The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the College of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

**Note: Admission to this program is temporarily suspended.**

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component and an elective component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science.

## Curriculum requirements

Students with an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems should be adequately prepared for the graduate curriculum. Students from other academic backgrounds may need to complete undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

## Prerequisite courses

Course	Title	Hours
CMSC 312 or INFO 361	Introduction to Operating Systems Systems Analysis and Design	3
CMSC 355 or INFO 370	Fundamentals of Software Engineering Fundamentals of Data Communications	3

CMSC 401	Algorithm Analysis with Advanced Data Structures	3
CMSC 508 or INFO 364	Database Theory Database Systems	3
MATH 211 or CMSC 302	Mathematical Structures Introduction to Discrete Structures	3
STAT 212	Concepts of Statistics	3

## Curriculum

Course	Title	Hours
<b>Core component</b>		
CISS/CMSC 618	Database and Application Security	3
CISS/CMSC 622	Network and Operating Systems Security	3
CISS 624/CMSC 620	Applied Cryptography	3
CISS 634	Ethical, Social and Legal Issues in Computer and Information Systems Security	3
CISS/INFO 644	Principles of Computer and Information Systems Security	3
INFO 646	Security Policy Formulation and Implementation	3
<b>Elective component</b>		
Choose four of the following courses. Students must select a minimum of one CMSC and one INFO course		12
CMSC 502	Parallel Algorithms	
CMSC 506	Computer Networks and Communications	
CMSC 525	Introduction to Software Analysis, Testing and Verification	
CMSC 612	Game Theory and Security	
CMSC 691	Special Topics in Computer Science	
INFO 609	Data-centric Re-engineering Analysis/Planning	
INFO 611	Data Re-engineering	
INFO 614	Data Mining	
INFO 616	Data Warehousing	
INFO 632	Business Process Re-engineering	
INFO 641	Strategic Information Systems Planning	
INFO 642	Decision Support and Intelligent Systems	
INFO 691	Topics in Information Systems	
Total Hours		30

**The minimum total of graduate credit hours required for this degree is 30.**

## Information Systems, Master of Science (M.S.)

### Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

### Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

### Student learning outcomes

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	GMAT or GRE*
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must submit an up-to-date resume.

\*Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

### Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/

software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. Students without an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems will likely need to complete several undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

Course	Title	Hours
<b>Prerequisite undergraduate courses</b>		
INFO 202	Introduction to E-business Technologies	3
INFO 300	Information Technology Infrastructure	3

INFO 370	Fundamentals of Data Communications	3
MATH 211	Mathematical Structures	3
A course in calculus		

In addition to the VCU Graduate School graduation requirements (p. 31), students who do not have a business degree must complete a minimum of two 500-level foundation courses (6 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student's background, career interests and the chosen area of specialization. Students applying to the program should consult with the master's program adviser to determine the foundation courses required for a particular area.

## Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive]

**Note: Admission to this program is temporarily suspended.**

#### Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

### Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring

and implementing EIS systems using state-of-the-art technologies within organizations.

## Student learning outcomes

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

**Note: Admission to this program is temporarily suspended.**

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Spring	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the master's program in information systems must submit an up-to-date resume.

**Note: Admission to this program is temporarily suspended.**

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 30 graduate credit hours.

The Executive Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles. Participants gain a wide range of new skills and knowledge by combining course work with their day-to-day professional activities. The program is targeted to rising business executives, entrepreneurs and information systems professionals. The program differs from the regular M.S. in Information Systems program in that it is offered in a weekend format, with students meeting for classes on alternate weekends throughout the calendar year. The lockstep program consists of 10 required courses.

## Curriculum requirements

Course	Title	Hours
ISTM 671	Organizational Culture and Team Building	3
ISTM 672	Information Systems Management	3
ISTM 673	Analysis and Decisions	3
ISTM 674	Emerging Technologies	3
ISTM 675	IS Planning and Project Management	3
ISTM 676	Information Systems Assurance and Security Management	3
ISTM 677	Structuring Information for Decision Making	3

ISTM 678	IS in the Digital Economy	3
ISTM 679	Enterprise Information Systems	3
ISTM 691	Topics in IT Management	3
Total Hours		30

The minimum total of graduate credit hours required for this degree is 30.

## Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree]

#### Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

### Program goal

#### Master of Business Administration

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

#### Master of Science in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

### Student learning outcomes

#### For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

#### For M.S. in Information Sciences graduates

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

## Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S. and M.B.A.	Fall	Jul 1	GMAT or GRE
	Spring	Nov 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the dual degree Master of Business Administration and Master of Science in Information Systems program must submit an up-to-date resume.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees.

Students in the dual degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A. (unless waived), all nine core courses required for the M.B.A. and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

## Curriculum requirements

Course	Title	Hours
<b>Foundation courses (not included in 54 hours required for combined degree program)</b>		
ACCT 507	Fundamentals of Accounting	3
ECON 500	Concepts in Economics	3
FIRE 520	Financial Concepts of Management	3
MGMT 540	Management Theory and Practice	3
MKTG 570	Concepts and Issues in Marketing	3
SCMA 524	Statistical Fundamentals for Business Management	3
SCMA 530	Fundamentals of the Legal Environment of Business	3
Total Hours		21

## M.B.A. course work

Course	Title	Hours
<b>Advanced courses</b>		
Each student must begin the advanced portion of the program with the courses below in each of the first two semesters. Full-time students will take additional courses from the remainder of the advanced program.		
Semester one (to be taken at the same time)		
ECON 610	Managerial Economics	3
MGMT 641	Leading People and Organizations	3
Semester two		
FIRE 623	Financial Management	3
<b>Remainder of the advanced program</b>		
ACCT 608	Managerial Accounting Concepts	3
INFO 661	Information Systems for Managers	3

INFO 664	Information Systems for Business Intelligence	3
MGMT 642	Business Policy and Strategy	3
MKTG 671	Marketing Management	3
SCMA 675	Operations Management	3
Total Hours		27

### M.S. in Information Systems course work

Course	Title	Hours
<b>Core courses</b>		
INFO 610	Analysis and Design of Database Systems	3
INFO 620	Data Communications	3
INFO 630	Systems Development	3
<b>Electives</b>		
Select six of the following:		18
INFO 611	Data Re-engineering	
INFO 614	Data Mining	
INFO/CISS 616	Data Warehousing

**Program website:** [business.vcu.edu/academics/mba-options/dual-degrees](https://business.vcu.edu/academics/mba-options/dual-degrees/) (<https://business.vcu.edu/academics/mba-options/dual-degrees/>)

## Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree]

Advanced study in health administration and information systems is available through a dual degree program co-sponsored by the Department of Health Administration in the College of Health Professions and the Department of Information Systems in the School of Business.

The dual degree M.H.A./M.S. program allows students interested in the fields of health management and information technology to earn two highly ranked and relevant master's degrees in just three years, which is the time it usually takes to complete just one of the degrees. The dual degree program is ideal for students who are pursuing careers in health IT management, health IT business consulting or working in the health IT vendor industry.

Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

### Degree requirements

The curriculum allows students to earn both the M.H.A. and the M.S. in Information Systems with a total of 78 credit hours rather than the 89 credit hours that would be required to obtain the degrees separately. The dual degree option offers this credit-hour efficiency by taking advantage of curricular similarities in the two programs and allowing some courses to count toward both sets of requirements. A total of 12 credit hours will count toward both degrees and the M.H.A. foundation courses will be substituted for the business school foundation course requirements for dual degree students. Students in the dual degree program will follow the same schedule as regular M.H.A. students, including the two lockstep years. Both degrees are conferred concurrently when all requirements for both degrees have been completed.

Students will take 51 credit hours of health administration courses required for the M.H.A. and nine additional courses (27 credit hours) in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The HADM 612 course taken for the M.H.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and one of the additional information systems courses will also count toward the elective courses in the M.H.A. program. A three-credit-hour, 10-week internship is required and must have substantial global, entrepreneurial and/or experiential components related to both degrees. The six information systems courses to be taken in addition to INFO 610, INFO 620 and INFO 630, must be approved by the program adviser and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

## Curriculum requirements

Course	Title	Hours
<b>Courses</b>

 (https://ha.chp.vcu.edu/mha-program/dual-degree-programs/)

## Department of Management and Entrepreneurship

**S. Douglas Pugh, Ph.D.**

Professor and chair

[business.vcu.edu/academics/management-and-entrepreneurship](https://business.vcu.edu/academics/management-and-entrepreneurship)  
 (https://business.vcu.edu/academics/management-and-entrepreneurship/)

The Department of Management and Entrepreneurship offers a Bachelor of Science in Business with concentrations in human resource management, management/business administration, management/entrepreneurship and management/international management. The department also offers a human resource management minor and a certificate in international management studies, as well as a doctoral degree in business with a concentration in management.

## Department of Marketing

**Bruce Huhmann, Ph.D.**

Professor and chair

[business.vcu.edu/academics/marketing](https://business.vcu.edu/academics/marketing) (https://business.vcu.edu/academics/marketing/)

The Department of Marketing provides students with a comprehensive introduction to the many topics and concepts that make up today's marketing professions. Additionally students have the opportunity to participate in high quality learning experiences that broaden traditional ideas of the classroom in projects, exercises and internship experiences that involve a variety of business organizations as well as state and local government agencies.

## Department of Supply Chain Management and Analytics

**Jeffery Smith, Ph.D.**

Associate professor and chair

[business.vcu.edu/academics/supply-chain-management-and-analytics](https://business.vcu.edu/academics/supply-chain-management-and-analytics)  
 (https://business.vcu.edu/academics/supply-chain-management-and-analytics/)

Faculty in the Department of Supply Chain Management and Analytics are passionate about providing impeccable academic instruction and research that advances knowledge related to production, product development and the information systems needed to direct these endeavors. The department's undergraduate and graduate programs prepare students to immediately take important positions related to supply chain management and business analytics. The department remains involved with the corporate community through a partnership with the Commonwealth Center for Advanced Logistics Systems.

Students interested in production, distribution, and the engineering and finances supporting large-scale operations will be prepared by VCU's programs in supply chain management and analytics to enter an exciting field with plentiful job opportunities. For additional information contact the department by emailing [scma@vcu.edu](mailto:scma@vcu.edu).

- Decision Analytics, Master of (M.D.A.) (p. 408)
- Decision Analytics, Master of (M.D.A.) – professional track (p. 410)
- Decision Analytics, Master of (M.D.A.) with a concentration in health care management (p. 412)
- Decision Analytics, Master of (M.D.A.) with a concentration in health care management – professional track (p. 414)
- Supply Chain Management, Master of (M.S.C.M.) (p. 416)

## Decision Analytics, Master of (M.D.A.)

**Program accreditation**

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

### Program goal

The Master of Decision Analytics provides students with knowledge of the statistical, mathematical and scientific skills and experience necessary to utilize advanced methods of data analysis for business decision-making.

### Student learning goals

Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommended decisions in a clear, ethical and transparent manner.

### Student learning outcomes

1. **Database structures and query:** Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.

- Quantitative skills:** Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
- Problem formulation:** Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
- Analytics applications:** Students will experience various applications of analytics in real situations.
- Technical communications and teamwork:** Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences, and will develop skills in organizing, interacting and analyzing real problems as members of a team.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

## Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.D.A.	Fall	Jul 1	GMAT or GRE*
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must submit an up-to-date resume.

\*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

## Degree requirements

The decision analytics degree provides students with knowledge of quantitative skills and experience in analyzing problems and using data for decision-making in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

In addition to the VCU Graduate School graduation requirements (p. 31):

- All students must have completed a course in calculus and database systems. Students must also be proficient at an intermediate level with a spreadsheet. These prerequisites can be met after admission to the program.
- At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following prerequisite courses and/or foundation course may be waived. A waiver may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course to the satisfaction of the admission committee.

## Prerequisite undergraduate and/or foundation courses

Prerequisite and/or foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. This determination is made by the faculty adviser at the time of admission.

## Decision Analytics, Master of (M.D.A.) – professional track

### Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

### Program goal

The M.D.A. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

### Student learning goals

Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommended decisions in a clear, ethical and transparent manner.

### Student learning outcomes

- 1. Problem formulation and analytical knowledge:** Students will demonstrate the ability to examine a situation/problem and select an appropriate analytical procedure that will use data to provide actionable insight to decision-makers.
- 2. Data management skills:** Students will demonstrate the ability to acquire and organize data in a format appropriate for the desired analysis.
- 3. Analytics and quantitative skills:** Students will perform the analyses using appropriate software and techniques to develop relevant insights for decision-making.
- 4. Communication skills:** Students will effectively demonstrate strong communications to a broad array of stakeholders.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

### Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.D.A.	Fall	Apr 15	

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants should have three years of work experience in an application area. Students without the required work experience may take six credit hours of graduate-level courses in an application area prior to acceptance into the program. Applicants are expected to have successfully completed an undergraduate or graduate course in statistics, and it is preferable that they have programming experience. Exceptions may be made at the discretion of the program director.

### Degree requirements

The Master of Decision Analytics provides students with a breadth of analytical and quantitative skills with experience in analyzing and communicating solutions to problems arising in an organization.

Leading organizations gain competitive advantage through the use of analysis of relevant data to guide and drive strategic and tactical decisions. Increased volumes of data and emphasis on data-driven decision-making create new challenges for decision-makers and provide new employment opportunities for people with deep analytical skills. There is a significant and growing demand for individuals with the ability to work collaboratively within an organization to mine relevant raw data and refine data into a recommended action of value to the enterprise. The decision analytics degree equips students with the essential skills to be analytically functional in an organization.

Skills, abilities and knowledge necessary for success in analytics:

1. Work in a collaborative environment
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics degree focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics
2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, making the program attractive to midcareer professionals who want to gain or increase their analytics skills without interrupting their careers.

In addition to the VCU Graduate School graduation requirements (p. 31) and credit hour requirements, students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers

of foundation courses only occur when a student has completed the required undergraduate equivalent courses with a minimum grade of C.

## Decision Analytics, Master of (M.D.A.) with a concentration in health care management

### Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

### Program goal

The Master of Decision Analytics provides students with knowledge of the statistical, mathematical and scientific skills and experience necessary to utilize advanced methods of data analysis for business decision-making.

### Student learning goals

Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision-makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommend decisions in a clear, ethical and transparent manner.

### Student learning outcomes

- Database structures and query:** Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.
- Quantitative skills:** Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
- Problem formulation:** Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
- Analytical applications:** Students will experience various applications of analytics in real situations.
- Technical communications and teamwork:** Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences and will develop skills in organizing, interacting and analyzing real problems as members of a team.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as

published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the [academic regulations section for additional information on academic regulations for graduate students](#).

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

## Other information

School of Business [policies and procedures for graduate students](#) are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.D.A.	Fall	Jul 1	GMAT or GRE
	Spring	Nov 1	
	Summer	Mar 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the master's program in business must submit an up-to-date resume.

## Degree requirements

The decision analytics degree provides students with knowledge of quantitative skills and experience in analyzing problems and using data for decision-making in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

In addition to the VCU Graduate School graduation requirements (p. 31):

1. All students must have completed a course in calculus prior to attempting graduate business courses. This prerequisite can be met after admission to the program.
2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with minimum grade of C.

The concentration in health care administration requires an additional nine credit hours beyond the minimum 30-credit hours required for the degree.

## Supply Chain Management, Master of (M.S.C.M.)

#### Program accreditation

Association to Advance Collegiate Schools of Business

### Program goal

The Master of Supply Chain Management program will educate students on the theory, skills and practices necessary to manage the daily challenges in managing global supply chains. Students will be introduced to supply management and logistics systems, international logistics, transportation management, enterprise resource planning and innovation processes. In addition, students will learn how to identify problems, gather information, analyze data, interpret solutions, establish contingencies and effectively present results.

Although developed in collaboration with the U.S. Army, the intent of the program is to provide an opportunity for both military officers and civilians to earn a master's degree in supply chain management.

### Student learning goals

Graduates will employ knowledge of supply chain management, while effectively utilizing analytics tools, to provide solutions and insight to complex business solutions.

### Student learning outcomes

- Content knowledge:** Demonstrate an understanding of the complexities of global supply chains
- Uncertainty and risk:** Demonstrate appropriate strategies to assess and manage uncertainty and risk
- Analytics methodologies:** Employ analytics tools to support decision-making
- Analytics applications:** Apply analytics techniques to supply chain problems

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

## SCHOOL OF DENTISTRY

The School of Dentistry was created in 1893 when the University College of Medicine opened with a dental department as one of its original divisions. The Medical College of Virginia inaugurated a dental education program in 1897, and in 1913 the two schools were merged to form the MCV School of Dentistry.

In 1968, by an act of the Virginia General Assembly, MCV was merged with Richmond Professional Institute to form Virginia Commonwealth University. The School of Dentistry is located on VCU's MCV Campus.

The facilities of the School of Dentistry are housed in the Wood Memorial, Lyons and Perkinson buildings and contain clinical facilities, research facilities, classrooms, student laboratories, departmental offices and a computer-learning laboratory.

The school provides opportunities for selected, qualified individuals to study dentistry under the most favorable conditions and in accordance with the standards established by the Commission on Dental Accreditation of the American Dental Association.

The degree of Doctor of Dental Surgery (D.D.S.) is awarded to graduates of the school's professional program and the Bachelor of Science degree to graduates of the Dental Hygiene Program within the Department of Oral Health Promotion and Community Outreach.

Graduates of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics are awarded the Master of Science in Dentistry degree.

Executive associate dean

### Accreditation

#### Dental hygiene (bachelor's degree)

Commission on Dental Accreditation

#### Dentistry (D.D.S.)

Commission on Dental Accreditation

#### Advanced Dental Education Programs\*

Commission on Dental Accreditation

\*(includes endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics and Advanced Education in General Dentistry)

### Mission

The mission of the VCU School of Dentistry:

- **Education** of highly qualified dental professionals
- **Research** that advances the understanding of oral health, disease and effective treatment
- **Service** to the community
- Improved oral and general **health** of our patients and the general population

### Philips Institute for Oral Health Research

**Iain M. Morgan, Ph.D.**  
Director

The mission of the Philips Institute for Oral Health Research is to serve the university and the commonwealth of Virginia as a center of educational and research excellence focused on infectious, neoplastic and genetic diseases of the oral cavity, head and neck.

### Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics

#### Program goal

The advanced dental specialty education program in endodontics offers the resident a comprehensive 24-month course of study in clinical and didactic endodontics. The program is designed to educate qualified individuals to pursue careers as practicing clinical dental specialists in endodontics. The program meets the educational requirements for limitation of practice to the specialty of endodontics and prepares the student for examination by the American Board of Endodontics.

Students completing the program earn a specialty Certificate in Endodontics and a Master of Science in Dentistry degree. The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

### Student learning outcomes

Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal

2. Be equipped to practice evidence-based endodontics
3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
  - a. Diagnosis, treatment planning and prognosis of pulpal and periradicular disease
  - b. Provision of nonsurgical endodontics, retreatment and surgical endodontics
  - c. Outcome assessment
  - d. Diagnostic imaging technologies
  - e. Management of medically compromised patients
  - f. Emergency management of endodontic conditions
  - g. Management of orofacial pain and dental anxiety
  - h. Use of magnification technologies
  - i. Use of emerging techniques of endodontic treatment
  - j. Management of traumatic dental injuries
5. Be eligible to sit for the Diplomate Boards of the American Board of Endodontists

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

For a current copy of the program handbook, contact the VCU School of Dentistry's Department of Endodontics.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Aug 15	National Dental Boards, part 1 and 2

## Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a minimum score of 100.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Graduation from an accredited university or its equivalent, with a Doctor of Dental Surgery or Doctor of Medicine in Dentistry or the international equivalent
2. For international students, an external credential evaluation of all international transcripts to complete the application (WES, ECE, and AACRAO are some of the recommended NACES-approved providers.)
3. One "dean's letter" from the academic institution from which the individual received the dental degree that gives class rank, GPA and overall academic recommendation
4. Two letters of recommendation from individuals who are in a position to judge the applicant's ability to engage in graduate study and pursue advanced dental training
5. A written letter of professional intent or biographical statement that reflects the candidate's desire to pursue the specialty and the intent upon receipt of the degree and certificate
6. A resume or curriculum vitae
7. An administrative application fee made payable to the Department of Endodontics, School of Dentistry (See website for details. This fee is in addition to the application fee that has to be paid with the submission of the graduate application. One year of an AEGD, GPR or the private practice equivalent is preferred but not required.)

Admission to the advanced dental specialty program in endodontics is through American Dental Education Association Postdoctoral Application

Support Service. PASS historically opens to receive applications mid-May of the year prior to the year for which the candidate wishes to enroll and is open until Aug. 15. Please refer to the VCU School of Dentistry website, Department of Endodontics postgraduate information or ADEA PASS for specific yearly dates of the application period.

Candidates are required to interview in person. Invitations to interview followed by an invitation to accept a position in the residency are extended by the program director in the fall at the close of the application period. For example, the candidate will submit an application through ADEA PASS during the application period (May through August). An invitation will be extended to interview with the advanced dental specialty program in endodontics admission committee in August or September. The candidate will be informed of selection or nonselection by Nov. 15. The resident will start the clinical program the following June and the academic program the following September.

Admission to the Master of Science in Dentistry degree program is made after the candidate has accepted a residency position in the advanced dental specialty program in endodontics.

## Degree requirements

All course work must be completed within the 24-month timeframe for the program. Any extension of the 24-months is at the discretion of the program director. Extensions are approved only in extenuating circumstances.

In addition to general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Residents must receive a minimum grade of B for all required courses. A student with a grade of C in a required course may be required to repeat the course. A second grade of C in a required course may result in dismissal from the program. At the discretion of the program director, a resident retaking a required course may still be eligible to take the comprehensive written and oral examinations and to start the thesis research process prior to successful completion of the repeat of the course.

In the last semester of the second year the resident will take a written and an oral comprehensive examination designed to evaluate the resident's ability to integrate the didactic and clinical course material, demonstrate critical-thinking skills and demonstrate command of evidence-based endodontics. Both the written and oral examinations must be successfully completed to receive the specialty Certificate in Endodontics.

The Certificate of Endodontics, conferred by the School of Dentistry, is only conferred upon completion and awarding of the Master of Science in Dentistry.

The residents must formulate, complete and defend a research project. The resident will prepare a manuscript in a thesis format or in the publishable format of a refereed journal. The project must be completed, defended and presented in a research forum in order for the resident to qualify for receipt of the Master of Science in Dentistry.

## Curriculum requirements

Course	Title	Hours
DENS 550	Update in Practice Administration	1
DENS 580	Biostatistics and Research Design in Dentistry (two credits taken twice)	4
DENS 660	Interdisciplinary Care Conference (0.5 credits earned twice) <sup>1</sup>	1

DENS 699	Thesis Guidance (two credits taken four times)	8
DENS 700	Basic Sciences and Graduate Dentistry	3
ENDO 522	Introduction: Specialty of Endodontics	2
ENDO 530	Advanced Oral Pathology (one credit taken twice)	2
ENDO 532	Management of Medical Emergencies in the Dental Office (one credit taken twice)	2
ENDO 560	Endodontic Therapy Lectures	3.5
ENDO 650	Endodontic Topic Literature Review (3.5 credits taken four times)	14
ENDO 652	Endodontic Clinical Seminars (1.5 credits taken four times)	6
ENDO 654	Endodontic Management of the Medically Compromised Patient (one credit taken twice)	2
ENDO 656	Endodontic Current Literature Review (one credit taken four times)	4
ENDO 680	Clinical Endodontics (five credits taken four times)	20
Total Hours		72.5

<sup>1</sup>

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5 credit classes.

**The minimum total of graduate credit hours required for this degree is 72.5.**

## Plan of study

The following illustrates how the course requirements are met during the 24 months of the program. No additional class work or course work is required other than the required courses listed below.

### Year one

Fall semester		Hours
DENS 580	Biostatistics and Research Design in Dentistry	2
DENS 660	Interdisciplinary Care Conference (no credits earned in fall; continuing course) <sup>1</sup>	-
DENS 699	Thesis Guidance	2
ENDO 522	Introduction: Specialty of Endodontics	2
ENDO 532	Management of Medical Emergencies in the Dental Office	1
ENDO 560	Endodontic Therapy Lectures	3.5
ENDO 650	Endodontic Topic Literature Review	3.5
ENDO 652	Endodontic Clinical Seminars	1.5
ENDO 656	Endodontic Current Literature Review	1
ENDO 680	Clinical Endodontics	5
Term Hours:		21.5

### Spring semester

DENS 580	Biostatistics and Research Design in Dentistry	2
DENS 660	Interdisciplinary Care Conference <sup>1</sup>	0.5
DENS 699	Thesis Guidance	2
DENS 700	Basic Sciences and Graduate Dentistry	3
ENDO 530	Advanced Oral Pathology	1
ENDO 650	Endodontic Topic Literature Review	3.5
ENDO 652	Endodontic Clinical Seminars	1.5
ENDO 654	Endodontic Management of the Medically Compromised Patient	1
ENDO 656	Endodontic Current Literature Review	1
ENDO 680	Clinical Endodontics	5
Term Hours:		20.5
<b>Year two</b>		
<b>Fall semester</b>		
DENS 550	Update in Practice Administration	1

## Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics

### Program goal

The Department of Orthodontics offers a 24-month advanced education Master of Science in Dentistry program. The program teaches the latest in clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. Our goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically.

The program's clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of our program with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is required. All senior residents present their research at the Virginia Association of Orthodontists' meeting. The program makes students educationally qualified to take the written portion of the American Board of Orthodontics (<http://www.americanboardortho.com>) examination in the senior year. Residents are required to pass the written portion of the examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists' meeting.

Students completing the program earn a specialty Certificate in Orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

### Student learning outcomes

Graduates of this program will:

1. Formulate and conduct a relevant research project as evidenced in the completion of a master's thesis in a publishable format for a refereed journal
2. Be equipped to practice evidence-based orthodontics

3. Have demonstrated the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners in the provision of ethical and informed patient care
4. Be proficient in:
  - a. Diagnosis, treatment planning, treatment, retention and prognosis of dental malocclusions and
  - b. dento-facial disharmony
  - c. Outcome assessment
  - d. Diagnostic imaging technologies
  - e. Management of patients with craniofacial deformities
  - f. Management of combined orthodontic and surgical cases
  - g. Use of various fixed and removable appliances, aligner technology
  - h. Use of temporary anchorage devices and soft tissue laser
  - i. Use of digital technology for records taking and treatments with aligners
5. Be eligible to sit for the Diplomate Boards of the American Board of Orthodontists

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Sep 2	NBDE, GRE, TOEFL or IELTS if international

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Agreement to participate in the Postdoctoral Dental Matching Program
2. Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
3. Graduation or anticipated graduation from dental school
4. Eligibility to obtain a Virginia temporary resident's license from the Virginia Board of Dentistry
5. Completion of National Boards Part I and anticipated completion of Part II
6. Completion of GRE
7. Completion of TOEFL or IELTS (for students whose native language is not English)
8. Application to the orthodontic graduate program through the ADEA PASS program. The PASS application should include the following items:
  - a. Online application form
  - b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in orthodontics. Include your plans for the future and any factors you believe are important for us to know in reviewing your application. Please limit your comments to one page.
  - c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.
  - d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you have attended before dental school.
  - e. Dental school transcripts
  - f. Institution Evaluation Form (completed by the dean of your dental school)
  - g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)

- h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director's letter can count as one). A letter from the chair of orthodontics is not required, but may be included if the chair has personal knowledge of your skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**
9. The following supplementary items are to be submitted directly to the VCU Department of Orthodontics:
- Application cover page
  - Application fee of \$50 (U.S. dollars drawn on a U.S. bank) made payable to VCU (Application fee is nonrefundable.)
  - Official transcripts from all colleges or universities you have attended after dental school, if any (If you have attended a program without a transcript, such as a residency, we will need a letter from your program director documenting the experience.)
  - Additional letters of recommendation may be submitted if you feel they would be beneficial to your application (optional).
  - National Board scores: Have an original score report sent directly to the Department of Orthodontics from the National Board office in addition to enclosing a copy in your supplementary materials package/envelope. If you have taken other exams (or if you wish to add to your file), you may send any item of this type for our consideration. The National Board scores, Part I, are required (even if you are a graduate of a foreign school) no exceptions.
  - GRE scores: Have an original score report sent directly to the Department of Orthodontics from the Educational Testing Service office in addition to enclosing a copy in your supplementary materials package/envelope. The GRE scores are required (even if you are a graduate of a foreign school) no exceptions.
  - TOEFL or IELTS scores are required for students whose native language is not English. These scores are not required if you went to dental school or graduate school in an English-speaking environment (U.S.A., Canada, Australia or Great Britain, etc.). Foreign dental school graduates: Graduation from our orthodontic program qualifies you to apply for a dental license in the commonwealth of Virginia; however, other regulations apply. For example, after graduation from our program, you will be required to take and pass a regional testing agency dental examination.

techniques. Graduates are prepared to enter into a successful and busy orthodontic practice.

## Curriculum requirements

Course	Title	Hours

DENS 660	Interdisciplinary Care Conference (no credits earned in fall; continuing course) <sup>1</sup>	-
DENS 699	Thesis Guidance	2

## Degree requirements

- The 24-month certificate program in orthodontics begins July 1 with two weeks of classes to familiarize students with concepts of growth and development, diagnosis and treatment planning, and basic biomechanical principles. First-year residents see new patients in the clinic in mid-July. In August, first-year residents begin a full clinic schedule that includes a morning and afternoon clinic session on most days.
- Didactic course work in the department consists primarily of small-group seminar sessions for an average of two hours each day.
- Clinical work simulates a private-practice environment. Each team consists of one junior and one senior orthodontic resident and a dental assistant whose time is dedicated to that team. The orthodontic clinic has its own business manager, practice manager and receptionist. Patient records are computerized, and billing, scheduling and record storage are accomplished using a commercial orthodontic office management system. The objective is to maximize clinical efficiency so residents fully develop the thought processes necessary to master orthodontic principles and treatment

## Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry

### Program goals and objectives

The didactic requirements of the Master of Science in Dentistry are combined with the goals of the M.S.D. program to provide the student with a strong clinical background that is supported by a strong background in research methodology.

### Program goals

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical pediatric dentistry can be achieved
2. To provide a sound background in medicine as it applies to the pediatric/adolescent patient and to patients with special health care needs
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply literature associated with the field of pediatric dentistry
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills in the clinic and in the operating room
6. To provide didactic instruction and clinical training in the area of nonpharmacologic and pharmacologic behavior management

7. To provide instruction and training in growth and development to include clinical interceptive orthodontic care
8. To provide methods of pain and anxiety control, including nitrous oxide and oral conscious sedation
9. To provide an environment for the interpretation and implementation of research
10. Enable successful completion of the American Board of Pediatric Dentistry exam
11. To develop sound lifelong didactic and clinical learning skills
12. To provide specialists in pediatric dentistry for community health care, professional service and dental education

## Program objectives

1. To be exposed to the basic sciences and be able to apply concepts to clinical pediatric dentistry
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the pediatric/adolescent patient and patients with special health care needs
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities to include treatment of patients under general anesthesia
5. To become competent in diagnosis and treatment planning
6. To obtain competency and certification in moderate conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the ABPD examination
9. To develop communication and presentation skills and lifelong learners

## Student learning outcomes

Graduates of this program will be competent in:

### Knowledge – concepts, facts and information

1. Knowledge and skills in the areas of pediatric medicine and oral medicine, as well as the delivery of dental care and oral surgery for compromised children and adolescents
2. In-depth knowledge and skills in the use of pharmacologic and nonpharmacologic behavior management techniques
3. Knowledge of hospital protocol, policies, rules, regulations and the ability to treat pediatric dental patients in the hospital environment
4. Ability to evaluate the dental literature and its research findings to the benefit of patients and to engage in scholarly activity which results in completion of a master's degree thesis suitable for publication
5. Knowledge of preventive and corrective dental procedures relating to general and oral health and to growth and development of the stomatognathic system
6. Knowledge and skill in oral and maxillofacial radiology specific to the needs of the child and adolescent
7. Preparation for managing a contemporary pediatric dental practice relative to practice administration, efficient auxiliary utilization and marketing
8. Understanding of the biomedical sciences related to the practice of contemporary pediatric dentistry: biostatistics/epidemiology,

- pharmacology, microbiology, embryology, genetics, anatomy and oral and medical pathology
9. In-depth knowledge of the physical, psychological and social development of children
10. In-depth knowledge of oral and perioral lesions and anomalies in the pediatric dental patient
11. In-depth knowledge of the management of dental and medical emergencies in the dental setting
12. Understanding of normal and abnormal language development
13. Understanding of jurisprudence, risk management and biomedical ethics
14. Understanding office and practice management including the use of contemporary technologies

### Clinical competency

1. Ability to appropriately manage and guide the behavior of the child patient to accept needed treatment and to provide advice or guidance to the parent to enhance the child's acceptance
2. Expertise in managing and rendering optimal dental care for the medically, emotionally or physically challenged pediatric dental patient
3. Ability to perform evaluations of the physical status of children and adolescents
4. Ability to transform didactic/learned information into appropriate clinical situations
5. Skill in the use of pharmacologic and nonpharmacologic methods for the comprehensive control of pain and anxiety
6. Ability to recognize, refer and treat children who have sustained abuse and neglect
7. Expertise in dental surgical procedures for the restoration of the dentition
8. Skill/dexterity in performing procedures of periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region, including in-depth knowledge of biopsy and adjunctive diagnostic tests
9. Appropriate management of orofacial injuries

### Diagnostic skills

1. Ability to recognize the early signs of child abuse and neglect
2. Ability to diagnose dental trauma
3. Skill in the diagnosis, prevention and treatment planning of pediatric disease in the primary and permanent dentition and periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region
4. Application and understanding of patient monitoring

### Communication skills

1. Competence in the skills required to instruct and motivate children and their caretakers in methods of achieving and maintaining optimum oral health
2. Ability to prepare patients and caretakers for procedures
3. Ability to interact meaningfully with dental and nondental health care providers
4. Ability to work cooperatively with consultants and clinicians of other specialties and health-related fields

### Organizational skills and documentation

1. Coordination of tasks such that diagnosis, case analysis, treatment planning and clinical management of oral-facial health problems of the pediatric dental patient occur in a logical, efficient manner
2. Ability to present an organized treatment plan to the patient, parent, attending and front desk
3. Ability to manage time and tasks and to work effectively with people

### Research

1. Coordination and implementation of a research project
2. Successful completion of a research project, thesis preparation and thesis defense

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Sep 15	National Dental Boards, Part 1 and 2

## Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL.
- Upon acceptance in the specialty certificate program in pediatric dentistry, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. from an American Dental Association-accredited dental school
2. Successful completion of Part I of the National Dental Board Exam at the time of application and completion of Part II by the time of matriculation
3. Minimum grade point average of 3.0 (4.0 scale) or equivalent
4. Ranking in the top 50 percent of the class of the dental school attended
5. Personal interview
6. An externship in pediatric dentistry of at least one week in duration while attending dental school (highly encouraged)
7. Participation status with American Dental Education Association Postdoctoral Application Support Service and the Postdoctoral Dental Matching Program
8. Agreement to participate in the Postdoctoral Dental Matching Program
9. Agreement to participate in the ADEA PASS
10. Graduation or anticipated graduation from a CODA-accredited U.S. or Canadian dental school
11. Eligibility to obtain a Virginia Temporary Resident's License from the Virginia Board of Dentistry
12. Completion of GRE
13. Completion of TOEFL or IELTS for students whose native language is not English
14. Application to the pediatric graduate program is accepted through the ADEA PASS program. The PASS application should include the following items:
  - a. Online application form
  - b. Essay/personal statement: Please tell us about your personal history that led you to apply for an educational program in pediatrics. Include your plans for the future and any factors you

believe are important for us to know in reviewing your application. Please limit your comments to one page.

- c. Curriculum vitae/resume: Include a curriculum vitae/resume to give us more information about yourself. Include your education and work experiences, awards, honors, research experiences, and personal interests.
- d. Undergraduate college transcripts: Include official transcripts from all colleges or universities you attended before dental school.
- e. Dental school transcripts
- f. Institution Evaluation Form (completed by the dean of your dental school)
- g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
- h. Professional evaluations: two letters of recommendation from individuals who can personally attest to your professional and personal qualities (the program director's letter can count as one). A letter from the chair of pediatrics is not required, but may be included if the chair has personal knowledge of your skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**

## Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (<http://international.admissions.vcu.edu/>) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items 1 through 7 above
3. Test of English as a Foreign Language (<http://www.ets.org/toefl/>) (minimum score of 600 on paper-based test and 100 on Internet-based test)
4. International English Language Testing System (<http://www.ielts.org>) (score of 6.5 or greater acceptable; test must be taken within two years of application date)

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained then the examination must be retaken. For research the student must have a thesis defense and present a poster by mid-April of their second year. Extensions may be approved but at the students own expense.

## Curriculum requirements

Course	Title	Hours
DENS 550	Update in Practice Administration	1
DENS 580	Biostatistics and Research Design in Dentistry (two credits taken twice)	4
DENS 660	Interdisciplinary Care Conference (0.5 credits earned twice) <sup>1</sup>	1
DENS 699	Thesis Guidance (two credits taken four times)	8
DENS 700	Basic Sciences and Graduate Dentistry	3

ORTH 620	Orthodontic Clinic for Non-orthodontic Graduate Students (one credit taken four times)	4
PEDD 511	General Anesthesia Rotation	3
PEDD 512	Growth and Development	1
PEDD 514	Introduction to Pediatric Dentistry	2
PEDD 572	Pediatric Dental Emergency Service (2.5 credits taken twice)	5
PEDD 612	Seminar Series: Pediatric Dentistry and Medicine (two credits taken two times)	4
PEDD 620	Pediatric Medicine Rotation	1.5
PEDD 640	Clinical Teaching (two credits taken three times)	6
PEDD 650	Literature Review (two credits taken two times)	4
PEDD 654	Treatment Planning Seminar (one credit taken four times)	4
PEDD 656	Current Literature Review (one credit taken two times)	2
PEDD 680	Pediatric Dental Clinic (four credits taken four times)	16
Total Hours		69.5

1

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5-credit classes.

**The minimum total of graduate credit hours required for this degree is 69.5.**

## Plan of study

### Year one

Fall semester	Hours
DENS 580 Biostatistics and Research Design in Dentistry	2
DENS 660 Interdisciplinary Care Conference (no credit earned in fall; continuing course) <sup>1</sup>	-
DENS 699 Thesis Guidance	2
ORTH 620 Orthodontic Clinic for Non-orthodontic Graduate Students	1

## Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics

### Program goals and objectives

The didactic requirements of the M.S.D. are combined with the goals of the M.S.D. program to provide the student with a strong clinical background which is supported by a strong background in research methodology.

### Program goals

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics can be achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply periodontal and associated literature
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research
9. Enable successful completion of the American Board of Periodontology exam
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education

### Program objectives

1. To be exposed to the basic sciences and be able to apply concepts to clinical periodontics
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the periodontal patient
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities
5. To become competent in the treatment planning, site preparation, surgical placement and maintenance of dental implants
6. To obtain competency and certification in enteral and parental conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the American Board of Periodontology examination

- To develop communication and presentation skills and lifelong learners

## Student learning outcomes

- To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics are achieved
- To provide a sound background in medicine as it applies to the periodontal patient
- To provide a sound background in oral pathology with a 100 percent completion of oral pathology rotation
- To be able to interpret, critique and apply periodontal and associated literature with a 100 percent completion of periodontal courses measured
- To develop sound diagnostic clinic, nonsurgical and surgical skills
- To provide didactic instruction and clinical training in the area of dental implants
- To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
- To provide an environment for the interpretation and implementation of research with a 100 percent successful completion of biostatistics and research design in dentistry course
- Enable successful completion of the American Board of Periodontology written and oral examinations
- To develop sound lifelong didactic and clinical learning skills
- To provide specialists in periodontics for community health care, professional service and dental education with a 100 percent graduate participation in specialty clinical practice

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.D.	Fall (Jul 1 start date)	Jul 1, a year previous to entry	National Dental Boards, Part 1 and 2

## Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a score of 100 or higher.
- International applicants must include an external credential evaluation of all international transcripts to complete the application. WES, ECE and AACRAO are some of the recommended NACES-approved providers.
- Upon acceptance in the specialty certificate program in periodontics, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

- D.D.S. or D.M.D. degree from U.S. or Canadian dental school
- Part I of the National Dental Board at the time of application and Part II by time of matriculation (official report or certified copy)
- Transcripts in a sealed envelope from each college/university/dental program attended
- GPA/class ranking forwarded from the dean's office of the dental school attended
- Three letters of recommendation addressed to the director of graduate periodontics
- Curriculum vitae and personal statement
- Interview upon request from program director

## Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (<http://international.admissions.vcu.edu/>) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items three through seven above
3. An external credential evaluation for international applicants of all international transcripts to complete the application (WES, ECE and AACRAO are some of the recommended NACES-approved providers.)
4. TOEFL with a minimum score of 100 for applicants from countries where English is not the primary and official language

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained, then the examination must be retaken. For research the student must have a thesis defense, present a poster and prepare a manuscript for submission by May 1 of the third year. Extensions may be approved, but students are responsible for the expense.

## Oral Health Research, Doctor of Philosophy (Ph.D.)

The Ph.D. in Oral Health Research prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and oral biology. Students will select a research project from one of three main areas of focus:

- Cancer and developmental biology of the head and neck
- Infection and immunology in diseases of the head and neck
- Tissue engineering, stem cells and new materials for the orofacial region

These areas correspond to the critical areas identified by the National Institute for Dental and Craniofacial Research. The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated not only with programs and departments within the Philips Institute for Oral Health Research within the School of Dentistry, but also the VCU Massey Cancer Center and VCU's College of Engineering.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

## Student learning outcomes

- Graduates will have acquired fundamental knowledge of oral health research and strength in cutting-edge research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.
- Graduates will have an understanding of the structure, function and development of tissues of the oral and craniofacial region.

- Graduates will be able to evaluate molecular mechanisms associated with head and neck cancer and design research programs to improve treatment.
- Graduates will be able to evaluate infectious and immune diseases of the head and neck and design research programs to improve treatment.
- Graduates will be able to evaluate the use of bioengineering for diseases of the head and neck and design research programs to improve treatment.
- Graduates will have developed strong practical foundations on which to build research careers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall		

## Special requirements

- Applicants whose native language is not English must submit satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL. These scores should be 80 minimum for Internet-based tests, 213 minimum for computer-based tests and 550 minimum for paper-based tests.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

- A minimum GPA of 3.0 on a 4.0 scale
- A personal statement, which should include long-term career goals to assess reasons behind the candidate's application; how a Ph.D. helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
- A current resume or curriculum vita
- Three letters of recommendation that speak to the scientific competency and experience of the applicant

## Degree requirements

For students with a B.S. degree, the Ph.D. in Oral Health Research will require the completion of a minimum of 102 credits, including a minimum of 35 didactic credit hours comprising seven required courses (12 credits), six core courses (15 credits) and additional electives (eight credits). The remaining 67 credits (at minimum) will be taken in research courses.

Students entering the program with an M.S. will be required to complete a minimum of 81 credits, including a minimum of 23 didactic credit hours comprising six core courses (15 credits) combined with electives (eight credits). These students must also complete the research requirements for a minimum of 58 credits.

Students entering the program with a D.D.S or D.M.D. will be required to complete a minimum of 84 credits, including a minimum of 24 didactic credits comprising five required course (six credits), four core courses (10 credits) and electives (eight credits). These students must also complete the research requirements for a minimum of 60 credits.

## Curriculum requirements for students entering with a B.S.

Course	Title	Hours
<b>Required courses</b>		
BIOC 530 & BIOC 531 & BIOC 532 & BIOC 533	Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function and Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism and Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology and Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics	5
or BIOC 503	Biochemistry, Cell and Molecular Biology

Students with an interest in academic and research careers are afforded the opportunity to undertake advanced degree training while in dental school by combining doctoral study in oral health research with a professional degree in dentistry. The program seeks to train students interested in translating oral research to the clinic. These clinician-scientists will help bridge the gap between basic and clinical science in the field of dentistry. For more information, see the program page in the Professional Bulletin (<http://bulletin.vcu.edu/professional-studies/dentistry/dds-phd-oral-health-research/>).

## Oral Health Research, Doctor of Philosophy (Ph.D.) with a concentration in bioengineering

The Ph.D. in Oral Health Research with a concentration in bioengineering prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and tissue. Students will develop an understanding of the mechanism of craniofacial tissue damage and healing, and develop therapeutics to regenerate the hard and soft tissue in dental and craniofacial areas.

The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated with the Philips Institute for Oral Health Research and the College of Engineering.

Ph.D. students are expected to enroll as full-time graduate students in the core Ph.D. program. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser, select their concentration and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

### Student learning outcomes

- Graduates will have acquired fundamental knowledge of oral health research and strength in cutting-edge research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.
- Graduates will have an understanding of the structure, function and development of tissues of the oral and craniofacial region.

The program seeks to train students interested in translating oral research to the clinic. These clinician-scientists will help bridge the gap between basic and clinical science in the field of dentistry. For more information, see the program page in the Professional Bulletin (<http://bulletin.vcu.edu/professional-studies/dentistry/dds-phd-oral-health-research/>).

## Oral Health Research, Doctor of Philosophy (Ph.D.) with a concentration in infection and immunology

The Ph.D. in Oral Health Research with a concentration in infection and immunology prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and microbiology. Students will develop an understanding of the molecular mechanisms of microbial disease initiation and progression with the goal of developing new approaches to prevent and treat oral and systemic diseases caused by the oral microbiome.

The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated with the Philips Institute for Oral Health Research and the School of Medicine.

Ph.D. students are expected to enroll as full-time graduate students in the core Ph.D. program. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser, select their concentration and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

### Student learning outcomes

- Graduates will have acquired fundamental knowledge of oral health research and strength in cutting-edge research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.
- Graduates will have an understanding of the structure, function and development of tissues of the oral and craniofacial region.
- Graduates will be able to evaluate infectious and immune diseases of the head and neck and design research programs to improve treatment.
- Graduates will have developed strong practical foundations on which to build research careers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall		

### Special requirements

- Applicants whose native language is not English must submit satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL. These scores should be 80 minimum for Internet-based tests, 213 minimum for computer-based tests and 550 minimum for paper-based tests.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

- A minimum GPA of 3.0 on a 4.0 scale
- A personal statement, which should include long-term career goals to assess reasons behind the candidate's application; how a Ph.D. helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
- A current resume or curriculum vita
- Three letters of recommendation that speak to the scientific competency and experience of the applicant

## Degree requirements

For students with a B.S. degree, the Ph.D. in Oral Health Research will require the completion of a minimum of 102 credits, including a minimum of 35 didactic credit hours comprising seven required courses (12 credits), six core courses (15 credits) and additional electives (eight credits). The remaining 67 credits (at minimum) will be taken in research courses.

Students entering the program with an M.S. will be required to complete a minimum of 81 credits, including a minimum of 23 didactic credit hours comprising six core courses (15 credits) combined with electives (eight credits). These students must also complete the research requirements for a minimum of 58 credits.

Students entering the program with a D.D.S or D.M.D. will be required to complete a minimum of 84 credits, including a minimum of 24 didactic credits comprising five required course (six credits), four core courses (10 credits) and electives (eight credits). These students must also complete the research requirements for a minimum of 60 credits.

## Curriculum requirements for students entering with a B.S.

Course	Title	Hours
<b>Required courses</b>		
BIOC 530 & BIOC 531 & BIOC 532 & BIOC 533	Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function and Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism and Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology and Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics	5
or BIOC 503	Biochemistry, Cell and Molecular Biology	
BIOS/STAT 543	Graduate Research Methods I	3
MICR/BNFO 653	Advanced Molecular Genetics: Bioinformatics	3
OVPR 601 or OVPR 602 or OVPR 603	Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research	1
<b>Core courses</b>		
OCMB 701	An Introduction to Oral Biology	2
OCMB 702	Oral Pathogenesis	2
OCMB 703	Research Topics in Oral Biology	1
OCMB 704	Oral Biology Seminar Series (one-credit course taken eight semesters)	8
OCMB 706	Proposal Preparation	1

OCMB 707	Research Skills and Career Development	1
<b>Electives</b>		
Choose a minimum of eight credit hours		8
MICR 505	Immunobiology	
MICR 515	Principles of Molecular Microbiology	
MICR 605	Prokaryotic Molecular Genetics	
MICR 616	Mechanisms of Viral and Parasite Pathogenesis	
MICR 618	Molecular Mechanisms of Bacterial Pathogenesis	
MICR 686	Advanced Immunobiology	
<b>Research requirement</b>		
OCMB 705	Oral Biology Directed Research (taken for a minimum of 67 credits)	67
Total Hours		102

For these students, the minimum total of graduate credit hours required for this degree is 102.

## Curriculum requirements for students entering with an M.S.

Course	Title	Hours
<b>Core courses</b>

**For these students, the minimum total of graduate credit hours required for this degree is 84.**

Students with an interest in academic and research careers are afforded the opportunity to undertake advanced degree training while in dental school by combining doctoral study in oral health research with a professional degree in dentistry. The program seeks to train students interested in translating oral research to the clinic. These clinician-scientists will help bridge the gap between basic and clinical science in the field of dentistry. For more information, see the program page in the Professional Bulletin (<http://bulletin.vcu.edu/professional-studies/dentistry/dds-phd-oral-health-research/>).

## Advanced Dental Education

### Patrice N. Gray

Director, marketing and continuing education

## Office of Continuing Education

For every professional person who serves the health sciences, education must be a lifetime commitment.

Graduation from dental school is the beginning of a lifelong educational experience for the serious, conscientious student of dentistry. Regardless of how well-prepared a health professional may be at the time of graduation, the adequate knowledge of yesterday is often insufficient information for today and tomorrow. With the rapid advancements made in dental technology and techniques, the professional must constantly seek new knowledge if the health care provider is to improve the health care given to patients.

Although the majority of continuing education courses are presented at the School of Dentistry, some are offered in other locations. The courses, which vary in length from one to four days, are scheduled throughout the year and consist of a variety of instructional methods from didactic to hands-on participation in clinical programs.

The instructional staff comprises faculty from the VCU School of Dentistry, guest lecturers from other dental schools and members of the dental profession and related professions from the United States and other countries.

## Advanced Dental Education programs

The School of Dentistry provides advanced dental education programs in the areas of endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics and advanced education in general dentistry. Satisfactory completion of the program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time resident trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

Students enrolling in endodontics, orthodontics, pediatric dentistry and periodontics also are awarded a Master of Science in Dentistry degree upon completion of the requirements for the certificate and successful defense of a thesis. The certificate program and Master of Science in Dentistry degree must be completed concurrently. See the School of Dentistry graduate program for more information on the Master of Science in Dentistry degree program.

Applications for admission should be directed to the director of the appropriate program, School of Dentistry, Virginia Commonwealth University, Box 980566, Richmond, VA 23298-0566. Successful completion of Part II of the National Board Dental Examination is required prior to admittance to the program.

## Advanced Education in General Dentistry

**Kevin M. Noall, D.D.S.**

Program director

The purpose of this 12-month advanced dental education residency program is to provide advanced education and clinical experience to prepare dental school graduates for a career in the practice of comprehensive, general dentistry. This program has a strong emphasis on treatment planning, experience with new technology, developing skills in aesthetic dentistry and restoration of dental implants. Graduates of this program will have attained added competency and confidence in all areas of dental care, practice management and professional responsibility. Further, this program provides residents with meaningful experiences in the delivery of dental care to diverse populations and people at high risk for dental disease. A strong affiliation exists between the School of Dentistry and the statewide Virginia Area Health Education Center, whose mission is to increase primary health care in underserved areas. The AEGD program works in concert with AHEC to deliver dental care and recruit/train minority health care providers from health professional shortage areas.

The School of Dentistry is committed to advanced dental education. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive training in the art and science of general dentistry. AEGD residents may be required to participate in off-site clinical experiences outside the city of Richmond, Virginia. Funds will be provided for travel and lodging when required.

### Eligibility and selection

Dentists with the following qualifications are eligible to apply for the AEGD program: Dental graduates from institutions in the United States accredited by the Commission on Dental Accreditation of the American Dental Association and who have passed Part I of the National Board Examination.

Selection criteria include didactic and clinical achievements, extramural experience, interpersonal skills and a demonstrated commitment to pursue a career in general dentistry. Every effort is made to recruit qualified applications from minority dentists and dentists from health professional shortage areas or dentists who profess a desire to serve in these areas. A selection committee consisting of the program director, the assistant dean for admissions, members from specialty areas, former residents and current residents will screen all applications. Using the above-mentioned selection criteria, the most promising applicants will be invited for personal interviews. Trainees and alternates will be selected. This program participates in the Postdoctoral Application Support Service Program. Phone (804) 828-3601; fax (804) 828-3159; email drhaselton@vcu.edu.

## Endodontics

**Garry L. Myers, D.D.S.**

Program director

The advanced dental education program in endodontics offers the student a comprehensive 24-month course of study in clinical, didactic and research endodontics. The program is designed to educate qualified individuals to pursue careers as educators, researchers and practicing clinicians, and meets the educational requirements for limitation of practice to the specialty of endodontics and examination by the American Board of Endodontics. The program is composed of several interrelated phases. The first phase consists of lecture courses that provide the student with a firm biological basis for patient care. The second phase

consists of lectures, seminars and clinical training designed to produce clinical mastery of endodontics. The third phase is research experience gained through completion of an individual research project and master's thesis.

Students completing the program earn a specialty certificate in endodontics and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

## Oral and Maxillofacial Surgery

**Robert A. Strauss, D.D.S., M.D.**

Professor and program director

The oral and maxillofacial surgery program is designed to provide extensive didactic and clinical experience in all aspects of the specialty. Those who complete training satisfactorily fulfill the prerequisites for examination and certification by the American Board of Oral and Maxillofacial Surgery.

The didactic portion of the program includes formal courses in oral pathology, anatomy and physical diagnosis, as well as numerous weekly conferences and seminars. Clinical rotations on oral pathology, anesthesia, medicine, surgical oncology, neurosurgery, cardiology, general surgery, emergency room and the trauma services are used to supplement the trainee's surgical experience. Throughout the program there is a constant correlation of the clinical experience with the biomedical sciences.

Through the multiple clinical and didactic facilities of the VCU Medical Center complex, the McGuire Veterans Affairs Medical Center and St. Mary's Hospital, there is ample material for education in the latest oral and maxillofacial surgical techniques. The oral and maxillofacial surgery service is responsible for diagnosis and management of diseases and injuries related to the oral and facial region. Trainees are involved in all aspects of treatment including simple and complicated oral surgery, anesthesia and pain control, oral and maxillofacial trauma, pre-prosthetic surgery, orthognathic surgery, head and neck pathology, oral and maxillofacial reconstruction, temporomandibular joint surgery, laser surgery, cosmetic facial surgery, and microneural and microvascular surgery. During the four years, the trainee assumes ever-increasing responsibilities as time and abilities dictate.

Upon satisfactory completion of the four-year residency, the trainee may earn the Doctor of Medicine degree from the School of Medicine by enrolling in the second and third years of that curriculum.

## Orthodontics

**Bhavna Shroff, D.D.S.**

Professor and program director

The Department of Orthodontics in VCU's School of Dentistry offers a 24-month advanced education in orthodontics and Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical-thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic

surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. The goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically. Clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of the program, with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is a requirement of the program. All senior residents present their research at the Virginia Association of Orthodontists meeting. The program qualifies students to take the written portion of the American Board of Orthodontics examination in the senior year. Residents are required to take the written portion of the American Board of Orthodontics examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists meeting.

Students completing the program earn a specialty certificate in orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

## Pediatric Dentistry

**William O. Dahlke, D.M.D.**

Associate professor and program director

The advanced education program in pediatric dentistry offers the student a comprehensive 24-month course of study in clinical and didactic pediatric dentistry. The program is designed to meet the educational requirements for limitation of practice to the specialty of pediatric dentistry and examination by the American Board of Pediatric Dentistry. The program emphasizes a diversified educational experience. The program places emphasis on all phases of pediatric dentistry including trauma, preventive dentistry, restorative, endodontics, periodontics, oral surgery, orthodontics and hospital dentistry. The program enables the student to provide comprehensive oral health care for the well child, the medically compromised and children with special needs. There is extensive use of various treatment modalities for pain control and behavioral management, such as sedation, analgesia and general anesthesia. Research experience is gained through completion of an individual research project and master's thesis.

Seminars are held in pediatric dentistry, orthodontic diagnosis and treatment, treatment planning, growth and development, cephalometric analysis, pediatric dentistry literature review, and behavior guidance. Formal courses in biostatistics, principles of pediatrics, pediatric advanced life support, head and neck anatomy, neurodevelopmental disabilities, leadership seminars, basic sciences and clinical core courses are required. The students participate in undergraduate clinical teaching and supervision.

One-month rotations occur in general anesthesia, and two-week rotations occur in the pediatric emergency room and pediatric medicine. During

the year, rotations in cleft palate, craniofacial anomalies and hemophilia occur. Optional elective rotations are available in treating institutionalized handicapped patients (in Lynchburg). Elective didactic courses also are available.

Students completing the program earn a specialty certificate in pediatric dentistry and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

## Periodontics

**Thomas C. Waldrop, D.D.S.**

Professor and program director

The advanced education program in periodontics consists of a 36-month clinical and didactic curriculum leading to a certificate in periodontics. Students are responsible for all materials and make up of lost clinical time. Courses in the basic and clinical sciences, medicine, head and neck anatomy, statistics and advanced cardiac life support are required. Students are responsible for attending and preparing for lectures, current and periodontal literature, medical-oral medicine, treatment planning, case presentation and surgical seminars. No grade less than 80 percent or passing is acceptable from any periodontal or basic science course work. Less than passing grades may require retesting or retaking of a course. Students are expected to be able to utilize a computer to prepare lectures and to access Internet resources.

Students are responsible for documentation of clinical and course work data. Specified digital intra-oral camera and documentation of all clinical cases and department archiving is required. Students are responsible to the service for rotations in general medicine, dental anesthesiology and oral pathology. Proficiency and certification in intravenous conscious sedation is required. Students are responsible for clinical and classroom teaching to undergraduate and specialty students. Research on a topic that is reviewed and approved by a faculty committee is required. Upon completion of the research, the student is required to prepare a thesis, defense and manuscript for publication. Certificates are not awarded until completion of the Master of Science in Dentistry requirements. Students are responsible for the purchase of program-required equipment, instruments, books and all associated fees. All students are required to become student members of the American Academy of Periodontology.

## Department of Endodontics

**Clara M. Spatafore, D.D.S.**

Interim chair

The Department of Endodontics is dedicated to providing quality endodontic dental care services as well as advancing new knowledge through teaching, research, community involvement and patient care. The faculty participate in the training of predoctoral dental students in the area of clinical endodontics. After an introduction to the specialty in their first year, students learn and develop didactic and treatment skills during preclinical classes and labs in the second year. Advanced topics and clinical techniques are stressed in the third year, which allows patient treatment during the third and fourth years. In the fourth year, students are prepared for dental board examinations and are given the opportunity to treat a variety of clinical cases in both the School of Dentistry and off-site service-learning clinics.

## Department of Orthodontics

**Steven J. Lindauer, D.M.D., M.D.Sc.**

Professor and chair

The Department of Orthodontics is dedicated to providing the best and latest care to patients, as well as offering the best preparation for graduate orthodontic residents. The department offers a 24-month advanced education Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice.

## Department of Pediatric Dentistry

**Tegwyn H. Brickhouse, D.D.S., Ph.D.**

Associate professor, research director and chair

The vision of the VCU Department of Pediatric Dentistry focuses on the oral health of the growing and developing child and how oral health impacts the overall health of the individual, which in turn informs a multidisciplinary approach to prepare students and residents for a rapidly evolving health care environment. The VCU Department of Pediatric Dentistry is committed to clinical excellence, innovative educational initiatives and forging ahead with translational research.

## Department of Periodontics

**Harvey A. Schenkein, D.D.S., Ph.D.**

Paul Tucker Goad Professor and chair

Faculty in the Department of Periodontics participate in the training of predoctoral dental students by emphasizing the evidence-based underpinnings of contemporary periodontics while providing innovative educational instruction. The department also trains specialists in periodontics via its postgraduate program. Furthermore, faculty provide outstanding care to patients through VCU Dental Care, the faculty practice of the VCU School of Dentistry.

# SCHOOL OF EDUCATION

---

The Virginia Commonwealth University School of Education prepares effective, highly skilled teachers, counselors, school administrators, higher education faculty and other education professionals committed to making a difference in the lives of children and adults and their communities, particularly in urban and high-need environments.

Located on the university's Monroe Park Campus, the School of Education has a strong commitment to social justice, diversity and inclusion among students, faculty and staff, as well as in its academic programs.

The School of Education offers five bachelor's programs, one undergraduate certificate, seven master's programs, three doctoral programs, seven post-baccalaureate certificates, one graduate certificate and two post-master's certificates.

The guiding theme of educator preparation programs in the School of Education is **educator as critically reflective practitioner**. Courses and experiences provide opportunities for individuals to be engaged in meaningful dialog about the nature and application of appropriate knowledge and skills to make instructional, assessment, counseling and leadership decisions that improve student learning.

The school has more than 130 teaching and research faculty, many of whom are internationally renowned experts who produce and disseminate scholarship that extends knowledge, improves practice and collaboration, and supports schools and educational and human service agencies.

## Administration

1015 West Main Street  
Box 842020  
Richmond, Virginia 23284-2020  
(804) 828-3382  
Fax: (804) 828-1323  
soe.vcu.edu (<http://www.soe.vcu.edu>)

**Andrew P. Daire, Ph.D.**  
Professor and dean

**Kathleen M. Rudasill, Ph.D.**  
Professor and associate dean for research and faculty development

**Luciana C. de Oliveira, Ph.D.**  
Professor and associate dean for academic affairs

**Tomika L. Ferguson, Ph.D.**  
Assistant professor and interim assistant dean for student affairs and inclusive excellence

## Accreditation

The school holds membership in the American and Virginia Association of Colleges of Teacher Education and in the Holmes Partnership.

## Education (all degrees)

National Council for Accreditation of Teacher Education (initial licensure and advanced degrees for school personnel), the Virginia Department of Education and the Southern Association of Colleges and Schools.

## Counselor education

Accredited by the Council on Accreditation of Counseling and Related Educational Programs

This accreditation applies to both the K-12 school counseling concentration and the college counseling and student affairs concentration.

## Organization

The chief administrative office for the School of Education is Oliver Hall, Room 2090. The dean is responsible for the overall operation of the school, while two associate deans and one assistant dean (associate dean for academic affairs, associate dean for research and faculty development, and assistant dean for student affairs and inclusive excellence) assist in the school's administrative functions.

The school contains four academic departments: Counseling and Special Education, Educational Leadership, Foundations of Education, and Teaching and Learning. The school also supports a number of centers and institutes, including:

- Asian-American Educational Studies Center
- Center for Innovation in STEM Education
- Center for School-Community Collaboration
- Center for Teacher Leadership
- Child Development Center
- Metropolitan Educational Research Consortium
- Minority Educator Recruitment, Retention and Equity Center
- Partnership for People with Disabilities
- Rehabilitation Research and Training Center
- The Literacy Institute at VCU
- Virginia Adult Learning Resource Center

## Facilities

The School of Education is housed primarily in Oliver Hall, where classroom, laboratory and activity centers, as well as faculty and administrative offices can be found. Clinical laboratories are located at 3600 W. Broad St. The affiliated centers have various locations close to the Monroe Park Campus.

## Support/resource offices

The School of Education has several offices that provide support services to students and faculty. These offices include the Office of Graduate Studies, Student Services Center, Office of Assessment, Office of Communications and Enrollment Management, and Instructional Technology Services.

## Office of Graduate Studies

The Office of Graduate Studies assists all departments with admission, matriculation, graduation, and special actions and appeals for graduate students. The office also supports and guides students throughout their graduate program, fostering a learning community that enhances students' professional development.

## Student Services Center

The Student Services Center provides support for teacher education and counselor education students as they progress through their academic programs. Services include:

- Advising for students in extended teacher preparation, post-baccalaureate, counselor education and special education programs prior to formal admission to graduate programs
- Processing of applications for admission to teacher preparation programs
- Processing of applications for clinical placements and coordinating for practica, student teaching, internships and externships in local school divisions and educational facilities
- Processing applications for licensure in Virginia and other states
- Providing general program and course information
- Assigning faculty advisers
- Entering, retrieving and managing data to document student progress through academic programs
- Serving as a repository of information on comprehensive examinations, application and forms for academic transactions, admission to teacher preparation, clinical experiences, and licensure

## Office of Assessment

The Office of Assessment coordinates data collection, analysis and reporting for a variety of purposes, including accreditation, personnel evaluations, student assessment and survey research.

## Office of Communications and Enrollment Management

The office coordinates all marketing and communication efforts for the school, provides brand alignment support and works with departments and programs on recruitment efforts. The team maintains the School of Education website, social media channels, and all marketing materials and communications to internal and external stakeholders.

## Information Technology Services

The Information Technology Services center provides support and training for faculty, staff and students in the School of Education for various technology resources. The ITS houses both Mac and PC laptops, Chromebooks, netbooks, digital cameras, Promethean board accessories, mobile devices and more for use and checkout by faculty, staff and students. The office provides technical assistance to faculty and staff to assure that issues in using technology are quickly resolved. The center also coordinates two technology resources:

- **Digital playgrounds (rooms 3107 and 3108)**

Digital playgrounds provide space and equipment that facilitate many opportunities to learn about incorporating computer-assisted instruction in the classroom. The digital playground in Room 3107 is equipped with several computers connected for use of pay-4-print services for students. Both rooms are equipped with smartboards, Promethean boards, 3-D printers, 3-D scanners and more for students to “play” with to develop more effective instruction. Technology devices can be checked out from ITS for use in these areas.

- **Distance-learning technology**

The ITS also supports three rooms in Oliver Hall with distance-learning technology and provides ongoing assistance to faculty, preservice teachers and staff in the School of Education.

## Licensure and reciprocity

Upon completion of degree requirements in any of VCU's teacher preparation programs and with the recommendation of the School of Education, students are eligible to receive initial teacher licensure from the Virginia Department of Education. For additional information on licensure, licensure renewal or an add-on endorsement, contact the School of Education's Student Services Center.

In Virginia, initial licensure requires successful completion of state-mandated tests. Passing scores on these tests are required to progress through different portions of the licensure programs from admission to teacher preparation, admission to student teaching and recommendation for licensure. For a list of testing requirements, please refer to the Students Services Center (<https://soe.vcu.edu/current-students/student-services-center/>) section on the School of Education website.

Students should request that their Praxis scores be reported to VCU.

Before a recommendation for licensure can be sent to the Teacher Licensure Division of the Virginia Department of Education, these test scores must be on file with the School of Education's Student Services Center.

## Licensure for education personnel

Licensure and endorsement are based in part on the successful completion of an approved program developed in response to nationally recognized standards. All licensure and endorsement programs offered by the School of Education are approved by the Virginia Department of Education and the National Council for the Accreditation of Teacher Education. The commonwealth of Virginia is a member of the National Association of State Directors of Teacher Education and Certification, which has a national reciprocity agreement for teacher licensure. Therefore, all licensure and endorsement programs in the School of Education have approved program status and are a part of the NASDTEC Certification Reciprocity Agreement.

## Graduate programs leading to initial teacher licensure

Individuals often decide to pursue a teaching career after they have completed a baccalaureate degree. VCU serves qualified individuals through approved programs leading to a Master of Teaching, Master of Education (special education) or a post-baccalaureate Certificate in Teaching. Upon completion of a degree program, graduates are eligible for both Virginia licensure and/or endorsement in the specific degree area.

Individuals who wish to obtain licensure in art education or music education should consult the School of the Arts section of this bulletin.

The Master of Teaching program integrates undergraduate course work for a bachelor's degree in a liberal arts or science major with course work and graduate study leading to a Master of Teaching in a program area.

## Approved programs and certification reciprocity

All of VCU's initial and advanced educator preparation programs are approved by the Virginia Department of Education and lead to recommendation for a Virginia Professional License. Furthermore,

our educator preparation programs are accredited by the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU's School of Education also holds membership in the American and Virginia Associations of Colleges for Teacher Education and the Holmes Partnership.

Based on the National Association of State Directors of Teacher Education and Certification agreement, VCU graduates may be eligible for teacher licensure reciprocity with other states. Please be aware that requirements for licensure vary from state to state. Students interested in licensure reciprocity should contact the School of Education's Student Services Center or the Department of Education Office in the future hiring state.

If a student plans to be in a state other than Virginia while completing an online program at VCU, please note that state regulations in every state determine whether VCU may offer a place in a course or program. VCU participates in the National Council of State Authorization Reciprocity Agreements, which allows students from NC-SARA-approved states to enroll in VCU's degree programs. All VCU licensure programs lead to a recommendation for a Virginia teaching license. Please also note that as a VCU student enrolled in an online program, all universitywide policies, as well as School of Education policies, would apply.

## Programs

### Master of Teaching (extended programs)

- Biology education
- Chemistry education
- Early and elementary education
- Earth science education
- English education
- History/social studies education
- Mathematics education
- Physics education

### Master of Education

- Adult learning
  - Adult literacy
  - Human resource development
  - Instructional design and technology
- Counselor education
  - College counseling and student affairs
  - Couples and family counseling
  - School counseling
- Curriculum and instruction
  - Instructional technology
  - Online teaching
  - Teaching and learning
- Educational leadership
  - Administration and supervision
  - Leadership studies
- Reading
  - K-12 reading specialist
  - Reading with TESOL/adult
  - Reading with TESOL/K-12
  - Without concentration

- Special education
  - Early childhood
  - General education
  - Severe disabilities

### Ed.D.

- Leadership

### Ph.D.

- Education
  - Art education
  - Counselor education and supervision
  - Curriculum, culture and change
  - Educational leadership, policy and justice
  - Educational psychology
  - Research, assessment and evaluation
  - Special education and disability leadership
  - Urban services leadership
- Special Education

### Graduate certificate

- Teaching elementary education

### Post-baccalaureate graduate certificates

- Disability leadership
- Instructional technology
- Medical education
- Online teaching for K-12 educators
- Teaching
  - Biology education
  - Chemistry education
  - English education
  - History/social studies education
  - Mathematics education
  - Physics education
- Teaching English to speakers of other languages

### Post-master's certificates

- Educational leadership
- Reading specialist

## Extended Teacher Preparation Program

The School of Education, in cooperation with the College of Humanities and Sciences, offers extended teacher preparation programs in early childhood and elementary education (prekindergarten through grade six) and secondary education (grade six through grade 12). The successful completion of these programs results in the simultaneous awarding of both a bachelor's and a master's degree.

## General degree requirements

The successful completion of these programs results in the simultaneous awarding of both a bachelor's and a master's degree. Prospective Master of Teaching students earn their bachelor's degree in a specific field in which they plan to teach. A student generally begins work on the

professional studies component in the third or fourth year of academic study.

A student enrolled in the extended teacher preparation program must complete a minimum of 153/154 credits. The student must maintain a cumulative GPA of 2.8 for admission to the teacher preparation program. Completion of at least 90 credits with a minimum GPA of 3.0 in the last 60 semester hours of study is required for that student to be admitted to the graduate studies portion of the extended program.

A post-baccalaureate graduate Certificate in Teaching is open primarily to those who have already earned a master's degree. The candidate must complete at least 30 additional hours beyond the bachelor's level. Admittance to this program requires a minimum GPA of 3.0 in the last 60 semester hours of study.

## Clinical experiences

All initial licensure programs require clinical experiences throughout the program. During the initial stages of a program, these experiences occur as practica in varied placements in K-12 education relevant to the student's program. The program also requires a capstone clinical experience in the form of student teaching. For student teaching, those pursuing early and elementary education are placed in two settings, one in early elementary grades (K-2) and one in upper elementary grades (3-5). Those pursuing secondary education receive a single placement in their discipline in a middle school or high school setting.

With the guidance of a clinical faculty member or cooperating teacher, the intern assumes more independence in the field setting. Satisfactory completion of the internship and the preceding training is charted through evaluations made by the university supervisor, clinical faculty or cooperating teacher, and school administrator.

## Undergraduate major

Freshman students who plan to become early and elementary education teachers through the extended teacher preparation pathway are required to enroll in the Bachelor of Interdisciplinary Studies liberal studies for early and elementary education major. Transfer students should meet with a B.I.S. adviser prior to course registration. The B.I.S. degree requirements are outlined in the College of Humanities and Sciences section of this bulletin.

Prospective secondary teachers should major in the discipline they wish to teach. The disciplines in which VCU offers licensure programs are as follows: English, history/social studies, mathematics and science (various specialties). Students should consult with their education adviser to ensure that courses taken to meet major requirements also meet state licensure requirements.

For the traditional, four-year pathway, students should review admissions and program information for the Bachelor of Science in Education program. See details on the School of Education website (<https://soe.vcu.edu/academics/undergraduate-programs/>).

