisers, program directors, academic deans/dean designees and the Graduate School to take additional course work to meet minimum University Graduate Council graduation requirements. Requests for such actions must be processed via the special action form according to the instructions articulated in the Exceptions policy (p. 25) in this section. Students will have a maximum of one calendar year to complete such additional requirements. At the end of that time, if students are still out of compliance, they must be dismissed from the program for lack of academic progress.

Revised 5/10/2011; 5/10/2016; 10/5/2016
University Graduate Council

Exceptions to graduate policies

Exceptions to graduate policies must be approved by the dean of the Graduate School. Requests for exceptions to Graduate School policies are to be made in writing by students to their graduate advisers/program

directors. The graduate advisers/program directors will forward their recommendations, along with copies of student requests and supporting documentation, to the school dean/dean's designee, who will review and approve or disapprove recommendations. Recommendations approved by the school dean/dean's designee will then be forwarded to the dean of the Graduate School, who represents the University Graduate Council.

Degree definitions

Dual degree programs

Dual degree programs allow students to concurrently pursue study in two graduate or professional programs and receive two separate program completion credentials (diplomas). Dual degree programs may combine two degrees offered by separate VCU units or combine a VCU degree program with a degree offered at another regionally accredited domestic or international institution. Students must meet all curricular requirements of both degrees and meet VCU's residency requirement for the relevant degree program.

Approved dual degree programs that combine two VCU graduate or professional programs may share up to 20 percent of credits that apply to the requirements of both degrees. Individual programs may set more restrictive limits on the amount of credits that can be shared between degrees. To ensure integration of curriculum across the two degree programs, students must be admitted and enrolled in both programs for at least one semester prior to degree conferral. Some dual degree programs require concurrent admission and acceptance to both programs prior to beginning study; see individual program pages in this Bulletin for information about the admission process and timing of the admission applications.

Joint degree programs

Joint degree programs consist of a single degree and curriculum that is delivered through a partnership between two or more VCU academic units or between VCU and one or more regionally accredited domestic or international institutions. For joint programs involving multiple institutions, students receive a single diploma bearing the names, seals and signatures of each of the participating institutions.

Accelerated degree programs

Accelerated degree programs allow completion of a program of study in fewer than the usual number of years, most often by attending summer sessions and carrying extra courses during regular academic terms following a prescribed plan of study.

Concurrent degrees

There are two types of concurrent degrees and both allow students to pursue candidacy and complete course work for two graduate or professional degree programs at the same time. The first is an approved dual degree program (defined above), which allows a limited number of course credits to be applied to both degrees. Students may also seek admission to and fulfill the requirements of two degrees that are not part of an approved dual degree program, in which case no credits are shared between degrees. Students interested in combining programs that are not part of an approved dual degree program must receive approval from both graduate programs and the Graduate School.

Sequential degrees

Alternate to dual degrees, which are concurrent, students may pursue candidacy in two graduate or professional degree programs in sequence,

where all requirements for one degree are completed before beginning course work for the second degree. Sequential degrees do not share credits. Students apply for admission to the second program prior to completion of the first degree and begin course work in the second degree after conferral of the first degree.

Degree candidacy

A graduate student admitted to a program or track requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Degree candidacy requirements vary from program to program and may include but are not limited to such milestones as successful completion of all or a portion of all required didactic course work, the passing of written and/or oral comprehensive examinations, the identification of the thesis/dissertation adviser and/or committee, and/or the successful defense of the thesis/dissertation prospectus.

Upon satisfactory completion of degree candidacy requirements, the graduate student must submit a notice of admission to master's or doctoral degree candidacy form (available on the Graduate School website (<http://www.graduate.vcu.edu/student/candidacy.html>)) to his/her program director. The student's signature acknowledges that he/she has read and understands the policies regarding research involving human or animal subjects (Information on human and animal subjects can be found on the website of the Office of Research and Innovation (<http://www.research.vcu.edu/>)) as well as continuous enrollment requirements (p. 29). Both the program director and the school's dean or dean's designee must sign the form to confirm the student's eligibility for admission to degree candidacy and forward it to the graduate dean for final approval and recording of admission to degree candidacy. The graduate dean will formally notify the student of admission to degree candidacy.

The degree candidacy form must be submitted **before** the student formally begins the final thesis/dissertation/research project **but no later** than the semester preceding the semester in which the student graduates. Failure to submit the degree candidacy form in a timely manner may delay graduation.

A graduate student approved for degree candidacy must register for at least one graduate credit hour at VCU each fall and spring semester until the degree is awarded. Students must be enrolled during their graduation semesters. Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period. **Students should note that while a leave of absence temporarily suspends the continuous enrollment requirement, it does not extend the time limit for completion of the degree.**

Revised 5/8/2012
University Graduate Council

Theses and dissertations

Comprehensive examinations

Comprehensive examination requirements and administration of the thesis/dissertation process vary by program and academic school. Graduate students should refer to the guidelines established by their

programs regarding specific program requirements. In addition, graduate students should refer to the thesis and dissertation manual found on the Graduate School website (<http://www.graduate.vcu.edu/student/thesis.html>) for guidelines regarding the preparation and submission of theses and dissertations and for scheduling the final defense.

Master's degree candidates may have a thesis requirement – or its equivalent in the form of a research project, performance, exhibit or other production. In some programs, master's degree candidates may elect a non-thesis option. In such cases, the program may allow a candidate to change from the thesis to the non-thesis option, or vice versa, once. Such action requires written approval of the department head and the faculty adviser and/or the student's advisory committee.

All doctoral candidates are required to prepare dissertations and the associated additional submission requirements as articulated in the thesis and dissertation manual.

At the time of defense, a thesis or dissertation must be approved by members of a student's advisory committee with no more than one negative vote. A committee member's approval is given by signing the ETD approval form (<http://graduate.vcu.edu/student/thesis.html>). A disapproving committee member must also sign the approval form as a dissenting member and must provide a written dissenting opinion to be sent to the Graduate School.

Revised 5/8/2012
University Graduate Council

Electronic theses/dissertations – mandatory

Electronic theses and dissertations are digital representations of the traditional work completed by graduate students in partial fulfillment of requirements for graduate degrees. An ETD can be a simple textual document converted to a standard electronic format such as Adobe PDF or a complex combination of images and formats.

The VCU Graduate School thesis and dissertation website, as developed by the University Graduate Council and VCU Libraries, serves as a guide for the preparation of electronic graduate theses and dissertations for graduate students in all programs within the university. Information and a video tutorial are available on the VCU Libraries Research Guides website (<http://guides.library.vcu.edu/etd/>).

Thesis/dissertation submission deadlines

All requirements for theses/dissertations must be completed by the deadline published in the Academic Calendar (<http://academiccalendars.vcu.edu/>) of the semester in which the candidate plans to graduate, including:

- Final defense of thesis/dissertation
- ETD approval form with all approval signatures, including the graduate dean's and, if applicable, documentation of IRB or IACUC approval number
- Submission of the ETD to the VCU Scholar's Compass according to instructions in the VCU Graduate School thesis and dissertation manual (<http://graduate.vcu.edu/student/thesis.html>) (Candidate should confirm with adviser/program director all internal schedules for submission of copy, defense and approval.)
- Survey of Earned Doctorates (<https://sed.norc.org/showRegister.do>) (All doctoral students must complete the SED.) Refer to the Graduate

School thesis and dissertation manual (<http://graduate.vcu.edu/student/thesis.html>) for further information.

Revised 5/11/2010; 5/10/2011; 12/12/2017
University Graduate Council

Grades of satisfactory (S), unsatisfactory (U) or fail (F) in thesis and dissertation courses

All thesis and dissertation credits are to be graded each semester as satisfactory (S), unsatisfactory (U) or fail (F). There is no limit to the number of these credits a student may take while pursuing completion of the degree. Receipt of the grade of U is formal notification to the student of unsatisfactory progress. A grade of U is a permanent grade and associated credits do not count toward a degree. Future satisfactory performance following a grade of U is reflected in the assignment of the grade of S in subsequent semesters. A grade of S or U is not included in the calculation of the GPA. A student who receives a final grade of F in the thesis or dissertation will be dismissed from the graduate program. A student who receives three Us in a thesis/dissertation course will be dismissed from the program.

Revised 5/10/2016
University Graduate Council

Graduate advisory committees

Graduate advisory committees shall be appointed for each master's degree candidate for whom there is a requirement to produce a thesis or its equivalent in the form of a research project, performance, exhibit or other production. The committee will coordinate and supervise the preparation of the thesis or its equivalent. The committee shall have a minimum of three faculty members, one of whom should be from a discipline other than that of the candidate. The chair of the committee will be designated as the candidate's faculty adviser. Departments/program directors will appoint advisers for master's degree candidates for whom a thesis or its equivalent is not required. Every member of the committee must hold graduate faculty or affiliate graduate faculty appointment. The chair and at least one other committee member must hold VCU graduate faculty status. It is expected that all members of the committee will be present at any thesis proposal and thesis defense. In the event that a single member of the committee is unable to attend, the committee may meet with the written approval of the graduate program director. If more than one member of the committee is unable to attend, the defense must be rescheduled. The chair must be present for the defense of a thesis proposal and the final thesis.

A graduate dissertation committee shall be appointed for each doctoral candidate. The committee will have a minimum of four faculty members, including a chair, who will serve as the candidate's faculty adviser. At least two members must be from within the candidate's discipline and at least one from another discipline. Every member of the committee must hold graduate faculty or affiliate graduate faculty appointment. The chair and at least two other committee members must hold VCU graduate faculty status. It is expected that all members of the committee will be present at the dissertation proposal and dissertation defense. In the event that a single member of the committee is unable to attend, the committee may meet with the written approval of the graduate program director. If more than one member of the committee is unable to attend, the defense must be rescheduled. The chair must be present for the defense of a dissertation proposal and the dissertation defense.

Upon satisfactory completion of all program requirements for admission to candidacy, doctoral matriculants will take written and/or oral comprehensive examinations administered by their major departments or schools. Successful completion of the examinations shall entitle students to advance to doctoral degree candidacy status. Candidates are then allowed to proceed with the research and preparation of their dissertations and any other doctoral degree requirements designated by their departments.

In the event of failure, students may be permitted to retake comprehensive examinations one time only. The re-examination requires the approval of the appropriate graduate program committee.

Revised 5/14/2013
University Graduate Council

Graduate faculty roles and responsibilities

VCU Graduate School Bylaws articulate eligibility criteria for membership on the graduate faculty and provisions for affiliate graduate faculty appointments. All members of a graduate advisory or thesis or dissertation committee must be a member of the graduate faculty or hold an appointment as an affiliate graduate faculty member. All graduate faculty may chair thesis committees; however, only graduate faculty holding the Ph.D. or equivalent degree may chair a dissertation committee. An affiliate graduate faculty member may advise and serve, but not chair, thesis or dissertation committees.

Appointment to affiliate graduate faculty status must clearly articulate the roles and responsibilities and the duration of the appointment. Appointment for purposes of serving on a graduate advisory or thesis and dissertation committee authorizes the affiliate graduate faculty member to fully participate in all activities defined for the group by the individual program guidelines, except for chairing the committee. If the administration and evaluation of comprehensive examinations is explicitly articulated as a responsibility of the graduate advisory or thesis or dissertation committee, then any affiliate graduate faculty appointed to the committee may administer and evaluate the comprehensive examination. If comprehensive examinations are administered and evaluated by a different committee, then any affiliate graduate faculty member appointed to the committee may administer and evaluate the comprehensive examination only if such a responsibility is articulated clearly in the recommendation for affiliate graduate faculty membership by the academic school dean and approved by the graduate dean.

Revised 5/10/2011
University Graduate Council

Transfer credit for graduate students

A maximum of 50 percent of the didactic hours required for a graduate degree or any graduate certificate program may be transferred from another institution and, if not applied previously toward another degree, may be applied toward a degree. Prerequisite course work that does not count toward the VCU degree may not be transferred.

Grades for course work taken at VCU, either as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded, are included in the calculation of the VCU graduate grade-point average and all other graduate statistics. Grades for course work taken at another institution are not recorded on the VCU transcript (only the names of courses, source institutions and credit hours) and are not

included in the calculation of the VCU graduate grade-point average and other graduate statistics.

Recommendations regarding transfer credit are initiated at the program and academic school levels and reviewed and approved by the Graduate School. All matriculated students must obtain final written approval from the Graduate School for course work approved for transfer **before** registering for course work at another institution. Individual schools/programs may have more stringent requirements. Requests for transfer of course work must include an official copy of the transcript from the college or university where the course work was taken and a VCU Graduate School transfer equivalency form.

Graduate credit hours earned toward a VCU certificate may be applied one time to degree requirements for master's or Ph.D. programs.

Graduate credit hours earned toward a VCU certificate may be applied toward only one certificate. The determination of the acceptability of specific courses to be used for both the certificate and the graduate degree will be the responsibility of that master's or Ph.D. program or school.

All transfer work must be at the A or B grade level from a regionally accredited college or university. "Credit" or "pass" grades can be accepted only if approved by petitioning the graduate advisory committee or equivalent of the student's school or college. Students must be in good standing both at VCU and at the institutions from which the credits were earned. Some programs will not accept credits earned as a nondegree-seeking graduate student for transfer. VCU will not accept credits that do not apply to a graduate degree at the offering institution for transfer, nor will it accept credits from unaccredited institutions for transfer. These criteria apply to all domestic and international institutions.

Course work taken under the auspices of any study abroad program, including the study abroad program at VCU, is classified as course work taken at an international institution for purposes of determining if the course work may count toward a VCU graduate degree. Registration for such course work does not guarantee that the course work will count toward a VCU graduate degree. All study abroad graduate course work is subject to the same review and approval process if the course work is to count toward a VCU graduate degree.

Revised 5/11/2010; 5/10/2011 5/10/2016
University Graduate Council

Credit for military service, career or life experience

The Graduate School does not grant graduate-level credit for any type of military service or career or life experience.

The Graduate School may grant credit for formal military service school graduate-level courses that have received positive recommendation by the Commission on Accreditation of Service Experiences of the American Council on Education as stated in the ACE's "Guide to the Evaluation of Educational Experiences in the Armed Services." (<http://www.acenet.edu/news-room/Pages/Military-Guide-Online.aspx>) Recommendations regarding the transfer of military course work are initiated at the program and academic school levels and reviewed and approved by the Graduate School and must meet all other criteria for transfer credit as articulated in the transfer credit policy.

Revised 5/10/2011; 5/14/2013
University Graduate Council

Laudatory honors and remedial work

Graduate students are not designated as special honors graduates (i.e., cum laude, magna cum laude, summa cum laude) on transcripts or diplomas upon completion of their programs.

No degree credit for remedial work shall be awarded to graduate students. Graduate students advised to take any level course for remedial work should be notified in writing that the course credit shall not apply to the degrees they are pursuing. Other bodies may rule later, should students wish to apply the credit to some other degree.

Change of graduate program

Students who wish to change to a different graduate degree must submit a new application to the new program with all materials required of applicants to that program. The dean of the Graduate School will work with the administrators of the two programs to facilitate the admission process for eligible students.

Revised 5/10/2016
University Graduate Council

Dismissal from a graduate program and appeal process

In addition to those standards of conduct described in VCU Rules and Procedures and the VCU Honor System, graduate students enrolled at the university may be dismissed from the academic programs in which they are enrolled for failure to meet prescribed academic program requirements. Students appealing dismissal from their graduate degree programs should first pursue appeals at the program/department and/or the school level. After receiving the program/department and/or school decision, students have the option of filing an appeal with the graduate dean in the process outlined below.

Dismissal process

- Dismissal is initiated at the program/department level by advisers/graduate program directors/department chairs via a special action form indicating the reason with relevant documentation attached. Reasons for dismissal may include but are not limited to:
 - Academic (D or F in class, too many grades of C or U, as determined by the student's academic program in conjunction with Graduate Council policy, GPA below 3.0, failure to secure a major adviser, failure of comprehensive exams, lack of progress on/unsuccessful defense of thesis/dissertation)
 - Discontinuous enrollment
 - Exceeding time limit
 - Honor policy violation
 - Academic misconduct
 - Professional misconduct
- Request for dismissal is forwarded to the school dean/dean's designee, who reviews the action, signs the form and forwards it to the graduate dean within 10 business days.

- The graduate dean/dean's designee reviews the action, signs the form, notifies the Office of Records and Registration and sends a dismissal letter to the student via official VCU email. This letter must include a statement of the student's right to appeal and inform the student that appeals must be initiated at the program/department and/or school level within 10 business days after receipt of the letter.

Appeal process

Preamble

Virginia Commonwealth University, through its Graduate School, defines minimum standards for admission and sets general rules governing eligibility for continuation. However, the individual graduate programs, through their respective graduate faculty and graduate program procedures, exercise principal responsibility for evaluating graduate student work. It is assumed that most disputes over evidence of unsatisfactory progress will be reconciled through discussions between faculty and students at the school/department/program level.

It is important that each graduate student be fully informed, not only of the VCU Graduate School policies and procedures, but also of any additional departmental program requirements beyond those established by the Graduate School. A copy of each departmental graduate policy statement should be readily available to all graduate students. The department should inform graduate students of degree requirements and associated school/program/department procedures at the time of matriculation.

A student may appeal dismissal from a graduate program under the following procedures.

- The student has the burden of proof in all appeals.
- The student must initiate the appeal process at the program level within 10 business days after receipt of the graduate dean's dismissal letter and according to the program/department and/or schools/colleges appeal processes. All program/department and/or school/college appeal processes should be exhausted prior to initiating an appeal to the graduate dean.
- If all program/department and/or school/college appeal processes fail to resolve the issue, the student must provide the graduate dean with written notification of appeal, to include justification and all supporting documentation (correspondence and other paperwork leading up to the dismissal), within 10 business days of the school/college decision. All documentation must be provided at the time of written notification of appeal.
- The graduate dean provides the graduate program director and school/college dean with copies of the student's appeal and asks the graduate program director/dean/department chair to provide the Graduate School with their response, including copies of correspondence and any other supporting documentation that led to the dismissal. The graduate program director and school dean must respond to the graduate dean's request for information within 10 business days.
- The graduate dean will review the materials and may refer the matter to the admissions and academic standards committee of the University Graduate Council. The committee is composed of faculty members from various divisions of the university plus one ex-officio voting member from the Graduate School. AAS members who have direct knowledge of the student's case will be recused. A

minimum of four members must be present to constitute a quorum. The committee will convene to review the documentation and consider the positions of the parties. At its meeting, the committee will hear presentations from and ask questions of the student and representatives of the school/department/program. The student and the school/department /program representative may each bring up to two persons who may provide support and advice but who may not speak for the parties.

- After considering the materials submitted and the presentations by the parties, the committee will convene in closed session and decide, by majority vote, whether to recommend that the graduate dean uphold or reverse the dismissal. In the event of a less than unanimous decision, both opinions will be communicated to the graduate dean. The graduate dean renders the final decision and notifies the student in writing within 10 business days by certified mail to the student's official address on file with the university.
- The student may be allowed to register for courses during the pendency of the appeal, understanding that he/she will be dropped retroactively if the dismissal is upheld.

Revised 5/11/2010; 5/8/2012; 5/13/2014; 5/10/2016
University Graduate Council

Time limit for completion

The time limit for a graduate degree will not extend beyond a period of six years for graduate certificates and master's degrees and eight years for doctoral degrees.

Course work completed before matriculation and applied toward the degree, including course work at VCU and that transferred from other institutions, will be evaluated by the program/department to determine whether it can be used to fulfill degree requirements. For course work that was taken more than eight years prior to the completion of the VCU degree, the program/department will evaluate the course work for acceptability and report those courses deemed acceptable to the dean of the Graduate School. (See policy on Exceptions (p. 25).)

Revised 5/11/2010; 5/10/2011
University Graduate Council

Repeated courses

If a graduate student repeats a course, both the original grade and the repeat grade shall be included in the calculation of the graduate GPA.

Revised 5/14/2013
University Graduate Council

Graduate registration policies

Enrollment

Any person engaged in graduate study at VCU must enroll each semester in which he/she is engaged in any form of study at VCU that involves use of university facilities, laboratories/studios and/or libraries, or who is supervised by or consults with a faculty member concerning graduate work on a project, work of art, thesis or dissertation.

Continuous enrollment for degree-seeking graduate students

Continuous enrollment – Pre-candidate

Once admitted to a degree program, a graduate student is expected to comply with minimum enrollment of one course per 12-month period from the beginning of his/her program.

Continuous enrollment – Candidate

A graduate student who has completed course requirements for a degree must register for at least one credit at VCU each fall and spring semester until the degree is awarded. Students must be enrolled during their graduation semester.

Revised 5/8/2012
University Graduate Council

Student load

Student load is the total number of credits for which students are enrolled in any semester. Students may be either full-time or part-time, dependent upon program rules. Students who are fully funded as VCU graduate assistants with tuition remission are classified as “full-time” during any semester in which they enroll for nine or more credits (three during the summer if funded on a 12-month stipend). Departmental requirements vary; therefore, funded students should verify expected course loads with their graduate program directors.

The maximum number of credits for which students may enroll in any semester without special permission is 15. More than 15 credits is an overload. More than 15 credits may result in increased tuition. Permission to enroll for more than 15 credits may be granted upon the written recommendation of the adviser, through departmental governance procedures, to the dean of the Graduate School.

Each summer course is designed to provide the equivalent of one semester’s work. With careful scheduling, it is possible for students to earn as many as 15 credits during the summer if course work extends over the full summer semester calendar. Permission to enroll for more than 15 credits in the summer semester may be granted upon the written recommendation of the adviser through departmental governing procedures to the dean of the Graduate School.

Summer success is predicted on the academic standard of one credit per week. Six credits in five weeks or nine credits in eight weeks is considered a normal load, but VCU does not permit six credits in four weeks or nine credits in six weeks. Suggested summer scheduling combinations are in the online Schedule of Classes (<https://pubapps.vcu.edu/scheduleofclasses/>).

Graduate courses are not offered during the winter intersession.

Revised 5/11/2010; 5/10/2011
University Graduate Council

Change in registration

Once students have registered for classes, changes in registration must be made during the add/drop period. Whenever students make any changes in registration, they should keep copies of their new schedules as verification of the changes. Changes in registration may affect financial aid. Students are advised to consult with a financial aid counselor before making any changes to their enrollment status. See

the Financing graduate school (p. 38) section of the Graduate Bulletin for detailed information.

Cancellation of registration

To cancel registration, students must notify, in writing, the Office of Records and Registration before the end of the add/drop period, or drop all classes using the Web registration system. Refunds are issued in accordance with procedures described in the Financing graduate school (p. 38) section of the Graduate Bulletin.

Auditing graduate classes

Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in courses, but do not receive academic credit upon completion of the courses. Students who register on an audit basis are subject to attendance regulations of that class and, unless otherwise specified at the discretion of the instructor, are subject to the same course requirements as other students in the class. Students who register on an audit basis may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted on the VCU Academic Calendar (<http://www.vcu.edu/academiccalendars/>). Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of a student’s semester load in terms of classification as a full-time student. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships or university graduate scholarships. Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration. The grade of AU is not included in the calculation of the GPA.

Revised 5/11/2010
University Graduate Council

Withdrawal from a graduate program

Graduate students in good academic standing, according to the academic rules and regulations articulated in the Graduate Bulletin and by individual graduate programs, may request to withdraw from a graduate program at any time. Students should notify their graduate program directors as soon as possible of the intent to withdraw from the program. The program director will then notify the Graduate School via the special action form procedure. The effective term of withdrawal is recorded as the end of the last term of active registration.

Withdrawal from a program does not constitute a withdrawal from course work. Students who wish to also withdraw from classes should do so according to the procedures on the Course drop vs. withdrawal page (p. 17) of the universitywide academic regulations.

Students who are not in good academic standing should be reviewed for possible dismissal from their academic programs as prescribed elsewhere in this section (see Dismissal from a graduate program and appeal process (p. 28)).

Revised 5/8/2012
University Graduate Council

Graduate degree requirements

The minimum course requirements, rules of admission to degree candidacy, language requirements, thesis or dissertation requirements, comprehensive examinations, transfer of credits and the like are specified for each graduate program in the individual pages on this website. Additionally, many schools, programs and departments maintain websites and publish special brochures, student manuals and program guides that may be requested from the appropriate dean or program director.

In all cases, the official policies and procedures of the University Graduate Council, as published in the Graduate Bulletin and on the Graduate School website, are fully applicable to all graduate programs and graduate students, both on- and off-campus, and take precedence over individual program policies and guidelines. Graduate students should contact the Graduate School with questions regarding any discrepancies.

Graduate advising and student responsibilities

Students are responsible for the proper completion of their academic programs. They must be familiar with the Graduate Bulletin as well as all additional academic regulations promulgated by individual schools and departments.

The offices of the deans and department chairs, in cooperation with the advisers and faculty, endeavor to follow the academic progress of all students, and students are encouraged to seek counsel whenever there is a need. If advisers are unable to resolve problems satisfactorily, they will refer students to others as deemed appropriate and necessary.

In order to aid advising, students are responsible for maintaining current mailing addresses on file with the Office of Records and Registration (<http://rar.vcu.edu/>), as well as with the schools and departments in which they are enrolled.

Students also are required to obtain an official VCU student email account within one week of the beginning of the first semester of enrollment and are responsible for reading in a timely fashion university-related communications sent to their official VCU student email accounts. Information on how to set up an email account (<http://mymail.vcu.edu>) is available online.

The academic advising process requires periodic checks by graduate students, advisers and program directors to ensure the accuracy of students' academic histories. Unofficial academic histories are available online through eServices (<http://www.eservices.vcu.edu/>), or official transcripts may be obtained for a fee from the Office of Records and Registration (<http://rar.vcu.edu/>).

It is the responsibility of all graduate students to:

1. Check their records no later than the end of the add/drop registration period at the beginning of each semester to ensure that their registrations are correct
2. Check their records at the end of each semester to ensure that their academic histories are current and correct

Students who wish to appeal assigned grades must follow the grade review procedure (p. 18) as articulated in this Bulletin and as

published in VCU Rules and Procedures (<http://policy.vcu.edu/>) in the VCU Policy Library.

Requests for any other changes to an academic history must be submitted in writing by students to their graduate program directors no later than 14 calendar days after the beginning of the following semester (for the fall semester, 14 calendar days after the beginning of the spring semester; for the spring or summer semester, 14 calendar days after the beginning of the fall semester).

Graduate students, program directors and academic school deans/designees are required to conduct a final review of all academic histories as part of the application-to-graduate check-out process as articulated in Graduation information (p. 31) section of this Bulletin as well as on the Graduate School website. A student's signature on or submission of the application to graduate is acknowledgement that the student has reviewed the academic history and that it is correct. Final approval by graduate program directors and academic school deans/designees of the application to graduate confirms that the student's academic history is complete, correct and final and that no future requests for changes to the academic history will be considered once the student has been approved to graduate.

Revised 5/11/2010
University Graduate Council

Graduation information

All degrees are conferred by the VCU Board of Visitors upon recommendation of the graduate faculty.

Candidates for degrees are eligible for graduation upon completion of all academic requirements in effect at the time of official matriculation into the program, provided the students are continuously enrolled and provided the requirements are met within the time limit specified by the school or program and the University Graduate Council. Students failing to satisfy the time requirement and who are readmitted to their programs shall satisfy requirements in effect at the time of readmission.

Degrees are granted at the close of the semester or summer session in which students complete their work. Degrees will not be granted unless all financial obligations have been resolved with VCU's Student Accounting Department. Students must be enrolled at the time of application (i.e., the semester in which students graduate).

No degrees will be conferred unless students make formal application to graduate.

Degrees will be awarded and diplomas issued in a current semester only. Students who do not submit/complete their applications to graduate in the semester in which they actually complete their programs will be awarded their degrees in the semester in which they apply to graduate. In such cases, a text notation will be added to the transcript to indicate the date that course work for the degree was completed. Program directors and academic school deans must submit a special action request to the Graduate School to this effect that also includes a request for a waiver of the requirement that the students must be enrolled at the time of application/reapplication. A request for a waiver of the enrollment requirement must document that the student has completed all degree requirements and is not using any university resources (i.e., libraries, computer labs, faculty advising, etc.)

Graduation applications must be submitted by students to their advisers or deans no later than the dates indicated in the university's academic

calendars (<http://academiccalendars.vcu.edu/>) on the Web. Students should schedule conferences with their advisers well ahead of the deadline and should note that the application requires the approval of the adviser, the department chair or the school director of graduate studies, and the school dean. **Credit is applicable toward only one degree unless students are admitted to a course of study that allows a defined number of shared courses. Graduate credit hours earned toward a VCU graduate certificate may be applied one time to degree requirements for master's or Ph.D. programs. Graduate credit hours earned toward a VCU graduate certificate may be applied toward only one certificate.** The determination of the acceptability of specific courses to be used for both the certificate and the graduate degree will be the responsibility of that master's or Ph.D. program or school.

Revised 5/11/2010, 1/24/2017
University Graduate Council

Graduation checklist

The total number of semester credits required for graduation depends upon the degree program. Specific information may be found under degree program descriptions. In addition to the specific requirements listed by the department, the following graduation checklist for graduate students, advisers and program directors summarizes all general requirements for graduation as determined by the University Graduate Council.

- All provisional or probationary conditions of admission have been met
- Candidates enrolled at time of application/reapplication to graduate (i.e., semester in which candidates plan to graduate)
- Overall graduate GPA is greater than or equal to 3.0
- Graduate GPA based on all graduate course work attempted after acceptance into program
- For repeated courses, both original grade and repeat grades included in calculation of graduate GPA
- Students may not present courses receiving grades less than C for fulfilling degree requirements. Individual programs reserve the right to establish more stringent requirements regarding acceptance of C grades.
- No course work approved for transfer below grade of B; no course work approved for transfer included in calculation of GPA
- Graduate course work only (500 level or higher) may be applied to a graduate degree, with at least one-half of required course work designated exclusively for graduate students (600 or higher)
- All Incompletes (I) converted to letter grade by last day of class of semester in which candidate plans to graduate
- All grades of Continued (CO), Progress (PR) and No Grade (NG) converted to letter grades by last day of class of semester in which candidate plans to graduate
- All course work taken within prescribed time limits (master's, six years; Ph.D., eight years, with any extensions approved by Graduate School)
- All requirements for theses/dissertations must be completed by the deadline published in the academic calendar (<http://academiccalendars.vcu.edu/>) of the semester in which the candidate plans to graduate, including:

- Final defense of thesis/dissertation
- ETD approval form with all approval signatures, including the graduate dean's and, if applicable, documentation of IRB or IACUC approval number
- Submission of the ETD to the VCU Scholar's Compass (<http://scholarscompass.vcu.edu/>) according to instructions in the VCU Graduate School Thesis and Dissertation Manual (<http://graduate.vcu.edu/student/thesis.html>) (Candidate should confirm with adviser/program director all internal schedules for submission of copy, defense and approval.)
- Survey of Earned Doctorates (<https://sed.norc.org/survey/>) (All doctoral students must complete the SED.) Refer to the Graduate School Thesis and Dissertation Manual (<http://graduate.vcu.edu/student/thesis.html>) for further information.)
- Students must settle all financial obligations with VCU's Student Accounting Department.

Revised 5/11/2010; 5/10/2011; 12/13/2016
University Graduate Council

Application to graduate

At the beginning of each semester, all matriculated graduate students will receive an email reminder from the Office of Records and Registration/Graduation Office to initiate the application-to-graduate process for the current semester. The email notification will be sent to the official VCU student email address and will include submission deadlines and guidelines. (All graduate students in the School of Medicine are asked to complete a preliminary review before initiating the graduation process and are referred to the School of Medicine guidelines or to their advisers/graduate program directors regarding application-to-graduate procedures.) Students planning to graduate in the current semester should proceed as follows:

- Complete the apply to graduate procedure on eServices. The VCU application to graduate will be provided during this process.
- Complete the VCU application to graduate according to the instructions provided. A separate application to graduate is required for each program from which the student intends to graduate.

Graduate students, program directors and academic school deans/designees are required to conduct a final review of all academic histories as part of the application-to-graduate check-out process as articulated in this Bulletin and on the Graduate School website (<http://graduate.vcu.edu/student/graduation.html>). A student's signature on the application to graduate is acknowledgement that the student has reviewed the academic history and that it is correct. Final approval signatures by graduate program directors and academic school deans/designees on the final application to graduate confirm that the student's academic history is complete, correct and final and that no future requests for changes to the academic history will be considered once the student has been approved to graduate.

Revised 5/11/2010; 5/10/2016
University Graduate Council

Reapplying for graduation

Candidates who do not graduate at the end of the semester for which they have applied must re-register and reapply. Students must be enrolled at the time of application/reapplication (i.e., the semester in which the student graduates).

Commencement participation

Graduate students are encouraged to visit the Graduate School website (<http://www.graduate.vcu.edu/student/graduation.html>) for information about university Graduate School events and activities for May and December commencement ceremonies. Students also are encouraged to visit the VCU Commencement website (<http://www.vcu.edu/commencement/>).

GRADUATE STUDY

Graduate programs are administered by the individual departments, schools and centers with assistance from the Graduate School. Major coordination of the various degree programs is performed by the University Graduate Council, which is chaired by the dean of the Graduate School. The University Graduate Council comprises two elected faculty members from each school and one elected faculty member from VCU Life Sciences.

The Graduate School section of the VCU Bulletins documents the official admission and academic rules and regulations that govern graduate education at the university. The University Graduate Council determines these policies.

Bulletins and course descriptions for the current and past years are now archived in the VCU Scholars Compass (<http://scholarscompass.vcu.edu/vcubulletins/>) hosted by the VCU Libraries.

Graduate programs

In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin. The Graduate School website (<http://www.graduate.vcu.edu>) provides links and contact information for all graduate programs offered at VCU. The website also provides updates that occur throughout the academic year, as well as the Application to Graduate Study and complete instructions for applying to all graduate programs.

Refer to the program index for a complete listing of all graduate programs, as well as application deadline dates, and special admission requirements and contact information. Applicants are encouraged to contact the school/department sponsoring the intended program of study at the telephone numbers and/or email addresses provided. Other important contact information is provided on the Graduate School (<http://www.vcu.edu/graduate/>) website as well.

Welcome from the graduate dean

Important information for all graduate students

On behalf of the graduate faculty, I welcome you to graduate study at Virginia Commonwealth University. At VCU you will find a comprehensive array of academic programs, outstanding faculty and a supportive environment conducive to graduate study and research. The university offers nationally and internationally acclaimed graduate and research programs that meet the many needs of the commonwealth of Virginia, the United States and the world.

The University Graduate Council, chaired by the dean of the Graduate School, provides academic and administrative oversight and coordination of all graduate programs in accordance with the Graduate School's mission: to provide leadership in all matters relating to graduate education at Virginia Commonwealth University in order to create a stimulating environment for teaching, learning, research, creative expression and public service. Academic departments and schools administer individual graduate degree programs with the assistance and support of the VCU Graduate School. In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin.

VCU Graduate Bulletin

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the Graduate Bulletin as well as the academic regulations in individual school and department publications and on program websites; however, in all cases, the official policies and procedures of the University Graduate Council, as published on this Graduate Bulletin website and on the Graduate School website, take precedence over individual program policies and guidelines.

Bulletins and course descriptions for the current and past years are now archived in the VCU Scholars Compass (<http://scholarscompass.vcu.edu/vcubulletins/>) hosted by the VCU Libraries.

Students who maintain continuous enrollment are subject to the curricular requirements of the bulletin in effect at the time of admission and to subsequent policy changes approved by the University Graduate Council for immediate implementation.

Students who do not maintain continuous enrollment must reapply for admission and will be subject to the requirements of the bulletin in effect at the time of readmission and to subsequent policy changes approved by the University Graduate Council for immediate implementation. (See policy on exceptions (p. 25).)

Graduate students should contact the Graduate School at any time regarding questions relating to graduate study at VCU.

I commend you for your decision to pursue graduate study, and I wish you every success in the pursuit of your educational goals at Virginia Commonwealth University.

Sincerely,

F. Douglas Boudinot
Dean of the Graduate School

Admission to graduate study

The Board of Visitors, the administration and the faculty of VCU are committed to a policy of equal opportunity in education and employment without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran's status, political affiliation or disability.

Admission requirements

Minimum admission requirements for graduate study at VCU are outlined below. Individual departments and programs may set more stringent requirements as described in relevant sections of the Graduate Bulletin. Each department/program determines how to evaluate the individual requirements in a holistic assessment of the applicant's potential for success in graduate study in a particular field. Additional factors, such as prior professional experience, may also be taken into consideration.

1. **Graduation from a regionally accredited college or university or its equivalent.** Departments may admit graduate applicants with three-year bachelor's degrees provided these three-year degrees allow the students to pursue graduate studies in their countries. Further, the department will require prerequisite/foundation courses as needed to fill in any gaps in the student's educational background.
2. **Required grade point average.** For admission to graduate study at VCU, the Graduate School requires a minimum undergraduate GPA of 3.0. For students with earned graduate degrees from

accredited institutions, the graduate GPA may be the primary basis for consideration.

3. **Entrance examinations.** Submission of standardized graduate-level test scores (fewer than five years old) may be required by the individual program/department. Note: Not all programs require standardized test scores. Applicants are encouraged to visit individual department and program sections of the Graduate Bulletin for information about specific test score requirements.
4. **Letters of recommendation.** Three letters of recommendation from instructors or professional references in the applicant's intended field of study are required. Letters should address the applicant's academic and professional abilities and preparation for graduate study.
5. **Statement of intent.** Applicants must state their reasons for pursuing graduate education in their planned course of study at VCU.
6. **Such additional requirements as may be established by individual programs and schools.** These may include personal interviews, auditions, submission of a portfolio or other materials.

An exception to the general admissions requirements is made for students entering through the Guaranteed Admissions Programs of the VCU Honors College. (See the heading Guaranteed admission through The Honors College (p. 36) in this section.)

Revised 4/8/2014; 5/12/2015; 5/10/2016
University Graduate Council

Types of admissions

Students may be admitted to graduate study under one of the following classifications:

Degree-seeking student

An applicant who meets all requirements for admission to a degree program and who has been recommended by the department or school in which the applicant proposes to study may be admitted as a degree-seeking student.

In order to finalize admission, an official transcript showing degree(s) awarded and any other required documentation must be provided by the end of the fourth week of the first semester of matriculation in the program. Holds will be placed by the Graduate School on all future registrations for students who do not submit required documentation by this deadline.

Revised 4/8/2014
University Graduate Council

Nondegree-seeking student

An individual who wishes to take graduate courses without formal admission to a degree program is classified as a nondegree-seeking student. There is no limit to the total number of credits a nondegree-seeking student may take, as long as the student's academic performance is credible. In courses where enrollment is limited, first priority is given to students admitted to the program, followed by other VCU graduate degree-seeking students. Nondegree-seeking students are not exempt from any prerequisite that may be specified for a course. **A nondegree-seeking student who is later admitted as a degree-seeking student will not be allowed to apply toward a degree more than six credits earned as a nondegree-seeking student.**

In order to enroll in graduate courses as a nondegree-seeking student, students must have graduated (or be in final term expecting to graduate) from a regionally accredited college or university or its equivalent. Information and forms certifying eligibility (<http://rar.vcu.edu/forms/>) to take graduate courses are available at VCU Records and Registration service centers or from the Office of Admissions.

Revised 4/8/2014
University Graduate Council

Guaranteed admission through The Honors College

Active members of The Honors College may apply to The Honors College Guaranteed Admission Program for certain graduate programs either before matriculation at VCU or early in their undergraduate studies. The specific deadline for applying is set by the program. Upon graduation, honors students in the Guaranteed Admission Program may enter the graduate program to which they have applied, provided they have satisfied all of the program requirements.

Interested students should meet with the senior associate dean of The Honors College prior to making application for guaranteed admission to a graduate program. Following that meeting, the student must submit a completed graduate application form with three letters of recommendation to Graduate Admissions. To be accepted into The Honors College Guaranteed Admission Program, a student must be accepted by the university, by the Office of Admissions and by the admissions committee of the program the student wishes to enter. The admissions committee may require an interview. Final notification of guaranteed admission is made by the Office of Admissions.

For additional information, refer to The Honors College (<http://bulletin.vcu.edu/undergraduate/honors-college/>) section of the Undergraduate Bulletin, or contact The Honors College at Box 843010, Richmond, VA 23284-3010; (804) 828-1803; or visit The Honors College website (<http://www.honors.vcu.edu>).

Revised 4/8/2014
University Graduate Council

Programs that offer guaranteed admission through The Honors College include:

- Doctor of Dental Surgery
- Doctor of Medicine
- Doctor of Occupational Therapy
- Doctor of Physical Therapy
- Doctor of Philosophy
 - Anatomy and Neurobiology
 - Biochemistry
 - Biomedical Engineering
 - Biostatistics
 - Human Genetics
 - Microbiology and Immunology
 - Neuroscience
 - Nursing
 - Pharmacology and Toxicology
 - Physiology and Biophysics

- Psychology
- Systems Modeling and Analysis
- Master of Accountancy
- Master of Arts
 - Economics
 - History
- Master of Business Administration
- Master of Education
 - Adult Learning
 - Counselor Education
 - Special Education
 - Early childhood
 - General education
 - Severe disabilities
- Master of Environmental Studies
- Master of Health Administration
- Master of Product Innovation
- Master of Public Administration
- Master of Public Health
- Master of Science
 - Anatomy
 - Biochemistry
 - Bioinformatics
 - Biomedical Engineering
 - Biostatistics
 - Business
 - Clinical Laboratory Sciences
 - Computer Science
 - Criminal Justice
 - Environmental Studies
 - Forensic Science
 - Genetic Counseling
 - Gerontology
 - Health and Movement Sciences
 - Human Genetics
 - Information Systems
 - Mathematical Sciences
 - Microbiology and Immunology
 - Nursing
 - Pharmacology and Toxicology
 - Physics/Applied Physics
 - Physiology and Biophysics
 - Rehabilitation Counseling
 - Sociology
- Master of Teaching
- Master of Urban and Regional Planning

Multiple admissions

Students may not be admitted and enrolled in more than one graduate program or in an undergraduate and graduate degree program, except as part of an approved bachelor's-to-master's curriculum without petitioning and receiving written permission from the program director of each

program in which the student is enrolled and the dean of the Graduate School.

Revised 4/8/2014
University Graduate Council

International students

The university encourages qualified international students to seek admission to VCU. U.S. government regulations and VCU admission policies require nonimmigrant applicants to demonstrate:

- Satisfactory academic achievement
- Adequate English language proficiency
- Ability to finance all educational and living expenses

International students are advised to refer to university and program admission requirements in this bulletin for other information requested of all applicants. An applicant must have earned a bachelor's degree from an accredited institution in the United States or an equivalent degree from a recognized foreign institution. Official academic records must be submitted.

English language proficiency requirement

To ensure maximum benefit from academic study at VCU, all non-native English-speaking applicants, regardless of immigration status, must provide evidence of English language proficiency before admission and/or enrollment in the university.

An applicant may satisfy university English proficiency requirements by obtaining a satisfactory score on the TOEFL. The university minimum TOEFL score requirement is 550 (paper-based) or 80 (Internet-based). Some graduate programs will accept satisfactory scores on the IELTS as evidence of English proficiency. The university minimum IELTS score requirement is 6.5. The PTE is also accepted with a minimum score of 65. Individual programs may require higher scores. TOEFL, IELTS and PTE scores are valid for two years.

The Office of Admissions reserves the right to require additional testing and study in the VCU English Language Program prior to full-time enrollment in university courses. The university offers a full-time English-as-a-Second-Language noncredit program. For information on the VCU English Language Program, including fees, international students can contact the English Language Program, Virginia Commonwealth University, Box 843043, Richmond, VA 23284-3043, United States; (804) 828-2551, or by email: oi-e-elp@vcu.edu; or visit the ELP webpage (<http://www.global.vcu.edu/elp/>). online.

Nonimmigrants (students with temporary U.S. visas)

Because of the amount of time required to process applications from international students and for international students to obtain their visas, prospective students should apply well in advance of the international application deadlines. The deadlines are April 1 for fall semester, Oct. 1 for spring semester and Feb. 1 for summer session. Students also must meet specific program deadlines. All required admission documents must be submitted no later than eight weeks prior to registration if appropriate immigration documents are to be issued. Applicants who are unable to meet this credential deadline will need to defer the intended semester of entry.

Revised 4/08/2014

University Graduate Council

As VCU does not generally provide financial support for graduate international students, applicants needing a student visa (F-1) or a visiting scholar visa (J-1) also must present documented evidence of available financial support to cover annual living and educational expenses while studying at VCU.

Proof of current visa type must be submitted with the application for applicants who are in the United States on student visas. F-1 students and J-1 visiting scholars admitted to VCU must submit copies of all immigration documents to the VCU international student adviser prior to enrolling in classes.

Immigrants (permanent residents, resident aliens and asylum/refugee applicants)

Because immigrant applicants usually are in the United States at the time applications are submitted, these students are required to meet the same application deadlines as U.S. citizens.

If educated in the United States, immigrant students will be considered for admission under the same academic policies as those applied to U.S. citizens. If educated outside the United States, the same academic records are required as those for nonimmigrant students.

VCU requires detailed information concerning U.S. immigration status. Proof of permanent residency or application for permanent residency must be submitted with the admission application.

Admissions appeals

The Office of Admissions will hold denied applicants' transcripts and test scores for one year. To reapply within this period, applicants should first contact the department or program. Additional materials should be supplied to strengthen the application, such as new test scores, new letters of recommendation or a new statement of intent.

Application procedures

A link to the online application, other supplemental forms and instructions for applying to all graduate programs are available in the admissions and aid section of the VCU website (<https://www.vcu.edu/admissions/apply/graduate/>).

A \$70 nonrefundable application fee must accompany each application. This fee will not be credited toward tuition payment.

Completed applications and all supporting materials must be submitted according to the application guidelines provided in this bulletin and before the program deadlines specified throughout this website. Late applications for some programs may be considered when possible but may require provisional action.

Note: Reference letters, the statement of intent/personal essay and any other supplementary materials such as art portfolios, resume/vita or specific program-required documents should be submitted to the address specific to the program to which you are applying. However, some programs require that all application materials be sent directly to the Graduate School.

Application instructions, including how to submit supplementary materials, and a list of program-specific addresses for supplemental materials (<https://www.vcu.edu/admissions/apply/graduate/>) is

available on the Graduate Admissions website. All transcripts and test scores must be submitted to Graduate Admissions. Supporting documentation submitted by mail should be addressed to Virginia Commonwealth University, Office of Admissions, Box 843051, Richmond, VA 23284-3051. Application materials submitted in person may be delivered to the Graduate Admissions office on the third floor of Blair House, 408 W. Franklin St., Richmond, Virginia.

Graduate students must use the Office of Admissions' online graduate application (<https://www.vcu.edu/admissions/apply/graduate/>). Supporting materials for online applications must be submitted promptly. An application cannot be given final consideration until all required documentation and the application fee have been received. Applicants are strongly encouraged to pay by credit card when submitting the online application.

Students are encouraged to apply well before the program deadline to ensure receipt of all application materials. Program deadlines are found with degree/program information elsewhere in this bulletin. Use the program index to navigate to the program(s) of interest.

Completed applications and supporting materials are reviewed by the graduate faculty of the intended program, and final official notification of acceptance is made by the Office of Admissions.

Admission to a graduate program may be contingent upon the successful completion of undergraduate course work, degrees or other prerequisites that may be specified by the program or school. Remedial course work will not apply toward a graduate degree.

Students who do not apply at least one month prior to the beginning of any semester risk their financial aid eligibility in the event that the admission process is not completed prior to the first day of classes.

Apply (<https://www.vcu.edu/admissions/apply/graduate/>)

Financing graduate school

Current information on financial aid programs, policies and procedures are available on the financial aid website (<http://finaid.vcu.edu/>). To obtain printed materials or additional information, call or visit the appropriate financial aid office listed.

Policies and procedures on graduate fellowships and assistantships

University graduate teaching and research assistantships and fellowships are awarded to continuing and newly admitted graduate students. These awards are provided with funds from the university, government, foundations, industrial sources, alumni and other private sources. Most fellowships and assistantships are granted on a competitive basis to eligible applicants and determined based on scholarly potential and excellence. Awards range from assistance for tuition and fees and research expenses to stipend support for full-time study and research in programs leading to graduate degrees.

The decision to award most stipends is determined by the department or school to which the applicant is seeking admission. Applicants for fellowship and assistantship support are notified by the department or school soon after the decision has been made. Fellowship and assistantship awards for new and continuing students are granted on a competitive basis, normally for a period of one academic year.

Inquiry about such awards should be made directly to the school or department in which the student intends to enroll. Students in the process of applying for admission should indicate their interest in such support. Some programs include a separate application for support with the application for admission. Refer to the individual chapters in this Bulletin, program websites and the Graduate School website (<http://graduate.vcu.edu/>) for additional information on graduate student support and funding opportunities.

VCU fully subscribes to the following resolution of the Council of Graduate Schools (<http://cgsnet.org/>) in the U.S. and Canada regarding graduate scholars, fellows, trainees and assistants:

"Acceptance of an offer of financial support (such as graduate scholarship, fellowship, traineeship or assistantship) for the next academic year by a prospective or enrolled graduate student completes an agreement that both student and graduate school expect to honor. In that context, the conditions affecting such offers and their acceptance must be defined carefully and understood by all parties."

The council provides the following comments on the CGS resolution:

"Students are under no obligation to respond to offers of financial support prior to April 15; earlier deadlines for acceptance of such offers violate the intent of this Resolution. In those instances in which the student accepts an offer before April 15 and subsequently desires to withdraw that acceptance, the student may submit in writing a resignation of the appointment at any time through April 15. However, an acceptance given or left in force after April 15 commits the student not to accept another offer without first obtaining a written release from the institution to which commitment has been made. Similarly, an offer by an institution after April 15 is conditional on presentation by the student of

the written release from any previously accepted offer. It is further agreed by the institutions and organizations subscribing to this resolution that a copy of this resolution should accompany every scholarship, fellowship, traineeship and assistantship offer."

Graduate fellowships

Fellowships are not work-related and are designed to free students to spend all of their time on graduate studies and research. Fellowships are awarded on the basis of a student's demonstrated academic achievement, promise and need.

Fellows are required to maintain strong academic records and to remain in residence as full-time students during the fellowship period unless special approval is given by the dean of the Graduate School.

Requests for graduate fellowships from students seeking admission to the university should be included in the personal statement submitted with the application for admission and/or on supplemental forms required by individual departments or programs. To be considered for a fellowship, students must return application forms to the university in accordance with deadlines established by the individual departments or programs.

Fellowships for minority students, such as those provided by the National Science Foundation and Ford Foundation, are made by the sponsoring agencies to individual students. Applications are submitted directly by the students to the sponsor, usually in early fall.

A number of graduate tuition fellowships are funded by the commonwealth of Virginia. Funding for this program is allocated by the Graduate School to individual schools and program directors who, in turn, identify recipients. These fellowships are awarded in most graduate departments with preference given to Virginia residents. Tuition fellowships may range from a minimum of \$500 a semester to full tuition and fees for an entire academic year.

Fellowships are awarded for not longer than one calendar year and are not renewed automatically from year to year unless specifically stated in writing. Graduate program directors generally determine eligibility for renewal of fellowship awards in subsequent years.

Graduate assistantships

Graduate assistants are typically more effective members of their chosen fields due to formal instruction and close interaction with faculty by assisting faculty in classrooms, research or administrative endeavors. All graduate assistant duties are designed to foster student training and graduate learning experiences.

Although assigned teaching, research or administrative support duties, graduate assistants are regarded by the university as students and not as employees. As such, graduate assistants do not accrue paid sick leave, annual leave or holiday leave.

A number of graduate assistantships are awarded each year on the basis of exceptional scholastic achievement, promise and competence for service in the departments of the university. Assistantships are generally also available in those departments which have government, foundation, business and industrial research grants and contracts.

The duties of graduate assistants require work from 10 to 20 hours per week, depending on the stipend awarded. Graduate assistants must satisfactorily perform the duties assigned by their departments; make satisfactory progress in their programs as defined by the degree

requirements and the regulations of their departments; and may not hold any employment or appointment of a remunerative nature during the term of their assistantship.

Additional opportunities for involvement in outside activities may arise in the course of the training period, some of which may provide for additional/supplementary compensation. Involvement and/or participation in such opportunities may assist the department in maintaining the research infrastructure, provide additional experience in instructional activity, assist other units of the university in the delivery of programs consistent with the missions of the institution, involve participation in university organizations and so forth. Such activities may include those for which supplementary compensation is provided. While such activities have the potential for enriching the development of the individual graduate student, they also hold the potential for interfering with the graduate student's responsibilities to his/her department or program and her/his timely progress toward the completion of his/her educational degree requirements.

Therefore, graduate students **must** consult with their advisers prior to undertaking additional activities that may detract, or which have the potential for detracting, from their timely progress to degree completion. Advisers are encouraged to provide/encourage opportunities which broaden the training experience for students in preparation for the wide variety of career opportunities now available. The graduate program director should also be made aware of any such activities to ensure that completion of degree requirements is not compromised.

Some graduate assistants are appointed to support faculty when conducting research. Whenever possible, these assistants will be assigned to faculty who are working in a variety of areas to extend the student research experience and professional development. Graduate assistantships that involve research are generally assigned to those students pursuing degrees that require a thesis or a dissertation.

Other graduate assistants are assigned to departments, divisions, institutes, schools and other offices of the university to assist in the administration of these units. Such assignments are generally given to those pursuing professional degrees in the management sciences. These assistants will be exposed to a variety of administrative experiences and tasks as an integral part of their academic endeavors to prepare them for future professional roles as administrators.

Graduate assistantships are awarded for not longer than one calendar year and are not renewed automatically from year to year unless specifically stated in writing. Graduate program directors generally determine eligibility for renewal of graduate assistantship awards in subsequent academic years. Specific work assignments, scheduling and arrangements relating to vacation and personal leave are determined by the department, program or administrative unit to which the graduate student is assigned.

Required compliance with the commonwealth of Virginia Manpower Control Program

VCU is an agency of the executive branch of the commonwealth of Virginia. The commonwealth's Manpower Control Program stipulates that employees in the executive branch who are not eligible for benefits under a health care plan established by the Virginia Department of Human Resource Management or by an agency administering its own health care plan may not work more than 29 hours per week on average over a 12-month period. Eligibility for the health care plans is limited to classified

state employees, salaried faculty as defined in the state health insurance manual and postdoctoral scholars paid through the university.

All other employees, including graduate assistants, may not work more than 29 hours per week on average over a 12-month period, regardless of the number of positions they hold at VCU that are ineligible for the health care plans. Graduate students should not hold both an assistantship and an hourly or adjunct instructor position at the same time. In exceptional cases, schools/colleges may authorize graduate assistants to have additional jobs, but only if both jobs do not exceed 29 hours total in a work week in compliance with the Manpower Control Program. Noncompliance with the Manpower Control Program exposes VCU to the risk of significant penalties and costs and constitutes a violation of state requirements.

Eligibility

Students who are candidates for appointment as graduate fellows and assistants are responsible for meeting the following eligibility requirements and for taking the initiative in ascertaining that all have been fulfilled. The requirements are described here to provide graduate student applicants with an understanding of the usual conditions for awarding fellowships and assistantships; however, individual schools, departments or programs may set more rigorous standards.

An entering student is awarded an assistantship or fellowship on the basis of academic potential. The student is expected to have been admitted fully and without academic provision, having achieved a minimum grade point average of 3.0 on a 4.0 scale for the last 60 semester hours of academic credit earned. Another indicator of academic potential is a score on the Graduate Record Examination that places the applicant above the 50th percentile of all students who take this examination. In those disciplines requiring GRE subject tests, an upper 50th percentile achievement is required. An equally high achievement level is expected on the Graduate Management Admissions Test, the Law School Admissions Test or the Miller Analogies Test. Students applying for studio and performing arts must demonstrate potential through the quality and promise of their portfolio or audition.

Graduate fellows and assistants, once appointed, must maintain a minimum grade point average of 3.0. Graduate students may be retained as fellows and assistants only as long as they are registered as current, full-time students in good academic standing and are satisfactorily performing their teaching, research or administrative duties.

Appointment and notification

Each year the dean of the Graduate School will notify individual department chairs, program directors and deans of the allocation of the university's graduate student support funds. This notification will include detailed award criteria and instructions for processing these funds. It is the responsibility of each awarding unit to provide funded graduate students with award letters which clearly define the amount, term of appointment and conditions of the award, including the job description of assistantships, renewal criteria, associated tuition and fee support, disbursement information, and minimum enrollment requirements. Award letters should also be provided to students funded by other sources, such as department funds, grants and overhead accounts.

Notices of awards should include the Graduate School policy statement on graduate fellowships and assistantships and the university's student tax guide [PDF] (<http://www.hr.vcu.edu/media/hr/documents/studenttaxguide.pdf>). Graduate students should be instructed to return signed copies of award letters to the awarding unit(s) in order

to acknowledge that they have read these documents and to indicate acceptance of the award and its conditions. All newly appointed graduate assistants will be subject to a criminal records check as a condition of employment at VCU.

Termination of appointments

Graduate assistantships and fellowships normally end when the period of appointment is concluded and the term of the assistantship or fellowship agreement is fulfilled. An appointment may also end when the grant or contract supporting the student expires, even if that occurs before the end of the student's current appointment. Otherwise, a graduate fellowship or assistantship may be terminated for the following reasons:

1. Resignation for cause by the student. Such resignation is to be in writing for approval by the department chair or program director, with a copy to the dean of the Graduate School.
2. Failure of the graduate fellow or assistant to perform assigned duties adequately or to behave professionally. Termination of assistantship or fellowship appointments requires written documentation to support the action. Documentation should clearly show that the infraction, any needed remedy and consequences were conveyed to the graduate student in writing in a timely manner. Such termination is to be recommended by the department chair or program director, with a copy to the dean of the Graduate School.
3. Failure of the graduate fellow or assistant to remain in good academic standing or to adhere to enrollment policies in accordance with this policy statement.

Any stipend funds remaining after termination of a graduate fellowship or assistantship revert to the funding department or program and may be reallocated to another graduate student. If students withdraw from classes or programs or reduce enrollment below full time, tuition and fees and stipends may be rescinded and students will be responsible for returning all funds to the university. Exceptions are made on a case-by-case basis by the dean of the Graduate School on the recommendation of the student's graduate program director.

A graduate student who believes that his or her graduate fellowship or assistantship has been terminated unjustly, and who has exhausted all departmental and school appeal procedures, may appeal the decision in writing to the dean of the Graduate School. A student who wishes to appeal a termination of a graduate fellowship or assistantship must notify the graduate dean in writing within 10 business days after the decision to terminate has been upheld by departmental and school appeal procedures.

Minimum course load

During the academic year, all graduate fellows or assistants whose tuition is being paid by the university must enroll for at least nine hours of graduate course work each semester. Undergraduate credits may be included in the minimum, provided they are relevant to the student's degree program and approved by an adviser and the dean of the Graduate School. Courses taken for audit are not counted toward the enrollment requirement. Students awarded summer stipends and tuition are expected to enroll for at least three credit hours during the summer session [change approved by the Graduate Council April 14, 2009, effective summer 2009]. All students are subject to the continuous enrollment rules (p. 29) published in the VCU Graduate Bulletin.

Stipends

Stipends for graduate assistantships vary by discipline, level of degree, hours of work required and availability of funds. All graduate assistantships, however, are subject to the university's minimum stipend levels. For nine- and 10-month assistantships, minimum stipends are \$4,000 for 10 hours of work per week and \$7,500 for 20 hours of work per week. For 12-month assistantships, minimum stipend levels are \$5,000 for 10 hours of work per week and \$9,000 for 20 hours of work per week. Not all appointments guarantee payment of tuition and fees, nor do payment schedules necessarily coincide with registration dates.

Tuition and fee support

Tuition and fee support associated with graduate fellowships and graduate assistantships varies from year to year and by program. Awards typically include the stipend plus university tuition. Payment of special program or class fees varies from program to program. Students are responsible for settling their accounts according to the rules and procedures of the university's Student Accounting Department (<http://www.enrollment.vcu.edu/accounting/>).

Tuition will be charged according to a student's official residency status as determined by the university's residency office (<http://www.enrollment.vcu.edu/rar/residency/>). Questions related to residency status should be directed to that office.

Per the 2017 Virginia Acts of Assembly, "Nonresident graduate students employed by an institution as teaching assistants, research assistants, or graduate assistants and paid at an annual contract rate of \$4,000 or more may be considered resident students for the purposes of charging tuition and fees." At VCU, the nonresident tuition waiver is applicable to Ph.D. and M.F.A. students receiving a graduate assistantship.

Payments and tax status

The stipend portion of a graduate assistantship package is designated by the Internal Revenue Service as wages for work performed, is processed through the university's Payroll Office and is subject to withholding taxes. A graduate assistantship stipend is reported to the IRS as earned income. Tuition and fee support, if provided, is processed through the university's Office of Financial Aid and is applied directly to the student's account.

A graduate fellowship stipend is not work-related and is not reported to the IRS as earned income. A recipient of a graduate fellowship, however, may be required to report fellowship support as other income and to pay quarterly withholding taxes. Graduate fellowship stipends and tuition and fee support are processed through the university's Office of Financial Aid (<http://www.enrollment.vcu.edu/finaid/>) and are applied directly to the student's account. Once all outstanding tuition, fees and other charges are paid, excess funds are refunded to the student.

For additional information about the tax status of student awards, students are referred to the student tax guide [PDF] (<http://www.hr.vcu.edu/media/hr/documents/studenttaxguide.pdf>) published by the Office of the Vice Provost for Student Affairs and the Office of Payroll Accounting. In all cases, final decisions and interpretations as to the tax status of graduate assistantship or fellowship stipends or tuition and fee awards are made solely by the IRS and, ultimately, it is the student's responsibility to ensure accurate reporting of such support.

Need-based financial aid

All graduate fellowship and tuition and fee awards are reported to the university's Office of Financial Aid and are included in any calculation

of financial aid need. Fellowship funding impacts need-based financial aid eligibility differently than funding received from graduate teaching and research assistantships. Students with questions about their need-based financial aid packaging should contact their financial aid advisers, graduate program directors or departmental fiscal administrators about the status of their funding before accepting offers.

Revised 7/17/2014; 6/16/2015
University Graduate Council

eServices – online records access

Students are encouraged to use eServices, a password-protected service for viewing VCU student records online, to check the status of their financial aid application and award package. Students also may register for classes, print bills and more. Visit the eServices website (<http://www.eservices.vcu.edu/>) for additional information.

Email – official method of communication

Students are required to obtain an official VCU student email account within one week of the beginning of their first semester of enrollment. Students are responsible for reading in a timely fashion university-related communications sent to their official VCU student email account. The Office of Financial Aid uses email to provide financial aid information, to request documentation to support financial aid application data and to provide financial aid application status and award information. Information on how to set up an account is available online (<http://www.ts.vcu.edu/askit/email/>).

Identification requirements

Students must provide picture identification, preferably a VCU Card, for in-person access to financial aid records. For the student's protection, information provided over the telephone and email may be limited if the financial aid staff member is not confident of the student's identity.

Eligibility for financial aid

Most students are eligible for some type of financial aid regardless of family financial circumstances. Basically, to receive aid from any of the federal or state student aid programs, students must:

- Submit a Free Application for Federal Student Aid or Renewal FAFSA designating VCU (school code 003735) to receive FAFSA results
- Demonstrate financial need, except for some loan programs
- Have a high school diploma or a General Education Development certificate
- Be enrolled or accepted for enrollment to an eligible degree or certificate program
- Be enrolled at least half time (five or more graduate credit hours)
- Be a U.S. citizen or eligible noncitizen
- Have a valid Social Security number (unless from the Republic of the Marshall Islands, the Federated States of Micronesia or the Republic of Palau)
- Meet Satisfactory Academic Progress standards as defined by the VCU Office of Financial Aid (The full VCU SAP policy is available on the Web at finaid.vcu.edu/progress/gradrequirements.html (<http://finaid.vcu.edu/progress/gradrequirements.html>).
- Certify that federal and state financial aid will be used for educational purposes only

- Not be in default on a federal student loan and not owe money on a federal student grant
- Comply with Selective Service registration, if required
- Not be convicted under federal or state law of sale or possession of illegal drugs

Students admitted as provisional graduate students are eligible for federal loans at the fifth-year undergraduate level.

Detailed information can be found in the federal Student Guide, available in print form from the VCU Office of Financial Aid or electronically at studentaid.ed.gov/students/publications/student_guide (http://studentaid.ed.gov/students/publications/student_guide/) and on the VCU Office of Financial Aid website. (<http://finaid.vcu.edu/>)

Applying for financial aid

The financial aid application process for the academic year begins Oct. 1. All students are encouraged to complete and submit the FAFSA as soon as possible after Oct. 1, designating VCU (school code 003735) to receive the results. In order to reduce problems, errors and omissions on the FAFSA, students are encouraged to apply electronically using FAFSA on the Web (available online at [fafsa.ed.gov](http://www.fafsa.ed.gov) (<http://www.fafsa.ed.gov/>)). Once the FAFSA is filed, the federal processor will send the student a Student Aid Report or electronic SAR acknowledgement and also will electronically send the information to the VCU Office of Financial Aid, if VCU was listed as a school to receive the data. If additional information is needed to complete processing of the application, the VCU Office of Financial Aid will send the student a request for additional information. Responding promptly to such requests will ensure timely processing of the application. Once the review of FAFSA data has been completed, the Office of Financial Aid will send the student a financial aid award notification.

Please note that health professions students (dentistry, medicine, nursing or pharmacy) must provide both student and parental information on the FAFSA to apply and receive consideration for Title VII grants and loans from the Department of Health and Human Services.

Priority filing dates

The VCU Office of Financial Aid recommends electronically filing the FAFSA by March 1.¹ Students should complete the FAFSA using data from their completed tax returns. If necessary, they may use estimated tax return data in order to meet the VCU priority filing date but should be prepared to submit a copy of their completed tax returns and W2 forms to VCU as soon as possible. Students will receive their financial aid award notification after their FAFSA application data has been verified. If students have not applied for financial aid in a timely manner, they may want to participate in the VCU installment payment plan, which budgets each semester's bill over four payments. Information about this plan can be found on the Student Accounting Department's website (accounting.vcu.edu/installment (<http://accounting.vcu.edu/installment/>)).

¹Students who do not have access to the Web may apply using the paper FAFSA, available through VCU, high schools, colleges and most public libraries. Those students completing a paper application should mail it to the federal processor by Feb. 1.

Summer studies

Limited financial aid may be available during the summer semester. Students applying for the summer semester must file the FAFSA by March 1. Students should review the summer financial aid policy statement (<https://finaid.vcu.edu/apply/summer/>), available on the Financial Aid website.

Students interested in financial aid for the summer semester should obtain a VCU Summer Studies Schedule of Classes (<http://www.vcu.edu/schedule/>) (available in March) for more details.

Study abroad

Financial assistance is available to eligible students enrolled in approved study abroad programs. All study abroad programs must be coordinated through the Global Education Office at (804) 827-7882. Students should work with a financial aid counselor to coordinate aid for their study abroad program. Information about financial aid and study abroad (<http://global.vcu.edu/abroad/students/funding/>) is available on the Global Education Office website.

All study abroad course work is subject to the criteria articulated in the transfer credit policy.

Quality assurance

To ensure that information provided on the FAFSA is accurate, a student's application may be selected for review at any time during an enrollment period, and the student will be requested to provide documentation that supports the information. By signing the FAFSA, the student (and the student's parents or spouse, if applicable) agreed to furnish such documentation. If the documentation is not provided when requested, financial aid awards will be canceled and any funds already disbursed may need to be repaid.

University bill

The Student Accounting Department issues online bills for tuition, fees and other university charges. When financial aid awards (grants, scholarships and loans) are not enough to pay university charges, the remaining balance must be paid from personal funds, credit card or the VCU installment payment plan. Federal work-study awards will not be deducted from university charges because those funds are paid directly to the student, based on hours worked. Any outstanding balance owed will prevent a student from registering for courses and receiving official transcripts. Students who fail to pay their balance on time may be assessed a late payment fee and have a financial hold placed on their account. If the balance remains outstanding after the semester ends, their account may be referred to the VCU collection unit at which time collection costs will be assessed.

Financial aid appeals

Financial aid eligibility decisions are made using federal, state and institutional regulations and policies. Students may appeal their eligibility if special circumstances warrant a review. Reasons for an appeal might include one of the following documented unusual circumstances:

- Loss or reduction of employment earnings
- Disability or death of parent or spouse
- Separation or divorce

- Loss or reduction of untaxed income
- Losses due to a natural disaster
- Unusually high educational program costs
- Unusual medical expenses
- Dependent and child care expenses

Any financial aid staff member can advise a student about the procedures on how to file an appeal.

Federal and state financial aid refund policy

Students who receive federal Title IV or state grant or loan assistance and withdraw from VCU before completing 60 percent of the semester (as measured in calendar days) must have their eligibility recalculated based on the federal return of Title IV funds formula. This federal formula specifies that a student's financial aid eligibility must be recalculated based on the aid the student has "earned" (based on the number of days that the student was enrolled or attending VCU prior to withdrawal). Any unearned aid (for the period of enrollment that the student did not complete from the date of withdrawal to the end of the semester) must be returned to the appropriate Title IV or state programs from which the student was awarded.

For VCU students who withdraw prior to completing 60 percent of the semester, they will have to return or repay all or a portion of the aid funds that had been disbursed to their VCU account. As a result, students who withdraw prior to completing 60 percent of the semester may be responsible for all or a portion of their tuition/fee bill that was previously paid by financial aid sources.

If a student does not officially withdraw from all classes but fails to earn a passing grade in at least one course, federal aid regulations require that the student be considered "unofficially withdrawn," unless it can be documented that the student completed the enrollment period. Unofficial withdrawals require a Title IV refund calculation at the midpoint of the enrollment period. The reduction of federal and state aid will create a balance due to the university that must be repaid.

Graduate students in undergraduate courses

Students who are classified as graduate students will be eligible for federal financial aid only if they are enrolled at least half time in courses that can be applied toward their graduate degree. The Office of Financial Aid will identify all graduate students who have applied for financial aid but have registered for less than half-time graduate course work in any given semester. If the undergraduate course work for which the student has registered is considered preparatory to the graduate degree, documentation must be provided by the student's adviser or program representative to verify which undergraduate courses are required. In these cases, the student will be eligible for federal financial aid, but it will be based on the fifth-year undergraduate loan limits. Students who have been admitted to a dual-degree program can take any amount of required undergraduate course work and will still be eligible for graduate loan limits.

Satisfactory academic progress for financial aid purposes

To be eligible to receive financial aid at VCU, students must make satisfactory academic progress. SAP is a combination of qualitative and quantitative components. SAP is measured by:

- **GPA.** Graduate students must maintain a 3.0 cumulative GPA.
- **Completion rate.** The completion rate is measured by the number of credit hours earned divided by the number of credit hours attempted. All students must successfully complete at least 67 percent of all credit hours attempted (withdrawals, incompletes and repeated courses also are considered attempted credit hours).
- **Overall progress toward degree/certificate.** Overall progress is measured by the number of credit hours attempted divided by the number of credit hours necessary to complete the degree or certificate program. Students who need financial aid funding may attempt no more than 150 percent of the hours required to complete their degree or certificate program.

The Office of Financial Aid will perform a periodic SAP review for students who receive or apply for financial aid. The reviews are typically performed at the end of the spring semester and must be completed at least once per academic year. Students will be alerted with warning letters, whenever possible, to provide them with notice that their financial aid may be in danger of being suspended. When students fail to meet SAP requirements, they will receive suspension letters indicating that they are ineligible to receive further financial aid. Students whose eligibility for financial aid has been suspended may submit an appeal if mitigating circumstances prevented the student from maintaining SAP.

For more detailed information about the VCU satisfactory academic progress (<http://www.finaid.vcu.edu/manage/sap/>) policy, visit the Office of Financial Aid website.

Types of financial aid

There are three basic types of financial aid: loans, grants and work-study. Each type has different features and advantages.

Loans

In terms of total dollars available, long-term federal loan programs provide the most dollars. Federal loans must be repaid after the grace period and/or deferment periods have expired. Students must generally remain enrolled at least half time (five credit hours for graduate students). Multiple repayment plans may be available for most federal loans. Selected loan programs include:

- Federal Direct Loan (unsubsidized)
- Health Professions Student Loan
- Loan for Disadvantaged Students
- Nursing Student Loan

To ensure that students understand the responsibility and the obligation they are assuming as a Federal Direct Loan borrower, the U.S. Department of Education requires participation in entrance counseling prior to receiving a Federal Direct Loan if the student has not previously received a Direct Loan, Federal Family Education Loan or Supplemental Loans to Students Loan. The entrance counseling requirement must be satisfied prior to the first loan disbursement. A student will also be required to complete exit counseling before they graduate, withdraw or drop

below half-time status. Visit the StudentLoans.gov website (<https://studentloans.gov>) to complete entrance and exit counseling.

Grants

Contact individual academic departments for information about grant or scholarship programs.

Work-study

Work-study is a form of financial aid that pays wages for work performed through employment. Work-study positions are located on campus and in approved off-campus locations. Hourly wages will vary depending on skills and experience. Job listings are posted on the Financial Aid website (<https://finaid.vcu.edu/types/workstudy/>). When interviewing for work-study positions, students should take copies of their financial aid award notifications to show prospective employers. Graduate students usually work 15 to 25 hours per week.

Veteran and reservist educational benefits

Veteran's certification for VCU is completed within the Military Student Services office located in Grace E. Harris Hall on the Monroe Park Campus. Detailed information about eligibility for Veterans Affairs programs is available on the Military Student Services website (<https://militaryservices.vcu.edu/benefits/>).

Military Student Services
Grace E. Harris Hall, Room 3122
1015 Floyd Avenue
Box 842536
Richmond, Virginia 23284-2536
Phone: (804) 828-6563
Fax: (804) 828-8212
Email: militaryserv@vcu.edu
militaryservices.vcu.edu (<https://militaryservices.vcu.edu/>)

Available programs

For details on any of these programs, please visit the Military Student Services website benefits overview (<http://www.militaryservices.vcu.edu/veterans/>).

- Montgomery – GI Bill Active Duty (Chapter 30)
- Vocational Rehabilitation (Voc Rehab, Chapter 31)
- Veterans Education Assistance Program (VEAP, Chapter 32)
- Post 9-11 GI Bill (Chapter 33)
- Survivors' and Dependents Educational Assistance Program (DEA, Chapter 35)
- Montgomery – GI Bill Selected Reserves (Chapter 1606)
- Tutorial Assistance Program
- VA Work-Study Program
- Virginia Military Survivors and Dependents Education Program
- Post 9-11 – Active Duty (Chapter 33)/Yellow Ribbon Program
- Yellow Ribbon Program
- Transferability of Benefit

Eligibility requirements

Eligible veterans/spouses/dependents must comply with the following requirements to receive educational benefits as students:

1. The veteran/spouse/dependent must be accepted into a degree or certificate program or be matriculating as a nondegree-seeking student for only two semesters before having to declare a major.
2. The veteran/spouse/dependent must request certification by completing and submitting VCU's VA education assistance form after obtaining approval via signature of their academic adviser and registering for courses each semester and each summer session from the Veterans Affairs Office.
3. The veteran/spouse/dependent is eligible to use benefits for only those courses taken toward a degree, certificate program or as prerequisite courses (only two semesters).
4. The veteran/spouse/dependent is not eligible to use benefits for courses taken on an audit basis, or if eliminating a course previously taken and paid for by the VA to remove a punitive grade not counted in GPA calculations via VCU's historical repeat option. The repeated course(s) will be paid for by the VA but the student will incur a debt to the VA for the course(s) eliminated from the student's GPA. The VA does not pay for courses that earn no credit.
5. The veteran/spouse/dependent is responsible for ensuring that transcripts are evaluated for transfer credits to be accepted by VCU. Students must submit this information to the Veterans Affairs Office for transmittal to the Veteran's Administration Regional Office.
6. The Veterans Affairs Office must be notified by the student/veteran/spouse/dependent if they change, add, drop or withdraw from courses originally approved by the student/ veteran/spouse/dependent's academic adviser and certified by VCU's Veterans Affairs coordinator/certifying official.

Graduate tuition and student fees

Students must pay all applicable tuition, housing and dining charges, and other fees when due, as described in this section. Students who fail to pay these charges on time may be assessed a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

Student financial responsibilities

Students who enroll are responsible for:

- Full payment of tuition and fees generated from their registration.
- Full payment of all charges for housing and dining services, and other applicable miscellaneous charges.
- Keeping a current mailing address on file with Enrollment Services. Refunds and tax forms are not issued to students with inactive mailing addresses.
- Establishing an official VCU email address and reading their email on a regular basis, since email will be used to notify students when their invoices are available in the payment and billing site. Paper bills are not sent to enrolled students. Failure to acknowledge and review the electronic invoice does not relieve responsibility for timely payments. Other important notifications are also sent to the official VCU email address.

Tuition and fees are categorized and described (<https://accounting.vcu.edu/tuition/>) on the Student Accounting website.

Full-time and part-time graduate study

Graduate students registered for nine to 15 credit hours are considered full-time and are charged a flat rate for tuition and fees. Graduate students registered for more than 15 credit hours during any semester will be charged an overload graduate tuition fee on a per-credit-hour basis above the full-time tuition rate. Graduate students registered for fewer than nine credit hours are charged a graduate per-credit-hour rate based on their program. Graduate students fully funded as graduate assistants or graduate fellows with tuition remission must register for at least nine credit hours per semester (three credit hours during the summer if funded on a 12-month stipend). Departmental requirements may vary; therefore, students should verify expected course loads with their graduate program directors.

Nondegree-seeking students who hold bachelor's degrees are classified as DHG (degree-holder graduate) if they enroll in one or more graduate courses. DHG students are charged the graduate rate regardless of whether they enroll in graduate- or undergraduate-level courses. If they enroll for nine or more credits, they are charged at the full-time graduate rate.

Tuition and fee schedule

Tuition and fees are categorized and described on the Student Accounting website (<https://accounting.vcu.edu/tuition/>). Questions regarding tuition and fees may be directed to the Student Accounting Department at (804) 828-2228, or by emailing stuacctg@vcu.edu. The university reserves the right to revise or alter all fees, regulations pertaining to student fees and fee collection procedures at any time.

University fee

This fee is used by the university to support recreational sports facilities, University Student Commons, campus development, career and counseling centers, student disability and student services center, intercollegiate athletics, and other programs. Full-time students pay a flat-rate university fee each semester. Part-time students pay this fee on a per-credit basis.

Student activity fee

This fee is used to support educational, social, cultural and other student activities for undergraduate, graduate and professional students. These activities include the Student Government Association, sports clubs, student organizations and publications. Full-time Monroe Park Campus students pay a flat rate and part-time students pay a per-credit-hour rate; MCV Campus students pay a flat rate based on part-time or full-time enrollment.

Student health fee

All full-time students on both campuses must pay the student health fee. Part-time students may participate in the University Student Health Services on an elective basis by paying the student health fee. USHS offers unlimited office visits for acute and chronic ailments, after-hours phone advice for an urgent medical problem and most laboratory tests associated with acute illnesses ordered by the USHS staff, among other services. The fee does not cover accidental injury, emergency room visits or hospitalization. More specific information as to what is covered and not covered by the fee is available on the USHS website (<http://www.students.vcu.edu/health/about/eligibility-and-charges/>).

Technology fee

The technology fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. The fee is used to provide for students' technological needs and to support university-wide technological initiatives.

Library fee

The library fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. Fee revenues are used to sustain around-the-clock services in James Branch Cabell Library and the new library facility, expand hours at the Tompkins-McCaw Library, strengthen digital tools and generally support operating costs for VCU Libraries.

Off-campus fees

The university fee, the student activity fee and the student health fee are not charged to students taking off-campus classes.

Capital outlay fee

This fee is charged to all full-time and part-time non-resident, on-campus students. The fee is mandated by the General Assembly to reimburse the State for debt service costs attributable to non-resident students related to the financing of buildings and equipment.

Online course fee

The online course fee is charged for undergraduate and graduate online courses. The fee covers operational and personnel support to develop and maintain online courses.

Special fee charges

Because of specialized programs, various schools and departments may charge each student additional fees to cover special materials, equipment breakage and other costs. For specific information about special fees, refer to the Student Accounting Department website or to the specific school or department section in this bulletin.

Student billing

Students must pay all applicable tuition, fees, room and board when due. Students are notified at their official VCU email address when their bills are available on the billing and payment site. No paper bills are sent to enrolled students. Tuition and fees for preregistered students, along with charges for housing and dining plans where applicable, are due by the official start of each semester. After the registration period all other students are sent a notification at their official VCU email address when their electronic bill has been issued and should pay by the payment due date indicated on the electronic invoice. Students who fail to pay these charges on time may be assessed a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and fee collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

The installment payment plan (<https://accounting.vcu.edu/plan/>) assists students in meeting the cost of their higher education by offering a convenient payment option. The university-administered IPP is offered only during the fall and spring semesters. The plan distributes the cost

of tuition, fees, housing and dining charges for a semester into four equal installments.

