| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

*Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration. Students may also pursue a dual degree with one of the school's specialized master's degree programs; specific

opportunities and shared courses are outlined below the standard curriculum.

Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit the MBA options section (<https://business.vcu.edu/academics/mba-options/>) of the School of Business website.

| SCMA 677 | Quality Management and Six Sigma |

Total Hours 45

The minimum total of graduate credit hours required for this degree is 45.

Dual degree opportunities

Students have the opportunity to combine the M.B.A. as a dual degree with a specialized master's degree program and have 12 credit hours count toward both degree programs.

Students may apply to the specialized degree program at the same time as the M.B.A. program application or at anytime while pursuing the M.B.A., but no later than the final M.B.A. semester. Pursuing a dual degree allows students to count M.B.A. elective courses, plus one core course, toward both degree programs. Adding a specialized master's degree provides students with a deep dive into another specialty area, adding to the generalist M.B.A. knowledge.

For students pursuing the M.B.A. dual degree with the Master of Accountancy

| Course | Title | Hours |
|----------|--|-------|
| ACCT 604 | Advanced Auditing ¹ | 3 |
| ACCT 610 | Forensic Accounting ¹ | 3 |
| ACCT 662 | Advanced Topics in Accounting Information Systems ¹ | 3 |
| INFO 661 | Information Systems for Managers (fulfills elective requirement in the M.Acc.) | 3 |

For students pursuing the M.B.A. dual degree with the Master of Arts in Economics

| Course | Title | Hours |
|----------|--|-------|
| ECON 604 | Advanced Microeconomic Theory ¹ | 3 |
| ECON 607 | Advanced Macroeconomic Theory ¹ | 3 |
| ECON 612 | Econometrics ¹ | 3 |
| FIRE 623 | Financial Management (fulfills elective requirement in the M.A.) | 3 |

For students pursuing the M.B.A. dual degree with the Master of Decision Analytics

| Course | Title | Hours |
|----------|---|-------|
| INFO 610 | Analysis and Design of Database Systems ¹ | 3 |
| SCMA 632 | Statistical Analysis and Modeling ¹ | 3 |
| SCMA 645 | Advanced Decision Analytics ¹ | 3 |
| SCMA 675 | Operations Management (fulfills elective requirement in the M.D.A.) | 3 |

For students pursuing the M.B.A. dual degree with the Master of Product Innovation

| Course | Title | Hours |
|----------|--|-------|
| INNO 501 | Arts Principles for Product Innovation ¹ | 3 |
| INNO 590 | da Vinci Project ¹ | 3 |
| INNO 600 | Integrative Design Studio ¹ | 3 |
| INFO 661 | Information Systems for Managers (fulfills requirement for INNO 503 in the M.P.I.) | 3 |

For students pursuing the M.B.A. dual degree with the Master of Science in Business with a concentration in finance

| Course | Title | Hours |
|----------|---|-------|
| FIRE 621 | Cases in Financial Management ¹ | 3 |
| FIRE 622 | Financial Management of Financial Institutions ¹ | 3 |
| FIRE 623 | Financial Management | 3 |
| FIRE 625 | Group Insurance and Pension Planning ¹ | 3 |

For students pursuing the M.B.A. dual degree with the Master of Science in Business with a concentration in global marketing management

| Course | Title | Hours |
|----------|--------------------------------------|-------|
| MGMT 642 | Business Policy and Strategy | 3 |
| MKTG 656 | International Marketing ¹ | 3 |
| MKTG 657 | Market Planning Project ¹ | 3 |
| MKTG 671 | Marketing Management ¹ | 3 |

For students pursuing the M.B.A. dual degree with the Master of Science in Business with a concentration in real estate

| Course | Title | Hours |
|----------|--|-------|
| FIRE 623 | Financial Management (fulfills elective requirement in the M.S.) | 3 |
| FIRE 627 | Real Estate Development ¹ | 3 |
| FIRE 629 | Cases in Real Estate ¹ | 3 |
| FIRE 638 | Real Property Investment Law ¹ | 3 |

For students pursuing the M.B.A. dual degree with the Master of Supply Chain Management

| Course | Title | Hours |
|----------|--|-------|
| SCMA 602 | Global Supply Chain Management ¹ | 3 |
| SCMA 603 | SAP ERP and Supply Chain Management ¹ | 3 |
| SCMA 606 | Supply Chain Innovation ¹ | 3 |
| SCMA 675 | Operations Management | 3 |

For students pursuing the M.B.A. dual degree with the Master of Science in Information Systems

| Course | Title | Hours |
|----------|--|-------|
| INFO 610 | Analysis and Design of Database Systems ¹ | 3 |
| INFO 620 | Data Communications ¹ | 3 |
| INFO 630 | Systems Development ¹ | 3 |
| INFO 661 | Information Systems for Managers | 3 |

Students may not apply both INFO 661 and INFO 640 toward degree requirements.

For students pursuing the M.B.A. dual degree with the Master of Sport Leadership

| Course | Title | Hours |
|----------|---------------------------------|-------|
| SPTL 603 | Research Methods in Sport | 3 |
| SPTL 630 | Sociology of Sport ¹ | 3 |
| SPTL 632 | Sport Business ¹ | 3 |
| SPTL 633 | Marketing of Sport ¹ | 3 |

SPTL 603 will also satisfy the M.B.A. SCMA 524 requirement.

¹

For students pursuing the combined programs mentioned above, these courses fulfill the nine credits of electives for the M.B.A. program.

Electives and concentrations

Project courses (693), topics courses (691) and guided studies (697) may be available for use toward concentration electives. These courses must be preapproved by the director of graduate studies.

Courses at the 500- or 600-level taken outside of the School of Business may be used with the permission of the director of graduate studies in business. Students must satisfy the necessary prerequisites for all electives.

Business Administration, Master of (M.B.A.) with a concentration in business analytics

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit the School of Business website (<http://www.vcu.edu/mba/>).

| Course | Title | Hours |

Business Administration, Master of (M.B.A.) with a concentration in global business

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the [academic regulations section for additional information on academic regulations for graduate students](#).

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the [academic regulations section for additional information on degree candidacy requirements](#).

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section for additional information on graduation requirements](#).

Business Administration, Master of (M.B.A.) with a concentration in real estate

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Student learning outcomes

1. Leadership and teamwork: Students will develop abilities to influence others and collaborate in teams.
2. Communication: Students will recognize the importance of and effectively demonstrate strong communication skills.
3. Analytical thinking: Students will demonstrate the ability to organize and interpret qualitative and quantitative information to make effective decisions.
4. Strategic thinking: Students will demonstrate the ability to apply appropriate conceptual frameworks to lead the organization in setting and meeting its goals and objectives.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.B.A. | Fall | Jul 1 | GMAT or GRE* |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

*Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/admissions/masters-and-certificate-programs/#sob-content-212447>).

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students in the M.B.A. program must complete a minimum of 45 graduate credit hours. In addition, a prerequisite course in precalculus is required. This prerequisite may be waived for students who present

satisfactory equivalent preparation. Applicants who have not met this prerequisite may take the course after admission.

Students are expected to enter the program with basic computing proficiency. Specific expectations will be provided by the Graduate Studies in Business Office. Specific means of evaluating and correcting any deficiency also will be identified.

Curriculum requirements

The curriculum for the M.B.A. program is flexible and is designed for students with diverse undergraduate backgrounds. Students may elect an M.B.A. without a concentration or may choose an M.B.A. with a single or double concentration.

Most classes are held in the evening to accommodate working students' schedules. Classes typically meet one evening a week from 7 to 9:40 p.m. or twice a week in the early evening from 5:30 to 6:45 p.m. For additional information about the program, visit the School of Business website (<http://www.vcu.edu/mba/>).

Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

Student learning outcomes

For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

For M.S. in Information Sciences graduates

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-----------------|-----------------------|-----------------|--------------------|
| M.S. and M.B.A. | Fall | Jul 1 | GMAT or GRE |
| | Spring | Nov 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the dual degree Master of Business Administration and Master of Science in Information Systems program must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees.

Students in the dual degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A. (unless waived), all nine core courses required for the M.B.A. and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

Curriculum requirements

| Course | Title | Hours |
|---|---|-----------|
| Foundation courses (not included in 54 hours required for combined degree program) | | |
| ACCT 507 | Fundamentals of Accounting | 3 |
| ECON 500 | | 3 |
| FIRE 520 | Financial Concepts of Management | 3 |
| MGMT 540 | Management Theory and Practice | 3 |
| MKTG 570 | Concepts and Issues in Marketing | 3 |
| SCMA 524 | Statistical Fundamentals for Business Management | 3 |
| SCMA 530 | Fundamentals of the Legal Environment of Business | 3 |
| Total Hours | | 21 |

M.B.A. course work

| Course | Title | Hours |
|--|---|-----------|
| Advanced courses | | |
| Each student must begin the advanced portion of the program with the courses below in each of the first two semesters. Full-time students will take additional courses from the remainder of the advanced program. | | |
| Semester one (to be taken at the same time) | | |
| ECON 610 | Managerial Economics | 3 |
| MGMT 641 | Leading People and Organizations | 3 |
| Semester two | | |
| FIRE 623 | Financial Management | 3 |
| Remainder of the advanced program | | |
| ACCT 608 | Managerial Accounting Concepts | 3 |
| INFO 661 | Information Systems for Managers | 3 |
| INFO 664 | Information Systems for Business Intelligence | 3 |
| MGMT 642 | Business Policy and Strategy | 3 |
| MKTG 671 | Marketing Management | 3 |
| SCMA 675 | Operations Management | 3 |
| Total Hours | | 27 |

M.S. in Information Systems course work

| Course | Title | Hours |
|------------------------------|---|-----------|
| Core courses | | |
| INFO 610 | Analysis and Design of Database Systems | 3 |
| INFO 620 | Data Communications | 3 |
| INFO 630 | Systems Development | 3 |
| Electives | | |
| Select six of the following: | | 18 |
| INFO 611 | Data Re-engineering | |
| INFO 614 | Data Mining | |
| INFO/CISS 616 | Data Warehousing | |
| INFO 622 | Internet Security Management | |
| INFO 632 | Business Process Re-engineering | |
| INFO 641 | Strategic Information Systems Planning | |
| INFO 642 | Decision Support and Intelligent Systems | |
| INFO 643 | Information Technology Project Management | |
| INFO/CISS 644 | Principles of Computer and Information Systems Security | |
| INFO 646 | Security Policy Formulation and Implementation | |
| INFO 654 | Systems Interface Design | |
| INFO 658 | Securing the Internet of Things | |
| INFO 691 | Topics in Information Systems | |
| INFO 693 | Field Project in Information Systems | |
| INFO 697 | Guided Study in Information Systems | |
| Total Hours | | 27 |

The minimum total of graduate credit hours required for this dual degree option is 54.

Students in the combined program who wish to have an M.B.A. concentration other than information resources management would need to complete an additional three courses for the concentration area.

Pharmacy, Doctor of (Pharm.D.)/Business Administration, Master of (M.B.A.) [dual degree]

The Pharm.D./M.B.A. program seeks to prepare pharmacists for careers that encompass pharmacy and business theories and principles. The program is designed to take advantage of efficiencies and electives in both the Pharm.D. and M.B.A. programs. Students in the dual degree program can earn both degrees and save as much as one year or more over the time required for completing the programs separately.

Students may be admitted into the program after the first year of enrollment in the Pharm.D. program. Applicants must be enrolled in the Pharm.D. program, have demonstrated a good academic record and have successfully completed the Graduate Management Admission Test.

To obtain both degrees, students will take all pharmacy courses unless waived, the seven business foundation courses, the nine M.B.A. core courses and three elective courses. The elective M.B.A. courses may be taken from pharmacy administration courses at the 600 level and a combination of a business seminar course and an elective advanced pharmacy practice experience in pharmacy management. The business foundation courses can be taken during the first two years in the pharmacy program with summer session(s). The M.B.A. core courses can be taken during the third and fourth years in the pharmacy program. The business electives can be taken during the fourth and fifth years in the dual degree program.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Application to Pharm.D./M.B.A. program

Students interested in pursuing the Pharm.D./M.B.A. program must first obtain admission to the Pharm.D. program. At the end of the first year of pharmacy school and after receiving permission from the dual degree committee in the School of Pharmacy, Pharm.D. students may apply to the M.B.A. program. Upon admission to the M.B.A. program, a Pharm.D. student will be considered a dual degree-seeking student. Students generally will register for a mix of School of Business courses and School of Pharmacy courses in the fourth, fifth and sixth semesters of the pharmacy program.

A student categorized as a Pharm.D. student will be charged tuition and fees from the School of Pharmacy and will be eligible to receive financial aid awards as a Pharm.D. student. Students categorized as M.B.A. students will be charged tuition and fee rates as graduate students and be eligible to receive financial awards as graduate students.

Business Administration, Master of (M.B.A.) [Executive]

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|---|--------------------|
| M.B.A. | Fall only | Feb 15 (for early decision) Apr 22 (final decisions) | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

Degree requirements

The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student's adviser will review the

student's educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to the VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 39 graduate credit hours. The program consists of 13 courses that are divided into seven integrated modules.

Curriculum requirements

| Course | Title | Hours |
|--------------------|---|-----------|
| FMBA 601 | Team Building and Leadership (course 1) | 3 |
| FMBA 602 | Team Building and Leadership (course 2) | 3 |
| FMBA 603 | Business Foundations (course 1) | 3 |
| FMBA 604 | Analysis and Decisions (course 1) | 3 |

Business Administration, Master of (M.B.A.) [Executive] with a concentration in business analytics

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in

today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Business Administration, Master of (M.B.A.) [Executive] with a concentration in information resources management

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

VCU's School of Business Executive M.B.A. program provides experienced managers in Virginia and surrounding states with the knowledge and skills needed to solve real-world business problems in today's complex global environment. The Executive M.B.A. program accomplishes this purpose by using a curriculum with an integrated, modular, team-oriented, interdisciplinary approach that constantly challenges students to apply knowledge and skills to new and unfamiliar situations by using a conceptual understanding of relevant business disciplines.

Student learning outcomes

1. Demonstrate the capacity from an executive perspective to integrate knowledge-specific information to different business disciplines in helping teams to solve business problems in new and unfamiliar circumstances
2. Demonstrate communication knowledge and skills in both technical and interpersonal areas
3. Demonstrate an understanding of the ethical and social responsibility of business organizations in the U.S. and in other parts of the world
4. Demonstrate analytic skills using new and unfamiliar data sets

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------------------|--------------------|
| M.B.A. | Fall only | Feb 15 (for early decision) | |
| | | Apr 22 (final decisions) | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

Degree requirements

The Executive M.B.A. program is designed for students with familiarity with significant work experience. The student's adviser will review the student's educational and professional background to determine the extent to which the student has satisfied the prerequisites. Those with outstanding prerequisites will be required to attend one or more training sessions to remove any deficiencies.

In addition to VCU Graduate School graduation requirements (p. 32), students seeking a concentration must complete a minimum of 48 graduate credit hours. The program consists of 13 courses that are divided into seven integrated modules plus the concentration electives.

Brandcenter

103 South Jefferson Street
Richmond, Virginia 23284
(804) 828-8384
brandcenter@vcu.edu

Program website: brandcenter.vcu.edu (<https://brandcenter.vcu.edu>)

The Brandcenter offers graduate study in marketing, advertising, branding, communications and innovation. The program offers a Master of Science in Business with a concentration in branding, and it is divided into five focus areas (sub-concentrations): art direction, copywriting, creative brand management, experience design and strategy.

The Brandcenter program is focused on preparing students for successful careers. The working environment is similar to that of agencies and their clients. Teams of students work together to develop ideas and campaigns that solve business problems strategically and creatively. They also learn how to present those ideas in engaging and persuasive ways.

After their first year, qualified students are offered internships where they gain experience and foster industry relationships. In their second year, students have the opportunity to network with professional mentors, guest speakers, alumni and recruiters from agencies and organizations around the country. Once students graduate, they become part of a tight-knit alumni network.

Mission

The Brandcenter's mission is to develop the best creative problem-solvers in the world.

- Business, Master of Science (M.S.) with a concentration in branding/art direction (p. 421)
- Business, Master of Science (M.S.) with a concentration in branding/copywriting (p. 422)
- Business, Master of Science (M.S.) with a concentration in branding/creative brand management (p. 423)
- Business, Master of Science (M.S.) with a concentration in branding/experience design (p. 425)
- Business, Master of Science (M.S.) with a concentration in branding/strategy (p. 426)

Business, Master of Science (M.S.) with a concentration in branding/art direction

Program goals

The Brandcenter offers graduate study in marketing, advertising, branding, communications and innovation. The program offers a Master of Science in Business with a concentration in branding, and it is divided into five focus areas (subconcentrations): art direction, copywriting, creative brand management, experience design and strategy.

The Brandcenter program is focused on preparing students for successful careers. The working environment is similar to that of agencies and their clients. Teams of students work together to develop ideas and campaigns that solve business problems strategically and creatively. They also learn how to present those ideas in engaging and persuasive ways.

After their first year, qualified students are offered internships where they gain experience and foster industry relationships. In their second year, students have the opportunity to network with professional mentors, guest speakers, alumni and recruiters from agencies and organizations around the country. Once students graduate, they become part of a tight-knit alumni network.

Student learning outcomes

1. **Presentation skills:** Students will demonstrate the ability to effectively present/sell their ideas in a clear, concise and compelling manner.
2. **Collaboration:** Students will demonstrate their ability to work together in cross-functional teams/groups (i.e., as art directors, copywriters, creative brand managers, experience designers and strategists) to develop viable business/marketing solutions.
3. **Creative and critical problem-solving:** Students will demonstrate the ability to research consumer culture (via secondary research, syndicated research and qualitative/quantitative research methods) and evaluate consumer media/technology usage habits to develop media-neutral business solutions.
4. **Culture:** Students will demonstrate an appreciation, interest in and openness for different cultures (both national and international) yielding more relevant, culturally savvy business solutions.
5. **Craft:** Students will demonstrate the ability to execute specific skills related to their individual subconcentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Business, Master of Science (M.S.) with a concentration in branding/copywriting

Program goals

The Brandcenter offers graduate study in marketing, advertising, branding, communications and innovation. The program offers a Master of Science in Business with a concentration in branding, and it is divided into five focus areas (subconcentrations): art direction, copywriting, creative brand management, experience design and strategy.

The Brandcenter program is focused on preparing students for successful careers. The working environment is similar to that of agencies and their clients. Teams of students work together to develop ideas and campaigns that solve business problems strategically and creatively. They also learn how to present those ideas in engaging and persuasive ways.

After their first year, qualified students are offered internships where they gain experience and foster industry relationships. In their second year, students have the opportunity to network with professional mentors,

guest speakers, alumni and recruiters from agencies and organizations around the country. Once students graduate, they become part of a tight-knit alumni network.

Student learning outcomes

1. **Presentation skills:** Students will demonstrate the ability to effectively present/sell their ideas in a clear, concise and compelling manner.
2. **Collaboration:** Students will demonstrate their ability to work together in cross-functional teams/groups (i.e., as art directors, copywriters, creative brand managers, experience designers and strategists) to develop viable business/marketing solutions.
3. **Creative and critical problem-solving:** Students will demonstrate the ability to research consumer culture (via secondary research, syndicated research and qualitative/quantitative research methods) and evaluate consumer media/technology usage habits to develop media-neutral business solutions.
4. **Culture:** Students will demonstrate an appreciation, interest in and openness for different cultures (both national and international) yielding more relevant, culturally savvy business solutions.
5. **Craft:** Students will demonstrate the ability to execute specific skills related to their individual subconcentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section](#) for additional information on graduation requirements.

Other information

Additional program (<https://brandcenter.vcu.edu/program/>) information, such as the academic and professional standards and student expectations and code of conduct may also be found on the Brandcenter's website.

Apply online today (<https://www.vcu.edu/admissions/apply/graduate/>), and also complete the VCU Brandcenter application at brandcenter.vcu.edu/admissions (<http://brandcenter.vcu.edu/admissions/>).

Department of Accounting

Carolyn S. Norman, Ph.D.

Chair

business.vcu.edu/academics/accounting (<https://business.vcu.edu/academics/accounting/>)

The future development of the accounting profession depends upon the quality of the educational foundation on which it rests. The Department of Accounting is committed to the support of professional accounting through the delivery of educational experiences directed toward practice and through research that addresses the important policy issues of the day.

The mission of the department is to prepare students for careers in accounting, to interpret and expand accounting knowledge, and to render service to the profession and communities. The department does so by:

1. Providing a learning environment in which students are encouraged to interact with others in identifying and solving accounting and business problems
2. Investigating, developing and sharing knowledge, which has the potential for significant influence on accounting, business and education
3. Interacting with the accounting profession, the business community and the community at large

- Accountancy, Master of (M.Acc.) with a concentration in data analytics (p. 427)

Accountancy, Master of (M.Acc.) with a concentration in data analytics

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The purpose of the Master of Accountancy program is to provide the skills and knowledge necessary to be future leaders in the professional

business community and the public sector for students who wish to specialize in the areas of accounting/information systems, auditing, financial reporting and accounting/other fields of business.

Student learning outcomes

- Students demonstrate current knowledge of financial accounting standards and other professional guidance that affects the profession, and they are able to apply that knowledge in a variety of professional contexts.
- Students demonstrate the ability to analyze accounting data, propose recommendations and design appropriate methods to communicate their recommendations.
- Students demonstrate the ability to distinguish ethical dilemmas and apply the appropriate ethical principles in a variety of accounting contexts and circumstances. Students evaluate information in a manner free of distortion, personal bias or conflicts of interest; recognize situations where professional ethical standards apply; respect confidentiality.

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Acc. | Fall | Jul 1 | GMAT or GRE* |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the Master of Accountancy degree program who do not hold an undergraduate degree in accounting or business may be required to take up to 24 credit hours of business prerequisite courses and 27 credit hours of accounting prerequisite courses. These prerequisite courses may be waived for students who have successfully completed an equivalent course.

Students may not be concurrently enrolled in the Master of Accountancy program and the post-baccalaureate undergraduate Certificate in Accounting program.

*

Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/admissions/masters-and-certificate-programs/#sob-content-212447>).

Prerequisite undergraduate and foundation courses

Prerequisite and/or foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. This determination is made by the faculty adviser at the time of admission.

| Course | Title | Hours |
|---|--|-------|
| Prerequisite undergraduate courses | | |
| Select eight from: | | |
| ACCT 203 & ACCT 204 or ACCT 205 | Introduction to Accounting I and Introduction to Accounting II Introductory Accounting Survey | 6 |

Department of Economics

Leslie S. Stratton, Ph.D.

Professor and chair

business.vcu.edu/academics/economics (<https://business.vcu.edu/academics/economics/>)

The Department of Economics provides instruction for degree programs at the baccalaureate, master's and doctoral level. The faculty works to develop in students the ability to use economic reasoning to understand and analyze business and economic phenomena and policies – the skills needed for careers in a rapidly changing world. To enhance the educational process and to broaden the frontiers of knowledge, faculty members conduct basic and applied research and provide academic and professional service to the university and professional communities.

- Economics, Master of Arts (M.A.) (p. 429)
- Economics, Master of Arts (M.A.) with a concentration in financial economics (p. 431)
- Economics, Master of Arts (M.A.) with a concentration in health economics (p. 433)
- Economics, Master of Arts (M.A.) with a concentration in statistics (p. 434)

Economics, Master of Arts (M.A.)

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Arts in Economics is designed to enhance the student's abilities to use economic modeling to conduct applied analytical and econometric research. Students in this program are expected to demonstrate competence over a rigorous and current core curriculum in microeconomic and macroeconomic theory and in econometrics.

Graduates of the program should be well-qualified to conduct applied economic analysis in either a government or corporate research setting. The program also is an excellent preparation for entry into a doctoral program in economics or finance.

Student learning outcomes

1. Students will be able to use a standard macroeconomic model to analyze the impact of a policy action on major macroeconomic variables.
2. Students will be able to use advanced microeconomic models to analyze the behavior of consumers and firms and the impact of public policy on economic welfare.
3. Students will understand the properties of the ordinary least squares estimator under different assumptions about the data-generating process encountered in economics.
4. Students will understand circumstances in which estimation of an econometric time series model is appropriate.
5. Students will understand the application of models appropriate for analysis of limited dependent variables encountered in economics.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.A. | Fall | Jul 1 | GMAT or GRE* |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), the M.A. in Economics degree requires a minimum of 30 credit hours including six core courses in economics and four approved electives.

Prerequisite undergraduate and/or foundation courses

Prerequisite and/or foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. This determination is made by the faculty adviser at the time of admission.

Accelerated opportunities

The department offers opportunities for qualified undergraduate students to earn both an undergraduate and graduate degree in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students interested in an accelerated program from the School of Business (<http://bulletin.vcu.edu/undergraduate/business/economics/economics-bs/#acceleratedtext>) can see details on the program page in the Undergraduate Bulletin. The College of Humanities and Sciences also offers this accelerated option (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/economicsprogram/economics-bs/#acceleratedbsandmatext>) in their liberal arts-focused economics degree.

Economics, Master of Arts (M.A.) with a concentration in health economics

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

Graduates of the Master of Arts in Economics program will have the knowledge and experience to qualify for a wide and rapidly expanding range of analyst positions in the private or public sectors. Graduates will be particularly well-suited for positions requiring modeling skills and substantial experience in the analysis and interpretation of firm-level, industry or macroeconomic data. A unique feature of the program is a three-course core sequence in applied econometrics. These courses emphasize the application of modeling techniques and data analysis through the introduction of cases and projects. Through these courses, students acquire a working knowledge of up-to-date powerful statistical software and broad experience in working with a variety of real data sets. The concentration in health economics will allow students with particular interest in the health sector and in health policy issues to specialize in health economics, a topic currently quite relevant.

Graduates of the M.A. in Economics with a concentration in health economics, in addition to holding highly competitive terminal credentials as analysts, will find the program to be an outstanding bridge to doctoral work in programs such as the Ph.D. in Healthcare Policy and Research offered in the School of Medicine at VCU.

Student learning outcomes

1. Students will be able to use a standard macroeconomic model to analyze the impact of a policy action on major macroeconomic variables.
2. Students will be able to use advanced microeconomic models to analyze the behavior of consumers and firms and the impact of public policy on economic welfare.
3. Students will understand the properties of the Ordinary Least Squares estimator under different assumptions about the data generating process encountered in economics.
4. Students will understand circumstances in which estimation of an econometric time series model is appropriate.
5. Students will understand the application of models appropriate for the analysis of limited dependent variables encountered in economics.

Accelerated opportunities

The department offers opportunities for qualified undergraduate students to earn both an undergraduate and graduate degree in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students interested in an accelerated program from the School of Business (<http://bulletin.vcu.edu/undergraduate/business/economics/economics-bs/#acceleratedtext>) can see details on the program page in the Undergraduate Bulletin. The College of Humanities and Sciences also offers this accelerated option (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/economicsprogram/economics-bs/#acceleratedbsandmatext>) in their liberal arts-focused economics degree.

Department of Finance, Insurance and Real Estate

Manu Gupta, Ph.D.

Associate professor and chair

business.vcu.edu/academics/finance-insurance-and-real-estate (<https://business.vcu.edu/academics/finance-insurance-and-real-estate/>)

The Department of Finance, Insurance and Real Estate delivers knowledge to students in all programs offered by the School of Business and contributes to the expansion of knowledge by engaging in scholarly activity. The department provides core courses as well as majors, minors and concentrations. In addition, the department develops and delivers courses in continuing professional education for practitioners seeking to upgrade their skills and/or attempting to achieve professional certification.

- Real Estate, Certificate in (Graduate certificate) (p. 436)

Real Estate, Certificate in (Graduate certificate)

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The graduate Certificate in Real Estate, which may be completed online, will provide students with the knowledge needed to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate, including economic and financial analysis, financing structures, and current trends in the securitization of commercial real estate debt and equity markets. Graduates will be able to communicate dimensions of real estate valuation in a clear and well-organized manner and analyze the ethical dimensions of a real estate situation using the Uniform Standards of Professional Appraisal Practice.

Student learning outcomes

1. Graduates will demonstrate the ability to communicate the qualitative and quantitative dimensions of real estate valuation in a clear and well-organized manner.
2. Graduates will be able to select, conceptualize and apply the appropriate quantitative measurement and analysis to correctly value real estate. Such methods might include an economic and financial analysis of commercial real estate investments, alternative financing structures and/or surveys of recent trends in the securitization of commercial real estate debt and equity markets.
3. Graduates will be able to analyze the ethical dimensions of a real estate situation and relate those dimensions to professional ethical standards. Specifically, graduates will have an understanding of the Uniform Standards of Professional Appraisal Practice.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--------------------|
| Certificate | Fall | Jul 1 | |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), in order to be eligible to receive the certificate, a student must maintain an overall GPA of 3.0. Twelve credit hours beyond the bachelor's degree are required for completion of this graduate certificate program. The program can be completed entirely online or by pursuing a combination of on-campus and online courses. A maximum of one three-hour course taken at another AACSB-accredited institution may be transferred into this program. Students interested in later applying for admission into either the Master of Business Administration program with a concentration in real estate or the Master of Science in Business with a concentration in real estate must do so through a separate application process. Admission is dependent on the applicant having achieved a 3.0 GPA in the graduate certificate and a satisfactory score on the GMAT examination.

Curriculum requirements

Department of Information Systems

Jim Wynne, Ph.D.

Associate professor and interim chair

business.vcu.edu/academics/information-systems/ (<https://business.vcu.edu/academics/information-systems/>)

The Department of Information Systems provides an innovative, high quality curriculum that is recognized nationally and internationally and maintains the ability to rapidly respond to the dynamic, changing needs of the academic discipline, industry and community.

The department offers degree programs at both the undergraduate and graduate level, as well as continuing education programs that support alumni and the community. Additionally, courses in information systems are offered to meet the needs of students in other curricula offered by the university as well as those who are seeking to enhance their knowledge of information systems.

Departmental faculty offers expertise in information technology and has wide-ranging research and teaching interests. As part of the department, the Information Systems Research Institute provides opportunities for sponsored research, innovative teaching initiatives and faculty development.

Traditional program options

- Computer and Information Systems Security, Master of Science (M.S.) (p. 438)
- Information Systems, Master of Science (M.S.) (p. 439)
- Information Systems, Master of Science (M.S.) with a concentration in data science in business (p. 441)
- Information Systems, Master of Science (M.S.) with a concentration in health care management (p. 443)
- Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance (p. 444)

Executive program option

- Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive] (p. 446)

Dual degree programs

- Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 448)

- Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree] (p. 450)

Computer and Information Systems Security, Master of Science (M.S.) [School of Business]

Note: Admission to this program is temporarily suspended.

Program mission

The Master of Science in Computer and Information Systems Security provides for the scholarly and professional needs of several groups who have either accepted or are keen to take on the challenge of protecting information resources of firms and society at large.

Program goal

Graduates of this program are expected to take on leadership positions, including as chief security officer, in computer and information systems security in organizations. VCU's program takes a broad interdisciplinary approach to computer and information systems security that will help develop the student's ability to see the larger organizational, social, political, ethical and economic aspects of information security.

Student learning outcomes

Graduates of the program will be:

1. Prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations
2. Familiar with state-of-the-art security technologies and best practices

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree

candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Note: Admission to this program is temporarily suspended.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|----------------------------------|
| M.S. | Fall | Jul 1 | GRE or GMAT |
| | Spring | Nov 1 | TOEFL for international students |

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

The Master of Science in Computer and Information Systems Security, jointly offered by the Department of Computer Science in the College of Engineering and the Department of Information Systems in the School of Business, is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the computer and information systems security community and as strategic partners within the enterprises in which they work. They will stay attuned to, and anticipate changes in, the computer and information systems security environment and ensure that security solutions create a sound, competitive, cost-effective advantage for the enterprise.

Graduates of the program will be prepared to take leading roles in planning, organizing, managing, designing and configuring security solutions in public and private organizations and will be familiar with state-of-the-art security technologies and best practices. The program takes a broad interdisciplinary approach to computer and information systems security that will help students develop the ability to see the larger organization and social, political, ethical and economic aspects of information security, as well as offering a unique graduate-level curriculum that is both technically and managerially oriented.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), the M.S. in Computer and Information Systems Security requires 30 graduate credit hours, including a core curricular component and an elective component. The elective component consists of three courses chosen by the student and selected from CISS course offerings or, with the approval of the program co-directors, from courses offered by the departments of Computer Science, Information Systems, Criminal Justice and Forensic Science.

Curriculum requirements

Students with an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems should be adequately prepared for the graduate curriculum. Students from other academic backgrounds may need to complete undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

Prerequisite courses

| Course | Title | Hours |
|-------------------------|---|-------|
| CMSC 312 or INFO 361 | Introduction to Operating Systems Systems Analysis and Design | 3 |
| CMSC 355 or INFO 370 | Fundamentals of Software Engineering Fundamentals of Data Communications | 3 |
| CMSC 401 | Algorithm Analysis with Advanced Data Structures | 3 |
| CMSC 508 or INFO 364 | Database Theory Database Systems | 3 |
| MATH 211 or CMSC 302 | Mathematical Structures Introduction to Discrete Structures | 3 |
| STAT 212 | Concepts of Statistics | 3 |

Information Systems, Master of Science (M.S.)

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

Student learning outcomes

1. Students will be capable of a) communicating and networking effectively within their profession and within their organizations; b) serving the profession by applying this knowledge broadly; and c) maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Students will have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Students will develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Students will understand IT systems management, which includes topics such as system availability; virtualization, change, storage,

network, configuration and facilities management; capacity planning; business continuity; and green computing.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Information Systems, Master of Science (M.S.) with a concentration in data science in business

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

The data science in business concentration of the master's program has an information systems orientation to data science. It is designed to prepare students for specialized roles that involve using information systems concepts, methodologies to effectively and efficiently support knowledge discovery and associated data management activities in modern organizations.

Student learning outcomes

1. Students will be capable of communicating and networking effectively within their profession and within their organizations; serving the profession by applying this knowledge broadly; and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Students will have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Students will develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Students will understand IT systems management, which includes topics such as system availability; virtualization, change, storage, network, configuration and facilities management; capacity planning; business continuity; and green computing.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall | Jul 1 | GMAT or GRE* |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in business administration must submit an up-to-date resume.

*Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/admissions/masters-and-certificate-programs/#sob-content-212447>).

Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, database, and systems analysis and design. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. Students without an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems will likely need to complete undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

Information Systems, Master of Science (M.S.) with a concentration in information risk, security and assurance

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

The information risk, security and assurance concentration within the degree is designed primarily for students interested in professional roles in business, industry or government. Program graduates will serve as leaders within the risk, security and assurance community and as strategic partners with the enterprise in which they work. They will stay attuned to and anticipate changes in the risk, security and assurance environment and ensure that security solutions create a sound, competitive and cost-effective advantage for the enterprise.

Student learning outcomes

1. Students will be capable of a) communicating and networking effectively within their profession and within their organizations; b) organizations, serving the profession by applying this knowledge broadly; broadly and c) maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Students will have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Students will be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Students will understand IT systems management, which includes topics such as system availability; virtualization, change, storage, network, configuration and facilities management; capacity planning; business continuity; and green computing.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall | Jul 1 | GMAT or GRE* |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

Students applying to the Master of Science in Information Systems must show evidence of competence in selected prerequisite areas of information systems including: application programming, systems analysis and design, database, telecommunications and hardware/software. Evidence of this competence may include formal course work, comparable training within a work environment or significant, relevant

and recent work experience in the field. Students enrolled as majors in the program who do not have a formal background or equivalent training must take the appropriate undergraduate courses to satisfy the prerequisites prior to taking master's program courses. Students without an accredited bachelor's degree or post-baccalaureate certificate in fields such as computer science or information systems will likely need to complete several undergraduate prerequisite courses. Prerequisites are determined by the faculty adviser at the time of admission.

In addition to the VCU Graduate School graduation requirements (p. 32), students who do not have a business degree must complete a minimum of two 500-level foundation courses (6 credit hours). Foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. Students who are required to take foundation courses may do so after admission. The foundation courses required will vary depending upon the student's background, career interests and the chosen area of specialization. Students applying to the program should consult with the master's program adviser to determine the foundation courses required for a particular area.

Information Systems, Master of Science (M.S.) with a concentration in information technology management [Executive]

Note: Admission to this program is temporarily suspended.

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Science in Information Systems program is designed to prepare students for specialized roles in information systems. The program is intended to provide a graduate-level, technically oriented curriculum that focuses on the design and development of information systems to solve real-world problems. The department's curriculum is focused on the rapidly emerging area known as enterprise information systems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring

and implementing EIS systems using state-of-the-art technologies within organizations.

Student learning outcomes

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

| M.S. | Spring | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the master's program in information systems must submit an up-to-date resume.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 30 graduate credit hours.

The Executive Master of Science in Information Systems with a concentration in information technology management provides an opportunity for current information technology professionals and business managers to receive the necessary preparation to move into IT management roles. Participants gain a wide range of new skills and knowledge by combining course work with their day-to-day professional activities. The program is targeted to rising business executives, entrepreneurs and information systems professionals. The program differs from the regular M.S. in Information Systems program in that it is offered in a weekend format, with students meeting for classes on alternate weekends throughout the calendar year. The lockstep program consists of 10 required courses.

Business Administration, Master of (M.B.A.)/Information Systems, Master of Science (M.S.) [dual degree]

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

Master of Business Administration

The purpose of the Master of Business Administration program at VCU is to prepare individuals for the responsibilities of management. As students at VCU, individuals will learn the functions and techniques of effective management. The student also will come to understand the environmental and economic factors that affect decision-making in organizations. In short, the student will know what to do as future events unfold that affect his/her firm or organization.

An M.B.A. from VCU benefits students at various points in their careers. Individuals who have recently received their baccalaureate degrees may choose to refine their business skills while their undergraduate training is fresh. Individuals with work experience often find that an M.B.A. is the key to rapid promotion or a career change. Finally, an M.B.A. from VCU meets the needs of students who recognize that the best preparation for an uncertain future is continuous learning.

Master of Science in Information Systems

The Master of Science in Information Systems program is designed to prepare students for specialized roles using information systems to support organizations. The program is intended to provide a graduate-level, business-technology-oriented curriculum that focuses on the design and development of information systems to solve real-world problems. Graduates of the program are expected to be able to take significant roles in planning, organizing, managing, designing, configuring and implementing systems using state-of-the-art technologies within organizations.

Student learning outcomes

For M.B.A. graduates

1. Students should be able to demonstrate the capacity to apply business knowledge in new and unfamiliar circumstances.
2. Students should be able to demonstrate the ability to work in teams and other groups.
3. Students should understand and be able to develop the ethical and social responsibilities of organizations.
4. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
5. Students should be able to identify and understand major issues faced by organizations with evolving information technology and investigate issues and challenges faced by managers with changes in information technology.
6. Students should be able to describe the factors involved in key operation decisions and to apply appropriately techniques that provide insight and structure for management decision-making.
7. Graduates of the program should be able to critically evaluate and use accounting and other information for managerial decision-making.
8. Graduates should be able to evaluate marketing programs.
9. Students should be able to think critically and systematically about financial issues in businesses to develop techniques to analyze these issues numerically.
10. Graduates of the program should be able to develop an analytical framework for identifying the objectives of the firm and to provide some tools for evaluating the firm's performance.

For M.S. in Information Sciences graduates

1. Graduates should be capable of communicating and networking effectively within their profession and within their organizations, serving the profession by applying this knowledge broadly and maintaining key technical expertise in order to sustain required levels of competitiveness.
2. Graduates must have an understanding of information technology as it applies to business contexts and the skill to apply this technology effectively in specific circumstances.
3. Graduates must be able to develop efficient and effective IS solutions using appropriate technologies that can deliver competitive advantages to organizations.
4. Graduates must be able to develop and incorporate changes in the planning and management of IS resources based on an increased understanding of the dynamic changes in the organization, IS and global environments.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-----------------|-----------------------|-----------------|--------------------|
| M.S. and M.B.A. | Fall | Jul 1 | GMAT or GRE |
| | Spring | Nov 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the dual degree Master of Business Administration and Master of Science in Information Systems program must submit an up-to-date resume.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students can earn both M.B.A. and M.S. in Information Systems degrees by having 12 credit hours counted toward both degrees.

Students in the dual degree program will follow the same schedule as regular M.B.A. students, including the two lockstep semesters. To get both degrees, students will take all foundation courses required for the M.B.A. (unless waived), all nine core courses required for the M.B.A. and nine additional courses in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The INFO 661 course taken for the M.B.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and three of the additional information systems courses also will count toward the normally required three elective courses in the M.B.A. program.

One of the information systems courses must have substantial global, entrepreneurial and/or experiential components. The six information systems courses to be taken in addition to INFO 661, INFO 664, INFO 610, INFO 620 and INFO 630 must be approved by the program adviser, and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

Curriculum requirements

| Course | Title | Hours |
|---|---|-----------|
| Foundation courses (not included in 54 hours required for combined degree program) | | |
| ACCT 507 | Fundamentals of Accounting | 3 |
| ECON 500 | | 3 |
| FIRE 520 | Financial Concepts of Management | 3 |
| MGMT 540 | Management Theory and Practice | 3 |
| MKTG 570 | Concepts and Issues in Marketing | 3 |
| SCMA 524 | Statistical Fundamentals for Business Management | 3 |
| SCMA 530 | Fundamentals of the Legal Environment of Business | 3 |
| Total Hours | | 21 |

M.B.A. course work

| Course | Title | Hours |
|--|----------------------------------|-------|
| Advanced courses | | |
| Each student must begin the advanced portion of the program with the courses below in each of the first two semesters. Full-time students will take additional courses from the remainder of the advanced program. | | |
| Semester one (to be taken at the same time) | | |
| ECON 610 | Managerial Economics | 3 |
| MGMT 641 | Leading People and Organizations | 3 |
| Semester two | | |
| FIRE 623 | Financial Management | 3 |
| Remainder of the advanced program | | |
| ACCT 608 | Managerial Accounting Concepts | 3 |
| INFO 661 | Information Systems for Managers | 3 |

| | | |
|--------------------|---|-----------|
| INFO 664 | Information Systems for Business Intelligence | 3 |
| MGMT 642 | Business Policy and Strategy | 3 |
| MKTG 671 | Marketing Management | 3 |
| SCMA 675 | Operations Management | 3 |
| Total Hours | | 27 |

M.S. in Information Systems course work

| Course | Title | Hours |
|------------------------------|---|-----------|
| Core courses | | |
| INFO 610 | Analysis and Design of Database Systems | 3 |
| INFO 620 | Data Communications | 3 |
| INFO 630 | Systems Development | 3 |
| Electives | | |
| Select six of the following: | | 18 |
| INFO 611 | Data Re-engineering | |
| INFO 614 | Data Mining | |
| INFO/CISS 616 | Data Warehousing | |
| INFO 622 | Internet Security Management | |
| INFO 632 | Business Process Re-engineering | |
| INFO 641 | Strategic Information Systems Planning | |
| INFO 642 | Decision Support and Intelligent Systems | |
| INFO 643 | Information Technology Project Management | |
| INFO/CISS 644 | Principles of Computer and Information Systems Security | |
| INFO 646 | Security Policy Formulation and Implementation | |
| INFO 654 | Systems Interface Design | |

Health Administration, Master of (M.H.A.)/Information Systems, Master of Science (M.S.) [dual degree]

Advanced study in health administration and information systems is available through a dual degree program co-sponsored by the Department of Health Administration in the College of Health Professions and the Department of Information Systems in the School of Business.

The dual degree M.H.A./M.S. program allows students interested in the fields of health management and information technology to earn two highly ranked and relevant master's degrees in just three years, which is the time it usually takes to complete just one of the degrees. The dual degree program is ideal for students who are pursuing careers in health IT management, health IT business consulting or working in the health IT vendor industry.

Applicants for this program are required to meet the admission requirements of each program. For information regarding the dual degree program, contact the director of the program.

Degree requirements

The curriculum allows students to earn both the M.H.A. and the M.S. in Information Systems with a total of 78 credit hours rather than the 89 credit hours that would be required to obtain the degrees separately. The dual degree option offers this credit-hour efficiency by taking advantage of curricular similarities in the two programs and allowing some courses to count toward both sets of requirements. A total of 12 credit hours will count toward both degrees and the M.H.A. foundation courses will be substituted for the business school foundation course requirements for dual degree students. Students in the dual degree program will follow the same schedule as regular M.H.A. students, including the two lockstep years. Both degrees are conferred concurrently when all requirements for both degrees have been completed.

Students will take 51 credit hours of health administration courses required for the M.H.A. and nine additional courses (27 credit hours) in the M.S. in Information Systems program, including INFO 610, INFO 620 and INFO 630. Students whose undergraduate degrees are not in information systems may also be required to take additional undergraduate prerequisite courses before taking the graduate information systems courses, as determined by the program adviser. The HADM 612 course taken for the M.H.A. will substitute for INFO 640, normally required for the M.S. in Information Systems degree, and one of the additional information systems courses will also count toward the elective courses in the M.H.A. program. A three-credit-hour, 10-week internship is required and must have substantial global, entrepreneurial and/or experiential components related to both degrees. The six information systems courses to be taken in addition to INFO 610, INFO 620 and INFO 630, must be approved by the program adviser and would normally be selected to satisfy one of the M.S. in Information Systems concentrations.

Curriculum requirements

| Course | Title | Hours |
|--|---|-----------|
| Courses | | |
| HADM 602 | Health System Organization, Financing and Performance | 3 |
| HADM 606 | Health Care Managerial Accounting | 3 |
| HADM 607 | Financial Management in Health Organizations | 3 |
| HADM 608 | Seminar in Health Care Finance | 3 |
| HADM 609 | Managerial Epidemiology | 2 |
| HADM 610 | Health Analytics and Decision Support | 3 |
| HADM 611 | Health Care Law and Bioethics | 3 |
| HADM 612 | Information Systems for Health Care Management | 3 |
| HADM 614 | Health Care Marketing | 3 |
| HADM 615 | Health Care Politics and Policy | 3 |
| HADM/ECON 624 | Health Economics | 3 |
| HADM 646 | Health Care Organization and Leadership | 3 |
| HADM 647 | Management of Health Care Organizations | 3 |
| HADM 648 | Strategic Management in Health Care Organizations | 3 |
| HADM 649 | Human Resources Management in Health Care | 3 |
| HADM 681 | Clinical Concepts and Relationships | 2 |
| HADM 682 | Executive Skills I | 1 |
| HADM 683 | Executive Skills II | 1 |
| HADM 693 | Internship in Health Administration | 3 |
| INFO 610 | Analysis and Design of Database Systems | 3 |
| INFO 620 | Data Communications | 3 |
| INFO 630 | Systems Development | 3 |
| INFO electives (chosen with permission of adviser) | | 6 |
| INFO focus area courses (see options below) | | 12 |
| Total Hours | | 78 |

The minimum total of graduate credit hours required for this dual degree is 78.

Information systems focus areas

Students must declare a focus in two of the following areas and take the classes offered for each of those two areas for a total of 12 credit hours.

| Course | Title | Hours |
|--|---|-------|
| Business engineering | | |
| INFO 611 | Data Re-engineering | 3 |
| INFO 632 | Business Process Re-engineering | 3 |
| Information assurance | | |
| INFO 622 | Internet Security Management | 3 |
| INFO 644 | Principles of Computer and Information Systems Security | 3 |
| Information technology management | | |
| INFO 641 | Strategic Information Systems Planning | 3 |

| | | |
|------------------------------|---|---|
| INFO 643 | Information Technology Project Management | 3 |
| Knowledge engineering | | |
| INFO 614 | Data Mining | 3 |
| INFO 616 | Data Warehousing | 3 |

Department of Management and Entrepreneurship

S. Douglas Pugh, Ph.D.

Professor and chair

business.vcu.edu/academics/management-and-entrepreneurship
 (https://business.vcu.edu/academics/management-and-entrepreneurship/)

The Department of Management and Entrepreneurship offers a Bachelor of Science in Business with concentrations in human resource management, management/business administration, management/entrepreneurship and management/international management. The department also offers a human resource management minor and a certificate in international management studies, as well as a doctoral degree in business with a concentration in management.

Department of Marketing

Bruce Huhmann, Ph.D.

Professor and chair

business.vcu.edu/academics/marketing (https://business.vcu.edu/academics/marketing/)

The Department of Marketing provides students with a comprehensive introduction to the many topics and concepts that make up today's marketing professions. Additionally students have the opportunity to participate in high quality learning experiences that broaden traditional ideas of the classroom in projects, exercises and internship experiences that involve a variety of business organizations as well as state and local government agencies.

Department of Supply Chain Management and Analytics

Jeffery Smith, Ph.D.

Associate professor and chair

business.vcu.edu/academics/supply-chain-management-and-analytics
 (https://business.vcu.edu/academics/supply-chain-management-and-analytics/)

Faculty in the Department of Supply Chain Management and Analytics are passionate about providing impeccable academic instruction and research that advances knowledge related to production, product development and the information systems needed to direct these endeavors. The department's undergraduate and graduate programs prepare students to immediately take important positions related to supply chain management and business analytics. The department remains involved with the corporate community through a partnership with the Commonwealth Center for Advanced Logistics Systems.

Students interested in production, distribution, and the engineering and finances supporting large-scale operations will be prepared by VCU's programs in supply chain management and analytics to enter an exciting field with plentiful job opportunities. For additional information contact the department by emailing scma@vcu.edu.

Decision Analytics, Master of (M.D.A.)

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The Master of Decision Analytics provides students with knowledge of the statistical, mathematical and scientific skills and experience necessary to utilize advanced methods of data analysis for business decision-making.

Student learning goals

Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommended decisions in a clear, ethical and transparent manner.

Student learning outcomes

1. **Database structures and query:** Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.

2. **Quantitative skills:** Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
3. **Problem formulation:** Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
4. **Analytics applications:** Students will experience various applications of analytics in real situations.
5. **Technical communications and teamwork:** Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences, and will develop skills in organizing, interacting and analyzing real problems as members of a team.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.D.A. | Fall | Jul 1 | GMAT or GRE* |
| | Spring | Nov 1 | |
| | Summer | Mar 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived for candidates with an undergraduate or graduate degree from an accredited U.S. institution with a minimum GPA of 3.25. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

The decision analytics degree provides students with knowledge of quantitative skills and experience in analyzing problems and using data for decision-making in a business environment. Depending upon individual student interests and adviser approval, the required nucleus is supplemented with relevant elective courses from within the School of Business or from outside departments.

In addition to the VCU Graduate School graduation requirements (p. 32):

1. All students must have completed a course in calculus and database systems. Students must also be proficient at an intermediate level with a spreadsheet. These prerequisites can be met after admission to the program.
2. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following prerequisite courses and/or foundation course may be waived. A waiver may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course to the satisfaction of the admission committee.

Prerequisite undergraduate and/or foundation courses

Prerequisite and/or foundation courses may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. This determination is made by the faculty adviser at the time of admission.

| Course | Title | Hours |

Decision Analytics, Master of (M.D.A.) – professional track

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The M.D.A. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

Student learning goals

Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommended decisions in a clear, ethical and transparent manner.

Student learning outcomes

- 1. Problem formulation and analytical knowledge:** Students will demonstrate the ability to examine a situation/problem and select an appropriate analytical procedure that will use data to provide actionable insight to decision-makers.
- 2. Data management skills:** Students will demonstrate the ability to acquire and organize data in a format appropriate for the desired analysis.
- 3. Analytics and quantitative skills:** Students will perform the analyses using appropriate software and techniques to develop relevant insights for decision-making.

4. **Communication skills:** Students will effectively demonstrate strong communications to a broad array of stakeholders.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.D.A. | Fall | Apr 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants should have three years of work experience in an application area. Students without the required work experience may take six credit hours of graduate-level courses in an application area prior to acceptance into the program. Applicants are expected to have successfully completed an undergraduate or graduate course in statistics, and it is preferable that they have programming experience. Exceptions may be made at the discretion of the program director.

Degree requirements

The Master of Decision Analytics provides students with a breadth of analytical and quantitative skills with experience in analyzing and communicating solutions to problems arising in an organization.

Leading organizations gain competitive advantage through the use of analysis of relevant data to guide and drive strategic and tactical decisions. Increased volumes of data and emphasis on data-driven decision-making create new challenges for decision-makers and provide new employment opportunities for people with deep analytical skills. There is a significant and growing demand for individuals with the ability to work collaboratively within an organization to mine relevant raw data and refine data into a recommended action of value to the enterprise. The decision analytics degree equips students with the essential skills to be analytically functional in an organization.

Skills, abilities and knowledge necessary for success in analytics:

1. Work in a collaborative environment
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics degree focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics
2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, making the program attractive to midcareer professionals who want to gain or increase their analytics skills without interrupting their careers.

In addition to the VCU Graduate School graduation requirements (p. 32) and credit hour requirements, students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers

of foundation courses only occur when a student has completed the required undergraduate equivalent courses with a minimum grade of C.

2. Students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waiver of a foundation course may be awarded when a student demonstrates equivalent knowledge, such as completing the required undergraduate equivalent course with minimum grade of C.

The concentration in health care administration requires an additional nine credit hours beyond the minimum 30-credit hours required for the degree.

Curriculum requirements

| Course | Title | Hours |
|--------------------------------|---|---|
| Prerequisite | | |
| Calculus | | |
| SCMA 212 | Differential Calculus and Optimization for Business | 3 |
| | or SCMA 500 | Quantitative Foundation for Decision-making |
| Foundation courses | | |
| SCMA 524 | Statistical Fundamentals for Business Management | 3 |
| Select three of the following: | | 9 |
| ACCT 507 | Fundamentals of Accounting | |
| ECON 500 | | |
| FIRE 520 | Financial Concepts of Management | |
| MGMT 540 | Management Theory and Practice | |
| MKTG 570 | Concepts and Issues in Marketing | |
| SCMA 530 | Fundamentals of the Legal Environment of Business | |
| Required core courses | | |
| INFO 614 | Data Mining | 3 |
| INFO 664 | Information Systems for Business Intelligence | 3 |
| SCMA 632 | Statistical Analysis and Modeling | 3 |
| SCMA 645 | Advanced Decision Analytics | 3 |
| SCMA 648 | Business Data Analytics | 3 |
| Approved electives | | |
| Select 15 credits from: | | 15 |
| ACCT 608 | Managerial Accounting Concepts | |
| ECON 501 | Introduction to Econometrics | |
| ECON 610 | Managerial Economics | |
| ECON 612 | Econometrics | |
| FIRE 629 | Cases in Real Estate | |
| FIRE 635 | Investments and Security Analysis | |
| INFO 610 | Analysis and Design of Database Systems | |
| INFO 611 | Data Re-engineering | |
| INFO 616 | Data Warehousing | |
| MGMT 642 | Business Policy and Strategy | |
| MGMT 697 | Guided Study in Management | |
| MKTG 673 | Marketing Research | |

| | | |
|--|--|-----------|
| OPER 528 | Stochastic Simulation | |
| OPER/STAT 636 | Machine Learning Algorithms | |
| OPER 643 | Decision and Risk Analysis | |
| SCMA 643 | Applied Multivariate Methods | |
| SCMA 669 | Developing and Implementing Forecasting Methods for Business | |
| SCMA 675 | Operations Management | |
| Health care management concentration required courses | | |
| FMBA 614 | Health Care Management I: National Perspective | 3 |
| FMBA 615 | Health Care Management II: Employer's Perspective | 3 |
| FMBA 616 | Health Care Management III: Industry Perspective | 3 |
| Total Hours | | 54 |

The minimum total of graduate credit hours required for this degree is 54 (39 if prerequisite and all foundation courses are waived).

Decision Analytics, Master of (M.D.A.) with a concentration in health care management – professional track

Program accreditation

Association to Advance Collegiate Schools of Business (<http://www.aacsb.edu/>)

Program goal

The M.D.A. program provides in-depth knowledge of one business discipline and allows students to develop and build technical skills in their specific areas of interest. It is frequently recommended for students with undergraduate business degrees.

Student learning goals

Students will be able to examine a situation/problem to determine a relevant data-driven analysis to provide valuable information for decision-makers and apply advanced analytical and quantitative skills to the decision problems of businesses, organizations and society. Students will be able to communicate analysis information and recommend decisions in a clear, ethical and transparent manner.

Student learning outcomes

1. **Database structures and query:** Students will have an understanding of basic database structures, be able to query databases and organize data for analysis.

2. **Quantitative skills:** Students will be able to identify appropriate data analysis approaches to address real-world problems. They will be able to perform the analysis using commercial software.
3. **Problem formulation:** Students will have the knowledge, skills and practice to take nonquantitative and perhaps ill-formed problems and issues and determine ways objective analysis can bring organization and insight to them. They will be able to determine data requirements and query available databases.
4. **Analytical applications:** Students will experience various applications of analytics in real situations.
5. **Technical communications and teamwork:** Students will be able to communicate analytical analysis and results effectively to nonquantitative audiences and will develop skills in organizing, interacting and analyzing real problems as members of a team.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section for additional information on graduation requirements](#).

Other information

School of Business [policies and procedures for graduate students](#) are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.D.A. | Fall | Apr 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants should have three years of work experience in an application area. Students without the required work experience may take six credit hours of graduate-level courses in an application area prior to acceptance into the program. Applicants are expected to have successfully completed an undergraduate or graduate course in statistics, and it is preferable that they have programming experience. Exceptions may be made at the discretion of the program director.

Degree requirements

The Master of Decision Analytics provides students with a breadth of analytical and quantitative skills with experience in analyzing and communicating solutions to problems arising in an organization.

Leading organizations gain competitive advantage through the use of analysis of relevant data to guide and drive strategic and tactical decisions. Increased volumes of data and emphasis on data-driven decision-making create new challenges for decision-makers and provide new employment opportunities for people with deep analytical skills. There is a significant and growing demand for individuals with the ability to work collaboratively within an organization to mine relevant raw data and refine data into a recommended action of value to the enterprise. The decision analytics degree equips students with the essential skills to be analytically functional in an organization.

Skills, abilities and knowledge necessary for success in analytics:

1. Work in a collaborative environment
2. Translate specific business questions into problems that can be insighted through data analysis
3. Acquire and organize appropriate data so it can be used for analysis
4. Know general principles and common tools and be able to apply them to analyze specific business problems
5. Develop and effectively communicate an actionable solution for specific business questions

The decision analytics degree focuses on the applications of digital and information technology, decision sciences and statistics to decision-making and problem-solving in organizations. The program will give students the theory, knowledge and skills to:

1. Formulate frequently nonquantitative and ill-formed business issues so they can be insighted through data analytics

2. Retrieve, cleanse and organize data from mega databases (big data)
3. Perform appropriate statistical analysis and interpret the results
4. Explain analytical results to nonquantitative management

The professional track is presented in a concentrated weekend schedule, making the program attractive to midcareer professionals who want to gain or increase their analytics skills without interrupting their careers.

In addition to the VCU Graduate School graduation requirements (p. 32) and credit hour requirements, students must complete up to four classes (zero to 12 credit hours) of foundation course work. At the time of application, all undergraduate and graduate transcripts will be reviewed to determine if the following courses may be waived. Waivers of foundation courses only occur when a student has completed the required undergraduate equivalent courses with a minimum grade of C.

The concentration in health care management will require an additional nine credit hours beyond the minimum 33-credit hours required for the degree.

Curriculum requirements

| Course | Title | Hours |
|---------------------------------------|---|-------|
| Courses | | |
| DAPT 611 | Analysis and Design of Database Systems | 3 |
| DAPT 612 | Text Mining and Unstructured Data | 2 |
| DAPT 613 | Tools for Business Intelligence | 1 |

Supply Chain Management, Master of (M.S.C.M.)

Program accreditation

Association to Advance Collegiate Schools of Business

Program goal

The Master of Supply Chain Management program will educate students on the theory, skills and practices necessary to manage the daily challenges in managing global supply chains. Students will be introduced to supply management and logistics systems, international logistics, transportation management, enterprise resource planning and innovation processes. In addition, students will learn how to identify problems, gather information, analyze data, interpret solutions, establish contingencies and effectively present results.

Although developed in collaboration with the U.S. Army, the intent of the program is to provide an opportunity for both military officers and civilians to earn a master's degree in supply chain management.

Student learning goals

Graduates will employ knowledge of supply chain management, while effectively utilizing analytics tools, to provide solutions and insight to complex business solutions.

Student learning outcomes

- Content knowledge:** Demonstrate an understanding of the complexities of global supply chains
- Uncertainty and risk:** Demonstrate appropriate strategies to assess and manage uncertainty and risk
- Analytics methodologies:** Employ analytics tools to support decision-making
- Analytics applications:** Apply analytics techniques to supply chain problems

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Business **policies and procedures for graduate students** are available on the school's website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|----------|-----------------------|-----------------|--------------------|
| M.S.C.M. | Fall | Jul 1 | GRE or GMAT* |
| | Spring | Nov 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must submit an up-to-date resume.

*Test requirements may be waived. Waiver request information can be found on the Graduate Studies in Business webpage (<https://business.vcu.edu/graduate-studies/how-to-apply/>).

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 30 credit hours. These credit hours consist of six core courses (18 credit hours), two analytics courses (six credit hours) and two elective courses (six credit hours).

The foundation course may be waived for students who present satisfactory equivalent preparation at either the undergraduate or graduate level. This determination is made by the faculty adviser at the time of admission.

SCHOOL OF DENTISTRY

The School of Dentistry was created in 1893 when the University College of Medicine opened with a dental department as one of its original divisions. The Medical College of Virginia inaugurated a dental education program in 1897, and in 1913 the two schools were merged to form the MCV School of Dentistry.

In 1968, by an act of the Virginia General Assembly, MCV was merged with Richmond Professional Institute to form Virginia Commonwealth University. The School of Dentistry is located on VCU's MCV Campus.

The facilities of the School of Dentistry are housed in the Wood Memorial, Lyons and Perkinson buildings and contain clinical facilities, research facilities, classrooms, student laboratories, departmental offices and a computer-learning laboratory.

The school provides opportunities for selected, qualified individuals to study dentistry under the most favorable conditions and in accordance with the standards established by the Commission on Dental Accreditation of the American Dental Association.

The degree of Doctor of Dental Surgery (D.D.S.) is awarded to graduates of the school's professional program and the Bachelor of Science degree to graduates of the Dental Hygiene Program within the Department of Oral Health Promotion and Community Outreach.

Graduates of the advanced dental education programs in endodontics, orthodontics, pediatric dentistry and periodontics are awarded the Master of Science in Dentistry degree.

Advanced Dental Education Programs*

Commission on Dental Accreditation

*(includes endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics and Advanced Education in General Dentistry)

Mission

The mission of the VCU School of Dentistry:

- **Education** of highly qualified dental professionals
- **Research** that advances the understanding of oral health, disease and effective treatment
- **Service** to the community
- Improved oral and general **health** of our patients and the general population

Philips Institute for Oral Health Research

Iain M. Morgan, Ph.D.
Director

The mission of the Philips Institute for Oral Health Research is to serve the university and the commonwealth of Virginia as a center of educational and research excellence focused on infectious, neoplastic and genetic diseases of the oral cavity, head and neck.

Dentistry, Master of Science in (M.S.D.) with a concentration in endodontics

Program goal

The advanced dental specialty education program in endodontics offers the resident a comprehensive 24-month course of study in clinical and didactic endodontics. The program is designed to educate qualified individuals to pursue careers as practicing clinical dental specialists in endodontics. The program meets the educational requirements for limitation of practice to the specialty of endodontics and prepares the student for examination by the American Board of Endodontics.

Students completing the program earn a specialty Certificate in Endodontics and a Master of Science in Dentistry degree. The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Student learning outcomes

Graduates of this program will:

1. Be able to formulate and conduct a research project relevant to their discipline
2. Practice evidence-based advanced level dentistry

3. Demonstrate the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners
4. Demonstrate advanced clinical skills in the provision of ethical and informed patient care
5. Be proficient in the delivery of state-of-the-art endodontic care including
 - a. Diagnosis, treatment planning and prognosis of pulpal and periradicular disease
 - b. Provision of nonsurgical endodontics, retreatment and surgical endodontics
 - c. Outcome assessment
 - d. Diagnostic imaging technologies
 - e. Management of medically compromised patients
 - f. Emergency management of endodontic conditions
 - g. Management of orofacial pain and dental anxiety
 - h. Use of magnification technologies
 - i. Use of emerging techniques of endodontic treatment
 - j. Management of traumatic dental injuries

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

For a current copy of the program handbook, contact the VCU School of Dentistry's Department of Endodontics.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-------------------------|-----------------|---|
| M.S.D. | Fall (Jul 1 start date) | Aug 15 | National Dental Boards, parts I and II or Integrated National Board |

Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL with a minimum score of 100.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Graduation from an accredited university or its equivalent, with a Doctor of Dental Surgery or Doctor of Medicine in Dentistry or the international equivalent
2. For international students, an external credential evaluation of all international transcripts to complete the application (WES, ECE, and AACRAO are some of the recommended NACES-approved providers.)
3. One "dean's letter" from the academic institution from which the individual received the dental degree that gives class rank, GPA and overall academic recommendation
4. Two letters of recommendation from individuals who are in a position to judge the applicant's ability to engage in graduate study and pursue advanced dental training
5. A written letter of professional intent or biographical statement that reflects the candidate's desire to pursue the specialty and the intent upon receipt of the degree and certificate
6. A resume or curriculum vitae
7. An administrative application fee made payable to the Department of Endodontics, School of Dentistry (See website for details. This fee is in addition to the application fee that has to be paid with the submission of the graduate application. One year of an AEGD, GPR or the private practice equivalent is preferred but not required.)

Admission to the advanced dental specialty program in endodontics is through American Dental Education Association Postdoctoral Application Support Service. PASS historically opens to receive applications mid-May of the year prior to the year for which the candidate wishes to enroll and is open until Aug. 15. Please refer to the VCU School of Dentistry website, Department of Endodontics postgraduate information or ADEA PASS for specific yearly dates of the application period.

Candidates are required to interview in person. Invitations to interview followed by an invitation to accept a position in the residency are extended by the program director in the fall at the close of the application period. For example, the candidate will submit an application through ADEA PASS during the application period (May through August). An invitation will be extended to interview with the advanced dental specialty program in endodontics admission committee in August or September. The candidate will be informed of selection or nonselection by Nov. 15. The resident will start the clinical program the following June and the academic program the following September.

Admission to the Master of Science in Dentistry degree program is made after the candidate has accepted a residency position in the advanced dental specialty program in endodontics.