## Change of major and transfer students

Students wishing to enter the Extended Teacher Preparation Program in early and elementary education or secondary education must transfer initially to the College of Humanities and Sciences. They must declare a major in the college and a specialization in the appropriate professional studies sequence in the School of Education.

For admission to teacher preparation, a minimum GPA of 2.8 is required. A minimum GPA of 3.0 in the last 60 semester hours of study is required for admission to the graduate phase of the Extended Teacher Preparation Program.

## Transcript evaluation

The College of Humanities and Sciences evaluates transcripts of students pursuing the extended program in early and elementary education or secondary education. Credits are accepted if they conform to specific program guidelines; course equivalents from accredited colleges and universities are accepted if the grade earned is a minimum of C. From the extended program, 60 semester hours of acceptable undergraduate course work are required to be admitted to a teacher preparation program. See specific criteria in the admission information below.

Credits that are accepted from two-year institutions may meet liberal arts and sciences requirements, but will not meet professional requirements for upper-division course work. The VCU Transfer Guide for Virginia Community Colleges lists, in full, credits accepted by VCU that have been earned in the state's community colleges.

After the initial student transcript evaluation, the assigned adviser reviews the accepted transfer credits with the student, determining what additional course work will be necessary at VCU to address state licensure requirements. An adviser is not required to use all the accepted transfer credits in a student's program of study. Only those credits approved for transfer can be applied toward the chosen degree.

## Faculty advisement

An academic adviser is assigned to a student by the department of that student's chosen major in the College of Humanities and Sciences. A professional studies adviser is similarly assigned by the Department of Teaching and Learning according to the student's proposed teaching endorsement. This adviser-student relationship continues throughout the course of study at VCU. Student and adviser jointly develop the student's individual program. During the planning process, the student identifies, clarifies and explores his or her personal and professional goals.

## Educator as reflective practitioner

The guiding theme of the teacher preparation program is "educator as reflective practitioner." The underlying foundation of instruction in the teacher preparation program is to challenge the prospective teacher to develop skills in critical reflection and to value thoughtful decision-making. Candidates demonstrate critical reflection by: being open to and respectful of all stakeholders; taking other perspectives into account; utilizing critical-thinking in framing and solving educational problems; making informed, ethical and professional decisions; and taking ethical and professional action.

## Demographics consideration in teaching

The demographics of elementary, middle and high school students are changing. There is an increase in the number of students for whom English is not the first language, of minority students, of students who do not all learn or respond in similar ways and of students who may be identified as possessing a disability.

Future teachers are encouraged to take advantage of opportunities through formal courses and other experiences to gain greater insight and ability in addressing learners from differing cultural backgrounds

and considering the needs of learners with different learning styles, participation styles, and special abilities or disabilities.

## Standards of learning

Much of the prekindergarten through grade 12 curriculum is based on the commonwealth of Virginia's current Standards of Learning. Students preparing to be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. The School of Education website has a link to the SOLs.

In some instances the content and concepts associated with one or more SOLs may be incorporated in a course in the College of Humanities and Sciences or in the School of Education, but as the SOLs are for a kindergarten through grade 12 curriculum and not a college curriculum, one may need to study several of these on her or his own.

## Technology standards

The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today's schools. Individuals preparing to teach must be competent on each of the eight standards in Virginia's Technology Standards for Instructional Personnel. These standards may be reached through the School of Education website.

Students are advised to consult with the professional studies adviser regarding the program's requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through Knowledgenet. Please see the general education requirements for undergraduate study (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/undergraduate-information/>) in the College of Humanities and Sciences section of this bulletin.

## Extended program in early and elementary or secondary education

In the extended program, a student generally begins work on the professional studies component in the third year of study. A student in the extended program must maintain a minimum cumulative GPA of 2.8 for admission to teacher preparation and clinical experience and, prior to the fifth year, a minimum GPA of 3.0 for admission to the graduate study portion of the program.

## Admission information

Any undergraduate admitted to VCU who declares a major in the College of Humanities and Sciences is eligible to declare a specialization in secondary education. Students specializing in early and elementary education must declare the liberal studies for early and elementary education major in the Bachelor of Interdisciplinary Studies program.

Transfer students and students currently attending VCU who wish to change their majors to this program must have a minimum GPA of 2.0; however, note the much higher GPA requirement for admission to teacher preparation and then to graduate study. All students in the program, upon completion of 60 hours of undergraduate course work and prior to completion of 90 hours, must apply for admission to teacher education. To be accepted, a student must have a minimum GPA of 2.8 and must have achieved satisfactory scores on the Scholastic Aptitude Test, the American College Test or the Graduate Record Examination.

Students who pursue one of the extended teacher preparation programs follow a series of steps as noted in order to meet all requirements, including the 153/154 credits.

## Step 1: Admission to the university

### Requirements

1. Scores from Scholastic Aptitude Test or American College Test
2. Minimum 2.0 GPA from high school or previous college

### Procedures

1. Declare an undergraduate major in the College of Humanities and Sciences for early and elementary or secondary education.
2. Declare an education specialization in early and elementary education or secondary education.

## Step 2: Admission to teacher preparation

Complete before enrolling in the first practicum (upon completion of 60 credits of liberal arts and prior to completion of 90 credits).

### Requirements

1. Minimum GPA of 2.8
2. Completion of six hours of English, three hours of mathematics, four hours of laboratory science and six hours of social science and/or history
3. Achieve satisfactory scores on the SAT, ACT or GRE (scores must be less than 5 years old) [**Note:** In addition, a passing score on the Virginia Communication and Literacy Assessment must be achieved for state licensure.]
4. Confirmation of education specialization (Undecided majors **must** choose a major prior to admission to teacher preparation.)
5. Enroll in or have completed TEDU 101, EDUS 300, EDUS 301 or equivalent course

### Procedures

1. Complete admission to teacher preparation application form (obtain in Office of Student Services) and submit a current transcript.
2. Complete TEDU 101, EDUS 300, EDUS 301 or equivalent course.
3. Register for practicum placement and accompanying courses. (**Note:** Students must be admitted to the teacher preparation program to be eligible for practicum placement and accompanying courses. Applications for practicum are available at the Student Services Center. In secondary education, these applications may be distributed at the initial class meeting.)
4. Register for, take and submit required GRE assessment results if sufficient SAT or ACT scores are not available; additionally, passing VCLA scores must be submitted for state licensure requirements. All assessments must be fewer than 5 years old to be used for the application to teacher preparation.

## Step 3: Application to graduate studies

### Requirements

1. Minimum GPA of 3.0
2. Acceptable scores on the SAT, ACT or GRE which are fewer than 5 years old. Applicant scores represent the top 50 percent of national test takers on the SAT, ACT or GRE in math and reading. General benchmark cohort averages include:
  - a. SAT: math – 533; reading – 543
  - b. ACT: math – 21; reading – 21
  - c. GRE: math – 153; reading – 151

- Statement of intent addressing reasons for seeking graduate education, including career goals; experience working with age group to be taught; reasons for entering teaching; and success in organizing, planning and implementing work with other individuals
- Three references: it is suggested that these be instructors or advisers in the College of Humanities and Sciences and the School of Education; use graduate studies reference forms
- Application fee

#### Procedures

- Obtain Graduate School admissions information online (<https://www.vcu.edu/admissions/apply/graduate/>).
- Complete the Graduate School admissions application online and submit all required materials.  
Note: Students must be admitted to the Graduate School to be eligible to enroll in graduate-level courses. No more than six graduate credits taken prior to admission to graduate study may be accepted toward the degree.

#### Application deadlines for early and elementary or secondary education

- Oct. 1 for spring semester
- Feb. 1 for summer and fall sessions

### Step 4: Clinical internship application

All programs require a graduate-level internship (TEDU 672 and TEDU 674) during the fifth year. Applications for internship can be obtained in the Student Services Center in Room 1037, Oliver Hall. Individuals in early and elementary education are placed in a kindergarten and a grade one through six classroom in the same semester. Individuals in secondary education typically have a single placement, although perhaps with two different teachers.

#### Requirements

- Minimum 3.0 GPA on graduate courses
- Admission to teacher preparation and to graduate study
- Completed application and transcripts submitted by established deadlines
- Passing score on applicable Praxis II specialty test(s) accompanying application
- Passing score on the Virginia Communication and Literacy Assessment
- Passing score on the Reading for Virginia Educators test (required for elementary and special education certification only)
- Criminal background check without a felony conviction

#### Procedures

- Obtain application form from the Student Services Center
- Submit copies of transcripts and required statement to a professional studies adviser for review
- Obtain approval signature of professional studies adviser
- Submit completed application to Student Services Center by Sept. 1 for the following spring semester, by Feb. 1 for the following fall semester

### Step 5: Admission to the profession

(during the final semester of enrollment)

#### Requirements

- Completion of all degree requirements
- Completion of application for initial teacher licensure (obtain from the Virginia Department of Education website (<http://doe.virginia.gov/teaching/licensure/index.shtml/>))
- Submit the completed application for initial teacher licensure with the required documents to the Student Services Center

#### Procedures for graduation check-out

Complete the "Apply to Graduate" procedure on eServices (<https://my.vcu.edu/>) for the undergraduate degree in humanities and sciences and the graduate degree in teaching.

## Added or add-on endorsements

### Added or add-on endorsements Teaching English as a Second Language

The School of Education offers the Virginia Department of Education ESL preK-12 endorsement for pre-service and in-service teachers. The ESL endorsement program at VCU requires 18 credit hours of ESL course work and six credit hours of a modern foreign language. Candidates must complete the following courses:

Course	Title	Hours
ENGL/LING/TEDU 552	Teaching English as a Second Language	3
FRLG 575	Intercultural Communication	3
LING/ENGL/ANTH 390	Introduction to Linguistics	3
TEDU 561	Reading Foundations: Sociological/Psychological Perspectives	3
TEDU 562	Reading Instruction in the Content Areas	3
TEDU 681	Investigations and Trends in Teaching (ESL curriculum and assessment)	3
Foreign language courses (modern languages only)		6
Total Hours		24

### Add-on endorsements in grades 6 through 12, science

Add-on endorsements in science are available in biology, chemistry, earth science and physics. Each add-on requires a first endorsement in one science and at least 18 semester hours in the add-on science that includes preparation in specified areas. The earth science added endorsement is listed below. For information about the added endorsements in biology, chemistry or physics, contact the Department of Teaching and Learning.

#### Earth science

To add an earth science endorsement to an endorsement in another science discipline, the individual must earn at least 18 semester hours in the earth sciences, including preparation in geology, oceanography, meteorology and astronomy. Courses to meet these requirements include:

Course	Title	Hours
ENVS 105 & ENVZ 105	Physical Geology and Physical Geology Laboratory	4

ENVS 335 & ENVZ 335	Environmental Geology and Environmental Geology Laboratory	4
ENVS 401	Meteorology and Climatology	3
ENVS 411	Oceanography	3
PHYS 103	Elementary Astronomy	3
Elective courses to complete at least 18 hours include: URSP 203 and URSP 204 and PHYS 391.		

## Education, Doctor of Philosophy (Ph.D.) with a concentration in art education

### Program goal

The art education concentration allows students to connect contemporary art and education theories and philosophies, practical and professional experiences, and impact research to develop an area of expertise relevant to the field of art education. The program distinguishes itself by integrating urban community engagement, digital and emerging media, and research and assessment in diverse settings. Graduates will be highly qualified to serve in teaching, research and leadership positions at universities and in arts and education organizations.

### Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.
2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all

graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Jan 15	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following represent the minimum requirements for admission:

1. Master's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the **School of Education website** for further information.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Curriculum requirements

Course	Title	Hours
<b>Foundation</b>		
EDUS 702	Foundations of Educational Research and Doctoral Scholarship I	3
EDUS 703	Foundations of Educational Research and Doctoral Scholarship II	3
<b>Research</b>		
EDUS 608	Educational Statistics	3
EDUS 710	Quantitative Research Design	3
EDUS 711	Qualitative Methods and Analysis	3
Research elective		3
<b>Externship</b>		
EDUC 700	Externship	3
<b>Dissertation</b>		
EDUC 899	Dissertation Research (minimum of six credit hours)	6
EDUS 890	Dissertation Seminar	3
<b>Concentration courses</b>		
ARTE 701	Issues in Art Education	3
ARTE 702	History of Art Education	3
ARTE 703	Contemporary Philosophies and Art Education	3
ARTE 704	Research in Art Education	3
ARTE 780	Cultural Diversity in Art and Society	3
ARTE 800	Advanced Seminar in Art Education	3
Elective from approved list		
Total Hours		48

The minimum total of graduate credit hours required for this degree is 48.

## Department of Counseling and Special Education

**Donna M. Gibson, Ph.D.**

Professor and chair

The Department of Counseling and Special Education blends top-tier, accredited programs in counselor education and special education and disability policy to create a unique, interdisciplinary academic environment for students and faculty. The department's primary mission is to prepare graduates to be leaders, ready to make a difference in people's lives. Courses emphasize applicable learning, incorporating the practical tasks and situations students will be faced with on the job.

The nationally recognized faculty members provide guidance and support, allowing students to fully explore their areas of interest. The department provides the tools that help students examine, refine and challenge current methods and scholarship and to use evidence-based research. Learn more by visiting the Department of Counseling and Special Education webpage (<http://www.soe.vcu.edu/departmentpages/counseling-and-special-education/>).

## **Counselor Education, Master of Education (M.Ed.) with a concentration in college counseling and student affairs**

### **Program goal**

The M.Ed. in Counselor Education with a concentration in college counseling and student affairs is a 60-credit-hour program designed to prepare counselors for higher education and community agencies throughout Virginia and the nation. The college counseling and student affairs concentration provides students with the specialized knowledge and skills necessary for employment as student affairs professionals in higher education settings. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

### **Student learning outcomes**

#### **Professional orientation/professional identity/continuing education**

1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

#### **Helping relationships/group work/career development/wellness**

1. Students display knowledge and understanding of counseling processes applied to both individuals and groups, including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

#### **Human development/wellness**

Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

#### **Social and cultural diversity/social justice and advocacy**

1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients' academic, personal and career opportunities.

2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

### **Assessment**

Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

### **Research**

Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

### **Leadership**

1. Students display knowledge of issues that affect student affairs practice and demonstrate an understanding of leadership, organization and management practices that help institutions accomplish their missions.
2. Students advocate for policies, programs and services that are equitable and responsive to the unique needs of postsecondary students.
3. Students use and analyze multiple data sources, including institutional data, to make decisions about improving differentiated student programs and students develop measurable outcomes for student development activities.
4. Students collaborate with the postsecondary community to assist students and use postsecondary community resources to improve student learning and development.

## **VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

Students accepted into the counselor education program must make satisfactory progress toward their degrees. Students who earn unsatisfactory grades and/or exhibit unprofessional conduct may be terminated from the program. More specific information about satisfactory academic progress (p. 24) can be found in the academic regulations section of this website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Summer or fall	Jan 15	GRE or MAT

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Personal interview
6. Satisfactory scores on the GRE or MAT

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-counselor-education/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 60 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirements: Students must complete approved internship.
4. Testing requirements: Students must provide acceptable score on the National Counselor Examination.

## Counselor Education, Master of Education (M.Ed.) with a concentration in couples and family counseling

### Program goal

The M.Ed. in Counselor Education with a concentration in couples and family counseling is a 60-credit-hour program designed to prepare students for careers as counselors in clinics, health care centers, schools and private practice. The program focuses on training to address a range of personal and professional problems faced by individuals, couples and families through a systemic framework. The course sequence meets the educational requirements for both the licensed professional counselor and licensed marriage and family therapist as set by the state of Virginia Department of Health Professions. The couples and family counseling concentration meets the licensure requirements for other states, however certain states have different requirements. It is the responsibility of the student to check with the state licensure board to verify the necessary requirements to be eligible for licensure and to plan on meeting those requirements. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

### Student learning outcomes

#### Professional orientation/professional identity/continuing education

1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

#### Helping relationships/group work/career development/wellness

1. Students display knowledge and understanding of counseling processes applied to individuals, couples, families and groups, including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.

3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

### Human development/wellness

Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

### Social and cultural diversity/social justice and advocacy

1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients' couple and family functioning, as well as academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and family systems, including an understanding of factors that promote family wellness, and work to promote equity in relational health and family functioning among disenfranchised groups.

### Assessment

Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

### Research

Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

### For couples and family counseling concentration

1. Students display knowledge of the family systems models that guide the practice of couple and family counseling and demonstrate the ability to conceptualize, articulate and implement interventions from a systems perspective that fosters family wellness.
2. Students display knowledge and understanding of the role of systems on individual and family development and strategies to enhance family wellness.

## Counselor Education, Master of Education (M.Ed.) with a concentration in school counseling

### Program goal

The M.Ed. in Counselor Education with a concentration in school counseling is a 60-credit-hour program designed to prepare counselors for elementary, middle and high schools. The school counseling concentration leads to school counseling licensure and preparation for advanced graduate work at the post-master's level. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

### Student learning outcomes

#### Professional orientation/professional identity/continuing education

1. Students display knowledge and understanding of the historical and philosophical foundations of the counseling profession, including counselor professional identity, and display necessary skills in applying this knowledge and understanding to professional practice.
2. Students demonstrate the ability to adhere to legal and ethical practice.
3. Students understand the importance of continuing education and are committed to seeking continuing education throughout their careers.

#### Helping relationships/group work/career development/wellness

1. Students display knowledge and understanding of counseling processes applied to both individuals and groups including knowledge of how to design, implement and evaluate programs related to academic, career and personal/social development of clients.
2. Students display knowledge and skills related to responding to crises, emergencies and disasters.
3. Students participate in the design, implementation and evaluation of programs that promote wellness, as well as prevention and intervention services.

### Human development/wellness

Students display knowledge of theories of learning, personality development, transitions and resilience, and use this information as a basis for facilitating optimal development and wellness.

### Social and cultural diversity/social justice and advocacy

1. Students display knowledge and understanding of diversity and equity issues and how these issues impact clients' academic, personal and career opportunities.
2. Students display multicultural competencies including appropriate sensitivity, skills and advocacy in working with diverse clients.
3. Students display knowledge and understanding of the relationship between counseling programs and academic achievement, including an understanding of factors that promote student success, and work to close the achievement gap among disenfranchised groups.

### Assessment

Students display knowledge and understanding of multiple factors that may affect personal, social and academic functioning, and possesses knowledge and skills to identify, evaluate and implement appropriate needs assessments and consequent interventions.

### Research

Students display knowledge and understanding of research and evaluation, including understanding of how data are used to inform decisions, and students display skills and professional practices in appropriate collection, analysis and use of data.

### For school counseling concentration

1. Students display knowledge of the professional models that guide the practice of school counseling and demonstrate the ability to articulate, model and advocate for appropriate school counselor duties and programs.
2. Students display knowledge and understanding of the role of family-school-community collaboration on student development and strategies to enhance collaboration.

### Leadership

Students display knowledge and understanding of leadership models and of the school counselor's role in school leadership; students display appropriate skills and dispositions for working in a leadership capacity in school counseling.

## Disability Leadership, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The Certificate in Disability Leadership is a 12-hour certificate program designed to prepare health professionals, special educators and other professionals in related disciplines in the field of childhood neurodevelopmental disabilities to be leaders in the health care system. The program provides a 12- to 24-month curriculum of didactic and Web-based courses, interactive seminars, clinical and community-based practica, a family mentorship experience and planned grassroots- and systems-level policy activities. To be eligible for admission, a student must be accepted into the Virginia Leadership Education in Neurodevelopmental Disabilities program.

Va-LEND is a collaboration among the School of Education (Partnership for People with Disabilities), the VCU School of Medicine (Department of Pediatrics) and the Virginia Department of Health (Title V Program). The LEND curriculum emphasizes all aspects of neurodevelopmental and related disabilities, the social environment (including ethnic and cultural issues), the interdisciplinary approach (systems of care), leadership (advocacy and public policy as well as administration) and research. Following completion of the program, the trainees will be able to serve as leaders in the field of child health and neurodevelopmental disabilities.

### Student learning outcomes

1. Students will demonstrate an understanding of the nature and range of neurodevelopmental disabilities.
2. Students will demonstrate an understanding of the team approach to serving individuals with neurodevelopmental disabilities and their families.
3. Students will demonstrate an understanding of community services and resources available to individuals with neurodevelopmental disabilities and their families.
4. Students will demonstrate an understanding of their role as advocates for individuals with neurodevelopmental disabilities and their families.
5. Students will be involved in a leadership role with an organization serving individuals with neurodevelopmental disabilities and their families.

**Program website:** [soe.vcu.edu/academics/certificates/disability-leadership](https://soe.vcu.edu/academics/certificates/disability-leadership) (<https://soe.vcu.edu/academics/certificates/disability-leadership/>)

## Education, Doctor of Philosophy (Ph.D.) with a concentration in counselor education and supervision

### Program goal

The counselor education and supervision concentration is designed to prepare experienced, research-oriented master's-level counselors for academic positions focused on research, service, teaching and counselor education. Doctoral students will integrate theory, research and practice in areas of counselor supervision and training, counselor education and teaching, advanced counseling, diversity and multiculturalism, leadership, advocacy, and social justice.

### Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at

least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.

2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership

### Program goal

The special education and disability leadership concentration is designed primarily for individuals employed in leadership positions in the field

of special education. Emphasis in this concentration is placed on developing in-depth knowledge about topics as they pertain to personnel development, research, issues and policies in special education.

## Student learning outcomes

1. Apply skills in external setting (internship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting in the areas of research, service, policy and teaching. The faculty adviser and the internship site supervisor work together to evaluate the student.
2. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting various research designs. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
3. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, the student is granted a Ph.D.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Jan 15	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following represent the minimum requirements for admission:

1. Master's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/phd-special-education/>) for further details.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.

- Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
- Externship requirement: Students must complete an approved externship in teaching, research and service policy.
- Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
- Dissertation requirements: Students must complete and defend a research dissertation.

## Special Education, Doctor of Philosophy (Ph.D.)

The Ph.D. in Special Education degree prepares the next generation of faculty members in the field of special education, with knowledge and skills in teaching, research and policy advocacy. The program provides instruction for preparing special education teachers to meet the diverse and complex needs of students with disabilities and their families, as well as strategies for developing programs that meet state licensure and accreditation requirements. The curriculum also provides students with a deep understanding of a range of different research methodologies and scholarly endeavors – including single case design, meta-analysis and grant proposal development – that are frequently expected of faculty in special education. Lastly, the program develops students' policy advocacy skills to create future special education faculty who understand national, state and local policies that impact the lives of individuals with disabilities and their families; design research that addresses questions that policymakers have about best practices in special education; and share research findings with policymakers to improve policies designed to improve education and services for children and youth with disabilities. Students who graduate from the program will be prepared to develop and provide high-quality training to the next generation of special education teachers, conduct and disseminate rigorous research to inform the field, and advocate locally, nationally and internationally for the diverse and complex needs of students and individuals with disabilities and their families.

## Student learning outcomes

- Apply skills in external setting (internship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting in the areas of research, service, policy and teaching. The faculty adviser and the internship site supervisor work together to evaluate the student.
- Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting various research designs. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
- Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
- Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. ## Special Education, Master of Education (M.Ed.) with a concentration in early childhood

### Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Teacher candidates should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, severe disabilities or special education-general education.

The Master of Education in Special Education program with an early childhood concentration is a sequentially planned series of courses and clinical experiences designed to prepare individuals to work with young children, from birth through age 5, with developmental disabilities and their families. The courses are delivered using a blend of online and face-to-face formats. The program is learner-centered, innovative, interactive and collaborative. Through online discussions and face-to-face meetings with faculty members, community partners, student peers and program graduates, the ECSE teacher candidates have multiple opportunities to engage in interactive, proactive and dynamic dialogues.

Successful completion of the degree program qualifies candidates for teacher licensure with endorsement in early childhood special education by the Virginia Department of Education and initial early intervention certification. Candidates are prepared to intervene with infants and young children representing a wide range of abilities, including those at risk for

developmental delays. As a result of training, candidates will be prepared to serve children and families in diverse and high-need communities in a variety of early intervention roles. The program can be completed in five semesters of full-time study or six semesters of part-time study.

In addition to course work, candidates create an electronic portfolio to showcase their knowledge, skills and dispositions in the special education early childhood curriculum.

### Student learning outcomes

- Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
- Content:** Demonstrate knowledge of the subjects they will teach
- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Mar 15	GRE
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Interview
6. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements.

Applicants who do not have a provisional or professional collegiate teaching license in special education must take **SEDP 630** as a prerequisite course.

Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 37 credit hours.

2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

**Program website:** [soe.vcu.edu/academics/masters-programs/med-special-education](https://soe.vcu.edu/academics/masters-programs/med-special-education/) (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>)

## Special Education, Master of Education (M.Ed.) with a concentration in general education

### Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, severe disabilities or general curriculum.

The Master of Education in Special Education general education concentration, which can lead to an endorsement in the special education general curriculum, is designed to prepare graduates with the professional knowledge and skills needed to work in a variety of settings.

1. General education classrooms (where children with special needs are being collaboratively taught)
2. Resource, modified resource or collaborative resource rooms
3. Self-contained settings or classrooms in varied urban, suburban or rural areas
4. Residential programs
5. Various community environments

Special training is provided in teaching reading and language, behavior management, and the use of interactive strategies that teach positive social skills. Candidates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.

Through course work, the general education concentration will encompass broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized courses develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in a special education-general education setting, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with high-incidence disabilities. In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education general curriculum.

The program offers candidates the opportunity to complete clinical placements in their own classroom or school with approval from VCU faculty and supervision by trained personnel. Placement opportunities for clinical experiences include a range of public and private schools and mental health programs that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students will have the opportunity to complete a practicum in addition to the externship.

When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students enrolled in special education, general curriculum in grades K-12. Candidates are offered the option of taking a full-time or an on-the-job externship for a semester.

### Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

**Program website:** [soe.vcu.edu/academics/masters-programs/med-special-education](https://soe.vcu.edu/academics/masters-programs/med-special-education/) (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>)

## Special Education, Master of Education (M.Ed.) with a concentration in severe disabilities

### Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed.

The Master of Education in Special Education severe disabilities concentration is designed to prepare teachers to work with students in grades K-12 in public school settings. Throughout the program, emphasis is placed on person-centered planning, school and community inclusion, transdisciplinary teamwork and the role of the family. Successful completion of the degree program leads to licensure endorsement in special education, adapted curriculum K-12.

Courses address physical and medical management issues, functional assessment strategies, longitudinal curriculum planning, systematic instruction, augmentative and alternative communication systems, assistive technology, transition from school to adulthood, positive behavioral supports and the special needs of students with physical, sensory and health-related disabilities, including autism spectrum disorder.

All core courses are offered through the Virginia Consortium for Teacher Preparation in Special Education Adapted Curriculum: Supporting Students with Severe Disabilities and Autism. Core courses are accessed through VCU. Students enrolled in the program complete a field-based externship in their school (if they currently serve students with severe disabilities) or in one of the many public schools in the Richmond area. A total of six credit hours of externship experience is spread throughout the course of study and is designed to meet the students' needs for professional development.

All candidates are required to submit a final portfolio as the capstone requirement of the program. Successful completion of the 42-credit-hour program results in eligibility for Virginia endorsement in special education, adapted curriculum in addition to the Master of Education degree.

### Student learning outcomes

- Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
- Content:** Demonstrate knowledge of the subjects they will teach
- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Mar 15	GRE
	Spring	Nov 1	
	Summer	Mar 15	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Interview
6. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements.

Applicants who do not have a provisional or professional collegiate teaching license in special education must take SEDP 630 as a prerequisite course.

Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 42 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Curriculum requirements

Course	Title	Hours

## Special Education K-12 Teaching, Certificate in (Post-baccalaureate graduate certificate)

The Certificate in Special Education K-12 Teaching will prepare provisionally licensed special education teachers to become fully licensed special education teachers who work with children with learning disabilities, emotional disturbance and mild to moderate intellectual disability. Students will be prepared to recognize a child's educational and social problems, to formulate effective individualized instruction, and to consult with parents, teachers and administrators to incorporate accommodations and transitions into the child's educational program. Graduates will be prepared to teach reading and language, behavior management, and social skills to students.

### Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an

awareness of the diversity of the school-age population in cultural backgrounds and styles of learning

2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. ## Department of Educational Leadership

**Whitney S. Newcomb, Ph.D.**

Professor and chair

The mission of the Department of Educational Leadership is to prepare school leaders who are able to translate authentic research on school leadership and society into quality practice.

The department offers two M.Ed. programs, a certificate program and two doctoral programs. The M.Ed. in Educational Leadership with a concentration in administration and supervision and the post-master's Certificate in Educational Leadership lead to endorsement in administration and supervision by the Virginia Department of Education. The M.Ed. in Educational Leadership with a concentration in leadership studies is offered for individuals in educational settings who want to study educational leadership but do not wish to seek endorsement in school administration and supervision.

The department offers an educational leadership, policy and justice concentration in the Ph.D. in Education, designed to prepare those who wish to focus on educational leadership, including careers as faculty members in higher education. The department oversees the Ed.D. in Leadership, a program for those wishing to study leadership and remain in leadership positions in educational organizations.

For more information consult the department's website. (<http://www.soe.vcu.edu/departmentpages/educational-leadership/>)

- Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice (p. 472)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision (p. 475)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies (p. 477)
- Leadership, Doctor of Education (Ed.D.) (p. 478)
- Educational Leadership, Certificate in (Post-master's certificate) (p. 474)

## Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice

### Program goal

The educational leadership, policy and justice concentration is designed to cultivate educational scholars and leaders who will advance scholarship, policy and practice related to equity and social justice. Drawing on an interdisciplinary study of leadership and policy, the program promotes an understanding of the many societal and organizational impediments to equal educational opportunity. This concentration is directed not only toward identifying and analyzing those injustices, but also toward imagining, researching and creating more equitable, inclusive schools, organizations and societies through leadership and policy. The dissertation is a rigorous culminating tool for research, advocacy and change within educational organizations and endeavors. Graduates will be prepared to lead for equity in K-12 organizations, higher education, research and policy think tanks or local, state and federal policymaking institutions.

### Student learning outcomes

1. Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, and other requirements are met, the student is granted a Ph.D.
2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

## Educational Leadership, Certificate in (Post-master's certificate)

### Program goal

The post-master's certificate is a 21-hour program for individuals who have obtained a master's degree from a regionally accredited college or university; the degree must be in the field of education or in one that meets the requirements to be employed in a position requiring licensure in Virginia. Applicants must have an active renewable educator license and have at least two years of experience in an instructional personnel position that requires licensure in Virginia.

Please visit the Department of Educational Leadership's website for additional information about program and application requirements.

### Student learning outcomes

1. Candidates demonstrate content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Design, align, evaluate curriculum, guide learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

## Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision

### Program goal

The administration and supervision concentration of the M.Ed. in Educational Leadership is a 33-credit-hour program that prepares individuals to fill positions as reflective leaders for schools. Applicants must possess an active renewable educator license and are expected to have at least two years of experience in a school setting in an instructional personnel position that requires licensure in Virginia. An end-of-program assessment is required. Individuals must meet technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

Please visit the Department of Educational Leadership's website for additional information about program and application requirements.

### Student learning outcomes

1. Content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
5. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
6. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	May 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. At least two years of experience in a school setting in an instructional personnel position that requires licensure in Virginia

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-educational-leadership/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirement: Students in the administration and supervision concentration must complete an internship sequence.
4. Testing requirements: Individuals must take the School Leaders Licensure Assessment or any other assessment required by the Virginia Board of Education for endorsement as a school principal/supervisor K-12.
5. For endorsement, individuals must meet the technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training.

## Curriculum requirements

Course	Title	Hours
<b>Required courses</b>		
ADMS 611	School Law	3
ADMS 618	Leadership for Educational Change and Improvement	3
ADMS 622	Understanding Diversity and Leading for Social Justice	3
ADMS 624	Principals as Human Resource Agents	3
ADMS 625	Leadership for Individualized Learning	3
ADMS 627	Enhancing and Supporting Instruction	3
ADMS 629	The Business of Schools	3
ADMS 630	Understanding and Engaging School Communities	3
ADMS 633	Multiple Dimensions of Leadership	3
ADMS 670	Administrative Internship I <sup>1</sup>	1
ADMS 671	Administrative Internship II <sup>2</sup>	1
ADMS 675	Administrative Internship III <sup>3</sup>	1
EDUS 660	Research Methods in Education	3

### Assessment

Individuals must take the SLLA or any other assessment required by the Virginia Board of Education for endorsement as a school principal/supervisor K-12. (no credit)

Total Hours 33

1

ADMS 670 must be taken in the first semester of enrollment in the program.

2

ADMS 671 is taken in the next-to-last semester of enrollment in the program.

3

ADMS 675 is taken in the last semester of enrollment in the program.

The minimum total of graduate credit hours required for this degree is 33.

## Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies

### Program goal

The leadership studies concentration of the M.Ed. in Educational Leadership is a 30-credit-hour program for individuals who hold or expect to hold leadership positions in educational organizations but who do not wish to obtain the administration/supervision endorsement from the Virginia Department of Education. Applicants are expected to have at least two years of experience in an educational setting. The program includes 15 hours of credit in required courses and 15 hours in a concentrated series of electives chosen with approval of the student's adviser.

### Student learning outcomes

1. Content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by case study analyses.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:

**Program website:** [soe.vcu.edu/academics/masters-programs/med-educational-leadership/](https://soe.vcu.edu/academics/masters-programs/med-educational-leadership/) (<https://soe.vcu.edu/academics/masters-programs/med-educational-leadership/>)

## Leadership, Doctor of Education (Ed.D.)

### Program goal

The purpose of the Ed.D. in Leadership program is to engage leaders in a variety of learning organizations with practitioner-oriented knowledge and skills, authentic leadership and research experiences, and opportunities for reflection that will enable them to succeed in a variety of organizational leadership positions. Three analytic lenses (equity, accountability and learning theory) guide course work and enable

students from diverse backgrounds to consider learning through common perspectives.

Students will examine cases centered on enduring questions in learning and leadership. Questions will be explored through contrasting evidence from a variety of perspectives and contexts.

### Program features

The Ed.D. in Leadership is a 48-credit hour, 36-month program. Based upon principles of adult learning, the program has the following features:

1. Competitive admissions
2. Midcareer entry
3. Practitioner-oriented
4. Learning-community based
5. Problem-oriented andragogy and curriculum
6. Two learning communities: general leadership (appropriate for leaders of schools and districts, nonprofits and other learning enterprises) and higher education leadership. Both learning communities are offered in face-to-face and online delivery modalities, depending on the number of admissions each year. Face-to-face learning communities typically meet one evening each week and five Saturdays each semester. Online learning communities meet online with the exception of an initial two-day face-to-face orientation and one face-to-face course each summer (five full Saturdays).
7. Program culminates in a three-semester applied group dissertation (the capstone)

### Student learning outcomes

1. Confident and clear communication and presentation skills through formal benchmark presentations
2. Understanding and application of effective leadership, team-building and learning behaviors through team projects
3. Appropriate data-gathering, management and analysis techniques through program evaluation and capstone projects
4. Making of decisions and recommendations based upon data analysis and scholarly research through formal benchmark presentations and capstone projects
5. Scholarly writing skills through technical report writing
6. Academic achievement necessary to be considered for doctoral candidate status, as required by the university by meeting candidacy requirements

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ed.D.	Summer	Feb 1	GRE or MAT

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE or MAT

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/edd-leadership/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program: Courses with a grade below C cannot be used to satisfy degree requirements.
3. Capstone requirements: Students must complete and defend a team-based capstone research project.

## Department of Foundations of Education

**Maike Philipsen, Ph.D.**

Professor and chair

The Department of Foundations of Education is committed to preparing educators and scholars for critical, reflective and responsible work in education, enhancing the knowledge base in the varied disciplines through research and scholarship, and engaging in service to the broader community.

To fulfill this mission, the department offers multidisciplinary perspectives that are the pillars for School of Education programs, based on the contention that the preparation of effective educational practitioners and scholars requires deep understanding of the broader perspectives that are represented by research and theory in psychological, cultural, philosophical, historical and ethical areas of inquiry. Learn more by visiting the Foundations of Education webpage (<http://www.soe.vcu.edu/departments/pages/foundations-of-education/>).

- Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology (p. 480)
- Education, Doctor of Philosophy (Ph.D.) with a concentration in research, assessment and evaluation (p. 481)

## Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology

### Program goal

The educational psychology concentration is designed to train research-oriented doctoral students who want to promote the success of students in educational environments. Doctoral students will integrate theory and research in the areas of developmental psychology, cognition, social psychology and motivation, assessment, and diversity to better study learning in schools or school-like settings.

### Student learning outcomes

1. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing,

conducting and interpreting qualitative, quantitative and mixed methods design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.

4. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Jan 15	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following represent the minimum requirements for admission:

1. Baccalaureate or master's degree in psychology, educational psychology or related discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/phd-educational-psychology/>) for further information.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Curriculum requirements

Students admitted with only a baccalaureate degree are required to take an additional 15 credits of 600 level didactic courses in EDUS, PSYC, SEDP, TEDU or another subject, selected in consultation with an adviser.

## Education, Doctor of Philosophy (Ph.D.) with a concentration in research, assessment and evaluation

### Program goal

The research, assessment and evaluation concentration is designed for individuals who want to develop skills to undertake, use and teach research, assessment and evaluation. Emphasis is placed on developing proficiency in quantitative, qualitative and mixed methods modes of inquiry and providing students with expertise to study varied educational and social research questions. Students select a focus in either research or evaluation.

## Student learning outcomes

1. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
2. Develop research knowledge and skills (research component): Students will acquire the skills essential to designing, conducting and interpreting qualitative, quantitative and mixed-methods research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.
3. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members approve, the student is granted a Ph.D.

## Adult Learning, Master of Education (M.Ed.) with a concentration in adult literacy

### Program goal

The Master of Education in Adult Learning is a 33-credit hour program of study that prepares individuals for a broad range of positions related to the education of adult learners. Students choose one of three elective concentrations in adult literacy, human resource development, or instructional design and technology. Graduates are found in major corporations, higher education, health care organizations, state and federal agencies, nonprofit and community-based organizations and human services agencies. Admission to the program is predicated on the "whole person" concept, taking into account life experience, academic record, references and the reasons for the student's interest in the program. An interview with the program adviser is recommended prior to admission. Successful applicants will have sufficient prior work experience with adults as learners to enable them to bring relevant work experience into the classroom learning environment.

The program provides a foundation in educational research methods and a strong core of seven courses in the theory and practice of adult learning, including emphasis in development of facilitation skills, as well as the design and delivery of adult learning programs. Upon completion of the foundation and core courses, students choose one of three concentration areas: adult literacy, human resource development (learning in the workplace), or instructional design and technology. The last course in the program, a capstone seminar in action learning, reunites students from all three concentrations for a comprehensive synthesis experience as they work in action learning teams to solve a real problem of strategic importance to an organization in the community.

A unique feature of the program is the learning portfolio, maintained in an online journal (blog) format. The learning portfolio, in combination with the capstone seminar, replaces a comprehensive examination requirement. For the portfolio, students write reflective blog entries during each of the core and concentration courses. During the program,

selected assignments are posted to the blog to document personal growth and learning over time. At the end of the program, students create a synthesis of their learning in an essay format or through creation of a digital story. The portfolio serves as a demonstration of the graduate's abilities to a prospective employer and can be added to a student's resume. Throughout, the program utilizes students' experiences in working with adults as learners to unite theory with practice and emphasizes 21st-century technologies for teaching and learning.

### Student learning outcomes

1. Demonstrate the ability to articulate a personal philosophy of adult learning practice that enables students to work effectively as leaders and facilitators to improve adult learning, as evidenced on the final program learning assessment
2. Demonstrate the ability to integrate knowledge of all facets of adult learning to have a significant impact on the practices, culture and learning environments of the organizations in which students work
3. Demonstrate knowledge of the nature, function and scope of adult learning during the capstone experience of the program
4. Demonstrate awareness of the processes of adult learning and development during the capstone experience
5. Acknowledge the influence of technology in adult learning, as evidenced in the final program learning assessment
6. Demonstrate awareness of educational research in the adult learning field, as evidenced on the research on instructional strategy and organizational change strategy analysis rubrics

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Feb 1	
	Spring	Nov 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School, the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-adult-learning/>) for further information.

## Degree requirements

Students must meet all general VCU Graduate School graduation requirements (p. 31).

## Curriculum requirements

Course	Title	Hours
<b>Foundation course</b>

## Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in instructional technology

**Note: Admission to this program is temporarily suspended.**

### Program goal

The Master of Education in Curriculum and Instruction program is designed to provide professional and cognate experiences for experienced educators seeking to develop additional skills in the use of technology in support of teaching and learning.

### Student learning outcomes

1. Demonstrate an understanding of research designs and an ability to read research studies critically
2. Demonstrate an understanding of the historical, philosophical, sociological and ethical foundations of education and the impact that these have on public education
3. Demonstrate an understanding of the use of technology in support of student learning and the instructional process

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. ### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

**Note: Admission to this program is temporarily suspended.**

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Feb 1	GRE or MAT
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Three letters of recommendation addressing the student's potential for graduate study in education
2. Student's written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

**Note: Admission to this program is temporarily suspended.**

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in online teaching

**Note: Admission to this program is temporarily suspended.**

### Program mission

The online teaching concentration of the Master of Education in Curriculum and Instruction is designed to prepare K-12 teachers and administrators to develop and facilitate effective online instruction in K-12 environments.

### Program goals

1. Expand on participants' current teaching expertise in instructional strategies, curriculum design and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

### Student learning outcomes

1. Demonstrate effective electronic communication methods for instruction in the K-12 environment
2. Reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas

3. Demonstrate effective virtual systematic instructional design through the development of a virtual learning environment
4. Demonstrate effective facilitation of virtual instruction including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning
5. Demonstrate knowledge of effective strategies for assessment and evaluation in online environments through the development of rubrics and alternative assessment tools
6. Demonstrate knowledge of the TPACK framework in designing instruction with appropriate virtual tools
7. Demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues, and the development of appropriate materials that reflect effective time and course management by the course facilitator

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

**Note: Admission to this program is temporarily suspended.**

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Feb 1	GRE or MAT
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Three letters of recommendation addressing the student's potential for graduate study in education
2. Student's written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

**Note: Admission to this program is temporarily suspended.**

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Curriculum requirements

Course	Title	Hours

## Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in teaching and learning

### Program goal

The Master of Education in Curriculum and Instruction program is designed to provide education professionals with a deeper understanding of pedagogy, curriculum design, philosophies of education, theories of learning and strategies for meeting the needs of diverse learners. Concentration courses within the program are selected in consultation with an adviser.

### Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## Admission requirements

This concentration is intended for students who initially pursue a licensure program at the VCU School of Education, but for whom that is no longer appropriate. Admission is by special action approved by the dean of the School of Education. Students may not apply directly to this concentration. Please contact your assigned faculty adviser and/or the school's dean ([soedean@vcu.edu](mailto:soedean@vcu.edu)) for further details.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Education, Doctor of Philosophy (Ph.D.) with a concentration in curriculum, culture and change

### Program goal

The curriculum, culture and change concentration offers a rigorous doctoral-level learning experience in curriculum and instruction with a strong emphasis on advocacy and social justice. The concentration prepares curriculum and instruction leaders for positions in school systems at the building level and above, as well as scholars with a wide range of curricular interests — urban education, rural education,

linguistically diverse groups, oppressed groups, critical pedagogy, philosophical and sociocultural foundations of education, etc. In addition to a deep grounding in theoretical, practical and methodological approaches to curriculum and instruction, the concentration prepares instructional leaders to advocate for change across a wide range of institutions, systems and contexts. The concentration offers challenging learning experiences in the field of curriculum and instruction. Its expressed social justice values allow framing of courses in ways that provide critical analyses of contemporary schooling and ground students in the philosophical and historical roots of school change. The program welcomes students with interests in all institutional settings serving students across the life span (early childhood through adulthood) as well as informal and nonformal contexts. It also allows for discipline-specific cohorts in fields such as STEM and literacy.

The concentration distinguishes itself by preparing curriculum and instruction leaders to be change agents capable of working in school systems, higher education and advocacy organizations. It reflects an activist stance toward the education profession — one that views schooling as not only shaped by society but also as an active force for equity and meaningful societal change. It will appeal to a wide range of students: those who are seeking to become instructional leaders in school systems, those preparing to teach in the academy and all those desiring a strong foundation in educational reform.

## Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.
2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, the student is granted a Ph.D.

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Summer or fall	Jan 15	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following represent the minimum requirements for admission:

1. Master's degree in curriculum and instruction, teaching and learning, educational philosophy or related discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/phd-curriculum-culture/>) for further information.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

## Education, Doctor of Philosophy (Ph.D.) with a concentration in urban services leadership

### Program goal

The urban services leadership concentration is designed to prepare future researchers, faculty and practitioners for leadership roles in academic, government (local, state, national and international) and community based for-profit and non-profit organizations. Doctoral students will utilize a multidisciplinary approach to develop a broad understanding of the critical issues and challenges in adult learning and subsequently apply that understanding to the planning, implementation and evaluation of adult learning and educational programs and initiatives.

Applicants are expected to have experience working with adult learners in organizational, community, government, higher education, health care or nonprofit settings, or within the community in roles as faculty, faculty developers, trainers, human resource development and organizational development professionals, adult literacy educators, or other roles in which they are actively involved in the teaching and training of adult learners.

## Student learning outcomes

1. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
2. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. ## Instructional Technology, Certificate in (Post-baccalaureate graduate certificate)

**Note:** Admission to this program is temporarily suspended.

## Program goal

The post-baccalaureate Certificate in Instructional Technology prepares educators to use technology effectively in their schools and to provide instructional leadership and technical support to other educators who use computer technology. Designed for teachers, resource persons and administrators at all grade levels (K-12), the sequence in instructional technology offers a unique opportunity to develop comprehensive knowledge and experience in the educational applications of computers and related technologies. The primary purpose of this certificate program is to meet the growing need for highly qualified core curriculum teachers, instructional technology support teachers and associated administrative personnel. The program requires six three-credit-hour courses. In addition, prerequisites for the program require that students must be licensed K-12 teachers or administrators with a minimum of two years of classroom experience who have a basic knowledge of instructional media. The program is committed to providing access to technology so that hands-on experience is offered in every class and participants produce instructional material that can be immediately integrated into the classroom.

## Student learning outcomes

- Demonstrate the necessary knowledge and skills to facilitate effective learning experiences using technology
- Demonstrate their skills in visual arts
- Demonstrate successful searching techniques
- Produce and edit video for education
- Set up online instructional modules incorporating various communication and digital activities for students
- Present at a conference and be able to prepare a professional development class in technology

## Medical Education, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The post-baccalaureate graduate Certificate in Medical Education is a 12-credit-hour program designed for faculty in the School of Medicine at Virginia Commonwealth University to enhance depth and breadth of faculty expertise in curriculum design and adult learning strategies for teaching, as well as to foster development of a cadre of academic leaders who can model best practices in teaching undergraduate, clinical and graduate programs.

### Student learning outcomes

1. Demonstrate the ability to articulate a personal philosophy of practice that enables them to facilitate adult learning in medical education and engage in critically reflective practice as an educator
2. Demonstrate the ability to integrate knowledge of adult learning for teaching in medical education to function as educational leaders who model best practices and serve as role models for trainees
3. Demonstrate knowledge of assessment and evaluation strategies that align with goals and objectives and instructional strategies within a curriculum
4. Adopt one or more instructional methods for actively engaging learners in a discovery or inquiry process that incorporates small-group or team-based learning strategies
5. Demonstrate familiarity with a variety of digital media technologies appropriate for use in preclinical and clinical teaching situations
6. Become familiar with the scholarship of teaching and learning by developing a research agenda for inquiry into student and trainee learning to advance the practice of teaching in medicine by making research findings public

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Feb 1	
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/medical-education/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 12 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

## Curriculum requirements

Course	Title	Hours
ADLT 670	Curriculum Design in Medical Education	2
ADLT 671	Theory and Practice of Adult Learning for Medical Educators	2
ADLT 672	Instructional Strategies for Teaching in Medicine	2
ADLT 673	Teaching as Scholarship in Medical Education	2

### Electives

Select two of the following:		
ADLT 674	Performance Feedback and Simulation in the Medical Education Curriculum	4

ADLT 675	Group and Team Facilitation for Medical Educators
ADLT 676	Digital Media Technologies for Teaching in Medicine
ADLT 677	Reflective Practice in Medical Education
Total Hours	12

**The minimum total of graduate credit hours required for this certificate is 12.**

## Online Teaching for K-12 Educators, Certificate in (Post-baccalaureate graduate certificate)

**Note: Admission to this program is temporarily suspended.**

## Program goals

The post-baccalaureate graduate Certificate in Online Teaching for K-12 Educators is a 17-credit-hour certificate designed to prepare candidates to develop and facilitate effective online instruction in K-12 environments. The goals for the certificate are to:

1. Expand on participants' current teaching expertise in instructional strategies, curriculum design, and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

## Student learning outcomes

1. Demonstrate effective electronic communication methods for instruction in the K-12 environment
2. Reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas
3. Demonstrate effective virtual systematic instructional design through the development of a virtual learning environment
4. Demonstrate effective facilitation of virtual instruction, including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning
5. Demonstrate knowledge of effective strategies for assessment and evaluations in online environments through the development of rubrics and alternative assessment tools

6. Demonstrate knowledge of TPACK framework in designing instruction with appropriate virtual tools
7. Demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues and the development of appropriate materials that reflect effective time and course management by the course facilitator

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

**Note: Admission to this program is temporarily suspended.**

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Feb 1	
	Spring	Oct 1	
	Summer	Feb 1	

Applicants must meet all general admission requirements of the VCU Graduate School (p. 34).

**Note: Admission to this program is temporarily suspended.**

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete a 21-month curriculum of online courses as well as course development and facilitation practica.

## Curriculum requirements

## Reading Specialist, Certificate in (Post-master's certificate)

### Program goal

The certificate program is designed for students who wish to gain state licensure as a reading specialist in kindergarten through high school settings. Applicants are required to have at least three years of teaching experience in a reading-related field setting if they want to be recommended to the Department of Education for endorsement as a reading specialist in Virginia.

All requirements for admission to graduate school apply to applicants for the Post-master's Certificate in Reading Specialist. All state department requirements for reading specialist (specifically the 12 hours of graduate or undergraduate work in selected areas) must be met.

Students are required to earn a minimum of 24 graduate hours beyond their current master's degree, including the required reading courses, an approved reading selective and an elective in the School of Education that has been approved by the adviser. Advisers will recommend selective courses based upon student experience and goals. During the last semester of course work, students must complete a reading portfolio documenting their work in the program and related work experiences.

Candidates must receive a passing score on the Reading for Virginia Educators Assessment as a graduation requirement.

Persons completing the program are expected to demonstrate:

1. An understanding of the reading language learning process
2. The ability to critique, adapt and model use of a variety of reading instructional strategies, methods and programs
3. Expertise in developing and providing for continuous assessment of an individual and groups
4. Ability to implement schoolwide developmental, creative and intervention reading/language arts programs
5. Ability to understand and apply theory to practice within a variety of cultural contexts

## Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Feb 1	
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree in any specialty area related to education
2. Must have an active renewable teaching license
3. Have at least three years of successful classroom teaching experience in which the teaching of reading was an important responsibility
4. Three letters of recommendation addressing the student's potential for graduate study in education
5. Statement of intent
6. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/reading-specialist/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 24 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students must provide a passing score on the Reading for Virginia Educators: Reading Specialist Assessment for graduation.
4. Endorsement requirements: Students must meet all Virginia Department of Education requirements to be recommended for endorsement.

(<https://soe.vcu.edu/academics/certificates/reading-specialist/>)

## Reading, Master of Education (M.Ed.)

### Program goal

The Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences, and they must pass the Reading for Virginia Educators Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

### Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning

2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

## Reading, Master of Education (M.Ed.) with a concentration in K-12 reading specialist

### Program goal

The K-12 reading specialist concentration in the Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences and pass the Reading for Virginia Educators Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist

endorsement also requires completion of three years of teaching in a reading-related field.

A cooperative agreement has been established with Virginia State University to permit selected, qualified students to complete the M.Ed. in Reading program. Up to 12 credit hours from an approved list may be transferred from the cooperating institution. Interested students should contact the Department of Teaching and Learning.

### Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:

## Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/K-12

### Program goal

Students who already have their K-12 initial licensure and want to pursue an endorsement in teaching English as a second language in the K-12 setting may do so in the K-12 subconcentration of the TESOL concentration in the M.Ed. in Reading. The following are prerequisites to the concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will **not** be endorsed as a K-12 reading specialist. Students interested in pursuing both endorsements must take the following nine credit hours in addition to the ones listed below: READ 600, READ 605 and READ 700.

### Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. **Program website:** [soe.vcu.edu/academics/masters-programs/med-reading](https://soe.vcu.edu/academics/masters-programs/med-reading/) (<https://soe.vcu.edu/academics/masters-programs/med-reading/>)

## Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/ adult

### Program goal

Students who are interested in teaching English as a second language to adults may develop their knowledge and skills in the adult concentration of the TESOL track in the M.Ed. in Reading. Those who are interested in pursuing an endorsement in teaching English as a second language in the adult setting must already have their K-12 initial licensure and adult education endorsement. The following are prerequisites to the

concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will **not** be endorsed as a K-12 reading specialist.

## Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Ed.	Fall	Feb 1	
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-reading/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Testing requirements: Students in the K-12 reading specialist concentration must present passing scores on state mandated licensure/endorsement assessments.

## Teaching Elementary Education, Certificate in (Graduate certificate)

The graduate Certificate in Teaching Elementary Education prepares students to become teachers in high-needs and hard-to-staff elementary schools. Students will gain an in-depth understanding of science, social studies, literacy and mathematics pedagogy and content. The program provides field experiences during a one-year residency to expose students to classroom teaching and classroom management. Graduates will be prepared to teach in elementary (PK-6) classroom settings and will meet the needs of elementary students with a focus on urban and high-needs schools.

The certificate offers a unique learning opportunity for students planning to teach in urban and high-needs schools in the Greater Richmond area. Information on the RTR program can be found at [teachRTR.org](https://teachRTR.org) (<https://teachrtr.org/>).

Graduates will receive a credential for successfully completing the program. The certificate does not provide full teacher licensure; however, the course work may be used to fulfill the requirements for provisional teacher licensure through a public school system.

### Student learning outcomes

1. Learner and learning: Students will understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning.
2. Content: Students will demonstrate knowledge of the subjects they will teach.

3. Instructional practice: Students will demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning.
4. Professional responsibility: Students will develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Summer	Feb 1	VCLA and Praxis subject tests for elementary education licensure

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>), the following requirements represent the minimum acceptable standards for admission:

1. Acceptance into the RTR program through a rigorous on-site assessment process that includes:

- a. Completion of a written application to the RTR program (including written statement concerning commitment to teaching in hard-to-staff schools, three letters of recommendation addressing the student's potential for graduate study in education and transcripts of all previous college work)
  - b. Teaching a mini-lesson in front of students
  - c. Personal interview
  - d. On-demand writing sample
2. A bachelor's degree from an accredited university with no more than nine credits of content courses needed to meet state licensure requirements
  3. Three letters of recommendation addressing the student's potential for graduate study in education
  4. Statement of intent
  5. Transcripts of all previous college work
  6. Satisfactory scores on the VCLA and Praxis subject tests for elementary education licensure

Prospective students should first contact [teachtr@vcu.edu](mailto:teachtr@vcu.edu) for additional details on admission into the RTR program.

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 27 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses requires review of the student's academic progress. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirements: Students must complete an internship in an RTR approved school.

## Curriculum requirements

The curriculum for the Graduate Certificate in Teaching Elementary Education is designed to help hard-to-staff schools meet their critical teaching shortages in elementary education through a year-long residency experience designed to address the unique challenges of urban and high-needs schools. The focus of the required course work will be content, pedagogy and assessment. The courses will prepare students to understand how to meet the needs of all students with a focus on urban and high-needs schools.

## Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

This program is designed to prepare professionals to work with K-12 students and adults for whom English is not their native language.

### Student learning outcomes

1. Demonstrate foundational knowledge needed to support ESL students' literacy learning
2. Effectively plan lessons that attend to linguistic proficiency of learners in various settings
3. Create assessments that assess ESL student competency in communication and content learning
4. Demonstrate a disposition of tolerance and appreciation for linguistic and cultural diversity
5. Demonstrate a range of teaching strategies and approaches that lead to ESL student learning

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Feb 1	
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline including education, social work, psychology or human services
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/tesol/>) for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Prerequisite or corequisite requirements: Students must have taken a class in linguistics and six hours of a modern foreign language.

## Curriculum requirements

As prerequisites or corequisites to the certificate program, students must have taken three credit hours of a modern foreign language, which may have been taken at the undergraduate or graduate level. The certificate program consists of 18 credit hours of graduate course work as follows:

Course	Title	Hours
ENGL/LING/TEDU 552	Teaching English as a Second Language	3
FRLG 575	Intercultural Communication	3
TEDU 561	Reading Foundations: Sociological/Psychological Perspectives	3
TEDU 562	Reading Instruction in the Content Areas	3
TEDU 683	ESL Assessment and Trends	3
TEDU 675	Internship in ESL	3
Total Hours		18

**The minimum total of graduate credit hours required for this certificate is 18.**

## Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in biology education

### Program goal

The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor's degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master's degree is not a priority (applicants already may have earned a master's degree or wish to earn a master's degree in a specialized area of education later). Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor's level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

### Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning

4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Feb 1	GRE
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in biology
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/teaching/>) for further information.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Feb 1	GRE
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in English
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

There are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/teaching/>) for further information.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours depending on concentration. Note that three credit hours are taken at the undergraduate level.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

## Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in history/social studies education

### Program goal

The post-baccalaureate Certificate in Teaching program is designed for students who have earned bachelor's degrees in fields other than education, who wish to become teachers in secondary schools in one or more subjects and for whom a master's degree is not a priority (applicants already may have earned a master's degree or wish to earn a

master's degree in a specialized area of education later). Applicants must have a major or its equivalent in the subject they wish to teach.

Students are required to complete a minimum of 24 hours beyond the bachelor's level, including the courses listed below. Equivalent courses taken within the past five years may transfer; however, a minimum of 27 credit hours, including clinical experiences, must be taken at VCU after admission to the program.

## Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

## Teaching, Master of (M.T.) with a concentration in biology education

### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 447) is available in this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

### Student learning outcomes

- Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
- Content:** Demonstrate knowledge of the subjects they will teach
- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.T.	Fall	Feb 1	GRE
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in biology
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>) website for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

### Undergraduate courses

Course	Title	Hours
<b>Qualifying courses</b>		
EDUS 301	Human Development and Learning	3
Major courses (as undergraduate science majors) including genetics/molecular biology, botany, zoology, anatomy/human physiology, ecology, two physics and one earth science		
Admission to teacher preparation is a prerequisite for the following courses:		
TEDU 311	Middle School Practicum (secondary; must be taken concurrently with TEDU 537)	2
TEDU 312	High School Practicum (science; must be taken concurrently with TEDU 540)	1
TEDU 510	Instructional Technology in PK-12 Environments	2

## Graduate courses

Course	Title	Hours
<b>Required courses</b>		
EDUS 617/PSYC 657	Advanced Educational Psychology for Secondary Teachers	3
EDUS 673	Democracy, Equity and Ethics in Education	3
TEDU 537	Secondary School Curriculum	3
TEDU 540	Teaching Middle and High School Sciences (fall only)	3
TEDU 562	Reading Instruction in the Content Areas	3
TEDU 588	Classroom Management	3
<b>Elective</b>		
Select one of the following:		3
EDUS 610	Social Foundations of Education	
SEDP 505	Theory and Practice of Educating Individuals with Special Needs	
SEDP 619	Multicultural Perspectives in Education	
TEDU 531	Media Literacy in the K-12 Classroom	
TEDU 651	Special Topics in Education (selected sections)	
<b>Clinical experience (spring only)</b>		
TEDU 672	Internship	4
TEDU 674	Internship II	5
TEDU 681	Investigations and Trends in Teaching (must be taken concurrently with TEDU 672 and TEDU 674)	3
Total Hours		33

The minimum total of graduate credit hours required for this degree is 33.

## Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

## Teaching, Master of (M.T.) with a concentration in chemistry education

### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 447) is available in this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

### Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.T.	Fall	Feb 1	GRE
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in chemistry
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>) website for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

### Undergraduate courses

Course	Title	Hours
<b>Qualifying courses</b>		
EDUS 301	Human Development and Learning	3
Major courses (as undergraduate science majors) including genetics/molecular biology, botany, zoology, anatomy/human physiology, ecology, two physics and one earth science		
Admission to teacher preparation is a prerequisite for the following courses:		
TEDU 311	Middle School Practicum (secondary; must be taken concurrently with TEDU 537)	2
TEDU 312	High School Practicum (science; must be taken concurrently with TEDU 540)	1
TEDU 510	Instructional Technology in PK-12 Environments	2

### Graduate courses

Course	Title	Hours
<b>Required courses</b>		
EDUS 617/PSYC 657	Advanced Educational Psychology for Secondary Teachers	3
EDUS 673	Democracy, Equity and Ethics in Education	3
TEDU 537	Secondary School Curriculum	3
TEDU 540	Teaching Middle and High School Sciences (fall only)	3
TEDU 562	Reading Instruction in the Content Areas	3

TEDU 588	Classroom Management	3
<b>Elective</b>		
Select one of the following:		
EDUS 610	Social Foundations of Education	3
SEDP 505	Theory and Practice of Educating Individuals with Special Needs	
SEDP 619	Multicultural Perspectives in Education	
TEDU 531	Media Literacy in the K-12 Classroom	
TEDU 651	Special Topics in Education (selected sections)	
<b>Clinical experience (spring only)</b>		
TEDU 672	Internship	4
TEDU 674	Internship II	5
TEDU 681	Investigations and Trends in Teaching (must be taken concurrently with TEDU 672 and TEDU 674)	3
Total Hours		33

The minimum total of graduate credit hours required for this degree is 33.

## Other curricular options

Students who already possess a content major in a discipline appropriate for secondary education may pursue a post-baccalaureate certificate.

**Program website:** [soe.vcu.edu/academics/masters-programs/master-of-teaching/](https://soe.vcu.edu/academics/masters-programs/master-of-teaching/) (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>)

## Teaching, Master of (M.T.) with a concentration in early and elementary education

### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

## Early and elementary education

Freshman students bound for the Master of Teaching program with a concentration in early and elementary education are required to enroll in the Bachelor of Interdisciplinary Studies with a liberal studies for early and elementary education major. This program offers liberal studies curriculum designed through an interdisciplinary collaboration among professors in the College of Humanities and Sciences and the School of Education in consultation with successful area teachers. It targets core knowledge across the four major subject areas represented in Virginia's Standards of Learning (mathematics, sciences, social sciences and language arts/communication) while also providing a university-level skill set and knowledge base. Throughout the undergraduate program, contact with area schools and young learners is programmed into service and experiential learning venues.

Transfer students intending to be elementary teachers (and completing the Master of Teaching with a concentration in early and elementary education) are required to meet with advisers for the LSEE major prior to registering for courses. Advisers will evaluate all courses successfully completed outside of the LSEE major prescribed curriculum (from VCU or elsewhere) to determine their transferability to the LSEE major.

LSEE majors are encouraged to select at least one minor in order to deepen knowledge and appreciation of a subject area. Philosophy, religious studies, African American studies and international studies have relevance in their understanding of human investigation of knowledge, human behavior and world cultures. A minor in a science area such as environmental studies may be more employable because of school and societal concerns about our planet and its preservation. In selecting the humanities and sciences minor, the choice should be based on the student's interest and perceived relevance.

Consult with the appropriate professional studies adviser for additional information regarding professional studies and liberal arts requirements.

## Student teaching requirements

All students pursuing a concentration in early and elementary education within the Master of Teaching program will student teach. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall or spring semester of the academic year in which they will student teach.

## Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.T.	Fall	Feb 1	GRE
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with an appropriate liberal arts major
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>) website for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

### Program requirements – mathematics and statistical reasoning

The general education requirement is three to six credit hours; the early childhood/elementary education program requirement is six credit hours, including three credit hours in mathematics at the college algebra level or higher and three credit hours in a statistics course typically taught by a college department of mathematics. Choosing among these courses is recommended:

Course	Title	Hours
MATH 303	Investigations in Geometry	3
MATH 361	Numbers and Operations	3
MATH 362	Algebra and Functions	3
STAT 206	Data Analysis and Statistics for Elementary Education	3

### Program requirements – natural sciences

The general education requirement is seven to nine credit hours, with one course each from the physical sciences and the biological sciences, with at least one laboratory; the early childhood/elementary education

program requirement is 12 credit hours, again with at least one course each in the physical sciences and the biological sciences and two laboratories.

Course	Title	Hours
<b>Biological sciences</b>		
BIOL 101	Biological Concepts	3
INSC 201	Energy!	3
or INSC 300	Experiencing Science	
or PHYS 101	Foundations of Physics	
CHEM 100	Introductory Chemistry	3
or CHEM 101	General Chemistry I	
or CHEM 110	Chemistry and Society	
ENVS 105	Physical Geology	3
or ENVS 201	Earth System Science	
or ENVS 301	Introduction to Meteorology	
or ENVS 310	Introduction to Oceanography	
or URSP 204	Physical Geography	
Science labs <sup>1</sup>		2

1

Two of the science content courses must pair with a one-credit lab for a total of two credits of laboratory course work in the degree program. Possible partner laboratory courses include BIOZ 101, PHYZ 101, CHEZ 101, CHEZ 110, ENVZ 105 and URSZ 204.

### Program requirements – applied arts

Two to three credit hours in applied arts to be designated with the professional studies adviser.

### Professional studies requirements

#### Undergraduate courses

Course	Title	Hours
EDUS 301	Human Development and Learning	3
or PSYC 301	Child Psychology	
TEDU 310	Elementary School Practicum A (taken with TEDU 410, TEDU 414 and TEDU 426)	2
TEDU 313	Elementary School Practicum B (taken with TEDU 517, TEDU 522 and TEDU 591)	2
TEDU/ENGL 386	Children's Literature I	3
TEDU 390	Movement Education	3
TEDU/SEDP 410	Building a Community of Learners: Classroom Management	3
TEDU 411	Integrating the Arts in Curriculum for Young Children <sup>1</sup>	3
or ARTE 301	Art for Elementary Teachers	
TEDU 414	Curriculum and Methods for Early/Elementary Children	4
TEDU 426	Teaching Reading and Other Language Arts	3
TEDU 510	Instructional Technology in PK-12 Environments	2

1

Students may choose another applied arts course.

#### Graduate courses

Course	Title	Hours
EDUS/PSYC 607	Advanced Educational Psychology for Elementary Teachers	3
EDUS 673	Democracy, Equity and Ethics in Education	3
SEDP 505	Theory and Practice of Educating Individuals with Special Needs	3
TEDU 517	Science Education in the Elementary School	3
TEDU 522	Teaching Mathematics for Elementary Education	3
TEDU 566	Diagnosis and Remediation in Reading	4
TEDU 591	Social Studies Education in the Elementary School	3
TEDU 626	Home-School Communication and Collaboration	3
TEDU 672	Internship	4
TEDU 674	Internship II	4
TEDU 681	Investigations and Trends in Teaching	1
Total Hours		34

The minimum total of graduate credit hours required for this degree is 34.

## Teaching, Master of (M.T.) with a concentration in earth science education

### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined

baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 447) is available in this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

### Student learning outcomes

- Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
- Content:** Demonstrate knowledge of the subjects they will teach
- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

## Teaching, Master of (M.T.) with a concentration in history/social studies education

### Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

### Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, drama, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 447) is available in this bulletin.

### Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

### Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.T.	Fall	Feb 1	GRE
	Spring	Oct 1	
	Summer	Feb 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in history, political science or related area
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent

- 4. Transcripts of all previous college work
- 5. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>) website for further information.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

## Curriculum requirements

### Undergraduate courses

Course	Title	Hours
<b>Qualifying courses</b>		
EDUS 301	Human Development and Learning	3
Students seeking a Master of Teaching with a concentration in history/social studies should major in history, political science or a related field. History majors will need nine credits of political science, six credits of geography/urban studies and three credits of economics. Political science majors will need 12 credits of history, six credits of geography/urban studies and three credits of economics.		
Admission to teacher preparation is a prerequisite for the following courses:		
TEDU 311	Middle School Practicum (secondary; must be taken concurrently with TEDU 537)	2

# L. DOUGLAS WILDER SCHOOL OF GOVERNMENT AND PUBLIC AFFAIRS

---

The L. Douglas Wilder School of Government and Public Affairs is a creative, interdisciplinary grouping of programs in the social sciences and professional arenas that provides students with the knowledge, skills and experience necessary for success in public service.

The Wilder School brings together faculty from multiple disciplines that share a common interest in public affairs. The faculty includes individuals with strong research and analytical skills and with substantive expertise in fields such as criminal justice, economics, homeland security, public administration, urban planning and community development. These faculty members are committed to producing cutting-edge research and public service that can bridge the gap between theory and practice and to providing high quality, innovative and nationally competitive degree programs for students.

To achieve this mission, the Wilder School actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs that develop close ties with other related university programs. The Wilder School is an intellectually exciting place committed to having a genuine impact on public policy and providing an intellectually stimulating education for future public affairs professionals who share in school's commitment.

## Accreditation

### Public administration (master's degree)

National Association of Schools of Public Affairs and Administration

### Urban and regional planning (master's degree)

Planning Accreditation Board

## Program offerings

The school offers a variety of educational opportunities. Students may pursue three undergraduate programs and an additional three minors. Graduate programs provide options for full-time students and for practicing professionals interested in enhancing their skills or engaging in graduate-level work on a part-time basis. Current graduate offerings include nationally recognized master's programs and eight graduate-level certificates, as well as a doctoral degree program. Wilder School programs include:

## Baccalaureate degrees

Bachelor of Science in Criminal Justice  
Bachelor of Arts in Homeland Security and Emergency Preparedness  
Bachelor of Science in Urban and Regional Studies

## Minors

Criminal justice  
Homeland security and emergency preparedness  
Urban and regional studies

## Graduate certificates

Certificate in Criminal Justice  
Certificate in Gender Violence Intervention  
Certificate in Geographic Information Systems  
Certificate in Homeland Security and Emergency Preparedness  
Certificate in Nonprofit Management  
Certificate in Public Management  
Certificate in Sustainability Planning  
Certificate in Urban Revitalization

## Master's degrees

Master of Arts in Homeland Security and Emergency Preparedness  
Master of Public Administration  
Master of Science in Criminal Justice  
Master of Urban and Regional Planning

## Doctoral degree

Ph.D. in Public Policy and Administration

The school also offers two dual degree programs with the University of Richmond's T.C. Williams Law School. Through these programs students can simultaneously obtain a law degree (J.D.) and either the Master of Public Administration or the Master of Urban and Regional Planning.

## Service-learning and internship opportunities

**Shajuana Isom-Payne**

Assistant dean of student services

The educational experience at the L. Douglas Wilder School of Government and Public Affairs extends far beyond the classroom. Many students take advantage of service-learning (<http://www.wilder.vcu.edu/service/servicelearning/>) and internship (<https://wilder.vcu.edu/students/student-success/internships/>) opportunities, gaining valuable work experience and enhancing their resumes as they contribute in meaningful ways to governmental departments and agencies, legislative offices, nonprofit institutions, community initiatives, and businesses throughout Richmond.

Exceptionally qualified graduate students in the criminal justice, homeland security and emergency preparedness, public administration, and urban and regional planning programs are selected to be Wilder Graduate Scholars (<https://wilder.vcu.edu/students/student-success/graduate-fellowship/>) who undertake yearlong placements in which they benefit from professional work experience and financial support.

At the Wilder School, service is a tradition that is supported and cultivated by a faculty that reflects a tremendous commitment to community-based research. Each semester, VCU faculty offer a diverse selection of credit-bearing service-learning courses that provide students with the privilege of developing hands-on experience within their academic fields while engaging in meaningful projects that benefit local communities.

Guidelines for internships (<https://wilder.vcu.edu/students/student-success/internships/>) are available on the Wilder School website.

## Graduate information

### Admission

Admission to programs of the L. Douglas Wilder School of Government and Public Affairs is available to qualified students on a rolling admissions basis. Since the demand for admission to some programs is high and space availability is limited, students are encouraged to apply well in advance of their proposed admission dates.

As outlined below, admission requirements vary by academic program. No application packet will be considered by the relevant program admissions committee until all the required materials have been submitted by the applicant.

Application forms and instructions for applying to all graduate programs are available on the Graduate School website (<http://www.graduate.vcu.edu>).

### Admission to a master's program from the certificate programs

The courses in the graduate Certificate in Criminal Justice program are the same as the master's courses and, with minimum grades of B and upon acceptance into the master's degree program, are fully transferable to the Master of Science in Criminal Justice program.

The courses that constitute the graduate Certificate in Homeland Security and Emergency Preparedness program represent the foundation for the HSEP master's degree. Completion of the HSEP certificate with a

minimum grade of B in each course guarantees admission to the HSEP master's and waives the standardized test requirement; applicants are still required to follow the standard application process. All courses in the certificate can be applied to the Master of Science in Homeland Security and Emergency Preparedness.