All students attending the university with current charges of \$100 or more are eligible to participate. All prior semester balances must be paid in full to be eligible.

Students who receive financial aid are also eligible for participation in the IPP. These students may deduct their aid to determine the net total due. If it is \$100 or more, the remaining amount may be paid in installments.

In some cases, a student may receive a financial aid refund, and then subsequent charges for the semester are added to the student's account. If the student has received a refund, he or she is ineligible to participate in the IPP unless the refund has been repaid to the university in full. The student must then pay the first installment and follow the instructions to enroll in the IPP.

There is a \$25 nonrefundable application fee payable with the first installment of each semester. Interest is not assessed on the outstanding balance; however, installments not paid by the payment due date are subject to a late payment penalty. Information about how to participate in the IPP (<https://accounting.vcu.edu/plan/>) is available on the Student Accounting website.

Drop vs. withdraw

Drop charges are removed to indicate that the student never attended the class. The student is not eligible to receive financial aid, and any financial aid already credited to the student's account based on the original course registration will be removed from the student's account, which may create a balance due to the university.

Withdraw results in the academic grade of W. Charges are assessed and adjusted according to the University Refund Policy. Students may owe a balance to the university.

Refund of tuition and fees

The official university tuition and fees refund policy is applicable only for the fall and spring semesters. This table pertains to both complete withdrawals and reduced course loads for standard classes (excluding short/nonstandard courses). The policy is based on the weeks of the semester and not the class meeting days (if the semester begins on a Thursday, the first week of classes is from Thursday through the following Wednesday).

Refunds (reduction of charges) are calculated on a course-by-course, per-credit-hour basis, disregarding the full-time cap amounts and discounted tuition. Charges are recalculated based on the number of credit hours in which the student remains enrolled in addition to the nonrefundable percentage portion of credit hours for the withdrawn course(s). Students who are enrolled and withdraw from courses may not receive a reduction in charges.

- Students dropping/withdrawing from courses through the first week of class will be entitled to a 100 percent refund of tuition and fees.
- Students withdrawing from courses through the second week of class may be entitled to an 80 percent refund of tuition and the university fee.
- Students withdrawing from courses through the third week of class may be entitled to a 60 percent refund of tuition and the university fee.

- Students withdrawing from courses through the fourth week of class may be entitled to a 40 percent refund of tuition and the university fee.
- Students withdrawing from courses after the fourth week of class are not entitled to receive a refund of tuition and fees.

The refund policy and deadlines of the English Language Program are different from the university's refund policy for academic courses. Details of the policy may be obtained from the English Language Program office.

A full refund for holiday intersession will be granted if the course is dropped before 4:30 p.m. on the day of the first class meeting. Partial refunds are not granted.

A full refund for a short/nonstandard course's tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. No refund of tuition and fees is given for withdrawals of short and nonstandard courses. Students should contact their program administrator for withdrawals from nonstandard classes that are longer than standard classes.

A full refund for summer tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. (This policy also is applicable if the class does not meet on two consecutive days.) Students reducing their academic course loads to less than full-time (12 credits for undergraduates and nine credits for graduates) before the end of the last day to drop a course will be entitled to a refund of tuition and applicable fees reflecting the reduced course load. Partial refunds are not granted for the summer session.

Students who are financial aid recipients and withdraw from all courses prior to completing 60 percent of the semester are subject to the Federal Return of Title IV Funds Policy. For more details see Federal financial aid refund policy (p. 43).

Refunds will be computed based on the actual withdrawal date certified by the Office of Records and Registration. Refunds will not be made to students who do not attend classes and have not completed the required withdrawal procedure. Refund processing may take approximately two to three weeks. Exceptions to this refund policy are made only in rare instances. Written application for an exception must be filed in the Student Accounting Department to the refund appeals committee within three years.

Refer to the Residential Housing contract and Dining Services' terms and conditions for housing and dining services refunds.

Requests for refunds that are not generated from the overpayment of financial aid should be made in writing to: VCU Student Accounting Department, Box 843036, Richmond, VA 23284-3036. Refund request forms are available at the Student Services Center, 1015 Floyd Ave. and on the Student Accounting website (<http://accounting.vcu.edu/refunds/>).

In accordance with credit card regulations, the university will refund any credit balance that may result on a student's account as the outcome of a credit card payment back to the credit card account. The remaining credit balance, if any, will be refunded to the student.

Students are responsible for paying any increase in charges that may occur after the generation of any refund.

Outstanding charges

Students who fail to meet payments when due will be assessed late payment penalties and will be denied registration for future classes until they have paid all accrued amounts owed. Students with balances owed to the university will not be issued diplomas or official transcripts until all charges are paid in full.

Any communication disputing an amount owed, including an instrument tendered as full satisfaction of a debt, must be submitted to the Director of Student Accounting, Student Accounting Department, Virginia Commonwealth University, Box 843036, Richmond, VA 23284-3036.

Student accounts with balances owed the university are referred to the VCU Collection Unit. Pursuant to Section 2.2-4805 et seq., of the Code of Virginia, and in accordance with rules and regulations promulgated by the state comptroller and attorney general of the commonwealth of Virginia, VCU will charge interest, costs and fees on all accounts past due. An additional fee of 25 percent of the outstanding balance will be assessed immediately upon referral to the VCU Collection Unit.

VCU participates in the Virginia Set-off Debt Collection Act of 1981. Under the provisions of this act, a Virginia individual income tax refund will be subject to the university's claim for unpaid balances of tuition and fees.

Students are reminded that they are ultimately responsible for any unpaid balance on their account as a result of the Office of Financial Aid or their sponsor canceling or reducing the award. The student remains financially responsible for the charges deferred on the basis of any financial aid if later the student is determined ineligible. Students are also responsible for ensuring that all necessary actions have been taken to receive their financial aid awards. See also the federal financial aid refund policy.

A student who pays a past due balance with a dishonored payment item may be subject to having his or her current and/or future registration cancelled. A charge of \$50 is levied for all dishonored payment items.

Military services tuition relief, refund and reinstatement guidelines

These guidelines apply to students whose service in the uniformed services (military) has necessitated their sudden withdrawal or prolonged absence from their enrollment at Virginia Commonwealth University and provides for the required re-enrollment of such students. Students are offered the following enrollment secession options:

1. Drop all courses before the end of the add/drop period and receive a full reduction of tuition and fee charges. Students residing in university housing and participating in a dining plan will be released from their housing and dining service contracts and will receive a prorated refund of these charges. Students will be asked to sign the drop request form with the director of military student services indicating that they are not receiving a financial aid refund. If the reduction of charges results in an overpayment on the account after any financial aid or third party awards have been reduced, the student will be issued a refund.

This option might best meet the needs of students who are called to active duty service during the first week of school and did not receive a financial aid refund check or direct deposit.

2. Receive a grade of Incomplete (IM – incomplete military) in one or all courses. Students residing in university housing will be released from their housing and dining service contracts and will receive a

prorated refund of these charges. Students who chose to take a grade of IM will not have tuition and fees reduced for these courses because, upon receipt of an approved change of grade, credits will still be earned for the semester. Students will have 12 months from the date that they return from active service to complete the course work and earn a course grade. If a student received financial aid, the amount recovered to the financial aid accounts will follow the Federal Financial Aid Refund Policy.

This option might best meet the needs of students who have essentially completed all course work in a class for the semester, but have yet to turn in a final project, an exam or other materials. It should be agreed upon between the instructor and the student that the remaining course work can reasonably be completed during the 12-month period.

3. Accept administrative withdrawal (WM – withdrawn military) from all courses as of the effective date of the orders to active duty. If this option is elected, a full refund of all tuition, fees and prorated room and dining charges will be made. If a student received financial aid, the amount recovered to the financial aid accounts will follow the Federal Financial Aid Refund Policy. If the reductions of charges results in an overpayment on the account after any financial aid or third party awards have been reduced, the student will be issued a refund.

This option might best meet the needs of students who are called to national service in the middle of a semester and have not completed 75 percent of their class requirements. This option also might best meet the needs of students who are leaving the university during the first week of class and received a financial aid refund check or direct deposit as a result of their financial aid.

4. Students who have completed 75 percent of the course requirements at the time of military activation and, notwithstanding certain exceptions noted below, who meet requirements as determined and agreed upon by the faculty instructor and the student may receive full course credit.

Students may receive full course credit if 75 percent of course requirements have been completed, under certain circumstances. The instructor is responsible for determining what percentage of course requirements have been completed based on factors to include but not limited to contact time, examinations, projects, work experience and clinical experience. The awarding of full credit cannot be made where the incomplete requirements are essential components of the course or program required by law or regulatory bodies, required for competency in the work place, or required to complete licensure examinations.

Leaving the university

To initiate this process, the student must provide the Office of Military Student Services with a copy of his or her active duty orders in addition to a printed copy of his or her course registration for that semester and indicate Option 1, 2, 3 or 4 for each course. If Option 4 is selected, the student must provide documentation from the instructor. The director of military student services will forward all documentation to the university registrar to take the appropriate enrollment action, post the appropriate grades and send a copy of the orders and a copy of the student course request statement to the director of financial aid and the director of student accounting.

Returning to the university

Students who withdrew from the university as a result of military deployment, mobilizations or duty changes are entitled to return without having to requalify for admission so long as the student (a) returns after a cumulative absence of no more than five years and (b) notifies the appropriate admissions office of the intent to return to the university not later than three years after the completion of military service obligation. The student may return to the university in the same program of study. With the consultation of an adviser, a comparable program of study may be chosen for discontinued programs.

Veterans Access, Choice and Accountability Act of 2014

codified in 38USC3679(c)

The following individuals shall be charged a rate of tuition not to exceed the in-state rate for tuition and fees purposes:

- A veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence) and enrolls in the school within three years of discharge or release from a period of active duty service of 90 days or more
- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence) and enrolls in the school within three years of the transferor's discharge or release from a period of active duty service of 90 days or more
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or release as described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence)
- Anyone using transferred Post-9/11 G.I. Bill benefits (38 U.S.C. § 3319) who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence) and the transferor is a member of the uniformed service who is serving on active duty

The policy shall be read to be amended as necessary to be compliant with the requirements of 38 U.S.C. 3679 as amended.

Tuition determination and student classification

Tuition is determined by the number of credit hours a student is taking, the student's residency classification, course of study and classification level.

In-state residency

Eligibility for in-state tuition benefits is determined by the Code of Virginia. Refer to the Determination of student classification for in-state tuition purposes (p. 15) in the About VCU section of this bulletin for the complete code.

All applicants to VCU who want to be classified as Virginia residents must complete the application for Virginia in-state tuition rates included in the application for admission. The residency determination of the applicant will be conveyed at the time of admission. New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency determination by completing an application for change of domicile available from the Office of Records and Registration (online). The student must present clear and convincing evidence that they are not residing in the state primarily to attend school. The application deadline is 30 days prior to the start of the semester, and it is the responsibility of the student to establish or to file an appeal to change their residency classification prior to the start of classes for the semester under consideration. In accordance with the Code of Virginia, applications received after the start of the semester must be considered for the next semester. Submit completed applications with documentation to the university residency appeals officer. Processing may require four to six weeks; therefore it is strongly recommended that applications be submitted earlier than the stated deadline.

The university's service to students is limited to assuring that they understand the procedures for appealing and that they have access to information about the relevant sections of the Code of Virginia. VCU provides information about the steps of the process and access to the applicable sections of the statute and the associated guidelines. The university also provides qualified staff to review the appeals and make decisions based on the information students provide. The office cannot provide advisement to students as to how to present their case for review; staff members cannot become the student's advocate since their office must make the decision.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Student Accounting Department. Students denied this status also are notified by mail. The denial letter informs the student of procedures for appeal of this decision, to include filing an appeal with the University Residency Appeals Committee. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Please note that a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

Off-campus graduate instruction

VCU is dedicated to serving the needs of Virginians by providing off-campus graduate credit instruction when and where it is needed. Courses are offered in response to an expression of need from various locales and groups.

Off-campus instruction features the same course work available on campus, and most off-campus courses are fully degree-applicable within the admission standards of the Graduate School. **The official policies and procedures of the University Graduate Council, as published on this**

Graduate Bulletin website and on the Graduate School website, are fully applicable to all off-campus graduate programs and graduate students.

Tuition for most off-campus classes is the same as other university classes; however, students in off-campus credit classes are not charged university or activity fees.

For additional information on off-campus credit instruction, contact Edward Howard, director of continuing studies, Division of Community Engagement, 920 W. Franklin St., Richmond, VA 23284-3062, telephone (804) 828-8819, or visit the Division of Community Engagement website (<http://www.community.vcu.edu>).

Undergraduate students in graduate classes

VCU undergraduates may enroll in 500-level courses with approval of their advisers and consent of the programs offering the courses. Highly qualified undergraduates approaching the last year of study may petition to enroll in a maximum of two 600-level graduate courses during the senior year of undergraduate study. Permission to enroll as an undergraduate in 600-level graduate courses must be obtained from the undergraduate academic adviser and the Graduate School. The total load must not exceed 16 hours of combined credit. Credit for any course is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses. Undergraduate students seeking permission to enroll in 600-level courses must have a minimum undergraduate overall and major grade point average of 3.0.

For undergraduate students repeating 500-level graduate courses, the undergraduate historical repeat policy (<http://bulletin.vcu.edu/academic-regs/ugrad/repeated-courses/>) applies only if the course is applied toward the undergraduate degree. A historical repeat may not be processed for 600-level courses.

Revised 5/11/2010; 5/14/2013
University Graduate Council

Accelerated bachelor's-to-master's programs

VCU offers a number of accelerated bachelor's-to-master's degree programs that allow academically talented undergraduate students to earn both degrees in a minimum of five years by taking approved graduate-level courses during the senior year of their undergraduate program. Accelerated bachelor's-to-master's programs must be approved by both the University Undergraduate Curriculum Committee and the University Graduate Council. Full descriptions for accelerated programs are included in the Undergraduate and Graduate Bulletins.

To be eligible to apply for an accelerated bachelor's-to-master's program, undergraduate students must have successfully completed a minimum of 30 hours of course work at VCU and be in good academic standing with a minimum cumulative GPA of 3.0. Individual programs may require higher academic achievement and/or standardized test scores for admission to accelerated programs. Prospective applicants should refer to the individual program section of the Bulletin for specific information on eligibility criteria and admission process, including application deadlines. Undergraduate students must have departmental approval and must apply for admission to the master's program for a future term prior to beginning their final year of full-time undergraduate study. Admission

to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Once accepted into an accelerated bachelor's-to-master's program, students may enroll in the shared graduate course work identified in the approved curriculum outlined in this Bulletin (or on the student's plan of study approved at the time of admission). Students may complete a maximum of 12 hours of approved graduate course work during the final year of their undergraduate career, which may be applied to both the undergraduate and graduate degrees, based on the standards specified below. Individual programs may set additional restrictions on the number of graduate credits that can be completed while the student is an undergraduate and applied to both the undergraduate and graduate degrees.

Students in accelerated bachelor's-to-master's programs may not utilize the undergraduate students in graduate courses (p. 49) option to complete more than 12 hours of graduate courses before conferral of the undergraduate degree. Graduate courses at the 600-level that have not been identified as part of the shared course work should not be attempted until the undergraduate degree has been conferred and the student's status has changed from undergraduate to graduate. No graduate-level course work should be taken before the senior year. No undergraduate course work may be counted toward the master's degree.

In order to meet continuance standards, students in accelerated bachelor's-to-master's programs must achieve a minimum grade of 3.0 (B) in each graduate course identified in the approved curriculum in the Bulletin (or the student's plan of study approved at the time of admission) and attempted while in undergraduate status. Students who do not receive a minimum grade of 3.0 (B) in graduate course work taken in undergraduate status will be reviewed for possible dismissal from the accelerated program. Substitutions for any of the shared graduate course work must be approved by the undergraduate and graduate advisers before the last day of add/drop registration of the semester in which the student wishes to take the substituted course(s).

COLLEGE OF ENGINEERING

Since its inception as a school in 1996, the now-College of Engineering at VCU has brought innovative, real-world engineering education to Central Virginia. The college currently teaches nearly 2,000 undergraduate students and approximately 300 graduate students. Students can earn B.S., M.S. and Ph.D. degrees through the departments of Biomedical Engineering, Chemical and Life Science Engineering, Computer Science, Electrical and Computer Engineering, and Mechanical and Nuclear Engineering.

Engineering skills alone do not equal success in the 21st century. The college challenges students to think bigger and actively collaborate with community businesses and students from a wealth of backgrounds – such as graphic design, physics and health care. Cross-disciplinary focus areas include sustainability and energy engineering, micro- and nano-electronic systems, pharmaceutical engineering, mechanobiology and regenerative medicine, security and mining of big data, and device design and development.

Students also benefit from close, personal interactions with faculty and from the many opportunities available for internships, cooperative education and undergraduate research experiences. Interdisciplinary research opportunities are offered through various state-of-the-art facilities, including the college's Nanomaterials Core Characterization Facility, the Institute for Engineering and Medicine, the Wright-Virginia Microelectronics Center, the dean's undergraduate research initiative and the da Vinci Center. To learn more, visit the College of Engineering website (<http://www.egr.vcu.edu/>).

Accreditation

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Chemical and Life Science Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Computer Science program is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Nuclear Engineering option in Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Degree programs

The College of Engineering offers the following degree programs:

Bachelor of Science

Biomedical Engineering
Chemical and Life Science Engineering
Computer Engineering
Computer Science
Electrical Engineering
Mechanical Engineering

- Mechanical Engineering with a concentration in nuclear engineering

Students also may be admitted under “undeclared engineering” for entrance to the College of Engineering. A field of study can be determined after the first semester. Students in undeclared engineering are subject to the change of major criteria listed by each department.

Master of Science

Biomedical Engineering
Computer Science
Engineering

- Engineering with a concentration in chemical and life science engineering
- Engineering with a concentration in electrical and computer engineering

Mechanical and Nuclear Engineering

Doctor of Philosophy

Biomedical Engineering
Chemical and Life Science Engineering
Engineering

- Engineering with a concentration in chemical and life science engineering
- Engineering with a concentration in computer science
- Engineering with a concentration in electrical and computer engineering

Mechanical and Nuclear Engineering

Dual degree

M.D./Ph.D. in Biomedical Engineering in participation with the School of Medicine

Interdisciplinary and cooperative studies degree

M.S. degree through the Commonwealth Graduate Engineering Program

Post-baccalaureate certificate

Computer Science
Cybersecurity
Data Science

Commonwealth Graduate Engineering Program

The Commonwealth Graduate Engineering Program is a collaborative effort of the University of Virginia, Virginia Commonwealth University, Virginia Polytechnic Institute and State University, Old Dominion University, and George Mason University. The University of Maryland Washington participates as a funded receive site.

See the College of Engineering Graduate Programs section of this bulletin for information on VCU's graduate programs in engineering.

Administration

Gregory Triplett, Ph.D.

Associate dean for graduate studies

The VCU Commonwealth Graduate Engineering Program director works closely with the other CGEP directors, the VCU Dean of the College of Engineering, and local businesses and industries.

Program description

Students who have baccalaureate degrees in engineering or strong backgrounds in the sciences may work toward a master's degree in engineering at VCU. Graduate engineering courses are available from the CGEP member universities via interactive television, the Web and two-way audio/video teleconferencing. In addition to the required engineering courses, elective courses are available in applied mathematics, mathematical statistics, chemistry, operations research and physics in classes at VCU. The following academic programs are available through CGEP:

- Chemical Engineering
- Civil and Environmental Engineering
- Computer Science
- Electrical and Computer Engineering
- Engineering Management
- Industrial and Systems Engineering
- Manufacturing and Design Engineering
- Materials Sciences and Engineering
- Mechanical and Aerospace Engineering
- Modeling and Simulation

Degree-seeking students

Students enrolling in the program should apply for admission in a given academic area of study and may select courses from any of the participating institutions, consistent with selected degree requirements.

Nondegree-seeking students

Qualified individuals may enroll in a particular course without pursuing a formal degree program of study. Admission will be based on the individual's academic preparation and the availability of space.

Admission requirements

Students should apply for admission to the CGEP university offering the desired degree program. Applicants should have a B average, but a successful professional experience may strengthen admission credentials. Three recommendations from persons who are qualified to give information concerning the applicant's probable success in the program and the completion of the Graduate Record Examination also are required.

Graduate information

Registration for graduate study

In the biomedical engineering program, all new students begin their course of study in the fall semester (August). Spring semester admissions require the recommendation of the graduate program director and consent of the chair and the associate dean for graduate studies.

Students may begin a course of study in either the fall or spring semesters for other engineering and computer science graduate programs; however, a start in the fall semester is preferred. For the CGEP, students may begin a course of study in either the fall or spring semester.

Engineering, Doctor of Philosophy (Ph.D.)

Note: Admission to this program is temporarily suspended.

Program goal

The goal of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge; an in-depth original research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. **Advanced research skills:** To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences in order to respond directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Communication:** To produce graduates who possess a facility with both written and oral communications so that engineers, researchers and professors will be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems stemming from the realization that new knowledge and new solutions to

existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

Graduates of the Ph.D. in Engineering degree program will be able to demonstrate:

1. The ability to apply advanced knowledge of mathematics, science or engineering
2. The ability to communicate effectively
3. The ability to identify, formulate and solve engineering problems
4. The ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jun 1 (Feb 15 for financial assistance)	GRE-General
	Spring	Nov 15	TOEFL required for international students

Special requirements

Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the doctoral degree in engineering must have a B.S. degree in engineering or a closely related discipline.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students entering the doctoral program with a B.S. degree, but not the M.S., will require a minimum of 60 post-baccalaureate credit hours beyond the bachelor's degree, including research credit hours (30 for M.S. level and an additional 30 for Ph.D. level).

Students holding the master's degree must complete a minimum of six credit hours in concentration course work, three credit hours in elective course work and 21 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research credit hours) beyond the master's degree. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credit hours per semester. Students

have a maximum of eight calendar years, beginning at the time of first registration to complete the Ph.D. degree program.

Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to degree candidacy

Before admission to doctoral candidacy, students must have:

1. Completed required course work
2. Successfully completed the comprehensive examinations
3. Fulfilled all additional departmental requirements

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

There are three components of each Ph.D. in Engineering curriculum:

1. Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.
2. Electives component: This component allows the student to take courses in either engineering or science with approval of the student's adviser.

3. Directed research component: This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

Curriculum requirements

M.S. to Ph.D. in Engineering

Course	Title	Hours
Concentration-specific component: ENGR course work		6
Electives: engineering or science course work		3
ENGR 697	Directed Research	21
Total Hours		30

Total graduate credit hours required (minimum) 30

B.S. to Ph.D. in Engineering

Course	Title	Hours
Concentration-specific component: ENGR course work		18
Electives: engineering or science course work		15
ENGR 697	Directed Research	27
Total Hours		60

The minimum total of graduate credit hours required for this degree is 60.

(<http://www.egr.vcu.edu/future-students/graduate-programs/>)

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in chemical and life science engineering

Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and

at a higher level, be capable of creative self-expression, conveying knowledge and leadership

3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. Demonstrate abilities in research: Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jun 1 (Jan 15 for financial assistance)	GRE-General
	Spring	Nov 15	International students require TOEFL (a minimum score of 100 in the TOEFL exam is required to be considered for financial assistance)

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the chemical and life science engineering concentration must have a B.S. degree in chemical engineering or a closely related discipline.

Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the College of Engineering's associate dean for graduate studies.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor's degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master's degree must complete a minimum of six credit hours in concentration course work and 18 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master's degree. No elective courses may be used for both M.S. and Ph.D.

degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, at the 600 level or above.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Ph.D. qualifying examinations

In order to advance to doctoral candidacy, the student must pass the written qualifying examination. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The written examination also assesses the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities and technical writing. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Admission to candidacy

Before admission to doctoral candidacy, students must have:

1. Completed required course work
2. Successfully completed the comprehensive examinations
3. Fulfilled all additional departmental requirements

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to the public. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

Curriculum requirements

M.S. to Ph.D. curriculum

Course	Title	Hours
Concentration component		
This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.		
Core courses (choose three)		9
CLSE 650	Quantitative Analysis in Chemical and Life Science Engineering	
CLSE 654	Equilibrium Analysis in Chemical and Biological Systems	
CLSE 655	Nonequilibrium Analysis in Chemical and Life Science Engineering	
CLSE 656	Advanced Chemical Reaction Engineering	
Directed research		
This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.		21
CLSE 690	Research Seminar in Chemical and Life Science Engineering	
CLSE 697	Directed Research in Chemical and Life Science Engineering	
Total Hours		30

For these students, the minimum total of graduate credit hours required for this degree is 30.

Students entering the doctoral program with a B.S. degree, but not the M.S., will require a minimum of 60 post-baccalaureate credit hours (30 for M.S. level and an additional 30 for Ph.D. level).

B.S. to Ph.D. curriculum

Course	Title	Hours
Concentration component - CLSE course work		
This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science

Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. **Advanced research skills:** To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.
3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

4. **Demonstrate abilities in research:** Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jun 1 (Jan 15 for financial assistance)	GRE-General
	Spring	Nov 15	TOEFL required for international students

Special requirements

- Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the associate dean for graduate studies.
- Students may begin a course of study in either the fall or spring semesters for the engineering graduate programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 35), and the College of Engineering, applicants must meet the following requirements:

Applicants to the Ph.D. in Engineering with a concentration in computer science must have an M.S. degree in computer science or a field closely related to computer science, such as mathematics, physics, engineering or bioinformatics. Outstanding students (preferably with a B.S. degree in computer science) can be admitted into the direct B.S. to Ph.D. program.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor's degree (typically a minimum of four years), or 30 credits beyond a master's degree (typically a minimum of three years), including research credits, is required for the Ph.D. in Engineering. Students may not present courses receiving grades less than C for fulfilling degree requirements and can only present up to six credit hours of course work receiving a grade of C.

A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Up to 30 percent of a student's required non-research graduate-level credits can be transferred into the Ph.D. program from another college or university. No more than 30 percent of student's non-research credits in graduate-level courses taken at VCU before admission to the Ph.D. program may be counted toward the Ph.D. degree.

A student will pursue a Ph.D. under the guidance of a computer science graduate faculty member who will serve as the dissertation adviser. Interdisciplinary programs of study that involve computer science and

another discipline are encouraged; however, a core of computer science courses is required. Courses not labeled CMSC must show relevance to the student's program of study and must be submitted for approval by the dissertation adviser. The advisory committee will conduct an annual review of student progress, with written minutes of committee recommendations prepared by student and signed by all advisory committee members.

The detailed requirements depend on the student's academic background.

Students with an M.S. in Computer Science or in a closely related field must take a minimum of 12 credit hours of didactic course work at the graduate level and 18 credit hours of directed research for a minimum of 30 credits.

- A minimum of four courses that should satisfy the following:
 - At least two courses at the 600 level or greater
 - At least one course from each of the following two foundational areas: theory and systems.
- In each semester while in the doctoral program, students must take the one-credit hour CMSC 702 course.

Other students, including those with only a B.S. degree, must take a minimum of 60 credit hours of course work.

- A minimum of 33 didactic credits, including
 - At least two courses from each of the three foundational areas: theory, systems and applied computer science; CMSC 501 **must** be one of the courses taken.
 - At least 17 credits at the 600 level or greater.
- In each semester while in the doctoral program, students must take the one-credit hour CMSC 702 course.
- A minimum of 18 credits of directed research is required.

The Ph.D. program is independent from the M.S. in Computer Science program. Credits earned while in the Ph.D. program cannot be used to satisfy the requirements of the M.S. in Computer Science degree. Students admitted to the Ph.D. program cannot switch to the M.S. in Computer Science program and cannot obtain an M.S. in Computer Science degree in addition to the Ph.D. degree. In exceptional circumstances, the computer science graduate committee may allow a student to graduate with an M.S. degree instead of the Ph.D. degree based on a petition submitted to the committee by the student's adviser; students cannot petition for it.

Comprehensive examinations

Before advancing to doctoral candidacy, the student must pass both qualifying and oral comprehensive examinations.

Qualifying comprehensive examination

The qualifying examination focuses on the subject matter deemed critical as a foundation in the program.

- **The examination is largely based on material covered in required course work and its application to theoretical and practical problems.**
- The examination will cover knowledge in three areas, and in order to pass students must score a minimum of 75 percent in each area.
 - The exam must include material based on CMSC 501 from the theory area and on at least one course from the systems foundational area.

- The third is the area of specialization based on courses to be decided by the dissertation adviser.
- Students are allowed to take the comprehensives based on courses they may not have taken at VCU, however, they have to satisfy the course requirements as mentioned above.
- Students can contact the lead professor for any area and obtain a list of topics that will be covered in the exam.
- The exam will be conducted a minimum of once a year and will be organized by the graduate director, with prior approval of the exam questions by the graduate committee.
- A student who fails the qualifying comprehensive exam is allowed one more attempt to pass it. The re-examination requires the approval of the student's advisory committee. A student who fails one area of the required three comprehensive exam areas must retake the exam in the failed area within the following year. The department may organize and schedule, no earlier than 60 days after the failed exam, a special comprehensive exam for such students. A student who fails two or more exam areas must retake the entire comprehensive exam at the regularly scheduled comprehensive exam within the following year.
- Graduate students may not take the comprehensive exam if their overall GPA falls below the minimum of 3.0.

Oral comprehensive examination

The oral examination (proposal defense), which follows only after successful completion of the qualifying examination, is administered to assess the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. The student is required to prepare a written proposal of original research and to defend it in front of the dissertation committee.

Admission to candidacy

Before admission to doctoral candidacy, students must have:

1. Completed required course work (students who entered the program through the B.S. entry point may be admitted to candidacy with six credit hours of electives not completed yet)
2. Successfully completed the comprehensive examinations

Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. There should be a student advisory committee meeting no later than three months prior to dissertation defense to certify student readiness to write, and this should be signed by all advisory committee members. When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee.

Final dissertation defense

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty and students.

Since the Ph.D. is awarded for completion of work on an original research problem, peer-reviewed evidence of the quality of this work, in terms of at least one accepted journal paper or published high-quality conference paper (publications should be in a student's research area), must be approved by the dissertation committee and the graduate committee before the final oral examination can be scheduled. Specific publication

requirements are available at the computer science department website as well as in the College of Engineering graduate handbook.

The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance.

Curriculum requirements

Program website: computer-science.egr.vcu.edu/graduate (<http://computer-science.egr.vcu.edu/graduate/>)

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in computer science/Computer Science Ph.D. with the University of Cordoba [dual degree]

Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning

and professional development. Graduates of this program will pursue careers in research and development or academia.

Program goals

1. **Advanced research skills:** To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.
3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. **Demonstrate abilities in research:** Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jun 1 (Jan 15 for financial assistance)	GRE-General
	Spring	Nov 15	TOEFL required for international students

All applicants to the dual-degree Ph.D. program with VCU and the University of Córdoba must meet all general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering. Applicants to the dual-degree Ph.D. program are selected from among the students already enrolled in either VCU's Ph.D. in Engineering computer science concentration or in the University of Cordoba's Ph.D. in Computer Science. The selection will be performed by the dual-degree Ph.D. program steering committee consisting of the chair and graduate program director of computer science at VCU and the chair and graduate program director of computer science at UCO.

Students need to apply to the dual-degree program after already being enrolled in the doctoral program at either VCU or UCO and before passing

the oral comprehensive examination. Students must have identified a dissertation adviser (and a co-adviser from the other institution).

To be admitted to the dual-degree program, VCU students must hold an M.S. degree in computer science with a minimum GPA of 3.0. To be admitted to the UCO Ph.D. program and into the dual-degree program, UCO students must fulfill the following requirements with regard to academic qualifications:

1. Applicants with degrees in engineering or architecture or any degree with 240 ECTS credits must have completed a research master's degree, including at least 16 ECTS credits for training in methodology and research, as well as a research dissertation.
2. Applicants with degrees in engineering or architecture or any degree with 240 ECTS credits who have completed a non-research master's degree (i.e. professional master's degree) must have completed additional training at the doctoral level in methodology and research equivalent to 16 ECTS credits, as well as a research project equivalent to 16 ECTS credits.
3. Graduates who have completed degrees, in accordance with EU law, worth a minimum of 300 ECTS credits, must have completed additional training at the doctoral level in methodology and research equivalent to 16 ECTS credits, as well as a research project equivalent to 16 ECTS credits.
4. Applicants with university qualifications who, prior to obtaining a place on a specialized health training course, have successfully completed at least two years of training as part of a program leading to an official qualification in any health sciences specialty, may be admitted directly or may be required to complete additional doctoral training as established by the academic committee for the doctoral program.
5. Applicants already holding doctorates under earlier university regulations or holding diplomas in advanced studies in accordance with the provisions of Royal Decree 778/1998 of 30 April, or who have demonstrated sufficient research ability in terms of Royal Decree 185/1985 of 23 January, may be admitted directly or may be required to complete additional doctoral training as established by the academic committee for the doctoral program.
6. Applicants holding master's degrees awarded in accordance with foreign education systems may be admitted to doctoral study without needing to have their degrees officially recognized, once the University of Córdoba has established that their degrees demonstrate a level of training equivalent to that provided by Spanish master's degrees, including the research training required under the present regulations, and entitles the holder to be admitted to doctoral studies in the country of issue. Admission does not, under any circumstances, imply official recognition of any previous degree held by the applicant, nor recognition for any purposes other than that of admission to doctoral study.
7. VCU students must complete all VCU Ph.D. degree requirements before the Ph.D. degree from the University of Cordoba may be awarded.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

A minimum of 30 graduate credit hours beyond the M.S. degree, including research credit, is required at VCU for the Ph.D. in Engineering with a concentration in computer science. Students must complete a minimum of 12 graduate credits hours (i.e., four courses) of didactic course work

and 18 graduate credit hours of dissertation research. At least half of the 12 didactic credits required must be at the 600 level or above. No elective courses may be used for both M.S. and Ph.D. degrees. The student adviser must approve all course work.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Students admitted into the Ph.D. program with a B.S. degree should refer to the program page for information on the Ph.D. in Engineering with a concentration in computer science (p. 56).

Didactic course work

VCU and UCO students in the dual-degree Ph.D. program will take four graduate courses: three from VCU (offered by VCU computer science faculty) and one from UCO (offered by UCO computer science faculty) as determined by the steering committee. The VCU courses include all approved graduate-level courses available to VCU computer science doctoral students. The following course is currently offered by UCO. The list of UCO courses will be updated every year by the steering committee.

54-22092014 Evolutionary Algorithms in Data Mining, 3 credit hour

The objective of this course is to introduce students to the field of evolutionary computation, as well as its applications to data mining problems. Genetic algorithms and genetic programming as well as evolutionary programming and evolutionary strategies will be covered. The second part of the course will focus on solving relevant problems in the field of data mining such as classification, regression, clustering, association rule mining, subgroup discovery and feature selection with EC approaches. Prerequisites: graduate standing. The course will be offered as an online course.

Foundation areas for computer science graduate studies include theory, systems and applied computer science. By the time of graduation, students must have completed at least one course from each of the following two foundation areas of theory and systems.

VCU faculty will deliver the courses for both VCU and UCO students (to the latter by synchronous broadcasting used currently for delivering M.S. programs to the Naval Surface Warfare Center at Dahlgren, while UCO will deliver its courses (one or more) to UCO and VCU students as asynchronous online course(s).

The courses will have identical names and will be cross-listed in the VCU and UCO bulletins and will be open to all VCU and UCO computer science students as long as there is at least one student from the dual-degree Ph.D. program enrolled in the course.

Students will register for the four required graduate courses at their universities and will pay their university tuition and fees, in spite of the fact that some will be delivered by the other university.

Dissertation committee

The dual-degree Ph.D. program dissertation committee will consist of the main adviser (from one university) and one co-adviser (from the other university) plus six members, three from VCU and three from UCO, for a total of eight members. The committee will be formed during the semester in which the student is admitted to the dual-degree program.

Admission to candidacy

Before admission to doctoral candidacy, students must have: (1) completed required course work, (2) successfully passed both written and oral comprehensive examinations and (3) fulfilled all additional departmental requirements.

Qualifying comprehensive examination

1. The qualifying comprehensive exam focuses on the subject matter deemed critical as a foundation in the program and is largely based on material covered in courses and its application to theoretical and practical problems
2. The qualifying comprehensive examination will cover knowledge in three areas and, in order to pass, students must score a minimum of 75 percent in each area.
 - a. The exam must include material based on CMSC 501 from the theory area and on at least one course from the systems area.
 - b. The third is the area of specialization based on courses to be decided by the dissertation adviser.
3. Students are allowed to take the exam based on courses they may not have taken, however, they still have to satisfy the course requirements as mentioned above.
4. Students may contact the lead professor for any area and obtain a list of topics that will be covered in the exam.
5. The exam will be conducted a minimum of once a year and will be organized by the VCU graduate program director, with prior approval of the exam questions by the graduate committee. The exam will be organized at the same date and time for VCU and UCO students. Students will be taking the exam in their home universities.
6. Students who fail the qualifying comprehensive exam are allowed one additional attempt to pass it. Students who fail one area of the required three qualifying comprehensive exam areas must retake the exam in the failed area within the following year. The department may organize and schedule, no earlier than 60 days after the failed exam, a special comprehensive exam for such students. Students who fail two or more exam areas must retake the entire qualifying comprehensive exam at the regularly scheduled comprehensive exam within the following year.
7. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. They also must have a minimum GPA of 3.0 on the courses covering the exam areas.

Oral comprehensive examination

The oral comprehensive exam requires students to prepare a written proposal of original research and to defend it in front of the dissertation committee. The oral comprehensive exam may be taken only after successful completion of the qualifying comprehensive exam.

Dissertation research and defense

During their studies, students must complete 18 credit hours of research at their own institutions. The student must conduct a substantial original investigation under the supervision of the advisers and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation, and all examiners are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to all members of the faculty. The final oral examination will be limited to the subject of the candidate's dissertation and related matters. A favorable vote of the candidate's advisory committee and no more than one negative vote shall be required for passing the final oral examination. All committee members must vote. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance. The UCO doctoral committee must approve/disapprove the defended dissertation.

International experience

Students, after passing comprehensive exams, will spend six months conducting research at the co-adviser's university. While abroad, the students must maintain full-time student status (to keep benefits such as a stipend) at their home institutions by registering for dissertation research credit hours. They will also need to register for one graduate credit hour at the co-adviser's university. (The UCO student would register for one VCU graduate credit hour while at VCU, and a VCU student for one UCO graduate credit hour while at UCO.) The hosting department is responsible for covering the cost of the one graduate credit-hour registration of the visiting student, in order for the student to qualify for health insurance.

Publication requirement

Students must publish at least one journal paper before the final defense takes place. Since the Ph.D. is awarded for completion of work on an original research problem, peer-reviewed evidence of the quality of this work, in terms of at least one journal paper (in a student's research area), must be approved by the dual-degree program dissertation committee and the graduate committee before the final dissertation defense may be scheduled. Specific publication requirements are available on the Department of Computer Science website as well as in the College of Engineering graduate handbook.

Curriculum requirements

Course	Title	Hours
VCU didactic course work		
Select nine credits from the three areas.		
Foundational area: theory		
Select at least one of the following:		3
CMSC 501	Advanced Algorithms (required)	
CMSC 526	Theory of Programming Languages	
CMSC 620/ CISS 624	Applied Cryptography	
CMSC 621	Theory of Computation	
Foundational area: systems		
Select at least one of the following:		3
CMSC 502	Parallel Algorithms	
CMSC 506/ EGRE 526	Computer Networks and Communications	
CMSC 608	Advanced Database	
CMSC/CISS 618	Database and Application Security	
CMSC 622	Network and Operating Systems Security	
Specialization area		

With dissertation adviser, select an additional three credit hours of CMSC course work or other engineering or science courses in MATH/OPER/STAT/EGRE	3
UCO didactic course work	
Select at least one course from the list of UCO offerings (updated each year by steering committee)	3
Directed research	
CMSC 697 Directed Research	18
Total Hours	30

The minimum total of graduate credit hours required for this degree is 30.

Typical plan of study

Students must apply to the dual program after being enrolled at either the VCU or UCO doctoral program and before passing the oral comprehensive examination, and must have a dissertation adviser (and a co-adviser from the other institution). The oral comprehensive exam should be completed by the end of the third year. Students must pass the qualifying comprehensive exam before taking the oral comprehensive exam. The plan of study is developed with the student adviser and co-adviser, taking into consideration the student's area of research.

Engineering, Doctor of Philosophy (Ph.D.) with a concentration in electrical and computer engineering

Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning and professional development. Graduates of this program will pursue careers in research and development or academia.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and

at a higher level, be capable of creative self-expression, conveying knowledge and leadership

3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. Demonstrate abilities in research: Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jun 1 (Jan 15 for financial assistance)	GRE-General; TOEFL or IELTS is required for international students
	Spring	Nov 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the Ph.D. in Engineering with a concentration in electrical and computer engineering must have a B.S. degree in electrical and computer engineering or a closely related discipline. Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the associate dean for graduate studies.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

A minimum of 60 credit hours beyond the bachelor's degree, including research credit hours, is required for the Ph.D. in Engineering. Students holding the master's degree must complete a minimum of six credit hours in concentration course work and 21 credit hours in dissertation research. The student's adviser must approve all course work. Ph.D. students must take a minimum of 30 credit hours (including research) beyond the master's degree. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the didactic credit hours required in the student's program must be those designated as exclusively for graduate students, that is, at the 600 level or above. Students may not present courses receiving grades lower than B for fulfilling degree requirements. More than six credits of C grades or lower in the student's transcript will be considered unsatisfactory performance and may result in termination from the program.

A minimum of three years of study, including research, is necessary to complete all requirements for the Ph.D. A period of residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credits per semester. A time limit of eight calendar years, beginning at the time of first registration, is placed on work to be credited toward the Ph.D.

Comprehensive examination (also referred to as the Ph.D. qualifier examination)

In order to advance to doctoral candidacy, the student must pass the comprehensive examination that is composed of written and oral parts. The examination focuses on the subject matter deemed critical as a foundation in the program and in the student's research area. It is based on the material covered in required course work and its application to theoretical and practical problems, as well as assessment of the student's proficiency and ability to comprehend and explain new knowledge in his/her area of study. Graduate students may not take the comprehensive exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the comprehensive exam. For further details, see the graduate program director or the program chair.

Proposal defense (also referred to as the Ph.D. candidacy examination)

The student should defend his/her research proposal within 36 months of enrollment. The purpose of the proposal defense is to assess the ability of the student to integrate information and display mastery of problem-solving capabilities in the chosen research area. The student is required to prepare a written dissertation proposal and to defend it in front of the doctoral advisory committee. The format of the proposal defense is an oral presentation by the candidate and questions by the doctoral advisory committee during and/or following the presentation. All committee members are required to vote, and a favorable decision with no more than one negative vote is required to pass the proposal defense. All members of the committee should be present at the dissertation proposal defense; in exceptional cases, the defense may go forward with one committee member other than the dissertation adviser absent, but the absent committee member must provide the student an opportunity to present and discuss the proposal before voting. Graduate students may not take the proposal exam if their overall GPA is less than 3.0. Students must also have a minimum GPA of 3.0 for courses within the program in order to take the proposal exam. For further details, see the graduate program director or the program chair.

Admission to candidacy

Before admission to doctoral candidacy, post-master's students must have completed all required course work and post-baccalaureate students must have no more than six credits of elective course work remaining. For candidacy, students must have also passed the comprehensive exam and the proposal defense and fulfilled all departmental requirements.

A student may seek admission to candidacy for the Doctor of Philosophy degree without first completing the research and thesis portion of the Master of Science degree.

Dissertation research

The student must conduct a substantial original investigation under the supervision of the permanent adviser and prepare a dissertation reporting

the results of this research and analyzing its significance in relation to existing scientific knowledge.

When the dissertation has been completed, copies in accepted form and style are submitted to the members of the advisory committee. The committee members decide upon the acceptability of the candidate's dissertation. A favorable unanimous vote is required to approve the dissertation for defense and all members are required to vote.

If the advisory committee accepts the dissertation for defense, the candidate appears before them for a final oral examination. This examination is open to public and is limited to the subject of the candidate's dissertation and related matters. There shall be an announcement of the candidate's name, department and title of dissertation, together with the day, place and hour of the final oral examination at least 10 working days in advance. All members of the doctoral advisory committee must be present at the dissertation defense; in exceptional cases, the defense may go forward if no more than one committee member other than the dissertation adviser is absent, but the absent committee member has to provide the student an opportunity to present and discuss the dissertation before voting. A favorable vote of the candidate's advisory committee, which can include no more than one negative vote, shall be required for passing the final oral examination. All committee members must vote.

Publication requirement

Peer-reviewed evidence of the quality of the dissertation work, in terms of at least one accepted or published reputable journal paper or published high-quality conference paper and a second manuscript submitted to a journal or a high-quality conference, must be approved by the doctoral advisory committee and the ECE graduate program director before the dissertation defense can be scheduled. These publications should be based on the student's dissertation research, with the student as the primary author.

Curriculum requirements

M.S. to Ph.D. curriculum

Course	Title	Hours
Concentration component		
EGRE course work (EGRE 500-level or higher or courses approved by the advisory committee): This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.		6
Option electives		
Engineering or science course work (including 500-level courses in EGRE, ENGR, EGRB, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM) approved by the advisory committee: This component allows the student to take courses in either engineering or science with approval of the student's adviser.		3
Directed research		
This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.		21
EGRE 697	Directed Research in Electrical and Computer Engineering	
Total Hours		30

For these students, the minimum total of graduate credit hours required for this degree is 30.

B.S. to Ph.D. curriculum

Course	Title	Hours
Concentration component

Program website: electrical-and-computer.egr.vcu.edu/graduate (<http://electrical-and-computer.egr.vcu.edu/graduate/>)

Engineering, Master of Science (M.S.)

Note: Admission to this program is temporarily suspended.

Program goals

The goal of the M.S. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. Advanced technical skills: To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences in order to respond directly to the higher goals of fulfilling

the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation

2. Communication: To produce graduates who possess a facility with both written and oral communications so that engineers will be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems stemming from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

Graduates of the M.S. in Engineering degree program will be able to demonstrate:

1. The ability to apply advanced knowledge of mathematics, science or engineering
2. The ability to communicate effectively
3. The ability to identify, formulate and solve engineering problems

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jun 1 (Feb 15 for financial assistance)	GRE-General
	Spring	Nov 15	TOEFL required for international students

Note: Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the master's degree in engineering must have a B.S. degree in engineering or a closely related discipline.

Note: Admission to this program is temporarily suspended.

Degree requirements

Thesis option

In addition to the VCU Graduate School graduation requirements (p. 31), students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours of concentration-specific course work, 12 credit hours in electives and six credit hours in thesis research. The student's adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser,

the student submits a copy to each member of the advisory committee. The student's advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student's adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student's advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

There are three components of each M.S. in Engineering thesis curriculum:

1. Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline. Students seeking to take course work and conduct their research in the engineering concentration must contact the graduate program coordinator or department chair of engineering for detailed information about that option.
2. Electives component: This component allows the student to take courses in either engineering or science with approval of the student's adviser. The option can be tailored to meet the individual student's academic goals and research interests.
3. Directed research component: This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student's adviser and the assistant dean for graduate affairs of the College of Engineering. The student's adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student's program must be designated as 600 level or above.

There are two components of each M.S. in Engineering non-thesis curriculum:

Concentration-specific component: This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.

Electives component: This component allows the student to take courses in either engineering or science with approval of the student's adviser.

The concentration can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the engineering concentration should contact the appropriate graduate program coordinator or department chair of engineering for detailed information about that option.

Curriculum requirements

Thesis option

Course	Title	Hours
Concentration-specific component: ENGR course work		12
Electives: engineering or science course work		12

ENGR 697	Directed Research	6
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

Non-thesis option

Course	Title	Hours
Concentration-specific component: ENGR course work		15
Electives: engineering or science course work		15
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

Engineering, Master of Science (M.S.) with a concentration in chemical and life science engineering

Program mission

The mission of the M.S. in Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. Advanced research skills: To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. Communication: To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Communicate effectively: Graduates will demonstrate an ability to communicate effectively.
3. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1 (Jan 15 for financial assistance)	GRE-General
	Spring	Nov 15	International students require TOEFL (A minimum score of 100 in the TOEFL exam is required to be considered for financial assistance.)

Note: Students may begin a course of study in either the fall or spring semester for the engineering programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the chemical and life science engineering concentration must have a B.S. degree in chemical engineering or a closely related discipline.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

Thesis option

Students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours in concentration course work, 12 credit hours in concentration electives course work and six credit hours in thesis research. The student's adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student's advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the

student's adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student's advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student's adviser and the assistant dean for graduate affairs of the College of Engineering. The student's adviser must review/approve all course work in advance of enrollment. At least half the credit hours required in the student's program must be designated as 600 level or above.

Curriculum requirements

There are three components of each M.S. in Engineering option:

1. **Concentration (option-specific) component:** This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.
2. **Option electives component:** This component allows the student to take courses in either engineering or science with approval of the student's adviser (e.g. CLSE, ENGR, CHEM courses at 500 level or higher)
3. **Directed research component:** This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.

The option can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the chemical and life science engineering concentration should contact the graduate program coordinator or department chair of chemical and life science engineering for detailed information about that concentration.

Thesis option

Course	Title	Hours
Concentration component - CLSE course work		
CLSE 650	Quantitative Analysis in Chemical and Life Science Engineering	3
CLSE 654	Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655	Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 656	Advanced Chemical Reaction Engineering	3
Choose additional CLSE course work at the 500 level or higher		
Option electives - engineering or science course work		
Select nine credit hours of course work		
Directed research		
Select six credit hours from the following:		
CLSE 690	Research Seminar in Chemical and Life Science Engineering	6

CLSE 697	Directed Research in Chemical and Life Science Engineering	
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

Non-thesis option

Course	Title	Hours
Concentration component - CLSE course work		
CLSE 650	Quantitative Analysis in Chemical and Life Science Engineering	3
CLSE 654	Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655	Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 656	Advanced Chemical Reaction Engineering	3
Choose additional CLSE course work at the 500 level or higher		
Option electives - engineering or science course work		
Select 12 hours of course work		
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1 (Jan 15 for financial assistance)	GRE-General; TOEFL or IELTS is required for international students
	Spring	Nov 15	

Note: Students may begin a course of study in either the fall or spring semesters for the engineering programs, although a start in the fall semester is preferred.

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the electrical and computer engineering option must have a B.S. degree in electrical engineering, computer engineering or a closely related discipline.

Students in the VCU's electrical engineering B.S. and computer engineering B.S. programs can apply to this M.S. program at the end of their junior year, if they have a minimum major GPA of 3.2 and minimum overall GPA of 3.0. These students are not required to complete the GRE-general exam and should be admitted to the M.S. program for the next term immediately following their last semester of undergraduate study. For admission to the M.S. program, these students must:

1. Fulfill all requirements for the B.S. degree in electrical engineering or computer engineering at VCU
2. Maintain a minimum major GPA of 3.2 and minimum overall GPA of 3.0
3. Complete a minimum of six credits of graduate course work in their senior year. Up to six credits of graduate course work which counted as technical electives toward requirements for the B.S. degree in electrical engineering or computer engineering can be counted toward the M.S. program.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

Thesis option

Students seeking the M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses (including research). Each student must complete 12 credit hours in concentration course work, 12 credit hours in concentration electives course work and six credit hours in thesis research. The student's adviser must review and approve all course work and thesis research credit hours. The total of all credit hours must be at least 30. No elective courses may be used for both M.S. and Ph.D. degrees. At least half of the didactic credit hours required in the student's program must be those designated as exclusively for graduate students, that is, those at the 600 level or above. Students may not present courses receiving grades lower than B for fulfilling degree requirements. More than six credits of C grades or lower in the student's transcript will be considered unsatisfactory performance and may result in termination from the program.

Each student must conduct an original investigation under the supervision of the permanent adviser and prepare a thesis reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. This study is reported in a thesis prepared in acceptable form and style. Upon approval of the thesis by the adviser, the student submits a copy to each member of the advisory committee. The student's advisory committee members examine the thesis and decide upon its acceptability. Each committee member reports to the student's adviser when the thesis is acceptable for defense. The thesis is approved for defense only if accepted unanimously. Upon approval of the thesis, the student appears for a final oral examination administered by the student's advisory committee. This examination of an M.S. candidate includes the subject matter of course work as well as the thesis.

Non-thesis option

Students seeking the non-thesis M.S. degree are required to take a minimum of 30 credit hours of approved graduate courses. Each student must complete 15 credit hours in concentration course work and 15 credit hours in option electives course work.

Each non-thesis student must have a plan of study by the end of the first semester or prior to completing nine credit hours. This plan of study (and all revisions) must be approved by the student's adviser and the assistant dean for graduate affairs of the College of Engineering. The student's adviser must review/approve all course work in advance of enrollment. At least half the didactic credit hours required in the student's program must be designated as 600 level or above. Students may not present courses receiving grades lower than B for fulfilling degree requirements. More than six credits of C grades or lower in the student's transcript will be considered unsatisfactory performance and may result in termination from the program.

Curriculum requirements

Thesis option

Course	Title	Hours
Concentration component		
EGRE course work (EGRE 500-level or higher or courses approved by the advisory committee): This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.		12
Option electives		
Engineering or science course work (including 500-level or higher courses in EGRE, ENGR, EGRB, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM) approved by the advisory committee: This component allows the student to take courses in either engineering or science with approval of the student's adviser.		12
Directed research component		
This component emphasizes research directed toward completion of degree requirements under the direction of an adviser and advisory committee.		
EGRE 697	Directed Research in Electrical and Computer Engineering	6
Total Hours		30

The option can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the electrical and computer engineering concentration should contact the graduate program coordinator or department chair of electrical and computer engineering for detailed information about that concentration.

The minimum total of graduate credit hours required for this degree is 30.

Non-thesis option

Course	Title	Hours
Concentration component		
EGRE course work (EGRE 500-level or higher or courses approved by the adviser): This component allows the student to pursue a series of courses that focus on a specific field of engineering and serve as the student's primary engineering discipline.		15
Option electives		
Engineering or science course work (including 500-level or higher courses in EGRE, ENGR, EGRB, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM) approved by the adviser. This component allows the student to take courses in either engineering or science with approval of the student's adviser.		15
Total Hours		30

The option can be tailored to meet the individual student's academic goals and research interests. Students seeking to take course work and conduct their research in the electrical and computer engineering concentration should contact the graduate program coordinator or department chair of electrical and computer engineering for detailed information about that concentration.

The minimum total of graduate credit hours required for this degree is 30.

Department of Biomedical Engineering

Henry J. Donahue, Ph.D.

Professor and chair

biomedical.egr.vcu.edu (<http://biomedical.egr.vcu.edu/>)

The Department of Biomedical Engineering offers programs at the baccalaureate, master's and doctoral level.

Biomedical engineering provides in-depth study in a variety of specialization areas including biomedical imaging systems, orthopaedic biomechanics, tissue and cellular engineering, biomaterials, artificial organs, human-computer interfaces, cardiovascular devices, rehabilitation and human factors engineering. The programs allow students to participate in cutting-edge research in one of the nation's most advanced engineering facilities. The department has ongoing collaborations with numerous industries, federal laboratories, the VCU science departments, the university's MCV Campus, the Hunter Holmes McGuire Veterans Affairs Medical Center, the Virginia BioTechnology Research Park and numerous biomedical and clinical programs throughout the VCU Medical Center's MCV Hospitals.

- Biomedical Engineering, Doctor of Philosophy (Ph.D.) (p. 72)
- Biomedical Engineering, Master of Science (M.S.) (p. 75)
- Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [combined] (p. 77)

Biomedical Engineering, Doctor of Philosophy (Ph.D.)

Program mission

The mission of the Doctor of Philosophy in Biomedical Engineering is to educate biomedical engineering students to be significant contributors in health care and in research and development in biomedicine and bioengineering. The curriculum closely links technical fundamentals in science, engineering and the life sciences, together with the ability to function on multidisciplinary teams, to communicate effectively and to achieve the knowledge tools necessary for lifelong learning.

Program goals

1. Provide students with a graduate education that prepares them for current and future challenges in biomedical engineering
2. Produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences — responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation

3. Produce graduates who possess a facility with both written and oral communications — emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
4. Produce graduates who demonstrate creativity and innovation in solving technological problems — stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Graduates possess the ability to formulate, analyze and solve problems, analytically and/or experimentally, in the biomedical engineering industry, in the clinical setting or in biomedical research. Graduates can work effectively in teams to solve biomedical and/or clinical problems including the interconnection of engineering and clinical personnel toward the solution of problems of compelling clinical and biomedical interest and need, with particular reference to the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills.

Student learning outcomes

1. Graduates will demonstrate an ability to apply advanced knowledge of mathematics, biomedical sciences and engineering.
2. Graduates will demonstrate an ability to communicate effectively.
3. Graduates will demonstrate an ability to identify, formulate and solve biomedical engineering problems.
4. Graduates will demonstrate an ability to conduct independent research.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jan 15	GRE-General; international students require TOEFL
	Spring	Oct 1	

Special requirements

- Acceptance of an applicant is based upon the recommendation of the admissions committee.

In addition to the general admission requirements of the VCU Graduate School (p. 35), biomedical engineering has the following admission criteria for all entering graduate students:

1. Minimum GPA of 3.0 during the previous 60 credit hours (for applicants with a B.S.)
2. Minimum GRE score of 300 (combined verbal reasoning and quantitative reasoning) including a minimum 150 on the quantitative reasoning
3. Minimum TOEFL score of 101 Internet-based for students whose first or native language is not English

Biomedical engineering will accept a maximum of six credit hours for transfer into the Ph.D. program if the original grades for such courses are B or higher (or equivalent).

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), the Ph.D. will require a minimum of 72 credit hours beyond the B.S. or a minimum of 60 credit hours beyond the M.S. Students may enter the Ph.D. program with either a B.S. or an M.S.

Comprehensive examinations

In order to advance to doctoral candidacy, the student must pass both written and oral comprehensive examinations. The written examination focuses on the subject matter deemed critical as a foundation in the program. The examination is largely based on material covered in required course work and its application to theoretical and practical problems. The oral examination, which follows successful completion of the written examination(s), is administered by a committee of three biomedical engineering faculty members and assesses the ability of the student to integrate information and display an appropriate mastery of problem-solving capabilities. For further details, see the graduate program director or the program chair.

Research adviser and graduate dissertation committee

Students will be expected to select a research adviser and dissertation committee within the first year of enrollment in the Ph.D. program. The dissertation committee will consist of five faculty members, including the primary research adviser, two faculty members from the biomedical engineering graduate program and two faculty members from outside of the biomedical engineering graduate program. This committee reviews and votes to approve or disapprove the student's dissertation research proposal and the final Ph.D. dissertation and oral defense. This committee also makes the final recommendation to award the Ph.D. degree.

Proposal presentation exam

Within one year of passing the qualifying examination the student will submit one copy of an original dissertation research proposal based upon their proposed research project to each member of his or her dissertation committee. The proposal consists of the research topic and proposed research plan. The proposal should include a thorough literature review of the topic and contain information sufficient to judge the feasibility, scope and potential impact of the research. The dissertation committee will then administer an exam based on the material submitted in the dissertation research proposal. The format of the exam is an oral presentation by the candidate with questions by the dissertation committee members. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the exam. If a student fails the exam, one re-examination may be given with the consent of the dissertation committee. Failure to pass the second exam will result in dismissal from the program.

Publication requirement

A Ph.D. student appearing for the final defense in the Department of Biomedical Engineering must provide evidence of a minimum of two manuscripts accepted for publication in peer-reviewed archival journals recognized by the ISI Web of Science at the time of defense. These publications should be based on the student's dissertation research and must also be acceptable to the student's dissertation committee. The student is expected to have served as the first author in one or more of the papers. Specific publication requirements are available on the department's website as well as in the School of Engineering graduate handbook.

Dissertation defense

No earlier than six months after passing the oral candidacy examination, the student will defend the dissertation in an open forum administered by the dissertation committee. At least two weeks prior to the defense, the candidate will submit a written copy of the dissertation to each committee member and schedule a date for the defense. The defense will be advertised and faculty and student colleagues will be invited to attend. During the defense, the student will present a detailed summary of their research project, which should be the original problem presented and approved during the proposal presentation exam. If a solution of the original problem proves elusive for reasons beyond the student's control, the student may be allowed to redirect the research with permission from the dissertation committee and find an alternate pathway to the solution of a redefined problem. The format of the dissertation defense will be a presentation by the student followed by questions from the dissertation committee and other attendees. After the first round of questions are completed, the non-committee members in attendance will be asked to leave and the dissertation committee members will hold a second round of questions in closed session. After the second round of questions is completed the student will be asked to leave and the committee members will deliberate privately. The problem presented and solved must be of sufficient importance and interest to warrant publication in a peer-reviewed journal in the student's area of specialization. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the dissertation defense. If a student fails the dissertation defense, one re-examination may be given. Failure to pass the second dissertation defense will result in dismissal from the program.

Students entering with a B.S. degree who are terminated from the Ph.D. program because of a failure to pass the QE, proposal presentation exam or dissertation defense (but not for other reasons such as academic dishonesty) will have the option to continue toward the M.S. in Biomedical Engineering.

Time limit

It is anticipated that students entering with a B.S. will complete the program in four years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of one credit hour per semester). All requirements for the Ph.D. must be completed within eight years of passing the qualifying examination.

It is anticipated that students entering with an M.S. will complete the program in three years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of one credit hour per semester). All requirements for the Ph.D. must be completed within six years of passing the qualifying examination.

Any student may request a one-year extension of the maximum time for extenuating circumstances such as a medical situation. The graduate program committee will review and approve or deny all such requests. The maximum time cannot be extended longer than one year. Students who do not satisfy the degree requirements within the maximum time will be dismissed from the program.

Because of the maximum time limits imposed on students in the Ph.D. program, the program does not accept part-time students.

Curriculum requirements

B.S. to Ph.D. in Biomedical Engineering

Course	Title	Hours
Required biomedical engineering courses		
EGRB 601	Numerical Methods and Modeling in Biomedical Engineering	4
EGRB 602	Biomedical Engineering Systems Physiology	4
Restricted electives		
Choose three courses from:		9
EGRB 507	Biomedical Electronics and Instrumentation	
EGRB 511	Fundamentals of Biomechanics	
EGRB 513	Cellular Signal Processing	
EGRB 521	Human Factors Engineering	
EGRB 603	Biomedical Signal Processing	
EGRB 613	Biomaterials	
Required courses in other departments		
GRAD 614	Introduction to Grant Writing	1
OVPR 603	Responsible Conduct of Research	1
Statistics (BIOS or STAT at 500 level or above)		3
Minimum elective courses		
e.g. EGRB, EGRM, ENGR, PHYS, MATH, BIOL, PHIS, BIOC at 500 level or above		12
Research		
EGRB 690	Biomedical Engineering Research Seminar	4
EGRB 697	Directed Research in Biomedical Engineering (required at a level to be determined by each student's graduate advisory committee)	34
Total Hours		72

For students entering with a B.S., the minimum total of graduate credit hours required for this degree is 72.

M.S. to Ph.D. in Biomedical Engineering

Course	Title	Hours
Required biomedical engineering courses

Biomedical Engineering, Master of Science (M.S.)

Program mission

The mission of the Master of Science in Biomedical Engineering program is to educate students to be significant contributors in health care and in research and development in biomedicine and bioengineering. The curriculum closely links technical fundamentals in science, engineering and the life sciences, together with the ability to function on multidisciplinary teams, to communicate effectively and to achieve the knowledge tools necessary for lifelong learning.

Program goals

1. Provide students with a graduate education that prepares them for current and future challenges in biomedical engineering
2. Produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
3. Produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership

4. Produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Graduates possess the ability to formulate, analyze and solve problems, analytically and/or experimentally, in the biomedical engineering industry, in the clinical setting or in biomedical research. Graduates can work effectively in teams to solve biomedical and/or clinical problems including the interconnection of engineering and clinical personnel toward the solution of problems of compelling clinical and biomedical interest and need, with particular reference to the biomedical engineering industry, in the clinical setting or in biomedical research. The career paths of BME graduates in these arenas would be enhanced as a result of these skills.

Student learning outcomes

1. Graduates will demonstrate an ability to apply advanced knowledge of mathematics, biomedical sciences and engineering.
2. Graduates will demonstrate an ability to communicate effectively.
3. Graduates will demonstrate an ability to identify, formulate and solve biomedical engineering problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1 (Jan 15 for financial assistance)	GRE-General; international students require TOEFL
	Spring	Oct 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), biomedical engineering has the following admission criteria for all entering graduate students:

1. Minimum GPA of 3.0 during the previous 60 credit hours (for applicants with a B.S.)
2. Minimum GRE score of 300 (combined verbal reasoning and quantitative reasoning) including a minimum 148 on the quantitative reasoning
3. Minimum TOEFL score of 101 Internet-based for students whose first or native language is not English

Biomedical engineering will accept a maximum of six credit hours for transfer into the M.S. program if the original grades for such courses are B or higher (or equivalent).

Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the department chair and the associate dean for graduate studies.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), this program is nominally a two-year program leading to the M.S. in Biomedical Engineering. Prior evidence of completion of physiology may result in a waiver of the requirements for this course as determined by the graduate program director and/or the department chair. These credit hours should be replaced by other graduate-level didactic course work reflective of the field of study. Each Master of Science student

must successfully complete a thesis describing his or her individualized research project. At the completion of the research, the student must present the research to the advisory committee and undergo an examination of the research results, thesis documentation and underlying educational foundation necessary to have successfully completed the research. Upon successful completion of the examination and thesis, the student may apply for graduation from Virginia Commonwealth University with the Master of Science in Biomedical Engineering.

Curriculum requirements

Course	Title	Hours
Required biomedical engineering courses		
EGRB 601	Numerical Methods and Modeling in Biomedical Engineering	4
EGRB 602	Biomedical Engineering Systems Physiology	4
Select at least three courses from the following:		9
EGRB 507	Biomedical Electronics and Instrumentation	
EGRB 521	Human Factors Engineering	
EGRB 603	Biomedical Signal Processing	
EGRB 604	Biomechanics	
EGRB 613	Biomaterials	
EGRB 616	Cell Engineering	
Elective courses (minimum)		6
e.g., EGRB, EGRM, ENGR, PHYS, MATH, BIOL, PHIS BIOC at 500 level or above ¹		
Research		
EGRB 690	Biomedical Engineering Research Seminar	1
EGRB 697	Directed Research in Biomedical Engineering ²	6
Total Hours		30

¹

The six credit hours listed are minimum elective courses required for graduation. However, a student's advisory committee may require additional electives reflective of the field of study.

²

Directed research (EGRB 697) is required at a level to be determined by each student's graduate advisory committee.

The minimum total of graduate credit hours required for this degree is 30.

Graduate program director

Christopher A. Lemmon, Ph.D.
Associate professor, Department of Biomedical Engineering
Email: clemmon@vcu.edu
(804) 827-0446

Additional contact

Program website: biomedical.egr.vcu.edu (<http://biomedical.egr.vcu.edu/>)

Medicine, Doctor of (M.D.)/Biomedical Engineering, Doctor of Philosophy (Ph.D.) [dual degree]

The M.D./Ph.D. program seeks to train physician-scientists for careers that bridge basic and clinical science. Physician-scientists will translate laboratory discoveries into better patient outcomes. The program begins two months prior to the first year of medical school. These students arrive on campus for orientation and complete two laboratory rotations before the start of medical school classes. They complete the pre-clinical phase of medical school and, after taking the first part of the U.S. National Medical Licensing Examination, enter a Ph.D.-granting department or program as a graduate student. Graduate-level course work, examinations and research will be guided by the dissertation adviser and the dissertation committee, with oversight by members of the M.D./Ph.D. steering committee. The main undertaking at this phase is laboratory research that leads to the Ph.D. dissertation. After completion of doctoral degree requirements, students move to the clinical year of medical school. Students may begin the clinical year of medical school immediately after completion of doctoral degree requirements, regardless of the time in the calendar year, and, 14 to 16 months later, may complete their medical school requirements. These students are exempt from the major part of the fourth year of medical school.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu/>).

Prospective students submit applications through the American Medical College Application Service. Upon review of the AMCAS documents, qualified applicants are sent supplemental admission materials, including an application for the M.D./Ph.D. program. Those invited to Richmond for interviews will spend one day in the standard interview for the School of Medicine and will spend a second day interviewing with members of the M.D./Ph.D. steering committee, as well as touring labs of faculty scientists.

Admission of medical students to the Ph.D. phase of training takes place formally following completion of the M-II year of M.D. training. A copy of the student file is transferred to the Office of Graduate Education and the individual is formally accepted to Ph.D. training by the VCU Graduate School.

The requirements for a combined professional school/graduate school degree in the School of Medicine are equivalent to those required of students seeking a graduate degree alone and are determined by the individual program.

For additional information, please see the program website at [mdphd.vcu.edu](http://www.mdphd.vcu.edu) (<http://www.mdphd.vcu.edu/>).

Graduate program director

Christopher Lemmon, Ph.D.

Associate professor, Department of Biomedical Engineering

Program website: biomedical.egr.vcu.edu (<http://biomedical.egr.vcu.edu/>)

Department of Chemical and Life Science Engineering

B. Frank Gupton, Ph.D.

Research professor and chair

chemical.egr.vcu.edu (<http://chemical.egr.vcu.edu/>)

Chemical and life science engineering represents the formal interaction of chemical engineering with the life sciences. VCU's Department of Chemical and Life Science Engineering is uniquely poised to bring these two premier disciplines together to form a program distinct in the nation. Programs are offered at the undergraduate and graduate levels.

Life science engineering — with interest areas including stem cell and stem cell-derived tissue engineering, biosciences/biotechnology, cellular engineering, biochips and biosensors, bioinformatics and molecular biocomputing, genetic and protein molecular engineering, environmental life science engineering, and molecular- and cellular-based therapeutics — is the fastest growing of all industries that currently employ engineers.

Chemical engineering and life science engineering share a broad range of common foundational knowledge bases, including the principles of mass and energy balances, transport phenomena and thermodynamics, surface and interfacial science, and reaction science and engineering. Strong academic and research programs in chemical and life science engineering will provide a wealth of exciting professional opportunities for successful graduates of the VCU program.

The bachelor's program offers concentrations in chemical engineering and life science engineering, and a chemical and life science engineering concentration is also available in the Master of Science in Engineering program, as well as the Ph.D. in Engineering program. The CLSE concentrations in the graduate-level programs are designed primarily for students who are interested in applying chemical and engineering principles toward important contemporary topics including process design, metabolic engineering, biosensor and biochip development, high-performance polymers in medicine and energy conversion, polymer surface science, and environmentally benign polymer processing technologies. Major emphasis is placed on chemical and life science engineering fundamentals with additional emphasis on applied chemistry and life sciences.

- Chemical and Life Science Engineering, Doctor of Philosophy (Ph.D.) (p. 77)

Chemical and Life Science Engineering, Doctor of Philosophy (Ph.D.)

Program mission

The mission of the Ph.D. in Engineering degree program is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge, an in-depth original research experience at the frontiers of engineering, and skills for lifelong learning

and professional development. Graduates of this program will pursue careers in research and development or academia.

1. **Advanced research skills:** To produce graduates who possess the necessary advanced analytical, technical and research skills in engineering and the sciences – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers, researchers and professors must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression, conveying knowledge and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.
3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.
4. **Demonstrate abilities in research:** Graduates will demonstrate the ability to identify pertinent research problems, to formulate and execute a research plan, to generate and analyze research results, and to communicate those results through oral presentations and written publications. Graduates will be able to creatively solve the research problems posed.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jun 1 (Jan 15 for financial assistance)	GRE-General; TOEFL required for international students
	Spring	Nov 15	

In addition to the **general admission requirements of the VCU Graduate School** and the School of Engineering, applicants to the chemical and life science engineering doctoral program must have a B.S. degree in chemical engineering or a closely related discipline.

International students will submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Services or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program. No minimum GRE score will be required for international students.

Non-native English speakers will provide evidence of proficiency in English by one of the following:

- A test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or 600 for the paper-based score
- An International English Language Testing System score minimum of 6.5 on the academic exam

Acceptance of an applicant is based upon the recommendation of the admissions committee with approval of the program chair and the School of Engineering's associate dean for graduate studies.

Special requirements

Admission to the Chemical and Life Science Engineering Ph.D. program requires that applicants demonstrate the following specific requirements:

- Proof of graduation from an accredited college or university or its equivalent with a degree in chemical engineering or a related discipline, such as petroleum engineering, biochemical engineering or materials science and engineering
- A minimum undergraduate GPA of 3.0 on a 4.0 scale in chemical engineering or a related discipline for at least the last two years of undergraduate work
- A minimum GRE score of 300 (150 in the verbal portion, and 150 in quantitative portion)
- A written statement of intent for pursuing graduate studies in chemical and life science engineering

Acceptance of an applicant is based upon the recommendation of the department's graduate admissions committee. The admissions committee is composed of the CLSE graduate committee, chaired by the graduate program director. The admission recommendation is based on an overall assessment of the applicant's potential for success in the program. The recommendations will be approved by the program director and the associate dean for graduate studies for the College of Engineering.

Transfer credits will not be counted towards core or required courses.

Degree requirements

In addition to the VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>), students must meet the following requirements.

The Chemical and Life Science Engineering Ph.D. program requires a minimum of 68 credit hours for students entering with a B.S. and a minimum of 45 credit hours for students entering with a M.S. degree.

Post-baccalaureate students undergo a course- and research-intensive program with 41 didactic credit hours and at least 27 research credit hours. The post-M.S. route requires 18 didactic credit hours and at least 27 research credit hours. At least half of the minimum required course work credit hours must be at the 600-level or higher.

To graduate, degree applicants must achieve an overall minimum grade point average of 3.0 on a 4.0 scale. Grades below a B will require remediation of the course as instructed by the course instructor. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program. Graduates must also achieve a passing performance on their qualifying and comprehensive examination.

Typically, a student entering with a B.S. degree requires around four years of study to complete the Ph.D. degree. A student entering with an M.S. degree requires around three years to complete the Ph.D. A period of

residence of at least three consecutive semesters is required. Residency is defined as registration for at least nine credit hours per semester. A time limit of seven calendar years, beginning at the time of the first registration, is placed on work to be credited toward the Ph.D., although the CLSE graduate committee may extend the time limit by one year, not to exceed the total of eight years.

Ph.D. qualifying examinations

To advance to doctoral candidacy, the student must pass the Ph.D. qualifying examination by the end of their first year of graduate study. The qualifying examination is in two parts.

Part I of the qualifying examination comprises the following topics: thermodynamics, non-equilibrium analysis, reaction engineering, and quantitative analysis. The examination is designed to assess knowledge and problem-solving skills fundamental to chemical and life science engineering. The core and foundational course work will prepare students for this part of the examination. Students may not take the examination if their overall GPA is less than 3.0. Students entering the Ph.D. program with a B.S. degree will be required to answer questions covering all four topic areas. Students entering the program with an M.S. degree will choose two out of the four topic areas. If unsuccessful on their first attempt, students will be allowed one additional attempt to pass the subject area questions in a re-examination. If they fail to pass on the second attempt, they will be asked to leave the program with an M.S. degree.

Part II of the qualifying examination has the same requirements for all students: an open-ended research question aimed at assessing critical thinking, research skills and technical writing. This will require submission of a written research proposal within a specified time period. The report will be graded by members of the program faculty who will be appointed in a rotating fashion each year. If unsuccessful on their first attempt, students will be asked to take a grant-writing course and work with their advisers to improve their research and writing skills. A second attempt will be provided to pass Part II in a re-examination. If a student fails to pass on the second attempt, they will be asked to leave the program with an M.S. degree.

The Ph.D. qualifying examination will be organized by the graduate program director who, with the CLSE graduate committee, will review all results and issue recommendations.

Dissertation committee

Following the qualifying examination, the research adviser will work with the student to select members of the dissertation committee. The dissertation committee should be formed within 12 months of selecting the research adviser, and no later than 24 months after enrollment. This committee will consist, at a minimum, of five members. Three members must be from the CLSE program faculty and two members must be from outside the program. The primary adviser will serve as the committee chair. The outside members may be from VCU, another university or from industry. All outside committee members must be members of the VCU graduate faculty. Those not already graduate faculty members must apply for membership via the dean of the VCU Graduate School. The selection of the research adviser and the dissertation committee is to be approved by the CLSE graduate program director.

Ph.D. proposal defense

A dissertation proposal must be presented for defense within 36 months from enrollment. The proposal defense will present progress in the

chosen research area and demonstrate problem-solving capabilities related to dissertation research.

The proposal defense has two parts: a written and an oral examination. The student is required to prepare a written dissertation proposal and to defend it in front of the dissertation committee. The proposal will include a research plan, initial results and a thorough literature review to judge the feasibility, scope and potential impact of the research. At the proposal defense, the candidate's oral presentation is followed by questions from the dissertation committee. A favorable decision with no more than one negative vote from the committee is required to pass.

Admission to candidacy

The admission to doctoral degree candidacy is a formal statement by the graduate student's faculty regarding the student's academic achievements and readiness to proceed to the final research phase of the doctoral program. Before admission to candidacy for the doctorate, a student in good standing must have:

- Completed required course work
- Successfully passed the qualifying examination and the oral comprehensive examination

Dissertation research and review

The student must complete at least 27 research credit hours conducting an original investigation under the guidance of the adviser. The student's dissertation committee will conduct a yearly review of progress based on a report prepared by the student. The student's report, along with written minutes of the dissertation committee recommendations, signed by all committee members will be submitted to the graduate program director.

Final dissertation defense

At the completion of the research, the student will prepare a dissertation reporting the results of this research. There should be a dissertation committee meeting no later than six months prior to dissertation defense to certify student readiness to write the dissertation. When the dissertation has been written, copies in the required form and style are submitted to the members of the dissertation committee. If the committee accepts the dissertation for defense, the candidate appears before them for a final oral examination.

The oral defense of the dissertation is open to all members of the community. There will be an announcement of the candidate's name, department and title of dissertation, specifying day, place and time of the final oral examination at least 14 days in advance. Following the presentation and questions, the candidate is excused and committee members vote. A favorable decision by the dissertation committee with no more than one negative vote is required for passing the examination. The committee can approve the final oral examination conditionally, subject to the corrections, to the satisfaction of either the adviser or the entire committee.

Publication requirement

To encourage research at the highest level and foster a spirit of innovation and discovery, it is important that the graduate students have conducted high quality original research. Peer-reviewed evidence of the quality of work, in terms of at least one accepted journal paper or published high-quality conference paper in a student's research area and a second manuscript submitted for review to a journal or a high-quality conference must be approved by the dissertation committee and the CLSE graduate committee prior to the Ph.D. defense.

Curriculum requirements

Total graduate credit hours required for post-baccalaureate students is 68 (minimum). Total graduate credit hours required for post-M.S. students is 45 (minimum).

The curriculum comprises the following components:

Core courses

This component is common to all students in the Ph.D. program, comprising three courses for a total of nine credits. Core courses provide foundational material for advanced courses and research, while providing the fundamental concepts critical to chemical engineering for all graduate students.

Research focus area courses

Students work with their research advisor to select courses appropriate for their research focus areas.

- Life science engineering

Course work will educate students on the principles of life sciences toward applications such as engineering better medicines, biochemical engineering (enzymatic pathways and cell growth) and using systems biology to model diseases as well as engineer biofuels. Students will select courses such as CLSE 560, CLSE 561, CLSE 563, CLSE 570, CLSE 660, CLSE 562 and CLSE 544.

- Chemical kinetics and process engineering

Course work will educate students on the principles of engineering pertinent to the development of large scale industrial processes (e.g. manufacture of chemicals, polymers and biologicals at the level of kilograms to tons) that can translate innovations from the laboratory to the marketplace. These engineering principles include the ability to design reactions and processes for the faster and more cost effective synthesis of drugs (synthetic and biological), understanding environmental mitigation strategies to reduce pollution and the design of catalysts for industrial processes. Students will select courses such as CLSE 549, CLSE 543, BNFO 530, MEDC 630 and ENVS 591 (environmental chemistry).

- Materials science and engineering

Course work will educate students on the principles of materials science relevant to chemical and life science engineering. These include the ability to evaluate, design, improve and fabricate unique materials for applications in human health (e.g. tissue engineering and regenerative medicine, medical devices, biosensors), energy and sustainability (e.g. novel batteries, economical solar energy, capturing carbon emissions) and the environment (e.g. health effects of nanomaterials, membranes for water purification). Students will select courses such as CLSE 675, ENGR 591 (introduction to materials science and engineering), CLSE 575, CLSE 645 and ENVS 602.

Seminar

All students will register for CLSE 690. This component will expose students to cutting-edge research from invited speakers and researchers from academia and industry each semester.

Directed research

All students will complete at least 27 credit hours of CLSE 697. This component emphasizes research directed toward solving an open, challenging problem under the guidance of the research adviser and dissertation committee.