Degree requirements

All course work must be completed within the 24-month timeframe for the program. Any extension of the 24-months is at the discretion of the program director. Extensions are approved only in extenuating circumstances.

In addition to general VCU Graduate School graduation requirements (p. 32), a cumulative GPA of 3.0 must be maintained. Residents must receive a minimum grade of B for all required courses. A student with a grade of C in a required course may be required to repeat the course. A second grade of C in a required course may result in dismissal from the program. At the discretion of the program director, a resident retaking a required course may still be eligible to take the comprehensive written and oral examinations and to start the thesis research process prior to successful completion of the repeat of the course.

In the last semester of the second year the resident will take a written and an oral comprehensive examination designed to evaluate the resident's ability to integrate the didactic and clinical course material, demonstrate critical-thinking skills and demonstrate command of evidence-based endodontics. Both the written and oral examinations must be successfully completed to receive the specialty Certificate in Endodontics.

The Certificate of Endodontics, conferred by the School of Dentistry, is only conferred upon completion and awarding of the Master of Science in Dentistry.

The residents must formulate, complete and defend a research project. The resident will prepare a manuscript in a thesis format or in the publishable format of a refereed journal. The project must be completed, defended and presented in a research forum in order for the resident to qualify for receipt of the Master of Science in Dentistry.

Curriculum requirements

| Course | Title | Hours |
|---------------------|-----------------------------------|-------|
| Core courses | | |
| DENS 550 | Update in Practice Administration | 1 |

| | | |
|------------------------------|---|-------------|
| DENS 580 | Biostatistics and Research Design in Dentistry (two credits taken twice) | 4 |
| DENS 660 | Interdisciplinary Care Conference (0.5 credits earned twice) ¹ | 1 |
| DENS 680 | Graduate Dental Clinic (four credits taken four times) | 16 |
| DENS 699 | Thesis Guidance (two credits taken four times) | 8 |
| DENS 700 | Basic Sciences and Graduate Dentistry | 3 |
| Concentration courses | | |
| ENDO 522 | Introduction: Specialty of Endodontics | 2 |
| ENDO 530 | Advanced Oral Pathology (one credit taken twice) | 2 |
| ENDO 532 | Management of Medical Emergencies in the Dental Office (one credit taken twice) | 2 |
| ENDO 560 | Endodontic Therapy Lectures | 3.5 |
| ENDO 650 | Endodontic Topic Literature Review (3.5 credits taken four times) | 14 |
| ENDO 652 | Endodontic Clinical Seminars (1.5 credits taken four times) | 6 |
| ENDO 654 | Endodontic Management of the Medically Compromised Patient (one credit taken twice) | 2 |
| ENDO 656 | Endodontic Current Literature Review (one credit taken four times) | 4 |
| ENDO 680 | Clinical Endodontics (one credit taken four times) | 4 |
| Total Hours | | 72.5 |

¹

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5 credit classes.

The minimum total of graduate credit hours required for this degree is 72.5.

Plan of study

The following illustrates how the course requirements are met during the 24 months of the program. No additional class work or course work is required other than the courses listed below.

| Year one | | |
|----------------------|---|--------------|
| Fall semester | | Hours |
| DENS 580 | Biostatistics and Research Design in Dentistry | 2 |
| DENS 660 | Interdisciplinary Care Conference (no credits earned in fall; continuing course) ¹ | - |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 2 |
| ENDO 522 | Introduction: Specialty of Endodontics | 2 |
| ENDO 532 | Management of Medical Emergencies in the Dental Office | 1 |
| ENDO 560 | Endodontic Therapy Lectures | 3.5 |

| | | |
|----------|--------------------------------------|-----|
| ENDO 650 | Endodontic Topic Literature Review | 3.5 |
| ENDO 652 | Endodontic Clinical Seminars | 1.5 |
| ENDO 656 | Endodontic Current Literature Review | 1 |
| ENDO 680 | Clinical Endodontics | 1 |

Term Hours: 21.5

Spring semester

| | | |
|----------|--|-----|
| DENS 580 | Biostatistics and Research Design in Dentistry | 2 |
| DENS 660 | Interdisciplinary Care Conference ¹ | 0.5 |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 2 |
| DENS 700 | Basic Sciences and Graduate Dentistry | 3 |
| ENDO 530 | Advanced Oral Pathology | 1 |
| ENDO 650 | Endodontic Topic Literature Review | 3.5 |
| ENDO 652 | Endodontic Clinical Seminars | 1.5 |
| ENDO 654 | Endodontic Management of the Medically Compromised Patient | 1 |
| ENDO 656 | Endodontic Current Literature Review | 1 |
| ENDO 680 | Clinical Endodontics | 1 |

Term Hours: 20.5

Year two

Fall semester

| | | |
|----------|---|-----|
| DENS 550 | Update in Practice Administration | 1 |
| DENS 660 | Interdisciplinary Care Conference (no credits earned in fall; continuing course) ¹ | - |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 2 |
| ENDO 532 | Management of Medical Emergencies in the Dental Office | 1 |
| ENDO 650 | Endodontic Topic Literature Review | 3.5 |
| ENDO 652 | Endodontic Clinical Seminars | 1.5 |
| ENDO 656 | Endodontic Current Literature Review | 1 |
| ENDO 680 | Clinical Endodontics | 1 |

Term Hours: 15

Spring semester

Dentistry, Master of Science in (M.S.D.) with a concentration in orthodontics

Program goal

The Department of Orthodontics offers a 24-month advanced education Master of Science in Dentistry program. The program teaches the latest in clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction with emphasis on critical thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. Our goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically.

The program's clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of our program with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is required. All senior residents present their research at the Virginia Association of Orthodontists' meeting. The program makes students educationally qualified to take the written portion of the American Board of Orthodontics (<http://www.americanboardortho.com>) examination in the senior year. Residents are required to pass the written portion of the examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists' meeting.

Students completing the program earn a specialty Certificate in Orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Student learning outcomes

Graduates of this program will:

1. Be able to formulate and conduct a research project relevant to their discipline
2. Practice evidence-based advanced level dentistry
3. Demonstrate the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners
4. Demonstrate advanced clinical skills in the provision of ethical and informed patient care
5. Be proficient in the delivery of state-of-the-art orthodontic care including:
 - a. Diagnosis, treatment planning, treatment, retention and prognosis of dental malocclusions and dento-facial disharmony
 - b. Outcome assessment
 - c. Diagnostic imaging technologies
 - d. Management of patients with craniofacial deformities
 - e. Management of combined orthodontic and surgical cases
 - f. Use of various fixed and removable appliances, aligner technology
 - g. Use of temporary anchorage devices and soft tissue laser
 - h. Use of digital technology for records taking and treatments with aligners

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-------------------------|-----------------|--|
| M.S.D. | Fall (Jul 1 start date) | Sep 2 | NBDE, GRE, TOEFL or IELTS if international |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Agreement to participate in the Postdoctoral Dental Matching Program
2. Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
3. Graduation or anticipated graduation from dental school
4. Eligibility to obtain a Virginia temporary resident's license from the Virginia Board of Dentistry
5. Completion of National Boards Part I and anticipated completion of Part II or completion of the Integrated National Board
6. Completion of GRE
7. Completion of TOEFL or IELTS (for students whose native language is not English)
8. Application to the orthodontic graduate program through the ADEA PASS program; the PASS application should include the following items:
 - a. Online application form
 - b. Essay/personal statement: Students should provide a personal history that explains what led them to apply for an educational program in orthodontics and including plans for the future and any factors the applicant believes are important for the school to know in reviewing the application. Please limit comments to one page.
 - c. Curriculum vitae/resume: Applicants should include a curriculum vitae/resume to provide more information about themselves, including education and work experiences, awards, honors, research experiences, and personal interests.

- d. Undergraduate college transcripts: Include official transcripts from all colleges or universities attended before dental school.
 - e. Dental school transcripts
 - f. Institution Evaluation Form (completed by the dean of the applicant's dental school)
 - g. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
 - h. Professional evaluations: two letters of recommendation from individuals who can personally attest to the applicant's professional and personal qualities (the program director's letter can count as one). A letter from the chair of orthodontics is not required, but may be included if the chair has personal knowledge of the applicant's skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**
9. The following supplementary items are to be submitted directly to the VCU Department of Orthodontics:
- a. Application cover page
 - b. Application fee of \$50 (U.S. dollars drawn on a U.S. bank) made payable to VCU (Application fee is nonrefundable.)
 - c. Official transcripts from all colleges or universities attended after dental school, if any (If the applicant has attended a program without a transcript, such as a residency, the department will need a letter from the applicant's program director documenting the experience.)
 - d. Additional letters of recommendation: may be submitted if the applicant feels they would be beneficial to the application (optional)
 - e. National Board scores: Have an original score report sent directly to the Department of Orthodontics from the National Board office in addition to enclosing a copy in the supplementary materials package/envelope. If the applicant has taken other exams (or wish to add to their file), they may send any item of this type for consideration. The National Board scores, Part I, are required (even if the applicant is a graduate of a foreign school) no exceptions.
 - f. GRE scores: Have an original score report sent directly to the Department of Orthodontics from the Educational Testing Service office in addition to enclosing a copy in the supplementary materials package/envelope. The GRE scores are required (even if the applicant is a graduate of a foreign school) no exceptions.
 - g. TOEFL or IELTS scores: required for students whose native language is not English. These scores are not required if the applicant went to dental school or graduate school in an English-speaking environment (U.S.A., Canada, Australia or Great Britain, etc.). Foreign dental school graduates: Graduation from our orthodontic program qualifies the applicant to apply for a dental license in the commonwealth of Virginia; however, other regulations apply. For example, after graduation from VCU's program, graduates will be required to take and pass a regional testing agency dental examination.

clinic schedule that includes a morning and afternoon clinic session on most days.

2. Didactic course work in the department consists primarily of small-group seminar sessions for an average of two hours each day.
3. Clinical work simulates a private-practice environment. Each team consists of one junior and one senior orthodontic resident and a dental assistant whose time is dedicated to that team. The orthodontic clinic has its own business manager, practice manager and receptionist. Patient records are computerized, and billing, scheduling and record storage are accomplished using a commercial orthodontic office management system. The objective is to maximize clinical efficiency so residents fully develop the thought processes necessary to master orthodontic principles and treatment techniques. Graduates are prepared to enter into a successful and busy orthodontic practice.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|---|-----------|
| Core courses | | |
| DENS 550 | Update in Practice Administration | 1 |
| DENS 580 | Biostatistics and Research Design in Dentistry (two credits taken twice) | 4 |
| DENS 660 | Interdisciplinary Care Conference (0.5 credits earned twice) ¹ | 1 |
| DENS 680 | Graduate Dental Clinic (four credits taken four times) | 16 |
| DENS 699 | Thesis Guidance (two credits taken four times) | 8 |
| DENS 700 | Basic Sciences and Graduate Dentistry | 3 |
| Concentration courses | | |
| DENS 630 | Orthodontic-Periodontic-AEGD Conference (0.5 credits taken four times) ¹ | 2 |
| ORTH 532 | Biomechanics: Theoretical Basis for Tooth Movement | 1 |
| ORTH 650 | Literature Review (two credits taken four times) | 8 |
| ORTH 652 | Growth and Development (two credits taken four times) | 8 |
| ORTH 654 | Orthodontic Diagnosis and Treatment Planning (two credits taken four times) | 8 |
| ORTH 656 | Current Literature (two credits taken four times) | 8 |
| ORTH 658 | Analysis of Orthodontic Treatment (1.5 credits taken four times) | 6 |
| ORTH 660 | Orthognathic Conference (one credit taken four times) | 4 |
| ORTH 662 | Craniofacial Anomalies (one credit taken four times) | 4 |
| ORTH 680 | Orthodontic Clinic (2.5 credits taken four times) | 10 |
| Total Hours | | 92 |

¹

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year.

Degree requirements

1. The 24-month certificate program in orthodontics begins July 1 with two weeks of classes to familiarize students with concepts of growth and development, diagnosis and treatment planning, and basic biomechanical principles. First-year residents see new patients in the clinic in mid-July. In August, first-year residents begin a full

Students take the class four times for .5 credits each time, but they are only graded for two .5 credit classes.

The minimum total of graduate credit hours required for this degree is 92.

Dentistry, Master of Science in (M.S.D.) with a concentration in pediatric dentistry

Program goals and objectives

The didactic requirements of the Master of Science in Dentistry are combined with the goals of the M.S.D. program to provide the student with a strong clinical background that is supported by a strong background in research methodology.

Program goals

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical pediatric dentistry can be achieved
2. To provide a sound background in medicine as it applies to the pediatric/adolescent patient and to patients with special health care needs
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply literature associated with the field of pediatric dentistry
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills in the clinic and in the operating room
6. To provide didactic instruction and clinical training in the area of nonpharmacologic and pharmacologic behavior management
7. To provide instruction and training in growth and development to include clinical interceptive orthodontic care
8. To provide methods of pain and anxiety control, including nitrous oxide and oral conscious sedation
9. To provide an environment for the interpretation and implementation of research
10. Enable successful completion of the American Board of Pediatric Dentistry exam
11. To develop sound lifelong didactic and clinical learning skills
12. To provide specialists in pediatric dentistry for community health care, professional service and dental education

Program objectives

1. To be exposed to the basic sciences and be able to apply concepts to clinical pediatric dentistry
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the pediatric/adolescent patient and patients with special health care needs
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities to include treatment of patients under general anesthesia
5. To become competent in diagnosis and treatment planning
6. To obtain competency and certification in moderate conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the ABPD examination
9. To develop communication and presentation skills and lifelong learners

Student learning outcomes

Graduates of this program will:

1. Be able to formulate and conduct a research project relevant to their discipline
2. Practice evidence-based advanced level dentistry
3. Demonstrate the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners
4. Demonstrate advanced clinical skills in the provision of ethical and informed patient care
5. Be proficient in the delivery of state-of-the-art pediatric care including
 - a. Knowledge – concepts, facts and information
 - i. Knowledge and skills in the areas of pediatric medicine and oral medicine, as well as the delivery of dental care and oral surgery for compromised children and adolescents
 - ii. In-depth knowledge and skills in the use of pharmacologic and nonpharmacologic behavior management techniques
 - iii. Knowledge of hospital protocol, policies, rules, regulations and the ability to treat pediatric dental patients in the hospital environment
 - iv. Knowledge of preventive and corrective dental procedures relating to general and oral health and to growth and development of the stomatognathic system
 - v. Knowledge and skill in oral and maxillofacial radiology specific to the needs of the child and adolescent
 - vi. Preparation for managing a contemporary pediatric dental practice relative to practice administration, efficient auxiliary utilization and marketing
 - vii. Understanding of the biomedical sciences related to the practice of contemporary pediatric dentistry: biostatistics/epidemiology, pharmacology, microbiology, embryology, genetics, anatomy and oral and medical pathology
 - viii. In-depth knowledge of the physical, psychological and social development of children
 - ix. In-depth knowledge of oral and perioral lesions and anomalies in the pediatric dental patient
 - x. In-depth knowledge of the management of dental and medical emergencies in the dental setting
 - xi. Understanding of normal and abnormal language development
 - xii. Understanding of jurisprudence, risk management and biomedical ethics
 - xiii. Understanding of office and practice management including the use of contemporary technologies
 - b. Clinical competency
 - i. Ability to appropriately manage and guide the behavior of the child patient to accept needed treatment and to provide advice or guidance to the parent to enhance the child's acceptance
 - ii. Expertise in managing and rendering optimal dental care for the medically, emotionally or physically challenged pediatric dental patient
 - iii. Ability to perform evaluations of the physical status of children and adolescents
 - iv. Ability to transform didactic/learned information into appropriate clinical situations

- v. Skill in the use of pharmacologic and nonpharmacologic methods for the comprehensive control of pain and anxiety
 - vi. Ability to recognize, refer and treat children who have sustained abuse and neglect
 - vii. Expertise in dental surgical procedures for the restoration of the dentition
 - viii. Skill/dexterity in performing procedures of periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region, including in-depth knowledge of biopsy and adjunctive diagnostic tests
 - ix. Appropriate management of orofacial injuries
- c. Diagnostic skills
- i. Ability to recognize the early signs of child abuse and neglect
 - ii. Ability to diagnose dental trauma
 - iii. Skill in the diagnosis, prevention and treatment planning of pediatric disease in the primary and permanent dentition and periodontal, mucocutaneous and associated hard tissues of the oral-maxillofacial region
 - iv. Application and understanding of patient monitoring
 - v. Competence in the skills required to instruct and motivate children and their caretakers in methods of achieving and maintaining optimum oral health
 - vi. Ability to prepare patients and caretakers for procedures
- d. Organizational skills and documentation
- i. Coordination of tasks such that diagnosis, case analysis, treatment planning and clinical management of oral-facial health problems of the pediatric dental patient occur in a logical, efficient manner
 - ii. Ability to present an organized treatment plan to the patient, parent, attending and front desk
 - iii. Ability to manage time and tasks and to work effectively with people

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for

continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-------------------------|-----------------|---|
| M.S.D. | Fall (Jul 1 start date) | Sep 15 | National Dental Boards, parts I and II or Integrated National Board |

Special requirements

- Applicants from countries where English is not the primary and official language must complete the TOEFL.
- Upon acceptance in the specialty certificate program in pediatric dentistry, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. D.D.S. or D.M.D. from an American Dental Association-accredited dental school
2. Successful completion of Part I of the National Dental Board Exam at the time of application and completion of Part II by the time of matriculation or successful completion of the Integrated National Board
3. Minimum grade point average of 3.0 (4.0 scale) or equivalent
4. Ranking in the top 50 percent of the class of the dental school attended
5. Personal interview
6. An externship in pediatric dentistry of at least one week in duration while attending dental school (highly encouraged)

7. Participation status with American Dental Education Association Postdoctoral Application Support Service and the Postdoctoral Dental Matching Program
8. Agreement to participate in the Postdoctoral Dental Matching Program
9. Agreement to participate in the ADEA PASS
10. Graduation or anticipated graduation from a CODA-accredited U.S. or Canadian dental school
11. Eligibility to obtain a Virginia Temporary Resident's License from the Virginia Board of Dentistry
12. Completion of GRE
13. Completion of TOEFL or IELTS for students whose native language is not English

Application to the pediatric graduate program is accepted through the ADEA PASS program. The PASS application should include the following items:

1. Online application form
2. Essay/personal statement: Students should provide a personal history that explains what led them to apply for an educational program in pediatrics and including plans for the future and any factors the applicant believes are important for the school to know in reviewing the application. Please limit comments to one page.
3. Curriculum vitae/resume: Applicants should include a curriculum vitae/resume to provide more information about themselves, including education and work experiences, awards, honors, research experiences, and personal interests.
4. Undergraduate college transcripts: Include official transcripts from all colleges or universities attended before dental school.
5. Dental school transcripts
6. Institution Evaluation Form (completed by the dean of the applicant's dental school)
7. Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)
8. Professional evaluations: two letters of recommendation from individuals who can personally attest to the applicant's professional and personal qualities (the program director's letter can count as one). A letter from the chair of pediatrics is not required, but may be included if the chair has personal knowledge of the applicant's skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**

Special admission requirements

International applicants must complete the following requirements and documentation. Permanent U.S. residents and international students are advised to contact VCU International Admissions (<https://www.vcu.edu/admissions/apply/international/>) to ensure eligibility.

1. D.D.S. or D.M.D. from an international dental school program
2. Provide all information in items 1 through 7 above
3. Test of English as a Foreign Language (<http://www.ets.org/toefl/>) (minimum score of 600 on paper-based test and 100 on Internet-based test)
4. International English Language Testing System (<http://www.ielts.org>) (score of 6.5 or greater acceptable; test must be taken within two years of application date)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained then the examination must be retaken. For research the student must have a thesis defense and present a poster by mid-April of their second year. Extensions may be approved but at the student's own expense.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|--|-------------|
| Core courses | | |
| DENS 550 | Update in Practice Administration | 1 |
| DENS 580 | Biostatistics and Research Design in Dentistry (two credits taken twice) | 4 |
| DENS 660 | Interdisciplinary Care Conference (0.5 credits earned twice) ¹ | 1 |
| DENS 680 | Graduate Dental Clinic (four credits taken four times) | 16 |
| DENS 699 | Thesis Guidance (two credits taken four times) | 8 |
| DENS 700 | Basic Sciences and Graduate Dentistry | 3 |
| Concentration courses | | |
| ORTH 620 | Orthodontic Clinic for Non-orthodontic Graduate Students (one credit taken four times) | 4 |
| PEDD 511 | General Anesthesia Rotation | 3 |
| PEDD 512 | Growth and Development | 1 |
| PEDD 514 | Introduction to Pediatric Dentistry | 2 |
| PEDD 572 | Pediatric Dental Emergency Service (2.5 credits taken twice) | 5 |
| PEDD 612 | Seminar Series: Pediatric Dentistry and Medicine (two credits taken twice) | 4 |
| PEDD 620 | Pediatric Medicine Rotation | 1.5 |
| PEDD 640 | Clinical Teaching (two credits taken three time) | 6 |
| PEDD 650 | Literature Review (two credits taken twice) | 4 |
| PEDD 654 | Treatment Planning Seminar (one credit taken four time) | 4 |
| PEDD 656 | Current Literature Review (one credit taken twice) | 2 |
| Total Hours | | 69.5 |

1

Students register for .5 credits for both fall and spring semesters for both years of the program. They receive a continuing grade in the fall semester and a pass/fail grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5-credit classes.

The minimum total of graduate credit hours required for this degree is 69.5.

Plan of study

Year one

Dentistry, Master of Science in (M.S.D.) with a concentration in periodontics

Program goals and objectives

The didactic requirements of the M.S.D. are combined with the goals of the M.S.D. program to provide the student with a strong clinical background which is supported by a strong background in research methodology.

Program goals

1. To provide an academic environment for inquiry in which expertise and knowledge in basic sciences and clinical periodontics can be achieved
2. To provide a sound background in medicine as it applies to the periodontal patient
3. To provide a sound background in oral pathology
4. To be able to interpret, critique and apply periodontal and associated literature
5. To develop sound diagnostic, clinical, nonsurgical and surgical skills
6. To provide didactic instruction and clinical training in the area of dental implants
7. To provide methods of pain and anxiety control, including ADA certification in intravenous conscious sedation
8. To provide an environment for the interpretation and implementation of research

9. Enable successful completion of the American Board of Periodontology exam
10. To develop sound lifelong didactic and clinical learning skills
11. To provide specialists in periodontics for community health care, professional service and dental education

Program objectives

1. To be exposed to the basic sciences and be able to apply concepts to clinical periodontics
2. To be able to critically critique and interpret the old and new literature
3. To have an understanding of oral pathology and medicine as it applies to management of the periodontal patient
4. To have residents become exposed to and proficient in multiple nonsurgical and surgical treatment modalities
5. To become competent in the treatment planning, site preparation, surgical placement and maintenance of dental implants
6. To obtain competency and certification in enteral and parental conscious sedation
7. To complete research, M.S.D. and prepare a paper for presentation and publication
8. To prepare the student to successfully complete Part I and II of the American Board of Periodontology examination
9. To develop communication and presentation skills and lifelong learners

Student learning outcomes

Graduates of this program will:

1. Be able to formulate and conduct a research project relevant to their discipline
2. Practice evidence-based advanced level dentistry
3. Demonstrate the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners
4. Demonstrate advanced clinical skills in the provision of ethical and informed patient care
5. Become proficient in the delivery of state-of-the-art periodontic care including:
 - a. Diagnosis treatment and planning as it applies to the periodontal patient
 - b. Expertise in systemic/medical considerations affecting patient periodontal status and provision of care
 - c. Outcomes assessment
 - d. An in-depth knowledge of oral medicine and oral pathology
 - e. Advanced clinical skills in a comprehensive variety of periodontal and dental implant treatment modalities
 - f. Management of medically compromised patients
 - g. Emergency management of periodontal conditions
 - h. Management of orofacial pain and dental anxiety, including ADA certification in intravenous conscious sedation
 - i. Use of emerging techniques of periodontal treatment

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-------------------------|---------------------------------|--|
| M.S.D. | Fall (Jul 1 start date) | Jul 1, a year previous to entry | National Dental Boards, part I and II or the Integrated National Board |

Upon acceptance into the speciality certificate program in periodontics the applicants must apply to the Graduate School for the M.S.D. program.

In addition to the **general admission requirements of the VCU Graduate School**, the following requirements represent the minimum acceptable standards for admission:

1. Agreement to participate in the Postdoctoral Dental Matching Program
2. Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
3. Graduation or anticipated graduation from dental school
4. Eligibility to obtain a Virginia temporary resident's license from the Virginia Board of Dentistry
5. Completion of National Boards Part I and Part II by time of matriculation (current dental student applicants) or successful completion of the Integrated National Board.
6. Minimum grade point average of 3.0 (4.0 scale) or the equivalent, or a ranking of the top 50 percent of the dental school class.
7. Completion of TOEFL or IELTS (for students whose native language is not English)

Application to the periodontics concentration is through the ADEA PASS program. The PASS application should include the following items:

1. Current curriculum vitae or resume
2. Official copies of dental school transcripts
3. GPA/class ranking forwarded from the dean's office of the dental school attended
4. Three letters of recommendation from individuals who can personally attest to the applicant's personal and professional qualities, including at least one letter from an individual who can discuss periodontal skills
5. For international students:
 - a. Test of English as a Foreign Language (original copy and minimum IBT score of 92 is required for consideration) or International English Language Testing System (original copy and score of 6.5 or greater acceptable; test must be taken within two years of application date)
 - b. An official, detailed, course-by-course evaluation by Education Credential Evaluators or World Education Services

The following supplementary items must be submitted directly to the VCU Department of Periodontics.

1. Personal statement indicating the applicant's interest in the speciality of periodontics, including information about experience and career goals (personal and professional)
2. \$50 application fee payable to VCU Department of Periodontics with memo line reading "for application fee"

3. 2x2 inch photograph

4. **Formal application [PDF]**

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained, then the examination must be retaken. For research the student must have a thesis defense, present a poster and prepare a manuscript for submission by May 1 of the third year. Extensions may be approved, but students are responsible for the expense.

Program website: periodontics.vcu.edu/gradprogram (<http://www.periodontics.vcu.edu/gradprogram/>)

Dentistry, Master of Science in (M.S.D.) with a concentration in prosthodontics

The advanced dental specialty education program in prosthodontics offers the resident a comprehensive 36-month course of study in clinical and didactic prosthodontics. The program is designed to educate qualified individuals to pursue careers as practicing clinical dental specialists in prosthodontics. The program will train new generations of prosthodontists through the combination of conventional prosthodontics and advanced digital technology, enabling graduates to provide state-of-the-art prosthodontic care for patients requiring complex prosthodontic care.

The program will provide an optimal and well-rounded academic environment for prosthodontic training through excellence in didactics, research and clinical service. During the program residents will become well-versed in contemporary biomaterials and be able to appropriately evaluate and apply these biomaterials in patient care using evidence-based approaches. They will be trained in pre-prosthetic surgery as well as digital technology associated with dental implant placement and restorations.

Graduates will be life-long learners, competent in all aspects of prosthodontic treatments including fixed, removable, implant and maxillofacial prosthodontics. They will be proficient in applying contemporary clinical prosthodontics through a combination of conventional and advanced technology.

The program meets the educational requirements for limitation of practice to the specialty of prosthodontics and prepares the student for examination by the American Board of Prosthodontics.

Students completing the program earn a specialty Certificate in Prosthodontics and a Master of Science in Dentistry degree. The program conforms to the Standards for Advanced Specialty Education in Prosthodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

The program makes students educationally qualified to take the written portion of the American Board of Prosthodontics (<https://www.abpros.org/>) examination in the senior year. Residents are required to pass the written portion of the examination prior to graduation and are encouraged to continue and complete the board certification process. The examinations are usually given every year in February and immediately after the American College of Prosthodontists annual meeting.

Student learning outcomes

Graduates of this program will:

1. Be able to formulate and conduct a research project relevant to their discipline
2. Practice evidence-based advanced level dentistry
3. Demonstrate the ability to communicate with patients, colleagues in general dentistry, dental specialties, medicine and other health care practitioners
4. Demonstrate advanced clinical skills in the provision of ethical and informed patient care

5. Be proficient in the delivery of state of the art prosthodontic care including:
 - a. Treatment planning
 - b. Appropriate multidisciplinary consultation
 - c. Contemporary diagnostic technologies
 - d. Conventional and digital prosthodontic technologies
 - e. Surgical and prosthodontic techniques and technologies associated with dental implants

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-------------------------|---------------------------------|---|
| M.S.D. | Fall (Jul 1 start date) | Jul 1, a year previous to entry | National Dental Boards, parts I and II or Integrated National Board |

Special requirements

- International applicants must include an external credential evaluation of all international transcripts to complete the application. WES, ECE and AACRAO are some of the recommended NACES-approved providers.
- Upon acceptance in the specialty certificate program in prosthodontics, applicants must apply to the Graduate School for the M.S.D.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- Agreement to participate in the Postdoctoral Dental Matching Program
- Agreement to participate in the American Dental Education Association Postdoctoral Application Support Service
- Graduation or anticipated graduation from dental school
- Eligibility to obtain a Virginia temporary resident's license from the Virginia Board of Dentistry
- Completion of National Boards Part I and anticipated completion of Part II or completion of the Integrated National Board
- For students whose native language is not English: TOEFL (minimum score of 550-paper, 213-computer or 80-internet) or IELTS (minimum score of 6.5)

Application to the prosthodontic concentration is through the ADEA PASS program. The PASS application should include the following items:

- Online application form
- Essay/personal statement: Applicants should share personal history that led them to apply for an educational program in prosthodontics, including plans for the future and any factors important for reviewers to know. Please limit comments to one page.
- Curriculum vitae/resume: Include a curriculum vitae/resume to give reviewers more information about applicant. Include education and work experiences, awards, honors, research experiences and personal interests.
- Undergraduate college transcripts: Include official transcripts from all colleges or universities attended before dental school.
- Dental school transcripts
- Institution evaluation form (completed by the dean of applicant's dental school)
- Personal potential index report (evaluation of different criteria by three to five evaluators compiled into a single report)

- Professional evaluation forms: Applicants can submit a minimum of two and a maximum of four PEFs per program. A letter from the prosthodontic department chair is not required, but may be included if they have personal knowledge of the applicant's skills. **Note: Professional evaluations are listed as optional for PASS; however, they must be submitted for VCU's program.**

The following supplementary items are to be submitted directly to the VCU Department of Prosthodontics:

- Application cover page
- Application fee of \$75 (U.S. dollars drawn on a U.S. bank) made payable to VCU (Application fee is nonrefundable.)
- Official transcripts from all colleges or universities attended after dental school, if any (If applicant has attended a program without a transcript, such as a residency, the department will need a letter from the program director documenting the experience.)
- Additional letters of recommendation (Optional; may be submitted if applicant feels they would be beneficial to the application.)
- National Board scores (Have an original score report sent directly to the program director from the National Board office in addition to enclosing a copy in the supplementary materials package/envelope. If the applicant has taken other exams – or if they wish to add to their file – applicant may send any item of this type for consideration. The National Board scores are required, even if a graduate of a foreign school, with no exceptions.)
- For students whose native language is not English: TOEFL (minimum score of 550-paper, 213-computer or 80-internet) or IELTS (minimum score of 6.5) scores (These scores are not required if the applicant went to dental school or graduate school in an English-speaking environment [USA, Canada, Australia or Great Britain, etc.]

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. Students will take written and oral examinations and must obtain a minimum grade of B or a passing grade. If either is not obtained, then the examination must be retaken. For research the student must have a thesis defense, present a poster and prepare a manuscript for submission by May 1 of the third year. Extensions may be approved, but students are responsible for the expense.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|---|-------|
| Core courses | | |
| DENS 550 | Update in Practice Administration | 1 |
| DENS 580 | Biostatistics and Research Design in Dentistry (two credits taken twice) | 4 |
| DENS 660 | Interdisciplinary Care Conference (0.5 credits earned twice) ¹ | 1 |
| DENS 680 | Graduate Dental Clinic (four credits taken four times) | 16 |
| DENS 699 | Thesis Guidance (variable credit course repeated for eight credits) | 8 |
| DENS 700 | Basic Sciences and Graduate Dentistry | 3 |
| Concentration courses | | |
| OVPR 601 | Scientific Integrity | 1 |

| | | |
|--------------------|--|-----------|
| PROS 500 | Advanced Biomaterials in Prosthodontics | 1 |
| PROS 501 | Prosthodontics Case Presentation and Interdisciplinary Seminar (one credit taken four times) | 4 |
| PROS 502 | Digital Technology Prosthodontics (one credit taken twice) | 2 |
| PROS 503 | Prosthodontic Principles (one credit taken twice) | 2 |
| PROS 600 | Advanced Prosthodontics (one credit taken twice) | 2 |
| PROS 601 | Surgical and Prosthodontic Principles of Implant Therapy (one credit taken twice) | 2 |
| PROS 656 | Literature Review in Prosthodontics (one credit taken four times) | 4 |
| PROS 680 | Clinical Prosthodontics | 15 |
| Total Hours | | 66 |

1

For DENS 660, students register for .5 credits for both fall and spring semesters in the first two years of the program. They receive a continuing grade in the fall semester and grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two 0.5 credit classes

The minimum number of graduate credit hours required for this degree is 66.

Plan of study

Year one

| Fall semester | | Hours |
|--------------------|--|-----------|
| DENS 580 | Biostatistics and Research Design in Dentistry | 2 |
| DENS 660 | Interdisciplinary Care Conference | - |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 1 |
| OVPR 601 | Scientific Integrity | 1 |
| PROS 500 | Advanced Biomaterials in Prosthodontics | 1 |
| PROS 501 | Prosthodontics Case Presentation and Interdisciplinary Seminar | 1 |
| PROS 502 | Digital Technology Prosthodontics | 1 |
| PROS 503 | Prosthodontic Principles | 1 |
| PROS 656 | Literature Review in Prosthodontics | 1 |
| Term Hours: | | 13 |

Spring semester

| | | |
|----------|--|-----|
| DENS 580 | Biostatistics and Research Design in Dentistry | 2 |
| DENS 660 | Interdisciplinary Care Conference ¹ | 0.5 |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 1 |
| DENS 700 | Basic Sciences and Graduate Dentistry | 3 |
| PROS 501 | Prosthodontics Case Presentation and Interdisciplinary Seminar | 1 |
| PROS 502 | Digital Technology Prosthodontics | 1 |

| | | |
|--------------------|-------------------------------------|-------------|
| PROS 503 | Prosthodontic Principles | 1 |
| PROS 656 | Literature Review in Prosthodontics | 1 |
| Term Hours: | | 14.5 |

Year two

Fall semester

| | | |
|--------------------|--|----------|
| DENS 660 | Interdisciplinary Care Conference (no credit earned in fall; continuing course) ¹ | - |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 1 |
| PROS 502 | Digital Technology Prosthodontics | 1 |
| PROS 600 | Advanced Prosthodontics | 1 |
| PROS 601 | Surgical and Prosthodontic Principles of Implant Therapy | 1 |
| PROS 656 | Literature Review in Prosthodontics | 1 |
| Term Hours: | | 9 |

Spring semester

| | | |
|--------------------|--|------------|
| DENS 660 | Interdisciplinary Care Conference ¹ | 0.5 |
| DENS 680 | Graduate Dental Clinic | 4 |
| DENS 699 | Thesis Guidance | 1 |
| PROS 501 | Prosthodontics Case Presentation and Interdisciplinary Seminar | 1 |
| PROS 600 | Advanced Prosthodontics | 1 |
| PROS 601 | Surgical and Prosthodontic Principles of Implant Therapy | 1 |
| PROS 656 | Literature Review in Prosthodontics | 1 |
| Term Hours: | | 9.5 |

Year three

Fall semester

| | | |
|--------------------|-----------------------------------|-----------|
| PROS 680 | Clinical Prosthodontics | 7 |
| DENS 550 | Update in Practice Administration | 1 |
| DENS 699 | Thesis Guidance | 2 |
| Term Hours: | | 10 |

Spring semester

| | | |
|---------------------|-------------------------|-----------|
| DENS 699 | Thesis Guidance | 2 |
| PROS 680 | Clinical Prosthodontics | 8 |
| Term Hours: | | 10 |
| Total Hours: | | 66 |

1

For DENS 660, students register for .5 credits for both fall and spring semesters in the first two years of the program. They receive a continuing grade in the fall semester and a grade at the end of the spring semester for the entire year. Students take the class four times for .5 credits each time, but they are only graded for two .5-credit classes.

The minimum number of graduate credit hours required for this degree is 66.

Microbiology and Immunology, Master of Science (M.S.) with a concentration in oral biology

See the School of Medicine section for a program description of the M.S. in Microbiology and Immunology with a concentration in oral biology (p. 670).

Oral Health Research, Doctor of Philosophy (Ph.D.)

The Ph.D. in Oral Health Research prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and oral biology. Students will select a research project from one of three main areas of focus:

- Cancer and developmental biology of the head and neck
- Infection and immunology in diseases of the head and neck
- Tissue engineering, stem cells and new materials for the orofacial region

These areas correspond to the critical areas identified by the National Institute for Dental and Craniofacial Research. The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated not only with programs and departments within the Philips Institute for Oral Health Research within the School of Dentistry, but also the VCU Massey Cancer Center and VCU's College of Engineering.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

Student learning outcomes

- Graduates will have acquired fundamental knowledge of oral health research and strength in cutting-edge research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.
- Graduates will have an understanding of the structure, function and development of tissues of the oral and craniofacial region.
- Graduates will be able to evaluate molecular mechanisms associated with head and neck cancer and design research programs to improve treatment.
- Graduates will be able to evaluate infectious and immune diseases of the head and neck and design research programs to improve treatment.

- Graduates will be able to evaluate the use of bioengineering for diseases of the head and neck and design research programs to improve treatment.
- Graduates will have developed strong practical foundations on which to build research careers.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Fall | | |

Special requirements

- Applicants whose native language is not English must submit satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL. These scores should be 80 minimum for Internet-based tests, 213 minimum for computer-based tests and 550 minimum for paper-based tests.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- A minimum GPA of 3.0 on a 4.0 scale
- A personal statement, which should include long-term career goals to assess reasons behind the candidate's application; how a Ph.D. helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
- A current resume or curriculum vita
- Three letters of recommendation that speak to the scientific competency and experience of the applicant

Degree requirements

For students with a B.S. degree, the Ph.D. in Oral Health Research will require the completion of a minimum of 102 credits, including a minimum of 35 didactic credit hours comprising seven required courses (12 credits), six core courses (15 credits) and additional electives (eight credits). The remaining 67 credits (at minimum) will be taken in research courses.

Students entering the program with an M.S. will be required to complete a minimum of 81 credits, including a minimum of 23 didactic credit hours comprising six core courses (15 credits) combined with electives (eight credits). These students must also complete the research requirements for a minimum of 58 credits.

Students entering the program with a D.D.S or D.M.D. will be required to complete a minimum of 84 credits, including a minimum of 24 didactic credits comprising five required course (six credits), four core courses (10 credits) and electives (eight credits). These students must also complete the research requirements for a minimum of 60 credits.

Curriculum requirements for students entering with a B.S.

| Course | Title | Hours |
|---|---|------------|
| Required courses | | |
| BIOC 530 & BIOC 531 & BIOC 532 & BIOC 533 | Biochemistry, Cell and Molecular Biology Module 1: Protein Structure and Function and Biochemistry, Cell and Molecular Biology Module 2: Basic Metabolism and Biochemistry, Cell and Molecular Biology Module 3: Central Dogma of Molecular Biology and Biochemistry, Cell and Molecular Biology Module 4: Lipids/Membranes and Bioenergetics | 5 |

D.D.S.-Ph.D. opportunity

Students with an interest in academic and research careers are afforded the opportunity to undertake advanced degree training while in dental school by combining doctoral study in oral health research with a professional degree in dentistry. The program seeks to train students interested in translating oral research to the clinic. These clinician-scientists will help bridge the gap between basic and clinical science in the field of dentistry. For more information, see the dual degree program page (p. 50).

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 70) for additional details.

Oral Health Research, Doctor of Philosophy (Ph.D.) with a concentration in bioengineering

The Ph.D. in Oral Health Research with a concentration in bioengineering prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and tissue. Students will develop an understanding of the mechanism of craniofacial tissue damage and healing, and develop therapeutics to regenerate the hard and soft tissue in dental and craniofacial areas.

The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated with the Philips Institute for Oral Health Research and the College of Engineering.

Ph.D. students are expected to enroll as full-time graduate students in the core Ph.D. program. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser, select their concentration and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

Student learning outcomes

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate**

School website and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Fall | | |

Special requirements

- Applicants whose native language is not English must submit satisfactory scores from a standardized test commonly used and deemed appropriate for evaluation of English language proficiency, such as the TOEFL. These scores should be 80 minimum for Internet-based tests, 213 minimum for computer-based tests and 550 minimum for paper-based tests.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- A minimum GPA of 3.0 on a 4.0 scale
- A personal statement, which should include long-term career goals to assess reasons behind the candidate's application; how a Ph.D. helps

achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration

- A current resume or curriculum vita
- Three letters of recommendation that speak to the scientific competency and experience of the applicant

Degree requirements

For students with a B.S. degree, the Ph.D. in Oral Health Research will require the completion of a minimum of 102 credits, including a minimum of 35 didactic credit hours comprising seven required courses (12 credits), six core courses (15 credits) and additional electives (eight credits). The remaining 67 credits (at minimum) will be taken in research courses.

Students entering the program with an M.S. will be required to complete a minimum of 81 credits, including a minimum of 23 didactic credit hours comprising six core courses (15 credits) combined with electives (eight credits). These students must also complete the research requirements for a minimum of 58 credits.

Students entering the program with a D.D.S or D.M.D. will be required to complete a minimum of 84 credits, including a minimum of 24 didactic credits comprising five required course (six credits), four core courses (10 credits) and electives (eight credits). These students must also complete the research requirements for a minimum of 60 credits.

Curriculum requirements for students entering with a B.S.

| Course | Title | Hours |

D.D.S.-Ph.D. opportunity

Students with an interest in academic and research careers are afforded the opportunity to undertake advanced degree training while in dental school by combining doctoral study in oral health research with a professional degree in dentistry. The program seeks to train students interested in translating oral research to the clinic. These clinician-scientists will help bridge the gap between basic and clinical science in the field of dentistry. For more information, see the dual degree program page (p. 50).

Program website: dentistry.vcu.edu/programs/oralhealthphd (<http://dentistry.vcu.edu/programs/oralhealthphd/>)

Oral Health Research, Doctor of Philosophy (Ph.D.) with a concentration in infection and immunology

The Ph.D. in Oral Health Research with a concentration in infection and immunology prepares students for research-oriented careers as independent scientists in academia, government and industry. The curriculum is specifically designed to provide a strong foundation in biochemistry, molecular biology and microbiology. Students will develop an understanding of the molecular mechanisms of microbial disease initiation and progression with the goal of developing new approaches to prevent and treat oral and systemic diseases caused by the oral microbiome.

The program emphasizes independent research culminating in the conduct of an original research project under the supervision of a faculty adviser. Participating faculty are associated with the Philips Institute for Oral Health Research and the School of Medicine.

Ph.D. students are expected to enroll as full-time graduate students in the core Ph.D. program. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser, select their concentration and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates will have acquired the necessary methods, techniques and critical-thinking skills to become the next generation of scientific leaders.

Student learning outcomes

- Graduates will have acquired fundamental knowledge of oral health research and strength in cutting-edge research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.
- Graduates will have an understanding of the structure, function and development of tissues of the oral and craniofacial region.
- Graduates will be able to evaluate infectious and immune diseases of the head and neck and design research programs to improve treatment.
- Graduates will have developed strong practical foundations on which to build research careers.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Advanced Dental Education

TBD

Director, continuing education

Patrice N. Gray

Director, marketing and continuing education

Office of Continuing Education

For every professional person who serves the health sciences, education must be a lifetime commitment.

Graduation from dental school is the beginning of a lifelong educational experience for the serious, conscientious student of dentistry. Regardless of how well-prepared a health professional may be at the time of graduation, the adequate knowledge of yesterday is often insufficient information for today and tomorrow. With the rapid advancements made in dental technology and techniques, the professional must constantly seek new knowledge if the health care provider is to improve the health care given to patients.

Although the majority of continuing education courses are presented at the School of Dentistry, some are offered in other locations. The courses, which vary in length from one to four days, are scheduled throughout the year and consist of a variety of instructional methods from didactic to hands-on participation in clinical programs.

The instructional staff comprises faculty from the VCU School of Dentistry, guest lecturers from other dental schools and members of the dental profession and related professions from the United States and other countries.

Advanced Dental Education programs

The School of Dentistry provides advanced dental education programs in the areas of endodontics, oral and maxillofacial surgery, orthodontics, pediatric dentistry, periodontics and advanced education in general dentistry. Satisfactory completion of the program leads to the award of a certificate of training and certifies eligibility for examination by the appropriate specialty board. All programs are accredited by the Commission on Dental Accreditation of the American Dental Association. Those enrolled in the advanced education programs are full-time resident trainees, considered to be the equivalent of full-time students. Under special circumstances, trainees may be accepted into some programs on a part-time basis.

Students enrolling in endodontics, orthodontics, pediatric dentistry and periodontics also are awarded a Master of Science in Dentistry degree upon completion of the requirements for the certificate and successful defense of a thesis. The certificate program and Master of Science in Dentistry degree must be completed concurrently. See the School of Dentistry graduate program for more information on the Master of Science in Dentistry degree program.

Applications for admission should be directed to the director of the appropriate program, School of Dentistry, Virginia Commonwealth University, Box 980566, Richmond, VA 23298-0566. Successful

completion of Part II of the National Board Dental Examination is required prior to admittance to the program.

Advanced Education in General Dentistry

Matthew Pelais, D.D.S.

Program director

The purpose of this 12-month advanced dental education residency program is to provide advanced education and clinical experience to prepare dental school graduates for a career in the practice of comprehensive, general dentistry. This program has a strong emphasis on treatment planning, experience with new technology, developing skills in aesthetic dentistry and restoration of dental implants. Graduates of this program will have attained added competency and confidence in all areas of dental care, practice management and professional responsibility. Further, this program provides residents with meaningful experiences in the delivery of dental care to diverse populations and people at high risk for dental disease. A strong affiliation exists between the School of Dentistry and the statewide Virginia Area Health Education Center, whose mission is to increase primary health care in underserved areas. The AEGD program works in concert with AHEC to deliver dental care and recruit/train minority health care providers from health professional shortage areas.

The School of Dentistry is committed to advanced dental education. The residents will receive hands-on experience with diagnostic and therapeutic care of special patient populations in addition to extensive training in the art and science of general dentistry. AEGD residents may be required to participate in off-site clinical experiences outside the city of Richmond, Virginia. Funds will be provided for travel and lodging when required.

Eligibility and selection

Dentists with the following qualifications are eligible to apply for the AEGD program: Dental graduates from institutions in the United States accredited by the Commission on Dental Accreditation of the American Dental Association and who have passed Part I of the National Board Examination.

Selection criteria include didactic and clinical achievements, extramural experience, interpersonal skills and a demonstrated commitment to pursue a career in general dentistry. Every effort is made to recruit qualified applications from minority dentists and dentists from health professional shortage areas or dentists who profess a desire to serve in these areas. A selection committee consisting of the program director, the assistant dean for admissions, members from specialty areas, former residents and current residents will screen all applications. Using the above-mentioned selection criteria, the most promising applicants will be invited for personal interviews. Trainees and alternates will be selected. This program participates in the Postdoctoral Application Support Service Program. Phone (804) 828-3601; fax (804) 828-3159; email drhaselton@vcu.edu.

Endodontics

Garry L. Myers, D.D.S.

Program director

The advanced dental education program in endodontics offers the student a comprehensive 24-month course of study in clinical, didactic and research endodontics. The program is designed to educate qualified individuals to pursue careers as educators, researchers and practicing clinicians, and meets the educational requirements for limitation of practice to the specialty of endodontics and examination by the American

Board of Endodontics. The program is composed of several interrelated phases. The first phase consists of lecture courses that provide the student with a firm biological basis for patient care. The second phase consists of lectures, seminars and clinical training designed to produce clinical mastery of endodontics. The third phase is research experience gained through completion of an individual research project and master's thesis.

Students completing the program earn a specialty certificate in endodontics and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program conforms to the Standards for Advanced Specialty Education in Endodontics and carries a full approval status from the Commission on Dental Accreditation of the American Dental Association.

Oral and Maxillofacial Surgery

Robert A. Strauss, D.D.S., M.D.
Professor and program director

The oral and maxillofacial surgery program is designed to provide extensive didactic and clinical experience in all aspects of the specialty. Those who complete training satisfactorily fulfill the prerequisites for examination and certification by the American Board of Oral and Maxillofacial Surgery.

The didactic portion of the program includes formal courses in oral pathology, anatomy and physical diagnosis, as well as numerous weekly conferences and seminars. Clinical rotations on oral pathology, anesthesia, medicine, surgical oncology, neurosurgery, cardiology, general surgery, emergency room and the trauma services are used to supplement the trainee's surgical experience. Throughout the program there is a constant correlation of the clinical experience with the biomedical sciences.

Through the multiple clinical and didactic facilities of the VCU Medical Center complex, the McGuire Veterans Affairs Medical Center and St. Mary's Hospital, there is ample material for education in the latest oral and maxillofacial surgical techniques. The oral and maxillofacial surgery service is responsible for diagnosis and management of diseases and injuries related to the oral and facial region. Trainees are involved in all aspects of treatment including simple and complicated oral surgery, anesthesia and pain control, oral and maxillofacial trauma, pre-prosthetic surgery, orthognathic surgery, head and neck pathology, oral and maxillofacial reconstruction, temporomandibular joint surgery, laser surgery, cosmetic facial surgery, and microneural and microvascular surgery. During the four years, the trainee assumes ever-increasing responsibilities as time and abilities dictate.

Upon satisfactory completion of the four-year residency, the trainee may earn the Doctor of Medicine degree from the School of Medicine by enrolling in the second and third years of that curriculum.

Orthodontics

Bhavna Shroff, D.D.S.
Professor and program director

The Department of Orthodontics in VCU's School of Dentistry offers a 24-month advanced education in orthodontics and Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice. The curriculum is composed of seminars and small-group instruction

with emphasis on critical-thinking and problem-solving. Contemporary concepts of orthodontic treatment are reviewed for substantive and scientific content. Also included are regularly scheduled orthognathic surgery conferences and seminars with other dental and medical specialists.

The postgraduate program is designed to develop skilled practitioners who are prepared to grow with the future and manage busy orthodontic practices. The goal is not only to familiarize future orthodontists with contemporary techniques but also to teach them how to interpret cutting-edge scientific information and use it to approach clinical challenges logically and practically. Clinical experience consists of a wide variety of orthodontic patients, including complex cases requiring orthognathic surgery and patients with facial clefts and other craniofacial abnormalities. An original research experience is an integral part of the program, with each project intended to produce results suitable for publication in a nationally circulated orthodontic journal. The successful completion of a research project is a requirement of the program. All senior residents present their research at the Virginia Association of Orthodontists meeting. The program qualifies students to take the written portion of the American Board of Orthodontics examination in the senior year. Residents are required to take the written portion of the American Board of Orthodontics examination prior to graduation and are encouraged to continue and complete the board certification process. This exam is given prior to the American Association of Orthodontists meeting.

Students completing the program earn a specialty certificate in orthodontics and Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Pediatric Dentistry

TBD
Program director

The advanced education program in pediatric dentistry offers the student a comprehensive 24-month course of study in clinical and didactic pediatric dentistry. The program is designed to meet the educational requirements for limitation of practice to the specialty of pediatric dentistry and examination by the American Board of Pediatric Dentistry. The program emphasizes a diversified educational experience. The program places emphasis on all phases of pediatric dentistry including trauma, preventive dentistry, restorative, endodontics, periodontics, oral surgery, orthodontics and hospital dentistry. The program enables the student to provide comprehensive oral health care for the well child, the medically compromised and children with special needs. There is extensive use of various treatment modalities for pain control and behavioral management, such as sedation, analgesia and general anesthesia. Research experience is gained through completion of an individual research project and master's thesis.

Seminars are held in pediatric dentistry, orthodontic diagnosis and treatment, treatment planning, growth and development, cephalometric analysis, pediatric dentistry literature review, and behavior guidance. Formal courses in biostatistics, principles of pediatrics, pediatric advanced life support, head and neck anatomy, neurodevelopmental disabilities, leadership seminars, basic sciences and clinical core courses

are required. The students participate in undergraduate clinical teaching and supervision.

One-month rotations occur in general anesthesia, and two-week rotations occur in the pediatric emergency room and pediatric medicine. During the year, rotations in cleft palate, craniofacial anomalies and hemophilia occur. Optional elective rotations are available in treating institutionalized handicapped patients (in Lynchburg). Elective didactic courses also are available.

Students completing the program earn a specialty certificate in pediatric dentistry and a Master of Science in Dentistry degree. Students must complete the requirements for the master's degree prior to being awarded the specialty certificate.

The program is accredited by the Commission on Dental Accreditation of the American Dental Association.

Periodontics

Thomas C. Waldrop, D.D.S.

Professor and program director

The advanced education program in periodontics consists of a 36-month clinical and didactic curriculum leading to a certificate in periodontics. Students are responsible for all materials and make up of lost clinical time. Courses in the basic and clinical sciences, medicine, head and neck anatomy, statistics and advanced cardiac life support are required. Students are responsible for attending and preparing for lectures, current and periodontal literature, medical-oral medicine, treatment planning, case presentation and surgical seminars. No grade less than 80 percent or passing is acceptable from any periodontal or basic science course work. Less than passing grades may require retesting or retaking of a course. Students are expected to be able to utilize a computer to prepare lectures and to access Internet resources.

Students are responsible for documentation of clinical and course work data. Specified digital intra-oral camera and documentation of all clinical cases and department archiving is required. Students are responsible to the service for rotations in general medicine, dental anesthesiology and oral pathology. Proficiency and certification in intravenous conscious sedation is required. Students are responsible for clinical and classroom teaching to undergraduate and specialty students. Research on a topic that is reviewed and approved by a faculty committee is required. Upon completion of the research, the student is required to prepare a thesis, defense and manuscript for publication. Certificates are not awarded until completion of the Master of Science in Dentistry requirements. Students are responsible for the purchase of program-required equipment, instruments, books and all associated fees. All students are required to become student members of the American Academy of Periodontology.

Department of Endodontics

Clara M. Spatafore, D.D.S.

Chair

The Department of Endodontics is dedicated to providing quality endodontic dental care services as well as advancing new knowledge through teaching, research, community involvement and patient care. The faculty participate in the training of predoctoral dental students in the area of clinical endodontics. After an introduction to the specialty in their first year, students learn and develop didactic and treatment skills during preclinical classes and labs in the second year. Advanced topics and clinical techniques are stressed in the third year, which allows patient

treatment during the third and fourth years. In the fourth year, students are prepared for dental board examinations and are given the opportunity to treat a variety of clinical cases in both the School of Dentistry and off-site service-learning clinics.

Department of Orthodontics

Steven J. Lindauer, D.M.D., M.D.Sc.

Professor and chair

The Department of Orthodontics is dedicated to providing the best and latest care to patients, as well as offering the best preparation for graduate orthodontic residents. The department offers a 24-month advanced education Master of Science in Dentistry program. The program teaches state-of-the-art clinical care in an environment modeled after private orthodontic practice.

Department of Pediatric Dentistry

Duane Schafer, D.D.S., M.S.

Professor and interim chair

The vision of the VCU Department of Pediatric Dentistry focuses on the oral health of the growing and developing child and how oral health impacts the overall health of the individual, which in turn informs a multidisciplinary approach to prepare students and residents for a rapidly evolving health care environment. The VCU Department of Pediatric Dentistry is committed to clinical excellence, innovative educational initiatives and forging ahead with translational research.

Department of Periodontics

Sharon K. Lanning, D.D.S.

Professor and chair

Faculty in the Department of Periodontics participate in the training of predoctoral dental students by emphasizing the evidence-based underpinnings of contemporary periodontics while providing innovative educational instruction. The department also trains specialists in periodontics via its postgraduate program. Furthermore, faculty provide outstanding care to patients through VCU Dental Care, the faculty practice of the VCU School of Dentistry.

SCHOOL OF EDUCATION

The Virginia Commonwealth University School of Education prepares effective, highly skilled teachers, counselors, school administrators, higher education faculty and other education professionals committed to making a difference in the lives of children and adults and their communities, particularly in urban and high-need environments.

Located on the university's Monroe Park Campus, the School of Education has a strong commitment to social justice, diversity and inclusion among students, faculty and staff, as well as in its academic programs.

The School of Education offers six bachelor's programs, one undergraduate certificate, three undergraduate minors, seven master's programs, three doctoral programs, four post-baccalaureate certificates, one graduate certificate and two post-master's certificates.

The guiding theme of educator preparation programs in the School of Education is **educator as critically reflective practitioner**. Courses and experiences provide opportunities for individuals to be engaged in meaningful dialog about the nature and application of appropriate knowledge and skills to make instructional, assessment, counseling and leadership decisions that improve student learning.

The school has more than 130 teaching and research faculty, many of whom are internationally renowned experts who produce and disseminate scholarship that extends knowledge, improves practice and collaboration, and supports schools and educational and human service agencies.

Administration

1015 West Main Street
Box 842020
Richmond, Virginia 23284-2020
(804) 828-3382
Fax: (804) 828-1323
soe.vcu.edu (<http://www.soe.vcu.edu>)

Andrew P. Daire, Ph.D.
Professor and dean

Kathleen M. Rudasill, Ph.D.
Professor and senior associate dean for research and faculty development

Luciana C. de Oliveira, Ph.D.
Professor and associate dean for academic affairs

Tomika L. Ferguson, Ph.D.
Assistant professor and assistant dean for student affairs and inclusive excellence

Accreditation

Virginia Commonwealth University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate, master's and doctoral degrees.

Education (all degrees)

In addition to institutional accreditation, initial and advanced licensure programs maintain professional accreditation and/or approval. Initial

and advanced licensure degree programs are accredited by the National Council for Accreditation of Teacher Education and approved by the Virginia State Board of Education.

The educator preparation program is currently undergoing the process of obtaining accreditation through the Council for Accreditation of Educator Preparation.

Counselor education

Accredited by the Council on Accreditation of Counseling and Related Educational Programs

This accreditation applies to both the K-12 school counseling concentration and the college counseling and student affairs concentration.

Organization

The chief administrative office for the School of Education is Oliver Hall, Room 2090. The dean is responsible for the overall operation of the school, while two associate deans and one assistant dean (associate dean for academic affairs, associate dean for research and faculty development, and assistant dean for student affairs and inclusive excellence) assist in the school's administrative functions.

The school contains four academic departments: Counseling and Special Education, Educational Leadership, Foundations of Education, and Teaching and Learning. The school also supports a number of centers and institutes, including:

- Center for Innovation in STEM Education
- Center for Teacher Leadership
- Child Development Center
- International Educational Studies Center
- Metropolitan Educational Research Consortium
- Minority Educator Recruitment, Retention and Equity Center
- Partnership for People with Disabilities
- Rehabilitation Research and Training Center
- The Literacy Institute at VCU

Facilities

The School of Education is housed primarily in Oliver Hall, where classroom, laboratory and activity centers, as well as faculty and administrative offices can be found. Clinical laboratories are located at 3600 W. Broad St. The affiliated centers have various locations close to the Monroe Park Campus.

Support/resource offices

The School of Education has several offices that provide support services to students and faculty. These offices include the Office of Graduate Studies, Student Services Center, Office of Assessment, Office of Enrollment Management, and Instructional Technology Services.

Office of Graduate Studies

The Office of Graduate Studies assists all departments with admission, matriculation, graduation, and special actions and appeals for graduate students. The office also supports and guides students throughout

their graduate program, fostering a learning community that enhances students' professional development.

Student Services Center

The Student Services Center provides support for teacher education and counselor education students as they progress through their academic programs. Services include:

- Advising for students in extended teacher preparation, post-baccalaureate, counselor education and special education programs prior to formal admission to graduate programs
- Processing of applications for admission to teacher preparation programs
- Processing of applications for clinical placements and coordinating for practica, student teaching, internships and externships in local school divisions and educational facilities
- Processing applications for licensure in Virginia and other states
- Providing general program and course information
- Assigning faculty advisers
- Entering, retrieving and managing data to document student progress through academic programs
- Serving as a repository of information on comprehensive examinations, application and forms for academic transactions, admission to teacher preparation, clinical experiences, and licensure

Office of Assessment

The Office of Assessment collects and analyzes data on current candidates and graduates. This information is used to evaluate and improve the education programs in the School of Education and its partners in the College of Humanities and Sciences and the School of the Arts.

Office of Enrollment Management

The Office of Enrollment Management supports all incoming prospective students and provides resources, support and engagement opportunities throughout the application process. This team works with external partners to support community-driven needs with a focus and passion for supporting licensure and non-licensure pathways to education careers.

Information Technology Services

The Information Technology Services center provides support and training for faculty, staff and students in the School of Education for various technology resources. The ITS houses both Mac and PC laptops, Chromebooks, netbooks, digital cameras, Promethean board accessories, mobile devices and more for use and checkout by faculty, staff and students. The office provides technical assistance to faculty and staff to assure that issues in using technology are quickly resolved. The center also coordinates two technology resources:

- **Digital playgrounds (rooms 3107 and 3108)**

Digital playgrounds provide space and equipment that facilitate many opportunities to learn about incorporating computer-assisted instruction in the classroom. The digital playground in Room 3107 is equipped with several computers connected for use of pay-4-print services for students. Both rooms are equipped with smartboards, Promethean boards, 3-D printers, 3-D scanners and more for students to “play” with to develop more effective instruction.

Technology devices can be checked out from ITS for use in these areas.

- **Distance-learning technology**

The ITS also supports three rooms in Oliver Hall with distance-learning technology and provides ongoing assistance to faculty, preservice teachers and staff in the School of Education.

Licensure and reciprocity

Upon completion of degree requirements in any of VCU's teacher preparation programs and with the recommendation of the School of Education, students are eligible to receive initial or advance teacher licensure from the Virginia Department of Education. For additional information on licensure, licensure renewal or an add-on endorsement, contact the School of Education's Student Services Center or the Virginia Department of Education.

In Virginia, licensure requires successful completion of state-mandated tests. Passing scores on these tests are required to progress through different portions of the licensure programs from admission to teacher preparation, admission to student teaching and recommendation for licensure. For a list of testing requirements, please refer to the Students Services Center (<https://soe.vcu.edu/current-students/student-services-center/>) section on the School of Education website.

Graduate programs leading to initial teacher licensure

Individuals may decide to pursue a teaching career after they have completed a baccalaureate degree. VCU serves qualified individuals through approved programs leading to a Master of Teaching or Master of Education (special education). Upon completion of a degree program, graduates are eligible for both Virginia licensure and/or endorsement in the specific degree area.

The Master of Teaching program integrates undergraduate course work for a bachelor's degree in a liberal arts or science major with course work and graduate study leading to a Master of Teaching in a program area.

Individuals who wish to obtain licensure in art education or music education should consult the School of the Arts section of this bulletin.

Approved programs and certification reciprocity

All of VCU's initial and advanced educator preparation programs are approved by the Virginia Department of Education and lead to recommendation for a Virginia Professional License. Furthermore, our educator preparation degrees are accredited by the Southern Association of Colleges and Schools and the National Council for Accreditation of Teacher Education. VCU's School of Education also holds membership in the American and Virginia Associations of Colleges for Teacher Education and the Holmes Partnership.

Based on the National Association of State Directors of Teacher Education and Certification agreement, VCU graduates may be eligible for teacher licensure reciprocity with other states. Please be aware that requirements for licensure vary from state to state. Students interested in licensure reciprocity should contact the School of Education's Student Services Center or the Department of Education Office in the future hiring state.

If a student plans to be in a state other than Virginia while completing an online program at VCU, please note that state regulations in every state

determine whether VCU may offer a place in a course or program. VCU participates in the National Council of State Authorization Reciprocity Agreements, which allows students from NC-SARA-approved states to enroll in VCU's degree programs. All VCU licensure programs lead to a recommendation for a Virginia educator's license. Please also note that as a VCU student enrolled in an online program, all universitywide policies, as well as School of Education policies, would apply. For additional information regarding out-of-state licensure reciprocity, please visit the Office of the Provost's professional licensure disclosures webpage (<https://provost.vcu.edu/academics/accreditation/disclosures/>).

Programs

Master of Teaching (extended programs)

- Early and elementary education
- English education
- History/social studies education
- Mathematics education
- Science education

Master of Education

- Adult learning
 - Adult literacy
 - Human resource development
 - Instructional design and technology
- Counselor education
 - College counseling and student affairs
 - Couples and family counseling
 - School counseling
- Curriculum and instruction
 - Teaching and learning
- Educational leadership
 - Administration and supervision
 - Leadership studies
- Reading
 - K-12 reading specialist
 - Reading with TESOL/adult
 - Reading with TESOL/K-12
 - Without concentration
- Special education
 - Early childhood
 - General education
 - Severe disabilities

Ed.D.

- Leadership

Ph.D.

- Education
 - Art education
 - Counselor education and supervision
 - Curriculum, culture and change
 - Educational leadership, policy and justice
 - Educational psychology

- Research, assessment and evaluation
- Urban services leadership
- Special Education

Graduate certificate

- Teaching elementary education

Post-baccalaureate graduate certificates

- Disability leadership
- Medical education
- Teaching English to speakers of other languages

Post-master's certificates

- Educational leadership
- Reading specialist

Extended Teacher Preparation Program

The School of Education, in cooperation with the College of Humanities and Sciences, offers extended teacher preparation programs in early childhood and elementary education (prekindergarten through grade six) and secondary education (grade six through grade 12). The successful completion of these programs results in the simultaneous awarding of both a bachelor's and a master's degree.

General degree requirements

The successful completion of these programs results in the simultaneous awarding of both a bachelor's and a master's degree. Prospective Master of Teaching students earn their bachelor's degree in a specific field in which they plan to teach. A student generally begins work on the professional studies component in the third or fourth year of academic study.

A student enrolled in the extended teacher preparation program must complete a minimum of 153/154 credits. The student must maintain a cumulative GPA of 2.8 for admission to the teacher preparation program. Completion of at least 90 credits with a minimum GPA of 3.0 in the last 60 semester hours of study is required for that student to be admitted to the graduate studies portion of the extended program.