The graduate Certificate in Public Management and the graduate Certificate in Nonprofit Management are designed for persons in professional positions who require a limited number of courses in contemporary management theory and skills. However, if a student later decides to pursue the M.P.A. degree, successfully completed certificate courses may be applied toward the degree. Successful completion of either certificate does not guarantee admission into the M.P.A. degree program.

All courses from the graduate Certificate in Urban Revitalization, graduate Certificate in Geographic Information Systems or graduate Certificate in Sustainability Planning may be applied toward the requirements of the Master of Urban and Regional Planning degree. However, successful completion of any certificate program does not guarantee admission into the M.U.R.P. program.

### Provisional admission

In rare cases, applicants who do not meet the requirements for full admission may be accepted provisionally upon recommendation of the program's admissions committee. The conditions for earning full admission are provided by the program and include an assessment of academic performance after a specific number of hours or courses are completed. Provisionally admitted students may not withdraw from any courses or receive an incomplete during the provisional period. Students with extenuating circumstances may request an exception to this policy.

Provisional admission does not constitute a waiver of the requirement to submit a standardized test score if required by the program.

### Re-admission after dismissal

If a student is dismissed from the VCU Wilder School, the student must wait a minimum of one year before applying for re-admission. Dismissed students will not be admitted to any other Wilder School graduate program for a period of one year after dismissal.

### Continuous enrollment requirements and expectations

To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for approved leaves of absence) until they have completed all requirements. Students who fail to register for two consecutive semesters (summer sessions included) will be dropped automatically from the program and must reapply for admission in order to continue. Exceptions to this policy will be made on an individual basis by petition. Students who reapply after having been dropped for failure to register continuously will be evaluated under the bulletin requirements in effect at the time of readmittance.

A minimum GPA of 3.0 on a 4.0 scale must be maintained. Compliance with other university regulations also is required.

### Student appeals

Appeals for exceptions to policies must be made in writing to the Graduate Student Services and Advising office. Refer to the Wilder School website for contact information.

Students may submit an appeal to request a retroactive drop or withdrawal from a class or from all classes taken in a specific semester. The appeal process must be started within two semesters after the semester in question.

## Part-time students

Since the school schedules many of its courses in the late afternoon or evening, its programs accommodate both full- and part-time students. Students also may take advantage of courses offered in the summer. Thus it is possible for a part-time student taking six credit hours per semester to finish the master's degree in four years or less.

## Nondegree-seeking students

Nondegree-seeking students must have an undergraduate degree from an accredited institution and the written approval of the instructor prior to registering for any graduate-level course. Nondegree-seeking students can take no more than six credit hours without authorization from the appropriate program coordinator.

## Financial aid information

Information and application forms for financial aid may be secured from the VCU Office of Financial Aid, Harris Hall, 1015 Floyd Ave., First Floor, Box 843026, Richmond, VA 23284-3026.

The L. Douglas Wilder School of Government and Public Affairs also offers a limited amount of financial assistance. Individuals interested in such assistance are urged to apply by March 30. Financial assistance available through the school includes:

- **Graduate teaching assistant positions** – Duties involve helping with the instruction of courses. The level of support varies according to the work level, financial need and scholarship.
- **Research assistant positions** – The stipend and number of positions depend upon the level of sponsored research carried out by the school each year.
- **Tuition fellowships** – There are a limited number of tuition fellowships for full-time students within the three master's degree programs.
- **T. Edward Temple Memorial Scholarship Award** – This award of approximately \$500 per year is given to an outstanding graduate student in the Master of Urban and Regional Planning program each year.
- **The Senator Edward E. Willey Scholarship, the Virginia City Management Association/University Dr. T. Edward Temple Scholarship and the Leigh E. Grosenick Scholarship** – These scholarships are available to outstanding students in the Master of Public Administration program. Preference for these three scholarships is given to those who plan public careers in Virginia.
- **Internships** – Paid, on-the-job internships are widely available in the Richmond area and elsewhere and are encouraged. VCU graduates also have been successful in obtaining presidential management internships in the federal government, state-government professional positions and local government positions.

## Transfer credit

With the consent of the admission committee or program coordinator, a maximum of six semester hours of appropriate graduate credit may be transferred and applied toward the Master of Science in Criminal Justice, the Master of Arts in Homeland Security and Emergency Preparedness,

the Master of Public Administration or the Master of Urban and Regional Planning. These hours will not have been credited toward another degree.

## Schoolwide master's-level requirements

In addition to the program-specific requirements of the Master of Public Administration, the Master of Science in Criminal Justice and the Master of Urban and Regional Planning as outlined elsewhere in this bulletin, the Wilder School requires all master's-level graduate degree-seeking students to acquire competence in four broad areas:

1. Research methods
2. Planning and/or policy analysis
3. Public administration
4. Ethics

Competence can be demonstrated by completion of the following:

Course	Title	Hours
<b>Research methods</b>		
URSP/CRJS/GVPA/ PADM 623	Research Methods for Government and Public Affairs	3
<b>Planning/policy analysis</b>		
Select one of the following:		3
PADM/GVPA 625	Public Policy Analysis	
URSP/GVPA 632	Planning Theory and Processes	
<b>Public administration</b>		
PADM/GVPA 601	Principles of Public Administration	3
<b>Ethics</b>		
Select one of the following options:		3
Option A:		
PADM/GVPA/PHIL 683	Administrative Ethics	
Option B:		
A program-specific course through which ethical issues are imbedded and discussed within a public sector context. Such courses would include:		
CRJS 550	Professional Ethics and Liability	
PADM 661	Nonprofit Law, Governance and Ethics	
PADM 689	Seminar in Public Administration: Integration of Theory and Practice	
URSP/GVPA 632	Planning Theory and Processes	
URSP 635	Legal and Legislative Foundations of Planning	

Selection of courses to meet these competency requirements will be made by the student in consultation with an academic adviser. While each graduate of the Wilder School must demonstrate competence in each of the areas outlined above, substitutions for the specific courses may be made with the written approval of the appropriate graduate program coordinator.

## Criminal Justice, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The Certificate in Criminal Justice is a post-baccalaureate graduate program designed to help facilitate career advancement in the criminal

justice and/or criminology field. The program seeks to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

This certificate program offers specialization for individuals interested or involved in law enforcement, corrections, juvenile justice or the courts. It combines survey and theory courses with research, management and policy courses on the justice system. The courses in the certificate program are the same as the master's courses. With minimum grades of B and upon acceptance into the master's degree program, these courses are fully transferable to the Master of Science (M.S.) in Criminal Justice degree program.

## Student learning outcomes

1. Students will communicate effectively about criminal justice issues/policies using well-reasoned evidence from empirical studies to support their arguments and/or positions.
2. Students will demonstrate critical thinking and articulation of major issues related to the field in a diverse socio-cultural context while also understanding the diversity of lived experiences.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

The Post-baccalaureate Certificate in Criminal Justice program offers an abbreviated graduate-level course sequence of 15 credit hours for individuals with an academic and/or professional background in criminal justice. Applicants must meet all general admission requirements of the VCU Graduate School. (p. 34)

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), five courses are required for the certificate, as specified in the list that follows. To receive the certificate, the student must achieve a B average in the five courses and earn no more than one C grade.

## Curriculum requirements

Course	Title	Hours
<b>Required courses</b>		
CRJS 501	Principles of Criminal Justice	3
CRJS 550	Professional Ethics and Liability	3
CRJS 617	Law and Criminal Justice Policy	3
CRJS/GVPA/PADM/URSP 623	Research Methods for Government and Public Affairs	3
<b>Elective</b>		<b>3</b>
One additional CRJS, GVPA, HSEP, URSP, PADM or PPAD course may be used as an elective. Other course(s) may be selected with permission of the criminal justice graduate coordinator.		
Total Hours		15

**The minimum total of graduate credit hours required for this certificate is 15.**

## Criminal Justice, Master of Science (M.S.)

### Program goal

The M.S. degree program in criminal justice assists in broadening and refining the understanding of criminal justice and criminological issues

to facilitate career success and advancement. The goal of the program is to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

## Student learning outcomes

1. Students will communicate effectively about criminal justice issues/policies using well-reasoned evidence from empirical studies to support their arguments and/or positions.
2. Students will demonstrate critical thinking and articulation of major issues related to the field in a diverse socio-cultural context while also understanding the diversity of lived experiences.
3. Students will integrate their knowledge of existing theoretical and methodological frameworks to evaluate policy issues related to criminal justice and to be able to communicate to community stakeholders about the consequences of policy implementation.
4. Students will make impactful contributions to their fields, surrounding community and public policy through ethically responsible active participation and leadership in their careers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Apr 1 (Mar 1 for financial aid)	GRE, LSAT or GMAT
	Spring	Oct 1	

## Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

In addition to the general admission requirements of the VCU Graduate School (p. 34), admission to the Master of Science in Criminal Justice also will be based on:

1. An undergraduate GPA that exceeds 2.7 overall
2. A satisfactory score on the graduate standardized test (GRE, LSAT or GMAT)
3. Previous evidence of ability to perform graduate-level work (where applicable)
4. Professional experience in criminal justice (where applicable)

The courses in the post-baccalaureate graduate Certificate in Criminal Justice program are the same as the master's courses. With minimum grades of B and, upon acceptance into the master's degree program, courses from the certificate program are fully transferable to the Master of Science in Criminal Justice degree program.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/graduate/study/general-academic-regulations-graduate-students/graduation-requirements/>), the Master of Science in Criminal Justice requires a minimum of 30 graduate credit hours of course work, with a minimum overall grade-point average of 3.0. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 30 semester hours.

To complete the M.S. curriculum, students must submit a portfolio of their work before they graduate. Contact the program director for format and submission details.

A maximum of nine semester hours of graduate credit from an accredited institution may be transferred and applied toward the master's degree. All transfer requests require the approval of the graduate program coordinator and the Graduate School and may not have been counted toward another degree.

## Curriculum requirements

## Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate)

### Program mission

The graduate Certificate in Gender Violence Intervention is designed to prepare individuals for positions related to understanding, studying, responding to and preventing sexual and domestic violence in a variety of communities and settings. It provides specialized study in gender violence and can be earned on its own, or in conjunction with another

graduate degree in the Wilder School of Government and Public Affairs or the School of Social Work.

## Program goals

1. The program will guide students in the development of strong academic understanding related to gender violence intervention.
2. The program will guide students in the development of skills in applying academic concepts to the practice of gender violence intervention.

## Student learning outcomes

1. Academic understanding
  - a. Students will have knowledge of common types of gender violence.
  - b. Students will have knowledge of theoretical perspectives of gender violence.
  - c. Students will have knowledge of gender violence policies.
2. Skills
  - a. Students will have the ability to demonstrate methods of applying concepts to problems, practice and policy.
  - b. Students will demonstrate professional behaviors and boundaries while working in GVI settings and with diverse populations.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

Applicants must meet all general admission requirements of the VCU Graduate School (p. 34).

Students with a B.A. or B.S. degree are eligible for admission into the certificate program. Relevant course work or practical experience will be considered in evaluating admission and substitution of courses. No more than six hours of substitution or equivalency credit will be granted. An overall GPA of 3.0 is required to receive the certificate, and no more than one grade of C may be earned in the certificate program curriculum.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a total of 15 graduate credit hours is required to earn the Certificate in Gender Violence Intervention. Five courses are required, including an internship (three credit hours) that offers the opportunity for involvement in all phases of work in this field.

## Curriculum requirements

### Required courses

Course	Title	Hours
GVPA 623	Research Methods for Government and Public Affairs	3
GVPA 635	Theorizing Gender Violence	3
GVPA 693	Internship	3
PADM 650	Principles of Nonprofit Management	3
SLWK 761	Interpersonal Violence in Clinical Social Work Practice	3
Total Hours		15

**The minimum total of graduate credit hours required for this certificate is 15.**

Students pursuing the Certificate in Gender Violence Intervention have an opportunity to combine their studies with a Master of Social Work (p. 729).

The combined Master of Social Work and Certificate in Gender Violence Intervention is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

## Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. Master of Social Work students may simultaneously earn the Certificate in Gender Violence Intervention offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to Graduate Admissions; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online application through Graduate Admissions (<http://www.graduate.admissions.vcu.edu/>), pay the application fee and submit a personal statement expressing their interest in the program and indicating that they are currently in the M.S.W. program. Students may email the Graduate School ([gradmail@vcu.edu](mailto:gradmail@vcu.edu)) to arrange for references, resume/CV and transcripts already on file from the M.S.W. program to be added to the application.

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [[ecramer@vcu.edu](mailto:ecramer@vcu.edu); (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., Wilder School [[sbrubaker@vcu.edu](mailto:sbrubaker@vcu.edu); (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

See the individual program pages (<http://bulletin.vcu.edu/graduate/school-government-public-affairs/gender-violence-intervention-certificate/>) for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and

graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W. and Post-baccalaureate graduate certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

## Curriculum requirements

Course	Title	Hours
<b>Required courses</b>		
GVPA 623	Research Methods for Government and Public Affairs <sup>1</sup>	3
GVPA 635	Theorizing Gender Violence	3
GVPA 693	Internship <sup>2</sup>	3
PADM 650	Principles of Nonprofit Management <sup>3</sup>	3
SLWK 761	Interpersonal Violence in Clinical Social Work Practice	3
Total Hours		15

<sup>1</sup>GVPA 623: satisfied by SLWK 706-SLWK 707 or SLWK 714-SLWK 715 [clinical or social work planning, administrative and policy practice research course (three credit hours)].

<sup>2</sup>GVPA 693: satisfied by SLWK 693-SLWK 694, SLWK 695; or SLWK 793-SLWK 794, SLWK 795 [a social work field practicum in an agency providing sexual or domestic violence services (three credit hours)].

<sup>3</sup>PADM 650: satisfied by SLWK 602-SLWK 606 or SLWK 608 (three credit hours).

The minimum total of graduate credit hours required for the Certificate in Gender Violence Intervention for students in the M.S.W. program is 15.

## Field placements

Once students are admitted and enrolled in the certificate program, they should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

## Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The graduate Certificate in Geographic Information Systems emphasizes the core functions and applications of GIS. It provides specialized training in the operations and techniques related to the creation, analysis, modeling, visualization, interpretation and management of geographic information.

The certificate program is designed to meet the educational needs of both traditional and nontraditional students. The GIS program prepares traditional students to utilize GIS in their major areas of study. Nontraditional students can also take advantage of the certificate program to learn and/or upgrade GIS knowledge and skills that are applicable and important to their professions.

### Student learning outcomes

1. Understand the fundamental principles and concepts upon which GIS technology is based.
2. Utilize various data structures for storing geographic information in GIS database creation and management.
3. Apply appropriate GIS techniques in spatial analyses and problem solving.
4. Design maps and other GIS outputs that communicate effectively.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

## Special requirements

- Only applicants with prior GIS training, course work or work experience are considered for spring admissions. Other applicants should apply for fall admission due to course sequencing and prerequisites.
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the prerequisites and general criteria of eligibility for admission to the GIS certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Geographic Information Systems
4. An official transcript showing successful completion of baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

At any time, students in the GIS certificate program may apply for admission into the Master of Urban and Regional Planning, the Master of Public Administration or the Master of Science in Criminal Justice degree programs. If accepted into a master's program, students may then transfer credits earned in the GIS certificate program toward partial fulfillment of the master's degree.

## Degree requirements

The Certificate in Geographic Information Systems can be completed in one academic year. In addition to general VCU Graduate School graduation requirements (p. 31), students must complete 12 graduate credit hours of GIS course work that includes two required and two elective courses with a minimum grade-point average of 3.0 (out of 4.0).

## Curriculum requirements

Course	Title	Hours
<b>Required courses</b>		
URSP 621	Introduction to Geographic Information Systems (offered in fall semester)	3
or URSP 521	Introduction to Geographic Information Systems	
URSP 625	Spatial Database Management and GIS Modeling (offered in spring semester)	3
<b>Electives</b>		
Select two of the following:		6
URSP 523	GIS for Land Use and Transportation Planning	
URSP 622	Community Socioeconomic Analysis Using GIS	
URSP 626	Transportation Analytics and Modeling	
URSP 627	GIS Applications in Urban Design	
Total Hours		12

**The minimum total of graduate credit hours required for this certificate is 12.**

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

All credits earned in the certificate program are transferable to the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning programs. However, students must apply to the certificate and master's degree programs separately.

## Sample plan of study

The following schedule is suggested as a means of completing the certificate program:

Fall semester	Hours
URSP 621 Introduction to Geographic Information Systems	3
One GIS-related elective (see list above) or other approved course	3
Term Hours:	6
<b>Spring semester</b>	
URSP 625 Spatial Database Management and GIS Modeling	3
One GIS-related elective (see list above) or other approved course	3
Term Hours:	6
Total Hours:	12

**The minimum total of graduate credit hours required for this certificate is 12.**

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

## Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

This certificate program complements a student's other fields of interest in public and government affairs. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels, as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

### Student learning outcomes

Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

## Special requirements

- Admission applications that do not have a decision will automatically carry over to the next semester for consideration.

Applicants must meet all general admission requirements of the VCU Graduate School. (p. 34)

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the graduate certificate program requires 15 credit hours, comprising five three-credit-hour graduate courses delivered through a combination of online technology and one on-campus session (three days) as described below. The courses offered in the certificate program are the same as those taken by students in the master's program. With minimum grades of B and upon acceptance into the master's program, these courses are fully transferable to the Master of Arts in Homeland Security and Emergency Preparedness degree program.

## Online study

Web-based course delivery in an asynchronous format is designed around each course's own Blackboard site.

## Curriculum requirements

Course	Title	Hours
HSEP 501	Introduction to Homeland Security and Emergency Preparedness	3
HSEP 502	Survey of Terrorism	3
HSEP 601	Emergency Management: Response Planning and Incident Command	3
HSEP 602	Government, Industry and Community Strategic Planning	3

HSEP 603	Risk Assessment	3
Total Hours		15

**The minimum total of graduate credit hours required for this certificate is 15.**

## Homeland Security and Emergency Preparedness, Master of Arts (M.A.)

### Program goal

The Master of Arts in Homeland Security and Emergency Preparedness degree program is designed in the broadest interdisciplinary sense. Students will learn theoretical and practical knowledge that will prepare them for private or public sector employment in the expanding area of homeland security and emergency preparedness and/or further study in numerous areas of public policy. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

The master's degree is an online, distance-learning program. VCU's program takes a broad interdisciplinary approach to preparedness that will give students the ability to see the larger organizational, social, political, ethical and economic aspects of disaster studies, in addition to the policy-making and implementation aspects. The scholarly study of homeland security and emergency preparedness rests at the intersection of national defense, emergency management, law enforcement and policy management. With expertise in criminal justice, geography, government (local, state, federal and foreign), international affairs, policy planning and public administration, the Wilder School is particularly well-suited for such a program. Its location in the state capital and situated just 90 minutes from the nation's capital also provides easy access to homeland security institutions and practitioners.

### Student learning outcomes

1. Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information in five key areas: risk and vulnerability analysis, strategic planning dilemmas of disasters and disaster preparedness, cybersecurity, institutional coordination, and intelligence operations and legal/constitutional aspects.
2. Students will develop advanced skills in expository writing and oral presentation.
3. Students will achieve comprehension of the theoretical and practical principles of emergency preparedness for both natural disasters and terrorist incidents and be able to analyze key topics related to natural disasters, emergency planning, terrorism and counterterrorism.
4. Students will perform research, policy analysis and risk assessment using several methodological and theoretical approaches to homeland security and emergency preparedness.
5. Students will also be able to evaluate scholarly and practitioner analyses of homeland security and emergency preparedness.

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.A.	Fall	Jul 25	GRE, GMAT, MAT or LSAT
	Spring	Dec 16	
	Summer	Apr 20	

## Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 34), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in a field related to homeland security and emergency preparedness. The application for admission requires:

1. A transcript documenting the completion of a bachelor's degree
2. Three letters of reference (including both academic and professional references if possible)
3. A current resume
4. Satisfactory standardized test score (GRE, GMAT, MAT, LSAT)
5. A minimum 2.7 GPA (on a 4.0 scale) in the last 60 semester hours of undergraduate work

Students not meeting these requirements who have demonstrated advanced competency on a professional basis may be admitted to the program provisionally. The provisional period shall consist of the first nine hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 36 graduate credit hours with a cumulative minimum GPA of 3.0.

## Off-campus study

Web-based course delivery is designed around each course's own web-based site utilizing the Blackboard education system, which provides the following:

1. Course syllabus
2. Course reference materials and links to supporting websites
3. Course lectures
4. Faculty-student and student-student communications via weekly discussion topics
5. Student writing assignments

Participation in online discussions is mandatory and will count for a significant percentage of each student's grades. Written work is submitted, evaluated and returned to students via the Blackboard education system assignment function.

## Curriculum requirements

Course	Title	Hours
HSEP 501	Introduction to Homeland Security and Emergency Preparedness	3
HSEP 502	Survey of Terrorism	3

## Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The program mission is to empower community leaders with the knowledge, theory, research and real-world applications needed to creatively solve public issues and shape public policy. The program equips current and future executives, boards, staff and volunteers to lead, govern and manage nonprofit organizations collaboratively, thoughtfully and ethically.

In the graduate Certificate in Nonprofit Management program, students gain knowledge and skills in nonprofit governance, management, fundraising, and program development and evaluation that they will need to become leaders and change agents in this rapidly growing sector. The school welcomes degree applicants from any undergraduate major, as entry- and top-level employees in nonprofit organizations have a wide range of backgrounds, including the sciences and humanities, social sciences, and technology. Courses are scheduled in the evening and on weekends with the working professional in mind.

### Student learning outcomes

1. To understand the nonprofit sector's relationship to the for-profit and government sectors
2. To know how to build a fundraising and donor communication plan model
3. To understand how to budget and evaluate the financial management practices of nonprofit organizations
4. To have the skills to analyze and implement laws impacting nonprofit organizations and their governance

### VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	None
	Spring	Oct 1	

### Special requirements

- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 34), admission to the certificate program requires the same procedure used in applying to the M.P.A., except that a standardized examination is not required.

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the certificate requires a total of 15 graduate credit hours, comprising four courses in the graduate public administration program and one elective. The elective may be from the public administration curriculum or from elsewhere within the school or university.

### Curriculum requirements

#### Required courses

Course	Title	Hours
PADM 650	Principles of Nonprofit Management	3
PADM 656	Fund Development for the Nonprofit Sector	3
PADM 659	Financial Management for Nonprofit Organizations	3
PADM 661	Nonprofit Law, Governance and Ethics	3
Total Hours		12

#### Elective

Course	Title	Hours
Select one of the following:		
PADM 583	Effective Managerial Communications	3
PADM 584	Planned Organizational Change	
PADM 585	Power, Influence and Organizational Competence	

PADM 591	Topic Seminar
PADM/GVPA 601	Principles of Public Administration
PADM 602	Public Administration Theory
PADM 603	Politics and Economics
PADM 604	Comparative Public Institutions
PADM/SOCY 605	Survey Research Methods
PADM 606	Government Management Models
PADM 607	Public Human Resource Management
PADM 609	Financial Management in Government
PADM 621	Organizational Behavior and Management in Government
PADM 622	Public Sector Budgeting
PADM/GVPA/CRJS/URSP 623	Research Methods for Government and Public Affairs
PADM 624	Quantitative Methods for Public Administration (PADM 623 is a prerequisite for PADM 624)
PADM/GVPA 625	Public Policy Analysis
PADM 626	Intergovernmental Relations
PADM 627	Workshop in Policy Analysis and Evaluation
PADM/ENVS 628	Environmental Policy and Administration
PADM/URSP 630	Strategic Planning and Management in the Public Sector
PADM 637	Organic Human Resources Management
PADM 642	Grants Management
PADM 652	Administrative Law
PADM 654	Program Design and Evaluation in the Nonprofit Sector
PADM 657	Nonprofit Advocacy and Government Relations
PADM 660	Community Power Dynamics
PADM 662	Advanced Topics in Revenue and Taxation
PADM 664	Local Government Administration
PADM 675	Comparative Public Administration
PADM 680	Executive Leadership Seminar
PADM 681	Governmental Administrative Decision-making Processes
PADM 682	Advanced Public Human Resources Management
PADM/PHIL/GVPA 683	Administrative Ethics
PADM 689	Seminar in Public Administration: Integration of Theory and Practice
PADM 691	Topics in Public Administration
One graduate three credit-hour course from elsewhere in the Wilder School or elsewhere in the university (with approval from the program chair)	
Total Hours	3

**The minimum total of graduate credit hours required for this certificate is 15.**

## Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Graduate Certificate in Nonprofit Management is a cooperative arrangement between the School of Social Work and the L. Douglas Wilder School of Government and Public Affairs. Master of Social Work students pursuing a concentration in administration, planning and policy practice or clinical practice may simultaneously earn the graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours. The program is designed to bring together two fields that benefit from complementary knowledge and skills that may be used in the government and nonprofit sectors. This integration of education in social work and nonprofit management draws on the contributions that each area can make to a professional knowledge base for practice in both fields.

### Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete two graduate admissions applications and be admitted to both programs. Students may begin their studies in either program, or apply to both programs simultaneously. Students who are already enrolled in good standing in the M.S.W. degree program are not required to submit any additional supporting documents when applying to the certificate program.

Visit the Wilder School's page (<https://wilder.vcu.edu/programs/public-administration/>) for more information.

### Certificate requirements for M.S.W. students

Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six credit hours of the certificate's 15 credit-hour requirement. One of these courses is SLWK 712. The second course may be SLWK 711 or SLWK 713.

Social work students enrolled in the clinical practice concentration are required to complete four nonprofit courses (PADM 650, PADM 656, PADM 659 and PADM 661) and one elective. Two social work courses, SLWK 602 and SLWK 606 (six credits) or SLWK 608 (3 credit hours), may substitute for PADM 650 (three credits).

**Note:** M.S.W. students pursuing the clinical practice concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

## Curriculum requirements - SWAPPP concentration

Course	Title	Hours
PADM 656	Fund Development for the Nonprofit Sector	3
PADM 659	Financial Management for Nonprofit Organizations	3
PADM 661	Nonprofit Law, Governance and Ethics	3
SLWK 712	Social Work Planning and Administrative Practice I	3
SLWK 711	Strategies for Social Work Planning and Administrative Practice	3
or SLWK 713	Social Work Planning and Administrative Practice II	

The minimum total of graduate credit hours required for the Certificate in Nonprofit Management for students in the M.S.W. program SWAPPP concentration is 15.

## Curriculum requirements - clinical practice concentration

Course	Title	Hours
PADM 650	Principles of Nonprofit Management	3
PADM 656	Fund Development for the Nonprofit Sector	3
PADM 659	Financial Management for Nonprofit Organizations	3
PADM 661	Nonprofit Law, Governance and Ethics	3

One graduate three credit-hour course from the Wilder School or elsewhere in the university (with approval from the program chair)

The minimum total of graduate credit hours required for the Certificate in Nonprofit Management for students in the M.S.W. program clinical practice concentration is 15.

## Public Administration, Master of (M.P.A.)

### Program accreditation

National Association of Schools of Public Affairs and Administration

## Program goals

The Master of Public Administration program's mission supports a "generalist" conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

The program's mission includes the following goals:

1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

## Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will analyze, synthesize, think critically, solve problems and make decisions.
4. Students will articulate and apply a public service perspective.
5. Students will communicate and interact productively with a diverse and changing workforce and citizenry.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.A.	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	
	Summer	Feb 1	

## Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

In addition to the general admission requirements of the VCU Graduate School (p. 34), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor's degree, three letters of reference (including both academic and professional references if possible), and a current resume. In addition, applicants must have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

## Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate

School graduation requirements (p. 31), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students may have no more than two C grades to graduate. Students who earn a D or F in a course will be dismissed from the program. Students must have a minimum grade of B in all core courses to be eligible to take the capstone class.
3. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
4. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

## Curriculum requirements

Course	Title	Hours
<b>Core courses (required)</b>		
PADM/GVPA 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3
PADM/GVPA/CRJS/URSP 623	Research Methods for Government and Public Affairs	3
PADM 624	Quantitative Methods for Public Administration	3
PADM/GVPA 625	Public Policy Analysis	3
PADM 689	Seminar in Public Administration: Integration of Theory and Practice (capstone)	3
<b>Electives</b>		
In consultation with an adviser, select 12 credits from any additional graduate-level PADM, CRJS, GVPA, HSEP, PPAD or URSP courses; other course(s) may be selected with permission of the program chair.		12
<b>Internship</b>		
GVPA 693	Internship (required for students with less than one year of professional experience in the public or nonprofit sector)	0-3

The minimum total of graduate credit hours required for this degree is 36 (or 39 with internship).

## Accelerated opportunities

The program offers opportunities for qualified undergraduate students to earn both an undergraduate and graduate degree in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. See the individual program page for concentrations in the Undergraduate Bulletin (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/political-science-program/>) for details.

## Public Administration, Master of (M.P.A.)/ Juris Doctor (J.D.) from the University of Richmond [dual degree]

### Program accreditation

National Association of Schools of Public Affairs and Administration

A cooperative arrangement with the University of Richmond School of Law makes it possible for students to receive a law degree from the University of Richmond and the Master of Public Administration from VCU. The dual degree program is designed to provide its graduates with competency in both public administration and law. This competency is applicable to areas of practice drawing upon knowledge and skills from each of these fields. The program brings together persons interested in both the broader aspects of public policy and government affairs and the law. It also brings together two fields that require complementary knowledge and skills that may be directed toward solving problems that are associated with the affairs of the government and nonprofit sectors. This integration of education in public administration and law draws on the contributions that each discipline can make to a professional knowledge base for practice in both fields.

## Application process

Application for admission to each program must be made separately to VCU and the T.C. Williams School of Law of the University of Richmond and the candidate will be subject to the admission requirements for the respective programs at each institution. Only students admitted to both programs will be eligible for the dual degree program.

Once admitted to the program, students are encouraged to meet with their advisers at both VCU and the University of Richmond to review the proposed course of dual degree study, keeping in mind the timelines and requirements for each program.

Students in the dual degree program may begin their studies at either institution and the primary program during the student's first year of study will determine the sequence of courses to be completed. Students must spend the entire first year at either VCU or the T.C. Williams School of Law, but may attend either institution in subsequent years. The first-year curriculum at the law school must be completed in its entirety during a single academic year.

Students who are accepted into the dual degree program are permitted to apply 12 credit hours of work in the M.P.A. degree program toward meeting the graduation requirements in the T.C. Williams School of Law and up to 12 credit hours of work in the law school are applied as elective credits toward meeting the degree requirements for the M.P.A. This credit application enables participants in the dual degree program to complete the requirements for the J.D. and the M.P.A. in an estimated four years of full-time course work after the completion of 99 or 102 credits, rather than a minimum of 123 or 126 if the degrees were pursued separately. Applicants for this program are required to meet all admission and academic standards of the T.C. Williams School of Law of the University of Richmond, the VCU Graduate School and the M.P.A. program.

## Public Management, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The graduate certificate in public management is a program designed to enable practitioners in government and nonprofit organizations to acquire knowledge and skills in public administration without pursuing a full master's degree.

### Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will articulate and apply a public service perspective.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

### Special requirements

- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 34), admission to the certificate program requires the same procedure in applying to the M.P.A., except that a standardized examination is not required.

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the certificate requires a total of 18 hours of graduate credit hours involving a mix of required and elective courses. The courses are the same as those offered to M.P.A. students.

### Curriculum requirements

#### Required courses

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3
Total Hours		9

#### Electives

Course	Title	Hours
Select three elective courses from the following:		9
PADM 583	Effective Managerial Communications	
PADM 584	Planned Organizational Change	
PADM 585	Power, Influence and Organizational Competence	
PADM 591	Topic Seminar	
PADM 602	Public Administration Theory	
PADM 603	Politics and Economics	
PADM 604	Comparative Public Institutions	
PADM/SOCY 605	Survey Research Methods	
PADM 606	Government Management Models	
PADM 621	Organizational Behavior and Management in Government	
PADM 622	Public Sector Budgeting	
PADM/GVPA/CRJS/URSP 623	Research Methods for Government and Public Affairs	
PADM 624	Quantitative Methods for Public Administration (PADM 623 is a prerequisite for PADM 624)	
PADM/GVPA 625	Public Policy Analysis	
PADM 626	Intergovernmental Relations	
PADM 627	Workshop in Policy Analysis and Evaluation	
PADM/ENVS 628	Environmental Policy and Administration	
PADM/URSP 630	Strategic Planning and Management in the Public Sector	
PADM 637	Organic Human Resources Management	
PADM 642	Grants Management	
PADM 650	Principles of Nonprofit Management	
PADM 652	Administrative Law	
PADM 654	Program Design and Evaluation in the Nonprofit Sector	
PADM 656	Fund Development for the Nonprofit Sector	
PADM 657	Nonprofit Advocacy and Government Relations	

PADM 659	Financial Management for Nonprofit Organizations
PADM 660	Community Power Dynamics
PADM 661	Nonprofit Law, Governance and Ethics
PADM 662	Advanced Topics in Revenue and Taxation
PADM 664	Local Government Administration
PADM 675	Comparative Public Administration
PADM 680	Executive Leadership Seminar
PADM 681	Governmental Administrative Decision-making Processes
PADM 682	Advanced Public Human Resources Management
PADM/PHIL/GVPA 683	Administrative Ethics
PADM 689	Seminar in Public Administration: Integration of Theory and Practice
PADM 691	Topics in Public Administration
Other courses from elsewhere in the Wilder School or elsewhere in the university (with approval from the program chair)	
Total Hours	9

The minimum total of graduate credit hours required for this certificate is 18.

## Public Policy and Administration, Doctor of Philosophy (Ph.D.)

### Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad

spectrum of academic disciplines and substantial interaction with government agencies and community groups.

### Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

### Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 15 for assistantships (Jan 30 final date for admission consideration)	GRE, GMAT, MAT or LSAT; international applicants TOEFL

## Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)

4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

## Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
  - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
  - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
  - c. Displays enthusiasm for the field of public policy and administration
  - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
  - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
  - b. Statistics (equivalent of PADM 624)
  - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<http://international.admissions.vcu.edu>).

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of

public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Six of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

## Curriculum requirements

Course	Title	Hours
<b>Core courses</b>		
PPAD 711	Seminar in Public Policy I	3
PPAD 712	Seminar in Public Policy II	3
PPAD 721	Survey of Applied Research Methods in Public Policy	3
PPAD 722	Survey of Data Analysis Techniques in Public Policy	3
PPAD 724	Seminar in Advanced Analytical Methods	3
PPAD 780	Synthesizing Seminar in Public Policy	3
<b>Concentration courses</b>		
All students will select a concentration after the first year of study and after passing the comprehensive examination. They will take four courses in one of the concentrations (criminal justice policy, public administration, public policy, or urban and regional policy). Courses will be selected from a list designated by the concentration committee for each area. The concentration committee will approve the program of study for each student in the concentration.		12
<b>Electives outside concentration</b>		
Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director.		6
Dissertation research		
PPAD 898	Dissertation Research (minimum)	9
Total Hours		45

The minimum total of graduate credit hours required for this degree is 45.

## Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

## Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

## Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in criminal justice policy

### Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

### Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

### Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 15 for assistantships (Jan 30 final date for admission consideration)	GRE, GMAT, MAT or LSAT; international applicants TOEFL

### Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such

as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test; and the Test of English as a Foreign Language is required for international students. Professional experience is not required but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

## Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
  - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
  - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
  - c. Displays enthusiasm for the field of public policy and administration
  - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
  - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
  - b. Statistics (equivalent of PADM 624)
  - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<http://international.admissions.vcu.edu>).

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

## Curriculum requirements

Course	Title	Hours
<b>Core courses (required)</b>		
PPAD 711	Seminar in Public Policy I	3
PPAD 712	Seminar in Public Policy II	3
PPAD 721	Survey of Applied Research Methods in Public Policy	3
PPAD 722	Survey of Data Analysis Techniques in Public Policy	3
PPAD 724	Seminar in Advanced Analytical Methods	3
PPAD 780	Synthesizing Seminar in Public Policy	3
<b>Concentration courses</b>		
PPAD 761	Risk Assessment in Criminal Justice	3
Select six credits from the following concentration electives:		6
PPAD 760	Criminal Justice Policy and Program Evaluation	
PPAD 791	Topical Seminar	

PPAD 792	Independent Study	
Additional research methods or statistics course (within or outside the Wilder School)		3
<b>Electives outside concentration</b>		
Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director.		6
<b>Dissertation research</b>		
PPAD 898	Dissertation Research (minimum)	9
Total Hours		45

The minimum total of graduate credit hours required for this degree is 45.

### Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

### Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

## Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public administration

### Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

### Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

### Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 15 for assistantships (Jan 30 final date for admission consideration)	GRE, GMAT, MAT or LSAT; international applicants TOEFL

## Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions

are considered exceptions and will be considered on a case-by-case basis.

---

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

## Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
  - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
  - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
  - c. Displays enthusiasm for the field of public policy and administration
  - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
  - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
  - b. Statistics (equivalent of PADM 624)
  - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec.15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct.15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct.15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<http://international.admissions.vcu.edu>).

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

### Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

### Student learning outcomes

1. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy analysis, formulation and implementation.
2. Students will be able to demonstrate mastery of a particular area of public policy.
3. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
4. Students will be able to conduct original and scholarly research on public policy issues.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Dec 15 for assistantships (Jan 30 final date for admission consideration)	GRE, GMAT, MAT or LSAT; international applicants TOEFL

### Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable

fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Scores from a standardized examination (GRE, GMAT, MAT or LSAT and TOEFL for international students)
4. Three letters of reference
5. A personal statement describing reasons for applying to the program
6. A current professional resume

## Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
  - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
  - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
  - c. Displays enthusiasm for the field of public policy and administration
  - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
  - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
  - b. Statistics (equivalent of PADM 624)
  - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered

to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<http://international.admissions.vcu.edu>).

## Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 31), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

## Curriculum requirements

Course	Title	Hours
<b>Core courses (required)</b>		
PPAD 711	Seminar in Public Policy I	3
PPAD 712	Seminar in Public Policy II	3
PPAD 721	Survey of Applied Research Methods in Public Policy	3
PPAD 722	Survey of Data Analysis Techniques in Public Policy	3
PPAD 724	Seminar in Advanced Analytical Methods	3
PPAD 780	Synthesizing Seminar in Public Policy	3
<b>Concentration courses</b>		

PPAD 716	Public Policy Economics	3
PPAD 750	Seminar in Urban Policy	3
Select six credits from the following concentration electives:		6
PPAD 791	Topical Seminar	
URSP/GVPA 632	Planning Theory and Processes	
URSP 637	Sustainable Community Development	
URSP 643	Housing Policy	
URSP 651	Transportation Policy and Planning	
URSP 655	Environmental Policy and Planning	
URSP 664	Urban Economic Development Policy	
URSP 672	Food Systems, Rural Development and Landscape Conservation	
URSP 681	International Urban Policy and Planning	
<b>Electives outside concentration</b>		
Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director.		6
<b>Dissertation research</b>		
PPAD 898	Dissertation Research (minimum)	9
Total Hours		45

The minimum total of graduate credit hours required for this degree is 45.

### Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

### Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee

must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

## Sustainability Planning, Certificate in (Post-baccalaureate graduate certificate)

### Program mission

The mission of the Certificate in Sustainability Planning is to provide students with a better understanding of society's land use and natural resource systems, with a particular emphasis on the factors that contribute to or constrain their level of sustainability. The program aims to give students the knowledge and skills needed to identify and address barriers to sustainability and to formulate strategies to create more sustainable practices, systems and institutions. Using a holistic and integrated approach, the program emphasizes the interdependence of sociocultural, biophysical and political-economic dimensions of sustainability, especially as they relate to urban or other subnational regions.

An important theme of the program is that sustainability planning is primarily about influencing humans and their activities by modifying organizational structures, economic policies and legislative frameworks. Therefore, of paramount importance are topics normally associated with the social sciences, such as urban and regional planning, economics, political science and human geography. However, sustainability is an interdisciplinary science, and thus students must also examine topics typically linked to the biophysical sciences, such as ecology and geomorphology.

Students will acquire knowledge and skills that complement backgrounds in engineering, environmental and social sciences, business or other fields.

### Program goals

1. Provide students with a better understanding of the sociocultural, biophysical and political-economic dimensions of the key problems faced by society with regard to natural resources and the environment – particularly in the context of urban and other subnational regions.

2. Develop students' insights on the underlying causes of these problems and on the political-economic and sociocultural factors that constrain the ability to address them more effectively.
3. Help student acquire the analytical and professional skills needed to identify and address barriers to sustainability and to formulate strategies to develop more sustainable lifestyles, systems and institutions.

## Student learning outcomes

1. Students will develop a well-rounded knowledge of sustainability, with particular emphasis on the following elements:
  - a. Factors influencing sustainability at the individual, household, community, regional, national and international scale
  - b. Balancing environmental, economic and social objectives in decision-making
  - c. The relationship between the built and natural environments and their effects on human health and well-being
  - d. Linkages among consumptions/lifestyle patterns, technology, regional carrying capacity and sustainability
  - e. Political-economic influences on land/resource use, community design, transportation and other human systems
  - f. Energy and natural resource efficiency and conservation
  - g. Renewable resource use, environmental management and landscape/habitat protection
  - h. Environmental remediation
2. Students will be able to communicate clearly and effectively, using a variety of methods, to enhance the collaborative and public nature of their work.
3. Students will acquire the analytical and research skills needed to investigate a sustainability-related problem and develop strategies for addressing it.
4. Student will acquire organizational skills and knowledge of management practices frequently employed within planning and related fields.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	April 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

## Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the prerequisites and general criteria of eligibility for admission to the sustainability planning certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Sustainability Planning
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

All courses in the graduate Certificate in Sustainability Planning may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

## Curriculum requirements

The mission of the Certificate in Sustainability Planning is to provide students with a better understanding of society's land use and natural resource systems, with a particular emphasis on the factors that contribute to or constrain their level of sustainability. The three core courses will provide subject matter knowledge on sustainable community development, natural resources management, and environmental policy and planning. In addition, students must take one course that focuses on socioeconomic sustainability to gain knowledge on the social equity aspect of sustainability planning. The remaining electives will provide an opportunity for more in-depth knowledge and training in specific subfields within sustainability (e.g., energy, land use or food systems) or

disciplines to which a sustainability approach can be applied, such as housing policy.

## Degree requirements

Course	Title	Hours
<b>Core courses</b>		<b>9</b>
URSP 637	Sustainable Community Development	
URSP 650	Natural Resources and Environmental Planning	
URSP 655	Environmental Policy and Planning	
<b>Restricted elective (social equity)</b>		<b>3</b>
Select one from:		
URSP 622	Community Socioeconomic Analysis Using GIS	
URSP 641	Citizen Participation and Negotiation	
URSP 643	Housing Policy	
<b>Restricted electives (sustainability application) <sup>1</sup></b>		<b>6</b>
Select two from:		
URSP 545	Sustainable Energy Policy and Planning	
URSP 621	Introduction to Geographic Information Systems	
URSP 628	Land Use Planning	
URSP 672	Food Systems, Rural Development and Landscape Conservation	
URSP 681	International Urban Policy and Planning	
Total Hours		18

1

With approval from the program director, other 500- and 600-level courses offered within and beyond the Wilder School can fulfill the sustainability application electives requirements. The program director will review substitution requests to maintain a commitment to the specialization and general intent of the certificate.

**The minimum total of graduate credit hours required for this certificate is 18.**

## Urban and Regional Planning, Master of (M.U.R.P.)

**Program accreditation**  
Planning Accreditation Board

### Program goals

The Master of Urban and Regional Planning degree program advances social justice and quality of life through planning, designing and evaluating options to create, enhance and sustain the social, economic and environmental conditions that improve communities. The program maintains a culture of diversity, equity and inclusion. The goals for the program are to:

1. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work
2. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development
3. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate
4. Address issues of historic and current inequity, social justice and sustainability in built environments, neighborhoods and communities

### Student learning outcomes

1. Students will acquire knowledge of planning and other related fields relevant to real-world and theoretical settings.
2. Students will be able to pose and solve urban planning problems using planning skills, including:
  - a. research methods,
  - b. plan creation and implementation,
  - c. public engagement, and
  - d. effective communication and leadership.
3. Students will understand how to use the values and ethics of professional planning to inform and guide planning decisions.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.U.R.P.	Fall	Apr 1 (Mar 1 for assistantship consideration or financial aid)	
	Spring	Oct 1	

## Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following specifications apply:

1. Students must have an undergraduate GPA of at least 2.7 (on a 4.0 scale).
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B.

3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the graduate certificates in Geographic Information Systems, Sustainability Planning or Urban Revitalization may be applied to meet the requirements of the Master of Urban and Regional Planning degree. However, successful completion of one of these certificate programs does not guarantee admission into the M.U.R.P. degree program.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

## Curriculum requirements

Course	Title	Hours
<b>Core courses</b>		
URSP 610	Introduction to Planning	3
URSP 622	Community Socioeconomic Analysis Using GIS	3

URSP 655	Environmental Policy and Planning	
URSP 658	Transportation Finance	
URSP 659	Transportation Project Development and Evaluation	
URSP 664	Urban Economic Development Policy	

URSP 666	Urban Commercial Revitalization
URSP 672	Food Systems, Rural Development and Landscape Conservation
URSP 681	International Urban Policy and Planning
URSP 691	Topics in Urban and Regional Planning
URSP 794	Planning Practicum Seminar
URSP 797	Directed Research

With the approval of the program chair, other appropriate graduate courses may be applied as electives.

**Concentrations**

If a student chooses to pursue a specific concentration, the concentration courses and corresponding credit hours will take the place of electives in the above list.

**Internship**

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

**Sample plan of study**

**Year one**

Semester 1		Hours

## Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in community revitalization

#### Program accreditation

Planning Accreditation Board

### Program goals

The Master of Urban and Regional Planning degree program advances social justice and quality of life through planning, designing and evaluating options to create, enhance and sustain the social, economic and environmental conditions that improve communities. The program maintains a culture of diversity, equity and inclusion. The goals for the program are to:

1. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work
2. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development
3. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate
4. Address issues of historic and current inequity, social justice and sustainability in built environments, neighborhoods and communities

### Student learning outcomes

1. Students will acquire knowledge of planning and other related fields relevant to real-world and theoretical settings.
2. Students will be able to pose and solve urban planning problems using planning skills, including:
  - a. Research methods
  - b. Plan creation and implementation

c. Public engagement

d. Effective communication and leadership

3. Students will understand how to use the values and ethics of professional planning to inform and guide planning decisions.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.U.R.P.	Fall	Apr 1 (Mar 1 for assistantship consideration or financial aid)	
	Spring	Oct 1	

## Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following specifications apply:

1. Students must have a minimum undergraduate GPA of 2.7 (on a 4.0 scale).
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the graduate certificates in Geographic Information Systems, Sustainability Planning or Urban Revitalization may be applied to meet the requirements of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours consist of concentration requirements and electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to

meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

## Curriculum requirements

Course	Title	Hours
<b>Core courses</b>		
URSP 610	Introduction to Planning	3
URSP 622	Community Socioeconomic Analysis Using GIS	3
URSP/GVPA/PADM/URSP 623	Research Methods for Government and Public Affairs	3
URSP/GVPA 632	Planning Theory and Processes	3
URSP 635	Legal and Legislative Foundations of Planning	3
URSP 662	Foundations for Development Planning	3
URSP 760	Capstone Proposal Development	3
URSP 761	Planning Studio	3
<b>Capstone</b>		
Select one of these two capstone options.		3 or 6
URSP 762	Professional Plan (3 credits)	
URSP 764	Thesis or Projects (6 credits)	
<b>Concentration requirements</b>		<b>12</b>
<b>Electives</b>		<b>6 or 9</b>
Total Hours		48

The minimum total of graduate credit hours required for this degree is 48.

### Community revitalization concentration (12 credits)

Course	Title	Hours
<b>Required concentration courses</b>		
URSP 664	Urban Economic Development Policy	3
URSP 666	Urban Commercial Revitalization	3
<b>Concentration electives</b>		
Select six credit hours from the following: <sup>1</sup>		6
FIRE 627	Real Estate Development	3
FIRE 629	Cases in Real Estate	3
FIRE 658	Real Estate Finance and Investments	3
PADM 609	Financial Management in Government	3
PADM 650	Principles of Nonprofit Management	3

URSP 691	Topics in Urban and Regional Planning	
URSP 794	Planning Practicum Seminar	
URSP 797	Directed Research	
Total Hours		

1

With the approval of the program chair, other appropriate courses may be applied as electives.

### Internship

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

URSP 626	Transportation Analytics and Modeling	
URSP 627	GIS Applications in Urban Design	
URSP 641	Citizen Participation and Negotiation	
URSP 643	Housing Policy	
URSP 659	Transportation Project Development and Evaluation	
URSP 664	Urban Economic Development Policy	
URSP 681	International Urban Policy and Planning	
URSP 691	Topics in Urban and Regional Planning <sup>2</sup>	

<sup>1</sup> With the approval of the program chair, other appropriate graduate courses may be applied toward the concentration.

<sup>2</sup> URSP 591 or URSP 691 may be selected when the topic is related to metropolitan planning.

**Electives**

Course	Title	Hours
Select six or nine credit hours (depending on selected capstone option) from the following: <sup>1</sup>		
URSP 502	Global Economic Change and Development	
URSP 517	Historic Preservation in Planning	
URSP 520	Park Planning	
URSP 521	Introduction to Geographic Information Systems	
URSP 523	GIS for Land Use and Transportation Planning	
URSP 525	Site Planning and Graphics	
URSP 541	Urban Public Policy-making Processes	
URSP 545	Sustainable Energy Policy and Planning	
URSP 561	Real Estate Development Finance for Planners	
URSP 567	The American Suburb	
URSP 591	Special Topics in Urban and Regional Studies and Planning	
URSP 605	Urban Planning History	
URSP 611	Principles of Urban Design	
URSP 621	Introduction to Geographic Information Systems	
URSP 625	Spatial Database Management and GIS Modeling	
URSP 626	Transportation Analytics and Modeling	
URSP 627	GIS Applications in Urban Design	
URSP/PADM 630	Strategic Planning and Management in the Public Sector	
URSP 637	Sustainable Community Development	
URSP 641	Citizen Participation and Negotiation	
URSP 643	Housing Policy	
URSP 647	Adaptive Reuse of Buildings	
URSP 650	Natural Resources and Environmental Planning	
URSP 652	Environmental Analysis	
URSP 653	Transportation Projects	
URSP/ENVS/BIOL 654	Environmental Remote Sensing	
URSP 655	Environmental Policy and Planning	
URSP 658	Transportation Finance	
URSP 659	Transportation Project Development and Evaluation	
URSP 664	Urban Economic Development Policy	
URSP 666	Urban Commercial Revitalization	
URSP 672	Food Systems, Rural Development and Landscape Conservation	
URSP 681	International Urban Policy and Planning	
URSP 691	Topics in Urban and Regional Planning	
URSP 794	Planning Practicum Seminar	
URSP 797	Directed Research	

With the approval of the program chair, other appropriate courses may be applied as electives.

### Internship

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

## Urban and Regional Planning, Master of (M.U.R.P.)/Juris Doctor (J.D.) with the University of Richmond [dual degree]

### Program accreditation

Planning Accreditation Board

A cooperative arrangement with the University of Richmond School of Law makes it possible for students to receive a law degree (J.D.) and an urban and regional planning degree (M.U.R.P.) in four years rather than the five years ordinarily required.

The purpose of the program is to integrate the two professional curricula and to provide the expertise necessary to apply legal analytical skills and planning methods and analysis to urban and regional policy issues and problems. The dual degree program is designed to equip graduates for a variety of professional positions, including staff for legislative committees and government agencies and commissions, government legal staff, private consulting, neighborhood advocacy, directorships of planning and related agencies and executive aides to elected officials.

Refer to individual program pages for admission requirements, application deadlines, program goals, student learning outcomes, degree requirements, curriculum requirements and graduation requirements specific to the separate programs and concentrations.

### Application process

Interested students must apply separately for and be admitted to the University of Richmond School of Law and the Master of Urban and Regional Planning program at VCU. Students will spend the entire

first year in either the University of Richmond School of Law or the L. Douglas Wilder School of Government and Public Affairs, and the second year in the program not selected the first year. Twelve credit hours of the planning program will be applied toward meeting the graduation requirements of the law school, and 12 credit hours in the law school will be applied toward meeting requirements of the M.U.R.P. program.

Upon admission to the dual degree program, every student will be assigned an adviser in each program who will assist in planning a course of study that will include all of the required courses in each program plus such elective courses that will best serve the interests of the individual student.

Students deciding not to complete the dual degree program must meet all of the regular requirements of either the J.D. or M.U.R.P. to receive the degree of their choice.

## Urban Revitalization, Certificate in (Post-baccalaureate graduate certificate)

### Program accreditation

Planning Accreditation Board

### Program goal

The Certificate in Urban Revitalization provides specialized training in the techniques and processes of city and neighborhood revitalization. Topics include adaptive reuse of buildings, historic preservation, real estate market analysis and the role of private-public partnerships in financing development projects. The certificate is useful for midcareer professionals who wish to learn new skills to expand their career options. It also is useful for recent college graduates who desire advanced training beyond the baccalaureate level and accelerated entry into the job market.

At any time, students in the certificate program may apply for admission into the Master of Urban and Regional Planning program and, if accepted, may transfer the certificate credits toward partial fulfillment of the master's degree requirements.

### Student learning outcomes

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.

2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

### Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the prerequisites and general criteria of eligibility for admission to the urban revitalization certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Urban Revitalization
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study
5. Demonstration of professional experience in planning or work related to the certificate program (The experience requirement may be waived for candidates who demonstrate professional promise.)

All courses in the graduate Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), the Certificate in Urban Revitalization program requires 18 graduate credit hours of course work, which blends instruction in planning, urban design, economics and finance.

### Curriculum requirements

Course	Title	Hours
Select six of the following:		18
FIRE 629	Cases in Real Estate <sup>1</sup>	
URSP 517	Historic Preservation in Planning	
URSP 610	Introduction to Planning	
URSP 611	Principles of Urban Design	
URSP 643	Housing Policy	
URSP 647	Adaptive Reuse of Buildings	
URSP 664	Urban Economic Development Policy	
URSP 666	Urban Commercial Revitalization	
URSP 691	Topics in Urban and Regional Planning (architectural analysis and historical preservation)	
URSP 691	Topics in Urban and Regional Planning (historical preservation application)	
Other elective, if approved by the program chair or certificate program coordinator		
Total Hours		18

<sup>1</sup>

Either URSP 647 or FIRE 629, but not both, may be applied toward the degree requirements.

**For students who wish to focus primarily on historic preservation 12 of the program's 18 hours should include:**

Course	Title	Hours
URSP 517	Historic Preservation in Planning	3
URSP 647	Adaptive Reuse of Buildings	3
URSP 691	Topics in Urban and Regional Planning (architectural analysis and historical preservation)	3

URSP 691	Topics in Urban and Regional Planning (historical preservation application)	3
Total Hours		12

**The minimum total of graduate credit hours required for this certificate is 18.**

# SCHOOL OF MEDICINE

---

The School of Medicine opened on Nov. 5, 1838, as the medical department of Hampden-Sydney College, and became the Medical College of Virginia in 1854. Full-time clinical faculty members were first appointed in 1928, and improved facilities became available between 1936 and 1941 with the completion of the 600-bed West Hospital, A.D. Williams Clinic and Hunton Hall dormitory, located on the current site of the Main Hospital building. Growth in faculty, students and facilities continued after World War II, leading to the development of today's academic health center.

Hospital facilities on the MCV Campus include both inpatient and outpatient facilities. MCV Hospitals of the VCU Health System is licensed for 902 beds. In addition, the hospital at the McGuire Veterans Affairs Medical Center (600 beds) provides excellent patient care, training and research opportunities for the School of Medicine through its affiliation programs.

In the School of Medicine, advanced degree programs are coordinated through the Office of the Associate Dean for Graduate Education, who acts for the dean of the School of Medicine on all issues related to administration of these programs. Each advanced degree program is represented by a graduate program director. Graduate program directors are appointed either by the chair of the department administering the program or, in the case of interdisciplinary programs, by the associate dean for graduate education in consultation with the chairs of participating departments. Graduate program directors administer all aspects of their programs and represent their programs within and outside of the School of Medicine.

## Administration

1201 East Marshall Street  
Box 980565  
Richmond, Virginia 23298-0565

American Board of Genetic Counseling

### **Medical physics**

Commission on Accreditation of Medical Physics Educational Programs

### **Medicine (M.D.)**

Liaison Committee on Medical Education

### **Public health (master's degree)**

Council on Education in Public Health

## **Mission statement**

The mission of the VCU School of Medicine is to provide pre-eminent education to physicians and scientists in order to improve the quality of health care for humanity. Through innovative, scholarly activity and a diverse educational context, the school seeks to create and apply new knowledge and to provide and continuously improve systems of medical and science education. Furthermore, the mission includes the development of more effective health care practices to address the needs of diverse populations and to provide distinguished leadership in the advancement of medicine and science.

The primary aim of the School of Medicine is to provide an academic environment appropriate for the education of its students, including undergraduate medical students, advanced-degree (graduate) students and graduate physician house officers, as well as continuing education directed toward the needs of practicing physicians. In the classroom, laboratory, clinic and hospital, the faculty and students are brought together in teaching-learning experiences that promote scientific scholarship and personal growth in knowledge and professional skills applicable to careers in a diverse workplace environment.

The School of Medicine and its faculty have vested responsibilities for the advancement of knowledge through research and for service to the community through application of skills in biomedical knowledge, health care leadership and patient care. Therefore, the school shares with teaching the interdependent and almost inseparable objectives of research and service.

The School of Medicine is located on the MCV Campus of VCU.

For comprehensive information on the School of Medicine departments, programs and faculty, please visit the school website (<http://www.medschool.vcu.edu>).

## **Faculty and facilities**

The School of Medicine consists of 700 full-time faculty, including affiliates, assisted by 630 residents and fellows and more than 700 clinical voluntary faculty. Programs of instruction and research are

conducted on campus, at the McGuire VA Medical Center and at affiliated hospitals in an effort to expose the students to the variety of clinical disorders encountered in the eastern U.S. The School of Medicine has established a geographically separate campus at the Inova Fairfax Hospital. Each year, 24 third-year students take all their clinical clerkships at Inova Fairfax Hospital. Their fourth year elective program also is based at the Inova Fairfax Hospital.

## **Health policies**

Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed prior to the third-year clerkships. For details related to these policies, please visit the school's website (<http://www.medschool.vcu.edu/>).

The School of Medicine requires that all students enrolled in the graduate academic programs administered by the school hold active health insurance coverage. This requirement applies to students at all degree categories: doctoral, master's and certificate. Compliance is monitored by administrative offices of the school and departments. Failure to comply with this requirement is grounds for dismissal.

## **Graduate programs**

The School of Medicine administers graduate programs leading to the:

- Doctor of Philosophy (Ph.D.) with degrees in biochemistry, biostatistics, human genetics, epidemiology, microbiology and immunology, healthcare policy and research, neuroscience, medical physics, pharmacology and toxicology, physiology and biophysics, and social and behavioral sciences
- Master of Science (M.S.) with degrees in addiction studies, anatomy and neurobiology, biochemistry, biostatistics, genetic counseling, human genetics, medical physics, microbiology and immunology, pharmacology and toxicology, physiology and biophysics and Master of Public Health (M.P.H.)
- Certificates in addiction studies (with intermediate and advanced concentrations), medical physics and pre-medical graduate health sciences

## **Other information**

Additional policies and guidelines for graduate programs in the School of Medicine are in other sections of this Bulletin and on the Graduate Student Resources (<https://medschool.vcu.edu/current-students/#den337656>) section of the School of Medicine Education (<https://medschool.vcu.edu/education/>) website.

## **Exceptions**

Exceptions to School of Medicine graduate program policies are rare, but a student may make a written request for such an exception to their current program director who will coordinate with the associate dean for graduate education and the School of Medicine Graduate Programs Committee to consider whether the exception is in the best interest of the student, the programs involved and all other programs within the School of Medicine.

## Application and admission to graduate programs

Applicants to graduate programs must submit all requested information in their application and be reviewed by their anticipated programs. To be admitted, an applicant must be approved by the program, the associate dean for graduate education and VCU Admissions. Although most programs will have additional and/or more specific admissions criteria, the minimum requirements for applicants admitted to advanced degree programs in the School of Medicine are:

- A bachelor's, master's or equivalent degree in a field relevant to their anticipated graduate program
- A minimum cumulative GPA of 3.0 (on a 4.0 scale) in their training leading to their prior degree(s)
- Communication skills deemed satisfactory by each program
- For applicants for whom English is not their native language or for whom the instruction for their prior academic degree was not in English, a TOEFL score of 100 or an IELTS score of 6.5
- Appropriate GRE or other test scores as determined by each program (if required)
- Appropriate experience as determined by each program

Applicants that withhold information about their prior training or provide misleading information will not be offered admission or will have their admission offer rescinded by the program, the associate dean for graduate education or VCU Admissions.

## Ph.D., master's and certificate programs

### General requirements for graduate degrees

A degree is earned only after payment of all tuition, fees and other charges to the university and after a student has fulfilled all requirements of the degree program including final submission of a successfully defended and approved dissertation, thesis, or summary of capstone or other final project (if required). Each graduate program in the School of Medicine has specific curricular requirements as described in other sections of the Bulletin.

### Expectations for graduate students

All graduate students are expected to:

- Exhibit professional behavior and treat all faculty members, staff and fellow students with honesty, dignity, respect and fairness
- Be fully committed to and give full effort on all aspects of their training
- Work with graduate program directors, counselors and advisers to enroll in appropriate course work for their programs and strive to achieve all training benchmarks
- Register for nine to 15 credits in the fall and spring semesters and at least three credits in the summer session (if required) to be considered full-time
- As required by their programs, identify (with guidance) and work collaboratively with advisers for thesis, dissertation, capstone and other projects
- Maintain satisfactory academic progress
- Reach out for guidance, advice and input from program directors, advisers and others when needed

- Participate when possible in the recruitment of future School of Medicine graduate students
- Follow other guidelines, policies and expectations described in the VCU Bulletin, on the School of Medicine website, in the School of Medicine Professionalism Committee guidelines, on the VCU Student Conduct and Academic Integrity website and in program materials

### Advisers for doctoral and master's students

A permanent adviser is required for students in all Ph.D. programs and for students in master's programs requiring a thesis. Other master's programs may also require a permanent adviser. Advisers play key roles in all aspects of graduate student training.

### Graduate advisory committees

Graduate advisory committees are required for students in all Ph.D. programs and students in master's programs requiring a thesis. Graduate advisory committees serve two inter-related roles. One role is to regularly assess each student to ensure they are meeting all training benchmarks. The other role is to guide, advise and support each student to facilitate their efficient progression toward degree completion.

### Comprehensive examinations and final defenses

Successful completion of comprehensive examinations and successful defenses of dissertations are required for all Ph.D. degrees. Successful defenses of theses are required for master's degrees in programs that require them. A student must be making satisfactory academic progress to undertake a comprehensive examination or final defense.

Comprehensive examinations and final defenses are conducted by a student's graduate advisory committee (or other committee as determined by the program). Comprehensive examinations and final defenses must be scheduled at a time during which all graduate advisory or other committee members are available to participate. If a single committee member cannot participate in a previously scheduled examination or defense, the meeting can occur if approved by the adviser and the graduate program director. If two or more committee members cannot participate in a previously scheduled examination or defense, the meeting must be rescheduled. A student may present and defend their work via video conference with prior approval of their graduate advisory committee and program director, in which case the student is responsible for organizing all aspects of the video conference.

A student must provide their graduate advisory or other committee with a draft of their research proposal, dissertation or thesis at least 10 working days prior to the scheduled comprehensive examination or final defense.

A comprehensive examination has written and oral components that focus on foundational information in the area of the anticipated degree and the proposed dissertation research project.

A final dissertation (Ph.D.) or thesis (master's) defense requires the student to present their dissertation or thesis research in a public seminar and then defend their dissertation or thesis to their graduate advisory committee. During the defense, the graduate advisory committee will determine if the student has:

- Demonstrated mastery of the general research area
- Demonstrated mastery of the background information for their dissertation or thesis project and their completed studies, including all major analyses and interpretations

- Performed with appropriate technical and other care all experiments required for their dissertation or thesis project
- Constructed a draft of the dissertation or thesis document that appears will be suitable after being revised in response to comments from the graduate advisory committee

Each graduate advisory committee member must vote to pass or fail the student before the comprehensive examination or final defense is adjourned. A student passes the examination or defense if there is no more than one vote of fail. A student fails the examination or defense if there are two or more votes of fail. A student may be allowed to retake an exam per the guidelines of their program and with approval of the School of Medicine Graduate Programs Committee.

A student who has passed their final defense should expect to revise their proposal, thesis or dissertation before receiving final approval from their graduate advisory committee. The student and the graduate advisory committee should identify a specific scope of work and a reasonable timeline for the revisions, and should work collaboratively and expeditiously to complete the revisions.

## Admission to candidacy

All doctoral students and students in master's programs requiring theses must be formally admitted to degree candidacy to continue in the program and complete the degree. Criteria for degree candidacy are determined by the Graduate School.

## Individual development plans

All doctoral students are required to formulate an individual development plan prior to their third year of training or by the semester after they pass their comprehensive examinations, whichever comes first. The individual development plan is an explicit statement of the student's immediate and longer-term career goals, as well as a plan for achieving those goals. Each student should develop their individual development plans with their adviser and – at their discretion – share their individual development plans with their graduate advisory committee and their graduate program. Each student should update their individual development plan at least annually. The format of the individual development plan is governed by a student's graduate program. Students are welcome to visit the American Association for the Advancement of Science myIDP (<https://myidp.sciencecareers.org/>) site as a starting point for developing their individual development plans.

Students in master's programs are strongly encouraged to formulate individual development plans.

## Directed research

All Ph.D. programs and all thesis master's programs require students to perform directed research under the guidance of an adviser and graduate advisory committee. The student's directed research efforts address their dissertation (Ph.D.) or thesis (master's) project. Directed research is a major component of all Ph.D. programs and all master's programs requiring a thesis. Students complete directed research in addition to didactic course work.

The scope, breadth and direction of the directed research project is established by the student's adviser, the student and the student's graduate advisory committee. Importantly, dissertation and thesis projects are original investigations and therefore it is difficult to precisely anticipate their duration or the time required to complete them.

## Doctoral dissertations and master's theses

Students in all Ph.D. programs and all master's programs requiring a thesis must perform directed research toward construction of dissertations or theses.

The School of Medicine has no specific formatting guidelines for dissertations and theses. Students and advisers should follow the guidelines (<https://graduate.vcu.edu/student/thesis/>) from the VCU Graduate School. In practice, advisers and students often also review several recently released dissertations or theses from students in the same graduate program (available in Scholars Compass (<https://scholarscompass.vcu.edu/etd/>)) to familiarize themselves with formatting conventions.

Students must coordinate with their advisers, graduate advisory committees and graduate program guidelines regarding the scope and content of their dissertations and theses. Program guidelines for scope and content of dissertations and theses supersede the guidelines below. If no program guidelines exist, dissertations and theses should at the minimum include the following sections in the indicated order:

- Title page
- Acknowledgements
- Table of contents
- List of tables
- List of figures
- List of abbreviations
- Statement of contributions
- Abstract
- Introduction chapter
- Methods, data or analysis chapter(s) including appropriate figures and tables
- Conclusions chapter
- References cited

Inclusion of short vitae for students or appendices for additional information such as protocols, small projects, etc. is optional.

Students can, with approval from their advisers and graduate advisory committees, modify the above to accommodate unique features of dissertation and thesis research projects.

## Satisfactory academic progress

All students are expected to maintain satisfactory academic progress. Satisfactory academic progress consists of

- Maintaining a cumulative graduate GPA  $\geq 3.0$
- Exclusively receiving final grades of A, B, C, P or S in all course work
- Securing a permanent adviser (if required by the program)
- Passing all comprehensive examinations, thesis and/or dissertation defenses attempted
- Meeting all program requirements in a timely fashion
- Following all VCU, Graduate School, School of Medicine and program guidelines

All students are reviewed twice annually by their graduate program. A student who is not making satisfactory academic progress can be considered for dismissal from their program.

## Change in degree program

Potential changes in the degree program for a student are governed by policies that are driven by the nature of the intended change:

1. A student completing a **certificate program** who wants to enroll in an M.S., Ph.D. or M.D. program within the VCU School of Medicine or the D.D.S. program in VCU's School of Dentistry must formally apply to that degree program. If accepted into the higher degree program, the student must complete the certificate program before matriculating in the higher degree program.
2. A student completing an **M.S. program** who wants to enroll in a Ph.D. or M.D. program within the VCU School of Medicine or the D.D.S. program in VCU's School of Dentistry must formally apply to the higher degree program. If accepted into that degree program, the student must complete the M.S. program before matriculating in the higher degree program.
3. A student in a **Ph.D. program** who wishes to move to a related M.S. program within the VCU School of Medicine may make a written request for this change to their current Ph.D. program director and to the program director of the master's program the student wishes to join. The program directors and the associate dean for graduate education will review the student's request and provide guidance for next steps. A formal application to the M.S. program may or may not be required.

Students who are not making satisfactory academic progress in one School of Medicine program are not eligible to enroll in another School of Medicine program until they have returned to satisfactory academic progress.

## Termination of enrollment and appeal

### Termination of enrollment

Students that are not making satisfactory academic progress or other reasons as stated in the School of Medicine student policies or the VCU Bulletin may be considered for dismissal by their program. Dismissed students will be notified in writing of the decision by their program director, the department chair, the associate dean for graduate education, the dean of the Graduate School or another VCU official.

### Appeal of termination

A student may appeal a decision to be dismissed from their program under the procedures below. Note that times to completion for all steps are based on normal VCU operations and therefore actual completion times may be different as the university responds to unanticipated circumstances. Also note that the student has the burden of proof in all appeals.

- The student must initiate the appeal at the program level within 10 business days of receiving the initial notice of dismissal.
- If the program declines the appeal, a student may, within 10 business days of being notified of the decision by the program, appeal the program's decision by submitting to the associate dean for graduate education in the School of Medicine a written notice (email preferred) outlining the rationale for the appeal along with all supporting documentation.
- Within 10 business days of receiving the appeal notice, the ADGE will convene an ad hoc committee composed of three School of Medicine faculty members who are outside of the student's program, were

not involved in the decision to dismiss and were not involved in the program-level appeal.

- The ad hoc committee will review the materials submitted by the student and may, at its discretion, ask the student to appear to clarify information in the submitted materials. The ad hoc committee will submit to the ADGE a written appraisal of the appeal within five business days of its formation, although more time will be allowed to accommodate an appearance by the student.
- The ADGE will review the ad hoc committee's appraisal, make a decision and communicate the decision to the student, the program director and the dean of the Graduate School within five business days.
- If the School of Medicine declines the appeal, a student may appeal the decision at the level of the Graduate School as described in the VCU Graduate Bulletin.

## School of Medicine Graduate Programs Committee

The Graduate Programs Committee serves as the deliberative body for all major changes to policies for graduate students and graduate faculty members, guidelines for graduate education, and graduate courses and curricula. More specifically, the Graduate Programs Committee is responsible for providing feedback and advice to the associate dean for graduate education on:

- Proposed alterations to existing and new processes in the Office for Graduate Education
- Proposed alterations to existing and new policies for graduate students and graduate faculty members
- Proposed alterations to existing and new graduate courses
- Proposed alterations to existing and new curricula
- Content and organization of graduate education websites
- Graduate education communication, advertising and promotion
- Graduate education priorities
- Major graduate student issues including dismissals, reassignments and requests for students to retake comprehensive exams and final defenses

Through the action of ad hoc subcommittees organized by the associate dean for graduate education, individual members might be called upon to take on more focused, short-term responsibilities related to the above or other topics that pertain to graduate education.

All graduate program and admissions directors and the assistant dean for graduate recruitment and admissions are members of the committee.

The committee meets monthly with the associate dean for graduate education. In all cases possible, the associate dean for graduate education and the committee approve requests or otherwise proceed by consensus. When a consensus cannot be reached, the associate dean for graduate education can call a formal advisory vote.

## School of Medicine Registrar

The School of Medicine houses a registrar's office to meet the needs of physician trainees and alumni. Visit the School of Medicine website (<http://www.medschool.vcu.edu/studentaffairs/registrar/>) for more information on the office.

VCU Records and Registration (<https://rar.vcu.edu/>) provides registrar services for all School of Medicine advanced (graduate) degree students.

## Criminal background checks

All applicants to the VCU School of Medicine who receive an acceptance will have a criminal background check performed by Certiphi Screening Inc. If there is a positive finding the applicant will be notified by Certiphi first; this will allow the applicant to make corrections to the report and verify the information. If there is no change in status Certiphi will then notify VCU of their positive findings. VCU's criminal background committee will meet to discuss the applicant's Certiphi report to determine if acceptance is to be withdrawn. The school encourages full disclosure at all times on the AMCAS and supplemental applications, as dishonesty will impact the committee's decision. If an applicant has a legal finding or institutional action against them after the supplemental application is submitted they should notify the school's admissions office immediately. Once an applicant is matriculated, full disclosure is also required throughout the student's time in medical school. Criminal background checks are repeated for all students at the end of the second year and for specific program participations throughout medical school.

## Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in advanced international addiction studies

VCU, King's College London and the University of Adelaide collaborate to offer a fully online Certificate in Addiction Studies available to students around the globe. No on-campus attendance is required, and students receive a degree from all three participating universities.

### Program mission

The mission of the addiction studies certificate with a concentration in advanced international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of both essential and advanced topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

### Program goals

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.

4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

## Student learning outcomes

1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 13	TOEFL

Prospective students should apply through the VCU graduate admissions portal at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>). Application to all three participating universities is accomplished through submission of the VCU graduate application. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must:

1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor's degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor's degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or a minimum grade of C in GCSE English.

Students who are enrolled in the Certificate in Addiction Studies intermediate concentration and are maintaining a minimum GPA of 3.0 may elect to change their concentration to the advanced concentration at any time during their enrollment with the permission of the program director. Students will be awarded only one certificate, however, which will reflect their highest level of attainment.

Students who have completed the Certificate in Addiction Studies intermediate concentration may also, after a period away from study, choose to apply for the advanced concentration addiction studies certificate. Students wishing to continue their studies through this mechanism may count the earlier courses toward the advanced concentration, as long as they meet all admission requirements of the Graduate School and pending surrender of the lower-level credential before being awarded the more-advanced credential. Courses taken more than four years prior to the time of the student's application will not be considered transferable and will need to be repeated.

Students completing either concentration in the Certificate in Addiction Studies may apply to the Master of Science in Addiction Studies program, also known as the International Programme in Addiction Studies and, if accepted, have their courses count toward that degree as long as they meet all admission requirements of the Graduate School. Courses taken more than four years prior to enrollment in the M.S. program will not be considered current and must be repeated.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete 24 credit hours in the six required graduate courses.

## Curriculum requirements

Course	Title	Hours
IPAS 600	The Biological Basis of Addiction	4
IPAS 601	Treatment of Addiction: Psychosocial Interventions	4
IPAS 602	Public Health Issues and Approaches to Addictions	4

IPAS 603	Addiction Policy	4
IPAS 604	Treatment of Addiction: Pharmacotherapies	4
IPAS 605	Treatment of Addiction: Critical Issues	4
Total Hours		24

**The minimum total of graduate credit hours required for this certificate is 24.**

## Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in intermediate international addiction studies

VCU, King's College London and the University of Adelaide collaborate to offer students the opportunity to complete a fully online program of study to obtain a Certificate in Addiction Studies conferred by all three universities.

### Program mission

The mission of the addiction studies certificate with a concentration in intermediate international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of essential topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

### Program goals

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

## Student learning outcomes

1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. ## Addiction Studies, Master of Science (M.S.)

VCU, King's College London and the University of Adelaide collaborate to offer students the opportunity to complete a fully online program of study to obtain a Master of Science in Addiction Studies conferred by all three universities.

### Program goal

The mission of the International Program in Addiction Studies leading to a Master of Science in Addiction Studies degree is to offer students cross-cultural exposure to the critical prevention, treatment, research and policy issues facing the field. Through a collaboration arrangement including VCU, King's College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain the degree. The program is designed to prepare students for local, national and international policy positions, prevention/treatment program management and other leadership positions in the addictions field. This program will speed the dissemination of the latest international addictions-related knowledge, especially to remote locations around the world, and help students compare international perspectives and translate this knowledge into more effective prevention and treatment practices and evidence-based policies within their own countries.

Students in the program will:

1. Demonstrate a detailed knowledge of the field of addiction science (including comparative international policies and practices) to prepare them for leadership roles in a variety of settings (including addiction research, policy and treatment venues).
2. Be able to synthesize and apply addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the advancement of addiction science.
3. Develop the ability to design, implement and interpret experimental approaches which address key questions in addiction science.
4. Communicate both core knowledge of addiction as well as experimental design, result and interpretation in a variety of formats.

### Student learning outcomes

1. Integrated knowledge of addiction science: The student will demonstrate an appropriate level of knowledge of the current elements of addiction science as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publication.
2. Problem-solving skills: Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in addiction research and practice, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

3. Research design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, develop and implement research studies.
4. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	TOEFL

Prospective students should apply through the VCU graduate admissions portal at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>). Application to all three participating

universities is accomplished through submission of the VCU graduate application. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must:

1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor's degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor's degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or minimum grade C in GCSE English.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete a minimum of 36 credit hours, which can be done either full time (12 months) or part time (24 months). Six of the required credit hours are assigned to a final research project examining a relevant addictions-related topic. VCU, King's College London and the University of Adelaide confer degrees jointly through a single diploma.

## Curriculum requirements

Course	Title	Hours
IPAS 600	The Biological Basis of Addiction	4
IPAS 601	Treatment of Addiction: Psychosocial Interventions	4
IPAS 602	Public Health Issues and Approaches to Addictions	4
IPAS 603	Addiction Policy	4
IPAS 604	Treatment of Addiction: Pharmacotherapies	4
IPAS 605	Treatment of Addiction: Critical Issues	4
IPAS 606	Research Methodology in Addictions	6
IPAS 692	Research Project in Addictions	6
Total Hours		36

# Anatomy and Neurobiology, Master of Science (M.S.)

## Program mission

The M.S. in Anatomy and Neurobiology program offers a two-year graduate curriculum of formal instructional activities and research training mentored by the members of the faculty leading to the terminal M.S. degree. The program prepares students for technical careers in neurobiological research laboratories in academic, private and government institutions. The program also provides a strong foundation for students who choose to continue onto doctoral training.

This is a research-oriented degree program comprised of graduate course work and supervised research leading to a master's thesis. The M.S. program involves approximately one year of course work and a research thesis performed under the supervision of a faculty adviser.

## Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers, trainers and technicians in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
2. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences. The program will prepare students to secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

## Student learning outcomes

1. **Experimental design:** Students will demonstrate an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
2. **Communication skills:** Students will demonstrate an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids. Students will also demonstrate an appropriate level of written communication skills with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
3. **Problem-solving skills:** Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in anatomy and neurobiology research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.
4. **General knowledge of anatomy and neurobiology:** Students will demonstrate an appropriate level of knowledge of the current elements of anatomy and neurobiology as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with

the research literature and the ability to evaluate and critique publications.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Applications received by Jul 1 given priority consideration	GRE, MCAT or DAT TOEFL if international
	Summer	Applications received by Jan 1 given priority consideration	

## Special requirements

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.2
2. Combined GRE scores of at least 300 for the verbal plus quantitative (1200 based on the previous scale) and 4.0 analytical score
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT), or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and upper-level courses in molecular and cellular biology are desirable. Previous research experience or demonstration of a serious interest in a research-oriented career is also desirable. A personal statement describing the applicant's research experience and interests, as well as letters of reference from previous supervisors, are necessary and helpful in determining an applicant's suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 66 graduate credit hours. A minimum cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses.

A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

There is no expectation of the time required to complete the master's degree; usually two years of study are necessary to complete the requirements. At the appropriate time in their research, students will prepare a thesis and schedule a final oral defense of the thesis. The final oral examination (defense of the thesis) will cover the subject of the candidate's dissertation and related basic science course work.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
ANAT 610	Systems Neuroscience	4

ANAT 690	Anatomy and Neurobiology Seminar (minimum four semesters)	4
BIOC 503	Biochemistry, Cell and Molecular Biology	5
BIOC 504	Biochemistry, Cell and Molecular Biology	5
IBMS 600	Laboratory Safety	1
NEUS 609	Cellular and Molecular Neuroscience	4
<b>Required additional courses</b>		
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	
<b>Thesis research</b>		
ANAT 697	Directed Research	42
Total Hours		66

The minimum total of graduate credit hours required for this degree is 66.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Biochemistry, Doctor of Philosophy (Ph.D.)

### Program goal

The Ph.D. program in biochemistry prepares students for research-oriented careers as independent scientists in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs

and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.
5. General knowledge of science: The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	

## Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
3. A personal statement that includes: long-term career goals to assess reasons behind the application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant
5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to the Ph.D. program and forego the Master's (M.S.) degree. However, applicants who are unsure if they want to earn a Ph.D. and desire experience in biomedical research before making this decision will be well-served by the M.S. program. Outstanding performance in the M.S. program can help students gain admittance to a doctoral program at VCU or elsewhere.

Master's students who wish to gain admission to the Ph.D. program should apply directly to the Biomedical Sciences Doctoral Portal and/or the Biochemistry Ph.D. program. Current M.S. students that are successful applicants to the Ph.D. program typically have final grades in the top 50% in BIOC 503 and BIOC and have earned grades of A in BIOC 505 and BIOC 661.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 60 graduate credit hours.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories.

## Training in the responsible conduct of research

All Ph.D. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: [research.vcu.edu/human\\_research/](https://research.vcu.edu/human_research/)

citi\_requirements.htm ([http://www.research.vcu.edu/human\\_research/citi\\_requirements.htm](http://www.research.vcu.edu/human_research/citi_requirements.htm))

- Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Access and guidance for the course is available through the "Animal Research" link on the Office of Research and Innovation website (<https://research.vcu.edu/>).

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
ANAT 620	Scientific Grantsmanship	2
BIOC 503	Biochemistry, Cell and Molecular Biology	5
BIOC 504	Biochemistry, Cell and Molecular Biology	5
BIOC 651	Biochemistry Journal Club (one-credit course taken at least four times)	4
BIOC 661	Critical Thinking (one-credit course repeated for two credits)	2
BIOC 690	Biochemistry Seminar (one-credit course taken at least four times)	4
BIOC 695	Biochemistry Student Seminar	1
IBMS 600	Laboratory Safety	1
IBMS 620	Laboratory/Clinical Rotations (repeat for six credits)	6
IBMS 635	Cellular Signalling	3
<b>Required additional courses</b>		
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	
<b>Elective courses</b>		
Take at least two courses for four credits total from the following:		4
ANAT 615	Techniques in Neuroscience and Cell Biology	
BIOC 601	Membranes and Lipids	
BIOC 605	Molecular Biology	
HGEN 501	Introduction to Human Genetics	
MICR 505	Immunobiology	
MICR 605	Prokaryotic Molecular Genetics	
MICR 607	Techniques in Molecular Biology and Genetics	
MICR 653	Advanced Molecular Genetics: Bioinformatics	
PHTX 691	Special Topics in Pharmacology	
<b>Dissertation research</b>		
BIOC 697	Directed Research in Biochemistry (taken each semester)	22
Total Hours		60

The minimum total of graduate credit hours required for this degree is 60.

## Typical plan of study

Many students often take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

## Biochemistry, Master of Science (M.S.)

### Program goal

The M.S. program in biochemistry prepares students for research-oriented careers in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

- Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
- Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.
- Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication

skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.

4. General knowledge of science: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.
5. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Summer or fall preferred	Applications accepted through DAT June; priority given to early applications	GRE, MCAT or

## Special requirements

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

Applicants to the Master of Science in Biochemistry program must meet all general admission requirements of the VCU Graduate School (p. 34). In addition, applicants must meet the following requirements.

1. Organic chemistry (with a minimum grade of B)
2. Undergraduate biochemistry (not required but recommended)
3. Laboratory experience
4. GRE scores of at least 158 (verbal), 158 (quantitative) and 4.0 analytical

### Continuing for the Ph.D.

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply via the Biomedical Sciences Doctoral Portal (<https://medschool.vcu.edu/education/bsdpp/>). Applicants who are unsure if they want to earn a Ph.D. and who wish to gain experience in biomedical research before making this decision will be well-served by this M.S. program. Outstanding performance in the program can help students gain admittance to a doctoral program at VCU or elsewhere.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the M.S. in Biochemistry program must complete a minimum of 30 credit hours, including at least 24 didactic credits hours (exclusive of research credit hours).

Students in the M.S. program in biochemistry take courses designed for graduate students with an emphasis on research design and experimentation. During the first year of study, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose

a faculty adviser and begin thesis research. Following completion of the research project and defense of the master's thesis, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, see the departmental website (<https://biochemistry.vcu.edu/Education/masters.html>).

M.S. students register for BIOC 651 and BIOC 690 for the duration of their tenure in the program. The core set of courses may be supplemented with elective courses offered by the Department of Biochemistry and Molecular Biology or other departments. Students are encouraged to take additional courses that relate to their personal projects. Electives may include courses in techniques in molecular biology and genetics, bioinformatics, statistics, immunology, microbiology, molecular genetics, mammalian physiology and advanced organic and physical chemistry, among others.

### Training in the responsible conduct of research

All M.S. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. See the CITI requirements and access the course ([https://research.vcu.edu/human\\_research/citi\\_requirements.htm](https://research.vcu.edu/human_research/citi_requirements.htm)) on the Office of Innovation and Research website.
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Access and guidance for the course is available through the "Animal Research" link on the **Office of Research and Innovation website**.

### Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOC 503	Biochemistry, Cell and Molecular Biology	5
BIOC 504	Biochemistry, Cell and Molecular Biology	5
BIOC 651	Biochemistry Journal Club <sup>1</sup>	1
BIOC 661	Critical Thinking (one-credit course repeated for two credits)	2
BIOC 690	Biochemistry Seminar <sup>1</sup>	1
IBMS 600	Laboratory Safety	1
IBMS 635	Cellular Signalling	3
<b>Required additional courses</b>		
BIOC 505	Experimental Biochemistry (research rotation, typically taken in year one)	2
or BIOC 697	Directed Research in Biochemistry	
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	

<b>Elective courses</b> <sup>2</sup>		<b>3</b>
ANAT 615	Techniques in Neuroscience and Cell Biology	
BIOC 601	Membranes and Lipids	
HGEN 501	Introduction to Human Genetics	
MICR 505	Immunobiology	
MICR 605	Prokaryotic Molecular Genetics	
MICR/BNFO 653	Advanced Molecular Genetics: Bioinformatics	
PHTX 691	Special Topics in Pharmacology	
<b>Thesis research</b>		
BIOC 697	Directed Research in Biochemistry (variable credit course; six credits minimum)	6
<b>Total Hours</b>		<b>30</b>

1

Taken each fall and spring semester throughout the program; minimum of one credit for each course.

2

Electives are suggested, but not required. Additional credits may be taken in BIOC 651 and/or BIOC 690 to reach 30-credit minimum program requirement.

**The minimum total of graduate credit hours required for this degree is 30.**

### Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Biostatistics, Doctor of Philosophy (Ph.D.)

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

## Student learning outcomes

This training program is designed to help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical concepts, ideas and methods, to which the candidate will contribute by developing new (or extending existing) biostatistical methods through scholarly peer-reviewed publications.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical and health science researchers, specifically with respect to planning and designing research studies and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 310, STAT 309 and STAT 212. MATH 507 and an additional graduate-level math analysis course are recommended for students interested in completing the Ph.D. program.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), Ph.D. students must complete a minimum total of 78 credit hours (59 didactic hours, plus eight hours each of seminar and consulting, and at least three credit hours of research). More specifically, required courses include BIOS 513, BIOS 514, BIOS 524, BIOS 601, BIOS 602, BIOS 606, BIOS 615, BIOS 631, BIOS 647, BIOS 653, BIOS 654 and one of OVPR 601, OVPR 602 or OVPR 603. Students must take at least 18 credits of additional BIOS, STAT or MATH courses, with at least two being BIOS courses and at least two being at the 600 level, and one graduate-level non-BIOS, STAT or MATH course. Ph.D. students must also take eight semesters each of BIOS 603 and BIOS 690. In addition, Ph.D. students will participate in the summer student training program at least twice and present at the Biostatistics Student Research Symposium each fall.

## Qualifying exam

Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) covers material from the following first-year courses: BIOS 513, BIOS 514, BIOS 653 and BIOS 654. Part B

(the applied examination) covers material from the following first-year courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

## Dissertation proposal defense

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for an M.S. degree.

## Admission to candidacy

A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

## Dissertation

A comprehensive dissertation reporting the results of original research is required for the Ph.D. degree.

## Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student's committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS/STAT 513	Mathematical Statistics I	3
BIOS/STAT 514	Mathematical Statistics II	3
BIOS 524	Biostatistical Computing	3
BIOS 601	Analysis of Biomedical Data I	3
BIOS 602	Analysis of Biomedical Data II	3
BIOS 603	Biostatistical Consulting (1 credit course taken 8 semesters)	8
BIOS 606	Clinical Trials	3
BIOS 615	Advanced Inference	4
BIOS 647	Survival Analysis	3

BIOS 653	Biostatistical Methods I	4
BIOS 654	Biostatistical Methods II	4
BIOS 690	Biostatistical Research Seminar (1 credit course taken 8 semesters)	8

### Required additional courses

BIOS 631	Mixed Models and Longitudinal Data Analysis	4
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	

Select one additional 600-level course (non-BIOS, non-STAT or non-MATH) with approval of program director. Suggested courses topics include:

Epidemiology and community health (EPID)	
Social and behavioral health (SBHD)	
Health care policy and research (HCPR)	
Bioinformatics (BNFO)	

### Elective courses

At least 18 credits must come from the courses listed below (at least two must be BIOS courses; at least two must be at the 600-level) or others selected with approval of program director.

BIOS 535	Behavioral Measurement
BIOS 549	Spatial Data Analysis
BIOS 632	Multivariate Analysis
BIOS 635	Structural Equation Modeling
BIOS 649	Advanced Spatial Data Analysis
BIOS 658	Statistical Methods for High-throughput Genomics Data I
BIOS 667	Statistical Learning and Data Mining
BIOS 668	Statistical Methods for High-throughput Genomic Data II
BIOS 688	Applied Bayesian Biostatistics
BIOS 691	Special Topics in Biostatistics
MATH 640	Mathematical Biology I
STAT 613	Stochastic Processes
STAT 614	Stochastic Processes
STAT/OPER 636	Machine Learning Algorithms
STAT 642	Design and Analysis of Experiments I
STAT 645	Bayesian Decision Theory
STAT 675	Time Series Analysis I

### Dissertation research

BIOS 697	Directed Research in Biostatistics	3
----------	------------------------------------	---

Total Hours 78

**The minimum total of graduate credit hours required for this degree is 78.**

## Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

### Student learning outcomes

This training program is designed to help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical and genomics concepts, ideas and methods, to which the candidate will contribute by developing new (or extending existing) biostatistical and genomics methods through scholarly peer-reviewed publications.
2. The successful candidate will demonstrate the ability to effectively collaborate with biostatistical, genomics and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical and genomics concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for

admission: MATH 307, MATH 310, STAT 309 and STAT 212. MATH 507 and an additional graduate-level math analysis course are recommended for students interested in completing the Ph.D. program.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), Ph.D. students in the genomic biostatistics concentration will complete a minimum of 78 graduate credit hours (59 didactic credit hours plus eight hours each of consulting and seminar, and at least three credit hours of research). More specifically, required courses include: BIOS 513, BIOS 514, BIOS 524, BIOS 601, BIOS 602, BIOS 606, BIOS 615, BIOS 632, BIOS 647, BIOS 653, BIOS 654, BIOS 658, BIOS 668, BNFO 540 (or BIOL 540) and one of OVPR 601, OVPR 602 or OVPR 603. In addition, students will take one of BIOS 667 or BIOS 691, and at least nine credits of other graduate-level BIOS, STAT, MATH or BNFO courses. Ph.D. students must take eight semesters each of BIOS 603 and BIOS 690. Ph.D. students will also participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.

## Qualifying exam

Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) covers material from the following first-year courses: BIOS 513, BIOS 514, BIOS 653 and BIOS 654. Part B (the applied examination) covers material from the following first-year courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

## Dissertation proposal defense

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for an M.S. degree.

## Admission to candidacy

A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

## Dissertation

A comprehensive dissertation reporting the results of original research related to genomics topics is required for the Ph.D. with a concentration in genomic biostatistics. It is expected that the dissertation will make use of some high-throughput genomic technology as an application for the methodological development.

## Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student's committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS/STAT 513	Mathematical Statistics I	3
BIOS/STAT 514	Mathematical Statistics II	3
BIOS 524	Biostatistical Computing	3

STAT 675	Time Series Analysis I	

**Dissertation research**

BIOS 697	Directed Research in Biostatistics	4
Total Hours		78

1

Or other course with program approval.

**The minimum total of graduate credit hours required for this degree is 78.**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Biostatistics, Master of Science (M.S.)

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

## Student learning outcomes

This training program is designed to be completed in 18 months (four semesters: fall, spring, summer, fall) and will help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical concepts, ideas and methodologies.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computation and analytic procedures, and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

Course	Title	Hours
MATH 307	Multivariate Calculus	4
MATH 310	Linear Algebra	3
STAT 212	Concepts of Statistics	3
STAT 309	Introduction to Probability Theory	3

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), M.S. students must complete a minimum total of 42 graduate credit hours of course work. Students are required to take BIOS 512 or BIOS 513, BIOS 524, BIOS 601, BIOS 602, BIOS 606, BIOS 653, BIOS 654 and OVPR 601, and four other 500- or 600-level BIOS, STAT, MATH or BNFO courses. M.S. students must take four credit hours of BIOS 603 and two credit hours of BIOS 690. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take both BIOS 513 and BIOS 514, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium.

## Qualifying exam

Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. This applied examination covers material from the following first-year courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606. This examination is graded as pass or fail. A student must pass the qualifying examination at the M.S. level to continue in the M.S. program. A student who does not pass the qualifying examination at the M.S. level will have one opportunity to retake that part of the qualifying examination. Students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to also take the theoretical component of the qualifying examination covering material from the following first-year courses: BIOS 513, BIOS 514, BIOS 653 and BIOS 654. These students must pass both the

applied and theoretical qualifying examinations at the Ph.D. level in order to be considered in the Ph.D. program.

## Thesis

There is no thesis requirement for the M.S. program.

## Course requirements

## Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

### Student learning outcomes

1. Experimental design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
2. Integrated knowledge of statistics and bioscience: Students will demonstrate an appropriate level of knowledge of the current elements of statistics as related to bioscience and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Oral communication skills: Students will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
4. Problem-solving skills: Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to

effectively present information including the use of figures, tables and citations as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), students applying to the clinical research and biostatistics concentration must hold the M.D., D.D.S., Ph.D., D.P.H., D.O., Pharm.D. or an equivalent health professional terminal degree from an accredited

college or university. Applicants with international M.D. degrees are considered on an individual basis. The applicant must have a minimum undergraduate GPA of 3.00. Applicants must also submit a letter detailing career goals and how the M.S. in Biostatistics with a concentration in clinical research and biostatistics applies to those goals, as well as at least three letters of recommendation.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), M.S. in Biostatistics, clinical research and biostatistics concentration students must complete a minimum total of 34 graduate credit hours. This includes 17 credit hours of core course work, 12 credit hours of elective courses and at least five credit hours of directed independent research.

Students in the clinical research and biostatistics concentration must complete a research project, culminating in an academic manuscript submitted for publication. A research advisory committee must be formed to direct the student's research project. The research advisory committee must consist of two clinicians familiar with the student's area of research and a faculty member of the Department of Biostatistics. The student is primarily responsible for the conceptualization, design, conduct, analysis and interpretation of the research project.

## Final examination

Clinical research and biostatistics concentration students do not defend their research projects at a final oral examination.

## Clinical Genetics, Certificate in (Graduate certificate)

The Certificate in Clinical Genetics will train graduate students in the principles of inheritance, the basis of inheritance, how inheritance

influences risk in human disease, and the technology and methods involved in testing for genetic disorders. Students who complete the certificate will be able to apply this knowledge to understand genetic conditions and the role of genetic professionals in the clinical setting, as well as calculate risk for genetic disorders. Graduates will be competitive applying for jobs, such as genetic counseling assistants, or in seeking promotions within their fields, such as nursing or technicians employed in genetic diagnostic laboratories. These graduates will also be more competitive in applying for professional training such as genetic counseling master's programs or clinical diagnostic fellowships.

## Program goals

The goal of the graduate certificate program in clinical genetics is to introduce students to human genetics concepts and its methodologies, understand the roles of genetic professionals in the clinic and gain an understanding of genetic conditions and the current genetic testing methodologies.

## Student learning outcomes

1. Knowledge of human genetics: Certificate candidates will demonstrate the appropriate knowledge of human genetics including patterns of inheritance, risk analysis, the molecular basis of inheritance and methods to study human genetics.
2. Knowledge of clinical genetics: Certificate candidates will demonstrate the appropriate knowledge of genetic conditions and the varying roles of genetics professionals in clinical and laboratory genetics.
3. Knowledge of genetic diagnostics: Certificate candidates will demonstrate the appropriate knowledge of current methodologies in genetic diagnostics for specific genetic conditions.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	May 30	TOEFL or IELTS required for non-native English speakers

The admission requirements outlined below will apply to all students. All applicants to the graduate certificate program are required to meet the admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>). Applicants will be required to submit the following materials to the Graduate School admissions office:

- An earned undergraduate degree related to genetics, biology or psychology
- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official undergraduate transcripts from all schools attended
- A statement of purpose outlining career goals and previous experience

A maximum of three equivalent, graduate-level transfer credit hours at the 500-level or higher may count toward the certificate. The transfer credits are evaluated on a case-by-case basis to determine course equivalency. Credits from a degree already awarded cannot be applied toward the certificate.

International students will submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program.

Non-native English speakers will provide evidence of proficiency in English by one of the following:

- A Test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or 600 for the paper-based score
- An International English Language Testing Systems minimum score of 6.5 on the academic exam
- A passing score on the VCU English Language Program compression test

The curriculum will prepare students to have a solid understanding of inheritance and the basis of inheritance as it applies to human and clinical genetics. Students will also gain an understanding of genetic conditions, modern diagnostic methodologies and their application, as well as the roles of genetic professionals in the clinic. Graduates will be prepared to work in clinical settings and genetics testing laboratories,

including academic institutions, research institutions, hospitals and private diagnostic companies.

Department of Human and Molecular Genetics  
heather.creswick@vcuhealth.org

## Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics

### Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

### Student learning outcomes

This training program is designed to be completed in 18 months (four semesters: fall, spring, summer, fall) and will help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical and genomics concepts, ideas and methods.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical, genomics and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures, and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical and genomics concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>).

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall preferred	Applications received prior to Jan 15 given priority consideration	GRE

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

Course	Title	Hours
MATH 307	Multivariate Calculus	4
MATH 310	Linear Algebra	3
STAT 212	Concepts of Statistics	3
STAT 309	Introduction to Probability Theory	3

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

### Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), M.S. students will complete a minimum total of 42 credit hours of course work. Required courses include BIOS 512 or BIOS 513, BIOS 524, BIOS 601, BIOS 602, BIOS 606, BIOS 653, BIOS 654, BIOS 658, OVPR 601, BIOL 540 or BNFO 540, at least one of BIOS 632, BIOS 667, BIOS 668 and BIOS 691 (the latter when the topic is systems biology or statistical genetics/genetic epidemiology), and one other 500- or 600-level BIOS, STAT, MATH or BNFO course. M.S. students must take four credit hours of BIOS 603 and two credit hours of BIOS 690. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take both BIOS 513 and BIOS 514, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium.

### Qualifying exam

Students pursuing the M.S. degree must pass a qualifying examination administered after completion of their first-year courses. This applied examination covers material from the following first-year courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606. This examination is graded as pass or fail. A student must pass the qualifying examination at the M.S. level to continue in the M.S. program. A student who does not pass the qualifying examination at the M.S. level will have one opportunity to retake the examination. Students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to also take the theoretical component of the qualifying examination covering material from the following first-year courses: BIOS 513, BIOS 514, BIOS 653 and BIOS 654. These students must pass both the applied and theoretical qualifying examinations at the Ph.D. level in order to be considered in the Ph.D. program.

### Thesis

There is no thesis requirement in the M.S. program.

### Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS 516	Biostatistical Consulting (one-credit course taken four semesters)	4
BIOS 524	Biostatistical Computing	3
BIOS 601	Analysis of Biomedical Data I	3
BIOS 602	Analysis of Biomedical Data II	3
BIOS 606	Clinical Trials	3
BIOS 653	Biostatistical Methods I	4
BIOS 654	Biostatistical Methods II	4

BIOS 690	Biostatistical Research Seminar (one-credit course taken two semesters)	2
OVPR 601	Scientific Integrity	1
<b>Required additional courses</b>		
BIOL/BNFO 540	Fundamentals of Molecular Genetics (or other relevant course)	3
BIOS 512 or BIOS 513	Basic Mathematical Statistics Mathematical Statistics I	3
BIOS 658	Statistical Methods for High-throughput Genomics Data I	3
<b>Elective courses</b>		
Select one of the following:		3
BIOS 632	Multivariate Analysis	
BIOS 667	Statistical Learning and Data Mining	
BIOS 668	Statistical Methods for High-throughput Genomic Data II	
BIOS 691	Special Topics in Biostatistics (systems biology or genetic epidemiology)	
Select at least one 500- or 600-level course (minimum three credits), which may be selected from the following list or another course with program director approval.		3
BIOS 535	Behavioral Measurement	
BIOS 549	Spatial Data Analysis	
BIOS 615	Advanced Inference	
BIOS 631	Mixed Models and Longitudinal Data Analysis	
BIOS 635	Structural Equation Modeling	
BIOS 647	Survival Analysis	
BIOS 649	Advanced Spatial Data Analysis	
BIOS 688	Applied Bayesian Biostatistics	
STAT 613	Stochastic Processes	
STAT 614	Stochastic Processes	
STAT 625	Applied Multivariate Analysis	
Total Hours		42

The minimum total of graduate credit hours required for this degree is 42.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Epidemiology, Doctor of Philosophy (Ph.D.)

### Program mission

The mission of the Ph.D. program in epidemiology is to educate and train students to become independent, competent and self-directed research scientists so they can conduct outstanding clinical and population-based research. Students will learn methods for studying disease etiology and prevention in populations and evaluating interventions, diagnostic tests and treatment efficacy; they will implement such methods in an independent research study under the mentorship of an experienced epidemiology researcher.

### Program goals

1. **Critical foundation skills:** The program is designed to provide students with the critical skills required to advance to positions as epidemiological researchers/trainers in a broad spectrum of positions.
2. **Mastery and application of science:** The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of epidemiology and ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. **Communication:** Students will develop skills in the various means of communicating both the core of epidemiological knowledge and the expression of epidemiological methodology, research design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

Students in the doctoral program in epidemiology will develop competencies in the following areas, as described below.

1. **Integrated knowledge of epidemiology:** Students will demonstrate an appropriate level of knowledge of theories of disease causation as well as bias in epidemiologic research and demonstrate in-depth understanding of one or more substantive theories related to research. Students will be able to appropriately link theoretical frameworks to the design, conduct and interpretation of epidemiologic research and demonstrate familiarity with the research literature and the ability to evaluate and critique publications appropriate to an independent research scientist.
2. **Problem-solving skills:** Students will be able to appropriately apply epidemiologic and statistical methods for research needs, demonstrating proficiency in selecting the appropriate measures of association for the research at hand and correctly implementing analytic techniques, including addressing issues such as confounding and effect modification. Students will be able to evaluate and interpret results, explaining relationships between determinant(s) and outcome(s) under study.
3. **Research design:** Students will construct and develop novel epidemiologic research questions, demonstrating proficiency in selecting the most appropriate study designs such that bias is minimized and efficiency maximized. Students will understand the required elements to estimate sample size, know how to identify and

minimize bias and confounders through study design and analysis, and demonstrate knowledge of the impact of measurement issues on study validity.

4. **Written communication skills:** Students will demonstrate proficiency in scientific writing, including manuscript development, grant writing and writing for multiple audiences, including lay audiences and policy-makers. Students will demonstrate an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations.
5. **Oral communication skills:** Students will demonstrate effective oral communication skills across disciplines, framing questions appropriately and implementing active listening skills in delivering oral presentations to professional audiences, lecturing to students or leading discussions. Students will appropriately use audio/visual technologies to develop effective presentations with respect to content, organization and appropriate use of language.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online** at [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Feb 1 (application strongly encouraged by this date)	GRE, TOEFL/IELTS

## Special requirements

- Applicants must hold a master's degree, preferably in public health or a related field, and provide test scores as detailed below. Applicants must provide all required materials as described herein and in the VCU Admissions graduate application checklist.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must meet the following minimum qualifications.

1. **Prior degree:** Master's degree in public health (M.P.H.) or equivalent M.S. degree, (e.g., sociology, biology, mathematics) with a minimum GPA of 3.0
2. **GRE:** Current GRE test results (taken within the past five years) with scores at or above the 75th percentile preferred in all components of the exam (e.g., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing)
3. **TOEFL:** For non-native speakers of English, recommended minimum scores of either 100iBT, 600 PBT or IELTS scores of 6.5 (academic band score)
4. **Personal statement:** Applicants must include a personal statement that indicates their reasons for pursuing a doctoral degree in epidemiology, their particular areas of research focus or study, the departmental faculty advisers with whom the students would prefer to work, and career goals upon graduation.
5. **Reference letters:** Students must submit three letters of recommendation from three individuals who can assess the applicant's qualifications for graduate school. Letters from past professors or faculty advisers are most appropriate.
6. **Current CV or resume:** Students must submit a current CV or resume.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students will be required to complete a minimum of 61 graduate credit hours as follows:

1. Four core courses focusing on epidemiological methods (12 credit hours)
2. Two core courses focusing on biostatistical theory and methods (six credit hours)
3. Four semesters of journal club (four credit hours)
4. Three courses of methodological electives (nine credit hours)
5. Three courses of substantive area electives, with at least one relating to the biological processes associated with the student's chosen substantive area (nine credit hours)
6. A minimum of two credit hours of practical research skills development
7. At least one course in the responsible conduct of research (one credit hour)
8. At least 18 credit hours of directed dissertation research

Students will also be required to complete the following:

## Practical experience

1. Assistantship: All doctoral students are required to work an average of 20 hours per week under the direction of their adviser as part of experiential program training. This 20-hour-per-week requirement is met by work in a research assistantship and at least one semester of a teaching assistantship.
  - a. Research assistantship: Research program support exposes students to a variety of aspects of developing and implementing research plans and programs. Work includes drafting manuscripts or preparing presentations for refereed conferences, conducting research activities in the community, traveling to attend research team meetings, or regular work with research team members.
  - b. Teaching assistantship: All doctoral students are required to serve as teaching assistants for at least one semester before graduation. The student and her/his adviser discuss and select the course that is best-suited for the teaching assistantship. During the semester(s) when students engage in the teaching assistantship, teaching hours count toward the experiential training requirement and are combined with research hours to meet the expected 20-hour-per-week training time.
2. Seminar attendance: All students are expected to attend all doctoral level Division of Epidemiology seminars during their tenure in the program. These seminars are generally held every other week during fall and spring semesters. In addition, students must attend any special public health seminars offered collaboratively by the public health departments. These special seminars may occur one to two times each semester.
3. Grant application submission: All students are expected to submit at least one grant application related to their dissertation to a federal agency or nongovernmental organization (according to student eligibility) to gain grantsmanship experience. The adviser guides the student on the timing for submission of this grant application and the appropriate funding organization or agency.

## Comprehensive examinations

Comprehensive examinations include a written examination and an oral candidacy examination. The written examination assesses knowledge of completed didactic course work on core epidemiological and biostatistical methods as well as a tailored substantive section based on the student's research focus. The oral candidacy examination is based upon the student's dissertation proposal, which consists of three proposed research projects.

### Written comprehensive examination

Students are expected to take the written comprehensive examination after completing all didactic program courses (typically the program core, a practical research skills course, a responsible conduct of research course and 18 credits of elective course work). Program expectation for satisfactory academic progress is that students complete the written comprehensive examination by the end of the second academic year (i.e., no later than the end of the second summer semester). Exceptions beyond this time limit must be approved by the student's adviser and the graduate program director based on the student's submission of a written explanation for the delay in progress. This written explanation must include a plan of action and schedule for completing the written comprehensive examination by the date approved by the student's faculty adviser.

### Oral candidacy examination

After passing the written comprehensive examinations, the student is eligible for the oral candidacy examination. For this examination, the student prepares background and methods for three proposed research projects in a focused area of dissertation research.

To maintain satisfactory academic progress in the program, students should complete the oral candidacy examination by the end of third fall semester. Exceptions beyond this time limit must be approved by the student's committee and the graduate program director based on the student's submission of a written explanation for the delay in progress. This written explanation must include a plan of action and schedule for completing the oral candidacy examination by the date approved by the student's dissertation adviser.

Upon successful completion of the oral candidacy examination, the student will embark upon the dissertation research.

## Dissertation

1. The dissertation must be a hypothesis-based, analytical epidemiology project designed by the student under the supervision of the faculty adviser and dissertation advisory committee members as appropriate. The dissertation consists of a minimum of three papers prepared in manuscript style and suitable for submission to a peer-reviewed journal.
2. The student submits at least one of the three manuscripts from the dissertation to a peer-reviewed journal before the student schedules the final defense.

To maintain satisfactory academic progress in the program, students should schedule the dissertation examination by the second semester of the fourth year. Exceptions beyond this time limit must be approved by the student's committee and the graduate program director based on the student's submission of a written explanation for the delay in progress. Plans for completion of the dissertation examination will be considered on an individual basis. Failure to maintain satisfactory

academic progress may result in a grade of U (unsatisfactory) for the dissertation work.

### Satisfactory academic progress

Satisfactory academic progress may be assessed on multiple factors, including progress on dissertation development in accordance with timelines established between the student and adviser and/or committee; lack of professional conduct, including communication lapses or failure to communicate with the adviser and/or committee about delays in progress and/or absence from research work; honor policy violations or academic misconduct; and failure to maintain continuous enrollment without an approved leave of absence.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS 573	Analysis of Biomedical Data II	3
EPID 649	Analysis of Health Datasets	3
EPID 650	Epidemiologic Methods for Research	3
EPID 651	Intermediate Epidemiologic Methods for Research	3
EPID 652	Advanced Epidemiologic Methods and Data Analysis	3
EPID 690	Journal Club (taken four semesters)	4
STAT 643	Applied Linear Regression	3
<b>Required additional courses</b>		
Practical research skills development: Select a minimum of two credits from the following.		2
ALHP 716	Grant Writing and Project Management in Health Related Sciences	
BIOS 610	Research Processes and Methods for the Health Professions	
GRAD 601	The Academic Profession	
GRAD 602	Teaching and Learning in Higher Education	
GRAD 604	Teaching, Learning, Technology and the Future of Higher Education	
GRTY 608	Grant Writing	
Responsible research conduct: Select at least one of the following.		1
OVPR 601	Scientific Integrity	
OVPR 602	Responsible Scientific Conduct	
OVPR 603	Responsible Conduct of Research	
<b>Elective courses</b>		
Methodological electives: Select nine credits from the following.		9
BIOS 549	Spatial Data Analysis	
BIOS 567	Statistical Methods for High-throughput Genomics Data I	
BIOS 631	Mixed Models and Longitudinal Data Analysis	
BIOS 632	Multivariate Analysis	
BIOS 647	Survival Analysis

## Genetic Counseling, Master of Science (M.S.)

**Program accreditation**

Accreditation Council for Genetic Counseling

### Program goals

1. Competency in genetic counseling
2. Eligibility for certification by the American Board of Genetic Counseling
3. Preparation for careers in genetic counseling and human genetics and genomics

Successful candidates will demonstrate competency in all four genetic counseling domains: I – genetic expertise and analysis, II – interpersonal, psychosocial, and counseling skills, III – education and IV – professional development and practice.

### Program objectives

1. Demonstrate knowledge of the principles of human, medical and public health genetics and genomics and their related sciences
2. Apply knowledge of genetic principles and understand how they contribute to etiology, pathophysiology, clinical features, disease expression, natural history recurrence risk, clinical management and disease prevention
3. Apply knowledge of genetic principles to understanding of differential diagnosis, genetic testing, genetic test report interpretation and population screening

### Student learning outcomes

1. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the core clinical competencies established by the Accreditation Council for Genetic Counseling. These competencies are documented with written and oral evaluations at the completion of each of the clinical rotations by the rotation supervisor.
2. General knowledge of sciences: The candidate should demonstrate a general knowledge of the elements of the sciences as related to genetic molecular/cellular bioscience and a detailed knowledge

of his or her area of research, including an appropriate familiarity with the research literature. The student is evaluated by academic performance, face-to-face and written evaluation of clinical performance in multiple rotations by multiple supervisors and annual written and oral exams.

3. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. This is achieved by evaluations of clinical rotations both written and verbal that are based on the competencies established by the Accreditation Council for Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Applications received prior to Jan 15 given priority consideration	GRE within five years of application; international applicants must score 100 or greater on the TOEFL.

In addition to the general admission requirements of the VCU Graduate School (p. 34):

1. Applicants must have successfully completed undergraduate training and hold a baccalaureate degree from an accredited university or college.
2. Applicants must write a personal essay, no longer than two pages, indicating their interest and suitability to the field of genetic counseling.
3. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion or philosophy) and three credit hours each of biochemistry, statistics and genetics. It is recommended that all prerequisite courses have been completed within 10 years of application. A prerequisite may be in process at the time of application. A minimum grade of a B must be obtained prior to admission if the course is in progress at the time of acceptance.
4. Students accepted to the program are generally drawn from applicants with a minimum undergraduate grade-point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students.
5. The Graduate Record Examination is required for admission; there is no MCAT substitution. The GRE should be taken within five years of application submission. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a writing performance above a score of 3.5 on the analytical section.
6. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.
7. Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crisis hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

Note: The department receives an average of 200 applications annually. Of those, about 50 are invited for an onsite interview, and eight to 10 students matriculate. The onsite interview is required for all North American applicants.

The program participates in the Association of Genetic Counseling Program Directors program match. Prospective students may see the National Society of Genetic Counselors (<http://www.nsgc.org/p/cm/ld/fid=44%23accept/>) website and the American Board of Genetic Counseling (<http://www.abgc.net/ABGC/>)

AmericanBoardofGeneticCounselors.asp) website for additional information.

Matriculating genetic counseling students are eligible for selection in the VA-LEND certificate in neurodevelopmental disabilities. Information is available at [wp.vcu.edu/virginialend](http://wp.vcu.edu/virginialend) (<https://rampages.us/virginialend1/>).

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum total of 60 credit hours. The program is a full-time, on-campus program. (Part-time on-campus options may exist at the discretion of the program director.) There is no online option for degree completion. Students are expected to complete their course work in four semesters (21 consecutive months). To be considered full-time, the VCU School of Medicine requires students to register for 15 credit hours in the fall and spring semesters. Occasionally special circumstances may occur that could require a temporary leave of absence. The VCU Graduate School requires that master's degrees be completed in a maximum of six years.

In order to be considered in good academic standing, a student must maintain a 3.0 GPA. Students who fail to maintain a 3.0 average are permitted one semester to bring their averages up to the required level.

As part of their course work, students begin clinical rotations in the spring semester of the first year and continue through the summer and both semesters of the second year. Students are required to engage in clinical experiences during the intervening summer. Options exist for summer experiences to occur outside the city of Richmond.

Students must pass a written comprehensive exam at the conclusion of the first two semesters of study and a written and oral comprehensive exam prior to graduation. The oral examination covers clinical competency and research competency.

Students are required to complete a research project during their course of study. The purpose of the research project is to give the student hands-on experience in developing a research question or exploring a professional or program problem, reviewing the literature, and attempting to answer the question or problem. Projects will enhance the student's professional development and represent a strong component of the "portfolio" of experience brought to the job interview process. Projects can range from laboratory to clinical and may include development of educational materials, videotapes or patient protocols. All projects are required to have defined goals and/or hypotheses to be tested. Institutional review board application and review is often required for student research. Publication and professional presentation are strongly encouraged.

Students are encouraged to consider projects in the first semester and to choose a project topic by the second semester. The project proposal is due to the program director by the first of June during the student's first year of study. All project proposals must be in writing and approved by the faculty member with whom the project will be performed and the program director. Some projects will require review by the Office of Research and Innovation for subject protections, and some projects may require that the student seek grant funding or participate on an existing faculty grant. The student is responsible for preparing documents and meeting these research requirements in a timely fashion.

Students must select a primary research adviser and the members of their research committee by the conclusion of the second semester. The

committee must have at least one meeting by July 1 of the intervening summer. The research committee must include at least three faculty members with one outside of the department. Additional members may be added if needed for optimal project advising.

The student's supervisors and the genetic counseling program director work together in mentoring the student. Students are provided ongoing written and verbal evaluation regarding their academic and clinical progress.

In addition to participating in course work and counseling rotations, students in the department also participate in a number of community and education programs. These opportunities may include lectures and presentations to local schools and community events, participation in health fairs, School of Medicine-sponsored activities, state of Virginia Genetics Advisory Board meetings, and DNA Day on the Hill in Washington, D.C.

The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling. Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists and contributing members of commercial genetic testing laboratories and the developing field of human genomic medicine.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
ANAT 612	Human Embryology	2
HGEN 501	Introduction to Human Genetics	3
HGEN 502	Advanced Human Genetics	3
HGEN 510	Classic Papers in Human Genetics	1
HGEN 525	Practice of Genetic Counseling	3
HGEN 526	Practice of Genetic Counseling	3
HGEN 527	Medical Genetics	3
HGEN 528	Medical Genetics	3
HGEN 600	Clinical Genetics (repeated three times)	9
HGEN 601	Research in Genetic Counseling	2
HGEN 607	Processes in Genetic Counseling I	1
HGEN 608	Processes in Genetic Counseling II	1
HGEN 615	Techniques in Genetic Counseling	3
HGEN 622	Cancer Genetic Counseling	3
HGEN 690	Genetics Research Seminar (repeated for four credits)	4
HGEN 697	Directed Research in Genetics (repeated for a minimum of eight credits) <sup>1</sup>	8
PATH 691	Special Topics in Modern Instrumental Methods (diagnostic genetic testing)	2
<b>Required additional courses</b>		
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	
<b>Elective courses</b>		
As approved by the program director		5
Total Hours		60

1

One credit to be taken in the summer semester as noted in the plan of study.

**The minimum total of graduate credit hours required for this degree is 60.**

## Typical plan of study

Many students may take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Genomics Data Science, Certificate in (Graduate certificate)

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research.

### Program goal

With the advent of sequencing technologies, genomic data science became a broad and interdisciplinary field with multiple points of entry, including biology, genetics and genomics, computer science, informatics, statistics and biostatistics, and others. As such, entry into the field can be confusing, especially for those looking to pursue further training, education or careers in this field. The purpose of the graduate Certificate in Genomics Data Science is to serve as a single point of entry for those interested in the field of genomics data science, which is defined as four domains: 1) biological principles of genomic science, 2) data analysis/

statistical training, 3) principles of sequencing and bioinformatics and 4) computational principles and software tools.

The knowledge and skills acquired as a part of this certificate program will enable graduates to have better opportunities to be employed in medical centers and hospitals, data science-oriented departments in colleges and universities and government jobs. This training program is designed to be completed over two semesters covering 10 months.

## Student learning outcomes

The purpose of the Certificate in Genomics Data Science is to train graduate students on the biological, DNA sequencing, bioinformatics and data analysis principles and procedures associated with applied genomics research and prepare them to apply those procedures to real data. Graduates will achieve the following learning outcomes:

1. Utilize the basic principles and methodologies of molecular biology and genetics, focusing on gene structure and function, epigenetics, gene expression, biochemical genetics and inborn errors of metabolism for therapeutic diagnostic decision-making
2. Receive training in the use of genomic technologies and software tools for data processing widely used in bioinformatics, and using the R programming language to learn computational methods and data manipulation principles, clustering, data visualization, and machine learning algorithms
3. Acquire the ability to use software packages to perform data analysis procedures and interpret the results, including descriptive statistics, tests of hypotheses and confidence intervals, analysis of variance, correlation and linear regression analysis, and quality control
4. Apply the knowledge and skills acquired in many high-demand areas, including genomic medicine, health care, pharmaceuticals and medical manufacturing, and government

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on certificate programs (p. 583) is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	July 1	

All successful applicants to this graduate certificate program are required to meet the admission requirements of the VCU Graduate School (p. 34) and are expected to:

- Have earned an undergraduate degree in an area related to biology, bioinformatics, computer sciences, computational biology, applied mathematics, statistics or in another relevant discipline
- Have computing/technology skills that allow the student to learn and use several statistical software packages

Applicants must submit the following materials to VCU graduate admissions:

- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official transcripts from all undergraduate and graduate schools attended
- A statement of purpose outlining career goals
- A resume stating relevant work experience

Additionally, international applicants must:

- Submit official transcript evaluations from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers
- Provide proof that they can support themselves financially for the duration of the program

Additionally, applicants that are non-native English speakers must demonstrate proficiency in English by providing one of the following:

- A Test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or 600 for the paper-based score
- An International English Language Testing Systems minimum score of 6.5 on the academic exam

- A passing score on the VCU English Language Program compression test

Students must take one three-credit course from each of the domains of biological principles of genomic science, data analysis/statistical training, and principles of sequencing and bioinformatics analysis; two three-credit courses in the domain of computational principles and software tools; and at least one three-credit elective course from any domain.

## Curriculum requirements

Course	Title	Hours
<b>Biological principles of genomic science</b>		
Select one from:		3
BIOL/BNFO 540	Fundamentals of Molecular Genetics	
BIOL 516	Population Genetics	
HGEN 501	Introduction to Human Genetics	
<b>Data analysis/statistical training</b>		
Select one from:		3
BIOS 543	Graduate Research Methods I	
BIOS 572	Analysis of Biomedical Data I

## Healthcare Policy and Research, Doctor of Philosophy (Ph.D.)

### Program goal

The doctoral program in healthcare policy and research trains students to understand the economic, political and social factors that affect access to care and the quality and cost of health care. Graduates of this program will have strong methodological and theoretical skills that will prepare them to make important contributions to the fields of health care policy and public health. Their training will enable them to add to scientific knowledge about how health policy, social factors, financing systems, organizational structures, care processes, health technologies and personal behaviors affect health care outcomes.

The program is structured to provide progressive mastery of the design and analysis of health services research. Program graduates will be able to formulate health care policy; to plan, implement and evaluate health programs and policies; and to interpret research findings in ways that are practical and policy-relevant to a variety of audiences. Trainees obtain experience working with colleagues in public health, medicine, psychology and other disciplines and to advance to positions as health policy researchers in academia, government or the private sector.

### Student learning outcomes

1. Content and theory: Students will critically articulate how health policies are developed, implemented and evaluated.
2. Critical and analytical thinking: Students will accurately analyze and synthesize health policy research.
3. Research methods: Students will demonstrate proficiency in designing, conducting and interpreting health policy research. Students will write and submit a grant proposal.
4. Effective communication: Students will communicate effectively to translate and disseminate research findings for health policy audiences.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

Enrolled students may access the program handbook on Blackboard.

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online** at [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 15 (Applications received prior to this date given priority consideration.)	GRE; TOEFL for international students

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must meet the following minimum qualifications.

1. A college-level course in calculus with a minimum grade of B is preferred.
2. Applicants must have graduated from an accredited university or its equivalent, with a master's degree in a related discipline (e.g., economics, public health, public policy, health administration, public administration). Applicants must have completed relevant course work (including microeconomics and introductory statistics) or have professional experience in a health-related field (two years minimum) that provides an appropriate background for graduate-level study in healthcare policy and research.
3. Applicants must have taken the Graduate Record Exam within the past five years; scores in the 75th percentile are preferred.
4. Applicants from countries where English is not the primary and official national language must complete one of the following:
  - a. English proficiency verification through official TOEFL score 550 or higher
  - b. Graduate with a master's degree following two years of study at a U.S. institution
  - c. English language proficiency certification through appropriate English training programs at other U.S. institutions, or English language proficiency certification by passing the English Language Proficiency Examination and/or the corresponding English Language Institute courses

VCU policy also requires that prospective students who have studied outside of the U.S. must provide an official WES or ECE external credential evaluation as a required part of the admissions process.
5. Applicants must present three letters of recommendation from individuals who are in a position to judge their ability to engage in interdisciplinary graduate study in healthcare policy and research. At least one recommendation must be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or adviser).
6. Applicants must provide a written statement of professional intent that includes the proposed area of research and identifies the faculty member(s) with which the applicant is interested in working.
7. Applicants must present a curriculum vitae or resume.
8. A recent writing sample, such as a first author, peer-reviewed publication; a master's thesis; a book chapter; a policy brief or report; or a graduate course paper is required. An undergraduate course paper may be substituted if none of the above is available.
9. Prospective students must be available to interview either in person or teleconference via technology such as Zoom.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program. At the discretion of the HCPR committee, a student who is retaking a required course may still be eligible to take the comprehensive examination and to start the dissertation prior to repeating the course.

At the end of the second year of required course work, students will take a written comprehensive examination designed to evaluate the student's ability to:

1. Integrate course material
2. Demonstrate critical thinking and evaluation of the literature in healthcare policy and research
3. Demonstrate quantitative analysis skills

After passing the written comprehensive examination, the student will schedule the proposal defense within six months. Following successful defense of the proposal, the student will prepare three manuscripts of publishable quality that will comprise the body of the dissertation and will orally defend the dissertation. It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within six years from the date of admission to the degree program. Extensions may be approved in extenuating circumstances.

## Course requirements

2

BIOS 625, BIOS 631 or BIOS 647 may be substituted with approval

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, the nature of research being conducted, or the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements. This program has a typical time to degree of four years. For additional information, see the departmental website.

## Human Genetics, Doctor of Philosophy (Ph.D.)

### Program goal

The program is designed to provide students with training in human and molecular genetics and with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with

respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	

## Special requirements

- International applicants must score 100 or greater on the TOEFL.
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report TOEFL score, use VCU Code 5570.)
3. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant

5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g., cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student's course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit the program website (<https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/>).

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student's knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student's development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

Total Hours		40

### Electives

Course	Title	Hours
Select at least two elective courses from the following:		5
PATH 670, courses at the 500-level or above in ANAT, BIOC, BIOL, BIOS, BNFO, HGEN, LFSC, MICR, NEUS, PHTX and PHIS excluding laboratory courses, courses specifically for professional programs (e.g. HGEN 600 Clinical Genetics), directed research, independent study, seminar, current topic courses, MICR 608 and MICR 609		
Total Hours		5

### Directed research

Course	Title	Hours
HGEN 697	Directed Research in Genetics (1-15 variable credit hours) <sup>3</sup>	41

1

HGEN 610 should be taken every fall and spring semester beginning the spring term of the first year.

2

HGEN 690 should be taken every fall and spring semester.

3

HGEN 697 should be taken every semester following the first year of study.

**The minimum total of graduate credit hours required for this degree is 86.**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted

by a study or in the enrollment or funding status of the student. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years. Students complete this degree program on average within five years. Students should refer to their program websites (<https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/curriculum/>) and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics

### Program goal

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

## Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree]

### Program accreditation

Accreditation Council of Genetic Counseling

### Program goal

#### Provide training in human and molecular genetics and competency in genetic counseling

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

#### Eligibility for certification by the American Board of Genetic Counseling

To prepare individuals for careers in genetic counseling and human genetics, successful candidates will demonstrate competency in all four genetic counseling domains: I – genetics expertise and analysis; II – interpersonal, psychosocial and counseling skills; III – education; and IV – professional development and practice.

The Department of Human and Molecular Genetics offers training that combines preparation for a career as a genetic counselor with research-based doctoral training in a coordinated program that integrates the complementary aspects of these two degree categories. In order to be admitted to this dual-degree program, an applicant must be accepted into both the M.S. and Ph.D. programs.

### Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. This is also achieved by evaluations of clinical rotations, both written and verbal, that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
6. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the core clinical competencies established by the Accreditation Council for Genetic Counseling (ACGC). These competencies are documented with written and oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on all types graduate programs (p. 583) is available elsewhere in the Graduate Bulletin.

To qualify as a dual-degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the "dual degree" for at least one semester.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D. and M.S.	Fall	Jan 15	GRE within five years of application (MCAT or DAT is not acceptable in lieu of GRE.)

## Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form. The dual degree box on the application must also be checked.
- Non-native English speakers must score 100 or greater on the TOEFL.
- It is recommended that all prerequisite courses have been completed within 10 years of application.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 34). In order to be admitted to this dual-degree program, an applicant must apply to and be accepted into both the M.S. and the Ph.D. programs.

## Human Genetics, Doctor of Philosophy

Successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student's course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit the department's website (<https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/>).

## Genetic Counseling, Master of Science (M.S.)

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion and philosophy) and three credit hours each of biochemistry, statistics and genetics. Students accepted to the program are generally drawn from applicants with an undergraduate minimum grade point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students. The Graduate Record Examination is required for admission; VCU does not substitute with the MCAT. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version. (The program participates in the Association of Genetic Counseling Program Directors program match. See the National Society of Genetic Counselors website (<https://www.nsgc.org/>) for additional information.)

Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic

counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crises hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

In the last five certification cycles (2007 to 2012) VCU graduates have an 86 percent pass rate on the American Board of Genetic Counseling/Accreditation Council of Genetic Counseling national certification examination.

In addition to the general VCU Graduate School graduation requirements (p. 31), completion of this dual-degree program requires at least three years of study for students entering with a baccalaureate degree and must be completed within eight years.

## Shared credits

Course	Title	Hours
<b>Courses within the Ph.D. curriculum counted toward the M.S. in Genetic Counseling</b>		
HGEN 501	Introduction to Human Genetics	3
HGEN 502	Advanced Human Genetics	3
HGEN 697	Directed Research in Genetics	8
<b>Courses within the M.S. curriculum counted toward the Ph.D. in Human Genetics</b>		
HGEN 510	Classic Papers in Human Genetics	1
HGEN 690	Genetics Research Seminar (one-credit course repeated for four credits)	4
OVPR 601 or OVPR 602 or OVPR 603	Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research	1
Total Hours		20

Students in this dual-degree program must complete a minimum of 126 graduate credit hours to earn both degrees. If students were to complete both degrees independently, a minimum of 146 total graduate credit hours would be required.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student's knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student's development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral comprehensive exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

<b>Electives</b>		

For the Ph.D. in Human Genetics select five credits from IDDS 602, courses at the 500-level or above in ANAT, BIOC, BIOL, BIOS, BNFO, HGEN, IBMS, LFSC, MICR, NEUS, PATH, PHTX and PHIS, excluding laboratory courses, courses specifically for professional programs, directed research, independent study, seminar, current topic courses, MICR 608 and MICR 609.

For the M.S. Genetic Counseling five credit hours of electives must be approved by the program director.	5
Total Hours	126

<sup>1</sup>M.S. in Genetic Counseling requirement

<sup>2</sup>Ph.D. in Human Genetics requirement

<sup>3</sup>HGEN 610 should be taken every fall and spring semester beginning the spring term of the first year but not required in the last year of study.

<sup>4</sup>HGEN 690 should be taken every fall and spring semester

<sup>5</sup>HGEN 697 should be taken every semester following the first year of study

**The minimum total of graduate credit hours required for this degree is 126.**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted or in the enrollment or funding status of the student. For example, students who elect the quantitative genetics concentration for the Ph.D. have additional course requirements. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years. Students complete these degree programs on average within six years. Students should refer to their program websites (<https://gen.vcu.edu/graduate-and-training-programs/dual-degree-program-in-human-genetics-genetic-counseling/>) and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## 5 Human Genetics, Master of Science (M.S.) Program goal

The goal of the master's program in human genetics is to provide training in human and molecular genetics. The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	May 1	GRE, MCAT or DAT

## Special requirements

- International applicants must score 100 or greater on the TOEFL.

In addition to the general admission requirements of the VCU Graduate School (<https://vcu-curr.courseleaf.com/graduate/study/admission-graduate-study/admission-requirements/>), applicants wishing to specialize in human genetics should have courses in biology, chemistry through organic chemistry, genetics and mathematics through calculus.

## Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

## Degree requirements

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Master of Science in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to master's students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling.

In addition to the general VCU Graduate School graduation requirements (p. 31), the M.S. degree requires at least two years of full-time study for students entering with a B.S. or B.A. degree and must be completed within six years. Students must complete a minimum of 59 graduate credit hours. Students may be required to take an additional six hours of directed research after the second spring semester if needed.

Upon completing their thesis research, master's students must report their results in a thesis that is prepared in an acceptable form and style as detailed by the university Graduate School. A final oral examination is scheduled after the student's thesis has been approved by the student's advisory committee. This examination includes the subject matter of course work the student has completed as well as the thesis. It is administered by the student's graduate advisory committee who will vote on the student's performance in addition to rating them with regard to the rubrics defined by the School of Medicine.

## Human Genetics, Master of Science (M.S.) with a concentration in genomic data science

### Program goal

The genomic data science concentration is designed for students interested in the computational aspects of genetics and genomics research. The goal of this concentration is to provide students with training in broadly applicable analytical and computational skills from the emerging field of data science to address important questions in human and molecular genetics. The structure of the M.S. program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Oral communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: Degree candidates will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: Degree candidates will demonstrate an appropriate level of knowledge of

the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

## Medical Physics, Certificate in (Post-baccalaureate graduate certificate)

#### Program accreditation

Commission on Accreditation of Medical Physics Educational Programs (<http://campep.org/>)

## Program goals

The graduate certificate in medical physics offers course work in physics as it is applied to the diagnosis and treatment of human diseases. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, imaging and health physics. The goal of the program is to provide a career path in medical physics as an alternative to a terminal degree in medical physics. The program is primarily designed for retraining those who possess a doctoral degree in physics or a related field.

The mission of the medical physics graduate certificate program is to serve the Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program is intended for postdoctoral individuals seeking to enhance their credentials for admission into a medical physics residency position.

## Student learning goals

To develop core competency in medical physics by:

1. Obtaining a medical physics knowledge base
2. Enhancing medical physics-specific problem-solving skills
3. Enhancing clinically relevant communication skills

## Student learning outcomes

1. Demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics
2. Demonstrate the ability to evaluate and integrate such knowledge into the solution of clinically relevant problems as measured by the course work
3. Demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work
4. Demonstrate appropriate written communication skills suitable for practice in clinical medical physics
5. Demonstrate appropriate oral and visual communication skills suitable for practice in clinical medical physics

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jan 15	GRE

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be from courses higher than introductory level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must have earned a doctoral degree in physics, engineering or other area of physical science with a minimum GPA of 3.0 on a 4-point scale

Program website: [medicalphysics.vcu.edu](http://www.medicalphysics.vcu.edu) (<http://www.medicalphysics.vcu.edu>)

## Medical Physics, Doctor of Philosophy (Ph.D.)

### Program accreditation

Commission on Accreditation of Medical Physics Educational Programs (<http://campep.org>)

## Program goals

The Ph.D. in Medical Physics offers students course work and research training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the doctoral program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in both the health care delivery and biomedical research settings. The program will prepare students for careers as independent investigators in the field of medical physics and jointly for careers in university departments, research institutes, laboratories and hospitals as trainee clinical medical physicists.

Research areas include brachytherapy, hyperthermia, image-guided radiation therapy, intensity-modulated radiation therapy, proton therapy, medical imaging technologies, radiomics, image processing and reconstructions, functional imaging, novel treatment device fabrications, robotics, and 4-D treatment technology development.

**Professional competency:** To develop professional competency in medical physics by providing a framework in which students progressively develop a mastery of the current state of medical physics and an ability to synthesize this information and apply it in research and clinical settings. Additionally, the program aims to develop skills in the various means of communicating both the core of medical physics knowledge and expression of experimental design, results, and interpretation to a variety of potential audiences.

**Scientific competency:** To develop scientific competency in medical physics by providing a framework by which candidates develop skills to design, conduct and implement theoretical and clinical research which answers identified questions. The research focus may lead to new and/or improved applications of physics for diagnosis and treatment of diseases. In broad terms, candidate research will be directed toward advancing "minimally invasive medicine" through applications of ionizing and non-ionizing radiation.

## Student learning outcomes

1. **Communication skills:** The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
2. **Experimental design:** The candidate should demonstrate an appropriate level of skill in the theoretical and technical design of experimental procedures and the technical conduct of experimentation related to his or her research. This includes demonstration of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
3. **Knowledge of medical physics literature:** The candidate should demonstrate a general knowledge of medical physics literature and a more detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

4. **Problem-solving:** The candidate should demonstrate an appropriate level of skill in the identification of meaningful medical physics research problems, including the ability to defend said identifications, and the design and implementation of appropriate problem-solving methods as measured by rubric.

These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

**School of Medicine graduate program policies**

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 15	

In addition to the general admission requirements of the VCU Graduate School (p. 34) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students entering the program with an undergraduate degree are required to earn a minimum of 42 credit hours of graduate medical physics course work. At least 19 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new Ph.D. students entering the program will be assigned an adviser. After successful completion of courses by the end of first year with a minimum GPA of 3.0, students and advisers will develop a graduate advisory committee. The committee will direct the students in their research and subsequent course selection. Advisers will report once each semester of student enrollment to the program director on the academic progress of their students, will participate in the oral candidacy examinations of students and chair the students' dissertation defense examinations.

The student is required to successfully complete both written comprehensive and oral candidacy examinations to be granted Ph.D. candidate status. The written comprehensive examination covers core knowledge and applications in medical physics course work, as well as basic concepts in physics, chemistry and biology. The oral candidacy examination, administered by the student's graduate advisory committee, is based upon a written prospectus describing the proposed dissertation research project. Examiners evaluate the adequacy of the proposed project, the student's level of understanding of the project and the likelihood that the dissertation research project can be completed successfully.

After being approved for degree candidacy, the student must conduct a substantial original investigation under the supervision of the advisers

and must prepare a dissertation reporting the results of the research in the context of existing scientific knowledge. After the dissertation has been completed and unanimously accepted for defense by the graduate advisory committee, the candidate will appear before the committee for an oral dissertation defense. The oral defense examines the candidate's research, dissertation documentation and underlying fundamental knowledge. Successful completion and defense of the dissertation is required for degree completion.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
MEDP 561	Topographical Anatomy and Physiology	1
MEDP 563	Radiological Physics and Radiation Dosimetry	3
MEDP 564	Radiological Physics and Radiation Dosimetry Lab	1
MEDP 567	Introduction to Radiation Therapy Physics	3

<b>Additional required course</b>		<b>1</b>
OVPR 602 or OVPR 601 or OVPR 603	Responsible Scientific Conduct Scientific Integrity Responsible Conduct of Research	
<b>Elective courses</b>		
Select a minimum of three credit hours from the following:		3
BIOS 543	Graduate Research Methods I	
BIOS 544	Graduate Research Methods II	
HGEN 611	Data Science I	
HGEN 612	Data Science II	
MEDP 682	Clinical Rotations in Medical Physics	
STAT 543	Statistical Methods I	
STAT 544	Statistical Methods II	
STAT 641	Applied Data Analysis	
<b>Dissertation research</b>		
MEDP 697	Directed Research (11 credits minimum)	11
<b>Total Hours</b>		<b>42</b>

1

Variable credit hours; clinical rotations may be repeated.

**The minimum total of graduate credit hours required for this degree is 42.**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students

should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Medical Physics, Master of Science (M.S.)

#### Program accreditation

Commission on Accreditation of Medical Physics Educational Programs (<http://campep.org/>)

### Program goals

The Master of Science in Medical Physics offers students course work and practical clinical training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the master's program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program will prepare students for careers as qualified and independent clinical medical physicists. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, medical imaging and health physics.

**Professional competency.** To develop professional competency in medical physics by providing a framework in which students progressively develop mastery of the current state of medical physics and an ability to synthesize this information and apply it in a clinical setting. Additionally, students in the program will develop skills in the various means of communicating the core of medical physics knowledge and clinical applications of that knowledge to a variety of potential audiences.

**Clinical competency.** To develop clinically competent medical physics graduates by providing a framework in which students progress from didactic knowledge to clinical knowledge and demonstrate application of clinical medical physics principles, practices and procedures.

### Student learning outcomes

1. Clinical performance: The candidate should demonstrate an appropriate level of skill in the theoretical, practical and technical conduct of medical physics in the clinical setting. This includes demonstration of an appropriate level of competence in the ability to:
  - a. Design and quality assure radiation therapy treatment plans for both brachytherapy and external beam radiation therapy
  - b. Quality assure radiation therapy delivery devices
  - c. Quality assure radiation therapy treatment charts
  - d. Perform calibration and/or beam delivery commissioning measurements as measured by instructor evaluation in compliance with accepted clinical standards
2. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate

use of language incorporating the use of visual aids, as measured by course work and the quality of the thesis. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, chart notation and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by course work and the quality of the thesis.

3. Medical physics knowledge base: The candidate should demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics. This includes general knowledge of medical physics scientific materials, clinical policies and procedures, and translational scientific literature. The student should demonstrate the ability to evaluate and integrate such knowledge into the solution of clinical problems as measured by course work and the quality of the thesis.
4. Problem-solving: The candidate should demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work, annual review and the quality of the thesis.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jan 15	

In addition to the general admission requirements of the VCU Graduate School (p. 34) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students entering the program with an undergraduate degree are required to earn a minimum of 30 credit hours of graduate medical physics course work. At least 22 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new M.S. students entering the program will be assigned an adviser. The student and adviser will develop a graduate advisory committee, which will direct the student in his/her research. Advisers will report once each semester of student enrollment to the program director on the academic progress of their students and will administer oral thesis defense examinations.

The student must conduct an original investigation under the supervision of his/her adviser and committee, and then must prepare a thesis reporting the results of the research in the context of existing scientific knowledge. After the thesis has been completed and unanimously approved for defense by the committee, the candidate will appear before the committee for an oral thesis defense examination. The oral thesis defense examines the candidate's research, thesis documentation and underlying fundamental knowledge. Successful completion of the thesis and its defense is required for degree completion.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
MEDP 561	Topographical Anatomy and Physiology	1
MEDP 563	Radiological Physics and Radiation Dosimetry	3

## Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.) [dual degree]

### Program accreditation

Liaison Committee on Medical Education (M.D.)  
Council on Education for Public Health (M.P.H.)

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the “dual degree” for at least one semester.

### Program goal

The Division of Epidemiology in the Department of Family Medicine and Population Health in the School of Medicine offers a program for VCU medical students to obtain a Master of Public Health degree in conjunction with their medical training. The M.D./M.P.H. dual degree program provides an opportunity for medical students who wish to pursue a public health or research career to graduate from medical school trained in both clinical and preventive, population-oriented medicine. Graduates from this program are prepared for positions in preventive medicine, primary care, research, community-based health centers and state and local health departments.

The objective of the dual degree program is to provide high quality and in-depth training in public health to qualified medical students. The five-year program includes four years of medical school and one year of study in the M.P.H. program. Students enter the M.P.H. curriculum after the M-3 year. During the M.P.H. year, students take a minimum of 36 credit hours of course work.

The required minimum of 36 credits in the M.P.H. curriculum includes 21 credit hours of core courses, a minimum of nine credit hours of concentration courses, a minimum of three credits of elective courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. Note that some elective courses may not be available in certain years or may require instructor permission for registration. Students receive nine credit hours toward the M.P.H. degree for completion of course work in the M.D. program. Successful completion of Population Health and Evidence-based Medicine satisfies the three credits of the M.P.H. core course, EPID 571; Patient Safety and Quality Improvement satisfies the one credit required for IPEC 501; The Physician, Patient, and Society satisfies two credits of elective course work; and a minimum of one public health elective during the M-4 year satisfies the three-credit public health internship (EPID 693) requirement. No credits in the M.P.H. program apply to the M.D. program.

**Note:** Enrollment in the dual degree program requires admission into both the School of Medicine and the Graduate School. Students must successfully complete all required course work to receive both degrees at the end of the five years.

The mission of the M.P.H. program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster lifelong inquiry and discovery that improve human health. The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to positions as public health practitioners in

a broad spectrum of positions and settings and who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health.

### Student learning outcomes

Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level assessed by program faculty as competent or higher, according to the program rubric.
2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a level assessed by program faculty as competent or higher, according to the program rubric.
3. Development of competencies: Through program course work and applied experiences, students will develop competence in the discipline of public health as demonstrated through annual self-assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program's integrated learning experience, the capstone project.
4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program's accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mph-program/competencies/>).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

The M.P.H. program student handbook is available upon request.

**For the M.P.H., apply online at** [sophas.org](http://sophas.org) (<http://www.sophas.org/>). Submit a VCU supplemental application following the instructions available at [sophas.org](http://sophas.org) and on the Family Medicine and Epidemiology website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/apply-now/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.D. and M.P.H.	Fall	Applications strongly encouraged by Mar 1	MCAT (acceptable in lieu of GRE scores for this combined professional/academic degree program) TOEFL

**Note:** Students applying to the dual degree M.D./M.P.H. program should be accepted to the VCU School of Medicine prior to applying to the M.D./M.P.H. Program. Students must apply separately to each program. Applications to the M.P.H. program are made through [sophas.org](http://sophas.org).

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must present the following qualifications.