B.S. to Ph.D. curriculum

Course	Title	Hours
Foundation courses		
CLSE 650	Quantitative Analysis in Chemical and Life Science Engineering	3
CLSE 656	Advanced Chemical Reaction Engineering	3
Core courses		
CLSE 654	Equilibrium Analysis in Chemical and Biological Systems	3
CLSE 655	Nonequilibrium Analysis in Chemical and Life Science Engineering	3
CLSE 690	Research Seminar in Chemical and Life Science Engineering (repeated over six semesters for six credits)	6
Seminar courses		
CLSE 690	Research Seminar in Chemical and Life Science Engineering (additional credits for B.S. degree entry students)	2

Department of Computer Science

Krzysztof J. Cios, Ph.D.

Professor and chair

computer-science.egr.vcu.edu (<http://computer-science.egr.vcu.edu/>)

The Department of Computer Science offers undergraduate and graduate programs. The Bachelor of Science in Computer Science is a rigorous, highly concentrated curriculum of computer science courses. It includes advanced study in several important areas of computer science and provides a strong foundation in this discipline. Every course is taught by full-time faculty members who also serve as advisers to both undergraduate and graduate students.

The master's degree program emphasizes continuing self-development of individuals currently engaged in science-, technology- and engineering-related fields. It prepares persons who have completed undergraduate majors in these fields for entry into careers in areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program. The program offers courses in a wide range of areas in computer science, including machine learning, artificial intelligence, cybersecurity and cloud computing, data mining, bioinformatics, and medical informatics.

- Computer and Information Systems Security, Master of Science (M.S.) (p. 87)
- Computer Science, Master of Science (M.S.) (p. 81)
- Computer Science, Master of Science (M.S.), accelerated Bachelor of Science in Computer Science to master's (p. 85)
- Cybersecurity, Certificate in (Post-baccalaureate graduate certificate) (p. 88)
- Data Science, Certificate in (Post-baccalaureate graduate certificate) (p. 90)

Computer Science, Master of Science (M.S.)

Program mission

The program is designed to develop skills and educate CS students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their

knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

Program goals

1. **Advanced software design skills:** To produce graduates who possess the necessary advanced analytical and technical skills in computer science – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Advanced problem-solving skills:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. **Computer science theory and concepts:** Graduates will demonstrate a solid understanding of the advanced theory and concepts underlying computer science.
2. **System design and implementation:** Graduates will demonstrate the ability, knowledge and technical skills to design and implement a computer-based system, process, component or program.
3. **Applications of computer science in multiple domains:** Graduates will demonstrate the ability to use the knowledge of computer science in order to solve problems in other domains.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements (thesis option only)

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for

continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **graduate-specific academic regulations section** for additional information on academic regulations for graduate students. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1	GRE-General
	Spring	Nov 1	TOEFL required for international students

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the M.S. program in computer science must satisfy the requirements outlined below.

Acceptance of an applicant is based upon the recommendation of the graduate committee with approval of the program chair and the associate dean for graduate studies.

Undergraduate education in computer science or in a related discipline or completion of Post-baccalaureate Undergraduate Certificate in Computer Science is highly preferred.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 30 credit hours at the graduate level. Students may not present courses receiving grades less than C for fulfilling degree requirements and can only present up to six credit hours of course work receiving a grade of C. Students may choose either a thesis or non-thesis degree program option. The thesis option is

suggested for students who have a strong research interest or those who wish to pursue a Ph.D.

At most, six non-CMSC credits may be applied toward the degree. Approval of the graduate committee is required before taking the credits.

Up to 30 percent of a student's required non-research graduate-level credits can be transferred into the M.S. program from another college or university. No more than 30 percent of student's required non-research credits in graduate-level courses taken at VCU before admission to the M.S. program may be counted toward the M.S. degree (see bulletin for the accelerated B.S-M.S. in Computer Science program for exception to this rule). The number of credits that may be transferred by students pursuing an M.S. in Computer Science through the Commonwealth Graduate Engineering Program is limited by CGEP policy to 50 percent of the required credits.

All transfer credits must be approved by the graduate committee and the Graduate School using the graduate course transfer form. These credits must not have been applied to any other degree (see bulletin for the accelerated B.S-M.S. in Computer Science program for exception to this rule); however, they may have been taken as part of a post-baccalaureate graduate certificate program.

Students must satisfy breadth requirements by taking two courses from each of the foundational areas. There are three foundational areas for computer science graduate studies: theory, systems and applied computer science.

Curriculum requirements

Non-thesis option ¹

Course	Title	Hours
Theory foundational area		
CMSC 501	Advanced Algorithms	3
Select at least one course from the following:		3
CMSC 510	Regularization Methods for Machine Learning	
CMSC 512	Advanced Social Network Analysis and Security	
CMSC 526	Theory of Programming Languages

1

Graduate course work only (500 level or higher) may be applied to a graduate degree with at least one half of required course work designated exclusively for graduate students (600 or higher).

2

Only selected sections of CMSC 591 and CMSC 691 count toward individual foundational areas. An up-to-date list of sections of these topics courses, including their assignments to foundational areas, is

available at computer-science.egr.vcu.edu/graduate/computer-science (<http://computer-science.egr.vcu.edu/graduate/computer-science/>).

3

Students seeking to take a research credit course must find a faculty adviser willing to supervise the research.

The minimum total of graduate credit hours required for this degree is 30.

Degree candidacy requirements (thesis option only)

In order to advance to master's candidacy, the student must:

1. Have completed required course work
2. Have a minimum 3.0 GPA in graduate course work

For fulfilling candidacy requirements:

1. Students may not present courses receiving grades less than C or not conforming to Graduate School graduation requirements. No more than six credit hours with a grade of C may be presented.
2. Students must be in compliance with candidacy requirements of VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>) and be in compliance with the time to degree, which is six years for a master's degree.
3. The student will produce a written thesis in the format specified by the VCU Graduate School and will publicly defend the thesis before a committee consisting of the thesis adviser, at least one other faculty member from the computer science program and a faculty member from outside of the computer science program.

Typical plan of study

Students should choose thesis or non-thesis option during their first semester of study. The non-thesis option is the default.

The typical plan of study for non-thesis option students involves doing between nine and 15 credit hours per semester and fulfilling the requirements of the program typically in three semesters.

A plan of study for thesis option students should be designed with the research adviser of the student to take into account the direction of thesis research.

Computer Science, Master of Science (M.S.), accelerated Bachelor of Science in Computer Science to master's

Students accepted into this selective program accomplish both the B.S. and M.S. degrees within five years by taking additional graduate courses within the first four years of the program. Up to two of these courses will count as open electives in the B.S. program and as didactic course work in the M.S. program.

Program mission

The program is designed to develop skills and educate CS students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

Program goals

1. **Advanced software design skills:** To produce graduates who possess the necessary advanced analytical and technical skills in computer science – responds directly to the higher goal of fulfilling the needs of industry, academe and research laboratories for effective, productive engineers, professors and researchers
2. **Advanced problem-solving skills:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. **Computer science theory and concepts:** Graduates will demonstrate a solid understanding of the advanced theory and concepts underlying computer science.
2. **System design and implementation:** Graduates will demonstrate the ability, knowledge and technical skills to design and implement a computer-based system, process, component or program.
3. **Applications of computer science in multiple domains:** Graduates will demonstrate the ability to use the knowledge of computer science in order to solve problems in other domains.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1 (Feb 15 for financial assistance)	GPA (see below)
	Spring	Nov 1	TOEFL required for international students

Students are selected from those already enrolled in B.S. in Computer Science program at VCU.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

In order to be accepted students must:

1. Apply to the computer science graduate committee during the first semester after they have completed the last of the following sequence of classes:

Course	Title	Hours
CMSC 255	Introduction to Programming	4
CMSC 256	Data Structures and Object Oriented Programming	4
CMSC 257	Computer Systems	4
CMSC 302	Introduction to Discrete Structures	3
CMSC 303	Introduction to the Theory of Computation	3
CMSC 311	Computer Organization	3

Transfer students who enter with all of these courses (or equivalents) must apply during their first semester at VCU.

2. Have a minimum GPA of 3.4 based on CMSC 255, CMSC 256, CMSC 257, CMSC 302, CMSC 303 and CMSC 311; all grades in any repeated courses will be included in computing this GPA. Students transferring these courses into the program will have the grades from their previous institution included in computing this GPA only for purposes of determining eligibility for this program.
3. Have a minimum overall GPA of 3.0.

In the last semester before graduating with the B.S. degree, the student will formally apply to the master's program. Providing the student has maintained a minimum GPA of 3.2 in the major, acceptance to the M.S. program is guaranteed. Accepted students are not required to complete the GRE for admission to the M.S. portion of the program.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 30 credit hours at the graduate level to graduate with the M.S. degree. Students must also complete the requirements for the B.S. degree in Computer Science.

Students accepted into this selective program accomplish both the B.S. and M.S. degrees within five years by taking additional graduate courses within the first four years of the program. Up to six credit hours will count as open electives in the B.S. program and as didactic course work in the M.S. program.

A student may choose either a thesis or non-thesis M.S. degree program. The thesis option is suggested for students who have a strong research interest or those who wish to pursue a Ph.D.

Curriculum requirements

Students accepted into the B.S.-M.S. program are allowed to transfer up to 12 graduate-level credits into the M.S. program, including up to six credit hours that were counted as open electives toward requirements for the B.S. degree.

After meeting all requirements for the B.S. degree, students in the program are eligible to take 600-level courses.

Apart from the exceptions above, all regulations outlined in the B.S. in Computer Science and M.S. in Computer Science bulletins apply toward the respective degrees.

Typical program of study

Before graduating with the B.S. degree, students in the program are expected to:

- Take six graduate-level didactic credits that will count as open electives toward their B.S. degree (that is, toward the requirements on total number of credits, upper-level credits and toward graduation GPA, but not as the required three CMSC technical electives) and as didactic credits toward their M.S. degree.
- Take an additional six graduate-level didactic credit hours that will count toward their M.S. degree but not toward the B.S. degree. In particular, these cannot be used to satisfy the total and upper-level credit requirements in the B.S. degree nor in calculating the B.S. graduation GPA.

Students cannot count more than six credit hours of non-CMSC courses toward the M.S. degree. Any non-CMSC graduate credits require approval of the graduate committee.

The typical full program of study in the accelerated B.S.-M.S. program is as follows:

Years 1-3

- Regular undergraduate program course work

Year 3

- Application to the accelerated B.S.-M.S. program

Year 4

- Remaining regular undergraduate program course work
- Six credit hours of CMSC 500-level courses, counted toward B.S. and M.S.
- Six credit hours of CMSC 500-level courses, counted toward M.S. only
- Application to the M.S. program

Year 5

Regular graduate program course work: 18 credits of CMCS 500-level and 600-level courses, counted toward M.S. only

Students must complete at least 50 percent of their graduate-level didactic credits at the 600-level for the M.S. degree; additional restrictions apply based on thesis and non-thesis study options as specified in the M.S. in Computer Science bulletin.

Program website: computer-science.egr.vcu.edu/graduate (<http://computer-science.egr.vcu.edu/graduate/>)

Computer and Information Systems Security, Master of Science (M.S.) [College of Engineering]

Program mission

The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

Program goal

Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU's program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student's ability to see the larger organizational, social, political, ethical and economic aspects of information security.

Student learning outcomes

Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree

candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE or GMAT
	Spring	Nov 1	TOEFL for international students

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the College of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component and an elective component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science.

Curriculum requirements

Students with an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems should be adequately prepared for the graduate curriculum. Students from other academic backgrounds may need to complete undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

Prerequisite courses

Course	Title	Hours
CMSC 312 or INFO 361	Introduction to Operating Systems Systems Analysis and Design	3
CMSC 355 or INFO 370	Software Engineering: Specification and Design Fundamentals of Data Communications	3
CMSC 401	Algorithm Analysis with Advanced Data Structures	3
CMSC 508 or INFO 364	Database Theory Database Systems	3
MATH 211 or CMSC 302	Mathematical Structures Introduction to Discrete Structures	3
STAT 212	Concepts of Statistics	3

Curriculum

Course	Title	Hours
Core component		
CISS/CMSC 618	Database and Application Security	3
CISS/CMSC 622	Network and Operating Systems Security	3
CISS 624/CMSC 620	Applied Cryptography	3
CISS 634	Ethical, Social and Legal Issues in Computer and Information Systems Security	3
CISS/INFO 644	Principles of Computer and Information Systems Security	3
INFO 646	Security Policy Formulation and Implementation	3
Elective component		
Choose four of the following courses. Students must select a minimum of one CMSC and one INFO course		12
CMSC 502	Parallel Algorithms	
CMSC 506	Computer Networks and Communications	
CMSC 525	Introduction to Software Analysis, Testing and Verification	
CMSC 612	Game Theory and Security	

CMSC 691	Special Topics in Computer Science
INFO 609	Data-centric Re-engineering Analysis/ Planning
INFO 611	Data Re-engineering
INFO 614	Data Mining
INFO 616	Data Warehousing
INFO 632	Business Process Engineering
INFO 641	Strategic Information Systems Planning
INFO 642	Decision Support and Intelligent Systems
INFO 691	Topics in Information Systems

Total Hours 30

The minimum total of graduate credit hours required for this degree is 30.

Cybersecurity, Certificate in (Post-baccalaureate graduate certificate)

The Certificate in Cybersecurity will train students to analyze and respond to threats against the security of computer systems. Students who complete the certificate will be able to assist software developers and system administrators by analyzing the security of databases, applications, networks and computer systems; assessing security risks and identifying vulnerabilities in computer and network systems; and developing methods and techniques for defending against a range of types of cyber attacks. The program will prepare graduates for entry into jobs as specialists in cyber defense for industry and the public sector.

Student learning outcomes

- Cybersecurity foundations:** Graduates will demonstrate a solid understanding of the foundational concepts underlying cybersecurity.
- Cybersecurity specialization:** Graduates will demonstrate the ability, knowledge and technical skills to assess and mitigate specific types of cybersecurity risk.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu/>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall (preferred)	Jun 1	TOEFL required for all international students
	Spring	Nov 1	

Admission criteria

The admission requirements outlined below apply to all students. All applicants to post-baccalaureate certificate programs are required to submit the online application form to VCU Undergraduate Admissions.

The Department of Computer Science also requires the following additional materials:

- Official undergraduate transcripts from all schools attended
- A resume stating relevant work experience
- A statement of purpose outlining career goals
- Three letters of recommendation – professional and/or academic

To be considered for admission to the certificate program, all candidates must satisfy the following requirements:

- Applicants must already have a bachelor's degree. A bachelor's degree in computer science or in a closely related discipline is highly preferred.
- Applicants must present an undergraduate minimum GPA of 3.0 and have completed at least one semester of calculus and one semester of discrete mathematics (VCU MATH 211 or equivalent), both with minimum grades of B.

Non-native English speakers will provide evidence of proficiency in English by one of the following methods:

- A Test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or score of 600 for the paper-based test

or

- An International English Language Testing System minimum score of 6.5 on the academic exam

Acceptance of an applicant is based upon the recommendation of the computer science graduate committee with approval of its director and the associate dean for graduate studies.

Students may transfer up to three credits from outside of the program to fulfill the program requirements. The transfer must be approved by the computer science graduate committee.

Degree requirements

All students must take four courses in total, including one course from the list of three restricted undergraduate electives, one course from the list of three restricted graduate electives and two other courses from the list of open electives.

Curriculum requirements

Course	Title	Hours
Restricted undergraduate elective (choose one)		3
CMSC 413	Introduction to Cybersecurity	
CMSC 414	Computer and Network Security	
CMSC 415	Introduction to Cryptography	
Restricted graduate elective (choose one)		3
CMSC 615	Cryptocurrency and Blockchain Techniques	
CMSC 618	Database and Application Security	
CMSC 622	Network and Operating Systems Security	
Open electives (choose two)		6
CMSC 512	Advanced Social Network Analysis and Security	
CMSC 525	Introduction to Software Analysis, Testing and Verification	
CMSC 612	Game Theory and Security	
CMSC 615	Cryptocurrency and Blockchain Techniques ¹	
CMSC 618	Database and Application Security ¹	
CMSC 620	Applied Cryptography	
CMSC 622	Network and Operating Systems Security ¹	
CMSC 628	Mobile Networks: Applications, Modeling and Analysis	
Total Hours		12

1

Course may be used as an open elective if not taken as a restricted elective.

The minimum total of credit hours required for this certificate is 12.

Data Science, Certificate in (Post-baccalaureate graduate certificate)

The Certificate in Data Science will train students in computer methods for analyzing big datasets generated by industry, research and government entities. Students will learn techniques for transforming the data into knowledge; developing algorithms for constructing computer systems that automatically learn from data; and tracking and evaluating new techniques and approaches in data science. The program will

prepare graduates for entry into jobs as specialists in data science for industry and the public sector.

Student learning outcomes

1. **Data science foundations:** Graduates will demonstrate a solid understanding of the foundational concepts underlying data science.
2. **Data science specialization:** Graduates will demonstrate the ability, knowledge and technical skills to process and analyze data in order to extract new insights.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Program website: computer-science.egr.vcu.edu/graduate (<http://computer-science.egr.vcu.edu/graduate/>)

Department of Electrical and Computer Engineering

Erdem Topsakal, Ph.D.
Professor and chair

electrical-and-computer.egr.vcu.edu (<http://electrical-and-computer.egr.vcu.edu/>)

The Department of Electrical and Computer Engineering prepares students for highly competitive, national placement in electrical and computer engineering employment and graduate education by providing a thorough grounding in electrical science and design, together with a sound foundation in mathematics, basic sciences and life skills.

The department offers baccalaureate degrees in computer engineering and electrical engineering, in addition to minors in both areas, as well as the option to choose course work appropriate for a pre-medicine or pre-dentistry curriculum. An electrical and computer engineering track is available in the Master of Science in Engineering as well as the Ph.D. in Engineering. The track is designed to prepare students for practice, research and/or teaching of electrical and computer engineering at the advanced level by providing intensive preparation for professional practice in the microelectronics, nanoelectronics, computer engineering, and controls and communications aspects of electrical and computer engineering. At the advanced level, this track prepares individuals to perform original, leading-edge research in the broad areas of microelectronics, nanoelectronics, controls and communications, and computer engineering.

The curricula of the department provide a strong foundation in the fundamentals of the profession, including engineering problem-solving, breadth in the major facets of the profession and the opportunity to specialize in today's critical areas of computer engineering, communication systems and microelectronics. Graduates will be well prepared for constant technological change and growth through lifelong learning.

Department of Mechanical and Nuclear Engineering

Gary Tepper, Ph.D.
Professor and chair

mechanical-and-nuclear.egr.vcu.edu (<http://mechanical-and-nuclear.egr.vcu.edu/>)

Mechanical engineering is one of the oldest and broadest engineering disciplines. Mechanical engineers design and analyze machines of all types including automobiles, airplanes, rockets, submarines, power generation systems, biomedical instrumentation, robots, manufacturing systems, household appliances and many, many more. In addition to well-known areas such as nuclear energy, nuclear propulsion and nuclear medicine, nuclear engineers are involved in many other applications of nuclear science and technology in fields as diverse as agriculture, industry, homeland security, forensics, environmental protection and even art. The Department of Mechanical and Nuclear Engineering provides quality graduate and undergraduate education through the following degree-granting programs:

- B.S. in Mechanical Engineering (general mechanical engineering curriculum)
- B.S. in Mechanical Engineering (nuclear engineering concentration)
- M.S. in Mechanical and Nuclear Engineering (thesis and non-thesis options, as well as online option)
- Ph.D. in Mechanical and Nuclear Engineering

Current areas of research within the department include but are not limited to energy conversion systems, smart materials, corrosion, medical devices, aerosol science, sensors, radiation detection and measurement,

nuclear reactor design, robotics, fluid mechanics, nanotechnology, and biomechanics.

- Mechanical and Nuclear Engineering, Doctor of Philosophy (Ph.D.) (p. 94)
- Mechanical and Nuclear Engineering, Master of Science (M.S.) (p. 98)

Mechanical and Nuclear Engineering, Doctor of Philosophy (Ph.D.)

Program mission

The Ph.D. curriculum will provide graduate-level training in both mechanical and nuclear engineering. Graduates of the program will be prepared for research and teaching careers in areas such as energy production, nuclear waste transport, storage and disposal, and the development of new mechanical devices for use in nuclear medicine. Technical electives in both mechanical and nuclear engineering will allow students to pursue in-depth study relevant to their selected research topics. Dissertation topics pursued as directed research credit hours will be devoted to open-ended research projects at the intersection of mechanical and nuclear engineering.

1. **Advanced technical skills:** To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
2. **Communication:** To produce graduates who possess a facility with both written and oral communications – emanates from the requirement that engineers must be able to interact and share ideas with others in the work environment, and at a higher level, be capable of creative self-expression and leadership
3. **Advanced problem-solving:** To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. **Apply advanced knowledge of mathematics, science or engineering:** Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. **Communicate effectively:** Graduates will demonstrate an ability to communicate effectively.
3. **Identify, formulate and solve engineering problems:** Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 15	GRE-General
	Spring	Oct 1	TOEFL required for international students

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following comprise the admissions requirements for the mechanical and nuclear engineering Ph.D. program:

1. Proof of graduation from an accredited college or university with either a bachelor's or a master's degree in mechanical engineering, nuclear engineering or a related discipline with a minimum grade point average of 3.0
2. Demonstration of proficiency in spoken and written English
3. Submission of results of the Graduate Record Examination (minimum score for admission to be established annually by the MNE graduate committee)
4. Submission of at least three letters of recommendation from former instructors or other individuals qualified to evaluate the applicant's ability to engage in graduate study in mechanical and nuclear engineering
5. Submission of a written statement of purpose that clearly demonstrates commitment to a career in mechanical and nuclear engineering

The MNE graduate committee may admit students unconditionally or provisionally. Provisional admission may be granted when deficiencies are identified; these deficiencies should be remedied by the time specified by the admissions committee. At the end of the provisional period, the student's progress is evaluated. Failure to meet the goals set forth by the MNE graduate committee at the time of admission results in a show-cause notice. A response to this notice that is deemed unsatisfactory results in a recommendation for dismissal. The student has the right to appeal the recommendation for dismissal following procedures set forth by the College of Engineering and the VCU Graduate School. Remedial courses, or those designed to remove deficiencies, will not be accepted for credit hours toward the fulfillment of the course requirements for the Ph.D.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), the Ph.D. degree will require a minimum of 68 credit hours beyond the B.S. degree or a minimum of 36 credit hours beyond the M.S. degree. Students may enter the Ph.D. program with either a B.S. or M.S. degree.

Transfer policy

Transfer courses must be approved by the MNE graduate committee and must fulfill all requirements of the VCU Graduate School as described in the student handbook. For students entering with a B.S. degree, a maximum of nine credit hours of technical electives may be transferred from another VCU program or outside institution and, if not applied previously toward another degree, may be applied toward the Ph.D.

Doctoral comprehensive oral examination guidelines

Goals

A comprehensive oral examination is used to determine admission of graduate students to Ph.D. candidacy in the Department of Mechanical and Nuclear Engineering. The CO exam is administered by the graduate examination committee (a standing committee of four MNE faculty members with rotating one year terms selected by the graduate program committee) with the goals of:

1. Assessing the student's understanding of MNE foundational material at the Ph.D. level
2. Evaluating the student's critical-thinking and problem-solving skills

3. Determining the student's ability to communicate ideas clearly and effectively

Format

The CO will be administered by the graduate examination committee, which is organized by the MNE graduate program committee as outlined in the graduate student handbook. The format of the CO is as follows:

- The student provides a brief presentation (~five slides). The student should provide a copy of his or her presentation to the committee at least one week prior to the CO exam detailing:
 - His or her academic background
 - Courses taken in graduate school at VCU (including a printed copy of the VCU transcript made available to committee members)
 - The remaining planned course of study
- The student then provides a brief presentation (~two to three slides) describing:
 - The expected dissertation research area
 - The proposed methods for addressing the research topic
- The GEC then presents questions in an oral format to the student.
- The question-and-answer session of the CO should not exceed 1 hour.
- After the question-and-answer component of the CO, the GEC meets in closed session to discuss their assessment of the candidate's responses and vote on admission to Ph.D. candidacy.

Assessment

The purpose of the CO is to assess items 1-3 provided under "Goals" in order to determine if the student should be admitted to Ph.D. candidacy. The committee will discuss the responses, including strengths and weaknesses observed. Correct answers are not required for a certain percentage of questions. Instead, the committee is to deliberate on the potential of the candidate to successfully complete the Ph.D. degree and become a successful professional. The committee then grades the student as pass or fail in each area of the goals. The committee also votes "yes" or "no" on admission to Ph.D. candidacy. A majority vote for promotion to candidacy is required for successful completion of the CO.

At least three (of the four GEC) voting committee members must be present in the CO exam and vote.

Preparation

To prepare for the CO exam, the student should review course work completed in the first year of graduate study as a Ph.D. student and foundational MNE undergraduate courses.

Scheduling

It is anticipated that the student will have completed two full semesters of courses in graduate school at VCU at the time of the CO exam and have a firm understanding of undergraduate concepts. The student must pass the CO before the end of their fourth semester (excluding summer sessions) as a Ph.D. student at VCU. The primary CO will be administered during the second week of the fall semester. The graduate coordinator will provide a sign-up list of available times to graduate students. A secondary CO will be offered in the second week of the spring semester of each year for students who started in the spring semester of the previous year and for second chance exams.

Successful completion of the CO

Upon successful completion of the CO, the student works with his or her adviser to develop the dissertation proposal document for presentation to the committee at the proposal presentation. The proposal

presentation will focus on the research topic an emphasis on objectives (or hypotheses) and a discussion of completed and future work.

Unsuccessful CO

In the event of an unsuccessful CO, the student may retake the exam once. The adviser is expected to work with the student on weaknesses identified by the committee. The CO is then re-administered and must be completed successfully within the first four semesters as a Ph.D. student at VCU. Failure to successfully complete the CO within the first four semesters is grounds for dismissal from the program. Special circumstances in scheduling within the four-semester timeline can be accommodated with written approval from the MNE graduate program director and approval from the student's primary adviser.

Benefits of the CO format

The CO is intended to benefit the student, primary adviser and department by:

- Providing feedback to the student at an early stage regarding admission to Ph.D. candidacy
- Critically evaluate Ph.D. candidates by committee consensus at an early stage
- Continue the development of well-trained successful Ph.D. applicants and professionals

For more information, contact the graduate program director.

Research adviser and graduate dissertation committee

Students will be expected to select a research adviser and dissertation committee within 12 months of enrollment in the Ph.D. program. The dissertation committee will consist of five faculty members, including the primary research adviser and at least two other faculty members from the mechanical and nuclear engineering graduate program. This committee reviews and votes to approve or disapprove the student's dissertation research proposal, oral candidacy exam, and the final Ph.D. dissertation and oral defense. This committee also makes the final recommendation to award the Ph.D. degree. All voting members of the committee must be members of the graduate faculty. Additional, nonvoting members may serve on the committee with the approval of the MNE graduate program director.

Proposal presentation exam

Within nine months after passing the qualifying examination the student will submit one copy of an original dissertation research proposal based upon their proposed research project to each member of his or her dissertation committee. The proposal consists of the research topic and proposed research plan. The proposal should include a thorough literature review of the topic and contain information sufficient to judge the feasibility, scope and potential impact of the research. The dissertation committee will then administer an exam based on the material submitted in the dissertation research proposal. The format of the exam is an oral presentation by the candidate with questions by the dissertation committee members. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the exam. If a student fails the exam, one re-examination may be given with the consent of the dissertation committee. Failure to pass the second exam will result in dismissal from the program.

Publication requirement

A Ph.D. student appearing for the final defense in the Department of Mechanical and Nuclear Engineering must provide evidence of a

minimum of two manuscripts accepted for publication in peer-reviewed archival journals recognized by the ISI Web of Science at the time of defense. These publications should be based on the student's dissertation research and must also be acceptable to the student's dissertation committee. The student is expected to have served as the first author in one or more of the papers. Specific publication requirements are available on the department's website as well as in the College of Engineering graduate handbook.

Dissertation defense

No earlier than six months after passing the oral candidacy examination, the student will defend the dissertation in an open forum administered by the dissertation committee. At least two weeks prior to the defense, the candidate will submit a written copy of the dissertation to each committee member and schedule a date for the defense. The defense will be advertised and faculty and student colleagues will be invited to attend. During the defense, the student will present a detailed summary of their research project, which should be the original problem presented and approved during the proposal presentation exam. If a solution of the original problem proves elusive for reasons beyond the student's control, the student may be allowed to redirect the research with permission from the dissertation committee and find an alternate pathway to the solution of a redefined problem. The format of the dissertation defense will be a presentation by the student followed by questions from the dissertation committee and other attendees. After the first round of questions are completed, the non-committee members in attendance will be asked to leave and the dissertation committee members will hold a second round of questions in closed session. After the second round of questions is completed the student will be asked to leave and the committee members will deliberate privately. The problem presented and solved must be of sufficient importance and interest to warrant publication in a peer reviewed journal in the student's area of specialization. A favorable decision by the dissertation committee with no more than one negative vote (all members are required to vote) shall be required to pass the dissertation defense. If a student fails the dissertation defense, one re-examination may be given. Failure to pass the second dissertation defense will result in dismissal from the program.

Students entering with a B.S. degree who are terminated from the Ph.D. program because of a failure to pass the QE, proposal presentation exam or dissertation defense (but not for other reasons such as academic dishonesty) will have the option to continue toward the M.S. in Mechanical and Nuclear Engineering.

Time limit

It is anticipated that students entering with a B.S. will complete the program in four years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of one credit hour per semester). All requirements for the Ph.D. degree must be completed within six years of passing the qualifying examination.

It is anticipated that students entering with an M.S. degree will complete the program in three years from the time the student passes the qualifying examination. Students must be continuously enrolled in the program (minimum of 1 credit hour per semester). All requirements for the Ph.D. must be completed within five years of passing the qualifying examination.

Any student may request a one-year extension of the maximum time for extenuating circumstances such as a medical situation. The graduate program committee will review and approve or deny all such requests.

The maximum time cannot be extended longer than one year. Students who do not satisfy the degree requirements within the maximum time will be dismissed from the program.

Because of the maximum time limits imposed on students in the Ph.D. program, the program does not accept part-time students.

Preparing Future Faculty Program

Students enrolled in the program will have the option and are strongly encouraged to participate in the Preparing Future Faculty Program. The VCU Graduate School provides graduate students with ongoing opportunities for academic and professional development. The PFFP at VCU offers a series of short courses and professional development opportunities for graduate students interested in pursuing careers in higher education. The series is modeled on the national PFFP created by the Association of American Colleges and Universities. PFFP courses introduce graduate students to the roles and responsibilities of higher education; address teaching, learning and technology issues in the college classroom; and incorporate material on the academic job search and continued professional development. For those students who complete all course requirements, the capstone course is an internship/externship experience during which the student is mentored by a senior faculty member. The program offers access to resources and activities and service-learning experiences while providing networking opportunities with students and faculty from a wide range of disciplines as well as discipline-specific areas of study. Since most courses are one or two credit hours, students are able to add them easily into their academic program schedules.

Curriculum requirements

Requirements for students entering with a B.S. degree

Course	Title	Hours
Core courses		
EGMN 604	Mechanical and Nuclear Engineering Materials	3
EGMN 605	Mechanical and Nuclear Engineering Analysis	3
EGMN 606	Mechanical and Nuclear Engineering Continuum Mechanics	3
EGMN 607	Heat and Mass Transfer Theory and Applications	3
EGMN 610	Topics in Nuclear Engineering	3
Technical elective component		
With the approval of your adviser or program director, select 21 credit hours of courses with the following rubrics: EGMN, EGRM, ENGR, EGRN, EGRB, EGRE, CLSE, CMSC, PHYS, MATH, NANO, CHEM, BIOL, GRAD, LFSC, OVPR.		21
Directed research component		
This component consists of dissertation research directed toward completion of Ph.D. degree requirements under the direction of a dissertation adviser and dissertation committee. Students can register for 1 to 15 credit hours of directed research in mechanical and nuclear engineering.		24
EGMN 697	Directed Research in Mechanical and Nuclear Engineering	
Seminar component		

EGMN 690	Mechanical and Nuclear Engineering Seminar	8
Total Hours		68

Notes:

1. A total of 21 credit hours from the core courses, technical electives or seminar (not including directed research credit hours) must be at the 600 level or higher.
2. In certain cases, independent study courses (EGMN 691) are offered by individual faculty members. Up to three credit hours of EGMN 691 may be taken as a technical elective course.
3. EGMN 610 is not required for students entering with a B.S. in Nuclear Engineering. A replacement course approved by the MNE graduate program director must be taken and will count toward the required 15 credits of core courses.

For these students, the minimum total of graduate credit hours required for this degree is 68.

Requirements for students entering with an M.S. degree

Course	Title	Hours
Core courses		
EGMN 604	Mechanical and Nuclear Engineering Materials ¹	3
EGMN 607	Heat and Mass Transfer Theory and Applications	3
EGMN 610	Topics in Nuclear Engineering	3
Directed research component		
This component consists of dissertation research directed toward completion of Ph.D. degree requirements under the direction of a dissertation adviser and dissertation committee.		24
EGMN 697	Directed Research in Mechanical and Nuclear Engineering	
Seminar component		
EGMN 690	Mechanical and Nuclear Engineering Seminar	3
Total Hours		36

Notes:

1. A total of nine credit hours of core courses and seminar but not including directed research credit hours must be at the 600 level or higher.
2. Students entering with an M.S. will follow the same curriculum as the students entering with a B.S. with the above noted reduction in required credit hours.
3. EGMN 610 is not required for students entering with a B.S. in Nuclear Engineering. A replacement course approved by the MNE graduate program director must be taken and will count toward the required 9 credits of core courses.

For these students, the minimum total of graduate credit hours required for this degree is 36.

Graduate program director

Karla M. Mossi, Ph.D.
Associate professor
kmmossi@vcu.edu

(804) 827-5275

Additional contact

Program website: mechanical-and-nuclear.egr.vcu.edu/academics/graduate/ (<http://mechanical-and-nuclear.egr.vcu.edu/academics/graduate/>)

Mechanical and Nuclear Engineering, Master of Science (M.S.)

Program mission

The mission of the M.S. in Mechanical and Nuclear Engineering degree is to provide graduate students with learning opportunities for acquiring a broad foundation of engineering knowledge including business and manufacturing aspects; an in-depth research experience at the frontiers of engineering; and skills for lifelong learning and professional development. Graduates of this program will pursue careers in business/industry and government, or will pursue doctoral degrees.

1. Advanced technical skills: To produce graduates who possess the necessary advanced analytical and technical skills in engineering and sciences – responds directly to the higher goals of fulfilling the needs of industry for effective, productive engineers and of providing economic development for the region, state and nation
2. Advanced problem-solving: To produce graduates who demonstrate creativity and innovation in solving technological problems – stems from the realization that new knowledge and new solutions to existing problems are necessary to meet the needs of our changing society and to advance the quality of human life

Student learning outcomes

1. Apply advanced knowledge of mathematics, science or engineering: Graduates will demonstrate an ability to apply advanced knowledge of mathematics, science or engineering.
2. Identify, formulate and solve engineering problems: Graduates will demonstrate an ability to identify, formulate and solve engineering problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

Student handbook (<http://www.egr.vcu.edu/current-students/graduate-student-services/resources-forms/>) is available on the College of Engineering website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Mechanical and Nuclear Engineering, Master of Science (M.S.)

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jan 15	GRE-General
	Spring	Oct 1	TOEFL required for international students

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Engineering, applicants to the mechanical and nuclear engineering degree must have a B.S. degree in mechanical engineering, nuclear engineering or a closely related discipline.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

The Master of Science in Mechanical and Nuclear Engineering program utilizes the faculty and research facilities of the Department of Mechanical and Nuclear Engineering to expose students to advanced and emerging technologies in mechanical and nuclear engineering. Research thrusts in the department include but are not limited to smart materials, micro/nanotechnology, energy conversion systems, sensors, aerosol science, nuclear engineering, fluid mechanics, medical devices, robotics and biomechanics.

The M.S. degree program offers a thesis or non-thesis option and can be tailored to meet the individual student's academic goals and research interests. Eighteen to 24 months of full-time study usually are necessary to complete the requirements for the thesis-option. The non-thesis option generally requires 12 months of full-time study or up to four years of part-time study. A time limit of six calendar years, beginning at the time of first registration, is placed on work to be credited toward the master's degree. Generally, a maximum of six credit hours of approved graduate course work required for a master's degree may be transferred from another program at VCU or outside institution and applied toward the degree.

The following are the minimum credit hour requirements for the proposed graduate degree program options:

M.S. thesis option – minimum 30 credit hours including nine credit hours in core courses, 15 credit hours in technical electives (engineering, science or related areas) and six credit hours in directed research EGMN 697

M.S. non-thesis option – minimum 30 credit hours including nine credit hours in core courses and 21 credit hours in technical electives (engineering, science or approved courses)

The mechanical and nuclear engineering M.S. degree program contains three curricular components:

1. **Core component:** This component consists of three required core courses that provide the foundation of the M.S. curriculum. See below for specific course requirements.
2. **Technical elective component:** This component allows the student to take courses in either engineering, science or other areas with approval of the student's adviser and graduate program director.
3. **Directed research component:** This component emphasizes research directed toward completion of M.S. degree requirements under the direction of an adviser and thesis committee.

Depending on the option pursued, students will have to take courses from two or all three of the curricular components. Students should select their concentration component courses based upon their concentration areas. Selecting one concentration area over another does not preclude a student from choosing courses from other areas.

Curriculum requirements

Core requirements

All full-time thesis master's students must register for and attend at least one semester of EGMN 690. Part-time and non-thesis students are not required to register for the seminar, but they are encouraged to attend.

Thesis option

Course	Title	Hours
Core courses, seminar and directed research		
EGMN 605	Mechanical and Nuclear Engineering Analysis	3
EGMN 606	Mechanical and Nuclear Engineering Continuum Mechanics	3
EGMN 610	Topics in Nuclear Engineering	3
Technical elective courses		
With the approval of the adviser or graduate program director, select 15 credit hours of courses with the following subject areas: EGMN, EGRM, ENGR, EGRN, EGRB, EGRE, CLSE, CMSC, PHYS, MATH, NANO, CHEM, BIOL, GRAD, LFSC, OVPR.		15
Directed research		
EGMN 697	Directed Research in Mechanical and Nuclear Engineering	6
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

Non-thesis option

Course	Title	Hours
Core courses, seminar and directed research		
EGMN 605	Mechanical and Nuclear Engineering Analysis	3
EGMN 606	Mechanical and Nuclear Engineering Continuum Mechanics	3
EGMN 610	Topics in Nuclear Engineering	3
Technical elective courses		
With the approval of the adviser or graduate program director, select 21 credit hours of courses from the following subject areas: EGMN, EGRM, ENGR, EGRN, EGRB, EGRE, CLSE, CMSC, PHYS, MATH, NANO, CHEM, BIOL, GRAD, LFSC, OVPR.		21
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

COLLEGE OF HEALTH PROFESSIONS

The College of Health Professions was established on Jan. 1, 1969, to provide an administrative structure for existing educational programs in allied health disciplines and to direct the development of new programs in response to the growing need for allied health manpower. At the outset, the college incorporated existing educational programs for hospital administration, medical technology, physical therapy, and radiologic technology and X-ray technicians.

In the years since its establishment, the college has grown significantly — developing unique, cutting-edge curricula and degree offerings in both traditional and nontraditional formats — to meet the increasing demand for allied health teachers, researchers and practitioners. Considered a leader in distance education, VCU's College of Health Professions offers the only interdisciplinary, Internet-based doctoral program in allied health in the country: the Ph.D. in Health Related Sciences. The college currently incorporates nine departments and offers programs at the baccalaureate, certificate, master's and doctoral levels.

Administration

900 East Leigh Street
Box 980233

Alexander F. Tartaglia, D.Min.
Senior associate dean

Angela Duncan, Ph.D.
Assistant dean for student affairs and community engagement

TBD
Interim assistant dean for research and innovation

Debra A. Ropelewski
Associate dean for fiscal affairs

T. Greg Prince, Ed.D.
Senior director of development

Jeffrey R. Lodge
Director of information technology

Accreditation

The College of Health Professions is an institutional member of the American Society of Allied Health Professions and the Virginia Association of Allied Health Professions. All of its programs are approved or accredited by the appropriate national professional or educational organizations.

Clinical laboratory sciences (bachelor's degree)

National Accrediting Agency for Clinical Laboratory Sciences

5600 N. River Road, Suite 720, Rosemont, IL 60018-5519; (847) 939-3597, (773) 714-8880 or (773) 714-8886 (fax); infor@naacls.org; naacls.org (<http://naacls.org>). Upon graduation the student is eligible to take the national examination for MLS given by the Board of Certification of the American Society for Clinical Pathology.

Health administration (master's and executive master's degrees)

Commission on Accreditation of Healthcare Management Education

Nuclear medicine technology (bachelor's degree in Clinical Radiation Sciences)

Joint Review Committee on Educational Programs in Nuclear Medicine Technology

Nurse anesthesia (master's, doctorate)

Council on Accreditation of Nurse Anesthesia Educational Programs (COA, 222 South Prospect Avenue, Park Ridge, Illinois, 847-692-7050). The COA is recognized by the U.S. Department of Education and the Council on Higher Education Accreditation to accredit programs of nurse anesthesia at the master's, post-master's and doctoral levels. Graduates of the master's program are eligible to take the examination for certification conducted by the Council on Certification of Nurse Anesthetists.

Occupational therapy (master's degree)

Accreditation Council for Occupational Therapy Education

Patient counseling (certificate)

Association for Clinical Pastoral Education

Physical therapy (D.P.T.)

Commission on Accreditation in Physical Therapy Education, American Physical Therapy Association

Radiation therapy technology and radiography (bachelor's degree in Clinical Radiation Sciences)

Joint Review Committee on Education in Radiologic Technology

Rehabilitation counseling (master's degree)

Council for Accreditation of Counseling and Related Educational Programs

Philosophy

The faculty of the college is committed to offering, through the establishment and maintenance of rigorous standards of excellence, educational programs that will prepare students for professional careers in the allied health disciplines. Development of professional attitudes, emotional maturity and ethical behavior of students is a vital component of the educational process. It is essential that students gain a deep respect for the dignity of human beings and the inherent rights of patients and others who receive services. The programs are designed to include not only the development of skills to assure excellence in

quality of health care, but also factual knowledge and experiences that will provide the basis for continuing intellectual and professional growth.

Community services of the college and faculty include continuing education, consultative resources and participation in all pertinent areas of health care. An integral part of these efforts is to stimulate and sponsor research activities in the allied health disciplines represented within the college and to encourage interdisciplinary research.

Programs

Both entry- and advanced-level undergraduate, graduate, professional and certificate programs are offered by the College of Health Professions. University and accreditation requirements for the individual programs guide the establishment of general admission prerequisites and course and degree requirements. Regulations and procedures for each program are outlined in these bulletins and are intended to ensure the selection of applicants whose motivation, ability, character and health status qualify them to pursue their program of study successfully.

Programs currently offered by this college and the degrees conferred on their graduates are:

College of Health Professions – Dean's Office

- Ph.D. in Health Related Sciences

Department of Clinical Laboratory Sciences

- Bachelor of Science
- Master of Science

Department of Gerontology

- Post-baccalaureate graduate Certificate in Aging Studies
- Post-baccalaureate graduate Certificate in Aging Studies and Doctor of Pharmacy (dual degree offered with the VCU School of Pharmacy)
- Post-baccalaureate graduate Certificate in Aging Studies and Master of Social Work (dual degree offered with the VCU School of Social Work)
- Master of Science

Department of Health Administration

- Master of Health Administration
- Master of Health Administration and Doctor of Medicine (dual degree offered with the VCU School of Medicine)
- Master of Health Administration and Juris Doctor (dual degree offered with the T. C. Williams School of Law at the University of Richmond and the Washington and Lee University School of Law)
- Master of Health Administration and Master of Science in Information Systems (dual degree offered with the VCU School of Business)
- Master of Science in Health Administration (Professional M.S.H.A. Program – Online)
- Ph.D. in Health Services Organization and Research

Department of Nurse Anesthesia

- Doctor of Nurse Anesthesia Practice
 - Entry-to-practice
 - Post-professional
- Master of Science in Nurse Anesthesia

Department of Occupational Therapy

- Occupational Therapy Doctorate

Department of Patient Counseling

- Post-baccalaureate graduate Certificate in Patient Counseling
- Master of Science
- Master of Science and Master of Divinity (dual degree offered with the School of Theology at Virginia Union University)

Department of Physical Therapy

- Doctor of Physical Therapy
- Ph.D. in Rehabilitation and Movement Science

Department of Radiation Sciences

- Bachelor of Science

Department of Rehabilitation Counseling

- Master of Science in Rehabilitation and Mental Health Counseling
- Post-master's Certificate in Professional Counseling

Licensure/certification

Graduates of most of the programs offered in the College of Health Professions are required or eligible to take national and/or state certification or licensure examinations. Requirements of licensing and certifying agencies vary. Some licensure and certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For information, prospective students should contact the licensure or certification agency for the specific allied health discipline.

Attendance regulations

The faculty considers attendance at lectures, laboratories and other functions a requisite to the successful acquisition of the knowledge and skills required of the professional. Hence, the faculty cannot condone absence without good reason from any regularly scheduled educational experience. At the beginning of each course, instructors relate to their classes the policy of the department concerning the attendance regulations for that semester. The nature of make-up work in the event of absence will be the prerogative of the instructor.

Student performance and behavior

The goals and objectives of the College of Health Professions and its component departments and programs relate to the education of persons preparing for professional careers in the allied health disciplines. An integral requisite of students and practitioners is an undeviating acceptance of a professional attitude and pride that will motivate them to adhere to a code of professional ethics and to develop fully their competencies for practice.

The suitability of student performance and behavior relating to these professions and to the consumers of health care is a paramount concern of the administration and faculty of this college. To assure a quality of educational and clinical preparation for its graduates, the following statement is promulgated:

- If, in the judgment of the faculty and administration of the College of Health Professions, a student is not considered suitable for

emotional, professional or related reasons, the student's academic status may be appropriately altered.

If any questions arise regarding the standards of performance or behavior, it is the responsibility of students to apprise themselves of acceptable character and conduct requirements prior to matriculation in the designated department or program.

Standards of professional behavior

These standards describe behaviors expected from the faculty and students of the College of Health Professions. They are in addition to those standards of behavior and ethical conduct required by the college's departments and professional organizations. They are supplemental to the university statement regarding conduct in the classroom.

- Recognize one's position as a role model of your profession for other members of the health care team
- Carry out academic, clinical and research responsibilities in a conscientious manner, making every effort to exceed expectations and demonstrating a commitment to lifelong learning
- Treat patients, faculty and students with respect, demonstrating sensitivity to diversity regarding ethnicity, culture, age, gender, disability, social and economic status, sexual orientation, etc., without discrimination, bias or harassment
- Maintain patient/client confidentiality
- Respect the privacy of all members of the campus community and avoid promoting gossip and rumor
- Interact with all members of the health care team in a collaborative and supportive fashion, with respect and recognition of the roles played by each individual
- Provide help or seek assistance for any member of the health care team who is recognized as impaired in his/her ability to perform his/her professional obligations
- Be mindful of the limits of one's knowledge and abilities and seek help from others whenever appropriate
- Abide by accepted ethical standards in the scholarship, research and practice of patient/client care
- Abide by the guidelines of the VCU Honor System

Financial aid

Financial aid is available for all students meeting the criteria for financial assistance. For details of the programs available contact the Financial Aid Office, Box 980244, Richmond, VA 23298-0244 or telephone (804) 828-9800.

The college and departments also offer financial awards, honors and scholarships. Details may be found on the college's and individual departments' websites at chp.vcu.edu.

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in clinical laboratory sciences

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical

laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT (taken within past 5 years)

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (**This requirement will not be waived.**)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay
- Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

- A completed application form from the applicant, including:
 - Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - A curriculum vitae
- Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
- GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

Applicants must be certified clinical laboratory scientists or a candidates with equivalent certification.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0,

a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in gerontology

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

An M.S. in Gerontology or other formal academic training in gerontology is preferred.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Program website: [phd.chp.vcu.edu \(https://phd.chp.vcu.edu/\)](https://phd.chp.vcu.edu/)

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in health administration

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the

dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director.

Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (This requirement will not be waived.)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay

6. Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
 - a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - b. A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application; a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

It is recommended that applicants have one to two years experience in the health care industry, and a master's degree in the health professions, public health or business-related disciplines.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible

to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in nurse anesthesia

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the

appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (**This requirement will not be waived.**)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay
- Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
 - a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - b. A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

CRNA certification is required.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer

conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Course	Title	Hours

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in occupational therapy

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic

methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (This requirement will not be waived.)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay
- Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

- A completed application form from the applicant, including:
 - Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - A curriculum vitae
- Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
- GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

If a U.S. resident, applicant must be board-certified by NBCOT. International applicants must show certification by the agency that provides certification in the therapist's home country or certification by the World Federation of Occupational Therapists if therapists do not have a certification agency in their home countries.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C.

Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in patient counseling

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/>)

[graduate/study/general-academic-regulations-graduate-students/degree-candidacy/](#)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and

defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-

month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (**This requirement will not be waived.**)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay
- Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

- A completed application form from the applicant, including:
 - Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - A curriculum vitae
- Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
- GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

Applicants must be certified as a professional chaplain or certification-eligible.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another

course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in physical therapy

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the

dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director.

Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (**This requirement will not be waived.**)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay
- Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

- A completed application form from the applicant, including:
 - Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - A curriculum vitae
- Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
- GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

If a U.S. resident, the applicant must have a current U.S. physical therapy license. International applicants must show certification by the agency that provides certification in the therapist's home country.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January,

will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in radiation sciences

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use

of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and present conclusions in the area of interdisciplinary health care using the appropriate methods
2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

- Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
- Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (**This requirement will not be waived.**)
- Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
- Demonstrate a record of professional competency and success
- Articulate clear professional and educational goals and written communication skills through the submission of a written essay
- Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

- A completed application form from the applicant, including:
 - Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - A curriculum vitae
- Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
- GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

Applicants must be certified by one of the following: ARRT, NMTCB or ARDMS.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Health Related Sciences, Doctor of Philosophy (Ph.D.) with a concentration in rehabilitation leadership

Program mission/purpose

The program will provide experienced health professionals with advanced knowledge and skills so that they may assume positions in teaching, research and administration upon graduation. It offers a curriculum with an interdisciplinary core of courses with concentrations in clinical laboratory sciences, gerontology, health administration, nurse anesthesia, occupational therapy, patient counseling, physical therapy, radiation sciences and rehabilitation leadership. The program emphasizes use of distance-learning technologies combined with traditional didactic methods. The curriculum is relevant, timely and meaningful to a multidisciplinary cohort of students.

Program goals

1. The program will provide students with the ability to understand and conduct research in health-related sciences.
2. The program will provide the student with the ability to analyze alternatives and develop responses in their disciplines to address the current and future challenges in health care.
3. The program will provide students with the skills to educate health professionals in their discipline using current principles of teaching and curriculum development.

Student learning outcomes

Students completing this doctoral program will:

1. Demonstrate the ability to conduct research, understand issues, design and execute research plans, analyze research results, and

present conclusions in the area of interdisciplinary health care using the appropriate methods

2. Demonstrate an in-depth knowledge in the area of specialization
3. Exhibit competency in translating research knowledge and principles into applied practice perspectives and skills
4. Display educational expertise in current principles and content of the allied health sciences and teach in the area of interdisciplinary health care practice
5. Display the ability to examine current issues and future changes in the health care environment from an interdisciplinary perspective
6. Exhibit knowledge and understanding of professional and ethical responsibility and conduct in the allied health professions
7. Demonstrate knowledge and understanding of the importance of cultural diversity in the delivery of health care and the formulation of health policy

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements (p. 26). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/degree-candidacy/>)

Admission to candidacy

Students are eligible to begin their dissertations upon written certification by the program director and associate dean of the Graduate School that

all predissertation/research requirements, including the comprehensive examinations, have been satisfied and that the student is prepared to proceed with the dissertation/research project. Copies of the certification will be forwarded to the student, the student's formal program adviser and the dean of the College of Health Professions. After admission to candidacy, students will proceed to propose, complete and defend their dissertations or three journal articles research requirement.

Enrollment requirement

Students are required to maintain continuous enrollment in ALHP 899 until completion of the requirements, including the defense process.

Dissertation and published research requirements

Dissertation/research committee

After successful completion of the comprehensive exam, the student nominates a dissertation/research committee, and the dissertation/research director submits the nominations in writing to the program director. Such committees will consist of a minimum of four graduate faculty members, one of whom will be outside the student's concentration area. The program director will provide written approval of the dissertation/research committee and clear such appointments with the appropriate administrative officials.

Dissertation/research standards

The dissertation or publishable research articles must represent independent research and should be based on an original research question or hypothesis. Generally, dissertations or publishable research articles will demonstrate the student's ability with empirical research, adhering to canons of (1) logic in conceptualization and design, (2) valid and reliable measurement, (3) appropriate analytic technique and (4) appropriate interpretation of results. Studies should be based on a formal theoretical or conceptually explicit framework for investigating a question or testing a hypothesis relevant to the allied health field.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements (p. 31). (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>)

Program completion requirements

The doctor of philosophy degree is awarded after (1) the minimum 51 credit hours of course work are completed, (2) comprehensive exams are passed, and (3) either a dissertation is written and defended orally or three first-author articles of publishable quality (on research undertaken by the doctoral candidate once enrolled in the program) are written and defended orally. The journal articles will be scrutinized for quality of scholarship by an internal research committee headed by the student's research adviser. All three articles must be approved by the internal research committee prior to submission.

Other information

Student handbook

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Facilities

The administrative offices for the program are located on the MCV Campus, at 1200 E. Broad St. (West Hospital, First Floor, East Wing).

Advising

Upon admission to the program, students will be assigned an interim adviser to guide them through the core courses and assist them as they consider their areas of research. All program advisers will have an earned doctorate and be members of the university's graduate faculty.

Students may change their interim advisers as their programs of study and interests evolve, if approved by the program director. Although discouraged, some students may wish to switch their area of concentration (changing from the department through which they were initially admitted to the program). Students who want to change concentration area must petition the doctoral program director. The petition must be approved by the program director, the DPAC and the appropriate department chair. There is no guarantee that the applicant will be accepted into the new concentration.

After successful completion of the comprehensive examinations, students will choose a dissertation chair that will serve as adviser and guide them through the research/dissertation process.

Computer requirements

All students admitted to the program must have a personal computer manufactured within the past two years and access to a high-speed Internet connection.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (begins end of June)	Mar 15 (Jan 15 for priority consideration; after Mar 15 considered on space-available basis)	GRE or MAT

Special requirements

- It is recommended that prospective applicants contact the program in advance of submitting an application to discuss research interests and the program's blended structure. When required, applicants must have a minimum Test of English as a Foreign Language score of 600. The Ph.D. program in health related sciences utilizes two six-month semesters per year (January through June and July through December), which include both on- and off-campus components.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following criteria:

1. Have an earned master's degree in an academic or allied health-related field from an accredited college or university; preference will be given to applicants who have a minimum cumulative GPA of 3.3 on master's-level work (The master's degree should be in one of the departmental areas of choice of concentration.)
2. Have GRE (verbal, quantitative and analytic writing) or MAT scores from within the past five years (**This requirement will not be waived.**)
3. Have completed a graduate course in statistics (including topics such as random variables, probability, distributions, descriptive statistics, hypothesis testing and inferential statistics) with a minimum grade of B
4. Demonstrate a record of professional competency and success
5. Articulate clear professional and educational goals and written communication skills through the submission of a written essay
6. Have any additional qualifications/certifications of the individual concentration¹

Prior to reviewing an application for admission, the program must receive:

1. A completed application form from the applicant, including:
 - a. Three letters of recommendation, two of which preferably are from sources qualified to assess the candidate's academic potential
 - b. A written statement of intent that discusses career goals and the manner in which this doctoral program will enhance those goals and what the applicant expects to contribute to this program
 - c. A curriculum vitae
2. Official transcripts indicating completion of baccalaureate and master's degrees (or equivalent) from an accredited college or university
3. GRE or MAT scores

Applicants whose applications are incomplete will be contacted periodically regarding missing materials. Incomplete applications will be held in the director's office until all materials are received.

Completed applications will be sent to the respective departmental representative of the College of Health Professions Doctoral Program Advisory Committee. Each department will then rank qualified applicants to its concentration and, based on a review of the application, a personal interview will be scheduled at the department's discretion for the top candidates.

The DPAC will meet to hear presentations from the departmental representatives regarding their rankings and recommendations and will then make final recommendations regarding the incoming class. The director and the dean of the College of Health Professions are responsible for the final decision.

Applicants will be notified by the Graduate Admissions office regarding the admission decision.

1

The ideal candidate will have a master's degree in rehabilitation counseling or eligibility to become a Certified Rehabilitation Counselor, as well as two years of postgraduate professional experience.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must successfully complete a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine credit hours of concentration courses and 12 credit hours of dissertation research), two comprehensive examinations, a research proposal defense and the final dissertation defense.

Curriculum structure

The proposed curriculum is designed to take four years to complete. Students spend the first two and one-half years (six-month-long semesters) completing course work. The final year and one-half is spent developing the doctoral dissertation. Research components are present in each year of the program, and a research emphasis is present throughout the entire curriculum. Students are required to designate the area of intended research in their concentration areas in the first year.

Each of the five course-work semesters is composed of both on- and off-campus components. On-campus sessions, scheduled during the end of June and beginning of July and at the beginning of January, will employ a rather traditional mix of educational technologies (e.g., lectures, seminars and assigned reading). During the off-campus component of each semester, students pursue their studies employing a wide variety of innovative educational technologies (e.g., computer conferencing, computer-aided instruction, videotape packages and programmed instructional material), in addition to assigned readings and the completion of various assignments and projects. Upon completion of the five semesters of course work, students are required to return to campus each semester until a research proposal has been developed and successfully defended.

Continuation requirements

After admission to the Ph.D. program, the student must maintain a minimum cumulative GPA of 3.0 in all of the course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency. Even with an overall minimum GPA of 3.0, a student may earn no more than two (six credit hours) grades of C. Students who receive a grade of D or F will be reviewed for continuation in the program by the department of their concentrations.

Students are expected to maintain continuous enrollment while in the program. Following the completion of the core course work, students must register for at least one credit hour each fall and spring semester for continuation in the program. A student who fails to register must have advance approval to do so or will be dropped automatically from the program and must reapply for reinstatement. The maximum time to complete all of the requirements for the degree is eight calendar years from the date of entry into the program.

Course transfer or waiver

A maximum of 25 percent of the course work other than research may be transferred from another VCU program or outside institution and applied toward the Ph.D. course requirements. Transfer and waiver credit is given at the discretion of the program director after consultation with appropriate faculty members, subject to university approval. Courses taken as requirements for other degrees are not transferable. A waiver may be warranted if an equivalent course was taken. However, another course must be substituted for the waived course in order to fulfill the requisite 51 credit hours needed for degree completion.

Comprehensive examination

The purpose of the comprehensive examination is to provide a vehicle through which students can demonstrate the ability to integrate their educational experiences by adequately addressing complex questions pertinent to the current and developing knowledge of the allied health fields. Students are eligible to take each of the two comprehensive examinations upon successful completion of the appropriate core course work. The core exam must be taken within six months of completing the methods exam.

Two written examinations will be administered, one for the common interdisciplinary core and one for the research methods core. A three-member graduate faculty committee will develop and administer each exam. This committee will be made up of two members of the core faculty and one member appointed by the program director. Each exam will be offered once in the fall semester and once in the spring semester. Prior to completion of the semester in which students become eligible to take each exam, they must submit a formal statement of intent to the program coordinator.

Students who receive a failing grade on the initial attempt will have one opportunity to repeat each comprehensive examination. Failure to pass an exam on the second attempt will result in dismissal from the program.

Curriculum requirements

The program curriculum consists of a total of 51 credit hours (18 credit hours of common interdisciplinary core courses, 12 credit hours of research methods core courses, nine hours of specialty concentration courses and 12 hours of dissertation research).

Department of Clinical Laboratory Sciences

Teresa S. Nadder, Ph.D., MLS(ASCP)^{CM}
Associate professor and chair

cls.chp.vcu.edu (<https://cls.chp.vcu.edu/>)

The Department of Clinical Laboratory Sciences supports the philosophy and mission of the university and the College of Health Professions, and provides an environment that nurtures excellence in education, research and service. The programs offered by the department are dedicated to enhancing and promoting clinical laboratory science. The department fosters fair and equitable educational experiences for students of all ages and diverse backgrounds. Strong affiliations with clinical educators and the integration of innovative technology in the academic setting facilitate both the education and research goals of the department.

The department provides students with superior studies in clinical laboratory science, including both theoretical and applied clinical education, and develops problem-solving expertise, leadership capabilities and communication skills. By providing advanced theoretical and technical education, the graduate program serves to maintain and update the competency of laboratory professionals and to prepare students to assume roles as laboratory supervisors, university educators and researchers. A mature, responsible approach to the acquisition of knowledge is cultivated in order to establish continuing intellectual growth and an enthusiasm for the profession.

The department meets the growing health care needs of the community by providing highly competent and professional clinical laboratory scientists who will be able to function effectively upon entrance into the field and be prepared to explore future scientific and technological advances in laboratory science. And the department promotes continued professional development and personal growth for the faculty and staff to fulfill and balance the individual's abilities and aspirations with the departmental, college and institutional mission and needs. Members of the department conduct themselves in a forthright, ethical manner and practice the highest standard of quality performance.

The objectives of the Department of Clinical Laboratory Sciences are:

- To provide an educational program that prepares students to accurately perform and evaluate analytical tests on body fluids, cells and products
- To foster the development of professional conduct, interpersonal communication skills and ethical principles
- To develop and promote strategies for lifelong learning and to encourage continued professional growth through research, continued education and active participation in professional societies

History

Clinical laboratory scientists have been trained on the MCV Campus since 1927. However, the Department (formerly school) of Medical Technology was not formally established until 1952, at which time the curriculum

included six months of didactic experience with lectures and laboratory sessions held in the department, followed by a six-month rotation through the clinical laboratories. The school offered a certificate and/or bachelor's degree program; the certificate program was discontinued during the 1961-62 school year.

In 1974 the curriculum was expanded to the current two-plus-two year program in which students complete 60 semester hours of prerequisites followed by two years of professional course work. The graduate program in clinical laboratory sciences was started in 1967 to provide advanced education for certified medical technologists/clinical laboratory scientists. In 1985 the program was modified to allow candidates holding a degree in another area of science to obtain graduate education in clinical laboratory sciences.

In 1994, the department name was changed to the Department of Clinical Laboratory Sciences. In 2003, an accelerated track was initiated to integrate the undergraduate and graduate programs, which requires completion of two years of prerequisites and three years of full-time professional course work, and leads to the simultaneous awarding of both the bachelor's and master's degrees.

Facilities

The Department of Clinical Laboratory Sciences is located in the Randolph Minor Hall on the MCV Campus. All faculty and clerical offices are located in this facility, as well as student classrooms, general teaching laboratory, computer facilities and a student lounge/reading room.

- Clinical Laboratory Sciences, Master of Science (M.S.), advanced master's concentration (p. 137)
- Clinical Laboratory Sciences, Master of Science (M.S.), categorical concentration (p. 140)
- Clinical Laboratory Sciences, Master of Science (M.S.), accelerated Bachelor of Science in Clinical Laboratory Sciences (B.S.) to master's (p. 143)

Clinical Laboratory Sciences, Master of Science (M.S.), advanced master's concentration

Program goals

The Department of Clinical Laboratory Sciences provides students with advanced theoretical and technical education and prepares them to assume roles as laboratory supervisors, educators and researchers.

Student learning outcomes

1. Demonstrated professional and leadership conduct
2. Demonstrated ability to research and evaluate laboratory testing-related issues

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

All students will be given a handbook on policies and regulations at orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jun 1	Satisfactory scores on the GRE; minimum TOEFL of 600 (paper), 250 (computer) or 100 (IBT); or minimum IELTS score of 7.0 for international students whose native language is not exclusively English
	Spring	Nov 1	

Special requirements

- Applicants holding baccalaureate degrees in clinical laboratory sciences/medical technology and generalist certification by the Board of Certification of the American Society for Clinical Pathology are eligible for the advanced master's concentration.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the general entrance requirements for the Master of Science in Clinical Laboratory Sciences for the advanced master's concentration are:

- Baccalaureate degree from an accredited college or university with a major in clinical laboratory sciences (medical technology)
- National certification as a medical laboratory scientist or equivalent level
- Minimum undergraduate GPA of 3.0 on a 4.0 scale for at least the last two years of undergraduate work
- Three letters of recommendation from employers or recent instructors addressing academic potential
- Satisfactory interview

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the advanced master's concentration are required to complete a minimum of 34 graduate credit hours to include 20 credits from core courses and 14 credits from discipline-specific courses.

In addition to the basic science requirement, each student may choose an area of secondary emphasis in biomedical research, education, management or business.

- In lieu of 12 of the 14 credit hours of discipline-specific courses, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas.

- No more than 12 graduate credit hours in the area of the secondary emphasis may be applied toward the required curriculum minimum of 34 credits.

Full-time candidates require a minimum of two academic years to complete the program. Part-time students must complete all work requirements within six years. An interruption in registration in excess of one semester requires prior approval of the department.

In addition to these requirements, the department faculty will review continuation in the program if:

- A student fails to achieve a minimum GPA of 3.0
- A student receives a D or F in a course.
- A student receives a grade of C on more than one CLLS graduate course or more than nine graduate credit hours (CLLS and non-CLLS credits)
- A student receives a grade of U (unsatisfactory) on required graduate course work
- A categorical master's student receives a grade less than a B in undergraduate course
- A student fails to demonstrate appropriate professional responsibility

Curriculum requirements

MKTG 671	Marketing Management

Total Hours 34

1

Specific courses will depend on the individual student's choice of specialty. The basic science requirement may be distributed among approved courses listed in the VCU Graduate Bulletin. Other courses may be approved.

2

In lieu of 12 of the 14 credits in discipline-specific courses, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas. No more than 12 graduate credit hours in the area of the secondary emphasis may be applied to the required curriculum minimum of 34 credits.

The minimum total of graduate credit hours required for this degree is 34.

Graduate program director

Teresa S. Nadder, Ph.D., MLS(ASCP)^{CM}

Associate professor and chair, Department of Clinical Laboratory Sciences

Email: tsnadder@vcu.edu

Phone: (804) 828-9469

Program website: sahp.vcu.edu/departments/clsc (<http://www.sahp.vcu.edu/departments/clsc/>)

Clinical Laboratory Sciences, Master of Science (M.S.), categorical concentration

Program goals

The Department of Clinical Laboratory Sciences provides students with advanced theoretical and technical education and prepares them to assume roles as laboratory supervisors, educators and researchers.

Student learning outcomes

1. Demonstrated professional and leadership conduct
2. Demonstrated ability to research and evaluate laboratory testing-related issues

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

All students will be given a handbook on policies and regulations at orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jun 1	Satisfactory scores on the GRE; minimum TOEFL of 600 (paper), 250 (computer) or 100 (IBT); or minimum IELTS score of 7.0 for international students whose native language is not exclusively English
	Spring	Nov 1	

Special requirements

- Applicants must possess the essential technical abilities and skills described below.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the general entrance requirements for the Master of Science in Clinical Laboratory Sciences for the categorical concentration are:

1. Baccalaureate degree from an accredited college or university with a major in biology or chemistry (Other majors may be approved with 12 credits of biology and 12 credits of chemistry completed.)
2. Minimum undergraduate GPA of 3.0 on a 4.0 scale for at least the last two years of undergraduate work
3. Three letters of recommendation from recent instructors or professional references from the applicant's intended field of study addressing the applicant's academic and professional abilities and preparation for graduate study
4. Satisfactory interview
5. Essential functions in clinical laboratory sciences

The VCU Department of Clinical Laboratory Sciences is responsible for providing education without regard to disability while assuring that academic and technical standards are met.

 - a. Academic standards are met by successfully completing the curriculum for the M.S. in Clinical Laboratory Sciences degree.

- b. Technical standards represent the essential nonacademic requirements that a student must demonstrate to successfully participate in the M.S. in Clinical Laboratory Sciences degree program. The technical standards for each category identified below are consistent with the expectations of Section 504 of the Rehabilitation Act of 1973, the Americans with Disabilities Act of 1990 and the ADA Amendments Act of 2008. Applicants must possess the following essential technical abilities and skills for admission consideration:
- Manual dexterity: Ability to use hand(s) or prosthetic devices with coordination
 - Fine motor: Ability to manipulate small objects with fingertips or adaptive devices
 - Mobility: Ability to maneuver in the laboratory and around instruments and in patient-care settings
 - Vision: Ability to distinguish red, yellow, green and blue colors; to distinguish clear from cloudy; and to distinguish objects through a microscope
 - Hearing: Ability to hear with assistive devices (i.e., phone receivers, hearing aid, etc.)
 - Speech: Ability to verbally communicate in English
 - Writing: Ability to communicate effectively in written form in English
 - Reading: Ability to read, understand and follow directions printed in English
 - Emotional and physical stability: Ability to work accurately and safely under stress, adapt to changing environments and prioritize tasks
 - Personal attributes: Must demonstrate integrity, responsibility, tolerance and respect

Degree requirements

The categorical concentration of the Master of Science program provides specialized study, including a clinical practicum, in one of the following areas: clinical chemistry, hematology, microbiology or immunohematology.

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the categorical concentration are required to complete:

- A minimum of 34 graduate credit hours to include 20 credits from core courses and 14 credits from discipline-specific science courses while completing undergraduate courses specific to their specializations
- A six-week clinical practicum in their specialty area

In addition to the basic science requirement, each student may choose an area of secondary emphasis in biomedical research, education, management or business.

- In lieu of 12 of the 14 credit hours of discipline-specific course, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas.

- No more than 12 credit hours in the area of the secondary emphasis may be applied toward the required curriculum minimum of 34 credits.

Upon completion of the curriculum, students are eligible to take a national certification examination in the area in which they performed their concentrated study.

Full-time candidates require a minimum of two academic years to complete the program. Part-time students must complete all work requirements within six years. An interruption in registration in excess of one semester requires prior approval of the department.

In addition to these requirements, the department faculty will review continuation in the program if:

- A student fails to achieve a minimum GPA of 3.0
- A student receives a D or F in a course
- A student receives a grade of C on more than one CLLS graduate course or more than nine graduate credit hours (CLLS and non-CLLS credits)
- A student receives a grade of U (unsatisfactory) on required graduate course work.
- A categorical master's student receives a grade less than a B in undergraduate course
- A student fails to demonstrate appropriate professional responsibility

Clinical Laboratory Sciences, Master of Science (M.S.), accelerated Bachelor of Science in Clinical Laboratory Sciences (B.S.) to master's

Program goals

The Department of Clinical Laboratory Sciences provides the student with advanced theoretical and technical education and prepares students to assume roles as laboratory supervisors, educators and researchers.

Student learning outcomes

1. Demonstrated professional and leadership conduct
2. Demonstrated ability to research and evaluate laboratory issues

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

All students will be given a handbook on policies and regulations at orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Spring	Nov 1	Minimum TOEFL of 600 (paper), 250 (computer) or 100 (IBT); or minimum IELTS score of 7.0 for international students whose native language is not exclusively English
			Satisfactory scores on the GRE

Special requirements

- Applicants pursuing the accelerated B.S. to M.S. degree program must initially qualify for admission to the B.S. in Clinical Laboratory Sciences degree program.

The accelerated bachelor's-to-master's-degree program integrates graduate and undergraduate course work and leads to the simultaneous awarding of the Bachelor of Science and Master of Science degrees in clinical laboratory sciences.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:

1. Initially qualify for admission to the Bachelor of Science in Clinical Laboratory Sciences program
2. Complete a minimum of 112.5 undergraduate credit hours, including 60 prerequisite undergraduate credit hours (see admission requirements for the baccalaureate degree program in clinical laboratory sciences in the Undergraduate Bulletin for a list of the specific courses) and 52.5 credit hours of undergraduate professional course work in clinical laboratory sciences
3. Have a minimum undergraduate GPA of 3.0 on a 4.0 scale in undergraduate clinical laboratory course work

4. Receive a positive recommendation from the Department of Clinical Laboratory Sciences faculty
5. Have a satisfactory interview

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the accelerated B.S.-to-M.S.-degree program are required to complete:

1. A minimum 40 hours of graduate credit hours
2. A research study in the form of a thesis or project related to clinical laboratory sciences
3. In addition to the basic science requirement, each student may choose an area of secondary emphasis in biomedical research, education, management or business.
 - a. In lieu of 14 credit hours of discipline-specific courses, students with a secondary emphasis in education, management or business may elect to focus on courses in those areas.
 - b. No more than 14 graduate credit hours in the area of the secondary emphasis may be applied toward the required curriculum minimum.

Beginning with the first semester of the Bachelor of Science in Clinical Laboratory Sciences program, candidates for the accelerated curriculum are expected to be full-time students and complete both the B.S. and M.S. requirements in three years.

Upon completion of the curriculum, students are eligible to take the ASCP BOC national certification examination for a Medical Laboratory Scientist generalist.

Department of Gerontology

Tracey Gendron, Ph.D.

Associate professor and interim chair

The mission of the Department of Gerontology is to promote optimal aging for individuals and communities.

The basic philosophy of the department is to improve the overall well-being of elders through the development of educational programs that are responsive to the changing psychological, physical, social and political needs of our elderly population. Research, community service and continuing education in gerontology and geriatrics are integral parts of this educational effort.

History

The Department of Gerontology was founded in 1976 and offers the only Master of Science in Gerontology in the commonwealth of Virginia. The Department of Gerontology became a part of the now-College of Health Professions in January 1985.

Objectives

The mission to promote optimal aging for individuals and communities is evident through the department's innovative graduate and continuing education, scholarship and university-community partnerships. Graduates further the person-centered, transdisciplinary mission largely in the areas of administration, education, advocacy and entrepreneurship. The purpose of this program is threefold: (1) to train qualified professionals to work in administrative, planning, service delivery and instructional and staff development positions in programs and services for elders at the national, state and local levels, (2) to provide an opportunity for those studying in other disciplines, and whose work will encompass service to the aged, to integrate their own training with a comprehensive knowledge and understanding of the aging process

and (3) to stimulate the design and execution of gerontological research across the multiple disciplines.

Facilities

Offices of the Department of Gerontology are located in the Theater Row building at 730 E. Broad St.

Diversity statement

As faculty, staff and students in the VCU Department of Gerontology in the College of Health Professions:

- We seek to support personhood by honoring the safety, dignity and well-being of all of our constituents.
- We believe that diverse backgrounds and philosophies are crucial to academic excellence.
- We seek to support an academic community whose members have diverse visions, cultures, backgrounds and life experiences.
- We honor freedom of expression and civility of discourse as fundamental educational cornerstones.
- We endeavor to foster a just and inclusive campus culture that promotes both cultural competence and cultural humility.
- We aim to engage members of our community as active citizens in a multicultural world.
- We recognize the need to identify and evaluate the ways in which social, cultural and economic inequities affect power and privilege in the larger society.
- We consider equity and autonomy central to our mission to promote optimal aging for individuals and communities.

Statement of values

As faculty, staff, and students of the VCU Department of Gerontology in the College of Health Professions, we will be guided by this departmental statement of values in the pursuit of our professional and academic endeavors and as we participate in the department's mission to promote optimal aging for individuals and communities. We recognize that this departmental statement of values is informed by the broader VCU Code of Ethics, and that we need to be mindful of our responsibility to adhere to both, as well as to any others which may be applicable to us by virtue of our professional affiliations or other obligations.

Professional competence

We will maintain the highest levels of competence in our work and will undertake only those tasks for which we are qualified by education, training or experience. We will embrace opportunities to work in inter- and transdisciplinary settings with colleagues from a wide range of disciplines, openly acknowledging the boundaries of our gerontological expertise and seeking opportunities to collaborate with other disciplines in our mission to support optimal aging. We recognize the need for continuing education in order to remain professionally competent and we will use the appropriate scientific, professional, technical and administrative resources needed to ensure competence in our professional activities. We will be open to asking for and receiving constructive feedback from others.

Integrity

We will conduct our affairs in ways that inspire trust, confidence and mutual respect and we will communicate candidly within the boundaries of confidentiality. We will strive always to provide an ethical and caring response to ourselves and others. We will use ethical decision-making

frameworks and other tools in order to manage ethical dilemmas and other complex problems, working both individually and collaboratively with others. We will not knowingly act in ways that jeopardize either our own or others' welfare and we will appropriately report any concerns about the welfare of older adults. We will always disclose and resolve possible, perceived and actual conflicts of interest in the performance of our professional responsibilities.

Professional and scientific responsibility

We will adhere to the highest scientific, professional and personal standards in pursuing and promoting evidence-based practices and behaviors that support optimal aging across the life span and in a bio-psycho-social-spiritual context. We will show respect for other gerontologists and colleagues of all disciplines even when we disagree on theoretical, methodological or personal approaches to professional activities. We value the continuing establishment of the public trust in the emerging and evolving profession of gerontology and will pursue ethical behavior in order to support that trust. In research and teaching we will adhere to accepted principles for the protection of human participants in research.

Respect for personhood, rights, dignity and diversity

We will respect the personhood, rights, dignity and diversity of all people and will use person-centered, nondiscriminatory language and approaches when engaging with others. We will strive to eliminate bias in our professional activities, through self-reflection, self-awareness and the practice of cultural humility, and we will encourage those with whom we partner to do the same. We will not tolerate any forms of discrimination based on age, gender, race, ethnicity, national origin, religion, sexual orientation, gender identity, disability, health conditions or marital, domestic, parental or socioeconomic status. In all of our work-related activities, we will acknowledge the rights of others to hold values, attitudes and opinions that differ from our own.

Social and advocacy responsibilities

We will maintain awareness of our personal, professional and scientific responsibilities to the communities and societies in which we live and work, making public and applying our evidence-based knowledge in order to contribute to the public good. We will seek to educate ourselves and others about the damaging nature of ageism and through our role-model leadership we will support ourselves and others to promote optimal aging across the lifespan through positive language, behaviors and practices. In undertaking these responsibilities, we will be courageous and compassionate, remaining open to new opportunities, ideas, and experiences in all aspects of the field of aging.

- Gerontology, Master of Science (M.S.) (p. 146)
- Aging Studies, Certificate in (Post-baccalaureate graduate certificate) (p. 149)

Opportunities for combined study

The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs, including the Master of Social Work and Doctor of Pharmacy.

- A combination of the Certificate in Aging Studies program and a Master of Social Work (M.S.W.) (p. 809), offered jointly with the School of Social Work

- A combination of the Certificate in Aging Studies with the Doctor of Pharmacy (Pharm.D.) (<http://bulletin.vcu.edu/professional-studies/pharmacy/pharmacy-pharmd-aging-studies-postbaccalaureate-graduate-certificate-combined/>), offered with the School of Pharmacy

Students must apply separately to the participating programs and must meet all admission and degree requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

Gerontology, Master of Science (M.S.)

Program goal

The Department of Gerontology serves the people of the commonwealth of Virginia and the nation by providing educational programs related to the understanding of aging and promoting optimal aging. The department encourages education through discovery of new knowledge, interdisciplinary interaction, professional behavior and service to the aging network. The department's primary focus is to prepare individuals for positions in the network of aging services. These gerontologists are educated to serve as supporters of optimal aging for older persons and families and caregivers. The master's program provides quality education leading to careers as services providers, educators and researchers. The department's assisted living administration specialty area is NAB-accredited and will prepare students who seek licensure as an assisted living administrator. The department also provides assistance and services to the community and engages in research and scholarly activities related to gerontology.

The goal of the program is to ensure that students in the program will:

1. Understand the biological, psychological and sociological underpinnings of aging in U.S. society as established by Association for Gerontology in Higher Education core competencies.
2. Gain understanding and respect for the interdisciplinary team process in effective gerontological practice.
3. Through a lifespan biopsychosocialspiritual approach, gain understanding of empirically and theoretically based components contributing to optimal quality of life and performance in late life as well as knowledge and skills in best practices to promote optimal aging across the life span.
4. Gain understanding of the existing aging network across federal, state and local levels. Thorough understanding will enable students to successfully identify their niche in the aging network, contribute to a growing field and deliver effective eldercare services.

Student learning outcomes

1. Students will demonstrate understanding and application of the biological, psychological, sociological and spiritual theories of aging to gerontology practice.
2. Students will demonstrate understanding and respect for the interdisciplinary team process in effective gerontological practice and essential role of various disciplines on the care team. Students develop a clearer understanding of eldercare through the biopsychosocial approach, lifespan perspective and the theories within the field (as implicit in AGHE's core competencies).
3. Students will demonstrate a thorough understanding of the multiple paths, methods and techniques of optimal aging in order to assist older persons, their families, program providers and policymakers

toward the goal of optimal aging. A comprehensive understanding of gerontology core concepts is essential to this goal.