A post-baccalaureate graduate Certificate in Teaching is open primarily to those who have already earned a master's degree. The candidate must complete at least 30 additional hours beyond the bachelor's level. Admittance to this program requires a minimum GPA of 3.0 in the last 60 semester hours of study.

Clinical experiences

All initial licensure programs require clinical experiences throughout the program. During the initial stages of a program, these experiences occur as practica in varied placements in K-12 education relevant to the student's program. The program also requires a capstone clinical experience in the form of student teaching. For student teaching, those pursuing early and elementary education are placed in two settings, one in early elementary grades (K-2) and one in upper elementary grades (3-5). Those pursuing secondary education receive a single placement in their discipline in a middle school or high school setting.

With the guidance of a clinical faculty member or cooperating teacher, the intern assumes more independence in the field setting. Satisfactory completion of the internship and the preceding training is charted

through evaluations made by the university supervisor, clinical faculty or cooperating teacher, and school administrator.

Undergraduate major

Freshman students who plan to become early and elementary education teachers through the extended teacher preparation pathway are required to enroll in the Bachelor of Interdisciplinary Studies liberal studies for early and elementary education major. Transfer students should meet with a B.I.S. adviser prior to course registration. The B.I.S. degree requirements are outlined in the College of Humanities and Sciences section of this bulletin.

Prospective secondary teachers should major in the discipline they wish to teach. The disciplines in which VCU offers licensure programs are as follows: English, history/social studies, mathematics and science (various specialties). Students should consult with their education adviser to ensure that courses taken to meet major requirements also meet state licensure requirements.

For the traditional, four-year pathway, students should review admissions and program information for the Bachelor of Science in Education program. See details on the School of Education website (<https://soe.vcu.edu/academics/undergraduate-programs/>).

Change of major and transfer students

Students wishing to enter the Extended Teacher Preparation Program in early and elementary education or secondary education must transfer initially to the College of Humanities and Sciences. They must declare a major in the college and a specialization in the appropriate professional studies sequence in the School of Education.

For admission to teacher preparation, a minimum GPA of 2.8 is required. A minimum GPA of 3.0 in the last 60 semester hours of study is required for admission to the graduate phase of the Extended Teacher Preparation Program.

Transcript evaluation

The College of Humanities and Sciences evaluates transcripts of students pursuing the extended program in early and elementary education or secondary education. Credits are accepted if they conform to specific program guidelines; course equivalents from accredited colleges and universities are accepted if the grade earned is a minimum of C. From the extended program, 60 semester hours of acceptable undergraduate course work are required to be admitted to a teacher preparation program. See specific criteria in the admission information below.

Credits that are accepted from two-year institutions may meet liberal arts and sciences requirements, but will not meet professional requirements for upper-division course work. The VCU Transfer Guide for Virginia Community Colleges lists, in full, credits accepted by VCU that have been earned in the state's community colleges.

After the initial student transcript evaluation, the assigned adviser reviews the accepted transfer credits with the student, determining what additional course work will be necessary at VCU to address state licensure requirements. An adviser is not required to use all the accepted transfer credits in a student's program of study. Only those credits approved for transfer can be applied toward the chosen degree.

Faculty advisement

An academic adviser is assigned to a student by the department of that student's chosen major in the College of Humanities and Sciences. A professional studies adviser is similarly assigned by the Department of Teaching and Learning according to the student's proposed teaching endorsement. This adviser-student relationship continues throughout the course of study at VCU. Student and adviser jointly develop the student's individual program. During the planning process, the student identifies, clarifies and explores his or her personal and professional goals.

Educator as reflective practitioner

The guiding theme of the teacher preparation program is "educator as reflective practitioner." The underlying foundation of instruction in the teacher preparation program is to challenge the prospective teacher to develop skills in critical reflection and to value thoughtful decision-making. Candidates demonstrate critical reflection by: being open to and respectful of all stakeholders; taking other perspectives into account; utilizing critical-thinking in framing and solving educational problems; making informed, ethical and professional decisions; and taking ethical and professional action.

Demographics consideration in teaching

The demographics of elementary, middle and high school students are changing. There is an increase in the number of students for whom English is not the first language, of minority students, of students who do not all learn or respond in similar ways and of students who may be identified as possessing a disability.

Future teachers are encouraged to take advantage of opportunities through formal courses and other experiences to gain greater insight and ability in addressing learners from differing cultural backgrounds and considering the needs of learners with different learning styles, participation styles, and special abilities or disabilities.

Standards of learning

Much of the prekindergarten through grade 12 curriculum is based on the commonwealth of Virginia's current Standards of Learning. Students preparing to be teachers are advised to examine the SOLs for the grade levels and content areas they plan to teach. The School of Education website has a link to the SOLs.

In some instances the content and concepts associated with one or more SOLs may be incorporated in a course in the College of Humanities and Sciences or in the School of Education, but as the SOLs are for a kindergarten through grade 12 curriculum and not a college curriculum, one may need to study several of these on her or his own.

Technology standards

The use of computers, graphing calculators, science probeware and other technologies is integral to successful teaching in today's schools. Individuals preparing to teach must be competent on each of the eight standards in Virginia's Technology Standards for Instructional Personnel. These standards may be reached through the School of Education website.

Students are advised to consult with the professional studies adviser regarding the program's requirements for demonstrating competence. Several of the standards may be documented as met by passing the Computer Literacy Examination offered online through Knowledgenet. Please see the general education requirements for undergraduate study

(<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/undergraduate-information/>) in the College of Humanities and Sciences section of this bulletin.

Extended program in early and elementary or secondary education

In the extended program, a student generally begins work on the professional studies component in the third year of study. A student in the extended program must maintain a minimum cumulative GPA of 2.8 for admission to teacher preparation and clinical experience and, prior to the fifth year, a minimum GPA of 3.0 for admission to the graduate study portion of the program.

Admission information

Any undergraduate admitted to VCU who declares a major in the College of Humanities and Sciences is eligible to declare a specialization in secondary education. Students specializing in early and elementary education must declare the liberal studies for early and elementary education major in the Bachelor of Interdisciplinary Studies program.

Transfer students and students currently attending VCU who wish to change their majors to this program must have a minimum GPA of 2.0; however, note the much higher GPA requirement for admission to teacher preparation and then to graduate study. All students in the program, upon completion of 60 hours of undergraduate course work and prior to completion of 90 hours, must apply for admission to teacher education. To be accepted, a student must have a minimum GPA of 2.8 and must have achieved satisfactory scores on the Scholastic Aptitude Test, the American College Test or the Graduate Record Examination.

Students who pursue one of the extended teacher preparation programs follow a series of steps as noted in order to meet all requirements, including the 153/154 credits.

Step 1: Admission to the university

Requirements

1. Scores from Scholastic Aptitude Test or American College Test
2. Minimum 2.0 GPA from high school or previous college

Procedures

1. Declare an undergraduate major in the College of Humanities and Sciences for early and elementary or secondary education.
2. Declare an education specialization in early and elementary education or secondary education.

Step 2: Admission to teacher preparation

Complete before enrolling in the first practicum (upon completion of 60 credits of liberal arts and prior to completion of 90 credits).

Requirements

1. Minimum GPA of 2.8
2. Completion of six hours of English, three hours of mathematics, four hours of laboratory science and six hours of social science and/or history
3. Achieve satisfactory scores on the SAT, ACT or GRE (scores must be less than 5 years old) [**Note:** In addition, a passing score on the Virginia Communication and Literacy Assessment must be achieved for state licensure.]
4. Confirmation of education specialization (Undecided majors **must** choose a major prior to admission to teacher preparation.)

5. Enroll in or have completed TEDU 101, EDUS 300, EDUS 301 or equivalent course

Procedures

1. Complete admission to teacher preparation application form (obtain in Office of Student Services) and submit a current transcript.
2. Complete TEDU 101, EDUS 300, EDUS 301 or equivalent course.
3. Register for practicum placement and accompanying courses. (**Note:** Students must be admitted to the teacher preparation program to be eligible for practicum placement and accompanying courses. Applications for practicum are available at the Student Services Center. In secondary education, these applications may be distributed at the initial class meeting.)
4. Register for, take and submit required GRE assessment results if sufficient SAT or ACT scores are not available; additionally, passing VCLA scores must be submitted for state licensure requirements. All assessments must be fewer than 5 years old to be used for the application to teacher preparation.

Step 3: Application to graduate studies

Requirements

1. Minimum GPA of 3.0
2. Acceptable scores on the SAT, ACT or GRE which are fewer than 5 years old. Applicant scores represent the top 50 percent of national test takers on the SAT, ACT or GRE in math and reading. General benchmark cohort averages include:
 - a. SAT: math – 533; reading – 543
 - b. ACT: math – 21; reading – 21
 - c. GRE: math – 153; reading – 151
3. Statement of intent addressing reasons for seeking graduate education, including career goals; experience working with age group to be taught; reasons for entering teaching; and success in organizing, planning and implementing work with other individuals
4. Three references: it is suggested that these be instructors or advisers in the College of Humanities and Sciences and the School of Education; use graduate studies reference forms
5. Application fee

Procedures

1. Obtain Graduate School admissions information online (<https://www.vcu.edu/admissions/apply/graduate/>).
2. Complete the Graduate School admissions application online and submit all required materials.
Note: Students must be admitted to the Graduate School to be eligible to enroll in graduate-level courses. No more than six graduate credits taken prior to admission to graduate study may be accepted toward the degree.

Application deadlines for early and elementary or secondary education

- Oct. 1 for spring semester
- Feb. 1 for summer and fall sessions

Step 4: Clinical internship application

All programs require a graduate-level internship (TEDU 672 and TEDU 674) during the fifth year. Applications for internship can be obtained in the Student Services Center in Room 1037, Oliver Hall. Individuals in early and elementary education are placed in a kindergarten and a grade one through six classroom in the same semester. Individuals in secondary education typically have a single placement, although perhaps with two different teachers.

Requirements

1. Minimum 3.0 GPA on graduate courses
2. Admission to teacher preparation and to graduate study
3. Completed application and transcripts submitted by established deadlines
4. Passing score on applicable Praxis II specialty test(s) accompanying application
5. Passing score on the Virginia Communication and Literacy Assessment
6. Passing score on the Reading for Virginia Educators test (required for elementary and special education certification only)
7. Criminal background check without a felony conviction

Procedures

1. Obtain application form from the Student Services Center
2. Submit copies of transcripts and required statement to a professional studies adviser for review
3. Obtain approval signature of professional studies adviser
4. Submit completed application to Student Services Center by Sept. 1 for the following spring semester, by Feb. 1 for the following fall semester

Step 5: Admission to the profession

(during the final semester of enrollment)

Requirements

1. Completion of all degree requirements
2. Completion of application for initial teacher licensure (obtain from the Virginia Department of Education website (<http://doe.virginia.gov/teaching/licensure/index.shtml/>))
3. Submit the completed application for initial teacher licensure with the required documents to the Student Services Center

Procedures for graduation check-out

Complete the "Apply to Graduate" procedure on eServices (<https://my.vcu.edu/>) for the undergraduate degree in humanities and sciences and the graduate degree in teaching.

Added or add-on endorsements**Added or add-on endorsements Teaching English as a Second Language**

The School of Education offers the Virginia Department of Education ESL preK-12 endorsement for pre-service and in-service teachers. The ESL endorsement program at VCU requires 18 credit hours of ESL course work and six credit hours of a modern foreign language. Candidates must complete the following courses:

| Course | Title | Hours |
|--------------------|--|-------|
| ENGL/LING/TEDU 552 | Teaching English as a Second Language | 3 |
| FRLG 575 | Intercultural Communication | 3 |
| LING/ENGL/ANTH 390 | Introduction to Linguistics | 3 |
| TEDU 561 | Reading Foundations: Sociological/Psychological Perspectives | 3 |
| TEDU 562 | Reading Instruction in the Content Areas | 3 |

| | | |
|--|---|-----------|
| TEDU 681 | Investigations and Trends in Teaching (ESL curriculum and assessment) | 3 |
| Foreign language courses (modern languages only) | | 6 |
| Total Hours | | 24 |

Add-on endorsements in grades 6 through 12, science

Add-on endorsements in science are available in biology, chemistry, earth science and physics. Each add-on requires a first endorsement in one science and at least 18 semester hours in the add-on science that includes preparation in specified areas. The earth science added endorsement is listed below. For information about the added endorsements in biology, chemistry or physics, contact the Department of Teaching and Learning.

Earth science

To add an earth science endorsement to an endorsement in another science discipline, the individual must earn at least 18 semester hours in the earth sciences, including preparation in geology, oceanography, meteorology and astronomy. Courses to meet these requirements include:

| Course | Title | Hours |
|---|--|-------|
| ENVS 105 & ENVZ 105 | Physical Geology and Physical Geology Laboratory | 4 |
| ENVS 335 & ENVZ 335 | Environmental Geology and Environmental Geology Laboratory | 4 |
| ENVS 401 | Meteorology and Climatology | 3 |
| ENVS 411 | Oceanography | 3 |
| PHYS 103 | Elementary Astronomy | 3 |
| Elective courses to complete at least 18 hours include: URSP 203 and URSP 204 and PHYS 391. | | |

Education, Doctor of Philosophy (Ph.D.) with a concentration in art education**Program goal**

The art education concentration allows students to connect contemporary art and education theories and philosophies, practical and professional experiences, and impact research to develop an area of expertise relevant to the field of art education. The program distinguishes itself by integrating urban community engagement, digital and emerging media, and research and assessment in diverse settings. Graduates will be highly qualified to serve in teaching, research and leadership positions at universities and in arts and education organizations.

Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.

2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Summer or fall | Jan 15 | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Master's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the **School of Education website** for further information.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Department of Counseling and Special Education

Donna M. Gibson, Ph.D.
Professor and chair

The Department of Counseling and Special Education blends top-tier, accredited programs in counselor education and special education and disability policy to create a unique, interdisciplinary academic environment for students and faculty. The department's primary mission is to prepare graduates to be leaders, ready to make a difference in people's lives. Courses emphasize applicable learning, incorporating the practical tasks and situations students will be faced with on the job.

The nationally recognized faculty members provide guidance and support, allowing students to fully explore their areas of interest. The department provides the tools that help students examine, refine and

challenge current methods and scholarship and to use evidence-based research. Learn more by visiting the Department of Counseling and Special Education webpage (<http://www.soe.vcu.edu/departmentpages/counseling-and-special-education/>).

Counselor Education, Master of Education (M.Ed.) with a concentration in college counseling and student affairs

Program goal

The M.Ed. in Counselor Education with a concentration in college counseling and student affairs is a 60-credit-hour program designed to prepare counselors for higher education and community agencies throughout Virginia and the nation. The college counseling and student affairs concentration provides students with the specialized knowledge and skills necessary for employment as student affairs professionals in higher education settings. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

Student learning outcomes

Counselor education core outcomes

1. Students will obtain theoretical knowledge grounded in research and reflective of current national and state standards in the areas of individual and group counseling, human development, multicultural counseling, wellness and career counseling.
2. Students will develop the skills and knowledge to support and enhance students' and clients' resiliency from a multicultural framework.

3. Students will demonstrate the knowledge and skills to be critical consumers of research in their roles as counselors.
4. Students will develop and demonstrate advocacy, social justice and leadership skills through their professional development and extracurricular learning activities.
5. Students will continue their personal and professional development by adhering to the professional ethical codes of professional counseling organizations and the counselor education program dispositions.

College counseling and student affairs concentration specific outcome

1. Students will demonstrate competency in counseling, assessment, program evaluation and consultation skills in higher education settings.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

Students accepted into the counselor education program must make satisfactory progress toward their degrees. Students who earn unsatisfactory grades and/or exhibit unprofessional conduct may be terminated from the program. More specific information about satisfactory academic progress (p. 25) can be found in the academic regulations section of this website.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Summer or fall | Jan 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Personal interview

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-counselor-education/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 60 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirements: Students must complete approved internship.
4. Testing requirements: Students must provide acceptable score on the National Counselor Examination.

Counselor Education, Master of Education (M.Ed.) with a concentration in couples and family counseling

Program goal

The M.Ed. in Counselor Education with a concentration in couples and family counseling is a 60-credit-hour program designed to prepare students for careers as counselors in clinics, health care centers, schools and private practice. The program focuses on training to address a range of personal and professional problems faced by individuals, couples and families through a systemic framework. The course sequence meets the educational requirements for both the licensed professional counselor and licensed marriage and family therapist as set by the state of Virginia Department of Health Professions. The couples and family counseling concentration meets the licensure requirements for other states, however certain states have different requirements. It is the responsibility of the student to check with the state licensure board to verify the necessary requirements to be eligible for licensure and to plan on meeting those requirements. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

Student learning outcomes

Counselor Education, Master of Education (M.Ed.) with a concentration in school counseling

Program goal

The M.Ed. in Counselor Education with a concentration in school counseling is a 60-credit-hour program designed to prepare counselors for elementary, middle and high schools. The school counseling concentration leads to school counseling licensure and preparation for advanced graduate work at the post-master's level. The program requires a minimum of two years of study to complete.

The faculty makes every effort to assist students in individualizing a graduate program to match their professional needs and interests. However, individualization takes place in an environment of legitimate constraints revolving around institutional, accreditation and licensure requirements. Faculty members view each program as more than simply an aggregate of courses, and students should plan all program work with their faculty advisers.

Student learning outcomes

Disability Leadership, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Certificate in Disability Leadership is a 12-hour certificate program designed to prepare health professionals, special educators and other professionals in related disciplines in the field of childhood neurodevelopmental disabilities to be leaders in the health care system. The program provides a 12- to 24-month curriculum of didactic and Web-based courses, interactive seminars, clinical and community-based practica, a family mentorship experience and planned grassroots- and systems-level policy activities. To be eligible for admission, a student must be accepted into the Virginia Leadership Education in Neurodevelopmental Disabilities program.

Va-LEND is a collaboration among the School of Education (Partnership for People with Disabilities), the VCU School of Medicine (Department of Pediatrics) and the Virginia Department of Health (Title V Program). The LEND curriculum emphasizes all aspects of neurodevelopmental and related disabilities, the social environment (including ethnic and cultural issues), the interdisciplinary approach (systems of care), leadership (advocacy and public policy as well as administration) and research. Following completion of the program, the trainees will be able to serve as leaders in the field of child health and neurodevelopmental disabilities.

Student learning outcomes

1. Students will demonstrate an understanding of the nature and range of neurodevelopmental disabilities.
2. Students will demonstrate an understanding of the team approach to serving individuals with neurodevelopmental disabilities and their families.
3. Students will demonstrate an understanding of community services and resources available to individuals with neurodevelopmental disabilities and their families.
4. Students will demonstrate an understanding of their role as advocates for individuals with neurodevelopmental disabilities and their families.
5. Students will be involved in a leadership role with an organization serving individuals with neurodevelopmental disabilities and their families.

Program website: soe.vcu.edu/academics/certificates/disability-leadership (<https://soe.vcu.edu/academics/certificates/disability-leadership/>)

Education, Doctor of Philosophy (Ph.D.) with a concentration in counselor education and supervision

Program goal

The counselor education and supervision concentration is designed to prepare experienced, research-oriented master's-level counselors for academic positions focused on research, service, teaching and counselor education. Doctoral students will integrate theory, research and practice in areas of counselor supervision and training, counselor education and teaching, advanced counseling, diversity and multiculturalism, leadership, advocacy, and social justice.

Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.
2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement

in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.

4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section](#) for additional information on graduation requirements.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Fall | Jan 15 | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree from a CACREP-accredited program or related discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/phd-counselor-education/>) for further information.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Education, Doctor of Philosophy (Ph.D.) with a concentration in special education and disability leadership

Note: Admission to this program is permanently suspended prior to closure.

Special Education, Doctor of Philosophy (Ph.D.)

The Ph.D. in Special Education degree prepares the next generation of faculty members in the field of special education, with knowledge and skills in teaching, research and policy advocacy. The program provides instruction for preparing special education professionals to meet the diverse and complex needs of students with disabilities and their families, as well as strategies for developing programs that meet state licensure and accreditation requirements. The curriculum also provides students with a deep understanding of a range of different research methodologies and scholarly endeavors — including single case design, meta-analysis and grant proposal development — that are frequently

expected of faculty in special education. Lastly, the program develops students' policy advocacy skills to create future special education faculty who understand national, state and local policies that impact the lives of individuals with disabilities and their families; design research that addresses questions that policymakers have about best practices in special education; and share research findings with policymakers to improve policies designed to improve education and services for children and youth with disabilities. Students who graduate from the program will be prepared to develop and provide high-quality training to the next generation of special education teachers, conduct and disseminate rigorous research to inform the field, and advocate locally, nationally and internationally for the diverse and complex needs of students and individuals with disabilities and their families.

Student learning outcomes

1. Apply skills in external setting (internship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting in the areas of research, service, policy and teaching. The faculty adviser and the internship site supervisor work together to evaluate the student.
2. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting various research designs. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
3. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, the student is granted a Ph.D.

Special Education, Master of Education (M.Ed.) with a concentration in early childhood

Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Teacher candidates should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, severe disabilities or special education-general education.

The Master of Education in Special Education program with an early childhood concentration is a sequentially planned series of courses and clinical experiences designed to prepare individuals to work with young children, from birth through age 5, with developmental disabilities and their families. The courses are delivered using a blend of online and face-to-face formats. The program is learner-centered, innovative, interactive and collaborative. Through online discussions and face-to-face meetings with faculty members, community partners, student peers and program graduates, the ECSE teacher candidates have multiple opportunities to engage in interactive, proactive and dynamic dialogues.

Successful completion of the degree program qualifies candidates for teacher licensure with endorsement in early childhood special education by the Virginia Department of Education and initial early intervention certification. Candidates are prepared to intervene with infants and young children representing a wide range of abilities, including those at risk for developmental delays. As a result of training, candidates will be prepared to serve children and families in diverse and high-need communities in a variety of early intervention roles. The program can be completed in five semesters of full-time study or six semesters of part-time study.

In addition to course work, candidates create an electronic portfolio to showcase their knowledge, skills and dispositions in the special education early childhood curriculum.

Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach

- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Fall | Mar 15 | GRE |
| | Spring | Nov 1 | |
| | Summer | Mar 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- Bachelor's degree
- Three letters of recommendation addressing the student's potential for graduate study in education
- Statement of intent
- Transcripts of all previous college work
- Interview
- Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements.

Applicants who do not have a provisional or professional collegiate teaching license in special education must take **SEDP 630** as a prerequisite course.

Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

- Credit hour requirements: Students are required to complete a minimum of 37 credit hours.
- Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Program website: soe.vcu.edu/academics/masters-programs/med-special-education (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>)

Special Education, Master of Education (M.Ed.) with a concentration in general education

Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed. Successful completion of the degree program leads to endorsement in early childhood special education, severe disabilities or general curriculum.

The Master of Education in Special Education general education concentration, which can lead to an endorsement in the special

education general curriculum, is designed to prepare graduates with the professional knowledge and skills needed to work in a variety of settings.

1. General education classrooms (where children with special needs are being collaboratively taught)
2. Resource, modified resource or collaborative resource rooms
3. Self-contained settings or classrooms in varied urban, suburban or rural areas
4. Residential programs
5. Various community environments

Special training is provided in teaching reading and language, behavior management, and the use of interactive strategies that teach positive social skills. Candidates are prepared to work with students in completing a variety of transitions, such as from special education to the general education classroom or from high school to employment and independent living.

Through course work, the general education concentration will encompass broad concepts of education, research, development, related disciplines and special education to build a foundation of professional knowledge and understanding. Specialized courses develop the intensive diagnostic, remedial, decision-making and consultative skills and understandings required of a professional in a special education-general education setting, including the ability to recognize educational and social problems, to formulate effective individualized instructional interventions using a variety of methodologies and modifications, to incorporate accommodations and transitions into program plans and to consult productively with appropriate personnel in the development of maximum educational opportunities for students with high-incidence disabilities. In addition to course work, candidates will create an electronic portfolio that will showcase their knowledge, skills and dispositions in the special education general curriculum.

The program offers candidates the opportunity to complete clinical placements in their own classroom or school with approval from VCU faculty and supervision by trained personnel. Placement opportunities for clinical experiences include a range of public and private schools and mental health programs that allow graduate students to select field experiences that are consistent with their professional goals. Previous teaching experience is valued, but not required. Students will have the opportunity to complete a practicum in addition to the externship. When students complete the program, they are eligible for licensure by the Virginia Department of Education with an endorsement to teach students enrolled in special education, general curriculum in grades K-12. Candidates are offered the option of taking a full-time or an on-the-job externship for a semester.

Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

Special Education, Master of Education (M.Ed.) with a concentration in severe disabilities

Program goal

The Master of Education in Special Education program prepares graduates for work in one of three areas: early childhood, severe disabilities or general education. Applicants who do not already hold a teaching license must meet both licensure and degree requirements prior to the awarding of the Master of Education degree unless exempted as a professional from another discipline. Students should plan carefully with their adviser to ensure that the appropriate courses and experiences are completed.

The Master of Education in Special Education severe disabilities concentration is designed to prepare teachers to work with students in grades K-12 in public school settings. Throughout the program, emphasis is placed on person-centered planning, school and community inclusion, transdisciplinary teamwork and the role of the family. Successful

completion of the degree program leads to licensure endorsement in special education, adapted curriculum K-12.

Courses address physical and medical management issues, functional assessment strategies, longitudinal curriculum planning, systematic instruction, augmentative and alternative communication systems, assistive technology, transition from school to adulthood, positive behavioral supports and the special needs of students with physical, sensory and health-related disabilities, including autism spectrum disorder.

All core courses are offered through the Virginia Consortium for Teacher Preparation in Special Education Adapted Curriculum: Supporting Students with Severe Disabilities and Autism. Core courses are accessed through VCU. Students enrolled in the program complete a field-based externship in their school (if they currently serve students with severe disabilities) or in one of the many public schools in the Richmond area. A total of six credit hours of externship experience is spread throughout the course of study and is designed to meet the students' needs for professional development.

All candidates are required to submit a final portfolio as the capstone requirement of the program. Successful completion of the 42-credit-hour program results in eligibility for Virginia endorsement in special education, adapted curriculum in addition to the Master of Education degree.

Student learning outcomes

- Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
- Content:** Demonstrate knowledge of the subjects they will teach
- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Fall | Mar 15 | GRE |
| | Spring | Nov 1 | |
| | Summer | Mar 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Interview
6. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements.

Applicants who do not have a provisional or professional collegiate teaching license in special education must take SEDP 630 as a prerequisite course.

Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-special-education/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 42 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|--|-------|
| Foundations | | |
| EDUS/PSYC 607 | Advanced Educational Psychology for Elementary Teachers | 3 |
| EDUS 660 | Research Methods in Education | 3 |
| Core courses | | |
| SEDP 501 | Characteristics of Individuals with Disabilities | 3 |
| SEDP 533 | Assessment of Individuals with Disabilities | 3 |
| SEDP 601 | Instructional Methods and Programming for Individuals with Disabilities | 3 |
| SEDP 603 | Theories, Assessment and Practices in Literacy Development for Individuals with Exceptionalities | 3 |
| SEDP 631 | Behavior Support of Individuals with Disabilities | 3 |
| SEDP 700 | Externship | 6 |
| Concentration courses | | |
| IDDS 600 | Interdisciplinary Studies in Developmental Disabilities: Teamwork in Serving Persons with Developmental Disabilities | 3 |
| SEDP 531 | Educational Foundations for Collaboration and Universally Designed Learning | 3 |
| SEDP 600 | Language/Communication Intervention for Young Children and Individuals with Severe Disabilities | 3 |
| SEDP 632 | Transition Strategies for Students with Disabilities | 3 |
| SEDP 658 | Individualized Supports and Specialized Care of Students With Significant Disabilities | 3 |

Successful completion of SEDP 630 if candidate does not hold eligibility for a Virginia provisional special education teaching license

Successful completion of portfolio requirement

Total Hours 42

The minimum total of graduate credit hours required for this degree is 42.

Special Education K-12 Teaching, Certificate in (Post-baccalaureate graduate certificate)

The Certificate in Special Education K-12 Teaching will prepare provisionally licensed special education teachers to become fully licensed special education teachers who work with children with learning disabilities, emotional disturbance and mild to moderate intellectual disability. Students will be prepared to recognize a child's educational and social problems, to formulate effective individualized instruction, and to consult with parents, teachers and administrators to incorporate accommodations and transitions into the child's educational program. Graduates will be prepared to teach reading and language, behavior management, and social skills to students.

Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

Department of Educational Leadership

Whitney S. Newcomb, Ph.D.
Professor and chair

The mission of the Department of Educational Leadership is to prepare visionary scholars and leaders who promote equity, inclusiveness and justice across a variety of spheres.

The department achieves this mission through an interdisciplinary integration of theory, research and practice. Students engage in course work, activities and projects that promote a deeper understanding for providing equitable educational opportunities for inclusive communities.

Intensive study of general, PreK-12 and higher education leadership policy and practice offers students opportunities to examine complex issues across a variety of contexts. Students work alongside dedicated, diverse and internationally recognized faculty that foster learning environments centered on intellectual integrity and advocacy.

For more information consult the department's website. (<http://www.soe.vcu.edu/departmentspages/educational-leadership/>)

- Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice (p. 516)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision (p. 519)
- Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies (p. 521)
- Leadership, Doctor of Education (Ed.D.) (p. 522)
- Educational Leadership, Certificate in (Post-master's certificate) (p. 518)

Education, Doctor of Philosophy (Ph.D.) with a concentration in educational leadership, policy and justice

Program goal

The educational leadership, policy and justice concentration is designed to cultivate educational scholars and leaders who will advance scholarship, policy and practice related to equity and social justice. Drawing on an interdisciplinary study of leadership and policy, the program promotes an understanding of the many societal and organizational impediments to equal educational opportunity. This concentration is directed not only toward identifying and analyzing those injustices, but also toward imagining, researching and creating more equitable, inclusive schools, organizations and societies through leadership and policy. The dissertation is a rigorous culminating tool for research, advocacy and change within educational organizations and endeavors. Graduates will be prepared to lead for equity in K-12 organizations, higher education, research and policy think tanks or local, state and federal policymaking institutions.

Student learning outcomes

- Complete an original research study: dissertation component – Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student

work. Once members agree, and other requirements are met, the student is granted a Ph.D.

2. Apply skills in external setting: externship component – Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills: research component – Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study: concentration component – Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

Educational Leadership, Certificate in (Post-master's certificate)

Program goal

The post-master's certificate is a 21-hour program for individuals who have obtained a master's degree from a regionally accredited college or university; the degree must be in the field of education or in one that meets the requirements to be employed in a position requiring licensure in Virginia. Applicants must have an active renewable educator license

and have at least two years of experience in an instructional personnel position that requires licensure in Virginia.

Please visit the Department of Educational Leadership's website for additional information about program and application requirements.

Student learning outcomes

1. Candidates demonstrate content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Design, align, evaluate curriculum, guide learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

Educational Leadership, Master of Education (M.Ed.) with a concentration in administration and supervision

Note: Admission to this program is temporarily suspended.

Program goal

The administration and supervision concentration of the M.Ed. in Educational Leadership is a 33-credit-hour program that prepares individuals to fill positions as reflective leaders for schools. Applicants must possess an active renewable educator license and are expected to have at least two years of experience in a school setting in an instructional personnel position that requires licensure in Virginia. An end-of-program assessment is required. Individuals must meet technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training. Individuals who successfully complete the program are eligible for endorsement as an administrator/supervisor K-12.

Please visit the Department of Educational Leadership's website for additional information about program and application requirements.

Student learning outcomes

1. Content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by the School Leaders Licensure Assessment and the school law case study.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.

3. Internship/clinical practice: Candidates demonstrate effective applications in internship/clinical practice as evidenced by the on-site supervisor evaluation.
4. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
5. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
6. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. 3. Statement of intent
4. Transcripts of all previous college work
5. At least two years of experience in a school setting in an instructional personnel position that requires licensure in Virginia

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-educational-leadership/>) for further information.

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Internship requirement: Students in the administration and supervision concentration must complete an internship sequence.
4. Testing requirements: Individuals must take the School Leaders Licensure Assessment or any other assessment required by the Virginia Board of Education for endorsement as a school principal/supervisor K-12.
5. For endorsement, individuals must meet the technology standards approved by the Virginia Board of Education, and they must supply proof of child abuse and neglect recognition training.

Curriculum requirements

| Course | Title | Hours |
|-------------------------|--|-------|
| Required courses | | |
| ADMS 611 | School Law | 3 |
| ADMS 618 | Leadership for Educational Change and Improvement | 3 |
| ADMS 622 | Understanding Diversity and Leading for Social Justice | 3 |

| | | |
|----------|---|---|
| ADMS 624 | Principals as Human Resource Agents | 3 |
| ADMS 625 | Leadership for Individualized Learning | 3 |
| ADMS 627 | Enhancing and Supporting Instruction | 3 |
| ADMS 629 | The Business of Schools | 3 |
| ADMS 630 | Understanding and Engaging School Communities | 3 |
| ADMS 633 | Multiple Dimensions of Leadership | 3 |
| ADMS 670 | Administrative Internship I ¹ | 1 |
| ADMS 671 | Administrative Internship II ² | 1 |
| ADMS 675 | Administrative Internship III ³ | 1 |
| EDUS 660 | Research Methods in Education | 3 |

Assessment

Individuals must take the SLLA or any other assessment required by the Virginia Board of Education for endorsement as a school principal/supervisor K-12. (no credit)

Total Hours **33**

1

ADMS 670 must be taken in the first semester of enrollment in the program.

2

ADMS 671 is taken in the next-to-last semester of enrollment in the program.

3

ADMS 675 is taken in the last semester of enrollment in the program.

The minimum total of graduate credit hours required for this degree is 33.

Note: Admission to this program is temporarily suspended.

Educational Leadership, Master of Education (M.Ed.) with a concentration in leadership studies

Program goal

The leadership studies concentration of the M.Ed. in Educational Leadership is a 30-credit-hour program for individuals who hold or expect to hold leadership positions in educational organizations. Applicants are expected to have at least two years of experience in an educational setting. The program includes 15 hours of credit in required courses and

15 hours in a concentrated series of electives chosen with approval of the student's adviser.

Student learning outcomes

1. Content knowledge: Candidates demonstrate content knowledge in educational leadership as evidenced by case study analyses.
2. Develop supervisory plan for learning: Candidates demonstrate the ability to develop a supervisory plan for classroom-based learning as evidenced by the clinical supervision model.
3. Assess ability to support student learning and development: Candidates demonstrate ability to support student learning and development as evidenced by the leadership to support student learning assessment.
4. Assess application of content: Candidates demonstrate application of content as evidenced by the action research project.
5. Assess management and community relations: Candidates demonstrate organizational management and community relations skills as evidenced by the educational intervention plan.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Fall | May 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. At least two years of experience in an educational setting

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-educational-leadership/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 30 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum requirements

Leadership, Doctor of Education (Ed.D.)

Program goal

The purpose of the Ed.D. in Leadership program is to engage leaders in a variety of learning organizations with practitioner-oriented knowledge and skills, authentic leadership and research experiences, and opportunities for reflection that will enable them to succeed in a variety of organizational leadership positions. Three analytic lenses (equity, accountability and learning theory) guide course work and enable students from diverse backgrounds to consider learning through common perspectives.

Students will examine cases centered on enduring questions in learning and leadership. Questions will be explored through contrasting evidence from a variety of perspectives and contexts.

Program features

The Ed.D. in Leadership is a 48-credit hour, 36-month program. Based upon principles of adult learning, the program has the following features:

1. Competitive admissions
2. Midcareer entry
3. Practitioner-oriented
4. Learning-community based
5. Problem-oriented andragogy and curriculum
6. Two learning communities in K12 and general leadership (appropriate for leaders of schools and districts, nonprofits and other service organizations) and higher education leadership are offered in face-to-face and online delivery modalities, depending on the number of admissions each year. Face-to-face students typically meet one evening each week and five Saturdays each semester. Online students receive a blend of synchronous and asynchronous learning and have three required face-to-face Saturday sessions in the summer of year one and two Saturday face-to-face sessions in the summer of year two.
7. Program culminates in a three-semester applied group dissertation (the capstone)

Student learning outcomes

1. Confident and clear communication and presentation skills through formal benchmark presentations
2. Understanding and application of effective leadership, team-building and learning behaviors through team projects
3. Appropriate data-gathering, management and analysis techniques through program evaluation and capstone projects
4. Making of decisions and recommendations based upon data analysis and scholarly research through formal benchmark presentations and capstone projects
5. Scholarly writing skills through technical report writing
6. Academic achievement necessary to be considered for doctoral candidate status, as required by the university by meeting candidacy requirements

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ed.D. | Summer | Feb 1 | GRE or MAT |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Master's degree
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE or MAT

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/edd-leadership/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48 credit hours.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program: Courses with a grade below C cannot be used to satisfy degree requirements.
3. Capstone requirements: Students must complete and defend a team-based capstone research project.

Department of Foundations of Education

Lisa Abrams, Ph.D.

Associate professor and interim chair

The Department of Foundations of Education is committed to preparing educators and scholars for critical, reflective and responsible work in education, enhancing the knowledge base in the varied disciplines through research and scholarship, and engaging in service to the broader community.

To fulfill this mission, the department offers multidisciplinary perspectives that are the pillars for School of Education programs, based on the contention that the preparation of effective educational practitioners and scholars requires deep understanding of the broader perspectives that are represented by research and theory in psychological, cultural, philosophical, historical and ethical areas of inquiry. Learn more by visiting the Foundations of Education webpage (<http://www.soe.vcu.edu/departmentpages/foundations-of-education/>).

- Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology (p. 524)
- Education, Doctor of Philosophy (Ph.D.) with a concentration in research, assessment and evaluation (p. 526)

Education, Doctor of Philosophy (Ph.D.) with a concentration in educational psychology

Program goal

The educational psychology concentration is designed to train research-oriented doctoral students who want to promote the success of students in educational environments. Doctoral students will integrate theory and research in the areas of developmental psychology, cognition, social psychology and motivation, assessment, and diversity to better study learning in schools or school-like settings.

Student learning outcomes

1. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once all members agree, the student is granted a Ph.D.; therefore, inter-rater reliability is extremely high.
2. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
3. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative, quantitative and mixed methods design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination. This exam is also graded "blindly," meaning that the evaluator does not know which student he or she is evaluating.
4. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Summer or fall | Jan 15 | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Baccalaureate or master’s degree in psychology, educational psychology or related discipline
2. Three letters of recommendation addressing the student’s potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)

6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/phd-educational-psychology/>) for further information.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.
4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.
5. Dissertation requirements: Students must complete and defend a research dissertation.

Curriculum requirements

Students admitted with only a baccalaureate degree are required to take an additional 15 credits of 600 level didactic courses in EDUS, PSYC, SEDP, TEDU or another subject, selected in consultation with an adviser.

Education, Doctor of Philosophy (Ph.D.) with a concentration in research, assessment and evaluation

Program goal

The research, assessment and evaluation concentration is designed for individuals who want to develop skills to undertake, use and teach research, assessment and evaluation. Emphasis is placed on developing proficiency in quantitative, qualitative and mixed methods modes of inquiry and providing students with expertise to study varied educational and social research questions. Students select a focus in either research or evaluation.

Student learning outcomes

1. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
2. Develop research knowledge and skills (research component): Students will acquire the skills essential to designing, conducting and interpreting qualitative, quantitative and mixed-methods research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.
3. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
4. Complete an original research study (dissertation component): Students will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the

committee discusses their thoughts on the quality of the student work. Once members approve, the student is granted a Ph.D.

Adult Learning, Master of Education (M.Ed.) with a concentration in adult literacy

Note: Admission to this program is temporarily suspended.

Program goal

The Master of Education in Adult Learning is a 33-credit hour program of study that prepares individuals for a broad range of positions related to the education of adult learners. Students choose one of three elective concentrations in adult literacy, human resource development, or instructional design and technology. Graduates are found in major corporations, higher education, health care organizations, state and federal agencies, nonprofit and community-based organizations and human services agencies. Admission to the program is predicated on the "whole person" concept, taking into account life experience, academic record, references and the reasons for the student's interest in the program. An interview with the program adviser is recommended prior to admission. Successful applicants will have sufficient prior work experience with adults as learners to enable them to bring relevant work experience into the classroom learning environment.

The program provides a foundation in educational research methods and a strong core of seven courses in the theory and practice of adult

learning, including emphasis in development of facilitation skills, as well as the design and delivery of adult learning programs. Upon completion of the foundation and core courses, students choose one of three concentration areas: adult literacy, human resource development (learning in the workplace), or instructional design and technology. The last course in the program, a capstone seminar in action learning, reunites students from all three concentrations for a comprehensive synthesis experience as they work in action learning teams to solve a real problem of strategic importance to an organization in the community.

A unique feature of the program is the learning portfolio, maintained in an online journal (blog) format. The learning portfolio, in combination with the capstone seminar, replaces a comprehensive examination requirement. For the portfolio, students write reflective blog entries during each of the core and concentration courses. During the program, selected assignments are posted to the blog to document personal growth and learning over time. At the end of the program, students create a synthesis of their learning in an essay format or through creation of a digital story. The portfolio serves as a demonstration of the graduate's abilities to a prospective employer and can be added to a student's resume. Throughout, the program utilizes students' experiences in working with adults as learners to unite theory with practice and emphasizes 21st-century technologies for teaching and learning.

Student learning outcomes

1. Demonstrate the ability to articulate a personal philosophy of adult learning practice that enables students to work effectively as leaders and facilitators to improve adult learning, as evidenced on the final program learning assessment
2. Demonstrate the ability to integrate knowledge of all facets of adult learning to have a significant impact on the practices, culture and learning environments of the organizations in which students work
3. Demonstrate knowledge of the nature, function and scope of adult learning during the capstone experience of the program
4. Demonstrate awareness of the processes of adult learning and development during the capstone experience
5. Acknowledge the influence of technology in adult learning, as evidenced in the final program learning assessment
6. Demonstrate awareness of educational research in the adult learning field, as evidenced on the research on instructional strategy and organizational change strategy analysis rubrics

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as

published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the [academic regulations section for additional information on academic regulations for graduate students](#).

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the [academic regulations section for additional information on degree candidacy requirements](#).

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section for additional information on graduation requirements](#).

Note: Admission to this program is temporarily suspended.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Fall | Feb 1 | |
| | Spring | Nov 1 | |
| | Summer | Feb 1 | |

In addition to the [general admission requirements of the VCU Graduate School](#), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-adult-learning/>) for further information.

Note: Admission to this program is temporarily suspended.

Degree requirements

Students must meet all general VCU Graduate School graduation requirements (p. 32).

Curriculum requirements

Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in online teaching

Note: Admission to this program is temporarily suspended.

Program mission

The online teaching concentration of the Master of Education in Curriculum and Instruction is designed to prepare K-12 teachers and administrators to develop and facilitate effective online instruction in K-12 environments.

Program goals

1. Expand on participants' current teaching expertise in instructional strategies, curriculum design and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

Student learning outcomes

1. Demonstrate effective electronic communication methods for instruction in the K-12 environment
2. Reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas
3. Demonstrate effective virtual systematic instructional design through the development of a virtual learning environment
4. Demonstrate effective facilitation of virtual instruction including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning
5. Demonstrate knowledge of effective strategies for assessment and evaluation in online environments through the development of rubrics and alternative assessment tools
6. Demonstrate knowledge of the TPACK framework in designing instruction with appropriate virtual tools
7. Demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues, and the development of appropriate materials that reflect effective time and course management by the course facilitator

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 28)

Note: Admission to this program is temporarily suspended.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Fall | Feb 1 | GRE or MAT |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Three letters of recommendation addressing the student’s potential for graduate study in education
2. Student’s written statement concerning career interests
3. Transcripts of all previous college work
4. Satisfactory scores on the GRE or MAT

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.

2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum requirements

| Course | Title | Hours |
|---|---|-----------|

Curriculum and Instruction, Master of Education (M.Ed.) with a concentration in teaching and learning

Program goal

The Master of Education in Curriculum and Instruction program is designed to provide education professionals with a deeper understanding

of pedagogy, curriculum design, philosophies of education, theories of learning and strategies for meeting the needs of diverse learners. Concentration courses within the program are selected in consultation with an adviser.

Student learning outcomes

1. **Learner and learning:** Understand learning theory appropriate to the age group they will teach and/or for which they will design curriculum and acquire an awareness of the diversity of the populations' cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach and for which they will design curriculum
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure learning in ways that lead to sustained development and growth
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Education, Doctor of Philosophy (Ph.D.) with a concentration in curriculum, culture and change

Program goal

The curriculum, culture and change concentration offers a rigorous doctoral-level learning experience in curriculum and instruction with a strong emphasis on advocacy and social justice. The concentration prepares curriculum and instruction leaders for positions in school systems at the building level and above, as well as scholars with a wide range of curricular interests — urban education, rural education, linguistically diverse groups, oppressed groups, critical pedagogy, philosophical and sociocultural foundations of education, etc. In addition to a deep grounding in theoretical, practical and methodological approaches to curriculum and instruction, the concentration prepares instructional leaders to advocate for change across a wide range of institutions, systems and contexts. The concentration offers challenging learning experiences in the field of curriculum and instruction. Its expressed social justice values allow framing of courses in ways that provide critical analyses of contemporary schooling and ground students in the philosophical and historical roots of school change. The program welcomes students with interests in all institutional settings serving students across the life span (early childhood through adulthood) as well as informal and nonformal contexts. It also allows for discipline-specific cohorts in fields such as STEM and literacy.

The concentration distinguishes itself by preparing curriculum and instruction leaders to be change agents capable of working in school systems, higher education and advocacy organizations. It reflects an activist stance toward the education profession — one that views schooling as not only shaped by society but also as an active force for equity and meaningful societal change. It will appeal to a wide range of students: those who are seeking to become instructional leaders in school systems, those preparing to teach in the academy and all those desiring a strong foundation in educational reform.

Student learning outcomes

1. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Students will demonstrate this knowledge and skill set on a qualifying examination, which is independently evaluated by at least two faculty members. To address inter-rater reliability, if the two faculty members disagree on the student's level of knowledge, a third faculty member is called in to evaluate the student's responses on the qualifying examination.
2. Develop in-depth knowledge in one area of study (concentration component): Students will demonstrate in-depth knowledge and skills in an area of study that is congruent with their current or projected career goals. Content will differ according to chosen concentration.
3. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
4. Complete an original research study (dissertation component): Student will design, implement, analyze and defend an original research study. Once a student passes the prospectus hearing, he or she will collect and analyze the data and finish writing the last two chapters of their dissertation. Students have a committee of a minimum of four faculty members. Typically, this consists of a chair, a methodologist, a subject-matter expert and an expert outside of the School of Education. Each committee member independently reviews the student's work. Once the dissertation defense has occurred, the committee discusses their thoughts on the quality of the student work. Once members agree, the student is granted a Ph.D.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Summer or fall | Jan 15 | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following represent the minimum requirements for admission:

1. Master's degree in curriculum and instruction, teaching and learning, educational philosophy or related discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. A personal interview and additional writing sample (may be requested)
6. Professional vitae/resume
7. Satisfactory scores on the GRE

Please visit the School of Education website (<https://soe.vcu.edu/academics/doctoral-programs/phd-curriculum-culture/>) for further information.

Degree requirements

In addition to the VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 48-54 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in three courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Externship requirement: Students must complete an approved externship.

4. Examination requirements: Students must pass both a qualifying examination early in the program and a comprehensive examination near the end of the program.

5. Dissertation requirements: Students must complete and defend a research dissertation.

Education, Doctor of Philosophy (Ph.D.) with a concentration in urban services leadership

Program goal

The urban services leadership concentration is designed to prepare future researchers, faculty and practitioners for leadership roles in academic, government (local, state, national and international) and community based for-profit and non-profit organizations. Doctoral students will utilize a multidisciplinary approach to develop a broad understanding of the critical issues and challenges in adult learning and subsequently apply that understanding to the planning, implementation and evaluation of adult learning and educational programs and initiatives.

Applicants are expected to have experience working with adult learners in organizational, community, government, higher education, health care or nonprofit settings, or within the community in roles as faculty, faculty developers, trainers, human resource development and organizational development professionals, adult literacy educators, or other roles in which they are actively involved in the teaching and training of adult learners.

Student learning outcomes

1. Apply skills in external setting (externship component): Students will demonstrate their knowledge and skills in a professional placement in a school, agency or corporate setting. The faculty adviser and the externship site supervisor work together to evaluate the student.
2. Develop research knowledge and skills (research component): Students will acquire the prerequisite skills essential to designing, conducting and interpreting qualitative and quantitative design research. Instructional Technology, Certificate in (Post-baccalaureate graduate certificate)

Note: Admission to this program is temporarily suspended.

Program goal

The post-baccalaureate Certificate in Instructional Technology prepares educators to use technology effectively in their schools and to provide instructional leadership and technical support to other educators who use computer technology. Designed for teachers, resource persons and administrators at all grade levels (K-12), the sequence in instructional technology offers a unique opportunity to develop comprehensive knowledge and experience in the educational applications of computers and related technologies. The primary purpose of this certificate program is to meet the growing need for highly qualified core curriculum teachers, instructional technology support teachers and associated administrative personnel. The program requires six three-credit-hour courses. In addition, prerequisites for the program require that students must be licensed K-12 teachers or administrators with a minimum of two years of classroom experience who have a basic knowledge of instructional media. The program is committed to providing access to technology so that hands-on experience is offered in every class and participants produce instructional material that can be immediately integrated into the classroom.

Student learning outcomes

1. Demonstrate the necessary knowledge and skills to facilitate effective learning experiences using technology
2. Demonstrate their skills in visual arts
3. Demonstrate successful searching techniques
4. Produce and edit video for education
5. Set up online instructional modules incorporating various communication and digital activities for students

- Present at a conference and be able to prepare a professional development class in technology

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Medical Education, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The post-baccalaureate graduate Certificate in Medical Education is a 12-credit-hour program designed for faculty teaching in medicine and health professions to enhance depth and breadth of their expertise in curriculum design and adult learning strategies for teaching, as well as to foster development of a cadre of academic leaders who can model best practices in teaching undergraduate, clinical and graduate programs.

Student learning outcomes

- Demonstrate the ability to articulate a personal philosophy of practice that enables them to facilitate adult learning in medical education and engage in critically reflective practice as an educator
- Demonstrate the ability to integrate knowledge of adult learning for teaching in medical education to function as educational leaders who model best practices and serve as role models for trainees
- Demonstrate knowledge of assessment and evaluation strategies that align with goals and objectives and instructional strategies within a curriculum
- Adopt one or more instructional methods for actively engaging learners in a discovery or inquiry process that incorporates small-group or team-based learning strategies
- Demonstrate familiarity with a variety of digital media technologies appropriate for use in preclinical and clinical teaching situations

- Become familiar with the scholarship of teaching and learning by developing a research agenda for inquiry into student and trainee learning to advance the practice of teaching in medicine by making research findings public

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--------------------|
| Certificate | Fall | Feb 1 | |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

- Bachelor's degree in an appropriate discipline
- Three letters of recommendation addressing the student's potential for graduate study in education
- Statement of intent
- Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/medical-education/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

- Credit hour requirements: Students are required to complete a minimum of 12 credit hours.
- Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

Curriculum requirements

| Course | Title | Hours |

Online Teaching for K-12 Educators, Certificate in (Post-baccalaureate graduate certificate)

Note: Admission to this program is temporarily suspended.

Program goals

The post-baccalaureate graduate Certificate in Online Teaching for K-12 Educators is a 17-credit-hour certificate designed to prepare candidates to develop and facilitate effective online instruction in K-12 environments. The goals for the certificate are to:

1. Expand on participants' current teaching expertise in instructional strategies, curriculum design, and assessment and evaluation to adapt to fully online and hybrid teaching environments
2. Foster the development of instructional leaders who can model and articulate best practices in online teaching within K-12 environments

Student learning outcomes

1. Demonstrate effective electronic communication methods for instruction in the K-12 environment
2. Reflect on current research and standards for online/blended course design/facilitation and articulate a personal philosophy of practice in these areas
3. Demonstrate effective virtual systematic instructional design through the development of a virtual learning environment
4. Demonstrate effective facilitation of virtual instruction, including employment of techniques to encourage discussion, development of policies and procedures for digital communications and online conflict moderation, and use of effective virtual tools to improve learning
5. Demonstrate knowledge of effective strategies for assessment and evaluations in online environments through the development of rubrics and alternative assessment tools
6. Demonstrate knowledge of TPACK framework in designing instruction with appropriate virtual tools
7. Demonstrate knowledge of online time and course management through the development of policies and procedures to assist online learners with these issues and the development of appropriate materials that reflect effective time and course management by the course facilitator

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Note: Admission to this program is temporarily suspended.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--------------------|
| Certificate | Fall | Feb 1 | |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Note: Admission to this program is temporarily suspended.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete a 21-month curriculum of online courses as well as course development and facilitation practica.

Reading Specialist, Certificate in (Post-master's certificate)

Program goal

The certificate program is designed for students who wish to gain state licensure as a reading specialist in kindergarten through high school settings. Applicants are required to have at least three years of teaching experience in a reading-related field setting if they want to be recommended to the Department of Education for endorsement as a reading specialist in Virginia.

All requirements for admission to graduate school apply to applicants for the Post-master's Certificate in Reading Specialist. All state department requirements for reading specialist (specifically the 12 hours of graduate or undergraduate work in selected areas) must be met.

Students are required to earn a minimum of 24 graduate hours beyond their current master's degree, including the required reading courses, an approved reading selective and an elective in the School of Education that has been approved by the adviser. Advisers will recommend selective courses based upon student experience and goals. During the last semester of course work, students must complete a reading portfolio documenting their work in the program and related work experiences. Candidates must receive a passing score on the Reading for Virginia Educators Assessment as a graduation requirement.

Persons completing the program are expected to demonstrate:

1. An understanding of the reading language learning process
2. The ability to critique, adapt and model use of a variety of reading instructional strategies, methods and programs
3. Expertise in developing and providing for continuous assessment of an individual and groups
4. Ability to implement schoolwide developmental, creative and intervention reading/language arts programs
5. Ability to understand and apply theory to practice within a variety of cultural contexts

Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

(<https://soe.vcu.edu/academics/certificates/reading-specialist/>)

Reading, Master of Education (M.Ed.)

Program goal

The Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences, and they must pass the Reading for Virginia Educators Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

Student learning outcomes

- Demonstrate content knowledge to support literacy and language learning
- Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
- Effectively apply knowledge, skills and dispositions in practice

Reading, Master of Education (M.Ed.) with a concentration in K-12 reading specialist

Program goal

The K-12 reading specialist concentration in the Master of Education in Reading program is designed to provide experienced teachers who are prospective reading specialists with a program of sequential and integrated experiences in areas of the reading curriculum ranging from preschool to adult levels. Students will gain an understanding of the developmental and diagnostic processes involved in teaching reading and the language arts and will become familiar with the resource and supervisory functions that are part of the specialist role. Prior to graduation, students must complete a reading portfolio documenting their work in the program and related work experiences and pass the Reading for Virginia Educators Assessment. The M.Ed. in Reading is an approved program (K-12) for students who meet Virginia State Department of Education requirements. The reading specialist endorsement also requires completion of three years of teaching in a reading-related field.

A cooperative agreement has been established with Virginia State University to permit selected, qualified students to complete the M.Ed. in Reading program. Up to 12 credit hours from an approved list may be transferred from the cooperating institution. Interested students should contact the Department of Teaching and Learning.

Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/K-12

Program goal

Students who already have their K-12 initial licensure and want to pursue an endorsement in teaching English as a second language in the K-12 setting may do so in the K-12 subconcentration of the TESOL concentration in the M.Ed. in Reading. The following are prerequisites to the concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will **not** be endorsed as a K-12 reading specialist. Students interested in pursuing both endorsements must take the following nine credit hours in addition to the ones listed below: READ 600, READ 605 and READ 700.

Student learning outcomes

- Demonstrate content knowledge to support literacy and language learning
- Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
- Effectively apply knowledge, skills and dispositions in practice

Program website: soe.vcu.edu/academics/masters-programs/med-reading (<https://soe.vcu.edu/academics/masters-programs/med-reading/>)

Reading, Master of Education (M.Ed.) with a concentration in reading with TESOL/adult

Program goal

Students who are interested in teaching English as a second language to adults may develop their knowledge and skills in the adult concentration of the TESOL track in the M.Ed. in Reading. Those who are interested in pursuing an endorsement in teaching English as a second language in the adult setting must already have their K-12 initial licensure and adult education endorsement. The following are prerequisites to the concentration: LING 390/ENGL 390/ANTH 390 and six credit hours of foreign language. Students who pursue this concentration will **not** be endorsed as a K-12 reading specialist.

Student learning outcomes

1. Demonstrate content knowledge to support literacy and language learning
2. Effectively plan instruction or fulfill other professional responsibilities that attend to learner differences
3. Effectively apply knowledge, skills and dispositions in practice

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.Ed. | Fall | Feb 1 | |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/masters-programs/med-reading/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.

3. Testing requirements: Students in the K-12 reading specialist concentration must present passing scores on state mandated licensure/endorsement assessments.

Teaching Elementary Education, Certificate in (Graduate certificate)

The graduate Certificate in Teaching Elementary Education prepares students to become teachers in high-needs and hard-to-staff elementary schools. Students will gain an in-depth understanding of science, social studies, literacy and mathematics pedagogy and content. The program

provides field experiences during a one-year residency to expose students to classroom teaching and classroom management. Graduates will be prepared to teach in elementary (PK-6) classroom settings and will meet the needs of elementary students with a focus on urban and high-needs schools.

The certificate offers a unique learning opportunity for students planning to teach in urban and high-needs schools in the Greater Richmond area. Information on the RTR program can be found at teachRTR.org (<https://teachrtr.org/>).

Graduates will receive a credential for successfully completing the program. The certificate does not provide full teacher licensure; however, the course work may be used to fulfill the requirements for provisional teacher licensure through a public school system.

Student learning outcomes

1. Learner and learning: Students will understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning.
2. Content: Students will demonstrate knowledge of the subjects they will teach.
3. Instructional practice: Students will demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning.
4. Professional responsibility: Students will develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--|
| Certificate | Summer | Feb 1 | VCLA and Praxis subject tests for elementary education licensure |

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>), the following requirements represent the minimum acceptable standards for admission:

- Acceptance into the RTR program through a rigorous on-site assessment process that includes:
 - Completion of a written application to the RTR program (including written statement concerning commitment to teaching in hard-to-staff schools, three letters of recommendation addressing the student's potential for graduate study in education and transcripts of all previous college work)
 - Teaching a mini-lesson in front of students
 - Personal interview
 - On-demand writing sample
- A bachelor's degree from an accredited university with no more than nine credits of content courses needed to meet state licensure requirements
- Three letters of recommendation addressing the student's potential for graduate study in education
- Statement of intent
- Transcripts of all previous college work
- Satisfactory scores on the VCLA and Praxis subject tests for elementary education licensure

Prospective students should first contact teachrtr@vcu.edu for additional details on admission into the RTR program.

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), students are required to complete course work in core and elective courses.

- Credit hour requirements: Students are required to complete a minimum of 27 credit hours.
- Grade requirements: Receipt of a grade of C or below in two courses requires review of the student's academic progress. Courses with a grade below C cannot be used to satisfy degree requirements.

- Internship requirements: Students must complete an internship in an RTR approved school.

Curriculum requirements

The curriculum for the Graduate Certificate in Teaching Elementary Education is designed to help hard-to-staff schools meet their critical teaching shortages in elementary education through a year-long residency experience designed to address the unique challenges of urban and high-needs schools. The focus of the required course work will be content, pedagogy and assessment. The courses will prepare students to understand how to meet the needs of all students with a focus on urban and high-needs schools.

| Course | Title | Hours |
|---|---|-----------|
| EDUS 673 | Democracy, Equity and Ethics in Education | 3 |
| TEDU 511 | Curriculum and Instruction for Residency Programs | 3 |
| TEDU 516 | Elementary Social Studies Methods | 2 |
| TEDU 517 | Science Education in the Elementary School | 3 |
| TEDU 522 | Teaching Mathematics for Elementary Education | 3 |
| TEDU 561 | Reading Foundations: Sociological/ Psychological Perspectives | 3 |
| TEDU 566 | Diagnosis and Remediation in Reading | 4 |
| TEDU 588 | Classroom Management | 3 |
| Graduate-level assessment elective (selected in consultation with an adviser) | | 3 |
| Total Hours | | 27 |

The minimum total of graduate credit hours required for this certificate is 27.

Teaching English to Speakers of Other Languages, Certificate in (Post-baccalaureate graduate certificate)

Program goal

This program is designed to prepare professionals to work with K-12 students and adults for whom English is not their native language.

Student learning outcomes

- Demonstrate foundational knowledge needed to support ESL students' literacy learning
- Effectively plan lessons that attend to linguistic proficiency of learners in various settings

3. Create assessments that assess ESL student competency in communication and content learning
4. Demonstrate a disposition of tolerance and appreciation for linguistic and cultural diversity
5. Demonstrate a range of teaching strategies and approaches that lead to ESL student learning

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--------------------|
| Certificate | Fall | Feb 1 | |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree in an appropriate discipline including education, social work, psychology or human services
2. Three letters of recommendation addressing the student's potential for graduate study in education

3. Statement of intent
4. Transcripts of all previous college work

Please visit the School of Education website (<https://soe.vcu.edu/academics/certificates/tesol/>) for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 18 credit hours.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Prerequisite or corequisite requirements: Students must have taken a class in linguistics and six hours of a modern foreign language.

Curriculum requirements

As prerequisites or corequisites to the certificate program, students must have taken three credit hours of a modern foreign language, which may have been taken at the undergraduate or graduate level. The certificate program consists of 18 credit hours of graduate course work as follows:

| Course | Title | Hours |
|--------------------|--|-----------|
| ENGL/LING/TEDU 552 | Teaching English as a Second Language | 3 |
| FRLG 575 | Intercultural Communication | 3 |
| TEDU 561 | Reading Foundations: Sociological/Psychological Perspectives | 3 |
| TEDU 562 | Reading Instruction in the Content Areas | 3 |
| TEDU 683 | ESL Assessment and Trends | 3 |
| TEDU 675 | Internship in ESL | 3 |
| Total Hours | | 18 |

The minimum total of graduate credit hours required for this certificate is 18.

Teaching, Certificate in (Post-baccalaureate graduate certificate) with a concentration in English education

Admission to this program is permanently suspended prior to closure.

Teaching, Master of (M.T.) with a concentration in early and elementary education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Baccalaureate degree recipients who meet the admission criteria may pursue the Master of Teaching degree program, including the qualifying courses.

Early and elementary education

Freshman students bound for the Master of Teaching program with a concentration in early and elementary education are required to enroll in an appropriate undergraduate liberal arts major.

Undergraduate liberal arts majors are encouraged to select at least one minor in order to deepen knowledge and appreciation of a subject area. Philosophy, religious studies, African American studies and international studies have relevance in their understanding of human investigation of knowledge, human behavior and world cultures. A minor in a science area such as environmental studies may be more employable because of school and societal concerns about our planet and its preservation. In selecting the humanities and sciences minor, the choice should be based on the student's interest and perceived relevance.

Consult with the appropriate professional studies adviser for additional information regarding professional studies and liberal arts requirements.

Student teaching requirements

All students pursuing a concentration in early and elementary education within the Master of Teaching program will student teach. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall or spring semester of the academic year in which they will student teach.

Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.T. | Fall | Feb 1 | GRE |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with an appropriate liberal arts major
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>) website for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Curriculum requirements

Program requirements – mathematics and statistical reasoning

The general education requirement is three to six credit hours; the early childhood/elementary education program requirement is six credit hours, including three credit hours in mathematics at the college algebra level or higher and three credit hours in a statistics course typically taught by a college department of mathematics. Choosing among these courses is recommended:

| Course | Title | Hours |
|----------|---|-------|
| MATH 303 | Investigations in Geometry | 3 |
| MATH 361 | Numbers and Operations | 3 |
| MATH 362 | Algebra and Functions | 3 |
| STAT 206 | Data Analysis and Statistics for Elementary Education | 3 |

Program requirements – natural sciences

The general education requirement is seven to nine credit hours, with one course each from the physical sciences and the biological sciences, with at least one laboratory; the early childhood/elementary education

program requirement is 12 credit hours, again with at least one course each in the physical sciences and the biological sciences and two laboratories.

| Course | Title | Hours |
|----------------------------|------------------------------|-------|
| Biological sciences | | |
| BIOL 101 | Biological Concepts | 3 |
| INSC 201 | Energy! | 3 |
| or INSC 300 | Experiencing Science | |
| or PHYS 101 | Foundations of Physics | |
| CHEM 100 | Introductory Chemistry | 3 |
| or CHEM 101 | General Chemistry I | |
| or CHEM 110 | Chemistry and Society | |
| ENVS 105 | Physical Geology | 3 |
| or ENVS 201 | Earth System Science | |
| or ENVS 301 | Introduction to Meteorology | |
| or ENVS 310 | Introduction to Oceanography | |
| or URSP 204 | Physical Geography | |
| Science labs ¹ | | 2 |

1

Two of the science content courses must pair with a one-credit lab for a total of two credits of laboratory course work in the degree program. Possible partner laboratory courses include BIOZ 101, PHYZ 101, CHEZ 101, CHEZ 110, ENVZ 105 and URSZ 204.

Program requirements – applied arts

Two to three credit hours in applied arts to be designated with the professional studies adviser.

Professional studies requirements

Undergraduate courses

| Course | Title | Hours |
|---------------|--|-------|
| EDUS 301 | Human Development and Learning | 3 |
| or PSYC 301 | Child Psychology | |
| TEDU 310 | Elementary School Practicum A (taken with TEDU 410, TEDU 414 and TEDU 426) | 2 |
| TEDU 313 | Elementary School Practicum B (taken with TEDU 517, TEDU 522 and TEDU 591) | 2 |
| TEDU/ENGL 386 | Children's Literature I | 3 |
| TEDU 390 | Movement Education | 3 |
| TEDU/SEDP 410 | Building a Community of Learners: Classroom Management | 3 |
| TEDU 411 | Integrating the Arts in Curriculum for Young Children ¹ | 3 |
| or ARTE 301 | Art for Elementary Teachers | |
| TEDU 414 | Curriculum and Methods for Early/Elementary Children | 4 |
| TEDU 426 | Teaching Reading and Other Language Arts | 3 |
| TEDU 510 | Instructional Technology in PK-12 Environments | 2 |

1

Students may choose another applied arts course.