1. **Prior degree:** Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. **Test scores:** The M.P.H. program normally requires GRE scores, but for the combined M.D./M.P.H., students may submit MCAT scores provided for admission to the School of Medicine in lieu of GRE scores.
3. **TOEFL:** International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information. The PTE is also accepted with a minimum score of 65.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement addressing the following issues:
  - What applicant plans to do in the first few years after graduation
  - Why VCU's M.P.H. program best fits the student's public health interests
  - Description of applicant's particular areas of interest in public health (e.g., maternal and child health, epidemiology)
  - How an M.P.H. degree will help the applicant achieve her/his career goals
  - Why the applicant wishes to pursue an M.P.H. degree
  - Description of the applicant's career goals

## Degree requirements

The Master of Public Health program prepares students committed to public health careers in the public, private or nonprofit sectors. The

program boasts experiential learning, a highly interactive environment, accessible and approachable faculty, and student involvement in important projects. The M.P.H. program is flexible enough to accommodate students who enter the program with various backgrounds and experiences.

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to successfully complete a minimum of 36 credit hours of formal course work that includes a capstone project. In addition, medical students will complete a public health elective during the M-4 year at a placement approved by the M.P.H. program director, in lieu of the required public health internship.

**Capstone project:** The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student’s academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report
4. Needs assessment for a specific population
5. Development, implementation, and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

**Noncurricular program requirements**

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

**M.P.H. curriculum requirements for the dual degree M.D./M.P.H. program**

## Microbiology and Immunology, Doctor of Philosophy (Ph.D.)

### Program goal

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified.

The Ph.D. program is also designed to develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences

## Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	TOEFL if international

## Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
3. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant

5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 58 graduate credit hours. At least six credits must come from didactic 600-level courses.

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Ph.D. degree is offered, as well as an M.D.-Ph.D. option for medical students interested in academic or research careers, and a master's degree.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings, writing of a grant application and writing of scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student matches with a research adviser, completes a written and oral examination and then carries out an original independent research project under the direction of the adviser. The project falls under the review of a graduate advisory committee, and a written dissertation is defended in a final examination.

A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to maintain satisfactory academic progress.

## Course requirements

**Note:** First-year Ph.D. students in the Biomedical Sciences Doctoral Portal should earn a minimum of seven credits of didactic courses in the fall semester to be eligible to matriculate into Ph.D. program in microbiology and immunology. Three of these credits must come from MICR 505 or MICR 515.

Course	Title	Hours
<b>Required core courses</b>		
IBMS 600	Laboratory Safety	1
IBMS 620	Laboratory/Clinical Rotations (three rotations)	6
MICR 505	Immunobiology	3
MICR 515	Principles of Molecular Microbiology	3
MICR 690	Microbiology Research Seminar (taken each fall and spring semester; minimum eight credits)	8
<b>Required additional courses</b>		
Select at least one of the following (satisfies three credits of six-credit 600-level didactic requirement):		3
MICR 605	Prokaryotic Molecular Genetics	
MICR 616	Mechanisms of Viral and Parasite Pathogenesis <sup>1</sup>	
MICR 618	Molecular Mechanisms of Bacterial Pathogenesis <sup>1</sup>	
MICR 686	Advanced Immunobiology <sup>2</sup>	

Select one of the following journal club courses for one semester every year (four credits minimum). 4

MICR 692	Current Topics in Molecular Pathogenesis	
MICR 693	Topics in Molecular Biology and Genetics	
MICR 694	Current Topics in Immunology	
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	

<b>Elective courses</b>		
Select at least two credits from the following:		2
MICR 607	Techniques in Molecular Biology and Genetics	
MICR/BNFO 653	Advanced Molecular Genetics: Bioinformatics	
MICR 684	Molecular Biology of Cancer	

<b>Dissertation research</b>		
MICR 697	Directed Research in Microbiology	27
Total Hours		58

1

Offered in alternate years

2

May be repeated with different content to satisfy the six-credit 600-level didactic requirement.

**The minimum total of graduate credit hours required for this degree is 58.**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Microbiology and Immunology, Master of Science (M.S.)

### Program goals

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Applications received prior to Jan 15 given priority consideration	GRE, DAT or MCAT

## Special requirements

- Successful domestic applicants typically have GRE scores of at least 156 for verbal reasoning and 153 for quantitative reasoning, 4.0 for analytical reasoning; DAT score of 18 or greater; or MCAT score of 26 or greater. International applicants should display English language proficiency by achieving a TOEFL score of 100 (iBT) or higher.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must meet the following minimum requirements.

1. Applicants must have earned or expect a baccalaureate or equivalent degree and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics.
2. Laboratory experience is strongly recommended.
3. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals.
4. For combined degree students, the Medical College Admission Test or Dental Aptitude Test is accepted in lieu of the GRE.
5. Foreign applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Complete application portfolio reviews will begin in January and will continue through May 1. International students requiring temporary U.S. visas should apply by April 1 for fall matriculation.

## Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

## Degree requirements

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and

oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Master of Science degree is offered, as well as a Ph.D. and an M.D.-Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then carries out an original, guided research project under the direction of the adviser. The project falls under the review of a graduate advisory committee and a written thesis is defended in a final oral examination.

M.S. students select their permanent advisers after three rotations completed during the first year of study. Research projects will be based on ongoing research in laboratories of the selected permanent adviser. The GAC is developed by the student and adviser. The M.S. student and the GAC will formulate a suitable curriculum of study based on the student's area of research interest.

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the M.S. degree program must complete all course requirements below. Additional hours may be completed for the M.S. degree. A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to maintain satisfactory academic progress.

An M.S. student performs a public presentation or defense of their thesis to their GAC, but the defense is open to all faculty members, students and staff. The GAC examines the student's fundamental knowledge of their research project and the disciplines encompassed by the student's thesis research.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>

## Neuroscience, Doctor of Philosophy (Ph.D.)

### Program mission

The program offers an interdepartmental, integrated curriculum for graduate study leading to the Ph.D. in Neuroscience. The program prepares students to teach in the neuroscience disciplines at a university or academic health center and is distinguished by its objective to prepare students to function as independent research investigators.

### Program goals

Upon completion of the Ph.D. in Neuroscience degree program, students will have:

1. Demonstrated a mastery of neuroscience and related bioscience knowledge
2. Developed effective oral, written and electronic communication skills
3. Demonstrated the ability to formulate, design, implement and interpret experimental approaches
4. Reached a level of competency to advance to positions as neuroscience researchers and teachers in a broad spectrum of academic, industrial and government employment venues
5. Successfully obtained employment in a neuroscience-related position

### Student learning outcomes

1. Students will demonstrate an appropriate level of knowledge of neuroscience and biosciences and exhibit the ability to integrate and comprehensively and critically review the scientific literature with an interdisciplinary perspective.
2. Students will demonstrate an appropriate level of oral and written communication skills with respect to content, organization, logical flow, presentation and appropriate use of language incorporating state-of-the-art technological advances in knowledge dissemination.
3. Students will demonstrate their ability to identify a scientific question, formulate testable hypotheses, design and carry out experiments to test their hypotheses, and interpret their results.
4. The candidate will demonstrate creativity and awareness to make significant contributions to neuroscience research in academic, private or government settings.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	TOEFL if international

## Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL score of 600 (pBT), 250 (cBT) or 100 (iBT); or 6.5 on the IELTS for individuals for whom English is a second language
3. Personal statements, including:
  - a. Long-term career goals to assess reasons behind application
  - b. How a Ph.D. in biomedical science helps achieve those goals
  - c. Initial motivating factors for a career in research
  - d. Research experience, including dates, places and duration
4. Equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology or biophysics)

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the Ph.D. program must complete a minimum of 69 graduate credit hours.

Students must maintain a minimum cumulative GPA of 3.0 and must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A

second grade of C in a required course shall result in dismissal from the program.

## Comprehensive examinations

The comprehensive examination occurs in two parts, usually commencing after the second year for Ph.D. students, or the first graduate year for M.D.-Ph.D. students. Part 1 consists of a mini-review, written by the student and defended before their graduate advisory committee. Part 2 consists of an oral defense of an NIH-style grant proposal prepared by the student, in consultation with their adviser, based on their research plan. Part 2 is also defended before their graduate advisory committee. Students are strongly encouraged to submit their proposals for extramural funding (e.g., NIH predoctoral fellowships) where appropriate. Both phases of the comprehensive exam must be completed by the end of the fall semester of the third year for Ph.D. students, or the second graduate year for M.D.-Ph.D. students.

Successful completion of the oral candidacy exam advances the student to candidacy for the doctoral degree. The oral candidacy exam must be completed prior to the beginning of the third year. Beginning with the spring semester the third year in the graduate program, students will devote their full time to conducting research in their advisers' laboratories. Students also register for neuroscience research seminar and journal club each semester.

At the appropriate time in their research, students will prepare a dissertation and schedule a final oral defense of the thesis. The final oral examination (defense of the dissertation) will be limited to the subject of the candidate's dissertation and related basic science.

It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within eight years from the date of matriculation in the degree program. Extensions may be approved in extenuating circumstances.

## Curriculum requirements

Course	Title	Hours
<b>Required core courses</b>		
ANAT 610	Systems Neuroscience	4
ANAT 615	Techniques in Neuroscience and Cell Biology	3
ANAT 620	Scientific Grantsmanship	2
ANAT 630	Research Presentations (repeat course to earn at least 8 credits)	8
BIOC 503	Biochemistry, Cell and Molecular Biology	5
BIOC 504	Biochemistry, Cell and Molecular Biology	5
BIOC 661	Critical Thinking	1
IBMS 600	Laboratory Safety	1
IBMS 620	Laboratory/Clinical Rotations (repeat course to earn 6 credits)	6
NEUS 609	Cellular and Molecular Neuroscience	4
NEUS 690	Neuroscience Research Seminar (repeat course to earn 8 credits)	8
<b>Required additional course</b>		
OVPR 601 or OVPR 602 or OVPR 603	Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research	1

**Elective courses**

Select two elective courses from the list below (or others as approved by the graduate program director) 6

ANAT 608	Functional and Clinical Neuroanatomy	
ANAT 617	Developmental Neurobiology	
BIOC 605	Molecular Biology	
BIOS 543	Graduate Research Methods I	
or STAT 543	Statistical Methods I	
IBMS 635	Cellular Signalling	
NEUS 619	Synaptic Organization of the Brain	
PHIS 604	Cell Physiology: Cardiovascular and Respiratory	
PHIS 606	Molecular Basis for Disease	
PHIS 619	Mitochondrial Pathophysiology and Human Diseases	
PHIS/PHTX 620	Ion Channels in Membranes	
PHIS 631	Electrophysiology and Photonic Methods	
PHTX 548	Drug Dependence	
PHTX 632	Neurochemical Pharmacology	
PHTX 636	Principles of Pharmacology

Professor and graduate program director

jbigbee@vcu.edu

(804) 828-0948

**Program website:** [neuroscience.vcu.edu](http://www.neuroscience.vcu.edu) (<http://www.neuroscience.vcu.edu/>)

**Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)****Program goal**

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement

and interpret experimental approaches that address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

**Student learning outcomes**

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

**VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs**

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

**Degree candidacy requirements**

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy

requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

Students wishing to matriculate into the Department of Pharmacology and Toxicology can contact the program director for further advice on course requirements and advising.

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Applications received prior to Jan 15 given priority consideration	TOEFL (individuals for whom English is a second language)

## Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)

3. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant
5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

## Degree requirements

The broad base offered in the Ph.D. program in pharmacology and toxicology, together with basic training in physiology and biochemistry, provides the background for a successful career in academic institutions, industry or government. The research program of the department is sufficiently broad to provide an adequate basis for entry into a wide variety of interesting areas of modern biology and medicine.

In addition to the general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 60 graduate credit hours. With few exceptions, Ph.D. students are enrolled in the Biomedical Sciences Doctoral Portal from matriculation until matched with an adviser, usually by the summer semester of the second year. The students are moved into the Ph.D. in Pharmacology and Toxicology major after meeting program requirements. Students customarily complete formal course work in pharmacology and biochemistry during the first year of study. Participation in research also is begun early in the first year. Students interested or committed to pharmacology should take the footnoted (<sup>1</sup>) courses listed in the curriculum requirements section during the portal period to assure rapid progress toward the degree.

In the third and subsequent years, the majority of the course load is taken as PHTX 697. Advanced electives also may be taken as desired and with the approval of the adviser. Students and faculty participate in a seminar program (PHTX 690) that includes distinguished visiting scientists from the U.S. and abroad. Following completion of a qualifying examination, a degree candidate is required to submit and defend a thesis embracing an original research project conducted under the guidance and supervision of an adviser and an advisory committee. There is no foreign language requirement. The average time necessary to complete the doctoral program in pharmacology and toxicology is four to five years.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOC 503	Biochemistry, Cell and Molecular Biology <sup>1</sup>	5
BIOC 661	Critical Thinking	1
IBMS 600	Laboratory Safety <sup>1</sup>	1
IBMS 620	Laboratory/Clinical Rotations (two-credit course taken for three rotations) <sup>1</sup>	6
PHTX 630	Basic Concepts in Pharmacology for Graduate Students <sup>1</sup>	3
PHTX 636	Principles of Pharmacology	5
PHTX 639	Principles of Pharmacology Journal Club	1

**Required additional courses**

OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	

PHTX 690	Pharmacology Research Seminar <sup>1</sup>	1
or IBMS 690	Basic Health Sciences Research Seminar	

**Elective courses** **6**

ANAT 610	Systems Neuroscience	
BIOC 504	Biochemistry, Cell and Molecular Biology	
BIOC 601	Membranes and Lipids	
BIOC 602	Physical Properties of Macromolecules	
BIOC 605	Molecular Biology	
BIOS 543	Graduate Research Methods I	
CHEM 504	Advanced Organic Chemistry I	
EGRB 603	Biomedical Signal Processing	
EGRB 610	Microprocessor Interfacing for Biomedical Instrumentation	
IBMS 635	Cellular Signalling	
MEDC 541	Survey of Molecular Modeling Methods	
MEDC 601	Advanced Medicinal Chemistry I	
MEDC 630	Theoretical Methods in Drug Design	
MICR 505	Immunobiology	
MICR/BNFO 653	Advanced Molecular Genetics: Bioinformatics	
NEUS 609	Cellular and Molecular Neuroscience	
PHIS 501	Mammalian Physiology	
PHIS 604	Cell Physiology: Cardiovascular and Respiratory	
PHIS 615	Signal Detection in Sensory Systems	
PHTX 632	Neurochemical Pharmacology	
PHTX 633	Behavioral Pharmacology	
PHTX/FRSC 644	Forensic Toxicology	

**Dissertation research**

PHTX 697	Directed Research in Pharmacology	30
----------	-----------------------------------	----

Total Hours		60
-------------	--	----

1

Students interested in or committed to pharmacology should take these courses during the portal year to assure rapid progress toward the degree.

**The minimum total of graduate credit hours required for this degree is 60.**

**Typical plan of study**

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

**Pharmacology and Toxicology, Master of Science (M.S.)****Program goal**

The graduate program leading to the Master of Science in Pharmacology and Toxicology prepares individuals for a variety of career objectives in biomedical science. These careers include but are not limited to as industrial scientists and scientists in government regulatory agencies. The M.S. program will be of interest to individuals planning on pursuing technical positions in pharmacology or toxicology research or testing; students interested in the health professions, such as medicine or dentistry, who desire additional research training; and those interested in government positions, such as those in regulatory agencies, that require training in pharmacology and toxicology.

The program incorporates formal instructional activity and research training mentored by members of the graduate faculty. The master's program is distinguished from the Ph.D. degree offered by the department in that the M.S. student is not being prepared for a career as an independent investigator.

**Student learning outcomes**

1. Communication skills: Degree candidates will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
2. Integrated knowledge of bioscience: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental

protocols and to design and develop experiments as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Apr 15	
	Summer	Jun 15	

## Special requirements

- See the departmental website for additional information on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 34), qualified applicants to the M.S. degree program typically must have:

1. Baccalaureate degrees with a major in fields such as biology, chemistry, biochemistry, pharmacy and related sciences
2. GRE scores of 1100 (verbal plus quantitative) and 3.5 (analytical) or equivalent scores on the new GRE exam
3. Undergraduate GPA of 3.2
4. Some laboratory research experience

## Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students in the master's program must complete a minimum of 30 graduate credit hours.

The Master of Science in Pharmacology and Toxicology is a research-oriented degree program comprising graduate course work and supervised research leading to a master's thesis. Students must conduct a substantial original investigation under the supervision of their advisers and must prepare and defend a thesis reporting the results of this research. It is highly recommended that students identify mentors for dissertation research as soon as possible within the first semester to ensure timely progress in their research.

When the thesis has been completed, copies are submitted to the members of the student's graduate advisory committee. The student's GAC decides upon the acceptability of the candidate's thesis. If the

committee unanimously accepts the thesis for defense, the candidate appears before them for a final oral examination.

M.S. students are required to present a departmental seminar prior to the final oral thesis defense as a requirement for completion of the thesis.

## Course requirements

Substitutions may be approved by the graduate program director.

## Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [dual degree]

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the "dual degree" for at least one semester.

The School of Pharmacy and the Division of Epidemiology in the Department of Family Medicine and Population Health in VCU's School of Medicine offer a dual degree program through which students earn both Pharm.D. and M.P.H. degrees. This dual degree program offers students the opportunity to achieve a Doctor of Pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend the fourth year of the Pharm.D. program pursuing the M.P.H. degree, after which they transition back to pharmacy for advanced practice experiences.

Students are required to take a minimum of 36 credits in the M.P.H. curriculum. This includes 24 credit hours of core courses, a minimum of nine credit hours of concentration courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. These courses [credits] within the Pharm.D. curriculum count toward the M.P.H. degree:

Course	Title	Hours
IPEC 501	Foundations of Interprofessional Practice	1
PHAR 509	Evidence-Based Pharmacy I: Introduction to Pharmacy Information Skills	1.5
PHAR 533	Introductory Pharmacy Practice Experience: Patient Care	0.5
PHAR 545	The U.S. Health Care System	2
PHAR 546	Pharmacy-based Immunization Delivery	1.5
PHAR 565	Evidence-based Pharmacy II: Research Methods and Statistics	2.5
Total Hours		9

Students in this dual degree program must complete a minimum of 191 graduate credit hours to earn both degrees. If students were to complete both degrees independently, a minimum total of 200 graduate credit hours would be required.

The required M.P.H. internship and M.P.H. capstone project will be completed in a community setting during the P5 year. The internship will be a community health-based advanced practice experience approved by both programs that involves the development of one or more deliverables. The M.P.H. capstone project will be a comprehensive, integrated learning experience involving either a hypothesis-based research question or a comprehensive project serving the needs of a professional public health organization. Examples include a disease surveillance project, a needs assessment or program evaluation, or analysis of survey data.

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

**For M.P.H., apply online at** [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>) and complete a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org) and the Family Medicine and Population Health/Division of Epidemiology website. **Pharm.D. applicants follow instructions on the** School of Pharmacy website (<https://pharmacy.vcu.edu/>).

Please review the admission requirements for each stand-alone degree (Master of Public Health and Doctor of Pharmacy) in the VCU Graduate and Professional Bulletins to learn the specific application requirements for each program.

Total Hours		155

The minimum total of graduate credit hours required for this degree is 191.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Physiology and Biophysics, Doctor of Philosophy (Ph.D.)

### Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the

expression of experimental design, results and interpretation to a variety of potential audiences.

## Program goals

### Training in physiology and biophysics

1. Students in the doctoral program in physiology and biophysics will acquire the skills to become independent research scientists, educators and administrators in a broad spectrum of positions.
2. Students will gain a progressive mastery of concepts in physiology and biophysics and related disciplines; an understanding of the current state of research investigations in the field; an ability to synthesize information and apply foundational concepts to identify key areas for innovative investigation and experimentation; and the knowledge to design, execute and interpret experiments and publish studies that address the questions identified.
3. Students will develop skills in various means of communicating core knowledge in the field and the details of experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

1. Problem-solving and analytical skills: Degree candidates will demonstrate an appropriate level of skill to identify and address scientific questions and utilize appropriate analytical methods and tools.
  - a. Problem-solving skills include the ability to: (1) effectively identify and select meaningful problems to be addressed in research studies; (2) define and state the hypotheses to be tested and their significance; (3) develop, justify and execute experimental and analytical methods to address the research questions identified; and (4) appropriately maintain complete records of experimental protocols, experimental data and working results of data analysis in order to document the accuracy and reproducibility of the studies and scientific publications.
  - b. Analytical skills include the ability to: (1) interpret information and quantitative data relevant to studies in physiology and biophysics, including by effectively using software and other analytical tools and by applying appropriate statistical tests to ensure data are robust; (2) connect rationales to experimental approaches; (3) draw reasonable conclusions from the evidence obtained and consider alternative interpretations; and (4) identify limitations in the experimental design and interpretation.
2. General knowledge of sciences and integration skills: Students will demonstrate an appropriate level of knowledge in related disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills include selection of content, organization and logical flow of ideas, and development of clear and professional presentations using appropriate language and incorporating appropriate visual aids.
  - b. Written communication skills include an appropriate use of grammar, syntax, spelling and vocabulary to effectively present written information in scientific style including the use of figures, tables and citations.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

Additional information is summarized under the Education tab on the departmental website (<https://physiology.vcu.edu/education/>). Feel free to contact the graduate program coordinator with any questions.

#### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan. 15	

### Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form. For further information see, the Biomedical Sciences Doctoral Portal (<https://medschool.vcu.edu/education/bsdpl/>).

In addition to the general admission requirements of the VCU Graduate School (<https://www.vcu.edu/admissions/apply/graduate/>), applicants to the BSDP must have earned a baccalaureate (i.e. bachelor's) degree (or higher) in the biological, chemical or related sciences by the time of enrollment. Successful applicants will have completed undergraduate courses in biology, chemistry through organic chemistry and mathematics often through calculus. Typically, the school targets applicants with minimum grade point averages of 3.3 and substantial research experience in a biological, biomedical or chemical laboratory setting. International applicants must have a minimum score of 100 on the TOEFL or 6.5 on the IELTS. The school takes a holistic approach when evaluating applications, though, and strength in one or more aspects of an application can compensate for another area that is not as well-developed.

### Degree requirements

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking and required course work represents only one component. Each student's program is tailored to meet their particular interests, with the primary emphasis on developing research skills and the capacity for independent scholarship.

Opportunities for research experience begin in the first year, when students spend time working in several faculty laboratories of their choice. These lab rotations enable students to examine faculty research projects, experimental approaches and laboratory environment and to select an area of specialization. In the second and subsequent years, increasingly more time is devoted to independent research under the guidance of a faculty adviser. Department-sponsored seminars and other activities give students opportunities to discuss their research interests with visiting scientists and to present their research both internally and at national professional meetings.

**The Ph.D. program in physiology and biophysics normally takes at least four years to complete.** The first two years are devoted mainly to course work. The first year consists primarily of required courses, while the second is geared toward electives and research. On satisfactory completion of two years of course work, students must pass written and oral comprehensive examinations to qualify for degree candidacy. Following admission to candidacy, each student must conduct a substantial original research project, prepare a written dissertation,

present their work in a seminar and defend it successfully in an oral examination.

In addition to the general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), students must complete a minimum of 66 credit hours for the Ph.D., including directed research.

To gain teaching experience, Ph.D. students are expected to serve as teaching assistants for PHIZ 206 for one semester.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOC 503	Biochemistry, Cell and Molecular Biology	5
BIOC 504	Biochemistry, Cell and Molecular Biology	5
IBMS 600	Laboratory Safety	1
IBMS 620	Laboratory/Clinical Rotations (repeated 3 times for 6 credits total)	6
PHIS 501	Mammalian Physiology	5
PHIS 650	Critical Thinking in Physiology	1
PHIS 689	Physiology Preseminar Highlights (one-credit course, required each Fall and Spring semester)	4
PHIS 690	Physiology Research Seminar (one-credit course, required each Fall and Spring semester)	4
PHIS 695	Research in Progress (0.5-credit course, required each Fall and Spring semester)	2
<b>Required additional courses</b>		
OVPR 601 or OVPR 602 or OVPR 603	Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research	1
<b>Elective courses</b>		
Select six credits from the following or as recommended by the graduate advisory committee and approved by the graduate program director:		6
IBMS 635	Cellular Signalling	
PHIS 604	Cell Physiology: Cardiovascular and Respiratory	
PHIS 606	Molecular Basis for Disease	
PHIS 607	Cell Physiology: GI and Endocrine	
PHIS 612	Cardiovascular Physiology	
PHIS 615	Signal Detection in Sensory Systems	
PHIS 620	Ion Channels in Membranes	
PHIS 630	Methods in Molecular Biophysics: A Practical Approach	
<b>Dissertation research</b>		
PHIS 697	Directed Research in Physiology (variable credit course, required each semester)	26
Total Hours		66

The minimum total of graduate credit hours required for this degree is 66.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Physiology and Biophysics, Master of Science (M.S.)

### Program goal

The master's program in physiology and biophysics is designed to provide students with the skills required to advance to positions as physiology and bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of physiology and bioscience, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

1. Problem-solving and analytical skills: Degree candidates will demonstrate an appropriate level of skill to identify and address scientific questions and utilize appropriate analytical methods and tools.
  - a. Problem-solving skills include the ability to: (1) define and state the hypotheses to be tested and their significance; (2) execute experimental and analytical methods to address the research questions; and (3) appropriately maintain complete records of experimental protocols, experimental data and working results of data analysis in order to document the accuracy and reproducibility of the studies and scientific publications.

- b. Analytical skills include the ability to: (1) interpret information and quantitative data relevant to studies and apply appropriate statistical tests to ensure data are robust; (2) connect rationales to experimental approaches; (3) draw reasonable conclusions from the evidence obtained; and (4) identify limitations in the experimental design and interpretation.
2. General knowledge of sciences and integration skills: Students will demonstrate an appropriate level of knowledge in their individual area of scholarship and related disciplines, including an appropriate familiarity with and understanding of the relevant research literature.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
  - a. Oral communication skills include selection of content, organization and logical flow of ideas, and development of clear and professional presentations using appropriate language and incorporating appropriate visual aids.
  - b. Written communication skills include an appropriate use of grammar, syntax, spelling and vocabulary to effectively present written information in scientific style, including the use of figures, tables and citations.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall (preferred)	Jun 1	GRE, MCAT or DAT
	Summer	Apr 1	

In addition to the general admission requirements of the VCU Graduate School (p. 34), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.0
2. GRE scores of at least 153 on verbal, 155 on quantitative, 4.0 on analytical writing components. GRE requirements for international students may vary. For students not taking the GRE, MCAT scores of at least 501 or DAT scores of at least 19.
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT) or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and course work in physics, molecular and cellular biology and calculus are desirable. Previous research experience is also desirable.

A personal statement describing the applicant's research experience and interests, as well as letters of reference from previous supervisors, are helpful in determining an applicant's suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

## Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two

years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

## Degree requirements

The Department of Physiology and Biophysics offers courses of study leading to the Master of Science and the Doctor of Philosophy. A combined M.D.-Ph.D. degree program is also available through this department and the School of Medicine. It is generally recommended that students intending to pursue careers as professional physiologists should attempt to earn the Ph.D. Work done in partial or complete fulfillment of the requirements for the master's degree may be applied toward the Ph.D. provided that it is of adequate quality.

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking and required course work represents only one component. Each student's program is tailored to meet their particular interests, with the primary emphasis on developing research and scholarship skills.

The M.S. degree program includes a first year comprising mainly didactic course work and a second year largely devoted to the completion of an independent research project under the guidance and in the laboratory of a chosen adviser. Many applicants who are admitted have successfully completed VCU's Certificate in Pre-medical Graduate Health Sciences program. A number of the certificate program's courses overlap with the first-year didactic requirements or electives and can satisfy those requirements; this allows students to start their M.S. training and research in the summer following completion of the certificate program. Additional information may be found on the department's website (<https://physiology.vcu.edu/education/>) or applicants may contact the graduate program director.

In addition to successfully competing required course work and electives, students are required to prepare a thesis based on their laboratory research and successfully present and defend their thesis in an oral defense.

In addition to the general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), students must complete a minimum of 30 graduate credit hours, including directed research, to earn an M.S. in Physiology and Biophysics.

## Teaching experience

M.S. students may have the opportunity to acquire teaching experience and financial support by serving as teaching assistants for PHIZ 206 for undergraduates. Contact the program coordinator or graduate program director in advance of the beginning of classes for additional information.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOC 503	Biochemistry, Cell and Molecular Biology	5
BIOC 504	Biochemistry, Cell and Molecular Biology	5
IBMS 600	Laboratory Safety	1
PHIS 501	Mammalian Physiology	5
PHIS 650	Critical Thinking in Physiology	1
PHIS 690	Physiology Research Seminar (one-credit course taken twice)	2
<b>Required additional courses</b>		
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	
<b>Elective courses</b>		
Select six credits from the following or as recommended by the graduate advisory committee and approved by the graduate program director:		6
IBMS 635	Cellular Signalling

## Pre-medical Graduate Health Sciences, Certificate in (Post-baccalaureate graduate certificate)

### Program goal

The pre-medical graduate health sciences certificate program in the School of Medicine provides an advanced level of didactic training in the biomedical sciences to enhance the preparation of students for a variety of career options, particularly professional degree training (i.e. M.D./D.O., D.D.S., M.S. and Ph.D.). The program also provides the opportunity for the development of an informed approach to the admission process in professional and/or advanced degree training to enhance the prospect of advancement.

### Student learning outcomes

1. Achievement of a threshold competency in the basic health sciences: The candidate will achieve/surpass expectations of a threshold-level competency in the basic health sciences, particularly in areas related to gaining admission to professional and/or higher-level degree programs.
2. MCAT/DAT preparation: The candidate will be prepared to take and/or retake standardized tests. The candidate will achieve a score that fulfills medical or dental school admission requirements.
3. Preparation for career advancement: The candidate who meets the threshold competency objective will display an enhanced level of advancement to higher levels of professional and/or advanced degree training.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### Applying to professional school and advanced graduate degree programs

Students must follow admission guidelines for applications to the M.D./D.O., M.S., D.D.S. and other programs. Completion of the certificate program does not afford a guaranteed admission to professional training programs at VCU. Exceptional performance, 3.5 GPA and a 28 MCAT guarantees an interview at VCU School of Medicine. Similar criteria increase eligibility for an interview at the VCU School of Dentistry.

**Advising:** Students are encouraged to seek opportunities for academic, personal and professional development from the Division for Academic Success, Career Services and the CERT Program Office. For students who choose to take a year off between CERT and professional school, several School of Medicine professors hire students for research positions and area hospitals offer SCRIBE programs that actively recruit VCU graduates. The CERT Program Office can also help identify possibilities.

**Letters of reference:** The CERT program adviser will provide a letter of reference for professional school applications. Students must schedule an appointment to interview with the program adviser for a letter.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	Jul 16	GRE, MCAT or DAT no more than five years old; TOEFL for international students
	Spring	Nov 15	

## Special requirements

- While there is no official deadline for applying to the certificate program, the school strongly recommends applicants have all materials into the graduate admissions office by July 16 (for fall semester matriculation) or Nov. 15 (for spring semester matriculation) to ensure that the file can be processed in time for the appropriate semester. The program has rolling admissions for a limited number of positions.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 34).

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must complete a minimum of 27 graduate credit hours of course work with a minimum final GPA of 3.0 (4.0 scale). The curriculum is composed of three required courses (15 credit hours) and 12 credit hours of electives spread over two semesters. The curriculum should be completed in one academic year (fall and spring semester).

Required and elective courses are drawn from departments within the School of Medicine: the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. All courses are held on the MCV Campus. In addition to the elective courses shown other courses may be applied as electives with the approval of the course director.

## Public Health, Master of (M.P.H.)

### Program accreditation

Council on Education for Public Health

### Program goal

The mission of the VCU M.P.H. program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster life-long inquiry and discovery that improve human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. This program is designed to provide students with the skills required to advance to a broad spectrum of positions as public health practitioners who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development as necessary
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

### Student learning outcomes

Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level assessed by program faculty as competent or higher, according to the program rubric.
2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a level assessed by program faculty as competent or higher, according to the program rubric.
3. Development of competencies: Through program course work and applied experiences, students will develop competence in the

discipline of public health as demonstrated through annual self-assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program's integrated learning experience, the capstone project.

4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program's accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mph-program/competencies/>).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

The M.P.H. program student handbook is available upon request.

Apply online at [sophas.org](http://www.sophas.org) ([http://www.sophas.org/](http://www.sophas.org)) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.H.	Fall	Mar 1	GRE; TOEFL or IELTS for international students

In addition to the general admission requirements of the VCU Graduate School (p. 34), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. GRE: Applicants must provide current GRE test results (taken within the past five years).
3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. The PTE is also accepted with a minimum score of 65. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement covering the following issues in two to five pages:
  - a. Description of the applicant's career goals
  - b. Why the applicant wishes to pursue an M.P.H. degree
  - c. How an M.P.H. degree will help the applicant achieve her/his career goals
  - d. Description of applicant's particular areas of interest in public health (e.g., maternal and child health, epidemiology)
  - e. Why VCU's M.P.H. program best fits the student's public health interests
  - f. What applicant plans to do in the first few years after graduation

## Degree requirements

The mission of the Master of Public Health program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster lifelong inquiry and discovery that improve human health. The program prepares students committed to public health careers in the public, private or nonprofit sectors. The M.P.H. program provides a rigorous curriculum to help students develop analytic and critical-reasoning skills to improve population health. The program boasts experiential learning, a

highly interactive environment, accessible and approachable faculty and student involvement in significant projects.

In addition to general VCU Graduate School graduation requirements (p. 31), a minimum of 45 credit hours of formal course work is required, including:

1. 25 credits minimum of core didactic course work
2. 14 credits minimum of elective course selections
3. An internship, typically conducted in the summer between the first and second year
4. A capstone project planned and implemented in the second year of the program

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

## Curriculum requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS 543	Graduate Research Methods I	3
BIOS 544	Graduate Research Methods II	3
EPID 547	Applied Data Analysis Lab I	1.5
EPID 548	Applied Data Analysis Lab II	1.5
EPID 571	Principles of Epidemiology	3
EPID 580	Public Health Ethics	1
EPID 593	Foundations of the Public Health Profession	2
EPID 604	Principles of Environmental Health	3
HCPR 601	Introduction to Health Policy	3
IPEC 501	Foundations of Interprofessional Practice	1
SBHD 605	Introduction to Social and Behavioral Health	3
<b>Elective courses</b>		
Select a minimum of 14 credit hours of course work chosen according to the area(s) of interest in public health. These may include the following courses:		14
BIOS 535	Behavioral Measurement	
BIOS 549	Spatial Data Analysis	
BIOS 571	Clinical Trials	
CCTR 630	Design Implications in Clinical Trials	
CCTR 631	Adaptive Clinical Trials	
EPID 594	MPH Practicum	
EPID 600	Introduction to Public Health	
EPID 601	Contemporary Issues and Controversies in Public Health	
EPID 603	Public Health Policy and Politics	
EPID 606	Epidemiologic Methods	
EPID 622	Maternal and Child Health	
EPID 623	Injury and Violence Epidemiology	
EPID 624	Chronic Disease Epidemiology	
EPID 645	Public Health Genomics	
EPID 646	Epidemiology of Psychiatric and Substance Use Disorders	
EPID 691	Special Topics	

EPID 692	Independent Study
GRAD 614	Introduction to Grant Writing
GRTY 501	Physiological Aging
GRTY 510	Aging
GRTY 603	Social Gerontology
GRTY 604	Problems, Issues and Trends in Gerontology
HEMS 505	Contemporary Issues in Health
HEMS 550	Exercise, Nutrition and Weight Management
HEMS 604	Nutrition for Health and Physical Activity
HEMS 605	Psychology of Physical Activity
HEMS 606	Psychosocial Aspects of Sport and Physical Activity
HGEN 501	Introduction to Human Genetics
HGEN 502	Advanced Human Genetics
HGEN 611	Data Science I
HGEN 620	Principles of Human Behavioral Genetics
HSEP 601	Emergency Management: Response Planning and Incident Command
HSEP 603	Risk Assessment
HSEP 650	Public Health Preparedness
PSYC 660	Health Psychology
SBHD 630	Theoretical Foundations of Social and Behavioral Health

SOCY 633	Application of the Policy Process to Issues of Violence
SOCY 634	Social Contexts of Childhood and Violence
SOCY 635	Theorizing Gender Violence
SOCY 645	The Sociology of Health and Illness
URSP 521	Introduction to Geographic Information Systems
URSP 621	Introduction to Geographic Information Systems

URSP 622	Community Socioeconomic Analysis Using GIS	
URSP 625	Spatial Database Management and GIS Modeling	
<b>Applied and integrative experience courses</b>		<b>6</b>
EPID 693	Public Health Internship	
EPID 694	MPH Capstone Project	
Total Hours		45

**The minimum total of graduate credit hours required for this degree is 45.**

**Public health internship:** The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student's progress. Students work a minimum of 180 hours in a professional public health organization.

**Capstone project:** The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student's academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report
4. Needs assessment for a specific population
5. Development, implementation and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

Students are expected to maintain satisfactory academic progress on the capstone project; such progress entails completing the capstone project according to the timeline included in the student's proposal for the capstone project (typically in no more than one-to-two semesters). Exceptions beyond this time limit must be approved by the student's adviser and the graduate program director, based on the student's submission to the adviser of a written explanation for the delay in

progress. This written explanation must include a plan for completing the project, developed by the student with adviser input and approval.

## Satisfactory academic progress

Satisfactory academic progress in the M.P.H. program may be assessed on multiple factors. These factors include professional conduct including communication with the adviser about capstone project progress or other relevant work; honor policy adherence and academic conduct; and continuous enrollment compliance. Students are notified of faculty assessment of their progress and performance in the program via semi-annual advising letters provided after the fall and spring semesters. In addition, special advising letters may be issued outside of this cycle if additional guidance or notification of unsatisfactory academic progress is necessary.

## Non-didactic program requirements

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Documented attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

## Public Health, Master of (M.P.H.) with a concentration in applied public health

### Program accreditation

Council on Education for Public Health

## Program goal

The mission of the VCU M.P.H. program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster life-long inquiry and discovery that improve human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. The applied public health concentration is designed to provide students with the skills required to advance to a broad spectrum of positions as public health practitioners who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions

4. Apply results of evaluations and data analyses to policy development
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

## Student learning outcomes

Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level assessed by program faculty as competent or higher, according to the program rubric.
2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a level assessed by program faculty as competent or higher, according to the program rubric.
3. Development of competencies: Through program course work and applied experiences, students will develop competence in the discipline of public health as demonstrated through annual self-assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program's integrated learning experience, the capstone project.
4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program's accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mph-program/competencies/>).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate**

**School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

## Public Health, Master of (M.P.H.) with a concentration in epidemiology

#### Program accreditation

Council on Education for Public Health

### Program goal

The mission of the VCU M.P.H. program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster life-long inquiry and discovery that improve human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. The epidemiology concentration is designed to provide students with the skills required to advance to a broad spectrum of positions as public health researchers, epidemiologists, or data analysts who can perform the following:

1. Collect, analyze and evaluate public health data
2. Select and apply epidemiologic methods appropriate for the disease topic
3. Plan, implement and evaluate public health interventions
4. Apply results of research and data analyses to policy development as necessary
5. Effectively communicate results of research to a wide variety of audiences

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

### Student learning outcomes

Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level

assessed by program faculty as competent or higher, according to the program rubric.

2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a level assessed by program faculty as competent or higher, according to the program rubric.
3. Development of competencies: Through program course work and applied experiences, students will develop competence in the discipline of public health as demonstrated through annual self-assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program's integrated learning experience, the capstone project.
4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program's accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mph-program/competencies/>).

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the [academic regulations section for additional information on degree candidacy requirements](#).

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section for additional information on graduation requirements](#).

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

The M.P.H. program student handbook is available upon request.

**Apply online** at [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.H.	Fall	Mar 1	GRE; TOEFL or IELTS for international students

In addition to the general admission requirements of the VCU Graduate School (p. 34), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. GRE: Applicants must provide current GRE test results (taken within the past five years).
3. TOEFL: International students must submit TOEFL or IELTS scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0. The PTE is also accepted with a minimum score of 65. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement covering the following issues in two to five pages:
  - a. Description of the applicant's career goals
  - b. Why the applicant wishes to pursue an M.P.H. degree
  - c. How an M.P.H. degree will help the applicant achieve her/his career goals
  - d. Description of applicant's particular areas of interest in public health (e.g., maternal and child health, epidemiology, community engagement)
  - e. Why VCU's M.P.H. program best fits the student's public health interests
  - f. What applicant plans to do in the first few years after graduation

## Degree requirements

The mission of the Master of Public Health program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster lifelong inquiry and discovery that improve human health. The program prepares students committed to public health careers in the public, private or nonprofit sectors through a rigorous curriculum that helps students develop analytic and critical-reasoning skills to improve population health. The M.P.H. program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in significant projects.

In addition to general VCU Graduate School graduation requirements (p. 31), a minimum of 45 credit hours of formal course work is required, including:

1. 25 credits minimum of core didactic course work
2. 14 credits minimum of concentration course work, including elective course selections
3. An internship, typically conducted in the summer between the first and second year
4. A capstone project planned and implemented in the second year of the program

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

## Curriculum requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS 543	Graduate Research Methods I	3
BIOS 544	Graduate Research Methods II	3
EPID 547	Applied Data Analysis Lab I	1.5
EPID 548	Applied Data Analysis Lab II	1.5
EPID 571	Principles of Epidemiology	3
EPID 580	Public Health Ethics	1
EPID 593	Foundations of the Public Health Profession	2
EPID 604	Principles of Environmental Health	3

HCPR 601	Introduction to Health Policy	3
IPEC 501	Foundations of Interprofessional Practice	1
SBHD 605	Introduction to Social and Behavioral Health	3
<b>Required additional courses</b>		
EPID 606	Epidemiologic Methods	3
EPID 620	Cancer Epidemiology	3
or EPID 645	Public Health Genomics	
or EPID 646	Epidemiology of Psychiatric and Substance Use Disorders	
EPID 624	Chronic Disease Epidemiology	3
<b>Elective courses</b>		
Select a minimum of five credit hours of course work chosen according to the area(s) of interest in public health. These may include the following courses:		5
BIOS 535	Behavioral Measurement	
BIOS 549	Spatial Data Analysis	
BIOS 571	Clinical Trials	
CCTR 630	Design Implications in Clinical Trials	
CCTR 631	Adaptive Clinical Trials	
EPID 594	MPH Practicum	
EPID 600	Introduction to Public Health	
EPID 601	Contemporary Issues and Controversies in Public Health	
EPID 603	Public Health Policy and Politics	
EPID 622	Maternal and Child Health	
EPID 623	Injury and Violence Epidemiology	
EPID 691	Special Topics	
EPID 692	Independent Study	
GRAD 614	Introduction to Grant Writing	
GRTY 501	Physiological Aging	
GRTY 510	Aging	
GRTY 603	Social Gerontology	
GRTY 604	Problems, Issues and Trends in Gerontology	
HEMS 505	Contemporary Issues in Health	
HEMS 550	Exercise, Nutrition and Weight Management	
HEMS 604	Nutrition for Health and Physical Activity	
HEMS 605	Psychology of Physical Activity	
HEMS 606	Psychosocial Aspects of Sport and Physical Activity	
HGEN 611	Data Science I	
HGEN 620	Principles of Human Behavioral Genetics	
HSEP 601	Emergency Management: Response Planning and Incident Command	
HSEP 603	Risk Assessment	
HSEP 650	Public Health Preparedness	
PSYC 660	Health Psychology	
SBHD 630	Theoretical Foundations of Social and Behavioral Health	

SBHD 632	Health Disparities and Social Justice	
SBHD 636	Community-based Participatory Research	
SBHD 638	Applications in Qualitative Research Methods	
SOCY 510	Domestic and Sexual Violence in Social Context	
SOCY 524	Aging and the Minority Community	
SOCY 603	Seminar in Population Studies	
SOCY 607	Seminar in Racial and Ethnic Relations in America	
SOCY 611	Studies in the Community	
SOCY 620	Seminar in Criminology	
SOCY 624	Community and Community Services for the Elderly	
SOCY 632	Intimate Partner and Sexual Violence: Medical Practice and Policy	
SOCY 633	Application of the Policy Process to Issues of Violence	
SOCY 634	Social Contexts of Childhood and Violence	
SOCY 635	Theorizing Gender Violence	
SOCY 645	The Sociology of Health and Illness	
URSP 521	Introduction to Geographic Information Systems	
URSP 621	Introduction to Geographic Information Systems	
URSP 622	Community Socioeconomic Analysis Using GIS	
URSP 625	Spatial Database Management and GIS Modeling	
<b>Applied practice and integrative learning courses</b>		
EPID 693	Public Health Internship	3
EPID 694	MPH Capstone Project	3
Total Hours		45

**The minimum total of graduate credit hours required for this degree is 45.**

**Public health internship:** The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student’s progress. Students work a minimum of 180 hours in a professional public health organization.

**Capstone project:** The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student’s academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both

broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report
4. Needs assessment for a specific population
5. Development, implementation and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

Students are expected to maintain satisfactory academic progress on the capstone project; such progress entails completing the capstone project according to the timeline included in the student's proposal for the capstone project (typically in no more than one-to-two semesters). Exceptions beyond this time limit must be approved by the student's adviser and the graduate program director, based on the student's submission to the adviser of a written explanation for the delay in progress. This written explanation must include a plan for completing the project, developed by the student with adviser input and approval.

## Satisfactory academic progress

Satisfactory academic progress in the M.P.H. program may be assessed on multiple factors. These factors include professional conduct including communication with the adviser about capstone project progress or other relevant work; honor policy adherence and academic conduct; and continuous enrollment compliance. Students are notified of faculty assessment of their progress and performance in the program via semi-annual advising letters provided after the fall and spring semesters. In addition, special advising letters may be issued outside of this cycle if additional guidance or notification of unsatisfactory academic progress is necessary.

## Non-curricular program requirements

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Documented attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

### Contact

Juan Lu, Ph.D., M.P.H., M.D.

### Additional contact

Lisa S. Anderson

Director of educational programs, Division of Epidemiology, Department of Family Medicine and Population Health  
 lisa.s.anderson@vcuhealth.org

(804) 628-2512

**Program website:** [www.epidemiology.vcu.edu/education/mph/](http://www.epidemiology.vcu.edu/education/mph/) (<http://www.epidemiology.vcu.edu/education/mph/>)

## Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [dual degree]

### Program accreditation

Council on Education for Public Health (M.P.H.)  
 Council on Social Work Education (M.S.W.)

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the "dual degree" for at least one semester.

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the appropriate application portal indicated in the admission requirements section of this Bulletin and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study.

## Dual degree efficiencies

Students are required to complete a minimum of 45 M.S.W. credit hours and a minimum of 37 M.P.H. credit hours for the dual degree program. In the M.P.H. program, the curriculum includes 25 credit hours of core and required courses, a minimum of nine credit hours in the applied public health concentration and a minimum of three credit hours of a capstone project that examines a relevant public health topic. These courses within the M.S.W. curriculum count toward the M.P.H. degree:

Course	Title	Hours
SLWK 601	Human Behavior in the Social Environment I	3
SLWK 606	Policy, Community and Organizational Practice II	3
SLWK 793	Concentration Field Instruction I	3

These courses within the M.P.H. curriculum count toward the M.S.W. degree:

Course	Title	Hours
BIOS 544	Graduate Research Methods II	3
EPID 571	Principles of Epidemiology	3

EPID 600	Introduction to Public Health	3
EPID 622	Maternal and Child Health	3

If students were to complete both degrees independently, a minimum total of 105 graduate credit hours would be required.

Note that some elective courses may not be available in certain years or may require instructor permission for registration. During the third and last year of study, dual degree students are placed in internships through the School of Social Work that focus on public health; the internship placement is approved by both the M.P.H. program director and the director of the M.S.W. field instruction. With adviser approval, the student may develop a capstone project based on work in this public health/social work placement.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

**For the M.P.H., apply online at** [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>) and submit a supplemental VCU application (available on the department website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/apply-now/>)) following instructions available at [sophas.org](http://www.sophas.org); **for the M.S.W., apply online at the** Graduate Admissions website (<http://www.graduate.admissions.vcu.edu>).

Please review the admission requirements for each stand-alone degree (Master of Public Health and Master of Social Work) in the VCU Graduate Bulletin to learn the specific application requirements for each program.

## Curriculum requirements

Course	Title	Hours
<b>Program core</b>		
BIOS 543	Graduate Research Methods I	3
BIOS 544	Graduate Research Methods II	3

SLWK 713	Social Work Planning and Administrative Practice II	
SLWK 793	Concentration Field Instruction I	3
SLWK 794	Concentration Field Instruction II	3
Select an M.P.H. concentration (applied public health shown):		
EPID 600	Introduction to Public Health	
EPID 603	Public Health Policy and Politics	
EPID 622	Maternal and Child Health	
<b>Integrative learning course</b>		
EPID 694	MPH Capstone Project	3
<b>Noncurricular requirements</b>		
In addition to course work, students must attend 12 public health seminars and complete 20 hours of community-based service-learning.		
Total Hours		82

The minimum total of graduate credit hours required for the dual degree M.P.H./M.S.W. is 82.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

## Social and Behavioral Sciences, Doctor of Philosophy (Ph.D.)

### Program goal

#### Training to be social and behavioral scientists

Students in the doctoral program in social and behavioral sciences will acquire the skills to become scientists, educators and scientists/administrators in a broad spectrum of positions and settings. Students will gain a progressive mastery of the current state of the subject matter in the social and behavioral sciences, an ability to synthesize the information and apply this foundation to the identification of key areas of investigation/experimentation and the ability to design and interpret studies that address the questions identified. In addition, students will develop the various means of communicating core social and behavioral science knowledge and particular study designs, results and interpretations to a variety of audiences.

### Student learning outcomes

1. Analytical thinking: Students will demonstrate an appropriate level of ability to interpret information relevant to social and behavioral science, to connect rationales to procedures and evidence to findings, to draw reasonable conclusions, and to generate and evaluate alternate explanations.
2. Integrated knowledge of social and behavioral science: Students will demonstrate an appropriate level of knowledge of the current elements of the social and behavioral sciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique.
3. Oral communication skills: Students will demonstrate the achievement of an appropriate level of skill in the oral communication of social and behavioral science subject matter with respect to content, organization, logical flow, presentation, use of language and incorporation of visual aids in formal and collaborative communication.
4. Study design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement study protocols and to design and develop studies.
5. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, vocabulary and use of figures, tables and citations to effectively present social and behavioral science information.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all

graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

### School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

**Apply online at** [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 9 (Priority consideration given to applications received by the deadline. Interviews will be conducted in February and March.)	GRE

## Special requirements

- M.P.H. or equivalent M.A. or M.S. degree

Applicants must meet all general admission requirements of the VCU Graduate School (p. 34).

## Degree requirements

The Ph.D. program in social and behavioral sciences, the only one of its kind in Virginia, prepares students to conduct theoretically based research and interventions on the social and behavioral determinants of health and disease. In addition to the general VCU Graduate School graduation requirements (p. 31), a minimum of 54 post-master's credit hours is required for the doctoral degree, which is expected to involve four years of full-time study.

## Course requirements

Course	Title	Hours
<b>Required core courses</b>		
BIOS 543	Graduate Research Methods I	3
BIOS 544	Graduate Research Methods II	3
SBHD 609	Research Methods in Social and Behavioral Health I	3
SBHD 619	Research Methods in Social and Behavioral Health II	3

**Shumei S. Sun, Ph.D.**

Professor and chair

[biostatistics.vcu.edu](http://www.biostatistics.vcu.edu/) (<http://www.biostatistics.vcu.edu/>)

The Department of Biostatistics is committed to excellence in providing a graduate training program, conducting multidisciplinary collaborative biomedical research and developing new statistical methods. The department offers M.S. and Ph.D. programs in biostatistics, with concentrations in genomic biostatistics concentration at both levels and an additional concentration in clinical research and biostatistics at the master's level. The majority of the department's graduate students are supported through collaborative projects and partnerships with industry. The department also has a National Research Service Award pre-doctoral training program funded by the National Institute of Environmental Health Sciences. The purpose of this award is to train students to develop analytic methods for the study of chemical mixtures and analysis of toxicogenomic data. One faculty member also has a regular research grant funded in this area by the NIEHS.

- Biostatistics, Doctor of Philosophy (Ph.D.) (p. 596)
- Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics (p. 599)
- Biostatistics, Master of Science (M.S.) (p. 601)
- Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics (p. 603)
- Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics (p. 606)

## Department of Family Medicine and Population Health

**Anton J. Kuzel, M.D.**

Professor and chair

[familymedicine.vcu.edu](http://www.familymedicine.vcu.edu/) (<http://www.familymedicine.vcu.edu/>)

The Department of Family Medicine and Population Health hosts both a robust residency program for family physicians and academic programs at the graduate level dealing with critical issues in public health. Within the department, the Division of Epidemiology integrates research, education and public health service programs. The department offers a Ph.D. degree in epidemiology along with a fully accredited Master of Public Health degree. Close ties to the Virginia Department of Health allow opportunities for students to immerse themselves in experiential learning with these public health partners. The doctoral training program in epidemiology cultivates public health scientists equipped to use state-

of-the-art research methods for the purpose of advancing fundamental knowledge of issues central to the improvement of population health.

- Epidemiology, Doctor of Philosophy (Ph.D.) (p. 608)
- Public Health, Master of (M.P.H.) (p. 660)
- Public Health, Master of (M.P.H.) with a concentration in applied public health (p. 663)
- Public Health, Master of (M.P.H.) with a concentration in epidemiology (p. 667)
- Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [combined] (p. 670)
- Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.) [combined] (p. 637)
- Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [combined] (p. 651)

## Department of Health Behavior and Policy

**Vanessa Sheppard, Ph.D.**

Professor and chair

[hbp.vcu.edu \(http://hbp.vcu.edu/\)](http://hbp.vcu.edu/)

The Department of Health Behavior and Policy's mission is to transform the health landscape through multidisciplinary research, education and service. The department's research identifies the behavioral, social, organizational and policy factors that affect the health of individuals and populations. Faculty members and students utilize rigorous quantitative and qualitative methods and engage diverse communities to develop and evaluate programs and policies designed to promote health, improve health care delivery and reduce health disparities. Research findings inform the translation of effective programs and policies into practice. The department provides training to and promotes excellence in the next generation of health behavior and policy practitioners, educators and scientists.

- Healthcare Policy and Research, Doctor of Philosophy (Ph.D.) (p. 617)
- Social and Behavioral Sciences, Doctor of Philosophy (Ph.D.) (p. 672)

## Department of Human and Molecular Genetics

**Paul B. Fisher, Ph.D.**

Professor and chair

[gen.vcu.edu \(http://www.gen.vcu.edu/\)](http://www.gen.vcu.edu/)

The Department of Human and Molecular Genetics provides multifaceted research activities focusing on important areas of current medical and basic research. Our faculty members conduct research and clinical and educational activities at the VCU Medical Center, the Virginia Institute for Psychiatric and Behavioral Genetics and the VCU Institute of Molecular Medicine. Genetic counselors and medical genetics faculty conduct their outpatient counseling, medical genetics practice and inpatient pediatrics service at the VCU Medical Center and affiliated outpatient clinics.

- Genetic Counseling, Master of Science (M.S.) (p. 612)
- Human Genetics, Doctor of Philosophy (Ph.D.) (p. 619)

- Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics (p. 621)
- Human Genetics, Master of Science (M.S.) (p. 627)
- Human Genetics, Master of Science (M.S.) with a concentration in genomic data science (p. 629)
- Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree] (p. 624)

## Department of Microbiology and Immunology

**Dennis E. Ohman, Ph.D.**

Professor and chair

[microbiology.vcu.edu \(http://microbiology.vcu.edu/\)](http://microbiology.vcu.edu/)

The Department of Microbiology and Immunology is focused on research, cutting-edge technologies and educational programs with emphasis on microbial pathogens, cancer and the host immune defense system, which protects individuals from disease. The training is rigorous, emphasizing conceptual and experimental strategies using state-of-the-art technologies in modern facilities.

Departmental microbiologists study the molecular mechanisms by which microorganisms (i.e., bacteria, viruses, fungi and parasites) colonize a host, evade the immune response and cause damage. Immunologists in the department study the molecular and cellular mechanisms by which the immune response either defends the host against pathogens or goes awry, such as with an allergic reaction. Many of the department's molecular cell biologists are studying the fundamentals of cancer and new therapeutic approaches. All conduct research using the tools of molecular biology, genetics, cell culture, infection models, transgenic animals and bioinformatics.

A major goal of the department is to train the next generation of research scientists. Ph.D. students and postdoctoral fellows work alongside principal investigators to test hypotheses of medical importance. Laboratory training is supplemented with rigorous course work, seminars, journal clubs and lab meetings. Most trainees present their research findings at national and international meetings.

- Microbiology and Immunology, Doctor of Philosophy (Ph.D.) (p. 640)
- Microbiology and Immunology, Master of Science (M.S.) (p. 643)

## Department of Pathology

**Charles V. Clevenger, M.D., Ph.D.**

Professor and chair

[pathology.vcu.edu \(http://www.pathology.vcu.edu/\)](http://www.pathology.vcu.edu/)

The Department of Pathology is a diverse clinical, research and teaching department within the School of Medicine. The department offers a full range of pathology services to physicians, researchers and patients at the VCU Health System, a 780-bed tertiary-care urban teaching hospital dedicated to serving the patients and physicians of central Virginia. The 47 faculty members supervise 14 hospital laboratories including histopathology, neuropathology, cytopathology, autopsy pathology, molecular diagnostics, cytogenetics, hematology, coagulation, microbiology, immunology, clinical chemistry, toxicology and transfusion medicine staffed by more than 350 hospital employees. The department

faculty conduct a robust array of research programs in numerous areas and participate in student training through a variety of mechanisms.

## Department of Pharmacology and Toxicology

**William L. Dewey, Ph.D.**

Professor and chair

pharmtox.vcu.edu (<https://pharmtox.vcu.edu/>)

The Department of Pharmacology and Toxicology is home to a community of researchers, students and faculty who strive to improve the treatment of medical disorders through a better understanding of the pharmacology of agents and by developing safer and more effective drugs. The department has educated alumni who have gone on to distinguished careers in government, academia and the private sector as researchers, educators and consultants. The work these students do at VCU and beyond has the potential to improve the health and well-being of people all over the world.

- Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) (p. 647)
- Pharmacology and Toxicology, Master of Science (M.S.) (p. 649)

## Department of Physiology and Biophysics

**Clive M. Baumgarten, Ph.D.**

Professor and interim chair

physiology.vcu.edu (<http://www.physiology.vcu.edu/>)

The Department of Physiology and Biophysics brings a long tradition to the study of physiology that spans the entire spectrum from molecules to man. Strong research programs exist in molecular biophysics, cardiovascular and gastrointestinal physiology as well as in chemical senses. Faculty recruitments are ongoing in two areas: structural biology, which aims to understand function in terms of structure, and systems physiology, which aims to elucidate fundamental ways of communication within and between physiological systems. Biophysical approaches serve as the common language used at all levels of scientific inquiry. The department offers a strong collegial atmosphere where faculty, students, postdoctoral fellows and administrators work together to promote and share in the discovery of fundamental principles governing life processes.

- Physiology and Biophysics, Doctor of Philosophy (Ph.D.) (p. 654)
- Physiology and Biophysics, Master of Science (M.S.) (p. 656)

## Department of Radiation Oncology

**Mitchell Anscher, M.D.**

Florence and Hyman Meyers Endowed Chair

The Department of Radiation Oncology is a key unit in the Massey Cancer Center, a National Cancer Institute-designated unit directed to the delivery of effective treatment modalities, research critical to improvement in the treatment of cancer and the education of physicians and scientists who specialize in this critical area. The department includes a Clinical Division, focusing on the delivery of advanced radiotherapy services to patient populations, the Division of Molecular Radiobiology and Targeted Imaging, conducting research to refine the understanding of the cellular response to radiation and the development of functional targeted imaging to enhance therapy, and the Division of Medical Physics, which integrates

research into methods to improve radiotherapy with Ph.D. training in medical physics.

- Medical Physics, Doctor of Philosophy (Ph.D.) (p. 632)
- Medical Physics, Master of Science (M.S.) (p. 635)
- Medical Physics, Certificate in (Post-baccalaureate graduate certificate) (p. 631)

# SCHOOL OF NURSING

The School of Nursing originated in 1893 as part of the University College of Medicine. Since then, the educational program has evolved from a basic diploma program to multiple programs at the baccalaureate, master's- and doctoral-degree levels. Additionally, the School of Nursing offers post-master's certificate programs. The School of Nursing takes pride in its long history of service to the profession of nursing and continues to be a leader in nursing education in Virginia.

## Administration

1100 East Leigh Street  
Box 980567  
Richmond, Virginia 23298-0567  
(804) 828-0724  
Fax: (804) 828-7743  
nursing.vcu.edu (<http://www.nursing.vcu.edu>)

**Jean Giddens, Ph.D., RN, FAAN**  
Dean

**Debra Barksdale, Ph.D., FNP-BC, CNE, FAANP, FAAN**  
Professor and associate dean of academic programs

**Suzanne Ameringer, Ph.D., RN**  
Professor and interim associate dean for research

**Jeannetta Hollins, Ph.D.**  
Assistant dean, Office of Student Success

## Accreditation

The baccalaureate degree in nursing, master's degree in nursing, post-master's certificate program and the Doctor of Nursing Practice program at the VCU School of Nursing are accredited by the Commission on Collegiate Nursing Education (<http://www.aacn.nche.edu/ccne-accreditation/>).

The pre-licensure nursing program is approved by the Virginia Board of Nursing (<http://www.dhp.virginia.gov/nursing/>).

## Programs

The School of Nursing offers Bachelor of Science, Master of Science, graduate certificate, post-master's certificate, Doctor of Philosophy and Doctor of Nursing Practice programs. Curricula and admissions information pertaining to all of these programs is available on this website and may be accessed using the program index feature at the top of this page.

Further information may be obtained by visiting the School of Nursing website (<http://www.nursing.vcu.edu/>) or by writing to Virginia Commonwealth University, School of Nursing, Office of Student Success, Box 980567, Richmond, VA 23298-0567.

## Facilities and resources

The faculty and administrative offices of the school are housed at 1100 E. Leigh St. Additionally, this building has a nursing clinical resource laboratory and classrooms equipped with a full range of audiovisual equipment. Both graduate and undergraduate courses are also scheduled in other classrooms on campus.

The clinical laboratories for nursing courses are conducted at the VCU Medical Center and in numerous other urban and rural hospitals and health agencies in the area, including community medical centers and state hospitals, public health services, private clinics and offices, and federal and state centers and departments. These facilities provide generalized and specialized inpatient and ambulatory services. Students are given a range of diverse experiences in hospital and community-oriented nursing. Selection of specific facilities for student experience is based upon curricular and advanced-practice certification requirements, the educational needs of the individual student and the services available.

## Financial assistance

Applications for financial assistance must be filed for all forms of financial assistance. A Free Application for Federal Student Aid may be obtained from the Office of Financial Aid, Virginia Commonwealth University, Richmond, VA 23298-0244 or online at [fafsa.ed.gov](https://fafsa.ed.gov) (<https://fafsa.ed.gov>).

Financial assistance is available through scholarships, fellowships and assistantships administered by the School of Nursing. Additional information may be found on the school's website (<https://nursing.vcu.edu/admission/scholarships-and-financial-aid/>).

## Departments

### Department of Adult Health and Nursing Systems

**Beth Rodgers, Ph.D., RN, FAAN**  
Professor and chair

### Department of Family and Community Health Nursing

**Christine Wynd, Ph.D., RN**  
Professor and chair

## Graduate information

### Nondegree-seeking students

Students who have not been admitted to a graduate program in nursing may be admitted to individual courses. Permission to register for courses is granted at the discretion of the School of Nursing. Only six credits earned as a nondegree-seeking student can be applied to the master's degree. Only three credits may be earned by post-master's students prior to admission.

## Enrollment

Students may begin study during the fall semester. Students will have an academic adviser appointed and will follow the standard program of study. Once admitted, students are expected to abide by enrollment policies of the Graduate School.

## Health Care Innovation, Certificate in (Graduate certificate) [School of Nursing]

The Certificate in Health Care Innovation is a collaboration between the VCU School of Nursing and the VCU da Vinci Center for Innovation. The graduate certificate will prepare students to become leaders in

developing digital and physical products and innovative solutions in the area of health care. Students will acquire skills and knowledge necessary to identify problems and implement solutions that foster high-quality, safe and accessible health care. The curriculum focuses on merging principles of leadership in health care and principles of product innovation and emphasizes the analysis of organization and clinical processes for effective operations to improve quality and safety. The specialized knowledge and skills include problem identification, product development, user analysis, prototyping, testing, marketing, intellectual property protection (patents, copyrights and trademarks) and commercialization opportunities.

## Student learning outcomes

Graduates will:

1. Acquire skills and knowledge necessary to identify problems and implement solutions that foster high quality, safe and accessible health care
2. Develop specialized skills and knowledge to lead health care teams in innovation

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Visit the **School of Nursing website** for program-specific application instructions (<https://nursing.vcu.edu/admission/application-instructions/certificate-in-health-care-innovation/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	All	Rolling admissions made on a space-available basis	

The admission requirements outlined below will apply to all students. All applicants to the graduate certificate program are required to meet the **admission requirements of the VCU Graduate School**. Applicants will be required to submit the following materials to Graduate Admissions:

- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official undergraduate transcripts from all schools attended
- A statement of purpose outlining career goals, strengths and skills that will be brought to a team and how life experience has shaped the applicant's perspective
- A resume or CV stating relevant work experience in health care and any additional experience in design, business, engineering, product development, innovation and/or entrepreneurship

The VCU School of Nursing and the VCU da Vinci Center for Innovation require students to have a bachelor's degree with evidence of strong academic performance.

No transfer credit hours are accepted for this certificate program. Credits applied to a degree already awarded cannot be applied toward the certificate.

International students will submit an official transcript evaluation from a recognized foreign educational credential evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program.

International applicants must also provide additional information with the application according to the English language proficiency guidelines for those who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/graduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/graduate-applicants/).)

In addition to the general admission requirements of the VCU Graduate School (<http://graduate.admissions.vcu.edu/apply/>), the following requirements represent the standards for admission:

1. Applicants from a health care background must be in good standing with licensing and certifying bodies as applicable.
2. Select applicants will complete a scheduled interview with the graduate admissions committee.

## Degree requirements

Students will complete course work to develop specific knowledge and skills in leadership and processes related to development and implementation of innovative solutions to health care issues such as rising costs and improving quality and access to care. The curriculum focuses on merging principles of leadership in health care and principles of health care innovation while emphasizing the analysis of organization

and clinical processes for effective operations to improve quality and safety. Problem identification, product development, user analysis, prototyping, testing, marketing and commercialization opportunities will be emphasized.

## Curriculum requirements

Course	Title	Hours
<b>Nursing courses</b>		
Select six credits from:		6
NURS 515	Holistic Leadership in Health Care Delivery	
NURS 517	Organizational Science Implications for Human and Material Resource Management	
NURS 603	Improvement Science and Outcomes Management	
<b>Innovation courses</b>		
Select six credits from option A or B		6
<b>Option A</b>		
INNO 502	Business Principles for Product Innovation	
INNO 600	Integrative Design Studio	
INNO 691	Topics in Product Innovation	
<b>Option B</b>		
INNO 651	Master's Project in Product Innovation <sup>1</sup>	
Total Hours		12

1

Students obtain all skills and knowledge needed to develop a project within this course.

**The minimum total of graduate credit hours required for this certificate is 12.**

## Nursing, Certificate in (Post-master's certificate) with a concentration in adult-gerontology acute care nurse practitioner

The VCU School of Nursing adult-gerontology acute care nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to manage acutely ill adults, ranging from adolescents to the elderly, through all phases of their hospitalization. Students learn to manage patients through comprehensive physical and

psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies. Graduates of the AGACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The AGACNP generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

Graduates of the AGACNP concentration are eligible to apply for certification as an AGACNP by the American Nurses Credentialing Center or the American Association of Critical-Care Nurses.

## Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

## Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the **School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/post-masters-certificate/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Spring or fall	Rolling admissions	

**Note: There are no specific test requirements for this certificate.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a completed application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and

the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)

6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>).
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry

## Degree requirements

Twenty-five graduate credit hours are required for the post-master's Certificate in Nursing with a concentration in adult-gerontology acute care nurse practitioner.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the post-master's Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Curriculum requirements

Students in nurse practitioner certification concentrations are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

Course	Title	Hours
NURS 611	Primary Care Advanced Practice Clinical Procedures	1
NURS 612	Acute Care Advanced Practice Clinical Procedures	1
NURS 618	Diagnosis and Management in Adult-Gerontology Acute Care I	3
NURS 619	Acute and Complex Health Conditions of the Adult-Gerontology Population	3
NURS 620	Gero-pharmacology	1
NURS 662	Care of the Adult-Gerontology Population in the Critical Care Setting	4

## Nursing, Certificate in (Post-master's certificate) with a concentration in family nurse practitioner

The VCU School of Nursing family nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to diagnose and manage common acute and chronic health problems across the lifespan through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The FNP is prepared to provide direct care to individuals and families in a variety of primary care settings, including college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, urgent care and private practices.

Graduates of the FNP concentration are eligible to apply for certification as a FNP by the American Nurses Credentialing Center or the American Academy of Nurse Practitioners.

### Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

### Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems

1. Be eligible for readmission or in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a completed application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)
6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>).
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry

## Degree requirements

Twenty-seven graduate credit hours are required for the post-master's Certificate in Nursing with a concentration in family nurse practitioner.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the post-master's Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in

absentia unless written request is made to the dean and permission is granted.

## Curriculum requirements

Students in nurse practitioner certification concentrations are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

Course	Title	Hours
NURS 611	Primary Care Advanced Practice Clinical Procedures	1
NURS 627	Foundational Perspectives of Family-centered Care	2
NURS 629	Diagnosis and Management in Family Primary Care I	4
NURS 630	Diagnosis And Management In Family Primary Care II	4
NURS 631	Primary Care of Select Populations	2
NURS 643	Family Primary Care Practicum I	6
NURS 644	Family Primary Care Seminar	1
NURS 645	Family Primary Care Practicum II	6
NURS 646	Family Primary Care Final Synthesis Seminar	1
Total Hours		27

**The minimum total of graduate credit hours required for this certificate is 27.**

## Nursing, Certificate in (Post-master's certificate) with a concentration in psychiatric-mental health nurse practitioner

The psychiatric-mental health nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills in areas of mental health promotion, as well as mental illness prevention, assessment, diagnosis, treatment and patient education in the care of individuals across the lifespan. Students are exposed to a unique balance of neuroscience, psychological theory and evidence-based practice. Students crystalize their understanding of this content through the use of simulation, interactive case study, discussion board activity, individual and group-based projects, writing assignments, testing and supervised practicum experiences. Informed by

a balanced approach to care, students receive focused instruction in both psychotherapy and psychopharmacotherapy.

The PMHNP is prepared to assess, diagnose, treat and educate individuals, families and groups with complex psychiatric-mental health problems and do so with an interprofessional lens of quality and safety. PMHNPs work in clinical settings that include private, state or Veterans Affairs in-patient or outpatient psychiatric facilities, private psychiatric practices, and community mental health centers. PMHNPs also provide services in settings such as correctional facilities, domestic violence shelters, residential substance abuse facilities and schools.

Graduates of the PMHNP concentration are eligible to apply for the Psychiatric and Mental Health Nurse Practitioner certification exam administered by the American Nurses Credentialing Center.

## Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

## Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

**Visit the School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/post-masters-certificate/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Spring or fall	Rolling admissions	

**Note: There are no specific test requirements for this certificate.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a completed application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](#) (<http://www.cgfn.org/>) and

the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)

6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry

## Degree requirements

Twenty-three graduate credit hours are required for the post-master's Certificate in Nursing with a concentration in psychiatric-mental health nurse practitioner.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the post-master's Certificate in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Curriculum requirements

Students in nurse practitioner certification concentrations are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

Course	Title	Hours
NURS 635	Advanced Practice Psychiatric Mental Health Nursing Practicum I	6
NURS 636	Advanced Practice Psychiatric Mental Health Nursing Seminar	3
NURS 637	Advanced Practice Psychiatric Mental Health Nursing Practicum II	6
NURS 656	Diagnosis and Management of Psychiatric Disorders Across the Lifespan	4
NURS 657	Advanced Practice Psychiatric Mental Health Nursing: Theory and Practice Across the Lifespan	4
Total Hours		23

The minimum total of graduate credit hours required for this certificate is 23.

## Nursing, Doctor of Philosophy (Ph.D.) with a concentration in biobehavioral research

The VCU School of Nursing Doctor of philosophy program in nursing prepares scholars to develop knowledge in the discipline of nursing to become teacher-scholars or pioneering researchers committed to the highest ideals of nursing excellence. The program examines knowledge development in nursing through an understanding of the impact of a wide range of historical influences on the discipline and through analysis of how emerging societal issues influence knowledge development. Knowledge in the humanities and social sciences and an understanding of knowledge development in other disciplines is viewed as foundational to a full understanding of knowledge development in nursing. Methodologic competency (i.e., knowledge of research designs, methodologies and tools) is also essential to a full understanding of the scope, range and path of knowledge development and the relevance to nursing practice.