- Students will demonstrate an understanding of the aging network and will be able to make contributions to community-identified needs through the successful delivery of services in the aging network. Community engagement will take the form of field work, research, grant writing, service-learning opportunities, education and training.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	June 1	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

The program is open to qualified students who have earned a baccalaureate degree from an accredited college or university or the equivalent, maintained a minimum GPA of 3.0 and have satisfactory scores on the GRE or MAT. A successful work experience may strengthen the admission credentials of applicants with marginal records.

Because of the diversity of undergraduate majors, candidates for the gerontology program must present evidence of successful completion of undergraduate courses in the following areas:

- Biological science – minimum of six credit hours
- Psychology – minimum of three credit hours
- Sociology, anthropology or social work – minimum of three credit hours
- Statistics, research methods or equivalent – minimum of three credit hours (Topics covered in this undergraduate course should be equivalent to those outlined for STAT 212 in the VCU courses database.)

Candidates for admission who do not meet these requirements will be expected to complete the required undergraduate course work or to pass challenge examinations by the end of the first year.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a 30-credit hour curriculum based on the core curriculum to include either a generalist area of study or one of the following optional specialty areas of study:

Assisted living administration: This specialty area will provide students with a foundation of knowledge in the long-term care continuum. Students electing this option will learn about assisted living, home and community-based services and nursing home care. Educational content is provided that informs students about the different types of services that exist. Students completing this area of study will gain the necessary skills and knowledge required to complete the assisted living administrator licensing exam. This specialty area is NAB-accredited.

Education: This specialty area is designed for students interested in teaching or training careers in gerontology. Students electing this specialty area will be prepared to provide instruction to university or community college students, the lay public, professional service providers and older people.

Health care organization and planning: (in conjunction with the Department of Health Administration) Upon completing this area of study, students will have a foundation of knowledge in health care organization, health planning, health policy and a macro perspective on the financing of health care. In addition, students will have developed skills in policy

analysis and the use of economic tools. Finally, students will broaden their understanding of the political, legal and ethical issues involved in health care organization and planning.

Psychogeriatrics: This specialty area, developed jointly with the Department of Psychology, is designed for students interested in working with those older adults and their families who are experiencing psychological difficulty. Students electing this option will be prepared to provide assistance directly to the elderly and their families as well as to consult and train professionals and paraprofessionals to provide more effective mental health services. Training is provided through a combination of specialized didactic instruction and structured field experience in providing direct services, consultation and education.

Public administration: Students who elect to pursue courses in the public administration area, developed jointly with the L. Douglas Wilder School of Government and Public Affairs, will, after completion of course work, be able to plan, organize, report and budget for public programs in aging. Grant writing and program evaluation skills will be developed as well. Students choosing the public administration option may wish to complete the Certificate in Public Management program or the Certificate in Nonprofit Management program.

Research: This specialty area is designed for students who would ultimately like to pursue a doctoral degree in the social or behavioral sciences or in one of the health-related sciences in the College of Health Professions. Students who elect the research option must complete a thesis or a paper of publishable quality. Students will obtain a strong background in experimental psychology research design and methodology and a broad background in life-span developmental theory.

Social services: This option concentrates on developing specialized knowledge and skills in the provision of services to the elderly, basic understanding and skills in at least one method of social work practice, commitment and ability to participate in the development of strategies and policies relevant to amelioration of social problems of the elderly, and the ability to integrate and use in practice knowledge of individual behavior and social structure with particular reference to the needs of the elderly.

Students should consult with their advisers for guidance with scheduling. It is required that students seek advising to determine how they will complete their five practice elective credit hours.

Aging Studies, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Department of Gerontology serves the people of the commonwealth of Virginia and the nation by providing educational programs related to understanding of aging and promoting successful aging. The department encourages education through discovery of new knowledge, interdisciplinary interaction, professional behavior and service to the aging network. The department's primary focus is to prepare individuals for positions in the network of aging services. These gerontologists are educated to serve as supporters of optimal aging for older persons and families and caregivers. The certificate program provides quality education to those who are already working with older adults and wish to enhance their services with formal academic training in gerontology or individuals with training in other professions.

The program's goal is to ensure that graduates will be able to demonstrate the ability to apply core gerontological concepts according to Association for Gerontology in Higher Education Core Concepts.

Student learning outcomes

1. Students will understand the biological, psychological and sociological underpinnings of aging in U.S. society.
2. Students will demonstrate understanding of methods and techniques to assist older persons and their families to achieve a successful response to aging.
3. Students will be demonstrate an ability to combine their knowledge of gerontology with experience in the aging network and with knowledge of their core professional discipline so as to contribute to the successful delivery of services in the aging network.
4. Students will develop understanding of and will engage in interdisciplinary approaches to issues and problems of aging.
5. Students enrolled in a dual program will engage in interdisciplinary practice in their core disciplines with special emphasis on gerontology.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Opportunities for combined study

The Department of Gerontology, in cooperation with other programs at the university, provides students interested in working with elders or in gerontological settings with the opportunity to complete the Certificate in Aging Studies while also completing requirements for other degree programs, including the Master of Science in Occupational Therapy, Master of Science in Rehabilitation Counseling, Master of Social Work and Doctor of Pharmacy. Students must apply separately to the participating programs and must meet all admission and degree requirements for both programs. In some cases, and with the approval of the advisers of both programs, course work in one program may be approved to satisfy a course requirement in another program.

Other information

The program's student handbook is available on the student Blackboard site.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	All semesters		None

The Certificate in Aging Studies program is open to qualified students who have earned a baccalaureate degree from an accredited college or university or the equivalent and who have met all general admission requirements of the VCU Graduate School (p. 35).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students in the Certificate in Aging Studies program must complete 21 credit hours of work, including 15 credit hours of core courses and six elective credit hours.

1. Students will complete courses in the biology of aging, psychology of aging, social gerontology and research methods form the basic core of the certificate program.
2. Following the completion of these gerontology courses, students may choose two elective gerontology courses after consultation with their faculty advisers. Advisers counsel students as to the courses that would best suit their educational training needs. Students may choose from aging and human values; topical seminars; independent studies; problems, issues and trends in gerontology; recreation, leisure and aging; and other elective courses.
3. In addition to the completion of these prescribed courses, each candidate for a Certificate of Aging Studies is required to satisfactorily complete a project in gerontology on a subject approved by the faculty. This project may be a comprehensive literature review, a research project or a training or demonstration project. Students register for a three-credit hour course in independent studies (GRTY 692) for this project.

Department of Health Administration

Carolyn A. Watts, Ph.D.

Richard M. Bracken Chair

The overall purpose of the Department of Health Administration is to provide top quality education, research and service related to the organization and administration of health care services. Education in health administration at the university began in 1949 with the establishment of a graduate curriculum in hospital administration. Early graduates received a certificate; the master's degree was awarded beginning in 1955.

These early efforts grew and developed into the Department of Health Administration, established in 1972. The department now includes three major programs: Master of Health Administration; Doctor of Philosophy in Health Services Organization and Research; and Master of Science in Health Administration. The latter program, aimed at mid-career professionals, was among the first to offer a health administration degree in a hybrid format (periodic on-campus sessions complemented by online learning in between). The department also cooperates with the schools of law at the University of Richmond and at Washington and Lee University to offer dual-degree programs in health administration and law (M.H.A./J.D.). In 2001, a dual-degree program was established with the VCU School of Medicine (M.H.A./M.D.). Both master's programs are fully accredited by the Commission on Accreditation of Healthcare Management Education. The Department of Health Administration also has a major research program and is involved in a wide range of public service activities, including professional development programs for health services administrators and other health professionals.

Facilities

The department is located in the William Grant House, formerly the Sheltering Arms Hospital, at 1008 E. Clay St., Richmond, Virginia. Built in 1857, the Grant House is on the National Register of Historic Places. VCU Medical Center, one of the largest teaching hospitals in the nation, and other clinical facilities are readily accessible to the department's students and faculty. In addition, the department has clinical affiliations and close working relationships with a large number of health care organizations and agencies in Virginia and throughout the United States. The organizations and agencies are used extensively as clinical facilities in the department's educational programs.

- Health Administration, Master of (M.H.A.) (p. 151)
- Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 155)
- Health Administration, Master of (M.H.A.)/Juris Doctor (J.D.) from the University of Richmond [dual degree] (p. 157)
- Medicine, Doctor of (M.D.)/Health Administration, Master of (M.H.A.) [dual degree] (p. 157)
- Health Administration, Master of Science in (M.S.H.A.) (p. 158)
- Health Services Organization and Research, Doctor of Philosophy (Ph.D.) (p. 162)

Health Administration, Master of (M.H.A.)

Overview and philosophy

The Master of Health Administration program is designed to prepare persons for administrative roles ultimately leading to top-level executive positions in complex health services organizations. The curriculum emphasizes strategic and operational management, thus orienting students toward the broad spectrum of managerial problems and functions likely to be encountered by health services organizations.

The program's educational objectives and content are based upon the premise that a large number of students who select this curriculum aspire to become senior executives of health care organizations at some point in their careers. The graduate M.H.A. program is designed for full-time students.

The M.H.A. program was accredited initially in 1968, one of the first programs in the United States to achieve that status. It has continuously maintained its national accreditation status and in 2017 the program was awarded a seven-year accreditation.

The administrative residency/internship is an integral part of VCU's M.H.A. program. The basic purpose of the residency/internship is to provide students opportunities to apply and further develop their administrative knowledge and skills through a period of applied experience in an operational setting. The administrative residency/internship is supervised directly by experienced executives who serve as the students' preceptors.

Through a carefully selected and organized residency/internship experience, students strengthen the foundation of general knowledge and skills gained through the core curriculum and develop further insight and expertise in their selected concentrations. Students serve their residency/internship in the type of health care organization in which they wish to gain specialized knowledge, skills and experience. Overall policies and guidance for the administrative residency/internship are established by the Department of Health Administration and are included in the administrative residency handbook.

Students become eligible for entrance into the administrative residency/internship after completing specified course work and achieving an overall GPA of 3.0. Students on academic probation or with any incomplete grades during their final on-campus semester prior to their residency may be, at the discretion of the faculty, prevented from entering their residency although their overall GPA is 3.0 or higher. In addition to meeting the academic requirements, the student must, in the judgment of the faculty, present evidence of readiness for a clinical experience by demonstrating sufficient academic proficiency in the core areas of the curriculum and by demonstrating professional maturity. The director of the M.H.A. program or designee has the responsibility to coordinate residency placements. In making these assignments, the director will consider the preferences of the students, the preferences of the preceptors and the recommendations of faculty advisers.

Program goal

The specific mission of the Master of Health Administration program is to prepare early careerists for management and leadership positions within complex health care organizations. The program is nationally accredited and has been consistently ranked in the top five programs in the nation by U.S. News and World Report.

The overall purpose of the Department of Health Administration in which the M.H.A. is housed is to provide top quality education, research and service related to the organization and administration of health care services. The department also has a major research program and is involved in a wide range of public service activities, including professional development programs for health services administrators and other health professionals.

The mission of the Department of Health Administration is to prepare, support and connect exceptional leaders who shape the health care industry. This is accomplished through:

1. Educating the next generation of health administrators and enhancing the skills of the present generation
2. Preparing a new generation of health services researchers and educators
3. Creating and disseminating basic and applied knowledge about the management, organization, financing, function and performance of the health care system
4. Serving people in the public and private sectors of the health care system

These activities, when mutually reinforced among all key people – faculty, staff, students, alumni – elevate the department to a premier status in the United States.

Student learning outcomes

Goal/domain	Competency	Description/learning outcomes
-------------	------------	-------------------------------

Communication and leadership management

	Interpersonal communication	Build collaborative relationships and negotiation skills
	Writing skills	Prepare business communications
	Presentation skills	Demonstrate effective oral communication and presentation skills

Leadership

	Leading and managing others	Hold self and others accountable for organizational goal attainment
	Change management	Promote and manage change
	Ability for honest self-assessment	Demonstrate reflection through self-assessment
	Systems thinking	Be able to assess the potential impacts and consequences of decisions in a broad variety of situations
	Problem-solving and decision-making	Apply evidence-based decision-making techniques to health care questions

Professionalism

	Personal and professional ethics	Adhere to ethical business principles; exhibit ethical behaviors
	Professional and community contribution	Participate in community service; balance professional and personal pursuits

	Working in teams	Create, participate in and lead teams, including interprofessionalism
--	------------------	---

Knowledge of the health care environment

	Health care issues and trends	Demonstrate knowledge of circumstances causing major changes and reform in U.S. health care delivery
--	-------------------------------	--

	Health care legal principles	Discuss and critically analyze health-related legal principles including standards, regulations and risk management.
--	------------------------------	--

	Health policy	Articulate the impact of select health policies on the delivery of health services
--	---------------	--

	Population health and status assessment	Understand and explain the major factors in health status to health care professionals
--	---	--

Business and analytical skills

	Financial management	Demonstrate the ability to compile and analyze financial data; develop capital, operating and cash flow budgets; analyze investment data; pro forma development
--	----------------------	---

	Human resources	Apply methods and techniques related to the management of health care organization employees and professional staff
--	-----------------	---

	Organizational dynamics and governance	Understand and be able to explain the roles, responsibilities, structures and influence governing bodies hold in health care organizations
--	--	--

	Strategic planning	Ability to perform environmental analysis; discern competitive strategy; formulate business strategy based on evidence
--	--------------------	--

	Marketing	Analyze and assess markets, market segmentation, strategy, change and innovation
--	-----------	--

Information management/ understanding and using technology skills	Apply techniques and methods to plan, design, implement and assess information flow and communication
Quality improvement/ performance improvement	Apply concepts of process improvement and patient safety to relevant problems
Quantitative skills	Analyze data and interpret quantitative information
Planning and managing projects	Design, plan, implement and assess projects related to performance, structure and outcomes of health services
Economic analysis and application	Analyze and apply economic theory and concepts to business decisions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

All enrolled students will be provided a handbook at orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.H.A.	Fall	Feb 1	GRE/GMAT scores on verbal and quantitative at or above the 50th percentile
		Applications received by Dec 1 are given priority for funding.	For international students: a TOEFL score of 600 (paper-based), 250 (computer-based) minimum

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

1. Baccalaureate degree from an accredited institution with a 3.0 GPA for all undergraduate work completed
2. Prerequisite course work in microeconomics, financial accounting and business statistics
3. A working knowledge of college-level algebra
4. Transcripts and VCU application forms
5. GRE/GMAT scores on verbal and quantitative at or above the 50th percentile
6. TOEFL scores required for international students
7. Professional resume
8. Three letters of reference
9. Present evidence of personal achievement, scholarship, intellectual ability and professional promise (personal statement)
10. Invited interview with M.H.A. admissions committee

The prerequisite requirements may be met by completing specified courses with a minimum grade of C within the past five years at any accredited college or university.

International applicants must submit evidence of a preapproved residency site in the home country and evidence of financial responsibility.

VCU Honors students are eligible to apply for admission to the M.H.A. program during the junior or senior year of undergraduate study. The application process is the same as for other applicants with the following exceptions: (1) requirements for the GRE or GMAT are waived, (2) application fee is waived and (3) official transcript is not needed (as grades can be accessed in the VCU system). The admission decision will be made by the M.H.A. admissions committee, at which time a place will be reserved for the student, provided the student graduates with honors and completes the prerequisite course work.

Candidates with one to two years of experience are preferred.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete a total of 59 credit hours (including transfer credit hours, if any) to qualify for the Master of Health Administration degree. This requirement includes 48 credit hours of core course work plus at least three credit hours of elective studies in health administration and related disciplines, such as business administration, urban and regional planning, public health and gerontology. In addition, eight credit hours of practicum course work are required as a part of the administrative residency. The graduate program is designed to provide a balanced combination of academic studies and field experience to enable students to achieve the program's educational goals and become well-prepared to enter the field of health administration.

Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree]

Advanced study in health administration and information systems is available through a dual degree program co-sponsored by the Department of Health Administration in the College of Health Professions and the Department of Information Systems in the School of Business.

The dual degree M.H.A./M.S. program allows students interested in the fields of health management and information technology to earn two highly ranked and relevant master's degrees in just three years, which is the time it usually takes to complete just one of the degrees. The dual degree program is ideal for students who are pursuing careers in health IT management, health IT business consulting or working in the health IT vendor industry.

Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

The proposed curriculum allows students to earn both the M.H.A. and the M.S. in Information Systems with a total of 78 credit hours rather than the 89 credit hours that would be required to obtain the degrees

separately. The dual degree option offers this credit-hour efficiency by taking advantage of curricular similarities in the two programs and allowing some courses to count toward both sets of requirements.

A total of 12 credit hours will count toward both degrees and the M.H.A. foundation courses will be substituted for the business school foundation course requirements for combined degree students. Students in the combined degree program will follow the same schedule as regular M.H.A. students, including the two lockstep years.

Students will take 51 credit hours of health administration courses required for the M.H.A. and nine additional courses (27 credit hours) in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The HADM 612 course taken for the M.H.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and one of the additional information systems courses will also count toward the elective courses in the M.H.A. program. A three-credit-hour, 10-week internship is required and must have substantial global, entrepreneurial and/or experiential components related to both degrees. The six information systems courses to be taken in addition to INFO 610, INFO 620 and INFO 630, must be approved by the program adviser and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

Health Administration, Master of (M.H.A.)/Juris Doctor (J.D.) from the University of Richmond [dual degree]

Advanced study in health administration and law is available through a dual degree program co-sponsored by the department and the schools of law at the University of Richmond. The program leads to the awarding of the Master of Health Administration and Juris Doctor degrees.

Participants are provided the necessary expertise either to represent clients within the health care industry or to function as legal policy-makers or administrators who fully appreciate the legal environment of the health care field. Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

The M.H.A. curriculum sequence of the M.H.A./J.D. degree is shown below. Students take a total of 48 credit hours of M.H.A. course work that includes a three-credit-hour internship.

Medicine, Doctor of (M.D.)/Health Administration, Master of (M.H.A.) [dual degree]

Advanced study in health administration and medicine is available through a dual degree program co-sponsored by the Department of Health Administration and the VCU School of Medicine. The program leads to the awarding of the Doctor of Medicine and Master of Health Administration degrees. The objective of the M.D./M.H.A. program is to provide highly motivated medical students the expertise for management

and leadership competency in complex health care organizations. Students may indicate their interest in the dual degree program prior to matriculation or during the first three years of the M.D. program. The program may be completed in five years. Applicants for this program are required to meet the admission requirements of each program.

For the dual degree program, course work for the M.H.A. is initiated following completion of the first two or three years of the M.D. program, occupies a full academic year (fall, spring and summer) and extends into a second year, and is taken during a hiatus from the third or fourth year of the M.D. program.

Students interested in the program may contact the School of Medicine Office of Curriculum or the director of the M.H.A. program in the Department of Health Administration (College of Health Professions). For additional information refer to the School of Medicine handbook available on the school's website (<http://www.medschool.vcu.edu>).

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

The M.H.A. curricular sequence of the M.H.A./M.D. degree is shown below. Students take a total of 43 credit hours of M.H.A. course work, which includes a three-credit hour internship.

Course	Title	Hours
Courses		
HADM 602	Health System Organization, Financing and Performance	3

HADM 693	Internship in Health Administration	3
Total Hours		43

Total graduate credit hours required (minimum) 43

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Health Administration, Master of Science in (M.S.H.A.)

Program accreditation

Commission on Accreditation of Health Management Education

Program goal

The Master of Science in Health Administration program mission is to prepare practicing professionals for management and leadership positions within complex health care organizations.

The overall purpose of the Department of Health Administration in which the M.S.H.A. is housed is to provide top quality education, research and service related to the organization and administration of health care services. The department also has a major research program and is involved in a wide range of public service activities, including professional development programs for health services administrators and other health professionals.

The mission of the Department of Health Administration is to prepare, support and connect exceptional leaders who shape the healthcare industry. This is accomplished through:

1. Educating the next generation of health administrators and enhancing the skills of the present generation
2. Preparing a new generation of health services researchers and educators
3. Creating and disseminating basic and applied knowledge about the management, organization, financing, function and performance of the health care system
4. Serving people in the public and private sectors of the health care system

These activities, when mutually reinforced among all key people – faculty, staff, students, alumni – elevate the department to a premier status in the United States.

The M.S.H.A. program is designed for self-motivated, mature and experienced professionals who are seeking advanced preparation in management and administrative roles that ultimately lead to executive positions in complex health services organizations. The curriculum emphasizes leadership in career progression as well as strategic and operational management of health care organizations. The program is nationally accredited and taught by faculty shared with the department's nationally ranked M.H.A. program.

Student learning outcomes

Goal/domain	Competency	Description/learning outcomes
Communication and relationship management:		
	Interpersonal communication	Build collaborative relationships and negotiation skills
	Writing skills	Prepare business communications
	Presentation skills	Demonstrate effective oral communication and presentation skills
Leadership		
	Leading and managing others	Hold self and others accountable for organizational goal attainment
	Change management	Promote and manage change
	Ability for honest selfassessment	Demonstrate reflection through self-assessment
	Systems thinking	Be able to assess the potential impacts and consequences of decisions in a broad variety of situations
	Problem-solving and decision-making	Apply evidence-based decision-making techniques to health care questions

Professionalism

	Personal and professional ethics	Adhere to ethical business principles; exhibit ethical behaviors
	Professional and community contribution	Participate in community service; balance professional and personal pursuits
	Working in teams	Create, participate in and lead teams, including interprofessionalism

Knowledge of the health care environment

	Health care issues and trends	Demonstrate knowledge of circumstances causing major changes and reform in U.S. health care delivery
	Health care legal principles	Discuss and critically analyze health-related legal principles including standards, regulations and risk management.
	Health policy	Articulate the impact of select health policies on the delivery of health services
	Population health and status assessment	Understand and explain the major factors in health status to health care professionals

Business and analytical skills

	Financial management	Demonstrate the ability to compile and analyze financial data; develop capital, operating and cash flow budgets; analyze investment data; pro forma development
	Human resources	Apply methods and techniques related to the management of health care organization employees and professional staff
	Organizational dynamics and governance	Understand and be able to explain the roles, responsibilities, structures and influence governing bodies hold in health care organizations

Strategic planning	Ability to perform environmental analysis; discern competitive strategy; formulate business strategy based on evidence
Marketing	Analyze and assess markets, market segmentation, strategy, change and innovation
Information management/ understanding and using technology skills	Apply techniques and methods to plan, design, implement and assess information flow and communication
Quality improvement/ performance improvement	Apply concepts of process improvement and patient safety to relevant problems
Quantitative skills	Analyze data and interpret quantitative information
Planning and managing projects	Design, plan, implement and assess projects related to performance, structure and outcomes of health services
Economic analysis and application	Analyze and apply economic theory and concepts to business decisions

requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

All enrolled students will receive a student handbook at orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.H.A.	Fall	Mar 1	GRE/GMAT scores on verbal and quantitative at or above the 50th percentile

Applicants who have taken the GRE or GMAT in the past five years may submit previous scores. Those applicants holding certain graduate or professional doctoral degrees (M.D., D.D.S., Pharm.D., Ph.D.) may have the testing requirement waived upon petition.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy

TOEFL scores for international students: score of 600 (paper-based), 250 (computer-based) or 100 (Internet-based) minimum

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

1. Baccalaureate degree from an accredited institution of higher education with a 2.75 GPA for all undergraduate work completed
2. Transcripts and VCU application forms
3. Five years of professional/managerial/health care experience
4. Employed in the health care field
5. Professional resume
6. Three letters of reference
7. Interview with M.S.H.A. admissions committee

Applicants with less than a 2.75 undergraduate GPA who have exceptional professional experience will be considered for admission on provisional status. If the applicant has completed any graduate studies (even if a degree was not awarded), performance in such course work will be considered in the admission decision.

Prerequisites: No specific previous course work is required for application. Upon formal acceptance, students will be provided, at cost, independent-study modules in three areas (microeconomics, accounting and statistics) to be completed prior to beginning the program. Applicants having acceptable previous course work in microeconomics, accounting and statistics may not be required to complete these modules. Generally, courses must be completed within five years of starting the program. The M.S.H.A. program begins in July for the fall semester.

Degree requirements

The M.S.H.A. program is designed to meet the distinctive needs of the experienced health care professional. Courses develop business skills for the unique health care environment so that students are prepared to meet the challenges of the health care marketplace. Classes draw upon the knowledge of the faculty and the diverse group of experienced professionals enrolled.

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete 14 courses, a total of 41 credit hours (including transfer credit hours, if any), to qualify for the Master of Science in Health Administration degree. Each semester is composed of both on-campus and off-campus sessions. During the six, approximately week-long, on-campus sessions, students attend professional program classes on the MCV Campus. During off-campus sessions, students continue studies at their homes or work sites, employing a variety of online technologies. Students must successfully complete an integrative capstone case to complete the degree. The competency model utilized by the M.S.H.A. program is operationalized in curricular offerings in the development of learning objectives for individual courses.

Semester 3	Fall		
	HADE 607	Financial Management in Health Organizations	3
	HADE 609	Managerial Epidemiology	2
	HADE 611	Health Care Law and Bioethics	3
	HADE 612	Information Systems for Health Care Management	3
	Term Hours:	11	

Semester 4

Spring		
HADE 614	Health Care Marketing	3
HADE 648	Strategic Management in Health Care Organizations	3
HADE 649	Human Resources Management in Health Care	3
Term Hours:		9
Total Hours:		41

The minimum total of graduate credit hours required for this degree is 41.

Part-time enrollment

Recognizing the challenge that full-time enrollment brings to busy careers and personal lives, the department offers a part-time enrollment option in the M.S.H.A. program. Part-time students generally enroll in six or eight credit hours per semester and spend an additional 10 months in classes in the program. The recommended part-time schedule is shown below.

Year one

Fall		
HADE 602	Health Systems Organization, Financing and Performance	3
HADE 624	Health Economics	3
Term Hours:		6

Spring

HADE 606	Health Care Managerial Accounting	3
HADE 615	Health Care Politics and Policy	3
HADE 647	Management of Health Care Organizations	3
Term Hours:		9

Year two

Health Services Organization and Research, Doctor of Philosophy (Ph.D.)

Program goal

The Ph.D. in Health Services Organization and Research program is designed to prepare individuals for careers in teaching, research and consulting at the highest level of capability in the field of health care organizational analysis and health services research. Graduates will be competitive for positions at the nation's top research and teaching institutions, governmental agencies and health care organizations.

Student learning outcomes

Dimension	
Foundational knowledge of health care	Display comprehensive knowledge of the context of health care systems, institutions, actors and environment.
Theoretical knowledge	Apply organizational theoretical and conceptual models relevant to health services research.
Generate research questions and hypotheses	Review, critique and synthesize a body of research, identifying significant gaps in knowledge, methods and study subjects to develop research questions and testable hypotheses.
Study design	Select appropriate interventional (experimental and quasiexperimental) or observational (quantitative, qualitative or mixed) study designs to address health services research questions. Use a conceptual model to specify study constructs and develop valid and reliable variables to measure the constructs.

Data collection and management	Sample and collect primary health and health care data and/or assemble and manage existing data from public or private sources.
Ethical conduct of research	Describe procedures that ensure the ethical and responsible conduct and dissemination of research.
Data analysis and interpretation	Apply rigorous quantitative and qualitative analytical strategies to specific research questions. Demonstrate ability to interpret results of data analysis.
Communication and knowledge transfer	Effectively communicate issues, research findings and implications of health services research verbally and in writing to appropriate professional, scientific, student, policy and lay audiences.
Integration	Develop and conduct original research that includes identifying the research question, selecting the theoretical framework, developing a study design, using appropriate methodologies, conducting the analysis and interpreting the results.

The doctoral program is designed to meet the professional development needs of:

1. Researchers, educators and policy analysts who want to develop in-depth theoretical and research capabilities about health services organizations
2. Clinical professionals who want to acquire a broader perspective on health care organizations and systems and to develop applied research skills in health services organization
3. Administrative professionals who want to prepare for positions as consultants or researchers in complex health organizations

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

All enrolled students will be provided a handbook at orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall only	Mar 15	GRE or GMAT
		Applications received by Dec 15 are given priority for funding	International students: TOEFL
		(Applications reviewed throughout year)	

Special requirements

- Candidates with one to two years' experience in the health care industry preferred.
- A part-time enrollment option, which requires three years of course work prior to the dissertation research, is also available.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum acceptable standards for admission:

1. Graduate degree (in an academic or professional field) with a minimum GPA of 3.0
2. Working knowledge of college-level algebra
3. Advanced courses in statistics and economics
4. GRE/GMAT scores on verbal and quantitative at or above the 50th percentile
5. TOEFL scores required for international students
6. Transcripts and VCU application forms
7. Three letters of reference
8. Interview with HSOR admissions committee

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 57 credit hours of course work. This includes 48 hours in four major areas of study and nine hours of dissertation study. Students take two written comprehensive examinations, covering health services organization and theory and health services research methods. Eleven credit hours of foundation course work are required. The program director and admissions committee may waive some of these courses. However, the credit hours required for the program are not reduced.

Department of Nurse Anesthesia

Suzanne M. Wright, Ph.D., CRNA
Professor and chair

The program was first organized in 1969 as the School of Nurse Anesthetists, thus becoming the first academic program to be implemented in the newly organized School of Allied Health Professions (now the College of Health Professions).

A letter of intent for a proposed Master of Science in Nurse Anesthesia program was submitted to the commonwealth's Council on Higher Education in 1977. When approved in May 1978, the graduate degree in nurse anesthesia became the first such offering within the profession of nurse anesthesia. While of major importance to the university, it marked a significant milestone for the profession of nurse anesthesia. The first class of graduate students was admitted in the fall of 1979 and graduated in the fall of 1981. A second hallmark was achieved in 2007 with approval of the Doctor of Nurse Anesthesia Practice program. The first Certified Registered Nurse Anesthetists entered the post-master's DNAP program in January 2008. Soon to mark the beginning of a new era, the program anticipates enrollment of the first cohort of students into the entry-to-practice DNAP option in 2017. The VCU Graduate Council approved this transition in 2015 and the application for approval by the Council on Accreditation of Nurse Anesthesia Educational Programs was submitted in February 2016.

Mission and philosophy

Mission

The mission of Virginia Commonwealth University is to provide a fertile and stimulating environment for learning, teaching, research, creative expression and public service. Essential to the life of the university is a faculty actively engaged in scholarship and creative exploration – activities that increase knowledge and understanding of the world and that inspire and enrich teaching.

The university is dedicated to educating full- and part-time students of all ages and diverse backgrounds in an atmosphere of free inquiry and scholarship so that they may realize their full potential as informed, productive citizens with a lifelong commitment to learning and service.

The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that promotes excellence, values diversity, stimulates creativity and recognizes achievement.

Philosophy

The philosophy of the department reflects the core values of the faculty and provides the foundation for the curriculum. The department's philosophy is synergistic with the mission and goals of VCU and the College of Health Professions.

The department is a social agency dedicated to the education and development of health care professionals in the specialty of nurse anesthesia. Consequently, the faculty recognizes and accepts the responsibility entrusted to it for the learning experiences for its graduate students.

The philosophical orientation of the faculty is that learning is a developmental process through which cognitive, affective and psychomotor behaviors are developed and modified. This process includes the acquisition of information, the transfer and application of knowledge, the evaluation of new skills, and the development of a professional attitude and bearing.

The faculty further subscribes to the belief that the learning process is both positive and rewarding for the student; that it is a transaction between the student and teacher executed through formal and informal processes with an objective to prepare knowledgeable and skillful graduates. Hence, learning is a lifelong process that results in a change in thinking, valuing and behaving. The educational process includes teacher-learner interaction in setting goals, selecting and assessing learning experiences, determining instructional methods, and evaluating the learner's progress. Learning experiences are designed to facilitate continuity in attainment of knowledge, skills and attitudes consistent with educational objectives, the individual needs of students and safe patient care. Students are respected as unique individuals possessing dignity, worth and the right to equity in educational opportunities. Faculty and students share the responsibility for creating an educational climate that reflects democratic values, fosters intellectual inquiry and creativity and encourages the maximum development of each individual's potential.

The American health care system is becoming progressively complex. Technological advances and changing economic patterns foster competition for scarce resources while the patient population is becoming quite diverse. It is increasingly essential for the CRNA to provide care in a manner that collaborates with and values the contribution of other health professionals. As advanced practice nurses working in an ever-changing health care system, CRNAs are well-positioned for roles in research, teaching, policy-making and resource management and as integral members of interprofessional teams.

Graduate education in nurse anesthesia builds upon the education and experiences of the professional registered nurse holding an appropriate baccalaureate degree. Graduates are prepared, through a frame of academic excellence, to become proficient advanced-practice providers and leaders in the specialty and to make scholarly contributions to the health care system and community.

- Nurse Anesthesia Practice, Doctor of (D.N.A.P.), entry-level (p. 168)
- Nurse Anesthesia, Master of Science in (M.S.N.A.) (p. 171)

Nurse Anesthesia Practice, Doctor of (D.N.A.P.)

Program accreditation

Council on Accreditation of Nurse Anesthesia Educational Programs

Program goal

The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that promotes excellence, values diversity, stimulates creativity and recognizes achievement.

Student learning outcomes

The overall objective of the Doctor of Nurse Anesthesia Practice program is to prepare graduates who have acquired knowledge, skills and competencies in patient safety, perianesthetic management, critical thinking and communication to fulfill their professional responsibility as certified nurse anesthetists.

Upon completion of the program, the graduate will:

1. Apply physiological, safety and organizational theories to promote patient safety, enhance quality care and improve nurse anesthesia practice
2. Analyze and synthesize relevant scientific literature and apply results to improve nurse anesthesia practice and patient care outcomes in a culturally sensitive manner
3. Communicate effectively with patients, families, the public and other health professionals
4. Demonstrate leadership skills to meet the challenges of increasingly complex health care and educational environments impacting nurse anesthetists
5. Develop effective strategies for managing ethical dilemmas inherent in anesthesia patient care and the workplace
6. Employ teaching and learning principles for the nurse anesthetist in educating and counseling individuals, families, students-in-training and groups
7. Demonstrate nurse anesthesia scholarship through presentations, publications, leadership activities and collaboration with other disciplines
8. Utilize technology and information systems to analyze, manage and present data

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
D.N.A.P.	Fall only	Mar 1	GRE within five years of application

Note: Review of applications is ongoing. Preference is given to those received prior to March 1 for fall entry.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must present the following minimum qualifications:

1. A graduate degree from an accredited university
2. Graduation from a nurse anesthesia educational program accredited by the Council on Accreditation of Nurse Anesthesia Educational Programs
3. Certification by the National Board of Certification and Recertification for Nurse Anesthetists
4. Recertification by the National Board of Certification and Recertification for Nurse Anesthetists (if applicable)
5. Current licensure as a registered nurse and advanced practice nurse (as applicable)
6. A minimum cumulative graduate GPA of 3.0 on a 4.0 scale
7. Graduate Record Examination General Test within five years of application
8. Personal statement including:
 - a. Reasons for seeking this educational opportunity
 - b. Career goals and how this degree will aid in that process
 - c. Prior lifework experience that will contribute to your success in the program
 - d. Potential areas of interest for the capstone project
9. Completed Graduate School application
10. Three professional references
11. Personal interview (by invitation)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), candidates for the degree of Doctor of Nurse Anesthesia Practice must be recommended by the faculty and:

1. Complete all requirements for the prescribed curriculum
2. Complete a capstone project
3. Earn a minimum GPA of 3.0 in all courses
4. Earn a minimum cumulative GPA of 3.0 in all work presented for graduation

Nurse Anesthesia Practice, Doctor of (D.N.A.P.), entry-level

Program accreditation

Council on Accreditation of Nurse Anesthesia Educational Programs

Program goal

The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that values excellence, stimulates creativity and recognizes achievement.

The department offers an entry-to-practice option to earn the Doctor of Nurse Anesthesia Practice degree. This 36-month, 93-credit-hour B.S. to D.N.A.P. option will include both traditional and hybrid (blended learning) course offerings preparing advanced practice registered nurses with the D.N.A.P. degree while also meeting all requirements for national certification as certified registered nurse anesthetists.

Student learning outcomes

The overall objective of the Doctor of Nurse Anesthesia Practice program is to prepare graduates who have acquired knowledge, skills and competencies in patient safety, perianesthetic management, critical thinking and communication to fulfill their professional responsibility as certified nurse anesthetists.

Upon completion of the program, the graduate will:

1. Apply physiological, safety and organizational theories to promote patient safety, enhance quality care and improve nurse anesthesia practice
2. Analyze and synthesize relevant scientific literature and apply results to improve nurse anesthesia practice and patient care outcomes in a culturally sensitive manner
3. Communicate effectively with patients, families, the public and other health professionals
4. Develop effective strategies for managing ethical dilemmas inherent in anesthesia patient care and the workplace
5. Employ teaching and learning principles for the nurse anesthetist in educating and counseling individuals, families, students-in-training and groups
6. Demonstrate leadership skills to meet the challenges of complex health care and educational environments
7. Demonstrate nurse anesthesia scholarship through presentations, publications, leadership activities and collaboration with other disciplines
8. Utilize technology and information systems to analyze, manage and present data

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
D.N.A.P.	Spring only	Mar 1	GRE within five years of application

Note: Review of applications is ongoing. Preference is given to those received prior to March 1 for spring entry.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must present the following minimum qualifications:

1. Baccalaureate degree in nursing or related science
2. Current, unencumbered licensure as a registered professional nurse in the United States and eligibility to obtain a registered professional nursing license in Virginia (prior to completion of the third semester)
3. Minimum cumulative undergraduate grade point average of 3.0 on a 4.0 scale (preferred)

4. Completion of the Graduate Record Examination within five years of application
5. A minimum of one year full-time work experience, or its part-time equivalent, as a registered nurse in a critical-care setting
6. Personal interview with members of the Admissions Committee (by invitation)
7. Three professional references (one of which must be from the immediate supervisor responsible for performance evaluations, including his or her contact number)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), candidates for the degree of Doctor of Nurse Anesthesia Practice must be recommended by the faculty and:

1. Complete all requirements for the prescribed curriculum
2. Earn a minimum GPA of 3.0 in all DNAP courses
3. Earn a minimum cumulative GPA of 3.0 in all work presented for graduation
4. Meet all clinical requirements as specified by the Council on Accreditation of Nurse Anesthesia Educational Programs and the National Board of Certification and Recertification of Nurse Anesthetists
5. Successfully complete both the Self-Evaluation Examination offered by the National Board of Certification and Recertification of Nurse Anesthetists and a written comprehensive examination

Curriculum requirements

Course	Title	Hours
ALHP 708	Ethics and Health Care	3
DNAP 701	Human Factors and Patient Safety for Nurse Anesthetists	3
DNAP 702	Nurse Anesthesia Patient Safety Seminar	3
DNAP 703	Health Services Delivery Systems for the Nurse Anesthetist	3
DNAP 704	Advanced Physiology/Pathophysiology for Nurse Anesthetists I	3
DNAP 705	Advanced Physiology/Pathophysiology for Nurse Anesthetists II	3
DNAP 706	Advanced Pharmacology for Nurse Anesthetists I	3
DNAP 707	Advanced Pharmacology for Nurse Anesthetists II	3
DNAP 711	Policy and Practice for Nurse Anesthetists	3
DNAP 712	Leadership in Nurse Anesthesia Education	3
DNAP 716	Advanced Chemistry and Physics Concepts for Nurse Anesthetists	1
DNAP 717	Advanced Physiological Concepts for Nurse Anesthetists	2
DNAP 718	Advanced Health Assessment for Nurse Anesthetists	3
DNAP 721	Clinical Practicum I	3

Program website: chp.vcu.edu/departments/nrsa (<https://chp.vcu.edu/departments/nrsa/>)

Nurse Anesthesia, Master of Science in (M.S.N.A.)

Program accreditation

Council on Accreditation of Nurse Anesthesia Educational Programs

Note: Admission to this program is temporarily suspended.

Program goal

The mission of the Department of Nurse Anesthesia is to provide learners with the knowledge and skills necessary to work as part of an interprofessional team to serve the public through the delivery of safe, cost-efficient, quality anesthesia services and to develop leaders and scholars who will advance the specialty of nurse anesthesia through research, scholarship and public service. The department achieves this mission by establishing an environment that promotes excellence, values diversity, stimulates creativity and recognizes achievement.

Student learning outcomes

The overall objective of the Master of Science in Nurse Anesthesia degree program is to prepare graduates who have acquired knowledge, skills and competencies in patient safety, perianesthetic management, critical thinking and communication to fulfill their professional responsibility as certified nurse anesthetists.

Upon completion of the program, the graduate will:

1. Plan, organize, deliver and evaluate safe anesthesia care
2. Design, implement and evaluate perianesthetic care
3. Incorporate critical thinking into ongoing professional practice
4. Evaluate the postoperative course of a patient
5. Assimilate into practice effective and culturally competent written, verbal and nonverbal communication with patients and families, other individuals involved in patient care, and the public
6. Assume responsibility for professional behavior

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

A student handbook will be made available to all admitted students in their cohort organizations in Blackboard.

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.N.A.	Fall only	Oct 1	GRE within five years of application

Note: Review of applications is ongoing. Preference is given to applications received prior to Jan. 1 for fall entry.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

1. Baccalaureate degree in nursing or related science
2. Current licensure as a registered professional nurse in Virginia (by completion of the first semester)
3. Cumulative minimum undergraduate grade point average of 3.0 on a 4.0 scale (preferred)
4. Upper-division undergraduate organic chemistry course or a Web-based medicinal chemistry prep course offered through VCU's Department of Chemistry [Contact (804) 828-9808 to register.]

- A minimum of one year's experience in an area of acute/critical care nursing (recent)
- Personal interview with members of the admissions committee (by invitation)
- Three professional references (One must be from the immediate supervisor who is responsible for applicant's performance evaluations with contact phone number attached.)

Contact the department (804) 828-9808 for specific admission requirements.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), candidates for the M.S.N.A. degree must be recommended by the faculty and:

- Complete all requirements for the prescribed curriculum
- Earn a minimum GPA of 3.0 in all NRSA courses
- Earn a minimum cumulative GPA of 3.0 in all work presented for graduation
- Meet all clinical requirements as specified by the National Board on Certification and Recertification of Nurse Anesthetists
- Successfully complete the Self Evaluation Examination offered by the National Board of Certification and Recertification for Nurse Anesthetists and a two-part (didactic/research) written comprehensive examination

Department of Occupational Therapy

Albert E. Copolillo, Ph.D.

Associate professor and chair

The program in occupational therapy was initiated at Richmond Professional Institute in 1942. In 1965, the graduate program leading to a Master of Science degree in basic professional education in occupational therapy was initiated. The School of Occupational Therapy became a department in the then-School of Allied Health Professions in 1970.

Philosophy

The philosophy of the Department of Occupational Therapy embraces the philosophical base of occupational therapy stated by the American Occupational Therapy Association (1979):

Man is an active being whose development is influenced by the use of purposeful activity. Human beings are able to influence their physical and mental health and their social and physical environment through purposeful activity. Human life is a process of continuous adaptation. Adaptation is a change in function that promotes survival and self-actualization. Biological, psychological and environmental factors may interrupt the adaptation process at any time throughout the life cycle, causing dysfunction. Purposeful activity facilitates the adaptive process. Purposeful activity (occupation), including its interpersonal and environmental components, may be used to prevent and mediate dysfunction and to elicit maximum function. Activity as used by occupational therapists includes both an intrinsic and a therapeutic purpose. (AOTA, [1979]. The philosophical base of occupational therapy. *AJOT*, 33, 785.)

Mission

The primary mission of the Department of Occupational Therapy is the preparation of excellent, innovative, adaptable and responsible occupational therapists as professional leaders for the state and the nation.

In pursuit of this mission, the department:

- Fosters student commitment to scientific inquiry and professional competence, and promotes personal growth, balance and dedication to lifelong learning
- Promotes faculty excellence and collaboration in teaching, scholarship and research that models integrity and competence
- Collaborates with the community through education, consultation and the development of strong linkages with clinical educators and the community
- Interacts dynamically with the occupational therapy profession and stakeholders, contributing proactively to the evolution of the profession

Facilities

The educational facilities of the Department of Occupational Therapy are located in the Theater Row building at 730 E. Broad St. During the professional master's degree program, fieldwork assignments are made for students in a wide range of clinics and agencies in the Richmond metropolitan area. A 24-week extended fieldwork requirement will be arranged in approved clinical education facilities throughout the United States.

Academic regulations

Students are admitted to the occupational therapy programs with the expectation that they will direct maximum time and effort to the learning process. Outside activities must be scheduled by students for such dates and hours as permit full compliance with the time requirements for course work. Tardiness, lack of regular attendance or failure to meet deadlines for course assignments will not be excused because of employment or other outside activities.

To continue in the graduate curriculum, students are expected to maintain a cumulative GPA of 3.0 based on course work following matriculation.

- Graduate students who fail to maintain a 3.0 cumulative GPA or receive a grade of D (regardless of the cumulative GPA) will automatically be placed on probation and will be notified of probationary status.
- Conditions of probation:
 - Students must earn a quality point average during the semester of probation sufficient to result in a cumulative GPA of 3.0 in order to be removed from probationary status.
 - Students who are on probation due to receiving a D grade must retake that course, achieving a grade of C or better while also meeting all other academic standards.
 - Conditions of probation also may include recommendations for academic counseling, assignments by individual instructors and other requirements identified by the Committee on Academic Standing and Student Progress. Conditions of probation will be detailed in a letter of notification of probation prepared by this committee.
 - Only one semester of academic probation is permitted in the program. If probationary students fail to meet academic standards (GPA of 3.0) in a second semester or do not successfully complete deficient courses, they will be considered for dismissal.
- As courses usually are offered only once a year and because early courses serve as prerequisites for later courses, students retaking a course or taking a reduced course load will have to continue under an adjusted curriculum plan. This will result in extending the student's time in the program.
- Students who receive an F grade in any required course will be considered for dismissal by the committee.
- University standards require that a graduate student must not have more than six semester hours or 20 percent of semester hours attempted, whichever is greater, with a grade of C. Students who receive a grade of C on more than the allowable number of semester hours will be reviewed for possible academic termination by the Committee on Academic Standing and Student Progress. Students who are not terminated for this criterion will be placed on automatic probation.
- If a student withdraws or is terminated by the clinical faculty before the completion of the Level II fieldwork course, the student will receive an U grade for the course. If the student withdraws, is terminated or fails a fieldwork experience, the course may be repeated only upon approval by the Committee on Academic Standing and Student Progress in consultation with the department chair and the fieldwork coordinator. Students may be dismissed from the program or be allowed to continue contingent upon fulfilling remedial activities based on a plan prepared by the fieldwork coordinator and ratified by the committee. No more than one additional fieldwork experience will be rescheduled. The opportunity to re-register and repeat the fieldwork course is contingent upon the fieldwork coordinator's ability to locate another facility willing to offer a fieldwork experience to the student and upon the support of the committee. Level II fieldwork must be completed no later than 24 months subsequent to the completion of the academic phase.
- To continue in good standing, students also are expected to:

- Pay all fees
- Maintain personal attributes and ethical behaviors consistent with professional practice as defined in the Occupational Therapy Department Student Handbook
- Complete fieldwork requirements to the satisfaction of clinical and academic faculty
- Although arrangements are made in advance, each student is reviewed prior to placement in the Level II Fieldwork education. Students must have satisfactorily completed courses prerequisite to that fieldwork experience and be recommended by the faculty. They must demonstrate professional behavior as specified in the ethical behaviors listed in the Occupational Therapy Department Student Handbook. Medical problems may delay or prevent fieldwork placement.
- Occupational Therapy Doctorate (O.T.D.), entry-level (p. 174)

Occupational Therapy Doctorate (O.T.D.), entry-level

Program accreditation

Accreditation Council for Occupational Therapy Education of the American Occupational Therapy Association

The O.T.D. program prepares students for entry-level practice while also providing advanced training in evidence-based practice, interprofessional and collaborative care and program and career development. In April 2014, the Board of Directors of the American Occupational Therapy Association, responding to changes seen in higher education, health care and the profession, issued a statement in support of a doctoral-level single point of entry for occupational therapists. The recommended target date for completion of the transition is 2025. The Board's rationale included:

- Greater demands for practice-based scholarship and research
- A need to prepare graduates with professional autonomy and avoid de-professionalization
- An increased focus on primary care, interprofessional care teams and specialization in practice
- Trends in health care professions to transition to the entry-level doctorate
- Creation of an unambiguous entry level that reflects equivalent preparation of all practitioners entering the profession

The entry-level O.T.D. program is designed to prepare students for careers in a wide range of occupational therapy practice settings. Graduates will be eligible to apply for licensure to practice in any state.

Program goal

The primary mission of the Department of Occupational Therapy is the preparation of excellent, innovative, adaptable and responsible occupational therapists as professional leaders for the state, the nation and the world. Our mission represents an integration of the missions of the university and the College of Allied Health Professions. In pursuit of this mission, the department:

- Fosters student commitment to scientific inquiry and professional competence and promotes growth, balance and dedication to lifelong learning

- Promotes faculty excellence and collaboration in teaching, scholarship, research and service that models integrity and competence
- Collaborates with the community through education, consultation and the development of strong linkages with clinical educators and the community
- Interacts dynamically with the OT profession and stakeholders, contributing proactively to the evolution of the profession.

Student learning outcomes

1. **Meet foundational requirements:** As part of a broad foundation in liberal arts and sciences, including biological, physical, social and behavioral sciences, to meet the needs of individuals and communities, students will be able to employ logical thinking, critical analysis, clinical reasoning and problem-solving to demonstrate oral and written communication skills, innovative use of computer technology, knowledge of human structure and function, awareness of social development and apply the use of statistics to interpret tests and measurements. (Objectives B.1.1-B.1.11 in ACOTE Standards)
2. **Basic tenets of occupational therapy:** Students will be able to explain the meaning and impact of occupation in meeting society's current and future occupational needs, including articulating the historical and philosophical base of the profession, its role as a central construct in OT theory development, its relationship to the promotion of health and wellness and prevention of disease and disability. Recognizing the importance of activity analysis in the process of formulating intervention plans will be an emphasis for student learning. (Objectives B.2.1-B.2.11 in ACOTE Standards)
3. **OT theories, models and frames of reference:** Students will be able to describe, integrate and apply a variety of occupational therapy theories, models of practice and frames of reference in evaluation and intervention and will articulate the process of theory development and its desired impact and influence on the individual and society. Students will be able to discuss how practice influences and is influenced by history, theory and sociopolitical climate. Occupational therapy theories and models covered in the curriculum will include but not be limited to: the model of human occupation, sensory integration, biomechanical and rehabilitation models, motor control and movement recovery models. (Objectives B.3.1-B.3.6 in ACOTE Standards)
4. **OT screening, evaluation and referral:** To analyze, synthesize, evaluate and diagnose problems related to occupational performance and participation, students will be able to use evidence-based reasoning to select appropriate tools, both standardized and non-standardized; analyze psychometric properties of assessment tools; evaluate occupational performance across all areas of occupation; distinguish between roles of occupational therapists and occupational therapy assistants; make appropriate client referrals; interpret test results; and document services to assure accountability, reimbursement and need for services. (Objectives B.4.1-B.4.11 in ACOTE Standards)
5. **Intervention planning:** In accordance with the Occupational Therapy Practice Framework, students will learn to develop occupation-based intervention plans and strategies from the level of individual to population-based interventions in traditional and emerging practice environments. Intervention planning will be based on appropriate theoretical approaches, information acquired via occupational profiles, evaluation of client factors – body function and structure strengths/weaknesses, performance patterns, contextual issues, activity demands, and performance skills. Students will be able to choose appropriate therapeutic activities, learn the value of therapeutic use of self, modify environments, incorporate assistive technologies, fabricate needed orthotics and train clients in areas of mobility and transfer, feeding and eating, and activities of daily living. Students will educate clients as needed and safely use superficial thermal and mechanical modalities as preparatory measures to improving occupational performance. (Objectives B.5.1-B.5.28 in ACOTE Standards)
6. **Context of service delivery:** Students will demonstrate knowledge of the variety of contexts that affect and are affected by occupational therapy service delivery. They will be able to compare and contrast differences in service delivery systems, including health care, education, community and social systems. They will be able to discuss the impact of socioeconomic and political influences on occupational therapy and advocate for changes in policies and systems to address society's occupational needs. They will integrate national and international resources in education, research, practice and policy development. (Objectives B.6.1-B.6.6 in ACOTE Standards)
7. **Leadership and management:** Students will be able to identify and evaluate how contextual factors affect service delivery and management of services; awareness of how federal and state laws guide service delivery; understanding of the requirements for licensing and certification, documentation and reimbursement; and the essential nature of competency-based procedures for legal and ethical supervision of occupational therapy personnel, non-occupational therapy personnel and fieldwork students. Students will demonstrate the ability to design and write program development plans for the provision of occupational therapy services to individuals and populations. (Objectives B.7.1-B.7.12 in ACOTE Standards)
8. **Scholarship:** Students will be able to articulate the importance of knowledge development for the profession; locate, critique and interpret research evidence; apply research literature to make evidence-based practice decisions; use and interpret basic descriptive, correlational and inferential quantitative statistics and code; analyze and synthesize qualitative data; and demonstrate an understanding of the grant process. Students will complete a culminating project that involves the design of a scholarly proposal, implementation and documentation of the study. (Objectives B.8.1-B.8.10 in ACOTE Standards)
9. **Professional ethics, values and responsibilities:** Students will be able to demonstrate knowledge and understanding of the American OT Association Code of Ethics and Ethics Standards and AOTA Standards of Practice; the importance of membership in professional organizations; the value of supporting and educating other professions about OT; identification and development of strategies for ongoing professional development; responsibilities related to liability; conflict resolution; contractual service provision; and ethical supervision. Students will discuss and justify the varied roles of occupational therapists, including program and policy development, advocate, administrator and leader. (Objectives B.9.1-B.9.13 in ACOTE Standards)
10. **Fieldwork:** Through a carefully coordinated process of fieldwork, students will be able to apply concepts learned in the classroom to practice settings under careful supervision of trained and qualified occupational therapy practitioners. Gradation of time spent, responsibilities and expectations placed on students will be provided through assignment, first to fieldwork level I and then to fieldwork level II experiences across a wide range of settings and practice areas. (Objectives C.1.1-C.1.19 in ACOTE Standards)

11. **Doctoral experiential component:** Through completion of a professional portfolio, a doctoral experiential component, and evaluation and dissemination, students will demonstrate leadership and advanced skills in one or more of the following areas: clinical practice, administration, research, program or policy development, advocacy, education or theory development. Upon completion of all course work, fieldwork and doctoral experiential requirements, students will be prepared to take the National Board for Certification in Occupational Therapy examination, thereby qualifying them for state licensure and practice of occupational therapy at the entry level. (Objectives C.2.1-2.5 in ACOTE Standards)

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

All graduates of an occupational therapy program are required to take the national certification examination to become a registered occupational therapist and use the credentials OTR. The national certifying organization for occupational therapy is the National Board for Certification in Occupational Therapy. Other licensure or certification requirements have been established by all 50 states, the District of Columbia, Guam and Puerto Rico. Most licensure requirements include board certification as a registered occupational therapist. Some licensure or certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For specific information, prospective students should contact the licensure or certification agency for occupational therapy.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
O.T.D.	Summer	Dec 1 (OTCAS and VCU graduate applications)	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

1. A bachelor's degree from an accredited college or university
2. A minimum grade-point average in all college courses of 3.0 (based on a 4.0 system) or a 2.7 overall GPA for applicants whose undergraduate degree was earned five or more years prior
3. A minimum grade-point average in prerequisite courses of 3.25 without rounding
4. The Graduate Record Exam with a 4.0 minimum analytical writing score
5. An Occupational Therapy Centralized Application Service application (<https://portal.otcas.org/>) including these items:
 - a. A personal statement that addresses:
 - i. How the applicant's personal, educational and professional background will help achieve these goals
 - ii. How a master's degree in OT relates to immediate and long-term professional goals
 - iii. Why applicant is selecting OT as a career
 - iv. A "value-added" essay (no more than 1000 words) submitted as a PDF file to otentrylevel@vcu.edu
 - v. Evidence of completion of a minimum of 30 observation hours in one or more settings under the supervision of a licensed OTR or COTA
 - vi. Three letters of recommendation (One letter from an occupational therapist is preferred, but it is not essential.)
 - vii. Ten prerequisite (<http://www.sahp.vcu.edu/departments/occu/programs/entry-level-otd/prerequisite-courses/>) courses (30-32 semester credit hours)
6. Courses on kinesiology and medical terminology – strongly recommended, but not required

- 7. For non-native English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language iBT score of greater than 102, a TOEFL CBT score of greater than 253, a TOEFL PBT score of greater than 610 or an International English Language Testing System score of greater than 6.5

The VCU entry-level occupational therapy doctorate is a 104 credit program that spans three years (nine semesters). Applicants apply for the program between July and Dec. 1 of the year preceding enrollment. Orientation and summer semester classes begin the first week of June. The first semester is a seven-credit part-time semester and the second summer semester is a five-credit part-time semester. All other semesters, including the last year of two semesters of Level II fieldwork and the final semester of doctoral practicum are full-time semesters. Five courses in the curriculum (OCCT 780, OCCT 781, OCCT 782, OCCT 783 and OCCT 784) taken during the second summer and the second and third spring semesters will be taught in a hybrid format, which will require some on-campus hours with the remainder taught using the Blackboard course management system. Students will be required to have a computer or tablet with access to the Internet.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete all College of Health Professions requirements and successfully complete 104 credit hours.

Course	Title	Hours
IPEC 501	Foundations of Interprofessional Practice	1
OCCT 580	Introduction to the Profession of Occupational Therapy	2
OCCT 589	Advanced Functional Anatomy	5
OCCT 590	Functional Movement Analysis in Occupational Therapy	3
OCCT 591	Neuroscience Applications to Occupational Therapy	4
OCCT 592	Introduction to Injury, Illness and Disability	3
OCCT 593	Analysis of Human Occupation	1
OCCT 594	Theoretical Foundations of Occupational Therapy	4
OCCT 613	Adult Occupational Performance I	3
OCCT 614	Pediatric Occupational Performance I	4

Department of Patient Counseling

Russell H. Davis, Ph.D.

Professor and chair

Patient counseling is the practice of communicating empathic concern, support and sensitive spiritual counsel to the physically or emotionally troubled person in the traumas of life. There is a long history of a concerted effort toward this end at VCU Health. With the appointment of Dr. George D. Ossman as chaplain in 1943, the administration gave clear evidence of its awareness of the need for a specialized caring ministry to hospitalized patients and their families.

The chaplaincy program was significantly expanded in 1958 and was accredited to begin the education and clinical training of persons in patient counseling. Since then, a continuous program has been in existence and has evolved into the present program in patient counseling. Patient counseling, as it exists today, became an integrated program in the then-School of Allied Health Professions in 1970. A comprehensive curriculum review was completed in 1999.

With the rapid growth of health care and the increasingly complex problems of medical ethics and viable delivery systems, it is very important to educate qualified persons to deal with the human dimensions of illness as well as the personal and family stressors related to it. Through this program, VCU has an opportunity to make an impact upon health care education by emphasizing the spiritual dimension of human needs in life crises. By so doing, this university has a significant role to play in the important task of keeping health care holistic and utilizing technical and scientific methodology in the context of a deep respect for the total life of persons.

Accreditation

The program is accredited by the Association for Clinical Pastoral Education Inc (<https://www.acpe.edu/>). and is offered in collaboration with VCU Health. Virginia Commonwealth University/VCU Health is accredited to offer CPE (Levels I/II) and Supervisory CPE by the ACPE, 1549 Clairmont Road, Suite 103, Decatur, Georgia, 30033; (404) 320-1472.

Objectives

The programs in patient counseling are designed to assist an individual to work in the health field as one skilled in dealing with the whole person in the context of life's crises and in a cooperative interprofessional team approach. The programs are offered to persons who have an existing identity in a helping or counseling profession. This includes clergy, social workers, institutional counselors, education specialists, psychologists, community health workers and others in the health care professions.

Facilities

West Hospital (W4S) is the base for the educational program, and limited space is available in clinical areas to work with persons and families in crisis. The Main Hospital, mezzanine level, contains the chapel, family consultation room and administrative offices.

Code of ethics

The professional behavior of the student is expected to be in accordance with the Code of Professional Ethics, as adopted by the Association for Clinical Pastoral Education, Inc. and the Code of Ethics of the Association of Professional Chaplains.

Student responsibilities

Students serve in the dual capacity of providing pastoral care service while learning. Extensive clinical involvement, including night and weekend responsibilities, is required for selected courses and clinical pastoral education credit. Each student receives individual supervision by a member of the faculty.

Students who are unsuccessful in demonstrating completion of designated clinical pastoral education outcomes in any program will be required to develop with a faculty mentor an individualized plan of study toward their completion. Typically, this plan will be accomplished through additional course work or a directed independent study.

Continuation requirements, advising, transfer and part-time status

A student must maintain a minimum GPA of 3.0 in all course work completed at VCU. A student who falls below that minimum will have one semester to remedy the deficiency.

A student must register for at least one credit hour each academic year for continuation in the program. Any student who fails to register must have prior approval to do so or be dropped from the program and must reapply for reinstatement.

There is a five calendar-year maximum for students to complete the Master of Science degree and a seven calendar-year maximum for the dual degree. The graduate certificate program must be completed within a four calendar-year maximum. Part-time students who wish to accumulate concurrent ACPE credit need to be sure that course work is completed in accordance with ACPE standards.

A maximum of eight credits may be transferred from another university toward the Master of Science course requirements provided these credits have not been applied to a previous degree. A maximum of one-third of the didactic hours may be transferred from another VCU program. Dual-degree candidates may apply six credits from their seminary studies to the VCU degree. Transfer is given at the discretion of the chair after consultation with the faculty, subject to university approval. Credits are not transferable to either of the certificate programs.

Students who have been admitted to the graduate certificate program may be admitted to the Master of Science degree with advanced standing after the completion of at least 18 credits with a B or better. All credits of a B or better will transfer to the degree program.

Upon admission to all programs students will be assigned a faculty adviser.

- Patient Counseling, Master of Science (M.S.) with a concentration in accelerated chaplain certification (p. 180)
- Patient Counseling, Master of Science (M.S.) with a concentration in chaplain certification (p. 182)
- Patient Counseling, Master of Science (M.S.) with a concentration in supervisory clinical pastoral education (p. 184)

Patient Counseling, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation

Association for Clinical Pastoral Education

Program goal

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context

Student learning outcomes

1. Students will articulate the central themes and core values of their religious heritage and the theological understanding that informs their ministry (ACPE Standard 311, Outcome 311.1).
2. Students will identify and discuss major life events, relationships and cultural contexts that influence personal identity as expressed in pastoral functioning (ACPE Standard 311, Outcome 311.2).
3. Students will initiate peer group and supervisory consultation and receive critique about one's ministry practice (ACPE Standard 311, Outcome 311.3).
4. Students will risk offering appropriate and timely critique (ACPE Standard 311, Outcome 311.4).
5. Students will recognize relational dynamics within group contexts (ACPE Standard 311, Outcome 311.5).
6. Students will demonstrate integration of conceptual understandings presented in the curriculum into pastoral practice (ACPE Standard 311, Outcome 311.6).
7. Students will initiate helping relationships within and across diverse populations (ACPE Standard 311, Outcome 311.7).
8. Students will use the clinical methods of learning to achieve their educational goals (ACPE Standard 311, Outcome 311.8).
9. Students will formulate clear and specific goals for continuing pastoral formation with reference to personal strengths and weaknesses (ACPE Standard 311, Outcome 311.9).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Students receive a Department of Patient Counseling student handbook during orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jun 1	TOEFL: international students
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have successfully completed undergraduate training and hold a bachelor's degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level. Students must apply and be accepted to VCU's Graduate School to participate in our Clinical Pastoral Education program. This program also requires the submission of a resume, the Association of Clinical Pastoral Education application materials and a personal interview with

faculty. Application fact sheets and narrative instructions can be found on the **ACPE website**.

Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. Ability to communicate orally and in writing must be presented to the Department of Patient Counseling Admissions Committee.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete 12 credit hours of study according to one of the established curricula. Course substitutions require faculty approval.

Curriculum requirements

Course	Title	Hours
Core requirements		
PATC 515	Basic Patient Counseling	9
Electives		
PATC 500-level or higher elective		3
Total Hours		12

The minimum total of graduate credit hours required for this certificate is 12.

Patient Counseling, Master of Science (M.S.), accelerated chaplain certification concentration

Program accreditation

Association for Clinical Pastoral Education

Program goal

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context.

Student learning outcomes

1. Graduates will demonstrate awareness of self with congruence in the care of patients, families and staff (ACPE Standard 312, Outcome 312.1).

2. Graduates will demonstrate ability to provide care with sensitivity and respect in a diverse patient, family and staff environment (ACPE Standard 312, Outcome 312.2).
3. Graduates will demonstrate the knowledge and provision of intensive and extensive pastoral/spiritual care to persons in crisis (ACPE Standard 312, Outcome 312.3).
4. Graduates will demonstrate incorporation of theological understanding and knowledge of the behavioral sciences in care of patients, families and staff (ACPE Standard 312, Outcome 312.4).
5. Graduates will demonstrate effective participation as members of a comprehensive health care team (ACPE Standard 312, Outcome 312.5).
6. Graduates will demonstrate responsible care and professional boundaries (ACPE Standard 312, Outcome 312.6).
7. Graduates will demonstrate the utilization of individual and group supervision for personal and professional development as well as ongoing evaluation of clinical practice (ACPE Standard 312, Outcome 312.7).
8. Graduates will demonstrate awareness of professional standards in chaplaincy (ACPE Standard 312, Outcome 312.8).
9. Graduates will demonstrate ability to self-supervise and critically reflect on their own pastoral encounters (ACPE Standard 312, Outcome 312.9).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. Patient Counseling, Master of Science (M.S.) with a concentration in chaplain certification

Program accreditation

Association for Clinical Pastoral Education

Program goal

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context

Student learning outcomes

1. Graduates will demonstrate awareness of self with congruence in the care of patients, families and staff (ACPE Standard 312, Outcome 312.1).
2. Graduates will demonstrate ability to provide care with sensitivity and respect in a diverse patient, family and staff environment (ACPE Standard 312, Outcome 312.2).
3. Graduates will demonstrate the knowledge and provision of intensive and extensive pastoral/spiritual care to persons in crisis (ACPE Standard 312, Outcome 312.3).
4. Graduates will demonstrate incorporation of theological understanding and knowledge of the behavioral sciences in care of patients, families and staff (ACPE Standard 312, Outcome 312.4).
5. Graduates will demonstrate effective participation as a member of a comprehensive health care team (ACPE Standard 312, Outcome 312.5).
6. Graduates will demonstrate responsible care and professional boundaries (ACPE Standard 312, Outcome 312.6).
7. Graduates will demonstrate the utilization of individual and group supervision for personal and professional development as well as ongoing evaluation of clinical practice (ACPE Standard 312, Outcome 312.7).
8. Graduates will demonstrate awareness of professional standards in chaplaincy (ACPE Standard 312, Outcome 312.8).
9. Graduates will demonstrate ability to self-supervise and critically reflect on their own pastoral encounters (ACPE Standard 312, Outcome 312.9).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Students receive a Department of Patient Counseling student handbook during orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1	None
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have successfully completed undergraduate training and hold a bachelor’s degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level; graduate degree in a health-related field; or two years of graduate theological education. Students must apply and be accepted to VCU’s Graduate School to participate in the clinical pastoral education program.

This program also requires submission of the following supplemental material: a current resume, the Association of Clinical Pastoral Education Inc. application materials, copies of all previous self- and supervisor’s CPE evaluations and two verbatim case studies of clinical work. An

interview with the faculty admission committee will be granted based on application material.

Application fact sheets and narrative instructions can be found on the ACPE website (<https://www.acpe.edu/ACPE/Resources/Forms.aspx>).

Chaplain certification concentration

1. The chaplain certification concentration is available to individuals who have a previous graduate degree or who have at least two years of graduate education in theology, the behavioral sciences or the health-related sciences. It is assumed that completion of this 44-credit-hour concentration will take four to five semesters.
2. Students admitted to this option must have a minimum GPA of 3.0. Submission of the Graduate Examination Record is required when this GPA requirement is not met.
3. Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. Ability to communicate orally and in writing must be presented to the Department of Patient Counseling admissions committee.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must:

1. Complete a minimum of 44 credit hours in accordance with the approved curriculum
2. Complete all core courses
3. Complete all required elective course hours

Curriculum requirements

Patient Counseling, Master of Science (M.S.) with a concentration in supervisory clinical pastoral education

Program accreditation

Association for Clinical Pastoral Education

Program goal

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context

Student learning outcomes

1. Student maintains personal integrity and a deepening pastoral identity (ACPE Standard 315, Outcome 315.1).
2. Student demonstrates emotional and spiritual maturity (ACPE Standard 315, Outcome 315.2).
3. Student forms meaningful pastoral relationships (ACPE Standard 315, Outcome 315.3).
4. Student self-supervises their own ongoing pastoral practice (ACPE Standard 315, Outcome 315.4).
5. Student refines their professional identity as a clinical pastoral educator (ACPE Standard 315, Outcome 315.5).
6. Student demonstrates awareness of how their own culture affects professional and personal identity, pastoral practice, the supervisory relationship and student learning (ACPE Standard 315, Outcome 315.6).
7. Student articulates understanding of and methodology for clinical pastoral supervision based on a critical grasp of the professional literature relating to the field of clinical supervision (Standard 315, Outcome 316.1).
8. Student articulates and implements a philosophy of CPE based on an educational model integrating the theory and practice of CPE, which is based on and congruent with their own theology (Standard 316, Outcome 316.2).
9. Student articulates rationale for multicultural competence, integrating the theory and practice of CPE, which is based on and congruent with their own theology (Standard 316, Outcome 316.3).
10. Student assesses an individual student's learning patterns, personality, religious history and cultural values as a basis for supervisory strategies (ACPE Standard 317.1, Outcome 317.1.1).
11. Student supervises students' pastoral work, giving attention to unique patterns of personal and professional development, including the ability to assist students' movement toward pastoral identity (ACPE Standard 317.1, Outcome 317.1.2).
12. Student defines and evaluates students' pastoral and personal resources, and uses supervisory strategies and interventions to facilitate students' learning and development in pastoral care (ACPE Standard 317.1, Outcome 317.1.3).
13. Student assists students in taking responsibility for formulating a learning process and evaluating the results of the learning experience (ACPE Standard 317.1, Outcome 317.1.4).
14. Student uses their own personality and personal, religious and cultural history as a teaching resource in shaping a personal supervisory style (ACPE Standard 317.1, Outcome 317.1.5).
15. Student facilitates development of group interpersonal interaction (ACPE Standard 317.2, Outcome 317.2.1).
16. Student enables students to use their responses to the program as a learning experience (ACPE Standard 317.2, Outcome, 317.2.2).
17. Student develops and organizes programs of CPE based on program educational principles appropriate to experiential learning (ACPE Standard 318, Outcome 318.1).
18. Student manages CPE programs effectively (ACPE Standard 318, Outcome 318.2).
19. Student develops a variety of CPE program resources (ACPE Standard 318, Outcome 318.3).
20. Student uses diverse clinical educational methods (ACPE Standard 318, Outcome 318.4).
21. Student works with the theological implications of the ministry context (ACPE Standard 318, Outcome 318.5).
22. Student understands and applies professional organizational ethics as they relate to CPE and pastoral practice (ACPE Standard 318, Outcome 318.6).
23. Student uses appropriate clinical skills and teaching methods that integrate the role of context and culture in pastoral practice and education (ACPE Standard 318, Outcome 318.7).
24. Student advocates for students based on awareness of how persons' social locations, systems and structures affect their ministry, learning and the educational context (ACPE Standard 318, Outcome 318.8).
25. Student considers cultural factors in the use of learning assessments, educational strategies, curriculum resources and evaluation procedures (ACPE Standard 318, Outcome 318.9).
26. Student integrates educational theory, knowledge of behavioral science, professional and organizational ethics, theology and pastoral identity into supervisory function (ACPE Standard 319, Outcome 319.1).
27. Student demonstrates awareness of the cultural contexts of diverse student groups and clinical populations that integrates and articulates ethnic identity development and its implications for pastoral practice and supervisory relationships (ACPE Standard 319, Outcome 319.2).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Students receive a Department of Patient Counseling student handbook during orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1	GRE
	Spring	Nov 1	International students required (TOEFL)
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have successfully completed undergraduate training and hold a bachelor's degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level; graduate degree in a health-related field; or two years of graduate theological education. Students must apply and be accepted to VCU's Graduate School to participate in the clinical pastoral education program.

This program also requires submission of the following supplemental material: a current resume, the Association of Clinical Pastoral Education Inc. application materials, a copy of all previous self- and supervisor's CPE evaluations and two verbatim case studies of clinical work. An interview with the faculty admission committee will be granted based on application material.

Application fact sheets and narrative instructions can be found on the **ACPE website**.

Supervisory clinical pastoral education concentration

1. The supervisory clinical pastoral education concentration is offered to persons seeking certification as supervisors according to the Standards of the Association for Clinical Pastoral Education Inc.
2. This degree concentration is available to students who hold a master's degree or equivalency and who have completed a minimum of four units of ACPE clinical pastoral education.
3. Students admitted to this option must have a minimum GPA of 3.0. Submission of the Graduate Examination Record is required when this GPA requirement is not met.
4. Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. The ability to communicate orally and in writing must be presented to the Department of Patient Counseling admissions committee.
5. Each full-time semester at VCU is designed to meet the requirements for one unit of supervisory CPE as accredited by the Association for Clinical Pastoral Education, Inc.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must:

1. Follow, under faculty guidance, the procedures outlined in ACPE's Manual on Certification
2. Meet with faculty annually for review of progress and continuation in the program
3. Complete a minimum of 44 credit hours in accordance with the approved curriculum
4. Complete all core courses
5. Complete all required elective course hours

Students who have completed degree requirements may continue to enroll as special students if completing residency requirements at VCU Medical Center or certification requirements with the ACPE.

Curriculum requirements

Only students admitted to this concentration are eligible to take courses numbered 653 through 696.

Course	Title	Hours
Core curriculum		
PATC 615	Theory of Group Leadership	2
PATC 640	Research Basics for Hospital Chaplains	1
PATC 641	Evidence-based Inquiry for Hospital Chaplains	1
PATC 642	Developing and Presenting Chaplaincy Research	1

Patient Counseling, Master of Science (M.S.)/Divinity, Master of (M.Div.) from the Samuel DeWitt Proctor School of Theology at Virginia Union University [dual degree]

Program accreditation

Association for Clinical Pastoral Education

Program goal

To provide clinical education for pastoral care professionals as well as other health care providers in the spiritual care of patients and families within an interdisciplinary context

Student learning outcomes

1. Graduates will demonstrate awareness of self with congruence in the care of patients, families and staff (ACPE Standard 312, Outcome 312.1).
2. Graduates will demonstrate ability to provide care with sensitivity and respect in a diverse patient, family and staff environment (ACPE Standard 312, Outcome 312.2).
3. Graduates will demonstrate the knowledge and provision of intensive and extensive pastoral/spiritual care to persons in crisis (ACPE Standard 312, Outcome 312.3).
4. Graduates will demonstrate incorporation of theological understanding and knowledge of the behavioral sciences in care of patients, families and staff (ACPE Standard 312, Outcome 312.4).
5. Graduates will demonstrate effective participation as a member of a comprehensive health care team (ACPE Standard 312, Outcome 312.5).
6. Graduates will demonstrate responsible care and professional boundaries (ACPE Standard 312, Outcome 312.6).
7. Graduates will demonstrate the utilization of individual and group supervision for personal and professional development as well as ongoing evaluation of clinical practice (ACPE Standard 312, Outcome 312.7).
8. Graduates will demonstrate awareness of professional standards in chaplaincy (ACPE Standard 312, Outcome 312.8).
9. Graduates will demonstrate ability to self-supervise and critically reflect on their own pastoral encounters (ACPE Standard 312, Outcome 312.9).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic

regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1	GRE
		Nov 1	TOEFL (required for international students)
		Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have successfully completed undergraduate training and hold a bachelor's degree or its equivalent from an accredited institution reflecting ability to perform at the graduate level; graduate degree in a health-related field; or two years of graduate theological education. Students must apply and be accepted to VCU's Graduate School to participate in the clinical pastoral education program.

Application fact sheets and narrative instructions can be found on the **ACPE website**.

Dual degree: Master of Science in Patient Counseling and Master of Divinity

1. The dual degree (M.S./M.Div.) option is offered cooperatively with the Samuel DeWitt Proctor School of Theology of Virginia Union University.
2. The program is designed as a four-year program with four full semesters spent in residence at VCU. Typically, students apply to the Department of Patient Counseling during the first semester of seminary enrollment.
3. Students admitted to this option must have a minimum GPA of 3.0. Submission of the Graduate Examination Record is required when this GPA requirement is not met.
4. Applicants holding degrees from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 550 on the TOEFL paper-based examination or 100 on the Internet-based examination. The ability to communicate orally and in writing must be presented to the Department of Patient Counseling admissions committee.
5. Students enrolled in the dual degree program will remain in good standing at VCU while enrolled in their seminary studies. Each sponsoring institution will grant its respective degree.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must:

1. Complete a minimum of 44 credit hours in accordance with the approved curriculum
2. Complete all core courses
3. Complete all required elective course hours
4. Submit official seminary transcript with VCU Application to Graduate

Final granting of the Master of Science degree requires an oral review with the faculty demonstrating completion of outcomes for Level II Clinical Pastoral Education or Supervisory Clinical Pastoral Education as determined by the chosen track of study.

Department of Physical Therapy

Mary Snyder Shall, P.T., Ph.D.

Professor and chair

The Department of Physical Therapy was established in 1931 to provide basic preparation for the practice of physical therapy. Between 1931 and 1954, the program consisted of a 12-month professional course designed to train students for entry into the profession. This program was based upon at least three years of college work or the possession of a registered nurse certificate. A two-year professional program after two years of preparatory college work was initiated in 1954. This program led to the degree of Bachelor of Science in Physical Therapy. In 1968, the Department of Physical Therapy became part of the then-School of Allied Health Professions. The two-year professional program leading to the Bachelor of Science degree continued through the 1988-89 academic year.

In August 1989, the department began a three-year professional program based on three years of previous college work that leads to a Master of Science degree. On Feb. 8, 2001 the VCU Board of Visitors approved a proposal to offer a Doctor of Physical Therapy as the entry-level professional degree. The State Council of Higher Education in Virginia gave its final approval for the proposal on June 20, 2001. The first class to study the professional program began in July 2002.

In addition to the professional program, the department participates in three collaborative and interdisciplinary Ph.D. programs.

Mission

The mission of the VCU Department of Physical Therapy is to serve the commonwealth of Virginia and the nation by:

- Advancing excellence in entry-level and post-entry-level education
- Generating innovative scientific discovery
- Impacting the health of the community through leadership

Philosophy

Physical therapy is an integral part of the health care system. Expanding knowledge in the basic and clinical sciences, and changes in the needs and mandates of society, continually place new demands on the physical therapy profession. The faculty of the Department of Physical Therapy is committed to providing educational programs responsive to expanding knowledge and the needs of society.

The primary principle directing the activities of the department is the faculty's commitment to optimal patient care through physical therapy education, research and practice. The faculty strongly believes that physical therapists must have a thorough understanding of the theory and evidence that form the basis of contemporary patient/client management. In addition, physical therapists must be excellent problem-solvers and must demonstrate the highest levels of professionalism in their interactions with patients/clients, families and colleagues. The faculty also believes that physical therapists have a responsibility to develop skills for lifelong learning and to engage in service to the profession and to their communities.

Objectives

The objectives of the Department of Physical Therapy, in concert with the mission of the university and the College of Health Professions, are to:

- Provide an entry-level post-baccalaureate educational program for full-time students with diverse backgrounds and experiences
- Contribute to interdisciplinary post-professional doctoral programs that prepare physical therapists to contribute to the understanding and application of therapeutic procedures through basic and applied research and to teach both clinical and didactic physical therapy on all academic levels
- Provide an atmosphere that fosters critical thinking, intellectual curiosity and integrity, freedom of expression, personal growth and professional competence, and a commitment to learning for faculty and students
- Provide an environment that facilitates research and scholarship directed toward optimizing patient care
- Provide services to the public and professional communities

Facilities

The educational facilities for the Department of Physical Therapy are located on the basement floor of A.D. Williams/West Hospital. These buildings, located on the northeast corner of 12th and Broad streets, house administrative and faculty offices, classrooms, physical therapy instructional, computer and research laboratories, and student locker rooms. Classrooms in other buildings on the MCV Campus are used as needed.

Clinical education experiences for professional students are offered in physical therapy clinics throughout Virginia and the country.

Graduate (post-professional) programs in physical therapy

The Department of Physical Therapy is committed to improving physical therapy services through graduate education and research. The department participates in cooperative and interdisciplinary doctoral programs. An interdisciplinary Ph.D. in Rehabilitation and Movement Science is offered in conjunction with two other departments at VCU: the Department of Kinesiology and Health Sciences in the College of Humanities and Sciences and the Department of Physical Medicine and Rehabilitation in the School of Medicine. Also, the department participates in the College of Health Professions' Ph.D. in Health Related Sciences.