Graduate courses

| Course | Title | Hours |
|--------------------|---|-----------|
| EDUS/PSYC 607 | Advanced Educational Psychology for Elementary Teachers | 3 |
| EDUS 673 | Democracy, Equity and Ethics in Education | 3 |
| SEDP 505 | Theory and Practice of Educating Individuals with Special Needs | 3 |
| TEDU 517 | Science Education in the Elementary School | 3 |
| TEDU 522 | Teaching Mathematics for Elementary Education | 3 |
| TEDU 566 | Diagnosis and Remediation in Reading | 4 |
| TEDU 591 | Social Studies Education in the Elementary School | 3 |
| TEDU 626 | Home-School Communication and Collaboration | 3 |
| TEDU 672 | Internship | 4 |
| TEDU 674 | Internship II | 4 |
| TEDU 681 | Investigations and Trends in Teaching | 1 |
| Total Hours | | 34 |

The minimum total of graduate credit hours required for this degree is 34.

Program website: soe.vcu.edu/academics/masters-programs/master-of-teaching/ (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>)

Teaching, Master of (M.T.) with a concentration in earth science education

Note: Admission to this program is permanently suspended prior to closure.

Teaching, Master of (M.T.) with a concentration in English education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients

who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 494) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

- Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
- Content:** Demonstrate knowledge of the subjects they will teach
- Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning
- Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.T. | Fall | Feb 1 | GRE |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following requirements represent the minimum acceptable standards for admission:

1. Bachelor's degree with a major, or equivalent, in English
2. Three letters of recommendation addressing the student's potential for graduate study in education
3. Statement of intent
4. Transcripts of all previous college work
5. Satisfactory scores on the GRE

Additionally, there are several tests that students must pass for admission to teacher preparation, admission to student teaching and licensure in Virginia. Students should consult the Teacher Preparation page (<https://soe.vcu.edu/admission/teacher-preparation-application/>) on the School of Education website for current testing requirements. Admission to clinical experiences in schools requires a background check and fingerprinting.

Please visit the School of Education (<https://soe.vcu.edu/academics/masters-programs/master-of-teaching/>) website for further information.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students are required to complete course work in core and elective courses.

1. Credit hour requirements: Students are required to complete a minimum of 33-34 credit hours depending on concentration.
2. Grade requirements: Receipt of a grade of C or below in two courses constitutes automatic dismissal from the program. Courses with a grade below C cannot be used to satisfy degree requirements.
3. Student teaching requirements: Students must successfully complete approved student teaching experience. Note: Students must complete all undergraduate courses before student teaching.
4. Additional testing requirement: Students must pass Praxis II, where applicable, for licensure.

Curriculum requirements

Undergraduate courses

| Course | Title | Hours |
|---|---|-------|
| Qualifying courses | | |
| EDUS 301 | Human Development and Learning | 3 |
| Admission to teacher preparation is a prerequisite for the following courses: | | |
| TEDU 311 | Middle School Practicum (secondary; must be taken concurrently with TEDU 537) | 2 |
| TEDU 312 | High School Practicum (English; must be taken concurrently with TEDU 548) | 1 |
| TEDU 510 | Instructional Technology in PK-12 Environments | 2 |

Graduate courses

| Course | Title | Hours |

Teaching, Master of (M.T.) with a concentration in history/social studies education

Program goal

The Master of Teaching curricula are designed to incorporate eligibility for initial teaching licensure in Virginia in early and elementary, or secondary education (biology, chemistry, earth science, English, history and social studies, mathematics or physics).

The approved curricula include undergraduate qualifying courses as well. Individuals pursuing the extended program are awarded undergraduate and graduate degrees simultaneously; baccalaureate degree recipients who meet the admission criteria also may pursue the Master of Teaching degree program, including the qualifying courses. The combined baccalaureate and Master of Teaching program requires a minimum of 153-154 hours, at least 33 of which must be at the graduate level.

Secondary education

The Master of Teaching program includes curricula that lead to endorsement in one of the following disciplines: biology, chemistry, earth science, English, history/social studies, mathematics or physics.

In order to enroll in the program, students must apply and be accepted to both the Extended Teacher Preparation Program and the Graduate School. Admission information for the Extended Teacher Preparation Program (p. 494) is available in this bulletin.

Student teaching requirements

All students pursuing a secondary education endorsement within the Master of Teaching program will student teach in the spring semester. To do so, students must take and pass the Virginia Communication and Literacy Assessment and their subject-specific Praxis II exams before the fall semester of the academic year in which they will student teach.

Student learning outcomes

1. **Learner and learning:** Understand human development and learning theory appropriate to the age group they will teach and acquire an awareness of the diversity of the school-age population in cultural backgrounds and styles of learning
2. **Content:** Demonstrate knowledge of the subjects they will teach
3. **Instructional practice:** Demonstrate an ability to plan and implement effective teaching and measure student learning in ways that lead to sustained development and learning

4. **Professional responsibility:** Develop an understanding of purposes for education and a defensible philosophical approach toward teaching and demonstrate professional dispositions

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

L. DOUGLAS WILDER SCHOOL OF GOVERNMENT AND PUBLIC AFFAIRS

The L. Douglas Wilder School of Government and Public Affairs is a creative, interdisciplinary grouping of programs in the social sciences and professional arenas that provides students with the knowledge, skills and experience necessary for success in public service.

The Wilder School brings together faculty from multiple disciplines that share a common interest in public affairs. The faculty includes individuals with strong research and analytical skills and with substantive expertise in fields such as criminal justice, economics, homeland security, public administration, urban planning and community development. These faculty members are committed to producing cutting-edge research and public service that can bridge the gap between theory and practice and to providing high quality, innovative and nationally competitive degree programs for students.

To achieve this mission, the Wilder School actively fosters and promotes a wide range of endeavors, including the establishment of interdisciplinary undergraduate and graduate programs that develop close ties with other related university programs. The Wilder School is an intellectually exciting place committed to having a genuine impact on public policy and providing an intellectually stimulating education for future public affairs professionals who share in school's commitment.

Program offerings

The school offers a variety of educational opportunities. Students may pursue three undergraduate programs and an additional three minors. Graduate programs provide options for full-time students and for practicing professionals interested in enhancing their skills or engaging in graduate-level work on a part-time basis. Current graduate offerings include nationally recognized master's programs and eight graduate-level certificates, as well as a doctoral degree program. Wilder School programs include:

Baccalaureate degrees

Bachelor of Science in Criminal Justice
Bachelor of Arts in Homeland Security and Emergency Preparedness
Bachelor of Science in Urban and Regional Studies

Minors

Criminal justice
Homeland security and emergency preparedness
Urban and regional studies

Graduate certificates

Certificate in Criminal Justice
Certificate in Gender Violence Intervention
Certificate in Geographic Information Systems
Certificate in Homeland Security and Emergency Preparedness
Certificate in Nonprofit Management
Certificate in Public Management
Certificate in Sustainability Planning
Certificate in Urban Revitalization

Master's degrees

Master of Arts in Homeland Security and Emergency Preparedness
Master of Public Administration
Master of Science in Criminal Justice
Master of Urban and Regional Planning

Doctoral degree

Ph.D. in Public Policy and Administration

The school also offers two dual degree programs with the University of Richmond's T.C. Williams Law School. Through these programs students can simultaneously obtain a law degree (J.D.) and either the Master of Public Administration or the Master of Urban and Regional Planning.

Service-learning and internship opportunities

Shajuana Isom-Payne

Assistant dean of student services

The educational experience at the L. Douglas Wilder School of Government and Public Affairs extends far beyond the classroom. Many students take advantage of service-learning (<http://www.wilder.vcu.edu/service/servicelearning/>) and internship (<https://wilder.vcu.edu/students/student-success/internships/>) opportunities, gaining valuable work experience and enhancing their resumes as they contribute in meaningful ways to governmental departments and agencies, legislative offices, nonprofit institutions, community initiatives, and businesses throughout Richmond.

Exceptionally qualified graduate students in the criminal justice, homeland security and emergency preparedness, public administration, and urban and regional planning programs are selected to be Wilder Graduate Scholars (<https://wilder.vcu.edu/students/student-success/graduate-fellowship/>) who undertake yearlong placements in which they benefit from professional work experience and financial support.

At the Wilder School, service is a tradition that is supported and cultivated by a faculty that reflects a tremendous commitment to community-based research. Each semester, VCU faculty offer a diverse selection of credit-bearing service-learning courses that provide students with the privilege of developing hands-on experience within their academic fields while engaging in meaningful projects that benefit local communities.

Guidelines for internships (<https://wilder.vcu.edu/students/student-success/internships/>) are available on the Wilder School website.

Graduate information

Admission

Admission to programs of the L. Douglas Wilder School of Government and Public Affairs is available to qualified students on a rolling admissions basis. Since the demand for admission to some programs is high and space availability is limited, students are encouraged to apply well in advance of their proposed admission dates.

As outlined below, admission requirements vary by academic program. No application packet will be considered by the relevant program admissions committee until all the required materials have been submitted by the applicant.

Application forms and instructions for applying to all graduate programs are available on the Graduate School website (<http://www.graduate.vcu.edu>).

Admission to a master's program from the certificate programs

The courses in the graduate Certificate in Criminal Justice program are the same as the master's courses and, with minimum grades of B and upon acceptance into the master's degree program, are fully transferable to the Master of Science in Criminal Justice program.

The courses that constitute the graduate Certificate in Homeland Security and Emergency Preparedness program represent the foundation for the HSEP master's degree. Completion of the HSEP certificate with a

minimum grade of B in each course guarantees admission to the HSEP master's and waives the standardized test requirement; applicants are still required to follow the standard application process. All courses in the certificate can be applied to the Master of Arts in Homeland Security and Emergency Preparedness.

The graduate Certificate in Public Management and the graduate Certificate in Nonprofit Management are designed for persons in professional positions who require a limited number of courses in contemporary management theory and skills. However, if a student later decides to pursue the M.P.A. degree, successfully completed certificate courses may be applied toward the degree. Successful completion of either certificate does not guarantee admission into the M.P.A. degree program.

All courses from the graduate Certificate in Urban Revitalization, graduate Certificate in Geographic Information Systems or graduate Certificate in Sustainability Planning may be applied toward the requirements of the Master of Urban and Regional Planning degree. However, successful completion of any certificate program does not guarantee admission into the M.U.R.P. program.

Provisional admission

In rare cases, applicants who do not meet the requirements for full admission may be accepted provisionally upon recommendation of the program's admissions committee. The conditions for earning full admission are provided by the program and include an assessment of academic performance after a specific number of hours or courses are completed. Provisionally admitted students may not withdraw from any courses or receive an incomplete during the provisional period. Students with extenuating circumstances may request an exception to this policy.

Provisional admission does not constitute a waiver of the requirement to submit a standardized test score if required by the program.

Re-admission after dismissal

If a student is dismissed from the VCU Wilder School, the student must wait a minimum of one year before applying for re-admission. Dismissed students will not be admitted to any other Wilder School graduate program for a period of one year after dismissal.

Continuous enrollment requirements and expectations

To remain in good standing, students must maintain continuous registration for each fall and spring semester (except for approved leaves of absence) until they have completed all requirements. Students who fail to register for two consecutive semesters will be dropped automatically from the program and must reapply for admission in order to continue. Exceptions to this policy will be made on an individual basis by petition. Students who reapply after having been dropped for failure to register continuously will be evaluated under the bulletin requirements in effect at the time of readmittance.

A minimum GPA of 3.0 on a 4.0 scale must be maintained. Compliance with other university regulations also is required.

Student appeals

Appeals for exceptions to policies must be made in writing to the Graduate Student Services and Advising office. Refer to the Wilder School website for contact information.

Students may submit an appeal to request a retroactive drop or withdrawal from a class or from all classes taken in a specific semester. The appeal process must be started within two semesters after the semester in question.

Part-time students

Since the school schedules many of its courses in the late afternoon or evening, its programs accommodate both full- and part-time students. Students also may take advantage of courses offered in the summer. Thus it is possible for a part-time student taking six credit hours per semester to finish the master's degree in four years or less.

Nondegree-seeking students

Nondegree-seeking students must have an undergraduate degree from an accredited institution prior to submitting an override request to register for any graduate-level course. Nondegree-seeking students can take no more than six credit hours without authorization from the appropriate program coordinator.

Financial aid information

Information and application forms for financial aid may be secured from the VCU Office of Financial Aid, Harris Hall, 1015 Floyd Ave., First Floor, Box 843026, Richmond, VA 23284-3026.

The L. Douglas Wilder School of Government and Public Affairs also offers a limited amount of financial assistance. Individuals interested in such assistance are urged to apply by March 30. Financial assistance available through the school includes:

- **Graduate teaching assistant positions** – Duties involve helping with the instruction of courses. The level of support varies according to the work level, financial need and scholarship.
- **Research assistant positions** – The stipend and number of positions depend upon the level of sponsored research carried out by the school each year.
- **Tuition fellowships** – There are a limited number of tuition fellowships for full-time students within the three master's degree programs.
- **T. Edward Temple Memorial Scholarship Award** – This award of approximately \$500 per year is given to an outstanding graduate student in the Master of Urban and Regional Planning program each year.
- **The Senator Edward E. Willey Scholarship, the Virginia City Management Association/University Dr. T. Edward Temple Scholarship and the Leigh E. Grosenick Scholarship** – These scholarships are available to outstanding students in the Master of Public Administration program. Preference for these three scholarships is given to those who plan public careers in Virginia.
- **Internships** – Paid, on-the-job internships are widely available in the Richmond area and elsewhere and are encouraged. VCU graduates also have been successful in obtaining presidential management internships in the federal government, state-government professional positions and local government positions.

Transfer credit

With the consent of the admission committee or program coordinator, a maximum of six semester hours of appropriate graduate credit may be transferred and applied toward the Master of Science in Criminal Justice, the Master of Arts in Homeland Security and Emergency Preparedness,

the Master of Public Administration or the Master of Urban and Regional Planning. These hours will not have been credited toward another degree.

Schoolwide master's-level requirements

In addition to the program-specific requirements of the Master of Public Administration, the Master of Science in Criminal Justice and the Master of Urban and Regional Planning as outlined elsewhere in this bulletin, the Wilder School requires all master's-level graduate degree-seeking students to acquire competence in four broad areas:

1. Research methods
2. Planning and/or policy analysis
3. Public administration
4. Ethics

Competence can be demonstrated by completion of the following:

| Course | Title | Hours |
|---|---|-------|
| Research methods | | |
| URSP/CRJS/GVPA/ PADM 623 | Research Methods for Government and Public Affairs | 3 |
| Planning/policy analysis | | |
| Select one of the following: | | 3 |
| PADM/GVPA 625 | Public Policy Analysis | |
| URSP/GVPA 632 | Planning Theory and Processes | |
| Public administration | | |
| PADM/GVPA 601 | Principles of Public Administration | 3 |
| Ethics | | |
| Select one of the following options: | | 3 |
| Option A: | | |
| PADM/GVPA/PHIL 683 | Administrative Ethics | |
| Option B: | | |
| A program-specific course through which ethical issues are imbedded and discussed within a public sector context. Such courses would include: | | |
| CRJS 550 | Professional Ethics and Liability | |
| PADM 661 | Nonprofit Law, Governance and Ethics | |
| PADM 689 | Seminar in Public Administration: Integration of Theory and Practice | |
| URSP/GVPA 632 | Planning Theory and Processes | |
| URSP 635 | Legal and Legislative Foundations of Planning | |

Selection of courses to meet these competency requirements will be made by the student in consultation with an academic adviser. While each graduate of the Wilder School must demonstrate competence in each of the areas outlined above, substitutions for the specific courses may be made with the written approval of the appropriate graduate program coordinator.

Criminal Justice, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Certificate in Criminal Justice is a post-baccalaureate graduate program designed to help facilitate career advancement in the criminal

justice and/or criminology field. The program seeks to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

This certificate program offers specialization for individuals interested or involved in law enforcement, corrections, juvenile justice or the courts. It combines survey and theory courses with research, management and policy courses on the justice system. The courses in the certificate program are the same as the master's courses. With minimum grades of B and upon acceptance into the master's degree program, these courses are fully transferable to the Master of Science (M.S.) in Criminal Justice degree program.

Student learning outcomes

1. Students will communicate effectively about criminal justice issues/policies using well-reasoned evidence from empirical studies to support their arguments and/or positions.
2. Students will demonstrate critical thinking and articulation of major issues related to the field in a diverse socio-cultural context while also understanding the diversity of lived experiences.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

The Post-baccalaureate Certificate in Criminal Justice program offers an abbreviated graduate-level course sequence of 15 credit hours for individuals with an academic and/or professional background in criminal justice. Applicants must meet all general admission requirements of the VCU Graduate School. (p. 35)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), five courses are required for the certificate, as specified in the list that follows. To receive the certificate, the student must achieve a B average in the five courses and earn no more than one C grade.

Curriculum requirements

| Course | Title | Hours |
|---|--|-----------|
| Required courses | | |
| CRJS 501 | Principles of Criminal Justice | 3 |
| CRJS 550 | Professional Ethics and Liability | 3 |
| CRJS 617 | Law and Criminal Justice Policy | 3 |
| CRJS/GVPA/PADM/URSP 623 | Research Methods for Government and Public Affairs | 3 |
| Elective | | 3 |
| One additional CRJS, GVPA, HSEP, URSP, PADM or PPAD course may be used as an elective. Other course(s) may be selected with permission of the criminal justice graduate coordinator. ¹ | | |
| Total Hours | | 15 |

1

Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 15 semester hours. The internship must be criminal justice-related and the student must be in their second semester of study.

The minimum total of graduate credit hours required for this certificate is 15.

Criminal Justice, Master of Science (M.S.)

Program goal

The M.S. degree program in criminal justice assists in broadening and refining the understanding of criminal justice and criminological issues to facilitate career success and advancement. The goal of the program is to develop critical-thinking skills among the students through the use of current criminal justice and criminological topics, reports and research findings.

Student learning outcomes

1. Students will communicate effectively about criminal justice issues/policies using well-reasoned evidence from empirical studies to support their arguments and/or positions.
2. Students will demonstrate critical thinking and articulation of major issues related to the field in a diverse socio-cultural context while also understanding the diversity of lived experiences.
3. Students will integrate their knowledge of existing theoretical and methodological frameworks to evaluate policy issues related to criminal justice and to be able to communicate to community stakeholders about the consequences of policy implementation.
4. Students will make impactful contributions to their fields, surrounding community and public policy through ethically responsible active participation and leadership in their careers.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|---------------------------------|--------------------|
| M.S. | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

In addition to the general admission requirements of the VCU Graduate School (p. 35), admission to the Master of Science in Criminal Justice also will be based on:

1. An undergraduate GPA that exceeds 2.7 overall
2. Personal narrative that clearly conveys professional goals and how they align with the objectives of the CRJS graduate program (Examples include prior work and life experiences related to interest in criminal justice and aptitude for the program; perception of intellectual capability and professionalism to successfully complete the graduate program and enhance the learning environment; information about academic honors or professional awards, including internships, scholarships, fellowships, prizes, honorary society memberships, publications, inventions or other creative work; and interest in receiving funding and or graduate teaching/research assistantships. If such opportunities are of interest, please be sure to describe relevant credentials for such positions.)
3. Previous evidence of ability to perform graduate-level work (where applicable).
4. A resume or curriculum vitae that includes all relevant information and professional designations

The courses in the post-baccalaureate graduate Certificate in Criminal Justice program are the same as the master's courses. With minimum grades of B and, upon acceptance into the master's degree program, courses from the certificate program are fully transferable to the Master of Science in Criminal Justice degree program.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), the Master of Science in Criminal Justice requires a minimum of 30 graduate credit hours of course work, with a minimum overall grade-point average of 3.0. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 30 semester hours.

A maximum of nine semester hours of graduate credit from an accredited institution may be transferred and applied toward the master's degree. All transfer requests require the approval of the graduate program coordinator and the Graduate School and may not have been counted toward another degree.

Curriculum requirements

| Course | Title | Hours |
|--|--|-----------|
| Core courses | | |
| CRJS 501 | Principles of Criminal Justice | 3 |
| CRJS 550 | Professional Ethics and Liability | 3 |
| CRJS 617 | Law and Criminal Justice Policy | 3 |
| CRJS 620 | Seminar in Criminology | 3 |
| CRJS/GVPA/PADM/ URSP 623 | Research Methods for Government and Public Affairs | 3 |
| CRJS 690 | Criminal Justice Policy Analysis | 3 |
| Electives ¹ | | |
| Select 12 credits in consultation with an adviser. | | 12 |
| Total Hours | | 30 |

1

Any additional CRJS, GVPA, HSEP, URSP, PADM or PPAD course may be used as an elective. Other course(s) may be selected with permission of the criminal justice graduate coordinator. Students who do not have at least one year of professional-level experience are encouraged to take a three-credit-hour internship as part of the 30 semester hours. The internship must be criminal justice-related and the student must be in their second semester of study.

The minimum total of graduate credit hours required for this degree is 30.

Accelerated opportunities

The department offers opportunities for qualified undergraduate students to earn both an undergraduate and graduate degree in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. See the individual program page for concentrations in the Undergraduate Bulletin (<http://bulletin.vcu.edu/undergraduate/government-public-affairs/>) for details.

Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate)

Program mission

The graduate Certificate in Gender Violence Intervention is designed to prepare individuals for positions related to understanding, studying, responding to and preventing sexual and domestic violence in a variety of communities and settings. It provides specialized study in gender violence and can be earned on its own, or in conjunction with another graduate degree in the Wilder School of Government and Public Affairs or the School of Social Work.

Program goals

1. The program will guide students in the development of strong academic understanding related to gender violence intervention.
2. The program will guide students in the development of skills in applying academic concepts to the practice of gender violence intervention.

Student learning outcomes

1. Academic understanding
 - a. Students will have knowledge of common types of gender violence.
 - b. Students will have knowledge of theoretical perspectives of gender violence.
 - c. Students will have knowledge of gender violence policies.
2. Skills
 - a. Students will have the ability to demonstrate methods of applying concepts to problems, practice and policy.
 - b. Students will demonstrate professional behaviors and boundaries while working in GVI settings and with diverse populations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic

regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Students with a B.A. or B.S. degree are eligible for admission into the certificate program. Relevant course work or practical experience will be considered in evaluating admission and substitution of courses. No more than six hours of substitution or equivalency credit will be granted. An overall GPA of 3.0 is required to receive the certificate, and no more than one grade of C may be earned in the certificate program curriculum.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), a total of 15 graduate credit hours is required to earn the Certificate in Gender Violence Intervention. Five courses are required, including an internship (three credit hours) that offers the opportunity for involvement in all phases of work in this field.

Curriculum requirements

Required courses

| Course | Title | Hours |
|--------------------|---|-----------|
| GVPA 623 | Research Methods for Government and Public Affairs | 3 |
| GVPA 635 | Theorizing Gender Violence | 3 |
| GVPA 693 | Internship | 3 |
| PADM 650 | Principles of Nonprofit Management | 3 |
| SLWK 761 | Interpersonal Violence in Clinical Social Work Practice | 3 |
| Total Hours | | 15 |

The minimum total of graduate credit hours required for this certificate is 15.

Students pursuing the Certificate in Gender Violence Intervention have an opportunity to combine their studies with a Master of Social Work (p. 761).

The combined Master of Social Work and Certificate in Gender Violence Intervention is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. Master of Social Work students may simultaneously earn the Certificate in Gender Violence Intervention offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to Graduate Admissions; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online application through Graduate Admissions (<https://www.vcu.edu/admissions/apply/graduate/>), pay the application fee and submit a personal statement expressing their interest in the program and indicating that they are currently in the M.S.W. program. Students may email the Graduate School (gradmail@vcu.edu) to arrange for references, resume/CV and transcripts already on file from the M.S.W. program to be added to the application.

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [ecramer@vcu.edu; (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., Wilder School [sbrubaker@vcu.edu; (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

See the individual program pages (<http://bulletin.vcu.edu/graduate/school-government-public-affairs/gender-violence-intervention-certificate/>) for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|--|-----------------------|---------------------------------|--------------------|
| M.S.W. and Post-baccalaureate graduate certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Curriculum requirements

| Course | Title | Hours |
|-------------------------|---|-----------|
| Required courses | | |
| GVPA 623 | Research Methods for Government and Public Affairs ¹ | 3 |
| GVPA 635 | Theorizing Gender Violence | 3 |
| GVPA 693 | Internship ² | 3 |
| PADM 650 | Principles of Nonprofit Management ³ | 3 |
| SLWK 761 | Interpersonal Violence in Clinical Social Work Practice | 3 |
| Total Hours | | 15 |

¹GVPA 623: satisfied by SLWK 706-SLWK 707 or SLWK 714-SLWK 715 [clinical or social work planning, administrative and policy practice research course (three credit hours)].

²GVPA 693: satisfied by SLWK 693-SLWK 694, SLWK 695; or SLWK 793-SLWK 794, SLWK 795 [a social work field practicum in an agency providing sexual or domestic violence services (three credit hours)].

³PADM 650: satisfied by SLWK 602-SLWK 606 or SLWK 608 (three credit hours).

The minimum total of graduate credit hours required for the Certificate in Gender Violence Intervention for students in the M.S.W. program is 15.

Field placements

Once students are admitted and enrolled in the certificate program, they should consult the certificate adviser when they choose their field placements to ensure that at least one placement is conducted in a setting that addresses gender violence.

Geographic Information Systems, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The graduate Certificate in Geographic Information Systems emphasizes the core functions and applications of GIS. It provides specialized training in the operations and techniques related to the creation, analysis, modeling, visualization, interpretation and management of geographic information.

The certificate program is designed to meet the educational needs of both traditional and nontraditional students. The GIS program prepares traditional students to utilize GIS in their major areas of study. Nontraditional students can also take advantage of the certificate program to learn and/or upgrade GIS knowledge and skills that are applicable and important to their professions.

Student learning outcomes

1. Understand the fundamental principles and concepts upon which GIS technology is based.
2. Utilize various data structures for storing geographic information in GIS database creation and management.
3. Apply appropriate GIS techniques in spatial analyses and problem solving.
4. Design maps and other GIS outputs that communicate effectively.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- Only applicants with prior GIS training, course work or work experience are considered for spring admissions. Other applicants should apply for fall admission due to course sequencing and prerequisites.
- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the prerequisites and general criteria of eligibility for admission to the GIS certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Geographic Information Systems
4. An official transcript showing successful completion of baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

At any time, students in the GIS certificate program may apply for admission into the Master of Urban and Regional Planning, the Master of Public Administration or the Master of Science in Criminal Justice degree programs. If accepted into a master's program, students may then transfer credits earned in the GIS certificate program toward partial fulfillment of the master's degree.

Degree requirements

The Certificate in Geographic Information Systems can be completed in one academic year. In addition to general VCU Graduate School graduation requirements (p. 32), students must complete 12 graduate credit hours of GIS course work that includes two required and two elective courses with a minimum grade-point average of 3.0 (out of 4.0).

Curriculum requirements

| Course | Title | Hours |
|------------------------------|---|-----------|
| Required courses | | |
| URSP 621 | Introduction to Geographic Information Systems (offered in fall semester) | 3 |
| or URSP 521 | Introduction to Geographic Information Systems | |
| URSP 625 | Spatial Database Management and GIS Modeling (offered in spring semester) | 3 |
| Electives | | |
| Select two of the following: | | 6 |
| URSP 523 | GIS for Land Use and Transportation Planning | |
| URSP 622 | Community Socioeconomic Analysis Using GIS | |
| URSP 626 | Transportation Analytics and Modeling | |
| URSP 627 | GIS Applications in Urban Design | |
| Total Hours | | 12 |

The minimum total of graduate credit hours required for this certificate is 12.

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

All credits earned in the certificate program are transferable to the Master of Science in Criminal Justice, the Master of Public Administration or the Master of Urban and Regional Planning programs. However, students must apply to the certificate and master's degree programs separately.

Sample plan of study

The following schedule is suggested as a means of completing the certificate program:

| Fall semester | Hours |
|---|-------|
| URSP 621 Introduction to Geographic Information Systems | 3 |

| | |
|--|-----------|
| One GIS-related elective (see list above) or other approved course | 3 |
| Term Hours: | 6 |
| Spring semester | |
| URSP 625 Spatial Database Management and GIS Modeling | 3 |
| One GIS-related elective (see list above) or other approved course | 3 |
| Term Hours: | 6 |
| Total Hours: | 12 |

The minimum total of graduate credit hours required for this certificate is 12.

Other GIS-related courses may be approved by the program chair or certificate program coordinator.

Homeland Security and Emergency Preparedness, Certificate in (Post-baccalaureate graduate certificate)

Program goal

This certificate program complements a student’s other fields of interest in public and government affairs. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels, as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

Student learning outcomes

Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- Admission applications that do not have a decision will automatically carry over to the next semester for consideration.

Applicants must meet all general admission requirements of the VCU Graduate School. (p. 35)

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), the graduate certificate program requires 15 credit hours, comprising five three-credit-hour graduate courses delivered through a combination of online technology and one on-campus session (three days) as described below. The courses offered in the certificate program are the same as those taken by students in the master’s program. With

minimum grades of B and upon acceptance into the master's program, these courses are fully transferable to the Master of Arts in Homeland Security and Emergency Preparedness degree program.

Online study

Web-based course delivery in an asynchronous format is designed around each course's own Blackboard site.

Curriculum requirements

| Course | Title | Hours |
|--------------------|--|-----------|
| HSEP 501 | Introduction to Homeland Security and Emergency Preparedness | 3 |
| HSEP 502 | Survey of Terrorism | 3 |
| HSEP 601 | Emergency Management: Response Planning and Incident Command | 3 |
| HSEP 602 | Government, Industry and Community Strategic Planning | 3 |
| HSEP 603 | Risk Assessment | 3 |
| Total Hours | | 15 |

The minimum total of graduate credit hours required for this certificate is 15.

Homeland Security and Emergency Preparedness, Master of Arts (M.A.)

Program goal

The Master of Arts in Homeland Security and Emergency Preparedness degree program is designed in the broadest interdisciplinary sense. Students will learn theoretical and practical knowledge that will prepare them for private or public sector employment in the expanding area of homeland security and emergency preparedness and/or further study in numerous areas of public policy. The curriculum focuses upon international and domestic security and preparedness issues related to terrorist threats, such as the 9/11 attack, and natural disasters, such as Hurricane Katrina. Since the attacks of Sept. 11, 2001, homeland security and emergency preparedness has become a critical aspect of governmental policy at the federal, state and local levels as well as within the private sector. The L. Douglas Wilder School of Government and Public Affairs believes that a stable and productive evolution of public and private sector policies in this area can only be achieved if academe

recognizes and accepts its role in developing scholars, professional policy analysts and informed governmental decision makers.

The master's degree is an online, distance-learning program. VCU's program takes a broad interdisciplinary approach to preparedness that will give students the ability to see the larger organizational, social, political, ethical and economic aspects of disaster studies, in addition to the policy-making and implementation aspects. The scholarly study of homeland security and emergency preparedness rests at the intersection of national defense, emergency management, law enforcement and policy management. With expertise in criminal justice, geography, government (local, state, federal and foreign), international affairs, policy planning and public administration, the Wilder School is particularly well-suited for such a program. Its location in the state capital and situated just 90 minutes from the nation's capital also provides easy access to homeland security institutions and practitioners.

Student learning outcomes

1. Students will achieve comprehension of the theory and practice of homeland security and emergency preparedness and be able to analyze policy and synthesize information in five key areas: risk and vulnerability analysis, strategic planning dilemmas of disasters and disaster preparedness, cybersecurity, institutional coordination, and intelligence operations and legal/constitutional aspects.
2. Students will develop advanced skills in expository writing and oral presentation.
3. Students will achieve comprehension of the theoretical and practical principles of emergency preparedness for both natural disasters and terrorist incidents and be able to analyze key topics related to natural disasters, emergency planning, terrorism and counterterrorism.
4. Students will perform research, policy analysis and risk assessment using several methodological and theoretical approaches to homeland security and emergency preparedness.
5. Students will also be able to evaluate scholarly and practitioner analyses of homeland security and emergency preparedness.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|------------------------|
| M.A. | Fall | Jul 25 | GRE, GMAT, MAT or LSAT |
| | Spring | Dec 16 | |
| | Summer | Apr 20 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in a field related to homeland security and emergency preparedness. The application for admission requires:

1. A transcript documenting the completion of a bachelor's degree
2. Three letters of reference (including both academic and professional references if possible)
3. A current resume
4. Satisfactory standardized test score (GRE, GMAT, MAT, LSAT)

5. A minimum 2.7 GPA (on a 4.0 scale) in the last 60 semester hours of undergraduate work

Students not meeting these requirements who have demonstrated advanced competency on a professional basis may be admitted to the program provisionally. The provisional period shall consist of the first nine hours of designated graduate work in which all grades must be no less than B. Provisional admission does not constitute a waiver of the requirement related to a standardized test.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 36 graduate credit hours with a cumulative minimum GPA of 3.0.

Off-campus study

Web-based course delivery is designed around each course's own web-based site utilizing the Blackboard education system, which provides the following:

1. Course syllabus
2. Course reference materials and links to supporting websites
3. Course lectures
4. Faculty-student and student-student communications via weekly discussion topics
5. Student writing assignments

Participation in online discussions is mandatory and will count for a significant percentage of each student's grades. Written work is submitted, evaluated and returned to students via the Blackboard education system assignment function.

Curriculum requirements

| Course | Title | Hours |
|----------|---|-------|
| HSEP 501 | Introduction to Homeland Security and Emergency Preparedness | 3 |
| HSEP 502 | Survey of Terrorism | 3 |
| HSEP 601 | Emergency Management: Response Planning and Incident Command | 3 |
| HSEP 602 | Government, Industry and Community Strategic Planning | 3 |
| HSEP 603 | Risk Assessment | 3 |
| HSEP 610 | Law Enforcement Policy and Judicial Precedent | 3 |
| HSEP 620 | Private Sector Issues in Security and Preparedness | 3 |
| HSEP 623 | Research Methods Homeland Security and Emergency Preparedness | 3 |
| HSEP 628 | Survey of Cyber Security | 3 |
| HSEP 640 | Intelligence and Counterintelligence | 3 |
| HSEP 650 | Public Health Preparedness | 3 |
| HSEP 690 | Capstone Seminar | 3 |

Total Hours 36

The minimum total of graduate credit hours required for this degree is 36.

Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The program mission is to empower community leaders with the knowledge, theory, research and real-world applications needed to creatively solve public issues and shape public policy. The program equips current and future executives, boards, staff and volunteers to lead, govern and manage nonprofit organizations collaboratively, thoughtfully and ethically.

In the graduate Certificate in Nonprofit Management program, students gain knowledge and skills in nonprofit governance, management, fundraising, and program development and evaluation that they will need to become leaders and change agents in this rapidly growing sector. The school welcomes degree applicants from any undergraduate major, as entry- and top-level employees in nonprofit organizations have a wide range of backgrounds, including the sciences and humanities, social sciences, and technology. Courses are scheduled in the evening and on weekends with the working professional in mind.

Student learning outcomes

1. To understand the nonprofit sector's relationship to the for-profit and government sectors
2. To know how to build a fundraising and donor communication plan model
3. To understand how to budget and evaluate the financial management practices of nonprofit organizations
4. To have the skills to analyze and implement laws impacting nonprofit organizations and their governance

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the

Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | None |
| | Spring | Oct 1 | |

Special requirements

- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 35), admission to the certificate program requires the same procedure used in applying to the M.P.A., except that a standardized examination is not required.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), the certificate requires a total of 15 graduate credit hours, comprising four courses in the graduate public administration program and one elective. The elective may be from the public administration curriculum or from elsewhere within the school or university.

Curriculum requirements

Required courses

| Course | Title | Hours |
|----------|---|-------|
| PADM 650 | Principles of Nonprofit Management | 3 |
| PADM 656 | Fund Development for the Nonprofit Sector | 3 |

| | | |
|--------------------|--|-----------|
| PADM 659 | Financial Management for Nonprofit Organizations | 3 |
| PADM 661 | Nonprofit Law, Governance and Ethics | 3 |
| Total Hours | | 12 |

Elective

| Course | Title | Hours |
|------------------------------|-------|-------|
| Select one of the following: | | 3 |

| | | |
|-------------------------|--|--|
| PADM 583 | Effective Managerial Communications | |
| PADM 584 | Planned Organizational Change | |
| PADM 585 | Power, Influence and Organizational Competence | |
| PADM 591 | Topic Seminar | |
| PADM/GVPA 601 | Principles of Public Administration | |
| PADM 602 | Public Administration Theory | |
| PADM 603 | Politics and Economics | |
| PADM 604 | Comparative Public Institutions | |
| PADM/SOCY 605 | Survey Research Methods | |
| PADM 606 | Government Management Models | |
| PADM 607 | Public Human Resource Management | |
| PADM 609 | Financial Management in Government | |

Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Graduate Certificate in Nonprofit Management is a cooperative arrangement between the School of Social Work and the L. Douglas Wilder School of Government and Public Affairs. Master of Social Work students pursuing a concentration in administration, planning and policy practice or clinical practice may simultaneously earn the graduate certificate in nonprofit management offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours. The program is designed to bring together two fields that benefit from complementary knowledge and skills that may be used in the government and nonprofit sectors. This integration of education in social work and nonprofit management draws on the contributions that each area can make to a professional knowledge base for practice in both fields.

Application process

To earn the Certificate in Nonprofit Management simultaneously with the M.S.W., it is necessary to complete two graduate admissions applications and be admitted to both programs. Students may begin their studies in either program, or apply to both programs simultaneously. Students who are already enrolled in good standing in the M.S.W. degree program are not required to submit any additional supporting documents when applying to the certificate program.

Visit the Wilder School's page (<https://wilder.vcu.edu/programs/public-administration/>) for more information.

Certificate requirements for M.S.W. students

Social work students enrolled in the SWAPPP concentration are required to complete three nonprofit courses: PADM 656, PADM 659 and PADM 661. Two social work SWAPPP courses are substituted for six

credit hours of the certificate's 15 credit-hour requirement. One of these courses is SLWK 712. The second course may be SLWK 711 or SLWK 713.

Social work students enrolled in the clinical practice concentration are required to complete four nonprofit courses (PADM 650, PADM 656, PADM 659 and PADM 661) and one elective. Two social work courses, SLWK 602 and SLWK 606 (six credits) or SLWK 608 (3 credit hours), may substitute for PADM 650 (three credits).

Note: M.S.W. students pursuing the clinical practice concentration must complete the entire 15 credit hours required for the Certificate in Nonprofit Management. Any six of the PADM nonprofit credit hours will satisfy the M.S.W. elective requirement for either concentration.

See the individual program pages for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the stand-alone M.S.W. and Certificate in Nonprofit Management programs.

Curriculum requirements - SWAPPP concentration

| Course | Title | Hours |
|-------------|---|-------|
| PADM 656 | Fund Development for the Nonprofit Sector | 3 |
| PADM 659 | Financial Management for Nonprofit Organizations | 3 |
| PADM 661 | Nonprofit Law, Governance and Ethics | 3 |
| SLWK 712 | Social Work Planning and Administrative Practice I | 3 |
| SLWK 711 | Strategies for Social Work Planning and Administrative Practice | 3 |
| or SLWK 713 | Social Work Planning and Administrative Practice II | |

The minimum total of graduate credit hours required for the Certificate in Nonprofit Management for students in the M.S.W. program SWAPPP concentration is 15.

Curriculum requirements - clinical practice concentration

| Course | Title | Hours |
|----------|--|-------|
| PADM 650 | Principles of Nonprofit Management | 3 |
| PADM 656 | Fund Development for the Nonprofit Sector | 3 |
| PADM 659 | Financial Management for Nonprofit Organizations | 3 |
| PADM 661 | Nonprofit Law, Governance and Ethics | 3 |

One graduate three credit-hour course from the Wilder School or elsewhere in the university (with approval from the program chair)

The minimum total of graduate credit hours required for the Certificate in Nonprofit Management for students in the M.S.W. program clinical practice concentration is 15.

Public Administration, Master of (M.P.A.)

Program accreditation

National Association of Schools of Public Affairs and Administration

Program goals

The Master of Public Administration program's mission supports a "generalist" conception of public administration. This seems quite appropriate as the students come from diverse academic and employment backgrounds and find jobs in a wide variety of government and nonprofit organizations.

The program's mission includes the following goals:

1. Prepare professional public managers, public officials and citizens to meet the challenges of public service in both government and nonprofit sectors
2. Advance the state of knowledge in the field of public administration through scholarly research and publications
3. Serve the profession and local, state, federal and international communities by extending faculty expertise and intellectual resources

Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will analyze, synthesize, think critically, solve problems and make decisions.
4. Students will articulate and apply a public service perspective.
5. Students will communicate and interact productively with a diverse and changing workforce and citizenry.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|---------------------------------|--------------------|
| M.P.A. | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |
| | Summer | Feb 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester. Please contact the program chair with specific application questions.

In addition to the general admission requirements of the VCU Graduate School (p. 35), selection is made on the basis of prior academic performance, professional accomplishments and other indicators of the ability to pursue graduate studies and a professional career in public management successfully. Specifically, the application for admission requires a transcript documenting the completion of a bachelor’s degree, three letters of reference (including both academic and professional references if possible), and a current resume. In addition, applicants must

have taken an undergraduate math course (algebra, statistics or finite mathematics) and passed with a minimum grade of C.

No applicant will be considered for admission to the M.P.A. program within two years of having been terminated from the program or of having been rejected for admission to the program.

Degree requirements

The Master of Public Administration program is designed to meet the graduate educational needs of pre-service and in-service professionals for careers in public management and analysis in the public and nonprofit sectors. The degree requires a minimum of 36 graduate credit hours (39 credit hours for students with less than one year of experience in the public or nonprofit sector). In addition to the general VCU Graduate School graduation requirements (p. 32), M.P.A. students must meet the following requirements:

1. Students must complete a minimum of 36 graduate credit hours, as approved, with an overall minimum GPA of 3.0. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship (for a total of 39 graduate credit hours for the degree).
2. Students who are required to take the practicum/internship will usually do so during the summer between the first and second years or during the last semester of course work. The practicum must include a minimum of 300 hours as required by the National Association of Schools of Public Affairs and Administration. The scheduling of the practicum will be flexible enough to accommodate the needs of those students who pursue the degree on a part-time basis. Each practicum will be negotiated between VCU and the host agency, including the scope of work to be performed by the student, the type and extent of supervision, both within the agency and from the university, and the stipend. A learning contract will be executed among the department, the agency and the student. A written student project is required to complete the internship.
3. All students are required to complete the courses in the core curriculum unless competence in the subject matter can be demonstrated on the basis of previous experience or course work. Course work that is waived must be replaced by approved substitutions in order to meet the minimum 36 (or 39) graduate credit hours required for the degree.

Curriculum requirements

| Course | Title | Hours |
|--------------------------------|---|-------|
| Core courses (required) | | |
| PADM/GVPA 601 | Principles of Public Administration | 3 |
| PADM 602 | Public Administration Theory | 3 |
| PADM 607 | Public Human Resource Management | 3 |
| PADM 609 | Financial Management in Government | 3 |
| PADM/GVPA/CRJS/URSP 623 | Research Methods for Government and Public Affairs | 3 |
| PADM 624 | Quantitative Methods for Public Administration | 3 |
| PADM/GVPA 625 | Public Policy Analysis | 3 |
| PADM 689 | Seminar in Public Administration: Integration of Theory and Practice (capstone) | 3 |
| Electives | | |

In consultation with an adviser, students may select up to 12 credit hours from any additional graduate-level CRJS, GVPA, HSEP or URSP courses.

Internship

| | | |
|----------|---|-----|
| GVPA 693 | Internship (required for students with less than one year of professional experience in the public or nonprofit sector) | 0-3 |
|----------|---|-----|

Total Hours **36-39**

The minimum number of graduate credit hours required for this degree is 36 (or 39 with internship).

Accelerated opportunities

The program offers opportunities for qualified undergraduate students to earn both an undergraduate and graduate degree in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. See the individual program page for concentrations in the Undergraduate Bulletin (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/political-science-program/>) for details.

Public Administration, Master of (M.P.A.)/ Juris Doctor (J.D.) from the University of Richmond [dual degree]

Program accreditation

National Association of Schools of Public Affairs and Administration

A cooperative arrangement with the University of Richmond School of Law makes it possible for students to receive a law degree from the University of Richmond and the Master of Public Administration from VCU. The dual degree program is designed to provide its graduates with competency in both public administration and law. This competency is applicable to areas of practice drawing upon knowledge and skills from each of these fields. The program brings together persons interested in both the broader aspects of public policy and government affairs and the law. It also brings together two fields that require complementary knowledge and skills that may be directed toward solving problems that are associated with the affairs of the government and nonprofit sectors. This integration of education in public administration and law draws

12 on the contributions that each discipline can make to a professional knowledge base for practice in both fields.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Application process

Application for admission to each program must be made separately to VCU and the T.C. Williams School of Law of the University of Richmond and the candidate will be subject to the admission requirements for the respective programs at each institution. Only students admitted to both programs will be eligible for the dual degree program.

Once admitted to the program, students are encouraged to meet with their advisers at both VCU and the University of Richmond to review the proposed course of dual degree study, keeping in mind the timelines and requirements for each program.

Students in the dual degree program may begin their studies at either institution and the primary program during the student's first year of study will determine the sequence of courses to be completed. Students must spend the entire first year at either VCU or the T.C. Williams School of Law, but may attend either institution in subsequent years. The first-year curriculum at the law school must be completed in its entirety during a single academic year.

Students who are accepted into the dual degree program are permitted to apply 12 credit hours of work in the M.P.A. degree program toward meeting the graduation requirements in the T.C. Williams School of Law and up to 12 credit hours of work in the law school are applied as elective credits toward meeting the degree requirements for the M.P.A. This credit application enables participants in the dual degree program to complete the requirements for the J.D. and the M.P.A. in an estimated four years of full-time course work after the completion of 99 or 102 credits, rather than a minimum of 123 or 126 if the degrees were pursued separately. Applicants for this program are required to meet all admission and academic standards of the T.C. Williams School of Law of the University of Richmond, the VCU Graduate School and the M.P.A. program.

Public Management, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The graduate certificate in public management is a program designed to enable practitioners in government and nonprofit organizations to acquire knowledge and skills in public administration without pursuing a full master's degree.

Student learning outcomes

1. Students will participate in and contribute to the policy process.
2. Students will lead and manage in public governance.
3. Students will articulate and apply a public service perspective.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- Students who achieve a minimum GPA of 3.6 in certificate course work in the L. Douglas Wilder School of Government and Public Affairs are eligible to apply to the Master of Public Administration program, provided they do so before the completion of the certificate. The student must still formally apply and be admitted to the M.P.A. program. A 3.6 GPA in certificate work does not guarantee admission to the M.P.A. program.

In addition to the general admission requirements of the VCU Graduate School (p. 35), admission to the certificate program requires the same procedure in applying to the M.P.A., except that a standardized examination is not required.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), the certificate requires a total of 18 hours of graduate credit hours involving a mix of required and elective courses. The courses are the same as those offered to M.P.A. students.

Curriculum requirements

Required courses

Public Policy and Administration, Doctor of Philosophy (Ph.D.)

Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes

1. Students will complete an original research project that will demonstrate the capacity to utilize appropriate methods in addressing major public policy and administration issues.
2. Students will develop mastery in a concentration area of the appropriate content and methods that will qualify them to perform original research.
3. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy formulation, implementation and analysis. Students will be able to demonstrate mastery of a particular area of public policy.
4. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
5. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Dec 15 for assistantships (Jan 30 final date for admission consideration) | |

Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Three letters of reference
4. A personal statement describing reasons for applying to the program
5. A current professional resume

Scores from a standardized examination (GRE, GMAT, MAT or LSAT) are optional.

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
 - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
 - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
 - c. Displays enthusiasm for the field of public policy and administration
 - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
 - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
 - b. Statistics (equivalent of PADM 624)
 - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec.15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct.15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct.15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is

not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<https://www.vcu.edu/admissions/apply/international/>).

Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 32), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Six of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|---|-------|
| Core courses | | |
| PPAD 711 | Seminar in Public Policy I | 3 |
| PPAD 712 | Seminar in Public Policy II | 3 |
| PPAD 721 | Survey of Applied Research Methods in Public Policy | 3 |
| PPAD 722 | Survey of Data Analysis Techniques in Public Policy | 3 |
| PPAD 724 | Seminar in Advanced Analytical Methods | 3 |
| PPAD 780 | Synthesizing Seminar in Public Policy | 3 |
| Concentration courses | | |

All students will select a concentration after the first year of study and after passing the comprehensive examination. They will take four courses in one of the concentrations (criminal justice policy, public administration, public policy, or urban and regional policy). Courses will be selected from a list designated by the concentration committee for each area. The concentration committee will approve the program of study for each student in the concentration.

12

Electives outside concentration

Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director.

6

Dissertation research

| | | |
|----------|---------------------------------|---|
| PPAD 898 | Dissertation Research (minimum) | 9 |
|----------|---------------------------------|---|

9

| | | |
|--------------------|--|-----------|
| Total Hours | | 45 |
|--------------------|--|-----------|

45

The minimum number of graduate credit hours required for this degree is 45.

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The

defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in criminal justice policy

Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes

1. Students will complete an original research project that will demonstrate the capacity to utilize appropriate methods in addressing major public policy and administration issues.
2. Students will develop mastery in a concentration area of the appropriate content and methods that will qualify them to perform original research.
3. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy formulation, implementation and analysis. Students will be able to demonstrate mastery of a particular area of public policy.
4. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.

5. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|---|--------------------|
| Ph.D. | Fall | Dec 15 for assistantships (Jan 30 final date for admission consideration) | |

Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test; and the Test of English as a Foreign Language is required for international students. Professional experience is not required but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Three letters of reference
4. A personal statement describing reasons for applying to the program
5. A current professional resume

Scores from a standardized examination (GRE, GMAT, MAT or LSAT) are optional.

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
3. Personal statement, resume, curriculum vitae that:

- a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
 - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
 - c. Displays enthusiasm for the field of public policy and administration
 - d. Is well-written and error-free
4. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
 - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
 - b. Statistics (equivalent of PADM 624)
 - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<https://www.vcu.edu/admissions/apply/international/>).

Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 32), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based

analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Curriculum requirements

| Course | Title | Hours |
|---|--|-----------|
| Core courses (required) | | |
| PPAD 711 | Seminar in Public Policy I | 3 |
| PPAD 712 | Seminar in Public Policy II | 3 |
| PPAD 721 | Survey of Applied Research Methods in Public Policy | 3 |
| PPAD 722 | Survey of Data Analysis Techniques in Public Policy | 3 |
| PPAD 724 | Seminar in Advanced Analytical Methods | 3 |
| PPAD 780 | Synthesizing Seminar in Public Policy | 3 |
| Concentration courses | | |
| PPAD 761 | Risk Assessment in Criminal Justice | 3 |
| Select six credits from the following concentration electives: | | |
| PPAD 760 | Criminal Justice Policy and Program Evaluation | 3 |
| PPAD 791 | Topical Seminar | 3 |
| PPAD 792 | Independent Study (Additional research methods or statistics course (within or outside the Wilder School)) | 3 |
| Additional research methods or statistics course (within or outside the Wilder School) | | |
| Electives outside concentration | | |
| Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director. | | 6 |
| Dissertation research | | |
| PPAD 898 | Dissertation Research (minimum) | 9 |
| Total Hours | | 45 |

The minimum number of graduate credit hours required for this degree is 45.

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to

material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice.

Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in public administration

Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed

to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes

1. Students will complete an original research project that will demonstrate the capacity to utilize appropriate methods in addressing major public policy and administration issues.
2. Students will develop mastery in a concentration area of the appropriate content and methods that will qualify them to perform original research.
3. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy formulation, implementation and analysis. Students will be able to demonstrate mastery of a particular area of public policy.
4. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
5. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's

faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Dec 15 for assistantships (Jan 30 final date for admission consideration) | |

Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Three letters of reference
4. A personal statement describing reasons for applying to the program
5. A current professional resume

Scores from a standardized examination (GRE, GMAT, MAT or LSAT) are optional.

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant’s ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
 - a. Clearly articulates the applicant’s academic research interests whereby a decision can be made as to the applicant’s “fit” with the program
 - b. Shows a clear indication of a faculty match and expertise for the applicant’s research interests
 - c. Displays enthusiasm for the field of public policy and administration
 - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
 - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
 - b. Statistics (equivalent of PADM 624)
 - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec.15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct.15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct.15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information

and materials are available from International Admissions (<https://www.vcu.edu/admissions/apply/international/>).

Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 32), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. | PPAD 791 | Topical Seminar | |
| PPAD 792 | Independent Study | |
| Electives outside concentration | | |
| Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director. | | 6 |
| Dissertation research | | |
| PPAD 898 | Dissertation Research (minimum) | 9 |
| Total Hours | | 45 |

The minimum number of graduate credit hours required for this degree is 45.

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to

measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Public Policy and Administration, Doctor of Philosophy (Ph.D.) with a concentration in urban and regional policy

Program mission

The mission of the Ph.D. in Public Policy and Administration program is to provide students with the knowledge and skills that will enable them to conduct original and scholarly research in academic institutions, governmental agencies and public policy research institutions. The purpose of the program is to prepare students for scholarly and

leadership roles in government, universities, research organizations and other settings where knowledge and research skills in public policy and administration are needed. The doctoral program is committed to accomplishing this mission by creating an intellectually vibrant atmosphere for scholarship involving an active faculty from a broad spectrum of academic disciplines and substantial interaction with government agencies and community groups.

Program goals

1. Enable students to develop expertise in a particular area of public policy
2. Enable students to apply their knowledge and skills in order to conduct original and scholarly research

Student learning outcomes

1. Students will complete an original research project that will demonstrate the capacity to utilize appropriate methods in addressing major public policy and administration issues.
2. Students will develop mastery in a concentration area of the appropriate content and methods that will qualify them to perform original research.
3. Students will be able to expertly apply public policy theories, integrating relevant ideas, concepts and approaches from the humanities, social sciences, law and public administration to policy formulation, implementation and analysis. Students will be able to demonstrate mastery of a particular area of public policy.
4. Students will be able to formulate appropriate research questions related to public policy and apply methodological knowledge to develop an appropriate research design for a research proposal.
5. Students will be able to conduct original and scholarly research on public policy issues.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy

requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Dec 15 for assistantships (Jan 30 final date for admission consideration) | |

Special requirements

- Master's degree, J.D. or M.D. from an accredited university. Graduate assistantships are only awarded for fall admission. For students wishing to be considered for a limited number of fellowships, materials must be received no later than Dec. 15. Spring admissions are considered exceptions and will be considered on a case-by-case basis.

Admission is open to qualified persons without regard to age, physical disability, national origin, race, religion or gender. Admission is competitive. The admission process is intended to assure a reasonable fit between the student's professional and research interests and faculty expertise. Consequently, otherwise qualified applicants may be denied admission.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants to the program must hold a master's degree or a recognized post-baccalaureate degree in one of the professions such as law or medicine from an accredited institution of higher education. A standardized test score, fewer than five years old, is required. Accepted examinations include the Graduate Record Examination, the Graduate Management Admissions Test, the Miller Analogies Test and the Law School Admissions Test and the Test of English as a Foreign Language

for international students. Professional experience is not required, but is considered desirable.

In order to apply for admission to the Ph.D. in Public Policy and Administration program, prospective students must submit:

1. A VCU application for graduate study
2. Transcripts from all previous colleges or universities
3. Three letters of reference
4. A personal statement describing reasons for applying to the program
5. A current professional resume

Scores from a standardized examination (GRE, GMAT, MAT or LSAT) are optional.

Admission standards

Applicants are evaluated based on the entire admission package; however, the following provides some guidelines for a competitive application.

1. Cumulative minimum GPA of 3.6 (on a four-point scale) or equivalent for graduate-level work
2. Standardized examination scores less than five years old (GRE preferred)
3. Three references – a minimum of one academic recommendation attesting to the applicant's ability to succeed in doctoral-level work
4. Personal statement, resume, curriculum vitae that:
 - a. Clearly articulates the applicant's academic research interests whereby a decision can be made as to the applicant's "fit" with the program
 - b. Shows a clear indication of a faculty match and expertise for the applicant's research interests
 - c. Displays enthusiasm for the field of public policy and administration
 - d. Is well-written and error-free
5. All students admitted to the program must have completed prior to admission, or are required to complete during the first year, the following graduate-level courses (or their equivalents):
 - a. Research methods (equivalent of PADM 623/GVPA 623/CRJS 623/URSP 623)
 - b. Statistics (equivalent of PADM 624)
 - c. Public policy, economics or administration/management

The primary admission deadline is Jan. 30 for enrollment to begin the following fall semester; however, materials must be received no later than Dec. 15 from those students wishing to be considered for assistantships. A small number of special admissions may be offered (Oct. 15 application deadline) for entry the following spring semester; however, these are considered on a case-by-case basis. Assistantships are only offered to those offered full-time admission in the fall. Applicants who wish to be considered for the Oct. 15 deadline must include a letter requesting and justifying early admission. If the request for early consideration is not accepted, the application will be held over to the Jan. 30 application deadline for consideration for the following fall admission.

While VCU Graduate School policy allows up to six credit hours of course work to be taken as a nondegree-seeking student prior to formal admission, taking such courses in no way guarantees admission to the program. Also, transfer credit hours are only considered for elective courses. Core courses must be taken at VCU.

Application information is available from the L. Douglas Wilder School of Government and Public Affairs Office of Graduate Advising or the Graduate Admissions Office. International applicant information and materials are available from International Admissions (<https://www.vcu.edu/admissions/apply/international/>).

Degree requirements

The doctoral program is structured around a core curriculum and four areas of concentration. The curriculum is designed to provide a sound intellectual foundation for the pursuit of scholarly research in areas of public policy, urban and regional policy, public administration and criminal justice policy. Students will select a concentration after the first year of study and after passing the comprehensive examination.

In addition to general VCU Graduate School graduation requirements (p. 32), students take a minimum of 45 graduate credit hours of course work and dissertation research in addition to any prerequisites that might be necessary. Five of these courses are part of the core, and at least four are concentration courses. The remaining two electives are to be taken outside the concentration with additional methodology courses highly recommended. Required courses generally will be available on an evening or weekend schedule.

Course work in the Ph.D. program has a strong orientation toward research, both applied and theoretical. Where appropriate, course work may be linked to funded university projects or to external agency-based analytical work. Courses emphasize research, writing and presentation skills.

All students must take a comprehensive qualifying examination on the core course requirements and a written or oral comprehensive examination in the concentration and must be approved by the VCU Graduate School for degree candidacy before beginning work on their dissertations.

Curriculum requirements

| Course | Title | Hours |
|--|---|-------|
| Core courses (required) | | |
| PPAD 711 | Seminar in Public Policy I | 3 |
| PPAD 712 | Seminar in Public Policy II | 3 |
| PPAD 721 | Survey of Applied Research Methods in Public Policy | 3 |
| PPAD 722 | Survey of Data Analysis Techniques in Public Policy | 3 |
| PPAD 724 | Seminar in Advanced Analytical Methods | 3 |
| PPAD 780 | Synthesizing Seminar in Public Policy | 3 |
| Concentration courses | | |
| PPAD 716 | Public Policy Economics | 3 |
| PPAD 750 | Seminar in Urban Policy | 3 |
| Select six credits from the following concentration electives: | | 6 |
| PPAD 791 | Topical Seminar | |
| URSP/GVPA 632 | Planning Theory and Processes | |
| URSP 637 | Sustainable Community Development | |
| URSP 643 | Housing Policy | |
| URSP 651 | Transportation Policy and Planning | |
| URSP 655 | Environmental Policy and Planning | |
| URSP 664 | Urban Economic Development Policy | |

| | | |
|---|--|-----------|
| URSP 672 | Food Systems, Rural Development and Landscape Conservation | |
| URSP 681 | International Urban Policy and Planning | |
| Electives outside concentration | | |
| Students will take at least two elective courses outside the concentration. Students may take courses at the 500-level or higher from other Ph.D. concentration areas (as listed under each concentration) and other programs such as homeland security, criminal justice, public administration, and urban and regional planning within the Wilder School. Alternately, students may choose two elective courses from other VCU graduate programs with the approval of the Ph.D. director. | | 6 |
| Dissertation research | | |
| PPAD 898 | Dissertation Research (minimum) | 9 |
| Total Hours | | 45 |

The minimum number of graduate credit hours required for this degree is 45.

Qualifying examinations

After completing all of the core courses in the Ph.D. program, each student takes a **comprehensive qualifying examination on the core**. The examination is designed to evaluate the mastery students have achieved over the body of knowledge represented by the core. It is intended to measure the ability of students to organize, integrate and creatively apply the knowledge in the field to important problems. Although organized around the courses in the core, the examination is not restricted to material covered in those courses. It is expected that doctoral students will read well beyond the confines of individual courses.

In order to continue in the program, students must attempt the qualifying examination no later than the next regular semester following the completion of the core course requirements. They must pass the exam by the end of the second regular semester after completing the core course requirements. A student may attempt the examination twice. Examinations are offered twice per year.

A student also must take a **written or oral comprehensive examination in the concentration**. The concentration faculty will determine the form of the examination. A student may attempt the examination twice. Each student must pass this second examination before defending a dissertation proposal.

Dissertation

After completing all course work for the concentration and passing both qualifying examinations, students must prepare a dissertation involving original research that contributes to the body of knowledge in the field. A committee approved by the associate dean of the Wilder School supervises the dissertation work. The chair of the committee must be appointed as graduate faculty and be a core or affiliate faculty member of the Ph.D. program.

The first formal step in the dissertation process is the development and defense of a dissertation prospectus that frames the problem to be studied, provides background on the problem, presents a review of relevant literature and justifies the methodology to be used. The defense of the prospectus as well as the completed dissertation must be presented orally and be approved by the dissertation committee. The dissertation defense is conducted in a forum open to other students and faculty.

Sustainability Planning, Certificate in (Post-baccalaureate graduate certificate)

Program mission

The mission of the Certificate in Sustainability Planning is to provide students with a better understanding of society's land use and natural resource systems, with a particular emphasis on the factors that contribute to or constrain their level of sustainability. The program aims to give students the knowledge and skills needed to identify and address barriers to sustainability and to formulate strategies to create more sustainable practices, systems and institutions. Using a holistic and integrated approach, the program emphasizes the interdependence of sociocultural, biophysical and political-economic dimensions of sustainability, especially as they relate to urban or other subnational regions.

An important theme of the program is that sustainability planning is primarily about influencing humans and their activities by modifying organizational structures, economic policies and legislative frameworks. Therefore, of paramount importance are topics normally associated with the social sciences, such as urban and regional planning, economics, political science and human geography. However, sustainability is an interdisciplinary science, and thus students must also examine topics typically linked to the biophysical sciences, such as ecology and geomorphology.

Students will acquire knowledge and skills that complement backgrounds in engineering, environmental and social sciences, business or other fields.

Program goals

1. Provide students with a better understanding of the sociocultural, biophysical and political-economic dimensions of the key problems faced by society with regard to natural resources and the environment — particularly in the context of urban and other subnational regions.
2. Develop students' insights on the underlying causes of these problems and on the political-economic and sociocultural factors that constrain the ability to address them more effectively.
3. Help student acquire the analytical and professional skills needed to identify and address barriers to sustainability and to formulate strategies to develop more sustainable lifestyles, systems and institutions.

Student learning outcomes

1. Students will develop a well-rounded knowledge of sustainability, with particular emphasis on the following elements:

- a. Factors influencing sustainability at the individual, household, community, regional, national and international scale
 - b. Balancing environmental, economic and social objectives in decision-making
 - c. The relationship between the built and natural environments and their effects on human health and well-being
 - d. Linkages among consumptions/lifestyle patterns, technology, regional carrying capacity and sustainability
 - e. Political-economic influences on land/resource use, community design, transportation and other human systems
 - f. Energy and natural resource efficiency and conservation
 - g. Renewable resource use, environmental management and landscape/habitat protection
 - h. Environmental remediation
2. Students will be able to communicate clearly and effectively, using a variety of methods, to enhance the collaborative and public nature of their work.
 3. Students will acquire the analytical and research skills needed to investigate a sustainability-related problem and develop strategies for addressing it.
 4. Student will acquire organizational skills and knowledge of management practices frequently employed within planning and related fields.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------------------------|--------------------|
| Certificate | Fall | April 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the prerequisites and general criteria of eligibility for admission to the sustainability planning certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Sustainability Planning
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study

All courses in the graduate Certificate in Sustainability Planning may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

Curriculum requirements

The mission of the Certificate in Sustainability Planning is to provide students with a better understanding of society's land use and natural resource systems, with a particular emphasis on the factors that contribute to or constrain their level of sustainability. The three core courses will provide subject matter knowledge on sustainable community development, natural resources management, and environmental policy and planning. In addition, students must take one course that focuses on socioeconomic sustainability to gain knowledge on the social equity aspect of sustainability planning. The remaining electives will provide an opportunity for more in-depth knowledge and training in specific subfields within sustainability (e.g., energy, land use or food systems) or disciplines to which a sustainability approach can be applied, such as housing policy.

Degree requirements

| Course | Title | Hours |
|--|--|----------|
| Core courses | | |
| URSP 637 | Sustainable Community Development | 9 |
| URSP 650 | Natural Resources and Environmental Planning | |
| URSP 655 | Environmental Policy and Planning | |
| Restricted elective (social equity) | | 3 |
| Select one from: | | |

| | | |
|---|--|-----------|
| URSP 622 | Community Socioeconomic Analysis Using GIS | |
| URSP 641 | Citizen Participation and Negotiation | |
| URSP 643 | Housing Policy | |
| Restricted electives (sustainability application) ¹ | | 6 |
| Select two from: | | |
| URSP 545 | Sustainable Energy Policy and Planning | |
| URSP 621 | Introduction to Geographic Information Systems | |
| URSP 628 | Land Use Planning | |
| URSP 672 | Food Systems, Rural Development and Landscape Conservation | |
| URSP 681 | International Urban Policy and Planning | |
| Total Hours | | 18 |

1

With approval from the program director, other 500- and 600-level courses offered within and beyond the Wilder School can fulfill the sustainability application electives requirements. The program director will review substitution requests to maintain a commitment to the specialization and general intent of the certificate.