The online Ph.D. program includes a combination of online courses and on-campus immersions each semester to offer students a dynamic, interactive learning experience that will prepare them to become nurse scholars and scientists. This format is designed to expand the Ph.D. program's reach to a wider range of highly motivated, independent students who aspire to become scholars, make a significant difference in the field of nursing and study with nationally recognized nurse scientists.

During the first year of the B.S. to Ph.D. option, there are some required face-to-face courses.

## Student learning outcomes

Graduates will be able to:

1. Synthesize and critically appraise extant knowledge and theory
2. Design, conduct and disseminate theoretically sound research that is relevant, rigorous, culturally competent and consistent with standards of scientific integrity
3. Lead and collaborate in team science to develop knowledge that enhances health in ways that reflect nursing's unique perspective
4. Communicate effectively to the scientific community, policy-makers and the public through appropriate scholarly mechanisms

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

### Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university

must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Rolling admissions	

**Note: No admissions test is required for this program.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet general admission requirements of the VCU Graduate School (p. 34)
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate and/or a master's degree, one of which must be in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA) (Graduates of international nursing schools and applicants who have studied outside of the U.S. are required to provide a course-by-course external credential evaluation from a VCU-recognized professional evaluator. The professional evaluation may not be older than two years at the time of application.)
5. Have completed a minimum of three credit hours in statistics with a minimum grade of B
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Students without an R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools \(http://www.cgfn.org/\)](http://www.cgfn.org/) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)
8. Complete a personal interview

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the B.S. to Ph.D. program.

### Degree requirements

A minimum of 58 graduate credit hours are required for the Ph.D. in Nursing program. Students entering the B.S.-to-Ph.D. option will complete an additional nine credits of course work for a total of 67 credits. Additionally, these students will take some required face-to-face courses during their first year of enrollment.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the doctoral degree in nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for course work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled, all fees to the university have been paid and electronic copies of the dissertation have been submitted. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Curriculum requirement

Total Hours		58

<sup>1</sup>

Of the six credits of methods courses and six credits of electives, a minimum of six credits may be taken in a discipline other than nursing. Electives must be approved by the student's adviser.

**The minimum total of graduate credit hours required for this degree is 58.**

## Comprehensive examination requirements

The purpose of the comprehensive examination is to test synthesis of foundational knowledge in preparation for launching a program of scholarship as a beginning scientist. Three knowledge domains are critical: a) theory and philosophy, b) qualitative and c) quantitative methodological approaches. The student's area of study is incorporated into these three domains. The comprehensive exam consists of two components, a written and an oral component, both of which must be

passed. The oral exam will be conducted with the student either in person or via video conference.

## Dissertation requirements

The student must conduct a substantial independent investigation and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. Satisfactory completion of the comprehensive examination and a satisfactory oral defense of the dissertation proposal are required prior to commencement of actual work outlined in the proposal. Once approved, the dissertation proposal is similar to a formal contract between the student and dissertation committee about the nature of the dissertation.

The dissertation committee must consist of a minimum of four members. A member of the graduate faculty of the School of Nursing who has an established program of research and prior experience on dissertation committees must chair a student's dissertation committee. Other committee members must include one faculty member from the student's focus area and one member from outside the School of Nursing. The dissertation committee is approved by the associate dean for academic programs in the School of Nursing. An oral defense of the dissertation is conducted by the student's dissertation committee. The student is responsible for preparing the dissertation in accordance with the most current version of the Graduate School Thesis and Dissertation Manual (<http://graduate.vcu.edu/media/graduate-school/docs/pdf/ThesisandDissertationManualUPDATED5-18-16.pdf>).

## Nursing, Doctor of Philosophy (Ph.D.) with a concentration in health care quality research

The VCU School of Nursing Doctor of philosophy program in nursing prepares scholars to develop knowledge in the discipline of nursing to become teacher-scholars or pioneering researchers committed to the highest ideals of nursing excellence. The program examines knowledge development in nursing through an understanding of the impact of a wide range of historical influences on the discipline and through analysis of how emerging societal issues influence knowledge development. Knowledge in the humanities and social sciences and an understanding of knowledge development in other disciplines is viewed as foundational to a full understanding of knowledge development in nursing. Methodologic competency (i.e., knowledge of research designs, methodologies and tools) is also essential to a full understanding of the scope, range and path of knowledge development and the relevance to nursing practice.

The online Ph.D. program includes a combination of online courses and on-campus immersions each semester to offer students a dynamic, interactive learning experience that will prepare them to become nurse scholars and scientists. This format is designed to expand the Ph.D. program's reach to a wider range of highly motivated, independent students who aspire to become scholars, make a significant difference in the field of nursing and study with nationally recognized nurse scientists.

During the first year of the B.S. to Ph.D. option, there are some required face-to-face courses.

## Student learning outcomes

Graduates will be able to:

1. Synthesize and critically appraise extant knowledge and theory
2. Design, conduct and disseminate theoretically sound research that is relevant, rigorous, culturally competent and consistent with standards of scientific integrity
3. Lead and collaborate in team science to develop knowledge that enhances health in ways that reflect nursing's unique perspective
4. Communicate effectively to the scientific community, policy-makers and the public through appropriate scholarly mechanisms

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

## Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

**Visit the School of Nursing website** for application instructions (<http://nursing.vcu.edu/admission/application-instructions/phd/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Rolling admissions	

**Note: No admissions test is required for this program.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet general admission requirements of the VCU Graduate School (p. 34)
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate and/or a master's degree, one of which must be in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA) (Graduates of international nursing schools and applicants who have studied outside of the U.S. are required to provide a course-by-course external credential evaluation from a VCU-recognized professional evaluator. The professional evaluation may not be older than two years at the time of application.)
5. Have completed a minimum of three credit hours in statistics with a minimum grade of B
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without an R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and

the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)

7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>).
8. Complete a personal interview

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the B.S. to Ph.D. programs.

## Degree requirements

A minimum of 58 graduate credit hours are required for the Ph.D. in Nursing program. Students entering the B.S.-to-Ph.D. option will complete an additional nine credits of course work for a total of 67 credits. Additionally, these students will take some required face-to-face courses during their first year of enrollment.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the doctoral degree in nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for course work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled, all fees to the university have been paid and electronic copies of the dissertation have been submitted. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

<b>Concentration courses</b>		
NURS 731	Foundations in Health Care Quality Research	3
NURS 732	Advanced Concepts in Health Care Quality Research	3

**Electives**

Select courses designed to support the area of study.<sup>1</sup> 6

**Dissertation**

NURS 898	Dissertation	12
Total Hours		58

<sup>1</sup>

Of the six credits of methods courses and six credits of electives, a minimum of six credits may be taken in a discipline other than nursing. Electives must be approved by the student's adviser.

**The minimum total of graduate credit hours required for this degree is 58.**

**Comprehensive examination requirements**

The purpose of the comprehensive examination is to test synthesis of foundational knowledge in preparation for launching a program of scholarship as a beginning scientist. Three knowledge domains are critical: a) theory and philosophy, b) qualitative and c) quantitative methodological approaches. The student's area of study is incorporated into these three domains. The comprehensive exam consists of two components, a written and an oral component, both of which must be passed. The oral exam will be conducted with the student either in person or via video conference.

**Dissertation requirements**

The student must conduct a substantial independent investigation and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. Satisfactory completion of the comprehensive examination and a satisfactory oral defense of the dissertation proposal are required prior to commencement of actual work outlined in the proposal. Once approved, the dissertation proposal is similar to a formal contract between the student and dissertation committee about the nature of the dissertation.

The dissertation committee must consist of a minimum of four members. A member of the graduate faculty of the School of Nursing who has an established program of research and prior experience on dissertation committees must chair a student's dissertation committee. Other committee members must include one faculty member from the student's focus area and one member from outside the School of Nursing. The dissertation committee is approved by the associate dean for academic programs in the School of Nursing. An oral defense of the dissertation is conducted by the student's dissertation committee. The student is responsible for preparing the dissertation in accordance with the most current version of the Graduate School Thesis and Dissertation Manual (<http://graduate.vcu.edu/media/graduate-school/docs/pdf/ThesisandDissertationManualUPDATED5-18-16.pdf>).

## Nursing, Master of Science (M.S.) with a concentration in adult-gerontology acute care nurse practitioner

The VCU School of Nursing adult-gerontology acute care nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to manage acutely ill adults, ranging from adolescents to the elderly, through all phases of their hospitalization. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies. Graduates of the AGACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The AGACNP generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

Graduates of the AGACNP concentration are eligible to apply for certification as an AGACNP by the American Nurses Credentialing Center or the American Association of Critical-Care Nurses.

### Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

### Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking

applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

**Visit the School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/masters/>).

#### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Rolling admissions	

**Note: No admissions test is required for this program.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate (or higher) degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have completed a minimum of three credit hours in statistics with a minimum grade of B
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>).

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the master's program.

## Degree requirements

Forty-four graduate credit hours are required for the adult-gerontology acute care nurse practitioner concentration.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses

4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Nursing, Master of Science (M.S.) with a concentration in family nurse practitioner

The VCU School of Nursing family nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to diagnose and manage common acute and chronic health problems across the lifespan through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The FNP is prepared to provide direct care to individuals and families in a variety of primary care settings, including college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, urgent care and private practices.

Graduates of the FNP concentration are eligible to apply for certification as a FNP by the American Nurses Credentialing Center or the American Academy of Nurse Practitioners.

### Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

### Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

### Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

## Nursing, Master of Science (M.S.) with a concentration in nursing leadership and organizational science

The Nursing Leadership and Organizational Science (NLOS) concentration at the VCU School of Nursing equips registered nurses with the knowledge and skills needed to transform the healthcare delivery system and sustain quality health outcomes across populations. NLOS students are educated in leading innovation and change, organization and improvement science, clinical and fiscal operations, system design, quality and safety evaluation, and project management. NLOS courses focus on skills for creating safe, healthy environments that support the work of the health care team, contribute to patient engagement, and improve the patient experience and health outcomes. Students

build on core content through elective options in the topic areas of innovation and system management. The skills acquired in the NLOS concentration support a flexible and rewarding career path as they are transferable to a variety of roles and practice settings. An online delivery model is used to deliver course content with a short 1 or 2 day face-to-face component each semester. Students also complete a precepted practicum experience.

Graduates of the NLOS concentration are prepared to succeed as nurse leaders and administrators across all levels of the healthcare system. Graduates are eligible, depending on employment role and work history, to apply for nursing administration certification exams offered through the American Nurses Credentialing Center of the American Nurses Association and the American Organization for Nursing Leadership.

## Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

## Nursing, Master of Science (M.S.) with a concentration in psychiatric-mental health nurse practitioner

The psychiatric-mental health nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills in areas of mental health promotion, as well as mental illness prevention, assessment, diagnosis, treatment and patient education in the care of individuals across the lifespan. Students are exposed to a unique balance of neuroscience, psychological theory and evidence-based practice. Students crystalize their understanding of this content through the use of simulation, interactive case study, discussion board activity, individual and group-based projects, writing assignments, testing and supervised practicum experiences. Informed by a balanced approach to care, students receive focused instruction in both psychotherapy and psychopharmacotherapy.

The PMHNP is prepared to assess, diagnose, treat and educate individuals, families and groups with complex psychiatric-mental health problems and do so with an interprofessional lens of quality and safety. PMHNPs work in clinical settings that include private, state or Veterans Affairs in-patient or outpatient psychiatric facilities, private psychiatric practices, and community mental health centers. PMHNPs also provide services in settings such as correctional facilities, domestic violence shelters, residential substance abuse facilities and schools.

Graduates of the PMHNP concentration are eligible to apply for the Psychiatric and Mental Health Nurse Practitioner certification exam administered by the American Nurses Credentialing Center.

## Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

## Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the **School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/masters/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Rolling admissions	

**Note: No admissions test is required for this program.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate (or higher) degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have completed a minimum of three credit hours in statistics with a minimum grade of B

6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools \(http://www.cgfns.org/\)](http://www.cgfns.org/) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the master's program.

## Degree requirements

Forty-four graduate credit hours are required for the psychiatric-mental health nurse practitioner concentration.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Curriculum requirements

Course	Title	Hours
<b>Core courses</b>		
NURS 502	Advanced Pharmacology	3
NURS 504	Advanced Pathophysiology	3
NURS 511	Advanced Health Assessment	3
NURS 512	Foundations for Evidence-based Advanced Practice	3
NURS 520	Professional Transitions for the Advanced Practice Nurse	2
NURS 607	Epidemiology and Population Health	3
NURS 638	Health Policy Leadership and Advocacy	3
NURS 640	Teamwork In Complex Clinical Situations	3
<b>Concentration courses</b>		
NURS 521	Psychiatric Disorders Across the Lifespan	4

NURS 522	Psychopharmacology for Advanced Practice	3
NURS 597	Psychiatric Mental Health Practicum I	2
NURS 598	Managing Psychiatric Disorders in Special and Vulnerable Populations	2
NURS 602	Psychotherapy: Theory and Practice	2
NURS 641	Psychiatric Mental Health Practicum II	4
NURS 659	Psychiatric Mental Health Practicum III	4
Total Hours		44

**The minimum total of graduate credit hours required for this degree is 44.**

## Nursing Practice, Doctor of (D.N.P.)

Building on the strength of the Magnet-designated VCU Health System and the School of Nursing's Langston Center for Quality, Safety and Innovation, this program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. The Institute of Medicine's 2011 report "The Future of Nursing: Leading Change, Advancing Health" noted that nurses have a critical role in transforming today's increasingly complex health care system and called for increased education to provide nurses with key knowledge and skills to expand their influence. In order to meet this charge, graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for sustainable best practices in clinical settings and influencing health policy.

Further, graduates of VCU's School of Nursing D.N.P. program will be prepared to engage in evidence-based, clinically focused scholarship. With support from the Langston Center, students will design, implement and evaluate innovative projects that advance quality and safety science.

Designed to accommodate master's-prepared nurses already established in advanced practice registered nurse or nurse executive positions, the D.N.P. program is planned as a post-master's degree requiring completion of a minimum of 39 credits. While the traditional plan of study follows an eight-semester format, an accelerated option is also available. The program will employ an online format with students coming to campus three times per year.

The D.N.P. offers is a solution-focused program designed to prepare nurses to lead interprofessional efforts to develop patient quality and safety innovations, influence policy change in the transformation of health care systems and ensure ethical stewardship in practice. The program seeks to foster and broaden inquiry that sparks new insights as students make connections across disciplines to improve health care and its delivery. Building on the university's mission to improve human health,

VCU D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

## Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

## Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Demonstrate strategic management skills in systems-based care delivery models and approaches designed to promote quality, safety and excellence in nursing practice
2. Assume a leadership role in the development, implementation and evaluation of health policies that improve quality and safety in health care systems
3. Translate and disseminate evidence-based practices to improve health care outcomes and reduce disparities
4. Integrate professional intra- and interdisciplinary best practices to create collaborative sustainable practice change
5. Integrate knowledge of specialized nursing practice with knowledge from other sciences as the basis for the highest level of nursing practice
6. Lead efforts to preserve, promote and improve the health of specialty populations
7. Use health information technology to promote best practices in health care systems
8. Ensure fiscal accountability when planning practice initiatives that will improve the quality of care delivery
9. Demonstrate advanced levels of ethical and moral judgment and decision-making

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

**Visit the School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/dnp/>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
D.N.P.	Fall or spring	Rolling admissions	

**Note: No admissions test is required for this program.**

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the general admission requirements of the VCU Graduate School (p. 34)
3. Submit a complete application with all required materials to the School of Nursing

4. Have an earned master's or doctoral degree with a cumulative GPA of 3.0
5. Have an earned nursing degree at the baccalaureate level or above from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a current R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools \(http://www.cgfn.org/\)](http://www.cgfn.org/) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)
8. Complete a personal interview

Note: Requests for exceptions to the above criteria will be considered on a case-by-case basis.

## Degree requirements

A minimum of 39 graduate credit hours are required for the Doctor of Nursing Practice program.

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the D.N.P. degree must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work and D.N.P. project

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

## Curriculum requirements

Course	Title	Hours
NURS 605	Statistical Methods for Quality Improvement	3
NURS 606	Evaluating Evidence to Improve Health Outcomes	3
NURS 607	Epidemiology and Population Health	3
NURS 608	Quality Improvement in Practice	3
NURS 610	Health Information and Emerging Health Care Technologies	3
NURS 621	Leadership and Organizational Systems	3
NURS 638	Health Policy Leadership and Advocacy	3

NURS 664	DNP Residency: Mentored Practicum	12
NURS 665	DNP Project I: Proposal Development	3
Elective chosen with adviser approval		3
Total Hours		39

The minimum total of graduate credit hours required for this degree is 39.

## Practice hours/residency requirement

"The Essentials of Doctoral Education for Advanced Nursing Practice" specifies the completion of 1,000 hours of practice post-baccalaureate as part of a supervised academic program. For post-master's D.N.P. programs, each institution is responsible for assessing how many relevant graduate clinical hours a student enters with and how many additional hours are required for the student to achieve the 1,000 clinical hour minimum upon degree completion. These hours are structured into the curriculum via 12 credits of residency courses. At the post-master's D.N.P. level, practice hours focus on developing the skills needed to lead efforts to improve care outcomes rather than direct clinical practice skills, as is the focus at the master's level. Experiences will be varied depending upon the student's abilities in relation to the D.N.P. essential competencies. For example, students may work with the quality improvement team in a particular setting to develop and implement an improvement initiative; they may develop an evidence-based practice guideline for a patient problem; or they may develop a policy change initiative in concert with their professional association. Practice experiences, settings and the focus of residency hours are individualized and developed mutually by the student and faculty adviser. Each residency course has individualized objectives, assignments and products that demonstrate student achievement of specific D.N.P. essential competencies. Qualified preceptors, based on their expertise and experience, will be identified to provide supervision as needed to support particular practice experiences. Students, preceptors and faculty advisers will all contribute to evaluation of student success in meeting the identified objectives developed for each residency course; final evaluation of all residency requirements is the responsibility of the faculty adviser for the course. Residency courses are graded on a pass-fail basis. The school has identified criteria that will trigger an adviser's decision to travel to the site for direct observation, such as preceptor concerns regarding student performance or unsatisfactory communications with student or preceptor that cannot be resolved by telephone or video conference. The completed assignments from each residency course culminate in a professional portfolio that demonstrates achievement of all residency course objectives by the completion of the 12 required residency credits.

## Project requirements

The D.N.P. program culminates in the successful completion of a scholarly work called the D.N.P. project. In collaboration with faculty and their project team, students design, implement and evaluate a quality/safety project that is focused in their specialized clinical area. The final product is a scholarly manuscript describing the project that is suitable for publication in a professional journal. The project teams consist of doctorally prepared content experts, one of whom must be from the practice site, and select faculty. The curriculum is designed so that students begin planning their D.N.P. project during initial course work and complete the project in their final semester of study. Dissemination of the D.N.P. project findings occur during the final semester as part of the course work.

# SCHOOL OF PHARMACY

The School of Pharmacy was established officially in 1898; the University College of Medicine had a school of pharmacy when it opened in 1893. The two-year curriculum gave way to a three-year program in 1925, and in 1932 the school required four years of college work and a Bachelor of Science degree was awarded. In 1960, the program lengthened to a five-year course leading to a Bachelor of Science in Pharmacy degree. In 1975 authority was granted to offer the Doctor of Pharmacy degree, which was initially offered to a small number of students who already completed four or five years of the B.S. program. A six-year program leading to the Doctor of Pharmacy degree was adopted as the only professional offering by the school in 1995. The School of Pharmacy currently enrolls students in a four-year professional Doctor of Pharmacy program curriculum following completion of at least 73 credits of pre-professional studies taken at VCU or elsewhere. In 1996 a part-time program was offered that permitted current Bachelor of Science in Pharmacy degree holders to earn the Doctor of Pharmacy degree in a nontraditional format requiring students to come to campus infrequently. This program was phased out in 2015 and no longer accepts students for enrollment. Since 1971, all pharmacy students have participated in a clerkship program (now referred to as advanced pharmacy practice experiences) during the final year of the curriculum. Beginning 2008, the school added introductory pharmacy practice experiences during the first three years of the program to gradually transition the student from the academic classroom setting into the practice arena. Students spend their final year in a variety of practice settings under the supervision of highly qualified faculty preceptors.

The authority to award graduate degrees in the pharmaceutical sciences was granted by the Graduate Council in 1952. Departments in the school have the responsibility for administering a graduate program leading to the M.S. and Ph.D. in Pharmaceutical Sciences. This program includes areas of specialization in medicinal chemistry, pharmaceuticals, pharmacotherapy and pharmacy administration. These programs provide the preparation and research experience for academic, governmental and industrial careers. Graduate degrees in pharmaceutical sciences do not provide eligibility for licensure as a pharmacist.

## Statement of purpose

The School of Pharmacy at VCU exists to provide exceptional programs benefiting the commonwealth of Virginia and society by offering the highest quality education and training for the development of health care practitioners, scientists, professional leaders and responsible citizens. These individuals are committed to shaping the health care world of tomorrow while serving society's health care needs today.

## Mission statement

### Mission

To achieve excellence in professional and graduate programs through innovative education and leading-edge research. We will achieve our mission by graduating outstanding future pharmacists and scientists who will improve human health, foster exemplary research and provide sustaining contributions to interprofessional patient care.

### Vision

A transformational leader in pharmacy education, clinical practice and clinical and pharmaceutical research.

## Core values

- Innovation**  
We encourage innovations and ideas that enhance the school's mission.
- Personal growth**  
We pursue professional growth and personal development that drives excellence.
- Integrity and respect**  
We demonstrate ethical behaviors, personal responsibility and respect for others.
- Collaboration**  
We embrace interprofessional and interdisciplinary collaboration in patient care, teaching, learning and research.
- Inclusive excellence**  
We promote an environment of engagement and inclusion that values the diversity and contributions of our students, staff, faculty and administrators.

## Philosophy

The School of Pharmacy has committed to developing progressive models of pharmacy practice while maintaining the foundational pharmaceutical sciences. In developing the curriculum of the school, the faculty recognizes that an educated person should be prepared to assume a responsible and rewarding role in society. The new paradigm of patient-centered, team-based care guides the school's curriculum committee and faculty in the design and implementation of the Doctor of Pharmacy curriculum. The curriculum is designed to provide a sound, scientific and professional background for both those who will enter the practice of pharmacy directly and those who wish to continue graduate education in the pharmaceutical sciences. It also includes courses in the arts and humanities in order to provide students with a broad educational base that will permit participation in community life, not only as a professional, but also as an informed, concerned citizen. The professional curriculum is rigorous and highly demanding of the student's time. The faculty has adopted educational outcomes for the curriculum that describe the knowledge, skills, behaviors, abilities and attitudes that promote holistic patient well-being expected of graduates to deliver the highest quality of direct patient care as an interprofessional team member.

## Facilities

The School of Pharmacy is located in the Robert Blackwell Smith Building at 12th and East Clay streets. This building — named in honor of a distinguished former dean of pharmacy, former president of the Medical College of Virginia and former provost of the MCV Campus — was completed in 1984 with the help of contributions from many alumni and friends of the School of Pharmacy. Additional classrooms, offices and laboratories are located in McGuire Hall and the Virginia BioTechnology Research Park, both located within a few blocks of the Smith Building.

Classes for students in pharmacy also are conducted in Sanger Hall, located between 11th and 12th streets on East Marshall Street, and McGuire Hall, located at the corner of 12th and Clay streets. In conjunction with VCU Health, students receive clinical experience in the hospitals and clinics on the MCV Campus. Other facilities available for teaching include area hospitals and pharmacies. The major library holdings are in the Tompkins-McCaw Library for the Health Sciences at 12th and East Clay streets.

Location in a major health sciences center provides excellent opportunities for interdisciplinary research and access to clinical facilities. The school is well equipped for graduate research and provides leadership to the VCU Institute for Structural Biology, Drug Discovery and Development at the Virginia BioTechnology Research Park. The school also supports the Center for Compounding Practice and Research, the Center for Biomarker Research and Precision Medicine, and the Center for Pharmacy Practice Innovation.

## Pharmaceutical Engineering, Doctor of Philosophy (Ph.D.) [School of Pharmacy]

The Ph.D. in Pharmaceutical Engineering will prepare students to respond to current, emerging and future challenges in the discovery, development and production of pharmaceutical products. The program will prepare talent and leaders who can pursue careers in industry and regulatory and nonprofit agencies, as well as academic settings that deal with drug products. Students will engage in a rigorous and cross-disciplinary educational experience that includes foundational and

research-area-specific course work; be empowered with the necessary tools to formulate and answer hypotheses-driven research questions in collaboration with mentors that have special expertise; engage in professional development opportunities to effectively promote and disseminate their work; and be immersed in a research and innovation environment of excellence.

Graduates will gain the necessary skills and scientific foundation to work in a team-based environment, seek entrepreneurial solutions, and effectively communicate concepts and results. The program will prepare students to work and innovate in areas that create medicines to improve human health including the pharmaceutical industry, medical nonprofits, universities and regulatory authorities.

## Student learning outcomes

- Students will demonstrate the knowledge and understanding of core concepts and processes necessary for developing pharmaceutical drug products.
- Students will be able to identify and solve problems in health care that are relevant to pharmaceutical engineering.
- Students will be able to develop entrepreneurial approaches to pharmaceutical engineering that may lead to innovation in the health care field.
- Students will be able to demonstrate the ability to carry out independent and collaborative work.
- Students will be able to communicate scientific knowledge and discoveries.
- Students will be able to demonstrate the ability to teach and mentor.
- Students will be able to demonstrate the ability to plan and execute research projects.
- Students will be able to demonstrate that they understand and will participate in community engagement/outreach.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree

candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	May 15	TOEFL or IELTS scores for non-native English speakers

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following are also required:

- Applicants must have graduated with a bachelor's degree or master's degree (or equivalent professional program) from an accredited college or university, with a degree in a discipline that provides an appropriate background for graduate-level study in pharmaceutical engineering, including but not limited to pharmacy, (bio)chemistry, bioengineering, chemical engineering, materials science, mechanical engineering, biomedical engineering and molecular biology.
- International applicants for whom English is not their native language must demonstrate language competency by achieving a minimum 100 points in TOEFL (BT). A bachelor's or graduate degree from an accredited U.S. institution along with an interview from a faculty member will be accepted in lieu of such an examination.
- Applicants must present a current resume or curriculum vita.
- Applicants must present transcripts (translated and validated if from abroad) from their bachelor's degree program and from any/all graduate programs the candidate may have attended.

Note: The GRE is not required but students are encouraged to submit their scores as additional evidence of their qualifications. Competitive scores are greater than 300 for combined Quantitative and Verbal and 4.0 Analytical score. The GRE cannot be used in place of other admissions requirements.

Transfer credits will be allowed. Students with an advanced degree (M.S. or equivalent professional program) from an accredited college

or university, with a degree in a discipline related to pharmaceutical engineering, including but not limited to pharmacy, chemistry, bioengineering, chemical engineering, materials science, mechanical engineering, biomedical engineering and molecular biology, may petition to transfer up to nine credits of elective courses. If the students have produced a thesis during their advanced studies, they may be eligible to transfer another nine credits of research.

## Curriculum requirements

The degree program has three entry points:

- B.S. entry point that will require a minimum of 83 credits to graduate
- M.S. without a thesis entry point that will require a minimum of 74 credits to graduate
- M.S. with a thesis entry point that will require a minimum of 63 credits to graduate

Regardless of the credits to degree, all students must satisfy common curriculum elements, including 12 credits of core courses. All of the courses in the curriculum ensure that students receive the necessary didactic instruction that will enable them to excel in the development of cutting-edge research in pharmaceutical engineering. The curriculum is highly flexible and consists of a combination of core courses, research area elective courses, electives and directed research. Students will develop a dissertation under the supervision of a faculty member, thus offering another opportunity for students to delve into a specific area while at the same time developing professional skills.

## Curriculum for students entering with a B.S. degree

Course	Title	Hours
<b>Core courses</b>		
OVPR 601	Scientific Integrity	1
PESC 605	Advanced Topics in Pharmaceutical Engineering I	3
PESC 607	Advanced Topics in Pharmaceutical Engineering II	3
PESC 609	Pharmaceutical Engineering Laboratory I	1
PESC 690	Pharmaceutical Engineering Seminar (.5-credit course taken six times)	3
PESC 709	Pharmaceutical Engineering Laboratory II	1
<b>Research area elective courses</b>

## Degree requirements

### Research adviser

Qualified students will be admitted to the Ph.D. program in pharmaceutical engineering upon selection by a pharmaceutical engineering graduate faculty member who is willing to serve as their major research adviser. In the event of admission without an adviser assignment, students will meet with all eligible graduate faculty and then select an adviser by the end of the first semester. The adviser is then responsible for providing the student guidance and counsel essential to scholarly development. The dissertation project will be designed by the student in consultation with the adviser. The student will be responsible for conducting research and promoting the work through peer-reviewed publications and presentations.

### The graduate student advisory committee

An advisory committee will be appointed shortly after (within the first year of study) the adviser has been selected and approved. The advisory committee serves as both an examining and consultative body. Together the adviser and the student will select the advisory committee members, which will need to be approved by the pharmaceutical engineering program directors. The advisory committee will consist of at least three graduate faculty members besides the adviser. The faculty members will have expertise in areas related to the student's dissertation work. One of the committee members must be from a program outside pharmaceutical engineering. The advisory committee will work with the adviser in guiding the student through the graduate program; the committee must meet formally once a year to ensure timely progress toward degree completion. The body of experimental work to be incorporated into the dissertation is subject to approval by the membership of the advisory committee, which will conduct the comprehensive (candidacy) exams, qualifying exam and final oral defense examinations.

### Admission to candidacy for Ph.D. degree

Students are admitted to candidacy based on completing required course work, the examinations described below and the recommendation of the adviser, advisory committee and the co-directors of the pharmaceutical engineering program. Advancement to candidacy should take place prior to initiating the third academic year in the program.

#### Part I – Qualifying examination

The qualifying examination consists of a combined written/oral examination to be taken prior to the second year in the program, and after clearing didactic core sequence and laboratories. A majority "pass" from the advisory committee is required for the student to advance. In case the student is not successful in the first iteration, a second examination with the same format will be automatically scheduled for the end of the following semester. Failing a second attempt will result in removal from the program. The written qualifying examination will consist of questions related to core classes and laboratory work, with the format to be determined by the faculty preparing the exams, which are the same as those administering the courses.

#### Part II – Written comprehensive examination

The written comprehensive examination is taken after successful completion of the qualifying examination. Comprehensive exams are administered to the Ph.D. student based on research proposals. The research proposal should follow the R21 (NIH) format exactly, including budget and other requirements. The topic of the proposal must be related to the student's doctoral dissertation project and agreed upon with the

adviser, particularly the aims of the proposal. The student's advisory committee will evaluate the written proposal and will grade as pass/fail.

### Oral comprehensive examination

After passing the written comprehensive examination(s), the student is eligible for the oral comprehensive examination, which is conducted by the advisory committee and is chaired by the student's adviser. The oral examination is administered to assess the ability of the candidate to integrate information and display an appropriate mastery of problem-solving capabilities. This is to be a defense of their written exam and can include questions related to general concepts in pharmaceutical engineering as well as those pertaining to the proposed work. Written and oral comprehensive exams must be taken by the end of the second year of study.

### Final Ph.D. examination and oral defense

The final examination requires the student to write a dissertation based on their research and defend it in an oral examination. On completion of their research, and in agreement with the adviser, the student shall prepare a written dissertation describing the completed research using the format approved by the Graduate School and submit it to the pharmaceutical engineering graduate program committee for approval. The student's advisory committee will select an appropriate external examiner to review the written dissertation and attend the dissertation defense. The oral defense of the dissertation under the direction of the student's advisory committee will be open to all faculty members and other graduate students; it will examine the student's project, intellectual context, and the underlying fundamental knowledge or contribution to science.

Following the defense, all committee members and the external examiner will vote on the acceptability of the dissertation. A student can pass the oral defense, signifying that the committee has accepted the dissertation project, with no more than one negative vote. If the outcome is negative, the final oral defense may be retaken with the approval of the directors of the pharmaceutical engineering program. Upon successful completion of the defense and dissertation, the student may apply for graduation from VCU with the degree of Ph.D. in Pharmaceutical Engineering.

## Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in medicinal chemistry

### Program goal

The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the doctoral level.

## Student learning outcomes

### 1. Knowledge of research in pharmaceutical sciences

The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.

### 2. Design experiments in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

### 3. Demonstrate appropriate communication skills

The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.

### 4. Identify problems in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

See the School of Pharmacy website for the process handbook (<https://pharmacy.vcu.edu/media/pharmacy/documents/GraduateHandbook.pdf>). Current graduate students (<https://pharmacy.vcu.edu/admissions/graduate/students/>) may visit the school's website for additional resources, and prospective students (<https://pharmacy.vcu.edu/admissions/graduate/>) may apply online.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 1	GRE, TOEFL (international applicants)

## Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), Ph.D. students in pharmaceutical sciences must complete a minimum of 30 graduate credit hours beyond the master's degree of required (both school and department core) and elective hours. All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below. Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived, students must still complete the minimum number of hours required for the degree.

## Curriculum requirements

Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived,

students must still complete the minimum number of hours required for the degree.

## Curriculum requirements

### Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

Course	Title	Hours
CHEM 409	Instrumental Analysis <sup>1</sup>	3
PCEU 507	Pharmaceutics and Biopharmaceutics I	3
PCEU 508	Pharmacokinetics	3
PCEU 509	Pharmaceutics and Biopharmaceutics II	3

<sup>1</sup>

Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below. Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived, students must still complete the minimum number of hours required for the degree.

## Curriculum requirements

Course	Title	Hours
<b>Program core</b>		
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	
PSCI 607	Introduction to Pharmaceutical Sciences From Bench to Shelf	2
PSCI 614	Research Techniques	1
PSCI 690	Seminars in the Pharmaceutical Sciences (one credit per semester)	4
<b>Concentration courses</b>		
BIOS 544	Graduate Research Methods II	3
or STAT 544	Statistical Methods II	
PHAR 626	Advanced Pharmacotherapy Research Methods	3
PHAR 637	Introduction to Research Methods in Pharmaceutical Sciences	3
<b>Electives</b>		
Select a minimum of 13 credit hours (recommended for Ph.D.) <sup>1</sup>		13
<b>Research</b>		
PHAR 697	Directed Research in Pharmacy	30
Total Hours		60

The minimum total of graduate credit hours required for this degree is 60.

## Pharmaceutical Sciences, Master of (M.P.S.) with a concentration in medicinal chemistry

### Program goal

The School of Pharmacy offers the highest quality of teaching in the pharmaceutical sciences graduate program at the Master of Pharmaceutical Sciences level. The M.P.S. is a non-thesis degree.

### Student learning outcomes

- 1. Knowledge of research in pharmaceutical sciences**  
Candidates should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of their areas of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their fields.
- 2. Design experiments in pharmaceutical sciences**  
Candidates should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to their research.
- 3. Demonstrate appropriate communication skills**  
Candidates should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.
- 4. Identify problems in pharmaceutical sciences**  
Candidates should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

See the School of Pharmacy website for the process handbook (<https://pharmacy.vcu.edu/media/pharmacy/documents/GraduateHandbook.pdf>). Current graduate students (<https://pharmacy.vcu.edu/admissions/graduate/students/>) may visit the school's website for additional resources, and prospective students (<https://pharmacy.vcu.edu/admissions/graduate/>) may apply online.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.S.	Fall	Jan 1	GRE, TOEFL (international applicants)

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have received a Doctor of Pharmacy (Pharm.D.) or a bachelor's degree in a related area from an accredited college or university.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), all School of Pharmacy graduate students must fulfill the curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. In order to graduate, M.P.S. students must complete a minimum of 30 graduate credit hours of required and elective course work and must pass the project review and defense in each department.

## Curriculum requirements

### School of Pharmacy core curriculum

Course	Title	Hours
Select one of the following:		3
BIOS 543 or STAT 543	Graduate Research Methods I Statistical Methods I	
MEDC 541	Survey of Molecular Modeling Methods (1 credit repeated)	
MEDC 601	Advanced Medicinal Chemistry I (1 credit repeated)	
IBMS 600	Laboratory Safety (or equivalent)	1
OVPR 601	Scientific Integrity (or equivalent)	1
Select a minimum of one credit from the following:		1
PCEU/MEDC/ PHAR 614	Research Techniques (variable credit)	
MEDC 526	Research Techniques in Medicinal Chemistry (variable credit)	
Select a minimum of one credit from the following:		1
PCEU 690	Pharmaceutics Research Seminar (variable credit)	
MEDC 690	Departmental Research Seminar (variable credit)	
PHAR 690	Pharmacy Research Seminar (variable credit)	
PSCI 607 & PSCI 608	Introduction to Pharmaceutical Sciences From Bench to Shelf and	2

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

### Concentration

Course	Title	Hours
CHEM 504	Advanced Organic Chemistry I	3
MEDC 526	Research Techniques in Medicinal Chemistry	1-4
MEDC 541 or CHEM 510	Survey of Molecular Modeling Methods Atomic and Molecular Structure	1-3
MEDC 591	Special Topics in Medicinal Chemistry	1-3.5
MEDC 601	Advanced Medicinal Chemistry I	2

### Electives

Course	Title	Hours
Electives (minimum six credits)		6

A minimum of six elective credit hours is recommended for the M.P.S. The elective courses taken will generally be selected from a list identified

by the major adviser and will be agreed upon by the major adviser and student. Electives may include courses outside the department.

### Research

Students are required to complete a project. The six credit-hour minimum directed research requirement may be waived for circumstances such as a prior related degree. If waived, students must still complete minimum number of hours required for the degree.

Course	Title	Hours
Select a minimum of six credits from the following:		6
PHAR 697	Directed Research in Pharmacy (variable credit)	
MEDC 697	Directed Research in Medicinal Chemistry (variable credit)	
PCEU 697	Directed Research in Pharmaceutics (variable credit)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.S.	Fall	May 1 (priority consideration for financial aid Feb 1)	GRE, TOEFL (international applicants)
	Spring	Oct 1	

## Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have received a baccalaureate from an accredited institution in a related area demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), all School of Pharmacy graduate students must fulfill the curricular requirements of the School of Pharmacy core curriculum and the core curriculum required by their respective options. In order to graduate, M.P.S. students must complete a minimum of 30 graduate credit hours of required and elective course work and must pass the project review and defense in each department.

### Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

Course	Title	Hours
CHEM 409 & CHEZ 409	Instrumental Analysis and Instrumental Analysis Laboratory <sup>1</sup>	5
PCEU 507	Pharmaceutics and Biopharmaceutics I (except pharmaceutical calculus)	3
PCEU 508	Pharmacokinetics	3
PCEU 509	Pharmaceutics and Biopharmaceutics II	3

<sup>1</sup>

Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

## School of Pharmacy core curriculum

Course	Title	Hours

## Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in medicinal chemistry

### Program goal

The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the Master of Science level.

### Student learning outcomes

- Knowledge of research in pharmaceutical sciences**  
The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.
- Design experiments in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.
- Demonstrate appropriate communication skills**  
The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.
- Identify problems in pharmaceutical sciences**  
The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

## Other information

See the School of Pharmacy website for the process handbook (<https://pharmacy.vcu.edu/media/pharmacy/documents/GraduateHandbook.pdf>). Current graduate students (<https://pharmacy.vcu.edu/admissions/graduate/students/>) may visit the school's website for additional resources, and prospective students (<https://pharmacy.vcu.edu/admissions/graduate/>) may apply online.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jan 1	GRE, TOEFL (international applicants)

## Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate.

## Curriculum requirements

### School of Pharmacy core curriculum

Course	Title	Hours
Select one of the following:		
BIOS 543 or STAT 543	Graduate Research Methods I Statistical Methods I	3
MEDC 541	Survey of Molecular Modeling Methods (1 credit repeated)	
MEDC 601	Advanced Medicinal Chemistry I (1 credit repeated)	1
IBMS 600	Laboratory Safety (or equivalent)	
OVRP 601	Scientific Integrity (or equivalent)	1
Select a minimum of one credit from the following:		
PCEU/MEDC/ PHAR 614	Research Techniques (variable credit)	1
MEDC 526	Research Techniques in Medicinal Chemistry (variable credit)	
Select a minimum of one credit from the following:		
PCEU 690	Pharmaceutics Research Seminar (variable credit)	1
MEDC 690	Departmental Research Seminar (variable credit)	
PHAR 690	Pharmacy Research Seminar (variable credit)	2
PSCI 607 & PSCI 608	Introduction to Pharmaceutical Sciences From Bench to Shelf and	

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below.

### Concentration

Course	Title	Hours
CHEM 504	Advanced Organic Chemistry I	3
MEDC 526	Research Techniques in Medicinal Chemistry	1-4
MEDC 541 or CHEM 510	Survey of Molecular Modeling Methods Atomic and Molecular Structure	1-3
MEDC 591	Special Topics in Medicinal Chemistry	1-3.5
MEDC 601	Advanced Medicinal Chemistry I	2

### Electives

Course	Title	Hours
Electives (minimum six credits)		6

A minimum of six elective credit hours is recommended for the M.S. The elective courses taken will generally be selected from a list identified

by the major adviser and will be agreed upon by the major adviser and student. These electives may include courses outside the department.

### Research

Students are required to complete a thesis. The six credit-hour minimum directed research requirement may be waived for circumstances such as a prior related degree. If waived, students must still complete minimum number of hours required for the degree.

Course	Title	Hours
MEDC 697	Directed Research in Medicinal Chemistry (variable credit; minimum six credits)	6

**The minimum total of graduate credit hours required for this degree is 30.**

## Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in pharmaceuticals

### Program goal

The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the Master of Science level.

### Student learning outcomes

#### 1. Knowledge of research in pharmaceutical sciences

The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.

#### 2. Design experiments in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

#### 3. Demonstrate appropriate communication skills

The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.

#### 4. Identify problems in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

Apply online at [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>).

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	May 1 (priority consideration for financial aid Feb 1)	GRE, TOEFL (international applicants)
	Spring	Oct 1	

## Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have received a baccalaureate from an accredited institution in a related area demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate.

## Curriculum requirements

### Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

Course	Title	Hours
CHEM 409 & CHEZ 409	Instrumental Analysis and Instrumental Analysis Laboratory <sup>1</sup>	5
PCEU 507	Pharmaceutics and Biopharmaceutics I (except pharmaceutical calculus)	3
PCEU 508	Pharmacokinetics	3
PCEU 509	Pharmaceutics and Biopharmaceutics II	3

<sup>1</sup>

Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

### School of Pharmacy core curriculum

Course	Title	Hours
Select one of the following:		3
BIOS 543	Graduate Research Methods I	

or STAT 543	Statistical Methods I

## Pharmacy, Doctor of (Pharm.D.)/ Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) [dual degree]

The VCU School of Pharmacy offers a Pharm.D./Ph.D. dual degree program for outstanding Pharm.D. students to obtain both a Pharm.D. and a Ph.D. in Pharmaceutical Sciences. The dual degree program provides curricular efficiencies in both the Pharm.D. and Ph.D. programs, opportunities for summer research and elective advanced pharmacy practice experiences, which allow dual degree students to graduate with their Pharm.D. after four years and with efficiencies to complete the Ph.D. degree after approximately two to three additional years.

**Credit efficiencies.** In the P-3 and P-4 years (corresponding to the G-1 and G-2 years), the student will be enrolled full-time in the Pharm.D./Ph.D. dual degree program. The students will take core or elective graduate courses as Pharm.D. electives, which are also applied toward six credits of their didactic Ph.D. credits. Additionally, students may take up to two elective advanced pharmacy practice experiences, which are also applied toward 10 credits of their Ph.D. research. In order to be eligible for the Pharm.D. degree, students must earn a minimum number of 155 credits, which includes a maximum of 16 credits that may also be applied toward the Ph.D. degree (six didactic credits and 10 APPE/directed research credits). In order to be eligible for the Ph.D., dual degree students must earn a minimum of 30 didactic credits and 30 directed research credits.

**Apply online at** [graduate.admissions.vcu.edu \(http://www.graduate.admissions.vcu.edu\)](http://graduate.admissions.vcu.edu).

### Admissions process

The program is developed for VCU School of Pharmacy Pharm.D. students to apply during their P-2 year, but applications from P-3 students will be considered. Applications will be evaluated according to the following criteria:

- Pharm.D. GPA:  $\geq 3.0$  (required).
- Personal statement/essay
- Personal interview by two Pharm.D./Ph.D. subcommittee members
- Required research experience (SRF or equivalent)
- Three letters of recommendation that comment on research accomplishments/experience/potential, including at least one letter from a prospective graduate faculty sponsor in the School of Pharmacy, Pharmaceutical Engineering Program or Department of Pharmacology and Toxicology

Application deadline: Jan. 15

Students admitted into the Pharm.D./Ph.D. dual degree program will receive acceptance letters during the spring semester of the P-2 year (or P-3 year in special cases).

## Pharmacy, Doctor of (Pharm.D.)/ Pharmaceutical Sciences, Master of Science (M.S.) [dual degree]

The School of Pharmacy offers a Pharm.D./Master of Science (M.S.) in Pharmaceutical Sciences as a graduate/professional dual degree program that teaches individuals to analyze and solve problems of interest to pharmacists. Students develop a broad range of skills by taking classes and working closely with faculty. Since the degree is offered concurrently with the professional pharmacy degree, certain efficiencies can be realized that permit students to graduate sooner than might be expected; although, this degree may require up to two years of study beyond the Pharm.D. program depending on the student's educational background and chosen area of study. Students will take the required Pharm.D. curriculum, with selected substitutions of required courses with graduate-level courses, in addition to the graduate curriculum.

**Credit efficiencies.** In the P-3 and P-4 years (corresponding to the G-1 and G-2 years), the student will be enrolled full time in the Pharm.D./M.S. dual degree program. The students may take up to six core or elective graduate credits as Pharm.D. electives, which are also applied toward six didactic M.S. credits. In order to be eligible for the Pharm.D. degree, students must earn a minimum number of 155 credits, which includes a maximum of six didactic credits that may also be applied toward the M.S. degree. In order to be eligible for the M.S., dual degree students must earn a minimum of 24 didactic credits and six directed research credits.

**Apply online at** [graduate.admissions.vcu.edu \(http://www.graduate.admissions.vcu.edu\)](http://graduate.admissions.vcu.edu).

### Application to the Pharm.D./M.S. program

Students may be admitted into the program before or during their first two years of enrollment in the Pharm.D. program. Applicants must demonstrate a good academic record, experience in research (e.g., during summer research fellowships with the school's graduate faculty) and successful completion of the Graduate Record Examination. Additionally, each applicant must be sponsored by a graduate faculty member.

## Department of Medicinal Chemistry

**Umesh R. Desai, Ph.D.**

Professor and chair

The Department of Medicinal Chemistry applies the latest strategies and concepts from several broad scientific disciplines – including synthetic chemistry, molecular modeling, computational biology, biological chemistry, structural biology and pharmacology – to discover new pharmaceutical agents and their mechanism of action in various diseases impacting humans.

## Department of Pharmaceutics

**Douglas H. Sweet, Ph.D.**

Professor and chair

The Department of Pharmaceutics offers graduate study leading to the degrees of Master of Science and Doctor of Philosophy in Pharmaceutical Sciences. In addition, students may elect to pursue a joint Pharm.D./Ph.D. program. These programs provide the preparation and research experience for academic, federal and industrial careers.

## Department of Pharmacotherapy and Outcomes Science

**Donald F. Brophy, Pharm.D., M.Sc., FCCP, FASN, BCPS**

Professor and chair

The Department of Pharmacotherapy and Outcomes Science is the largest of the three departments at the VCU School of Pharmacy. The focus of the department is pharmacotherapy (the safe and effective use of drugs in humans) and pharmacy administration (evaluation of the social and economic impact of drug therapy in humans and in health care systems).

# SCHOOL OF SOCIAL WORK

The oldest of its kind in the South, Virginia Commonwealth University's School of Social Work was established in 1917 as the Richmond School of Social Economy. Later renamed the School of Social Work and Public Health, it became the first unit of Richmond Professional Institute.

The school was created initially in response to community needs in working with World War I veterans and their social and health problems. Subsequent development of the school has expanded activity into all areas of human service.

With the creation of VCU in 1968, the School of Social Work became a unit of what is now the university's Monroe Park Campus. The school offers baccalaureate-, master's- and doctoral-level programs in Richmond, and the capital provides educational opportunities in many state government agencies.

Social work education at VCU is highly individualized and is characterized by a close relationship between faculty and students. Faculty members help students learn the form and method of social work practice, and students are encouraged to discover their own unique style of helping others. The school's educational programs are designed to prepare students for practice in many different kinds of social agencies. A combination of classroom courses and concurrent fieldwork experiences facilitates integration of knowledge, attitudes and skills necessary for professional practice. The integrated class and fieldwork curriculum offers students the opportunity to acquire a substantial base in social work practice, patterns of human behavior and development, organization and operation of social welfare programs and policies, the methods of scientific inquiry in social work, and the needs of special populations.

## The profession of social work

The goals of the profession of social work are to provide services to persons who are vulnerable due to a lack of personal, social and/or institutional resources to meet their emotional, health and economic needs. Social work practice is the application of professional knowledge, skills and values across a range of settings and populations. The focus of practice is on individuals, couples, families, groups and communities. In addition to direct clinical social work practice, social workers are involved in the administration of human service programs, social planning, the development of social policies, research and evaluation, and teaching.

In order to achieve the goals of promoting social justice and enhancing well-being for individuals, families, groups and communities, social workers provide a variety of services primarily in public and nonprofit organizational contexts. Examples of the range of settings in which social workers practice include community centers, public social services, child welfare, residential treatment facilities, schools, community mental health agencies, family and children's service agencies, psychiatric and acute care hospitals, substance abuse treatment facilities, services for the elderly, court services and adult and juvenile rehabilitation facilities.

Professional education for social work practice dates to the early 1900s. The contributions of the profession are evidenced in health and mental health care, the well-being of children and families, the development and implementation of social policies, the planning, delivery and evaluation of human services, and a broad base of research on the human condition. The knowledge base of the profession and the integration of related social, behavioral and biological sciences acquired

through professional education facilitates the contributions of social workers in multidisciplinary contexts.

Social work practice is designed to enrich quality of life by enabling individuals, groups, communities and organizations to achieve their greatest potential development. The goal of the School of Social Work at VCU is to provide professional education in response to these needs.

## Accreditation

VCU's Bachelor of Social Work and Master of Social Work programs are accredited by the Commission on Accreditation of the Council on Social Work Education – the accrediting body for all schools of social work at both the baccalaureate and master's levels. Copies of the Accreditation Standards and Curriculum Policy Statement are available in the Office of the Dean.

## Financial assistance

Although financial assistance is limited, some funds are available from a variety of sources. No prospective student should refrain from seeking admission to the school for financial reasons alone. Besides the federal financial aid programs outlined in the undergraduate or graduate study areas of the bulletins, the university and the school also offer scholarships and/or teaching assistantships at all degree levels.

The H.H. Hibbs Loan Fund was established by the School of Social Work Alumni Association for short-term emergency needs. Enrolled students who wish to apply for a loan should discuss this with their faculty adviser and the associate dean.

For more information on these financial aid opportunities (<https://socialwork.vcu.edu/student/scholarships/>), visit the School of Social Work website.

## Continuing education

Continuing education is a vital part of professional development. The School of Social Work offers institutes and workshops as part of the school's commitment to enhance social work practice and broaden educational experiences for students, social workers, field instructors and others in social service delivery systems.

State, regional and local agencies and institutions frequently identify educational and training needs in content or skill areas for selected staff members. The school, through contractual arrangements, contributes expertise in designing and implementing short-term training courses and materials. Offerings are planned throughout the year.

## Associations and student interest groups

### Alumni Association

The School of Social Work Alumni Association supports the school, its students and faculty. All graduates of the School of Social Work are members of the alumni association. The association falls under the umbrella of the VCU Alumni Association.

### B.S.W. Student Association

The Baccalaureate Social Work Student Association, an organization of students in the Bachelor of Social Work Program, was established to facilitate communication among students and between the student body and the school faculty and staff. This organization plays a vital role in the educational process. Through student representation on committees within the school, BSWSA members participate in decision-making processes. In addition, the association enables students to conduct a variety of social and professional activities throughout the year.

### M.S.W. Student Association

The Master of Social Work Student Association is the organization of M.S.W. students enrolled in the school. Established for the purposes of facilitating communication among students and between the student body and the school, the association provides a means by which student concerns and ideas can be formulated and acted upon. It also enables students to conduct a variety of social, civic and educational activities throughout the year.

This organization plays a vital role in the educational process. Student contributions to the governance and curriculum of the school are of value to both the institution and the students. Participation in the decision-making process is accomplished through student representation on committees. Faculty and students work closely together throughout the year to meet the needs of graduate social work education. Students participate as full members of committees within the school.

## Association of Black Social Workers – VCU Chapter

The Association of Black Social Workers was established to create and maintain an atmosphere of unity and support among black students in the School of Social Work. It serves to assist students in their personal and professional growth and development. Membership in this organization helps students to develop a keen awareness of the acute needs of the black community and the active role that must be assumed by the dedicated black professional social worker in promoting the general welfare of black citizens. To attain these goals, the organization utilizes the educational process and related experiences of students at

the school and in fieldwork. Students are encouraged to participate in all phases of the academic environment.

## LGBTQIA and Allied Social Work Group VCU

The LGBTQIA and Allied Social Work Group provides a safe space for LGBTQIA and allied social workers to collaborate and engage in advocacy efforts. The organization also promotes awareness of LGBTQIA topics within the VCU social work community through curriculum building, education and social events.

## Doctoral Student Association

The Doctoral Student Association is a collegial association available to all doctoral students regardless of full- or part-time status. Its primary purpose is to provide information, resources, advocacy and support to students throughout the doctoral program experience. Governance of the association is conducted on a rotating leadership and consensual basis. The Doctoral Student Association provides doctoral student representatives to various committees of the school governance structure.

## Other student interest groups

The School of Social Work supports the development of groups that address a variety of student needs and interests.

## M.S.W. Program

**Melissa D. Stewart**  
Director, M.S.W. Program

## Program mission and profession purpose and values

The VCU School of Social Work offers a graduate professional curriculum accredited by the Council on Social Work Education leading to the Master of Social Work degree. The mission of the M.S.W. program at VCU is to educate students for advanced practice in either clinical social work or social work administration, planning and policy practice under the guiding principle of promoting a more just society that includes a commitment to the values of diversity, ethics and competent social work practice in a multicultural society. The M.S.W. program's mission is strongly aligned to the purpose of the social work profession in that it fully embodies and promotes the worth and dignity of the person and the empowerment and self-determination of individuals, families and communities. In addition, a strong focus on the values of diversity; social, economic and environmental justice; cultural competence/sensitivity; and the importance of human relationships are the cornerstone of the M.S.W. program mission statement. This mission is consistent with and reflected throughout the NASW Code of Ethics.

Upon completion of the M.S.W. program, students will possess the knowledge, skills, values and ethics that guide the core practice standards of the VCU School of Social Work, NASW and CSWE's Educational Policy and Accreditation standards. The curriculum fosters student learning about human rights through course work that addresses poverty and the enhancement of the quality of life for all persons. The program curriculum promotes human and community well-being by providing courses focused on service to and empowerment of people who experience oppression or vulnerability due to inadequate or inequitable distribution of personal, social or institutional resources. This perspective is infused across the curriculum. Within this context, social work practice is defined as the application of professional knowledge,

skills and values across a range of settings and populations for the prevention and amelioration of personal and social problems. The curriculum connects with the profession's purpose of using scientific inquiry within the practice setting by providing students with practice knowledge based upon the analysis of critical application of qualitative and quantitative research from within the profession and related social, behavioral and biological sciences. The interactions among persons and their environments are the primary targets of social work practice and students obtain critical skills to provide services including the restoration, rehabilitation, maintenance and enhancement of the functioning of individuals, families, groups, communities and organizations.

- Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice (p. 729)
- Social Work, Master of (M.S.W.) with a concentration in clinical practice (p. 734)

Opportunities exist to combine the M.S.W. with certification and degree programs within the university as well as programs offered in conjunction with other institutions. See the Opportunities tab for additional information.

- Social Work, Master of (M.S.W.)/Aging Studies, Certificate in (Post-baccalaureate graduate certificate) [dual degree] (p. 740)
- Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree] (p. 741)
- Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree] (p. 742)
- Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [dual degree] (p. 743)
- Social Work, Master of (M.S.W.)/school social work practice certification [dual degree]
- Social Work, Master of (M.S.W.)/Divinity, Master of from the Baptist Theological Seminary at Richmond or the Samuel DeWitt Proctor School of Theology at Virginia Union University [dual degree]
- Social Work, Master of (M.S.W.)/Juris Doctor with the University of Richmond [dual degree]

## Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice

### Program accreditation

Council on Social Work Education

The concentration in administration, planning and policy practice prepares graduates to become leaders skilled in analyzing, formulating, implementing and evaluating policies, plans and programs. The knowledge, values and skills that are taught emphasize current theory and research through classroom and field-based experiences. Practice takes place in the context of a complex, changing environment in which communities and governmental, legislative, nonprofit and for-profit organizations advocate for, plan and deliver social services and advocate for social change. The major themes within the integrated curriculum are social and economic justice, diversity, leadership and advocacy. This concentration is not available to distance education students at this time.

## Program goals

Flowing from the mission of the School of Social Work and guided by the principles of promoting social justice, human rights, diversity, cultural competence/sensitivity and ethical practice, the goals of the M.S.W. program are:

1. To provide for a generalist knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations
2. To provide for a program that prepares students for work in concentration areas of specialization in either clinical social work or social work administration, planning and policy practice in a range of settings
3. To provide for an educational environment where students apply the profession's values and ethical principles
4. To provide for an educational environment where students gain a greater understanding of implications of diversity through education on identifying cultural strengths and ways to counteract individual and institutional prejudice, oppression and discrimination
5. To provide for an educational environment where students apply research methods to analyze and critically evaluate professional practice, programs and service delivery systems
6. To provide for an educational environment where students gain a greater understanding of advocacy and involvement in advocacy to affect social and economic justice

## Program competencies

Competency 1 – Demonstrate ethical and professional behavior

Competency 2 – Engage diversity and difference in practice

Competency 3 – Advance human rights and social, economic and environmental justice

Competency 4 – Engage in practice-informed research and research-informed practice

Competency 5 – Engage in policy practice

Competency 6 – Engage with individuals, families, groups, organizations and communities

Competency 7 – Assess individuals, families, groups, organizations and communities

Competency 8 – Intervene with individuals, families, groups, organizations and communities

Competency 9 – Evaluate with individuals, families, groups, organizations and communities

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W.	Summer (advanced standing format)	Second Wed in Nov	
	Fall (regular standing formats – all on-campus part- and full-time)	Third Wed in Jan	

## Special requirements

- The School of Social Work requires a specific outline for the professional statement that is different from what is shown in the

graduate admissions website. Please visit the School of Social Work website for this specific information.

---

Full-time and part-time on-campus applicants are admitted to begin study in the fall semester. Advanced standing applicants are admitted for the summer session. At the time of application, applicants may apply for full-time or part-time on-campus (Richmond) or advanced standing. Application forms and instructions for applying to all graduate programs are available on the Graduate Admissions website (<http://www.graduate.admissions.vcu.edu/>).

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>), the School of Social Work has established the following minimum criteria for admission to the 60-credit hour full-time or part-time format:

1. A bachelor's degree from an accredited college or university
2. A cumulative GPA of 3.0 on a 4.0 scale for all undergraduate course work
3. Completion of the following prerequisites: two three-credit courses in the social and behavioral sciences (e.g., psychology, sociology, anthropology, political science, economics), or health sciences, biological sciences or humanities.

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the professional statement and (2) the applicant's background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

## General admission procedures

Applications will only be reviewed when they are complete and received by the deadline. This includes the application form, three letters of reference (such as from faculty, employers and/or colleagues who know the applicant's academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, including VCU transcripts from those who are VCU graduates, a professional statement based upon the outline provided on the M.S.W. website (<http://socialwork.vcu.edu/programs/msw/admission.html>) and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline.

## Admission to the advanced standing format

The advanced standing option leads to a Master of Social Work degree upon completion of 42 credit hours. Advanced standing begins in late May, continues through the summer and culminates with graduation the following May. The advanced standing option is offered full-time only. Admission to advanced standing is available to a select group of students with a bachelor's degree (B.S.W.) from an undergraduate social work program accredited by the Council on Social Work Education, completed no more than five years prior to the date of application to the M.S.W. program. The minimum requirement for admission to the advanced standing format is a 3.0 GPA on a 4.0

scale for all undergraduate course work. As part of the application packet, applicants must submit their field practicum evaluation(s) and a reference letter from the field practicum faculty. Applicants who meet these criteria will be scheduled for a structured on-campus interview that includes a written case assessment. Refer to the M.S.W. website (<http://socialwork.vcu.edu/programs/msw/admission.html>) for more information.

### Transfer admits

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a statement of good standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, professional statement, resume and reference letters. No more than 30 credit hours will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants from non-social work graduate programs may transfer graduate courses that could count as electives. To do so, they must submit course syllabi for transfer evaluation. A maximum of six credit hours of elective course work may be accepted in transfer from non-social work graduate programs in accordance with Graduate School policies governing transfer credit and time limits for degree completion. Only courses that have not been applied to another degree will be eligible for transfer. No course credit is given for life or work experience.

### Course waiver information for new M.S.W. students

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an A or B grade in the courses that are the basis for the waiver request; these courses must have been completed within the past five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs (but not in the advanced standing format), and from B.A., B.S. or other undergraduate programs may be waived from no more than three of the following foundation courses:

Course	Title	Hours
SLWK 601 & SLWK 610	Human Behavior in the Social Environment I and Human Behavior in the Social Environment II	6
SLWK 609	Foundations of Research in Social Work Practice	3

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are granted waivers but not transfer credit hours must take elective courses to fulfill the number of credit hours that have been waived. Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. program office to request the Equivalency Portfolio Form(s) and instructions.

### Degree requirements

In addition to general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), the regular standing format for the M.S.W. degree requires the completion of 60 credit hours of graduate study (two years of full-time study). The first 30 credit hours (generalist curriculum) may be taken in one academic

year on a full-time basis or may be extended to a maximum of two years in the structured part-time format. To earn the M.S.W. degree in the advanced standing option requires 42 credits of full-time graduate study. Students in advanced standing do not complete the generalist curriculum but instead take 12 credit hours during the summer prior to entering the concentration curriculum.

All students select a concentration for the last 30 credit hours, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time format. Students are usually in a field instruction practicum two days each week during the generalist curriculum and three days each week during the concentration curriculum. Course credit for work or life experience is not granted in lieu of M.S.W. course credit hours.

The purpose of the Master of Social Work program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society.

The generalist curriculum comprises the first 30 credit hours of the M.S.W. program. The purpose of the generalist practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Generalist practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision-making, multicultural competency and social and economic justice. The generalist curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

#### Concentration options

After completion of the generalist year of study or summer studies for advanced standing, M.S.W. students choose an advanced concentration in clinical practice or in administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

### Administration, planning and policy practice concentration (SWAPPP)

The concentration in administration, planning and policy practice prepares graduates to become leaders skilled in analyzing, formulating, implementing and evaluating policies, plans and programs. The knowledge, values and skills that are taught emphasize current theory and research through classroom and field-based experiences. Practice takes place in the context of a complex, changing environment in which communities and governmental, legislative, nonprofit and for-profit organizations advocate for, plan and deliver social services and advocate for social change. The major themes within the integrated curriculum are social and economic justice, diversity, leadership and advocacy. This concentration is not available to distance education students at this time.

### Curriculum requirements

#### Generalist courses

Course	Title	Hours
SLWK 601	Human Behavior in the Social Environment I	3

SLWK 602	Policy, Community and Organizational Practice I	3
SLWK 603	Social Work and Social Justice	3
SLWK 604	Social Work Practice with Individuals, Families and Groups I	3
SLWK 605	Social Work Practice with Individuals, Families and Groups II	3
SLWK 606	Policy, Community and Organizational Practice II	3
SLWK 609	Foundations of Research in Social Work Practice	3
SLWK 610	Human Behavior in the Social Environment II	3
Select one of the following:		6
SLWK 693 & SLWK 694	Generalist Field Instruction I and Generalist Field Instruction II (Change name to Generalist Field Instruction I)	
SLWK 695	Block Generalist Field Instruction (Change name to Generalist Field Instruction) <sup>1</sup>	
Total Hours		30

1

Part-time students may choose a block field placement in lieu of SLWK 693 and SLWK 694. Only one field placement can be a block placement

#### Advanced standing option

In the advanced standing option students do not take the generalist courses outlined above, but instead take 12 credit hours in the summer prior to their concentration year that include courses in practice/human behavior, policy and research, in addition to completing a field education course with a field placement that will extend throughout their concentration year of study. The purpose of this curriculum is to enhance and restore understanding of the generalist curriculum content for entering B.S.W. students prior to entering the concentration year.

(Taken summer semester prior to concentration courses)

Course	Title	Hours
SLWK 607	Social Work Practice with Individuals, Families and Groups for Advanced-standing Students	3
SLWK 608	Social Work Practice in Organizations and Communities for Advanced-standing Students	3
SLWK 611	Social Work Research for Advanced-standing Students	3
SLWK 612	Advanced-standing Field Instruction	3
Total Hours		12

#### Required administration, planning and policy concentration courses

Course	Title	Hours
SLWK 710	Concentration Social Policy (Change course name to Specialized Social Policy)	3

SLWK 711	Strategies for Social Work Planning and Administrative Practice	3
SLWK 712	Social Work Planning and Administrative Practice I	3
SLWK 713	Social Work Planning and Administrative Practice II	3
SLWK 714	Research for Social Work Administration, Planning and Policy Practice I	3
SLWK 715	Research for Social Work Administration, Planning and Policy Practice II	3
Select one of the following:		6
SLWK 793 & SLWK 794	Concentration Field Instruction I and Concentration Field Instruction II (Change name to Specialization Field Instruction I)	
SLWK 795	Concentration Block Field Instruction (Change name to Specialization Field Instruction) <sup>1</sup>	
Total Hours		24

1

Part-time students may choose a block field placement in lieu of SLWK 793 and SLWK 794. Only one field placement can be a block placement

#### Electives

Course	Title	Hours
Complete six additional credit hours of electives chosen from SLWK 717-SLWK 792. Electives from outside the School of Social Work are accepted as part of the combined offerings for dual degrees and certificates. Other electives from outside the school may be accepted with prior approval from the M.S.W. program director.		6
Total Hours		6

The minimum total of graduate credit hours required for this degree is 60.

#### Sample plan of study for regular standing

##### Year one

Fall semester		Hours
SLWK 601	Human Behavior in the Social Environment I	3
SLWK 602	Policy, Community and Organizational Practice I	3
SLWK 603	Social Work and Social Justice	3

<b>Spring semester</b>		
SLWK 710	Concentration Social Policy	3
SLWK 713	Social Work Planning and Administrative Practice II	3
SLWK 715	Research for Social Work Administration, Planning and Policy Practice II	3
SLWK 794	Concentration Field Instruction II	3
Elective		3
Term Hours:		15
Total Hours:		60

**The minimum total of graduate credit hours required for this degree is 60.**

Students pursuing the Master of Social Work have an opportunity to combine their studies and complete other degree programs offered within the university and some outside institutions in these areas.

## Aging studies certificate

The School of Social Work, in conjunction with the Department of Gerontology in the College of Health Professions at VCU, offers students an opportunity to earn their Master of Social Work along with a post-baccalaureate graduate certificate. Students interested in working with older adults may earn a Certificate in Aging Studies (p. 116) while completing their M.S.W. requirements. Students must take 12 credit hours in the Department of Gerontology; six of these hours would apply as electives in the M.S.W. program. M.S.W. students are required to complete a research project with a focus in gerontology as well as a field placement in a geriatric setting.

## Application process

Students must meet the admissions requirements of both the M.S.W. program and the Certificate in Aging Studies. Admission into one program does not guarantee admission into the other. For additional information, contact:

Melissa Stewart, Ph.D.  
M.S.W. program director  
mdstewart2@vcu.edu  
Phone: (804) 828-2007

Jennifer Pryor

Department of Gerontology  
pryorjm@vcu.edu  
Phone: (804) 828-1565

## Master of Divinity (M.Div)

The combination of the Master of Social Work and the Master of Divinity is a four-year professional program offered by VCU in cooperation with the Samuel DeWitt Proctor School of Theology at Virginia Union University. This dual degree program prepares students for service in occupations where social work and the church's ministries intersect, enabling social workers to perform and evaluate social work practices as they relate to biblical, theological, ethical, educational and pastoral perspectives. Graduates are equipped for various forms of ministry in which clinical and administrative skills in social work are critical.

This program requires four continuous years of study and leads to an M.S.W. conferred by VCU and a Master of Divinity conferred by VUU. Students need to apply and be accepted to both programs and may begin study at either institution following the approved curriculum plan. Alternately a student may begin at either VCU or the seminary and then, in accordance with application deadlines, apply for admission to the other school during the first year of study.

## Application process

Prospective students apply to the VCU School of Social Work and VUU, must meet both sets of admission standards and must be accepted to both programs. For the M.S.W. program, refer to the Admission page (<https://socialwork.vcu.edu/programs/msw/admission.html>) of the M.S.W. website. For information about admission to VUU, contact:

Samuel DeWitt Proctor School of Theology  
1500 N. Lombardy St.  
Richmond, Virginia 23220  
Phone: (804) 257-5715

## Gender violence intervention certificate

The dual degree Master of Social Work and Certificate in Gender Violence Intervention (p. 539) is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

## Application process

Apply online at **VCU Graduate Admissions**. For additional information, contact:

Elizabeth Cramer, Ph.D.  
Professor, School of Social Work  
ecramer@vcu.edu  
Phone: (804) 828-9029

Sarah Jane Brubaker, Ph.D.  
Director, Gender Violence Intervention Program  
sbrubaker@vcu.edu  
Phone: (804) 827-2400

## Juris Doctor (J.D.)

Through a cooperative agreement with the University of Richmond T.C. Williams Law School (<https://lawcatalog.richmond.edu/dual-degree/>), selected students in either school may pursue a dual degree four-year curriculum of graduate study leading to the Master of Social Work and

Juris Doctor. This program is established in recognition of the role of public law in social and economic life. The dual degree program prepares professionals to be well-versed in the values, knowledge and skills of both fields, bringing an integrated base of competency to the resolution of human and social problems. The time normally required for completion of the integrated four-year curriculum is one academic year less than if each degree were pursued separately. Elective courses will enable students to select areas in law and social work which meet their particular interests.

## Application process

Applicants must successfully meet the admission requirements of both schools and, upon admission, are assigned an adviser in each school. Students may begin the course work in either school, with the sequence of courses being determined by the point of entry. For more information, contact:

Melissa Stewart, Ph.D.  
M.S.W. program director  
mdstewart2@vcu.edu  
Phone: (804) 828-2007

John F. Preis, J.D.  
Associate Dean of Academic Affairs; Professor of Law  
University of Richmond, T.C. Williams Law School  
jpreis@richmond.edu (mdstewart2@vcu.edu)  
Phone: (804) 287-6398

## Nonprofit management certificate

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, M.S.W. students may simultaneously earn the post-baccalaureate graduate Certificate in Nonprofit Management (p. 546) offered by the Wilder School. Students gain knowledge and skills that they will need to become leaders and change agents in this rapidly growing sector.

## Application process

To earn a Certificate in Nonprofit management in conjunction with the M.S.W., students will complete a graduate school application for the certificate program and pay the required fee to the university.

Melissa Stewart, Ph.D.  
M.S.W. program director  
mdstewart2@vcu.edu  
Phone: (804) 828-2007

Nancy Stutts, Ph.D.  
Director of nonprofit studies  
nbstutts@vcu.edu

## Master of Public Health (M.P.H)

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the VCU School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health (p. 660) degrees. This dual degree program prepares graduates to work with individuals, families, groups, communities and/or organizations; to advocate for social, health care and economic justice in a diverse and multicultural society; and to promote physical and mental health across the life course.

## Application process

Prospective students are required to apply separately to both programs and meet both sets of admissions requirements. Once admitted, student and adviser will work together to develop a plan of study. It is preferable that students apply to both programs at the same time so that the structured dual degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study. For more information, contact:

Sarah K. Price, Ph.D.  
Professor, School of Social Work  
skprice@vcu.edu

## Social Work, Master of (M.S.W.) with a concentration in clinical practice

### Program accreditation

Council on Social Work Education

Clinical social work practice involves a mutual problem-solving process in which multidimensional assessment, goal-setting, planned intervention and evaluation are prominent components, all of which are informed by current scientific knowledge. All clinical practice is grounded in the values and purposes of the social work profession. The goal of clinical social work is to promote effective coping with life challenges and transitions. This is achieved by helping people solve problems, change dysfunctional behavior, resolve emotional and interpersonal conflicts, develop and use social networks and resources, and maintain achieved capacities and strengths. This goal rests on the fundamental belief in the dignity of all human beings and in communal responsibility for all members of the multicultural society.