Education at the Ph.D. level is a highly independent adventure. The curricula offered by the Department of Physical Therapy through joint ventures with other departments allow students the opportunity to focus on highly divergent aspects of research related to physical therapy. Each of the programs also offers students opportunity to hone teaching skills in preparation for a well-rounded academic career.

Regardless of the chosen program or track, each Ph.D. student conducts a substantial original research project. Individuals interested in doctoral education are encouraged to examine the research interest areas of faculty in each of the participating departments and to consult with the program directors before submitting their application to a specific program.

Admission requirements

Applications are encouraged from individuals who are practicing physical therapists. Applicants must have graduated from a physical therapy educational program approved by the American Physical Therapy Association. International students must have an equivalent level of education as determined by the International Admissions. Individuals who are not physical therapists are not accepted into the advanced degree programs.

Additional admission requirements for graduate study in the Department of Physical Therapy are as follows:

1. A minimum GPA of 2.7 on a 4.0 scale for entry-level professional education
2. Satisfactory score on the general test of the GRE (taken no more than five years prior to admission)
3. Three satisfactory letters of recommendation
4. Applicant's written statement of intent for pursuing graduate studies in a particular program
5. Such additional requirements as established for each specific program

International students also must score a 600 or above on the Test of English as a Foreign Language (250 on computer-based test).

Financial assistance

Some teaching and research assistantships are available from the department. These assistantships are competitive. Part-time employment as a physical therapy clinician is available in Richmond and surrounding areas. Doctoral students receiving stipends must receive approval of outside employment.

VCU provides three types of student assistance: scholarships, loans and work-study. For information on these types of financial assistance, write to the Office of Financial Aid, Virginia Commonwealth University, MCV Campus, Richmond, VA 23298-0244.

Priority consideration is given to applications received by Jan. 9.

- Physical Therapy, Doctor of (D.P.T.) (p. 189)
- Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology (p. 192)
- Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in neuromusculoskeletal dynamics (p. 194)

Physical Therapy, Doctor of (D.P.T.)

Program accreditation

Commission on Accreditation in Physical Therapy Education

The Department of Physical Therapy serves the people of the commonwealth of Virginia and the nation by providing educational programs related to physical therapy. The department provides an environment that encourages education through problem solving, free inquiry, professional behavior and scholarship. The department's primary focus is to prepare individuals for general physical therapy practice. These practitioners are educated to serve as an entry point into the health care system for consumers. Post-professional programs provide quality education leading to careers in teaching and research. The department also provides assistance and services to the community and

engages in research and scholarly activities related to the practice of physical therapy.

Preparation of physical therapists

VCU's Department of Physical Therapy offers a three-year degree program leading to a Doctor of Physical Therapy. The program prepares students for entry into the profession by teaching them to evaluate and manage patients with physical therapy problems effectively and in accordance with ethical principles. It also provides students with strategies to continually define and meet their own educational needs in order to keep skills and knowledge current throughout their professional careers.

Expected student outcomes

Satisfactory performance in the experiences provided in the Doctor of Physical Therapy program prepares the graduate to:

1. Demonstrate professional behavior in a manner consistent with APTA Code of Ethics and APTA Core Values
2. Adhere to legal practice standards, including all federal, state and institutional regulations related to patient/client care and fiscal management
3. Communicate effectively with all stakeholders, including patients/clients, family members, caregivers, practitioners, interprofessional team members, consumers, payers and policymakers
4. Adapt delivery of physical therapy services with consideration for patients' differences, values, preferences and expressed needs in all professional activities
5. Integrate basic principles of critical inquiry to evaluate, interpret and utilize professional literature in clinical practice, participate in clinical research activities, and critically analyze new concepts in the application of physical therapy practice
6. Apply current knowledge, theory and professional judgment, while considering the patient/client perspective, the environment and available resources
7. Determine, with each patient encounter, the patient's need for further examination or consultation by a physical therapist or referral to another health care professional
8. Perform a physical therapy patient examination using evidenced-based tests and measures that are appropriate to the patient's age, diagnosis and health status
9. Evaluate data from the patient examination (history, systems review, and tests and measures) to determine a diagnosis, prognosis, client goals and expected outcomes that guide future patient management
10. Establish and manage a safe and effective physical therapy plan of care that is consistent with professional obligations, interprofessional collaborations, and administrative policies and procedures of the practice environment
11. Perform physical therapy interventions in a competent manner to achieve patient/client goals and outcomes
12. Educate others (patients, caregivers, staff, students, other health care providers, business and industry representatives, school systems) using relevant and effective teaching methods
13. Produce accurate documentation that follows guidelines and specific documentation formats required by state practice acts, the practice setting and other regulatory agencies.
14. Collect and analyze data from selected outcome measures in a manner that supports accurate analysis of individual patient and group outcomes

15. Direct and supervise personnel to meet patient's goals and expected outcomes according to legal standards and ethical guidelines
16. Demonstrate a commitment to lifelong learning and the physical therapy profession by serving as an advocate for the profession and the health care needs of society

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

A hard copy of the VCU D.P.T. program student handbook and policies and procedures manual is distributed to each entering physical therapy student at orientation.

Apply online at [ptcas.org](http://www.ptcas.org/home.aspx) (<http://www.ptcas.org/home.aspx>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
D.P.T.	Summer	The beginning of November of the year prior to intended enrollment	GRE For non-native English-speaking applicants, regardless of immigration status, a TOEFL score of at least 600 (score of 250 on computerized exam) All test scores should be reported directly to VCU.

Special requirements

- The VCU Department of Physical Therapy participates in the American Physical Therapy Association-sponsored physical therapy centralized application service for applicants to the D.P.T. program. All students interested in applying to this program must submit their application materials directly to PTCAS. Applicants who apply through PTCAS will submit a completed Web-based application comprising biographical data, colleges and universities attended, academic course history, physical therapy observation hours, list of reference providers, work experience, extracurricular activities, honors, professional licenses and a personal essay. It is the applicant's responsibility to read and follow all PTCAS and program-specific instructions. Please visit the Department of Physical Therapy website for application deadlines.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

1. A Bachelor of Arts or Bachelor of Science degree from an accredited college or university
2. A minimum grade-point average of 2.7 (in a 4.0 system)
3. A minimum total of 45 volunteer hours in at least two physical therapy practice settings
4. Three recommendations, at least one of which is from a physical therapist

Prerequisites for admission to the professional Doctor of Physical Therapy program include a Bachelor of Arts or Bachelor of Science degree from an accredited college or university. If the applicant has

received college credit hours for AP courses and/or exams, and those hours are listed on the university transcript, those credit hours will be accepted. A grade of D in any required prerequisite course is not acceptable. A minimum GPA of 2.7 (in a 4.0 system) is required to be considered for admission. The GRE is required; the scores should be reported directly to Virginia Commonwealth University. For non-native English-speaking applicants, regardless of immigration status, a Test of English as a Foreign Language score of at least 600 (score of 250 on computerized exam) is required; scores should be reported directly to Virginia Commonwealth University.

The program of study necessary to be considered for admission to the professional Doctor of Physical Therapy program must include a minimum of the following subject areas and credits:

Biological sciences – 12 credit hours including laboratory experiences

- Must include four credit hours of college-level biology
- Must include four credit hours of anatomy and four credit hours of human physiology, or eight credit hours of anatomy/physiology (An exercise physiology course is not an acceptable substitute for a human physiology course.)
- Cell biology and histology highly recommended but not required

Chemistry – eight credit hours including laboratory experiences

Mathematics – three credit hours (must be in pre-calculus or a more advanced mathematics course)

Physics – eight credit hours of general physics with laboratory (Courses that emphasize mechanics, electricity, heat and light are highly recommended.)

Psychology – six credit hours (One introductory course and one course in human growth and development or abnormal psychology is required.)

Statistics – three credit hours

In order to complete the total requirements, students are encouraged to elect courses from the following categories: computer science, embryology, histology, cell biology, comparative anatomy, kinesiology, exercise physiology, foreign languages and courses in physical education dealing with an analytical approach to human movement or motor learning.

Students must also present a minimum of 45 volunteer hours in at least two physical therapy practice settings.

Students are required to have current CPR certification.

One of the three required letters of recommendation must be from a physical therapist.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), every professional physical therapy program student must maintain a minimum cumulative grade point average of 3.0. At the end of each semester, the faculty reviews the academic performance of all students. All students must have a GPA of 3.0 by the end of the second academic year in order to matriculate into PHTY 680 in the third academic year. Physical therapy students must complete all clinical education experiences to the satisfaction of the clinical and academic faculty.

Under no circumstances are physical therapy students permitted to participate in graduation ceremonies if they have not satisfactorily completed all the requirements of the professional physical therapy program curriculum.

Curriculum requirements

Course	Title	Hours
IPEC 501	Foundations of Interprofessional Practice	1
PHTY 501	Gross Anatomy (Physical Therapy)	7
PHTY 502	Kinesiology	4
PHTY 503	Applied Exercise Physiology	3
PHTY 505	Applied Microscopic Anatomy for Physical Therapy	4
PHTY 506	Functional Neuroanatomy	4
PHTY 508	Musculoskeletal Physical Therapy I	6
PHTY 510	Rehabilitation I	3
PHTY 512	Health Care Systems	2
PHTY 520	Clinical Education I	3
PHTY 531	Evidence-based Practice Concepts	2
PHTY 537	Rehabilitation II	3
PHTY 540	Psychosocial Aspects of Physical Therapy	1
PHTY 609	Clinical Biomechanics	3
PHTY 615	Pharmacology (Physical Therapy)	1
PHTY 621	Biophysical Agents	4
PHTY 623	Cardiopulmonary Physical Therapy	3
PHTY 624	Clinical Problem-solving I	2
PHTY 626	Lifespan I	6
PHTY 627	Lifespan II	2
PHTY 640	Neurologic Physical Therapy	6
PHTY 644	Orthotics and Prosthetics	2
PHTY 646	Clinical Medicine	2
PHTY 648	Musculoskeletal Physical Therapy II	5
PHTY 650	Clinical Education II	8
PHTY 651	Professional Issues in Physical Therapy	2
PHTY 654	Clinical Problem-solving II	1
PHTY 660	Musculoskeletal Physical Therapy III	2
PHTY 661	Administration and Management in Physical Therapy	2
PHTY 670	Clinical Integration of Physical Therapy Concepts	2
PHTY 674	Clinical Problem-solving III	1
PHTY 676	Comprehensive Study of Physical Therapy Practice	1
PHTY 680	Clinical Education III	12
PHTY 695	Clinical Education IV	12
Total Hours		122

The minimum total of graduate credit hours required for this degree is 122.

Sample plan of study

Summer semester

Prior to year one

PHTY 501	Gross Anatomy (Physical Therapy)	7
Term Hours:		7

P1 year

Fall semester

IPEC 501	Foundations of Interprofessional Practice	1
PHTY 502	Kinesiology	4
PHTY 503	Applied Exercise Physiology	3
PHTY 505	Applied Microscopic Anatomy for Physical Therapy	4
PHTY 510	Rehabilitation I	3
PHTY 531	Evidence-based Practice Concepts	2
PHTY 615	Pharmacology (Physical Therapy)	1
Term Hours:		18

Spring semester

PHTY 506	Functional Neuroanatomy	4
PHTY 508	Musculoskeletal Physical Therapy I	6
PHTY 520	Clinical Education I	3
PHTY 537	Rehabilitation II	3
PHTY 540	Psychosocial Aspects of Physical Therapy	1
PHTY 623	Cardiopulmonary Physical Therapy	3
Term Hours:		20

Summer semester

No courses required

Term Hours:		0
-------------	--	---

P2 year

Fall semester

PHTY 512	Health Care Systems	2
PHTY 609	Clinical Biomechanics	3
PHTY 621	Biophysical Agents	4
PHTY 624	Clinical Problem-solving I	2
PHTY 648	Musculoskeletal Physical Therapy II	5
PHTY 661	Administration and Management in Physical Therapy	2
Term Hours:		18

Spring semester

PHTY 626	Lifespan I	6
PHTY 627	Lifespan II	2
PHTY 640	Neurologic Physical Therapy	6
PHTY 644	Orthotics and Prosthetics	2

Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology [College of Health Professions]

Program goal

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity's impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals

for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.

Student learning outcomes

At the completion of the program students will:

1. Demonstrate comprehensive foundational knowledge within his/her area of program specialization
2. Develop testable hypotheses and appropriate study designs to address relevant research questions in his/her area of program specialization
3. Develop the skills and abilities to collect and manage research data while ensuring ethical and responsible conduct of research
4. Develop the ability to analyze research data and subsequently interpret and synthesize results and draw appropriate conclusions
5. Demonstrate teaching effectiveness in the classroom and/or clinical environment
6. Disseminate research findings effectively in oral and/or written formats

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan. 9 will be given priority consideration. Applications received following the deadline may be considered if space and resources are available.	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:

1. Have completed at least one of a master's degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
2. Provide official GRE score
3. Submit a curriculum vitae or professional resume indicating an applicant's educational and career experience as well as evidence of research potential

Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:

1. A minimum of 50 credit hours developed in conjunction with their advisers
2. Written and oral comprehensive examinations
3. All other university requirements of qualification for degree candidacy

4. Written dissertation based on a focused line of research
5. Oral defense of the dissertation

Department of Radiation Sciences

Jeffrey S. Legg, Ph.D., RT(R)(CT)(QM), FASRT

Associate professor and chair

chp.vcu.edu/departments/radsci (<http://sahp.vcu.edu/departments/radsci/>)

The Department of Radiation Sciences is an integral part of the College of Health Professions and shares its values. The department serves as a national leader in the education of students in the radiologic sciences and provides learning opportunities that are innovative and educationally sound. Strong linkages with clinical affiliates and their staffs are vital to the department's success. Faculty and staff work in a cooperative spirit in an environment conducive to inquisitiveness and independent learning to help a diverse student body develop to its fullest potential. The faculty is committed to the concept of lifelong learning and promotes standards of clinical practice that will serve students throughout their professional careers. Faculty members serve as resources for professionals in practice and contribute to an expanded knowledge base in the field of clinical radiation sciences.

The mission of the Department of Radiation Sciences is to enable a diverse student body to develop its fullest potential and to graduate baccalaureate-level radiologic health professionals who demonstrate outstanding technical, communication and critical-thinking skills.

Department of Radiation Sciences' goals

- For entry-level and second modality programs, students will be clinically competent.
 - Students will attain clinical competence.
 - Graduates will demonstrate clinical competence while employed in the radiation sciences.

2. Students will communicate effectively.
 - a. Students will demonstrate effective communication during their clinical experience.
 - b. Students will demonstrate effective communication through the research project.
 - c. Graduates will demonstrate effective communication while employed in the radiation sciences.
3. Students will demonstrate critical-thinking skills.
 - a. Students will demonstrate critical-thinking skills during their clinical experience.
 - b. Students will demonstrate critical-thinking skills in developing their research project.
4. Students will model professionalism.
 - a. Students will demonstrate professionalism during their clinical experience.
 - b. Graduates will demonstrate professionalism while employed in the radiation sciences.
5. The department will assure program effectiveness.

History

Radiologic technology education began at the Medical College of Virginia in the 1930s with a one-year training program in radiography. This program has undergone a number of changes through the years to evolve into the current baccalaureate educational program.

A concentration in nuclear medicine technology was added in 1984 and in radiation therapy in 1992. Degree-completion programs have been added to provide an opportunity for certified technologists and therapists to complete requirements for the baccalaureate degree.

Facilities

The educational facilities for the Department of Radiation Sciences are located at 701 W. Grace St., Suite 2100. These facilities include energized laboratories in radiography, nuclear medicine and radiation therapy. The radiography laboratory includes a digital imaging system. In addition, the radiation therapy laboratory has a 3-D treatment planning system.

During the various phases of the curriculum, students will be assigned to one or more of the following affiliate institutions: VCU Health's MCV Hospitals, McGuire VA Medical Center, Southside Regional Medical Center, Henrico Doctors' Hospitals and a variety of smaller clinics and facilities.

Department of Rehabilitation Counseling

Amy J. Armstrong, Ph.D.

Associate professor and chair

sahp.vcu.edu/rehab (<http://sahp.vcu.edu/departments/rehab/>)

Founded in 1955, the Department of Rehabilitation Counseling serves as a national leader in the professional preparation of licensed professional counselors and certified rehabilitation counselors who will exercise skill and competence on a high technical and ethical level. Department faculty conduct active programs of research and service and maintain high levels of teaching competence. In partnership with students, community agencies and consumer and professional organizations, the department endeavors to enhance the personal, social and economic well-being of the clients they serve, regardless of disability or other life circumstances.

The Department of Rehabilitation Counseling is fully accredited by the Council on Rehabilitation Education, and is the only such program in the commonwealth of Virginia. The purpose of accreditation is to promote the effective delivery of rehabilitation services to people with disabilities by fostering ongoing review and improvements of rehabilitation education programs. CORE has developed a field-based research accreditation process that has gained widespread acceptance in the professional accreditation movement. With more than 2,000 alumni, the department also enjoys solid relationships with many community organizations that serve as excellent sites for clinical training.

Faculty adviser

Every student must have a faculty adviser to guide the student regarding course selection and scheduling, to supervise his/her research and to act as a channel of communication with the department, to other departments and to the Graduate School. When the student receives notification of admission to the department, it is his/her responsibility to contact the faculty adviser to plan the program of study. Students consult with faculty advisers on a regular basis to ensure orderly progress through the entire program of study, choose clinical placement sites, select electives and plan their careers.

- Rehabilitation and Mental Health Counseling, Master of Science (M.S.) (p. 199)
- Professional Counseling, Certificate in (Post-master's certificate) (p. 197)

Professional Counseling, Certificate in (Post-master's certificate)

Program goals

The post-master's certificate program in professional counseling is designed for persons who hold the Master of Science or Master of Arts degree in counseling from VCU or other accredited institutions. The intent is to assist students in meeting the educational requirements for the Licensed Professional Counselor, the Licensed Substance Abuse Practitioner and the Certified Substance Abuse Counselor credentials in Virginia and other states.

The certificate program also may be pursued to fulfill preservice or continuing education requirements for various national certifications, such as National Certified Counselor or Certified Rehabilitation Counselor. Specialization requirements may exceed the minimum number of required credit hours for the certificate program as a whole.

Courses are selected from course offerings of the Master of Science in Rehabilitation Counseling program based on individualized need and in conjunction with a faculty adviser.

Specific goals include but are not limited to:

1. The encouragement of advanced graduate education in counseling
2. The facilitation of the professional counselor's career development efforts and goals
3. The facilitation of the acquisition or maintenance of professional state licenses or national certificates
4. The expansion of the student's awareness and expertise in specialized counselor roles and functions

Student learning outcomes

Upon completion of the program, the graduate will be able to:

1. Develop and maintain confidential counseling relationships with individuals using established skills and techniques
2. Establish, in collaboration with the consumer, individual counseling goals and objectives
3. Apply advanced counseling and interviewing skills
4. Employ consultation skills with and on behalf of the consumer

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Post-master's certificate	Fall	Apr 1	
	Spring	Oct 1	

Special requirements

- Statement of academic and professional goals and of previous work or volunteer experience
- Three letters of reference from professors, employers or others who can assess applicant's capabilities (nonfamily members)
- Personal interview (may be required)

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have completed a master's degree in rehabilitation counseling or a related discipline.

Upon admission to the program, students must meet with an academic adviser to design an approved course of study that leads to the completion of the educational requirements for licensure or certification as a professional counselor.

Degree requirements

In addition to general Graduate School graduation requirements (p. 31),

1. Students must complete a minimum of 15 graduate credit hours of course work in professional counseling that leads to the completion of the educational requirements for licensure or certification as a professional counselor, as prescribed in their approved courses of study. Specialization requirements may exceed the minimum number of required credit hours for the certificate program as a whole.
2. Students must maintain an overall minimum grade point average of 3.0.
3. The 15 graduate credit hours must not duplicate previous graduate course work completed at VCU or other institutions.
4. The 15 graduate credit hours must include six graduate credit hours in advanced counseling skills.
5. Transfer credits are not accepted.

Curriculum requirements

Upon admission to the program, students must meet with an academic adviser to design an approved course of study that leads to the completion of the educational requirements for licensure or certification as a professional counselor. Each plan of study is individualized, but may include courses from the following list, if approved by the faculty adviser.

Licensed Professional Counselor credential

Course	Title	Hours
RHAB 613	Advanced Rehabilitation Counseling Seminar (three-credit course; may be repeated for a total of nine credit hours)	9

RHAB 614	Counseling, Death and Loss ²	3
RHAB 615	Human Growth and Development	3
Total Hours		15

1

Possible topics: cognitive behavioral therapy; crisis counseling, etc.

2

Courses that may satisfy the six graduate credit hours in advanced counseling skills requirement.

The minimum total of graduate credit hours required for this certificate is 15.

Certified Rehabilitation Counselor credential

Course	Title	Hours
Select five of the following:		15
RHAB 525	Introduction to Rehabilitation Counseling	
RHAB 611	Theories of Professional Counseling	
RHAB 623	Career Counseling and Job Placement	
RHAB 624	Assessment and Evaluation	
RHAB 640	Medical and Psychosocial Aspects of Disabilities	
RHAB 633	Case Management	
RHAB 654	Multicultural Counseling	
RHAB 691	Counseling Techniques	
Total Hours		15

The minimum total of graduate credit hours required for this certificate is 15.

Licensure requirements

Refer to the Department of Rehabilitation Counseling website for additional information on Licensed Professional Counselor (<http://www.sahp.vcu.edu/rehab/current/lpc.html>) and the Commission on Rehabilitation Counselor Certification website (<http://www.crc certification.com/pages/aboutcertification/46.php>) for Certified Rehabilitation Counselor examination requirements.

Rehabilitation and Mental Health Counseling, Master of Science (M.S.)

Program accreditation

Council on Rehabilitation Education

Department goals

- To provide students with educational experiences that facilitate the development of knowledge, skills and values necessary to practice as a licensed professional counselor and certified rehabilitation counselor
- To provide students with learning opportunities that foster culturally responsive and ethical counseling practices
- To provide students with clinical training environments that prepare them to work in a variety of counseling settings

Program objectives

- Develop a well-rounded education in rehabilitation and mental health counseling
- Advance the basic philosophical tenets of rehabilitation, including the value and worth of all individuals, a belief in human dignity, and the right of all persons to fully participate in society
- Exercise skills and competencies on a high ethical level and with personal integrity
- Acquire a comprehensive understanding of the personal, social, vocational and psychological needs of persons with disabilities

Student learning outcomes

Upon completion of the program, the graduate will be able to:

- Demonstrate the ability to function ethically and effectively within settings that offer counseling, advocacy and related services to diverse populations
- Understand a range of counseling theories and skills applicable in a pluralistic society with individuals, groups, couples and families, as well as demonstrate the ability to apply this knowledge in a therapeutic manner to promote change and growth.
- Understand and apply the stages of development throughout the lifespan, including developmental goals, when working with individuals, regardless of disability or other impairing conditions
- Understand and apply career development theory and tools
- Demonstrate the ability to apply case management techniques with an understanding of the range of community resources available
- Demonstrate the appropriate use of assessment techniques when working with individuals and utilize relevant information within the counseling process
- Demonstrate the ability to evaluate professional research literature and incorporate such information into their professional development
- Demonstrate the knowledge and skills necessary to be an effective professional counselor through supervised practicum and internship experience

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

A student handbook is made available to students through a closed electronic system (Blackboard) and at new student orientation.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 1	GRE or MAT

Special requirements

- Full- and part-time students can be accommodated by the program. Applications are reviewed on an ongoing basis. To be considered, all pertinent materials must be received in the department by March 1.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

- Satisfactory performance in undergraduate education (based upon transcripts provided to Graduate Admissions)
- Three positive letters of reference from professors, employers or relevant sources
- Satisfactory performance on either the GRE or the MAT
- A relevant and clear statement of goals for graduate study and career
- Statement of previous work or volunteer experience

A personal interview with a faculty member may also be required.

A complete set of application materials is available from the Graduate Admissions website (<http://www.graduate.admissions.vcu.edu>).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the minimum degree requirement is 60 graduate credits, including 48 credits of didactic course work, 100 hours of fieldwork, 600 hours of internship and three credits of electives.

Graduates from accredited rehabilitation counseling programs are typically trained in counseling theory and techniques; individual, group and environmental assessment; psychosocial and medical aspects of disability; human development; cultural diversity; principles of psychiatric rehabilitation, case management and rehabilitation planning; issues and ethics in rehabilitation service delivery; technological adaptation; vocational evaluation and work adjustment; career counseling; implementation of the Americans with Disabilities Act; job development; and placement.

According to CORE Standards and the requirements of the department, students must have supervised rehabilitation and mental health counseling fieldwork and internship experiences that include:

- A minimum of 100 clock hours of fieldwork experience (as part of RHAB 692)
- A minimum of 600 clock hours of internship experience in rehabilitation and mental health settings (as part of RHAB 695 or RHAB 696)
- Written expectations and procedures for these experiences that are distributed to students and agency supervisors
- The following activities:
 - Orientation to program components, policies and procedures
 - Introduction to staff and their roles and functions
 - Identification of the expectations for students
 - Observation of all aspects of the delivery of rehabilitation and mental health counseling services
 - Work assignments performing the tasks required of an employed rehabilitation and mental health counselor in a rehabilitation and mental health setting from intake to discharge and/or placement
 - Reporting, including all required academic reports as well as logs, weekly progress reviews and summaries of activities
- Evaluation of student performance by the agency supervisor and the faculty supervisor, including self-evaluation by the student

Internship experiences shall be carried out under the regularly scheduled supervision of a CRC and LPC. The quality of supervision shall be maintained by involvement of VCU faculty in terms of in-service training, consultation, information and the provision of professional development resources to agency supervisors.

Transfer credit

A maximum of 12 graduate credit hours may be transferred from another VCU graduate program or outside institution if not applied previously to another degree. Transfer credit hours must carry a minimum grade of B from an accredited institution. Acceptance of transfer credit hours is made at the level of the department chair and dean of the School of Allied Health Professions. Transfer credit hours earned as a nondegree-seeking graduate student are limited to six credit hours. Credit hours earned as deficiency hours or to demonstrate the ability to compete at the graduate level, though transferable, may not be applied to the 48-credit-hour program of study.

Curriculum requirements

Course	Title	Hours
RHAB 521	Addiction Counseling	3
RHAB 525	Introduction to Rehabilitation Counseling	3
RHAB 526	Introduction to Mental Health Counseling	3

Virginia Center on Aging

The Virginia Center on Aging, established at VCU by the Virginia General Assembly in 1978, is a statewide resource for aging-related research, education, service, training and technical assistance. It serves as a focal point for the collection, assessment and maintenance of data on elders in the commonwealth; designs and tests innovative demonstration projects in education and service delivery; and assists public and private organizations in meeting the needs of older citizens.

The Virginia Center on Aging and the Department of Gerontology maintain the Information Resources Center, a broad collection of print and audiovisual materials on aging that is available on loan. Short reports and training manuals may be obtained at cost. The Virginia Center on Aging also administers the Alzheimer's and Related Diseases Research Award Fund that provides seed grants of \$25,000 each to researchers in Virginia in order to investigate biomedical, psychosocial, clinical, public policy and other aspects of dementing illness.

The Virginia Center on Aging regularly partners with other units of VCU in developing, conducting and evaluating research and training projects related to aging, disabilities, lifelong learning and health problems. The center is located in the Theater Row building at 730 E. Broad St.

COLLEGE OF HUMANITIES AND SCIENCES

The faculty and staff of the College of Humanities and Sciences are dedicated to excellence in teaching, research and public service. The mission of Virginia Commonwealth University provides the framework for this pursuit of excellence.

Teaching and learning are central to the college, and the college is central to educational and intellectual life at VCU. The college meets the educational needs of a diverse student body, provides general education for all undergraduate students of the university, preparatory programs for the health sciences, engineering and law, and educates future teachers in the liberal arts and sciences. The college offers comprehensive undergraduate, graduate and professional programs of study that link a foundation of understanding and knowledge with skills on which students can build careers, become responsible citizens and continue lifelong learning.

Scholarship, creative work and professional accomplishment are essential to teaching and learning. The college is responsible for advancing understanding and increasing knowledge for its own sake, for the educational benefit of its students, and for the good of the larger community.

In both teaching and research, the College of Humanities and Sciences seriously upholds the responsibilities of being part of a public, metropolitan university. Through service and public teaching, the college meets the challenges and opportunities afforded by VCU's urban environment and by its location in the capital of the commonwealth.

The college achieves national and international recognition through the success of its students, the advancement of the disciplines and professions represented by its programs, and through the individual and collaborative research of its faculty.

Graduate programs

The College of Humanities and Sciences offers the following graduate degree programs:

Biology, M.S.
Chemical Biology, Ph.D.
Chemistry, M.S. and Ph.D.
Clinical Psychology, Ph.D.
Counseling Psychology, Ph.D.
Creative Writing, M.F.A.
English, M.A.
Forensic Science, M.S.
Health and Movement Science, M.S.
Health Psychology, Ph.D.
History, M.A.
Integrative Life Sciences, Ph.D.
Interdisciplinary Studies, M.I.S.
Mass Communications, M.S. (through the Robertson School of Media and Culture)
Mathematical Sciences, M.S.
Media, Art, and Text, Ph.D.
Nanoscience and Nanotechnology, Ph.D.
Physics and Applied Physics, M.S.
Psychology, M.S. and Ph.D.
Rehabilitation and Movement Science, Ph.D.
Sociology, M.S.
Systems Modeling and Analysis, Ph.D.

Post-baccalaureate certificates

Applied Social Research (graduate)
Applied Statistics (graduate)
Gender, Sexuality and Women's Studies (graduate)

In addition to these degree programs, the College of Humanities and Sciences offers selected graduate courses in the Department of Philosophy and the School of World Studies (foreign languages and

religious studies), but does not offer graduate degree programs in these areas.

Graduate admission requirements

In addition to the general requirements for admission to graduate studies as stated in the Graduate study (p. 34) section of this bulletin, persons seeking admission to any of the graduate programs in humanities and sciences should:

- Have a bachelor's degree in the discipline in which application for graduate study is made or, in some programs as noted, a bachelor's degree in some other appropriate area
- Submit Graduate Record Examination scores (some departments require the scores on the advanced GRE within the discipline; some departments accept LSAT and MAT scores in lieu of GREs)
- Have submitted letters of recommendation that comment on the applicant's ability to undertake graduate study in the specified area

All applications will be considered in terms of the specific requirements for admission noted in the description of the individual programs and of the applicant's ability to perform satisfactorily in the program for which he/she has applied. The judgment of that ability will be based on the supporting material submitted with the application. Some graduate programs must limit enrollment to a fixed number of the best-qualified applicants. Final action on admission is taken by the dean of the Graduate School in consultation with the College of Humanities and Sciences and the program concerned.

Applicants whose applications reach the university after July 1 for the fall semester and after Nov. 15 for the spring semester may not have their applications processed in time for registration. The applicant whose application arrives late may be considered for admission as a special student, but there is no guarantee that the special student later will be accepted into a degree program.

Graduate registration

Although most students register for the fall semester, which begins in August, they may arrange to begin graduate work during the spring semester with the exception of the programs in clinical and counseling psychology.

Scholarships, assistantships, fellowships and other financial assistance for graduate students

The College of Humanities and Sciences seeks to attract and support graduate students of the highest caliber and to prepare them, through research and instruction, to meet local and national needs for highly trained men and women. Recognizing that financial limitations may inhibit some qualified students from applying, the college attempts to inform students of the options of various loans, grants and work-study opportunities that are available to them as well as assist them in financing their education by offering various forms of financial aid and facilitating the process of seeking financial assistance from external sources. Additionally, the college believes that the experience of being a teaching or research assistant reinforces the learning that takes place in the classroom. The value of teaching assistants also is recognized as being beneficial to the college's undergraduate programs.

Types of financial aid that are available to graduate students fall into three basic categories: aid that does not have to be repaid (grants, scholarships and tuition waivers), aid that does have to be repaid (loans) and aid that enables students to earn a portion of their school costs

(work-study, graduate teaching assistantships and graduate research assistantships).

Offers of financial aid are based on financial need and/or skill and competency. Financial need is determined by information contained in the Federal Application for Student Aid completed by the student. Not all financial aid is based on financial need. To ascertain your eligibility for the different types of financial aid, contact:

VCU Office of Financial Aid
901 W. Franklin St.
Box 843026
Richmond, VA 23284-3026
(804) 828-6669

and the department to which you will be applying.

The university library has reference books listing other types of scholarships and grants. International students should contact:

Global Education Office
916 W. Franklin St.
Box 843043
Richmond, VA 23284-3043
(804) 828-6016

Graduate teaching assistantships and graduate research assistantships are forms of financial aid that provide teaching and research positions for graduate students within their field of study. These are not loans and do not have to be repaid because the student is actually earning income for services rendered. Usually graduate assistants must work the equivalent of 20 hours per week. Assistantships are awarded to students who have demonstrated academic excellence. Individual departments award the assistantships, which usually include payment of tuition; the teaching and/or research duties of graduate assistants vary among departments. Graduate students interested in seeking these teaching and research positions are advised to contact the departments to which they will apply for admission.

Graduate students applying for financial assistance should remember the following tips:

- Apply early
- Use federal tax forms to complete the FAFSA
- Save copies of all forms completed, including tax returns
- Check with the specific department for application requirements and deadlines

Students should assume they are eligible, not ineligible.

The student adviser and the graduate committee

All departments offering graduate degrees in the College of Humanities and Sciences provide graduate students with advising either through a single adviser, the student's graduate committee or a departmental graduate committee. For details, students should consult the departmental director of graduate studies or the department chair.

Graduate degree requirements

- Full-time graduate status shall consist of a minimum of nine and a maximum of 15 credits per semester. No more than 12 semester credits may be earned in a summer session. See the Graduate study

(p. 34) section of this bulletin for course load requirements for students awarded graduate assistantships.

- Graduate students are required to maintain an overall GPA of 3.0 (B). Students who do not maintain a B average during the course of their program may be dropped from the program at any time on recommendation of the appropriate department committee to the dean of the Graduate School. If students earn less than a B on 20 percent or more of all attempted credits, their graduate status must be reviewed for continuation by the appropriate department committee.
- At least half of the credits required in the student's program must be those designated as exclusively for graduate students; that is, those at the 600 level or above.
- Graduate students must have earned an overall GPA of 3.0 (B) in order to receive a degree.

In addition to these requirements and those set forth in the Graduate study (p. 34) section of this bulletin, students must meet the requirements for specific degrees set forth in the departmental listings. Students also should consult the continuous enrollment policy stated in the Graduate study (p. 34) section of this bulletin.

VCU requires registration for a defined credit-hour level during both the didactic and research phases of advanced degree training. For programs requiring the preparation of a thesis or dissertation, there is no obligatory linkage between the accumulation of credit hours and an expectation that a degree be awarded.

As a guide to monitoring the timely completion of the degree requiring a thesis or dissertation within the present enrollment framework, the accumulation of 80 credit hours for a master's degree and 180 credit hours for a doctoral degree can be taken to be reasonable credit maxima. Unless stated otherwise, these figures apply only to programs offered by the College of Humanities and Sciences.

Students are required to submit in advance of the date when they expect to receive a degree a graduation application form to the dean of the College of Humanities and Sciences. Deadlines for the submission of the graduation application form are listed in the academic calendars (<http://academiccalendars.vcu.edu/>); for departmental deadlines the student should consult the departmental adviser. Individual departments may require additional forms.

Appeal procedures

Graduate students in the College of Humanities and Sciences have the right to appeal course grades or other academic actions on the grounds of a breach of due process. See the Graduate study (p. 34) section of this bulletin for a summary of the grade review procedure. An appeal of an academic action other than a grade review is governed by the graduate student academic appeal procedure. A copy of this document can be obtained from department offices.

Natasha Long

Coordinator of student services

The Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The school offers a Bachelor of Science in Mass Communications with specialization in one of three concentrations: advertising, journalism and public relations. The school also awards the Master of Science in Mass Communications, with concentrations in the areas of integrated PR and advertising, multimedia journalism, and strategic public relations.

Graduate information

Admission requirements for graduate study

All areas are open to graduates of accredited colleges and universities. Applicants must satisfy the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences (see the College of Humanities and Sciences guidelines in this bulletin). In addition, they should hold a baccalaureate degree in an area appropriate to the program to which they are applying and a GPA that indicates the ability to pursue graduate work. Although the type of undergraduate degree is not critical to admission, the programs require approved undergraduate curricula or the equivalent in order to grant full admission.

- Mass Communications, Master of Science (M.S.) with a concentration in integrated public relations and advertising with Fudan University [dual degree] (p. 205)
- Mass Communications, Master of Science (M.S.) with a concentration in multimedia journalism (p. 207)
- Mass Communications, Master of Science (M.S.) with a concentration in strategic public relations (p. 209)
- Media, Art, and Text, Doctor of Philosophy (Ph.D.) (p. 210)

Mass Communications, Master of Science (M.S.) with a concentration in integrated public relations and advertising with Fudan University [dual degree]

Program goals

The Richard T. Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research,

professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The M.S. in Mass Communications with a concentration in integrated public relations and advertising is offered in collaboration with Fudan University in Shanghai, one of VCU's 16 recognized international partners, and VCU's Richard T. Robertson School of Media and Culture. It is designed to educate Chinese students for the practice, in China, of professional public relations and/or advertising. Because in many agencies and organizations public relations and advertising are integrated, we are integrating the two professional disciplines in one degree program. The program is for Chinese students who have undergraduate degrees from a Chinese institution and who are already working or aspire to work in China for a public relations or advertising agency or an agency that combines the two persuasive communication disciplines. It is also open to students in the U.S. with the same undergraduate education and a desire to work in an internationally active public relations or advertising agency that does business in Asia/China. The program will prepare its students to function at a higher professional level than they can attain with their current academic and professional credentials.

Student learning outcomes

1. Demonstrate higher-level skills of the public relations management function, including strategy development and critical thinking
2. Communicate clearly and effectively in written and spoken forms appropriate for strategic public relations practice, audiences and the purposes they serve
3. Demonstrate ability to conduct research and evaluation to support strategic public relations decision-making
4. Effectively apply tools and technologies appropriate to managing the process for strategic public relations

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

The mass communications graduate handbook (<http://robertson.vcu.edu/about/advising/handbooks-and-worksheets/>) is available on the Robertson School website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Spring	Jan 15 (preferred consideration)	GRE-general
		Mar 15	TOEFL (International students only)

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Pass the entrance examination for postgraduate studies in the School of Journalism at Fudan University
2. Attain a qualified English proficiency level (i.e., greater than 600 for TOEFL or equivalent for iBT test)
3. Attain a GRE general test level of more than 1050 with no less than 500 for verbal (or equivalent for revised GRE)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

The dual degree program generally takes three academic years. The first three semesters are typically completed at Fudan. Students will continue their studies in VCU's Richard T. Robertson School of Media and Culture for three semesters (second semester and summer of the second academic year and fall semester of the third academic year). Students return to Fudan for the final semester.

1. Credit hour requirements: This degree requires a minimum of 31 credit hours beyond the baccalaureate, of which 18 credit hours are from VCU and 13 credit hours — preparatory foundation courses and thesis supervision — are taken at Fudan University's School of Journalism. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. Upon completion of all requirements, students in this dual master's degree program will receive both the M.S. in Mass Communications from VCU and the Master of Literature from Fudan University.
2. Other requirements: All students are required to demonstrate proficiency in a suite of software programs commonly used by public relations and advertising practitioners before enrolling in their first VCU course.

Program website: robertson.vcu.edu (<http://www.Robertson.vcu.edu>)

Mass Communications, Master of Science (M.S.) with a concentration in multimedia journalism

Program goals

The Richard T. Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The M.S. in Mass Communications with a concentration in multimedia journalism is designed to prepare students to work in a highly competitive and multiple-platform (print, broadcast, online/digital) news environment. The program is for recent graduates who have an undergraduate degree in journalism or a related field, or for more veteran journalists who want to upgrade their professional skills.

Student learning outcomes

1. Demonstrate higher-level skills in concept building with a focus on critical thinking, and in the design of journalism news stories and packages with a multimedia focus
2. Communicate clearly and effectively in written and multimedia platforms to serve news audiences
3. Demonstrate the ability to conduct basic research that is applicable to journalism and multimedia
4. Effectively apply tools and technologies to multimedia news stories and packages as appropriate for the news industry and other communication workplaces

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

The mass communications graduate handbook (<http://robertson.vcu.edu/about/advising/handbooks-and-worksheets/>) is available on the Robertson School website.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu/>)

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE - General
	Spring	Nov 1	

Admission note: The school may admit other student candidates who submit materials beyond the review deadlines, depending on available space.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. An undergraduate degree in journalism or a related field or several years of professional journalism experience
2. An undergraduate GPA that exceeds 2.7 overall
3. A GRE (general test) score that indicates the ability to pursue graduate work
4. A detailed CV showing work experience in journalism or appropriate educational credentials
5. Three recommendations from persons who are qualified to give information concerning the applicant's ability for the specific program of study proposed
6. A personal statement detailing specific journalism career goals
7. A portfolio of work in journalism

Students who have not completed baccalaureate course work in journalism or who have not had the appropriate professional experience may be required to take undergraduate courses as a foundation. These do not count toward the graduate degree.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: This degree requires 36 credit hours beyond the baccalaureate, 30 of which are in the journalism discipline. Students take an additional six credit hours in a collateral area outside of mass communications. Students in this program learn the theory and practice of journalism in an immersion news environment and can further specialize through graduate electives, projects and stories in any number of "beat" areas. For example, students can focus on coverage of health or the environment or concentrate on learning about international media coverage. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other: The program is designed so that students will take three courses each semester (fall and spring). During each semester, two of the courses will be offered in the evenings and one will be offered online. Thus, students will be able to complete the course work over two years of study.

Mass Communications, Master of Science (M.S.) with a concentration in strategic public relations

Program goals

The Richard T. Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research, professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The M.S. in Mass Communications with a concentration in strategic public relations trains a new generation of communications professionals who are able to function in high-level management positions and apply sophisticated strategic thinking to accomplish organizational objectives.

Student learning outcomes

1. Demonstrate higher-level skills of the public relations management function, including strategy development and critical thinking
2. Communicate clearly and effectively in written and spoken forms appropriate for strategic public relations practice, audiences and the purposes they serve
3. Demonstrate ability to conduct research and evaluation to support strategic public relations decision-making

4. Effectively apply tools and technologies appropriate to managing the process for strategic public relations

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

The mass communications graduate handbook (<http://robertson.vcu.edu/about/advising/handbooks-and-worksheets/>) is available on the Robertson School website.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Summer	Jan 15 (preferred consideration) Mar 15	GRE-general

Note: The school may admit other student candidates who submit materials beyond the review deadlines, depending on available space.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. A current resume
2. Portfolio material from undergraduate and/or graduate course work and/or professional experience
3. An academic background in public relations (university or professional accreditation program) and appropriate public relations experience

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: This degree requires 30 credit hours beyond the baccalaureate, including six hours of approved elective courses in areas such as nonprofit management and marketing. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other: Students take weekend classes (Friday evenings and all day Saturday) as a cohort over four semesters. Continued full-time public relations employment is encouraged during the program. In addition, one of the program's unique features is a two-week study abroad experience, an expectation of students while they are enrolled in the MASC 683 Strategic PR in a Global Environment. The study tour is led by a full-time faculty member. The cost of the study abroad program is not included in the program's tuition.

MKTG 671	Marketing Management
MKTG 672	Concepts in Consumer Behavior
SCMA 524	Statistical Fundamentals for Business Management
SCMA 530	Fundamentals of the Legal Environment of Business
Total Hours	30

The minimum total of graduate credit hours required for this degree is 30.

Graduate program director

June O. Nicholson
Professor and director of graduate studies, Richard T. Robertson School of Media and Culture
jnichols@vcu.edu
(804) 827-0251

Program website: [robertson.vcu.edu](http://www.Robertson.vcu.edu) (<http://www.Robertson.vcu.edu>)

Media, Art, and Text, Doctor of Philosophy (Ph.D.) [Robertson School]

Program goal

VCU's interdisciplinary doctoral program in media, art, and text is a joint endeavor of the Department of English, the School of the Arts and the Richard T. Robertson School of Media and Culture. The program prepares students primarily to teach at the college or university level, although some pursue careers in related media fields. MATX emphasizes the historical and theoretical foundations essential to the scholarly study of media, both old and new, broadly defined. It provides an intellectually stimulating environment that encourages students to work both collaboratively and independently, as well as across and between disciplines and media. Students maintain a base in their primary area of research, which is usually but not always the field in which they have done prior graduate work.

Student learning outcomes

1. Develop advanced communication skills in writing, speaking and the use of multimedia
2. Demonstrate broad knowledge of history and theory as the foundation for interdisciplinary work in a specialized facet of media, art, and/or text
3. Develop competence in interdisciplinary and disciplinary research methods and responsible conduct of research
4. Develop specialized knowledge in relevant fields to support dissertation and subsequent research

5. Demonstrate the ability to conduct independent research and produce new, specialized knowledge within the broad parameters of media, art, and text
6. Develop a strong basis for ongoing professional practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Other information

The MATX student handbook (<http://www.matx.vcu.edu/program/handbook/>) is available online.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 2	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must hold a master's degree (M.A., M.F.A., M.S.) in a relevant field.
2. Applicants must submit the following, in the formats indicated via VCU's online application portal.
 - a. Writing sample demonstrating the ability to write clearly, analyze effectively and conduct original research in advanced doctoral-level seminars – This may be a master's thesis, a graduate-level seminar paper or a published essay. Submit as a PDF.
 - b. Statement of purpose describing the applicant's interest, motivation and goals in pursuing this degree – The statement should specifically address the importance of interdisciplinarity to the applicant's academic goals, and it should also offer evidence of preparation for the study of media, art, and text. The applicant should indicate the specific area of study and research to be pursued at VCU and identify faculty who might potentially direct dissertation research. Submit as a PDF.
 - c. Academic curriculum vitae or professional resume – List all colleges and universities attended and degrees earned, all professional and academic positions held, all publications and/or exhibitions, technical skills, and any other relevant information. Include URLs for personal and/or professional websites. Submit as PDF.
 - d. Letters of recommendation – Provide letters from three present or former instructors or other individuals qualified to evaluate the applicant's ability to engage in interdisciplinary study at the doctoral level. Have recommenders submit their letters via the online application portal.
3. Applicants who wish to pursue creative work at VCU must also submit a portfolio. Those with an M.F.A. who do not wish to continue creative work should consult with the MATX director about this requirement. Materials submitted should demonstrate excellence in studio or professional practice and the potential to do graduate-level work in media, art, and text. Portfolios will be reviewed by the MATX admissions committee as well as relevant faculty in the School of the Arts and the Richard T. Robertson School of Media and Culture. Please observe the following guidelines:
 - a. Those working in 2-D or 3-D mediums should provide 20 images of representative work arranged chronologically, beginning with the most recent.
 - b. Those working in sound and time-based media, as well as those in the performing arts, should provide clips totaling no more than 10 minutes.
 - c. Those working across media may submit a combination of the above.
 - d. The portfolio should include title, date, media and dimensions of each work, as well as a brief statement or other information that will help the admissions committee in its evaluation.

Small files illustrating 2-D or 3-D work should be submitted in a single PDF. Sound or video files should be posted to Vimeo or Sound Cloud with a functioning link submitted in a PDF with the required information posted to the portal. Portfolio materials may also be posted to a personal or professional website and the link submitted in a PDF posted to the portal.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the MATX program are required to earn a minimum of 42 graduate-level credit hours beyond the master's. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. The 42-hour curriculum comprises 36 hours of course work and a minimum of six hours of dissertation research. Course work includes a core of four required courses taken during the first two semesters by all incoming students. Three doctoral seminars provide a shared historical and theoretical foundation for the study of media, art, and text, while a workshop offers the opportunity to develop and expand professional and/or creative skills relevant to the student's career goals and research focus. In addition, all students will take a research methods course in a field relevant to their anticipated area of dissertation research. Beyond the core, students select 21 hours of elective credit hours from course offerings in disciplines relevant to their research interests and career goals. The program offers a topics seminar focused on the history, theory or practice of media, art, and text. Independent study and internships are also available as electives. While enrollment in courses with the MATX prefix is guaranteed to matriculated MATX students, enrollment in other graduate courses is subject to the conditions established by individual units. Together the core and the electives support the interdisciplinary work of the dissertation, which is an original scholarly examination of some aspect of media, art, and/or text. It may include work in media other than text. It is supervised by a committee consisting of four or five members drawn from disciplines relevant to the research topic.
2. Grade requirements: To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.
3. Requirements for admission to candidacy: Before beginning formal dissertation research, students must complete all 36 hours of required course work, both stages of the e-portfolio and the requirements described below. Upon completion of these, the student will apply for degree candidacy.
4. Dissertation committee: The dissertation committee consists of the director (who must hold a Ph.D.) and three or four additional members whose scholarly knowledge and interests are relevant to the project. The committee must have at least one member from each of the sponsoring units (Department of English, School of the Arts, Richard T. Robertson School of Media and Culture). All must be members of VCU's graduate faculty. Appropriate faculty from outside VCU may serve on committees (but not as director) with the approval of the MATX director and the graduate dean. It is the student's responsibility to assemble the committee, in consultation with the dissertation director. Committees will not be appointed by the program.
5. E-portfolio: Work on the e-portfolio will begin in MATX 604 in the spring of the first year. There are no technical specifications, and

content will include, but is not limited to, work done in the first two years in the program. It will take the form of a website and must demonstrate the technical skills (Web design, audio, video, etc.) relevant to the student's work on the dissertation and the career sought after VCU. Submission is a two-stage process:

- a. Stage 1 (August of the second year): a three- to five-page design rationale for the portfolio site along with a mock-up or rough structure
 - b. Stage 2 (April of the second year): a finished, live site accompanied by a five-page statement relating it to the student's work inside and outside the program and outlining how it uses media techniques to promote a specific professional and/or creative identity (Note: Each submission is graded pass/fail and may be repeated once. A second failure results in automatic termination from the program.)
6. Competency: Candidates must demonstrate competency in a skill or technique relevant to the dissertation research or planned professional career. The dissertation committee approves and administers the competency portion. Graded pass/fail, the test may be repeated once.
 7. Bibliography exam: Candidates will complete an exam on a reading list of 20 to 30 sources relevant to or supportive of the dissertation topic. The dissertation committee approves and administers the bibliography exam. Graded pass/fail, the test may be repeated once.
 8. Dissertation prospectus and prospectus defense: The prospectus is a 15- to 20-page document that indicates the significance of the proposed research, gives a short review of relevant literature, states the research question, specifies the proposed methodology and indicates how the project lays the foundation for the anticipated academic or professional career. It also includes a work plan for the completion of research and writing, as well as a complete bibliography. The prospectus is defended orally before the dissertation committee, which may accept, reject or require revisions. The defense may be repeated once.
 9. Dissertation and dissertation defense: The dissertation is an original, interdisciplinary and scholarly examination of a topic relevant to an aspect of media, art, and/or text. It may include work in media other than text. Given the varied nature of doctoral research, there is no set time frame for completion of a dissertation. It is expected, however, that the dissertation will take about two years after attaining candidacy, but it must be defended within the eight-year time limit for completion of the doctoral degree. The dissertation will be defended orally before the dissertation committee. Successful defense of the dissertation completes the requirements for the degree.

Mark Wood, Ph.D.

Associate professor and director

Angelina Overvold, Ph.D.

Associate professor and associate director

The School of World Studies explores what it means to be human and prepares students to participate in the work of building a healthy world community. With training in the humanities, social sciences and natural sciences, the school's faculty conduct research on the diversity and universality of human existence and creative expression, generating interdisciplinary knowledge of the evolving and dynamic nature of human beings. Faculty and students explore the development, composition and interaction of language, religion, art, film, literature, poetry and culture and their relationship to gender, nationality, race, social justice, human rights and the environment. Graduates acquire the knowledge, analytic abilities, critical perspectives, and cross-cultural communication skills to succeed in a globalized world.

Degree programs

The School of World Studies offers baccalaureate degrees in the following fields:

Anthropology – Bachelor of Science

Foreign Language – Bachelor of Arts

- French
- German
- Spanish

International Studies– Bachelor of Arts

Religious Studies – Bachelor of Arts

Minors are awarded in these areas:

- African studies
- Anthropology
- Arabic and Middle Eastern studies
- Asian and Chinese studies
- Catholic studies
- European studies
- French
- German
- International social justice studies
- Islamic studies
- Italian studies
- Judaic studies
- Latin American studies
- Mediterranean studies
- Religious studies
- Russian studies
- Spanish
- World cinema

Undergraduate certificates are awarded in these areas:

- International management studies (in conjunction with the School of Business)
- Spanish/English translation and interpretation

Information regarding curricula is provided on the respective program pages.

Languages

The School of World Studies offers students significant opportunities to broaden their knowledge of diverse cultures through language study, including:

- Arabic
- Chinese
- French (major and minor)
- German (major and minor)
- Italian (Italian studies minor)
- Latin
- Russian (Russian studies minor)
- Spanish (major and minor)

In cases where the appropriate level of instruction is unavailable, the School of World Studies Advising Office will assist the student in identifying language study options at other U.S. institutions or abroad.

Study abroad

Summer study-abroad programs provide students with opportunities for short-term immersion in the language, culture and civilization of the countries they visit. A list of current VCU study abroad opportunities (<http://www.global.vcu.edu/abroad/>) can be found on the Global Education Office website. VCU is a member of the International Student Exchange Program, which offers junior year abroad programs at one of 40

universities worldwide. For more information about study abroad visit the School of World Studies website (<http://www.worldstudies.vcu.edu>).

Interdisciplinary Studies, Master of (M.I.S.), with a concentration in interdisciplinary mathematics and science leadership/K-8 mathematics specialist

Program goals

The interdisciplinary mathematics and science leadership concentration in the M.I.S. program is designed for in-service teachers of mathematics for kindergarten through eighth grades. In designing their individual programs, students, in conjunction with their advisers, may select courses offered by VCU mathematics, science and education departments and courses offered by other collaborating Virginia colleges and universities. The Graduate School, the College of Humanities and Sciences, the School of Education and the departments of Mathematics and Applied Mathematics and Teaching and Learning administer the program.

Student learning outcomes

1. Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.
2. Students will solve mathematical problems.
3. Students will use multiple representations to correctly describe mathematical ideas.
4. Students will study K-12 children's work and use it to demonstrate knowledge of children's thinking.
5. Students will write mathematical proofs clearly, concisely and correctly.
6. Students will collaborate on projects.
7. Students will read and comprehend mathematical works and mathematics education works, including national and state standards.
8. Students will analyze and synthesize mathematics education literature.
9. Students will make effective written and oral presentations to demonstrate their understanding of mathematical ideas and mathematics education ideas.
10. Students will (a) analyze and develop rich mathematical tasks for children and adults, (b) study and implement models of mathematics coaching, (c) study and implement professional development models.
11. Students will study and implement models of formative and summative assessment.
12. Students will study and implement effective methods of communicating with teachers and administrators.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.I.S.	Fall, spring, summer	Contact program administrator	GRE-General or MAT

Special requirements

- Upon review of the application and all supporting documentation, the mathematics/science leadership program coordinator will contact applicants to schedule interviews to develop programs of study that will detail specific courses to be taken and the institutions offering those courses.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- At least three years of successful K-8 mathematics and/or science teaching experience
- Three recommendations: at least one from an immediate supervisor or principal and at least one that addresses leadership potential
- Submission of satisfactory scores on either the GRE or MAT from a current test (fewer than five years old) (Provisional admission may be granted pending fulfillment of this requirement.)
- A written statement of intent that provides evidence of at least three years of experience in teaching mathematics and/or science for kindergarten through eighth grades
- Interview to develop program of study (Program director will contact student after initial review of application.)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

- Credit hour requirements: Students in the interdisciplinary mathematics and science leadership concentration are required to earn a minimum of 36 graduate-level credit hours beyond the baccalaureate. The discipline focus areas are required to be in mathematics and either the sciences or mathematics/science education. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
- Other requirements: At least 18 of the 36 credits, including the final project, must be granted by VCU. Up to six transfer credits may be approved, and the remainder of the credits must be from consortium partners as approved by the students' advisers, the VCU Graduate School and the Mathematics and Science Leadership Advisory Committee. A maximum of six hours may be taken as a nondegree-seeking student before admission to the program.
- The final project must be supervised by a VCU graduate faculty member, may be in mathematics, science or education and must include an indication of the relationship of the subject of the project to teaching at the kindergarten-through-eighth-grade level.

Curriculum requirements

Course	Title	Hours
MATH 661	Number and Operations	3
MATH 662	Geometry and Measurement	3
MATH 663	Functions and Algebra	3
MATH 664	Statistics and Probability	3
MATH 665	Rational Numbers and Proportional Reasoning	3
TEDU 657	Mathematics Education Leadership I	3
TEDU 658	Mathematics Education Leadership II	3
TEDU 659	Mathematics Education Leadership III	3
TEDU 680	Externship Proposal Seminar	3
TEDU 700	Externship	3

Elective courses

Select from the following with adviser approval:	6
BIOL (500- and 600-level)	
CHEM (500- and 600-level)	

MATH (500- and 600-level)

TEDU (500- and 600-level)

Total Hours 36

The minimum total of graduate credit hours required for this degree is 36.**Graduate program director**

Aimee J. Ellington, Ph.D.

Director, M.I.S. interdisciplinary mathematics and science leadership program

Email: ajellington@vcu.edu

Phone: (804) 828-5521

(<http://math.vcu.edu/graduate-programs/mis-specialists/>)

Department of African American Studies

Shawn Utsey, Ph.D.

Professor and interim chair

afam.vcu.edu (<http://www.afam.vcu.edu>)

The Department of African American Studies at Virginia Commonwealth University provides an educationally rich environment in which students and scholars research, learn and teach about the past and present realities of people of African descent. Employing a wide range of theories, perspectives, methods and tools, departmental faculty explore social, political, economic and cultural realities and connections between the experiences of persons in Africa and throughout the African Diaspora. The department emphasizes experiential learning, offers study abroad opportunities and internships.

Department of Biology

Derek Johnson, Ph.D.

Associate professor and chair

Clint Turbeville, Ph.D.

Associate professor and director of graduate studies

biology.vcu.edu (<http://biology.vcu.edu/>)

The Department of Biology offers programs leading to baccalaureate, master's and doctoral degrees; the doctoral degree is offered through the Ph.D. in Integrative Life Sciences program. Students may specialize within many areas, such as molecular and cellular biology, genetics, aquatic and terrestrial ecology, systematics, physiology, neurobiology, and developmental biology. Students also may develop an interdisciplinary focus to their degree program, for example within areas such as bioinformatics, cancer biology, forensic science and environmental science.

In addition to the courses offered by the Department of Biology, graduate students may enroll in graduate courses offered through VCU Life Sciences and these departments in the VCU School of Medicine: Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pathology, Pharmacology and Toxicology, and Physiology and Biophysics. Visit the Department of Biology's website (<http://biology.vcu.edu/>) for additional information.

- Biology, Master of Science (M.S.) (p. 216)

Biology, Master of Science (M.S.)

Program goals

The Department of Biology prepares graduate students to:

1. Acquire training in a chosen subdiscipline of biology
2. Learn research techniques used in the subdiscipline
3. Develop presentation skills
4. Develop publication skills

Student learning outcomes

Upon completion of the M.S. in Biology, students will:

1. Demonstrate knowledge of a chosen subfield, including the most recent advances in research
2. Apply appropriate research techniques (i.e., field or lab)
3. Effectively communicate research and findings in a professional context
4. Effectively write papers for publication

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

Details on the M.S. degree in biology can be found in the Guidelines for Graduate Studies in Biology (http://biology.vcu.edu/media/biology/pdf/MS_GuidelinesRevised2015.pdf).

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jan 15	GRE
	Spring and summer	By special permission of graduate director	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in biological or related science or equivalent
2. Appropriate college-level background in mathematics, chemistry and physics
3. Three letters of recommendation pertaining to the applicant's potential ability as a graduate student in biology
4. Student's written statement concerning career and research interests
5. Transcripts of all previous college work
6. Satisfactory scores on the GRE (general test)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Master of Science degree candidates are required to take a minimum of 30 graduate credit hours. A maximum of six credit hours from graduate course work taken at other institutions may be transferred if they meet approval of the department.
2. Grade requirements: Receipt of a grade of C or lower in two courses constitutes automatic dismissal from the graduate program in biology. Courses with a grade of C or lower cannot be applied to satisfying the degree requirements.
3. Other requirements: All graduate students are required to write a thesis proposal and a formal thesis following a prescribed format. In order to initiate thesis research, the thesis proposal must be

approved by the student's graduate committee and the chair of the department, and the student must be approved for degree candidacy. Each student will be required to pass a final examination, which will be primarily a defense of the thesis. Students may specialize within many areas, such as molecular and cellular biology, genetics, aquatic and terrestrial ecology, systematics, physiology, neurobiology and developmental biology. Students also may develop an interdisciplinary focus to their degree programs, for example, within areas such as bioinformatics, cancer biology, forensic science and environmental science.

Curriculum requirements

Course	Title	Hours
Required courses		11
BIOL 693	Current Topics in Biology	2
BIOL 698	Thesis	6
BIOS 543 or STAT 543	Graduate Research Methods I ¹ Statistical Methods I	3
Recommended electives		
Choose courses from the following list in consultation with adviser.		19
BIOL/BNFO 601	Integrated Bioinformatics	3
BIOL 606	Quantitative Ecology	3
BIOL 610	Conservation Applications	3
BIOL 618	Ecosystems Ecology	3
BIOL 626	Physiological Ecology	4
BIOL 630	Patterns of Mammalian Reproduction	3
BIOL 640	Evolution and Molecular Markers	3
BIOL 650	Conservation Genetics	3
BIOL/ENVS/URSP 654	Environmental Remote Sensing	3
BIOL 660	Developmental Biology	3
BIOL 676	Plant and Animal Cell Biology	3
BIOL 690	Biology Seminar	1-4
BIOL 691	Special Topics in Biology	1-9
BIOL 692	Independent Study	1-4
BIOL 693	Current Topics in Biology	1-5
BIOL 698	Thesis	1-3
Any 500- or 600-level courses in ANAT, BIOL, BIOC, BIOS, BNFO, CLSE, EGRB, ENVS, HEMS, HGEN, LFSC, MEDC, MICR, NEUS, PCEU, PHTX, PHIS or STAT		
Any 600-level course in CHEM, EDUS, GRAD, MATH, PHYS, PSYC or URSP		

The minimum total of graduate credit hours required for this degree is 30.

1

Students should take STAT 543 or BIOS 543 as early as possible. Students entering the program with a statistics background equivalent to one of these courses may petition to have this requirement waived.

Graduate program director

James M. Turbeville, Ph.D.
Director of graduate studies
Email: jmturbeville@vcu.edu

Phone: (804) 828-0561

Program website: biology.vcu.edu/graduate-program/ms-program-in-biology (<http://biology.vcu.edu/graduate-program/ms-program-in-biology/>)

Department of Chemistry

M. Samy El-Shall, Ph.D.

Professor and chair

Sally S. Hunnicutt, Ph.D.

Associate professor and assistant chair

chemistry.vcu.edu (<https://chemistry.vcu.edu/>)

The Department of Chemistry offers programs leading to the Bachelor of Science, Master of Science and Doctor of Philosophy degrees. For undergraduate students, the Bachelor of Science offers concentrations in chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling.

For graduate students, the Master of Science and Doctor of Philosophy programs provide opportunities for concentrated study in analytical, inorganic, organic or physical chemistry, or chemical physics. A plan of study is worked out for each student to ensure a sound basis for research. In keeping with the university's commitment as an urban institution, the department also offers part-time programs leading to these degrees.

Refer to the department's website (<https://chemistry.vcu.edu/>) for more information.

Admission requirements for graduate study

In addition to the general requirements for admission to graduate programs in the Graduate School and the College of Humanities and Sciences, students are expected to have a bachelor's degree from an accredited college or university with 30 semester credits in chemistry. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background. Acceptance is based upon undergraduate performance, satisfactory scores on the GRE and letters of recommendation.

Graduate students in the Department of Chemistry may receive financial support via teaching or research assistantships or fellowships. Application forms and instructions for applying to all graduate programs are available on the Graduate School website (<http://www.graduate.vcu.edu>).

General degree requirements for graduate programs

Entering graduate students are required to take proficiency examinations in analytical, inorganic, organic and physical chemistry. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school's fall and spring semesters. These tests are used to evaluate the student's strengths and weaknesses, and the student's program is planned accordingly.

- Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biochemistry (p. 218)
- Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology (p. 220)

- Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology of cancer (p. 222)
- Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in bioorganic chemistry (p. 223)
- Chemistry, Doctor of Philosophy (Ph.D.) (p. 225)
- Chemistry, Doctor of Philosophy (Ph.D.) with a concentration in chemical physics (p. 227)
- Chemistry, Master of Science (M.S.) (p. 229)
- Chemistry, Master of Science (M.S.) with Fudan University [dual degree] (p. 232)
- Nanoscience and Nanotechnology, Doctor of Philosophy (Ph.D.) (p. 235)

Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biochemistry

Program goal

Chemical biology presents a framework for the modern approach to studying the complexities of biological processes. It is already a leading focal point for research in the 21st century, integrating concepts and information from the molecular to the cellular level. This interdisciplinary degree program has participants from the departments of Chemistry, Biology, Biochemistry and Molecular Biology, Medicinal Chemistry and Pharmacology within the College of Humanities and Sciences and the schools of Medicine and Pharmacy.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemical biology
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Mar 15	GRE
	Spring	Nov 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Students must present a satisfactory GPA score of a minimum of 3.0 on a 4.0 scale; satisfactory GRE scores (must be less than five years old); a written statement of the candidate's goals; and three letters of recommendation.
2. Students are required to have a bachelor's degree from an accredited college or university with 30 semester credit hours in chemistry or biology. These credit hours should consist of at least two semesters of organic chemistry and a biology course in cell biology, molecular biology or genetics. A physical chemistry course is desirable.
3. If applicants have outstanding potential but lack specific requirements, they may be accepted as provisional. Provisionally accepted students must complete all conditions within one year of enrollment.

Graduate students in the program may receive financial support via teaching or research assistantships or fellowships available from the "home" department. No part-time students are accepted at this time.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemical Biology program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Upon completion of their course work, students will complete their dissertation requirements, which will typically consist of a written and oral dissertation proposal, research and literature seminars, and both a written and oral dissertation defense.

Curriculum requirements

Course	Title	Hours
Courses ¹		
CHEB 601	Chemical Biology I	3
CHEB 602	Chemical Biology II	3
CHEB 690	Research Seminars in Chemical Biology (credit hours are variable) ²	variable
or CHEM 690	Research Seminar in Chemistry	
CHEB 697	Chemical Biology Research Rotations (credit hours are variable) ³	variable
CHEM 693	Chemistry Perspectives and Ethics ⁴	1
CHEM 697	Directed Research (credit hours are variable) ⁵	variable
Electives		
Select 11 credit hours from the following: ⁶		11
BIOC 500- and 600-level courses		
BIOC 503	Biochemistry, Cell and Molecular Biology	
BIOC 504	Biochemistry, Cell and Molecular Biology	
BIOC 602	Physical Properties of Macromolecules	
BIOC 605	Molecular Biology	
CHEM 500- and 600-level courses		
CHEM 504	Advanced Organic Chemistry I	
CHEM 506	Introduction to Spectroscopic Methods in Organic Chemistry	
CHEM 604	Advanced Organic Chemistry II	
CHEM 633	Mass Spectrometry	
MEDC 500- and 600-level courses		
MEDC 541	Survey of Molecular Modeling Methods	
MEDC 670	Advanced Molecular Modeling Theory and Practice	
PHTX 500- and 600-level courses		

1

At least 18 credit hours of didactic course work must be completed.

2

Students are expected to participate in their home department's seminar program.

3

Students are expected to enroll in CHEB 697 or directed research (one credit minimum) every spring and fall semester.

4

Students are expected to enroll in CHEM 693 within their first year of matriculation. Other courses may be used to satisfy this requirement in research conduct and ethics in consultation with the graduate program director.

5

Students may also enroll in BIOC 697 for directed research credit hours.

6

The list of recommended electives includes some typical courses taken in this concentration, but there is flexibility in designing a program of study in consultation with the adviser and graduate program director.

The minimum total of graduate credit hours required for this degree is 72.

1. Students must present a satisfactory GPA score of a minimum of 3.0 on a 4.0 scale; satisfactory GRE scores (must be less than five years old); a written statement of the candidate's goals; and three letters of recommendation.
2. Students are required to have a bachelor's degree from an accredited college or university with 30 semester credit hours in chemistry or biology. These credit hours should consist of at least two semesters of organic chemistry and a biology course in cell biology, molecular biology or genetics. A physical chemistry course is desirable.
3. If applicants have outstanding potential but lack specific requirements, they may be accepted as provisional. Provisionally accepted students must complete all conditions within one year of enrollment.

Graduate students in the program may receive financial support via teaching or research assistantships or fellowships available from the "home" department. No part-time students are accepted at this time.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemical Biology program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Upon completion of their course work, students will complete their dissertation requirements, which will typically consist of a written and oral dissertation proposal, research and literature seminars, and both a written and oral dissertation defense.

Curriculum requirements

1

At least 18 credit hours of didactic course work must be completed.

2

Students are expected to participate in their home department's seminar program.

3

Students are expected to enroll in CHEB 697 or directed research (one credit minimum) every spring and fall semester.

4

Students are expected to enroll in CHEM 693 within their first year of matriculation. Other courses may be used to satisfy this requirement in research conduct and ethics in consultation with the graduate program director.

5

Students may also enroll in CHEB 697 or PHIS 697 for directed research credit hours.

6

The list of recommended electives includes some typical courses taken in this concentration, but there is flexibility in designing a program of study in consultation with the adviser and graduate program director.

The minimum total of graduate credit hours required for this degree is 72.

Graduate program director

Nicholas Farrell, Ph.D.

Professor and graduate director, chemical biology program, Department of Chemistry

npfarrell@vcu.edu

(804) 828-6320

Additional contact

Maryanne M. Collinson, Ph.D.
 Professor and chair of graduate recruiting and admissions committee,
 Department of Chemistry
 mmcollinson@vcu.edu
 (804) 828-7509

Program website: chembio.vcu.edu (<http://www.chembio.vcu.edu/>)

Chemical Biology, Doctor of Philosophy (Ph.D.) with a concentration in biology of cancer

Program goal

Chemical biology presents a framework for the modern approach to studying the complexities of biological processes. It is already a leading focal point for research in the 21st century, integrating concepts and information from the molecular to the cellular level. This interdisciplinary degree program has participants from the departments of Chemistry, Biology, Biochemistry and Molecular Biology, Medicinal Chemistry and Pharmacology within the College of Humanities and Sciences and the schools of Medicine and Pharmacy.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemical biology
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree

candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Mar 15	GRE
	Spring	Nov 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Students must present a satisfactory GPA score of a minimum of 3.0 on a 4.0 scale; satisfactory GRE scores (must be less than five years old); a written statement of the candidate's goals; and three letters of recommendation.
2. Students are required to have a bachelor's degree from an accredited college or university with 30 semester credit hours in chemistry or biology. These credit hours should consist of at least two semesters of organic chemistry and a biology course in cell biology, molecular biology or genetics. A physical chemistry course is desirable.

Chemistry, Doctor of Philosophy (Ph.D.)

Program goal

The Department of Chemistry is committed to the dual mission of teaching and research at the bachelor's, master's and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department's activities.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Mar 15	GRE-General
	Spring	Nov 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor's degree from an accredited college or university with 30 credit hours in chemistry.
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemistry program are required to earn a minimum of 60 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school's fall and spring semesters. These tests are used to evaluate the student's strengths and weaknesses, and the student's program is planned accordingly.
3. Doctoral candidacy: The student is required to complete written and oral examinations in his/her major field to become a doctoral candidate. The written examinations consist of a series of cumulative exams based on the chemistry literature. The oral examination includes the presentation and defense of the proposed dissertation research.

4. Dissertation: Students must conduct a substantial original investigation under the supervision of their adviser. Students who wish to include a chemical education component in their research will choose two advisers, one in the cognate area, and one in the area of chemical education. All formal requirements for the degree are otherwise the same as for any doctoral student. Students must prepare dissertations reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. An oral defense of the dissertation will be held. Full-time students should complete the degree requirements in four to five years.

Curriculum requirements

Course	Title	Hours
Required didactic courses ¹		
Select three core courses of the following four areas: analytical, inorganic, organic and physical ²		9
CHEM 504	Advanced Organic Chemistry I	
CHEM 510 or CHEM 511	Atomic and Molecular Structure ⁴ Chemical Thermodynamics and Kinetics	
CHEM 620	Advanced Inorganic Chemistry I	
CHEM 63x or ENGR 691 (courses in analytical area) ³		
CHEM 698	Investigations in Current Chemistry Literature (0.5 credit hour) ⁵	1
Select eight credit hours of the following recommended electives, in consultation with adviser:		8
BIOC 500-level (except BIOC 505, BIOC 506 and BIOC 507)		
BIOC 530	Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function	
BIOC 531	Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism	
BIOC 532	Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology	
BIOC 533	Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics	
BIOC 602	Physical Properties of Macromolecules	
BIOS 543 or STAT 543	Graduate Research Methods I Statistical Methods I	
BIOS 544 or STAT 544	Graduate Research Methods II Statistical Methods II	
CHEB 601	Chemical Biology I	
CHEB 602	Chemical Biology II	
CHEM 500-level		
CHEM 600-level		
CHEM 610	Applied Quantum Chemistry

CHEM 631	Separation Science	
CHEM 632	Chemometrics	
CHEM 633	Mass Spectrometry	
CHEM 634	Surface Science	
CHEM 635	Spectrochemical Analysis	
CHEM 691	Topics in Chemistry	
CHEM 698	Investigations in Current Chemistry Literature ⁵	
ENGR 591	Special Topics in Engineering	
ENGR 691	Special Topics in Engineering	
MEDC 541	Survey of Molecular Modeling Methods	
MEDC 609	Advanced Organic Synthesis: A Target-oriented Approach	
MEDC 670	Advanced Molecular Modeling Theory and Practice	
NANO 570	Nanoscale Physics	
NANO 571	Nanoscale Chemistry	
NANO 650	Experimental Techniques in Nanoscience I	
NANO 651	Experimental Techniques in Nanoscience II	
NANO 660	Theoretical Studies of Nanostructures	
NANO 661	Computational Nanoscience	
PHYS 550	Techniques in Material Research	
PHYS 573	Analytical Methods in Physics	
PHYS 576	Electromagnetic Theory	
PHYS 580	Quantum Mechanics	
PHYS 591	Topics in Physics	
PHYS 661	Surface and Materials Physics	
PHYS 691	Special Topics	
Other required courses		
CHEM 690	Research Seminar in Chemistry ⁶	1-8
CHEM 692	Chemistry Seminar Presentation ⁶	2
CHEM 693	Chemistry Perspectives and Ethics ⁷	1
CHEM 697	Directed Research ⁸	30

1

Students must earn a minimum of 18 credit hours in eight didactic graduate courses, not including credit for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.

2

One of these courses may be waived upon satisfactory proficiency exam scores. The number of required credit hours for the degree does not change.

3

The ENGR 691 topics course must be materials characterization.

4

In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores.

5

Students are expected to enroll in CHEM 698 (1 credit hour) once during their graduate studies, prior to the semester of their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.

6

Students are expected to participate in the department's seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

7

Students are expected to enroll in CHEM 693 within the first year of study.

8

Students must enroll in CHEM 697 (one credit hour minimum) every spring and fall semester for a minimum of 30 total credit hours. If the required minimum of 60 credit hours for the degree is not fulfilled after completion of all other course requirements, then additional credit hours of CHEM 697 may satisfy remaining credit hours for the degree.

The minimum total of graduate credit hours required for this degree is 60.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Mar 15	GRE-General
	Spring	Nov 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor's degree from an accredited college or university with 30 credit hours in chemistry or in physics.
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background or in physics.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the Ph.D. in Chemistry program are required to earn a minimum of 60 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students entering the chemical physics concentration must pass proficiency examinations in two areas of chemistry and two areas of physics (mechanics, electricity and magnetism). Students entering with a bachelor's or master's degree in chemistry who have not taken the courses previously may satisfy the physics requirement with an A or B in PHYS 301 Classical Mechanics I and PHYS 302 Classical Mechanics II and PHYS 376 Electromagnetism I. Students entering with a bachelor's or master's degree in physics who have not taken the chemistry courses previously may satisfy the chemistry requirement with an A or B in two of the four courses, CHEM 301 Organic Chemistry-CHEM 302 Organic Chemistry; the two-course sequence counts as one course only), CHEM 406 Inorganic Chemistry II, CHEM 409 Instrumental Analysis or CHEM 510 Atomic and Molecular Structure.
3. Doctoral candidacy: The student is required to complete written and oral examinations in his/her major field to become a doctoral candidate. The written examinations consist of a series of cumulative exams based on the chemistry literature. The oral examination includes the presentation and defense of the proposed dissertation research.
4. Dissertation: The student must conduct a substantial original investigation under the supervision of his/her adviser and must prepare a dissertation reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. An oral defense of the dissertation will be held. Full-time students should complete the degree requirements in four to five years.

Curriculum requirements

Course	Title	Hours
Required didactic courses ¹		
CHEM 510 or PHYS 580	Atomic and Molecular Structure Quantum Mechanics	3

CHEM 511	Chemical Thermodynamics and Kinetics	3
CHEM 612	Modern Statistical Mechanics: Fundamentals and Applications	3
PHYS 576	Electromagnetic Theory	3
PHYS 641	Solid State Physics	3

Recommended electives

Select nine credit hours of the following, in consultation with adviser 9

CHEM 512	Applied Molecular Modeling	
CHEM 550	Introduction to Polymer Chemistry	
CHEM 591	Topics in Chemistry	
CHEM 610	Applied Quantum Chemistry	
CHEM 611	Molecular Spectroscopy	
CHEM 615	Chemical Thermodynamics	
CHEM 616	Chemical Kinetics	
CHEM 620	Advanced Inorganic Chemistry I	
CHEM 634	Surface Science	
CHEM 635	Spectrochemical Analysis	
CHEM 691	Topics in Chemistry	
NANO 650	Experimental Techniques in Nanoscience I	
NANO 651	Experimental Techniques in Nanoscience II	
PHYS 550	Techniques in Material Research	
PHYS 571	Theoretical Mechanics	
PHYS 573	Analytical Methods in Physics	
PHYS 661	Surface and Materials Physics	
PHYS 691	Special Topics	

Other required courses

CHEM 690 or PHYS 690	Research Seminar in Chemistry ³ Research Seminar	1-8
CHEM 692	Chemistry Seminar Presentation ³	2
CHEM 693	Chemistry Perspectives and Ethics ⁴	1
CHEM 697 or PHYS 697	Directed Research ⁵ Directed Research	30

1

Students must earn a minimum of 24 credit hours in didactic graduate courses, not including credit for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.

2

At least 12 credit hours of the 24 required didactic course credit hours must be CHEM graduate courses. Therefore, depending on the choice of CHEM 510 or PHYS 580 above, at least 3 to 6 credit hours chosen from the list of recommended electives must be CHEM graduate courses, respectively.

3

Students are expected to participate in the chemistry and/or physics department seminar program by enrolling in CHEM 690, CHEM 692 or PHYS 690 every spring and fall semester. At least two formal talks are to

be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

4

Students are expected to enroll in CHEM 693 within their first year of enrollment.

5

Students are expected to enroll in CHEM 697 or PHYS 697 (one credit hour minimum) every spring and fall semester. Up to 15 credit hours of PHYS 697 can be used to satisfy the minimum requirement of 30 credit hours of directed research. If the required 60 credit hours for the degree is not fulfilled after completion of all other course requirements, then additional credit hours of CHEM 697 can satisfy the remaining credit hours for the degree.

The minimum total of graduate credit hours required for this degree is 60.

Chemistry, Master of Science (M.S.)

Program goal

The Department of Chemistry is committed to the dual mission of teaching and research at the bachelor's, master's and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department's activities.

Student learning outcomes

1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

The Department of Chemistry graduate handbook is available online (<http://chemistry.vcu.edu/graduate-programs/graduate-handbook/>).

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 15	GRE-General
	Spring	Nov 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Have a bachelor's degree from an accredited college or university with 30 credit hours in chemistry
2. Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.S. in Chemistry program are required to earn a minimum of 30 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Proficiency exams: Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school's fall and spring semesters. These tests are used to evaluate the student's strengths and weaknesses, and the student's program is planned accordingly.
3. Other requirements: Students are to conduct a research study under the guidance of a thesis adviser. After their first year, students are required to present their research at a poster presentation every fall semester. Once students have completed all required course work (with a 3.0 GPA) and the literature seminar, they must submit the application to candidacy form to the chemistry graduate director. After candidacy, an acceptable research thesis and a final oral examination on the thesis are required. Full-time students should complete these degree requirements in two to three years.