The minimum total of graduate credit hours required for this certificate is 18.

Urban and Regional Planning, Master of (M.U.R.P.)

Program accreditation

Planning Accreditation Board

Program goals

The Master of Urban and Regional Planning degree program advances social justice and quality of life through planning, designing and evaluating options to create, enhance and sustain the social, economic and environmental conditions that improve communities. The program maintains a culture of diversity, equity and inclusion. The goals for the program are to:

1. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work
2. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development
3. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate
4. Address issues of historic and current inequity, social justice and sustainability in built environments, neighborhoods and communities

Student learning outcomes

1. Students will acquire knowledge of planning and other related fields relevant to real-world and theoretical settings.
2. Students will be able to pose and solve urban planning problems using planning skills, including:
 - a. research methods,
 - b. plan creation and implementation,
 - c. public engagement, and
 - d. effective communication and leadership.
3. Students will understand how to use the values and ethics of professional planning to inform and guide planning decisions.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|----------|-----------------------|--|--------------------|
| M.U.R.P. | Fall | Apr 1 (Mar 1 for assistantship consideration or financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply:

1. Students must have an undergraduate GPA of at least 2.7 (on a 4.0 scale).
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the graduate certificates in Geographic Information Systems, Sustainability Planning or Urban Revitalization may be applied to meet the requirements of the Master of Urban and Regional Planning degree. However, successful completion of one of these certificate programs does not guarantee admission into the M.U.R.P. degree program.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours are electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

Curriculum requirements

| Course | Title | Hours |
|---|--|-----------|
| Core courses | | |
| URSP 610 | Introduction to Planning | 3 |
| URSP 622 | Community Socioeconomic Analysis Using GIS | 3 |
| URSP/GVPA/PADM/URSP 623 | Research Methods for Government and Public Affairs | 3 |
| URSP/GVPA 632 | Planning Theory and Processes | 3 |
| URSP 635 | Legal and Legislative Foundations of Planning | 3 |
| URSP 662 | Foundations for Development Planning | 3 |
| URSP 760 | Capstone Proposal Development | 3 |
| URSP 761 | Planning Studio | 3 |
| Capstone | | |
| Select one of these two capstone options. | | 3 or 6 |
| URSP 762 | Professional Plan (3 credits) | |
| URSP 764 | Thesis or Projects (6 credits) | |
| Electives | | |
| Select 18 or 21 credits from the list below as appropriate. | | 18 or 21 |
| Total Hours | | 48 |

The minimum total of graduate credit hours required for this degree is 48.

Electives

| Course | Title | Hours |
|--------------------|--|-------|
| FIRE 627 | Real Estate Development | |
| FIRE 629 | Cases in Real Estate | |
| URSP 502 | Global Economic Change and Development | |
| URSP 517 | Historic Preservation in Planning | |

| URSP 797 | Directed Research | |

With the approval of the program chair, other appropriate graduate courses may be applied as electives.

Concentrations

If a student chooses to pursue a specific concentration, the concentration courses and corresponding credit hours will take the place of electives in the above list.

Internship

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

Sample plan of study

Year one

| Semester 1 | | Hours |
|--------------------|--|-----------|
| URSP 610 | Introduction to Planning | 3 |
| URSP 622 | Community Socioeconomic Analysis Using GIS | 3 |
| URSP 632 | Planning Theory and Processes | 3 |
| Elective | | 3 |
| Term Hours: | | 12 |

Semester 2

| | | |
|--------------------------------|--|-----------|
| URSP/GVPA/ PADM/CRJS 623 | Research Methods for Government and Public Affairs | 3 |
| URSP 662 | Foundations for Development Planning | 3 |
| URSP 761 | Planning Studio | 3 |
| Elective | | 3 |
| Term Hours: | | 12 |

Year two

Semester 1

| | | |
|--------------------|---|-----------|
| URSP 635 | Legal and Legislative Foundations of Planning | 3 |
| URSP 760 | Capstone Proposal Development | 3 |
| Elective | | 6 |
| Term Hours: | | 12 |

Semester 2

| | | |
|----------------------------|--|-----------|
| URSP 762 or URSP 764 | Professional Plan or Thesis or Projects | 3 or 6 |
| Elective | | 6 or 9 |
| Term Hours: | | 12 |
| Total Hours: | | 48 |

The minimum total of graduate credit hours required for this degree is 48.

Urban and Regional Planning, Master of (M.U.R.P.) with a concentration in community revitalization

Program accreditation

Planning Accreditation Board

Program goals

The Master of Urban and Regional Planning degree program advances social justice and quality of life through planning, designing and evaluating options to create, enhance and sustain the social, economic and environmental conditions that improve communities. The program maintains a culture of diversity, equity and inclusion. The goals for the program are to:

1. Prepare students to be effective practitioners in a variety of planning-related organizations, especially in mature communities and regions, with competence in the preparation, presentation and implementation of professional plans and in doing planning-related work
2. Produce scholarship that increases knowledge and understanding of sustainability and planning support systems as well as the development of innovative methodological approaches and solutions to address issues related to sustainable community development
3. Provide useful planning services to mature communities and regions, in cooperation with private and public planners, as appropriate
4. Address issues of historic and current inequity, social justice and sustainability in built environments, neighborhoods and communities

Student learning outcomes

1. Students will acquire knowledge of planning and other related fields relevant to real-world and theoretical settings.
2. Students will be able to pose and solve urban planning problems using planning skills, including:
 - a. Research methods
 - b. Plan creation and implementation
 - c. Public engagement
 - d. Effective communication and leadership
3. Students will understand how to use the values and ethics of professional planning to inform and guide planning decisions.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|----------|-----------------------|--|--------------------|
| M.U.R.P. | Fall | Apr 1 (Mar 1 for assistantship consideration or financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply:

1. Students must have a minimum undergraduate GPA of 2.7 (on a 4.0 scale).
2. Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B.
3. Generally, at least two of the three letters of reference should come from former faculty.

All courses in the graduate certificates in Geographic Information Systems, Sustainability Planning or Urban Revitalization may be applied to meet the requirements of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students in the M.U.R.P. degree program must:

1. Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours consist of concentration requirements and electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
2. Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department's faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to

meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

1. Community revitalization
2. Environmental planning
3. Metropolitan planning

Curriculum requirements

| Course | Title | Hours |
|---|--|---------------|
| Core courses | | |
| URSP 610 | Introduction to Planning | 3 |
| URSP 622 | Community Socioeconomic Analysis Using GIS | 3 |
| URSP/GVPA/PADM/ URSP 623 | Research Methods for Government and Public Affairs | 3 |
| URSP/GVPA 632 | Planning Theory and Processes | 3 |
| URSP 635 | Legal and Legislative Foundations of Planning | 3 |
| URSP 662 | Foundations for Development Planning | 3 |
| URSP 760 | Capstone Proposal Development | 3 |
| URSP 761 | Planning Studio | 3 |
| Capstone | | |
| Select one of these two capstone options. | | 3 or 6 |
| URSP 762 | Professional Plan (3 credits) | |
| URSP 764 | Thesis or Projects (6 credits) | |
| Concentration requirements | | 12 |
| Electives | | 6 or 9 |
| Total Hours | | 48 |

The minimum total of graduate credit hours required for this degree is 48.

Community revitalization concentration (12 credits)

| Course | Title | Hours |
|--|--|-------|
| Required concentration courses | | |
| URSP 664 | Urban Economic Development Policy | 3 |
| URSP 666 | Urban Commercial Revitalization | 3 |
| Concentration electives | | |
| Select six credit hours from the following: ¹ | | 6 |
| FIRE 627 | Real Estate Development | 3 |
| FIRE 629 | Cases in Real Estate | 3 |
| FIRE 658 | Real Estate Finance and Investments | 3 |
| PADM 609 | Financial Management in Government | 3 |
| PADM 650 | Principles of Nonprofit Management | 3 |
| PADM 656 | Fund Development for the Nonprofit Sector | 3 |
| URSP 517 | Historic Preservation in Planning | 3 |
| URSP 521 | Introduction to Geographic Information Systems | 3 |
| URSP 541 | Urban Public Policy-making Processes | 3 |

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|----------|-----------------------|--|--------------------|
| M.U.R.P. | Fall | Apr 1 (Mar 1 for assistantship consideration or financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following specifications apply:

1. Students must have a minimum undergraduate GPA of 2.7 (on a 4.0 scale).

- Students not meeting these requirements may be admitted to the program on a provisional basis. The provisional period shall consist of the first nine to 12 hours of designated graduate work in which all grades must be no less than B.
- Generally, at least two of the three letters of reference should come from former faculty.

All courses in the graduate certificates in Geographic Information Systems, Sustainability Planning or Urban Revitalization may be applied to meet the requirements of the Master of Urban and Regional Planning degree. However, successful completion of either certificate does not guarantee admission into the M.U.R.P. degree program.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students in the M.U.R.P. degree program must:

- Complete a minimum of 48 graduate credit hours plus an internship (not for credit). A core of required courses accounts for 24 of these credit hours. A capstone requirement accounts for three or six of the required 48 credit hours. The remaining 18 or 21 credit hours consist of concentration requirements and electives. A minimum overall GPA of 3.0 (on a 4.0 scale) is required for receipt of the M.U.R.P. degree. In addition, students must receive a minimum grade of B for all core and capstone courses.
- Complete either a six-credit thesis (URSP 764) or prepare a three-credit professional plan project through the professional plan course (URSP 762). Program administrators request permission to utilize the grade of PR, in addition to normal letter grades (A, B, C, D or F) in URSP 762. This will allow students the ability to work on their plans over a more extended period of time, if necessary.

In selecting their elective courses, students may (1) opt for exposure to a wide array of planning-related subject matter (the generalist or comprehensive approach), (2) select one of the areas of specialization defined by the department’s faculty (see the list that follows) or (3) develop an individualized program, focusing on one or more self-defined topics. Regardless of the approach selected, students are expected to meet regularly with their faculty advisers for discussion of their courses of study in relation to their career plans.

The following faculty-defined areas of specialization are offered by the department:

- Community revitalization
- Environmental planning
- Metropolitan planning

Curriculum requirements

| Course | Title | Hours |
|-------------------------|--|-------|
| Core courses | | |
| URSP 610 | Introduction to Planning | 3 |
| URSP 622 | Community Socioeconomic Analysis Using GIS | 3 |
| URSP/GVPA/PADM/URSP 623 | Research Methods for Government and Public Affairs | 3 |
| URSP/GVPA 632 | Planning Theory and Processes | 3 |
| URSP 635 | Legal and Legislative Foundations of Planning | 3 |
| URSP 662 | Foundations for Development Planning | 3 |

| | | |
|-----------------------------------|--------------------------------|---------------|
| URSP 760 | Capstone Proposal Development | 3 |
| URSP 761 | Planning Studio | 3 |
| Capstone | | 3 or 6 |
| URSP 762 | Professional Plan (3 credits) | |
| URSP 764 | Thesis or Projects (6 credits) | |
| Concentration requirements | | 12 |
| Electives | | 6 or 9 |
| Total Hours | | 48 |

The minimum total of graduate credit hours required for this degree is 48.

Metropolitan planning concentration courses

| Course | Title | Hours |
|--|--|-------|
| Required concentration courses | | |
| URSP 628 | Land Use Planning | 3 |
| URSP 651 | Transportation Policy and Planning | 3 |
| Concentration electives | | |
| Select six credit hours from the following: ¹ | | |
| FIRE 627 | Real Estate Development | |
| FIRE 629 | Cases in Real Estate | |
| URSP 520 | Park Planning | |
| URSP 521 | Introduction to Geographic Information Systems | |
| URSP 523 | GIS for Land Use and Transportation Planning | |
| URSP 541 | Urban Public Policy-making Processes | |
| URSP 591 | Special Topics in Urban and Regional Studies and Planning ² | |
| URSP 611 | Principles of Urban Design | |
| URSP 621 | Introduction to Geographic Information Systems | |
| URSP 625 | Spatial Database Management and GIS Modeling | |
| URSP 626 | Transportation Analytics and Modeling | |
| URSP 627 | GIS Applications in Urban Design | |
| URSP 641 | Citizen Participation and Negotiation | |
| URSP 643 | Housing Policy | |
| URSP 659 | Transportation Project Development and Evaluation | |
| URSP 664 | Urban Economic Development Policy | |
| URSP 681 | International Urban Policy and Planning | |
| URSP 691 | Topics in Urban and Regional Planning ² | |

¹ With the approval of the program chair, other appropriate graduate courses may be applied toward the concentration.

² URSP 591 or URSP 691 may be selected when the topic is related to metropolitan planning.

Electives

| Course | Title | Hours |
|--|--|--------|
| Select six or nine credit hours (depending on selected capstone option) from the following: ¹ | | |
| URSP 502 | Global Economic Change and Development | 6 or 9 |
| URSP 517 | Historic Preservation in Planning | |
| URSP 520 | Park Planning | |
| URSP 521 | Introduction to Geographic Information Systems | |
| URSP 523 | GIS for Land Use and Transportation Planning | |
| URSP 525 | Site Planning and Graphics | |
| URSP 541 | Urban Public Policy-making Processes | |
| URSP 545 | Sustainable Energy Policy and Planning | |
| URSP 561 | Real Estate Development Finance for Planners | |
| URSP 567 | The American Suburb | |
| URSP 591 | Special Topics in Urban and Regional Studies and Planning | |
| URSP 605 | Urban Planning History | |
| URSP 611 | Principles of Urban Design | |
| URSP 621 | Introduction to Geographic Information Systems | |
| URSP 625 | Spatial Database Management and GIS Modeling | |
| URSP 626 | Transportation Analytics and Modeling | |
| URSP 627 | GIS Applications in Urban Design | |
| URSP/PADM 630 | Strategic Planning and Management in the Public Sector | |
| URSP 637 | Sustainable Community Development | |
| URSP 641 | Citizen Participation and Negotiation | |
| URSP 643 | Housing Policy | |
| URSP 647 | Adaptive Reuse of Buildings | |
| URSP 650 | Natural Resources and Environmental Planning | |
| URSP 652 | Environmental Analysis | |
| URSP 653 | Transportation Projects | |
| URSP/ENVS/BIOL 654 | Environmental Remote Sensing | |
| URSP 655 | Environmental Policy and Planning | |
| URSP 658 | Transportation Finance | |
| URSP 659 | Transportation Project Development and Evaluation | |
| URSP 664 | Urban Economic Development Policy | |
| URSP 666 | Urban Commercial Revitalization | |
| URSP 672 | Food Systems, Rural Development and Landscape Conservation | |
| URSP 681 | International Urban Policy and Planning | |
| URSP 691 | Topics in Urban and Regional Planning | |
| URSP 794 | Planning Practicum Seminar | |
| URSP 797 | Directed Research | |

With the approval of the program chair, other appropriate courses may be applied as electives.

Internship

The internship is designed to give students practical experience in planning-related activities in an institutional context. Normally, the internship is taken during the summer between the first and second year or during the second year. Many opportunities for internship positions, as well as part- and full-time jobs in planning at all levels of government, exist within the Richmond area. Upon request, the internship requirement may be waived for students with substantial planning-related professional experience.

Urban and Regional Planning, Master of (M.U.R.P.)/Juris Doctor (J.D.) with the University of Richmond [dual degree]

Program accreditation

Planning Accreditation Board

A cooperative arrangement with the University of Richmond School of Law makes it possible for students to receive a law degree (J.D.) and an urban and regional planning degree (M.U.R.P.) in four years rather than the five years ordinarily required.

The purpose of the program is to integrate the two professional curricula and to provide the expertise necessary to apply legal analytical skills and planning methods and analysis to urban and regional policy issues and problems. The dual degree program is designed to equip graduates for a variety of professional positions, including staff for legislative committees and government agencies and commissions, government legal staff, private consulting, neighborhood advocacy, directorships of planning and related agencies and executive aides to elected officials.

Refer to individual program pages for admission requirements, application deadlines, program goals, student learning outcomes, degree requirements, curriculum requirements and graduation requirements specific to the separate programs and concentrations.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Application process

Interested students must apply separately for and be admitted to the University of Richmond School of Law and the Master of Urban and

Regional Planning program at VCU. Students will spend the entire first year in either the University of Richmond School of Law or the L. Douglas Wilder School of Government and Public Affairs, and the second year in the program not selected the first year. Twelve credit hours of the planning program will be applied toward meeting the graduation requirements of the law school, and 12 credit hours in the law school will be applied toward meeting requirements of the M.U.R.P. program.

Upon admission to the dual degree program, every student will be assigned an adviser in each program who will assist in planning a course of study that will include all of the required courses in each program plus such elective courses that will best serve the interests of the individual student.

Students deciding not to complete the dual degree program must meet all of the regular requirements of either the J.D. or M.U.R.P. to receive the degree of their choice.

Urban Revitalization, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation

Planning Accreditation Board

Program goal

The Certificate in Urban Revitalization provides specialized training in the techniques and processes of city and neighborhood revitalization. Topics include adaptive reuse of buildings, historic preservation, real estate market analysis and the role of private-public partnerships in financing development projects. The certificate is useful for midcareer professionals who wish to learn new skills to expand their career options. It also is useful for recent college graduates who desire advanced training beyond the baccalaureate level and accelerated entry into the job market.

At any time, students in the certificate program may apply for admission into the Master of Urban and Regional Planning program and, if accepted, may transfer the certificate credits toward partial fulfillment of the master's degree requirements.

Student learning outcomes

1. Students should display evidence of having developed a multidisciplinary understanding of urban life.

2. Students will demonstrate an understanding of, and a willingness to act in accordance with, the ethics and values of the professional.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|---------------------------------|--------------------|
| Certificate | Fall | Apr 1 (Mar 1 for financial aid) | |
| | Spring | Oct 1 | |

Special requirements

- These deadlines are designed to allow sufficient time for application review and admission processing. Applications may be submitted after the deadline; however, there is no guarantee of sufficient time for processing. Any application submitted too late for current semester processing will be considered for the following semester.

In addition to the general admission requirements of the VCU Graduate School (p. 35), the prerequisites and general criteria of eligibility for admission to the urban revitalization certificate program include:

1. Completion of an official application form
2. Three letters of reference
3. Letter of intent describing interest in applying for the Certificate in Urban Revitalization
4. An official transcript showing successful completion of a baccalaureate degree or its equivalent from an accredited college or university with a minimum grade point average of 2.7 (out of 4.0) in the last 60 hours of undergraduate study
5. Demonstration of professional experience in planning or work related to the certificate program (The experience requirement may be waived for candidates who demonstrate professional promise.)

All courses in the graduate Certificate in Urban Revitalization may be applied to meet the requirement of the Master of Urban and Regional Planning degree. However, successful completion of the certificate does not guarantee admission into the M.U.R.P. degree program.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), the Certificate in Urban Revitalization program requires 18 graduate credit hours of course work, which blends instruction in planning, urban design, economics and finance.

Curriculum requirements

| Course | Title | Hours |
|---|--|-----------|
| Select six of the following: | | 18 |
| FIRE 629 | Cases in Real Estate ¹ | |
| URSP 517 | Historic Preservation in Planning | |
| URSP 610 | Introduction to Planning | |
| URSP 611 | Principles of Urban Design | |
| URSP 643 | Housing Policy | |
| URSP 647 | Adaptive Reuse of Buildings | |
| URSP 664 | Urban Economic Development Policy | |
| URSP 666 | Urban Commercial Revitalization | |
| URSP 691 | Topics in Urban and Regional Planning (architectural analysis and historical preservation) | |
| URSP 691 | Topics in Urban and Regional Planning (historical preservation application) | |
| Other elective, if approved by the program chair or certificate program coordinator | | |
| Total Hours | | 18 |

1

Either URSP 647 or FIRE 629, but not both, may be applied toward the degree requirements.

For students who wish to focus primarily on historic preservation 12 of the program's 18 hours should include:

| Course | Title | Hours |
|----------|--|-------|
| URSP 517 | Historic Preservation in Planning | 3 |
| URSP 647 | Adaptive Reuse of Buildings | 3 |
| URSP 691 | Topics in Urban and Regional Planning (architectural analysis and historical preservation) | 3 |

| | | |
|--------------------|---|-----------|
| URSP 691 | Topics in Urban and Regional Planning (historical preservation application) | 3 |
| Total Hours | | 12 |

The minimum total of graduate credit hours required for this certificate is 18.

SCHOOL OF MEDICINE

The School of Medicine opened on Nov. 5, 1838, as the medical department of Hampden-Sydney College, and became the Medical College of Virginia in 1854. Full-time clinical faculty members were first appointed in 1928, and improved facilities became available between 1936 and 1941 with the completion of the 600-bed West Hospital, A.D. Williams Clinic and Hunton Hall dormitory, located on the current site of the Main Hospital building. Growth in faculty, students and facilities continued after World War II, leading to the development of today's academic health center.

Hospital facilities on the MCV Campus include both inpatient and outpatient facilities. MCV Hospitals of the VCU Health System is licensed for 902 beds. In addition, the hospital at the McGuire Veterans Affairs Medical Center (600 beds) provides excellent patient care, training and research opportunities for the School of Medicine through its affiliation programs.

In the School of Medicine, advanced degree programs are coordinated through the Office of the Associate Dean for Graduate Education, who acts for the dean of the School of Medicine on all issues related to administration of these programs. Each advanced degree program is represented by a graduate program director. Graduate program directors are appointed either by the chair of the department administering the program or, in the case of interdisciplinary programs, by the associate dean for graduate education in consultation with the chairs of participating departments. Graduate program directors administer all aspects of their programs and represent their programs within and outside of the School of Medicine.

Mission statement

The mission of the VCU School of Medicine is to provide pre-eminent education to physicians and scientists in order to improve the quality of health care for humanity. Through innovative, scholarly activity and a diverse educational context, the school seeks to create and apply new knowledge and to provide and continuously improve systems of medical and science education. Furthermore, the mission includes the development of more effective health care practices to address the needs of diverse populations and to provide distinguished leadership in the advancement of medicine and science.

The primary aim of the School of Medicine is to provide an academic environment appropriate for the education of its students, including undergraduate medical students, advanced-degree (graduate) students and graduate physician house officers, as well as continuing education directed toward the needs of practicing physicians. In the classroom, laboratory, clinic and hospital, the faculty and students are brought together in teaching-learning experiences that promote scientific scholarship and personal growth in knowledge and professional skills applicable to careers in a diverse workplace environment.

The School of Medicine and its faculty have vested responsibilities for the advancement of knowledge through research and for service to the community through application of skills in biomedical knowledge, health care leadership and patient care. Therefore, the school shares with teaching the interdependent and almost inseparable objectives of research and service.

The School of Medicine is located on the MCV Campus of VCU.

For comprehensive information on the School of Medicine departments, programs and faculty, please visit the school website (<http://www.medschool.vcu.edu>).

Faculty and facilities

The School of Medicine consists of 700 full-time faculty, including affiliates, assisted by 630 residents and fellows and more than 700 clinical voluntary faculty. Programs of instruction and research are conducted on campus, at the McGuire VA Medical Center and at affiliated hospitals in an effort to expose the students to the variety of clinical disorders encountered in the eastern U.S.

Health policies

Virginia Commonwealth University School of Medicine requires that all medical students carry active health insurance. Health insurance benefits must be equal to or greater than those provided by the university health carrier. In addition, it is required that all students complete required immunizations within six months of matriculation and have repeat tuberculosis screening performed prior to the third-year clerkships. For

details related to these policies, please visit the school's website (<http://www.medschool.vcu.edu/>).

The School of Medicine requires that all students enrolled in the graduate academic programs administered by the school hold active health insurance coverage. This requirement applies to students at all degree categories: doctoral, master's and certificate. Compliance is monitored by administrative offices of the school and departments. Failure to comply with this requirement is grounds for dismissal.

Graduate programs

The School of Medicine administers graduate programs leading to the:

- Doctor of Philosophy (Ph.D.) with degrees in biochemistry, biostatistics, human genetics, epidemiology, microbiology and immunology, healthcare policy and research, neuroscience, medical physics, pharmacology and toxicology, physiology and biophysics, and social and behavioral sciences
- Master of Science (M.S.) with degrees in addiction studies, anatomy and neurobiology, biochemistry, biostatistics, genetic counseling, human genetics, medical physics, microbiology and immunology, pharmacology and toxicology, physiology and biophysics and Master of Public Health (M.P.H.)
- Certificates in addiction studies (with intermediate and advanced concentrations), clinical genetics, genomics data science, medical physics and pre-medical graduate health sciences

Other information

Additional policies and guidelines for graduate programs in the School of Medicine are in other sections of this Bulletin and on the Graduate Student Resources (<https://medschool.vcu.edu/current-students/#den337656>) section of the School of Medicine Education (<https://medschool.vcu.edu/education/>) website.

Exceptions

Exceptions to School of Medicine graduate program policies are rare, but a student may make a written request for such an exception to their current program director who will coordinate with the associate dean for graduate education and the School of Medicine Graduate Programs Committee to consider whether the exception is in the best interest of the student, the programs involved and all other programs within the School of Medicine.

Application and admission to graduate programs

Applicants to graduate programs must submit all requested information in their application and be reviewed by their anticipated programs. To be admitted, an applicant must be approved by the program, the associate dean for graduate education and VCU Admissions. Although most programs will have additional and/or more specific admissions criteria, the minimum requirements for applicants admitted to advanced degree programs in the School of Medicine are:

- A bachelor's, master's or equivalent degree in a field relevant to their anticipated graduate program
- A minimum cumulative GPA of 3.0 (on a 4.0 scale) in their training leading to their prior degree(s)
- Communication skills deemed satisfactory by each program

- For applicants for whom English is not their native language or for whom the instruction for their prior academic degree was not in English, a TOEFL score of 100 or an IELTS score of 6.5
- Appropriate GRE or other test scores as determined by each program (if required)
- Appropriate experience as determined by each program

Applicants that withhold information about their prior training or provide misleading information will not be offered admission or will have their admission offer rescinded by the program, the associate dean for graduate education or VCU Admissions.

Ph.D., master's and certificate programs

General requirements for graduate degrees

A degree is earned only after payment of all tuition, fees and other charges to the university and after a student has fulfilled all requirements of the degree program including final submission of a successfully defended and approved dissertation, thesis, or summary of capstone or other final project (if required). Each graduate program in the School of Medicine has specific curricular requirements as described in other sections of the Bulletin.

Expectations for graduate students

All graduate students are expected to:

- Exhibit professional behavior and treat all faculty members, staff and fellow students with honesty, dignity, respect and fairness
- Be fully committed to and give full effort on all aspects of their training
- Work with graduate program directors, counselors and advisers to enroll in appropriate course work for their programs and strive to achieve all training benchmarks
- Register for nine to 15 credits in the fall and spring semesters and at least three credits in the summer session (if required) to be considered full-time
- As required by their programs, identify (with guidance) and work collaboratively with advisers for thesis, dissertation, capstone and other projects
- Maintain satisfactory academic progress
- Reach out for guidance, advice and input from program directors, advisers and others when needed
- Participate when possible in the recruitment of future School of Medicine graduate students
- Follow other guidelines, policies and expectations described in the VCU Bulletin, on the School of Medicine website, in the School of Medicine Professionalism Committee guidelines, on the VCU Student Conduct and Academic Integrity website and in program materials

Advisers for doctoral and master's students

A permanent adviser is required for students in all Ph.D. programs and for students in master's programs requiring a thesis. Other master's programs may also require a permanent adviser. Advisers play key roles in all aspects of graduate student training.

Graduate advisory committees

Graduate advisory committees are required for students in all Ph.D. programs and students in master's programs requiring a thesis. Graduate advisory committees serve two inter-related roles. One role is to regularly

assess each student to ensure they are meeting all training benchmarks. The other role is to guide, advise and support each student to facilitate their efficient progression toward degree completion.

Comprehensive examinations and final defenses

Successful completion of comprehensive examinations and successful defenses of dissertations are required for all Ph.D. degrees. Successful defenses of theses are required for master's degrees in programs that require them. A student must be making satisfactory academic progress to undertake a comprehensive examination or final defense.

Comprehensive examinations and final defenses are conducted by a student's graduate advisory committee (or other committee as determined by the program). Comprehensive examinations and final defenses must be scheduled at a time during which all graduate advisory or other committee members are available to participate. If a single committee member cannot participate in a previously scheduled examination or defense, the meeting can occur if approved by the adviser and the graduate program director. If two or more committee members cannot participate in a previously scheduled examination or defense, the meeting must be rescheduled. A student may present and defend their work via video conference with prior approval of their graduate advisory committee and program director, in which case the student is responsible for organizing all aspects of the video conference.

A student must provide their graduate advisory or other committee with a draft of their research proposal, dissertation or thesis at least 10 working days prior to the scheduled comprehensive examination or final defense.

A comprehensive examination has written and oral components that focus on foundational information in the area of the anticipated degree and the proposed dissertation research project.

A final dissertation (Ph.D.) or thesis (master's) defense requires the student to present their dissertation or thesis research in a public seminar and then defend their dissertation or thesis to their graduate advisory committee. During the defense, the graduate advisory committee will determine if the student has:

- Demonstrated mastery of the general research area
- Demonstrated mastery of the background information for their dissertation or thesis project and their completed studies, including all major analyses and interpretations
- Performed with appropriate technical and other care all experiments required for their dissertation or thesis project
- Constructed a draft of the dissertation or thesis document that appears will be suitable after being revised in response to comments from the graduate advisory committee

Each graduate advisory committee member must vote to pass or fail the student before the comprehensive examination or final defense is adjourned. A student passes the examination or defense if there is no more than one vote of fail. A student fails the examination or defense if there are two or more votes of fail. A student may be allowed to retake an exam per the guidelines of their program and with approval of the School of Medicine Graduate Programs Committee.

A student who has passed their final defense should expect to revise their proposal, thesis or dissertation before receiving final approval from their graduate advisory committee. The student and the graduate advisory committee should identify a specific scope of work and a

reasonable timeline for the revisions, and should work collaboratively and expeditiously to complete the revisions.

Admission to candidacy

All doctoral students and students in master's programs requiring theses must be formally admitted to degree candidacy to continue in the program and complete the degree. Criteria for degree candidacy are determined by the Graduate School.

Individual development plans

All doctoral students are required to formulate an individual development plan prior to their third year of training or by the semester after they pass their comprehensive examinations, whichever comes first. The individual development plan is an explicit statement of the student's immediate and longer-term career goals, as well as a plan for achieving those goals. Each student should develop their individual development plans with their adviser and – at their discretion – share their individual development plans with their graduate advisory committee and their graduate program. Each student should update their individual development plan at least annually. The format of the individual development plan is governed by a student's graduate program. Students are welcome to visit the American Association for the Advancement of Science myIDP (<https://myidp.sciencecareers.org/>) site as a starting point for developing their individual development plans.

Students in master's programs are strongly encouraged to formulate individual development plans.

Directed research

All Ph.D. programs and all thesis master's programs require students to perform directed research under the guidance of an adviser and graduate advisory committee. The student's directed research efforts address their dissertation (Ph.D.) or thesis (master's) project. Directed research is a major component of all Ph.D. programs and all master's programs requiring a thesis. Students complete directed research in addition to didactic course work.

The scope, breadth and direction of the directed research project is established by the student's adviser, the student and the student's graduate advisory committee. Importantly, dissertation and thesis projects are original investigations and therefore it is difficult to precisely anticipate their duration or the time required to complete them.

Doctoral dissertations and master's theses

Students in all Ph.D. programs and all master's programs requiring a thesis must perform directed research toward construction of dissertations or theses.

The School of Medicine has no specific formatting guidelines for dissertations and theses. Students and advisers should follow the guidelines (<https://graduate.vcu.edu/student/thesis/>) from the VCU Graduate School. In practice, advisers and students often also review several recently released dissertations or theses from students in the same graduate program (available in Scholars Compass (<https://scholarscompass.vcu.edu/etd/>)) to familiarize themselves with formatting conventions.

Students must coordinate with their advisers, graduate advisory committees and graduate program guidelines regarding the scope and content of their dissertations and theses. Program guidelines for scope and content of dissertations and theses supersede the guidelines below.

If no program guidelines exist, dissertations and theses should at the minimum include the following sections in the indicated order:

- Title page
- Acknowledgements
- Table of contents
- List of tables
- List of figures
- List of abbreviations
- Statement of contributions
- Abstract
- Introduction chapter
- Methods, data or analysis chapter(s) including appropriate figures and tables
- Conclusions chapter
- References cited

Inclusion of short vitae for students or appendices for additional information such as protocols, small projects, etc. is optional.

Students can, with approval from their advisers and graduate advisory committees, modify the above to accommodate unique features of dissertation and thesis research projects.

Satisfactory academic progress

All students are expected to maintain satisfactory academic progress. Satisfactory academic progress consists of

- Maintaining a cumulative graduate GPA ≥ 3.0
- Exclusively receiving final grades of A, B, C, P or S in all course work
- Securing a permanent adviser (if required by the program)
- Passing all comprehensive examinations, thesis and/or dissertation defenses attempted
- Meeting all program requirements in a timely fashion
- Following all VCU, Graduate School, School of Medicine and program guidelines

All students are reviewed twice annually by their graduate program. A student who is not making satisfactory academic progress can be considered for dismissal from their program.

Change in degree program

Potential changes in the degree program for a student are governed by policies that are driven by the nature of the intended change:

1. A student completing a **certificate program** who wants to enroll in an M.S., Ph.D. or M.D. program within the VCU School of Medicine or the D.D.S. program in VCU's School of Dentistry must formally apply to that degree program. If accepted into the higher degree program, the student must complete the certificate program before matriculating in the higher degree program.
2. A student completing an **M.S. program** who wants to enroll in a Ph.D. or M.D. program within the VCU School of Medicine or the D.D.S. program in VCU's School of Dentistry must formally apply to the higher degree program. If accepted into that degree program, the student must complete the M.S. program before matriculating in the higher degree program.

3. A student in a **Ph.D. program** who wishes to move to a related M.S. program within the VCU School of Medicine may make a written request for this change to their current Ph.D. program director and to the program director of the master's program the student wishes to join. The program directors and the associate dean for graduate education will review the student's request and provide guidance for next steps. A formal application to the M.S. program may or may not be required.

Students who are not making satisfactory academic progress in one School of Medicine program are not eligible to enroll in another School of Medicine program until they have returned to satisfactory academic progress.

Termination of enrollment and appeal

Termination of enrollment

Students that are not making satisfactory academic progress or other reasons as stated in the School of Medicine student policies or the VCU Bulletin may be considered for dismissal by their program. Dismissed students will be notified in writing of the decision by their program director, the department chair, the associate dean for graduate education, the dean of the Graduate School or another VCU official.

Appeal of termination

A student may appeal a decision to be dismissed from their program under the procedures below. Note that times to completion for all steps are based on normal VCU operations and therefore actual completion times may be different as the university responds to unanticipated circumstances. Also note that the student has the burden of proof in all appeals.

- The student must initiate the appeal at the program level within 10 business days of receiving the initial notice of dismissal.
- If the program declines the appeal, a student may, within 10 business days of being notified of the decision by the program, appeal the program's decision by submitting to the associate dean for graduate education in the School of Medicine a written notice (email preferred) outlining the rationale for the appeal along with all supporting documentation.
- Within 10 business days of receiving the appeal notice, the ADGE will convene an ad hoc committee composed of three School of Medicine faculty members who are outside of the student's program, were not involved in the decision to dismiss and were not involved in the program-level appeal.
- The ad hoc committee will review the materials submitted by the student and may, at its discretion, ask the student to appear to clarify information in the submitted materials. The ad hoc committee will submit to the ADGE a written appraisal of the appeal within five business days of its formation, although more time will be allowed to accommodate an appearance by the student.
- The ADGE will review the ad hoc committee's appraisal, make a decision and communicate the decision to the student, the program director and the dean of the Graduate School within five business days.
- If the School of Medicine declines the appeal, a student may appeal the decision at the level of the Graduate School as described in the VCU Graduate Bulletin.

School of Medicine Graduate Programs Committee

The Graduate Programs Committee serves as the deliberative body for all major changes to policies for graduate students and graduate faculty members, guidelines for graduate education, and graduate courses and curricula. More specifically, the Graduate Programs Committee is responsible for providing feedback and advice to the associate dean for graduate education on:

- Proposed alterations to existing and new processes in the Office for Graduate Education
- Proposed alterations to existing and new policies for graduate students and graduate faculty members
- Proposed alterations to existing and new graduate courses
- Proposed alterations to existing and new curricula
- Content and organization of graduate education websites
- Graduate education communication, advertising and promotion
- Graduate education priorities
- Major graduate student issues including dismissals, reassignments and requests for students to retake comprehensive exams and final defenses

Through the action of ad hoc subcommittees organized by the associate dean for graduate education, individual members might be called upon to take on more focused, short-term responsibilities related to the above or other topics that pertain to graduate education.

All graduate program and admissions directors and the assistant dean for graduate recruitment and admissions are members of the committee.

The committee meets monthly with the associate dean for graduate education. In all cases possible, the associate dean for graduate education and the committee approve requests or otherwise proceed by consensus. When a consensus cannot be reached, the associate dean for graduate education can call a formal advisory vote.

School of Medicine Registrar

The School of Medicine houses a registrar's office to meet the needs of physician trainees and alumni. Visit the School of Medicine website (<http://www.medschool.vcu.edu/studentaffairs/registrar/>) for more information on the office.

VCU Records and Registration (<https://rar.vcu.edu/>) provides registrar services for all School of Medicine advanced (graduate) degree students.

Criminal background checks

All applicants to the VCU School of Medicine who receive an acceptance will have a criminal background check performed by Certiphi Screening Inc. If there is a positive finding the applicant will be notified by Certiphi first; this will allow the applicant to make corrections to the report and verify the information. If there is no change in status Certiphi will then notify VCU of their positive findings. VCU's criminal background committee will meet to discuss the applicant's Certiphi report to determine if acceptance is to be withdrawn. The school encourages full disclosure at all times on the AMCAS and supplemental applications, as dishonesty will impact the committee's decision. If an applicant has a legal finding or institutional action against them after the supplemental application is submitted they should notify the school's admissions

office immediately. Once an applicant is matriculated, full disclosure is also required throughout the student's time in medical school. Criminal background checks are repeated for all students at the end of the second year and for specific program participations throughout medical school.

Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in advanced international addiction studies

VCU, King's College London and the University of Adelaide collaborate to offer a fully online Certificate in Addiction Studies available to students around the globe. No on-campus attendance is required, and students receive a degree from all three participating universities.

Program mission

The mission of the addiction studies certificate with a concentration in advanced international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of both essential and advanced topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

Program goals

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

Student learning outcomes

1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--------------------|
| Certificate | Fall | Jul 13 | TOEFL |

Prospective students should apply through the VCU graduate admissions portal (<https://www.vcu.edu/admissions/apply/graduate/>). Application to all three participating universities is accomplished through submission of the VCU graduate application. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:

1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor's degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor's degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language

requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or a minimum grade of C in GCSE English.

Students who are enrolled in the Certificate in Addiction Studies intermediate concentration and are maintaining a minimum GPA of 3.0 may elect to change their concentration to the advanced concentration at any time during their enrollment with the permission of the program director. Students will be awarded only one certificate, however, which will reflect their highest level of attainment.

Students who have completed the Certificate in Addiction Studies intermediate concentration may also, after a period away from study, choose to apply for the advanced concentration addiction studies certificate. Students wishing to continue their studies through this mechanism may count the earlier courses toward the advanced concentration, as long as they meet all admission requirements of the Graduate School and pending surrender of the lower-level credential before being awarded the more-advanced credential. Courses taken more than four years prior to the time of the student's application will not be considered transferable and will need to be repeated.

Students completing either concentration in the Certificate in Addiction Studies may apply to the Master of Science in Addiction Studies program, also known as the International Programme in Addiction Studies and, if accepted, have their courses count toward that degree as long as they meet all admission requirements of the Graduate School. Courses taken more than four years prior to enrollment in the M.S. program will not be considered current and must be repeated.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students are required to successfully complete 24 credit hours in the six required graduate courses.

Curriculum requirements

| Course | Title | Hours |
|--------------------|--|-----------|
| IPAS 600 | The Biological Basis of Addiction | 4 |
| IPAS 601 | Treatment of Addiction: Psychosocial Interventions | 4 |
| IPAS 602 | Public Health Issues and Approaches to Addictions | 4 |
| IPAS 603 | Addiction Policy | 4 |
| IPAS 604 | Treatment of Addiction: Pharmacotherapies | 4 |
| IPAS 605 | Treatment of Addiction: Critical Issues | 4 |
| Total Hours | | 24 |

The minimum total of graduate credit hours required for this certificate is 24.

Addiction Studies, Certificate in (Post-baccalaureate graduate certificate) with a concentration in intermediate international addiction studies

VCU, King's College London and the University of Adelaide collaborate to offer students the opportunity to complete a fully online program of study to obtain a Certificate in Addiction Studies conferred by all three universities.

Program mission

The mission of the addiction studies certificate with a concentration in intermediate international addiction studies is to offer students around the world an in-depth, evidence-based, multidimensional and cross-cultural understanding of essential topics in the field of addiction studies, including biological, psychological and public health perspectives on the etiology and treatment of addiction and evidence-based addiction policy. This will be accomplished through distance-learning technologies.

Program goals

1. Knowledge of field of addiction science: Students in the program will develop an in-depth knowledge of the field of addiction science to enhance their ability to succeed in a variety of addiction-related settings.
2. Ability to synthesize and apply advanced addiction-related knowledge: Students of the program will be able to synthesize and apply advanced addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the treatment or prevention of addiction.
3. Understanding and application of experimental results from addiction-related research: Students will develop the ability to interpret experimental approaches and results, and apply them to address key questions in addiction science and policy, as well as conceptualize the translation from research to policy, treatment or prevention.
4. Communication skills related to addiction: Students will develop skills in communicating both core knowledge of addiction as well as the interpretation of research findings in a variety of formats.

Student learning outcomes

1. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.
2. Advanced knowledge of addiction science: The student will demonstrate an advanced level of knowledge of the current elements of addiction science.
3. Familiarity and understanding of research: Students will demonstrate an advanced level of fluency with the research literature, become familiar with research methods used in addiction science and demonstrate the ability to evaluate and critique publications.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Addiction Studies, Master of Science (M.S.)

VCU, King's College London and the University of Adelaide collaborate to offer students the opportunity to complete a fully online program of study

to obtain a Master of Science in Addiction Studies conferred by all three universities.

Program goal

The mission of the International Program in Addiction Studies leading to a Master of Science in Addiction Studies degree is to offer students cross-cultural exposure to the critical prevention, treatment, research and policy issues facing the field. Through a collaboration arrangement including VCU, King’s College London and the University of Adelaide in Australia, students complete a program of study using distance-learning technologies to obtain the degree. The program is designed to prepare students for local, national and international policy positions, prevention/treatment program management and other leadership positions in the addictions field. This program will speed the dissemination of the latest international addictions-related knowledge, especially to remote locations around the world, and help students compare international perspectives and translate this knowledge into more effective prevention and treatment practices and evidence-based policies within their own countries.

Students in the program will:

1. Demonstrate a detailed knowledge of the field of addiction science (including comparative international policies and practices) to prepare them for leadership roles in a variety of settings (including addiction research, policy and treatment venues).
2. Be able to synthesize and apply addiction-related knowledge, including comparative international perspectives and approaches, to address key issues related to the advancement of addiction science.
3. Develop the ability to design, implement and interpret experimental approaches which address key questions in addiction science.
4. Communicate both core knowledge of addiction as well as experimental design, result and interpretation in a variety of formats.

Student learning outcomes

1. Integrated knowledge of addiction science: The student will demonstrate an appropriate level of knowledge of the current elements of addiction science as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publication.
2. Problem-solving skills: Students will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in addiction research and practice, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
3. Research design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, develop and implement research studies.
4. Written communication skills: The candidate will use effective written communication skills to present information related to addiction causes, interventions, treatments and policies using appropriate vocabulary, figures, tables and citations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master’s programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall | Jul 1 | TOEFL |

Prospective students should apply through the VCU graduate admissions portal (<https://www.vcu.edu/admissions/apply/graduate/>). Application to all three participating universities is accomplished through submission of the VCU graduate application. Once accepted, students are enrolled in all three universities and have access to the resources associated with all three schools. No on-campus classroom time is required to complete the degree.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must:

1. Have qualified in a related discipline for an honors degree (level 2A or 1) or a bachelor's degree from a recognized tertiary institution in the U.S. Any applicant who does not meet this criterion should have (in addition to an honors or bachelor's degree) significant professional work experience and approval of the program committee.
2. Have a high level of proficiency in English, demonstrated by completion of a university qualification studied in the English language, or by meeting one of the following English language requirements: an IELTS score of 7.0, a TOEFL score of 600 (paper-based) or 260 (computer-based), or minimum grade C in GCSE English.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students are required to successfully complete a minimum of 36 credit hours, which can be done either full time (12 months) or part time (24 months). Six of the required credit hours are assigned to a final research project examining a relevant addictions-related topic. VCU, King's College London and the University of Adelaide confer degrees jointly through a single diploma.

Curriculum requirements

| Course | Title | Hours |
|--------------------|--|-----------|
| IPAS 600 | The Biological Basis of Addiction | 4 |
| IPAS 601 | Treatment of Addiction: Psychosocial Interventions | 4 |
| IPAS 602 | Public Health Issues and Approaches to Addictions | 4 |
| IPAS 603 | Addiction Policy | 4 |
| IPAS 604 | Treatment of Addiction: Pharmacotherapies | 4 |
| IPAS 605 | Treatment of Addiction: Critical Issues | 4 |
| IPAS 606 | Research Methodology in Addictions | 6 |
| IPAS 692 | Research Project in Addictions | 6 |
| Total Hours | | 36 |

The minimum total of graduate credit hours required for this degree is 36.

Anatomy and Neurobiology, Master of Science (M.S.)

Program mission

The M.S. in Anatomy and Neurobiology program offers a two-year graduate curriculum of formal instructional activities and research training mentored by the members of the faculty leading to the terminal M.S. degree. The program prepares students for technical careers in neurobiological research laboratories in academic, private and

government institutions. The program also provides a strong foundation for students who choose to continue onto doctoral training.

This is a research-oriented degree program comprised of graduate course work and supervised research leading to a master's thesis. The M.S. program involves approximately one year of course work and a research thesis performed under the supervision of a faculty adviser.

Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers, trainers and technicians in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
2. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
3. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences. The program will prepare students to secure positions in their chosen career goals (medical school, doctoral studies, employment in academic or private laboratories).

Student learning outcomes

The following are the learning outcomes for the program. Students will be able to

- Define the molecular, cellular and tissue-level organization of the central and peripheral nervous system
- Apply the properties of cells that make up the nervous system, including the propagation of electrical signals used for cellular communication
- Compare and contrast the properties of individual cells to their function in organized neural circuits and systems
- Model and explain how the interaction of cells and neural circuits leads to higher level activities such as cognition and behavior
- Distinguish the fundamental biochemical principles, such as the structure/function of biomolecules, metabolic pathways and the regulation of biological/biochemical processes
- Generate testable scientific hypotheses and develop research plans to test these hypotheses
- Evaluate and critically review primary research literature in seminar discussions
- Engage effectively in independent and collaborative research projects
- Make presentations that convey complex knowledge in an audience-appropriate and venue-appropriate fashion and answer questions effectively
- Write scientific texts such as abstracts, full-length manuscripts and research proposals

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|---|---|
| M.S. | Fall (preferred) | Applications received by Jul 1 given priority consideration | GRE, MCAT or DAT TOEFL if international |
| | Summer | Applications received by Jan 1 given priority consideration | |

Special requirements

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.2
2. Combined GRE scores of at least 300 for the verbal plus quantitative (1200 based on the previous scale) and 4.0 analytical score
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT), or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and upper-level courses in molecular and cellular biology are desirable. Previous research experience or demonstration of a serious interest in a research-oriented career is also desirable. A personal statement describing the applicant's research experience and interests, as well as letters of reference from previous supervisors, are necessary and helpful in determining an applicant's suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 37 graduate credit hours. A minimum cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses.

A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

There is no expectation of the time required to complete the master's degree; usually two years of study are necessary to complete the requirements. At the appropriate time in their research, students will prepare a thesis and schedule a final oral defense of the thesis. The final oral examination (defense of the thesis) will cover the subject of the candidate's dissertation and related basic science course work.

Course requirements

| Course | Title | Hours |
|------------------------------|----------------------|-------|
| Required core courses | | |
| ANAT 610 | Systems Neuroscience | 4 |

| | | |
|------------------------------------|--|-----------|
| ANAT 690 | Anatomy and Neurobiology Seminar (minimum four semesters) | 4 |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 504 | Biochemistry, Cell and Molecular Biology | 5 |
| IBMS 600 | Laboratory Safety | 1 |
| NEUS 609 | Cellular and Molecular Neuroscience | 4 |
| Required additional courses | | |
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |
| Thesis research | | |
| ANAT 697 | Directed Research | 13 |
| Total Hours | | 37 |

The minimum total of graduate credit hours required for this degree is 37.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Biochemistry, Doctor of Philosophy (Ph.D.)

Program goal

The Ph.D. program in biochemistry prepares students for research-oriented careers as independent scientists in academia, government and biotechnology. The core of this degree program is an original independent research project under the supervision of a faculty adviser. The Department of Biochemistry and Molecular Biology has research efforts of international stature in several areas, including cellular and molecular signaling, tumor biology, structural biology, eukaryotic molecular biology, lipid and membrane biochemistry and molecular genetics, using state-of-the-art approaches in enzymology, genomics, proteomics and lipidomics.

While emphasizing independent research in biochemistry and molecular biology and training in the responsible conduct of research, the program also provides a background of courses designed to match the needs

and interests of each student. The program is designed to provide students with the skills required to advance to positions as bioscience researchers/trainers in a broad spectrum of positions. The program provides a framework for the progressive development of a mastery of the current state of the subject matter of biochemistry, cell and molecular biology, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.

The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems.
5. General knowledge of science: The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Applications received prior to Jan 15 given priority consideration | |

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
3. A personal statement that includes: long-term career goals to assess reasons behind the application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant
5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply directly to the Ph.D. program and forego the Master's (M.S.) degree. However, applicants who are unsure if they want to earn a Ph.D. and desire experience in biomedical research before making this decision will be well-served by the M.S. program. Outstanding performance in the M.S. program can help students gain admittance to a doctoral program at VCU or elsewhere.

Master's students who wish to gain admission to the Ph.D. program should apply directly to the Biomedical Sciences Doctoral Portal and/or the Biochemistry Ph.D. program. Current M.S. students that are successful applicants to the Ph.D. program typically have final grades in the top 50% in BIOC 503 and BIOC and have earned grades of A in BIOC 505 and BIOC 661.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 60 graduate credit hours.

Ph.D. students are expected to enroll as full-time graduate students. During the first year, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin dissertation research. Following completion of the research project and defense of the doctoral dissertation, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories.

Training in the responsible conduct of research

All Ph.D. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Consult the following link to access the course: research.vcu.edu/human_research/

citi_requirements.htm (http://www.research.vcu.edu/human_research/citi_requirements.htm)

- Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Access and guidance for the course is available through the "Animal Research" link on the Office of Research and Innovation website (<https://research.vcu.edu/>).

Course requirements

| Course | Title | Hours |
|--|---|-----------|
| Required core courses | | |
| ANAT 620 | Scientific Grantsmanship | 2 |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 504 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 651 | Biochemistry Journal Club (one-credit course taken at least four times) | 4 |
| BIOC 661 | Critical Thinking (one-credit course repeated for two credits) | 2 |
| BIOC 690 | Biochemistry Seminar (one-credit course taken at least four times) | 4 |
| BIOC 695 | Biochemistry Student Seminar | 1 |
| IBMS 600 | Laboratory Safety | 1 |
| IBMS 620 | Laboratory/Clinical Rotations (repeat for six credits) | 6 |
| IBMS 635 | Cellular Signalling | 3 |
| Required additional courses | | |
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |
| Elective courses | | |
| Take at least two courses for four credits total from the following: | | 4 |
| ANAT 615 | Techniques in Neuroscience and Cell Biology | |
| BIOC 601 | Membranes and Lipids | |
| BIOC 605 | Molecular Biology | |
| HGEN 501 | Introduction to Human Genetics | |
| MICR 505 | Immunobiology | |
| MICR 605 | Prokaryotic Molecular Genetics | |
| MICR 607 | Techniques in Molecular Biology and Genetics | |
| MICR 653 | Advanced Molecular Genetics: Bioinformatics | |
| PHTX 691 | Special Topics in Pharmacology | |
| Dissertation research | | |
| BIOC 697 | Directed Research in Biochemistry (taken each semester) | 22 |
| Total Hours | | 60 |

The minimum total of graduate credit hours required for this degree is 60.

Typical plan of study

Many students often take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a student or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors and advisers for information about typical plans of study and registration requirements.

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 52) for additional details.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|--------------------------|--|--------------------|
| M.S. | Summer or fall preferred | Applications accepted through June; priority given to early applications | GRE, MCAT or DAT |

Special requirements

- MCAT or DAT acceptable in lieu of GRE for combined professional/academic degree programs.

Applicants to the Master of Science in Biochemistry program must meet all general admission requirements of the VCU Graduate School (p. 35). In addition, applicants must meet the following requirements.

1. Organic chemistry (with a minimum grade of B)
2. Undergraduate biochemistry (not required but recommended)
3. Laboratory experience
4. GRE scores of at least 158 (verbal), 158 (quantitative) and 4.0 analytical

Continuing for the Ph.D.

Students who plan to eventually work toward the Ph.D. degree in biochemistry at VCU should apply via the Biomedical Sciences Doctoral Portal (<https://medschool.vcu.edu/education/bsdp/>). Applicants who are unsure if they want to earn a Ph.D. and who wish to gain experience in biomedical research before making this decision will be well-served by this M.S. program. Outstanding performance in the program can help students gain admittance to a doctoral program at VCU or elsewhere.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students in the M.S. in Biochemistry program must complete a minimum of 30 credit hours, including at least 24 didactic credits hours (exclusive of research credit hours).

Students in the M.S. program in biochemistry take courses designed for graduate students with an emphasis on research design and experimentation. During the first year of study, students pursue research rotations, take formal course work and become familiar with current research topics through seminars, discussion groups and lectures by distinguished scientists. By the end of the first year, students choose a faculty adviser and begin thesis research. Following completion of the research project and defense of the master's thesis, graduates are equipped to participate in virtually any area of current biomedical research in the most prestigious laboratories. For more detailed information on the program, see the departmental website (<https://biochemistry.vcu.edu/Education/masters.html>).

M.S. students register for BIOC 651 and BIOC 690 for the duration of their tenure in the program. The core set of courses may be supplemented with elective courses offered by the Department of Biochemistry and Molecular Biology or other departments. Students are encouraged to take additional courses that relate to their personal projects. Electives may include courses in techniques in molecular biology and genetics, bioinformatics, statistics, immunology, microbiology, molecular genetics, mammalian physiology and advanced organic and physical chemistry, among others.

Training in the responsible conduct of research

All M.S. students are required to complete the following training in the responsible conduct of research:

1. OVPR 601, OVPR 602 or OVPR 603
2. Collaborative Investigator Training Initiative: an online course that provides training in human subjects research. The course must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. See the CITI requirements and access the course (https://research.vcu.edu/human_research/citi_requirements.htm) on the Office of Innovation and Research website.
3. Animal research training: Students are required to complete an online training course for the conduct of animal subjects research. The training must be completed during the fall semester of year two. Students must submit the certificate of completion before starting the spring semester of year two. Access and guidance for the course is available through the "Animal Research" link on the **Office of Research and Innovation website**.

Course requirements

| Course | Title | Hours |
|------------------------------|--|-------|
| Required core courses | | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 504 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 651 | Biochemistry Journal Club ¹ | 1 |
| BIOC 661 | Critical Thinking (one-credit course repeated for two credits) | 2 |
| BIOC 690 | Biochemistry Seminar ¹ | 1 |
| IBMS 600 | Laboratory Safety | 1 |
| IBMS 635 | Cellular Signalling | 3 |

Required additional courses

| | | |
|--|---|----------|
| BIOC 505 or BIOC 697 | Experimental Biochemistry (research rotation, typically taken in year one) Directed Research in Biochemistry | 2 |
| OVPR 601 or OVPR 602 or OVPR 603 | Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research | 1 |
| Elective courses ² | | 3 |
| ANAT 615 | Techniques in Neuroscience and Cell Biology | |
| BIOC 601 | Membranes and Lipids | |
| HGEN 501 | Introduction to Human Genetics | |
| MICR 505 | Immunobiology | |
| MICR 605 | Prokaryotic Molecular Genetics | |
| MICR/BNFO 653 | Advanced Molecular Genetics: Bioinformatics | |
| PHTX 691 | Special Topics in Pharmacology | |
| Thesis research | | |
| BIOC 697 | Directed Research in Biochemistry (variable credit course; six credits minimum) | 6 |

Total Hours **30**

1

Taken each fall and spring semester throughout the program; minimum of one credit for each course.

2

Electives are suggested, but not required. Additional credits may be taken in BIOC 651 and/or BIOC 690 to reach 30-credit minimum program requirement.

The minimum total of graduate credit hours required for this degree is 30.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Program website: [biochemistry.vcu.edu](http://www.biochemistry.vcu.edu) (<http://www.biochemistry.vcu.edu>)

Biostatistics, Doctor of Philosophy (Ph.D.)

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty

members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes

This training program is designed to help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical concepts, ideas and methods, to which the candidate will contribute by developing new (or extending existing) biostatistical methods through scholarly peer-reviewed publications.
2. The successful candidate will demonstrate the ability to effectively collaborate with both biostatistical and health science researchers, specifically with respect to planning and designing research studies and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall preferred | Applications received prior to Jan 15 given priority consideration | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 310, STAT 309 and STAT 212. MATH 507 and an additional graduate-level math analysis course are recommended for students interested in completing the Ph.D. program.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), Ph.D. students must complete a minimum total of 78 credit hours (59 didactic hours, plus eight hours each of seminar and consulting, and at least three credit hours of research). More specifically, required courses include BIOS 513, BIOS 514, BIOS 524, BIOS 601, BIOS 602, BIOS 606, BIOS 615, BIOS 631, BIOS 647, BIOS 653, BIOS 654 and one of OVPR 601, OVPR 602 or OVPR 603. Students must take at least 18 credits of additional BIOS, STAT or MATH courses, with at least two being BIOS courses and at least two being at the 600 level, and one graduate-level non-BIOS, STAT or MATH course. Ph.D. students must also take eight semesters each of BIOS 603 and BIOS 690. In addition, Ph.D. students will participate in

the summer student training program at least twice and present at the Biostatistics Student Research Symposium each fall.

Qualifying exam

Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) covers material from the following first-year courses: BIOS 513, BIOS 514, BIOS 653 and BIOS 654. Part B (the applied examination) covers material from the following first-year courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

Dissertation proposal defense

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for an M.S. degree.

Admission to candidacy

A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

Dissertation

A comprehensive dissertation reporting the results of original research is required for the Ph.D. degree.

Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student's committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

Course requirements

| Course | Title | Hours |
|------------------------------|----------------------------|-------|
| Required core courses | | |
| BIOS/STAT 513 | Mathematical Statistics I | 3 |
| BIOS/STAT 514 | Mathematical Statistics II | 3 |
| BIOS 524 | Biostatistical Computing | 3 |

| | | |
|----------|---|---|
| BIOS 601 | Analysis of Biomedical Data I | 3 |
| BIOS 602 | Analysis of Biomedical Data II | 3 |
| BIOS 603 | Biostatistical Consulting (1 credit course taken 8 semesters) | 8 |
| BIOS 606 | Clinical Trials | 3 |
| BIOS 615 | Advanced Inference | 4 |
| BIOS 647 | Survival Analysis | 3 |
| BIOS 653 | Biostatistical Methods I | 4 |
| BIOS 654 | Biostatistical Methods II | 4 |
| BIOS 690 | Biostatistical Research Seminar (1 credit course taken 8 semesters) | 8 |

Required additional courses

| | | |
|-------------|---|---|
| BIOS 631 | Mixed Models and Longitudinal Data Analysis | 4 |
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |

Select one additional 600-level course (non-BIOS, non-STAT or non-MATH) with approval of program director. Suggested courses topics include:

| | |
|--|--|
| Epidemiology and community health (EPID) | |
| Social and behavioral health (SBHD) | |
| Health care policy and research (HCPR) | |
| Bioinformatics (BNFO) | |

Elective courses

At least 18 credits must come from the courses listed below (at least two must be BIOS courses; at least two must be at the 600-level) or others selected with approval of program director.

| | | |
|---------------|---|--|
| BIOS 535 | Behavioral Measurement | |
| BIOS 549 | Spatial Data Analysis | |
| BIOS 632 | Multivariate Analysis | |
| BIOS 635 | Structural Equation Modeling | |
| BIOS 649 | Advanced Spatial Data Analysis | |
| BIOS 658 | Statistical Methods for High-throughput Genomics Data I | |
| BIOS 667 | Statistical Learning and Data Mining | |
| BIOS 668 | Statistical Methods for High-throughput Genomic Data II | |
| BIOS 688 | Applied Bayesian Biostatistics | |
| BIOS 691 | Special Topics in Biostatistics | |
| MATH 640 | Mathematical Biology I | |
| STAT 613 | Stochastic Processes | |
| STAT 614 | Stochastic Processes | |
| STAT/OPER 636 | Machine Learning Algorithms | |
| STAT 642 | Design and Analysis of Experiments I | |
| STAT 645 | Bayesian Decision Theory | |
| STAT 675 | Time Series Analysis I | |

Dissertation research

| | | |
|----------|------------------------------------|---|
| BIOS 697 | Directed Research in Biostatistics | 3 |
|----------|------------------------------------|---|

Total Hours **78**

The minimum total of graduate credit hours required for this degree is 78.

Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes

This training program is designed to help students achieve the following learning outcomes:

1. The successful candidate will understand the modern and advanced literature of biostatistical and genomics concepts, ideas and methods, to which the candidate will contribute by developing new (or extending existing) biostatistical and genomics methods through scholarly peer-reviewed publications.
2. The successful candidate will demonstrate the ability to effectively collaborate with biostatistical, genomics and health science researchers, specifically with respect to planning and designing research studies, and also in analyzing data from a broad spectrum of research questions.
3. The successful candidate will develop fluency in several computational languages, will exhibit proficiency in standard computational and analytic procedures and will demonstrate the ability to computationally solve new and complex problems.
4. The successful candidate will display exceptional written and oral communication skills in terms of explaining biostatistical and genomics concepts, methods and results to both biostatistical and non-biostatistical health sciences researchers.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall preferred | Applications received prior to Jan 15 given priority consideration | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam. The following mathematics courses or their equivalents are required for admission: MATH 307, MATH 310, STAT 309 and STAT 212. MATH 507 and an additional graduate-level math analysis course are recommended for students interested in completing the Ph.D. program.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), Ph.D. students in the genomic biostatistics concentration will complete a minimum of 78 graduate credit hours (59 didactic credit hours plus eight hours each of consulting and seminar, and at least three credit hours of research). More specifically, required courses include: BIOS 513, BIOS 514, BIOS 524, BIOS 601, BIOS 602, BIOS 606, BIOS 615, BIOS 632, BIOS 647, BIOS 653, BIOS 654, BIOS 658, BIOS 668, BNFO 540 (or BIOL 540) and one of OVPR 601, OVPR 602 or OVPR 603. In addition, students will take one of BIOS 667 or BIOS 691, and at least nine credits of other graduate-level BIOS, STAT, MATH or BNFO courses. Ph.D. students must take eight semesters each of BIOS 603 and BIOS 690. Ph.D. students will also participate in the summer student research program at least twice and present at the Biostatistics Student Research Symposium each fall.

Qualifying exam

Students pursuing the Ph.D. degree must pass a two-part qualifying examination administered after completion of their first-year courses. Part A (the theoretical examination) covers material from the following first-year courses: BIOS 513, BIOS 514, BIOS 653 and BIOS 654. Part B (the applied examination) covers material from the following first-year courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the qualifying exam at the Ph.D. level to continue in the Ph.D. program. A student who does not pass either Part A or Part B of the qualifying examination at the Ph.D. level will have one opportunity to retake that part of the qualifying examination.

Dissertation proposal defense

Students pursuing the Ph.D. degree who have passed the qualifying exam must pass a defense of their dissertation proposal that will consist of both written and oral components. For the written component of the dissertation proposal defense the student will produce a detailed report and description of the proposed research plan. For the oral component of the dissertation proposal defense the student will present the dissertation proposal to their dissertation committee and respond to any feedback or questions.

The proposal defense will be scheduled as soon as the student is ready after passing both parts of the qualifying examination. This could be as

early as Year 2, with students required to defend before December of their fourth year.

Each part of the exam is graded as pass or fail. A student must pass both Part A and Part B of the dissertation proposal defense to continue toward their final dissertation defense. A student who does not pass both Part A and Part B of the dissertation proposal defense may choose to complete the requirements for an M.S. degree.

Admission to candidacy

A student must pass both parts A and B of their qualifying examination, must identify a dissertation adviser and committee and must pass both the written and oral components of the dissertation proposal defense before they can be admitted to candidacy.

Dissertation

A comprehensive dissertation reporting the results of original research related to genomics topics is required for the Ph.D. with a concentration in genomic biostatistics. It is expected that the dissertation will make use of some high-throughput genomic technology as an application for the methodological development.

Final examination

All Ph.D. candidates must defend their dissertations at a final oral examination. A public presentation will precede a Ph.D. defense closed to all but the student's committee. Questions are restricted to the topic of the dissertation for the Ph.D. candidate.

Biostatistics, Master of Science (M.S.)

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes

This training program is designed to be completed in 12 months (three semesters: fall, spring, summer) and will help students achieve the following learning outcomes:

1. Explain biostatistical concepts, ideas and methods in plain terms to non-biostatistical researchers
2. Demonstrate the ability to effectively collaborate with biostatistical and health science researchers
3. Develop fluency in several computational languages
4. Display exceptional written and oral communication skills

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| M.S. | Fall preferred | Applications received prior to Jan 15 given priority consideration | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

| Course | Title | Hours |
|----------|------------------------------------|-------|
| MATH 307 | Multivariate Calculus | 4 |
| MATH 310 | Linear Algebra | 3 |
| STAT 212 | Concepts of Statistics | 3 |
| STAT 309 | Introduction to Probability Theory | 3 |

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), M.S. students must complete a minimum total of 33 graduate credit hours of course work, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take BIOS 513, BIOS 514, BIOS 653 and BIOS 654.