## Program goals

Flowing from the mission of the School of Social Work and guided by the principles of promoting social justice, human rights, diversity, cultural competence/sensitivity and ethical practice, the goals of the M.S.W. program are:

1. To provide for a generalist knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations
2. To provide for a program that prepares students for work in concentration areas of specialization in either clinical social work or social work administration, planning and policy practice in a range of settings

3. To provide for an educational environment where students apply the profession's values and ethical principles
4. To provide for an educational environment where students gain a greater understanding of implications of diversity through education on identifying cultural strengths and ways to counteract individual and institutional prejudice, oppression and discrimination
5. To provide for an educational environment where students apply research methods to analyze and critically evaluate professional practice, programs and service delivery systems
6. To provide for an educational environment where students gain a greater understanding of advocacy and involvement in advocacy to affect social and economic justice

## Program competencies

Competency 1 – Demonstrate ethical and professional behavior

Competency 2 – Engage diversity and difference in practice

Competency 3 – Advance human rights and social, economic and environmental justice

Competency 4 – Engage in practice-informed research and research-informed practice

Competency 5 – Engage in policy practice

Competency 6 - Engage with individuals, families, communities and organizations

Competency 7 – Assess individuals, families, groups, organizations and communities

Competency 8 – Intervene with individuals, families, groups, organizations and communities

Competency 9 – Evaluate with individuals, families, groups, organizations and communities

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W	Fall (regular standing formats – all on-campus part- and full-time)	Third Wed in Jan	
	Fall (full-time online)	First Wed in April	
	Fall (part-time online)	Last Wed in June	
	Spring (full-time online)	Last Wed in Aug	
	Spring (part-time online)	Second Wed in Nov	
	Summer (advanced standing format)	Second Wed in Nov	
	Summer (full-time online)	Second Wed in Jan	
	Summer (part-time online)	Last Wed in March	

## Special requirements

- The School of Social Work requires a specific outline for the professional statement that is different from what is shown in the graduate admissions website. Please visit the School of Social Work website for this specific information.

Full-time and part-time on-campus applicants are admitted to begin study in the fall semester. Full-time and part-time online applicants are admitted in fall, spring and summer terms. Advanced standing applicants are admitted for the summer session. At the time of application, applicants may apply for one of the following: full-time and part-time on-campus (Richmond), full-time and part-time distance education or advanced standing. Application forms and instructions for applying to all graduate programs are available on the **Graduate Admissions website**.

In addition to the **general admission requirements of the VCU Graduate School**, the School of Social Work has established the following minimum criteria for admission to the 60-credit hour full-time or part-time format:

1. A bachelor's degree from an accredited college or university
2. A cumulative GPA of 3.0 on a 4.0 scale for all undergraduate course work
3. Completion of the following prerequisites: two three-credit courses in the social and behavioral sciences (e.g., psychology, sociology, anthropology, political science, economics), or health sciences, biological sciences or humanities.

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the professional statement and (2) the applicant's background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

## General admission procedures

Applications will only be reviewed when they are complete and received by the deadline. This includes the application form, three letters of reference (such as from faculty, employers and/or colleagues who know the applicant's academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, including VCU transcripts from those who are VCU graduates, a **professional statement based upon the outline provided on the M.S.W. website** and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline.

## Admission to the advanced standing format

The advanced standing option leads to a Master of Social Work degree upon completion of 42 credit hours. Advanced standing begins in late May, continues through the summer and culminates with graduation the following May. The advanced standing option is offered full-time only. Admission to advanced standing is available to a select group of students with a bachelor's degree (B.S.W.) from an undergraduate social work program accredited by the Council on Social Work Education, completed no more than five years prior to the date of application to the M.S.W. program. The minimum requirement for admission to the advanced standing format is a 3.0 GPA on a 4.0 scale for all undergraduate course work. As part of the application packet, applicants must submit their field practicum evaluation(s) and a reference letter from the field practicum faculty. Applicants who meet these criteria will

be scheduled for a structured on-campus interview that includes a written case assessment. Refer to the **M.S.W. website** for more information.

## Transfer admits

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a statement of good standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, professional statement, resume and reference letters. No more than 30 credit hours will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants from non-social work graduate programs may transfer graduate courses that could count as electives. To do so, they must submit course syllabi for transfer evaluation. A maximum of six credit hours of elective course work may be accepted in transfer from non-social work graduate programs in accordance with Graduate School policies governing transfer credit and time limits for degree completion. Only courses that have not been applied to another degree will be eligible for transfer. No course credit is given for life or work experience.

## Course waiver information for new M.S.W. students

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an A or B grade in the courses that are the basis for the waiver request; these courses must have been completed within the past five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs (but not in the advanced standing format), and from B.A., B.S. or other undergraduate programs may be waived from no more than three of the following foundation courses:

Course	Title	Hours
SLWK 601 & SLWK 610	Human Behavior in the Social Environment I and Human Behavior in the Social Environment II	6
SLWK 609	Foundations of Research in Social Work Practice	3

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are granted waivers but not transfer credit hours must take elective courses to fulfill the number of credit hours that have been waived. Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. program office to request the Equivalency Portfolio Form(s) and instructions.

## Degree requirements

In addition to general **VCU Graduate School graduation requirements**, the regular standing format for the M.S.W. degree requires the completion of 60 credit hours of graduate study (two years of full-time study). The first 30 credit hours (generalist curriculum) may be taken in one academic year on a full-time basis or may be extended to a maximum of two years in the structured part-time format. To earn the M.S.W. degree in the advanced standing option requires 42 credits of full-time graduate study. Students in advanced standing do not complete the generalist curriculum

but instead take 12 credit hours during the summer prior to entering the concentration curriculum.

All students select a concentration for the last 30 credit hours, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time format. Students are usually in a field instruction practicum two days each week during the generalist curriculum and three days each week during the concentration curriculum. Course credit for work or life experience is not granted in lieu of M.S.W. course credit hours.

The purpose of the Master of Social Work program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society.

The generalist curriculum comprises the first 30 credit hours of the M.S.W. program. The purpose of the generalist practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Generalist practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision-making, multicultural competency and social and economic justice. The generalist curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

### Concentration options

After completion of the generalist year of study or summer studies for advanced standing, M.S.W. students choose an advanced concentration in clinical practice or in administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

### Clinical practice concentration

Clinical social work practice involves a mutual problem-solving process in which multidimensional assessment, goal setting, planned intervention and evaluation are prominent components, all of which are informed by current scientific knowledge. All clinical practice is grounded in the values and purposes of the social work profession. The goal of clinical social work is to promote effective coping with life challenges and transitions. This is achieved by helping people solve problems, change dysfunctional behavior, resolve emotional and interpersonal conflicts, develop and use social networks and resources, and maintain achieved capacities and strengths. This goal rests on the fundamental belief in the dignity of all human beings and in communal responsibility for all members of the multicultural society.

Clinical social work practice takes place in the context of a purposeful relationship. The conscious use of the professional self is central in building and maintaining such relationships. Interventions may involve therapeutic, supportive, educational and resource-management activities. These interventions are based on a process of strengthening and reordering organizational structures in the lives of clients: intrapersonal (including intrapsychic), interpersonal, institutional and/or social.

## Curriculum requirements

### Generalist courses

Course	Title	Hours
SLWK 601	Human Behavior in the Social Environment I	3
SLWK 602	Policy, Community and Organizational Practice I	3
SLWK 603	Social Work and Social Justice	3
SLWK 604	Social Work Practice with Individuals, Families and Groups I	3
SLWK 605	Social Work Practice with Individuals, Families and Groups II	3
SLWK 606	Policy, Community and Organizational Practice II	3
SLWK 609	Foundations of Research in Social Work Practice	3
SLWK 610	Human Behavior in the Social Environment II	3
Select one of the following:		6
SLWK 693 & SLWK 694	Generalist Field Instruction I and Generalist Field Instruction II (Change course title to Generalist Field Instruction I)	
SLWK 695	Block Generalist Field Instruction (Change course title to Block Generalist Field Instruction) <sup>1</sup>	
Total Hours		30

<sup>1</sup>

Part-time students may choose a block field placement in lieu of SLWK 693 and SLWK 694. Only one field placement can be a block placement

### Advanced standing option

In the advanced standing option students do not take the generalist courses outlined above, but instead take 12 credit hours in the summer prior to their concentration year that include courses in practice/human behavior, policy and research, in addition to completing a field education course with a field placement that will extend throughout their concentration year of study. The purpose of this curriculum is to enhance and restore understanding of the generalist curriculum content for entering BSW students prior to entering the concentration year.

(Taken summer semester prior to concentration courses)

Course	Title	Hours
SLWK 607	Social Work Practice with Individuals, Families and Groups for Advanced-standing Students	3
SLWK 608	Social Work Practice in Organizations and Communities for Advanced-standing Students	3
SLWK 611	Social Work Research for Advanced-standing Students	3
SLWK 612	Advanced-standing Field Instruction	3
Total Hours		12

**Required clinical concentration courses**

Course	Title	Hours
SLWK 703	Mental, Emotional and Behavioral Disorders	3
SLWK 704	Clinical Social Work Practice I	3
SLWK 705	Clinical Social Work Practice II	3
SLWK 706	Research for Clinical Social Work Practice I	3
SLWK 707	Research for Clinical Social Work Practice II	3
SLWK 710	Concentration Social Policy	3
Select one of the following:		6
SLWK 793 & SLWK 794	Concentration Field Instruction I and Concentration Field Instruction II	1
SLWK 795	Concentration Block Field Instruction <sup>1</sup>	
SLWK 796 & SLWK 797 & SLWK 798	Concentration Field Instruction Extended Semesters I and Concentration Field Instruction Extended Semesters II and Concentration Field Instruction Extended Semesters III	1
Total Hours		

1

Part-time students may choose a block field placement in lieu of SLWK 793 and SLWK 794. Only one field placement can be a block placement.

**Electives**

Course	Title	Hours
Complete six additional credit hours of electives chosen from SLWK 717-SLWK 792. Electives from outside the School of Social Work are accepted as part of the combined offerings for dual degrees and certificates. Other electives from outside the school may be accepted with prior approval from the M.S.W. program director.		6
Total Hours		6

**The minimum total of graduate credit hours required for this degree is 60.**

**Sample plan of study for regular standing****Year one**

Fall semester	Hours

Term Hours:	15
Total Hours:	60

**The minimum total of graduate credit hours required for this degree is 60.**

Students pursuing the Master of Social Work have an opportunity to combine their studies and complete other degree programs offered within the university and some outside institutions in these areas.

**Aging studies certificate**

The School of Social Work, in conjunction with the Department of Gerontology in the College of Health Professions at VCU, offers students an opportunity to earn their Master of Social Work along with a post-baccalaureate graduate certificate. Students interested in working with older adults may earn a Certificate in Aging Studies (p. 116) while completing their M.S.W. requirements. Students must take 12 credit hours in the Department of Gerontology; six of these hours would apply as electives in the M.S.W. program. M.S.W. students are required to complete a research project with a focus in gerontology as well as a field placement in a geriatric setting.

**Application process**

Students must meet the admissions requirements of both the M.S.W. program and the Certificate in Aging Studies. Admission into one program does not guarantee admission into the other. For additional information, contact:

## Master of Divinity (M.Div)

The combination of the Master of Social Work and the Master of Divinity is a four-year professional program offered by VCU in cooperation with the Samuel DeWitt Proctor School of Theology at Virginia Union University. This dual degree program prepares students for service in occupations where social work and the church's ministries intersect, enabling social workers to perform and evaluate social work practices as they relate to biblical, theological, ethical, educational and pastoral perspectives. Graduates are equipped for various forms of ministry in which clinical and administrative skills in social work are critical.

This program requires four continuous years of study and leads to an M.S.W. conferred by VCU and a Master of Divinity conferred by VUU. Students need to apply and be accepted to both programs and may begin study at either institution following the approved curriculum plan. Alternately a student may begin at either VCU or the seminary and then, in accordance with application deadlines, apply for admission to the other school during the first year of study.

### Application process

Prospective students apply to the VCU School of Social Work and VUU, must meet both sets of admission standards and must be accepted to both programs. For the M.S.W. program, refer to the Admission page (<https://socialwork.vcu.edu/programs/msw/admission.html>) of the M.S.W. website. For information about admission to VUU, contact:

Samuel DeWitt Proctor School of Theology  
1500 N. Lombardy St.  
Richmond, Virginia 23220  
Phone: (804) 257-5715

## Gender violence intervention certificate

The dual degree Master of Social Work and Certificate in Gender Violence Intervention (p. 539) is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

### Application process

Apply online at **VCU Graduate Admissions**. For additional information, contact:

## Juris Doctor (J.D.)

Through a cooperative agreement with the University of Richmond T.C. Williams Law School (<https://lawcatalog.richmond.edu/dual-degree/>), selected students in either school may pursue a dual degree four-year curriculum of graduate study leading to the Master of Social Work and Juris Doctor. This program is established in recognition of the role of public law in social and economic life. The dual degree program prepares

professionals to be well-versed in the values, knowledge and skills of both fields, bringing an integrated base of competency to the resolution of human and social problems. The time normally required for completion of the integrated four-year curriculum is one academic year less than if each degree were pursued separately. Elective courses will enable students to select areas in law and social work which meet their particular interests.

### Application process

Applicants must successfully meet the admission requirements of both schools and, upon admission, are assigned an adviser in each school. Students may begin the course work in either school, with the sequence of courses being determined by the point of entry. For more information, contact:

Melissa Stewart, Ph.D.

nbstutts@vcu.edu

## Master of Public Health (M.P.H)

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the VCU School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health (p. 660) degrees. This dual degree program prepares graduates to work with individuals, families, groups, communities and/or organizations; to advocate for social, health care and economic justice in a diverse and multicultural society; and to promote physical and mental health across the life course.

## Application process

Prospective students are required to apply separately to both programs and meet both sets of admissions requirements. Once admitted, student and adviser will work together to develop a plan of study. It is preferable that students apply to both programs at the same time so that the structured dual-degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study. For more information, contact:

Sarah K. Price, Ph.D.  
Professor, School of Social Work  
skprice@vcu.edu  
Phone: (804) 828-0579

(804) 628-2512

## School social work certificate

In conjunction with the VCU School of Education, students may meet Virginia Department of Education standards for certification as school social workers in Virginia, while completing requirements for the M.S.W. degree. Students interested in a certification in school social work should contact their advisers during the first semester of the M.S.W. program.

Melissa Stewart, Ph.D.  
M.S.W. program director  
mdstewart2@vcu.edu

## Social Work, Master of (M.S.W.)/ Aging Studies, Certificate in (Post- baccalaureate graduate certificate) [dual degree]

### Program accreditation

Council on Social Work Education (M.S.W.)

The School of Social Work in cooperation with the Department of Gerontology in the College of Health Professions at VCU provides students with a unique educational opportunity in social work and gerontology. Master of Social Work students interested in work with elders or in gerontological programs may earn a Certificate in Aging Studies while completing the master's degree requirements.

In order to meet the requirements of the M.S.W. degree and the Certificate in Aging Studies, students complete a total of 65 graduate credit hours, instead of 75 hours if the master's and certificate were pursued separately. All foundation and concentration courses of the Master of Social Work program are completed, and core courses (nine credit hours) of the Certificate in Aging Studies program are completed. Ten hours

of course work from the M.S.W. degree are applied to the certificate to fulfill the research methods requirement, one hour of independent study and six hours of electives. In order for the SLWK courses to apply as indicated, students must complete an M.S.W. research course in which students undertake a project focused on aging, complete a second-year field instruction practicum (six credit hours) in a social work setting related to aging and complete an independent study course in gerontology, which integrates research and practicum courses.

To earn the Certificate in Aging Studies simultaneously with the M.S.W., students must apply and be admitted to both programs. Students may begin their studies in either program, or apply to both programs simultaneously. See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Aging Studies degree programs.

**Apply online at** [graduate.admissions.vcu.edu](http://graduate.admissions.vcu.edu) (<http://www.graduate.admissions.vcu.edu>).

## Application process

Students must meet the admission requirements of the Master of Social Work program of the School of Social Work and of the Certificate in Aging Studies program in the Department of Gerontology. Admission into one program does not guarantee admission into the other.

Additional information may be obtained from the individual program pages or either of the following offices:

Virginia Commonwealth University  
College of Health Professions  
Department of Gerontology  
Box 980228  
Richmond, Virginia 23298-0228  
Attention: M.S.W.-Gerontology Certificate Adviser

Virginia Commonwealth University  
School of Social Work  
Box 842027  
Richmond, Virginia 23284-2027  
Attention: M.S.W.-Gerontology Certificate Adviser

## Curriculum requirements

Students must complete the M.S.W. foundation curriculum or the advanced standing format and the concentration curriculum (either clinical practice or SWAPPP), including the following social work courses and the additional following courses from the Department of Gerontology. Six credit hours of GRTY courses will count toward the M.S.W. concentration electives.

Course	Title	Hours
GRTY 601	Biological and Physiological Aging	3
GRTY 602	Psychology of Aging	3
GRTY 603	Social Gerontology	3
GRTY 692	Independent Studies	2
Select one of the following:		6
SLWK 706 & SLWK 707	Research for Clinical Social Work Practice I and Research for Clinical Social Work Practice II	

SLWK 714 & SLWK 715	Research for Social Work Administration, Planning and Policy Practice I and Research for Social Work Administration, Planning and Policy Practice II	
Select one of the following:		6
SLWK 793 & SLWK 794	Concentration Field Instruction I and Concentration Field Instruction II	
SLWK 795	Concentration Block Field Instruction	
Total Hours		23

## Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. Master of Social Work students may simultaneously earn the Certificate in Gender Violence Intervention offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to Graduate Admissions; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online application through Graduate Admissions (<http://www.graduate.admissions.vcu.edu/>), pay the application fee and submit a personal statement expressing their interest in the program and indicating that they are currently in the M.S.W. program. Students may email the Graduate School ([gradmail@vcu.edu](mailto:gradmail@vcu.edu)) to arrange for references, resume/CV and transcripts already on file from the M.S.W. program to be added to the application.

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [[ecramer@vcu.edu](mailto:ecramer@vcu.edu); (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., Wilder School [[sbrubaker@vcu.edu](mailto:sbrubaker@vcu.edu); (804) 827-2400]. Certificate courses can be completed after M.S.W. degree

requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

See the individual program pages (<http://bulletin.vcu.edu/graduate/school-government-public-affairs/gender-violence-intervention-certificate/>) for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W. and Post-baccalaureate graduate certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

## Curriculum requirements

Course	Title	Hours
<b>Required courses</b>		
GVPA 623	Research Methods for Government and Public Affairs <sup>1</sup>	3
GVPA 635	Theorizing Gender Violence	3
GVPA 693	Internship <sup>2</sup>	3
PADM 650	Principles of Nonprofit Management <sup>3</sup>	3
SLWK 761	Interpersonal Violence in Clinical Social Work Practice	3
Total Hours		15

<sup>1</sup>GVPA 623: satisfied by SLWK 706-SLWK 707 or SLWK 714-SLWK 715 [clinical or social work planning, administrative and policy practice research course (three credit hours)].

<sup>2</sup>GVPA 693: satisfied by SLWK 693-SLWK 694, SLWK 695; or SLWK 793-SLWK 794, SLWK 795 [a social work field practicum in an agency providing sexual or domestic violence services (three credit hours)].

<sup>3</sup>PADM 650: satisfied by SLWK 602-SLWK 606 or SLWK 608 (three credit hours).

**The minimum total of graduate credit hours required for the Certificate in Gender Violence Intervention for students in the M.S.W. program is 15.**

## Field placements

Once students are admitted and enrolled in the certificate program, they should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

## Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Graduate Certificate in Nonprofit Management is a cooperative arrangement between the School of Social Work and the L. Douglas Wilder School of Government and Public Affairs. Master of Social Work students pursuing a concentration in administration, planning and policy practice or clinical practice may simultaneously earn the graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours. The program is designed to bring together two fields that benefit from complementary knowledge and skills that may be used in the government and nonprofit sectors. This integration of education in social work and nonprofit management draws on the contributions that each area can make to a professional knowledge base for practice in both fields.

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.W. and Post-baccalaureate graduate certificate	Fall	Apr 1 (Mar 1 for financial aid)	
	Spring	Oct 1	

### Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete a graduate admissions application for the certificate program; however, no supporting documents are required for students who are already enrolled in good standing in the M.S.W. degree program.

### Certificate requirements for M.S.W. students

Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six credit hours of the certificate's 15 credit-hour requirement. One of these courses is SLWK 712. The second course may be SLWK 711 or SLWK 713.

Social work students enrolled in the clinical practice concentration are required to complete four nonprofit courses (PADM 650, PADM 656, PADM 659 and PADM 661) and one elective. Two social work courses,

SLWK 602 and SLWK 606 (six credits) or SLWK 608 (3 credit hours), may substitute for PADM 650 (three credits).

**Note:** M.S.W. students pursuing the clinical practice concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

### Curriculum requirements - SWAPPP concentration

Course	Title	Hours
PADM 656	Fund Development for the Nonprofit Sector	3
PADM 659	Financial Management for Nonprofit Organizations	3
PADM 661	Nonprofit Law, Governance and Ethics	3
SLWK 712	Social Work Planning and Administrative Practice I	3
SLWK 711	Strategies for Social Work Planning and Administrative Practice	3
or SLWK 713	Social Work Planning and Administrative Practice II	

**The minimum total of graduate credit hours required for the Certificate in Nonprofit Management for students in the M.S.W. program SWAPPP concentration is 15.**

### Curriculum requirements - clinical practice concentration

Course	Title	Hours
PADM 650	Principles of Nonprofit Management	3
PADM 656	Fund Development for the Nonprofit Sector	3
PADM 659	Financial Management for Nonprofit Organizations	3
PADM 661	Nonprofit Law, Governance and Ethics	3

One graduate three credit-hour course from the Wilder School or elsewhere in the university (with approval from the program chair)

**The minimum total of graduate credit hours required for the Certificate in Nonprofit Management for students in the M.S.W. program clinical practice concentration is 15.**

## Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [dual degree]

### Program accreditation

Council on Education for Public Health (M.P.H.)  
Council on Social Work Education (M.S.W.)

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the “dual degree” for at least one semester.

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the School of Medicine’s Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. The purpose of this dual degree program is to prepare graduates to work with individuals, families, groups, communities and/or organizations; advocate for social, health care and economic justice in a diverse and multicultural society; and promote physical and mental health across the life course.

Prospective students are required to apply separately to both programs through the appropriate application portal indicated in the admission requirements section of this Bulletin and must meet both sets of admission requirements. Once admitted to both programs, the student is assigned an adviser from each to develop a plan of study, typically starting with the M.S.W. course work. It is preferable that students apply to both programs at the same time so that the structured dual degree curriculum can be optimally planned. Students in one program may also apply to the second program during the first year of study.

### Dual degree efficiencies

Students are required to complete a minimum of 45 M.S.W. credit hours and a minimum of 37 M.P.H. credit hours for the dual degree program. In the M.P.H. program, the curriculum includes 25 credit hours of core and required courses, a minimum of nine credit hours in the applied public health concentration and a minimum of three credit hours of a capstone project that examines a relevant public health topic. These courses within the M.S.W. curriculum count toward the M.P.H. degree:

Course	Title	Hours
SLWK 601	Human Behavior in the Social Environment I	3
SLWK 606	Policy, Community and Organizational Practice II	3
SLWK 793	Concentration Field Instruction I	3

These courses within the M.P.H. curriculum count toward the M.S.W. degree:

Course	Title	Hours
BIOS 544	Graduate Research Methods II	3
EPID 571	Principles of Epidemiology	3
EPID 600	Introduction to Public Health	3
EPID 622	Maternal and Child Health	3

If students were to complete both degrees independently, a minimum total of 105 graduate credit hours would be required.

Note that some elective courses may not be available in certain years or may require instructor permission for registration. During the third and last year of study, dual degree students are placed in internships through the School of Social Work that focus on public health; the internship placement is approved by both the M.P.H. program director and the director of the M.S.W. field instruction. With adviser approval, the student may develop a capstone project based on work in this public health/ social work placement.

**For the M.P.H., apply online at** [sophas.org \(http://www.sophas.org/\)](http://www.sophas.org) and submit a supplemental VCU application (available on the department website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/apply-now/>)) following instructions available at [sophas.org](http://www.sophas.org); **for the M.S.W., apply online at the** Graduate Admissions website (<http://www.graduate.admissions.vcu.edu>).

Please review the admission requirements for each stand-alone degree (Master of Public Health and Master of Social Work) in the VCU Graduate Bulletin to learn the specific application requirements for each program.

### Curriculum requirements

Course	Title	Hours
<b>Program core</b>		
BIOS 543	Graduate Research Methods I	3
BIOS 544	Graduate Research Methods II	3
EPID 547	Applied Data Analysis Lab I	1.5
EPID 548	Applied Data Analysis Lab II	1.5
EPID 571	Principles of Epidemiology	3
EPID 580	Public Health Ethics	1
EPID 593	Foundations of the Public Health Profession	2
EPID 604	Principles of Environmental Health	3
HCPR 601	Introduction to Health Policy	3
IPEC 501	Foundations of Interprofessional Practice	1
SBHD 605	Introduction to Social and Behavioral Health	3
SLWK 601	Human Behavior in the Social Environment I	3
SLWK 602	Policy, Community and Organizational Practice I	3
SLWK 603	Social Work and Social Justice	3
SLWK 604	Social Work Practice with Individuals, Families and Groups I	3
SLWK 605	Social Work Practice with Individuals, Families and Groups II	3
SLWK 606	Policy, Community and Organizational Practice II	3
SLWK 609	Foundations of Research in Social Work Practice	3
SLWK 610	Human Behavior in the Social Environment II	3
SLWK 693	Generalist Field Instruction I	3
SLWK 694	Generalist Field Instruction II	3

### Concentration courses

Select one of the following M.S.W. concentrations: 9

M.S.W. clinical concentration:

SLWK 703	Mental, Emotional and Behavioral Disorders	
SLWK 704	Clinical Social Work Practice I	
SLWK 705	Clinical Social Work Practice II	

M.S.W. SWAPPP concentration:

SLWK 711	Strategies for Social Work Planning and Administrative Practice	
SLWK 712	Social Work Planning and Administrative Practice I	
SLWK 713	Social Work Planning and Administrative Practice II	

SLWK 793 Concentration Field Instruction I 3

SLWK 794 Concentration Field Instruction II 3

Select an M.P.H. concentration (applied public health shown): 9

EPID 600	Introduction to Public Health	
EPID 603	Public Health Policy and Politics	
EPID 622	Maternal and Child Health	

#### Integrative learning course

EPID 694 MPH Capstone Project 3

#### Noncurricular requirements

In addition to course work, students must attend 12 public health seminars and complete 20 hours of community-based service-learning.

Total Hours 82

**The minimum total of graduate credit hours required for the dual degree M.P.H./M.S.W. is 82.**

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

The Ph.D. Program administers the curriculum that leads to the Doctor of Philosophy in Social Work.

- Social Work, Doctor of Philosophy (Ph.D.) (p. 744)

## Social Work, Doctor of Philosophy (Ph.D.)

### Program mission

The VCU School of Social Work Ph.D. program prepares researchers and educators to generate, implement and communicate knowledge to advance social justice, improve human well-being and enhance the profession's impact on pressing social problems.

### Program goals

The principal goal of the Ph.D. in Social Work program is to prepare a diverse student body whose research, teaching and scholarship will position them for leadership in advancing professional practice, social policy and social work education. To achieve this goal, the program prepares students to:

1. Conduct and disseminate high-quality research that furthers the knowledge base of the profession
2. Develop cutting-edge knowledge and skills for social work teaching and learning
3. Promote social welfare and social justice in and with local, national and global communities

### Student learning outcomes

Upon completion of the required curriculum, students will demonstrate the ability to:

1. Understand and critique the history of social work as a profession and academic discipline and draw implications for its current and future directions
2. Use rigorous methods and analytic strategies to conduct and disseminate high-quality research that contributes to the knowledge base of social work and related disciplines
3. Identify and critique the main social and behavioral science theories that inform knowledge development in their selected substantive area and in social work education
4. Articulate expertise in a selected substantive area relevant to social work and contextualize this expertise in a broader interdisciplinary frame of reference
5. Critically analyze the substance, function and contexts for formulation, implementation and evaluation of key social policies and draw implications for advocacy and social justice
6. Demonstrate proficiency in the knowledge, skills and values required for excellence as a social work educator

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Comprehensive exam/admission to candidacy

Upon completion of all required course work, students are required to take a comprehensive exam under the supervision of a comprehensive examination committee. Through the comprehensive examination, students must demonstrate the ability to integrate the whole of their educational experience by adequately addressing complex questions pertinent to the current and developing knowledge base of the human service field. Students must register for a minimum of one credit hour of independent study (SWKD 792) in the semester in which they take the comprehensive examination.

Upon successful completion of all portions of the comprehensive exam, students are approved for degree candidacy and for registration for a minimum of one credit hour of dissertation research.

If one or more portions of the examination are not passed upon the first attempt, the student receives a mark of I in the independent study course and the following semester reattempts all (or portions) of the comprehensive examination one additional time. The grade of I is changed to A upon successful completion of the comprehensive exam on the second attempt and results in approval of degree candidacy and registration for dissertation research. If a student fails to pass all portions of the comprehensive examination a second time the grade

of I is changed to F in the independent study course and the student is dismissed from the program. If a student chooses not to attempt the failed portion(s) of the comprehensive examination a second time, the grade of I is changed to F in the independent study course and the student is dismissed from the program.

### Dissertation

After admission to candidacy, students proceed to propose, complete and defend their dissertations. The dissertation is completed under the supervision of a dissertation committee. A cumulative total of at least 15 credit hours of dissertation research must be completed in order to receive the Ph.D.; however, students may register for as many credits as needed/desired. Students are required to maintain continuous enrollment of at least three credit hours per semester (excluding summer) until they have attained 12 hours of dissertation credit, after which they may enroll for as few as one credit per semester. The dissertation must represent independent research and should be based on an original question or hypothesis relevant to social work. Successful defense of the dissertation, after the completion of 54 hours of course work and dissertation credits, completes the requirements for the degree.

Upon successful completion of the comprehensive examinations and entering candidacy, doctoral candidates enroll in SWKD 898 every fall and spring semester until graduation. Candidates must have successfully defended their dissertation proposal within four consecutive academic terms (fall and spring semesters), inclusive of the semester entering candidacy. Failure to have successfully defended the dissertation proposal within the time limit specified above will result in an unsatisfactory grade (U) in the fourth term of enrollment in SWKD 898. Failure to successfully defend the dissertation proposal by the end of the next fall or spring semester will result in another U grade in SWKD 898 and dismissal from the program. The semester limits noted above for successfully defending the dissertation proposal are in effect whether a candidate is actively matriculated or on a leave of absence.

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall only	Jan 15	GRE-General

### Special requirements

- Submit all additional application materials (personal statement, reference letters, writing sample and resume/curriculum vita) through the Graduate Admissions office. If desired, an additional copy may

be sent directly to the School of Social Work c/o Ph.D. program coordinator.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must meet the following minimum requirements.

Applicants to the program must have an earned master's degree in social work or a closely related discipline, as well as professional experience relevant to their career goals. The relationship between the applicants' professional experiences and their career objectives should be clearly articulated in the personal statements submitted with the application materials.

Applicants whose career goals include teaching in a bachelor's- and/or master's-level social work program should be aware that an M.S.W. degree and social work practice experience, along with the Ph.D., are often considered to be minimal job requirements. In addition, Council on Social Work Education accreditation standards currently require that individuals who want to teach practice courses, in particular, must have an M.S.W. and at least two years of post-M.S.W. practice experience.

The Graduate Record Examination (General Test including verbal, quantitative and analytic sections) is required. There is no minimum threshold for acceptance. Applicants are strongly advised to take the examination by December to ensure scores are received by the application date of Jan. 15. For more information on the GRE, visit gre.org (<https://www.ets.org/gre/>). The institution code for VCU is 5570.

The normal course of study is full-time. While it is possible, in some cases, to combine a limited amount of course work with outside employment, all students must complete at least one year of full-time study prior to admission to candidacy.

## Degree requirements

The Ph.D. curriculum is designed for students to specialize in a substantive area and increase their relevant research skills. In addition to general VCU Graduate School graduation requirements (p. 31), students must meet the following requirements.

A minimum of 54 graduate credit hours is required, which comprises 27 hours of core course work common for all students; 12 credit hours of electives selected individually to suit the student's course of study as follows: three credit hours of advanced statistics, three credits hours of advanced statistics or research methods, three credit hours of theory three credit hours of any course customized to the student's area of interest and a minimum of 12 credit hours of dissertation research. In addition to elective courses offered by the program, students may enroll in appropriate courses in other schools and departments at VCU with approval of their advisers. A minimum of 39 credit hours of coursework, as outlined above is required before admission to candidacy. Upon completion of the 39 credit hours of coursework students are required to complete three credit hours in a social work teaching practicum. The Graduate School requirements for candidacy exams and dissertation committees apply to students in this program. Up to six credit hours may be granted for courses completed at another university. Full-time students ordinarily complete 18 to 20 credit hours per academic year.

## Curriculum requirements

### Core curriculum

Course	Title	Hours
SWKD 701	Introduction to Advanced Quantitative Methods	3
SWKD 702	Introduction to Quantitative Data Analysis	4
SWKD 704	Introduction to Qualitative Methods	3
SWKD 705	Multivariate Analysis	3
SWKD 706	Proseminar I	1
SWKD 707	Proseminar II	1
SWKD 709	History and Philosophy of Social Work	3
SWKD 711	Social and Behavioral Science Theory for Social Work Research and Practice	3
SWKD 713	Social Policy Theory and Analysis	3
SWKD 716	Measurement in Social and Behavioral Sciences	3
Total Hours		27

### Electives

Course	Title	Hours
<b>Advanced statistics and/or research courses</b>		
Select two of the following:		6
BIOS/STAT 513	Mathematical Statistics I <sup>1</sup>	
BIOS/STAT 514	Mathematical Statistics II <sup>1</sup>	
BIOS 553	Biostatistical Methods I	
BIOS 554	Biostatistical Methods II	
BIOS 571	Clinical Trials	
BIOS 572	Analysis of Biomedical Data I <sup>1</sup>	
BIOS 625	Categorical Data Analysis and Generalized Linear Models <sup>1</sup>	
BIOS 631	Mixed Models and Longitudinal Data Analysis <sup>1</sup>	
BIOS 647	Survival Analysis <sup>1</sup>	
BIOS 688	Applied Bayesian Biostatistics <sup>1</sup>	
EDUS 712	Mixed Methods Research <sup>1</sup>

## VCU LIFE SCIENCES

VCU entered a new era when it implemented, as one of its highest priorities, a new universitywide matrix academic organization called VCU Life Sciences, created in response to the need to prepare students for the anticipated growth in new life sciences jobs in the coming decades. The skills identified for these jobs require highly interdisciplinary or multidisciplinary approaches, often falling between the boundaries of traditional academic disciplines. The way that the life sciences are understood and taught is likely to be fundamentally different, with increasing emphasis on systems biosciences as an important complement to more traditional, purely reductive approaches. The objective of Phase II of VCU's strategic plan specifically outlines the need to bring VCU's major academic and administrative divisions together to work on mutual initiatives that will accomplish VCU's goal of national leadership. VCU Life Sciences is a response to that objective.

### Faculty

VCU Life Sciences faculty members are drawn from departments across the university. Lists of participating faculty and academic affiliations are available on the VCU Life Sciences website (<https://lifesciences.vcu.edu/>) for each program.

### Facilities

VCU Life Sciences comprises the resources and interests not only of the Monroe Park Campus and the VCU Medical Center, but also the Virginia BioTechnology Research Park (<http://www.vabiotech.com/>) and the VCU Rice Rivers Center (<https://ricerivers.vcu.edu/>), a property of 342 acres overlooking the James River in Charles City County. The \$27 million Eugene P. and Lois E. Trani Center for Life Sciences houses administrative offices, the Center for Environmental Studies, state-of-the-art laboratories and classrooms, and a climate-controlled greenhouse. The Center for the Study of Biological Complexity, including the Center for High Performance Computing at VCU, is housed in Grace E. Harris Hall.

VCU Life Sciences supports two university centers for its research and teaching efforts: the Center for Environmental Studies (<http://www.vcu.edu/cesweb/>) and the Center for the Study of Biological Complexity (<http://www.vcu.edu/csbc/>).

**Brian Verrelli, Ph.D.**  
Director, Ph.D. in Integrative Life Sciences program

## Graduate information

### Transfer credit

Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. There is no limit to the number of credits that can be transferred from another program at VCU as long as they have not been previously applied toward another degree. A maximum of six credit hours earned at an institution other than VCU can be accepted for transfer into the program if not previously applied toward another degree. A minimum grade of B is required for transfer of credits.

### Grade requirements

Degree candidates must maintain a minimum GPA of 3.0. GPAs shall be based on all graduate courses attempted after acceptance into the program. The academic standing of any student who receives multiple grades of C, or a grade of D or F, will be reviewed for possible termination from the program.

## Center for Environmental Studies

**Rodney J. Dyer, Ph.D.**  
Director

**James R. Vonesh, Ph.D.**  
Assistant director

**Daniel McGarvey, Ph.D.**  
Director for graduate studies

**Lindsay Freeman**  
Undergraduate adviser  
[envsadvising@vcu.edu](mailto:envsadvising@vcu.edu)

[ces.vcu.edu](http://ces.vcu.edu) (<http://ces.vcu.edu>)

The undergraduate and graduate programs in environmental studies are interdisciplinary in nature, exposing students to the critical links between the areas of environmental life sciences, technology and policy.

At the undergraduate level, students gain the necessary skills for entry-level field and research positions. Class lectures and guest speakers introduce the importance of policy-making and awareness in the environmental field, while laboratory and internship experiences provide a working knowledge of the latest in environmental technology and field practices.

The graduate programs provide two options for students to further their studies in the environmental life sciences. The Master of Science in Environmental Studies is a thesis-based program designed for those individuals interested pursuing research in the environmental field. The Master of Environmental Studies (the non-thesis program) is a terminal, two-year professional degree for individuals working in the private/public sector of the environmental field.

- Environmental Studies, Master of (M.Envs.) (p. 749)
- Environmental Studies, Master of Science (M.S.) (p. 750)

## Environmental Studies, Master of (M.Envs.)

### Program goal

The goal of the Master of Environmental Studies (M.Envs.) degree program is to provide an interdisciplinary master's degree program in environmental studies that emphasizes the critical links between environmental life sciences and public policy. This goal necessitates training that crosses disciplinary boundaries. Through a program of study combining environmental science, environmental technology and environmental policy, the successful graduate will gain a range of skills designed to facilitate a science-based understanding of the natural world and human interactions with it. The M.Envs. is specifically designed to provide students with professional training to prepare them for careers involving leadership in environmental science and policy.

### Student learning outcomes

1. Graduates will be able to use emerging environmental technologies and apply them under real-world conditions.
2. Graduates will be able to conduct objective research and/or interpret research findings, and apply scientific concepts and information to the decision-making process for environmental regulations and policies.
3. Graduates will be able to effectively bridge the realms of policy and science on critical environmental issues and be able to make significant contributions in an interdisciplinary professional and academic environment.
4. Graduates will possess a sophisticated and practical understanding of methods for collection, analysis, presentation and critical interpretation of environmental data using appropriate statistical and quantitative tools.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy

requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.Envs. (non-thesis degree)	Fall	Jul 1	TOEFL for international students
	Spring	Dec 1	
	Summer	May 1	

### Special requirements

- For students seeking fall admission, preference is given to applications received before March 15. Students wishing to be considered for funding must apply by April 1.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have successfully completed undergraduate training and hold a bachelor's degree from an accredited institution reflecting ability to perform at the graduate level.

While qualified students from any baccalaureate program will be considered for admission to the M.S., due to the program goal of linking science and policy, students with narrow training in one field or the other may be required to complete some basic education in the alternate field prior to full admission.

Students admitted to the program are generally drawn from applicants with a minimum undergraduate GPA of 3.0 (on a 4.0 scale or equivalent). Applicants holding an undergraduate degree from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 600 on the TOEFL paper-based examination or 100 on the Internet-based examination.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must:

1. Complete a minimum of 33 graduate credit hours, approved by the program director, with an overall minimum GPA of 3.0 on all graduate course work attempted after acceptance into the program (At least one-half of required course work must be at the 600 level or higher.)
2. Complete three required core courses (9 credit hours)
3. Complete an additional 21 credit hours of approved graduate electives
4. Complete 3 credit hours of practical experience (either 3 credit hours of internship or independent study)
5. Successfully complete a comprehensive oral examination administered by three faculty members

## Curriculum requirements

### Core requirements

Course	Title	Hours
ENVS 601	Survey in Environmental Studies	3
ENVS 603	Environmental Research Methods	3
STAT 543	Statistical Methods I	3
<b>Practical experience</b>		
Select three credit hours from the following: <sup>1</sup>		3
ENVS 692	Independent Study	
ENVS 693	Internship in Environmental Studies	
Select courses from electives list below <sup>2</sup>		21
Total Hours		33

1

Students may not apply more than a total of 3 credits of ENVS 692 and/or ENVS 693 to the degree without prior approval of the major adviser and program director.

2

Courses must represent at least two of the disciplines below. Listed courses are options and are not comprehensive of all electives. Other electives may be allowed with prior permission of major adviser and program director.

### Electives

Course	Title	Hours
Environmental studies		
ENVS 550	Ecological Risk Assessment	3
ENVS/ANTH 556	Historical and Cultural Landscapes	3
ENVS 692	Independent Study	1-3
ENVS 693	Internship in Environmental Studies	1-3
Environmental policy and administration		
ENVS/PADM 628	Environmental Policy and Administration	3
ENVS 660	Virginia Environmental Law	3

**Program website:** [vcu.edu/cesweb](http://vcu.edu/cesweb/) (<http://vcu.edu/cesweb/>)

## Environmental Studies, Master of Science (M.S.)

### Program goal

The goal of the M.S. in Environmental Studies is to provide an interdisciplinary master's degree program in environmental studies that emphasizes the critical links between environmental life sciences and public policy. This goal necessitates training that crosses disciplinary boundaries. Through a program of study combining environmental science, environmental technology and environmental policy, the successful graduate will gain a range of skills designed to facilitate a science-based understanding of the natural world and human interactions with it. The M.S. is specifically designed to prepare students for careers involving science and policy research through the completion of a culminating thesis project.

### Student learning outcomes

1. Graduates will be able to use emerging environmental technologies and apply them under real-world conditions.
2. Graduates will be able to conduct objective research and/or interpret research findings, and apply scientific concepts and information to the decision-making process for environmental regulations and policies.

3. Graduates will be able to effectively bridge the realms of policy and science on critical environmental issues and be able to make significant contributions in an interdisciplinary professional and academic environment.
4. Graduates will possess a sophisticated and practical understanding of methods for collection, analysis, presentation and critical interpretation of environmental data using appropriate statistical and quantitative tools.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jan 10	TOEFL (or IELTS or equivalent) for international students
	Spring	Aug 15	

## Special requirements

- For students seeking consideration for fall admission and potential funding, preference is given to applications received by Jan. 10. See program website (<http://www.vcu.edu/cesweb/>) for details.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants must have successfully completed undergraduate training and hold a bachelor's degree from an accredited institution reflecting ability to perform at the graduate level.

While qualified students from any baccalaureate program will be considered for admission to the Master of Science in Environmental Studies (M.S.) program, due to the program goal of linking science and policy, students with narrow training in one field or the other may be required to complete some basic education in the alternate field prior to full admission. Moreover, admission to the M.S. program requires a sponsoring faculty adviser, who will function as a thesis adviser for the admitted student. Students without such sponsorship will be considered for admission to the Master of Environmental Studies (M.Envs.) degree program. If an appropriate adviser is identified following admission, the student's program may be changed to the M.S. program.

Students admitted to the program are generally drawn from applicants with a minimum undergraduate GPA of 3.0 (on a 4.0 scale or equivalent). Applicants holding an undergraduate degree from recognized foreign institutions should display an acceptable level of English proficiency by achieving a minimum score of 600 on the TOEFL paper-based examination or 100 on the Internet-based examination. The IELTS or equivalent is considered as well.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students must:

1. Complete a minimum of 33 graduate credit hours, approved by the program director, with an overall minimum GPA of 3.0 on all graduate course work attempted after acceptance into the program (At least one-half of required course work must be at the 600 level or higher).
2. Complete four required core courses (10 credit hours)
3. Complete an additional 10 credit hours of approved graduate electives
4. Develop a research proposal approved by a committee of three faculty members
5. Qualify for degree candidacy based upon satisfactory completion of the above requirements

- Complete the proposed research culminating in a publication-quality thesis (minimum of 13 research/thesis credit hours)
- Successfully defend the research thesis

## Curriculum requirements

Course	Title	Hours

### Contact

Daniel J. McGarvey, Ph.D.  
Associate professor and graduate program director  
djmgarvey@vcu.edu  
(804) 828-7278

**Program website:** [vcu.edu/cesweb](http://vcu.edu/cesweb/) (<http://vcu.edu/cesweb/>)

## Center for the Study of Biological Complexity

**Michael S. Rosenberg, Ph.D.**

Director

[cbds.vcu.edu](https://cbds.vcu.edu/) (<https://cbds.vcu.edu/>)

The Center for the Study of Biological Complexity is a multidisciplinary focus of research and scholarly activity within VCU Life Sciences. The mission of the center is to apply the principles of complexity to contemporary biological problems in all aspects of research and scholarly activity, supporting research in integrative molecular, cellular and developmental biology.

- Bioinformatics, Master of Science (M.S.) (p. 752)

## Bioinformatics, Master of Science (M.S.)

### Program goals

The VCU Center for the Study of Biological Complexity created and administers the Master of Science in Bioinformatics degree program to provide interested students with two options:

- A traditional "thesis master's," including the development, implementation, writing and presentation of a coherent research project under the supervision of a graduate faculty member. This degree is most appropriate for students committed to initiating research careers in a variety of settings, including students considering pursuing later work toward a Ph.D.
- A "professional science master's" option, with project-oriented research, including completion of a 10- to 12-week full-time externship in an industrial, government or academic site, usually during the summer between the first and second years of the bioinformatics program. This degree is most appropriate for students who wish to work in industrial/commercial settings.

Students enter the program from a variety of academic backgrounds (biology, chemistry, computer science, mathematics/statistics, etc.) assisted by flexible "bridge curricula" designed to help them meet program prerequisites. Students will have an effective exposure to the

biotech industry and other career options and to real-life applications of their learning.

The Master of Science in Bioinformatics degree program will prepare students to:

1. **Synthesize and apply interdisciplinary subject matter:** The M.S. in Bioinformatics degree program seeks to provide students with the skills and knowledge required to advance into Ph.D. training programs and research positions in universities, government labs or industry. The program provides a framework for the progressive development of a mastery of the interdisciplinary subject matter pertinent to bioinformatics and an ability to synthesize this information and apply it to key areas of investigation and experimentation in bioinformatics.
2. **Design, implement and interpret experimental approaches:** The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches.
3. **Develop communication skills:** In addition, the program will develop skills in oral and written communication of interdisciplinary science concepts, experimental design, results and interpretation.

## Student learning outcomes

1. **Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations, as measured by rubric.
3. **Experimental design competency:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement bioinformatics experimental protocols and to design and develop experiments, as measured by rubric.
4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of ability to analyze scientific problems including pertinent datasets and design and develop appropriate methods to solve said problems, as measured by rubric.
5. **Integrated knowledge of bioinformatics:** The candidate will demonstrate an appropriate level of knowledge of fundamentals of molecular biology, computational science, statistics and a more detailed understanding of an individual area of internship research, including an appropriate familiarity with the research literature, as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	Jul 1	
	Spring	Nov 15	
	Summer	May 1	

## Special requirements

- International students requiring temporary U.S. visas should apply by April 1 for fall admission, Oct. 1 for spring admission or Feb. 1 for summer admission.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants are encouraged to include in their personal statements, and request that their referees also discuss, one or more examples of creative and analytical contributions they have made to a recent research project (preferred) or to a challenging course assignment.

Because of the interdisciplinary nature of bioinformatics, applications are welcomed from students with various academic backgrounds, such as biology, biotechnology, molecular biology, computer science, mathematics or statistics. Our program provides “bridge curricula” to strengthen students’ preparation for graduate study in bioinformatics.

## Degree requirements

### Prerequisites and bridge curricula for master’s programs

While an ideal preparation for the bioinformatics master’s programs would include substantial work in molecular biology, computer science, mathematics and statistics, the program has been designed to provide “bridge curricula” to accommodate academically strong students with majors in any one of these or related disciplines. These students would develop with the assistance of their advisers a “bridge curriculum” of largely undergraduate courses to meet the prerequisites for the program and prepare them for graduate-level work.

Program prerequisites are listed below. In general, students will not need to address the set corresponding to their undergraduate majors, but will usually need to address the other two sets. It is expected that all bridge course work will be completed during the first year. While bridge courses may be completed prior to initiating the graduate program, this is not required, and most students are able, through advising, to complete bridge courses alongside graduate course work during the first year of the program.

1. **Biology/genomic prerequisites:** an introductory knowledge of biochemistry and molecular biology, one semester of organic chemistry (e.g. CHEM 301), cell biology (e.g. BIOL 300) and an undergraduate course in molecular biology
2. **Computational science prerequisites:** an introductory knowledge of discrete mathematics (e.g. MATH 211) and an introductory knowledge of computer science, including at least one general computer programming language, met by taking structured programming (e.g. CMSC 255) and data structures and advanced programming (e.g. CMSC 256)
3. **Quantitative/statistical prerequisites:** an introductory knowledge of mathematics/statistics, met by taking calculus I (e.g. MATH 200) and at least one undergraduate course in statistics

### Thesis research

In addition to general VCU Graduate School graduation requirements (p. 31), students in the M.S. program must perform a credible original investigation under the supervision of their major advisers and the Graduate Advisory Committee. Students must develop and write short proposals in consultation with their major advisers and GAC. The project must be approved by the student’s GAC, based on a short (10-page) paper submitted by the student. This paper will include background on the project, including a review of the literature, the purpose, specific aims and rationale of the project, a statement about the specific hypothesis to be investigated, and proposed methods and statistical analyses.

Research projects will be based on ongoing research in the laboratories of faculty in the CSBC and across both campuses of VCU and the Virginia BioTechnology Research Park. Students in the program may perform research on the broad range of subjects, from molecules to ecosystems, studied by CSBC faculty.

Students shall prepare a written thesis describing the completed research performed during their tenure in the M.S. in Bioinformatics program following the format of the Graduate School Thesis and Dissertation

Manual (<http://graduate.vcu.edu/media/graduate-school/docs/pdf/ThesisandDissertationManualUPDATED5-18-16.pdf>). An oral defense, consisting of a public presentation of the thesis and a committee meeting to discuss the thesis, under the direction of the GAC but open to all faculty members, shall be scheduled to examine the student’s research, thesis and underlying fundamental knowledge of the discipline encompassed by the student’s research. Announcement of the oral defense, including the candidate’s name, thesis title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

### Non-thesis (professional science master’s) externship

In addition to general VCU Graduate School graduation requirements (p. 31), students enrolled in the non-thesis, professional science master’s option complete a 10- to 12-week full-time externship at an industrial, government or academic site, usually during the summer between the first and second years of the bioinformatics program. In preparation for this externship, students will enroll in BNFO 620 and BNFO 621 in the semester preceding their externships. Upon initiating the externship, each student must develop and write a short proposal or prepare a PowerPoint presentation outlining the plans for the externship for review by the student’s GAC. Research projects will be based on ongoing research in the laboratories of the participating external advisers. Students in the program may perform computational research on a broad range of subjects, from molecules to ecosystems, encompassing the field of bioinformatics.

In the semester following the externship experience, non-thesis students shall prepare written papers (~10 pages) describing the completed research performed during their externships following the format of the Graduate School’s Thesis and Dissertation Manual (<http://graduate.vcu.edu/media/graduate-school/docs/pdf/ThesisandDissertationManualUPDATED5-18-16.pdf>). The paper should include background on the project, including a review of the literature, the purpose, specific aims and rationale of the project, the specific hypotheses investigated, description of the methods and statistical analyses implemented, results, discussion/conclusions, and a bibliography. An oral defense, consisting of a public presentation of the paper and a committee meeting to discuss the results, under the direction of the GAC but open to all faculty members and the adviser of the externship, shall be scheduled to examine the student’s underlying fundamental knowledge of the disciplines encompassed by the student’s externship. Announcement of the oral defense, including the candidate’s name, project title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

## Curriculum requirements

### Thesis option

Course	Title	Hours
<b>Core</b>		
BIOL/BNFO 540	Fundamentals of Molecular Genetics	3
BNFO 501	Introduction to Physical Implementation of Databases	1
BNFO 508	Introduction to Bioinformatics Research	2
BNFO 600	Basic Scripting Languages	3
BNFO 601	Integrated Bioinformatics	3
BNFO 620	Bioinformatics Practicum	3
BNFO 690	Seminars in Bioinformatics	1

BNFO 697	Directed Research in Bioinformatics (six credits minimum)	6
CMSC 508	Database Theory	3
OVPR 601	Scientific Integrity	1
or OVPR 602	Responsible Scientific Conduct	
or OVPR 603	Responsible Conduct of Research	

**Electives**

**The minimum total of graduate credit hours required for this degree is 34.**

**Accelerated opportunities**

The department offers opportunities for qualified undergraduate students to earn both an undergraduate and graduate degree in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. See the individual program page for concentrations in the Undergraduate Bulletin (<http://bulletin.vcu.edu/undergraduate/vcu-life-sciences/center-study-biological-complexity/#degreestext>) for details.

**Contact**

Allison A. Johnson, Ph.D.  
Associate professor and graduate program director  
aajohnson@vcu.edu

**Program website:** [csbc.vcu.edu/bioinformatics-programs](http://csbc.vcu.edu/bioinformatics-programs) (<http://csbc.vcu.edu/bioinformatics-programs/>)

**Integrative Life Sciences, Doctor of Philosophy (Ph.D.)****Program mission**

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with research faculty members from any department, center or institute across VCU campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels.

**Program goals**

- 1. Interdisciplinary knowledge and skills:** The core curriculum of the ILS program will effectively assist students in gaining understanding of modern systems biology along with training in the interdisciplinary skills and knowledge increasingly required for doing effective research in the life sciences. It will also foster progressive

development of a mastery of the current state of the research in students' areas of interest as they seek to identify key focus areas for their integrative research.

- 2. Research skills:** The mentored research component of the program, building on the core curriculum and interdisciplinary elective course work, will foster development of an ability to synthesize this learning and identify key focus areas for integrative research. It will support students as they learn how to design, implement and interpret interdisciplinary experimental approaches that will best address their research questions.
- 3. Communication skills:** Students in the program will develop skills in both written and oral communication of life science knowledge, experimental design, results and interpretation to a variety of potential audiences.

## Student learning outcomes

- 1. Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
- 2. Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations, as measured by rubric.
- 3. Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement experimental protocols and to design and develop experiments, as measured by rubric.
- 4. Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems, as measured by rubric.
- 5. Integrated knowledge:** The candidate will demonstrate an appropriate level of knowledge of the life sciences and a more detailed understanding of the disciplines most pertinent to their own interdisciplinary research areas, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as

published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section for additional information on academic regulations for graduate students.**

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

**Visit the academic regulations section for additional information on degree candidacy requirements.**

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section for additional information on graduation requirements.**

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jan. 10	TOEFL, IELTS or equivalent for international students

**Note:** All application components must be received by Jan. 10 to be competitive.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the Ph.D. in Integrative Life Sciences program requires graduation from an accredited college or university or its equivalent with a degree that is preparative for graduate-level study in the life sciences. Applicants should have a minimum GPA of 3.0 on a 4.0 scale. The GRE is not required. For international applicants, satisfactory scores from a standardized test, such as the TOEFL (a minimum score of 100) or IELTS (minimum band scores of 7.0), must be submitted along with external evaluation of undergraduate transcripts from nondomestic educational institutions (see Graduate Admissions website (<http://graduate.admissions.vcu.edu/apply/>) for further details).

Letters of recommendation from three present or former professors, advisers or mentors qualified to evaluate the applicant's ability to engage in graduate research in the life sciences are required, as is a

written statement from the applicant describing the applicant's research interests, motivation, research experience, education and goals for pursuing graduate study in this particular program, preferred research adviser(s), official transcripts from all past postsecondary educational institutions, official GRE scores, and current curriculum vita or resume. Applicants are **strongly** encouraged to contact potential research advisers prior to submitting application materials and to identify potential research advisers in their personal statements. Individuals who have identified a research adviser will be given preference for admittance and funding.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the degree must be completed within eight years of the first enrollment.

- Credit-hour requirements:** Students in the program are required to earn a minimum of 64 graduate-level credit hours. At least one-half of the graduate credit hours presented for graduation must be at the 600 level or higher.
- Grade requirement:** Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than one course. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.
- Transfer/waiver credit:** Graduate-level VCU course work taken as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded may be evaluated to determine whether it can be used to fulfill degree requirements of this program in accordance with the VCU Graduate School transfer policy (p. 27). Course work completed toward a previous degree can also be considered as a waiver of program core or elective course work requirements. In these cases, the requirement(s) are waived, and other course work or research credits can be used to make up credits needed toward the degree. A minimum grade of B is required for credit hours transferred or waived.
- Research adviser and committee:** Students should select a research adviser prior to matriculation, but no later than the end of the first semester. The research adviser may be chosen from among the many graduate faculty members from any VCU research unit. This research adviser is approved by the program director in accordance with the Graduate School bylaws.

Students are required to form a research advisory committee that is headed by the research adviser (as chair) and that consists of a minimum of four other members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary affiliate graduate faculty appointment. The significant areas of the student's research focus should be represented by the members of the research advisory committee. At least two members of the committee should have primary appointments in departments other than that of the research adviser, with one of those members being integrally associated with the student's research to foster the interdisciplinary intent of this degree program. Students should form their committees no later than the end of the second semester of study. This committee must be approved by the program director.

- Written and oral examinations:** Before admission to degree candidacy for the Ph.D. degree, students must successfully complete a comprehensive examination and a research proposal examination.

The student's research advisory committee will administer both exams. Students should take the comprehensive exam upon completion of all required didactic course work, usually no later than the end of the fourth semester of study. It may be written or oral (or both) and will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student's research field. Upon successful completion of the comprehensive examination, and submission and acceptance of a written research proposal, students will take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the comprehensive and research proposal examinations only once each. Written evaluations of the examinations will be completed by research advisory committee members. These evaluations are provided to the chair of the research advisory committee and to the program director for discussion with the student and for program assessment.

- Dissertation research:** The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research, incorporating two or more disciplines. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to the public, also is required. Written evaluations of the dissertation and the oral defense of the dissertation will be completed by research advisory committee members. These evaluations are provided to the chair of the research advisory committee and to the program director for discussion with the student and for program assessment. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences.

## Curriculum requirements

A minimum total of 64 graduate credit hours is required and is distributed as follows:

Course	Title	Hours
<b>Core courses</b>		
LFSC 630	Integrative Life Sciences Research	2
LFSC 631	Student Seminar in Integrative Life Sciences (one credit hour taken two semesters)	2
LFSC 690	Research Seminar in Integrative Life Sciences (one credit hour taken two semesters)	2
Scientific integrity course		
OVPR 601 or OVPR 602 or OVPR 603	Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research	1
Technologies course (these are options; students may suggest any course for approval)		
Select one of the following:		2
ANAT 615	Techniques in Neuroscience and Cell Biology	
BNFO/BIOL 541	Laboratory in Molecular Genetics	

BNFO 650	Sequence Analysis in Biological Systems	
ENVS 602	Environmental Technology	
MICR 607	Techniques in Molecular Biology and Genetics	
MICR/BNFO 653	Advanced Molecular Genetics: Bioinformatics	
<b>Advanced statistics, advanced mathematics or experimental design course</b>		
Select one of the following: <sup>2,3</sup>		3
BIOL 606	Quantitative Ecology	
BIOS 524	Biostatistical Computing	
BIOS 572	Analysis of Biomedical Data I	
BNFO/BIOL 601	Integrated Bioinformatics	
ENVS 603	Environmental Research Methods	
LFSC 610	Analytical Methods in Biocomplexity Analysis	
MATH 591	Topics in Mathematics (mathematical biology)	
STAT 544 or BIOS 544	Statistical Methods II Graduate Research Methods II	
STAT 623	Discrete Multivariate Analysis	
STAT 643	Applied Linear Regression	
Other courses based on approval of research advisory committee		
<b>Elective courses</b>		
Select nine credit hours of the following: <sup>4,5</sup>		9
500-level or higher courses in ANAT, ANTH, BIOC, BIOL, BIOS, BNFO, CHEM, CLSE, CMSC, EDUS, EGRB, ENVS, EPID, FRSC, HGEN, MATH, MEDC, MEDP, MICR, NANO, NEUS, OPER, PATH, PCEU, PHAR, PHIS, PHTX, PSCI, PSYC or STAT		
<b>Directed research</b>		43
LFSC 697	Directed Research in Integrative Life Sciences	
Total Hours		64

1

Does not count toward three credit-hour restriction for Preparing Future Faculty courses

2

Depending on the student's area of research

3

Students are expected to enter the program proficient in statistics at the introductory level, as exemplified by STAT 543 or BIOS 543. Students not at this level, as evidenced by prior course work, will be required to take STAT 543 or BIOS 543 or an equivalent course.

4

Based on research interest and approved by research advisory committee

5

Only three credits of Preparing Future Faculty (GRAD) courses will be accepted toward the nine credit hours of electives (exclusive of OVPR responsible conduct of research).

**The minimum total of graduate credit hours required for this degree is 64.**

## Integrative Life Sciences, Doctor of Philosophy (Ph.D.) with a concentration in behavioral and statistical genetics

### Program mission

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with research faculty members from any department, center or institute across VCU campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels.

### Program goals

- 1. Interdisciplinary knowledge and skills:** The core curriculum of the ILS program will effectively assist students in gaining understanding of modern systems biology along with training in the interdisciplinary skills and knowledge increasingly required for doing effective research in the life sciences. It will also foster progressive development of a mastery of the current state of the research in students' areas of interest as they seek to identify key focus areas for their integrative research.
- 2. Research skills:** The mentored research component of the program, building on the core curriculum and interdisciplinary elective course work, will foster development of an ability to synthesize this learning and identify key focus areas for integrative research. It will support students as they learn how to design, implement and interpret interdisciplinary experimental approaches that will best address their research questions.
- 3. Communication skills:** Students in the program will develop skills in both written and oral communication of life science knowledge, experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

- 1. Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and

appropriate use of language incorporating the use of visual aids, as measured by rubric.

2. **Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations, as measured by rubric.
3. **Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement experimental protocols and to design and develop experiments, as measured by rubric.
4. **Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems, as measured by rubric.
5. **Integrated knowledge:** The candidate will demonstrate an appropriate level of knowledge of the life sciences and a more detailed understanding of the disciplines most pertinent to their own interdisciplinary research areas, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall	Jan 10	GRE; TOEFL, IELTS or equivalent for international students

**Note:** All application components must be received by Jan. 10 to be competitive.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the Ph.D. in Integrative Life Sciences with a concentration in behavioral and statistical genetics requires graduation from an accredited college or university or its equivalent with a degree that is preparative for graduate-level study in the life sciences. Applicants should have a minimum GPA of 3.0 on a 4.0 scale, and scores on the Graduate Record Examination should exceed the 50th percentile in each category. For international applicants, satisfactory scores from a standardized test, such as the TOEFL (a minimum score of 100) or IELTS (minimum band scores of 7.0), must be submitted along with external evaluation of undergraduate transcripts from nondomestic educational institutions (see Graduate Admissions website (<http://graduate.admissions.vcu.edu/apply/>) for further details).

Letters of recommendation from three present or former professors, advisers or mentors qualified to evaluate the applicant's ability to engage in graduate research in the life sciences are required, as is a written statement from the applicant describing the applicant's research interests, motivation, research experience, education and goals for pursuing graduate study in this particular program, preferred research adviser(s), official transcripts from all past postsecondary educational institutions, official GRE scores, and current curriculum vita or resume. Applicants are **strongly** encouraged to contact potential research advisers prior to submitting application materials and to identify potential research advisers in their personal statements. Individuals who have identified a research adviser will be given preference for admittance and funding.

### Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and

elective courses and to conduct significant research. All work toward the degree must be completed within eight years of the first enrollment.

- Credit-hour requirements:** Students in the program are required to earn a minimum of 64 graduate-level credit hours. At least one-half of the graduate credit hours presented for graduation must be at the 600 level or higher.
- Grade requirement:** Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than one course. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.
- Transfer/waiver credit:** Graduate-level VCU course work taken as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded may be evaluated to determine whether it can be used to fulfill degree requirements of this program in accordance with the VCU Graduate School transfer policy (p. 27). Course work completed toward a previous degree can also be considered as a waiver of program core or elective course work requirements. In these cases, the requirement(s) are waived, and other course work or research credits can be used to make up credits needed toward the degree. A minimum grade of B is required for credit hours transferred or waived.
- Research adviser and committee:** Students should select a research adviser prior to matriculation, but no later than the end of the first semester. The research adviser may be chosen from among the many graduate faculty members from any VCU research unit. This research adviser is approved by the program director in accordance with the Graduate School bylaws.

Students are required to form a research advisory committee that is headed by the research adviser (as chair) and that consists of a minimum of four other members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary affiliate graduate faculty appointment. The significant areas of the student's research focus should be represented by the members of the research advisory committee. At least two members of the committee should have primary appointments in departments other than that of the research adviser, with one of those members being integrally associated with the student's research to foster the interdisciplinary intent of this degree program. Students should form their committees no later than the end of the second semester of study. This committee must be approved by the program director.

- Written and oral examinations:** Before admission to degree candidacy for the Ph.D. degree, students must successfully complete a comprehensive examination and a research proposal examination. The student's research advisory committee will administer both exams. Students should take the comprehensive exam upon completion of all required didactic course work, usually no later than the end of the fourth semester of study. It may be written or oral (or both) and will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student's research field. Upon successful completion of the comprehensive examination, and submission and acceptance of a written research proposal, students will take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the comprehensive and research proposal examinations only once each. Written evaluations of the examinations will be completed by research advisory committee members. These evaluations are provided to the chair of the research advisory committee and to the

program director for discussion with the student and for program assessment.

- Dissertation research:** The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research, incorporating two or more disciplines. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to the public, also is required. Written evaluations of the dissertation and the oral defense of the dissertation will be completed by research advisory committee members. These evaluations are provided to the chair of the research advisory committee and to the program director for discussion with the student and for program assessment. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences, with a concentration in behavioral and statistical genetics.

## Curriculum requirements

A minimum total of 64 graduate credit hours is required and is distributed as follows:

Course	Title	Hours
<b>Core courses</b>		
LFSC 630	Integrative Life Sciences Research	2
LFSC 631	Student Seminar in Integrative Life Sciences	2
LFSC 690	Research Seminar in Integrative Life Sciences	2
<b>Scientific integrity course</b>		
OVPR 601 or OVPR 602 or OVPR 603	Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research	1
<b>Technologies course (recommended, with approval from committee)</b>		2
HGEN 611	Data Science I	
<b>Advanced statistics, advanced mathematics or experimental design course</b>		
CCTR 702	Statistics for Genetic Studies I	3
<b>Additional required concentration courses</b>		
CCTR 703	Statistics for Genetic Studies II	3
HGEN 501	Introduction to Human Genetics	3
HGEN 502	Advanced Human Genetics	3
HGEN 610	Current Literature in Human Molecular Genetics	2
HGEN 620	Principles of Human Behavioral Genetics	3
EPID 646	Epidemiology of Psychiatric and Substance Use Disorders	3
<b>Elective courses</b>		
Select six credit hours from the following:		6

500-level or higher courses in ANAT, ANTH, BIOC, BIOL, BIOS, BNFO, CHEM, CLSE, CMSC, EDUS, EGRB, ENV5, EPID, FRSC, HGEN, MATH, MEDC, MEDP, MICR, NANO, NEUS, OPER, PATH, PCEU, PHAR, PHIS, PHTX, PSCI, PSYC or STAT

## Integrative Life Sciences, Doctor of Philosophy (Ph.D.) with a concentration in bioinformatics and genome sciences

### Program mission

The Ph.D. in Integrative Life Sciences is designed for students who want to conduct research that is integrative across multiple disciplines and that takes a systems approach to emerging research questions across the many fields that comprise the life sciences. Students may opt to work with research faculty members from any department, center or institute across VCU campuses. The program provides the opportunity to conduct interdisciplinary research at multiple scales of study from the molecular to ecosystem levels.

### Program goals

- 1. Interdisciplinary knowledge and skills:** The core curriculum of the ILS program will effectively assist students in gaining understanding of modern systems biology along with training in the interdisciplinary skills and knowledge increasingly required for doing effective research in the life sciences. It will also foster progressive development of a mastery of the current state of the research in students' areas of interest as they seek to identify key focus areas for their integrative research.
- 2. Research skills:** The mentored research component of the program, building on the core curriculum and interdisciplinary elective course work, will foster development of an ability to synthesize this learning and identify key focus areas for integrative research. It will support students as they learn how to design, implement and interpret interdisciplinary experimental approaches that will best address their research questions.
- 3. Communication skills:** Students in the program will develop skills in both written and oral communication of life science knowledge,

experimental design, results and interpretation to a variety of potential audiences.

### Student learning outcomes

- 1. Oral communication skills:** The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
- 2. Written communication skills:** The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations, as measured by rubric.
- 3. Experimental design:** The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify, and/or create and implement experimental protocols and to design and develop experiments, as measured by rubric.
- 4. Problem-solving skills:** The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems, as measured by rubric.
- 5. Integrated knowledge:** The candidate will demonstrate an appropriate level of knowledge of the life sciences and a more detailed understanding of the disciplines most pertinent to their own interdisciplinary research areas, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications, as measured by rubric.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree

candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred)	Jan. 10	TOEFL, IELTS or equivalent for international students

**Note:** All application components must be received by Jan. 10 to be competitive.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the Ph.D. in Integrative Life Sciences program requires graduation from an accredited college or university or its equivalent with a degree that is preparative for graduate-level study in the life sciences. Applicants should have a minimum GPA of 3.0 on a 4.0 scale. The GRE is not required. For international applicants, satisfactory scores from a standardized test, such as the TOEFL (a minimum score of 100) or IELTS (minimum band scores of 7.0), must be submitted along with external evaluation of undergraduate transcripts from nondomestic educational institutions (see Graduate Admissions website (<http://graduate.admissions.vcu.edu/apply/>) for further details).

Letters of recommendation from three present or former professors, advisers or mentors qualified to evaluate the applicant's ability to engage in graduate research in the life sciences are required, as is a written statement from the applicant describing the applicant's research interests, motivation, research experience, education and goals for pursuing graduate study in this particular program, preferred research adviser(s), official transcripts from all past postsecondary educational institutions, official GRE scores, and current curriculum vita or resume. Applicants are **strongly** encouraged to contact potential research advisers prior to submitting application materials and to identify potential research advisers in their personal statements. Individuals who have identified a research adviser will be given preference for admittance and funding.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to complete course work in core and elective courses and to conduct significant research. All work toward the degree must be completed within eight years of the first enrollment.

- Credit-hour requirements:** Students pursuing the concentration in bioinformatics and genome sciences are required to earn a minimum of 64 graduate-level credit hours. At least one-half of the graduate credit hours presented for graduation must be at the 600 level or higher.
- Grade requirement:** Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than one course. The GPA for graduation is based on all graduate courses attempted after acceptance into the program.
- Transfer/waiver credit:** Graduate-level VCU course work taken as a nondegree-seeking student or in a previous graduate matriculation for which a degree was never awarded may be evaluated to determine whether it can be used to fulfill degree requirements of this program in accordance with the VCU Graduate School transfer policy (p. 27). Course work completed toward a previous degree can also be considered as a waiver of program core or elective course work requirements. In these cases, the requirement(s) are waived, and other course work or research credits can be used to make up credits needed toward the degree. A minimum grade of B is required for credit hours transferred or waived.
- Research adviser and committee:** Students should select a research adviser prior to matriculation, but no later than the end of the first semester. The research adviser may be chosen from among the many graduate faculty members from any VCU research unit. This research adviser is approved by the program director in accordance with the Graduate School bylaws. Students are required to form a research advisory committee that is headed by the research adviser and that consists of a minimum of four other members of the VCU graduate faculty. Individuals who are not graduate faculty members (i.e., individuals from another institution or industry) must apply to the dean of the Graduate School for temporary affiliate graduate faculty appointment. The significant areas of the student's research focus should be represented by the members of the research advisory committee. At least two members of the committee should have primary appointments in departments other than that of the research adviser, with one of those members being integrally associated with the student's research to foster the interdisciplinary intent of this degree program. Students should form their committees no later than the end of the second semester of study. This committee must be approved by the program director.
- Written and oral examinations:** Before admission to degree candidacy for the Ph.D. degree, students must successfully complete a comprehensive examination and a research proposal examination. The student's research advisory committee will administer both exams. Students should take the comprehensive exam upon completion of all required didactic course work, usually no later than the end of the fourth semester of study. It may be written or oral (or both) and will focus on material covered in core and selected elective courses as well as fundamental knowledge relevant to the student's research field. Upon successful completion of the comprehensive examination and submission and acceptance of a written research proposal, students will take an oral examination that includes a defense of the proposed research project and other subject areas deemed appropriate by the committee. Students may retake the comprehensive and research proposal examinations only once.

each. Written evaluations of the examinations will be completed by research advisory committee members. These valuations are provided to the chair of the research advisory committee and to the program director for discussion with the student and for program assessment.