Curriculum requirements

CHEM 690	Research Seminar in Chemistry (credit hours variable) ⁶	
CHEM 692	Chemistry Seminar Presentation ⁶	2
CHEM 693	Chemistry Perspectives and Ethics ⁷	1
CHEM 697	Directed Research ⁸	12
Total Hours		30

1

Students must earn a minimum of 15 credit hours in six didactic graduate courses, not including credit hours for CHEM 690, CHEM 692, CHEM 693 or CHEM 697.

2

One of these courses may be waived upon satisfactory proficiency exam scores. The required number of credit hours for the degree does not change.

3

The ENGR 691 topics course must be materials characterization.

4

In some cases, students may be required to enroll in both CHEM 510 and CHEM 511 because of proficiency exam scores.

5

Students are expected to enroll in CHEM 698 (0.5 credit hour) twice during their graduate studies, including the semester preceding their literature seminar presentation (CHEM 692). Note: A maximum of two credit hours of CHEM 698 may be presented toward the didactic course graduation requirements to count as one course.

6

Students are expected to participate in the department's seminar program by enrolling in CHEM 690 or CHEM 692 every spring and fall semester. At least two formal talks are to be presented in the seminar program by enrolling twice in CHEM 692 (one credit hour).

7

Students are expected to enroll in CHEM 693 within their first year of enrollment.

8

Students are expected to enroll in CHEM 697 (one credit hour minimum) every spring and fall semester.

The minimum total of graduate credit hours required for this degree is 30.

Chemistry, Master of Science (M.S.) with Fudan University [dual degree]

Program goals

The VCU Department of Chemistry is committed to the dual mission of teaching and research at the bachelor's, master's and doctoral level. In teaching, the purpose is to provide high quality education in chemistry to students in preparation for professional careers at all levels. In research, the goals are to advance the science of chemistry, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline. Service to the chemical profession is also an important aspect of the department's activities.

Student learning outcomes

Graduates of the program must:

1. Demonstrate expertise (breadth and depth) in chemistry
2. Demonstrate appropriate ability to design and conduct experimental research
3. Demonstrate ability to analyze data critically and to design experiments independently
4. Develop competency in the responsible conduct of research
5. Develop effective oral and written communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

The Department of Chemistry graduate handbook is available online (<http://chemistry.vcu.edu/graduate-programs/graduate-handbook/>).

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Apr 15	GRE-General TOEFL (International students only)
	Spring	Oct 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have a bachelor's degree from an accredited college or university with 30 credit hours in chemistry. (Admission on a provisional basis is possible for a student temporarily lacking this expected chemistry background.)
2. Graduate students in the Department of Chemistry may receive financial support via teaching or research assistantships or fellowships. Application forms and instructions for applying to all graduate programs are available on the Graduate School website at graduate.vcu.edu (<http://www.graduate.vcu.edu/>).

- Fudan University students participating in this dual degree program will be full-time students in good standing in Fudan University's Department of Chemistry.
- Fudan University students will be required to (a) successfully pass an interview at Fudan University conducted by an identified faculty member of VCU's Chemistry Department and (b) successfully pass an English proficiency exam before the application to VCU will be processed.
- Fudan University students' program will be required to submit formal applications to the VCU International Admissions Office. The VCU Department of Chemistry is responsible for admitting these students to VCU.
- Fudan University students will be required to submit to VCU their Fudan transcripts and grade-related information before their applications to VCU will be processed.
- Fudan University students are classified as full-time, out-of-state graduate students and will assume all tuition, fees, housing and cost-of-living expenses while at VCU.
- Students must receive a positive evaluation from both the Fudan and VCU chemistry departments to receive admission into the program. As part of the admission process, a member of VCU's Department of Chemistry will interview applicants in Shanghai prior to admission into the program.
- Fudan University students are required to maintain the equivalent of a VCU B average including their first year at Fudan University.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

- Credit hour requirements:** Students in the M.S. in Chemistry program are required to earn a minimum of 30 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
- Proficiency exams:** Students must demonstrate competency in analytical, inorganic, organic and physical chemistry by satisfactory performance on the proficiency exams or with a minimum grade of B in the appropriate course. These examinations are at the level of sound undergraduate courses and are offered preceding the start of the school's fall and spring semesters. These tests are used to evaluate the student's strengths and weaknesses, and the student's program is planned accordingly.
- Other requirements:** Students are to conduct a research study under the guidance of a thesis adviser. After their first year, students are required to present their research at a poster presentation every fall semester. Once students have completed all required course work (with a 3.0 GPA) and the literature seminar, they must submit the application to candidacy form to the chemistry graduate director. After candidacy, an acceptable research thesis and a final oral examination on the thesis are required. Full-time students should complete these degree requirements in two to three years.

Program schedule

- In the first year (two semesters) at Fudan University, the Fudan student will successfully complete core courses required of all graduate students in the VCU M.S. in Chemistry program. The Department of Chemistry at VCU requires an M.S. student to earn a minimum of 15 credit hours in six graduate courses. A further minimum of 20 credit hours must be earned in seminar, seminar

discussion, a mandatory course on chemistry perspectives and ethics and directed research courses. A departmental committee, composed of the VCU graduate program director, the VCU graduate admissions director and the Fudan program director, will determine the transferability and correspondence of Fudan courses to VCU courses and credit hours before the student enters VCU. This committee will advise the individual student on course work and credits eligible for transfer to meet the 15-credit didactic course requirement and what, if any, further course work should be taken.

- In the second year (two semesters) at VCU, the student will immediately begin laboratory research (CHEM 697). The student will also identify a thesis adviser no later than the beginning of enrollment at VCU (third semester of program). A co-adviser from Fudan University will also be appointed at this time. The student will enroll in didactic courses offered by the Department of Chemistry at the discretion of the VCU adviser. It is envisaged that the core courses will have been taken at Fudan and that specialized and topics courses will be taken at VCU. The Department of Chemistry will not create new courses for Fudan students.
- In the third year, the Fudan student will remain at VCU to complete the fifth semester of the program. The student will continue to select from the department's regular course offerings and will continue to work on the thesis with the VCU thesis adviser. All research data should be obtained by the end of the third semester at VCU.
- In the sixth and final semester, the Fudan student will return to Fudan University to complete the writing of the thesis and will enroll in final elective courses (if necessary) pertinent to the student's area of concentration. The two thesis advisers (one from VCU and one from Fudan) will oversee the completion of the thesis. The formal thesis will be written in Chinese with an English translation.

Program website: chemistry.vcu.edu (<http://chemistry.vcu.edu/>)

Nanoscience and Nanotechnology, Doctor of Philosophy (Ph.D.)

Program goals

1. In teaching, the purpose is to provide high quality education in chemistry and/or physics in preparation for professional careers in nanoscience and nanotechnology.
2. In research, the goals are to advance nanoscience research, to keep faculty on the forefront of the field and to maintain an educational program consistent with the latest technology and development of the discipline.

Student learning outcomes

1. Develop effective oral and written communication skills
2. Demonstrate expertise (breadth and depth) in nanoscience
3. Demonstrate appropriate ability to design and conduct experimental research
4. Demonstrate ability to analyze data critically and to design experiments independently
5. Develop competency in the responsible conduct of research

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Apr 15	GRE
	Spring	Oct 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the College of Humanities and Sciences, students are expected to have a bachelor's degree from an accredited college or university with 30 credit hours in chemistry, physics or engineering.

Admission on a provisional basis is possible for a student temporarily lacking the expected background. Acceptance is based upon undergraduate performance, satisfactory scores on the GRE and letters of recommendation.

Graduate students in the nanoscience and nanotechnology Ph.D. program may receive financial support via teaching or research assistantships or fellowships available from the home department.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students preparing for the Doctor of Philosophy degree in nanoscience and nanotechnology must earn a minimum of 72 credit hours consisting of core courses (12 credit hours), elective courses (six credit hours), seminar (eight credit hours) and research (46 credit hours). The minimum GPA is the same as the one mandated by VCU's Graduate School. However, students may receive no more than one grade of C and below. Similarly, no more than one grade of U for directed research is admissible (consecutive or nonconsecutive). Note: A student who receives more

than one grade of C or below or two U grades will be automatically dismissed from the program.

Before admission to candidacy for the Ph.D., students must have:

1. Completed at least 12 credit hours of their required course work
2. Successfully completed a candidacy examination
3. Successfully completed an oral candidacy examination based on a research proposal

Students will be required to complete a written candidacy examination in the area of nanoscience and nanotechnology, which will normally occur at the end of the student's first year in residence. After passing the written candidacy examination, an oral candidacy examination is then required to become a Ph.D. candidate. The oral examination, which is administered by the student's graduate dissertation committee, is based upon a written proposal describing the proposed dissertation research project. The proposal is intended to evaluate the adequacy of the proposed project, the student's level of understanding of the project and the likelihood that the dissertation can be completed successfully. Students must conduct a substantial original investigation under the supervision of their advisers and must submit to the graduate dissertation committee a written dissertation reporting the results of the research and analyzing its significance in relation to existing scientific knowledge. The oral dissertation defense, conducted under the direction of the dissertation committee, will examine the candidate's research, dissertation documentation and underlying fundamental knowledge encompassed by the candidate's research. Upon successful completion of the defense and the dissertation, the student may apply for graduation with the Ph.D. in Nanoscience and Nanotechnology. Full-time students should complete the degree requirements in four to five years.

Curriculum requirements

Course	Title	Hours
Core courses		
NANO 570	Nanoscale Physics	3
NANO 571	Nanoscale Chemistry	3
NANO 630	Experimental Techniques in Nanoscience	3
PHYS 560	Fundamentals of Semiconductor Nanostructures	3
Seminar		
NANO 690	Research Seminar in Nanoscience and Nanotechnology (one credit hour taken six times)	6
NANO 692	Nanoscience Seminar Presentation (one credit hour taken twice)	2
Research		46
CHEM 697 or PHYS 697	Directed Research	
Elective courses		
Select a minimum of six credit hours from the following list. Other courses may be chosen, but only upon written approval from the program director.		6
CHEM 511	Chemical Thermodynamics and Kinetics	
CHEM 620	Advanced Inorganic Chemistry I	
CHEM 622	Solid State and Materials Chemistry	

CHEM 637	Electrochemistry Applications
PHYS 522	Optics and Laser Physics
PHYS 641	Solid State Physics
PHYS 680	High Bandwidth Nanoscale Control, Positioning and Dynamics
<hr/>	
Total Hours	72

The minimum total of graduate credit hours required for this degree is 72.

Students will attend NANO 690 throughout their degree programs, receiving an S (satisfactory) or U (unsatisfactory) grade based on attendance and participation. Students will also give two seminar presentations, one on a literature topic and one on their dissertation research, which will be graded on the A/B/C/D/F scale.

Eric Garberson, Ph.D.

Associate professor of art history and director of the MATX program
[english.vcu.edu](http://www.english.vcu.edu) (<http://www.english.vcu.edu>)

The purpose of the Department of English is to teach students to see their worlds with clarity and respond to them with sensitivity, through reading and writing. Students are invited to read and explore a diversity of texts created in different times and voices and then to respond to these texts variously and critically, situating them within their contexts and discerning their important aesthetic features, rhetorical elements and social functions.

Students in this department also are encouraged to express themselves in expository or imaginative works that engage thought and feeling, evince purpose clearly, marshal appropriate evidence and observe principles of rhetorical decorum.

The Department of English offers a Bachelor of Arts in English, as well as minors in American studies, British studies, English (for non-English majors) and creative writing, the Master of Arts in English and the Master of Fine Arts in Creative Writing, and a doctoral program leading to a Ph.D. in Media, Art, and Text. Use the program index links to view individual program descriptions and curricula, or visit the department's website (<http://www.english.vcu.edu>) for additional information.

Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in dual genre

Program goals

Our selective and academically rigorous 48-credit-hour, three-year program is designed to provide talented writers with the opportunity to work closely with both outstanding faculty and gifted peers to strengthen their craft, develop their literary aesthetics, enrich their understanding of existing traditions as well as compositional possibilities, and to participate actively in the life of the literary community at large.

The primary areas of study are poetry and fiction, and admission is highly competitive. In addition to the poetry and fiction workshops, there are courses available that focus on writing drama, nonfiction and screenplays, as well as courses that provide practical experience in editing.

Student learning outcomes

Students in the M.F.A. in Creative Writing program will:

1. Develop and refine their individual writerly voices, produce literary work of a high quality and demonstrate a comprehensive understanding of their own aesthetics, as well as the literary models and cultural sources of those aesthetics
2. Actively engage in a wider literary culture and community at the local, regional, national or international level
3. Develop constructive workshop practices and demonstrate the ability to read closely and respond perceptively and critically to the writing of their fellow M.F.A. students
4. Develop an advanced comprehension of editing and revision techniques and strategies, which include synthesizing challenges, advice and critiques from professors and fellow M.F.A. students
5. Develop, hone and articulate a keen sense of their artistic and career goals

Student learning outcomes specific to fiction

1. Demonstrate the use or knowledge of effective approaches for creating sustained works of fiction distinguished by a nuanced use of appropriate narrative elements, techniques and conventions

2. Demonstrate a highly developed proficiency in understanding and creating story structures appropriate to their purpose and audience, as well as to their chosen literary modes and styles
3. In a statement of purpose or aesthetics that is part of their thesis manuscripts, as well as in an exit interviews/thesis defense, appraise and locate their own work within literary and cultural contexts

Student learning outcomes specific to poetry

1. Demonstrate a skillful use or knowledge of major poetic devices, such as metaphor, imagery, lineation, persona, types of rhythm, rhyme and other sonic effect.
2. Demonstrate the use or knowledge of classic poetic forms, such as the sonnet, the ode and the elegy, as well as other contemporary, experimental or avant-garde forms.
3. In a statement of purpose or aesthetics that is part of their thesis manuscript, as well as in an exit interview/ thesis defense, appraise and locate their own work within literary and cultural contexts

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Feb 1 (Jan 15 for consideration of assistantship)	

Special requirements

- Portfolio (see below)

The Master of Fine Arts in Creative Writing program is designed to attract students from diverse undergraduate backgrounds who are writers of promise. The program is suited particularly to those interested primarily in the writing of fiction and poetry; however, some emphasis also is placed on nonfiction writing, playwriting and screenwriting.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. A portfolio of promising fiction or poetry, possibly with drama (as a minimum, approximately eight to 10 poems, or 20 or more pages of fiction or some combination of these; in all cases, applicants should submit only their strongest creative writing samples) to be submitted directly to the M.F.A. program
2. Three recommendations from persons who are qualified to give information concerning the applicant's probable success in graduate school, especially in a creative writing program
3. A scholastic record that is indicative of the applicant's ability to pursue a graduate degree successfully
4. A baccalaureate degree or its equivalent from an accredited institution

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.F.A. in Creative Writing program are required to earn a minimum of 48 graduate-level credit hours beyond the baccalaureate. At least half of the credit hours presented for graduation must be at the 600 level or higher.

2. Other requirements: Beyond the required courses, students should select elective courses, in conjunction with the program director or their thesis advisers, which are appropriate to their aims and interests. The thesis work gives students the opportunity to produce manuscripts of publishable quality. Course work also is available in the techniques of teaching creative writing, and the program is flexible enough to include studies undertaken in other departments of the university as well, including the departments of Art History, Theatre and Philosophy and the Richard T. Robertson School of Media and Culture.

Curriculum requirements

Course	Title	Hours
Workshops		
Select four of the following (majority of course work should be in the student's genre):		12
ENGL 666	Creative Writing: Fiction	
ENGL 667	Creating Writing: Poetry	
ENGL 668	Creative Writing: Drama	
ENGL 671	Film and Television Scripts	
ENGL 672	Writing Nonfiction	
Elective courses in literature		
Select four of the following:		12
ENGL/TEDU 528	Children's Literature II	
ENGL 560	Studies in British Literature and Culture	
ENGL 570	Special Topics in American Literature and Culture	
ENGL/ENED 601	Young Adult Literature	
ENGL 605	Introduction to Scholarship in English Studies	
ENGL 606	Literary Criticism	
ENGL 611	Authors	
ENGL 614	Cultural Discourses

Creative Writing, Master of Fine Arts (M.F.A.) with a concentration in poetry

Program goals

Our selective and academically rigorous 48-credit-hour, three-year program is designed to provide talented writers with the opportunity to work closely with both outstanding faculty and gifted peers to strengthen their craft, develop their literary aesthetics, enrich their understanding of existing traditions as well as compositional possibilities, and to participate actively in the life of the literary community at large.

The primary areas of study are poetry and fiction, and admission is highly competitive. In addition to the poetry and fiction workshops, there are courses available that focus on writing drama, nonfiction and screenplays, as well as courses that provide practical experience in editing.

Student learning outcomes

Students in the M.F.A. in Creative Writing program will:

1. Develop and refine their individual writerly voices, produce literary work of a high quality and demonstrate a comprehensive understanding of their own aesthetics, as well as the literary models and cultural sources of those aesthetics
2. Actively engage in a wider literary culture and community at the local, regional, national or international level
3. Develop constructive workshop practices and demonstrate the ability to read closely and respond perceptively and critically to the writing of their fellow M.F.A. students
4. Develop an advanced comprehension of editing and revision techniques and strategies, which include synthesizing challenges, advice and critiques from professors and fellow M.F.A. students
5. Develop, hone and articulate a keen sense of their artistic and career goals

Student learning outcomes specific to poetry

1. Demonstrate a skillful use or knowledge of major poetic devices, such as metaphor, imagery, lineation, persona, types of rhythm, rhyme and other sonic effect.
2. Demonstrate the use or knowledge of classic poetic forms, such as the sonnet, the ode and the elegy, as well as other contemporary, experimental or avant-garde forms.
3. In a statement of purpose or aesthetics that is part of their thesis manuscript, as well as in an exit interview/ thesis defense, appraise and locate their own work within literary and cultural contexts

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

The M.F.A. Guide (<http://english.vcu.edu/mfa/mfa-guide/>) may be accessed online.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Feb 1 (Jan 15 for consideration of assistantship)	

Special requirements

- Portfolio (see below)

The Master of Fine Arts in Creative Writing program is designed to attract students from diverse undergraduate backgrounds who are writers of promise. The program is suited particularly to those interested primarily in the writing of fiction and poetry; however, some emphasis also is placed on nonfiction writing, playwriting and screenwriting.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. A portfolio of promising fiction or poetry, possibly with drama (as a minimum, approximately eight to 10 poems, or 20 or more pages of fiction or some combination of these; in all cases, applicants should submit only their strongest creative writing samples) to be submitted directly to the M.F.A. program
2. Three recommendations from persons who are qualified to give information concerning the applicant's probable success in graduate school, especially in a creative writing program
3. A scholastic record that is indicative of the applicant's ability to pursue a graduate degree successfully
4. A baccalaureate degree or its equivalent from an accredited institution

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.F.A. in Creative Writing program are required to earn a minimum of 48 graduate-level credit hours beyond the baccalaureate. At least half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Beyond the required courses, students should select elective courses, in conjunction with the program director or their thesis advisers, which are appropriate to their aims and interests. The thesis work gives students the opportunity to produce manuscripts of publishable quality. Course work also is available in the techniques of teaching creative writing, and the program is flexible enough to include studies undertaken in other departments of the university as well, including the departments of Art History, Theatre and Philosophy and the Richard T. Robertson School of Media and Culture.

Curriculum requirements

Course	Title	Hours
Workshops		
Select four of the following (majority of course work should be in the student's genre):		12

ENGL 666 Creative Writing: Fiction

ENGL 667 Creating Writing: Poetry

ENGL 668 Creative Writing: Drama

ENGL 671 Film and Television Scripts

ENGL 672 Writing Nonfiction

Elective courses in literature

Select four of the following: 12

ENGL/TEDU 528 Children's Literature II

ENGL 560 Studies in British Literature and Culture

ENGL 570 Special Topics in American Literature and Culture

ENGL/ENED 601 Young Adult Literature

ENGL 605 Introduction to Scholarship in English Studies

ENGL 606 Literary Criticism

ENGL 611 Authors

ENGL 614 Cultural Discourses

ENGL 620 Intertextuality

ENGL 624 Texts and Contexts

ENGL 627 Genres

ENGL 629 Form and Theory of Poetry

ENGL 630 Form and Theory of Fiction

ENGL 631 Form and Theory of Creative Nonfiction

ENGL 692 Independent Study

Additional recommended electives

Select 18 credit hours of the following (may include up to three additional credit hours of thesis): 18

ENGL/TEDU 528 Children's Literature II

ENGL/ENED 532 Applied English Linguistics

ENGL 550 Studies in Linguistics

ENGL/TEDU/LING 552 Teaching English as a Second Language

ENGL 560 Studies in British Literature and Culture

ENGL 570 Special Topics in American Literature and Culture

ENGL/ENED 601 Young Adult Literature

ENGL 605 Introduction to Scholarship in English Studies

ENGL 606 Literary Criticism

ENGL 611 Authors

ENGL 614 Cultural Discourses

ENGL 620 Intertextuality

ENGL 624 Texts and Contexts

ENGL 627 Genres

ENGL 629 Form and Theory of Poetry

ENGL 630 Form and Theory of Fiction

ENGL 631 Form and Theory of Creative Nonfiction

ENGL 632 Community Writing

ENGL 636 Teaching Writing

ENGL 637 Theories of Rhetoric and Composition

ENGL 638 Responding to Writing

ENGL 652 Studies in Writing and Rhetoric: ____

ENGL 661 Themes in Interdisciplinary Studies

ENGL 666	Creative Writing: Fiction	
ENGL 667	Creating Writing: Poetry	
ENGL 668	Creative Writing: Drama

English, Master of Arts (M.A.)

Program goals

The Department of English offers an M.A. degree for students seeking study beyond a bachelor's degree which prepares graduates to pursue a doctorate, to teach in secondary or higher education or to obtain other positions in the public and private sector. The M.A. in English is designed for students pursuing advanced English studies, and students may choose to focus their course work in either literature or writing and rhetoric. The M.A. in English with a research concentration is designed for students pursuing advanced English studies with an emphasis on research, criticism and methodology.

Student learning outcomes

1. Develop advanced reading and writing skills
2. Engage in theoretical and/or textual/bibliographical scholarship
3. Conduct original research and advance an original argument under faculty direction
4. Explain and defend original research in a formal presentation or defense
5. Survey the professional and academic work to which the degree leads

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.A.	Fall	Mar 1	GRE-General
	Spring	Oct 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. A baccalaureate degree in an area appropriate to the study of literature or writing
2. A GPA that indicates the applicant can successfully pursue a graduate degree
3. Three letters of recommendation from former instructors
4. Completion of the general GRE
5. A writing sample, optimally ranging from 10-15 double-spaced pages

Should students wish to be considered for a possible graduate teaching assistantship, they must also complete a separate Graduate Teaching Assistantship Application, which can be found on the program’s website. This separate/additional application also requires an undergraduate, graduate or professional paper, as well as a brief personal essay (two to three pages) in which applicants discuss their relevant teaching experience, educational background and particular interest in a graduate degree, suggesting where their education seems to be leading.

Applicants may also indicate whether they intend to write a thesis and with which faculty members they hope to study.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.A. in English program are required to earn a minimum of 30 graduate credit hours beyond the baccalaureate. At least half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Students must complete one of two final projects: either a directed study, under the supervision of a faculty member with a public presentation; or a thesis in consultation with a faculty committee, which culminates in an oral defense. Students must obtain approval for their final projects from their supervising faculty and the M.A. committee.

Curriculum requirements

Media, Art, and Text, Doctor of Philosophy (Ph.D.) [College of Humanities and Sciences]

Program goal

VCU's interdisciplinary doctoral program in media, art, and text is a joint endeavor of the Department of English, the School of the Arts and the Richard T. Robertson School of Media and Culture. The program prepares students primarily to teach at the college or university level, although some pursue careers in related media fields. MATX emphasizes the historical and theoretical foundations essential to the scholarly study of media, both old and new, broadly defined. It provides an intellectually stimulating environment that encourages students to work both collaboratively and independently, as well as across and between disciplines and media. Students maintain a base in their primary area of research, which is usually but not always the field in which they have done prior graduate work.

Student learning outcomes

1. Develop advanced communication skills in writing, speaking and the use of multimedia
2. Demonstrate broad knowledge of history and theory as the foundation for interdisciplinary work in a specialized facet of media, art, and/or text
3. Develop competence in interdisciplinary and disciplinary research methods and responsible conduct of research
4. Develop specialized knowledge in relevant fields to support dissertation and subsequent research
5. Demonstrate the ability to conduct independent research and produce new, specialized knowledge within the broad parameters of media, art, and text
6. Develop a strong basis for ongoing professional practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for

continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

The MATX student handbook (<http://www.matx.vcu.edu/program/handbook/>) is available online.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 2	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must hold a master's degree (M.A., M.F.A., M.S.) in a relevant field.
2. Applicants must submit the following, in the formats indicated via VCU's online application portal.
 - a. Writing sample demonstrating the ability to write clearly, analyze effectively and conduct original research in advanced doctoral-level seminars – This may be a master's thesis, a graduate-level seminar paper or a published essay. Submit as a PDF.
 - b. Statement of purpose describing the applicant's interest, motivation and goals in pursuing this degree – The statement should specifically address the importance of interdisciplinarity to the applicant's academic goals, and it should also offer evidence of preparation for the study of media, art, and text. The applicant should indicate the specific area of study and research to be pursued at VCU and identify faculty who might potentially direct dissertation research. Submit as a PDF.
 - c. Academic curriculum vitae or professional resume – List all colleges and universities attended and degrees earned, all professional and academic positions held, all publications and/or exhibitions, technical skills, and any other relevant information.

Include URLs for personal and/or professional websites. Submit as PDF.

- d. Letters of recommendation – Provide letters from three present or former instructors or other individuals qualified to evaluate the applicant's ability to engage in interdisciplinary study at the doctoral level. Have recommenders submit their letters via the online application portal.
3. Applicants who wish to pursue creative work at VCU must also submit a portfolio. Those with an M.F.A. who do not wish to continue creative work should consult with the MATX director about this requirement. Materials submitted should demonstrate excellence in studio or professional practice and the potential to do graduate-level work in media, art, and text. Portfolios will be reviewed by the MATX admissions committee as well as relevant faculty in the School of the Arts and the Richard T. Robertson School of Media and Culture. Please observe the following guidelines:
 - a. Those working in 2-D or 3-D mediums should provide 20 images of representative work arranged chronologically, beginning with the most recent.
 - b. Those working in sound and time-based media, as well as those in the performing arts, should provide clips totaling no more than 10 minutes.
 - c. Those working across media may submit a combination of the above.
 - d. The portfolio should include title, date, media and dimensions of each work, as well as a brief statement or other information that will help the admissions committee in its evaluation.

Small files illustrating 2-D or 3-D work should be submitted in a single PDF. Sound or video files should be posted to Vimeo or Sound Cloud with a functioning link submitted in a PDF with the required information posted to the portal. Portfolio materials may also be posted to a personal or professional website and the link submitted in a PDF posted to the portal.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the MATX program are required to earn a minimum of 42 graduate-level credit hours beyond the master's. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. The 42-hour curriculum comprises 36 hours of course work and a minimum of six hours of dissertation research. Course work includes a core of four required courses taken during the first two semesters by all incoming students. Three doctoral seminars provide a shared historical and theoretical foundation for the study of media, art, and text, while a workshop offers the opportunity to develop and expand professional and/or creative skills relevant to the student's career goals and research focus. In addition, all students will take a research methods course in a field relevant to their anticipated area of dissertation research. Beyond the core, students select 21 hours of elective credit hours from course offerings in disciplines relevant to their research interests and career goals. The program offers a topics seminar focused on the history, theory or practice of media, art, and text. Independent study and internships are also available as electives. While enrollment in courses with the MATX prefix is guaranteed to matriculated MATX students, enrollment in other graduate courses is subject to the conditions established by individual units. Together

the core and the electives support the interdisciplinary work of the dissertation, which is an original scholarly examination of some aspect of media, art, and/or text. It may include work in media other than text. It is supervised by a committee consisting of four or five members drawn from disciplines relevant to the research topic.

2. Grade requirements: To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.
3. Requirements for admission to candidacy: Before beginning formal dissertation research, students must complete all 36 hours of required course work, both stages of the e-portfolio and the requirements described below. Upon completion of these, the student will apply for degree candidacy.
4. Dissertation committee: The dissertation committee consists of the director (who must hold a Ph.D.) and three or four additional members whose scholarly knowledge and interests are relevant to the project. The committee must have at least one member from each of the sponsoring units (Department of English, School of the Arts, Richard T. Robertson School of Media and Culture). All must be members of VCU's graduate faculty. Appropriate faculty from outside VCU may serve on committees (but not as director) with the approval of the MATX director and the graduate dean. It is the student's responsibility to assemble the committee, in consultation with the dissertation director. Committees will not be appointed by the program.
5. E-portfolio: Work on the e-portfolio will begin in MATX 604 in the spring of the first year. There are no technical specifications, and content will include, but is not limited to, work done in the first two years in the program. It will take the form of a website and must demonstrate the technical skills (Web design, audio, video, etc.) relevant to the student's work on the dissertation and the career sought after VCU. Submission is a two-stage process:
 - a. Stage 1 (August of the second year): a three- to five-page design rationale for the portfolio site along with a mock-up or rough structure
 - b. Stage 2 (April of the second year): a finished, live site accompanied by a five-page statement relating it to the student's work inside and outside the program and outlining how it uses media techniques to promote a specific professional and/or creative identity (Note: Each submission is graded pass/fail and may be repeated once. A second failure results in automatic termination from the program.)
6. Competency: Candidates must demonstrate competency in a skill or technique relevant to the dissertation research or planned professional career. The dissertation committee approves and administers the competency portion. Graded pass/fail, the test may be repeated once.
7. Bibliography exam: Candidates will complete an exam on a reading list of 20 to 30 sources relevant to or supportive of the dissertation topic. The dissertation committee approves and administers the bibliography exam. Graded pass/fail, the test may be repeated once.
8. Dissertation prospectus and prospectus defense: The prospectus is a 15- to 20-page document that indicates the significance of the proposed research, gives a short review of relevant literature, states the research question, specifies the proposed methodology and indicates how the project lays the foundation for the anticipated academic or professional career. It also includes a work plan for the completion of research and writing, as well as a complete bibliography. The prospectus is defended orally before the

dissertation committee, which may accept, reject or require revisions. The defense may be repeated once.

9. Dissertation and dissertation defense: The dissertation is an original, interdisciplinary and scholarly examination of a topic relevant to an aspect of media, art, and/or text. It may include work in media other than text. Given the varied nature of doctoral research, there is no set time frame for completion of a dissertation. It is expected, however, that the dissertation will take about two years after attaining candidacy, but it must be defended within the eight-year time limit for completion of the doctoral degree. The dissertation will be defended orally before the dissertation committee. Successful defense of the dissertation completes the requirements for the degree.

The Department of Forensic Science offers programs leading to bachelor's and master's degrees.

The Bachelor of Science is for students who plan a career or graduate study in the forensic sciences. The forensic science program provides students with fundamental learning in forensic laboratory analyses and crime scene investigation, with academic emphasis in biology, chemistry and criminal justice. The program offers three concentrations: forensic biology, forensic chemistry and physical evidence. Students will select one of the three concentrations prior to the second semester of their sophomore year. The B.S. in Forensic Science supplies students with the necessary skills for professional careers in forensic laboratories, public and private, basic research laboratories, clinical laboratories, and/or to pursue graduate studies. Students also will be prepared to pursue advanced degrees in the physical sciences, biological sciences, forensic science, law, allied health and medicine, to name a few.

The Master of Science in Forensic Science prepares students for careers as forensic scientists in government and private laboratories. Students receive in-depth exposure to specializations within the field, including drug analysis, DNA analysis, trace evidence, criminalistics and legal issues.

For more information visit the departmental website (<http://forensicscience.vcu.edu/>).

- Forensic Science, Master of Science (M.S.) with a concentration in forensic biology (p. 250)
- Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/drugs and toxicology (p. 253)
- Forensic Science, Master of Science (M.S.) with a concentration in forensic chemistry/trace (p. 255)
- Forensic Science, Master of Science (M.S.) with a concentration in forensic physical analysis (p. 257)

Forensic Science, Master of Science (M.S.) with a concentration in forensic biology

Program accreditation

Forensic Science Education Programs Accreditation Commission

Program goal

The Master of Science in Forensic Science is one of only a few of its kind in the U.S. The mission of the program is to prepare students for careers as forensic scientists in government and private forensic laboratories. In addition, students will be prepared to pursue further graduate and/or professional academic degrees.

Core courses in the forensic science curriculum offer broad exposure to forensic laboratory equipment and instrumentation, as well as legal issues, expert testimony, forensic biology, forensic chemistry, trace evidence, physical evidence, professional ethics, quality assurance and current topics in research and development within the forensic sciences. Students entering the program will be required to select a concentration by the end of the first semester. Concentrations offered include forensic biology, forensic chemistry/drugs and toxicology, forensic chemistry/trace and forensic physical analysis. A strong emphasis is placed on laboratory course work, providing students with significant laboratory

and research experience. Several of the laboratory courses are taught by practicing professional forensic scientists at the Virginia Division of Forensic Science Central Laboratory, which is nationally accredited by the American Society of Crime Laboratory Directors/Laboratory Accreditation Board.

Student learning outcomes

1. Students will be able to apply basic principles and laboratory procedures of biology and chemistry to forensic science through focused study in the available concentration options.
2. Students will demonstrate capabilities, use, potential and limitations of forensic laboratory theory and techniques.
3. Students will demonstrate the ability to perform (report and orally present) independent research in an area of forensic science.
4. Students will demonstrate an understanding of legal procedure, rules of evidence, ethical and professional duties and responsibilities of the forensic scientist.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

The forensic science graduate student handbook (<http://forensicscience.vcu.edu/graduate/student-handbook/>) is available online.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 1	GRE

Note: Review of application and offers of admission will begin Jan. 15 and proceed until enrollment openings are filled. All applicants are automatically considered for graduate teaching assistantships in the Department of Forensic Science; however, the earlier a student's application is complete, the better the chance of being selected for an assistantship.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in a natural science discipline, including forensic science, or a degree with equivalent course work
2. An undergraduate GPA that exceeds 2.9 on a 4.0 scale (Most students entering the forensic science graduate program have a minimum GPA of 3.0 on undergraduate work and a combined score of 300 or more on the verbal and quantitative sections of the GRE)
3. Completion of eight credit hours (two semesters or equivalent) of organic chemistry with laboratories and eight credit hours (two semesters or equivalent) of general biology with laboratories
4. Assessment of prior graduate course work and/or relevant laboratory experience (where applicable)
5. Three letters of recommendation pertaining specifically to the student's potential ability as a graduate student in forensic science
6. Personal statement
7. Satisfactory scores on GRE

Applicants are required to select a concentration and will be considered only for that concentration. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those required for the concentration.

Additional admission requirements for concentration in forensic biology

In addition to the M.S. in Forensic Science general admission requirements, applicants to the forensic biology concentration must have completed a minimum of nine credit hours or equivalent of upper-level course work in the biological or biochemical sciences. This may include,

but is not limited to, course work in cell biology, general biochemistry, genetics and/or molecular biology.

Degree requirements

The graduate program is a full-time, two-year program. Courses will vary depending on the concentration selected. Required and elective courses are offered at various times, day and night, throughout the week. The M.S. in Forensic Science requires 42 graduate credit hours of course work, including 27 credit hours of required core course work and 15 credit hours of specialized course work designed for each concentration (including electives). The required course work includes a directed research project, which is an extensive research experience conducted within a forensic laboratory setting.

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students must complete a minimum of 42 graduate-level credit hours as outlined in the list of core and concentration requirements, including electives.
2. Grade requirements: Students must maintain an ongoing, cumulative minimum GPA of 3.0. Receipt of a grade of C in two or more courses will constitute an automatic dismissal from the graduate program in forensic science. Receipt of a grade of D or lower in any one course will constitute an automatic dismissal from the graduate program in forensic science.
3. Other requirements: Students must maintain continuous, full-time enrollment. Interruption in continuous enrollment or full-time status for any reason without a leave of absence approved by the forensic science graduate committee will require that students reapply to the program. Request for credit for graduate course work taken at other institutions must be submitted to the director of graduate studies in forensic science and will be considered on a case-by-case basis by the forensic science graduate committee. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those listed below. These will not count toward the 42 required credit hours.

Curriculum requirements

Course	Title	Hours
FRSC 570	Forensic Science Seminar (one-credit course repeated for three credits) ^{1,2}	3

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students must complete a minimum of 42 graduate-level credit hours as outlined in the list of core and concentration requirements, including electives.
2. Grade requirements: Students must maintain an ongoing, cumulative minimum GPA of 3.0. Receipt of a grade of C in two or more courses will constitute an automatic dismissal from the graduate program in forensic science. Receipt of a grade of D or lower in any one course will constitute an automatic dismissal from the graduate program in forensic science.
3. Other requirements: Students must maintain continuous, full-time enrollment. Interruption in continuous enrollment or full-time status for any reason without a leave of absence approved by the forensic science graduate committee will require that students reapply to the program. Request for credit for graduate course work taken at other institutions must be submitted to the director of graduate studies in forensic science and will be considered on a case-by-case basis by the forensic science graduate committee. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those listed below. These will not count toward the 42 required credit hours.

Curriculum requirements

Course	Title	Hours
FRSC 570	Forensic Science Seminar (once-credit course repeated for three credits) ^{1,2}	3
FRSC 661 or FRSC 662	Analysis of Pattern Evidence ³ Firearm and Toolmark Identification	3

FRSC 670	Forensic Evidence and Criminal Procedure	3	³
FRSC 671	Instrumentation in Forensic Chemistry ²	3	
FRSC 673 & FRSZ 673	Forensic Microscopy and Forensic Microscopy Laboratory ²	3	⁴
FRSC 675 & FRSZ 675	Forensic Serology and DNA Analysis and Forensic Serology and DNA Analysis Laboratory ²	3	
FRSC 677	Professional Practices and Expert Testimony	3	
FRSC 793	Directed Research in Forensic Science	3	
STAT 543	Statistical Methods I	3	
or FRSC 580	Applied Statistics for Forensic Science		
or BIOS 543	Graduate Research Methods I		
Forensic chemistry/trace concentration courses			
FRSC 565	Scientific Crime Scene Investigation ³	3	
FRSC 681	Analysis of Fire Debris and Explosives ³	3	
FRSC 682	Forensic Analysis of Paint and Polymers ³	3	
Recommended electives			
Select six credit hours of the following: ⁴			6
CHEM 506	Introduction to Spectroscopic Methods in Organic Chemistry		
CHEM 606	Advanced Spectroscopic Methods in Organic Chemistry		
CHEM 630	Electroanalytical Chemistry		
CHEM 631	Separation Science		
CHEM 632	Chemometrics		
CHEM 633	Mass Spectrometry		
CHEM 634	Surface Science		
CHEM 635	Spectrochemical Analysis		
FRSC 510	Developmental Osteology ³		
FRSC 520	Forensic Fire Investigation		
FRSC 566	Advanced Crime Scene Investigation ³		
FRSC 580	Applied Statistics for Forensic Science		
FRSC 607	Forensic Taphonomy ³		
FRSC/PHTX 644	Forensic Toxicology		
FRSC 661	Analysis of Pattern Evidence ³		
FRSC 662	Firearm and Toolmark Identification ³		
FRSC 672	Advanced Drug Analysis ³		
FRSC 690	Scientific Writing		
FRSC 692	Forensic Science Independent Study		
FRSC 693	Current Topics in Forensic Science		
FRSC 792	Research Techniques		
FRSC 793	Directed Research in Forensic Science		
Total Hours		42	

1

FRSC 690 may substitute for one credit of this requirement.

2

Courses required during the first fall semester upon entry in to the program

³ Course consists of lecture and laboratory.

⁴ In consultation with adviser. At least one elective must be a graduate-level chemistry course.

The minimum total of graduate credit hours required for this degree is 42.

Program website: forensicscience.vcu.edu (<http://forensicscience.vcu.edu/>)

Forensic Science, Master of Science (M.S.) with a concentration in forensic physical analysis

Program accreditation

Forensic Science Education Programs Accreditation Commission

Program goal

The Master of Science in Forensic Science is one of only a few of its kind in the U.S. The mission of the program is to prepare students for careers as forensic scientists in government and private forensic laboratories. In addition, students will be prepared to pursue further graduate and/or professional academic degrees.

Core courses in the forensic science curriculum offer broad exposure to forensic laboratory equipment and instrumentation, as well as legal issues, expert testimony, forensic biology, forensic chemistry, trace evidence, physical evidence, professional ethics, quality assurance and current topics in research and development within the forensic sciences. Students entering the program will be required to select a concentration by the end of the first semester. Concentrations offered include forensic biology, forensic chemistry/drugs and toxicology, forensic chemistry/trace and forensic physical analysis. A strong emphasis is placed on laboratory course work, providing students with significant laboratory and research experience. Several of the laboratory courses are taught by practicing professional forensic scientists at the Virginia Division of Forensic Science Central Laboratory, which is nationally accredited by the American Society of Crime Laboratory Directors/Laboratory Accreditation Board.

Student learning outcomes

1. Students will be able to apply basic principles and laboratory procedures of biology and chemistry to forensic science through focused study in the available concentration options.
2. Students will demonstrate capabilities, use, potential and limitations of forensic laboratory theory and techniques.
3. Students will demonstrate the ability to perform (report and orally present) independent research in an area of forensic science.

4. Students will demonstrate an understanding of legal procedure, rules of evidence, ethical and professional duties and responsibilities of the forensic scientist.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

The forensic science graduate student handbook (<http://forensicscience.vcu.edu/graduate/student-handbook/>) is available online.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 1	GRE

Note: Review of application and offers of admission will begin Jan. 15 and proceed until enrollment openings are filled. All applicants are automatically considered for graduate teaching assistantships in the Department of Forensic Science; however, the earlier a student's application is complete, the better the chance of being selected for an assistantship.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in a natural science discipline, including forensic science, or a degree with equivalent course work
2. An undergraduate GPA that exceeds 2.9 on a 4.0 scale (Most students entering the forensic science graduate program have a minimum GPA of 3.0 on undergraduate work and a combined score of 300 or more on the verbal and quantitative sections of the GRE)
3. Completion of eight credit hours (two semesters or equivalent) of organic chemistry with laboratories and eight credit hours (two semesters or equivalent) of general biology with laboratories
4. Assessment of prior graduate course work and/or relevant laboratory experience (where applicable)
5. Three letters of recommendation pertaining specifically to the student's potential ability as a graduate student in forensic science
6. Personal statement
7. Satisfactory scores on GRE

Applicants are required to select a concentration and will be considered only for that concentration. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those required for the concentration.

Additional admission requirements for concentration in forensic physical analysis

In addition to the M.S. in Forensic Science general admission requirements, applicants to the forensic physical analysis concentration must have completed a minimum of nine credit hours or equivalent of upper-level science course work. This may include, but is not limited to, course work in the areas of biology, chemistry, physics or biochemistry.

Degree requirements

The graduate program is a full-time, two-year program. Courses will vary depending on the concentration selected. Required and elective courses are offered at various times, day and night, throughout the week. The M.S. in Forensic Science requires 42 graduate credit hours of course work, including 27 credit hours of required core course work and 15 credit hours of specialized course work designed for each concentration (including electives). The required course work includes a directed research project, which is an extensive research experience conducted within a forensic laboratory setting.

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students must complete a minimum of 42 graduate-level credit hours as outlined in the list of core and concentration requirements, including electives.
2. Grade requirements: Students must maintain an ongoing, cumulative minimum GPA of 3.0. Receipt of a grade of C in two or more courses will constitute an automatic dismissal from the graduate program in forensic science. Receipt of a grade of D or lower in any one course will constitute an automatic dismissal from the graduate program in forensic science.
3. Other requirements: Students must maintain continuous, full-time enrollment. Interruption in continuous enrollment or full-time status for any reason without a leave of absence approved by the forensic science graduate committee will require that students reapply to the program. Request for credit for graduate course work taken at other institutions must be submitted to the director of graduate studies in forensic science and will be considered on a case-by-case basis by the forensic science graduate committee. If course work deficiencies are identified, students may be required to take additional foundational courses beyond those listed below. These will not count toward the 42 required credit hours.

Curriculum requirements

Course	Title	Hours
FRSC 570	Forensic Science Seminar (one-credit course repeated for three credits) ^{1,2}	3

Department of Gender, Sexuality and Women's Studies

Kathleen Ingram, Ph.D.

Associate professor and chair

gsws.vcu.edu (<http://gsws.vcu.edu/>)

Gender, sexuality and women's studies provides a broad interpretation and view of diversity, including the interdisciplinary, cross-cultural examination of women's perspectives and experiences, masculinity and femininity, and heterosexuality and alternate sexualities as culturally constructed and socially experienced.

- Gender, Sexuality and Women's Studies, Certificate in (Post baccalaureate graduate certificate) (p. 260)

Gender, Sexuality and Women's Studies, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Department of Gender, Sexuality and Women's Studies is devoted to the interdisciplinary, multicultural study of the achievements, contributions, perspectives, experiences, roles and status of women encompassing the intersectionality of race, class, age, ethnicity, disability status, nationality and sexual identity.

Student learning outcomes

1. Have a firm grasp of the feminist paradigm, including feminist theories and the theoretical frameworks that inform the analysis of social, cultural, historical, economic and political forces that shape the experiences of women
2. Demonstrate facility for problem-solving and critical-thinking
3. Demonstrate facility for intersectional analysis as it relates to diversity
4. Be grounded in and understand the linkages between the liberal arts and sciences including commonalities, differences and contributions of each to the field of gender, sexuality and women's studies

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 30	
	Spring	Nov 30	

Special requirements

- Fall semester entrance is required for students without prior course work in gender, sexuality or women's studies (graduate or undergraduate).

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission: Students possessing a B.A. or B.S. degree are eligible for admission into this certificate program.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students in the Certificate in Gender, Sexuality and Women's Studies program are required to earn a minimum of 15 graduate-level credit hours beyond the baccalaureate.
2. Grade requirements: An overall GPA of 3.0 is required for award of the certificate, and no more than three credit hours of C may be earned in the certificate program curriculum.

Curriculum requirements

The Department of History offers programs at the graduate and undergraduate levels, specializing in a multidimensional analysis of the human past. Faculty research interests vary among thematic, topical, national or chronological emphases. For more information regarding the department and its specialty areas, visit their website (<http://history.vcu.edu/>).

- History, Master of Arts (M.A.) (p. 261)

• Public History, Certificate in (Post-baccalaureate graduate certificate) (p. 263)

History, Master of Arts (M.A.)

Program goals

The master's program in history draws on faculty expertise and the wealth of historical resources available in the Richmond area to support the extended exploration of the human past and the craft of history. It prepares students for the successful practice of historical scholarship in a variety of fields including archives, libraries, historical sites, museums, government agencies, businesses, publishing and secondary education, as well as for advanced study in doctoral programs.

Student learning outcomes

Graduates of the program will:

1. Develop the ability to understand the processes and methodologies historians use to study the past
2. Develop the ability to understand and think critically about scholarly works of history
3. Develop the ability to do historical research and present interpretations in writing
4. Develop the ability to understand the myriad of forces that shape human experiences and critically weigh change and continuity over time

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.A.	Fall	Jul 1	GRE
	Spring	Dec 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Normally, 30 credit hours of undergraduate history courses, of which 18 credit hours should be at the upper-division level
2. A GPA indicative of the ability to successfully pursue a graduate degree
3. Three letters of recommendation from persons qualified to provide information concerning the applicant's probable success in graduate school
4. Satisfactory completion of the Graduate Record Examination
5. Submission of a written statement of intent, indicating why the applicant wishes to pursue a graduate degree in history

The submission of a writing sample, demonstrating the applicant's writing ability and research skills, is strongly encouraged.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. The Master of Arts in History may be achieved through one of two options:
 - a. The thesis option requires 30 graduate credit hours with six credit hours of HIST 698.
 - b. The non-thesis option requires 36 graduate credit hours with a minimum of six credits in research-level courses and an oral comprehensive exam.
2. At least half of the credit hours presented for graduation must be at the 600 level or higher.
3. Students may take up to six credits of non-history electives from an approved list of elective courses. In addition, students who wish to pursue specific areas of study may, with the approval of the graduate director, substitute other courses when appropriate, but in no case shall be able to count more than six credit hours of non-history courses.

Curriculum requirements

Thesis option

Course	Title	Hours
Required courses		
HIST 601	Historiography and Methodology	3

Program website: history.vcu.edu (<http://history.vcu.edu/>)

Public History, Certificate in (Post-baccalaureate graduate certificate)

Program goals

The Certificate in Public History draws on faculty expertise and the wealth of historical resources available in the Richmond area to prepare students for professional work in the field of public history. Public history can be defined as the practice of history outside the classroom, exemplified by the work of archivists, museum curators, historical guides, historic preservationists, editors, publishers, administrators and digital media specialists. Accordingly, pursuit of this certificate builds theoretical and methodological knowledge as well as hands-on experience to provide students an entry into the field.

At any time, students in the certificate program may apply for admission into the Master of Arts in History program and, if accepted, may transfer the certificate credits toward partial fulfillment of the master's degree requirements. Conversely, students currently enrolled in the Master of Arts in History program may fulfill this certificate's requirements as part of their degree.

Student learning outcomes

Graduates of the program will:

- Apply to project development the concept of "shared authority" with which public historians engage their various audiences
- Apply the processes and methodologies historians use to study the past
- Present historical interpretations effectively in different formats
- Work collaboratively in a professional setting

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 1	
	Spring	Dec 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- Undergraduate exposure to history and humanities courses
- A GPA indicative of the ability to successfully complete a graduate program
- Three letters of recommendation from persons qualified to provide information concerning the applicant's probable success in graduate school
- Submission of a written statement of intent, indicating why the applicant wishes to pursue a graduate certificate in history

Three graduate-level transfer credits will be accepted toward the certificate with the department's approval.

Degree requirements

The certificate consists of 15 credit hours, to include the following:

Curriculum requirements

Course	Title	Hours
Required courses		
HIST 651	Public History: Theory and Practice	3
HIST 693	Internship in History	3
Electives		
ARTH 621	Historical Preservation and Architectural History ¹	9
or URSP 517	Historic Preservation in Planning	
ARTH 681	Museums and Communities ¹	9
ARTH 682	The Museum as Educational Institution ¹	
ARTH 683	Museum Collections ¹	9
ARTH 684	Curating Museum Exhibitions ¹	
HIST 623	Readings in Virginia and Southern History	9
HIST 652	Documentary Editing and Scholarly Publishing	
HIST 653	American Material Culture	9
HIST 654	Oral History: Theory and Practice	
HIST 691	Special Topics in History (when topic involves public history)	9
HIST 693	Internship in History ²	
PADM 650	Principles of Nonprofit Management ¹	9
URSP 647	Adaptive Reuse of Buildings ¹	
Total Hours		15

¹

No more than six credits may be taken from these non-history (HIST) courses.

²

An additional three credits may be taken in this required course for a maximum of six credits in HIST 693.

The minimum total of graduate credit hours required for this certificate is 15.

Graduate program director

Emilie E. Raymond, Ph.D.

Professor and director of graduate studies

eeraymond@vcu.edu

(804) 828-1635

Program website: history.vcu.edu (<http://history.vcu.edu/>)

Department of Kinesiology and Health Sciences

Joann Richardson, Ph.D.

Associate professor and chair

khs.vcu.edu (<http://khs.vcu.edu/>)

The Department of Kinesiology and Health Sciences offers programs that prepare students to pursue careers that utilize exercise interventions for both healthy and diseased populations and/or careers designed for students who wish to enter a health care-related field (that does not require licensure, certification or registry status). The department offers one undergraduate degree program; the Bachelor of Science with either the exercise science concentration or the health science concentration.

Along with the undergraduate program, the department also offers a Master of Science in Health and Movement Sciences and Doctor of Philosophy in Rehabilitation and Movement Science.

The M.S. in Health and Movement Sciences program provides advanced course work for students interested in the application of health and movement science principles to exercise science, teaching and sports medicine. This program has a central focus on the sciences and is flexible enough so that students, with the assistance of an adviser, can design a program that truly meets their professional goals.

The Doctor of Philosophy in Rehabilitation and Movement Science program is interdisciplinary in nature and includes faculty from the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. Students choose a concentration in either exercise physiology or neuromusculoskeletal dynamics.

The department also offers a post-baccalaureate undergraduate Certificate in Health Sciences that is designed for students who hold a baccalaureate degree in a non-science area and wish to pursue their undergraduate pre-health sciences requirements at VCU.

For more information, consult the department's website (<http://khs.vcu.edu/>).

- Health and Movement Sciences, Master of Science (M.S.) with a concentration in exercise science (p. 265)
- Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology (p. 267)
- Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in neuromusculoskeletal dynamics
- Health Behavior Coaching, Certificate in (Post-baccalaureate graduate certificate) (p. 271)

Health and Movement Sciences, Master of Science (M.S.) with a concentration in exercise science

Program goal

This program provides advanced course work for students interested in the application of health and movement science principles to exercise

science, teaching and sports medicine. Applicants planning to enter the teaching profession should hold a valid teaching endorsement. Students admitted to this program typically have backgrounds in exercise science, life science or related fields. This program does not provide opportunities for initial licensure in health and physical education.

Student learning outcomes

1. Demonstrate an understanding of research design and statistical applications relative to the disciplines comprising the health and movement sciences
2. Demonstrate mastery of essential knowledge in health and movement science
3. Demonstrate a comprehensive or advanced knowledge of the field of health and movement science

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 15	GRE-General MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have received a bachelor's degree in exercise science or a related field from an accredited university or college.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the M.S. in Health and Movement Sciences program are required to earn a minimum of 36 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Master's-level candidacy and requirements: The Master of Science in Health and Movement Sciences program offers a thesis and non-thesis option. After completing at least 12 graduate credit hours and not more than 18 credit hours, with a minimum GPA of 3.0, all students must apply for advancement to candidacy. In the thesis option, students must complete HEMS 798 Thesis for six credit hours and 30 hours of prescribed course work. Students enrolling in this option will not be required to complete a comprehensive examination. In the non-thesis option, students must complete 36 hours of prescribed course work and must pass a comprehensive examination, which is taken after completing 30 hours of course work.

Curriculum requirements

Thesis option

Course	Title	Hours

Rehabilitation and Movement Science, Doctor of Philosophy (Ph.D.) with a concentration in exercise physiology [College of Humanities and Sciences]

Program goal

The Ph.D. in Rehabilitation and Movement Science is an interdisciplinary degree program developed through a collaborative partnership of the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. The mission of this collaborative degree program is to prepare applied scientists capable of approaching multifaceted health care, preventive medicine and rehabilitation initiatives from an integrative perspective and to prepare graduates to assume research, teaching and leadership positions within rehabilitation and movement science professions.

There are two program concentrations: exercise physiology and neuromusculoskeletal dynamics. The exercise physiology concentration prepares individuals to conduct research, direct external funding initiatives and teach in the area of exercise physiology, with particular focus on physical activity's impact on chronic disease states. The neuromusculoskeletal dynamics concentration prepares individuals for research, teaching and clinical initiatives associated with the identification and rehabilitation of movement disorders.

Student learning outcomes

At the completion of the program students will:

1. Demonstrate comprehensive foundational knowledge within his/her area of program specialization
2. Develop testable hypotheses and appropriate study designs to address relevant research questions in his/her area of program specialization
3. Develop the skills and abilities to collect and manage research data while ensuring ethical and responsible conduct of research
4. Develop the ability to analyze research data and subsequently interpret and synthesize results and draw appropriate conclusions
5. Demonstrate teaching effectiveness in the classroom and/or clinical environment
6. Disseminate research findings effectively in oral and/or written formats

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan. 9 will be given priority consideration. Applications received following the deadline may be considered if space and resources are available.	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:

1. Have completed at least one of a master's degree in a related area, 30 hours of post-baccalaureate work (e.g. course work at 500 level or greater) or a first-professional degree program
2. Provide official GRE score
3. Submit a curriculum vitae or professional resume indicating an applicant's educational and career experience as well as evidence of research potential

Admission decisions are made only on the basis of a completed application packet.

Applicants being considered for admission must complete an interview with a Ph.D. admissions committee representative and/or research faculty member with whom the student would like to work.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students pursuing the Ph.D. in Rehabilitation and Movement Science must successfully complete:

1. A minimum of 50 credit hours developed in conjunction with their advisers
2. Written and oral comprehensive examinations
3. All other university requirements of qualification for degree candidacy
4. Written dissertation based on a focused line of research
5. Oral defense of the dissertation

Health Behavior Coaching, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Post-baccalaureate Graduate Certificate in Health Behavior Coaching prepares professionals to serve a critical role on the interdisciplinary health care delivery team, particularly in the emerging preventive health care model in the U.S. This emerging model is prompted in large part by increased health promotion and chronic disease prevention/management efforts emphasizing improving access to preventive services, improving health outcomes, developing and training preventive care health professionals, reducing health disparities, and helping to control health care spending.

Health behavior coaches support, motivate and empower clients/patients to adopt healthy lifestyles, lower health risks by changing negative behaviors, better self-manage their health, and prevent or control acute and chronic health conditions. In addition, health behavior coaches teach clients/patients how to navigate the complex health care system in order to meet their diverse health care needs. This program will prepare students for an innovative, cutting-edge, STEM-H profession that has emerged in response to the need for more time- and labor-intensive encounters to empower clients/patients to be active and responsible participants in their health outcomes.

The certificate program is designed for professionals from diverse backgrounds ranging from clinical professionals (e.g., physicians, physician assistants, nurses, nurse practitioners, physical therapists, occupational therapists, exercise physiologists, sports medicine practitioners, pharmacists, counselors, psychotherapists, etc.) to health promotion professionals (e.g., health educators, registered dietitians, personal trainers, fitness trainers, athletic trainers, diabetes educators, recreational therapists, etc.). The goal of the program is to develop and enhance professional competencies and skills that facilitate a client/patient-centered and a client/patient-driven approach whereby clients/patients determine their own personal health goals and action plans to achieve those goals versus the traditional practitioner/professional-centered approach. In addition, through the coach's utilization of active learning and self-discovery strategies, client/patient accountability is fostered. The program trains professionals in evidence-based motivational techniques, behavior-change theory and processes, knowledge in healthy lifestyle practices, and communication strategies that assist clients/patients in developing inner resources and intrinsic motivation for adopting and sustaining lifestyle changes to improve health and overall well-being. Successful completion of the

program requires a minimum of 21 graduate credit hours beyond the baccalaureate level. The course work consists of 17 core credit hours plus four credit hours in a selected focus area.

The program is committed to providing didactic and experiential learning opportunities that prepare students for credentialing as a certified health education specialist, as administered by the National Commission for Health Education Credentialing Inc.

Student learning outcomes

1. Students will demonstrate a comprehensive understanding of the roles, responsibilities and scope of practice of health behavior coaches in the context of the U.S. health care delivery system.
2. Students will commit to practicing in accordance with applicable laws and regulations.
3. Students will demonstrate skills and competencies in partnering with clients/patients to develop client-centered and client-driven health outcomes goals and a feasible plan to accomplish their goals.
4. Students will demonstrate skills and competencies in facilitating client/patient lifestyle changes and empowering them to sustain healthy behaviors to improve health status, health outcomes and overall well-being.
5. Students will demonstrate their commitment to engage in continuing education to become more proficient in their practice and to ensure that their practice-related knowledge and skills remain current.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 15	

In addition, admission to the program requires that students:

- Have earned an undergraduate degree in a health science, social science, behavioral science or other health-related discipline from an accredited college or university
- Possess a minimum of one year of health-related work experience
- Have completed a minimum of four total prerequisite course credits in medical terminology and personal health

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work and to meet grade requirements.

1. Credit hour requirements: Students in the post-baccalaureate graduate certificate program in health behavior coaching are required to earn a minimum of 21 graduate credit hours beyond the baccalaureate level. The course work consists of 17 core credit hours plus four credit hours in a selected focus area.
2. Grade requirements: Receiving a C or below in two courses constitutes an automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum requirements

Course	Title	Hours
Required courses		
HEMS 640	Health Care Organization and Delivery in the U.S.	3
HEMS 641	Human Disease Prevention, Prevalence and Lifestyle Risk Factors	3
HEMS 642	Theoretical Foundations of Health Behavior Change	3
HEMS 643	Fundamentals of Motivational Interviewing	1
HEMS 644	Advanced Motivational Interviewing	1
HEMS 647	Concepts and Applications in Chronic Disease Self-management	3
HEMS 695	Externship	3

Specified elective courses

Select one pair of courses based on focus area.		4
HEMS 645 & HEMS 648	Application of Motivational Interviewing in Clinical Settings and Health Behavior Change Counseling Techniques for Clinical Interventions (clinical focus)	
HEMS 646 & HEMS 649	Application of Motivational Interviewing in Group and Community Settings and Planning, Implementing and Evaluating Group/Community Health Behavior Change Interventions (group/community focus)	
Total Hours		21

The minimum total of graduate credit hours required for this certificate is 21.

Graduate program director

Ronald K. Evans, Ph.D.
Associate professor and director of graduate studies, Department of Kinesiology and Health Sciences
rkevans@vcu.edu
(804) 828-1948

Program website: [khs.vcu.edu \(http://www.khs.vcu.edu\)](http://www.khs.vcu.edu)

Department of Mathematics and Applied Mathematics

Glenn Hurlbert, Ph.D.
Professor and chair

[math.vcu.edu \(http://www.math.vcu.edu\)](http://www.math.vcu.edu)

The Department of Mathematics and Applied Mathematics offers an undergraduate program leading to a Bachelor of Science in Mathematical Sciences with concentrations in applied mathematics, biomathematics, mathematics and secondary mathematics teacher preparation. The department administers the Master of Science in Mathematical Sciences concentrations in applied mathematics or mathematics and is involved in administering the Doctor of Philosophy in Systems Modeling and Analysis. The curricula of these programs are run jointly with additional concentrations offered by the Department of Statistical Sciences and Operations Research.

- Mathematical Sciences, Master of Science (M.S.) with a concentration in applied mathematics (p. 273)
- Mathematical Sciences, Master of Science (M.S.) with a concentration in mathematics (p. 275)
- Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) (p. 277)

Mathematical Sciences, Master of Science (M.S.) with a concentration in applied mathematics

Program goal

The Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research jointly offer the M.S. in Mathematical Sciences.

The mission of the Department of Mathematics and Applied Mathematics is to foster excellence in mathematical research and to offer a strong undergraduate and graduate education that will prepare students for stimulating and rewarding employment, career and lifelong learning opportunities. In addition, the department strives to help all VCU students achieve a level of quantitative literacy and analytical skills enabling them to deal effectively with the quantitative issues that they will encounter throughout their lives.

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. Students may obtain a designation on their transcripts indicating that their graduate study has emphasized the applied mathematics concentration by completing the requirements that are listed here. A student who has not satisfied the requirements for one of the program concentrations offered, but who has otherwise fulfilled all the requirements for a master's degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

Student learning outcomes

1. Students will develop creative-thinking skills to apply to mathematical problems and proofs.
2. Students will be able to analyze mathematical arguments and write their own arguments and proofs.
3. Students will be able to read and interpret mathematical literature, including technical articles, within their chosen mathematical subfield.
4. Students will be able to use technology, including specialized computational and graphics software, to test the validity of certain conjectures, to solve problems, to conduct mathematical experiments and do mathematical research.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 1	GRE – general
	Spring	Oct 1	TOEFL (international students only)

Special requirements

- Students should follow priority deadlines for funding consideration.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
2. Three letters of recommendation pertaining to the student's potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master's degree.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to meet the following requirements.

1. Credit hour requirements: Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Students must pass a comprehensive exam in the core courses and selected elective courses determined by the Department of Mathematics and Applied Mathematics.

Curriculum requirements

Thesis option

Course	Title	Hours
Concentration core courses		
MATH 507	Bridge to Modern Analysis	3
MATH 515	Numerical Analysis	3
MATH 535	Introduction to Dynamical Systems	3
Additional courses		
MATH 690	Research Seminar	2
MATH 697	Directed Research ¹	0-3
MATH 698	Thesis (three or six hours) ^{1,2}	3 or 6
Mathematics electives (Choose courses from list one below.) ²		6 or 9
Mathematical sciences or allied field electives (Choose courses from list two below.)		7

1

A maximum total of six credit hours for MATH 697 and MATH 698 may count toward the degree.

2

A minimum of 12 credits from mathematics electives (list one) and thesis are required for the degree.

The minimum total of graduate credit hours required for this degree is 30.

Non-thesis option

Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) [Mathematics and Applied Mathematics]

Program goal

The Ph.D. in Systems Modeling and Analysis is offered jointly by the Department of Statistical Sciences and Operations Research and the Department of Mathematics and Applied Mathematics. The program focuses on the development of the mathematical and computational skills used to conceptualize and analyze real-world systems. Faculty and students will engage and collaborate to contribute to the knowledge base used in the fields of science, medicine, business and engineering. The continued development of applied mathematics, discrete mathematics, operations research and statistics is critical to scientific advancement in the 21st century. The curriculum enables students to expand the frontiers of knowledge through original, relevant research involving quantitative and qualitative complex systems derived from real, contemporary problems facing our world.

Student learning outcomes

1. Gain a solid foundation in the theory and application of optimization, stochastic processes, simulation, decision analysis and biomathematics, and demonstrate a comprehensive understanding of these concepts
2. Learn to perform appropriate collection, modeling and analysis of data using statistical methods
3. Demonstrate the ability to identify situations in which mathematics, operations research or statistics can be applied and model the situation
4. Demonstrate the ability to solve a wide variety of mathematics, operations research or statistics problems using the software commonly used in industry
5. Demonstrate the ability to write code using appropriate research programming environments to implement research ideas
6. Learn how to interpret the analysis from mathematics, operations research or statistics models to draw meaningful conclusions about the systems being studied
7. Gain the ability to successfully communicate research ideas through writing and presentations
8. Gain the skills needed to successfully participate in research under the guidance of faculty

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Feb 1	GRE-General
	Spring	Nov 1	
	Summer	Jul 1	

Note: Assistantships are only available starting in the fall semester. Spring and summer semester admission deadlines are only for students not seeking an assistantship.

In addition to general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission: have completed an undergraduate degree with at least 30 credit hours of undergraduate-level mathematics, including calculus I and II, multivariate calculus, linear algebra, probability and statistics. Applicants also must have completed at least one upper-level mathematics class that includes mathematical reasoning, such as abstract algebra, combinatorics, graph theory, real analysis or topology.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the systems modeling and analysis Ph.D. program are required to earn a minimum of 57 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Qualifying exam: Students must pass a qualifying exam covering material from each of the first three core courses they take after admission to the program. Two attempts are allowed for each exam. This requirement must be fulfilled by the end of the semester following completion of 18 graduate credit hours. Students are exempt from a qualifying exam if they earned an A in the corresponding core course or if they took an equivalent course at another university, as determined by the Ph.D. steering committee.
3. Doctoral candidacy: Admission to candidacy is made by evaluation of a qualifying portfolio, including exams and project work from courses; writing samples from the research seminars (SYSM 681, SYSM 682 and SYSM 683); research products from systems research projects (SYSM 697); and statements from faculty advisers and instructors. The portfolio can be submitted after all course work has been completed, as well as any additional preparatory course work required at admission. The candidacy committee will evaluate the student's readiness to begin their dissertation work. Supplementary examination may be required by the committee.
4. Dissertation proposal: After admission to candidacy and the completion of all course work, the student will prepare a written and oral proposal of the intended dissertation research area, including a complete literature review. A successful proposal must be completed at least three months prior to the dissertation defense.
5. Dissertation defense: The student must complete 18 credit hours in SYSM 798 resulting in a publishable dissertation and a successful oral defense. The student also must have submitted at least one paper to a refereed academic journal and prepared a second manuscript or given a conference presentation on the research prior to the defense.

Curriculum requirements

Course	Title	Hours
Choose three from the following foundation courses:		9
MATH 535	Introduction to Dynamical Systems	
MATH 556	Graph Theory	
OPER 527	Optimization I

Program website: sysm.vcu.edu (<http://sysm.vcu.edu/>)

Department of Philosophy

Anthony Ellis

Professor and chair

philosophy.vcu.edu (<http://philosophy.vcu.edu/>)

Philosophy aims at a deeper understanding of matters that should most concern the human race. Philosophical questions crop up in science, religion, art, morality, politics, medicine and in everyday life. Students enrolled in philosophy are encouraged to think seriously about fundamental issues in all these domains and to formulate coherent and well-grounded points of view. Because of its extensive use of critical and analytical reasoning, philosophy equips students for careers in medicine, law, business and other fields that require careful thought and the clear expression of ideas.

The Department of Philosophy offers a Bachelor of Arts in Philosophy. The department offers courses for students in other programs, as well as for those majoring in philosophy or religious studies.

Department of Physics

Shiv Khanna, Ph.D.

Professor and chair

[physics.vcu.edu](http://www.physics.vcu.edu) (<http://www.physics.vcu.edu>)

The Department of Physics offers programs leading to the Bachelor of Science in Physics and the Master of Science in Physics and Applied Physics. The department also offers an accelerated B.S.-M.S. program that allows students in the baccalaureate program to take graduate

courses that will count toward the M.S. in Physics and Applied Physics degree.

- Physics and Applied Physics, Master of Science (M.S.) (p. 279)
- Physics and Applied Physics, Master of Science (M.S.), accelerated Bachelor of Science in Physics (B.S.) to master's (p. 281)

Physics and Applied Physics, Master of Science (M.S.)

Program goal

The Department of Physics teaches graduate students advanced concepts, applications and skills that reach to the frontiers of current research in physics. The master's program offers traditional core physics courses and a variety of specialized electives emphasizing the department's strengths in theoretical and experimental physics. Research interests include theoretical and experimental condensed matter physics, general relativity and cosmology.

Student learning outcomes

1. Students will achieve a broad knowledge of the principles of physics.
2. Students will demonstrate analytical problem-solving skills.
3. Students will demonstrate mastery of a topic at the frontier of physics research.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	May 1	GRE
	Spring	Dec 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Students must have a minimum of 30 credit hours in undergraduate physics or engineering, of which at least 18 credit hours must be at the upper-level in physics.
2. Students must present satisfactory GRE scores.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit toward the graduate degree.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students are required to earn a minimum of 30 graduate credit hours with at least 15 credit hours at the 600 level. PHYS 690 and PHYS 697 may not exceed 15 of the required 30 credit hours.
2. M.S. plan of study: Students will choose a primary adviser during the first semester of study. At the end of the first semester, the student and adviser will propose an M.S. plan of study to the physics graduate curriculum committee. This plan will include the graduate courses and research subject matter to fulfill the student's individual career goals. Normally, students will select courses for their individual M.S. plans of study from the list of graduate courses in physics. The courses selected will include no fewer than nine credits of traditional physics core courses, such as PHYS 576 and PHYS 580, to provide

a solid foundation in fundamental physics. However, students also may select graduate courses in chemistry, mathematics, computer science and engineering, as well as courses from the School of Medicine, when such courses are consistent with the student's career goals. The M.S. plan of study must be approved by the physics graduate curriculum committee. Courses taken outside this plan will not count toward the above general course requirements.

3. Thesis or non-thesis option: Each student must select either the thesis option or non-thesis option. Students selecting the thesis option must take at least nine credit hours of PHYS 697. No more than nine credit hours of directed research may be counted toward the 15 credit-hour, 600-level requirement. Students selecting the non-thesis option may take no more than three credit hours of PHYS 697. A student who elects the non-thesis option must pass a written comprehensive exam administered by the physics graduate curriculum committee.

Curriculum requirements

Thesis option

Course	Title	Hours
Core courses		
Select nine credits of the following:		9
NANO 570	Nanoscale Physics	
NANO 650	Experimental Techniques in Nanoscience I	
NANO 651	Experimental Techniques in Nanoscience II	
PHYS 571	Theoretical Mechanics	
PHYS 576	Electromagnetic Theory	
PHYS 580	Quantum Mechanics

Physics and Applied Physics, Master of Science (M.S.), accelerated Bachelor of Science in Physics (B.S.) to master's

Students who are enrolled in the B.S. in Physics program may elect to take graduate courses that will count toward the M.S. in Physics and Applied Physics degree. Up to six hours of graduate credit may be earned in this way without any special provision. In order to offer more than six hours of pre-admission graduate credit toward the graduate degree, a student must apply to the Department of Physics graduate admission committee for admission to the accelerated B.S.-M.S. program.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Persons applying for admission to this program should (1) submit a curricular plan for completing the bachelor's degree within two years or its part-time equivalent, (2) indicate which graduate courses they intend to offer toward the physics master's degree and (3) have a B average or better. The M.S. degree completion form must include a memo from the Department of Physics graduate admission committee to indicate which graduate courses were taken under the accelerated B.S.-M.S. program.

Department of Political Science

Jason Ross Arnold, Ph.D.

Associate professor and chair

politicalscience.vcu.edu (<http://politicalscience.vcu.edu/>)

Political science is the systematic study of institutions, behavior and ideas in order to further the understanding and explanation of

government and politics at the local, state, national and international levels. The discipline has a rich history that bridges the present with the past and future, is pluralistic in its modes of inquiry and adopts a critical approach that makes use of qualitative and quantitative analytic methods.

VCU's political science department uses its unique position on an urban campus — located in the state capital and just a short distance from Washington, D.C. — to provide students with transformative learning experiences promoting active and engaged citizenship, both domestically and globally. Faculty integrate their teaching with cutting-edge scholarship that advances the boundaries of the discipline and meaningfully impacts public debate and policy.

The department values diversity of thought and identity, inclusive pedagogy, informal mentorships, active citizenship and the free expression of ideas through innovative scholarship, teaching and community engagement. Faculty are dedicated to developing programs and a curriculum that prepare graduates to be informed and inquisitive citizens who are positioned to make a difference as professionals and lifelong learners.

These faculty members have expertise in a broad spectrum of subjects, including: international health; Russian politics; the intersections between politics and religion in both historical and contemporary contexts; Anglo-American political thought; feminist political theory; U.S. presidential decision-making for national security and foreign policy; information politics (e.g. government secrecy, mis/disinformation and public ignorance); national security intelligence; governance responses to human migration; global environmental politics; immigration; labor politics; Latin American politics; legislative behavior; partisan gerrymandering; campaign finance; political communication; political behavior; public opinion; international relations; local economic development in the US; public administration; constitutional law; European politics; political theory; comparative political development; African democratization; public administration; and public and nonprofit management.

Department of Psychology

Michael Southam-Gerow, Ph.D.

Professor and chair

Zewe Serpell, Ph.D.

Associate professor and director of graduate studies

Linda E. Zyzniewski, Ph.D.

Associate professor and director of undergraduate studies

Dorothy E. Fillmore

Director of academic operations

psychology.vcu.edu (<http://www.psychology.vcu.edu>)

In addition to the Bachelor of Science in Psychology, the Department of Psychology offers instruction in clinical, counseling, health and general psychology leading to the Doctor of Philosophy degree. Students in all doctoral degree programs are educated first as psychologists and then helped to develop competence in a more specialized area relevant to their scholarly and professional objectives. In addition, special training and experience in college teaching is available.

Admission requirements for doctoral programs

In addition to the general requirements for admission to the graduate programs in the Graduate School (in the Graduate study (p. 35) section of this bulletin), the following requirements represent the minimum acceptable standards for admission:

- Graduation with a bachelor's degree from an accredited college or university, but not necessarily with a major in psychology
- 18 semester hours of undergraduate course work in psychology (This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.)
- An undergraduate record indicating superior academic potential
- Satisfactory performance on the GRE
- Three letters of recommendation from previous instructors
- A personal interview may be required at the discretion of the department

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed. See the admission requirements summary tables to view admission deadlines for each of the Ph.D. programs: clinical psychology, counseling psychology, general psychology (biopsychology, developmental psychology, social psychology) and health psychology.

Applicants to the general psychology program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social).

Transfer credits for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements for doctoral programs

The following requirements are in addition to those described for the graduate programs in the Graduate School and the College of Humanities and Sciences section of this bulletin.

All students are required to complete a core curriculum of 15 credits (or its equivalent for students entering with a master's degree).

Students who receive grades of B or better in each of the department core courses are considered to have fulfilled the university requirements of a master's level comprehensive examination and will then officially be considered candidates for the Master of Science degree. Students who receive grades of C or lower in two or more department core courses will have failed the comprehensive examination and will be dismissed automatically from the program. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of

B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program.

Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee.

Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credits of psychology courses, constitutes automatic dismissal of a student from the program.

All students are required to complete a master's thesis and to defend it successfully in an oral examination. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee.

The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six semester credits in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.

Students are obligated to request, in writing from their program committees, continuation of study beyond the master's degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master's level will be evaluated by the appropriate program committee after completion of all requirements for the master's degree. The program committee reviews the student's request and approves or disapproves the request.

The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs.

With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major.

Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit will vary depending on the program. Internship will be one-half credit per semester.

A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 semester credits in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree.

Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology's graduate

student handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (<http://www.psychology.vcu.edu>).

- Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in behavioral medicine (p. 283)
- Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in clinical child (p. 286)
- Counseling Psychology, Doctor of Philosophy (Ph.D.) (p. 288)
- Health Psychology, Doctor of Philosophy (Ph.D.) (p. 291)
- Psychology, Doctor of Philosophy (Ph.D.) with a concentration in developmental psychology (p. 294)
- Psychology, Doctor of Philosophy (Ph.D.) with a concentration in social psychology (p. 297)

Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in behavioral medicine

Program accreditation

American Psychological Association

Program goal

The Doctor of Philosophy in Clinical Psychology offered by VCU is accredited by the American Psychological Association. The clinical psychology program at VCU is committed to excellence in scholarship and clinical training from the scientist-practitioner model. The doctoral program in clinical psychology is designed to require four to five years of academic work plus one additional year devoted to a full-time APA-accredited predoctoral internship placement. The first three years of graduate school residence concentrate on course work, thesis research and practicum experience, with the fourth and fifth year largely reserved for the completion of off-campus practicum experience and dissertation research. A student entering the program with a master's degree and extensive clinical experience may petition to reduce the practicum requirements by one year, resulting in three rather than four years of residency. All academic training occurs while the student is in residence at VCU.

The goal of the program is to train clinical psychologists in scientific principles and evidence-based theoretical models to guide the study and treatment of psychopathology for diverse groups of individuals. Accordingly, student learning outcomes include demonstrating competence in scientific research; the delivery of clinical services and related documentation; and cultural competence in science and practice. The clinical program is designed to provide students with foundational clinical and research competencies in two broad specialty areas: behavioral medicine and child and adolescent. The concentration in behavioral medicine emphasizes training in prevention, program development, consultation, empowerment and health promotion. The concentration in clinical child focuses on developmental psychopathology and treatment of underserved youth in schools and community settings. The program also has a strong focus on meeting the needs of underserved populations within these two broad specialty areas. The program prepares students for faculty, staff, administrative and practitioner positions in university departments of psychology, medical schools, community mental health centers, clinics, hospitals, prisons, state departments of mental health and private practice.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will demonstrate competence in scientific research.
2. Students will demonstrate competence in the delivery of clinical services and related documentation.
3. Students will demonstrate cultural competence in science and practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 1	GRE-General

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor's degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the clinical psychology Ph.D. program are required to earn a minimum of 87.5 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.

2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master's-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (14 credit hours) or its equivalent for students entering with a master's degree. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee. All students are required to complete a master's thesis and to defend it successfully in an oral examination. The successful proposal of the thesis will elevate the student to master's degree candidacy status. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.
4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master's degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master's level will be evaluated by the appropriate program committee after completion of all requirements for the master's degree. The program committee reviews the student's request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D.

degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology's Graduate Student Handbook, which is provided to each incoming graduate student. Clinical Psychology, Doctor of Philosophy (Ph.D.) with a concentration in clinical child

Program accreditation

American Psychological Association

Program goal

The Doctor of Philosophy in Clinical Psychology offered by VCU is accredited by the American Psychological Association. The clinical psychology program at VCU is committed to excellence in scholarship and clinical training from the scientist-practitioner model. The doctoral program in clinical psychology is designed to require four to five years of academic work plus one additional year devoted to a full-time APA-accredited predoctoral internship placement. The first three years of graduate school residence concentrate on course work, thesis research and practicum experience, with the fourth and fifth year largely reserved for the completion of off-campus practicum experience and dissertation research. A student entering the program with a master's degree and extensive clinical experience may petition to reduce the practicum requirements by one year, resulting in three rather than four years of residency. All academic training occurs while the student is in residence at VCU.