Applied examination

Students pursuing the M.S. degree must pass an applied examination administered after completion of following courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606. This examination is graded as pass or fail. A student who does not pass the applied examination will have one opportunity to retake the examination.

Thesis

There is no thesis requirement for the M.S. program.

Course requirements

| Course | Title | Hours |

Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes

This training program is designed to be completed in 12 months (three semesters: fall, spring, summer) and will help students achieve the following learning outcomes:

1. Explain biostatistical concepts, ideas and methods in plain terms to non-biostatistical researchers
2. Demonstrate the ability to effectively collaborate with biostatistical and health science researchers
3. Develop fluency in several computational languages
4. Display exceptional written and oral communication skills

Students in the clinical research and biostatistics concentration will achieve the following additional learning outcomes:

5. Design an observational or experimental research study in a clinical setting
6. Synthesize findings and evidence from multiple clinical research sources

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| M.S. | Fall preferred | Applications received prior to Jan 15 given priority consideration | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), students applying to the clinical research and biostatistics concentration must hold the M.D., D.D.S., Ph.D., D.P.H., D.O., Pharm.D. or an equivalent health professional terminal degree from an accredited college or university. Applicants with international M.D. degrees are considered on an individual basis. The applicant must have a minimum undergraduate GPA of 3.00. Applicants must also submit a letter detailing career goals and how the M.S. in Biostatistics with a concentration in clinical research and biostatistics applies to those goals, as well as at least three letters of recommendation.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), M.S. students must complete a minimum total of 33 graduate credit hours.

Applied examination

Students pursuing the M.S. degree must pass an applied examination administered after completion of the following courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606. This examination is graded as pass or fail. A student who does not pass the applied examination will have one opportunity to retake the examination.

Thesis

There is no thesis requirement for the M.S. program.

Course requirements

| Course | Title | Hours |

Clinical Genetics, Certificate in (Graduate certificate)

The Certificate in Clinical Genetics will train graduate students in the principles of inheritance, the basis of inheritance, how inheritance influences risk in human disease, and the technology and methods involved in testing for genetic disorders. Students who complete the certificate will be able to apply this knowledge to understand genetic conditions and the role of genetic professionals in the clinical setting, as well as calculate risk for genetic disorders. Graduates will be competitive applying for jobs, such as genetic counseling assistants, or in seeking promotions within their fields, such as nursing or technicians employed in genetic diagnostic laboratories. These graduates will also be more competitive in applying for professional training such as genetic counseling master's programs or clinical diagnostic fellowships.

Program goals

The goal of the graduate certificate program in clinical genetics is to introduce students to human genetics concepts and its methodologies, understand the roles of genetic professionals in the clinic and gain an understanding of genetic conditions and the current genetic testing methodologies.

Student learning outcomes

1. Knowledge of human genetics: Certificate candidates will demonstrate the appropriate knowledge of human genetics including patterns of inheritance, risk analysis, the molecular basis of inheritance and methods to study human genetics.
2. Knowledge of clinical genetics: Certificate candidates will demonstrate the appropriate knowledge of genetic conditions and the varying roles of genetics professionals in clinical and laboratory genetics.
3. Knowledge of genetic diagnostics: Certificate candidates will demonstrate the appropriate knowledge of current methodologies in genetic diagnostics for specific genetic conditions.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|---|
| Certificate | Fall | May 30 | TOEFL or IELTS required for non-native English speakers |

The admission requirements outlined below will apply to all students. All applicants to the graduate certificate program are required to meet the admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>). Applicants will be required to submit the following materials to the Graduate School admissions office:

- An earned undergraduate degree related to genetics, biology or psychology
- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official undergraduate transcripts from all schools attended
- A statement of purpose outlining career goals and previous experience

A maximum of three equivalent, graduate-level transfer credit hours at the 500-level or higher may count toward the certificate. The transfer credits are evaluated on a case-by-case basis to determine course equivalency. Credits from a degree already awarded cannot be applied toward the certificate.

International students will submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program.

Non-native English speakers will provide evidence of proficiency in English by one of the following:

- A Test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or 600 for the paper-based score
- An International English Language Testing Systems minimum score of 6.5 on the academic exam
- A passing score on the VCU English Language Program compression test

The curriculum will prepare students to have a solid understanding of inheritance and the basis of inheritance as it applies to human and clinical genetics. Students will also gain an understanding of genetic conditions, modern diagnostic methodologies and their application, as well as the roles of genetic professionals in the clinic. Graduates will be prepared to work in clinical settings and genetics testing laboratories, including academic institutions, research institutions, hospitals and private diagnostic companies.

Curriculum requirements

| Course | Title | Hours |
|--|--|-------|
| Required courses | | |
| BIOS 543 | Graduate Research Methods I | 3 |
| HGEN 501 | Introduction to Human Genetics | 3 |
| HGEN 502 | Advanced Human Genetics | 3 |
| HGEN 606 | Introduction to Clinical Genetics | 1 |
| HGEN/PATH 609 | Clinical Genomics | 2 |
| Electives ¹ | | |
| Select a minimum of four credits from: | | 4 |
| ALHP 708 | Ethics and Health Care | |
| ANAT 612 | Human Embryology | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | |
| BIOS 544 | Graduate Research Methods II | |
| CCTR 640 | Team Science: Theories and Practice | |
| EPID 645 | Public Health Genomics | |
| GRAD 615 | Biomedical Science Careers Seminar Series | |
| HADM 611 | Health Care Law and Bioethics | |
| HADM 615 | Health Care Politics and Policy | |
| HADM 646 | Health Care Organization and Leadership | |
| HADM 681 | Clinical Concepts and Relationships | |
| HCPR 601 | Introduction to Health Policy | |
| HGEN 527 | Medical Genetics | |
| HGEN 528 | Medical Genetics | |
| HGEN 603 | Mathematical and Statistical Genetics | |
| HGEN 605 | Experimental Methods in Human Genetics | |
| HGEN 610 | Current Literature in Human Molecular Genetics | |
| HGEN 611 | Data Science I | |
| HGEN 612 | Data Science II | |
| HGEN 614 | Pathogenesis of Human Genetic Disease | |
| HGEN 620 | Principles of Human Behavioral Genetics | |
| HGEN 631 | Advanced Dental Genetics | |
| IDDS 600 | Interdisciplinary Studies in Developmental Disabilities: Teamwork in Serving Persons with Developmental Disabilities | |

Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics

Program goal

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research. Faculty members conduct methodological research motivated by collaborative alliances, which in turn contributes to and enhances the department's educational mission. By focusing on the integration of methodological and collaborative research, students develop strong biostatistical and communication skills, enabling them to assume leadership positions in academia, government and industry.

Student learning outcomes

This training program is designed to be completed in 12 months (three semesters: fall, spring, summer) and will help students achieve the following learning outcomes:

1. Explain biostatistical concepts, ideas and methods in plain terms to non-biostatistical researchers
2. Demonstrate the ability to effectively collaborate with biostatistical and health science researchers
3. Develop fluency in several computational languages
4. Display exceptional written and oral communication skills

Students in the genomic biostatistics concentration will achieve the following additional learning outcomes:

5. Identify and utilize the various formats for high-throughput genomic data
6. Use computational tools for analyzing high-throughput genomic data

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall preferred | Applications received prior to Jan 15 given priority consideration | GRE |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants for the M.S. in Biostatistics must complete the verbal, quantitative and analytical writing sections of the Graduate Record Exam.

Additionally, the following mathematics courses or their equivalents are required for admission:

| Course | Title | Hours |
|----------|------------------------------------|-------|
| MATH 307 | Multivariate Calculus | 4 |
| MATH 310 | Linear Algebra | 3 |
| STAT 212 | Concepts of Statistics | 3 |
| STAT 309 | Introduction to Probability Theory | 3 |

Although not required, prior course work in additional mathematics, statistics or computer science is helpful.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), M.S. students will complete a minimum total of 33 credit hours of course work, participate in the Summer Student Training Program and present at the Biostatistics Student Research Symposium. M.S. students interested in applying to the Ph.D. program in biostatistics (with no concentration or with a concentration in genomic biostatistics) are strongly encouraged to take BIOS 513, BIOS 514, BIOS 653 and BIOS 654.

Applied examination

Students pursuing the M.S. degree must pass an applied examination administered after completion of the following courses: BIOS 524, BIOS 601, BIOS 602 and BIOS 606. This examination is graded as pass or fail. A student who does not pass the applied examination will have one opportunity to retake the examination.

Thesis

There is no thesis requirement in the M.S. program.

Course requirements

| Course | Title | Hours |
|---------------------------------------|---|-----------|
| Required core courses | | |
| BIOS 524 | Biostatistical Computing | 3 |
| BIOS 601 | Analysis of Biomedical Data I | 3 |
| BIOS 602 | Analysis of Biomedical Data II | 3 |
| BIOS 603 | Biostatistical Consulting (one-credit course taken two semesters) | 2 |
| BIOS 606 | Clinical Trials | 3 |
| BIOS 690 | Biostatistical Research Seminar (one-credit course taken two semesters) | 2 |
| BIOS 697 | Directed Research in Biostatistics | 1 |
| OVPR 601 | Scientific Integrity | 1 |
| Required concentration courses | | |
| BIOL/BNFO 540 | Fundamentals of Molecular Genetics (or other relevant course) | 3 |
| BIOS 658 | Statistical Methods for High-throughput Genomics Data I | 3 |
| BIOS 668 | Statistical Methods for High-throughput Genomic Data II | 3 |
| Elective courses | | |
| Select at least two of the following: | | 6 |
| BIOS 632 | Multivariate Analysis | |
| BIOS 667 | Statistical Learning and Data Mining | |
| BIOS 688 | Applied Bayesian Biostatistics | |
| Total Hours | | 33 |

The minimum number of graduate credit hours required for this degree is 33.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Epidemiology, Doctor of Philosophy (Ph.D.)

Program mission

The mission of the Ph.D. program in epidemiology is to train students to become independent research scientists and leaders who can develop epidemiological methods and conduct outstanding population-based research.

Program goals

1. Critical foundation skills: The program is designed to provide students with the critical skills required to advance to positions as epidemiological researchers/trainers in a broad spectrum of positions.
2. Mastery and application of science: The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of epidemiology and ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. Communication: Students will develop skills in the various means of communicating both the core of epidemiological knowledge and the expression of epidemiological methodology, research design, results and interpretation to a variety of potential audiences.

Student learning outcomes

Students in the doctoral program in epidemiology will develop competencies in the following areas, as described below.

1. Integrated knowledge of epidemiology: Students will demonstrate an appropriate level of knowledge of theories of disease causation as well as bias in epidemiologic research and demonstrate in-depth understanding of one or more substantive theories

related to research. Students will be able to appropriately link theoretical frameworks to the design, conduct and interpretation of epidemiologic research and demonstrate familiarity with the research literature and the ability to evaluate and critique publications appropriate to an independent research scientist.

2. **Problem-solving skills:** Students will be able to appropriately apply epidemiologic and statistical methods for research needs, demonstrating proficiency in selecting the appropriate measures of association for the research at hand and correctly implementing analytic techniques, including addressing issues such as confounding and effect modification. Students will be able to evaluate and interpret results, explaining relationships between determinant(s) and outcome(s) under study.
3. **Research design:** Students will construct and develop novel epidemiologic research questions, demonstrating proficiency in selecting the most appropriate study designs such that bias is minimized and efficiency maximized. Students will understand the required elements to estimate sample size, know how to identify and minimize bias and confounders through study design and analysis, and demonstrate knowledge of the impact of measurement issues on study validity.
4. **Written communication skills:** Students will demonstrate proficiency in scientific writing, including manuscript development, grant writing and writing for multiple audiences, including lay audiences and policy-makers. Students will demonstrate an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information, including the use of figures, tables and citations.
5. **Oral communication skills:** Students will demonstrate effective oral communication skills across disciplines, framing questions appropriately and implementing active listening skills in delivering oral presentations to professional audiences, lecturing to students or leading discussions. Students will appropriately use audio/visual technologies to develop effective presentations with respect to content, organization and appropriate use of language.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Feb 1 (application strongly encouraged by this date) | GRE, TOEFL/IELTS |

Special requirements

- Applicants must hold a master's degree, preferably in the health or social sciences, including, but not limited to, public health, and provide test scores as detailed below. Applicants must provide all required materials as described herein and in the VCU Admissions graduate application checklist.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum qualifications.

1. Prior degree: Master's degree in the health or social sciences, including, but not limited to, public health (M.P.H.), with a minimum GPA of 3.0
2. GRE: Current GRE test results (taken within the past five years) with scores at or above the 75th percentile preferred in all components of the exam (e.g., minimum scores of 159 quantitative, 157 verbal and 4.5 analytical writing)
3. TOEFL: For non-native speakers of English, recommended minimum scores of either 100iBT, 600 PBT or IELTS scores of 6.5 (academic band score)
4. Personal statement: Applicants must include a personal statement that indicates: (1) their reasons for pursuing a doctoral degree in epidemiology, (2) their particular areas of research focus or study, (3) the departmental faculty advisers with whom the students would prefer to work and (4) career goals upon graduation.
5. Reference letters: Students must submit three letters of recommendation from three individuals who can assess the applicant's qualifications for graduate school. Letters from past professors or faculty advisers are most appropriate.
6. Current CV or resume: Students must submit a current CV or resume.

the course that is best-suited for the teaching assistantship. During the semester(s) when students engage in the teaching assistantship, teaching hours count toward the experiential training requirement and are combined with research hours to meet the expected 20-hour-per-week training time.

2. Seminar attendance: All students are expected to attend all doctoral level Division of Epidemiology seminars during their tenure in the program. These seminars are generally held every other week during fall and spring semesters. In addition, students must attend any special public health seminars offered collaboratively by the public health departments. These special seminars may occur one to two times each semester.
3. Grant application submission: All students are expected to submit at least one grant application related to their dissertation to a federal agency or nongovernmental organization (according to student eligibility) to gain grantsmanship experience. The adviser guides the student on the timing for submission of this grant application and the appropriate funding organization or agency.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students will be required to complete a minimum of 61 graduate credit hours as follows:

1. Four core courses focusing on epidemiological methods (12 credit hours)
2. Two core courses focusing on biostatistical theory and methods (six credit hours)
3. Four semesters of journal club (four credit hours)
4. Three courses of methodological electives (nine credit hours)
5. Three courses of substantive area electives, with at least one relating to the biological processes associated with the student's chosen substantive area (nine credit hours)
6. A minimum of two credit hours of practical research skills development
7. At least one course in the responsible conduct of research (one credit hour)
8. At least 18 credit hours of directed dissertation research

Students will also be required to complete the following:

Practical experience

1. Assistantship: All doctoral students are required to work an average of 20 hours per week under the direction of their adviser as part of experiential program training. This 20-hour-per-week requirement is met by work in a research assistantship and at least one semester of a teaching assistantship.
 - a. Research assistantship: Research program support exposes students to a variety of aspects of developing and implementing research plans and programs. Work includes drafting manuscripts or preparing presentations for refereed conferences, conducting research activities in the community, traveling to attend research team meetings, or regular work with research team members.
 - b. Teaching assistantship: All doctoral students are required to serve as teaching assistants for at least one semester before graduation. The student and her/his adviser discuss and select

Comprehensive examinations

Comprehensive examinations include a written examination and an oral candidacy examination. The written examination assesses knowledge of completed didactic course work on core epidemiological and biostatistical methods as well as a tailored substantive section based on the student's research focus. The oral candidacy examination is based upon the student's dissertation proposal, which consists of three proposed research projects.

Written comprehensive examination

Students are expected to take the written comprehensive examination after completing all didactic program courses (typically the program core, a practical research skills course, a responsible conduct of research course and 18 credits of elective course work). Program expectation for satisfactory academic progress is that students complete the written comprehensive examination by the end of the second academic year (i.e., no later than the end of the second summer semester). Exceptions beyond this time limit must be approved by the student's adviser and the graduate program director based on the student's submission of a written explanation for the delay in progress. This written explanation must include a plan of action and schedule for completing the written comprehensive examination by the date approved by the student's faculty adviser.

Oral candidacy examination

After passing the written comprehensive examinations, the student is eligible for the oral candidacy examination. For this examination, the student prepares background and methods for three proposed research projects in a focused area of dissertation research.

To maintain satisfactory academic progress in the program, students should complete the oral candidacy examination by the end of third fall semester. Exceptions beyond this time limit must be approved by the student's committee and the graduate program director based on the student's submission of a written explanation for the delay in progress. This written explanation must include a plan of action and schedule for completing the oral candidacy examination by the date approved by the student's dissertation adviser.

Upon successful completion of the oral candidacy examination, the student will embark upon the dissertation research.

Dissertation

1. The dissertation must be a hypothesis-based, analytical epidemiology project designed by the student under the supervision of the faculty adviser and dissertation advisory committee members as appropriate. The dissertation consists of a minimum of three papers prepared in manuscript style and suitable for submission to a peer-reviewed journal.
2. The student submits at least one of the three manuscripts from the dissertation to a peer-reviewed journal before the student schedules the final defense.

To maintain satisfactory academic progress in the program, students should schedule the dissertation examination by the second semester of the fourth year. Exceptions beyond this time limit must be approved by the student's committee and the graduate program director based on the student's submission of a written explanation for the delay in progress. Plans for completion of the dissertation examination will be considered on an individual basis. Failure to maintain satisfactory academic progress may result in a grade of U (unsatisfactory) for the dissertation work.

Satisfactory academic progress

Satisfactory academic progress may be assessed on multiple factors, including progress on dissertation development in accordance with timelines established between the student and adviser and/or committee; lack of professional conduct, including communication lapses or failure to communicate with the adviser and/or committee about delays in progress and/or absence from research work; honor policy violations or academic misconduct; and failure to maintain continuous enrollment without an approved leave of absence.

Course requirements

| Course | Title | Hours |
|--|---|-------|
| Required core courses | | |
| BIOS 602 | Analysis of Biomedical Data II | 3 |
| EPID 649 | Analysis of Health Datasets | 3 |
| EPID 650 | Epidemiologic Methods for Research | 3 |
| EPID 651 | Intermediate Epidemiologic Methods for Research | 3 |
| EPID 652 | Advanced Epidemiologic Methods and Data Analysis | 3 |
| EPID 690 | Journal Club (taken four semesters) | 4 |
| STAT 643 | Applied Linear Regression | 3 |
| Required additional courses | | |
| Practical research skills development: Select a minimum of two credits from the following. | | 2 |
| ALHP 716 | Grant Writing and Project Management in Health Related Sciences | |
| BIOS 610 | Research Processes and Methods for the Health Professions | |
| GRAD 601 | The Academic Profession | |
| GRAD 602 | Teaching and Learning in Higher Education | |
| GRAD 604 | Teaching, Learning, Technology and the Future of Higher Education | |
| GRTY 608 | Grant Writing | |
| Responsible research conduct: Select at least one of the following. | | 1 |

| | | |
|---|---|---|
| OVPR 601 | Scientific Integrity | |
| OVPR 602 | Responsible Scientific Conduct | |
| OVPR 603 | Responsible Conduct of Research | |
| Elective courses | | |
| Methodological electives: Select nine credits from the following. | | 9 |
| BIOS 549 | Spatial Data Analysis | |
| BIOS 567 | Statistical Methods for High-throughput Genomics Data I | |
| BIOS 632 | Multivariate Analysis | |
| BIOS 635 | Structural Equation Modeling | |
| BIOS 668 | Statistical Methods for High-throughput Genomic Data II | |

| Dissertation research | | |
| EPID 697 | Directed Research in Epidemiology | 18 |
| Total Hours | | 61 |

The minimum total of graduate credit hours required for this degree is 61.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. A typical plan of study is available on the department's website (<https://familymedicine.vcu.edu/epidemiology/phd/>).

Genetic Counseling, Master of Science (M.S.)

Program accreditation

Accreditation Council for Genetic Counseling

Program goals

1. Competency in genetic counseling
2. Eligibility for certification by the American Board of Genetic Counseling
3. Preparation for careers in genetic counseling and human genetics and genomics

Successful candidates will demonstrate competency in all four genetic counseling domains: I – genetic expertise and analysis, II – interpersonal, psychosocial, and counseling skills, III – education and IV – professional development and practice.

Program objectives

1. Demonstrate knowledge of the principles of human, medical and public health genetics and genomics and their related sciences

2. Apply knowledge of genetic principles and understand how they contribute to etiology, pathophysiology, clinical features, disease expression, natural history recurrence risk, clinical management and disease prevention
3. Apply knowledge of genetic principles to understanding of differential diagnosis, genetic testing, genetic test report interpretation and population screening

Student learning outcomes

1. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the core clinical competencies established by the Accreditation Council for Genetic Counseling. These competencies are documented with written and oral evaluations at the completion of each of the clinical rotations by the rotation supervisor.
2. General knowledge of sciences: The candidate should demonstrate a general knowledge of the elements of the sciences as related to genetic molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature. The student is evaluated by academic performance, face-to-face and written evaluation of clinical performance in multiple rotations by multiple supervisors and annual written and oral exams.
3. Communication skills: The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. This is achieved by evaluations of clinical rotations both written and verbal that are based on the competencies established by the Accreditation Council for Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.
4. Education skills: Effectively educate clients, orally and in writing, about a wide range of genetics and genomics information based on their needs, their characteristics and the circumstances of the encounter.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--|
| M.S. | Fall | Applications received prior to Jan 15 given priority consideration | GRE within five years of application; international applicants must score 100 or greater on the TOEFL. |

In addition to the general admission requirements of the VCU Graduate School (p. 35):

1. Applicants must have successfully completed undergraduate training and hold a baccalaureate degree from an accredited university or college.
2. Applicants must write a personal essay, no longer than two pages, indicating their interest and suitability to the field of genetic counseling.
3. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion or philosophy) and three credit hours each of biochemistry, statistics and genetics. It is recommended that all prerequisite courses have been completed within 10 years of application. A prerequisite may be in process at the time of application. A minimum grade of a B must be obtained prior to admission if the course is in progress at the time of acceptance.
4. Students accepted to the program are generally drawn from applicants with a minimum undergraduate grade-point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students.
5. The Graduate Record Examination is required for admission; there is no MCAT substitution. The GRE should be taken within five years of application submission. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a writing performance above a score of 3.5 on the analytical section.

6. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version.
7. Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crisis hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

Note: The department receives an average of 200 applications annually. Of those, about 50 are invited for an onsite interview, and eight to 10 students matriculate. The on-site interview is required for all North American applicants.

The program participates in the Association of Genetic Counseling Program Directors program match. Prospective students may see the National Society of Genetic Counselors (<http://www.nsgc.org/p/cm/ld/fid=44%23accept/>) website and the American Board of Genetic Counseling (<http://www.abgc.net/ABGC/AmericanBoardofGeneticCounselors.asp>) website for additional information.

Matriculating genetic counseling students are eligible for selection in the VA-LEND certificate in neurodevelopmental disabilities. Information is available at wp.vcu.edu/virginialend (<https://rampages.us/virginialend1/>).

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 60 credit hours. The program is a full-time, on-campus program. (Part-time on-campus options may exist at the discretion of the program director.) There is no online option for degree completion. Students are expected to complete their course work in four semesters (21 consecutive months). To be considered full-time, the VCU School of Medicine requires students to register for 15 credit hours in the fall and spring semesters. Occasionally special circumstances may occur that could require a temporary leave of absence. The VCU Graduate School requires that master's degrees be completed in a maximum of six years.

In order to be considered in good academic standing, a student must maintain a 3.0 GPA. Students who fail to maintain a 3.0 average are permitted one semester to bring their averages up to the required level.

As part of their course work, students begin clinical rotations in the spring semester of the first year and continue through the summer and both semesters of the second year. Students are required to engage in clinical experiences during the intervening summer. Options exist for summer experiences to occur outside the city of Richmond.

Students must pass a written comprehensive exam at the conclusion of the first two semesters of study and a written and oral comprehensive exam prior to graduation. The oral examination covers clinical competency and research competency.

Students are required to complete a capstone project during their course of study. The capstone project is similar to a thesis in that it is a culminating, synthesizing experience that may involve hypothesis-based research; however, capstone projects may also represent a more applied genetic counseling project.

Students are strongly recommended to select a primary adviser and the members of their advisory committee by the conclusion of the second semester. There should be at least two full committee meetings prior to the student's oral exam. The committee must include at least three members, at least two of whom are from the department and at least one of whom is from outside of the department.

In addition to participating in course work, the capstone project and counseling rotations, students in the department also participate in a number of community and education programs. These opportunities may include lectures and presentations to local schools and community events, participation in health fairs, School of Medicine-sponsored activities, state of Virginia Genetics Advisory Board meetings, and DNA Day on the Hill in Washington, D.C.

The straddling of the student and professional roles is a lifelong process in the changing field of human genetics and genetic counseling. Graduates of this program will be contributing members of the clinical genetics team of counselors, physicians and basic scientists and contributing members of commercial genetic testing laboratories and the developing field of human genomic medicine.

Course requirements

| Course | Title | Hours |
|--|---|-----------|
| Required core courses | | |
| ANAT 612 | Human Embryology | 2 |
| HGEN 501 | Introduction to Human Genetics | 3 |
| HGEN 502 | Advanced Human Genetics | 3 |
| HGEN 510 | Classic Papers in Human Genetics | 1 |
| HGEN 525 | Practice of Genetic Counseling | 3 |
| HGEN 526 | Practice of Genetic Counseling | 3 |
| HGEN 527 | Medical Genetics | 3 |
| HGEN 528 | Medical Genetics | 3 |
| HGEN 600 | Clinical Genetics (repeated three times) | 9 |
| HGEN 601 | Research in Genetic Counseling | 2 |
| HGEN 607 | Processes in Genetic Counseling I | 1 |
| HGEN 608 | Processes in Genetic Counseling II | 1 |
| HGEN 615 | Techniques in Genetic Counseling | 3 |
| HGEN 622 | Cancer Genetic Counseling | 3 |
| HGEN 690 | Genetics Research Seminar (repeated for four credits) | 4 |
| HGEN 697 | Directed Research in Genetics (repeated for a minimum of eight credits) ¹ | 8 |
| PATH 691 | Special Topics in Modern Instrumental Methods (diagnostic genetic testing) | 2 |
| Required additional courses | | |
| OVPR 601 or OVPR 602 or OVPR 603 | Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research | 1 |
| Elective courses | | |
| As approved by the program director | | 5 |
| Total Hours | | 60 |

¹

One credit to be taken in the summer semester as noted in the plan of study.

The minimum total of graduate credit hours required for this degree is 60.

Typical plan of study

Many students may take more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Genomics Data Science, Certificate in (Graduate certificate)

The mission of the VCU Department of Biostatistics is to improve human health through methodological research, the education of graduate students and health science researchers in biostatistical methods and applications, and collaborative health sciences research.

Program goal

With the advent of sequencing technologies, genomic data science became a broad and interdisciplinary field with multiple points of entry, including biology, genetics and genomics, computer science, informatics, statistics and biostatistics, and others. As such, entry into the field can be confusing, especially for those looking to pursue further training, education or careers in this field. The purpose of the graduate Certificate in Genomics Data Science is to serve as a single point of entry for those interested in the field of genomics data science, which is defined as four domains: 1) biological principles of genomic science, 2) data analysis/

statistical training, 3) principles of sequencing and bioinformatics and 4) computational principles and software tools.

The knowledge and skills acquired as a part of this certificate program will enable graduates to have better opportunities to be employed in medical centers and hospitals, data science-oriented departments in colleges and universities and government jobs. This training program is designed to be completed over two semesters covering 10 months.

Student learning outcomes

The purpose of the Certificate in Genomics Data Science is to train graduate students on the biological, DNA sequencing, bioinformatics and data analysis principles and procedures associated with applied genomics research and prepare them to apply those procedures to real data. Graduates will achieve the following learning outcomes:

1. Utilize the basic principles and methodologies of molecular biology and genetics, focusing on gene structure and function, epigenetics, gene expression, biochemical genetics and inborn errors of metabolism for therapeutic diagnostic decision-making
2. Receive training in the use of genomic technologies and software tools for data processing widely used in bioinformatics, and using the R programming language to learn computational methods and data manipulation principles, clustering, data visualization, and machine learning algorithms
3. Acquire the ability to use software packages to perform data analysis procedures and interpret the results, including descriptive statistics, tests of hypotheses and confidence intervals, analysis of variance, correlation and linear regression analysis, and quality control
4. Apply the knowledge and skills acquired in many high-demand areas, including genomic medicine, health care, pharmaceuticals and medical manufacturing, and government

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on certificate programs (p. 613) is available elsewhere in this chapter of the Graduate Bulletin.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--------------------|
| Certificate | Fall | July 1 | |

All successful applicants to this graduate certificate program are required to meet the admission requirements of the VCU Graduate School (p. 35) and are expected to:

- Have earned an undergraduate degree in an area related to biology, bioinformatics, computer sciences, computational biology, applied mathematics, statistics or in another relevant discipline
- Have computing/technology skills that allow the student to learn and use several statistical software packages

Applicants must submit the following materials to VCU graduate admissions:

- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official transcripts from all undergraduate and graduate schools attended
- A statement of purpose outlining career goals
- A resume stating relevant work experience

Additionally, international applicants must:

- Submit official transcript evaluations from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers
- Provide proof that they can support themselves financially for the duration of the program

Additionally, applicants that are non-native English speakers must demonstrate proficiency in English by providing one of the following:

- A Test of English as a Foreign Language minimum composite score of 100 for the Internet-based test or 600 for the paper-based score
- An International English Language Testing Systems minimum score of 6.5 on the academic exam
- A passing score on the VCU English Language Program compression test

Students must take one three-credit course from each of the domains of biological principles of genomic science, data analysis/statistical training, and principles of sequencing and bioinformatics analysis; two three-credit courses in the domain of computational principles and software tools; and at least one three-credit elective course from any domain.

Curriculum requirements

| Course | Title | Hours |
|---|---|-----------|
| Biological principles of genomic science | | |
| Select one from: | | 3 |
| BIOL/BNFO 540 | Fundamentals of Molecular Genetics | |
| BIOL 516 | Population Genetics | |
| HGEN 501 | Introduction to Human Genetics | |
| Data analysis/statistical training | | |
| Select one from: | | 3 |
| BIOS 543 | Graduate Research Methods I | |
| BIOS 572 | Analysis of Biomedical Data I | |
| HGEN 651 | Statistics for Genetic Studies I | |
| STAT 641 | Applied Data Analysis | |
| Principles of sequencing and bioinformatics analysis | | |
| Select one from: | | 3 |
| BIOS 567 | Statistical Methods for High-throughput Genomics Data I | |
| BNFO 601 | Integrated Bioinformatics | |
| Computational principles and software tools | | |
| Select two from: | | 6 |
| BNFO 600 | Basic Scripting Languages | |
| HGEN 611 | Data Science I | |
| HGEN 612 | Data Science II | |
| Suggested electives | | |
| Select three credits from: | | 3 |
| BIOS/STAT 513 | Mathematical Statistics I | |
| BIOS/STAT 514 | Mathematical Statistics II | |
| BIOS 516 | Biostatistical Consulting | |
| BIOS 544 | Graduate Research Methods II | |
| BIOS 573 | Analysis of Biomedical Data II | |
| BNFO 653 | Advanced Molecular Genetics: Bioinformatics | |
| BIOS 668 | Statistical Methods for High-throughput Genomic Data II | |
| CMSC 610 | Algorithmic Foundations of Bioinformatics | |
| HGEN 502 | Advanced Human Genetics | |
| HGEN 603 | Mathematical and Statistical Genetics | |
| HGEN 652 | Statistics for Genetic Studies II | |
| STAT 543 | Statistical Methods I | |
| STAT 544 | Statistical Methods II | |
| Total Hours | | 18 |

The minimum total of graduate credit hours required for this certificate is 18.

A maximum of six equivalent, graduate-level transfer credit hours at the 500 level or higher may count toward the certificate. The transfer credits

are evaluated on a case-by-case basis to determine course equivalency. Credits from a degree already awarded cannot be applied toward the certificate.

Contact

Ekaterina Smirnova, Ph.D.
Assistant professor, Department of Biostatistics
Ekaterina.Smirnova@vcuhealth.org
(804) 828-9824

Healthcare Policy and Research, Doctor of Philosophy (Ph.D.)

Program goal

The doctoral program in healthcare policy and research trains students to understand the economic, political and social factors that affect access to care and the quality and cost of health care. Graduates of this program will have strong methodological and theoretical skills that will prepare them to make important contributions to the fields of health care policy and public health. Their training will enable them to add to scientific knowledge about how health policy, social factors, financing systems, organizational structures, care processes, health technologies and personal behaviors affect health care outcomes.

The program is structured to provide progressive mastery of the design and analysis of health services research. Program graduates will be able to formulate health care policy; to plan, implement and evaluate health programs and policies; and to interpret research findings in ways that are practical and policy-relevant to a variety of audiences. Trainees obtain experience working with colleagues in public health, medicine, psychology and other disciplines and to advance to positions as health policy researchers in academia, government or the private sector.

Student learning outcomes

1. Content and theory: Students will critically articulate how health policies are developed, implemented and evaluated.
2. Critical and analytical thinking: Students will accurately analyze and synthesize health policy research.
3. Research methods: Students will demonstrate proficiency in designing, conducting and interpreting health policy research. Students will write and submit a grant proposal.
4. Effective communication: Students will communicate effectively to translate and disseminate research findings for health policy audiences.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and

on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

Enrolled students may access the program handbook on Blackboard.

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at sophas.org (<http://www.sophas.org/>) and submit a VCU supplemental application following instructions available at sophas.org.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|---------------------------------------|
| Ph.D. | Fall | Jan 15 (Applications received prior to this date given priority consideration.) | GRE; TOEFL for international students |

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum qualifications.

1. A college-level course in calculus with a minimum grade of B is preferred.
2. Applicants must have graduated from an accredited university or its equivalent, with a master's degree in a related discipline (e.g., economics, public health, public policy, health administration, public administration). Applicants must have completed relevant course work (including microeconomics and introductory statistics) or have professional experience in a health-related field (two years minimum) that provides an appropriate background for graduate-level study in healthcare policy and research.
3. Applicants must have taken the Graduate Record Exam within the past five years; scores in the 75th percentile are preferred.
4. Applicants from countries where English is not the primary and official national language must complete one of the following:
 - a. English proficiency verification through official TOEFL score 550 or higher
 - b. Graduate with a master's degree following two years of study at a U.S. institution
 - c. English language proficiency certification through appropriate English training programs at other U.S. institutions, or English language proficiency certification by passing the English Language Proficiency Examination and/or the corresponding English Language Institute courses

VCU policy also requires that prospective students who have studied outside of the U.S. must provide an official WES or ECE external credential evaluation as a required part of the admissions process.
5. Applicants must present three letters of recommendation from individuals who are in a position to judge their ability to engage in interdisciplinary graduate study in healthcare policy and research. At least one recommendation must be from an individual who can comment on the applicant's academic qualifications (e.g., former instructor or adviser).
6. Applicants must provide a written statement of professional intent that includes the proposed area of research and identifies the faculty member(s) with which the applicant is interested in working.
7. Applicants must present a curriculum vitae or resume.
8. A recent writing sample, such as a first author, peer-reviewed publication; a master's thesis; a book chapter; a policy brief or report; or a graduate course paper is required. An undergraduate course paper may be substituted if none of the above is available.
9. Prospective students must be available to interview either in person or teleconference via technology such as Zoom.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), a cumulative GPA of 3.0 must be maintained. Students must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program. At the discretion of the HCPR committee, a student who is retaking a required course may still be eligible to take the comprehensive examination and to start the dissertation prior to repeating the course.

At the end of the second year of required course work, students will take a written comprehensive examination designed to evaluate the student's ability to:

1. Integrate course material
2. Demonstrate critical thinking and evaluation of the literature in healthcare policy and research
3. Demonstrate quantitative analysis skills

After passing the written comprehensive examination, the student will schedule the proposal defense within six months. Following successful defense of the proposal, the student will prepare three manuscripts of publishable quality that will comprise the body of the dissertation and will orally defend the dissertation. It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within six years from the date of admission to the degree program. Extensions may be approved in extenuating circumstances.

Course requirements

| Course | Title | Hours |
|--|---|-----------|
| Required core courses | | |
| ECON 501 | Introduction to Econometrics ¹ | 3 |
| ECON 612 | Econometrics | 3 |
| ECON 642 | Panel and Nonlinear Methods in Econometrics ² | 3 |
| EPID 571 | Principles of Epidemiology | 3 |
| HCPR 699 | Departmental Seminar (one-credit course taken four times) | 4 |
| HCPR 701 | Health Services Research and Policy I | 3 |
| HCPR 702 | Health Services Research and Policy II | 3 |
| HCPR 703 | Health Economics: Theory and Principles | 3 |
| HCPR 720 | Economics of Health Disparities | 3 |
| HCPR 730 | Survey Research Methods and Analysis for Health Policy | 3 |
| HCPR 732 | Research Design and Proposal Preparation | 3 |
| HCPR 733 | Statistical Methods in Analysis of Healthcare Research | 3 |
| HCPR 734 | Economic Evaluation and Decision Analysis in Health | 3 |
| Required additional courses | | |
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |
| Elective courses | | |
| Choose any graduate-level courses approved by adviser. | | 9 |
| Dissertation research | | |
| HCPR 899 | Directed Research (nine credits minimum) | 9 |
| Total Hours | | 59 |

The minimum total of graduate credit hours required for this degree is 59.

1

BIOS 553 may be substituted with approval

2

BIOS 625, BIOS 631 or BIOS 647 may be substituted with approval

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, the nature of research being conducted, or the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements. This program has a typical time to degree of four years. For additional information, see the departmental website.

Human Genetics, Doctor of Philosophy (Ph.D.)

Program goal

The program is designed to provide students with training in human and molecular genetics and with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Applications received prior to Jan 15 given priority consideration | |

Special requirements

- International applicants must score 100 or greater on the TOEFL.
- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report TOEFL score, use VCU Code 5570.)
3. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant
5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g., cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics,

developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student's course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit the program website (<https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/>).

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 86 graduate credit hours. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student's knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student's development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

Curriculum requirements

| Course | Title | Hours |
|---------------------|---|-------|
| Core courses | | |
| HGEN 501 | Introduction to Human Genetics | 3 |
| HGEN 502 | Advanced Human Genetics | 3 |
| HGEN 510 | Classic Papers in Human Genetics | 1 |

| OVPR 601 or OVPR 602 or OVPR 603 | Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research | 1 |
| Electives | | |
| Select at least two courses from among: PATH 670; courses at the 500-level or above in ANAT, BIOC, BIOL, BIOS, BNFO, HGEN, LFSC, MICR, NEUS, PHTX and PHIS (excluding laboratory courses); courses specifically for professional programs (e.g. HGEN 600); directed research; independent study; seminar; current topic courses; MICR 608 and MICR 609 | | 5 |
| Dissertation research | | |
| HGEN 697 | Directed Research in Genetics ³ | 41 |
| Total Hours | | 86 |

1

HGEN 610 should be taken every fall and spring semester beginning the spring term of the first year.

2

HGEN 690 should be taken every fall and spring semester.

3

HGEN 697 should be taken every semester following the first year of study.

The minimum total of graduate credit hours required for this degree is 86.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years. Students complete this degree program on average within five years. Students should refer to their program websites (<https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/curriculum/>) and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 61) for additional details.

Program website: [gen.vcu.edu](http://www.gen.vcu.edu/) (<http://www.gen.vcu.edu/>)

Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics

Program goal

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree]

Program accreditation

Accreditation Council of Genetic Counseling

Program goal

Provide training in human and molecular genetics and competency in genetic counseling

The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Eligibility for certification by the American Board of Genetic Counseling

To prepare individuals for careers in genetic counseling and human genetics, successful candidates will demonstrate competency in all four genetic counseling domains: I – genetics expertise and analysis; II – interpersonal, psychosocial and counseling skills; III – education; and IV – professional development and practice.

The Department of Human and Molecular Genetics offers training that combines preparation for a career as a genetic counselor with research-based doctoral training in a coordinated program that integrates the complementary aspects of these two degree categories. In order to be admitted to this dual-degree program, an applicant must be accepted into both the M.S. and Ph.D. programs.

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. This is also achieved by evaluations of clinical rotations, both written and verbal, that are based on the competencies established by the American Board of Genetic Counseling and the scope of practice as set forth by the National Society of Genetic Counselors.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in research in human and molecular genetics, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

5. Integrated knowledge of human and molecular genetics: The candidate will demonstrate an appropriate level of knowledge of the current elements of human and molecular genetics as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
6. Competency in practice: The candidate should demonstrate development of competency in the responsible practice of genetic counseling. This will be assessed in the clinical setting by certified genetic counselors and medical geneticists. The assessment is based upon the core clinical competencies established by the Accreditation Council for Genetic Counseling (ACGC). These competencies are documented with written and oral evaluations at the completion of each of the seven clinical rotations by the rotation supervisor.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on all types graduate programs (p. 613) is available elsewhere in the Graduate Bulletin.

To qualify as a dual-degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the “dual degree” for at least one semester.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|----------------|-----------------------|-----------------|--|
| Ph.D. and M.S. | Fall | Jan 15 | GRE within five years of application (MCAT or DAT is not acceptable in lieu of GRE.) |

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form. The dual degree box on the application must also be checked.
- Non-native English speakers must score 100 or greater on the TOEFL.
- It is recommended that all prerequisite courses have been completed within 10 years of application.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35). In order to be admitted to this dual-degree program, an applicant must apply to and be accepted into both the M.S. and the Ph.D. programs.

Human Genetics, Doctor of Philosophy

Successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. Current GRE scores (taken within the past five years), with scores at the 75th percentile or greater preferred
3. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
4. Personal statements, which should include: long-term career goals to assess reasons behind the candidate’s application; how a Ph.D. in

biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration

5. Three letters of recommendation that speak to the scientific competency and experience of the applicant
6. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Doctor of Philosophy in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to Ph.D. students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling. Once core course work requirements have been completed, the student’s course plan is tailored to meet individual needs with regard to the area of research focus. A concentration in quantitative human genetics is available for those planning a career in this area. For more detailed information on the program visit the department’s website (<https://gen.vcu.edu/graduate-and-training-programs/phd-in-human-genetics/>).

Genetic Counseling, Master of Science (M.S.)

Applicants should have successfully completed undergraduate training and hold a baccalaureate degree. Prerequisites for admission include six credit hours each of biology, chemistry and behavioral science (psychology, anthropology, sociology, religion and philosophy) and three credit hours each of biochemistry, statistics and genetics. Students accepted to the program are generally drawn from applicants with an undergraduate minimum grade point average of 3.0 (on a 4.0 scale or equivalent), with an average GPA of 3.3 to 3.5 for matriculating students. The Graduate Record Examination is required for admission; VCU does not substitute with the MCAT. Matriculating students generally have GRE verbal scores at or above 153, quantitative scores at or above 144 and a performance above a score of 3.5 on the analytical section. Applicants holding an undergraduate degree from foreign institutions must display an acceptable level of English proficiency by achieving a score of 250 on the computer-based TOEFL examination or 600 on the written version. (The program participates in the Association of Genetic Counseling Program Directors program match. See the National Society of Genetic Counselors website (<https://www.nsgc.org/>) for additional information.)

Additionally, successful applicants often have experience with shadowing genetic counselors and medical geneticists, interviewing genetic counselors and exposure to individuals with physical and cognitive disabilities. Exposure to crises hotlines, support groups and community activities related to individuals with disability and genetic conditions is also helpful.

In the last five certification cycles (2007 to 2012) VCU graduates have an 86 percent pass rate on the American Board of Genetic Counseling/ Accreditation Council of Genetic Counseling national certification examination.

In addition to the general VCU Graduate School graduation requirements (p. 32), completion of this dual-degree program requires at least three

years of study for students entering with a baccalaureate degree and must be completed within eight years.

| Courses within the M.S. curriculum counted toward the Ph.D. in Human Genetics | | |
| HGEN 510 | Classic Papers in Human Genetics | 1 |
| HGEN 690 | Genetics Research Seminar (one-credit course repeated for four credits) | 4 |
| OVPR 601 or OVPR 602 or OVPR 603 | Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research | 1 |
| Total Hours | | 20 |

Students in this dual-degree program must complete a minimum of 126 graduate credit hours to earn both degrees. If students were to complete both degrees independently, a minimum of 146 total graduate credit hours would be required.

The training programs in human and molecular genetics are intended to set the tone for a career and lifelong learning in human and molecular genetics by developing the student's knowledge of the field and skills in writing, laboratory techniques, critical thinking, data interpretation, study design, literature research and review, and integration of data from multiple disciplines while fostering the student's development as an independent researcher, laboratory director or teacher. These programs also seek to provide students with a core foundation of knowledge that will equip them to carry out translational research and for later work leading to certification by the American Board of Medical Genetics.

Students working toward the Ph.D. degree in human genetics pass through two stages of graduate study. The first stage consists primarily of course work recommended by the department and the student's graduate committee; the second stage consists of original research leading to the doctoral dissertation. Ph.D. students are expected to complete the required course work within four semesters and one summer, and they are intended to set the tone of a lifelong research career. In order to be considered in good academic standing, a student must maintain a 3.0 grade point average. The focus then shifts to the student's development as an independent researcher with emphasis being placed upon the development and execution of an original research project leading to the doctoral dissertation.

After the second year of study, students will take the Ph.D. candidacy examination. This exam comprises two parts, a departmental comprehensive examination and a written NIH-style application with an oral examination administered by the student's graduate committee. Upon successfully completing the departmental comprehensive and the oral comprehensive exam, the student is admitted to Ph.D. candidacy. At this point, students are expected to develop and conduct dissertation research projects and to write and defend their dissertations describing their dissertation research.

Course requirements

| Course | Title | Hours |

| Total Hours | | 126 |

¹M.S. in Genetic Counseling requirement

²Ph.D. in Human Genetics requirement

³HGEN 610 should be taken every fall and spring semester beginning the spring term of the first year but not required in the last year of study.

⁴HGEN 690 should be taken every fall and spring semester

⁵HGEN 697 should be taken every semester following the first year of study

The minimum total of graduate credit hours required for this degree is 126.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted or in the enrollment or funding status of the student. For example, students who elect the quantitative genetics concentration for the Ph.D. have additional course requirements. The program requires at least three years of study for students entering with a B.S. or B.A. degree and must be completed within eight years. Students complete these degree programs on average within six years. Students should refer to their program websites (<https://gen.vcu.edu/graduate-and-training-programs/dual-degree-program-in-human-genetics-genetic-counseling/>) and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Human Genetics, Master of Science (M.S.)

Program goal

The goal of the master's program in human genetics is to provide training in human and molecular genetics. The program is designed to provide students with the skills required to advance to positions as researchers and trainers in a broad spectrum of positions in human and molecular genetics. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the

questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Explain basic genetic principles and their biological basis
2. Assess the inheritance pattern of a disease or phenotype using pedigree data and calculate recurrence risk
3. Explain how different DNA variants and structural changes can affect the phenotype of an organism
4. Explain the methods used in genetic analyses and what each method can reveal
5. Clean and format large data sets for further analyses
6. Apply the appropriate statistical test in the analysis of data
7. Apply the principles of reproducibility of research such as the use of version control, access to computer code, transparency of analyses and data availability
8. Read and comprehend a primary journal article and be able to list the strengths and weaknesses of the research
9. Practice the highest ethical principles with responsible conduct in genetics research
10. Speak and present clearly to professional and lay audiences with respect to use of vocabulary and logical progression including the use of figures and tables to effectively present a research project, proposal, or findings and implications
11. Write clearly with respect to grammar, syntax, spelling, use of vocabulary and logical progression including the use of figures, tables and citations to effectively present a research project or proposal
12. Form a testable hypothesis, demonstrate the ability to design and develop experiments to test the hypothesis, collect and analyze data, and form conclusions from the analysis

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for

continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall | May 1 | GRE, MCAT or DAT |

Special requirements

- International applicants must achieve a minimum score of 100 on the TOEFL or a minimum of 6.5 on the IELTS.

In addition to the general admission requirements of the VCU Graduate School (<https://vcu-curr.courseleaf.com/graduate/study/admission-graduate-study/admission-requirements/>), applicants wishing to specialize in human genetics should have courses in biology, chemistry through organic chemistry, genetics and mathematics through calculus.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a

report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Human and Molecular Genetics offers a comprehensive program in graduate study leading to a Master of Science in Human Genetics. The program includes the completion of an original research project under the supervision of a faculty adviser and a background/foundation of courses that prepare students for research-oriented careers in the rapidly expanding field of human genetics. Major areas of study available to master's students in the program include clinical and molecular cytogenetics, molecular genetics, developmental genetics, cancer genetics, behavior genetics, population and quantitative genetics, genetic epidemiology, clinical genetics and genetic counseling.

In addition to the general VCU Graduate School graduation requirements (p. 32), the M.S. degree requires at least two years of full-time study for students entering with a B.S. or B.A. degree and must be completed within six years. Students must complete a minimum of 36 graduate credit hours. Students may be required to take an additional one hour of directed research after the second spring semester if needed.

Upon completing their thesis research, master's students must report their results in a thesis that is prepared in an acceptable form and style as detailed by the university Graduate School. A final oral examination is scheduled after the student's thesis has been approved by the student's advisory committee. This examination includes the subject matter of course work the student has completed as well as the thesis. It is administered by the student's graduate advisory committee who will vote on the student's performance in addition to rating them with regard to the rubrics defined by the School of Medicine.

Human Genetics, Master of Science (M.S.) with a concentration in genomic data science

Program goal

The genomic data science concentration is designed for students interested in the computational aspects of genetics and genomics

research. The goal of this concentration is to provide students with training in broadly applicable analytical and computational skills from the emerging field of data science to address important questions in human and molecular genetics. The structure of the M.S. program provides a framework for the progressive development of a mastery of the current state of the subject matter in human and molecular genetics and an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in this discipline. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of human and molecular genetics knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Explain basic genetic principles and their biological basis

Medical Physics, Certificate in (Post-baccalaureate graduate certificate)

Program accreditation

Commission on Accreditation of Medical Physics Educational Programs (<http://campep.org/>)

Program goals

The graduate certificate in medical physics offers course work in physics as it is applied to the diagnosis and treatment of human diseases. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, imaging and health physics. The goal of the program is to provide a career path in medical physics as an alternative to a terminal degree in medical physics. The program is primarily designed for retraining those who possess a doctoral degree in physics or a related field.

The mission of the medical physics graduate certificate program is to serve the Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program is intended for postdoctoral individuals seeking to enhance their credentials for admission into a medical physics residency position.

Student learning goals

To develop core competency in medical physics by:

1. Obtaining a medical physics knowledge base
2. Enhancing medical physics-specific problem-solving skills
3. Enhancing clinically relevant communication skills

Student learning outcomes

1. Demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics
2. Demonstrate the ability to evaluate and integrate such knowledge into the solution of clinically relevant problems as measured by the course work
3. Demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving methods and solutions as measured by course work
4. Demonstrate appropriate written communication skills suitable for practice in clinical medical physics
5. Demonstrate appropriate oral and visual communication skills suitable for practice in clinical medical physics

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

| Certificate | Fall | Jan 15 | GRE |

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be from courses higher than introductory level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must have earned a doctoral degree in physics, engineering or other area of physical science with a minimum GPA of 3.0 on a 4-point scale

Medical Physics, Doctor of Philosophy (Ph.D.)

Program accreditation

Commission on Accreditation of Medical Physics Educational Programs (<http://campep.org>)

Program goals

The Ph.D. in Medical Physics offers students course work and research training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the doctoral program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in both the health care delivery and biomedical research settings. The program will prepare students for careers as independent investigators in the field of medical physics and jointly for careers in university departments, research institutes, laboratories and hospitals as trainee clinical medical physicists. Research areas include brachytherapy, hyperthermia, image-guided radiation therapy, intensity-modulated radiation therapy, proton therapy, medical imaging technologies, radiomics, image processing and reconstructions, functional imaging, novel treatment device fabrications, robotics, and 4-D treatment technology development.

Professional competency: To develop professional competency in medical physics by providing a framework in which students progressively develop a mastery of the current state of medical physics and an ability to synthesize this information and apply it in research and clinical settings. Additionally, the program aims to develop skills in the various means of communicating both the core of medical

physics knowledge and expression of experimental design, results, and interpretation to a variety of potential audiences.

Scientific competency: To develop scientific competency in medical physics by providing a framework by which candidates develop skills to design, conduct and implement theoretical and clinical research which answers identified questions. The research focus may lead to new and/or improved applications of physics for diagnosis and treatment of diseases. In broad terms, candidate research will be directed toward advancing "minimally invasive medicine" through applications of ionizing and non-ionizing radiation.

Student learning outcomes

1. **Communication skills:** The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
2. **Experimental design:** The candidate should demonstrate an appropriate level of skill in the theoretical and technical design of experimental procedures and the technical conduct of experimentation related to his or her research. This includes demonstration of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
3. **Knowledge of medical physics literature:** The candidate should demonstrate a general knowledge of medical physics literature and a more detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
4. **Problem-solving:** The candidate should demonstrate an appropriate level of skill in the identification of meaningful medical physics research problems, including the ability to defend said identifications, and the design and implementation of appropriate problem-solving methods as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on doctoral programs is available in the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Fall | Jan 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students entering the program with an undergraduate degree are required to earn a minimum of 42 credit hours of graduate medical physics course work. At least 19 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new Ph.D. students entering the program will be assigned an adviser. After successful completion of courses by the end of first year with a minimum GPA of 3.0, students and advisers will develop a graduate advisory committee. The committee will direct the students in their research and subsequent course selection. Advisers will report once each semester of student enrollment to the program director on the academic progress of their students, will participate in the oral candidacy examinations of students and chair the students' dissertation defense examinations.

The student is required to successfully complete both written comprehensive and oral candidacy examinations to be granted Ph.D. candidate status. The written comprehensive examination covers core knowledge and applications in medical physics course work, as well as basic concepts in physics, chemistry and biology. The oral candidacy examination, administered by the student's graduate advisory committee, is based upon a written prospectus describing the proposed dissertation research project. Examiners evaluate the adequacy of the proposed project, the student's level of understanding of the project and the likelihood that the dissertation research project can be completed successfully.

After being approved for degree candidacy, the student must conduct a substantial original investigation under the supervision of the advisers and must prepare a dissertation reporting the results of the research in the context of existing scientific knowledge. After the dissertation has been completed and unanimously accepted for defense by the graduate advisory committee, the candidate will appear before the committee for an oral dissertation defense. The oral defense examines the candidate's research, dissertation documentation and underlying fundamental knowledge. Successful completion and defense of the dissertation is required for degree completion.

Course requirements

| Dissertation research | | |
| MEDP 697 | Directed Research (11 credits minimum) | 11 |
| Total Hours | | 42 |

1

Variable credit hours; clinical rotations may be repeated.

The minimum total of graduate credit hours required for this degree is 42.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study, or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Medical Physics, Master of Science (M.S.)

Program accreditation

Commission on Accreditation of Medical Physics Educational Programs (<http://campep.org/>)

Program goals

The Master of Science in Medical Physics offers students course work and practical clinical training in physics as it is applied to the diagnosis and treatment of human diseases. The mission of the master's program is to serve the commonwealth of Virginia and the nation by helping to meet the demand for competent medical physicists in the health care delivery setting. The program will prepare students for careers as qualified and independent clinical medical physicists. Required course work provides theoretical and practical training in radiation dosimetry, radiation biology, radiation therapy, medical imaging and health physics.

Professional competency: To develop professional competency in medical physics by providing a framework in which students progressively develop mastery of the current state of medical physics and an ability to synthesize this information and apply it in a clinical setting. Additionally, students in the program will develop skills in the various means of communicating the core of medical physics knowledge and clinical applications of that knowledge to a variety of potential audiences.

Clinical competency: To develop clinically competent medical physics graduates by providing a framework in which students progress from didactic knowledge to clinical knowledge and demonstrate application of clinical medical physics principles, practices and procedures.

Student learning outcomes

1. **Clinical performance:** The candidate should demonstrate an appropriate level of skill in the theoretical, practical and technical conduct of medical physics in the clinical setting. This includes demonstration of an appropriate level of competence in the ability to:
 - a. Design and quality assure radiation therapy treatment plans for both brachytherapy and external beam radiation therapy
 - b. Quality assure radiation therapy delivery devices
 - c. Quality assure radiation therapy treatment charts
 - d. Perform calibration and/or beam delivery commissioning measurements as measured by instructor evaluation in compliance with accepted clinical standards
2. **Communication skills:** The candidate should demonstrate that an appropriate level of oral, written and visual communication skills have been acquired. The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by course work and the quality of the thesis. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, chart notation and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by course work and the quality of the thesis.
3. **Medical physics knowledge base:** The candidate should demonstrate satisfactory knowledge of the base of scientific information required to practice clinical medical physics. This includes general knowledge of medical physics scientific materials, clinical policies and procedures, and translational scientific literature. The student should demonstrate the ability to evaluate and integrate such knowledge into the solution of clinical problems as measured by course work and the quality of the thesis.
4. **Problem-solving:** The candidate should demonstrate an appropriate level of skill in the identification of clinical medical physics problems and the design and implementation of appropriate problem-solving

methods and solutions as measured by course work, annual review and the quality of the thesis.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall | Jan 15 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35) and the School of Medicine, students are expected to satisfy the following minimum standards for admission.

1. Students must have a minimum of 30 credit hours in undergraduate physics, physical science or engineering, of which at least 18 credit hours must be at the upper level. Background courses should include calculus one and two, linear algebra, differential equations, modern physics, and electricity and magnetism.
2. Applicants must present a minimum GPA of 3.0 on a 4-point scale for the undergraduate degree or most recently completed graduate degree.

Provisional admission may be granted where deficiencies exist. These deficiencies must be removed by the end of the first year of residence, or its part-time equivalent, when the student's application will be re-examined. Courses that are designed to remove deficiencies will not be accepted for credit hours toward the graduate degree.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students entering the program with an undergraduate degree are required to earn a minimum of 30 credit hours of graduate medical physics course work. At least 22 credit hours must be earned at the 600 level or higher. Detailed degree requirements are listed below and in the medical physics graduate handbook.

All new M.S. students entering the program will be assigned an adviser. The student and adviser will develop a graduate advisory committee, which will direct the student in his/her research. Advisers will report once each semester of student enrollment to the program director on the academic progress of their students and will administer oral thesis defense examinations.

The student must conduct an original investigation under the supervision of his/her adviser and committee, and then must prepare a thesis reporting the results of the research in the context of existing scientific knowledge. After the thesis has been completed and unanimously approved for defense by the committee, the candidate will appear before the committee for an oral thesis defense examination. The oral thesis defense examines the candidate's research, thesis documentation and underlying fundamental knowledge. Successful completion of the thesis and its defense is required for degree completion.

Course requirements

| Course | Title | Hours |
|------------------------------|--|-------|
| Required core courses | | |
| MEDP 561 | Topographical Anatomy and Physiology | 1 |

Microbiology and Immunology, Doctor of Philosophy (Ph.D.)

Program goal

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by

inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified.

The Ph.D. program is also designed to develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences

Student learning outcomes

1. Oral communication skills: The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.
2. Written communication skills: The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.
3. Experimental design: The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
4. Problem-solving skills: The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
5. General knowledge of science: The candidate should demonstrate a general knowledge of the elements of the sciences as related to molecular/cellular bioscience and a detailed knowledge of his or her area of research, including an appropriate familiarity with the research literature.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and

procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|------------------------|
| Ph.D. | Fall | Applications received prior to Jan 15 given priority consideration | TOEFL if international |

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report GRE or TOEFL score, use VCU Code 5570.)
3. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant
5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 58 graduate credit hours. At least six credits must come from didactic 600-level courses.

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Ph.D. degree is offered, as well as an M.D.-Ph.D. option for medical students interested in academic or research careers, and a master's degree.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings, writing of a grant application and writing of scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student matches with a research adviser, completes a written and oral examination and then carries out an original independent research project under the direction of the adviser. The project falls under the review of a graduate advisory committee, and a written dissertation is defended in a final examination.

A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to maintain satisfactory academic progress.

Course requirements

Note: First-year Ph.D. students in the Biomedical Sciences Doctoral Portal should earn a minimum of seven credits of didactic courses in the fall semester to be eligible to matriculate into Ph.D. program in microbiology and immunology. Three of these credits must come from MICR 505 or MICR 515.

| Course | Title | Hours |
|------------------------------|-------------------|-------|
| Required core courses | | |
| IBMS 600 | Laboratory Safety | 1 |

| | | |
|----------|--|---|
| IBMS 620 | Laboratory/Clinical Rotations (three rotations) | 6 |
| MICR 505 | Immunobiology | 3 |
| MICR 515 | Principles of Molecular Microbiology | 3 |
| MICR 690 | Microbiology Research Seminar (taken each fall and spring semester; minimum eight credits) | 8 |

Required additional courses

Select at least one of the following (satisfies three credits of six-credit 600-level didactic requirement):

| | | |
|----------|---|--|
| MICR 605 | Prokaryotic Molecular Genetics | |
| MICR 616 | Mechanisms of Viral and Parasite Pathogenesis ¹ | |
| MICR 618 | Molecular Mechanisms of Bacterial Pathogenesis ¹ | |
| MICR 686 | Advanced Immunobiology ² | |

Select one of the following journal club courses for one semester every year (four credits minimum).

| | | |
|-------------|--|---|
| MICR 692 | Current Topics in Molecular Pathogenesis | |
| MICR 693 | Topics in Molecular Biology and Genetics | |
| MICR 694 | Current Topics in Immunology | |
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |

Elective courses

Select at least two credits from the following:

| | | |
|---------------|--|---|
| MICR 607 | Techniques in Molecular Biology and Genetics | 2 |
| MICR/BNFO 653 | Advanced Molecular Genetics: Bioinformatics | |
| MICR 684 | Molecular Biology of Cancer | |

Dissertation research

| | | |
|----------|-----------------------------------|----|
| MICR 697 | Directed Research in Microbiology | 27 |
|----------|-----------------------------------|----|

Total Hours **58**

¹

Offered in alternate years

²

May be repeated with different content to satisfy the six-credit 600-level didactic requirement.

The minimum total of graduate credit hours required for this degree is 58.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 64) for additional details.

Microbiology and Immunology, Master of Science (M.S.)

Program goals

The graduate programs of the Department of Microbiology and Immunology in the School of Medicine include degrees offered at the master's and doctoral levels. These educational programs have as their mission the preparation of individuals for a variety of career objectives in microbiology and immunology. The programs incorporate formal instructional activities and, as appropriate, research training, mentored by the members of the faculty. The M.S. program is distinguished by inclusion of the preparation of the individual to function as a laboratory director or scientific investigator.

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation/experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research,

including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to

graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| M.S. | Fall | Applications received prior to Jan 15 given priority consideration | GRE, DAT or MCAT |

Special requirements

- Successful domestic applicants typically have GRE scores of at least 156 for verbal reasoning and 153 for quantitative reasoning, 4.0 for analytical reasoning; DAT score of 18 or greater; or MCAT score of 26 or greater. International applicants should display English language proficiency by achieving a TOEFL score of 100 (iBT) or higher.

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must meet the following minimum requirements.

1. Applicants must have earned or expect a baccalaureate or equivalent degree and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics.
2. Laboratory experience is strongly recommended.
3. The Graduate Record Examination is required, as are letters of recommendation and a letter summarizing the applicant's goals.
4. For combined degree students, the Medical College Admission Test or Dental Aptitude Test is accepted in lieu of the GRE.
5. Foreign applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Complete application portfolio reviews will begin in January and will continue through May 1. International students requiring temporary U.S. visas should apply by April 1 for fall matriculation.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two

years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research. The Master of Science degree is offered, as well as a Ph.D. and an M.D.-Ph.D. degree for medical students interested in academic or research careers.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then carries out an original, guided research project under the direction of the adviser. The project falls under the review of a graduate advisory committee and a written thesis is defended in a final oral examination.

M.S. students select their permanent advisers after three rotations completed during the first year of study. Research projects will be based on ongoing research in laboratories of the selected permanent adviser. The GAC is developed by the student and adviser. The M.S. student and the GAC will formulate a suitable curriculum of study based on the student's area of research interest.

In addition to the general VCU Graduate School graduation requirements (p. 32), students in the M.S. degree program must complete all course requirements below. Additional hours may be completed for the M.S. degree. A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to maintain satisfactory academic progress.

An M.S. student performs a public presentation or defense of their thesis to their GAC, but the defense is open to all faculty members, students and staff. The GAC examines the student's fundamental knowledge of their research project and the disciplines encompassed by the student's thesis research.

Course requirements

| Course | Title | Hours |
|------------------------------|--|-------|
| Required core courses | | |
| MICR 505 | Immunobiology | 3 |
| MICR 515 | Principles of Molecular Microbiology | 3 |
| MICR 607 | Techniques in Molecular Biology and Genetics | 2 |
| MICR 608 | Introduction to Microbiology and Immunology Research I | 4 |

| | | |
|---|---|-----------|
| MICR 609 | Introduction to Microbiology and Immunology Research II | 4 |
| MICR 690 | Microbiology Research Seminar (taken each fall and spring semester; minimum four credits) | 4 |
| IBMS 600 | Laboratory Safety | 1 |
| OVPR 601 | Scientific Integrity | 1 |
| Elective courses | | |
| Select at least five credits from the following: | | 5 |
| MICR 605 | Prokaryotic Molecular Genetics | |
| MICR 616 | Mechanisms of Viral and Parasite Pathogenesis | |
| MICR 618 | Molecular Mechanisms of Bacterial Pathogenesis | |
| MICR/BNFO 653 | Advanced Molecular Genetics: Bioinformatics | |
| MICR 684 | Molecular Biology of Cancer | |
| MICR 686 | Advanced Immunobiology | |
| Take one of the following journal club courses for one semester every year: | | 2 |
| MICR 692 | Current Topics in Molecular Pathogenesis | |
| MICR 693 | Topics in Molecular Biology and Genetics | |
| MICR 694 | Current Topics in Immunology | |
| Thesis research | | |
| MICR 697 | Directed Research in Microbiology | 12 |
| Total Hours | | 41 |

The minimum total of graduate credit hours required for this degree is 41.