6. **Dissertation research:** The dissertation research project should represent a significant contribution to the body of knowledge in its field and should be deemed suitable for publication in refereed journals. The emphasis of the research conducted by students in this program should be on interdisciplinary research and incorporate two or more disciplines. Research projects may take advantage of the many research opportunities across the life sciences on both campuses. Students shall prepare a written dissertation describing the completed research using the format approved by the Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to the public, also is required. Written evaluations of the dissertation and the oral defense of the dissertation will be completed by research advisory committee members. These evaluations are provided to the chair of the research advisory committee and to the program director for discussion with the student and for program assessment. Upon successful completion of all degree requirements, students will graduate with the Ph.D. in Integrative Life Sciences with a concentration in bioinformatics and genome sciences.

## Curriculum requirements

A minimum total of 64 graduate credit hours is required and is distributed as follows:

Course	Title	Hours
<b>Core courses</b>		
LFSC 630	Integrative Life Sciences Research	2
LFSC 631	Student Seminar in Integrative Life Sciences (one credit hour taken two semesters)	2
LFSC 690	Research Seminar in Integrative Life Sciences (one credit hour taken two semesters)	2
Scientific integrity

<b>Directed research (minimum 32 credit hours)</b>		<b>32</b>
LFSC 697	Directed Research in Integrative Life Sciences	
<b>Total Hours</b>		<b>64</b>

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

davincicenter.vcu.edu (<http://www.davincicenter.vcu.edu>)

**Garret Westlake**  
Executive director

A collaboration of VCU's schools of the Arts, Business, Engineering and College of Humanities and Sciences, the VCU da Vinci Center is a unique collegiate model that advances innovation and entrepreneurship through cross-disciplinary collaboration.

The academic and other program offerings of the da Vinci Center aim to create T-shaped individuals: individuals who are anchored in a discipline and have the capacity and openness to span across disciplines.

Students participating in the da Vinci Center view innovation and entrepreneurship from multiple disciplinary perspectives and, thus, are prepared for the 21st-century workforce by more robustly approaching the innovation/entrepreneurship endeavor.

- Product Innovation, Master of (M.P.I.) (p. 766)
- Health Care Innovation, Certificate in (Graduate certificate) (p. 765)

## Health Care Innovation, Certificate in (Graduate certificate) [da Vinci Center for Innovation]

The Certificate in Health Care Innovation is a collaboration between the VCU School of Nursing and the VCU da Vinci Center for Innovation. The graduate certificate will prepare students to become leaders in developing digital and physical products and innovative solutions in the area of health care. Students will acquire skills and knowledge necessary to identify problems and implement solutions that foster high-quality, safe and accessible health care. The curriculum focuses on merging principles of leadership in health care and principles of product innovation and emphasizes the analysis of organization and clinical processes for effective operations to improve quality and safety. The specialized knowledge and skills include problem identification, product development, user analysis, prototyping, testing, marketing, intellectual property protection (patents, copyrights and trademarks) and commercialization opportunities.

### Student learning outcomes

Graduates will:

1. Acquire skills and knowledge necessary to identify problems and implement solutions that foster high quality, safe and accessible health care
2. Develop specialized skills and knowledge to lead health care teams in innovation

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

### Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

**Visit the academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

### Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	All	Rolling admissions made on a space-available basis	

The admission requirements outlined below will apply to all students. All applicants to the graduate certificate program are required to meet the **admission requirements of the VCU Graduate School**. Applicants will be required to submit the following materials to Graduate Admissions:

- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official undergraduate transcripts from all schools attended
- A statement of purpose outlining career goals, strengths and skills that will be brought to a team and how life experience has shaped the applicant's perspective
- A resume or CV stating relevant work experience in health care and any additional experience in design, business, engineering, product development, innovation and/or entrepreneurship

The VCU School of Nursing and the VCU da Vinci Center for Innovation require students to have a bachelor's degree with evidence of strong academic performance.

No transfer credit hours are accepted for this certificate program. Credits applied to a degree already awarded cannot be applied toward the certificate.

International students will submit an official transcript evaluation from a recognized foreign educational credential evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program.

International applicants must also provide additional information with the application according to the English language proficiency guidelines for those who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/graduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/graduate-applicants/).)

In addition to the general admission requirements of the VCU Graduate School (<http://graduate.admissions.vcu.edu/apply/>), the following requirements represent the standards for admission:

1. Applicants from a health care background must be in good standing with licensing and certifying bodies as applicable.
2. Select applicants will complete a scheduled interview with the graduate admissions committee.

## Degree requirements

Students will complete course work to develop specific knowledge and skills in leadership and processes related to development and implementation of innovative solutions to health care issues such as rising costs and improving quality and access to care. The curriculum focuses on merging principles of leadership in health care and principles of health care innovation while emphasizing the analysis of organization and clinical processes for effective operations to improve quality and safety. Problem identification, product development, user analysis, prototyping, testing, marketing and commercialization opportunities will be emphasized.

## Curriculum requirements

Course	Title	Hours

## Product Innovation, Master of (M.P.I.)

### Program mission and objectives

Integrating arts, business and engineering principles, students in the Master of Product Innovation learn advanced product innovation topics pertaining to conceptualization, development and commercialization of new products/services. Through unique instruction and experiential learning that culminates with a yearlong master's project, students have a real product innovation experience. The program emphasizes product innovation and teamwork skills so that graduates can take on key leadership roles that stimulate the creation, development and management of new products and services.

### Student learning outcomes

The M.P.I. program hones competency in the area of product innovation. Students will:

1. Demonstrate successful collaboration skills
2. Demonstrate the ability to conceive and develop product concepts and related business plans
3. Demonstrate the ability to think across multiple disciplines
4. Demonstrate the ability to create and deliver effective presentations and other communication media such as reports and portfolios

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.P.I.	Summer	Apr 15	See special requirements below

## Special requirements

- At the time of application, an applicant declares an area of specialization: arts, business or engineering. The arts specialization requires the submission of a portfolio comprising 20 to 30 examples of representative work; the business specialization requires either the GMAT or GRE; and the engineering specialization requires the GRE. A personal interview may be requested.

In addition to the general admission requirements of the VCU Graduate School (p. 34), the following requirements represent the minimum acceptable standards for admission:

- A bachelor's degree or equivalent from an accredited college or university
- Except in very unusual cases approved by the graduate dean, a minimum undergraduate GPA of 3.0 on a 4.0 scale for at least the last two years of undergraduate work
- For applicants whose native language is not English, satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL
- Three letters of recommendation
- Applicant's written statement of intent for pursuing graduate study in the product innovation discipline

## Degree requirements

The Master of Product Innovation requires a minimum of 30 graduate credit hours for completion. In addition to general VCU Graduate School graduation requirements (p. 31), students must:

- Complete the boot camp experience prior to the first semester of study in the program
- Complete the required core curriculum courses (12 or 15 credit hours of specified course work depending on undergraduate degree)
- Complete two elective courses (six credit hours) with one of these courses at the 600 level
- Complete the master's project courses (12 credit hours) (The master's project is mandatory for all students.)

The program can be taken either on a full-time or part-time basis.

## Curriculum requirements

Course	Title	Hours
<b>Core requirements</b>		
Select two or three of the following: <sup>1</sup>		6-9
INNO 501	Arts Principles for Product Innovation	
INNO 502	Business Principles for Product Innovation	
INNO 503	Technology Principles for Product Innovation	
INNO 590	da Vinci Project	3
INNO 600	Integrative Design Studio	3
<b>Technical electives</b>		
Select two of the following: <sup>2</sup>		6
INNO 691	Topics in Product Innovation	
INNO 697	Guided Study in Product Innovation	
Other approved graduate-level course <sup>3</sup>		
<b>Master's project</b>		
INNO 651	Master's Project in Product Innovation I	6
INNO 652	Master's Project in Product Innovation II	6
Total Hours		30-33

<sup>1</sup>

Select depending on which courses do not correspond to the undergraduate degree. If the student does not have an undergraduate degree in an arts, business or engineering discipline, all three courses must be taken. **Note:** Students are strongly encouraged to take all three courses regardless of undergraduate degree.

2

All technical electives must be at the graduate level, with at least three credit hours at the 600 level.

3

Specific courses will be determined by the student with approval by the M.P.I. faculty committee.

**The minimum total of graduate credit hours required for this degree is 30.**

## Sample full-time enrollment plan of study

### Year one

Summer semester		Hours
INNO 600	Integrative Design Studio	3
INNO 691	Topics in Product Innovation	3
Term Hours:		6

### Fall

INNO 501	Arts Principles for Product Innovation <sup>1</sup>	3
INNO 502	Business Principles for Product Innovation <sup>1</sup>	3
INNO 503	Technology Principles for Product Innovation <sup>1</sup>	3
INNO 590	da Vinci Project	3
Term Hours:		9-12

### Spring

INNO 651	Master's Project in Product Innovation I	6
INNO 691	Topics in Product Innovation (or other 500-600 level technical elective approved by MPI faculty committee)	3
Term Hours:		9

### Year two

Summer semester		Hours
INNO 652	Master's Project in Product Innovation II	6
Term Hours:		6
Total Hours:		30-33

1

Select depending on which courses do not correspond to the undergraduate degree. If the student does not have an undergraduate degree in an arts, business or engineering discipline, all three courses must be taken. Note: Students are strongly encouraged to take all three courses regardless of undergraduate degree.

**The minimum total of graduate credit hours required for this degree is 30.**

## P. Srirama Rao, Ph.D.

Vice president for research and innovation

The mission of the Virginia Commonwealth University Office of Research and Innovation is to create an environment that enables university investigators to: 1) effectively compete for research funding, 2) responsibly conduct research in compliance with mandated policies and 3) broadly disseminate knowledge gained and discoveries made.

Research universities provide the nexus of discovery, education and service. The research process evolves into scholarly publication, enlightening histories, interpretative arts, lifesaving drugs and remarkable innovations ranging from nanotechnology to macroeconomics. Each day VCU researchers make progress toward improving quality of life and understanding of the world around us.

Research at VCU provides an incubator for training new scholars and a new generation of students who understand where and how knowledge is formed. No matter their chosen career, all researchers benefit from the curiosity instilled and the recognition that learning is a lifelong process.

The research enterprise at VCU has made substantial forward steps in recent years, doubling the sponsored award base, renovating laboratories, rebuilding the research subjects' protection program and investing in state-of-the-art animal care equipment and facilities.

The VCU Office of Research and Innovation seeks to partner with faculty in all schools and departments as they seek funding, plan studies, establish collaborations, calculate budgets, submit grant applications, negotiate industry contracts and secure patents and licensing agreements. Skilled staff within each of the major divisions — sponsored programs administration, research subjects protection, animal research, technology transfer, industry partnerships, and education and oversight — look forward to helping VCU faculty in all realms of the research process.

Affiliated research institutes include the Center for Clinical and Translational Research (and its Research Incubator), the Institute for Drug and Alcohol Studies, the Philips Institute for Oral Health Research, the Virginia Institute for Psychiatric and Behavioral Genetics, the Institute for Structural Biology and Drug Discovery and the Institute for Women's Health.

## Center for Clinical and Translational Research

1200 East Clay Street  
Box 980261  
Richmond, Virginia 23298-0261  
(804) 827-1531  
Fax: (804) 827-1510  
cctr.vcu.edu (<https://cctr.vcu.edu/>)

## F. Gerard Moeller, M.D.

Director

The Center for Clinical and Translational Research at Virginia Commonwealth University provides the necessary longitudinal and cross-disciplinary network, culture and infrastructure for identifying promising discoveries made in the laboratory, testing them in animals and developing trials and studies for humans.

Joint participation of researchers from across the university is critical to this mission. Partnerships with foundations and industry — particularly the support of the Virginia BioTechnology Research Park — is also crucial for moving these discoveries to the clinic. At the same time, mutually beneficial partnerships with community practitioners, community organizations and patients enhance the adoption of evidence-based best practices in general clinical practice and thus deliver improved medical care to the region.

The center offers a corridor in which participants in the translational research continuum can meet, interact and advance each others' missions. Bench and computer scientists will learn from animal models and clinician observations. Clinical researchers will recognize the need for communication with basic scientists to direct experimental design. Community practitioners will better understand their role in informing the clinical research process and participating in pragmatic clinical trials. Patients will develop a higher comfort level with "medical research."

The center also serves as the administrative unit for the interdisciplinary graduate degrees in clinical and translational sciences.

## Research Incubator

The Clinical and Translational Research Incubator is designed to serve as a hub for resources and networking opportunities for established researchers and junior clinical investigators who are working on novel, interdisciplinary and collaborative clinical research at VCU. The RI will support its investigators by coordinating and optimizing current resources and by developing innovative new resources to facilitate the research process. It is anticipated that faculty researchers from the schools of Allied Health Professions, Dentistry, Education, Engineering, Medicine, Nursing, Pharmacy and Social Work, as well as the College of Humanities and Sciences, will access services at the RI.

- Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.) with a concentration in cancer and molecular medicine (p. 769)
- Clinical and Translational Sciences, Master of Science (M.S.) (p. 773)
- Clinical Research, Certificate in (Post-baccalaureate certificate) (p. 775)

## Clinical and Translational Sciences, Doctor of Philosophy (Ph.D.) with a concentration in cancer and molecular medicine

### Program goal

The doctoral program in clinical and translational sciences offers a general curriculum, an interdisciplinary concentration in psychiatric, behavioral and statistical genetics and a concentration in cancer and molecular medicine.

Students who pursue the doctoral program in clinical and translational sciences will be grounded in a relative substantive area and be prepared to integrate data from multiple disciplines, have strong communication and computational skills and be sufficiently flexible to easily move among different projects and research venues.

## Student learning outcomes

Students who complete the program should achieve the following core competencies:

1. Understand, integrate and apply relevant discipline-specific biomedical concepts and theoretical frameworks in research, written and oral communication
2. Comprehend, assess and apply appropriate theories and/or experiments to address issues in the literature, research and in oral communication
3. Comprehend and assess context, methodology and data of scientific articles
4. Comprehend what is being measured, theoretical knowledge on how measurement occurs, be able to compare outcome to homologous types of data
5. Be able to define, identify and express weaknesses in research or content as an effort for further investigation or suitable explanation
6. Plan, incorporate and use appropriate terminology for orally imparting research findings and theories
7. Use writing as a vehicle to impart or explain research findings and theories in a discipline- or audience-specific manner

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Ph.D.	Fall (preferred); rolling admissions	Applications received by Jan 10 receive priority	GRE, TOEFL if relevant

In addition to the general admission requirements of the VCU Graduate School (p. 34) all applicants must provide the following:

1. A statement of purpose for application to the program. The document should be 1.5 or double-spaced with one-inch margins, in a font height no smaller than 11 points. The statement of purpose should cover the following issues in two to five pages:
  - a. Why the applicant wishes to pursue a Ph.D. in the Clinical and Translational Sciences with a concentration in cancer and molecular medicine
  - b. Background experience relevant to pursuing a Ph.D. in the concentration in cancer and molecular medicine
  - c. Research interests and potential faculty mentors with whom the individual would want to work
  - d. Description of the applicant's career goals
2. Scores from the Graduate Record Examination. Applicants **must** score at the 75th percentile or above in all sections of the GRE.
3. International applicants must also provide, to the VCU Global Education Office, scores from the Test of English as a Foreign Language or International English Language Testing System.

## Degree requirements

All students are expected to be actively engaged in research throughout the duration of the Ph.D. program. Students are generally admitted under a mentorship model, meaning that they will begin research under the supervision of faculty advisers to whom their research interests most closely align. Other didactic experiences include the weekly seminar series (both at the VIPBG and in external departments) as well as participation in workshops and scientific meetings of relevance to the student's research area.

The curriculum provides a strong grounding in fundamental concepts while emphasizing aspects of research design and technology that are broadly applicable across disciplines in industrial, government and academic settings. A series of elective courses will then provide an advanced base of knowledge focused on a student's areas of interest.

In addition to general VCU Graduate School graduation requirements (p. 31), students are required to meet the following:

1. Credit hour requirements: Students are required to complete course work in core and elective courses and to conduct significant research. In order to earn the Ph.D., students must complete a minimum of 54 credit hours: 32 core and elective courses as well as 22 in directed and dissertation research that provide a sound foundation in clinical and translational research principles. Students will also participate in seminar and workshop experiences that place them in the midst of the research process from theoretically based hypothesis generation through grant writing, study conduction, and, ultimately, data analysis and manuscript preparation. This program also includes a rigorous interdisciplinary research component comprising directed research and dissertation hours.
2. Transfer and M.S. credit hours: Graduate-level course work completed prior to matriculation into the program, including course work taken in another program at VCU or at another institution, shall be evaluated to determine whether it can be used to fulfill degree requirements of this program. Transfer of credit hours will be limited to those allowed by the university. A minimum grade of B is required for credit hours to transfer.
3. Grade requirements: Degree applicants must achieve an overall GPA of 3.0 (B) with a grade of C in no more than two courses per the VCU Graduate Bulletin. The GPA for graduation shall be based on all graduate courses attempted after acceptance into the program. Students who receive a grade lower than a B in any of the required core courses will be subject to remedial action as determined by their advisory committee in conjunction with the program director to ensure that there is adequate mastery of the material. All remedial action must be undertaken and completed to the committee's satisfaction before the student is eligible to begin their qualifying exams.
4. Research advisers and committee: The director of the CCTR education program or the director's designee will assist the student with initial course selection and provide advice concerning the program. All students should select their master's or doctoral co-advisers and finalize the composition of their research advisory committee prior to the end of the second semester of study.
5. The student's co-advisers shall provide each student enrolled in the master's or doctoral program with individualized recommendations regarding course work selection, workshop experiences and the direction of their research. It is essential that each student be comprehensively assessed in the area of their methodological and research background. Particularly in the case of those pursuing the Ph.D., recommendations will be made to ensure that each student has acquired the needed substantive research background necessary for doctoral-level work. Thus, the total credit hours required for graduation will be determined on a case-by-case basis by the individual student's research advisory committee.
6. The committee will consist of a minimum of five members, all of whom must be members of the VCU graduate faculty. Note: Individuals who are not already graduate faculty members must apply to the dean of the Graduate School for temporary affiliate membership. The composition of the research advisory committee shall be such that the significant areas of the student's research focus are represented. To foster the interdisciplinary intent of this degree program, at least one member of the committee shall be from a school other than those of the student's co-advisers. Final approval of each student's advisory committee membership shall rest with the CCTR Education Program committee.
7. Admission to candidacy for the Ph.D. Before admission to candidacy for the Ph.D., students must have:
  - a. Completed all required course work (as noted above, through a comprehensive screening process students will have been evaluated to assure that they have grounding in a relevant substantive content area and have taken the needed course work in statistics, methodology and research so that they are able to pursue doctoral-level research)
  - b. Successfully completed an oral examination
8. Oral examination: Upon successful completion of all required didactic course work, not including seminars and workshops and submission and acceptance of a research proposal, students shall take an oral examination administered by the student's research advisory committee. The exam shall be based on a defense of the student's proposed dissertation research project, which shall be constructed in the format of an NIH grant submission and all other subject areas deemed appropriate by the committee. All advisory committee members must vote on the student's performance as either Pass or Fail. A student may pass the exam with no more than one negative vote. Upon successful completion of the oral examination, the student is officially entered into candidacy and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below). An unsuccessful oral examination shall require re-examination within a time period determined by the committee. Only one oral re-examination is permitted.
9. Dissertation research/proposal: Students must propose and conduct a substantial original clinical and/or translational investigation under the supervision of the research advisers and advisory committee. The student can refine the research proposal which served as the foundation of their oral examination in consultation with the research advisers and advisory committee or propose a new novel research proposal. The proposal, which shall be constructed in the format of an NIH grant submission, should include information on the general purpose of the research, background information on the research topic (including a review of the relevant literature), a rationale for the project, a statement of the hypotheses to be investigated or research questions to be answered, and proposed methods and statistical analyses. Once the student has received the committee's approval, they can initiate their dissertation research.
10. Dissertation research project: The research project should represent a significant contribution to the body of knowledge in its field and should be deemed publishable in refereed journals. The emphasis of the research conducted by students in this program shall be on clinical and translational interdisciplinary research, incorporating two or more disciplines as well as a systems approach. This emphasis will be fostered by the requirement of having at least one faculty member on the research advisory committee from a school or college different from that of the research advisers, thereby exposing students to different perspectives on the same problem and assisting students in developing multidisciplinary approaches to their research.
11. Dissertation defense: Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty

members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense. Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences.

## Research advisers and committee

Each student in the program will have both a research and a clinical mentor (these could be the same or different faculty members). This team-based mentoring approach will facilitate the translational aspects of the Ph.D. students' projects and may actually serve to stimulate new translational projects and collaborations at VCU. The research mentors in the program will be chosen based on demonstrated research expertise in the area of cancer or molecular medicine, excellent mentoring skills, and research funding to support the Ph.D. student. Clinical mentors will be chosen based on clinical expertise and mentoring excellence. Through the clinical mentor, the trainee will have opportunities to be exposed to clinical practice, including clinics and surgeries, clinical laboratories, the complexities of clinical trials, and other clinical activities. The clinical activities are expected to consist of approximately one hour/week on average for Ph.D. students, but would be more intensive for M.D./Ph.D. students, in keeping with the existing requirements for that program. Both the research and clinical mentor would be on the thesis committee, which would comprise a total of five faculty members, at least three of whom are CaMM faculty members. For M.D./Ph.D. students, their clinical mentors will be the same faculty member serving as their Foundations of Clinical Medicine preceptors. The students' mentors and thesis committee will advise the students as they prepare career development plans in the second year in the program. The career development plan will be required because translational science is by definition an interdisciplinary and novel career path for students.

## Qualifying examination

Students in good academic standing who have completed all of their required academic core course work will spend the summer after the second year preparing for the qualifying exam. The qualifying exam will consist of writing a review paper of no more than 30 double-spaced pages, excluding references. In keeping with the interdisciplinary nature of the program, the review paper must demonstrate mastery across the core areas represented in CaMM. The topic of the review paper should be developed by students in consultation with their advisers. The title of the review paper, along with a short abstract (no longer than one single-spaced page) describing the proposed content should be submitted to the concentration program director by June 15 for review by the qualifying exam committee. The QEC will review the proposal to ensure that the topic of the review paper is appropriate in that it allows the student to demonstrate command of the literature and interdisciplinary breadth. The committee will make decisions about adequacy of the review paper and, if necessary, work with the student to make revisions within approximately 14 days. Once the topic has been approved by the QEC, the student may begin writing. The review paper must be the student's own work. Drafts may not be reviewed by the student's adviser

or other faculty, fellows or students. The final review paper must be submitted to the advisory committee by Aug. 1.

An oral examination of the paper administered by the student's advisory committee and the QEC must be scheduled to take place approximately two weeks after submission to evaluate the student's command of the material and to give the committee opportunity to ask questions and provide feedback. A pass/fail decision will be made at that time. Unsuccessful completion of the qualifying exam will require re-examination within a period of time determined by the committee and the program director. The content of the re-examination will also be determined by the committee and program director on an individual basis. In some cases this could involve a revision of the review paper or particular sections; in other cases, it may involve a repeat of the entire process including selection of a new topic and submission of a new review paper and/or repeat of the oral defense. Only one reattempt to pass qualifying exams is permitted. Students who do not pass their qualifying exams upon their second attempt will be dismissed from the program. Upon successful completion of the oral examination, the student is then officially entered into candidacy for the Ph.D. and permitted to refine their proposed dissertation research and submit it for final committee approval before initiating the project (see below).

## Admission to Ph.D. candidacy

Students will have written and oral qualifying examinations, based on writing a grant proposal describing their proposed thesis research and orally defending the proposal with their thesis committee. Before admission to candidacy for the Ph.D., students must have (1) completed all required course work as described above and (2) successfully completed a qualifying exam.

## Dissertation proposal defense

Students who have completed the qualifying exam and the second year project are eligible to propose and defend their dissertation. The proposal should be constructed in the format of an NIH grant submission. The proposal must consist of an original research idea generated by the student in consultation with their adviser. The dissertation proposal defense should generally be completed during the fall semester of the third year. Students shall prepare a written dissertation describing the completed research using a format approved by the VCU Graduate School. An oral defense of the dissertation, under the direction of the research advisory committee and open to all faculty members, shall be scheduled to examine the student's research, dissertation documentation and underlying fundamental knowledge across the disciplines encompassed by the student's research. An announcement of the oral defense, including the candidate's name, dissertation title, and the day, place and time of the defense, shall be made at least 10 working days in advance of the defense.

Following the defense, all committee members shall vote on the acceptability of the dissertation. A student may pass the oral defense, signifying that the research advisory committee has accepted the dissertation, with no more than one negative vote. Upon successful completion of the defense and dissertation, the student may apply for graduation from Virginia Commonwealth University with the degree of Doctor of Philosophy in Clinical and Translational Sciences with a concentration in cancer and molecular medicine.

## Time limit

All requirements for the Ph.D. must be completed within eight years from the date of admission to the degree program.

## Concentration in cancer and molecular medicine

The concentration in cancer and molecular medicine is a translational and interdisciplinary Ph.D. curriculum in the Center for Clinical and Translational Research. The goal of the program is to train students to perform translational research in cancer and molecular medicine. This requires a background and the necessary vocabulary to communicate with both scientists and clinicians and the research skills to be able to bridge bench science and clinical science. The marriage of cancer and molecular medicine blends established cancer biology with an emerging field, molecular medicine. The CaMM concentration serves as an educational program for Ph.D. as well as M.D./Ph.D. students encompassing the research objectives of the VCU Massey Cancer Center, the VCU Institute of Molecular Medicine and the CCTR.

In addition to the core courses, elective courses will be recommended to Ph.D. students based on their research. Students will develop an individualized curriculum with the guidance of the program director, based on their research interests and career goals. By the end of the first semester, each student will develop a complete curriculum plan, to be approved by the program director. This will be reviewed by the student's thesis committee in the second fall semester.

## Curriculum requirements

Course	Title	Hours
<b>Required courses</b>		
ANAT 620	Scientific Grantsmanship	2
BIOS 543	Graduate Research Methods I	3
or STAT 543	Statistical Methods I

## Clinical and Translational Sciences, Master of Science (M.S.)

### Program goal

The Master of Science in Clinical and Translational Sciences program provides training and mentoring for a new generation of investigators who, regardless of primary areas of interest, will be able to understand the methods and techniques used along the pathway from the bench to the bedside, to the community and beyond. The program emphasizes the importance of interdisciplinary approaches to research.

### Student learning outcomes

1. Understand, integrate and apply relevant biomedical biobehavioral concepts and theoretical frameworks to research
2. Comprehend, select and apply the appropriate study design to address specific health issues
3. Critically review the scientific literature by applying sound research knowledge and principles to the review
4. Apply data collection processes and information technology to create, maintain and secure databases and other information
5. Apply ethical principles to study design, data collection and dissemination
6. Devise an analysis plan (statistical methodology) and analyze data using methods appropriate for the study design and type of data to be obtained
7. Identify, interpret and implement relevant laws, regulations and policies related to specific studies and/or programs
8. Plan, incorporate and use appropriate methods for the dissemination and adoption of clinical research findings

9. Manage as a clinical translational research team leader, including the fiscal, personnel, facilities, regulatory assets and scientific integrity of a funded clinical research program
10. Effectively communicate specialist-to-specialist
11. Effectively communicate specialist knowledge to nonspecialists and laypersons

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.S.	Fall	June 15	None

In addition to the general admission requirements of the VCU Graduate School (p. 34), please note the following:

1. Enrollment is open to VCU junior faculty or residents only.
2. Applicants should be early stage investigators or residents with terminal degrees (e.g. M.D., Ph.D., D.D.S., Sc.D., D.V.M., Ed.D., Pharm.D.).
3. Applicants should have a targeted research interest that is explained in a personal statement accompanying the graduate application.
4. A letter of support from the applicant's department chair is mandatory.
5. A letter of commitment from an academic adviser is mandatory.

## Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 31), the master's degree can be earned upon completion of 30 credit hours that combine didactic course work and directed research, including a master's capstone project in the form of a peer-reviewed journal article or a grant proposal.

The program provides a sound foundation in clinical and translational research principles and thereby prepares the student to engage in many components of investigative processes. Students are expected to attend the research seminar course each semester they are in the program (and register for the course a minimum of three times) in order to stay abreast of current health and human services research and to develop their communication skills. Additionally, students must complete a course on responsible conduct of research and scientific integrity, which will ensure that students understand the broad ethical implications of biobehavioral and biomedical research, understand what constitutes scientific fraud and misconduct and are aware of their responsibilities as scientists.

When students have reached 27 credit hours of didactic and research course work, they must register for CCTR 700, which may be in one of two forms: an NIH-style grant proposal or a peer-reviewed journal article ready for submission.

This project will be overseen and reviewed by the student's research advisory committee. Students are expected to present their final projects to the committee for acceptance.

## Curriculum requirements

Course	Title	Hours
BIOS 543	Graduate Research Methods I	3
BIOS 544	Graduate Research Methods II	3

## Electives

Course	Title	Hours
--------	-------	-------

Examples of potential electives include but are not limited to:

ANAT 615	Techniques in Neuroscience and Cell Biology	
ANAT 620	Scientific Grantsmanship	
BIOC 530	Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function	
BIOC 532	Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology	
BIOS 668	Statistical Methods for High-throughput Genomic Data II	
BNFO 621	Business and Entrepreneurship Essentials for Life Scientists	
CCTR 640	Team Science: Theories and Practice	
CCTR 801 & CCTR 802 & CCTR 803	Clinical Practicum and Research Practicum I and Research Practicum II	
EPID 571	Principles of Epidemiology	
EPID 603	Public Health Policy and Politics	
EPID 606	Epidemiologic Methods	
MEDC 530	Bioinformatics and Genomics in Drug Research	
NURS 773	Perspectives on Research Design

## Clinical Research, Certificate in (Post-baccalaureate certificate)

The post-baccalaureate Certificate in Clinical Research educates students in the conduct of clinical (human) research studies and trials. The focus of the curriculum is in the foundational knowledge necessary to understand basic clinical research and trial study design,

statistics and data management; ethical principles to respect and protect the rights and welfare of individuals participating in clinical research; and select regulations and guidelines to guide activities related to new biopharmaceutical and medical device product development.

Students will develop the essential knowledge and understanding to organize, coordinate and administer clinical research studies and trials working with participants in a culturally aware manner; supporting and performing quality data collection; and applying ethical, regulatory and compliance requirements. Students who complete the certificate will be well-prepared to be effective and successful members of the clinical research workforce.

**Note: This program is not eligible for the issuance of student immigration documents.**

## Student learning outcomes

1. Students will demonstrate a comprehensive understanding of, and commitment to the protection of the human research participant rights, safety and welfare.
2. Students will commit to practicing as a clinical research professional in an ethical and responsible manner in accordance with good clinical practice and applicable regulations and laws.
3. Students will demonstrate skills and competencies pertaining to the conduct of clinical research utilizing cultural awareness, understanding study design and appropriate data collection methods.
4. Students will demonstrate their commitment to engage in continuing education toward becoming increasingly proficient in their practice and to ensure that their practice-related knowledge and skills remain current.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Any	Rolling admission	Non-native English speakers see requirements outlined below.

The admission requirements outlined below apply to all students. All applicants to the post-baccalaureate Certificate in Clinical Research program are required to:

- Submit a completed application and the application fee
- Have earned an undergraduate degree – preferably in a life science, a health care discipline, a social/behavioral science or mathematics/statistics – from a U.S. regionally accredited university or college (or its equivalent from a foreign institution based upon a four-year program) with a minimum cumulative 2.5 GPA
- Provide three letters of recommendation (at least one from a current or former employer)
- Provide an official undergraduate transcript(s) from all schools attended
- Provide documentation of a minimum of one year of health-related work experience
- Submit a current resume or CV (including relevant work experience)
- Submit a statement of purpose outlining their career goals (less than 500 words)
- Have completed the Collaborative Institutional Training Initiative program basic human subjects protection module **and** good clinical practice module (either social/behavioral clinical trials or biomedical clinical trials)

International students will submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Services or the American Association of Collegiate Registrars and Admissions Officers.

Non-native English speakers will provide evidence of proficiency in English by one of the following:

- A test of English as a Foreign Language minimum composite score of 100 for the internet-based test or 600 for the paper-based score
- An International English Language Testing System minimum score of 6.5 on the academic exam

## Curriculum requirements

The curriculum requires 12 credits beyond the bachelor's degree and will prepare graduates for employment within the clinical research ecosystem. Students will complete nine required credit hours focusing on federal clinical research regulations, basic principles of clinical trial design and data management, ethical conduct of research and multicultural communication skills, with an additional three elective credit hours from a set of predetermined courses. The curriculum focuses on educating students in the basic core competency domains for the

conduct of clinical research as outlined by the Joint Task Force for Clinical Trial Competency, including scientific concepts and research design; ethical and participant safety considerations; investigational products development and regulation; clinical study operations (good clinical practice); study and site management; data management and informatics; and communication and teamwork.

Students are expected to obtain a minimum grade of B in all courses to demonstrate competency in the course areas at the level of a certificate program. Courses may be taken in any order and as offered during the course of study. No prerequisites are required other than those listed in the admission requirement section.

## Degree requirements

Course	Title	Hours
<b>Required courses</b>		
BIOS 571	Clinical Trials	3
CCTR 520	Fundamentals of Research Regulation	2
OVPR 601	Scientific Integrity	1
WRLD 302	Communicating Across Cultures	3
<b>Electives</b>		
Students must select course(s) from the following.		3
ALHP 410	Professional and Clinical Ethics	
CCTR 640	Team Science: Theories and Practice	
EPID 580	Public Health Ethics	
HADE 646	Health Care Organization and Leadership	
SBHD 605	Introduction to Social and Behavioral Health	
SBHD 608	Health Communication	
Total Hours		12

**The minimum total of credit hours required for this certificate is 12.**

# VCU HEALTH SCIENCES

1012 East Marshall Street  
Box 980549  
Richmond, Virginia 23298-0549  
healthsciences.vcu.edu (<http://healthsciences.vcu.edu/>)

## Peter Buckley, M.D.

Interim senior vice president for health sciences

The mission of the Office of the Vice President for Health Sciences is to provide leadership, resource management counsel and programmatic oversight to the VCU health sciences schools and Massey Cancer Center.

The core values of the office are evidence-based decision-making; novelty; collaboration; diversity, as a facilitator of a culturally competent workforce; and responsible and transparent business practices.

Located on VCU's MCV Campus in Richmond, and in partnership with the VCU Health System, the vice president for health sciences oversees the five health sciences schools (Allied Health Professions, Dentistry, Medicine, Nursing and Pharmacy) as well as the VCU Massey Cancer Center. Areas of responsibility include academic affairs, academic and research space management, financial and administrative affairs, and interprofessional education and collaborative care.

More than 4,200 students each year participate in more than 50 degree programs offered at the undergraduate, graduate and first-professional levels as well post-baccalaureate and post-master's certificate programs. As a growing academic health sciences center, VCU Health Sciences maintains an aggressive research portfolio. Total research awards amounted to approximately \$151.5 million in fiscal year 2015, which represented approximately 56 percent of the university's total research awards.

VCU Health Sciences is committed to educational programs directed toward providing graduates capable of meeting the commonwealth's health care needs. Programs are dedicated to maintaining and updating the competency of health professionals in addition to preparing graduates to enter health professions. The educational programs are supported by an institutional commitment to effective teaching and by the 865-bed teaching hospital. The office is committed to providing the very best in education, research and practice for the expansion of science and health care for Virginians and the growing global community.

## Care Coordination, Certificate in (Post-baccalaureate graduate certificate)

### Program mission

The mission of the VCU Center for Interprofessional Education and Collaborative Care is to improve health through collaboration by:

1. Implementing interprofessional models of care that advance patient and population health
2. Promoting research-driven innovations in interprofessional education and practice
3. Educating students and practitioners to lead in an evolving interprofessional health care environment

The center's vision is to become a national model for transforming communities and health care through innovations in education, scholarship and practice focused on increasing interprofessional care.

### Program goals

Students in the care coordination certificate program will integrate concepts of care coordination in an interprofessional context along the full continuum of health care to meet the needs of patients and their families as they transition between health care settings and seek to maintain optimum health. Graduates will be equipped to help patients of any age who are at high risk for excess use of health care services and who have the potential for adverse health outcomes.

### Student learning outcomes

Graduates will be able to:

1. Explain ways the health care team can empower the patient and/or family with decision-making skills about the patient's health care needs by keeping patients and families central in the care planning process
2. Apply ethical principles to the care of patients of all ages and their families
3. Compare and contrast methods of effective care coordination in a variety of clinical settings to minimize cost and enhance health outcomes
4. Develop and demonstrate skills for effective communication and collaboration within the interprofessional team and across settings
5. Describe approaches to link complex patients with community resources that promote social justice and health
6. Develop and demonstrate skills to effectively facilitate and utilize timely, complete, effective and safe handoffs during care transitions for complex patients
7. Demonstrate how to maximize the utility of information systems to enhance care
8. Explain the overall infrastructure and regulation of U.S. health care and its effect on care coordination
9. Compare and contrast health care payment models as they relate to utilization review, compliance and reimbursement.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
Certificate	Fall	May 15	

In addition to the general admission requirements of the VCU Graduate School ([http://www.pubapps.vcu.edu/Bulletins/prog\\_search/?uid=10045&iid=30033&did=20062](http://www.pubapps.vcu.edu/Bulletins/prog_search/?uid=10045&iid=30033&did=20062)), the following requirements represent the standards for admission. An applicant must:

1. Be a health care professional, such as registered nurse, social worker, pharmacist, clinical psychologist, physician, therapist (P.T./O.T./S.T.) or professional counselor (The applicant must be in good standing with their own health-related discipline.)
2. Have a bachelor's degree (or equivalent) from a U.S.-accredited program with a health care-related focus such as in nursing, social work, pharmacy, psychology, medicine, allied health or counseling
3. Have preferably one year of clinically based experience (which may include student internships)
4. Submit a resume or vita that includes all relevant information, professional designations and licensure, as applicable
5. Complete the electronic submission of the online VCU Graduate Application (<http://graduate.vcu.edu/>) as well as all supplemental application materials and required documents by the listed deadline

Note: A personal interview may be requested.

## Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 31), a candidate for the Certificate in Care Coordination must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all courses in this certificate program, achieving at minimum 15 total credit hours, within five academic years of the first registration work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to university policies in respect to pass/fail grading for course work
6. Complete capstone project and present findings at completion of the program

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the assistant vice president of health sciences for interprofessional education and collaborative care and permission is granted.

## Curriculum requirements

Course	Title	Hours
IPEC 510	Interprofessional Communication and the Care Coordinator I	1
IPEC 511	U.S. Health Care and Care Coordination	2
IPEC 512	Health Care Payment Models and Care Coordination	3
IPEC 513	Ethical and Legal Considerations in Care Coordination	2
IPEC 514	Hospital-based Care Coordination	3
IPEC 515	Interprofessional Communication and the Care Coordinator II	1
IPEC 516	Community-based Care Coordination	3
Total Hours		15

The minimum total of graduate credit hours required for this certificate is 15.

## Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, the nature of research being conducted by a student, or in the enrollment or funding status of the student. Students should refer to the program website and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

# GRADUATE SCHOOL

Graduate programs are administered by the individual departments, schools and centers with assistance from the Graduate School. Major coordination of the various degree programs is performed by the University Graduate Council, which is chaired by the dean of the Graduate School. The University Graduate Council comprises two elected faculty members from each school and one elected faculty member from VCU Life Sciences.

The Graduate School section of the VCU Bulletins documents the official admission and academic rules and regulations that govern graduate education at the university. The University Graduate Council determines these policies.

Bulletins and course descriptions for the current and past years are now archived in the VCU Scholars Compass (<http://scholarscompass.vcu.edu/vcubulletins/>) hosted by the VCU Libraries.

## Graduate programs

In-depth descriptions of all graduate programs at VCU are provided in the individual school and program sections of this bulletin. The Graduate School website (<http://www.graduate.vcu.edu>) provides links and contact information for all graduate programs offered at VCU. The website also provides updates that occur throughout the academic year, as well as the Application to Graduate Study and complete instructions for applying to all graduate programs.

Refer to the program index for a complete listing of all graduate programs, as well as application deadline dates, and special admission requirements and contact information. Applicants are encouraged to contact the school/department sponsoring the intended program of study at the telephone numbers and/or email addresses provided. Other important contact information is provided on the Graduate School (<http://www.vcu.edu/graduate/>) website as well.

## Interdisciplinary Studies, Master of (M.I.S.), individual program of study

**Note: Admission to this program is temporarily suspended.**

The Master of Interdisciplinary Studies (M.I.S.) degree program provides an opportunity for the highly motivated student to pursue a unique course of study that combines graduate course work in a learner-centered approach to graduate education. The student is an active participant in proposing a curriculum that supports an individualized and scholastically rigorous academic goal in a clearly defined, multidisciplinary program. To expand the program's range of options and interdisciplinary perspectives, the program allows for cooperative ventures with other approved colleges and universities.

## Program goals

1. To provide the highly motivated graduate student with the opportunity to develop and complete an individualized and learner-centered course of study that combines graduate course work in multiple academic disciplines in order to meet a unique scholarly goal
2. To provide skills required for a wide range of positions or for further advanced study
3. To provide for the student's mastery and synthesis of course content in the academic focus areas, culminating in the design,

implementation, interpretation and communication of the results of a capstone research project related to the scholarly goal of the student's interdisciplinary course of study

## Student learning outcomes

1. Students must demonstrate general knowledge and synthesis of two or more academic focus areas combined in an approved interdisciplinary course of study with relevant electives, research methodology and independent study through mastery of individual course work and the synthesis of that course work into a final research project.
2. Students must demonstrate oral and written communication skills to convey effectively the assimilated, synthesized knowledge gained from their interdisciplinary study.
3. Students must demonstrate the ability to design and conduct an independent research project or study that exhibits skills of synthesis, analysis and critical thinking, that is directly related to the purpose of the unique scholarly goal identified as part of the admissions process and that is reflected in the academic focus areas in the approved course of study.
4. Students must demonstrate the achievement of an appropriate level of competence in the ability to design and develop the research protocol and to evaluate and present the outcomes.

## VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

**Visit the academic regulations section** for additional information on academic regulations for graduate students. (p. 16)

## Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 25)

## Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 31)

**Note: Admission to this program is temporarily suspended.**

## Admission requirements

Degree:	Semester(s) of entry:	Deadline dates:	Test requirements:
M.I.S.	Fall	Apr 1	GRE

## Special requirements

- Applicants must schedule a preliminary advising interview with the director of the M.I.S. program and complete a preliminary curriculum proposal.

In addition to the general admission requirements of the VCU Graduate School (p. 34), applicants who are proposing an individualized course of study must:

- Schedule a preliminary advising interview with the director of the M.I.S. program to discuss academic goals and curricular proposals.
- Submit satisfactory scores on the Graduate Record Examination from a current test (fewer than five years old). Substitutions of other standardized test scores may be made on a case-by-case basis, depending upon the focus areas identified in the curriculum proposal and the approval of all members of the admission committee.
- Articulate in the written statement of intent, including:
  - The applicant's academic goal
  - How the M.I.S. degree program will facilitate the achievement of that goal
  - How a more traditional program does not meet those goals
- Complete a preliminary curriculum proposal form identifying the specific course work that will support the academic goal articulated in the written statement of intent. This form is available from the Graduate School by sending an email request to: [gradschool@vcu.edu](mailto:gradschool@vcu.edu).
- Students who are interested in working toward a degree are encouraged to apply to the program as early as possible, since a maximum of six credit hours taken as a nondegree-seeking student may be counted toward the degree.

Members of the admission committee include the directors of graduate study of the two focus areas identified in the curriculum proposal and the director of the M.I.S. program.

**Note: Admission to this program is temporarily suspended.**

## Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 31), students who are admitted to the M.I.S. individual program of study concentration must:

- Obtain approval for all transfer and elective course work as part of the formal advising process for developing and/or changing the approved curriculum plan
- Identify two focus areas and complete nine to 15 graduate credit hours in each
- Complete a minimum of three graduate credits in a research methods course relevant to the final research project before beginning the final research project
- Be approved for degree candidacy before beginning the final research project
- Complete three to six graduate credits as part of the final research project in the form of an approved directed research, independent study, special project or thesis
  - A student who chooses the thesis option must identify a thesis adviser and committee before beginning formal work on the thesis. The student will follow the thesis guidelines of the school/program of the thesis adviser, as well as the general guidelines for completion of theses/dissertations (<http://www.graduate.vcu.edu/student/thesis.html>) as prescribed by the VCU Graduate School, the University Graduate Council and VCU Libraries.
  - A student who chooses the directed research option must obtain formal approval for the final research project. Before beginning formal work on the final directed research project, the student must submit to the director of the M.I.S. program a copy of the proposed project, along with a signed copy of the Final Project Proposal Approval form (available from the M.I.S. program director).

## Curriculum requirements

All course work and any substitutions must be approved by the M.I.S. graduate program director.

Course	Title	Hours
Focus area I		9-15
Focus area II		9-15
Electives (additional related course work)		0-12
Research methods (relevant to final research project)		3
Final research project		3-6
GRAD 697	Directed Research	

**The minimum total of graduate credit hours required for this degree is 36.**

**Note: Admission to this program is temporarily suspended.**

## Graduate School Mentorship Program

The Graduate School Mentorship Program matches undergraduate and graduate students in mentoring relationships. The goals of the program are twofold: first, to expose undergraduate students to the graduate experience as they consider options and make decisions about post-baccalaureate study and as they transition from undergraduate to graduate student status, and secondly, to provide graduate students with the opportunity to develop mentoring skills as they share their own personal experiences with the undergraduate participants in the program. Complete information about the program (<http://www.graduate.vcu.edu/development/mentorship.html>) is available on the Graduate School website.

## Leaders and Entrepreneurs Academy for Professional Development

In 2011, VCU finalized its six-year strategic plan, Quest for Distinction. Explicit within the first theme, to “become a leader among national research universities in providing all students with high-quality learning/living experiences focused on inquiry, discovery and innovation in a global environment,” are several goals related to preparing students appropriately for careers in the 21st century. The Leaders and Entrepreneurs Academy for Professional Development is a new initiative sponsored by the VCU Graduate School. A companion to the Preparing Future Faculty Program, LEAPD will offer a series of short courses and experiences to assist graduate students seeking careers in industry, nonprofit organizations, health care, public service and government. Areas of study will include: how to start your own business, career search and networking skill-building, what does it mean (and take) to be a leader, enhancing communication skills, resume writing, negotiation skills, and opportunities for discovering alternative career paths for your chosen program of study. LEAPD is open to all graduate students. For more information contact the VCU Graduate School at (804) 828-2233 or visit the Graduate School website (<https://graduate.vcu.edu/development/leaders.html>).

## Preparing Future Faculty Program

The Graduate School at VCU is committed to providing graduate students with ongoing opportunities for academic and professional development. Working with graduate faculty and academic graduate program directors, and with academic and administrative support from across the university, the Graduate School strives to identify, support and sponsor initiatives that will prepare the next generation of the professoriate.

In conjunction with the Center for Teaching Excellence, the Graduate School sponsors the Preparing Future Faculty Program for graduate students interested in pursuing teaching careers in academe. Complete information about the program (<http://www.graduate.vcu.edu/development/faculty.html>) is available on the Graduate School website.

## VCU Broadening Experiences for Scientific Training

### VCU Career Services

Box 842007  
Richmond, Virginia 23284-2007  
Phone: (804) 828-1645  
[careers@vcu.edu](mailto:careers@vcu.edu) ([kelee@vcu.edu](mailto:kelee@vcu.edu))

VCU BEST seeks to transform the culture of biomedical scientist training at VCU by developing AEGDS, a training platform that broadens student awareness of potential careers, provides opportunities to experience career paths, provides guidance for career paths(s) selection, allows students to develop the skill sets necessary to be successful and encourages students to share their experiences, thereby broadening exposure of others in the community. To register for any upcoming VCU BEST events log in to Handshake ([https://vcu.joinhandshake.com/login/?requested\\_authentication\\_method=standard](https://vcu.joinhandshake.com/login/?requested_authentication_method=standard)) and search for "VCU BEST" in the event search.

## Objectives

1. Create an innovative student/postdoctoral professional and personal development program that puts student on an optimized, individualized career path that incorporates their strengths and personal goals
2. Build a sustainable program that builds on existing/volunteer faculty and resources and unique training opportunities already in place at VCU (Each participating unit will be counseled in mechanisms to sustain and continue the program after the funding period in collaboration with a campus steering committee.)
3. Develop mechanisms to engage the entire VCU community, as well as alumni, and community partners – alumni engagement/participation, providing and encouraging interdisciplinary participation throughout schools/programs and with partner organizations, seminars for campus community
4. Empower students to engage and take responsibility for their future, improve self-knowledge and self-management, and to mentor others to do the same
5. Perform ongoing evaluation to optimize the program and ensure that it continues to meet the needs of trainees and mentors

## Program requirements

## DIVISION OF COMMUNITY ENGAGEMENT

---

901 West Franklin Street  
Box 843062  
Richmond, Virginia 23284-3062  
(804) 828-8848  
Fax: (804) 828-2756  
community.vcu.edu (<http://www.community.vcu.edu/>)

The Division of Community Engagement mobilizes university-community partnerships that generate innovative solutions to societal challenges and prepares the engaged citizens of tomorrow. In advancing VCU's mission and strategic plan, Quest 2025: Together We Transform, the office:

- Facilitates and coordinates innovative academic programs, on and off-campus, to enhance the community's access to VCU
- Supports the involvement of faculty and students throughout the university in community partnerships
- Creates opportunities for interdisciplinary, community-based collaborations that integrate research, teaching and service

The Division of Community Engagement resides within the Office of the Provost and Vice President for Academic Affairs and serves as the university's central hub for community engagement. Community-engaged teaching, including programs such as ASPIRE and service-learning, offers experiential student learning that is embedded in the community; through mutually beneficial university-community partnerships, students and faculty participate in activities that address community-identified needs and deepen students' academics and civic learning. Community-engaged outreach actively enlists students, faculty and community members in efforts to identify social issues and provide innovative solutions. The Mary and Frances Youth Center and the VCU America Reads programs serve as models of developing and sustaining high-impact community-university partnerships. Community-engaged research is a collaborative process between researchers and community partners that creates and disseminates knowledge and creative expression with the goal of contributing to the discipline and strengthening the well-being of the community.

### Service-learning

Service-learning integrates community service with traditional academic courses in order to enhance academic learning, facilitate the development of students into responsible citizens and meet community-identified needs. Each student in a service-learning class participates in organized service activities that directly relate to the subject matter of the course and meet community-identified needs. The service needs are defined by community organizations in partnership with service-learning faculty. All service-learning students participate in reflection activities, which increase their understanding and application of course content, enhance their sense of civic responsibility, and encourage them to learn and grow from their experience. A listing of service-learning courses is provided in the Schedule of Classes each semester. For more information, email [servelearn@vcu.edu](mailto:servelearn@vcu.edu) or visit the Service-Learning website (<https://servicelearning.vcu.edu/>).

### VCU America Reads

The America Reads initiative began as a challenge put forth by former President Bill Clinton to "ensure that every child can read independently by third grade." Citizens from across the nation and all walks of life have answered the call to improve the literacy skills of struggling readers. VCU has responded to the challenge by setting aside college work-study funds for eligible students who want to make a difference in the life of a child.

The VCU America Reads program places college work-study students in local elementary schools to provide comprehensive reading support to students who are below grade level in reading.

Interested students can apply through the VCU work-study jobs portal on the Financial Aid website (<https://finaid.vcu.edu/types/workstudy/>).

# DIVISION OF STRATEGIC ENROLLMENT MANAGEMENT

---

901 West Franklin Street, Third Floor  
Richmond, Virginia 23284-3065  
(804) 827-8737  
sem@vcu.edu  
sem.vcu.edu (<http://www.sem.vcu.edu>)

**Tomikia LeGrande, Ed.D.**

Vice provost, Division of Strategic Enrollment Management

The Division of Strategic Enrollment Management (<http://www.sem.vcu.edu/>) provides primary oversight for the recruitment, retention and graduation of students at all levels. The purpose of the division is to ensure academic quality and student success, which is dependent upon the recruitment, retention and timely graduation of a talented and diverse student body. The division's goals and aspirations are clearly articulated in the university's strategic plan, and a primary component of that vision is to ensure that the university attracts and retains students who will graduate at a higher rate and who will contribute to a highly skilled 21st-century workforce.

Within the division there are several operational areas: Admissions, Financial Aid, Intersession, Records and Registration, Student Accounting, the Student Services Center, Summer Studies, and Trio Student Support Services.

For more information, please visit the Division of Strategic Enrollment Management (<http://www.sem.vcu.edu/>) website.

# DIVISION OF STUDENT AFFAIRS

---

901 Floyd Avenue  
 Box 843017  
 Richmond, Virginia 23284-3017  
 (804) 828-1244  
 Fax: (804) 828-2180  
[students.vcu.edu](http://www.students.vcu.edu) (<http://www.students.vcu.edu>)

**Charles Klink, Ph.D.**  
 Senior vice provost for student affairs

The Division of Student Affairs comprises departments promoting the intellectual, cultural, personal, social, moral, financial, physical and psychological development of Virginia Commonwealth University students. The division provides administrative support for key policies of the university, including the VCU Honor System and the University Rules and Procedures. Visit the Division of Student Affairs (<https://students.vcu.edu/>) online for updated information throughout the year.

## Departments and offices

### Dean of Students Office

Staff members in the dean's office help students chart a path toward success, overcome barriers and ensure support services are being utilized. Visit the DOS website (<https://dos.vcu.edu/>) for additional information.

### Health Promotion and Well-Being Center

The Health Promotion and Well-Being Center, also referenced as "The Well," maximizes student success by fostering a healthy campus environment and is the public health outreach branch of University Student Health Services. Visit the Health Promotion and Well-Being Center's website (<https://thewell.vcu.edu/>) for additional information.

### New Student and Family Programs

NSFP provides support for students and their families to help with the transition to college life. Visit the NSFP website (<https://nsfp.vcu.edu/>) for additional information.

### Office of Multicultural Student Affairs

The OMSA features cultural programs, discussion groups, student organizations, scholarship opportunities and much more in an effort to strengthen the university's sense of community through cultural appreciation. Visit the OMSA website (<https://omsa.vcu.edu/>) for additional information.

### Office of Student Conduct and Academic Integrity

This office supports the educational mission of the university by educating students about appropriate behavior and fostering a community supporting academic success. Visit their website (<https://conduct.students.vcu.edu/>) for more information.

### Rams in Recovery

Rams in Recovery is VCU's collegiate recovery program which works to ensure that students do not have to choose between their recovery and their education. They support students inside and outside the classroom, organize events and trips, offer recovery housing and more. Visit the Rams in Recovery website (<https://students.vcu.edu/programs/recovery-support/>) for more information.

## Recreational Sports

Recreational Sports offers a range of programmed and informal recreational, fitness and sports activities for VCU students and faculty/staff/alumni/plus one members. Visit the Rec Sports website (<https://recsports.vcu.edu/>) for more information.

## Residential Life and Housing

This unit provides safe, inclusive and well-maintained facilities where intentional communities are built to empower residents in their academic excellence, citizenship and personal growth. See the Residential Life and Housing website (<https://housing.vcu.edu/>) for more information.

## Student Accessibility and Educational Opportunity

Student Accessibility and Educational Opportunity assists students with disabilities registered for classes on the Monroe Park Campus to identify and utilize reasonable accommodations, supports and services. Visit the SAEO website (<https://saeo.vcu.edu/>) for more information.

## Student Media Center

The Student Media Center (<https://studentmedia.vcu.edu/>) is dedicated to the support and encouragement of responsible, independent student media to connect, explore and enrich the lives of the university's many constituencies.

## Technology Support Services

Technology Support Services provide technical support and services to the Division of Student Affairs staff through the DSA help desk and VCU students through the Resnet help desk. Students can use their eID to sign in to the LANDESK (<https://itsupport.vcu.edu/>) for technology support.

## University Counseling Services

UCS creates an environment that fosters student growth, development and psychological well-being through direct clinical service, education and prevention. Visit the UCS website (<https://counseling.vcu.edu/>) for more information.

## University Student Health Services

USHS provides quality outpatient medical care and public health services, which also includes health education programming that empowers students to become full participants in their health care. Find more information on the USHS website (<https://health.students.vcu.edu/>).

## University Student Commons and Activities

The facilities, services and programs of USCA, including Fraternity and Sorority Life, Student Government Association and Activities Programming Board, bring together all members of the VCU community and contributes to intellectual, emotional and social growth through informal interaction. Visit the USCA website (<https://usca.vcu.edu/>) for more information.

## VCU LEAD

VCU LEAD (<https://lead.vcu.edu/>) is a living-learning program for undergraduate students of sophomore status or above, focused on developing graduates who can successfully lead professional and civic organizations within their respective fields.

## Student government associations

The **VCU Student Government Association** is an elected body of students who are organized into three branches — executive, legislative and judicial — with various committees. Nonelected, at-large members are

encouraged to join most of these committees. All meetings of the senate are open to the public. Visit the SGA website (<https://sga.vcu.edu/>) for more information.

The **Graduate Student Association** serves as an advocate for graduate students at VCU. It sponsors events such as meet-and-greets, monthly socials and the annual Graduate Research Symposium (<http://graduate.vcu.edu/research/symposium.html>) that are designed to enhance academic skills, provide professional development opportunities and facilitate an active social environment. The GSA and the Graduate School work together to assist students with travel costs for academic conferences. The GSA places students on campuswide committees to ensure concerns of graduate students are heard. Visit the Graduate School website (<http://www.graduate.vcu.edu/life/association.html>) for more information.

## University policies and procedures

A number of policies and regulations at VCU affect students, and many of these are printed in the general information chapters of this bulletin. Two policy documents are of particular interest to students.

- **VCU Student Code of Conduct:** outlines the responsibilities of student conduct from the time of application for admission through the actual awarding of their degree
- **VCU Honor System:** defines academic dishonesty and provides a procedure for judging alleged violators of academic integrity

Each student is responsible for being familiar with the provisions of all university policies and regulations. The policy documents described above are available in the VCU Policy Library (<https://policy.vcu.edu/>), which is an excellent online resource.

# GLOBAL EDUCATION OFFICE

912 West Grace Street  
Box 843043  
Richmond, Virginia 23284-3043  
(804) 828-8471  
Fax: (804) 828-2552  
global.vcu.edu (<http://www.global.vcu.edu>)

**Jill Blondin, Ph.D.**  
Executive director

The Virginia Commonwealth University Global Education Office advances the university's three global priorities:

- Improve the recruitment and retention of international students and scholars
- Increase the global engagement of VCU students and faculty
- Expand VCU's global footprint through research, teaching and service – especially as they impact global health

The Global Education Office is home to five units and programs that advance the internationalization of the university.

## Units and programs

### Education Abroad

GEO's study abroad office offers student advising and placement in a full range of programs abroad, as well as academic unit support in developing, operating and evaluating study abroad programs.

### English Language Program

The fully accredited intensive English program offers beginner to advanced levels of academic preparation. This large and growing program concentrates on academic preparation and study skills that equip students for success in their educational and career pursuits.

### Global Outreach

The global outreach team supports the university's academic units in identifying and pursuing global priorities within the context of Quest for Distinction by facilitating international institutional agreements, coordinating the universitywide Global Advisory Network, supporting international faculty development and providing funding opportunities for global initiatives.

### International Student and Scholar Programs

This program offers students, scholars and visitors a full suite of services that include academic and immigration advising, student engagement activities and campus and community orientation. The program equips faculty and staff with expertise and tools to support international students and scholars through workshops, faculty academies and individualized pedagogical consulting.

### VCU Globe: A global education living-learning community

One of only 25 Peace Corps Prep programs in the nation and recognized by the 2015 Senator Paul Simon Award for Innovation in International Education, VCU Globe prepares undergraduates in all majors to live and work in a 21st-century global environment. In addition to completing a rigorous, globally focused curriculum, students live together in the West

Grace North residence hall and participate in community-engagement and leadership-building activities.

## Education Abroad

**Stephanie Tignor**  
Director

[global.vcu.edu/abroad](http://global.vcu.edu/abroad/) (<http://global.vcu.edu/abroad/>)

VCU encourages students from every academic discipline to pursue part of their university education in an international setting by studying abroad. Education abroad benefits students academically, professionally and personally; students become more engaged in their academic field of study and often show stronger performance upon returning to campus from their study abroad experiences. Skills gained through education abroad help increase employment marketability upon graduation.

Students are encouraged to study in a foreign country for any length of time including summer, winter session, spring break, a semester or a full academic year as part of their degree program. The VCU Education Abroad office assists students in accomplishing these goals by providing information, advising and administering study abroad and exchange programs.

Participants must be in good standing with the university prior to participation. Please note that individual program requirements may vary.

## Program offerings

### VCU short-term study abroad

Each year VCU offers a variety of short-term program options during winter break, spring break or summer. Both faculty-led and direct-enroll options are available. Participants earn VCU or transfer credit and study subjects ranging from science, business and foreign language to arts, health care, economic development and beyond. New programs are created every year in countries as diverse as Barbados, Spain, Guatemala, Peru, Italy, Germany, Mexico, France and China.

### International Student Exchange Program

International Student Exchange Program is a network of more than 300 colleges and universities in 50 countries that provides exchange opportunities for a summer, semester or academic year. ISEP is well-suited for mature, independent students who wish to be fully immersed into the host culture. Students usually enroll directly into their host university and take classes in the host language. A wide variety of options to study in English is also available. ISEP offers an affordable option to study abroad — charges are based on the cost of VCU in-state tuition, fees, and room and board in many of its locations.

### Departmental and partnership exchanges

VCU has negotiated a number of direct student exchange agreements arising out of specific interest in the university community. Students pay their tuition and fees at VCU and enroll directly in the chosen host university. Options include a variety of destinations including Curtin University in Perth, Australia, University of Guadalajara, Mexico, University of the West of England in Bristol, UK, and the University of Córdoba, Spain.

### Affiliate and alternative programs

Students seeking alternatives to VCU short-term programs, ISEP and exchanges may consider affiliate or alternative programs. Students may elect to participate in a program offered by another university or

organization. VCU Education Abroad will assist students in identifying and applying to the program, maintaining their VCU status while away, and securing financial aid where appropriate. All programs must be pre-approved by VCU.

Except for specific VCU short-term programs offered for VCU credit, all credit received through study abroad will appear on the students' transcripts as transfer credit. Students must earn the equivalent of a C, at minimum, for credit to be awarded. Grades are not calculated into the GPA, unless a student is attempting to graduate with honors.

## English Language Program

**Moe Greene, Ph.D.**  
Director

[global.vcu.edu/elp](http://global.vcu.edu/elp) (<http://global.vcu.edu/elp/>)

The English Language Program offers an intensive university-preparation language program for nonnative speakers of English and serves international students, U.S. citizens, permanent residents and refugees. Core courses are offered at three levels of instruction – beginning through advanced – in multiple sessions each year. Core courses include reading and writing and speaking and listening.

Students may apply directly to the English Language Program. Admission to the ELP may also be recommended by VCU Undergraduate Admissions and International Admissions at the time of the application review. Placement in the ELP is based on the results of an English Language Placement Exam, taken upon arrival in Richmond.

### More information

For more information, students may contact the English Language Program office at 912 W. Grace St., by phone at (804) 828-2551, by fax at (804) 828-2552 or by email at [geo@vcu.edu](mailto:geo@vcu.edu).

## Global Outreach

**Osama Alami**  
Associate director, Global Education Office

[global.vcu.edu/outreach](http://global.vcu.edu/outreach) (<http://global.vcu.edu/outreach/>)

The global outreach team supports the university's academic units in identifying and pursuing global priorities within the context of Quest 2025: Together We Transform by facilitating international institutional agreements, coordinating the universitywide global network and supporting international faculty development and global initiatives.

## International Student and Scholar Programs

**Paul Babbitts, Ph.D.**  
Director

[global.vcu.edu/students](http://global.vcu.edu/students) (<http://www.global.vcu.edu/students/>)

International students face many challenges when entering a new country. GEO's International Student and Scholar Programs offers assistance and guidance as students adjust to a different culture and pursue their educational goals.

Program advisers help with pre- and post-arrival concerns, such as immigration, academic preparation and registration, airport pick-ups, housing, banking, health insurance, and other orientation activities.

Support continues throughout an international student's stay at VCU. The International Student and Scholar Programs staff assists, advises and refers students with academic, immigration, personal, legal, health and cultural issues. Advisers also confer with VCU faculty, staff and university officials regarding student concerns.

International Student and Scholar Programs offers educational, cultural and social activities that promote international understanding and community. Some activities include Global Cafes, Conversation Partners, Friendship Families, visits to places such as Washington, D.C. and New York City and other trips, including camping and skiing.

For information or assistance, please contact International Student and Scholar Programs, Global Education Office, 912 W. Grace St., at (804) 828-8471, by fax at (804) 828-2552 or by email at [geo@vcu.edu](mailto:geo@vcu.edu).

# GLOBAL STUDENT SUCCESS PROGRAM

---

**Lin Reed**

Executive director

(888) 477-7828

llin2@vcu.edu

[provost.vcu.edu/initiatives/gssp](https://provost.vcu.edu/initiatives/gssp/) (<https://provost.vcu.edu/initiatives/gssp/>)

The goal of the Global Student Success Program, a partnership with global education provider Navitas, is to broaden the global experience for our students by focusing on the recruitment of talented international students.

An international pathway program, GSSP eases the transition to a U.S. university environment and prepares pathway students for future academic success at VCU.

Among the services that the program provides for international students are academic content, study skills development and high levels of social and academic support.

Students who successfully complete the program will then be eligible to continue their undergraduate or graduate studies at VCU.

# OFFICE OF CONTINUING AND PROFESSIONAL EDUCATION

---

9 West Cary Street  
Box 842505  
Richmond, Virginia 28284-2505  
(804) 828-1322  
Fax: (804) 828-6444  
ocpe@vcu.edu  
ocpe.vcu.edu (<http://ocpe.vcu.edu/>)

**Michael Huffman, Ph.D.**

Director

The Office of Continuing and Professional Education (<http://ocpe.vcu.edu/>) offers a wide range of services to VCU and the community at large and is a comprehensive hub for delivering and supporting quality learning experiences to individuals and organizations through continuing education and professional development.

## Mission

OCPE, in partnership with the colleges and schools at VCU, provides and supports quality continuing and professional education and skills training for individual, local, regional and national impact. OCPE aligns its priorities to the appropriate themes of the strategic plan, Quest 2025: Together We Transform.

## Goals

OCPE provides:

- Comprehensive logistical support for continuing education and professional development activities for the colleges and schools at VCU and VCU Health
- Educational opportunities that further personal, professional and organizational growth
- Customized solutions to partners in the marketplace
- Lifelong learning opportunities for VCU alumni

Whether individuals want to enhance their career or find a new one, fulfill CEU requirements, develop customized training solutions for a company, arrange logistical support for an event, or find opportunities for personal enrichment, OCPE offers courses and services to achieve these goals.

For more information, visit the Office of Continuing and Professional Education website (<http://ocpe.vcu.edu/>) or explore the course directory (<http://ocpe.vcu.edu/courses/>).

# GRADUATE COURSES

## College of Engineering

### Biomedical Engineering (EGRB)

#### **EGRB 506. Artificial Organs. 3 Hours.**

Semester course; 3 lecture hours. 3 credits. Prerequisite: PHIS 501 or permission of instructor. This course explores the design, operating principles and practices regarding artificial organs and their use in the human body. Analysis of dialysis systems for kidney replacement, artificial hearts and heart-assist devices, artificial heart valves, cardiac pacemakers, and sensory organ-assist and -replacement devices. Design aspects, legal ramifications, regulatory issues and clinical implantation issues will be addressed.

#### **EGRB 507. Biomedical Electronics and Instrumentation. 3 Hours.**

Semester course; 2 lecture and 2 laboratory hours. 3 credits. Fundamental principles and applications of electronics and instrumentation as related to biomedical sciences.

#### **EGRB 509. Microcomputer Technology in the Biomedical Sciences. 3 Hours.**

Semester course; 2 lecture and 2 laboratory hours. 3 credits. Microcomputer applications to the acquisition and manipulation of data in the biomedical laboratory.

#### **EGRB 511. Fundamentals of Biomechanics. 3 Hours.**

Semester course; 3 lecture hours. 3 credits. Prerequisites: Calculus and ordinary differential equations (MATH 200-201, MATH 301 or equivalent). Presents basic mechanical properties of materials, describes methods of material testing and introduces techniques for analyzing the solid and fluid mechanics of the body. Considers topics such as stress/strain relationships, particle mechanics, and force balances.

#### **EGRB 513. Cellular Signal Processing. 3 Hours.**

Semester course; 3 lecture hours. 3 credits. In this course students will study the process by which an extracellular protein binding event is transduced and interpreted as an incoming signal into a cell. Students will learn the biology of cellular signal transduction, as well as how to apply computational models and experimental techniques to predict and investigate these pathways. The course will follow the course of a protein within a signal transduction cascade, from binding to a receptor, activating intracellular pathways, inducing new transcription and translation, and targeting of the protein to its final location. Students will develop MATLAB-based mathematical models to predict signal transduction dynamics and then study experimental techniques that are used to both disrupt and measure signal transduction.

#### **EGRB 517. Cell Mechanics and Mechanobiology. 3 Hours.**

Semester course; 3 lecture hours. 3 credits. Prerequisites: previous course in biomechanics and a previous cell biology course, or permission of instructor. Graduate-level students will gain a quantitative understanding of cellular mechanics and the way cells detect, modify and respond to the physical properties within the cell environment. Students will gain a thorough understanding of relevant primary literature and mathematical models. Both experimental and theoretical approaches toward cell mechanics and mechanobiology will be addressed. Emphasis will be placed upon cells from the nervous, cardiovascular and pulmonary systems. Cancer cell mechanotransduction will also be addressed.

#### **EGRB 521. Human Factors Engineering. 3 Hours.**

Semester course; 3 lecture hours. 3 credits. Students enrolling in this course should have completed a class in human and/or quantitative physiology (or equivalents), differential equations, statistics and/or have consent of the instructor. Course explores the principles and practices of ergonomics and human factors with respect to effective design and decision-making. Course addresses the physical and cognitive aspects of user-centered design, including factors related to the sensory systems, human memory, movement control and control systems, physical and mental workload, decision-making, mathematical modeling, environmental factors, simulation, usability testing, task analysis, eye tracking, display systems, and controls.

#### **EGRB 524. Assistive Technology Design. 3 Hours.**

Semester course; 3 lecture hours. 3 credits. Prerequisite: CMSC 255 or EGRE 245. Smartphones are prevalent in their use as a platform for assistive technology for individuals with disabilities. This course will consider the product development cycle for assistive technology. Students will also learn key aspects of programming Android phones, which are relevant for most assistive technology applications. Students will also have a group design project.

#### **EGRB 591. Special Topics in Biomedical Engineering. 1-4 Hours.**

Semester course; 1-4 lecture hours. 1-4 credits. Enrollment is restricted to students with senior or graduate standing in the School of Engineering or by permission of the instructor. Lectures, tutorial studies, library assignments in selected areas of advanced study or specialized laboratory procedures not available in other courses or as part of research training. See the Schedule of Classes for special topics to be offered each semester.

#### **EGRB 601. Numerical Methods and Modeling in Biomedical Engineering. 4 Hours.**

Semester course; 4 lecture hours. 4 credits. Prerequisite: MATH 301 or equivalent. Enrollment is restricted to graduate students. The goal of this course is to develop an enhanced proficiency in the use of computational methods and modeling, to solve realistic numerical problems in advanced biomedical engineering courses and research, as well careers. The course will discuss and students will develop advanced technical skills in the context of numerical data analysis and modeling applications in biology and medicine. An important component of this course is developing problem-solving skills and an understanding of the strengths and weaknesses of different numerical approaches applied in biomedical engineering applications.

#### **EGRB 602. Biomedical Engineering Systems Physiology. 4 Hours.**

Semester course; 4 lecture hours. 4 credits. Prerequisite: EGRB 601. Enrollment restricted to graduate students. Biomedical engineering requires a foundational understanding of organ systems in the body as well as an advanced understanding of how to apply engineering principles and mathematical models to those systems. In this course, students will learn the basic physiology of major organ systems while also identifying and implementing mathematical modeling approaches to simulate and better understand these organ systems. Students will also learn how to apply engineering concepts, such as fluid dynamics, thermodynamics, structural mechanics and mass transport to better understand organ system physiology.

**EGRB 603. Biomedical Signal Processing. 3 Hours.**