The goal of the program is to train clinical psychologists in scientific principles and evidence-based theoretical models to guide the study and treatment of psychopathology for diverse groups of individuals. Accordingly, student learning outcomes include demonstrating competence in scientific research; the delivery of clinical services and related documentation; and cultural competence in science and practice. The clinical program is designed to provide students

with foundational clinical and research competencies in two broad specialty areas: behavioral medicine and child and adolescent. The concentration in behavioral medicine emphasizes training in prevention, program development, consultation, empowerment and health promotion. The concentration in clinical child focuses on developmental psychopathology and treatment of underserved youth in schools and community settings. The program also has a strong focus on meeting the needs of underserved populations within these two broad specialty areas. The program prepares students for faculty, staff, administrative and practitioner positions in university departments of psychology, medical schools, community mental health centers, clinics, hospitals, prisons, state departments of mental health and private practice.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will demonstrate competence in scientific research.
2. Students will demonstrate competence in the delivery of clinical services and related documentation.
3. Students will demonstrate cultural competence in science and practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 1	GRE-General

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor's degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the clinical psychology Ph.D. program are required to earn a minimum of 87.5 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master's-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (14 credit hours) or its equivalent for students entering with a master's degree. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee. All students are required to complete a master's thesis and to defend it successfully in an oral examination. The successful proposal of the thesis will elevate the student to master's degree candidacy status. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.
4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master's degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master's level will be evaluated by the appropriate program committee after completion of all requirements for the master's degree. The program committee reviews the student's request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or

courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology's Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (<http://www.psychology.vcu.edu/>).

Counseling Psychology, Doctor of Philosophy (Ph.D.)

Program accreditation

American Psychological Association

Program goal

The Doctor of Philosophy in Counseling Psychology offered at VCU is accredited by the American Psychological Association [Commission on Accreditation, 750 First Street NE, Washington, DC 20002; phone: (202) 336-5979]. The program emphasizes the scientist-practitioner model and prepares students for research and service in professional psychology, including positions in university academic and medical school departments, counseling centers, mental health agencies and hospitals, physical health facilities, and other organizational settings.

The counseling psychology program emphasizes the enhancement of life skills and personal competence. Typical subspecializations include disease prevention and health promotion, career and life planning, work with medical populations, college students, community outreach, interpersonal processes, group counseling, marriage and family counseling, multiculturalism, and sport psychology.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will design, carry out and write publishable scientific research.
2. Students will demonstrate excellence in professional practice of health care psychology.
3. Students will demonstrate cultural sensitivity in research and practice.
4. Students will demonstrate competent integration of science and practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. Health Psychology, Doctor of Philosophy (Ph.D.)

Program goal

The Doctor of Philosophy in Health Psychology offered by VCU is an experimentally oriented program that is designed to train students to contribute to the knowledge of psychological contributions to health and illness via training in basic and clinical research. Students completing the Ph.D. in Health Psychology will not be eligible for licensure. Research in health psychology examines the causes and development of illness, methods to help individuals develop healthy lifestyles to promote good health and prevent illness, the treatment individuals receive for their medical problems, the effectiveness with which individuals cope with and reduce stress and pain, biopsychosocial connections with immune functioning, and factors in the recovery, rehabilitation and psychosocial adjustment of patients with serious health problems. Thus, graduates from the Ph.D. program in Health Psychology are prepared for work in a range of settings including colleges and universities, medical centers, research centers, nonprofit agencies and local, state and national government.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will demonstrate understanding of the models, theories and processes of health psychology.
2. Students will demonstrate knowledge of the biological, cognitive, attitudinal, social and cultural underpinnings of health.
3. Students will demonstrate knowledge of primary and secondary prevention of disease in a diverse range of communities and populations.
4. Students will produce a rigorously designed research project in the field of health psychology.
5. Students will adhere to the highest standards of ethics in their research, teaching and applied practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Feb. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the health psychology Ph.D. program are required to earn a minimum of 80 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master's-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master's degree. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee. All students are required to complete a master's thesis and to defend it successfully in an oral examination. The successful proposal of the thesis will elevate the student to master's degree candidacy status. Ideally the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.
4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master's degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master's level will be evaluated by the appropriate program committee after completion of all requirements for the master's degree. The program committee reviews the student's request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no

more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology's Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (<http://www.psychology.vcu.edu/>).

Psychology, Doctor of Philosophy (Ph.D.) with a concentration in developmental psychology

Program goal

The Doctor of Philosophy in Psychology offered by VCU prepares students for basic or applied research and includes three specialty areas: biopsychology, developmental psychology and social psychology. The concentration in developmental psychology trains students for work in either college or university academic departments or applied settings. Applied developmentalists work in a variety of settings and programs (violence prevention, community intervention, schools, family service agencies, nonprofit agencies, health care settings, disability agencies) with a variety of human populations (infants and young children, school-age children, adolescents, at-risk youth, incarcerated youth and adults, parents, older adults, persons with disabilities); they do not offer counseling/therapy services.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs,

including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will demonstrate their understanding of the models and theories of developmental psychology
2. Students will use scientifically sound methodologies in their research.
3. Students will adhere to the highest standards of ethics in their research, teaching and applied practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 1	GRE-General

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must have graduated with a bachelor's degree from an accredited college or university, but not necessarily with a major in psychology.
2. Applicants must present 18 semester hours of undergraduate course work in psychology. This is the minimal, but not optimal, number of hours for an applicant to be considered for admission. Included must be each of the following courses: general psychology, statistics and experimental psychology. Exceptionally well-qualified applicants with less than a major in psychology, or applicants whose undergraduate work is considered outdated by the admissions committee, may be advised to complete some additional undergraduate courses at the beginning of their graduate study program.
3. Applicants must present an undergraduate record indicating superior academic potential.
4. Students must show proof of satisfactory performance on the GRE.
5. Three letters of recommendation from previous instructors are required.
6. A personal interview may be required at the discretion of the department.

The number of students who can be admitted is limited by the facilities and staff available. All applicants will be notified of the decision made. The screening process may begin as early as Jan. 1. First offers of admission are made by April 1. By June 1, after other offers to alternates have been made and final acceptances by students have been received, admissions may be closed.

Applicants to the psychology doctoral program should specify to which of the three divisions they are applying (i.e., biopsychology, developmental or social).

Transfer credit hours for graduate work at other institutions will be evaluated after the completion of nine semester hours in the department.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the Ph.D. degree must be completed within eight years of the first enrollment.

1. Credit hour requirements: Students in the psychology Ph.D. program are required to earn a minimum of 72 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Grade requirement: Receipt of a grade of C or lower in two courses, or grades of C or lower in more than six credit hours of psychology courses, constitutes automatic dismissal of a student from the program.
3. Master's-level candidacy and requirements: All students in the Department of Psychology are required to complete a department core curriculum (13-15 credit hours) or its equivalent for students entering with a master's degree. Students who receive a grade of C or lower in one of the department core courses must either (a) satisfactorily complete a re-examination of the material covered in the course within one semester following the receipt of the grade (this re-examination is to be arranged and evaluated by the course instructor) or (b) repeat the course for credit the next time it is offered and receive a grade of B or better. Regardless of which of these approaches is chosen, the students will be given only one opportunity to demonstrate that they have mastered the course material. Students who either fail the re-examination or repeat the course and receive a grade of C or lower will have failed the comprehensive examination and will be dismissed from the program. Additional courses and training experiences will be determined in consultation with and subject to the approval of the student's faculty adviser and graduate program committee. All students are required to complete a master's thesis and to defend it successfully in an oral examination. The successful proposal of the thesis will elevate the student to master's degree candidacy status. Ideally, the thesis should be publishable as a piece of research and make a contribution to the field of psychology. Students who have previously completed a master's thesis in psychology at another university may have the thesis requirement waived if the thesis is accepted by their graduate program committee. The residence requirement for the master's degree is 18 hours, nine in each of two consecutive semesters. Completion of the degree usually requires four semesters. At least six credit hours in PSYC 798 must be completed, and no more than six can be counted toward the M.S. degree.
4. Doctoral candidacy and requirements: Students are obligated to request, in writing from their program committees, continuation of study beyond the master's degree and approval of their doctoral plan of study. Application from a student for continuation beyond the master's level will be evaluated by the appropriate program committee after completion of all requirements for the master's degree. The program committee reviews the student's request and approves or disapproves the request. The student must pass a written preliminary examination to become a doctoral candidate. Students are required to complete this requirement prior to defense of their dissertations and prior to leaving on internship for students in the clinical and counseling psychology programs. With the consent of the program committee, doctoral students may design a minor consisting of courses in departments other than psychology or courses in an area of psychology other than the major. Both the clinical and counseling psychology programs require completion of applied practica and a one-year predoctoral internship approved by the program committee. Research practica are required by all programs. Practicum credit hours will vary depending on the program. Internship will be one-half credit hour per semester. A dissertation requiring the planning, completion and oral defense of an original research project is an integral part of the doctoral program. At least 12 credit hours in PSYC 898 must be completed, and no

more than 12 can be counted toward the Ph.D. degree. Completion of the entire program usually requires four to six years (including the internship year for students in the clinical and counseling programs). Candidates must complete all requirements for the Ph.D. degree within an eight-year period from the date of admission to the graduate program unless permission is granted for an extension. In some cases, specific programs and divisions may have requirements in addition to those stated here.

A more detailed description of the requirements for each of the graduate programs is included in the Department of Psychology's Graduate Student Handbook, which is provided to each incoming graduate student. Visit the website for more information: psychology.vcu.edu (<http://www.psychology.vcu.edu/>).

Psychology, Doctor of Philosophy (Ph.D.) with a concentration in social psychology

Program goal

The Doctor of Philosophy in Psychology offered by VCU prepares students for basic or applied research and includes three specialty areas: biopsychology, developmental psychology and social psychology. The concentration in developmental psychology trains students for

work in either college or university academic departments or applied settings. Applied developmentalists work in a variety of settings and programs (violence prevention, community intervention, schools, family service agencies, nonprofit agencies, health care settings, disability agencies) with a variety of human populations (infants and young children, school-age children, adolescents, at-risk youth, incarcerated youth and adults, parents, older adults, persons with disabilities); they do not offer counseling/therapy services.

The Center for Psychological Services and Development, a campus-based community service agency operated by the department, provides training opportunities for graduate students in all departmental programs, including practicum and research training for graduate students in the clinical psychology program. A wide variety of other on- and off-campus practicum placements also are available.

The department maintains laboratory facilities for research in the areas of behavioral assessment, behavioral medicine, developmental, learning, behavioral pharmacology, psychophysiology, psychotherapy process, social perception, social influence and group dynamics. Opportunities for field research also are available in a variety of settings.

Student learning outcomes

1. Students will demonstrate mastery of basic principles, theories and findings in the field of social psychology.
2. Students will produce a rigorously designed research project in the field of social psychology.
3. Students will write a paper based on a research project that is of publishable quality.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

PSYC 631	Evaluation Research: Psychological Perspectives	
PSYC 688	The Self and Identity	
PSYC 691	Special Topics ((interpersonal processes, social influence, social and developmental practicum, positive psychology)	
Recommended concentration electives		
Select nine to 10 credit hours from the following:		9-10
HGEN 620	Principles of Human Behavioral Genetics	
PSYC/GRTY 602	Psychology of Aging	
PSYC 603	Developmental Processes	
PSYC 604	Social Psychology of Business and Industry	
PSYC 605	Social Development	
PSYC 613	Cognitive Development	
PSYC 631	Evaluation Research: Psychological Perspectives	
PSYC 633	Group Dynamics	
PSYC 659	Seminar in Consultation Psychology	
PSYC 660	Health Psychology	
PSYC 668	Interpersonal Psychotherapy: Social Psychological Analysis	
PSYC 671	Readings and Research	
PSYC 688	The Self and Identity	
PSYC 690	Research Practicum	
PSYC 691	Special Topics	
PSYC 700	Grant Writing	
PSYC/MGMT 702	Causal Analysis for Organizational Studies	
PSYC 795	Practicum in the Teaching of College Psychology	
SBHD 610	Behavioral Measurement	
STAT 643	Applied Linear Regression	
STAT 744	Regression II	
Thesis/dissertation		
PSYC 798	M.S. Thesis ¹	6
PSYC 898	Doctoral Dissertation	12
Total Hours		72

¹

Required course for M.S. degree (40 credit hours minimum)

The minimum total of graduate credit hours required for this degree is 72.

Department of Sociology

Jennifer Johnson, Ph.D.

Associate professor and chair

[sociology.vcu.edu](http://www.sociology.vcu.edu) (<http://www.sociology.vcu.edu>)

The sociology department at VCU provides an engaged, learner-centered experience for our undergraduate and graduate students through active involvement in faculty research and community development. Through cutting-edge research, excellent undergraduate and graduate teaching focused on critical thinking, exciting applied opportunities, vital service and community outreach both nationally and internationally, and preparation of students for a wide range of jobs, sociology plays a central role in quality liberal arts education. Sociology is a “social science”; it is a discipline grounded in using sociological theory and the scientific method to create the knowledge necessary for understanding and improving social life. Using theory as a foundation for analysis, sociologists collect and analyze empirical data useful in making decisions related to public life, such as social and economic policy, and private life, such as family and interpersonal health. It is this relationship between sociological theory, as the foundation of critical thinking, and the scientific method, as the guiding principles of analysis, which makes sociology a rapidly expanding field with expertise increasingly sought after by those who craft policies and create programs.

The Department of Sociology offers a Bachelor of Science in Sociology at the undergraduate level, as well as a Master of Science at the graduate level.

Sociology, Master of Science (M.S.)

Program goals

The goal of the graduate program in sociology is to facilitate the development of theoretical, methodological and substantive competence appropriate for students’ interests and career goals. In keeping with VCU’s role as an urban institution, the program focuses on the study of public sociology, inequality, social problems, policy alternatives and strategies for change. In addition to its program on the VCU campus, the department offers an online concentration in digital sociology.

Student learning outcomes

1. Students will demonstrate a mastery of the key concepts, including diversity and inequality, developed by classical and modern sociological theorists.
2. Students will organize and integrate information into a cohesive overview of current knowledge; demonstrate the ability to critically evaluate the meaning, value and contribution of published literature in the field.
3. Students will demonstrate the ability to design and implement an appropriate collection and analysis of data, which is a critical response to theory and current literature in the field of sociology.
4. Students will demonstrate the ability to draw reasoned conclusions based on qualitative and/or quantitative evidence relevant to the discipline of sociology.

5. Students will demonstrate the ability to present their work as a cohesive artifact to their relevant publics.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE-General

Note: A limited number of assistantships are available for qualified applicants. Applicants for assistantships should have their files complete by April 1. Individuals not applying for assistantships should file their applications for graduate study as early as possible to permit adequate review.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

Preference is given to students who have a substantial background in sociology, such as an undergraduate major or minor or 18 or more college-level credit hours in sociology. Students with an undergraduate or graduate degree in a closely related field will also receive consideration for admission.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the following requirements apply:

1. Credit hour requirements: Students in the M.S. in Sociology program are required to earn a minimum of 36 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Transfer credits: A maximum of six credit hours of elective credit taken at another university or in another department can be applied to the M.S. in Sociology. The courses applied to the degree should be relevant to the student's primary area of study and get prior approval from the graduate program director.
3. Other requirements: The sociology master's degree may be pursued either on the VCU campus or online. Students who wish to complete the M.S. degree online should consult the digital sociology concentration area page for more information.

Curriculum requirements

Course	Title	Hours
Required core courses		
SOCY 502	Contemporary Sociological Theory	3
SOCY/STAT 508	Introduction to Social Statistics	3
SOCY 601	Sociological Research Methods	3
SOCY 602	Applications of Sociological Research Methods	3
SOCY 699	Seminar in Sociological Practice (course may be repeated; six credits required for degree) ¹	6
Electives		
A maximum of six credits from outside the sociology department and a maximum of three credits of SOCY 692 may be presented toward the degree with the prior approval of the graduate program director.		18
Total Hours		36

1

A maximum of six credits of SOCY 699 may be presented toward the degree.

The minimum total of graduate credit hours required for this degree is 36.

Sociology, Master of Science (M.S.) with a concentration in digital sociology

Program goals

The purpose of the M.S. in Sociology with a concentration in digital sociology is to teach students to analyze digitally native data through the lens of social justice. The program aims to prepare graduates to shape emerging local, national and global conversations about big data, privacy, algorithms, inequality and social movements. The sociology department believes in the importance of developing new ways of doing sociology that are both public and critical. The program brings together a cross-disciplinary course sequence in methods, theory, big data analysis, data visualization, social network analysis, digital sociology, public sociology and digital social problems, culminating in two practicums. Students create meaningful projects from the beginning of the program, building a digital portfolio exhibiting their proficiency in applying sociological theory, methodology and critical analysis skills to the digital world.

Learning outcomes

1. Students will demonstrate a mastery of the key concepts, including diversity and inequality, developed by classical and modern sociological theorists.
2. Students will organize and integrate information into a cohesive overview of current knowledge and demonstrate the ability to critically evaluate the meaning, value and contribution of published literature in the field.
3. Students will demonstrate the ability to design and implement an appropriate collection and analysis of data, which is a critical response to theory and current literature in the field of sociology.
4. Students will demonstrate the ability to draw reasoned conclusions based on qualitative and/or quantitative evidence relevant to the discipline of sociology.
5. Students will demonstrate the ability to present their work as a cohesive artifact to their relevant publics.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate**

School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GRE General

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>), the following requirements represent the minimum acceptable standards for admission.

Preference is given to students who have a substantial background in sociology, such as an undergraduate major or minor or 18 or more college-level credit hours in sociology. Students with an undergraduate or graduate degree in a closely related field will also receive consideration for admission.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the following requirements apply:

1. Credit hour requirements: Students in the M.S. in Sociology program are required to earn a minimum of 36 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Other requirements: Students in the online digital sociology concentration area typically fulfill the M.S. program requirements through the completion of two three-credit practicum projects in SOCY 699. These projects should demonstrate their theoretical and methodological mastery of the subject area. Full-time students should take the practicum requirement during the fall and spring semesters of their second year in the program. The final product is a research project that contributes to the student's goals and meets the standards for publication in the sociology department's online journal. Practicum projects must relate to at least three of the four substantive areas in the concentration: professional digital practice, sociological analysis of digital use, digital data analysis and critical digital sociology.

Total Hours		36

The minimum total of graduate credit hours required for this degree is 36.

Graduate program director

Tara M. Stamm, Ph.D.
Email: tmstamm@vcu.edu
Phone: (804) 828-9432

Program website: sociology.vcu.edu (<http://www.sociology.vcu.edu>)

Sociology, Master of Science (M.S.), accelerated Bachelor of Science in Sociology (B.S.) to master's

The accelerated B.S. and M.S. program allows qualified students, with a major in sociology, to earn both degrees in a minimum of five years by completing approved graduate courses during the senior year of the undergraduate program. The program will provide students with the opportunity to expand and deepen their knowledge of sociology, enhance their credentials for the job market, and/or prepare for further professional education. Students in the program may count up to 12 hours of graduate courses toward both the B.S. and M.S. degrees. Thus,

the two degrees may be earned with a minimum of 144 hours instead of the 156 required if the degrees are pursued separately.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

The program is restricted to students who have demonstrated a clear interest in sociology. Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours with an overall GPA of 3.0, and a minimum of nine credit hours in sociology with a GPA of 3.3. Prior to being formally considered for admittance and before enrolling in graduate courses, the student must complete the graduate school application, submit GRE general aptitude scores and supply supporting information required for admission. All persons admitted to the program must meet the graduate student standards of performance, e.g., maintain a 3.0 GPA, and satisfactorily complete all requirements for the degree.

The director of graduate studies will provide guidance to students in this program. Students who are interested in this program should consult with the director of graduate studies or the director of undergraduate studies before they have completed 90 credits. Both directors may be contacted for more information about admission procedures.

Requirements for the Bachelor of Science in Sociology include the completion of a minimum of 120 credits. Students in the accelerated program may take up to six graduate sociology credits in each of the final two semesters of their undergraduate course work. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements. A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree.

The B.S. degree will be awarded when the student has completed all requirements for the undergraduate degree, which may include the 12 graduate sociology credits. The graduate sociology courses that may be taken, once a student is admitted to the program, include:

Course	Title	Hours
SOCY 502	Contemporary Sociological Theory	3
SOCY/STAT 508	Introduction to Social Statistics	3
SOCY 601	Sociological Research Methods	3
SOCY/STAT 608	Statistics for Social Research	3

Other SOCY graduate courses, with the approval of the director of graduate studies

Such courses may serve as an elective requirement for the M.S. degree and an elective for the undergraduate major. All accelerated program students must have their schedules approved by the director of graduate studies prior to registration.

Applied Social Research, Certificate in (Post-baccalaureate graduate certificate)

Program goal

This certificate program is designed to enable practitioners to acquire additional knowledge and skills in applied social research without necessarily pursuing a graduate degree and provide marketable job/career skills for graduate degree-seeking students in sociology as well as other graduate programs. Because the certificate program involves a limited number of credit hours and coordinates with the type of statistics and methods courses offered in a number of graduate degree programs, it may be pursued simultaneously with other graduate programs such as sociology, social work, public administration, social policy and urban services. At the same time, individuals seeking more limited, specialized training may pursue the certificate independently.

Student learning outcomes

1. Students will demonstrate knowledge of applied social research methodology.
2. Students will demonstrate the ability to produce data-based social scientific research reports for relevant audiences.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the [academic regulations section](#) for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section](#) for additional information on graduation requirements.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 1	

Note: Students may not be able to enroll full time or complete the certificate in one year given the limits on course scheduling.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Students possessing a B.A. or B.S. degree and beginning level skills in statistics/research methods are eligible for admission into the certificate program.
2. Relevant course or research experience will be considered in evaluating admission and substitution of courses. Equivalency tests are available for required courses in statistics and methods.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students in the applied social research certificate program are required to earn a minimum of 18 graduate-level credit hours beyond the baccalaureate.
2. Grade requirements: An overall GPA of 3.0 is required for award of the certificate, and no more than three credit hours of C may be earned in the certificate program curriculum.

Curriculum requirements

Course	Title	Hours
Required courses		
SOCY 601	Sociological Research Methods	3
SOCY 602	Applications of Sociological Research Methods	3
SOCY/STAT 608	Statistics for Social Research	3
SOCY 699	Seminar in Sociological Practice	3
Electives		
		6

Students select six credits of electives, as approved by the sociology department's graduate program director prior to registration; the courses shown below are recommended electives and may be taken without the approval of the sociology graduate program director.

PADM 625	Public Policy Analysis
PADM 627	Workshop in Policy Analysis and Evaluation
PSYC 631	Evaluation Research: Psychological Perspectives
PSYC 643	Principles of Psychological Measurement
SBHD 637	Program Evaluation
SBHD 638	Applications in Qualitative Research Methods
SOCY 603	Seminar in Population Studies
SOCY/PADM 605	Survey Research Methods
SOCY 656	Social Network Analysis
SOCY 676	Digital Data for the Social Sciences
SOCY 691	Special Topics (Data Visualization)
URSP 621	Introduction to Geographic Information Systems
URSP 622	Community Socioeconomic Analysis Using GIS
Total Hours	18

The minimum total of graduate credit hours required for this certificate is 18.

Department of Statistical Sciences and Operations Research

D'Arcy P. Mays III, Ph.D.

Associate professor and chair

ssor.vcu.edu (<https://ssor.vcu.edu/>)

The Department of Statistical Sciences and Operations Research offers programs leading to a Bachelor of Science in Mathematical Sciences, a Master of Science in Mathematical Sciences with a concentration in either operations research or statistics and a Doctor of Philosophy in Systems Modeling and Analysis. The curriculum of the programs is run jointly with the Department of Mathematics and Applied Mathematics (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/departments/mathematicsandappliedmathematics/>).

The department also offers a post-baccalaureate undergraduate certificate in statistics.

- Mathematical Sciences, Master of Science (M.S.) with a concentration in operations research (p. 305)
- Mathematical Sciences, Master of Science (M.S.) with a concentration in statistics

- Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) (p. 277)
- Applied Statistics, Certificate in (Graduate certificate) (p. 311)

Mathematical Sciences, Master of Science (M.S.) with a concentration in operations research

Program goal

The Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research jointly offer the M.S. in Mathematical Sciences.

The mission of the Department of Statistical Sciences and Operations Research is to offer a strong undergraduate and graduate education, with an increasing focus on the development of cross-disciplinary efforts that will prepare students for real-world applications and stimulating employment and career opportunities.

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. Students may obtain a designation on their transcripts indicating that their graduate study has emphasized the mathematics concentration by completing the requirements that are listed here. A student who has not satisfied the requirements for one of the program concentrations offered, but who has otherwise fulfilled all the requirements for a master's degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

Student learning outcomes

- Theory and application of mathematical programming**
Students will demonstrate a solid foundation in the theory and application of mathematical programming and a comprehensive understanding of basic mathematical programming methods.
- Theory and application of stochastic models**
Students will demonstrate a comprehensive understanding of the theory and application of stochastic models and decision analysis.
- Obtain, analyze and interpret data**
Students will be able to obtain, analyze and interpret the data necessary to perform operations research projects.
- Use of software commonly used in industry**
Students will be able to solve a wide variety of operations research problems employing the software commonly used in industry.
- Modeling of operations research problems**
Students will identify and model situations in which operations research can be applied.
- Mathematical knowledge**
Students will demonstrate proficiency in the mathematics required to perform operations research methods.
- Written communication of technical information**
Students will clearly and concisely present technical information in writing.
- Oral communication of technical information**
Students will clearly and concisely present technical information through oral presentations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 1	GRE-General
	Spring	Oct 1	TOEFL (International students only)

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
- Three letters of recommendation pertaining to the student's potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master's degree.

Degree requirements

In addition to the VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>), students are required to complete course work in core and elective courses and to meet the following requirements.

- Credit hour requirements:** Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
- Other requirements:** All students must pass two comprehensive examinations: foundations of operations research, covering OPER 527 and OPER 528 and methods of operations research, covering OPER 639, OPER 643 and STAT 613. All students will be given two attempts to pass each exam. Students who receive a minimum grade of B on both OPER 527 and OPER 528 and a grade of A on at least one of the two courses will not need to take the foundations of operations research exam. Students who receive a minimum grade of B on each of OPER 639, OPER 643 and STAT 613 and a grade of A on at least one of the three courses will not need to take the methods of operations research exam.

Curriculum requirements

Course	Title	Hours
Concentration core courses		
OPER 527	Optimization I ¹	3
OPER 528	Stochastic Simulation ¹	3
OPER 639	Practical Optimization	3
OPER 643	Decision and Risk Analysis	3
SSOR 690	Research and Communications Seminar	3
STAT 613	Stochastic Processes	3
Additional courses		

Operations research electives (Choose courses from list one below)	6
Operations research and allied field electives (Choose courses from list two below)	6
Total Hours	30

¹

If a student previously received credit hours for OPER 527 and/or OPER 528 or their equivalents, then one or two other operations research courses must be taken in their place.

The minimum total of graduate credit hours required for this degree is 30.

List one: Recommended electives in operations research

Course	Title	Hours
OPER 627	Optimization II	3
OPER 635	Network Models and Graph Theory	3
OPER/STAT 636	Machine Learning Algorithms	3
OPER 641	Stochastic Simulation and Monte Carlo Methods	3
OPER 645	Queuing Theory	3
OPER 647	Multiobjective Decision Analysis	3
OPER 648	Systems Reliability Analysis	3
OPER 649	Statistical Quality Control	3
OPER 691	Special Topics in Operations Research	1-3
OPER 696	Applied Project	1-3
OPER 697	Directed Research	1-3
OPER 698	Thesis	1-3
OPER 731	Discrete Optimization	3
OPER 732	Optimization Under Uncertainty	3
OPER/STAT 736	Mathematics of Knowledge and Search Engines	3
OPER 741	Advanced Stochastic Simulation	3

Mathematical Sciences, Master of Science (M.S.) with a concentration in statistics

Program goal

The Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research jointly offer the M.S. in Mathematical Sciences.

The mission of the Department of Statistical Sciences and Operations Research is to offer a strong undergraduate and graduate education, with an increasing focus on the development of cross-disciplinary efforts that will prepare students for real-world applications and stimulating employment and career opportunities.

The program offers maximum flexibility by allowing students, in consultation with their graduate committees, to design a course of study that will best develop competence in those areas most relevant to their scholarly and professional objectives. Students may obtain a designation on their transcripts indicating that their graduate study has emphasized the mathematics concentration by completing the requirements that are listed here. A student who has not satisfied the requirements for one of the program concentrations offered, but who has otherwise fulfilled all the requirements for a master's degree, will be awarded a degree of Master of Science in Mathematical Sciences without any specialization.

Student learning outcomes

1. Students will demonstrate a comprehensive understanding of basic statistical concepts, probability and inference, general linear modeling, calculus, and linear algebra.
2. Students will know how to select appropriate samples and conduct appropriate experimental data collection methods.
3. Students will be able to perform appropriate analysis of data, including knowledge of the assumptions associated with the procedures and how to determine the appropriate procedure to use.
4. Students will be able to use statistical software packages to solve various problems.
5. Students will know how to clearly and concisely present technical information in writing and through oral presentations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Mar 1	GRE-General
	Spring	Oct 1	TOEFL (International students only)

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- Thirty credit hours in undergraduate mathematical sciences, computer science or related areas of which at least 18 credit hours must represent upper-level courses
- Three letters of recommendation pertaining to the student's potential ability as a graduate student in mathematical sciences

Provisional admission may be granted when deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are remedial or designed to remove deficiencies will not be accepted for credit hours toward the fulfillment of the course requirements for the master's degree.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to meet the following requirements.

- Credit hour requirements: Students in the M.S. in Mathematical Sciences program are required to earn a minimum of 30 graduate-level credit hours. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
- Other requirements: All students must pass two comprehensive examinations: statistical theory (covering STAT 513 and STAT 514) and statistical application (covering STAT 546, STAT 642 and STAT 643). All students will be given two attempts to pass each exam.

Curriculum requirements

Course	Title	Hours
Concentration core courses		
SSOR 690	Research and Communications Seminar	3
STAT/BIOS 513	Mathematical Statistics I ¹	3
STAT/BIOS 514	Mathematical Statistics II ¹	3
STAT 546	Linear Models	3
STAT 642	Design and Analysis of Experiments I	3
STAT 643	Applied Linear Regression	3
Additional courses		
Statistics electives (Choose courses from list one below.)		6
Statistics and allied fields electives (Choose courses from list two below.)		6
Total Hours		30

If student previously received credit for STAT 513/BIOS 513 and/or STAT 514/BIOS 514 or their equivalents, then one or two other statistics courses must be taken in their place.

The minimum total of graduate credit hours required for this degree is 30.

List one: recommended electives in statistics

Course	Title	Hours
500-, 600- or 700-level STAT courses, except the following:		
STAT 508	Introduction to Social Statistics	
STAT 543	Statistical Methods I	
STAT 544	Statistical Methods II	
STAT 608	Statistics for Social Research	

List two: recommended electives in statistics and allied fields

Course	Title	Hours
500-, 600- or 700-level MATH, OPER, STAT or SYSM courses, except the following:

Systems Modeling and Analysis, Doctor of Philosophy (Ph.D.) [Statistical Sciences and Operations Research]

Program goal

The Ph.D. in Systems Modeling and Analysis is offered jointly by the Department of Statistical Sciences and Operations Research and the Department of Mathematics and Applied Mathematics. The program focuses on the development of the mathematical and computational skills used to conceptualize and analyze real-world systems. Faculty and students will engage and collaborate to contribute to the knowledge base used in the fields of science, medicine, business and engineering. The continued development of applied mathematics, discrete mathematics, operations research and statistics is critical to scientific advancement in the 21st century. The curriculum enables students to expand the frontiers of knowledge through original, relevant research involving quantitative and qualitative complex systems derived from real, contemporary problems facing our world.

Student learning outcomes

1. Gain a solid foundation in the theory and application of optimization, stochastic processes, simulation, decision analysis and biomathematics, and demonstrate a comprehensive understanding of these concepts
2. Learn to perform appropriate collection, modeling and analysis of data using statistical methods
3. Demonstrate the ability to identify situations in which mathematics, operations research or statistics can be applied and model the situation
4. Demonstrate the ability to solve a wide variety of mathematics, operations research or statistics problems using the software commonly used in industry
5. Demonstrate the ability to write code using appropriate research programming environments to implement research ideas
6. Learn how to interpret the analysis from mathematics, operations research or statistics models to draw meaningful conclusions about the systems being studied
7. Gain the ability to successfully communicate research ideas through writing and presentations
8. Gain the skills needed to successfully participate in research under the guidance of faculty

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Feb 1	GRE-General
	Spring	Nov 1	
	Summer	Jul 1	

Note: Assistantships are only available starting in the fall semester. Spring and summer semester admission deadlines are only for students not seeking an assistantship.

In addition to general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission: have completed an undergraduate degree with at least 30 credit hours of undergraduate-level mathematics, including calculus I and II, multivariate calculus, linear algebra, probability and statistics. Applicants also must have completed at least one upper-level mathematics class that includes mathematical reasoning, such as abstract algebra, combinatorics, graph theory, real analysis or topology.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the systems modeling and analysis Ph.D. program are required to earn a minimum of 57 graduate-level credit hours beyond the baccalaureate. At least one-half of the credit hours presented for graduation must be at the 600 level or higher.
2. Qualifying exam: Students must pass a qualifying exam covering material from each of the first three core courses they take after admission to the program. Two attempts are allowed for each exam. This requirement must be fulfilled by the end of the semester following completion of 18 graduate credit hours. Students are exempt from a qualifying exam if they earned an A in the corresponding core course or if they took an equivalent course at another university, as determined by the Ph.D. steering committee.
3. Doctoral candidacy: Admission to candidacy is made by evaluation of a qualifying portfolio, including exams and project work from courses; writing samples from the research seminars (SYSM 681, SYSM 682 and SYSM 683); research products from systems research projects (SYSM 697); and statements from faculty advisers and instructors. The portfolio can be submitted after all course work has been completed, as well as any additional preparatory course work required at admission. The candidacy committee will evaluate the student's readiness to begin their dissertation work. Supplementary examination may be required by the committee.
4. Dissertation proposal: After admission to candidacy and the completion of all course work, the student will prepare a written and oral proposal of the intended dissertation research area, including a complete literature review. A successful proposal must be completed at least three months prior to the dissertation defense.
5. Dissertation defense: The student must complete 18 credit hours in SYSM 798 resulting in a publishable dissertation and a successful oral defense. The student also must have submitted at least one paper to a refereed academic journal and prepared a second manuscript or given a conference presentation on the research prior to the defense.

Curriculum requirements

Course	Title	Hours
Choose three from the following foundation courses:		9
MATH 535	Introduction to Dynamical Systems	
MATH 556	Graph Theory	
OPER 527	Optimization I	
STAT 513	Mathematical Statistics I	
SYSM 681	Systems Seminar I	1
SYSM 682	Systems Seminar II	1

Program website: sysm.vcu.edu (<http://sysm.vcu.edu/>)

Applied Statistics, Certificate in (Graduate certificate)

The Certificate in Applied Statistics will train students on the assumptions associated with applied statistics procedures and prepare them to apply the procedures to real data. Students will learn statistical packages that allow them to perform the procedures and learn the proper interpretation of the results. Graduates will be able to apply the procedures in many high-demand areas, including industry, government and professional/financial businesses.

The graduate certificate is appropriate for working professionals in government agencies and the financial sector who want to advance their careers by acquiring new skills and learning new topics in applied statistics. Individuals who are considering a graduate degree in statistics may also be interested, as all courses in this program would transfer to an M.S. within the statistics department.

Full-time students can complete the certificate in one year (two semesters) with a course load of six credits each in a fall and spring semester. Part-time students can complete the certificate in two years (four semesters) with a three-credit load each semester.

Student learning outcomes

1. Students will demonstrate a comprehensive understanding of basic statistical concepts and general linear modeling.
2. Students will know how to select appropriate samples and conduct appropriate experimental data collection methods.

3. Students will be able to perform appropriate analysis of data, including knowledge of the assumptions associated with the procedures and how to determine the appropriate procedure to use.
4. Students will be able to use statistical software packages to solve various problems.
5. Students will know how to clearly and concisely present technical information in writing.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Mar 1	

The admission requirements outlined below will apply to all students. All applicants to the graduate certificate programs are required to meet the admission requirements of the VCU Graduate School (p. 35). Applicants will be required to submit the following materials to the Graduate School admissions office:

- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official undergraduate transcripts from all schools attended
- A statement of purpose outlining career goals
- A resume stating relevant work experience.

The Department of Statistical Sciences and Operations Research requires that students demonstrate the following:

- Have earned an undergraduate degree in an area related to applied mathematics, or in another discipline that requires mathematics through calculus and linear algebra and statistics
- Have computing/technology skills that would allow the student to learn and use several statistical software packages

A maximum of three equivalent, graduate-level transfer credit hours at the 500-level or higher may count toward the certificate. The transfer credits are evaluated on a case-by-case basis to determine course equivalency.

Credits from a degree already awarded cannot be applied toward the certificate.

International students will submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program.

Non-native English speakers will provide evidence of proficiency in English by one of the following:

- A Test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or 600 for the paper-based score
- An International English Language Testing Systems minimum score of 6.5 on the academic exam
- A passing score on the VCU English Language Program compression test

The curriculum will prepare students to work with data from a variety of disciplines and perform appropriate procedures to best analyze the data. The curriculum focuses on the assumptions associated with applied statistics procedures and how to verify the assumptions, and it emphasizes appropriate statistical software packages for data analysis and the current workplace technologies for statistical applications.

Curriculum requirements

Course	Title	Hours
STAT 636	Machine Learning Algorithms	3
STAT 641	Applied Data Analysis	3
STAT 642	Design and Analysis of Experiments I	3

STAT 643	Applied Linear Regression	3

SCHOOL OF THE ARTS

The School of the Arts offers 25 degree programs and comprises more than 3,000 students. With the inclusion of our campus in Qatar come an additional four programs. It all began as one night class taught by Theresa Pollak in the fall of 1928.

The school strives to be a stimulating community of students and teachers who cross the boundaries of conventional art and design disciplines, apply aesthetic and intellectual vision to the expression of complex ideas, value artistic tradition and experimentation in the search for creative solutions, connect international experience with professional education, integrate technical skills with theoretical understanding and care about the impact of their work on people.

- National Council for Accreditation National Association of Schools of Music, for Teacher Education, Virginia Department of Education

Theatre (bachelor's and master's degrees)

National Association for Schools of Theatre

Programs

The School of the Arts offers degrees in the following areas of study:

Advanced Media Production Technology

- Post-baccalaureate undergraduate certificate

Art Education

- Master of Art Education

Art History

- Bachelor of Arts
- Master of Arts
- Doctor of Philosophy

Arts

- Bachelor of Fine Arts with a concentration in art education

Cinema

- Bachelor of Arts

Communication Arts

- Bachelor of Fine Arts

Craft and Material Studies

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Dance and Choreography

- Bachelor of Fine Arts

Design

- Master of Fine Arts (with concentrations in design studies [at VCUQ], interior environments and visual communications)

Fashion

- Bachelor of Arts
- Bachelor of Fine Arts

Fine Arts

- Master of Fine Arts (with concentrations in ceramics, fibers, furniture design, glassworking and jewelry/metalworking; kinetic imaging; painting or printmaking; photography and film; sculpture)

Graphic Design

- Bachelor of Fine Arts

Interior Design

- Bachelor of Fine Arts

Kinetic Imaging

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Music

- Bachelor of Arts
- Bachelor of Music
- Master of Music

Painting and Printmaking

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Photography and Film

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Sculpture

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Theatre

- Bachelor of Arts
- Bachelor of Fine Arts
- Master of Fine Arts

School of the Arts Visual Resource Center

VCU's Cabell Library houses an extensive collection of books, publications and magazines on the visual and performing arts. VCU subscribes to ARTstor, the largest online image bank for the arts.

VCU is a short distance from Washington, D.C., Baltimore, Philadelphia and New York and the museums, libraries and research facilities in those urban areas.

Graduate information

Graduate admission

Admission procedures

Application forms and instructions for applying to all graduate programs in the School of the Arts are available on the School of the Arts website (<http://arts.vcu.edu/>).

General information about admission to graduate study and application procedures can be found in the Graduate School section of this bulletin or on the Graduate School website (<http://www.graduate.vcu.edu>).

Admission requirements

For Ph.D. degree, see Ph.D. in Art History section.

For all other degrees (M.A., M.A.E., M.F.A. and M.M.):

- Applicants should hold the baccalaureate degree from an accredited institution.
- It is expected that applicants will have a 3.0 (B) average on the last 60 semester hours of undergraduate work.

The prospective student should consult the appropriate section of this bulletin for additional admission requirements for a particular degree program. Such requirements include:

- The Graduate Record Examination for applicants to art history
- An audition and examination for music applicants, as described in the program description for the M.M. degree
- An audition or presentation of portfolio, as well as a personal interview, for applicants for the M.F.A. in Theatre
- A portfolio review for all applicants to the visual arts M.F.A. degrees (a personal interview is encouraged)

Graduate student status

The School of the Arts has two categories of graduate students — full-time or part-time. Full- or part-time graduate students are accepted either provisionally or as students with full standing into the graduate degree programs of the various departmental areas. These students may matriculate full time or part time except for the residence limitation discussed elsewhere in this bulletin.

Most graduate programs in the school require full-time status, including the concentrations in the Master of Fine Arts in Fine Arts degree (photography and film, painting and printmaking, sculpture, kinetic imaging, and ceramics, fibers, furniture design, glassworking and jewelry/metalworking) and the visual communication track of the M.F.A. in Design. Check with the individual departments to confirm whether full-time status is required or part-time status is permitted.

Holders of the baccalaureate degree from recognized institutions may enroll in graduate courses as nondegree-seeking (special) graduate students, but such courses are not applicable toward a graduate degree from this institution unless the student is accepted into a graduate degree program prior to the conclusion of the semester in which the student registered as a nondegree-seeking graduate student.

A nondegree-seeking student who is later admitted as a degree-seeking student will not be allowed to apply more than six credits earned as a nondegree-seeking student toward a degree.

The second type of nondegree-seeking graduate student is the student who holds a baccalaureate degree, who wishes to take graduate courses for personal enrichment and who does not intend to work toward a graduate degree. There is no limit to the number of credits that students in this category may take, as long as the academic performance is credible.

All nondegree-seeking (special) graduate students must have written permission from the chair of the appropriate department in order to enroll in classes.

Registration for graduate students

Graduate art students are urged to plan their schedules and register during advanced registration. Registration materials for students accepted into advanced degree programs are available in the department during the advanced registration and registration periods. The advantage of advanced registration is that of securing places in classes before they are closed and of obtaining proper counsel from advisers. All graduate students must see their assigned advisers for schedule planning and signature approval. New nondegree-seeking graduate students, or those contemplating registration as such, must secure written permission to register from the departmental chair.

Continuous enrollment policy for graduate students

Graduate students in the School of the Arts must observe the university's continuous enrollment policy (p. 29) as explained elsewhere in this bulletin.

Candidates for all advanced degree programs, after completing all formal course work, must register for at least one semester hour of credit each semester, except summer, until the culminating graduate project (dissertation, thesis, creative project, exhibition, recital, etc.) is completed and the student is ready to graduate. Also, if candidates intend to graduate in August, they must be enrolled for at least one semester hour in the summer session.

Transfer credit and graduate study

A maximum of nine graduate credits may be transferred from other accredited institutions and applied to any of the graduate degree programs in the School of the Arts. However, transfer credit is not typically granted to incoming students and is approved at the discretion of the department chair.

Graduate advising

All students accepted into advanced degree programs must make an appointment with the chair of the department or the graduate adviser prior to registration for their first semester of course work. Normally, the student's initial adviser will be the chair of the department; but students may be assigned an adviser more directly related to their areas of concentration.

Students also are encouraged to consult faculty members outside their major area and arrange with the appropriate departmental chair to use facilities and equipment available in other departments.

Finances for graduate students

Special charges

All degree-seeking graduate students are charged an art comprehensive fee. The art comprehensive fee is not charged to students who are

registered only in course work to complete a dissertation/thesis/creative project or who are enrolled in order to satisfy the one-credit requirement for continuous enrollment. Nondegree-seeking graduate students enrolled in any of the courses that require an additional outlay for materials will be billed for those individual fees by the Student Accounting Department.

In addition to the comprehensive fee for all majors in the School of the Arts, all students registering for private music lessons pay an applied music fee.

Financial support

The School of the Arts awards a limited number of graduate assistantships and scholarships to full-time students. Please see the specific program requirements for more information and application deadlines.

Advanced degree candidacy

Students seeking an advanced degree in all programs must apply for advanced degree candidacy. Those seeking the M.A.E. and the M.M. must submit the application during or after the completion of the first nine semester credits of graduate work and prior to the completion of 18 semester credits. Students pursuing the M.F.A. degree must submit the application during or after the completion of the first 15 semester credits of graduate work and prior to the completion of 30 semester credits. Applications for candidacy are available in the departmental offices and the Office of Graduate Studies of the School of the Arts.

Admission to a degree program does not constitute candidacy, and admission to degree candidacy is not an automatic process. Departments carefully review applicants for candidacy on such basis as examination or review of creative work or performance. Upon certification by the department that the applicant has met all departmental expectations, including the minimum 3.0 GPA and is adequately prepared to continue pursuing the degree program, the School of the Arts will admit the applicant to degree candidacy.

Students who are found to be inadequately prepared to continue their graduate programs, but who demonstrate the potential to ultimately fulfill degree requirements will be advised as to what additional work will be needed in order to meet departmental expectations. Candidacy, in such instances, will be postponed until departmental expectations are satisfied; postponement of candidacy may result in termination of financial assistance. Students whose academic or creative work demonstrates no likelihood of successful completion of a graduate program will be denied candidacy by the School of the Arts.

Advanced degree requirements

- Students must achieve candidacy (with the exception of art history students).
- Students must complete all formal course work.
- Students must maintain a minimum 3.0 cumulative GPA. No grade below B will count toward graduation for students in the art history and the visual communications degree programs. For all students in the theatre program, any grade below B in any course will result in termination from the degree program. Students in all programs in the Department of Music must not have more than six hours or 20 percent of semester hours attempted — whichever is greater — with a grade of C. For all other degree programs in the School of the Arts, no grade below B is acceptable for any course within the student's major

department, and a grade below B in a course in the student's major department will result in termination from the degree program.

- All students must complete the culminating project (dissertation, thesis, final examination, creative project, recital, etc.) as outlined in departmental guidelines. The thesis, or other written documentation related to the culminating project, must be done in a form that can be retained by the university and in accordance with departmental guidelines. Students preparing a thesis must use the guidelines set forth in the "Preparation of Thesis," available in departmental offices or the Office of Graduate Studies, School of the Arts.

Residency requirements for graduate study

Candidates for the Master of Fine Arts degree in the fine arts and theatre must complete a minimum of one-third of their degree program semester-hour credits within one calendar year.

Candidates for all master's degrees in the School of the Arts have five years plus two possible extensions of one year each to complete all degree requirements. The above limitations apply to both full-time and part-time students. A petition for an extension is initiated with the academic or thesis adviser.

Media, Art, and Text, Doctor of Philosophy (Ph.D.) [School of the Arts]

Program goal

VCU's interdisciplinary doctoral program in media, art, and text is a joint endeavor of the Department of English, the School of the Arts and the Richard T. Robertson School of Media and Culture. The program prepares students primarily to teach at the college or university level, although some pursue careers in related media fields. MATX emphasizes the historical and theoretical foundations essential to the scholarly study of media, both old and new, broadly defined. It provides an intellectually stimulating environment that encourages students to work both collaboratively and independently, as well as across and between disciplines and media. Students maintain a base in their primary area of research, which is usually but not always the field in which they have done prior graduate work.

Student learning outcomes

1. Develop advanced communication skills in writing, speaking and the use of multimedia
2. Demonstrate broad knowledge of history and theory as the foundation for interdisciplinary work in a specialized facet of media, art, and/or text
3. Develop competence in interdisciplinary and disciplinary research methods and responsible conduct of research
4. Develop specialized knowledge in relevant fields to support dissertation and subsequent research
5. Demonstrate the ability to conduct independent research and produce new, specialized knowledge within the broad parameters of media, art, and text
6. Develop a strong basis for ongoing professional practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

The MATX student handbook (<http://www.matx.vcu.edu/program/handbook/>) is available online.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 2	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission.

1. Applicants must hold a master's degree (M.A., M.F.A., M.S.) in a relevant field.
2. Applicants must submit the following, in the formats indicated via VCU's online application portal.
 - a. Writing sample demonstrating the ability to write clearly, analyze effectively and conduct original research in advanced doctoral-level seminars – This may be a master's thesis, a graduate-level seminar paper or a published essay. Submit as a PDF.
 - b. Statement of purpose describing the applicant's interest, motivation and goals in pursuing this degree – The statement should specifically address the importance of interdisciplinarity to the applicant's academic goals, and it should also offer evidence of preparation for the study of media, art, and text. The applicant should indicate the specific area of study and research to be pursued at VCU and identify faculty who might potentially direct dissertation research. Submit as a PDF.
 - c. Academic curriculum vitae or professional resume – List all colleges and universities attended and degrees earned, all professional and academic positions held, all publications and/or exhibitions, technical skills, and any other relevant information. Include URLs for personal and/or professional websites. Submit as PDF.
 - d. Letters of recommendation – Provide letters from three present or former instructors or other individuals qualified to evaluate the applicant's ability to engage in interdisciplinary study at the doctoral level. Have recommenders submit their letters via the online application portal.
3. Applicants who wish to pursue creative work at VCU must also submit a portfolio. Those with an M.F.A. who do not wish to continue creative work should consult with the MATX director about this requirement. Materials submitted should demonstrate excellence in studio or professional practice and the potential to do graduate-level work in media, art, and text. Portfolios will be reviewed by the MATX admissions committee as well as relevant faculty in the School of the Arts and the Richard T. Robertson School of Media and Culture. Please observe the following guidelines:
 - a. Those working in 2-D or 3-D mediums should provide 20 images of representative work arranged chronologically, beginning with the most recent.
 - b. Those working in sound and time-based media, as well as those in the performing arts, should provide clips totaling no more than 10 minutes.
 - c. Those working across media may submit a combination of the above.
 - d. The portfolio should include title, date, media and dimensions of each work, as well as a brief statement or other information that will help the admissions committee in its evaluation.

Small files illustrating 2-D or 3-D work should be submitted in a single PDF. Sound or video files should be posted to Vimeo or Sound Cloud with a functioning link submitted in a PDF with the

required information posted to the portal. Portfolio materials may also be posted to a personal or professional website and the link submitted in a PDF posted to the portal.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research.

1. Credit hour requirements: Students in the MATX program are required to earn a minimum of 42 graduate-level credit hours beyond the master's. At least one-half of the credit hours presented for graduation must be at the 600 level or higher. The 42-hour curriculum comprises 36 hours of course work and a minimum of six hours of dissertation research. Course work includes a core of four required courses taken during the first two semesters by all incoming students. Three doctoral seminars provide a shared historical and theoretical foundation for the study of media, art, and text, while a workshop offers the opportunity to develop and expand professional and/or creative skills relevant to the student's career goals and research focus. In addition, all students will take a research methods course in a field relevant to their anticipated area of dissertation research. Beyond the core, students select 21 hours of elective credit hours from course offerings in disciplines relevant to their research interests and career goals. The program offers a topics seminar focused on the history, theory or practice of media, art, and text. Independent study and internships are also available as electives. While enrollment in courses with the MATX prefix is guaranteed to matriculated MATX students, enrollment in other graduate courses is subject to the conditions established by individual units. Together the core and the electives support the interdisciplinary work of the dissertation, which is an original scholarly examination of some aspect of media, art, and/or text. It may include work in media other than text. It is supervised by a committee consisting of four or five members drawn from disciplines relevant to the research topic.
2. Grade requirements: To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.
3. Requirements for admission to candidacy: Before beginning formal dissertation research, students must complete all 36 hours of required course work, both stages of the e-portfolio and the requirements described below. Upon completion of these, the student will apply for degree candidacy.
4. Dissertation committee: The dissertation committee consists of the director (who must hold a Ph.D.) and three or four additional members whose scholarly knowledge and interests are relevant to the project. The committee must have at least one member from each of the sponsoring units (Department of English, School of the Arts, Richard T. Robertson School of Media and Culture). All must be members of VCU's graduate faculty. Appropriate faculty from outside VCU may serve on committees (but not as director) with the approval of the MATX director and the graduate dean. It is the student's responsibility to assemble the committee, in consultation with the dissertation director. Committees will not be appointed by the program.
5. E-portfolio: Work on the e-portfolio will begin in MATX 604 in the spring of the first year. There are no technical specifications, and content will include, but is not limited to, work done in the first two years in the program. It will take the form of a website and must demonstrate the technical skills (Web design, audio, video, etc.)

relevant to the student's work on the dissertation and the career sought after VCU. Submission is a two-stage process:

- a. Stage 1 (August of the second year): a three- to five-page design rationale for the portfolio site along with a mock-up or rough structure
 - b. Stage 2 (April of the second year): a finished, live site accompanied by a five-page statement relating it to the student's work inside and outside the program and outlining how it uses media techniques to promote a specific professional and/or creative identity (Note: Each submission is graded pass/fail and may be repeated once. A second failure results in automatic termination from the program.)
6. Competency: Candidates must demonstrate competency in a skill or technique relevant to the dissertation research or planned professional career. The dissertation committee approves and administers the competency portion. Graded pass/fail, the test may be repeated once.
 7. Bibliography exam: Candidates will complete an exam on a reading list of 20 to 30 sources relevant to or supportive of the dissertation topic. The dissertation committee approves and administers the bibliography exam. Graded pass/fail, the test may be repeated once.
 8. Dissertation prospectus and prospectus defense: The prospectus is a 15- to 20-page document that indicates the significance of the proposed research, gives a short review of relevant literature, states the research question, specifies the proposed methodology and indicates how the project lays the foundation for the anticipated academic or professional career. It also includes a work plan for the completion of research and writing, as well as a complete bibliography. The prospectus is defended orally before the dissertation committee, which may accept, reject or require revisions. The defense may be repeated once.
 9. Dissertation and dissertation defense: The dissertation is an original, interdisciplinary and scholarly examination of a topic relevant to an aspect of media, art, and/or text. It may include work in media other than text. Given the varied nature of doctoral research, there is no set time frame for completion of a dissertation. It is expected, however, that the dissertation will take about two years after attaining candidacy, but it must be defended within the eight-year time limit for completion of the doctoral degree. The dissertation will be defended orally before the dissertation committee. Successful defense of the dissertation completes the requirements for the degree.

Curriculum requirements

Course	Title	Hours
MATX 601	Texts and Textuality	3
MATX 602	History of Media, Art, and Text	3
MATX 603	Mass Media	3
MATX 604	Interdisciplinary Workshop	3

Program website: matx.vcu.edu (<http://matx.vcu.edu/>)

Department of Art Education

Sara Wilson McKay, Ph.D.
Associate professor and chair

arts.vcu.edu/arteducation (<http://arts.vcu.edu/arteducation/>)

The Department of Art Education supports instruction in art that encourages the construction of meaning. Faculty and students are actively involved with the art world, education and local and global communities through art-based service-learning, visual culture studies, critical thinking, exhibition, assessment, curriculum, critical theory and emerging digital technologies (virtual and interactive).

The department emphasizes interdisciplinary connections throughout the School of the Arts and the university as a whole. Through their own research and instruction, art teacher candidates engage their students and themselves in traditional and nontraditional forms of inquiry to contribute to the continuing growth and strength of the profession.

- Art Education, Master of (M.A.E.) (p. 319)

Art Education, Master of (M.A.E.)

Program accreditation

National Association of Schools of Art and Design
National Council for Accreditation of Teacher Education

Program goal

Through engagement with theory, research and emerging technologies, the Master of Art Education program prepares art educators to be mindful professionals who are active in the field of art education.

The program offers two specific options:

1. One option is for teachers who are already licensed and who wish to deepen their understanding of art education.
2. The second is for people who hold baccalaureate degrees and wish to earn a master's degree that may include a teaching license.

The program includes required and elective courses and allows students to pursue an area of interest. All students are expected to work at a high level of independence, be self-motivated, respect peers and instructors and participate in the opportunities that the Department of Art Education and the School of the Arts offer. With the assistance of the adviser, the

student determines a viable structure for the content and sequence of a program of graduate study. Such a program can utilize the collective expertise of the art education faculty as well as appropriate community resources. Graduate course work, therefore, could include both on-campus and off-campus involvement.

Opportunities for personal growth through the M.A.E. program also include the rich resources of other graduate departments in the university in the visual and performing arts, education (including supervision, administration and specialty areas), the natural and social sciences and the humanities. Alternative approaches to traditional thesis methods are also encouraged within the program.

Student learning outcomes

1. **Theoretical foundations:** Students will demonstrate an ability to analyze varying points of view regarding art education theories.
2. **Research competencies:** Students will demonstrate the ability to apply research methods and methodologies to write a realistic proposal.
3. **Skills with and knowledge of emerging technologies:** Students will demonstrate knowledge of emerging technologies for teaching, research or art-making.
4. **Command of literature and practice in art education:** Students will demonstrate historical and current knowledge of theoretical and practical issues in art education.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.A.E.	Fall	Jan 15	GRE required if undergraduate GPA is below 3.2; optional if 3.2 or higher.

Special requirements

- See the School of the Arts admissions page for the specific directions about the portfolio, letters of reference, etc.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following requirements:

- Thirty-six undergraduate credit hours of art and art history course work (Students who do not have these credit hours from the undergraduate degree are welcome to take undergraduate courses to earn these credit hours before applying to VCU. These can be taken at any accredited undergraduate institution.)
- An undergraduate degree in art education, studio art, art history or a related field

It is desired, though not required, for students to have some teaching experience before applying.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.A.E. program requires a minimum of 36 graduate credit hours, including required art education and approved elective courses.

Licensure

For students who also pursuing teaching licensure, there are additional requirements, including:

Course	Title	Hours
EDUS 301	Human Development and Learning	3
ARTE 404	Clinical Internship Seminar	1
ARTE 550 or SEDP 505	Art for the Exceptional Learner Theory and Practice of Educating Individuals with Special Needs	3
ARTE 501	Art Education Elementary Materials and Practicum	3
ARTE 502	Art Education Secondary Materials and Practicum	3
A semester of student teaching		

The electives in the following curricular requirements account for some of these courses. The M.A.E. plus licensure requires a minimum of 36 graduate credit hours plus 13-16 of undergraduate credit hours.

Students who wish to be considered for a teaching license are required to complete a series of tests as mandated by the Virginia Department of Education. See arts.vcu.edu/arteducation/mae/testing (<http://arts.vcu.edu/arteducation/mae/testing/>) for additional information.

Written examination

After completing nine credit hours, including ARTE 611, and before completing 18 credit hours, all students are required to submit a written exam. This exam will determine whether a student is approved for degree candidacy and is ready to proceed to the final stages of the degree program. Failure to submit this required exam may result in dismissal from the program. Students who fail the exam will have a second chance the following semester. Students who fail on the second attempt will be dismissed from the program.

Thesis option

A thesis or project option may develop from graduate course work or professional involvement. Projects are those endeavors of thesis proportion that do not fit the traditional thesis format. A thesis or project may be explored by descriptive research, historical research, empirical/statistical research, design of learning packages, philosophical study, curriculum development, action research or other methodologies if deemed appropriate by the adviser and committee.

Comprehensive exam option

In lieu of the thesis, students complete six credit hours of graduate seminar work (ARTE 600 taken twice with different topics and different faculty members) in the Department of Art Education. In addition, students must successfully pass a written and oral comprehensive examination in the later stages of their course work. The examination will pertain to the course work, to contemporary issues in the field and to students' particular areas of expertise. This option is suggested for students pursuing the track that results in the M.A.E. and simultaneous teaching licensure.

Students who do not pass all portions of the comprehensive exam will have one opportunity to retake the exam the following semester. Students who fail the exam on the second attempt will be dismissed from the program and will not be eligible to graduate from the Department of Art Education.

Curriculum requirements

The minimum total of graduate credit hours required for this degree is 36.

Graduate program director

Courtne Wolfgang, Ph.D.

Assistant professor
cnwolgang@vcu.edu

Program coordinator

Ronika Jarratt
artedgrad@vcu.edu
(804) 828-1996

Program website: arts.vcu.edu/arteducation/mae (<http://arts.vcu.edu/arteducation/mae/>)

Department of Art History

Margaret Lindauer, Ph.D.

Associate professor and chair

arts.vcu.edu/arhistory (<http://arts.vcu.edu/arhistory/>)

The Department of Art History offers programs that acquaint students with the humanistic discipline of art historical inquiry. While providing students with the opportunity for a broad education drawing on the liberal arts and humanities, the department also emphasizes a close bond with the studio and performing arts and enjoys a close relationship with the other departments in the School of the Arts.

The department offers a broad-based education in the humanistic discipline of art history at the baccalaureate, master's and doctoral levels.

Overseas studies are available through university-sponsored programs abroad in Europe and Asia. Graduate assistantships and fellowships are available to full-time graduate students.

- Art History, Doctor of Philosophy (Ph.D.) with a concentration in curatorial (p. 321) (admission temporarily suspended)
- Art History, Doctor of Philosophy (Ph.D.) with a concentration in historical studies (p. 324) (admission temporarily suspended)
- Art History, Master of Arts (M.A.) with a concentration in historical studies (p. 325)
- Art History, Master of Arts (M.A.) with a concentration in museum studies (p. 327)

Art History, Doctor of Philosophy (Ph.D.) with a concentration in curatorial

Note: Admission to this program is temporarily suspended.

Program goal

The Ph.D. in Art History is a research-oriented degree designed to train critical and productive scholars, college and university professors, and curators and museum professionals who are well-grounded in the

literature, methodology and major art historical and/or museological problems in their selected areas of study.

All doctoral students establish a program of study that includes a major field of study and a minor field of study shared by a full-time faculty member. Students in the curatorial concentration select museum studies as either the major or minor field of study.

Student learning outcomes

1. Students apply critical and analytical concepts, frameworks and methods.
2. Students contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate.
3. Students write effectively for audiences of scholarly and nonspecialist readers.
4. Students speak effectively to scholarly and nonspecialist audiences.
5. Students demonstrate ability to translate art historical scholarship written in a language or languages relevant to their research.
6. Students conduct scholarly inquiry that makes a scholarly professional contribution.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall only	Jan 15	GRE

Special requirements

- Writing sample

Prospective students holding a master's degree in art history or a related field from VCU or any other accredited institution may apply directly to the doctoral program. Prospective students who hold only a bachelor's degree in art history or a related field also may apply directly to the Ph.D. program; if admitted, they select one of the three M.A. curriculum concentrations and complete 27 of the required 30 credit hours for the M.A. degree before beginning Ph.D. course work.

Applicants are encouraged to speak with a prospective dissertation adviser (the full-time faculty member whose research area corresponds to an applicant's interests).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the Ph.D. in Art History must meet the following requirements:

1. A statement of purpose, 750-1000 words in length, that briefly recounts applicant's academic background, describes an avenue of inquiry that the applicant expects to explore, notes applicant's professional goals beyond graduate study and explains why VCU's Ph.D. in Art History program is suited to applicant's interests
2. A research/writing sample that has a clearly articulated thesis statement, identifies and interprets primary and/or secondary sources in support of a well-argued thesis, and offers a coherent, cohesive narrative
3. Three letters of recommendation, at least two of which are from faculty members who can assess the applicant's preparation and promise for graduate work (Some applicants may choose to solicit the third letter from a museum professional who has supervised the applicant's professional work in a museum setting.)
4. Official transcripts from schools where applicant completed course work applied toward the baccalaureate or master's degree
5. An official report of GRE scores

Applications are reviewed by the program's full-time faculty members, who assess an applicant's overall package of materials with particular attention to the statement of interest and writing sample. Applicants are

encouraged to correspond with individual faculty members who share their areas of research interests.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the program of study for students who have an M.A. degree upon applying for the Ph.D. program is determined on a case-by-case basis, to include at least 30 credit hours in the concentration area. Students may also be required to also complete ARTH 690, ARTH 694 and/or selected art history seminars if they have not completed equivalent courses in their master's programs and/or if their degrees were awarded in fields other than art history. Students in the curatorial concentration may also be required to take one or more museum studies course (ARTH 681-ARTH 684, ARTH 691) if their M.A. programs did not include equivalent courses.

Students who matriculate into the concentration in historical studies with only a baccalaureate degree initially complete the requirements in either the concentration in historical studies or the concentration in architectural history in the M.A. program; they then proceed to complete the following 30 credit hours.

Major and minor art historical field of study

Students complete a major and a minor art historical field of study of their choosing. The major area requires three seminars, while the minor requires two seminars. M.A./Ph.D. students may complete some of these courses while at the master's stage.

Language proficiency

Doctoral students must demonstrate competency in two foreign languages relevant to their areas of research and approved by the departmental graduate committee before admission to candidacy. Foreign language competency demonstrated for an M.A. may be applied to this requirement. The Department of Art History administers language exams and offers a course in German for art history.

Admission to candidacy

Doctoral students are admitted to candidacy after demonstrating proficiency in two foreign languages, passing the major and minor field exams administered in ARTH 772 and ARTH 773 and orally defending a dissertation prospectus previously approved by the dissertation adviser. Only after candidacy is granted may a student enroll for dissertation credits.

Dissertation

After admission to candidacy, doctoral students proceed to complete and defend a dissertation. They work under the supervision of the dissertation director, and they are required to maintain continuous enrollment of at least three credit hours per semester (excluding summer) until they have attained six hours of dissertation credit, after which they may enroll for as few as one credit per semester. The dissertation must represent independent research that is devoted to an original question or hypothesis with the appropriate development, analysis and interpretation. Successful defense of the dissertation completes the requirements for the degree. All degree requirements must be completed within eight years of the first semester of enrollment in the doctoral program (either M.A./Ph.D. or Ph.D.).

Art History, Doctor of Philosophy (Ph.D.) with a concentration in historical studies

Note: Admission to this program is temporarily suspended.

Program goal

The Ph.D. in Art History is a research-oriented degree designed to train critical and productive scholars, college and university professors, and curators and museum professionals who are well-grounded in the literature, methodology and major art historical and/or museological problems in their selected areas of study.

All doctoral students establish a program of study that includes a major field of study and a minor field of study shared by a full-time faculty member. Students in the curatorial concentration select museum studies as either the major or minor field of study.

Student learning outcomes

1. Students apply critical and analytical concepts, frameworks and methods.
2. Students contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate.
3. Students write effectively for audiences of scholarly and nonspecialist readers.
4. Students speak effectively to scholarly and nonspecialist audiences.
5. Students demonstrate ability to translate art historical scholarship written in a language or languages relevant to their research.
6. Students conduct scholarly inquiry that makes a scholarly professional contribution.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall only	Jan 15	GRE

Special requirements

- Writing sample

Prospective students holding a master's degree in art history or a related field from VCU or any other accredited institution may apply directly to the doctoral program. Prospective students who hold only a bachelor's degree in art history or a related field also may apply directly to the Ph.D. program; if admitted, they select one of the three M.A. curriculum concentrations and complete 27 of the required 30 credit hours for the M.A. degree before beginning Ph.D. course work.

Applicants are encouraged to speak with a prospective dissertation adviser (the full-time faculty member whose research area corresponds to an applicant's interests).

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the Ph.D. in Art History must meet the following requirements:

1. A statement of purpose, 750-1000 words in length, that briefly recounts applicant's academic background, describes an avenue of inquiry that the applicant expects to explore, notes applicant's professional goals beyond graduate study and explains why VCU's Ph.D. in Art History program is suited to applicant's interests
2. A research/writing sample that has a clearly articulated thesis statement, identifies and interprets primary and/or secondary sources in support of a well-argued thesis, and offers a coherent, cohesive narrative
3. Three letters of recommendation, at least two of which are from faculty members who can assess the applicant's preparation and promise for graduate work (Some applicants may choose to solicit

the third letter from a museum professional who has supervised the applicant's professional work in a museum setting.)

4. Official transcripts from schools where applicant completed course work applied toward the baccalaureate or master's degree
5. An official report of GRE scores

Applications are reviewed by the program's full-time faculty members, who assess an applicant's overall package of materials with particular attention to the statement of interest and writing sample. Applicants are encouraged to correspond with individual faculty members who share their areas of research interests.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the program of study for students who have an M.A. degree upon applying for the Ph.D. program is determined on a case-by-case basis, to include at least 30 credit hours in the concentration area. Students may also be required to also complete ARTH 690, ARTH 694 and/or selected art history seminars if they have not completed equivalent courses in their master's programs and/or if their degrees were awarded in fields other than art history. Students in the curatorial concentration may also be required to take one or more museum studies course (ARTH 681-ARTH 684, ARTH 691) if their M.A. programs did not include equivalent courses.

Students who matriculate into the concentration in historical studies with only a baccalaureate degree initially complete the requirements in either the concentration in historical studies or the concentration in architectural history in the M.A. program; they then proceed to complete the following 30 credit hours.

Major and minor art historical field of study

Students complete a major and a minor art historical field of study of their choosing. The major area requires three seminars, while the minor requires two seminars. M.A./Ph.D. students may complete some of these courses while at the master's stage.

Language proficiency

Doctoral students must demonstrate competency in two foreign languages relevant to their areas of research and approved by the departmental graduate committee before admission to candidacy. Foreign language competency demonstrated for an M.A. may be applied to this requirement. The Department of Art History administers language exams and offers a course in German for art history.

Admission to candidacy

Doctoral students are admitted to candidacy after demonstrating proficiency in two foreign languages, passing the major and minor field exams administered in ARTH 772 and ARTH 773 and orally defending a dissertation prospectus previously approved by the dissertation adviser. Only after candidacy is granted may a student enroll for dissertation credits.

Dissertation

After admission to candidacy, doctoral students proceed to complete and defend a dissertation. They work under the supervision of the dissertation director, and they are required to maintain continuous enrollment of at least three credit hours per semester (excluding summer) until they have attained six hours of dissertation credit, after which they may

enroll for as few as one credit per semester. The dissertation must represent independent research that is devoted to an original question or hypothesis with the appropriate development, analysis and interpretation. Successful defense of the dissertation completes the requirements for the degree. All degree requirements must be completed within eight years of the first semester of enrollment in the doctoral program (either M.A./Ph.D. or Ph.D.).

Art History, Master of Arts (M.A.) with a concentration in historical studies

Program goal

The mission of the graduate program in art history is to equip students with requisite knowledge, skills and theoretical foundation to embark on successful careers in academia and/or museums.

The M.A. curriculum concentrations provide students with a general background in the research methods and teachings of art history in preparation for careers in museums, collections care or arts organizations. It also prepares students for the more rigorous research

demands of the Ph.D., which is the required degree for academic and curatorial careers.

Student learning outcomes

1. Students apply critical and analytical concepts, frameworks and methods.
2. Students contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate.
3. Students demonstrate ability to translate art historical scholarship written in a language or languages relevant to their research.
4. Students conduct scholarly inquiry that makes a scholarly professional contribution.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Department of Communication Arts

TyRuben Ellingson

Associate professor and chair

arts.vcu.edu/communicationarts

The Department of Communication Arts will cultivate engaged, innovative and technically skilled artists and designers seeking a degree centered

on narrative illustration and entertainment design. By offering robust and rigorous courses that embrace all forms of media, graduates will be prepared to forge dynamic careers.

The program

Centered on a rigorous investigation of studio methods and practices, the communication arts curriculum additionally explores historical, conceptual and theoretical concerns critical to the development of a well-rounded and informed understanding of image, media, content and context.

With a history richly rooted in drawing, painting and art theory, the communication arts program is effectively tailored to provide students educational opportunities to develop the types of quality skills and meaningful understandings that are relevant and sought after in the expanding universe of communication medias.

It is a curriculum that endeavors to provide a balance between past, present and future, valuing artistic traditions and techniques, while thoughtfully embracing new tools, technologies, opportunities and outcomes.

Woven throughout the program, the study of communication arts is concerned with the powerful and timeless relationship between art and narrative – image and story – which invites each student to embrace, amplify and build upon their unique views and life experience so that they may, in the lifetime beyond university, add to humanity's ongoing evolution and unfolding.

The communication arts department offers a B.F.A. in Communication Arts as well as a B.F.A. in Communication Arts with a concentration in scientific illustration. The communication arts department also offers a minor in scientific illustration for students majoring in biology or environmental sciences.

Department of Craft and Material Studies

Susan Ganch

Associate professor and interim chair

arts.vcu.edu/craft/ (<http://arts.vcu.edu/craft/>)

The Department of Craft and Material Studies explores the language of ceramics, glass, wood, fiber and metal. The department offers both a Bachelor of Fine Arts in Craft and Material Studies and a Master of Fine Arts in Fine Arts degree with concentrations in five disciplines: ceramics, fiber, furniture design, glassworking and jewelry/metalworking.

Students are encouraged to learn and explore through the traditional craft media. Together, faculty and students hone, improvise and redefine ancient technologies with new technologies; they bend and blend concepts and materials.

The Department of Craft and Material Studies is housed in a state-of-the-art facility that provides a safe and excellent physical environment in which to work. Students have access to well-equipped studios in each of the five media areas. The department shares the facilities with the departments of Sculpture, Painting and Printmaking, and Kinetic Imaging.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in ceramics (p. 329)
- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in fibers (p. 331)

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in furniture design (p. 333)
- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in glassworking (p. 334)
- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in jewelry/metalworking (p. 336)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in ceramics

Program accreditation

National Association of Schools of Art and Design

Program goal

The program comprises a community of makers/artists who advance the conceptual, historical, technical and haptic aspects of clay, fiber, glass, metal and wood. The program promotes an artistic practice rooted in the values of craft. Students will investigate craft's inherent relationship to the world with fearless innovation.

Student learning outcomes

1. Aesthetic and cross-cultural understanding: The students will demonstrate mastery in aesthetic and cross-cultural understanding.
2. Understanding of the contemporary of their field: The curriculum of craft and material studies is designed to provide students with a comprehensive and up-to-date understanding of their field.
3. Critique information interpretation: The students will be able to use knowledge gained from critique to improve creative work.
4. Technique development: The students will demonstrate mastery of advanced craft techniques within their field.
5. Professional practice: The students will demonstrate leadership in their field in teaching and/or studio management.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy

requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

The student handbook (https://arts.vcu.edu/craft/files/2012/07/Craft_MaterialStudiesGraduateHandbook.pdf) is available online.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	None

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the School of the Arts admission requirements, applicants in the visual arts must have completed a minimum of 36 credit hours in art at the undergraduate level. Applicants should also present:

1. **Curriculum vitae/resume:** If applicant has a website, please include a link in CV/resume.
2. **Statement of purpose:** Please submit with university application and upload as PDF.
3. **References:** Provide the names and contact information for three references from professional associates such as instructors, supervisors or colleagues who can comment on the applicant's ability to succeed in a graduate program. Letters of recommendation will be submitted electronically by recommenders.
4. **Portfolio:** Provide 20 still and/or moving images. Present work in reverse chronological order with the newest work first and the oldest work last. Images are reviewed one at a time. Please include any additional information to help reviewers understand the image.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.F.A. program requires 60 credit hours, which students usually complete in two years of full-time study. The majority of credit hours are taken in the student's area of specialization. Graduate seminars, art history courses and other studio/academic electives round out the graduate student's individualized program. Studio visits and critiques with visiting artists are an important aspect of the program.

Within the studio concentration, emphasis is placed on self-motivation, individual investigation and the development of professional attitudes and skills. Graduate students are expected to demonstrate a serious commitment to their work and to develop mature ideas and forms of expression. Admission to the graduate program is highly selective and competitive.

Graduate students interact formally and informally with the faculty in their areas and with other faculty members in the School of the Arts. Each graduate student works closely with a faculty committee that meets twice a semester for critiques and discussions. At the end of the first year, students present their work to their committee and departmental faculty in a candidacy review. At the successful completion of the 60 credit hours, a thesis exhibition is mounted at the university's Anderson Gallery or at an alternative venue. A written thesis is also required.

Graduate open elective ¹	3
Term Hours:	15
Total Hours:	60

1

Graduate open electives: any 500-level or higher graduate course (Permission of instructor or program may apply.)

2

Art history: any graduate-level (500 to 799) ARTH course

The minimum total of graduate credit hours required for this degree is 60.

Graduate program director

Susie Ganch
Interim chair, Department of Craft and Material Studies
seganch@vcu.edu
(804) 828-1750

Program website: arts.vcu.edu/craft (<http://arts.vcu.edu/craft/>)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in jewelry/metalworking

Program accreditation

National Association of Schools of Art and Design

Program goal

The program comprises a community of makers/artists who advance the conceptual, historical, technical and haptic aspects of clay, fiber, glass, metal and wood. The program promotes an artistic practice rooted in the values of craft. Students will investigate craft's inherent relationship to the world with fearless innovation.

Student learning outcomes

1. Aesthetic and cross-cultural understanding: The students will demonstrate mastery in aesthetic and cross-cultural understanding.
2. Understanding of the contemporary of their field: The curriculum of craft and material studies is designed to provide students with a comprehensive and up-to-date understanding of their field.
3. Critique information interpretation: The students will be able to use knowledge gained from critique to improve creative work.
4. Technique development: The students will demonstrate mastery of advanced craft techniques within their field.
5. Professional practice: The students will demonstrate leadership in their field in teaching and/or studio management.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

The student handbook (https://arts.vcu.edu/craft/files/2012/07/Craft_MaterialStudiesGraduateHandbook.pdf) is available online.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	None

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the School of the Arts admission requirements, applicants in the visual arts must have completed a minimum of 36 credit hours in art at the undergraduate level. Applicants should also present:

1. **Curriculum vitae/resume:** If applicant has a website, please include a link in CV/resume.
2. **Statement of purpose:** Please submit with university application and upload as PDF.
3. **References:** Provide the names and contact information for three references from professional associates such as instructors, supervisors or colleagues who can comment on the applicant's ability to succeed in a graduate program. Letters of recommendation will be submitted electronically by recommenders.
4. **Portfolio:** Provide 20 still and/or moving images. Present work in reverse chronological order with the newest work first and the oldest work last. Images are reviewed one at a time. Please include any additional information to help reviewers understand the image.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.F.A. program requires 60 credit hours, which students usually complete in two years of full-time study. The majority of credit hours are taken in the student's area of specialization. Graduate seminars, art history courses and other studio/academic electives round out the graduate student's individualized program. Studio visits and critiques with visiting artists are an important aspect of the program.

Within the studio concentration, emphasis is placed on self-motivation, individual investigation and the development of professional attitudes and skills. Graduate students are expected to demonstrate a serious commitment to their work and to develop mature ideas and forms of expression. Admission to the graduate program is highly selective and competitive.

Graduate students interact formally and informally with the faculty in their areas and with other faculty members in the School of the Arts. Each graduate student works closely with a faculty committee that meets twice a semester for critiques and discussions. At the end of the first year, students present their work to their committee and departmental faculty in a candidacy review. At the successful completion of the 60 credit hours, a thesis exhibition is mounted at the university's Anderson Gallery or at an alternative venue. A written thesis is also required.

Graduate program director

Susie Ganch
Interim chair, Department of Craft and Material Studies
seganch@vcu.edu
(804) 828-1750

Program website: arts.vcu.edu/craft/

Department of Dance and Choreography

Courtney B. Harris

Associate professor and chair

arts.vcu.edu/dance (<http://arts.vcu.edu/dance/>)

The mission of the Department of Dance and Choreography is to create an environment where the student experiences the demands and challenges of the professional dancer/choreographer. In a community setting where communication, mutual respect and self-motivation are encouraged, classes provide students with disciplined training that will maximize their potential to become dancers of technical excellence, choreographers with original and powerful voices and thinkers with high academic standards.

Students are trained to be performers, choreographers and teachers in this curriculum, which emphasizes modern dance and offers dance courses in modern, improvisation, composition, choreography, music, and dance forms and dance history, as well as ballet, jazz, tap, hip-hop, ballroom, contact improvisation, dance science, anatomy for dancers, video/choreography and teaching methods for dance. Additionally, the program provides a variety of experiences in performance, choreography and production. These offerings enable students to develop as savvy, expressive artists with professional training in dance technique, knowledge of dance philosophies and a foundation in history, enabling them to function as independent and creative artists in the field of dance. VCU Dance is an accredited member of the National Association of Schools of Dance.

Department of Fashion Design and Merchandising

Patricia Brown

Associate professor and chair

arts.vcu.edu/fashion (<http://arts.vcu.edu/fashion/>)

The Department of Fashion Design and Merchandising offers two programs. The fashion design concentration leads to a Bachelor of Fine Arts degree and the fashion merchandising concentration leads to a Bachelor of Arts degree.

Both concentrations are extremely time-consuming. Students are expected to put class attendance and study time above other campus activities or employment.

All students are required to have a laptop computer. The department can provide specifications.

Students must take classes in the sequence prescribed by the department and adhere to all prerequisites. Failure to comply can lengthen the number of semesters necessary for completion of degree requirements.

Internships provide not only experience but industry contacts, and are strongly recommended. They may be conducted primarily during the summer semester.

Department of Graphic Design

David Shields

Associate professor and chair

arts.vcu.edu/graphicdesign (<http://arts.vcu.edu/graphicdesign/>)

The Department of Graphic Design champions agency through the competencies of collaboration, research, making and cultural literacy. The department believes in responding to the reality of our time and that

design is activated by content, condition and impact. Further, that design exists in a continuum: The study of the historical past informs the now and the strength of design is its ability to strategically speculate on future forms and language.