Microbiology and Immunology, Master of Science (M.S.) with a concentration in oral biology

Program goals

The oral biology concentration in the M.S. in Microbiology and Immunology is a two-year program with students completing one year of

formal course work before conducting an original research project under the supervision of a faculty adviser and culminating in an oral defense of their thesis. Curricula and research opportunities will be individually tailored for one of three possible career paths: admission into a D.D.S program, admission into a Ph.D. program or applying for a position in a health sciences research laboratory.

Students will gain a broad knowledge base that is essential for understanding biomedical disease and will gain in-depth knowledge in the area of their independent research with opportunities in the fields of cancer, microbiology and immunology, tissue engineering, health disparities, and clinical dentistry.

Student learning outcomes

1. Problem-solving skills: Degree candidates will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.
2. General knowledge of sciences: Degree candidates will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired as measured by rubric.
4. Experimental design: Degree candidates will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.
5. Oral biology: Degree candidates will demonstrate an appropriate level of knowledge of oral health research and in research that crosses disciplines and fosters the ability of the students to view oral health research questions from a broad perspective.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| M.S. | Fall | Applications received prior to Jan 15 given priority consideration | GRE, DAT or MCAT |

Applicants to the M.S. in Microbiology and Immunology with a concentration in oral biology must meet all general admission requirements of the VCU Graduate School (p. 35).

1. Applicants must have earned or expect a baccalaureate or equivalent degree and must have demonstrated a superior knowledge of biology, chemistry, physics and mathematics.
2. Laboratory experience is strongly recommended.
3. The GRE, DAT or MCAT is required, as are letters of recommendation and a letter summarizing the applicant's goals.
4. Foreign applicants who do not use English as their native language must take the Test of English as a Foreign Language examination.

Degree requirements

The Department of Microbiology and Immunology has an outstanding faculty with diverse research interests that include cell and molecular biology, molecular genetics, molecular pathogenesis, bacteriology, immunology, immunotoxicology, virology, parasitology, mycology and oncology. The goal of the graduate program is to prepare students to become creative problem-solvers and leaders in scientific research.

The research experience is complemented with excellent course offerings, seminar programs, teaching opportunities, presentations at scientific meetings and writing scientific papers. Graduate students acquire a wide range of research experience in the first year through exposure to a variety of research laboratories and investigators. The student chooses a research adviser and then carries out an original, guided research project under the direction of the adviser. The project falls under the review of a graduate advisory committee and a written thesis is defended in a final oral examination.

M.S. students select their permanent advisers after three rotations completed during the first year of study. Research projects will be based on ongoing research in laboratories of the selected permanent adviser. The GAC is developed by the student and adviser. The M.S. student and the GAC will formulate a suitable curriculum of study based on the student's area of research interest.

In addition to the general VCU Graduate School graduation requirements (p. 32), students in the M.S. degree program must complete all course requirements below. Additional hours may be completed for the M.S. degree. A cumulative GPA of 3.0 (with no more than six credit hours of a C grade) is required to maintain satisfactory academic progress.

An M.S. student performs a public presentation or defense of their thesis to their GAC, but the defense is open to all faculty members, students and staff. The GAC examines the student's fundamental knowledge of their research project and the disciplines encompassed by the student's thesis research.

Course requirements

Neuroscience, Doctor of Philosophy (Ph.D.)

Program mission

The program offers an interdepartmental, integrated curriculum for graduate study leading to the Ph.D. in Neuroscience. The program prepares students to teach in the neuroscience disciplines at a university or academic health center and is distinguished by its objective to prepare students to function as independent research investigators.

Program goals

Upon completion of the Ph.D. in Neuroscience degree program, students will have:

1. Demonstrated a mastery of neuroscience and related bioscience knowledge
2. Developed effective oral, written and electronic communication skills
3. Demonstrated the ability to formulate, design, implement and interpret experimental approaches
4. Reached a level of competency to advance to positions as neuroscience researchers and teachers in a broad spectrum of academic, industrial and government employment venues
5. Successfully obtained employment in a neuroscience-related position

Student learning outcomes

1. Students will demonstrate an appropriate level of knowledge of neuroscience and biosciences and exhibit the ability to integrate and comprehensively and critically review the scientific literature with an interdisciplinary perspective.
2. Students will demonstrate an appropriate level of oral and written communication skills with respect to content, organization, logical

flow, presentation and appropriate use of language incorporating state-of-the-art technological advances in knowledge dissemination.

3. Students will demonstrate their ability to identify a scientific question, formulate testable hypotheses, design and carry out experiments to test their hypotheses, and interpret their results.
4. The candidate will demonstrate creativity and awareness to make significant contributions to neuroscience research in academic, private or government settings.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|------------------------|
| Ph.D. | Fall | Applications received prior to Jan 15 given priority consideration | TOEFL if international |

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL score of 600 (pBT), 250 (cBT) or 100 (iBT); or 6.5 on the IELTS for individuals for whom English is a second language
3. Personal statements, including:
 - a. Long-term career goals to assess reasons behind application
 - b. How a Ph.D. in biomedical science helps achieve those goals
 - c. Initial motivating factors for a career in research
 - d. Research experience, including dates, places and duration
4. Equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology or biophysics)

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students in the Ph.D. program must complete a minimum of 69 graduate credit hours.

Students must maintain a minimum cumulative GPA of 3.0 and must receive a minimum grade of B for all required courses. A student who receives a grade of C in a required course shall repeat the course. A second grade of C in a required course shall result in dismissal from the program.

Comprehensive examinations

The comprehensive examination occurs in two parts, usually commencing after the second year for Ph.D. students, or the first graduate year for M.D.-Ph.D. students. Part 1 consists of a mini-review, written by the student and defended before their graduate advisory committee. Part 2 consists of an oral defense of an NIH-style grant proposal prepared by the student, in consultation with their adviser, based

on their research plan. Part 2 is also defended before their graduate advisory committee. Students are strongly encouraged to submit their proposals for extramural funding (e.g., NIH predoctoral fellowships) where appropriate. Both phases of the comprehensive exam must be completed by the end of the fall semester of the third year for Ph.D. students, or the second graduate year for M.D.-Ph.D. students.

Successful completion of the oral candidacy exam advances the student to candidacy for the doctoral degree. The oral candidacy exam must be completed prior to the beginning of the third year. Beginning with the spring semester the third year in the graduate program, students will devote their full time to conducting research in their advisers' laboratories. Students also register for neuroscience research seminar and journal club each semester.

At the appropriate time in their research, students will prepare a dissertation and schedule a final oral defense of the thesis. The final oral examination (defense of the dissertation) will be limited to the subject of the candidate's dissertation and related basic science.

It is anticipated that students will complete the program in four to five years. All requirements for the Ph.D. degree must be completed within eight years from the date of matriculation in the degree program. Extensions may be approved in extenuating circumstances.

Curriculum requirements

| Course | Title | Hours |
|--|---|-------|
| Required core courses | | |
| ANAT 610 | Systems Neuroscience | 4 |
| ANAT 615 | Techniques in Neuroscience and Cell Biology | 3 |
| ANAT 620 | Scientific Grantsmanship | 2 |
| ANAT 630 | Research Presentations (repeat course to earn at least 8 credits) | 8 |

| | | |
|------------------------------|--|-----------|
| NEUS 619 | Synaptic Organization of the Brain | |
| PHIS 604 | Cell Physiology: Cardiovascular and Respiratory | |
| PHIS 606 | Molecular Basis for Disease | |
| PHIS 619 | Mitochondrial Pathophysiology and Human Diseases | |
| PHIS/PHTX 620 | Ion Channels in Membranes | |
| PHIS 631 | Electrophysiology and Photonic Methods | |
| PHTX 548 | Drug Dependence | |
| PHTX 632 | Neurochemical Pharmacology | |
| PHTX 636 | Principles of Pharmacology | |
| Dissertation research | | |
| NEUS 697 | Directed Research | 15 |
| Total Hours | | 69 |

The minimum total of graduate credit hours required for this degree is 69.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 67) for additional details.

(804) 828-0948

Program website: neuroscience.vcu.edu (https://medschool.vcu.edu/education/phd_programs/neuroscience/)

Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.)

Program goal

The Ph.D. program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates this framework to the development of the ability to design, implement and interpret experimental approaches that address the questions identified. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the

expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

SLO 1.0: Communication skills

The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric.

- Measure 1.0: Dissertation review and examination
- Measure 2.0: Oral doctoral candidacy examination
- Measure 3.0: Performance review of progress
- Measure 4.0: Written doctoral candidacy examination

SLO 2.0: Experimental skills

The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

- Measure 1.0: Dissertation review and examination
- Measure 2.0: Oral doctoral candidacy examination
- Measure 3.0: Performance review of progress
- Measure 4.0: Written doctoral candidacy examination

SLO 3.0: Integrated knowledge of biosciences

The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by the rubric.

- Measure 1.0: Dissertation review and examination
- Measure 2.0: Oral doctoral candidacy examination
- Measure 3.0: Performance review of progress
- Measure 4.0: Written doctoral candidacy examination

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

Students wishing to matriculate into the Department of Pharmacology and Toxicology can contact the program director for further advice on course requirements and advising.

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|---|
| Ph.D. | Fall | Applications received prior to Jan 15 given priority consideration | TOEFL (individuals for whom English is a second language) |

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected from the drop-down menu of programs on the VCU online application form.

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. A baccalaureate degree or its equivalent at the time of enrollment, with an undergraduate GPA of 3.5
2. TOEFL scores of 600 (pBT), 250 (cBT) or 100 (iBT) for individuals for whom English is a second language; or 6.5 on the IELTS (To report TOEFL score, use VCU Code 5570.)
3. Personal statements, which should include: long-term career goals to assess reasons behind the candidate's application; how a Ph.D. in biomedical science helps achieve those goals; the factors motivating a career in research; research experience, including dates, places and duration
4. Three letters of recommendation that speak to the scientific competency and experience of the applicant
5. The equivalent of two semesters of general chemistry, two semesters of organic chemistry and two semesters of upper-level biology courses (e.g. cell biology, molecular biology, biochemistry, genetics, neuroscience, physiology, biophysics, etc.)

Degree requirements

The broad base offered in the Ph.D. program in pharmacology and toxicology, together with basic training in physiology and biochemistry, provides the background for a successful career in academic institutions, industry or government. The research program of the department is sufficiently broad to provide an adequate basis for entry into a wide variety of interesting areas of modern biology and medicine.

In addition to the general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 60 graduate credit hours. With few exceptions, Ph.D. students are enrolled in the Biomedical Sciences Doctoral Portal from matriculation until matched with an adviser, usually by the summer semester of the second year. The students are moved into the Ph.D. in Pharmacology and Toxicology major after meeting program requirements. Students customarily complete formal course work in pharmacology and biochemistry during the first year of study. Participation in research also is begun early in the first year. Students interested or committed to pharmacology should take the footnoted ⁽¹⁾ courses listed in the curriculum requirements section during the portal period to assure rapid progress toward the degree.

In the third and subsequent years, the majority of the course load is taken as PHTX 697. Advanced electives also may be taken as desired and with the approval of the adviser. Students and faculty participate in a seminar program (PHTX 690) that includes distinguished visiting scientists from the U.S. and abroad. Following completion of a qualifying examination, a degree candidate is required to submit and defend a thesis embracing an original research project conducted under the guidance and supervision of an adviser and an advisory committee. There is no foreign language requirement. The average time necessary to complete the doctoral program in pharmacology and toxicology is four to five years.

Course requirements

| Course | Title | Hours |
|------------------------------|---|-------|
| Required core courses | | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology ¹ | 5 |
| BIOC 661 | Critical Thinking | 1 |
| IBMS 600 | Laboratory Safety ¹ | 1 |

| | | |
|------------------------------------|--|-----------|
| IBMS 620 | Laboratory/Clinical Rotations (two-credit course taken for three rotations) ¹ | 6 |
| PHTX 630 | Basic Concepts in Pharmacology for Graduate Students ¹ | 3 |
| PHTX 636 | Principles of Pharmacology | 5 |
| PHTX 639 | Principles of Pharmacology Journal Club | 1 |
| Required additional courses | | |
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |
| PHTX 690 | Pharmacology Research Seminar ² | 1 |
| or IBMS 690 | Basic Health Sciences Research Seminar | |
| Elective courses | | |
| ANAT 610 | Systems Neuroscience | |
| BIOC 504 | Biochemistry, Cell and Molecular Biology | |
| BIOC 601 | Membranes and Lipids | |
| BIOC 605 | Molecular Biology | |
| BIOS 543 | Graduate Research Methods I | |
| BIOS 544 | Graduate Research Methods II | |
| CHEM 504 | Advanced Organic Chemistry I | |
| EGRB 603 | Biomedical Signal Processing | |
| EGRB 610 | Microprocessor Interfacing for Biomedical Instrumentation | |
| IBMS 635 | Cellular Signalling | |
| MEDC 541 | Survey of Molecular Modeling Methods | |
| MEDC 601 | Advanced Medicinal Chemistry I | |
| MEDC 630 | Theoretical Methods in Drug Design | |
| MICR 505 | Immunobiology | |
| MICR/BNFO 653 | Advanced Molecular Genetics: Bioinformatics | |
| NEUS 609 | Cellular and Molecular Neuroscience | |
| PHIS 501 | Mammalian Physiology | |
| PHIS 604 | Cell Physiology: Cardiovascular and Respiratory | |
| PHIS 615 | Signal Detection in Sensory Systems | |
| PHIS 620 | Ion Channels in Membranes | |
| PHTX 632 | Neurochemical Pharmacology | |
| PHTX 633 | Behavioral Pharmacology | |
| PHTX/FRSC 644 | Forensic Toxicology | |
| Dissertation research | | |
| PHTX 697 | Directed Research in Pharmacology | 30 |
| Total Hours | | 60 |

1

Students interested in or committed to pharmacology should take these courses during the portal year to assure rapid progress toward the degree.

2

Students are expected to enroll in PHTX 690 Pharmacology Seminar each semester (will accumulate more than 1.0 credit during academic years).

Doctoral students are required to present a dissertation seminar prior to the final committee defense as a requirement for completion of the degree.

The minimum number of graduate credit hours required for this degree is 60.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 72) for additional details.

Pharmacology and Toxicology, Master of Science (M.S.)

Program goal

The graduate program leading to the Master of Science in Pharmacology and Toxicology prepares individuals for a variety of career objectives in biomedical science. These careers include but are not limited to as industrial scientists and scientists in government regulatory agencies. The M.S. program will be of interest to individuals planning on pursuing technical positions in pharmacology or toxicology research or testing; students interested in the health professions, such as medicine or dentistry, who desire additional research training; and those interested in government positions, such as those in regulatory agencies, that require training in pharmacology and toxicology.

The program incorporates formal instructional activity and research training mentored by members of the graduate faculty. The master's program is distinguished from the Ph.D. degree offered by the department in that the M.S. student is not being prepared for a career as an independent investigator.

Student learning outcomes

SLO 1: Communication skills

The candidate will demonstrate the achievement of an appropriate level of oral communication skills with respect to the content, organization, logical flow, presentation and appropriate use of language incorporating the use of visual aids, as measured by rubric. The candidate will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling and use of vocabulary to effectively present information including the use of figures, tables and citations as measured by rubric.

- Measure 1.0: Course work presentations
- Measure 2.0: Performance review of progress
- Measure 3.0: Thesis review and examination

SLO 2: Integrated knowledge of bioscience

The candidate will demonstrate an appropriate level of knowledge of the current elements of the biosciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications as measured by rubric.

- Measure 1.0: Performance review of progress
- Measure 2.0: Thesis review and examination

SLO 3: Problem-solving skills

The candidate will demonstrate an appropriate level of skill in the identification and selection of meaningful problems to be addressed in bioscience research, including the ability to defend said identifications and to design and develop appropriate methods to solve said problems as measured by rubric.

- Measure 1.0: Performance review of progress
- Measure 2.0: Thesis review and examination

SLO 4: Experimental design

The candidate will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement experimental protocols and to design and develop experiments as measured by rubric.

- Measure 1.0: Performance review of progress
- Measure 2.0: Thesis review and examination

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU

Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall | Apr 15 | |
| | Summer | Jun 15 | |

Special requirements

- See the departmental website for additional information on the application process.

In addition to the general admission requirements of the VCU Graduate School (p. 35), qualified applicants to the M.S. degree program typically must have:

1. Baccalaureate degrees with a major in fields such as biology, chemistry, biochemistry, pharmacy and related sciences

- Undergraduate GPA of 3.2
- Several hours of laboratory research experience

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

In addition to the general VCU Graduate School graduation requirements (p. 32), students in the master's program must complete a minimum of 30 graduate credit hours.

The Master of Science in Pharmacology and Toxicology is a research-oriented degree program comprising graduate course work and supervised research leading to a master's thesis. Students must conduct a substantial original investigation under the supervision of their advisers and must prepare and defend a thesis reporting the results of this research. It is highly recommended that students identify mentors for dissertation research as soon as possible within the first semester to ensure timely progress in their research.

When the thesis has been completed, copies are submitted to the members of the student's graduate advisory committee. The student's GAC decides upon the acceptability of the candidate's thesis. If the committee unanimously accepts the thesis for defense, the candidate appears before them for a final oral examination.

M.S. students are required to present a departmental seminar prior to the final oral thesis defense as a requirement for completion of the thesis.

Course requirements

Substitutions may be approved by the graduate program director.

| Course | Title | Hours |
|------------------------------------|--|-------|
| Required core courses | | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |
| IBMS 600 | Laboratory Safety | 1 |
| PHTX 630 | Basic Concepts in Pharmacology for Graduate Students | 3 |
| PHTX 636 | Principles of Pharmacology | 5 |

Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [dual degree]

To qualify as a dual degree student in any of the training paradigms which appear in the Bulletin, a student must have evidence of having been simultaneously enrolled in one or more courses of both of the programs constituting the "dual degree" for at least one semester.

The School of Pharmacy and the Division of Epidemiology in the Department of Family Medicine and Population Health in VCU's School of Medicine offer a dual degree program through which students earn both Pharm.D. and M.P.H. degrees. This dual degree program offers students the opportunity to achieve a Doctor of Pharmacy while also learning about research and the importance of population health. This five-year program requires students to spend the fourth year of the Pharm.D. program pursuing the M.P.H. degree, after which they transition back to pharmacy for advanced practice experiences.

Students are required to take a minimum of 36 credits in the M.P.H. curriculum. This includes 24 credit hours of core courses, a minimum of nine credit hours of concentration courses and a minimum of three credit hours of a capstone project that examines a relevant public health topic. These courses [credits] within the Pharm.D. curriculum count toward the M.P.H. degree:

| Course | Title | Hours |
|----------|--|-------|
| IPEC 501 | Foundations of Interprofessional Practice | 1 |
| PHAR 509 | Evidence-Based Pharmacy I: Introduction to Pharmacy Information Skills | 1.5 |
| PHAR 533 | Introductory Pharmacy Practice Experience: Patient Care | 0.5 |

| | | |
|--------------------|---|----------|
| PHAR 545 | The U.S. Health Care System | 2 |
| PHAR 546 | Pharmacy-based Immunization Delivery | 1.5 |
| PHAR 565 | Evidence-based Pharmacy II: Research Methods and Statistics | 2.5 |
| Total Hours | | 9 |

Students in this dual degree program must complete a minimum of 191 graduate credit hours to earn both degrees. If students were to complete both degrees independently, a minimum total of 200 graduate credit hours would be required.

The required M.P.H. internship and M.P.H. capstone project will be completed in a community setting during the P5 year. The internship will be a community health-based advanced practice experience approved by both programs that involves the development of one or more deliverables. The M.P.H. capstone project will be a comprehensive, integrated learning experience involving either a hypothesis-based research question or a comprehensive project serving the needs of a professional public health organization. Examples include a disease surveillance project, a needs assessment or program evaluation, or analysis of survey data.

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Program website: [pharmacy.vcu.edu](http://www.pharmacy.vcu.edu) (<http://www.pharmacy.vcu.edu/>) and MPH Dual Degrees web page

Physiology and Biophysics, Doctor of Philosophy (Ph.D.)

Program goals

1. The program is designed to provide students with the skills required to advance to positions as bioscience researchers and trainers in a broad spectrum of positions.
2. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of bioscience, an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience.
3. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified.
4. In addition, the program will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Program goals

Training in physiology and biophysics

1. Students in the doctoral program in physiology and biophysics will acquire the skills to become independent research scientists, educators and administrators in a broad spectrum of positions.
2. Students will gain a progressive mastery of concepts in physiology and biophysics and related disciplines; an understanding of the

current state of research investigations in the field; an ability to synthesize information and apply foundational concepts to identify key areas for innovative investigation and experimentation; and the knowledge to design, execute and interpret experiments and publish studies that address the questions identified.

3. Students will develop skills in various means of communicating core knowledge in the field and the details of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Problem-solving and analytical skills: Degree candidates will demonstrate an appropriate level of skill to identify and address scientific questions and utilize appropriate analytical methods and tools.
 - a. Problem-solving skills include the ability to: (1) effectively identify and select meaningful problems to be addressed in research studies; (2) define and state the hypotheses to be tested and their significance; (3) develop, justify and execute experimental and analytical methods to address the research questions identified; and (4) appropriately maintain complete records of experimental protocols, experimental data and working results of data analysis in order to document the accuracy and reproducibility of the studies and scientific publications.
 - b. Analytical skills include the ability to: (1) interpret information and quantitative data relevant to studies in physiology and biophysics, including by effectively using software and other analytical tools and by applying appropriate statistical tests to ensure data are robust; (2) connect rationales to experimental approaches; (3) draw reasonable conclusions from the evidence obtained and consider alternative interpretations; and (4) identify limitations in the experimental design and interpretation.
2. General knowledge of sciences and integration skills: Students will demonstrate an appropriate level of knowledge in related disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique publications.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
 - a. Oral communication skills include selection of content, organization and logical flow of ideas, and development of clear and professional presentations using appropriate language and incorporating appropriate visual aids.
 - b. Written communication skills include an appropriate use of grammar, syntax, spelling and vocabulary to effectively present written information in scientific style including the use of figures, tables and citations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

Additional information is summarized under the Education tab on the departmental website (<https://physiology.vcu.edu/education/>). Feel free to contact the graduate program coordinator with any questions.

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| Ph.D. | Fall | Jan. 15 | |

Special requirements

- Applications for the program must be submitted to the Biomedical Sciences Doctoral Portal – School of Medicine – Ph.D. selected

from the drop-down menu of programs on the VCU online application form. For further information see, the Biomedical Sciences Doctoral Portal (<https://medschool.vcu.edu/education/bsd/p/>).

In addition to the general admission requirements of the VCU Graduate School (<https://www.vcu.edu/admissions/apply/graduate/>), applicants to the BSDP must have earned a baccalaureate (i.e. bachelor's) degree (or higher) in the biological, chemical or related sciences by the time of enrollment. Successful applicants will have completed undergraduate courses in biology, chemistry through organic chemistry and mathematics often through calculus. Typically, the school targets applicants with minimum grade point averages of 3.3 and substantial research experience in a biological, biomedical or chemical laboratory setting. International applicants must have a minimum score of 100 on the TOEFL or 6.5 on the IELTS. The school takes a holistic approach when evaluating applications, though, and strength in one or more aspects of an application can compensate for another area that is not as well-developed.

Degree requirements

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking and required course work represents only one component. Each student's program is tailored to meet their particular interests, with the primary emphasis on developing research skills and the capacity for independent scholarship.

Opportunities for research experience begin in the first year, when students spend time working in several faculty laboratories of their choice. These lab rotations enable students to examine faculty research projects, experimental approaches and laboratory environment and to select an area of specialization. In the second and subsequent years, increasingly more time is devoted to independent research under the guidance of a faculty adviser. Department-sponsored seminars and other activities give students opportunities to discuss their research interests with visiting scientists and to present their research both internally and at national professional meetings.

The Ph.D. program in physiology and biophysics normally takes at least four years to complete. The first two years are devoted mainly to course work. The first year consists primarily of required courses, while the second is geared toward electives and research. On satisfactory completion of two years of course work, students must pass written and oral comprehensive examinations to qualify for degree candidacy. Following admission to candidacy, each student must conduct a substantial original research project, prepare a written dissertation, present their work in a seminar and defend it successfully in an oral examination.

In addition to the general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), students must complete a minimum of 66 credit hours for the Ph.D., including directed research.

To gain teaching experience, Ph.D. students are expected to serve as teaching assistants for PHIZ 206 for one semester.

Course requirements

| Course | Title | Hours |
|------------------------------|--|-------|
| Required core courses | | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |

| | | |
|----------|--|---|
| BIOC 504 | Biochemistry, Cell and Molecular Biology | 5 |
| IBMS 600 | Laboratory Safety | 1 |
| IBMS 620 | Laboratory/Clinical Rotations (repeated 3 times for 6 credits total) | 6 |
| PHIS 501 | Mammalian Physiology | 5 |
| PHIS 650 | Critical Thinking in Physiology | 1 |
| PHIS 689 | Physiology Preseminar Highlights (one-credit course, required each Fall and Spring semester) | 4 |
| PHIS 690 | Physiology Research Seminar (one-credit course, required each Fall and Spring semester) | 4 |
| PHIS 695 | Research in Progress (0.5-credit course, required each Fall and Spring semester) | 2 |

Required additional courses

| | | |
|-------------|---------------------------------|---|
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |

Elective courses

Select six credits from the following or as recommended by the graduate advisory committee and approved by the graduate program director: 6

| | | |
|----------|---|--|
| IBMS 635 | Cellular Signalling | |
| PHIS 604 | Cell Physiology: Cardiovascular and Respiratory | |
| PHIS 606 | Molecular Basis for Disease | |
| PHIS 607 | Cell Physiology: GI and Endocrine | |
| PHIS 612 | Cardiovascular Physiology | |
| PHIS 615 | Signal Detection in Sensory Systems | |
| PHIS 620 | Ion Channels in Membranes | |
| PHIS 630 | Methods in Molecular Biophysics: A Practical Approach | |

Dissertation research

| | | |
|----------|--|----|
| PHIS 697 | Directed Research in Physiology (variable credit course, required each semester) | 26 |
|----------|--|----|

Total Hours 66

The minimum total of graduate credit hours required for this degree is 66.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

M.D.-Ph.D. opportunity

The M.D.-Ph.D. program allows students to pursue both the M.D. and Ph.D. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the Ph.D. See the dual degree program page (p. 75) for additional details.

Physiology and Biophysics, Master of Science (M.S.)

Program goal

The master's program in physiology and biophysics is designed to provide students with the skills required to advance to positions as physiology and bioscience researchers and trainers in a broad spectrum of positions. The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of physiology and bioscience, as well as an ability to synthesize this information and apply this foundation to the identification of key areas of investigation and experimentation in bioscience. The program relates the above framework to the development of the ability to design, implement and interpret experimental approaches which address the questions identified. In addition, students will develop skills in the various means of communicating both the core of bioscience knowledge and the expression of experimental design, results and interpretation to a variety of potential audiences.

Student learning outcomes

1. Problem-solving and analytical skills: Degree candidates will demonstrate an appropriate level of skill to identify and address scientific questions and utilize appropriate analytical methods and tools.
 - a. Problem-solving skills include the ability to: (1) define and state the hypotheses to be tested and their significance; (2) execute experimental and analytical methods to address the research questions; and (3) appropriately maintain complete records of experimental protocols, experimental data and working results of data analysis in order to document the accuracy and reproducibility of the studies and scientific publications.
 - b. Analytical skills include the ability to: (1) interpret information and quantitative data relevant to studies and apply appropriate statistical tests to ensure data are robust; (2) connect rationales to experimental approaches; (3) draw reasonable conclusions from the evidence obtained; and (4) identify limitations in the experimental design and interpretation.
2. General knowledge of sciences and integration skills: Students will demonstrate an appropriate level of knowledge in their individual area of scholarship and related disciplines, including an appropriate familiarity with and understanding of the relevant research literature.
3. Communication skills: Degree candidates will demonstrate that an appropriate level of oral, written and visual communication skills have been acquired.
 - a. Oral communication skills include selection of content, organization and logical flow of ideas, and development of clear and professional presentations using appropriate language and incorporating appropriate visual aids.
 - b. Written communication skills include an appropriate use of grammar, syntax, spelling and vocabulary to effectively present written information in scientific style, including the use of figures, tables and citations.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|--------------------|
| M.S. | Fall (preferred) | Jun 1 | GRE, MCAT or DAT |
| | Summer | Apr 1 | |

In addition to the general admission requirements of the VCU Graduate School (p. 35), successful applicants will typically have the following credentials:

1. Baccalaureate degree or its equivalent at the time of enrollment with a minimum overall GPA of 3.0
2. GRE scores of at least 153 on verbal, 155 on quantitative, 4.0 on analytical writing components. GRE requirements for international students may vary. For students not taking the GRE, MCAT scores of at least 501 or DAT scores of at least 19.
3. Test of English as a Foreign Language examination with a minimum score of 100 (IBT), 250 (CBT) or 600 (PBT) or 6.5 on the IELTS for foreign applicants who do not use English as their native language

Although there are no absolute course requirements for admission, fundamental knowledge of general and organic chemistry and biology are considered necessary to pursue advanced studies, and course work in physics, molecular and cellular biology and calculus are desirable. Previous research experience is also desirable.

A personal statement describing the applicant's research experience and interests, as well as letters of reference from previous supervisors, are helpful in determining an applicant's suitability for this curriculum. Official transcripts of all graduate and undergraduate records must be mailed from the college or university registrar.

Basic science, research-intensive, non-thesis curriculum for medical students

Individuals who are participants in medical training (the Doctor of Medicine program) at VCU may be eligible for enrollment in a research-intensive, non-thesis graduate curriculum. This basic science option builds on the core of disciplinary material embedded in the first two years of training in the medical school curriculum. Additional exposure is provided to specialized areas in basic science disciplines in concert with an intensive research experience leading to the preparation of a report in the form of a manuscript suitable for publication. The program is designed to be completed within 12 to 15 months. Subject matter related to the core material and/or suitable elective courses taken in the didactic phase of medical training correspond to a minimum of the equivalent of 24 graduate credit hours. The equivalent of 12 credit hours may be applied to the M.S. degree program in which the student is enrolled in accordance with Graduate School policy. Medical students interested

in the basic science option should contact the M.S. graduate program director for additional information.

Degree requirements

The Department of Physiology and Biophysics offers courses of study leading to the Master of Science and the Doctor of Philosophy. A combined M.D.-Ph.D. degree program is also available through this department and the School of Medicine. It is generally recommended that students intending to pursue careers as professional physiologists should attempt to earn the Ph.D. Work done in partial or complete fulfillment of the requirements for the master's degree may be applied toward the Ph.D. provided that it is of adequate quality.

Graduate study in the Department of Physiology and Biophysics in the School of Medicine is a highly individualized undertaking and required course work represents only one component. Each student's program is tailored to meet their particular interests, with the primary emphasis on developing research and scholarship skills.

The M.S. degree program includes a first year comprising mainly didactic course work and a second year largely devoted to the completion of an independent research project under the guidance and in the laboratory of a chosen adviser. Many applicants who are admitted have successfully completed VCU's Certificate in Pre-medical Graduate Health Sciences program. A number of the certificate program's courses overlap with the first-year didactic requirements or electives and can satisfy those requirements; this allows students to start their M.S. training and research in the summer following completion of the certificate program. Additional information may be found on the department's website (<https://physiology.vcu.edu/education/>) or applicants may contact the graduate program director.

In addition to successfully competing required course work and electives, students are required to prepare a thesis based on their laboratory research and successfully present and defend their thesis in an oral defense.

In addition to the general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), students must complete a minimum of 30 graduate credit hours, including directed research, to earn an M.S. in Physiology and Biophysics.

Teaching experience

M.S. students may have the opportunity to acquire teaching experience and financial support by serving as teaching assistants for PHIZ 206 for undergraduates. Contact the program coordinator or graduate program director in advance of the beginning of classes for additional information.

Course requirements

| Course | Title | Hours |
|------------------------------|---|-------|
| Required core courses | | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 504 | Biochemistry, Cell and Molecular Biology | 5 |
| IBMS 600 | Laboratory Safety | 1 |
| PHIS 501 | Mammalian Physiology | 5 |
| PHIS 650 | Critical Thinking in Physiology | 1 |
| PHIS 690 | Physiology Research Seminar (one-credit course taken twice) | 2 |

| Required additional courses | | |
|---|--|-----------|
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |
| Elective courses | | |
| Select six credits from the following or as recommended by the graduate advisory committee and approved by the graduate program director: | | 6 |
| IBMS 635 | Cellular Signalling | |
| PHIS 512 | Cardiac Function in Health and Disease | |
| PHIS 604 | Cell Physiology: Cardiovascular and Respiratory | |
| PHIS 606 | Molecular Basis for Disease | |
| PHIS 607 | Cell Physiology: GI and Endocrine | |
| PHIS 612 | Cardiovascular Physiology | |
| PHIS 615 | Signal Detection in Sensory Systems | |
| PHIS/PHTX 620 | Ion Channels in Membranes | |
| Thesis research | | |
| PHIS 697 | Directed Research in Physiology (variable credit course; required each semester) | 4 |
| Total Hours | | 30 |

The minimum total of graduate credit hours required for this degree is 30.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the program, nature of research being conducted by a study or in the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program directors or advisers for information about typical plans of study and registration requirements.

Pre-medical Graduate Health Sciences, Certificate in (Post-baccalaureate graduate certificate)

Program goal

The Certificate in Pre-medical Graduate Health Sciences Certificate program in the School of Medicine provides an advanced level of didactic training in the biomedical sciences that will enhance the preparation of students for a variety of career options, particularly professional degree training (i.e. M.D./D.O., D.D.S., M.S. and Ph.D.). The program supports student success by providing Kaplan standardized test preparation for enrolled students, academic advising and application review, and workshops that foster an informed approach to the professional school admission process.

Student learning outcomes

1. Achievement of a threshold competency in the basic health sciences: The candidate will achieve/surpass expectations of a threshold-level competency in the basic health sciences, particularly in areas related to gaining admission to professional and/or higher-level degree programs.
2. MCAT/DAT preparation: The candidate will be prepared to take and/or retake standardized tests. The candidate will achieve a score that fulfills medical or dental school admission requirements.
3. Preparation for career advancement: The candidate who meets the threshold competency objective will display an enhanced level of advancement to higher levels of professional and/or advanced degree training.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

Applying to professional school and advanced graduate degree programs

Students must follow admission guidelines for applications to the M.D./D.O., M.S., D.D.S. and other programs. Completion of the certificate program does not afford a guaranteed admission to professional training programs at VCU. Exceptional performance, 3.5 GPA and a 28 MCAT guarantees an interview at VCU School of Medicine. Similar criteria increase eligibility for an interview at the VCU School of Dentistry.

Advising: Students are encouraged to seek opportunities for academic, personal and professional development from the Division for Academic Success, Career Services and the CERT Program Office. For students who choose to take a year off between CERT and professional school, several School of Medicine professors hire students for research positions and area hospitals offer SCRIBE programs that actively recruit VCU graduates. The CERT Program Office can also help identify possibilities.

Letters of reference: The CERT program adviser will provide a letter of reference for professional school applications. Students must schedule an appointment to interview with the program adviser for a letter.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|-----------------|--|
| Certificate | Fall | Jul 16 | GRE, MCAT or DAT no more than five years old; TOEFL for international students |
| | Spring | Nov 15 | |

Special requirements

- While there is no official deadline for applying to the certificate program, the school strongly recommends applicants have all materials into the graduate admissions office by July 16 (for fall semester matriculation) or Nov. 15 (for spring semester matriculation) to ensure that the file can be processed in time for the appropriate semester. The program has rolling admissions for a limited number of positions.

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), students must complete a minimum of 27 graduate credit hours of course work with a minimum final GPA of 3.0 (4.0 scale). The curriculum is composed of three required courses (15 credit hours) and

12 credit hours of electives spread over two semesters. The curriculum should be completed in one academic year (fall and spring semester).

Required and elective courses are drawn from departments within the School of Medicine: the departments of Anatomy and Neurobiology, Biochemistry and Molecular Biology, Human and Molecular Genetics, Microbiology and Immunology, Pharmacology and Toxicology, and Physiology and Biophysics. All courses are held on the MCV Campus. In addition to the elective courses shown other courses may be applied as electives with the approval of the course director.

Curriculum requirements

| Course | Title | Hours |
|-------------------------|---|-----------|
| Required courses | | |
| BIOC 503 | Biochemistry, Cell and Molecular Biology | 5 |
| BIOC 504 | Biochemistry, Cell and Molecular Biology | 5 |
| PHIS 501 | Mammalian Physiology | 5 |
| Electives | | |
| Select 12 credits from: | | 12 |
| ANAT 608 | Functional and Clinical Neuroanatomy | |
| ANAT 611 | Histology | |
| ANAT 612 | Human Embryology | |
| ANAT 691 | Special Topics in Anatomy | |
| HGEN 501 | Introduction to Human Genetics | |
| or BIOL 530 | Introduction to Human Genetics | |
| HGEN 620 | Principles of Human Behavioral Genetics | |
| IBMS 690 | Basic Health Sciences Research Seminar | |
| IBMS 691 | Special Topics in Interdisciplinary Biomedical Sciences | |
| IBMS 692 | Special Topics in Interdisciplinary Biomedical Sciences | |
| MICR 505 | Immunobiology | |
| PHIS 512 | Cardiac Function in Health and Disease | |
| PHTX 536 | | |
| PHTX 630 | Basic Concepts in Pharmacology for Graduate Students | |
| PHTX 691 | Special Topics in Pharmacology | |
| Total Hours | | 27 |

The minimum total of graduate credit hours required for this certificate is 27.

Public Health, Master of (M.P.H.)

Note: This concentration has been permanently suspended prior to closure.

Public Health, Master of (M.P.H.) with a concentration in applied public health

Program accreditation

Council on Education for Public Health

Program goal

The mission of the VCU M.P.H. program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster life-long inquiry and discovery that improve human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. The applied public health concentration is designed to provide students with the skills required to advance to a broad spectrum of positions as public health practitioners who can perform the following:

1. Administer public health programs
2. Collect, analyze and evaluate public health data
3. Plan, implement and evaluate public health interventions
4. Apply results of evaluations and data analyses to policy development
5. Promote public health through educational campaigns

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

Student learning outcomes

Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level assessed by program faculty as competent or higher, according to the program rubric.
2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a level assessed by program faculty as competent or higher, according to the program rubric.
3. Development of competencies: Through program course work and applied experiences, students will develop competence in the discipline of public health as demonstrated through annual self-

assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program's integrated learning experience, the capstone project.

4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program's accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mph-program/competencies/>).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section](#) for additional information on graduation requirements.

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

The M.P.H. program student handbook is available upon request.

Apply online at [sophas.org](http://www.sophas.org) ([http://www.sophas.org/](http://www.sophas.org)) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|---|
| M.P.H. | Fall | Feb. 15 | TOEFL or IELTS for international students |

In addition to the general admission requirements of the VCU Graduate School (p. 35), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor's degree from an accredited institution, with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. Standardized tests for English proficiency: International students must submit TOEFL, IELTS or PTE scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0; PTE minimum score is 65. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement covering the following issues in two to five pages:
 - a. Description of the applicant's career goals
 - b. Why the applicant wishes to pursue an M.P.H. degree
 - c. How an M.P.H. degree will help the applicant achieve her/his career goals
 - d. Description of applicant's particular areas of interest in public health (e.g., maternal and child health, epidemiology)

- e. Why VCU's M.P.H. program best fits the student's public health interests
- f. What applicant plans to do in the first few years after graduation

Degree requirements

The mission of the Master of Public Health program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster lifelong inquiry and discovery that improve human health. The program prepares students committed to public health careers in the public, private or nonprofit sectors through a rigorous curriculum to help students develop analytic and critical-reasoning skills to improve population health. The M.P.H. program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in significant projects.

In addition to general VCU Graduate School graduation requirements (p. 32), a minimum of 45 credit hours of formal course work is required, including:

1. 25 credits minimum of core didactic course work, including:
 - a. A three-credit internship, typically conducted in the summer between the first and second year
 - b. A minimum three-credit capstone project planned and implemented in the second year of the program
2. Nine credits minimum of concentration course work
3. 11 credits minimum of concentration elective course work

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

Curriculum requirements

| Course | Title | Hours |
|---|---|-------|
| Required core courses | | |
| BIOS 543 | Graduate Research Methods I | 3 |
| EPID 571 | Principles of Epidemiology | 3 |
| EPID 580 | Public Health Ethics | 1 |
| EPID 593 | Foundations of the Public Health Profession | 2 |
| EPID 604 | Principles of Environmental Health | 3 |
| EPID 693 | Public Health Internship | 3 |
| EPID 694 | MPH Capstone Project | 3 |
| HCPR 601 | Introduction to Health Policy | 3 |
| IPEC 501 | Foundations of Interprofessional Practice | 1 |
| SBHD 605 | Introduction to Social and Behavioral Health | 3 |
| Required additional courses | | |
| EPID 600 | Introduction to Public Health | 3 |
| EPID 628 | Public Health Program Planning and Evaluation | 3 |
| SBHD 632 | Health Disparities and Social Justice | 3 |
| Elective courses | | |
| Select a minimum of 11 credit hours of course work chosen according to the area(s) of interest in public health. These may include the following: | | 11 |
| BIOS 535 | Behavioral Measurement | |

| | |
|----------|---|
| BIOS 549 | Spatial Data Analysis |
| EPID 548 | Applied Data Analysis Lab |
| EPID 594 | MPH Practicum |
| EPID 601 | Contemporary Issues and Controversies in Public Health |
| EPID 603 | Public Health Policy and Politics |
| EPID 606 | Epidemiologic Methods |
| EPID 622 | Maternal and Child Health |
| EPID 623 | Injury and Violence Epidemiology |
| EPID 624 | Chronic Disease Epidemiology |
| EPID 645 | Public Health Genomics |
| EPID 646 | Epidemiology of Psychiatric and Substance Use Disorders |
| EPID 691 | Special Topics |
| EPID 692 | Independent Study |
| GRAD 614 | Introduction to Grant Writing |
| GRTY 501 | Physiological Aging |
| GRTY 510 | Aging |
| GRTY 603 | Social Gerontology |
| GRTY 604 | Problems, Issues and Trends in Gerontology |
| HEMS 505 | Contemporary Issues in Health |
| HEMS 550 | Exercise, Nutrition and Weight Management |
| HEMS 604 | Nutrition for Health and Physical Activity |
| HEMS 605 | Psychology of Physical Activity |
| HEMS 606 | Psychosocial Aspects of Sport and Physical Activity |
| HSEP 601 | Emergency Management: Response Planning and Incident Command |
| HSEP 603 | Risk Assessment |
| HSEP 650 | Public Health Preparedness |
| PSYC 660 | Health Psychology |
| SBHD 630 | Theoretical Foundations of Social and Behavioral Health |
| SBHD 632 | Health Disparities and Social Justice |
| SBHD 636 | Community-based Participatory Research |
| SBHD 638 | Applications in Qualitative Research Methods |
| SOCY 510 | Domestic and Sexual Violence in Social Context |
| SOCY 524 | Aging and the Minority Community |
| SOCY 603 | Seminar in Population Studies |
| SOCY 607 | Seminar in Racial and Ethnic Relations in America |
| SOCY 611 | Studies in the Community |
| SOCY 620 | Seminar in Criminology |
| SOCY 624 | Community and Community Services for the Elderly |
| SOCY 632 | Intimate Partner and Sexual Violence: Medical Practice and Policy |

| | |
|----------|---|
| SOCY 633 | Application of the Policy Process to Issues of Violence |
| SOCY 634 | Social Contexts of Childhood and Violence |
| SOCY 635 | Theorizing Gender Violence |
| SOCY 645 | The Sociology of Health and Illness |
| URSP 521 | Introduction to Geographic Information Systems |
| URSP 621 | Introduction to Geographic Information Systems |

Total Hours **45**

The minimum number of graduate credit hours required for this degree is 45.

Public health internship: The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student's progress. Students work a minimum of 180 hours in a professional public health organization.

Capstone project: The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student's academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report
4. Needs assessment for a specific population
5. Development, implementation and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

Students are expected to maintain satisfactory academic progress on the capstone project; such progress entails completing the capstone project according to the timeline included in the student's proposal for the capstone project (typically in no more than one to two semesters). Exceptions beyond this time limit must be approved by the student's

adviser and the graduate program director, based on the student's submission to the adviser of a written explanation for the delay in progress. This written explanation must include a plan for completing the project, developed by the student with adviser input and approval.

Satisfactory academic progress

Satisfactory academic progress in the M.P.H. program may be assessed on multiple factors. These factors include professional conduct including communication with the adviser about capstone project progress or other relevant work; honor policy adherence and academic conduct; and continuous enrollment compliance. Students are notified of faculty assessment of their progress and performance in the program via semi-annual advising letters provided after the fall and spring semesters. In addition, special advising letters may be issued outside of this cycle if additional guidance or notification of unsatisfactory academic progress is necessary.

Non-curricular program requirements

In addition to course work, students are required to complete the following non-curricular requirements for the M.P.H. degree:

1. Documented attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

A typical plan of study for this degree concentration is available on the M.P.H. program page of the Division of Epidemiology, Department of Family Medicine and Population Health, under the heading, Degree Completion and Typical Plan of Study. (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mpg-program/>)

M.D.-M.P.H. opportunity

The M.D.-M.P.H. program allows students to pursue both the M.D. and M.P.H. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the M.P.H. See the dual degree program page (p. 78) for additional details.

M.S.W.-M.P.H. opportunity

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the VCU School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. This dual degree program prepares graduates to work with individuals, families, groups, communities and/or organizations; to advocate for social, health care and economic justice in a diverse and multicultural society; and to promote physical and mental health across the life course. Program details (<http://bulletin.vcu.edu/dual-degree-opps/msw-mpg/>) can be found in the dual degree opportunities section of this Bulletin.

Public Health, Master of (M.P.H.) with a concentration in epidemiology

Program accreditation

Council on Education for Public Health

Program goal

The mission of the VCU M.P.H. program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster life-long inquiry and discovery that improve human health.

The overall goal of the M.P.H. program is to educate students to become well-grounded in the essential knowledge, skills and attitudes of public health and demonstrate their ability to apply these essentials through course work, internships and the M.P.H. capstone project. The epidemiology concentration is designed to provide students with the skills required to advance to a broad spectrum of positions as public health researchers, epidemiologists or data analysts who can perform the following:

1. Collect, analyze and evaluate public health data
2. Select and apply epidemiologic methods appropriate for the disease topic
3. Plan, implement and evaluate public health interventions
4. Apply results of research and data analyses to policy development as necessary
5. Effectively communicate results of research to a wide variety of audiences

The structure of the program provides a framework for the progressive development of a mastery of the current state of the subject matter of public health and an ability to synthesize and apply this information to the identification of key areas of practice and research in public health. Students will develop educational competencies outlined by the M.P.H. program. These competencies cover the foundational knowledge necessary for a public health practitioner to both communicate the core of public health knowledge and express the design, results and interpretation of various public health interventions, evaluations, and data collection and analysis efforts to a variety of potential audiences.

Student learning outcomes

Student learning outcomes are monitored by the program faculty and center primarily around competencies for all students. Overall learning outcomes are as follows.

1. Integrated knowledge of public health: Students will demonstrate knowledge of the current elements of public health, at a level assessed by program faculty as competent or higher, according to the program rubric.
2. Demonstration of focused knowledge and skills: Students will demonstrate more detailed knowledge and applied skills in the individual area of scholarship, including familiarity with the research literature and the ability to evaluate and critique publications, at a

level assessed by program faculty as competent or higher, according to the program rubric.

3. Development of competencies: Through program course work and applied experiences, students will develop competence in the discipline of public health as demonstrated through annual self-assessment of performance on the M.P.H. program competencies and faculty assessment of (1) student competence in semi-annual student reviews and (2) student performance in the program's integrated learning experience, the capstone project.
4. Training in appropriate public health skills/knowledge: Through didactic study and two separate applied experiences in professional public health settings, students will gain knowledge and skills required to perform as public health practitioners and/or researchers.

The M.P.H. program trains students to develop educational competencies established by the program's accrediting body, the Council on Education for Public Health. These competencies may be viewed on the Department of Family Medicine and Population Health website (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mp-program/competencies/>).

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section for additional information on academic regulations for graduate students.**

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section for additional information on degree candidacy requirements.**

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section for additional information on graduation requirements.**

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **master's programs** is available elsewhere in this chapter of the Graduate Bulletin.

The M.P.H. program student handbook is available upon request.

Apply online at [sophas.org](http://www.sophas.org) (<http://www.sophas.org/>) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|---|
| M.P.H. | Fall | Feb. 15 | TOEFL or IELTS for international students |

In addition to the general admission requirements of the VCU Graduate School (p. 35), to be considered for admission, applicants must meet the following requirements:

1. Prior degree: Students must hold a bachelor's degree from an accredited institution (health, social or basic sciences preferred) with a minimum GPA of 3.0 on a 4.0 scale in all undergraduate and any other graduate study. Official copies of transcripts for all prior degrees earned must be submitted to the VCU Office of Graduate Admissions.
2. Standardized tests: International students must submit TOEFL, IELTS or PTE scores. Minimum TOEFL score is 600 (paper-based), 250 (computer-based) or 100 (Internet-based); IELTS minimum score is 7.0; PTE minimum score is 65. Test score requirements may be waived for international students who have received a medical degree (M.D.) in the U.S. Contact the program coordinator for more information.

Students must also submit the following materials with their applications:

1. Letters of recommendation from three individuals who can assess applicant qualifications for graduate school; at least one academic reference is required, but two are preferred. Most appropriate are letters from past professors or work supervisors.
2. Current version of curriculum vitae or resume. Include experience and/or education relevant to study in public health.
3. Personal statement covering the following issues in two to five pages:

- a. Description of the applicant’s career goals
- b. Why the applicant wishes to pursue an M.P.H. degree
- c. How an M.P.H. degree will help the applicant achieve her/his career goals
- d. Description of applicant’s particular areas of interest in public health (e.g., maternal and child health, epidemiology, community engagement)
- e. Why VCU’s M.P.H. program best fits the student’s public health interests
- f. What applicant plans to do in the first few years after graduation

Degree requirements

The mission of the Master of Public Health program is to provide exceptional public health training; conduct cutting-edge, translational research; promote health equity and community wellness; and foster lifelong inquiry and discovery that improve human health. The program prepares students committed to public health careers in the public, private or nonprofit sectors through a rigorous curriculum that helps students develop analytic and critical-reasoning skills to improve population health. The M.P.H. program boasts experiential learning, a highly interactive environment, accessible and approachable faculty and student involvement in significant projects.

In addition to general VCU Graduate School graduation requirements (p. 32), a minimum of 45 credit hours of formal course work is required, including:

1. 25 credits minimum of core didactic course work, including
 - a. A three-credit internship, typically conducted in the summer between the first and second year
 - b. A minimum three-credit capstone project planned and implemented in the second year of the program
2. Nine credits minimum of concentration course work
3. 11 credits minimum of concentration elective course work

Note that some elective courses may not be available in certain years or may require instructor permission for registration.

Total Hours **45**

The minimum number of graduate credit hours required for this degree is 45.

Public health internship: The public health internship is a supervised experience designed to expose M.P.H. students to a real-world public health practice setting, such as a governmental public health agency or nonprofit organization, requiring them to integrate classroom knowledge and skills in practical applications in a professional environment. Each student intern works with a practice site supervisor who assigns tasks, instructs the student in new skills and evaluates the student's progress. Students work a minimum of 180 hours in a professional public health organization.

Capstone project: The culminating work in the M.P.H. program is the capstone project. The project is a practical experience that allows the student to apply what has been learned in the didactic components of the curriculum to a focused project. The goal is to enhance the student's academic experience through the application of public health concepts and skills in a supervised experience. Students are required to synthesize the literature; analyze, assess or evaluate quantitative or qualitative data; and in general apply theory and integrate knowledge gained and principles in situations that approximate some aspects of professional practice. With this mentored experience, students are able to both broaden their skills and hone their proficiency in a specific area of public health. The major product of this culminating experience is expected to vary depending on the educational goals of the student, but could include one of the following:

1. Manuscript suitable for publication in a peer-reviewed journal
2. Comprehensive disease-related report and analysis
3. Policy analysis report

4. Needs assessment for a specific population
5. Development, implementation and analysis of target population surveys
6. Program evaluation

At a minimum, the capstone experience will require the integration of multiple major competencies used by a public health professional. In fulfilling the capstone requirement, each candidate must: (a) submit a formal written paper of sufficient depth and rigor and (b) satisfactorily complete a poster presentation of the project chosen as the basis for the written paper at an appropriate venue (e.g., research forum, refereed conference, etc.) approved by the M.P.H. program director.

Students are expected to maintain satisfactory academic progress on the capstone project; such progress entails completing the capstone project according to the timeline included in the student's proposal for the capstone project (typically in no more than one-to-two semesters). Exceptions beyond this time limit must be approved by the student's adviser and the graduate program director, based on the student's submission to the adviser of a written explanation for the delay in progress. This written explanation must include a plan for completing the project, developed by the student with adviser input and approval.

Satisfactory academic progress

Satisfactory academic progress in the M.P.H. program may be assessed on multiple factors. These factors include professional conduct including communication with the adviser about capstone project progress or other relevant work; honor policy adherence and academic conduct; and continuous enrollment compliance. Students are notified of faculty assessment of their progress and performance in the program via semi-annual advising letters provided after the fall and spring semesters. In addition, special advising letters may be issued outside of this cycle if additional guidance or notification of unsatisfactory academic progress is necessary.

Non-curricular program requirements

In addition to course work, students are required to complete the following noncurricular requirements for the M.P.H. degree:

1. Documented attendance at 12 public health seminars
2. Twenty hours of community-based service-learning

A typical plan of study for this degree concentration is available on the M.P.H. program page of the Division of Epidemiology, Department of Family Medicine and Population Health, under the heading, Degree Completion and Typical Plan of Study. (<https://familymedicine.vcu.edu/epidemiology/epidemiology-graduate-programs/mp-h-program/>)

M.D.-M.P.H. opportunity

The M.D.-M.P.H. program allows students to pursue both the M.D. and M.P.H. degrees using a coordinated program of study and apply a limited number of M.D. requirements toward fulfillment of requirements for the M.P.H. See the dual degree program page (p. 78) for additional details.

M.S.W.-M.P.H. opportunity

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the VCU School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. This dual degree program prepares graduates to work

with individuals, families, groups, communities and/or organizations; to advocate for social, health care and economic justice in a diverse and multicultural society; and to promote physical and mental health across the life course. Program details (<http://bulletin.vcu.edu/dual-degree-ops/msw-mp/>) can be found in the dual degree opportunities section of this Bulletin.

Social and Behavioral Sciences, Doctor of Philosophy (Ph.D.)

Program goal

Training to be social and behavioral scientists

Students in the doctoral program in social and behavioral sciences will acquire the skills to become scientists, educators and scientists/administrators in a broad spectrum of positions and settings. Students will gain a progressive mastery of the current state of the subject matter in the social and behavioral sciences, an ability to synthesize the information and apply this foundation to the identification of key areas of investigation/experimentation and the ability to design and interpret studies that address the questions identified. In addition, students will develop the various means of communicating core social and behavioral science knowledge and particular study designs, results and interpretations to a variety of audiences.

Student learning outcomes

1. Analytical thinking: Students will demonstrate an appropriate level of ability to interpret information relevant to social and behavioral science, to connect rationales to procedures and evidence to findings, to draw reasonable conclusions, and to generate and evaluate alternate explanations.
2. Integrated knowledge of social and behavioral science: Students will demonstrate an appropriate level of knowledge of the current elements of the social and behavioral sciences as related to disciplinary specialization and a more detailed understanding of the individual area of scholarship, including an appropriate familiarity with the research literature and the ability to evaluate and critique.
3. Oral communication skills: Students will demonstrate the achievement of an appropriate level of skill in the oral communication of social and behavioral science subject matter with respect to content, organization, logical flow, presentation, use of language and incorporation of visual aids in formal and collaborative communication.

4. Study design: Students will demonstrate the achievement of an appropriate level of competence in the ability to appraise, modify and/or create, and implement study protocols and to design and develop studies.
5. Written communication skills: Students will demonstrate the achievement of an appropriate level of written communication skill with respect to grammar, syntax, spelling, vocabulary and use of figures, tables and citations to effectively present social and behavioral science information.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

School of Medicine graduate program policies

The School of Medicine provides policies applicable to all programs administratively housed in the school. Information on **doctoral programs** is available elsewhere in this chapter of the Graduate Bulletin.

Apply online at [sophas.org](http://www.sophas.org) ([http://www.sophas.org/](http://www.sophas.org)) and submit a VCU supplemental application following instructions available at [sophas.org](http://www.sophas.org).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|--------------------|
| Ph.D. | Fall | Jan 9 (Priority consideration given to applications received by the deadline. Interviews will be conducted in February and March.) | GRE |

Special requirements

- M.P.H. or equivalent M.A. or M.S. degree

Applicants must meet all general admission requirements of the VCU Graduate School (p. 35).

Degree requirements

The Ph.D. program in social and behavioral sciences, the only one of its kind in Virginia, prepares students to conduct theoretically based research and interventions on the social and behavioral determinants of health and disease. In addition to the general VCU Graduate School graduation requirements (p. 32), a minimum of 54 post-master's credit hours is required for the doctoral degree, which is expected to involve four years of full-time study.

Course requirements

| Course | Title | Hours |
|------------------------------|---|-------|
| Required core courses | | |
| BIOS 543 | Graduate Research Methods I | 3 |
| BIOS 544 | Graduate Research Methods II | 3 |
| SBHD 609 | Research Methods in Social and Behavioral Health I | 3 |
| SBHD 619 | Research Methods in Social and Behavioral Health II | 3 |
| SBHD 630 | Theoretical Foundations of Social and Behavioral Health | 3 |
| SBHD 632 | Health Disparities and Social Justice | 3 |
| SBHD 634 | Patient-Provider Interaction ¹ | 3 |
| SBHD 636 | Community-based Participatory Research ¹ | 3 |
| SBHD 637 | Program Evaluation | 3 |
| SBHD 638 | Applications in Qualitative Research Methods | 3 |

| | | |
|----------|---|---|
| SBHD 639 | Intervention Development and Implementation | 3 |
| SBHD 640 | Seminar in Mixed Methods Research | 1 |
| SBHD 690 | Departmental Seminar (one credit course taken four times) | 4 |

Required additional courses

| | | |
|-------------|---------------------------------|---|
| OVPR 601 | Scientific Integrity | 1 |
| or OVPR 602 | Responsible Scientific Conduct | |
| or OVPR 603 | Responsible Conduct of Research | |

Elective courses

| | |
|--|---|
| Any graduate-level courses approved by adviser | 6 |
|--|---|

Dissertation research

| | | |
|----------|--|---|
| SBHD 697 | Directed Research in Social and Behavioral Health (nine credits minimum) | 9 |
|----------|--|---|

Total Hours **54**

1

SBHD 692 may be taken if subject matter is appropriate; see adviser for approval.

The minimum total of graduate credit hours required for this degree is 54.

Typical plan of study

Many students often end up taking more than the minimum number of hours required for a degree program. The total number of hours may vary depending upon the nature of research being conducted or the enrollment or funding status of the student. Students should refer to their program websites and talk with their graduate program director or adviser for information about typical plans of study and registration requirements. This program has a typical time to degree of four years. For additional information, see the departmental website (<http://hbp.vcu.edu/education/phd-behavioralhealth/>).

Program website: hbp.vcu.edu (<http://hbp.vcu.edu/>)

Department of Anatomy and Neurobiology

John Povlishock, Ph.D.

Professor and chair

[anatomy.vcu.edu](http://www.anatomy.vcu.edu) (<http://www.anatomy.vcu.edu/>)

The Department of Anatomy and Neurobiology offers neuroscience education for Ph.D. students and exciting research opportunities for postdoctoral scientists that span cellular to systems neuroscience. The department houses a large number of the university's neuroscientists and maintains dynamic research groups in glial cell biology, plasticity, development and circuitry, and central nervous system injury and repair.

- Anatomy and Neurobiology, Master of Science (M.S.) (p. 620)

Department of Biochemistry and Molecular Biology

Sarah Speigel, Ph.D.
Professor and chair

biochemistry.vcu.edu (<http://www.biochemistry.vcu.edu/>)

The Department of Biochemistry and Molecular Biology is home to a community of dedicated scientists, students and postdoctoral fellows who conduct innovative research on biochemical and molecular mechanisms governing cellular processes. The department offers a strong collegial atmosphere where faculty, students, postdoctoral fellows and administrators work together to promote and share in the discovery of fundamental principles governing life processes.

- Biochemistry, Doctor of Philosophy (Ph.D.) (p. 622)
- Biochemistry, Master of Science (M.S.) (p. 624)

Department of Biostatistics

Shumei S. Sun, Ph.D.
Professor and chair

biostatistics.vcu.edu (<http://www.biostatistics.vcu.edu/>)

The Department of Biostatistics is committed to excellence in providing a graduate training program, conducting multidisciplinary collaborative biomedical research and developing new statistical methods. The department offers M.S. and Ph.D. programs in biostatistics, with concentrations in genomic biostatistics concentration at both levels and an additional concentration in clinical research and biostatistics at the master's level. The majority of the department's graduate students are supported through collaborative projects and partnerships with industry. The department also has a National Research Service Award pre-doctoral training program funded by the National Institute of Environmental Health Sciences. The purpose of this award is to train students to develop analytic methods for the study of chemical mixtures and analysis of toxicogenomic data. One faculty member also has a regular research grant funded in this area by the NIEHS.

- Biostatistics, Doctor of Philosophy (Ph.D.) (p. 626)
- Biostatistics, Doctor of Philosophy (Ph.D.) with a concentration in genomic biostatistics (p. 629)
- Biostatistics, Master of Science (M.S.) (p. 631)
- Biostatistics, Master of Science (M.S.) with a concentration in clinical research and biostatistics (p. 633)
- Biostatistics, Master of Science (M.S.) with a concentration in genomic biostatistics (p. 636)

Department of Family Medicine and Population Health

Anton J. Kuzel, M.D.
Professor and chair

familymedicine.vcu.edu (<http://www.familymedicine.vcu.edu/>)

The Department of Family Medicine and Population Health hosts both a robust residency program for family physicians and academic programs

at the graduate level dealing with critical issues in public health. Within the department, the Division of Epidemiology integrates research, education and public health service programs. The department offers a Ph.D. degree in epidemiology along with a fully accredited Master of Public Health degree. Close ties to the Virginia Department of Health allow opportunities for students to immerse themselves in experiential learning with these public health partners. The doctoral training program in epidemiology cultivates public health scientists equipped to use state-of-the-art research methods for the purpose of advancing fundamental knowledge of issues central to the improvement of population health.

- Epidemiology, Doctor of Philosophy (Ph.D.) (p. 637)
- Public Health, Master of (M.P.H.) (p. 688)
- Public Health, Master of (M.P.H.) with a concentration in applied public health (p. 688)
- Public Health, Master of (M.P.H.) with a concentration in epidemiology (p. 691)
- Public Health, Master of (M.P.H.)/Social Work, Master of (M.S.W.) [combined] (<http://bulletin.vcu.edu/graduate/school-medicine/public-health-mp-h-social-work-msw-combined/>)
- Medicine, Doctor of (M.D.)/Public Health, Master of (M.P.H.) [combined] (<http://bulletin.vcu.edu/graduate/school-medicine/medicine-md-mp-h-combined/>)
- Pharmacy, Doctor of (Pharm.D.)/Public Health, Master of (M.P.H.) [combined] (p. 679)

Department of Health Behavior and Policy

Vanessa Sheppard, Ph.D.
Professor and chair

hbp.vcu.edu (<http://hbp.vcu.edu/>)

The Department of Health Behavior and Policy's mission is to transform the health landscape through multidisciplinary research, education and service. The department's research identifies the behavioral, social, organizational and policy factors that affect the health of individuals and populations. Faculty members and students utilize rigorous quantitative and qualitative methods and engage diverse communities to develop and evaluate programs and policies designed to promote health, improve health care delivery and reduce health disparities. Research findings inform the translation of effective programs and policies into practice. The department provides training to and promotes excellence in the next generation of health behavior and policy practitioners, educators and scientists.

- Healthcare Policy and Research, Doctor of Philosophy (Ph.D.) (p. 646)
- Social and Behavioral Sciences, Doctor of Philosophy (Ph.D.) (p. 695)

Department of Human and Molecular Genetics

Paul B. Fisher, Ph.D.
Professor and chair

gen.vcu.edu (<http://www.gen.vcu.edu/>)

The Department of Human and Molecular Genetics provides multifaceted research activities focusing on important areas of current medical and basic research. Our faculty members conduct research and clinical and

educational activities at the VCU Medical Center, the Virginia Institute for Psychiatric and Behavioral Genetics and the VCU Institute of Molecular Medicine. Genetic counselors and medical genetics faculty conduct their outpatient counseling, medical genetics practice and inpatient pediatrics service at the VCU Medical Center and affiliated outpatient clinics.

- Genetic Counseling, Master of Science (M.S.) (p. 641)
- Human Genetics, Doctor of Philosophy (Ph.D.) (p. 648)
- Human Genetics, Doctor of Philosophy (Ph.D.) with a concentration in quantitative human genetics (p. 650)
- Human Genetics, Master of Science (M.S.) (p. 656)
- Human Genetics, Master of Science (M.S.) with a concentration in genomic data science (p. 658)
- Human Genetics, Doctor of Philosophy (Ph.D.)/Genetic Counseling, Master of Science (M.S.) [dual degree] (p. 652)

Department of Microbiology and Immunology

Dennis E. Ohman, Ph.D.
Professor and chair

microbiology.vcu.edu (<http://microbiology.vcu.edu/>)

The Department of Microbiology and Immunology is focused on research, cutting-edge technologies and educational programs with emphasis on microbial pathogens, cancer and the host immune defense system, which protects individuals from disease. The training is rigorous, emphasizing conceptual and experimental strategies using state-of-the-art technologies in modern facilities.

Departmental microbiologists study the molecular mechanisms by which microorganisms (i.e., bacteria, viruses, fungi and parasites) colonize a host, evade the immune response and cause damage. Immunologists in the department study the molecular and cellular mechanisms by which the immune response either defends the host against pathogens or goes awry, such as with an allergic reaction. Many of the department's molecular cell biologists are studying the fundamentals of cancer and new therapeutic approaches. All conduct research using the tools of molecular biology, genetics, cell culture, infection models, transgenic animals and bioinformatics.