The department provides an education that values a diversity of backgrounds, skill sets and experiences. Students develop acuties to communicate effectively through visual and verbal representation, and are prepared — as individuals and collaborators — to be practitioners not limited by the confines of current professional practices.

- Design, Master of Fine Arts (M.F.A.) with a concentration in visual communications (p. 339)

Design, Master of Fine Arts (M.F.A.) with a concentration in visual communications

Program accreditation

National Association of Schools of Art and Design

Program goal

The graduate program in design with a concentration in visual communications is oriented toward individuals interested in pursuing a career in design education and/or furthering their professional practices, in conducting visual or theoretical research, and in investigating the intersections of function and expression in design problem solving.

Student learning outcomes

1. Students will be able to present fluent verbal and written explanations of research and studio activities.
2. Students will develop a personal vocabulary, approach and vision in creative work.
3. Students will demonstrate knowledge of historical, social and cultural perspectives in relation to visual communications and clarify how they influence work.
4. Students will develop the ability to create expressive forms and use them to communicate appropriately.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	

Special requirements

- International applicants should apply by Dec. 15 to ensure that application materials are received by the deadline.
- See arts.vcu.edu/admissions/how-to-apply/ (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process, including portfolio, resume, statement of purpose, letters of reference, transcripts and scores.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have taken 36 undergraduate credit hours in studio art that should include a minimum of 20 credit hours in visual communications and/or related fields. Under special circumstances, these requirements may be waived.

Interview

The department will contact selected applicants regarding the interview (may be via Skype, telephone or in person).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.F.A. is an intensive two-year, 60 credit-hour full-time program with courses only scheduled during the day. Courses are often integrated with each other during the semester.

Department of Interior Design

Roberto Ventura

Associate professor and interim chair

arts.vcu.edu/interiordesign/ (<http://arts.vcu.edu/interiordesign/>)

The Department of Interior Design is accredited by the Council for Interior Design Accreditation. The mission of the department is to provide an intellectually rigorous, studio-based experience grounded in the issues of interior architecture. The department develops in its students an enduring passion and curiosity for their work, a determination to continually seek quality in their endeavors, an ability to reflect constructively upon their actions as individuals and a responsibility for their lifelong education. The department focuses students' professional activities while encouraging connections between these activities and the larger forum of ideas that enrich their culture and environment. The Bachelor of Fine Arts in Interior Design program prepares students for careers in interior design or entry into programs of advanced study.

The department also offers a Master of Fine Arts in Design with a concentration in interior environments with a professional entry-level option and a post-professional option. These tracks seek to produce competent creative designers whose design solutions are based on human response in the contemporary environment. Mastery of design skills, development of productive habits, knowledge of resources and an awareness of interrelated disciplines equip the student with the tools and expertise necessary to pursue creative design positions.

The department relates with the professional interior design community through a variety of activities. The faculty invites featured speakers to share experiences, participate in the annual ASID EXPO, facilitate mentorships with professional designers and support student internships. An active student chapter of the American Society of

Interior Designers provides additional enriching opportunities for student involvement.

The department offers limited accelerated undergraduate preparation for those individuals who lack full preparation. Assessment of the individual candidate's needs will determine the scope of the preparatory course work. This is an opportunity to gain the skills and design experiences required to qualify for admission to the graduate degree program.

The department has a very comprehensive website with extensive information about the program, interior design in general, faculty, student work and the department newsletter. In advance of scheduling a meeting for department advising or for application to the program, students should review the website at arts.vcu.edu/interiordesign/.

- Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – post-professional option (p. 341)
- Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – professional entry-level option (p. 343)

Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – post-professional option

Program accreditation

Council for Interior Design Accreditation

Program goal

The mission of the Department of Interior Design in VCU's School of the Arts is to provide an intellectually rigorous, studio-based experience grounded in the issues of interior architecture. The department develops in its students an enduring passion and curiosity for their work, a determination to continually seek quality in their endeavors, an ability to reflect constructively upon their actions as individuals, and a responsibility for their lifelong education. The department focuses a student's professional activities while encouraging connections between these activities and a larger forum of ideas that enrich their culture and their environment.

Student learning outcomes

1. Students will demonstrate professional values.
2. Student work will demonstrate advanced design theory.
3. Student work will demonstrate advanced knowledge of interior design.
4. Student work will demonstrate effective communication.
5. Students will demonstrate a foundation in business and professional practices.

Concentration in interior environments – post-professional option

The post-professional option is a subconcentration of the interior environments concentration, one of about 10 available nationally, that allows students who already have undergraduate degrees in interior design or architecture the opportunity to develop an individualized direction in scholarship. Admission is highly selective and open only to students who have demonstrated a high caliber of work at the undergraduate and/or master's level.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Feb 1	TOEFL or IELTS scores for international students only

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process and TOEFL score requirements.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum requirements:

1. An interview (recommended, but not required)
2. Previous university/college transcripts (one official copy)
3. Three letters of recommendation to be submitted electronically through the online application process
4. Essay: three-to-five page (minimum) sample of academic writing
5. Written personal statement (one to two pages)
6. A resume
7. TOEFL score (international students only) – 600 paper/2500 computer/100 Internet
8. A portfolio with samples of design work (Applicants will be directed to upload portfolio images and/or video after they start the application process.)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a minimum of 60 credit hours is required within prescribed courses. A research-design project is required to complete the program of study. This project is undertaken and developed in the context of IDES 699 and must consist of the testing of an original idea that is supported by research. This information will be synthesized through the design development process and culminate in an individual creative project of complex scale and scope. Documentation must follow established guidelines and be presented in a form that can be retained by the department and the university. On completion of the thesis, students participate in an oral examination and a graduate exhibition.

Design, Master of Fine Arts (M.F.A.) with a concentration in interior environments – professional entry-level option

Program accreditation

Council for Interior Design Accreditation

Program goal

The mission of the Department of Interior Design in VCU's School of the Arts is to provide an intellectually rigorous, studio-based experience grounded in the issues of interior architecture. The department develops in its students an enduring passion and curiosity for their work, a determination to continually seek quality in their endeavors, an ability to reflect constructively upon their actions as individuals, and a responsibility for their lifelong education. The department focuses a student's professional activities while encouraging connections between these activities and a larger forum of ideas that enrich their culture and their environment.

Student learning outcomes

1. Students will demonstrate professional values.
2. Student work will demonstrate advanced design theory.
3. Student work will demonstrate advanced knowledge of interior design.
4. Student work will demonstrate effective communication.
5. Students will demonstrate a foundation in business and professional practices.

Concentration in interior environments – professional entry-level option

The professional entry-level track is a 60-72 credit-hour program for second-degree seekers who have a proven record of academic excellence in a field other than architecture or interior design and are interested in pursuing a career in interior design. The structure of the track echoes the B.F.A. in Interior Design program in content, but advances the student at an accelerated rate during the first year and summer, bringing students parallel with the curriculum of the post-professional track by the second year.

The curriculum is highly sequenced, and students are admitted to the program for the fall semester only. All incoming students are required to take part in an intensive workshop in the summer that introduces and develops drawing, presentation skills and an understanding of two- and three-dimensional design methods. Students must successfully pass the workshop with a minimum grade of B to begin the professional entry-level track. Applicants who have an art or design background are strongly encouraged to submit a portfolio for review with their application. PowerPoint is the preferred format for the portfolio. Applicants are also required to submit three letters of recommendation and a three-to-five page writing sample.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. 2. Previous university/college transcripts (one official copy)
3. Three letters of recommendation to be submitted electronically through the online application process
4. Essay: three-to-five page (minimum) sample of academic writing
5. Written personal statement (one to two pages)
6. A resume
7. TOEFL score (international students only) – 600 paper/2500 computer/100 Internet
8. A portfolio with samples of design work (Applicants will be directed to upload portfolio images and/or video after they start the application process.)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a minimum of 60 credit hours is required within prescribed courses. A research-design project is required to complete the program of study. This project is undertaken and developed in the context of IDES 699 and must consist of the testing of an original idea that is supported by research. This information will be synthesized through the design development process and culminate in an individual creative project of complex scale and scope. Documentation must follow established guidelines and be presented in a form that can be retained by the department and the university. On completion of the thesis, students participate in an oral examination and a graduate exhibition.

Curriculum requirements

Prerequisite

Students with no art or design background must successfully complete this class with a minimum grade of B as a prerequisite for enrolling in the program.

Course	Title	Hours
Take 2-12 credits in the following:		2-12
IDES 500	Art and Design Methods Workshop	

Required courses

Course	Title	Hours
IDES 501	Introductory Graduate Design Studio I	6
IDES 502	Introductory Graduate Design Studio II	6

IDES 511	Introductory Graduate Graphics I	3
IDES 512	Introductory Graduate Graphics II	3
IDES 521	Advanced Material Studies for Interior Environments	2
IDES 522	Environmental Factors for Interior Environments	2
IDES 601	Graduate Interior Environments Studio	6
IDES 611	Advanced Graphics for Interior Environments I	2
IDES 612	Advanced Graphics for Interior Environments II	2
IDES 623	Advanced Design Studies	3
IDES 624	Advanced Furniture Design (or elective)	2
IDES 626	Advanced Light and Color for Interior Environments	2
IDES 631	Ethics and Business Procedures for Interior Environments	2
IDES 651	History and Theory of Interior Environments I	2
IDES 652	History and Theory of Interior Environments II	2
IDES 690	Graduate Seminar in Interior Environments	3
IDES 693	Interior Design Internship	4-6
IDES 699	Creative Project - Thesis	6
Arts or other graduate-level elective (must be approved by program director)		2-4
Total Hours		60-64

The minimum total of graduate credit hours required for this degree is 60.

Note: Candidacy/portfolio review occurs upon successful completion of the second semester.

Department of Kinetic Imaging

Stephen Vitiello
Professor and interim chair

[arts.vcu.edu/kineticimaging/](http://www.arts.vcu.edu/kineticimaging/) (<http://www.arts.vcu.edu/kineticimaging/>)

The Department of Kinetic Imaging prepares students to use video, animation and sound for the purpose of art-making, self-expression and experimentation. The kinetic imaging programs are designed for

students who want to study video art, sound design and experimental two-dimensional and three-dimensional animation. Emphasis is placed on artistic uses of the media.

The department offers an undergraduate curriculum leading to a Bachelor of Fine Arts in Kinetic Imaging as well as a graduate level program that results in a Master of Fine Arts in Fine Arts.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in kinetic imaging (p. 345)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in kinetic imaging

Program accreditation

National Association of Schools of Art and Design

Program goals

The Department of Kinetic Imaging is committed to the artistic exploration of video, animation and sound. The M.F.A. program emphasizes the extension of these practices into the arts and their connection to contemporary issues in visual culture.

Graduate students in the M.F.A. program are exposed to a vigorous visiting artist schedule. Through studio reviews, seminars and research, the students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work. In addition to their own investigations, graduate students participate in and contribute to the undergraduate program.

While the graduate program is generally a two-year, four-semester in-residence program, students are expected to continue pursuits either on campus or at an alternative site throughout the calendar year.

Student learning outcomes

1. Through studio reviews, seminars and research, students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work.
2. Students will demonstrate critical thinking and conceptual problem-solving, with the ability to contribute to and challenge the rapidly evolving dialogue in media arts.
3. Students' creative work will demonstrate an engagement with critical thinking and conceptual problem-solving.
4. Students will demonstrate the ability to carry their work and critical inquiry to professional platforms such as public exhibitions, performance and/or scholarly publication. This includes knowledge of the various venues available to support and enhance their professional careers and the ability to accurately communicate what their work is addressing and who they are as artists.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	None

Special requirements

- See arts.vcu.edu/admissions/how-to-apply/ (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the requirements listed on the website above.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete 60 credit hours total, which

includes studio, seminar and elective courses. While seminar and studio courses are offered through the kinetic imaging program, these credit hours can include other courses from within the fine arts degree program with the approval of the graduate program director. Additional elective courses are drawn from approved courses in participating units.

To graduate, degree applicants must achieve an overall grade point average of 3.0 (B) on a 4.0 scale with a grade of C in no more than two courses. The GPA for graduation will be based on all graduate courses attempted after acceptance into the program.

The M.F.A. in Fine Arts with a concentration in kinetic imaging will be a 60-credit hour program consisting of eight credit hours of graduate studio, four credit hours of graduate seminar and three credit hours of electives¹ (15 credit hours) each semester. The program will typically take two years of full-time study to complete.

The M.F.A. in Fine Arts with a concentration in kinetic imaging is consistent with national standards established by the accrediting National Association of Schools of Art and Design.

The curriculum for the M.F.A. in Fine Arts with a concentration in kinetic imaging is built on the understanding that incoming students will exhibit high levels of ability and quickly demonstrate a serious commitment to their work and artistic development. Students accepted into the graduate program will possess a competitive portfolio and a minimum 3.0 grade point average, with a B.A., B.F.A., B.S. or M.A. from an accredited university. Due to the interdisciplinary nature of these media arts disciplines, applicants with degrees in other disciplines will be encouraged to apply. At the end of the first year, students will go through an advanced candidacy review, where they will present and defend their work before their graduate committee, which will be composed of members from the Department of Kinetic Imaging and other fine arts departments, following the current M.F.A. model. During the final semester, graduates will be required to complete a body of work resulting in an M.F.A. exhibition and written thesis, which will serve as the capstone elements of the degree program and be evaluated by the student's graduate committee.

1

Electives may be chosen from among all university courses listed as 500-level or greater and require approval from a faculty adviser.

Curriculum requirements

Course	Title	Hours
Take 32 credits in the following course:		32

Department of Music

Terry Austin, Ph.D.

Professor and interim chair
arts.vcu.edu/music (<http://arts.vcu.edu/music/>)

VCU Music: Educating musicians to shape the stage, the classroom and the world

The Department of Music is committed to the advancement of Western art music and jazz as academic disciplines, as fields of professional endeavor and as significant expressions of culture. Entrance and graduation requirements comply with the National Association of Schools of Music guidelines. The department offers degree programs at the baccalaureate and master's levels, and each of them is described in detail on individual program pages within the Bulletins website. Students in the VCU Music community are involved in a musically rich environment of studio lessons, small classes, independent study and performances. They hear outstanding professional performers in the classical and jazz traditions and attend on-campus master classes with major touring artists. Student soloists also may appear with regional and university ensembles. Through the Mary Anne Rennolds Chamber Concert Series and other events, the department is one of the region's major sponsors of music performances. Approximately 250 students choose to major in music, with many other students from throughout the university taking courses and participating in ensembles. There are 26 full-time faculty, more than half of whom hold doctorates, in addition to 45 part-time instructors. Among the faculty are internationally recognized

performers, composers, researchers and teachers – musician-educators who are active in all facets of the professional music world. The faculty includes members and regular performers with ensembles that include the Richmond and Virginia symphonies, the New York Philharmonic, the Virginia Opera, Rhythm and Brass, and the Atlantic Chamber Ensemble. The faculty maintains a high level of recognition through each individual's publications, recordings, international performances and lectures. The department is housed in two buildings. The principal facility is the W.E. Singleton Center for the Performing Arts, which includes the 502-seat Sonia Vlahcevic Concert Hall, faculty offices, rehearsal rooms and special studios for organ, percussion and piano. The James W. Black Music Center has a 347-seat recital hall, classrooms, practice rooms, rehearsal spaces, faculty offices and studios.

Admission and auditions

An audition and interview are necessary for admission to programs in the Department of Music. Students must also meet the general admission requirements of the university. For audition information contact Virginia Commonwealth University, Department of Music, 922 Park Ave., Box 842004, Richmond, VA 23284-2004; phone (804) 828-1169 or email apply4music@vcu.edu.

Music education candidacy

In order to achieve candidacy, music education majors must maintain a minimum cumulative GPA of 2.8 and must demonstrate satisfactory completion of the Praxis I, ACT or SAT. Music education students who do not achieve candidacy will not be allowed to continue in the music education program, but may continue in one of the other music degree programs provided they meet the requirements.

Courses for non-majors

Students majoring in a field other than music are welcome and encouraged to register for ensembles, private lessons and a variety of classroom courses in music specifically designed for the non-music major. Some courses require an audition.

Grades and achievement levels

All music majors are required to maintain a cumulative GPA of 2.0 and pass at least one applied achievement level within any two-semester period (not including summers) in order to continue as music majors. Jazz studies majors must pass one applied achievement level of classical instrument study per two-semester period (not including summers) and at least one jazz applied music level within the first three semesters in order to maintain a jazz studies concentration. All music students also must pass MHIS 145-MHIS 146 by the end of the fourth semester. Any student who fails to meet or maintain these standards will not be allowed to continue as a music major. A student may audition for readmission into the department as a music major only with permission from the Department of Music.

A cumulative GPA of 2.8 is required for music education students to qualify for student teaching placement. Music education students who do not maintain a cumulative 2.8 GPA will not be allowed to continue in the music education track, but may continue in the Bachelor of Arts program or the Bachelor of Music performance track if they meet the minimum requirements that apply to those respective degree programs.

Electives in music

Students majoring in a field other than music may register for ensembles, private lessons and a variety of classroom courses in music. Classes

in music appreciation, African-American music, introduction to writing music, basic music skills and special offerings in music are specifically designed for the non-music major.

Internship in music

Interested students should consult with a faculty member closely associated with the appropriate field. As the student approaches junior academic standing, he or she may apply to the department for participation in APPM 493. Applications will be reviewed on the basis of academic GPA, instructor recommendation(s), professional promise, and demonstrated interest and competence in the area of study. The student must possess a minimum 2.5 overall GPA with a minimum 3.0 GPA in major course work in music. All students (including transfers) must have completed a minimum of 60 credits.

All internships for credit are approved by the Department of Music. The experience may also be coordinated by VCU's Cooperative Education/ Internship Program. The latter office requires completion of an application and resume.

Fees

All students registering for applied lessons (APPL 200) pay an applied lesson fee. Current fee rates for applied lessons (http://www.enrollment.vcu.edu/accounting/%20tuition_fees.html) can be found on the Student Accounting website.

Recital/convocation attendance

All undergraduate majors are required to pass four semesters of recital/convocation attendance for graduation. During each semester of enrollment, the student must attend a minimum number of concerts or recitals plus departmental convocations in order to pass the requirement.

Master class

This requirement consists of participation in weekly master classes in the student's applied major area. For students in the Bachelor of Music program, enrollment in master class is required for each semester that students enroll for a two-credit lesson on their principal performing instrument. A minimum of eight semesters in the performance concentration (jazz studies majors take four semesters classical and four semesters jazz) and six semesters for the music education concentration are required. Students in the Bachelor of Arts in Music program must also enroll in master class each semester they take a two-credit lesson until they complete a minimum of four semesters of master class on the same instrument.

Ensemble requirements

To ensure consistent skill development in ensemble settings, only one large ensemble credit per semester will be counted toward a student's large ensemble requirements. Students whose principal instrument is a band or orchestral instrument must satisfy the large ensemble requirement by performing in a large ensemble on that instrument. Students whose principal instrument is voice must satisfy the requirement by performing in a large choral ensemble on voice. Those whose principal instrument is piano must complete four of their six elective credits by playing the piano in ensembles. Jazz studies majors must have ensembles approved in advance by their adviser or program director. Bachelor of Arts students must earn six credits in either large or small ensembles.

- Music, Master of (M.M.) with a concentration in music education (p. 348)

Music, Master of (M.M.) with a concentration in music education

Program accreditation

National Association of Schools of Music

Program goal

The Master of Music with a concentration in music education program at VCU is designed to provide the opportunity for advanced, graduate study for the practicing professional music educator. It is the goal of the Department of Music that successful graduates emerge as leaders and innovators in the profession.

The curricular goal of the program is to provide flexibility in addressing the individual pedagogical interests of each student as well as the framework and foundations needed for continued advanced study in music education at the doctoral level. As part of this design, the degree is offered exclusively as a three-summer program, with continuous enrollment required following admittance to degree candidacy (fall and spring semesters prior to third summer). This design provides a “real-world” option for the practicing music educator to enter graduate study.

Student learning outcomes

1. Understand research in music education
2. Understand current issues in music education
3. Develop advanced pedagogical skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.M.	Summer only	Apr 1	None

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Baccalaureate degree in music or music education from an accredited institution
2. Virginia teaching certification in PK-12 music education (or same from a reciprocal state)
3. Written statement of personal philosophy of music education – used to assess thoughtful reflection on larger issues of the profession, ability to express thought in clearly written English and as diagnosis for specific deficiencies in this area
4. Three letters of recommendation – must include letter from persons who have directly observed applicant's teaching
5. Interview with the director of music education

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the Master of Music program requires a minimum of 30 graduate credit hours. The summer program is intended to be completed in three consecutive summer sessions and is structured into three cognate areas: music education, music pedagogy and professional education. Music education and music pedagogy cognate courses are offered on a rotating basis, with electives in music pedagogy developed and offered on an ongoing basis. This structure permits the student to enter the program at any given point in the sequence. The student will apply for degree candidacy following the completion of 18 credit hours. It is recommended that students enroll in eight to nine credit hours each summer. Final project credit hours are earned through online enrollment during the

fall/spring semester and in residency during the final summer session following admittance to degree candidacy.

Curriculum requirements

Cognate areas

Course	Title	Hours
Music education		
MUED 600	Seminar in Music Education	3
MUED 610	Psychology of Music	3
MUED 620	Introduction to Research in Music Education	3
Take three credits in the following course:		3

Department of Painting and Printmaking

Noah Simblist, Ph.D.

Associate professor and chair

arts.vcu.edu/paintingprintmaking (<http://arts.vcu.edu/paintingprintmaking/>)

The Department of Painting and Printmaking offers an undergraduate program that earns a Bachelor of Fine Arts in Painting and Printmaking, as well as a graduate program of study that leads to the Master of Fine Arts in Fine Arts. Students admitted to the programs are expected to have a high level of competence in either painting or printmaking. The graduate program is designed to encourage the development of professional attitudes and skills, with an emphasis on individual investigation.

The department is housed in the Fine Arts Building with 15 individual graduate studios plus a large graduate printmaking area in addition four state-of-the-art undergraduate printmaking studios: etching, lithography, screenprinting and digital. These facilities provide an excellent physical environment for the programs with easy access to the other fine art areas of sculpture and crafts. Established in 1928, the Department of Painting and Printmaking was the first department in what has become the School of the Arts. For nearly 70 years, the department has made significant contributions to the development of the School of the Arts' reputation as one of the premier art schools in the country.

The department supports an active and ambitious program of visiting artists and lecturers. Leading figures in the world of contemporary art visit to discuss their work, critique, visit studios, conduct workshops and meet with students throughout the year.

The Master of Fine Arts degree is the terminal degree in the studio areas of fine arts and is a requirement for most college and university teaching positions. Many graduate students have gained teaching experience in the department as part of their assistantship responsibilities, teaching classes in painting, drawing and printmaking. The department assists graduate students financially through a variety of teaching assistantships, graduate assistantships and scholarships.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in painting and printmaking (p. 350)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in painting and printmaking

Program goals

The graduate program advances the development of:

1. Individual studio and scholarly talents, interests and philosophies, used creatively to both expand and preserve our cultural heritage
2. Professional studio competence as exemplified by a significant body of work
3. Individuals with the potential to solve contemporary problems in all aspects of the visual arts and to explore and address new questions and issues
4. Professional competence in the dissemination of knowledge, including logical, clear verbal and written presentation of aesthetic ideas in teaching and other contexts
5. Scholarly competence in the organization, evaluation and interpretation of knowledge
6. Technical proficiency in relation to the tools, techniques and materials used in their field and the expertise to visually articulate their ideas
7. Proficiency regarding critical thinking and conceptual problem-solving with particular focus on the context and practice of painting and printmaking

Student learning outcomes

1. Define work in relation to history and practice
2. Engage fully in critical discourse
3. Increase knowledge of materials and techniques
4. Develop professional practice: engage in opportunities that develop the experience required to manage a creative professional career

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	None

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the requirements listed on the School of the Arts website (<https://arts.vcu.edu/admissions/how-to-apply/>).

Additionally applicants:

1. Should hold a baccalaureate degree from an accredited institution
2. Are expected to have a 3.0 (B) average on the last 60 semester hours of undergraduate work
3. Must submit a portfolio for review (A personal interview is encouraged.)
4. Must have completed a minimum of 36 credit hours of art at the undergraduate level

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.F.A. in Fine Arts with a concentration in painting and printmaking requires 60 credit hours and is usually completed in two years of full-time study. These credit hours are in studio areas,

augmented by seminar courses that relate to the history, theory and criticism of visual culture and its professional practices.

Graduate students must meet with committees composed of three faculty members, both individually and as a group, over the course of four semesters. At the end of the second semester students must mount an exhibition of their work to be considered for candidacy. At the end of the fourth semester the students must participate in the thesis exhibition at The Anderson, submit a written thesis and deliver a public lecture about their work.

Department of Photography and Film

Justin James Reed

Associate professor and interim chair

arts.vcu.edu/photofilm/ (<http://arts.vcu.edu/photofilm/>)

The Department of Photography and Film aims to facilitate a comprehensive artistic, technical and intellectual understanding and use of the mediums of photography and film; to provide a rigorous education in the arts, specifically in photographic and moving image media, and a broad education in other academic subjects; to foster a climate that inspires creativity, intellectual curiosity, freedom of expression and critical-thinking. The department fosters a pluralistic approach that allows both faculty and students to expand the traditional boundaries of the respective media and engage in multidisciplinary practice.

The department offers undergraduate concentrations in photography and filmmaking resulting in a Bachelor of Fine Arts in Photography and Film, as well as a graduate program that leads to a Master of Fine Arts in Fine Arts with a concentration in photography and film.

To promote student development and research of contemporary art practice and theory, the Department of Photography and Film presents a diverse and active visiting artist program. Through lectures, critiques and research courses, students are exposed to the valuable insights of respected international artists, scholars and critics. In addition, the visiting artists teach topics courses exploring the current artistic and conceptual foundations found in their own work. Graduate students are encouraged to establish an individual critical dialogue with the visiting artists and faculty and attain a strong critical and historical basis for their work.

The facilities include several critique and screening rooms; a large black-and-white darkroom; a large state-of-the-art digital photography and film editing lab; a shooting studio; a student checkout center with a wide range of still photography and film cameras, professional lights and sound recording equipment; a professionally staffed graphics lab located in the same building that provides student with digital services on several high-tech imaging devices; and individual graduate M.F.A. studios.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in photography and film (p. 352)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in photography and film

Program accreditation

National Association of Schools of Art and Design

Program goal

The mission of the M.F.A. in Fine Arts with a concentration in photography and film is to facilitate a comprehensive, advanced, intellectual and artistic understanding and use of the mediums of photography and filmmaking. The specific goals of the program are as follows: to foster a climate that inspires creativity, intellectual curiosity, freedom of expression and critical thinking; to attract and sustain a faculty of the highest quality by providing an environment conducive to their achieving and maintaining national and international stature; and to attract highly artistic and intelligent individuals interested in advanced study of the medium.

Student learning outcomes

1. Students will demonstrate a familiarity with contemporary critical theory and an ability to apply and investigate those ideas in their work.
2. Students will gain and display advanced skills in conceptual and technical use of the medium.
3. Students will be able to create photographs and films that display an advanced level of intelligence and artistic vision.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree

candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	None

Special requirements

- A portfolio is required for admission to this program. See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the requirements listed on the website above.

Degree requirements

The advanced study of photography and film is both broad and varied. Therefore, the program's requirements are flexible and determined by the needs of each student on an individual basis. There are, however, a few definite requirements. In addition to general VCU Graduate School graduation requirements (p. 31), on completion of the program, students must have knowledge of contemporary art history, a more in-depth knowledge of the history of their disciplines and an understanding of the critical dialogue that is connected with their medium. Courses are suggested for students to meet these requirements, based on their backgrounds.

Department of Sculpture and Extended Media

Mary Eisendrath

Assistant professor and interim chair

arts.vcu.edu/sculpture (<http://arts.vcu.edu/sculpture/>)

The Department of Sculpture and Extended Media's eight full-time faculty members and various part-time and technical faculty represent a spectrum of directions and philosophical attitudes. Faculty interests range from formal to conceptual, from the concrete to the evanescent. This breadth of interests is presented to students and contributes to the comprehensive nature of the department. Students are not only exposed to traditional sculpture media, but encouraged to explore technology's parameters and to pursue interdisciplinary activity.

The department encourages sculpture students to broaden their experience in other areas. By promoting a curriculum that encourages students to take a wide range of courses throughout the university, faculty stress links between art, science, the humanities and the world. As a consequence, sculpture students have rich, productive associations with professors in many fields.

Sculpture students are challenged to exploit their full potential by questioning notions of contemporary art. The goal is to provide students with the vocabulary, the seeds of discernment and the skills of both analysis and synthesis in order to become participants in the dialogue of our time. All of this takes place in an environment of high expectation regarding self-motivation, intellectual capacity and responsibility.

The sculpture program is housed in a state-of-the-art facility. Sculpture majors are provided with semi-private, locked studio spaces and are given time, support and encouragement to pursue their independently determined goals.

- Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in sculpture (p. 353)

Fine Arts, Master of Fine Arts (M.F.A.) with a concentration in sculpture

Program accreditation

National Association of Schools of Art and Design

Program goal

Formal and informal contact with faculty is designed into the program. Along with the Department of Sculpture's faculty, graduate students are exposed to a vigorous visiting artist schedule. Through studio reviews, seminars and research, students are expected to build an awareness of contemporary and historical definitions of art that will influence their creative work. In addition to their own investigations, graduate students participate in and contribute to the undergraduate program.

While the graduate program is generally a two-year, four-semester in-residence program, students are expected to continue studio pursuits either on campus or at an alternative site throughout the calendar year.

Student learning outcomes

1. Define work in relation to history
2. Take full advantage program resources

3. Develop knowledge of equipment and techniques
4. Develop professional practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Jan 15	None

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the requirements listed on the website above. Additionally:

1. Applicants should hold a baccalaureate degree from an accredited institution.
2. It is expected that applicants will have a 3.0 (B) average on the last 60 semester hours of undergraduate work.
3. A portfolio review is required. A personal interview is encouraged.
4. Applicants must have completed a minimum of 36 credit hours of art at the undergraduate level.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.F.A. in Fine Arts with a concentration in sculpture requires 60 credit hours and is usually completed in two years of full-time study. Most of these credit hours are in studio areas and are augmented by related courses in specialized academic fields. A graduate seminar meets weekly and addresses topics related to contemporary art and theory. Two required semesters of art and critical theory are presented in a course that surveys the major themes of contemporary art criticism.

Graduate students meet with individual committees composed of three faculty members. Each committee and student conducts an ongoing dialogue and critique. At the end of the second semester, students discuss their work at a candidacy critique comprising their committee and additional faculty members. M.F.A. recipients mount a comprehensive exhibition of their work at the university's Anderson Gallery at the successful conclusion of the program's second year.

The Master of Fine Arts program is based on intensive studio practice at an advanced level in the area of sculpture. The program is highly selective and is presently limited to 15 participants.

Program website: arts.vcu.edu/sculpture (<http://arts.vcu.edu/sculpture/>)

Department of Theatre

Sharon Ott

Associate professor and chair

arts.vcu.edu/theatre (<http://arts.vcu.edu/theatre/>)

The mission of the Department of Theatre is to educate and train students as theatre professionals and/or academicians in the field of performance, design/technology or theatre pedagogy.

In fulfilling its mission, the Department of Theatre provides students with the professional and cultural foundations essential for achieving the highest standards of the art. The department offers three degrees – a Bachelor of Arts, a Bachelor of Fine Arts and a Master of Fine Arts – to which applicants are admitted based on demonstration of ability, genuine interest determined during an interview, and audition and/or portfolio presentation.

In addition to introductory theatre and acting courses for non-majors, the department also serves students throughout the university with offerings in speech communication.

The Department of Theatre employs 23 faculty and staff and enrolls 230 undergraduate and 40 to 50 full-time graduate students. Theatre VCU produces four mainstage productions and numerous graduate and undergraduate directing projects each year.

Theatre, Master of Fine Arts (M.F.A.) with a concentration in costume design

Program accreditation

National Association of Schools of Theatre

Program goal

The M.F.A. in Theatre offers concentrations in stage design/technical theatre and costume design, which comprise the professional option, and in literature and performance, which make up the pedagogy option. Focus areas in pedagogy include movement, performance, and voice and speech.

Student learning outcomes

The M.F.A. degree prepares students to either enter the professional field of design or to teach at the college or university level. Students will demonstrate theoretical and practical knowledge in their areas of focus, as well as in the core courses in history, literature and theory; and in teaching performance or production. They will be evaluated on their ability to teach undergraduates, a final thesis project and approval of a professional-quality design, presentation or publishable article.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Feb 15 (suggested)	None

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must possess a bachelor's degree (theatre preferred). Students must present a portfolio of design work (both project and realized designs) as part of their application to the program. Professional experience will be considered. The program provides preparation for early to midcareer professionals to enter the field of either professional design or teaching theatre at the college/university level.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to take 60 credit hours of graduate-level course work distributed among core courses, area of concentration and electives, including special topics courses. The program is usually completed within two to three years.

Costume design concentration

The costume design concentration's degree requirements include 12 credit hours in core courses, 12 to 18 credit hours in (level-appropriate) design studio and three to six credit hours of thesis/thesis project. The balance of credit hours will be in approved electives, which may include additional practica, research and production, or professional internships. Students will take practical courses and assist faculty in teaching and design projects. They may be advised to take additional history or drawing courses to ensure that they possess the background required for advanced design projects. Their design skills and professional preparation will be evaluated by the faculty through portfolio presentations and participation at professional conferences.

Theatre, Master of Fine Arts (M.F.A.) with a concentration in pedagogy/performance

Program accreditation
National Association of Schools of Theatre

Program goal

The M.F.A. in Theatre offers concentrations in stage design/technical theatre and costume design, which comprise the professional option, and in literature and performance, which make up the pedagogy option. Focus areas in pedagogy include movement, performance, and voice and speech.

Student learning outcomes

The M.F.A. degree prepares students to either enter the professional field of design or to teach at the college or university level. Students will demonstrate theoretical and practical knowledge in their areas of focus, as well as in the core courses in history, literature and theory; and in teaching performance or production. They will be evaluated on their

ability to teach undergraduates, a final thesis project and approval of a professional-quality design, presentation or publishable article.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Feb 15 (suggested)	
	Spring	Nov 15 (suggested)	

Special requirements

- See arts.vcu.edu/admissions/how-to-apply (<http://arts.vcu.edu/admissions/how-to-apply/>) for details on the application process.
- Audition required.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must possess a bachelor's degree (theatre preferred). Students must present a portfolio of design work (both project and realized designs) as part of their application to the program. Professional experience will be considered. The program provides preparation for early to midcareer professionals to enter the field of either professional design or teaching theatre at the college/university level.

Degree requirements

In addition to general Graduate School graduation requirements (p. 31), students are required to take 60 credit hours of graduate-level course work distributed among core courses, area of concentration and electives, including special topics courses. Students will also be evaluated on performance projects, production work and teaching. The program is usually completed within two to three years.

Pedagogy/performance concentration

Requirements of the pedagogy/performance concentration include 18 credit hours in core courses (including theatre pedagogy and production), 12 to 15 credit hours in a focus area (voice and speech, performance, or movement) and six credit hours of thesis/thesis project. The remainder of the program consists of approved elective courses. Students will take practical courses and assist faculty in teaching. Their teaching effectiveness will be evaluated by area faculty.

Founded in 1998 as a collaboration between the Qatar Foundation for Education, Science and Community Development and Virginia Commonwealth University School of the Arts, the School of the Arts in Qatar offers the baccalaureate degrees in art history, fashion design, graphic design, interior design, and painting and printmaking, as well as a Master of Fine Art in Design. Its purpose is to provide special educational opportunities preparing graduates for leadership roles in the design professions and art history. Courses emulate those offered on VCU's Monroe Park Campus. Graduates are prepared for exciting careers in these growing fields.

VCU School of the Arts obtained the appropriate approvals from the VCU Board of Visitors and the State Council of Higher Education for Virginia and admitted the first class to what would become VCU School of the Arts in Qatar in fall 1998. SCHEV approved the request in April 2001 and forwarded its recommendation to the governor and General Assembly. The 2002 General Assembly adopted legislation authorizing VCU to establish a campus in Qatar.

- Design, Master of Fine Arts (M.F.A.) with a concentration in design studies [VCUQatar Campus] (p. 364)

Design, Master of Fine Arts (M.F.A.) with a concentration in design studies [VCUQatar Campus]

Program accreditation

National Association of Schools of Art and Design

Mission statement

The M.F.A. in Design with a concentration in design studies defines and inhabits an area between design disciplines. The purpose of the program is to produce designers who are experts at negotiating and utilizing elements of many different fields to construct new tailored experiences.

Tomorrow's designers must be able to understand their audiences, collaborators and patrons in original and authentic ways. Global cultures already experience design in a singular fashion. The practices at VCUQ combine graphics, interaction, engineering, systems, architecture, fashion and product design into a merged experience. Designers who are able to work outside their individual discipline will be at an advantage. The designers of the future will need to navigate between forms of practice, combining elements and skills to create new products, visuals, environments and interactions.

VCUQ is looking for creative, motivated, hardworking, self-directed individuals willing to engage with challenging topics. The program sets high demands on its students, requiring them to familiarize and grasp the myriad of variables involved in meaningful design, while simultaneously having the discipline and rigor to formulate their own assessment of what being a designer — in all its guises — entails today.

Students in this program should be able to question; be open to explore and experiment; stay true to ethical foundations; lead and be bold, while being open and flexible to adjust to shifting paradigms. The school strives to expose students to a variety of tools, materials and methods, while providing the theoretical background and research methodologies that will allow each student to develop their own unique ideas.

The M.F.A. in Design with a concentration in design studies celebrates the amorphous notion of what is called "empirical vagueness," a term that encapsulates the simultaneously analytical, yet intuitive, fashion in which a design endeavor is developed. Students, alumni and faculty all play a role in exploring and fostering this as an essential, if inherently open-ended, calling.

Program goals

1. **Creative leadership:** Students will achieve mastery in creative leadership, with the skills and knowledge needed to achieve success as design professionals and entrepreneurs, educators, and researchers, and they will be able to creatively engage with the broad design community to bring added value to the regional economy, society and culture.
2. **Integrated research:** Students will integrate practice and theory to ensure the highest level of critical knowledge and to make meaningful contributions to pedagogy and teaching in the design disciplines. The program provides increased focus and visibility for individual and collaborative research activity that has an applied focus.
3. **Interdisciplinary emphasis:** Students will achieve high levels of creativity, literacy and knowledge across the design disciplines.
4. **Community impact:** Students will engage and raise social awareness.

5. **Career development:** The program will develop graduates with skills and knowledge to make meaningful contributions to pedagogy and teaching in the design disciplines. It also will provide opportunities that encourage students to engage and present their work in connection with the professional world.

Student learning outcomes

1. Students will demonstrate the ability to effectively communicate in speech about their research and studio activities.
2. Students will demonstrate the ability to effectively communicate in writing about their research and studio activities.
3. Students will demonstrate the ability to practice lifelong learning by dealing with new forms of design practice and other changes in the discipline.
4. Students will demonstrate the ability to integrate ideas from historical, social and cultural movements; from policies and theories; and from the dynamics of historical, social and cultural change.
5. Students will demonstrate the ability to apply appropriate technologies to projects in their field.
6. Students will demonstrate the ability to synthesize knowledge from different disciplines to solve design problems.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

The student handbook (<http://qatar.vcu.edu/images/uploads/documents/MFA-ProgramHandbook.pdf>) is available online.

Apply online at graduate.admissions.vcu.edu (<http://graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.F.A.	Fall	Feb 1	TOEFL: 570 (paperbased), 230 (computer-based) or 88 (Internet-based)

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit the following documentation and meet the following requirements:

1. A brief statement of intent that addresses:
 - a. The reason for graduate study in design studies
 - b. How previous studies and experiences have prepared the applicant for the M.F.A. program
 - c. Career objectives and how the M.F.A. program relates to them
2. A digital portfolio of visual or written work that includes:
 - a. Samples of relevant work that show creative thinking, idea development and visualization skills
 - b. Works that support the ideas shared in the statement of intent
 - c. No more than 20 individual works
3. A prepared presentation (for individuals selected for the interview)
4. A resume that highlights the applicant's previous experiences and studies as they relate to graduate study at VCUQatar
5. Three letters of recommendation from former professors, teachers, mentors or supervisors familiar with the applicant's academic and/or professional ability and aptitude toward graduate study

Note: In the VCUQatar portfolio system, applicants are able to send an online form to each recommender. Alternatively, the applicant can deliver a printed recommendation letter to the Admissions Office. Download a recommendation template to use.
6. Official academic transcripts (secondary and postsecondary) for all university studies
 - a. Submit officially certified copies of all academic diplomas, certificates, national and other major examination results. Transcripts in languages other than English must also include a certified English translation. Transcript(s) must be properly

sealed and stamped by the issuing institution and must be delivered to VCUQatar Admissions Office either by hand or post.

- b. The address on the official online application Confirmation Page will list a Richmond, VA address for supporting materials, but all documents should be sent to the VCUQatar Admissions Office.
7. For applicants whose first language is a language other than English, an English language proficiency test with the following minimum requirements: < >TOEFL: 570 (paper-based), 230 (computer-based) or 88 (Internet-based)IELTS: 6.5Note: Test scores must be sent electronically by the testing center. The TOEFL code for admission testing to VCUQatar is 5570. There is no code for IELTS.
8. The English language proficiency tests and standardized testing (TOEFL, SAT, ACT and IELTS) can be taken at the QF Test Center in Education City. Please visit the test center's website to see the latest dates.
9. A legible copy of the applicant's passports uploaded using the online application
10. A non-refundable application fee of \$50 (US) or QAR183 for each M.F.A. application (This can be paid by credit card when submitting the online application form or at the VCUQatar's Cashier Office.)

Important reminders

1. All admission supporting materials (excluding exam scores and transcripts) must be uploaded electronically using the VCUQatar online application process at <https://ssb.vcu.edu>.
2. Original, official TOEFL/IELTS score reports must be sent to VCUQatar via courier or delivered in person to the Admissions Office.
3. Applicants must ensure that letters of recommendation reach the office using either the VCUQatar portfolio application system or the downloadable template.
4. Only complete applications will be considered for assessment.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must meet the following minimum requirements:

1. Total of 60 credit hours
2. Publication/documentation as specified
3. Qualification for degree candidacy
4. Thesis and final research project, exhibition and oral defense

Curriculum requirements

Course	Title	Hours
DESI 510	Materials and Methods Studio	3
DESI 511	Studio in Digital Design and Fabrication Technology	3
DESI 512	Studio in Visual Communications	3
DESI 520	Design Research Methodologies	3
DESI 601	Interdisciplinary Design Seminar	3
DESI 605	Design Strategies and Ethics for Business	3

DESI 612	Design Studio Two	6
DESI 613	Design Studio Three	6
DESI 620	Design Thesis Research and Formulation	3

DESI 621	Design Research Studio: Leadership and Entrepreneurship	3
DESI 630 or DESI 631	Teaching Practicum in Design Design Internship	3
DESI 690	Thesis Studio	9
Approved studio electives ¹		6
Total Hours		60

1

Approved electives (six credit hours) may be selected from a variety of 500- and 600-level courses offered at VCUQatar and VCU in Richmond. In addition, students are encouraged to enroll in 500- and 600-level elective courses offered by other accredited universities within Hamad bin Khalifa University in Qatar or any other internationally accredited university. Before taking a course outside of VCU, the student must submit a course syllabus to the M.F.A. in Design program director for approval.

The minimum total of graduate credit hours required for this degree is 60.

Sample plan of study

Probationary course work may be required prior to gaining full admission to the program. The amount and type of undergraduate course work will be determined at the time of application, and no graduate credit hours will be awarded for this probationary course work. The decision to grant full admission will be based upon successful completion of the required course work.

Semester 1		Hours
DESI 511	Studio in Digital Design and Fabrication Technology	3

SCHOOL OF BUSINESS

A close-knit community within a leading urban, public university, the VCU School of Business enrolls 4,000 students in a wide range of bachelor's, master's, certificate and doctoral programs. The school ranks in the top 5 percent of business schools worldwide due to its accreditation by AACSB International. From its founding in 1937, the school has developed strong connections with the business community in Richmond and beyond, with students actively engaged in internships, corporate projects and learning from executives.

Strategic plan

In 2015-16, the VCU School of Business launched a bold strategic plan, EPIC, to build on its strengths and ensure that the school's students are prepared to thrive in a changing world. As the business landscape grows increasingly complex, companies in every industry need creative solutions. Leaders are seeking to hire graduates who have a solid foundation in their chosen business discipline — combined with the ability to bring fresh thinking and a creative approach to solving problems.

Our vision

Drive the future of business through the power of creativity

Our mission

To be a dynamic hub of business education and research, fueled by creativity and a commitment to preparing students to lead in a complex world

EPIC Pillars

Experiential learning, Problem-solving curricula, Impactful research, Creative culture

The School of Business, its programs and faculty have received national recognition from top publications such as U.S. News & World Report, the Princeton Review, Bloomberg Businessweek, The CEO Magazine and Advertising Age. In 2014, the top-ranked VCU Brandcenter joined the School of Business. Graduates from all programs are welcomed into the VCU Business Alumni Society.

Accreditation

The School of Business is accredited by the Association to Advance Collegiate Schools of Business, which accredits programs of professional education in business at the collegiate level. AACSB International accreditation represents the highest standard of achievement for business schools worldwide. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. AACSB International accreditation is the hallmark of excellence in management education.

The School of Business is the first school of business in the nation to gain accreditation from the Accreditation Board for Engineering and Technology for its undergraduate program in information systems.

Financial aid, scholarships and awards

Scholarships and awards

In addition to university scholarships, business students may apply and compete for scholarships awarded through School of Business endowed scholarship funds or through the various School of Business academic programs. For detailed information on scholarships and awards, visit the School of Business website.

Cooperative education and internships

Business students are eligible for the university's cooperative education program. Qualified students placed with an employer will either alternate one semester of full-time study with one semester of full-time work or combine study with part-time work during the same semester. The School of Business also offers internships, allowing advanced students to pursue part-time work assignments with area employers.

Assistantships

The School of Business offers a limited number of graduate assistantships to full-time students for the academic year. For further information, write to the Graduate Studies in Business Office.

Graduate students also are eligible for funds administered under the National Defense Loan and college work-study programs. For further information, write to Director of Financial Aid, Virginia Commonwealth University, Richmond, VA 23284-2526.

Graduate information

Graduate programs

The School of Business offers degree programs leading to the Master of Arts in Economics, Master of Accountancy, Master of Business Administration, Master of Business Administration/Master of Science in Information Systems, Master of Science in Business, Master of Science in Information Systems, Master of Taxation, and the Ph.D. in Business and Pharm.D./M.B.A.

Graduate policies

Enrollment in graduate courses

Students may not enroll in any graduate business courses (except SCMA 500) for credit without first being admitted formally to a graduate degree or graduate certificate program.

Exceptions may be granted by the director of graduate studies in business to students with superior academic records. No credit will be given for graduate classes taken prior to acceptance into a graduate degree program in business or economics unless such an exception has been granted. A form to request such an exception is available from the Graduate Studies in Business Office.

A "graduate transient" classification may be granted to a student in good standing in any graduate school accredited by the Association to Advance Collegiate Schools of Business who wishes to enroll in the School of Business for any one semester or summer session. Students will be required to present certificates of graduate standing but will not have to submit the data normally required for an admission decision. A form is available from the Graduate Studies in Business Office to facilitate transient enrollment.

Transfer credit

A maximum of six semester hours of acceptable graduate credit earned in a degree program at an AACSB-accredited institution may be transferred and applied toward the graduate degree. Acceptance of transfer credit is made at the discretion of the director of graduate studies in business.

All transfer work must be at the A or B grade level. Students must be in good standing both at VCU and at the institution from which the credits were earned. Additionally, students must have had full admission during the time these credits were earned at that college or university. Transfer credit shall not be older than seven years at the time the degree is awarded.

Credit to be earned at other institutions after acceptance in the graduate program must be approved in advance, and approval is granted at the discretion of the director of graduate studies in business. Such work is approved only under unusual circumstances such as job transfers or other extenuating circumstances.

Advising program

All students admitted to graduate programs are assigned advisers. Students are expected to work with their advisers to plan their graduate programs. Each student is required to complete an approved program form and file it with the Graduate Studies in Business Office no later than the end of the first semester in which the student is admitted. The curriculum plan described on the form must be approved by both the adviser and the director of graduate studies in business. Courses taken without approval are taken at the student's own risk.

Students are responsible for knowing and fulfilling all general and specific requirements relating to the completion of their degree programs. Answers to specific questions may be obtained from the Graduate Studies in Business Office, (804) 828-4622.

Change in program or concentrations

Students who wish to change their graduate programs or areas of concentration within the school must make that request in writing to the director of graduate studies in business. The director will advise them

of the necessary requirements and whether the change is possible. The student must be in good standing at the time of change.

Notification

The student should notify in writing both the Office of Records and Registration and the Graduate Studies in Business Office, 301 W. Franklin St., Box 844000, Richmond, VA 23284-4000, of any address changes. Students who do not wish to register in any given semester must notify in writing the Graduate Studies in Business Office of their intent not to register and their plans for continuation in the program.

Student appeals

Appeals for exceptions to policies or academic standards may be made in writing to the Graduate Studies in Business Office, School of Business, Virginia Commonwealth University, 301 W. Franklin St., Richmond, VA 23284-4000.

Individual research projects

Various opportunities exist for students to work closely with faculty on individual research projects. Courses in the School of Business numbered 690, 693 and 697 are suitable for this purpose. No more than one research course may be taken as part of a master's program.

Registration in all research courses requires approval of both the student's adviser and the director of graduate studies in business. Forms for this purpose are available upon request from the Graduate Studies in Business Office. Students are expected to seek permission to register in research courses by the end of the semester or summer session preceding the semester or summer session for which registration is desired. The written research report is required to be filed at the Graduate Studies in Business Office no later than the last day of classes of the semester or summer session in which the course is taken.

General requirements for master's degrees

In addition to the general academic regulations stated in the Graduate study (p. 34) section of this bulletin and the regulations listed earlier in this section, master's students in the School of Business are subject to the following requirements:

1. A course for which a passing grade was received cannot be repeated without prior written permission of the director of graduate programs in business. An appeal to the School of Business master's committee is required.
2. Students who satisfy all requirements except the 3.0 average may be allowed to take a maximum of six additional credit hours to raise the average. Students are required to appeal to the School of Business master's committee for permission.
3. A foundation course may be waived by the director of graduate studies in business, based on satisfactory completion of equivalent undergraduate work prior to acceptance in the program. CLEP credit at the B or higher level may be accepted in lieu of foundation courses with permission. The waiver of courses is at the discretion of the School of Business.
4. A maximum of two one-year extensions may be granted by the director of graduate studies in business in the time allowed to complete a degree if satisfactory progress has been demonstrated on the part of the student requesting an extension. For extensions, write to the director of graduate studies in business.
5. Students are not permitted to take undergraduate courses equivalent to foundation courses once they are admitted to the graduate

program without the written permission of the director of graduate studies in business.

6. Grades received for undergraduate courses are not included in the calculation of the cumulative graduate GPA.
7. All students admitted into a program must have earned a bachelor's degree or its equivalent. To be accepted in the graduate program, in addition to other requirements, applicants must be in good standing at the college or university they previously attended.

Business Administration, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Note: Admission to this program is temporarily suspended.

Program goal

The post-baccalaureate graduate Certificate in Business Administration is designed for professionals with little or no prior business course work who seek an opportunity for advanced study in core business function areas. The certificate provides students the ability to advance their careers while receiving recognition for academic accomplishment in the form of a graduate certificate. By completing the curriculum for the certificate, students will have satisfied the foundation course requirements in the M.B.A. and other master's programs in business.

Student learning outcomes

1. To apply communication skills in new and unfamiliar circumstances in a form that can be readily communicated to entry-level, midlevel and senior-level managers
2. To analyze the ethical dimensions of a business situation, to relate those dimensions to professional ethical standards, and to formulate and defend possible resolutions from the perspective of entry-level managers
3. To select, conceptualize and apply appropriate quantitative techniques or approaches in order to analyze business problems for the purpose of decision-making by entry-level managers
4. To critically evaluate and use accounting and/or other financial information for the purpose of decision-making by entry-level managers

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Business policies and procedures for graduate master's degree students (<http://business.vcu.edu/graduate-studies/current-graduate-students/>) are available on the school's website.

Note: Admission to this program is temporarily suspended.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 1	
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have earned a baccalaureate degree or its equivalent from an accredited college or university. This program is intended for students with an undergraduate degree in an area other than business management. Other admission requirements include a minimum undergraduate GPA of 2.7 in at least 60 hours of course work. Work experience is preferred.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core courses. In order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Completion of this graduate certificate program requires 21 credit hours beyond the bachelor's degree. The director of graduate studies in the School of Business may waive up to 12 credit hours based upon equivalent course work completed in the past five years with a minimum grades of B presented. Students who have not completed a precalculus math course may take MATH 151 during enrollment in the certificate program. Successful completion of the graduate certificate program does not guarantee admission to a master's-level program. Students interested in applying at a later date to either the M.B.A. or other master's programs must do so through a separate application process.

Curriculum requirements

Course	Title	Hours
Required courses		
ACCT 507	Fundamentals of Accounting	3
ECON 500	Concepts in Economics	3
FIRE 520	Financial Concepts of Management	3

Business, Doctor of Philosophy (Ph.D.) with a concentration in accounting

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Ph.D. in Business program is designed specifically for individuals intending to fill positions at institutions that require a balance of scholarly training, teaching and practical application of the appropriate field of study. With its small size, the program allows for extensive one-to-

one interaction between students and faculty. Three concentrations are offered: accounting, information systems and management.

A basic tenet of the Ph.D. in Business program is that the classic trilogy of research, teaching and service typically invoked in university mission statements is synergistic. The program strives to develop graduates who share this perspective and aspire to well-rounded individual roles within universities, colleges and other learning organizations. For this reason, the program provides instruction in both research and teaching.

Instruction in basic and applied research is the cornerstone of the program. To fulfill the requirements for the degree, students must demonstrate successful completion of prerequisite and advanced courses, comprehensive examinations, and completion and defense of a dissertation. The advanced courses provide coverage in basic theories, methodologies and techniques needed to conduct research. The dissertation demonstrates the student's competence in conducting independent research.

Enhancement of teaching skills is emphasized in the program. It provides students with mentoring and teaching experience. Formal instruction designed to augment student teaching skills is also required. Mentoring involves teaming a student with a faculty member with the goal of augmenting student self-awareness and self-confidence in the classroom. Classroom experience is required to insure that the Ph.D. graduate enters the job market with certifiable teaching experience. The formal courses are designed to provide substantive instruction on teaching the adult learner.

A third aspect of the Ph.D. program is its emphasis on practical application in the area of study for students concentrating in accounting. In accounting emphasis is placed on projects based on real-world experience, and students are encouraged to develop papers around topics that address practical application of accounting concepts.

Student learning outcomes

1. Students will demonstrate the ability to apply general principles of scientific research and methodologies to critically review published research papers.
2. Students will demonstrate the ability to (a) design a research study, (b) select the appropriate methodology and (c) develop the study into a research proposal.
3. Students will demonstrate the ability to identify ethical dilemmas in the major area of study and know how to respond ethically to such issues.
4. Students will demonstrate an understanding of current knowledge in the major area of study.
5. Students will demonstrate the ability to effectively communicate and teach knowledge in the major area of study.
6. Students will demonstrate the ability to develop and conduct research in the major area of study (i.e., complete an independent doctoral-level research project pertaining to the state of the art of the student's major area).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all

graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Other information

School of Business policies and procedures for graduate master's degree students (<http://business.vcu.edu/graduate-studies/current-graduate-students/>) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 1	GMAT

Note: Accounting majors are admitted for the fall of odd-numbered years.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the doctoral program in business must submit an up-to-date resume.

Degree requirements

Upon admission to the Ph.D. program, faculty will evaluate students to determine if they have attained a basic competency level in general business disciplines. Students who have already completed a master's degree in business will likely have met all foundation/prerequisite requirements.

Students who enter the Ph.D. in Business without an education in business will be expected to meet the foundation requirements for the intended concentration area of study as determined by their advisers.

In addition to the VCU Graduate School graduation requirements (p. 31), Ph.D. in Business students must complete a minimum of 53 graduate credit hours, including core, concentration and elective course work, and a minimum of 12 credit hours of dissertation research. Each student must also complete a teaching portfolio and take a written comprehensive examination in the concentration area.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the doctoral program in business must submit an up-to-date resume.

Degree requirements

Students should at a minimum possess knowledge equivalent to the core courses in the Master of Science in Information Systems program: INFO 610, INFO 620, INFO 630 and INFO 640. Students who do not have knowledge equivalent to these courses, as assessed by the IS department Ph.D. committee, must take one or more of the courses in which they lack knowledge upon admission into the Ph.D. program.

In addition to the VCU Graduate School graduation requirements (p. 31), Ph.D. in Business students must complete a minimum of 53 graduate credit hours, including core, concentration and elective course work, and a minimum of 12 credit hours of dissertation research. Each student must also complete a teaching portfolio and take a written comprehensive examination in the concentration area.

Curriculum requirements

Course	Title	Hours
Ph.D. in Business core		
BUSN 700	Principles of Scientific Inquiry in Business	3
BUSN 701	Research Methods in Business	3
ECON 501	Introduction to Econometrics	3
GRAD 602	Teaching and Learning in Higher Education	2
Concentration research courses		
INFO 701	Qualitative Research in Information Systems	3
INFO 702	Design Science Research and Methods in Information Systems	3
Concentration seminar courses		12
Complete four of the following IS doctoral seminars:		
INFO 710	Database Systems	
INFO 720	Analysis and Design of Systems	
INFO 730	Information Systems Strategy	

INFO 740	Decision Support and Intelligent Systems	
INFO 750	Information Systems Security	
INFO 760	Knowledge Management	
INFO 790	Doctoral Seminar	
Electives ¹		
Four additional courses, as approved by concentration coordinator		12
Dissertation research		
INFO 898	Dissertation Research in Information Systems (minimum of 12 credit hours)	12

1

Choose four additional courses, of which up to three may be 600-level courses taught by doctoral (or equivalent) faculty, where the selection of such courses is approved by the department's Ph.D. committee or the department Ph.D. adviser. All four may be guided studies, but no more than two guided studies may be supervised by the same faculty member.

The minimum total of graduate credit hours required for this degree is 53.

Business, Doctor of Philosophy (Ph.D.) with a concentration in management

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Ph.D. in Business program is designed specifically for individuals intending to fill positions at institutions that require a balance of scholarly training, teaching and practical application of the appropriate field of study. With its small size, the program allows for extensive one-to-one interaction between students and faculty. Three concentrations are offered: accounting, information systems and management.

A basic tenet of the Ph.D. in Business program is that the classic trilogy of research, teaching and service typically invoked in university mission statements is synergistic. The program strives to develop graduates who share this perspective and aspire to well-rounded individual roles within universities, colleges and other learning organizations. For this reason, the program provides instruction in both research and teaching.

Instruction in basic and applied research is the cornerstone of the program. To fulfill the requirements for the degree, students must demonstrate successful completion of prerequisite and advanced

courses, comprehensive examinations, and completion and defense of a dissertation. The advanced courses provide coverage in basic theories, methodologies and techniques needed to conduct research. The dissertation demonstrates the student's competence in conducting independent research.

Enhancement of teaching skills is emphasized in the program. It provides students with mentoring and teaching experience. Formal instruction designed to augment student teaching skills is also required. Mentoring involves teaming a student with a faculty member with the goal of augmenting student self-awareness and self-confidence in the classroom. Classroom experience is required to insure that the Ph.D. graduate enters the job market with certifiable teaching experience. The formal courses are designed to provide substantive instruction on teaching the adult learner.

Student learning outcomes

1. Students will demonstrate the ability to apply general principles of scientific research and methodologies to critically review published research papers.
2. Students will demonstrate the ability to
 - a. Design a research study
 - b. Select the appropriate methodology
 - c. Develop the study into a research proposal
3. Students will demonstrate the ability to identify ethical dilemmas in the major area of study and know how to respond ethically to such issues.
4. Students will demonstrate an understanding of current knowledge in the major area of study.
5. Students will demonstrate the ability to effectively communicate and teach knowledge in the major area of study.
6. Students will demonstrate the ability to develop and conduct research in the major area of study (i.e., complete an independent doctoral-level research project pertaining to the state of the art of the student's major area).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Other information

School of Business policies and procedures for graduate master's degree students (<http://business.vcu.edu/graduate-studies/current-graduate-students/>) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Feb 1	GMAT or GRE

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the doctoral program in business must submit an up-to-date resume.

Degree requirements

Upon admission to the Ph.D. program, faculty will evaluate students to determine if they have attained a basic competency level in general business disciplines. Students who have already completed a master's degree in business will likely have met all foundation/prerequisite requirements.

Students who enter the Ph.D. in Business without an education in business will be expected to meet the foundation requirements for the intended concentration area of study as determined by their advisers.

In addition to the VCU Graduate School graduation requirements (p. 31), Ph.D. in Business students must complete a minimum of 56 graduate credit hours, including core, concentration and elective course work, and a minimum of 12 credit hours of dissertation research. Each

student must also complete a teaching portfolio and take a written comprehensive examination in the concentration area.

Business, Master of Science (M.S.) with a concentration in finance

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The goal of the Master of Science in Business with a concentration in finance program is to train students to take on the quantitatively challenging and highly competitive business environment of the financial industry. Students learn skills to effectively analyze, develop and communicate solutions that take into consideration ethical implications.

Student learning outcomes

1. Graduates will be able to conceptualize and apply quantitative measurement methods, to analyze business problems and to propose solutions.
2. Graduates will be able to analyze a business problem in terms of both quantitative and qualitative aspects, including:
 - a. A precise statement of the problem and how it relates to the goals of the firm
 - b. A consideration of the ethical, policy and/or practicality limitations on any proposed solution strategy
 - c. A statement and consideration of proposed solutions strategies and their implementation within the limitations
 - d. A plan for implementation and monitoring of the proposed solution
3. Graduates will be able to analyze the ethical dimensions of a business situation and relate those dimensions to general ethical standards as well as to professional ethical standards.
4. Graduates will be able to express the analytic, quantitative and ethical dimensions of business problems and proposed solutions in a clear and well-organized manner.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the [academic regulations section](#) for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section](#) for additional information on graduation requirements.

Other information

School of Business policies and procedures for graduate master's degree students (<http://business.vcu.edu/graduate-studies/current-graduate-students/>) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GMAT or GRE*
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

The finance concentration prepares students for financial decision-making positions in corporate, investment, financial and governmental institutions. Courses offered in finance include advanced financial management, investments and security analysis, funds management in financial institutions, international finance, and derivatives.

In addition to the VCU Graduate School graduation requirements (p. 31):

- All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
- Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent

knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

Curriculum requirements

Course	Title	Hours
Prerequisite		
Calculus		
SCMA 212	Differential Calculus and Optimization for Business	3
or SCMA 500	Quantitative Foundation for Decision-making	
Foundation courses		
ACCT 507	Fundamentals of Accounting	3
ECON 500	Concepts in Economics	3
FIRE 520	Financial Concepts of Management	3
SCMA 524	Statistical Fundamentals for Business Management	3
Required core courses		
FIRE 621	Cases in Financial Management	3
FIRE 622	Financial Management of Financial Institutions	3
FIRE 623	Financial Management	3
FIRE 635	Investments and Security Analysis	3
FIRE 650	Derivatives	3
Approved electives		
Select four of the following:		12
ACCT 608	Managerial Accounting Concepts	
ECON 617	Financial Markets	
FIRE 626	Risk Management	
FIRE 629	Real Estate Investment Analysis	
FIRE 639	International Finance	
FIRE 654	Short-term Financial Management	
FIRE 657	Current Issues in Investments and Markets	
FIRE 658	Real Estate Finance and Investments	
FIRE 664	Current Issues in Corporate Finance	
FIRE 691	Topics in Finance, Insurance and Real Estate	
FIRE 693	Field Project in Finance, Insurance and Real Estate ¹	
or FIRE 697	Guided Study in Finance, Insurance and Real Estate	
Free electives		
Select one of the following: ^{2,3}		3
ACCT (any 600-level)		
ECON (any 600-level)		
FIRE (any 600-level)		
INFO 610	Analysis and Design of Database Systems	
INFO 611	Data Re-engineering	
INFO 614	Data Mining	
INFO 632	Business Process Engineering	
MGMT 644	International Business Management	
MGMT 655	Entrepreneurship	
MKTG 656	International Marketing	

MKTG 673	Marketing Research
SCMA 632	Statistical Analysis and Modeling
SCMA 643	Applied Multivariate Methods
SCMA 669	Developing and Implementing Forecasting Methods for Business

Total Hours 45

1

FIRE 693 is recommended for full-time students. The department will work closely with full-time students and prospective employers in order to achieve this goal. Students may not use both FIRE 693 and FIRE 697 toward degree requirements

2

A student may substitute a free elective for one of the FIRE electives with the approval of the director of the concentration in finance.

3

Students may choose any free elective approved by the director of the M.S. program in finance. Students are encouraged to select accounting, economics, math, or statistics courses. These courses are pre-approved electives and therefore do not require further approval.

The minimum total of graduate credit hours required for this degree is 45 (30 if prerequisite and all foundation courses are waived).

Business, Master of Science (M.S.) with a concentration in global marketing management

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Science in Business with a concentration in global marketing management offers students the opportunity to combine their studies in international marketing with contemporary issues in marketing management.

Student learning outcomes

1. Students will demonstrate the ability to evaluate global marketing programs to identify strategic issues.

2. Students will present an international marketing plan proposal that they developed to a client.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Business policies and procedures for graduate master's degree students (<http://business.vcu.edu/graduate-studies/current-graduate-students/>) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GMAT or GRE*
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

The global marketing management concentration provides the opportunity to focus on conceptual and experiential dimensions of marketing management. Students interested in the increasingly global nature of business will be well-suited for this unique graduate degree program. Core courses provide a framework for understanding the role of marketing in diverse organizations. Electives add knowledge in areas of growing importance to the profession and provide the flexibility for students to consider emerging topics in the global marketing environment. Client projects and global applications prepare students for marketing careers. Study abroad is available and encouraged.

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete up to six classes (zero to 18 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

Curriculum requirements

Course	Title	Hours
Foundation courses		
0-18 credits; courses may be waived for demonstrated equivalence.		
ACCT 507	Fundamentals of Accounting	
ECON 500	Concepts in Economics	
FIRE 520	Financial Concepts of Management	
SCMA 524	Statistical Fundamentals for Business Management	
Two-course sequence in a foreign language at the undergraduate or graduate level (or demonstrated proficiency) or two approved cross-cultural courses taken at the undergraduate or graduate level		
Core courses		
MGMT 642	Business Policy and Strategy (to be taken in the last semester)	3
MKTG 656	International Marketing	3
MKTG 657	International Market Planning Project	3
MKTG 671	Marketing Management	3
MKTG 673	Marketing Research	3
Marketing electives		

Select three of the following: 9

MKTG 672	Concepts in Consumer Behavior
MKTG 674	Service Quality Management
MKTG 675	Digital Marketing
MKTG 678	Marketing Analytics
MKTG 679	Brand Strategy
MKTG 691	Topics in Marketing
MKTG 693	Field Project in Marketing

Non-marketing electives

Select two of the following: 6

ECON 609	Advanced International Economics
FIRE 621	Cases in Financial Management
FIRE 639	International Finance
INFO 658	Securing the Internet of Things
MGMT 644	International Business Management
MGMT 655	Entrepreneurship
SCMA 632	Statistical Analysis and Modeling
SCMA 643	Applied Multivariate Methods
SCMA 669	Developing and Implementing Forecasting Methods for Business

Total Hours 30

The minimum total of graduate credit hours required for this degree is 48 (30 if all foundation courses are waived).

Business, Master of Science (M.S.) with a concentration in real estate

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

1. To prepare students for successful careers in real estate and lifelong learning by providing education that is firmly grounded in technology, interdisciplinary teamwork and a global perspective
2. To ensure that students understand and can apply appropriate analytical methodologies and technology to the discipline of real estate
3. To prepare students for professional licensing, certification and/or professional designations

Student learning outcomes

1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze a real estate problem in terms of:
 - a. Development of a precise statement of the problem and how it relates to the goals of the firm and/or client
 - b. A consideration of the ethical, policy and/or practical limitations on any proposed solution strategy
 - c. Statement and consideration of proposed solutions strategies and their implementation
 - d. Formulation of a plan for implementation and monitoring of the proposed solution
4. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GMAT or GRE*
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

The real estate concentration satisfies the rigorous educational requirements of the Appraisal Institute's MAI designation. Students can satisfy most of the Appraisal Institute's education requirements by completing the concentration. This concentration provides comprehensive education in related disciplines so that graduates' analytical skills and abilities to communicate with other professionals are greatly enhanced.

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete the following undergraduate prerequisite courses:

Curriculum requirements

Prerequisite undergraduate courses

Course	Title	Hours
Calculus (or demonstrated quantitative ability)		3
FIRE 305	Principles of Real Estate	3

FIRE 425	Real Estate Appraisal	3	Email: gouldmana@vcu.edu
or FIRE 435	Real Estate Finance and Capital Markets		Phone: (804) 828-4622

Students must also complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with a minimum grade of C.

Curriculum requirements

Course	Title	Hours

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The post-baccalaureate graduate Certificate in Real Estate and Urban Land Development is designed for professionals who seek an opportunity for advanced study in real estate and are more interested in the focused knowledge obtainable than receipt of a graduate degree. The certificate provides students the ability to advance their careers while receiving recognition for their academic accomplishment in the form of a graduate certificate. Many working professionals, especially those with undergraduate majors in the liberal arts, will find this program attractive since they can concentrate their energies on a tightly focused curriculum without enrolling in a large number of prerequisite courses.

Student learning outcomes

1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate valuation in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards. Specifically, graduates will have an understanding of the Uniform Standards of Professional Appraisal Practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Other information

School of Business policies and procedures for graduate master's degree students (<http://business.vcu.edu/graduate-studies/current-graduate-students/>) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 1	
	Spring	Nov 1	
	Summer	Mar 1	

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), in order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Eighteen credit hours beyond the bachelor's degree are required for completion of this graduate certificate program. A maximum of one three-hour course taken at another AACSB-accredited institution may be transferred into this program. Students interested

in later applying for admission into either the Master of Business Administration program with a concentration in real estate or the Master of Science in Business with a concentration in real estate valuation must do so through a separate application process. Admission is dependent on the applicant having achieved a 3.0 GPA in the graduate certificate and a satisfactory score on the GMAT examination.

Sport Leadership, Master of (M.S.L.)

The School of Business offers a structured graduate program combining classroom theory with exposure to relevant field experiences. Through the sport leadership program, students will be prepared to assume the responsibilities for developing professional and amateur athletes and managing sports programs in a variety of academic, public and private sectors. The interdisciplinary faculty and curriculum give students the opportunity to concentrate on areas most important to them and most

relevant to the sports business. Students of the program are required to complete a comprehensive examination.

The program offers graduate courses online for those students who want to take advantage of educational opportunities via the Internet. Currently, three online classes are available each semester.

Student learning outcomes

1. Content knowledge of sport industry: Students will be able to analyze and synthesize information and develop plans to address issues in sport leadership.
2. Development of interpersonal skills and professionalism: Students will demonstrate interpersonal skills and professionalism appropriate to the fields of sport management and coaching.
3. Development of leadership skills: Students will demonstrate content knowledge of leadership skills and traits, as well as the ability to utilize these skills and traits in a professional setting.

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.L.	Fall	Apr 15	GRE or MAT
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Student's written statement concerning career interests
4. Transcripts of all previous college work

Students should contact the Center for Sport Leadership at VCU at (804) 828-7821 or link directly to sportleadership.vcu.edu (<http://www.sportleadership.vcu.edu/>) for information and application materials.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 36 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Examination requirement: Students must pass a comprehensive examination (see below).
4. Externship requirement: Students must complete an externship in the sport field.

Comprehensive examination

1. Written comprehensive examinations are required for all graduate students in the VCU Center for Sport Leadership.
2. Comprehensive examinations will take place at the end of the spring semester for each cohort of full-time, on-campus students and at the completion of 30 credit hours of course work for all part-time/distance-learning students.
3. Comprehensive examinations will be evaluated in a pass/fail format.
4. Comprehensive examinations will be independently evaluated by two faculty members; in the case that the faculty members disagree, a third faculty member will be brought in for a final decision.

5. Any student failing the comprehensive examination will have one additional opportunity to pass the exam. Failure to pass the comprehensive examination the second time will result in the student being dropped from the degree program.

M.B.A. programs

The School of Business allows students to complete requirements for an M.B.A. using two distinct modalities.

The curriculum for the evening M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Concentrations are available in business

analytics, corporate finance, entrepreneurship and innovation, global business, health care management, information resources management, investments, real estate, and supply chain management. Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit the M.B.A. options website (<https://business.vcu.edu/academics/mba-options/>).

The Executive M.B.A. curriculum takes advantage of students' midlevel and executive professional experience by using it as a foundation on which to build a more sophisticated understanding of business. Core program components and differentiators include its integrated structure, experiential exercises and real-world application, which enable students to transition easily between the business world and their studies.

The program's innovative, integrated modular structure enables students to approach issues by module topic, which accurately reflects the multidisciplinary demands of the real business world. The program is targeted to rising business executives, entrepreneurs, nonprofit managers and service professionals. It differs from other master's programs at VCU because of its unique modular curriculum, which integrates components of communication, technology, service/quality, globalization and strategy.

The Executive M.B.A. program is a lockstep program that meets alternating weekends, Fridays from 12:30 to 6:15 p.m. and Saturdays from 8 a.m. to 2:15 p.m. The program can be completed in approximately 20 months.

Traditional program options

- Business Administration, Master of (M.B.A.) (p. 385)
- Business Administration, Master of (M.B.A.) with a concentration in business analytics (p. 388)
- Business Administration, Master of (M.B.A.) with a concentration in corporate finance (p. 390)
- Business Administration, Master of (M.B.A.) with a concentration in entrepreneurship and innovation (p. 392)
- Business Administration, Master of (M.B.A.) with a concentration in global business (p. 393)
- Business Administration, Master of (M.B.A.) with a concentration in health care management (p. 395)
- Business Administration, Master of (M.B.A.) with a concentration in information resources management (p. 396)
- Business Administration, Master of (M.B.A.) with a concentration in investments (p. 398)
- Business Administration, Master of (M.B.A.) with a concentration in real estate (p. 399)
- Business Administration, Master of (M.B.A.) with a concentration in supply chain management (p. 401)

Executive program options

- Business Administration, Master of (M.B.A.) [Executive] (p. 408)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in business analytics (p. 409)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in corporate finance (p. 410)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in entrepreneurship and innovation (p. 412)

- Business Administration, Master of (M.B.A.) [Executive] with a concentration in global business (p. 413)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in health care management (p. 414)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in information resources management (p. 416)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in investments (p. 417)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in real estate (p. 418)
- Business Administration, Master of (M.B.A.) [Executive] with a concentration in supply chain management (p. 420)

Dual degree programs

Business Administration, Master of (M.B.A.) (p. 385) dual degree with:

- Master of Accountancy
- Master of Arts in Economics
- Master of Decision Analytics
- Master of Product Innovation
- Master of Science in Business with a concentration in finance
- Master of Science in Business with a concentration in global marketing management
- Master of Science in Business with a concentration in real estate
- Master of Science in Information Systems
- Master of Sport Leadership
- Master of Supply Chain Management

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 403)

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science in (M.S.) with a concentration in information technology management [Executive] [dual degree] (p. 405)

Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [dual degree] (p. 407)

Business Administration, Master of (M.B.A.) [Executive]/Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] [dual degree] (p. 421)

Business Administration, Master of (M.B.A.)

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section for additional information on graduation requirements](#).

Other information

School of Business [policies and procedures for graduate master's degree students](#) are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.B.A.	Fall	Jul 1	GMAT or GRE
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (<http://www.vcu.edu/mba/>).

Total Hours 45

The minimum total of graduate credit hours required for this degree is 45.

Students have the opportunity to combine the M.B.A. as a dual degree with a specialized master's degree program and have 12 credit hours count toward both degree programs. Specific opportunities and shared courses are outlined below.

For students pursuing the M.B.A. dual degree with the Master of Accountancy

Course	Title	Hours
ACCT 604	Advanced Auditing ¹	3
ACCT 610	Forensic Accounting ¹	3
ACCT 662	Advanced Topics in Accounting Information Systems ¹	3
INFO 661	Information Systems for Managers (fulfills elective requirement in the M.Acc.)	3

For students pursuing the M.B.A. dual degree with the Master of Arts in Economics

Course	Title	Hours
ECON 604	Advanced Microeconomic Theory ¹	3
ECON 607	Advanced Macroeconomic Theory ¹	3
ECON 612	Econometrics ¹	3
FIRE 623	Financial Management (fulfills elective requirement in the M.A.)	3

For students pursuing the M.B.A. dual degree with the Master of Decision Analytics

Course	Title	Hours
INFO 610	Analysis and Design of Database Systems ¹	3
SCMA 632	Statistical Analysis and Modeling ¹	3
SCMA 645	Advanced Decision Analytics ¹	3
SCMA 675	Operations Management (fulfills elective requirement in the M.D.A.)	3

For students pursuing the M.B.A. dual degree with the Master of Product Innovation

Course	Title	Hours
INNO 501	Arts Principles for Product Innovation ¹	3
INNO 590	da Vinci Project ¹	3
INNO 600	Integrative Design Studio ¹	3
INFO 661	Information Systems for Managers (fulfills requirement for INNO 503 in the M.P.I.)	3

For students pursuing the M.B.A. dual degree with the Master of Science in Business with a concentration in finance

Course	Title	Hours
FIRE 621	Cases in Financial Management ¹	3
FIRE 622	Financial Management of Financial Institutions ¹	3
FIRE 623	Financial Management	3
FIRE 625	Group Insurance and Pension Planning ¹	3

For students pursuing the M.B.A. dual degree with the Master of Science in Business with a concentration in global marketing management

Course	Title	Hours
MGMT 642	Business Policy and Strategy	3
MKTG 656	International Marketing ¹	3
MKTG 657	International Market Planning Project ¹	3
MKTG 671	Marketing Management ¹	3

For students pursuing the M.B.A. dual degree with the Master of Science in Business with a concentration in real estate

Course	Title	Hours
FIRE 623	Financial Management (fulfills elective requirement in the M.S.)	3
FIRE 627	Real Estate Development ¹	3
FIRE 629	Real Estate Investment Analysis ¹	3
FIRE 638	Real Property Investment Law ¹	3

For students pursuing the M.B.A. dual degree with the Master of Supply Chain Management

Course	Title	Hours
SCMA 602	Global Supply Chain Management ¹	3
SCMA 603	SAP ERP and Supply Chain Management ¹	3
SCMA 606	Supply Chain Innovation ¹	3
SCMA 675	Operations Management	3

For students pursuing the M.B.A. dual degree with the Master of Science in Information Systems

Course	Title	Hours
INFO 610	Analysis and Design of Database Systems ¹	3
INFO 620	Data Communications ¹	3
INFO 630	Systems Development ¹	3
INFO 661	Information Systems for Managers	3

Students may not apply both INFO 661 and INFO 640 toward degree requirements.

For students pursuing the M.B.A. dual degree with the Master of Sport Leadership

Course	Title	Hours
SPTL 603	Research Methods in Sport	3
SPTL 630	Sociology of Sport ¹	3
SPTL 632	Sport Business ¹	3
SPTL 633	Marketing of Sport ¹	3

SPTL 603 will also satisfy the M.B.A. SCMA 524 requirement.

¹

For students pursuing the combined programs mentioned above, these courses fulfill the nine credits of electives for the M.B.A. program.

Electives and concentrations

Project courses (693), topics courses (691) and guided studies (697) may be available for use toward concentration electives. These courses must be preapproved by the director of graduate studies.

Courses at the 500- or 600-level taken outside of the School of Business may be used with the permission of the director of graduate studies in business. Students must satisfy the necessary prerequisites for all electives.

Business Administration, Master of (M.B.A.) with a concentration in business analytics

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Other information

School of Business **policies and procedures for graduate master's degree students** are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).

Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.B.A.	Fall	Jul 1	GMAT or GRE
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit vcu.edu/mba (<http://www.vcu.edu/mba/>).

	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit [vcu.edu/mba/](http://www.vcu.edu/mba/) (<http://www.vcu.edu/mba/>).

Business Administration, Master of (M.B.A.) with a concentration in information resources management

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.

4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Other information

School of Business **policies and procedures for graduate master's degree students** are available on the school's website.

Apply online at graduate.admissions.vcu.edu (<http://www.graduate.admissions.vcu.edu>).