A major goal of the department is to train the next generation of research scientists. Ph.D. students and postdoctoral fellows work alongside principal investigators to test hypotheses of medical importance. Laboratory training is supplemented with rigorous course work, seminars, journal clubs and lab meetings. Most trainees present their research findings at national and international meetings.

- Microbiology and Immunology, Doctor of Philosophy (Ph.D.) (p. 665)
- Microbiology and Immunology, Master of Science (M.S.) (p. 668)

Department of Pathology

Charles V. Clevenger, M.D., Ph.D.
Professor and chair

[pathology.vcu.edu](http://www.pathology.vcu.edu/) (<http://www.pathology.vcu.edu/>)

The Department of Pathology is a diverse clinical, research and teaching department within the School of Medicine. The department offers a full range of pathology services to physicians, researchers and patients

at the VCU Health System, a 780-bed tertiary-care urban teaching hospital dedicated to serving the patients and physicians of central Virginia. The 47 faculty members supervise 14 hospital laboratories including histopathology, neuropathology, cytopathology, autopsy pathology, molecular diagnostics, cytogenetics, hematology, coagulation, microbiology, immunology, clinical chemistry, toxicology and transfusion medicine staffed by more than 350 hospital employees. The department faculty conduct a robust array of research programs in numerous areas and participate in student training through a variety of mechanisms.

Department of Pharmacology and Toxicology

William L. Dewey, Ph.D.
Professor and chair

pharmtox.vcu.edu (<https://pharmtox.vcu.edu/>)

The Department of Pharmacology and Toxicology is home to a community of researchers, students and faculty who strive to improve the treatment of medical disorders through a better understanding of the pharmacology of agents and by developing safer and more effective drugs. The department has educated alumni who have gone on to distinguished careers in government, academia and the private sector as researchers, educators and consultants. The work these students do at VCU and beyond has the potential to improve the health and well-being of people all over the world.

- Pharmacology and Toxicology, Doctor of Philosophy (Ph.D.) (p. 674)
- Pharmacology and Toxicology, Master of Science (M.S.) (p. 676)

Department of Physiology and Biophysics

Clive M. Baumgarten, Ph.D.
Professor and interim chair

[physiology.vcu.edu](http://www.physiology.vcu.edu/) (<http://www.physiology.vcu.edu/>)

The Department of Physiology and Biophysics brings a long tradition to the study of physiology that spans the entire spectrum from molecules to man. Strong research programs exist in molecular biophysics, cardiovascular and gastrointestinal physiology as well as in chemical senses. Faculty recruitments are ongoing in two areas: structural biology, which aims to understand function in terms of structure, and systems physiology, which aims to elucidate fundamental ways of communication within and between physiological systems. Biophysical approaches serve as the common language used at all levels of scientific inquiry. The department offers a strong collegial atmosphere where faculty, students, postdoctoral fellows and administrators work together to promote and share in the discovery of fundamental principles governing life processes.

- Physiology and Biophysics, Doctor of Philosophy (Ph.D.) (p. 681)
- Physiology and Biophysics, Master of Science (M.S.) (p. 684)

Department of Radiation Oncology

Mitchell Anscher, M.D.
Florence and Hyman Meyers Endowed Chair

The Department of Radiation Oncology is a key unit in the Massey Cancer Center, a National Cancer Institute-designated unit directed to the delivery of effective treatment modalities, research critical to improvement in the treatment of cancer and the education of physicians and scientists

who specialize in this critical area. The department includes a Clinical Division, focusing on the delivery of advanced radiotherapy services to patient populations, the Division of Molecular Radiobiology and Targeted Imaging, conducting research to refine the understanding of the cellular response to radiation and the development of functional targeted imaging to enhance therapy, and the Division of Medical Physics, which integrates research into methods to improve radiotherapy with Ph.D. training in medical physics.

- Medical Physics, Doctor of Philosophy (Ph.D.) (p. 661)
- Medical Physics, Master of Science (M.S.) (p. 663)
- Medical Physics, Certificate in (Post-baccalaureate graduate certificate) (p. 660)

SCHOOL OF NURSING

The School of Nursing originated in 1893 as part of the University College of Medicine. Since then, the educational program has evolved from a basic diploma program to multiple programs at the baccalaureate, master's- and doctoral-degree levels. Additionally, the School of Nursing offers post-master's certificate programs. The School of Nursing takes pride in its long history of service to the profession of nursing and continues to be a leader in nursing education in Virginia.

Administration

1100 East Leigh Street
Box 980567
Richmond, Virginia 23298-0567
(804) 828-0724
Fax: (804) 828-7743
nursing.vcu.edu (<http://www.nursing.vcu.edu>)

Jean Giddens, Ph.D., RN, FAAN
Dean

Pamela Parsons, Ph.D., RN, GNP-BC, FNAP
Clinical associate professor and associate dean for practice and community engagement

Amy Salisbury, Ph.D., RN
Professor and associate dean for research, scholarship and innovation

Megan Rapchick
Assistant dean, Office of Student Success

Christine Wynd, Ph.D., RN
Professor and chair, Department of Family and Community Health Nursing

Shelley Conroy, Ed.D., RN, CNE
Professor and chair, Department of Adult Health and Nursing Systems

Accreditation

The baccalaureate degree in nursing, master's degree in nursing, post-master's certificate program and the Doctor of Nursing Practice program at the VCU School of Nursing are accredited by the Commission on Collegiate Nursing Education (<https://www.aacnnursing.org/CCNE/>).

The pre-licensure nursing program is approved by the Virginia Board of Nursing (<http://www.dhp.virginia.gov/nursing/>).

Programs

The School of Nursing offers Bachelor of Science, Master of Science, graduate certificate, post-master's certificate, post-professional certificates, Doctor of Philosophy and Doctor of Nursing Practice programs. Curricula and admissions information pertaining to all of these programs is available on this website and may be accessed using the program index feature at the top of this page.

Further information may be obtained by visiting the School of Nursing website (<http://www.nursing.vcu.edu/>) or by writing to Virginia Commonwealth University, School of Nursing, Office of Student Success, Box 980567, Richmond, VA 23298-0567.

Facilities and resources

The faculty and administrative offices of the school are housed at 1100 E. Leigh St. Additionally, this building has a nursing clinical resource laboratory and classrooms equipped with a full range of audiovisual equipment. Both graduate and undergraduate courses are also scheduled in other classrooms on campus.

The clinical laboratories for nursing courses are conducted at the VCU Medical Center and in numerous other urban and rural hospitals and health agencies in the area, including community medical centers and state hospitals, public health services, private clinics and offices, and federal and state centers and departments. These facilities provide generalized and specialized inpatient and ambulatory services. Students are given a range of diverse experiences in hospital and community-oriented nursing. Selection of specific facilities for student experience is based upon curricular and advanced-practice certification requirements, the educational needs of the individual student and the services available.

Financial assistance

Applications for financial assistance must be filed for all forms of financial assistance. A Free Application for Federal Student Aid may be obtained from the Office of Financial Aid, Virginia Commonwealth University, Richmond, VA 23298-0244 or online at fafsa.ed.gov (<https://fafsa.ed.gov>).

Financial assistance is available through scholarships, fellowships and assistantships administered by the School of Nursing. Additional information may be found on the school's website (<https://nursing.vcu.edu/admission/scholarships-and-financial-aid/>).

Graduate information

Nondegree-seeking students

Students who have not been admitted to a graduate program in nursing may be admitted to individual courses. Permission to register for courses is granted at the discretion of the School of Nursing. Only six credits earned as a nondegree-seeking student can be applied to the master's degree. Only three credits may be earned by post-master's students prior to admission.

Enrollment

Students may begin study during the fall semester. Students will have an academic adviser appointed and will follow the standard program

of study. Once admitted, students are expected to abide by enrollment policies of the Graduate School.

Adult-Gerontology Acute Care Nurse Practitioner, Certificate in (Post-professional certificate)

The 21-credit Certificate in Adult-Gerontology Acute Care Nurse Practitioner is designed to prepare master's- or doctorate-prepared nurses already established in advanced practice to obtain the education and experience to certify in an enhanced scope of practice. Students will incorporate new skills and knowledge to care for individuals from adolescents to geriatrics with acute and chronic illnesses. Students will develop knowledge in the diagnosis and management of an illness and will learn to provide advanced nursing care to these patients. Graduates will be prepared to obtain a health history, conduct physical examinations, order and interpret diagnostic studies (e.g. lab tests, scans, X-rays), make a differential diagnosis, prepare a case management plan, prescribe medications and treatments, collaborate with physicians and other health professionals, and counsel patients on health behaviors and treatment options.

Upon completion of the certificate program, graduates will be able to sit for the adult-gerontology acute care nurse practitioner certification, which is a prerequisite for Virginia state licensure application. Certification is offered by the American Nurses Certification Center and the American Association of Critical Care Nurses.

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|--------------------|--------------------|
| Certificate | Spring or fall | Rolling admissions | |

Note: There are no specific test requirements for this certificate.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without an R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools \(http://www.cgfn.org/\)](http://www.cgfn.org/) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry
8. Submit all official college transcripts from each college attended, including concurrent college enrollment transcripts

9. Have completed three separate comprehensive nursing graduate-level lifespan courses in advanced pathophysiology, advanced health assessment and advanced pharmacology

For international students, the following is required:

1. Submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Services (<https://www.naces.org/>) or the American Association of Collegiate Registrars and Admissions Officers (<https://www.aacrao.org/>)
2. Receive a minimum composite score of 100 for the Internet Based Test or 600 for the paper-based score; or an International English Language Testing System score minimum of 6.5 on the academic exam
3. Receive a passing score on the VCU English Language Program Compression test

Degree requirements

Twenty-one graduate credit hours are required for the post-professional Certificate in Adult-Gerontology Acute Care Nurse Practitioner.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the post-professional certificate in must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

Students in nurse practitioner certification certificate programs are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

| Course | Title | Hours |
|----------|---|-------|
| NURS 580 | Primary Care of the Adult-Gerontology Population | 4 |
| NURS 581 | Adult-Gerontology Acute Care Practicum I | 2 |
| NURS 619 | Acute and Complex Health Conditions of the Adult-Gerontology Population | 3 |
| NURS 662 | Care of the Adult-Gerontology Population in the Critical Care Setting | 4 |
| NURS 669 | Adult-Gerontology Acute Care Practicum II | 4 |

| | | |
|--------------------|--|-----------|
| NURS 689 | Adult-Gerontology Acute Care Practicum III | 4 |
| Total Hours | | 21 |

The minimum total of graduate credit hours required for this certificate is 21.

Family Nurse Practitioner, Certificate in (Post-professional certificate)

The 21-credit Certificate in Family Nurse Practitioner is designed to prepare master's- or doctorate-prepared nurses already established in advanced practice to obtain the education and experience to certify in an enhanced scope of practice. Students will incorporate new skills and knowledge to care for individuals across the lifespan with common acute and chronic illnesses. The program will educate students in the concepts of health maintenance across the lifespan. Students will develop knowledge in the diagnosis and management of illness and will learn to provide advanced nursing care to patients from infancy to geriatrics. Graduates will be prepared to obtain a health history, conduct physical examinations, order and interpret diagnostic studies (e.g., lab tests, cans, X-rays), make a differential diagnosis, prepare a case management plan, prescribe medications and treatments, collaborate with physicians and other health professionals, and counsel patients on health behaviors and treatment options.

Upon completion of the certificate program, graduates will be able to sit for the family nurse practitioner certification, which is a prerequisite for Virginia state licensure application. Certification is offered by the American Nurses Certification Center and the American Academy of Nurse Practitioners.

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|--------------------|--------------------|
| Certificate | Spring or fall | Rolling admissions | |

Note: There are no specific test requirements for this certificate.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without an R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)

6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>.)
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry
8. Submit all official college transcripts from each college attended, including concurrent college enrollment transcripts
9. Have completed three separate comprehensive nursing graduate-level lifespan courses in advanced pathophysiology, advanced health assessment and advanced pharmacology

For international students, the following is required:

1. Submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Services (<https://www.naces.org/>) or the American Association of Collegiate Registrars and Admissions Officers (<https://www.aacrao.org/>)
2. Receive a minimum composite score of 100 for the Internet Based Test or 600 for the paper-based score; or an International English Language Testing System score minimum of 6.5 on the academic exam
3. Receive a passing score on the VCU English Language Program Compression test

Degree requirements

Twenty-one graduate credit hours are required for the post-professional Certificate in Family Nurse Practitioner.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the post-professional certificate must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

Students in nurse practitioner certification certificate programs are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

| Course | Title | Hours |
|----------|--|-------|
| NURS 580 | Primary Care of the Adult-Gerontology Population | 4 |

| | | |
|--------------------|---|-----------|
| NURS 589 | Maternal and Child Health in Primary Care | 3 |
| NURS 590 | Complex Problems in Family Primary Care | 4 |
| NURS 595 | Family Primary Care Practicum I | 2 |
| NURS 642 | Family Primary Care Practicum II | 4 |
| NURS 658 | Family Primary Care Practicum III | 4 |
| Total Hours | | 21 |

The minimum total of graduate credit hours required for this certificate is 21.

Health Care Innovation, Certificate in (Graduate certificate) [School of Nursing]

The Certificate in Health Care Innovation is a collaboration between the VCU School of Nursing and the VCU da Vinci Center for Innovation. The graduate certificate will prepare students to become leaders in developing digital and physical products and innovative solutions in the area of health care. Students will acquire skills and knowledge necessary to identify problems and implement solutions that foster high-quality, safe and accessible health care. The curriculum focuses on merging principles of leadership in health care and principles of product innovation and emphasizes the analysis of organization and clinical processes for effective operations to improve quality and safety. The specialized knowledge and skills include problem identification, product development, user analysis, prototyping, testing, marketing, intellectual property protection (patents, copyrights and trademarks) and commercialization opportunities.

Student learning outcomes

Graduates will:

1. Acquire skills and knowledge necessary to identify problems and implement solutions that foster high quality, safe and accessible health care
2. Develop specialized skills and knowledge to lead health care teams in innovation

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Visit the **School of Nursing website** for program-specific application instructions (<https://nursing.vcu.edu/admission/application-instructions/certificate-in-health-care-innovation/>).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|--|--------------------|
| Certificate | All | Rolling admissions made on a space-available basis | |

The admission requirements outlined below will apply to all students. All applicants to the graduate certificate program are required to meet the **admission requirements of the VCU Graduate School**. Applicants will be required to submit the following materials to Graduate Admissions:

- Application form and application fee
- Three letters of recommendation, professional and/or academic
- Official undergraduate transcripts from all schools attended
- A statement of purpose outlining career goals, strengths and skills that will be brought to a team and how life experience has shaped the applicant's perspective
- A resume or CV stating relevant work experience in health care and any additional experience in design, business, engineering, product development, innovation and/or entrepreneurship

The VCU School of Nursing and the VCU da Vinci Center for Innovation require students to have a bachelor's degree with evidence of strong academic performance.

No transfer credit hours are accepted for this certificate program. Credits applied to a degree already awarded cannot be applied toward the certificate.

International students will submit an official transcript evaluation from a recognized foreign educational credential evaluation service accredited

by the National Association of Credential Evaluation Service or the American Association of Collegiate Registrars and Admissions Officers. International students must also provide proof that they can support themselves financially for the duration of the program.

International applicants must also provide additional information with the application according to the English language proficiency guidelines for those who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/graduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/graduate-applicants/).)

In addition to the general admission requirements of the VCU Graduate School (<http://graduate.admissions.vcu.edu/apply/>), the following requirements represent the standards for admission:

1. Applicants from a health care background must be in good standing with licensing and certifying bodies as applicable.
2. Select applicants will complete a scheduled interview with the graduate admissions committee.

Degree requirements

Students will complete course work to develop specific knowledge and skills in leadership and processes related to development and implementation of innovative solutions to health care issues such as rising costs and improving quality and access to care. The curriculum focuses on merging principles of leadership in health care and principles of health care innovation while emphasizing the analysis of organization and clinical processes for effective operations to improve quality and safety. Problem identification, product development, user analysis, prototyping, testing, marketing and commercialization opportunities will be emphasized.

Curriculum requirements

| Course | Title | Hours |
|---------------------------------------|--|-----------|
| Nursing courses | | |
| Select six credits from: | | 6 |
| NURS 515 | Holistic Leadership in Health Care Delivery | |
| NURS 517 | Organizational Science Implications for Human and Material Resource Management | |

Psychiatric Mental Health Nurse Practitioner, Certificate in (Post-professional certificate)

The 21-credit Certificate in Psychiatric Mental Health Nurse Practitioner is designed to prepare master's- or doctorate-prepared nurses already established in advanced practice to obtain the education and experience to certify in an enhanced scope of practice. Students will incorporate new skills and knowledge to care for individuals across the lifespan with common acute and chronic mental health illnesses. The program will educate students in the concepts of the maintenance of mental health across the lifespan. Students will develop knowledge in the diagnosis and management of mental health illnesses and will learn to provide advanced nursing care to patients from infancy to geriatrics. Graduates will be prepared to obtain a health history, conduct physical examinations, order and interpret diagnostic studies (e.g., lab tests), make differential diagnoses, prepare a case management plan, prescribe medications and treatments, provide psychotherapy, collaborate with physicians and other health professionals, and counsel patients on health behaviors and treatment options.

Upon completion of the certificate program, graduates will be able to sit for the psychiatric mental health nurse practitioner certification, which is a prerequisite for Virginia state licensure application. Certification is offered by the American Nurses Certification Center.

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science

- Incorporate current and emerging health care technologies and informatics into practice
- Demonstrate core competencies in their advanced practice concentration

Nursing, Certificate in (Post-master's certificate) with a concentration in adult-gerontology acute care nurse practitioner

The VCU School of Nursing adult-gerontology acute care nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to manage acutely ill adults, ranging from adolescents to the elderly, through all phases of their hospitalization. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies. Graduates of the AGACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The AGACNP generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

Graduates of the AGACNP concentration are eligible to apply for certification as an AGACNP by the American Nurses Credentialing Center or the American Association of Critical-Care Nurses.

Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

Nursing, Certificate in (Post-master's certificate) with a concentration in family nurse practitioner

The VCU School of Nursing family nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to diagnose and manage common acute and chronic health problems across the lifespan through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The FNP is prepared to provide direct care to individuals and families in a variety of primary care settings, including college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, urgent care and private practices.

Graduates of the FNP concentration are eligible to apply for certification as a FNP by the American Nurses Credentialing Center or the American Academy of Nurse Practitioners.

Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care

3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

| Certificate | Spring or fall | Rolling admissions | |

Note: There are no specific test requirements for this certificate.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without an R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)
6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>.)
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry
8. Submit all official college transcripts from each college attended, including concurrent college enrollment transcripts
9. Have completed three separate comprehensive nursing graduate-level lifespan courses in advanced pathophysiology, advanced health assessment and advanced pharmacology

For international students, the following is required:

1. Submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Services (<https://www.naces.org/>) or the American Association of Collegiate Registrars and Admissions Officers (<https://www.aacrao.org/>)
2. Receive a minimum composite score of 100 for the Internet Based Test or 600 for the paper-based score; or an International English Language Testing System score minimum of 6.5 on the academic exam
3. Receive a passing score on the VCU English Language Program Compression test

Degree requirements

Twenty-one graduate credit hours are required for the post-professional Certificate in Family Nurse Practitioner.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the post-professional certificate must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

Students in nurse practitioner certification certificate programs are required to have completed advanced health assessment, pharmacotherapeutics and pathophysiology courses. A gap analysis is required to determine specific plan of study.

| Course | Title | Hours |
|--------------------|--|-----------|
| NURS 580 | Primary Care of the Adult-Gerontology Population | 4 |
| NURS 589 | Maternal and Child Health in Primary Care | 3 |
| NURS 590 | Complex Problems in Family Primary Care | 4 |
| NURS 595 | Family Primary Care Practicum I | 2 |
| NURS 642 | Family Primary Care Practicum II | 4 |
| NURS 658 | Family Primary Care Practicum III | 4 |
| Total Hours | | 21 |

The minimum total of graduate credit hours required for this certificate is 21.

Nursing, Certificate in (Post-master's certificate) with a concentration in psychiatric-mental health nurse practitioner

The psychiatric-mental health nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills in areas of mental health promotion, as well as mental illness prevention, assessment, diagnosis, treatment and patient education in the care of individuals across the lifespan. Students are exposed to a unique balance of neuroscience, psychological theory and evidence-based practice. Students crystalize their understanding of this content through the use of simulation, interactive case study, discussion board activity, individual and group-based projects, writing assignments, testing and supervised practicum experiences. Informed by a balanced approach to care, students receive focused instruction in both psychotherapy and psychopharmacotherapy.

The PMHNP is prepared to assess, diagnose, treat and educate individuals, families and groups with complex psychiatric-mental health problems and do so with an interprofessional lens of quality and safety. PMHNPs work in clinical settings that include private, state or Veterans Affairs in-patient or outpatient psychiatric facilities, private psychiatric practices, and community mental health centers. PMHNPs also provide services in settings such as correctional facilities, domestic violence shelters, residential substance abuse facilities and schools.

Graduates of the PMHNP concentration are eligible to apply for the Psychiatric and Mental Health Nurse Practitioner certification exam administered by the American Nurses Credentialing Center.

Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements. (p. 32)

Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the School of Nursing website for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/post-masters-certificate/>).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|-------------|-----------------------|--------------------|--------------------|
| Certificate | Spring or fall | Rolling admissions | |

Note: There are no specific test requirements for this certificate.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without an R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools \(http://www.cgfn.org/\)](http://www.cgfn.org/) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
6. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)
7. Submit transcripts and/or syllabi for gap analysis to determine individual plan of study and semester of entry
8. Submit all official college transcripts from each college attended, including concurrent college enrollment transcripts
9. Have completed three separate comprehensive nursing graduate-level lifespan courses in advanced pathophysiology, advanced health assessment and advanced pharmacology

For international students, the following is required:

1. Submit an official transcript evaluation from a recognized foreign educational credentials evaluation service accredited by the National Association of Credential Evaluation Services (<https://www.naces.org/>) or the American Association of Collegiate Registrars and Admissions Officers (<https://www.aacrao.org/>)
2. Receive a minimum composite score of 100 for the Internet Based Test or 600 for the paper-based score; or an International English Language Testing System score minimum of 6.5 on the academic exam
3. Receive a passing score on the VCU English Language Program Compression test

Degree requirements

Twenty-one graduate credit hours are required for the post-professional Certificate in Psychiatric Mental Health Nurse Practitioner.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the post-professional certificate must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for work to be credited toward the degree

3. Earn a minimum grade of B or pass grade in all nursing courses

Nursing, Doctor of Philosophy (Ph.D.) with a concentration in biobehavioral research

The VCU School of Nursing Doctor of philosophy program in nursing prepares scholars to develop knowledge in the discipline of nursing to become teacher-scholars or pioneering researchers committed to the highest ideals of nursing excellence. The program examines knowledge development in nursing through an understanding of the impact of a wide range of historical influences on the discipline and through analysis of how emerging societal issues influence knowledge development. Knowledge in the humanities and social sciences and an understanding of knowledge development in other disciplines is viewed as foundational to a full understanding of knowledge development in nursing. Methodologic competency (i.e., knowledge of research designs,

methodologies and tools) is also essential to a full understanding of the scope, range and path of knowledge development and the relevance to nursing practice.

The online Ph.D. program includes a combination of online courses and on-campus immersions each semester to offer students a dynamic, interactive learning experience that will prepare them to become nurse scholars and scientists. This format is designed to expand the Ph.D. program's reach to a wider range of highly motivated, independent students who aspire to become scholars, make a significant difference in the field of nursing and study with nationally recognized nurse scientists.

During the first year of the B.S. to Ph.D. option, there are some required face-to-face courses.

Student learning outcomes

Graduates will be able to:

1. Synthesize and critically appraise extant knowledge and theory
2. Design, conduct and disseminate theoretically sound research that is relevant, rigorous, culturally competent and consistent with standards of scientific integrity
3. Lead and collaborate in team science to develop knowledge that enhances health in ways that reflect nursing's unique perspective
4. Communicate effectively to the scientific community, policy-makers and the public through appropriate scholarly mechanisms

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--------------------|--------------------|
| Ph.D. | Fall | Rolling admissions | |

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet general admission requirements of the VCU Graduate School (p. 35)
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate and/or a master's degree, one of which must be in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA) (Graduates of international nursing schools and applicants who have studied outside of the U.S. are required to provide a course-by-course external credential evaluation from a VCU-recognized professional evaluator. The professional evaluation may not be older than two years at the time of application.)
5. Have completed a minimum of three credit hours in statistics with a minimum grade of B
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted

(Applicants without an R.N. license in the U.S. should consult with **CGFNS International** and the **Virginia Board of Nursing** (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)

- Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the **VCU International Admissions website** (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>.)
- Complete a personal interview

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the B.S. to Ph.D. program.

Degree requirements

A minimum of 58 graduate credit hours are required for the Ph.D. in Nursing program. Students entering the B.S.-to-Ph.D. option will complete an additional nine credits of course work for a total of 67 credits.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the doctoral degree in nursing must be recommended by the faculty and must:

- Meet academic requirements of the Graduate School
- Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for course work to be credited toward the degree
- Earn a minimum grade of B or pass grade in all nursing courses
- Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
- Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled, all fees to the university have been paid and electronic copies of the dissertation have been submitted. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirement

For students entering with a baccalaureate degree

| Course | Title | Hours |
|---|---|-------|
| Post-baccalaureate entry prerequisites | | |

| Electives | | |
| Select course(s) designed to support the area of study. ¹ | | 3 |
| Dissertation | | |
| NURS 898 | Dissertation | 12 |
| Total Hours | | 58 |

1

Of the six credits of methods courses and three credits of electives, a minimum of three credits must be taken in a discipline other than nursing. Electives must be approved by the student's adviser.

The minimum number of graduate credit hours required for this degree is 58.

Comprehensive examination requirements

The purpose of the comprehensive examination is to test synthesis of foundational knowledge in preparation for launching a program of scholarship as a beginning scientist. Three knowledge domains are critical: a) theory and philosophy, b) qualitative and c) quantitative methodological approaches. The student's area of study is incorporated into these three domains. The comprehensive exam consists of two components, a written and an oral component, both of which must be passed. The oral exam will be conducted with the student either in person or via video conference.

Dissertation requirements

The student must conduct a substantial independent investigation and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. Satisfactory completion of the comprehensive examination and a satisfactory oral defense of the dissertation proposal are required prior to commencement of actual work outlined in the proposal. Once approved, the dissertation proposal is similar to a formal contract between the student and dissertation committee about the nature of the dissertation.

The dissertation committee must consist of a minimum of four members. A member of the graduate faculty of the School of Nursing who has an established program of research and prior experience on dissertation committees must chair a student's dissertation committee. Other committee members must include one faculty member from the student's focus area and one member from outside the School of Nursing. The dissertation committee is approved by the associate dean for academic programs in the School of Nursing. An oral defense of the dissertation is conducted by the student's dissertation committee. The student is responsible for preparing the dissertation in accordance with the most current version of the Graduate School Thesis and Dissertation Manual (<http://graduate.vcu.edu/media/graduate-school/docs/pdf/ThesisandDissertationManualUPDATED5-18-16.pdf>).

Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without an R.N. license in the U.S. should consult with [C \(https://www.cgfns.org/GFNS International\)](https://www.cgfns.org/GFNS_International) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)
8. Complete a personal interview

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the B.S. to Ph.D. programs.

Degree requirements

A minimum of 58 graduate credit hours are required for the Ph.D. in Nursing program. Students entering the B.S.-to-Ph.D. option will complete an additional nine credits of course work for a total of 67 credits.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the doctoral degree in nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within eight calendar years of the first registration for course work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses

- Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
- Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled, all fees to the university have been paid and electronic copies of the dissertation have been submitted. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirement

For students entering with a baccalaureate degree

| Course | Title | Hours |
|--|--|-----------|
| Post-baccalaureate entry prerequisites | | |
| NURS 512 | Foundations for Evidence-based Advanced Practice | 3 |
| NURS 610 | Health Information and Emerging Health Care Technologies | 3 |
| Elective: Select course(s) designed to support the area of study. | | 3 |
| Core courses | | |
| NURS 638 | Health Policy Leadership and Advocacy | 3 |
| NURS 700 | Scientific Integrity: Responsible Conduct of Research | 1 |
| NURS 701 | Statistical Methods for Nursing Research | 3 |
| NURS 702 | Advanced Statistical Concepts for Nursing Research | 3 |
| NURS 703 | Philosophy of Human Sciences | 3 |
| NURS 704 | Analysis and Construction of Theory for Nursing Research | 3 |
| NURS 707 | Scholarly Writing | 3 |
| NURS 725 | Synthesis and Emerging Trends in Scientific Inquiry | 3 |
| NURS 770 | Quantitative Research | 3 |
| NURS 772 | Qualitative Research | 3 |
| NURS 797 | Practicum in Nursing Research | 3 |
| Research methods courses | | |
| Select methods courses from any subject area with adviser approval. ¹ | | 6 |
| Concentration courses | | |
| NURS 731 | Foundations in Health Care Quality Research | 3 |
| NURS 732 | Advanced Concepts in Health Care Quality Research | 3 |
| Electives | | |
| Select course(s) designed to support the area of study. ¹ | | 3 |
| Dissertation | | |
| NURS 898 | Dissertation | 12 |
| Total Hours | | 67 |

¹

Of the six credits of methods courses and three credits of electives, a minimum of three credits must be taken in a discipline other than nursing. Electives must be approved by the student's adviser.

The minimum number of graduate credit hours required for this degree is 67.

For students entering with a master's degree

| Course | Title | Hours |
|--|--|-----------|
| Core courses | | |
| NURS 638 | Health Policy Leadership and Advocacy | 3 |
| NURS 700 | Scientific Integrity: Responsible Conduct of Research | 1 |

| Dissertation | | |
| NURS 898 | Dissertation | 12 |
| Total Hours | | 58 |

¹

Of the six credits of methods courses and three credits of electives, a minimum of three credits must be taken in a discipline other than nursing. Electives must be approved by the student's adviser.

The minimum number of graduate credit hours required for this degree is 58.

Comprehensive examination requirements

The purpose of the comprehensive examination is to test synthesis of foundational knowledge in preparation for launching a program of scholarship as a beginning scientist. Three knowledge domains are critical: a) theory and philosophy, b) qualitative and c) quantitative methodological approaches. The student's area of study is incorporated into these three domains. The comprehensive exam consists of two components, a written and an oral component, both of which must be passed. The oral exam will be conducted with the student either in person or via video conference.

Dissertation requirements

The student must conduct a substantial independent investigation and prepare a dissertation reporting the results of this research and analyzing its significance in relation to existing scientific knowledge. Satisfactory completion of the comprehensive examination and a satisfactory oral defense of the dissertation proposal are required prior to commencement of actual work outlined in the proposal. Once approved, the dissertation proposal is similar to a formal contract between the student and dissertation committee about the nature of the dissertation.

The dissertation committee must consist of a minimum of four members. A member of the graduate faculty of the School of Nursing who has an established program of research and prior experience on dissertation committees must chair a student's dissertation committee. Other committee members must include one faculty member from the student's focus area and one member from outside the School of Nursing. The dissertation committee is approved by the associate dean for academic programs in the School of Nursing. An oral defense of the dissertation is conducted by the student's dissertation committee. The student is responsible for preparing the dissertation in accordance with the most current version of the Graduate School Thesis and Dissertation Manual (<http://graduate.vcu.edu/media/graduate-school/docs/pdf/ThesisandDissertationManualUPDATED5-18-16.pdf>).

Nursing, Master of Science (M.S.) with a concentration in adult-gerontology acute care nurse practitioner

The VCU School of Nursing adult-gerontology acute care nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to manage acutely ill adults, ranging from adolescents to the elderly, through all phases of their hospitalization. Students learn to manage patients through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures, and implementation of evidence-based treatment strategies. Graduates of the AGACNP concentration are prepared to diagnose and manage complex health problems of adults across the life span, including acute/critical illness and injuries, as well as exacerbations of chronic conditions.

The AGACNP generally works in an acute care setting, often within a multidisciplinary team focused on the provision of evidence-based care to adults who are acutely ill. The sphere of influence of the nurse practitioner is that of the patient.

Graduates of the AGACNP concentration are eligible to apply for certification as an AGACNP by the American Nurses Credentialing Center or the American Association of Critical-Care Nurses.

Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy

requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the **School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/masters/>).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--------------------|--------------------|
| M.S. | Fall | Rolling admissions | |

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate (or higher) degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)

5. Have completed a minimum of three credit hours in statistics with a minimum grade of B
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools \(http://www.cgfn.org/\)](http://www.cgfn.org/) and the [Virginia Board of Nursing \(https://www.dhp.virginia.gov/nursing/\)](https://www.dhp.virginia.gov/nursing/) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/\)](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/).)

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the master's program.

Degree requirements

Forty-four graduate credit hours are required for the adult-gerontology acute care nurse practitioner concentration.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses
4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|--|-------|
| Core courses | | |
| NURS 502 | Advanced Pharmacology | 3 |
| NURS 504 | Advanced Pathophysiology | 3 |
| NURS 511 | Advanced Health Assessment | 3 |
| NURS 512 | Foundations for Evidence-based Advanced Practice | 3 |
| NURS 520 | Professional Transitions for the Advanced Practice Nurse | 2 |
| NURS 607 | Epidemiology and Population Health | 3 |
| NURS 638 | Health Policy Leadership and Advocacy | 3 |
| NURS 640 | Teamwork In Complex Clinical Situations | 3 |
| Concentration courses | | |

| | | |
|--------------------|---|-----------|
| NURS 580 | Primary Care of the Adult-Gerontology Population | 4 |
| NURS 581 | Adult-Gerontology Acute Care Practicum I | 2 |
| NURS 619 | Acute and Complex Health Conditions of the Adult-Gerontology Population | 3 |
| NURS 662 | Care of the Adult-Gerontology Population in the Critical Care Setting | 4 |
| NURS 669 | Adult-Gerontology Acute Care Practicum II | 4 |
| NURS 689 | Adult-Gerontology Acute Care Practicum III | 4 |
| Total Hours | | 44 |

The minimum total of graduate credit hours required for this degree is 44.

Nursing, Master of Science (M.S.) with a concentration in family nurse practitioner

The VCU School of Nursing family nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills needed to diagnose and manage common acute and chronic health problems across the lifespan through comprehensive physical and psychosocial assessments, use of decision-making/diagnostic reasoning processes, performance of advanced practice skills and procedures and implementation of evidence-based treatment strategies, including health promotion and disease prevention.

The FNP is prepared to provide direct care to individuals and families in a variety of primary care settings, including college health services, health maintenance organizations, community clinics, long-term care, assisted living, continuing care retirement communities, occupational health settings, urgent care and private practices.

Graduates of the FNP concentration are eligible to apply for certification as a FNP by the American Nurses Credentialing Center or the American Academy of Nurse Practitioners.

Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes

Graduates will be able to:

Nursing, Master of Science (M.S.) with a concentration in nursing leadership and organizational science

The Nursing Leadership and Organizational Science (NLOS) concentration at the VCU School of Nursing equips registered nurses with the knowledge and skills needed to transform the healthcare delivery system and sustain quality health outcomes across populations. NLOS students are educated in leading innovation and change, organization and improvement science, clinical and fiscal operations, system design, quality and safety evaluation, and project management. NLOS courses focus on skills for creating safe, healthy environments that support the work of the health care team, contribute to patient engagement, and improve the patient experience and health outcomes. Students build on core content through elective options in the topic areas of innovation and system management. The skills acquired in the NLOS concentration support a flexible and rewarding career path as they are transferable to a variety of roles and practice settings. An online delivery model is used to deliver course content with a short 1 or 2 day face-to-face component each semester. Students also complete a precepted practicum experience.

Graduates of the NLOS concentration are prepared to succeed as nurse leaders and administrators across all levels of the healthcare system. Graduates are eligible, depending on employment role and work history, to apply for nursing administration certification exams offered through the American Nurses Credentialing Center of the American Nurses Association and the American Organization for Nursing Leadership.

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice

7. Demonstrate core competencies in their advanced practice concentration

Nursing, Master of Science (M.S.) with a concentration in psychiatric-mental health nurse practitioner

The psychiatric-mental health nurse practitioner concentration prepares graduates for advanced practice registered nurse roles by developing the knowledge and skills in areas of mental health promotion, as well as mental illness prevention, assessment, diagnosis, treatment and patient education in the care of individuals across the lifespan. Students are exposed to a unique balance of neuroscience, psychological theory and evidence-based practice. Students crystalize their understanding of this content through the use of simulation, interactive case study, discussion board activity, individual and group-based projects, writing assignments, testing and supervised practicum experiences. Informed by a balanced approach to care, students receive focused instruction in both psychotherapy and psychopharmacotherapy.

The PMHNP is prepared to assess, diagnose, treat and educate individuals, families and groups with complex psychiatric-mental health problems and do so with an interprofessional lens of quality and safety. PMHNPs work in clinical settings that include private, state or Veterans Affairs in-patient or outpatient psychiatric facilities, private psychiatric practices, and community mental health centers. PMHNPs also provide services in settings such as correctional facilities, domestic violence shelters, residential substance abuse facilities and schools.

Graduates of the PMHNP concentration are eligible to apply for the Psychiatric and Mental Health Nurse Practitioner certification exam administered by the American Nurses Credentialing Center.

Program goals

Graduates will achieve advanced nursing practice competencies by demonstrating:

1. Systems and organizational leadership
2. Implementation of advanced nursing practice interventions
3. Effective use of research and technology
4. Systematic evaluation of interventions and outcomes

Student learning outcomes

Graduates will be able to:

1. Synthesize knowledge and theories from nursing and related sciences to improve health outcomes for individuals, populations and systems
2. Integrate prevention and population health concepts into models of care
3. Demonstrate leadership to foster interprofessional collaboration that advances health care practices and influences health policies
4. Integrate evidence and organizational science into practice to enhance outcomes
5. Enhance patient care and safety using quality processes and improvement science
6. Incorporate current and emerging health care technologies and informatics into practice
7. Demonstrate core competencies in their advanced practice concentration

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking

applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Visit the **School of Nursing website** for program-specific application instructions (<http://nursing.vcu.edu/admission/application-instructions/masters/>).

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--------------------|--------------------|
| M.S. | Fall | Rolling admissions | |

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the **general admission requirements of the VCU Graduate School**
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned baccalaureate (or higher) degree in nursing from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
5. Have completed a minimum of three credit hours in statistics with a minimum grade of B
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>).

School of Nursing B.S. graduates who successfully completed the requirements of the VCU Honors College are eligible for guaranteed admission to the master's program.

Degree requirements

Forty-four graduate credit hours are required for the psychiatric-mental health nurse practitioner concentration.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the degree of Master of Science in Nursing must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses

4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work or thesis study

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

| Course | Title | Hours |
|------------------------------|--|-----------|
| Core courses | | |
| NURS 502 | Advanced Pharmacology | 3 |
| NURS 504 | Advanced Pathophysiology | 3 |
| NURS 511 | Advanced Health Assessment | 3 |
| NURS 512 | Foundations for Evidence-based Advanced Practice | 3 |
| NURS 520 | Professional Transitions for the Advanced Practice Nurse | 2 |
| NURS 607 | Epidemiology and Population Health | 3 |
| NURS 638 | Health Policy Leadership and Advocacy | 3 |
| NURS 640 | Teamwork In Complex Clinical Situations | 3 |
| Concentration courses | | |
| NURS 521 | Psychiatric Disorders Across the Lifespan | 4 |
| NURS 522 | Psychopharmacology for Advanced Practice | 3 |
| NURS 597 | Psychiatric Mental Health Practicum I | 2 |
| NURS 598 | Managing Psychiatric Disorders in Special and Vulnerable Populations | 2 |
| NURS 602 | Psychotherapy: Theory and Practice | 2 |
| NURS 641 | Psychiatric Mental Health Practicum II | 4 |
| NURS 659 | Psychiatric Mental Health Practicum III | 4 |
| Total Hours | | 44 |

The minimum total of graduate credit hours required for this degree is 44.

Nursing Practice, Doctor of (D.N.P.)

The D.N.P. program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. Graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for

sustainable best practices in clinical settings and influencing health policy. Building on the university's mission to improve human health, VCU D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

The 39-credit post-master's to D.N.P. pathway is designed to accommodate master's-prepared nurses already established in advanced practice registered nurse or nurse executive positions. The program prepares these nurses to lead change in the clinical setting. The online format with students coming to campus three times per year provides working nurses a flexible option.

Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Demonstrate strategic management skills in systems-based care delivery models and approaches designed to promote quality, safety and excellence in nursing practice
2. Assume a leadership role in the development, implementation and evaluation of health policies that improve quality and safety in health care systems
3. Translate and disseminate evidence-based practices to improve health care outcomes and reduce disparities
4. Integrate professional intra- and interdisciplinary best practices to create collaborative sustainable practice change
5. Integrate knowledge of specialized nursing practice with knowledge from other sciences as the basis for the highest level of nursing practice
6. Lead efforts to preserve, promote and improve the health of specialty populations
7. Use health information technology to promote best practices in health care systems
8. Ensure fiscal accountability when planning practice initiatives that will improve the quality of care delivery
9. Demonstrate advanced levels of ethical and moral judgment and decision-making

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university

must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--------------------|--------------------|
| D.N.P. | Fall or spring | Rolling admissions | |

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants must:

1. Be eligible for readmission or be in good standing at the last college or university attended
2. Meet the general admission requirements of the VCU Graduate School (p. 35)
3. Submit a complete application with all required materials to the School of Nursing
4. Have an earned master's or doctoral degree with a cumulative GPA of 3.0
5. Have an earned nursing degree at the baccalaureate level or above from an accredited nursing school (e.g. ACEN, CCNE, CNEA)
6. Have a current, unrestricted R.N. license from a U.S. state or territory at the time admissions application is submitted (Applicants without a current R.N. license in the U.S. should consult with the [Commission on Graduates of Foreign Nursing Schools](http://www.cgfn.org/) (<http://www.cgfn.org/>) and the [Virginia Board of Nursing](https://www.dhp.virginia.gov/nursing/) (<https://www.dhp.virginia.gov/nursing/>) for the steps needed to obtain a Virginia R.N. license.)
7. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website](https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/) (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/>).
8. Complete a personal interview

Note: Requests for exceptions to the above criteria will be considered on a case-by-case basis.

Degree requirements

A minimum of 39 graduate credit hours are required for the Doctor of Nursing Practice program.

In addition to general VCU Graduate School graduation requirements (p. 32), a candidate for the D.N.P. degree must be recommended by the faculty and must:

1. Meet academic requirements of the Graduate School
2. Complete all requirements for the prescribed curriculum within six calendar years of the first registration for work to be credited toward the degree
3. Earn a minimum grade of B or pass grade in all nursing courses

4. Earn a minimum cumulative grade-point average of 3.0 on a 4.0 scale in all work presented for graduation
5. Conform to School of Nursing policies in respect to pass/fail grading for course work and D.N.P. project

The degree will be granted only after all requirements have been fulfilled and all fees to the university have been paid. Degrees are not granted in absentia unless written request is made to the dean and permission is granted.

Curriculum requirements

| Course | Title | Hours |
|---------------------------------------|--|-----------|
| NURS 605 | Statistical Methods for Quality Improvement | 3 |
| NURS 606 | Evaluating Evidence to Improve Health Outcomes | 3 |
| NURS 607 | Epidemiology and Population Health | 3 |
| NURS 608 | Quality Improvement in Practice | 3 |
| NURS 610 | Health Information and Emerging Health Care Technologies | 3 |
| NURS 621 | Leadership and Organizational Systems | 3 |

| NURS 664 | DNP Residency: Mentored Practicum | 12 |
| NURS 665 | DNP Project I: Proposal Development | 3 |
| Elective chosen with adviser approval | | 3 |
| Total Hours | | 39 |

The minimum total of graduate credit hours required for this degree is 39.

Practice hours/residency requirement

"The Essentials of Doctoral Education for Advanced Nursing Practice" specifies the completion of 1,000 hours of practice post-baccalaureate as part of a supervised academic program. For post-master's D.N.P. programs, each institution is responsible for assessing how many relevant graduate clinical hours a student enters with and how many additional hours are required for the student to achieve the 1,000 clinical hour minimum upon degree completion. These hours are structured into the curriculum via 12 credits of residency courses. At the post-master's D.N.P. level, practice hours focus on developing the skills needed to lead efforts to improve care outcomes rather than direct clinical practice skills, as is the focus at the master's level. Experiences will be varied depending upon the student's abilities in relation to the D.N.P. essential competencies. For example, students may work with the quality improvement team in a particular setting to develop and implement an improvement initiative; they may develop an evidence-based practice guideline for a patient problem; or they may develop a policy change initiative in concert with their professional association. Practice experiences, settings and the focus of residency hours are individualized and developed mutually by the student and faculty adviser. Each residency course has individualized objectives, assignments and products that demonstrate student achievement of specific D.N.P. essential competencies. Qualified preceptors, based on their expertise and experience, will be identified to provide supervision as needed to support particular practice experiences. Students, preceptors and faculty advisers will all contribute to evaluation of student success in meeting the identified objectives developed for each residency course; final evaluation of all residency requirements is the responsibility of the faculty adviser for the course. Residency courses are graded on a pass-fail basis.

The school has identified criteria that will trigger an adviser's decision to travel to the site for direct observation, such as preceptor concerns regarding student performance or unsatisfactory communications with student or preceptor that cannot be resolved by telephone or video conference. The completed assignments from each residency course culminate in a professional portfolio that demonstrates achievement of all residency course objectives by the completion of the 12 required residency credits.

Project requirements

The D.N.P. program culminates in the successful completion of a scholarly work called the D.N.P. project. In collaboration with faculty and their project team, students design, implement and evaluate a quality/safety project that is focused in their specialized clinical area. The final product is a scholarly manuscript describing the project that is suitable for publication in a professional journal. The project teams consist of doctorally prepared content experts, one of whom must be from the practice site, and select faculty. The curriculum is designed so that students begin planning their D.N.P. project during initial course work and complete the project in their final semester of study. Dissemination of the D.N.P. project findings occur during the final semester as part of the course work.

Program website: nursing.vcu.edu/programs/dnp (<http://www.nursing.vcu.edu/programs/dnp/>)

Nursing Practice, Doctor of (D.N.P.) with a concentration in adult-gerontology acute care nurse practitioner

The D.N.P. program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. Graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for sustainable best practices in clinical settings and influencing health policy. Building on the university's mission to improve human health, VCU D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

The 66-credit hour B.S. to D.N.P. pathway will prepare students to apply the knowledge and skills acquired in the program to health care settings. Those students who pursue the program's nurse practitioner concentrations will possess the knowledge and skills to serve as certified nurse practitioners in health care settings. The purpose of the adult-gerontology nurse practitioner concentration is to prepare students with the knowledge and skills for clinical practice to provide direct acute care to the entire spectrum of adults, including young adults, adults and older

adults. The focus of the course work is on the care of adult patients who are characterized as physiologically unstable, technologically dependent and/or are highly vulnerable to complications.

Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Synthesize knowledge from nursing and other sciences to lead efforts to promote health and improve outcomes of individuals, populations and systems
2. Demonstrate integration of population health concepts in systems-based care delivery models designed to promote quality, safety and excellence in advanced nursing practice
3. Lead the development, implementation and evaluation of policy initiatives to improve quality and safety in health care systems
4. Translate and disseminate evidence-based practices toward improving health care outcomes and reducing disparities
5. Lead innovative approaches in the application of health information technology that supports delivery and evaluation of patient-centered care
6. Apply principles of ethical and moral reasoning in advanced practice roles to lead to sustainable change in health care
7. Demonstrate advanced levels of clinical and ethical judgement, systems thinking and accountability in designing, delivering and evaluating evidence-based care to improve patient outcomes

Concentration-specific outcomes for adult-gerontology acute care

Students who select this concentration will be able to meet the following outcomes:

1. Perform assessment, diagnosis and management of young adults, adults and older adults who are physiologically unstable, technologically dependent and/or are highly vulnerable to complications
2. Synthesize knowledge from advanced practice nursing and related sciences to successfully complete a clinical practicum in an acute care setting with adult and gerontology patients

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university

must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--------------------|--------------------|
| D.N.P. | Fall or spring | Rolling admissions | |

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants must:

1. Meet the general admission requirements of the VCU Graduate School (p. 35)
2. Submit all official college transcripts from each college attended, including concurrent college enrollment transcripts
3. Be eligible for readmission or be in good standing at the last college or university attended
4. Be a baccalaureate (or higher) graduate of an accredited (ACEN, CCNE or CNEA) nursing program
5. Have a current unrestricted R.N. license or authorization to practice as an R.N. in the U.S.
6. Submit three academic and/or professional references
7. Write a personal statement
8. Submit a resume/CV
9. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/graduate-applicants/#tabs-193125\)](https://www.vcu.edu/admissions/apply/international/graduate-applicants/#tabs-193125).)

Note: Requests for exceptions to the above criteria will be considered on a case-by-case basis.

In accordance with VCU's Graduate School policy, a maximum of 50 percent of the didactic hours required for a graduate degree or any graduate certificate program may be transferred from another institution and, if not applied previously toward another degree, may be applied toward a degree. Prerequisite course work that does not count toward the VCU degree may not be transferred.

Degree requirements

The post-bachelor's pathway to the D.N.P. is a 66-credit-hour degree program that requires no thesis. The focus of the program is quality and safety in advanced practice nursing. The curriculum prepares advanced practice registered nurses with a terminal clinical practice doctorate that focuses on improving quality and safety outcomes. This is a direct clinical care concentration that prepares graduates to become certified in the specialty of adult-gerontology acute care nurse practitioner. Course work culminates in the successful completion of a D.N.P. project focusing on a quality or patient safety issue in the student's specific patient population or area of focus.

The purpose of the adult-gerontology nurse practitioner concentration is to prepare students with the knowledge and skills for clinical practice to provide direct acute care to the entire spectrum of adults, including young adults, adults and older adults. The focus of the course work is on the care of adult patients who are characterized as physiologically unstable, technologically dependent and/or highly vulnerable to complications.

Curriculum requirements

| Course | Title | Hours |
|---|--|-----------|
| Core courses | | |

| NURS 669 | Adult-Gerontology Acute Care Practicum II | 4 |
| NURS 689 | Adult-Gerontology Acute Care Practicum III | 4 |
| Total Hours | | 66 |

The minimum total of graduate credit hours required for this degree is 66.

Practice hours/residency requirement

National accreditation requirements stipulate the completion of a minimum of 1,000 clinical hours for students in the post-bachelor's pathway. These 1,000 hours are divided into two major foci: direct patient care clinical hours and residency hours. The program will include 600 direct patient care clinical hours. During this clinical component of the program, students will focus on their role as a care provider, which includes the diagnosis and management of patients appropriate to their concentration. Each clinical course has objectives, assignments and products that demonstrate student achievement of advanced practice patient care competencies. In order to achieve the D.N.P. essential competencies, students will then complete an additional 400 hours that

focus on developing the skills needed to lead efforts to improve care outcomes in populations of patients.

D.N.P. program clinical experiences are developed to assist the students achieve the D.N.P. essential competencies. For example, students may work with the quality improvement team in a particular setting to develop and implement an improvement initiative; they may develop an evidence-based practice guideline for a patient problem; or they may develop a policy change initiative in concert with their professional association. The practice experiences, settings and focus of residency hours are individualized and developed mutually by the student and the faculty adviser. Each residency course has individualized objectives, assignments and products that demonstrate student achievement of specific D.N.P. essential competencies. Qualified preceptors, based on their expertise and experience, will be identified to provide supervision as needed to support particular practice experiences. Preceptors and faculty advisers will all contribute to evaluation of student success in meeting the identified objectives developed for each clinical and residency course.

Final evaluation of clinical courses is the responsibility of the clinical faculty for the course. Final evaluation of all residency requirements is the responsibility of the faculty for the course. Residency and clinical courses are graded on a pass-fail basis. The completed assignments from clinical and residency courses culminate in a professional e-portfolio that demonstrates achievement of all course objectives, student learning outcomes and the D.N.P. essentials.

Project requirements

The D.N.P. program culminates in the successful completion of a scholarly work — the D.N.P. project. In collaboration with faculty and their project team, students design, implement and evaluate a quality/safety project that is focused in their specialized clinical area. The final product is a scholarly manuscript describing the project that is suitable for publication in a professional journal. The project teams consist of doctorally prepared content experts, one of whom must be from the practice site, and select faculty. The curriculum is designed so that students begin planning their D.N.P. project during initial course work and complete the project in their final semester of study. Dissemination of the D.N.P. project findings occur during the final semester as part of the course work.

Nursing Practice, Doctor of (D.N.P.) with a concentration in family nurse practitioner

The D.N.P. program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. Graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for sustainable best practices in clinical settings and influencing health policy. Building on the university's mission to improve human health, VCU

D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

The 66-credit hour B.S. to D.N.P. pathway will prepare students to apply the knowledge and skills acquired in the program to health care settings. Those students who pursue the program's nurse practitioner concentrations will possess the knowledge and skills to serve as certified nurse practitioners in health care settings. The purpose of the family nurse practitioner concentration is to prepare students with knowledge and skills to provide primary care services including wellness/preventive, episodic and chronic care to children, adolescents, adults, pregnant and postpartum women and older adults. The focus of the courses is on episodic, comprehensive, chronic and continuous care characterized by a long-term relationship between the patient and the FNP.

Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Synthesize knowledge from nursing and other sciences to lead efforts to promote health and improve outcomes of individuals, populations and systems
2. Demonstrate integration of population health concepts in systems-based care delivery models designed to promote quality, safety and excellence in advanced nursing practice
3. Lead the development, implementation and evaluation of policy initiatives to improve quality and safety in health care systems
4. Translate and disseminate evidence-based practices toward improving health care outcomes and reducing disparities
5. Lead innovative approaches in the application of health information technology that supports delivery and evaluation of patient-centered care
6. Apply principles of ethical and moral reasoning in advanced practice roles to lead to sustainable change in health care
7. Demonstrate advanced levels of clinical and ethical judgement, systems thinking and accountability in designing, delivering and evaluating evidence-based care to improve patient outcomes

Concentration-specific outcomes for family nurse practitioner

Students who select this concentration will be able to meet the following outcomes:

1. Perform primary care assessment, diagnosis and management including wellness/preventive, episodic and chronic care of children,

adolescents, adults, pregnant and postpartum women, and older adults

2. Synthesize knowledge from advanced practice nursing and related sciences to successfully complete a clinical practicum in primary care across the life span (children to gerontology patients and their families)

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the academic regulations section for additional information on graduation requirements.

Other information

VCU School of Nursing Student Policy and Information handbooks (<http://nursing.vcu.edu/about-us/resources/>) are located on the school's website.

Our international and non-native English-speaking students bring different perspectives and new thinking to our nursing programs. To ensure that all incoming student are prepared for the school's academic rigor, all international applicants and non-native English speaking applicants without a degree from a U.S. high school, college or university must provide additional information with their applications according to the English language proficiency guidelines on the program admission tab.

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--------------------|--------------------|
| D.N.P. | Fall or spring | Rolling admissions | |

Note: No admissions test is required for this program.

To be considered for admission to the School of Nursing, applicants must:

1. Meet the general admission requirements of the VCU Graduate School (p. 35)
2. Submit all official college transcripts from each college attended, including concurrent college enrollment transcripts
3. Be eligible for readmission or be in good standing at the last college or university attended
4. Be a baccalaureate (or higher) graduate of an accredited (ACEN, CCNE or CNEA) nursing program
5. Have a current unrestricted R.N. license or authorization to practice as an R.N. in the U.S.
6. Submit three academic and/or professional references
7. Write a personal statement
8. Submit a resume/CV
9. Provide additional information with the application according to the English language proficiency guidelines for applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university (Additional information can be found on the 'Required materials' tab of the [VCU International Admissions website \(https://www.vcu.edu/admissions/apply/international/graduate-applicants/#tabs-193125\)](https://www.vcu.edu/admissions/apply/international/graduate-applicants/#tabs-193125).)

Note: Requests for exceptions to the above criteria will be considered on a case-by-case basis.

In accordance with VCU's Graduate School policy, a maximum of 50 percent of the didactic hours required for a graduate degree or any graduate certificate program may be transferred from another institution and, if not applied previously toward another degree, may be applied toward a degree. Prerequisite course work that does not count toward the VCU degree may not be transferred.

Degree requirements

The post-bachelor's pathway to the D.N.P. is a 66-credit-hour degree program that requires no thesis. The focus of the program is quality and safety in advanced practice nursing. The curriculum prepares advanced practice registered nurses with a terminal clinical practice doctorate that focuses on improving quality and safety outcomes. This is a direct clinical care concentration that prepares graduates to become certified in the specialty of family nurse practitioner. Course work culminates in the successful completion of a D.N.P. project focusing on a quality or patient safety issue in the student's specific patient population or area of focus.

The purpose of the family nurse practitioner concentration is to prepare students with knowledge and skills to provide primary care services including wellness/preventive, episodic and chronic care to children, adolescents, adults, pregnant and postpartum women and older adults. The focus of the courses is on episodic, comprehensive, chronic and continuous care characterized by a long-term relationship between the patient and the family nurse practitioner.

Curriculum requirements

| Course | Title | Hours |
|---|--|-----------|
| Core courses | | |
| NURS 605 | Statistical Methods for Quality Improvement | 3 |
| NURS 606 | Evaluating Evidence to Improve Health Outcomes | 3 |
| NURS 607 | Epidemiology and Population Health | 3 |
| NURS 608 | Quality Improvement in Practice | 3 |
| NURS 610 | Health Information and Emerging Health Care Technologies | 3 |
| NURS 621 | Leadership and Organizational Systems | 3 |
| NURS 638 | Health Policy Leadership and Advocacy | 3 |
| NURS 664 | DNP Residency: Mentored Practicum (variable credit course repeated for 12 credits) | 12 |
| NURS 665 | DNP Project I: Proposal Development | 3 |
| Direct care concentration core courses | | |
| NURS 502 | Advanced Pharmacology | 3 |
| NURS 504 | Advanced Pathophysiology | 3 |
| NURS 511 | Advanced Health Assessment | 3 |
| Concentration courses | | |
| NURS 580 | Primary Care of the Adult-Gerontology Population | 4 |
| NURS 589 | Maternal and Child Health in Primary Care | 3 |
| NURS 590 | Complex Problems in Family Primary Care | 4 |
| NURS 595 | Family Primary Care Practicum I | 2 |
| NURS 642 | Family Primary Care Practicum II | 4 |
| NURS 658 | Family Primary Care Practicum III | 4 |
| Total Hours | | 66 |

The minimum total of graduate credit hours required for this degree is 66.

Practice hours/residency requirement

National accreditation requirements stipulate the completion of a minimum of 1,000 clinical hours for students in the post-bachelor's

pathway. These 1,000 hours are divided into two major foci: direct patient care clinical hours and residency hours. The program will include 600 direct patient care clinical hours. During this clinical component of the program, students will focus on their role as a care provider, which includes the diagnosis and management of patients appropriate to their concentration. Each clinical course has objectives, assignments and products that demonstrate student achievement of advanced practice patient care competencies. In order to achieve the D.N.P. essential competencies, students will then complete an additional 400 hours that focus on developing the skills needed to lead efforts to improve care outcomes in populations of patients.

D.N.P. program clinical experiences are developed to assist the students achieve the D.N.P. essential competencies. For example, students may work with the quality improvement team in a particular setting to develop and implement an improvement initiative; they may develop an evidence-based practice guideline for a patient problem; or they may develop a policy change initiative in concert with their professional association. The practice experiences, settings and focus of residency hours are individualized and developed mutually by the student and the faculty adviser. Each residency course has individualized objectives, assignments and products that demonstrate student achievement of specific D.N.P. essential competencies. Qualified preceptors, based on their expertise and experience, will be identified to provide supervision as needed to support particular practice experiences. Preceptors and faculty advisers will all contribute to evaluation of student success in meeting the identified objectives developed for each clinical and residency course.

Final evaluation of clinical courses is the responsibility of the clinical faculty for the course. Final evaluation of all residency requirements is the responsibility of the faculty for the course. Residency and clinical courses are graded on a pass-fail basis. The completed assignments from clinical and residency courses culminate in a professional e-portfolio that demonstrates achievement of all course objectives, student learning outcomes and the D.N.P. essentials.

Project requirements

The D.N.P. program culminates in the successful completion of a scholarly work – the D.N.P. project. In collaboration with faculty and their project team, students design, implement and evaluate a quality/safety project that is focused in their specialized clinical area. The final product is a scholarly manuscript describing the project that is suitable for publication in a professional journal. The project teams consist of doctorally prepared content experts, one of whom must be from the practice site, and select faculty. The curriculum is designed so that students begin planning their D.N.P. project during initial course work and complete the project in their final semester of study. Dissemination of the D.N.P. project findings occur during the final semester as part of the course work.

Nursing Practice, Doctor of (D.N.P.) with a concentration in nursing leadership and organizational science

The D.N.P. program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. Graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for sustainable best practices in clinical settings and influencing health policy. Building on the university's mission to improve human health, VCU D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

The 62-credit hour B.S. to D.N.P. pathway offers a concentration in nursing leadership and organizational science, which will prepare students to serve in administrative nurse leader roles in a variety of health care settings. The purpose of the nursing leadership and organizational science concentration is to prepare nurses for leadership and management roles in health care settings. The courses for the concentration focus on financial management, human resource management, performance improvement and leadership at the unit or organizational level. Course work will provide students with the skills for creating safe, healthy environments that support the work of the health care team, contribute to patient engagement, improve the patient experience and improve patient outcomes.

Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Synthesize knowledge from nursing and other sciences to lead efforts to promote health and improve outcomes of individuals, populations and systems
2. Demonstrate integration of population health concepts in systems-based care delivery models designed to promote quality, safety and excellence in advanced nursing practice
3. Lead the development, implementation and evaluation of policy initiatives to improve quality and safety in health care systems
4. Translate and disseminate evidence-based practices toward improving health care outcomes and reducing disparities
5. Lead innovative approaches in the application of health information technology that supports delivery and evaluation of patient-centered care

6. Apply principles of ethical and moral reasoning in advanced practice roles to lead to sustainable change in health care
7. Demonstrate advanced levels of clinical and ethical judgement, systems thinking and accountability in designing, delivering and evaluating evidence-based care to improve patient outcomes

Concentration-specific outcomes for nursing leadership and organizational science

Students who chose this concentration will not directly serve individuals or populations. Students will serve organizations. Students who select this concentration will be able to meet the following outcomes:

1. Provide leadership, oversight and management of a unit, organization or health system to optimize operations and improve care and outcomes
2. Work within a collaborative and interprofessional environment to influence improvement in the patient experience of care (including quality and satisfaction), improving the health of populations and reducing the per-capita cost of health care

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. Nursing Practice, Doctor of (D.N.P.) with a concentration in psychiatric mental health nurse practitioner

The D.N.P. program is strongly positioned to prepare students to improve the quality of health care delivery and patient outcomes. Graduates of the D.N.P. program at VCU will be prepared to improve health care delivery by critically appraising scientific evidence to inform practice, sharing clinical expertise in collaborative and dynamic environments, leading interprofessional teams, providing systems leadership for sustainable best practices in clinical settings and influencing health policy. Building on the university's mission to improve human health, VCU D.N.P. graduates will translate evidence that leads to sustainable practice change for improved patient quality and safety outcomes.

The 66-credit hour B.S. to D.N.P. pathway will prepare students to apply the knowledge and skills acquired in the program to health care settings. Those students who pursue the program's nurse practitioner concentrations will possess the knowledge and skills to serve as certified nurse practitioners in health care settings. The purpose of the psychiatric mental health nurse practitioner concentration is to prepare students with knowledge and skills to provide primary mental health care to individuals, families or populations across the life span in a wide range of settings. The focus of the courses is assessment, diagnosis and management of mental health problems including the promotion of optimal mental health as well as prevention and treatment of psychiatric disorders.

Program goals

Students will achieve D.N.P.-level competencies by demonstrating:

1. Use of quality and safety outcomes to evaluate practice improvement initiatives
2. Skills in using evidence-based practice to achieve sustainable practice change
3. Advanced decision-making skills founded in ethics and the highest level of nursing practice
4. Leadership strategies to influence health policies
5. Interprofessional collaboration in health care systems

Student learning outcomes

At the completion of the D.N.P. program, students will have the knowledge and skills to:

1. Synthesize knowledge from nursing and other sciences to lead efforts to promote health and improve outcomes of individuals, populations and systems

2. Demonstrate integration of population health concepts in systems-based care delivery models designed to promote quality, safety and excellence in advanced nursing practice
3. Lead the development, implementation and evaluation of policy initiatives to improve quality and safety in health care systems
4. Translate and disseminate evidence-based practices toward improving health care outcomes and reducing disparities
5. Lead innovative approaches in the application of health information technology that supports delivery and evaluation of patient-centered care
6. Apply principles of ethical and moral reasoning in advanced practice roles to lead to sustainable change in health care
7. Demonstrate advanced levels of clinical and ethical judgement, systems thinking and accountability in designing, delivering and evaluating evidence-based care to improve patient outcomes

Concentration-specific outcomes for psychiatric-mental health nurse practitioner

Students who select this concentration will be able to meet the following outcomes:

1. Perform mental health assessment, diagnosis and management of mental health problems and psychiatric disorders for individuals and families
2. Synthesize knowledge and theories from advanced practice nursing and related sciences to complete a clinical practicum in psychiatric-mental health care with patients across the lifespan

Course work culminates in the successful completion of a D.N.P. project focusing on a quality or patient safety issue in the student's specific patient population or area of focus.

The purpose of the psychiatric-mental health nurse practitioner concentration is to prepare students with knowledge and skills to provide primary mental health care to individuals, families or populations across the lifespan in a wide range of settings. The focus of the courses is assessment, diagnosis and management of mental health problems, including the promotion of optimal mental health and prevention and treatment of psychiatric disorders.

Curriculum requirements

| Course | Title | Hours |
|---|--|-------|
| Core courses | | |
| NURS 605 | Statistical Methods for Quality Improvement | 3 |
| NURS 606 | Evaluating Evidence to Improve Health Outcomes | 3 |
| NURS 607 | Epidemiology and Population Health | 3 |
| NURS 608 | Quality Improvement in Practice | 3 |
| NURS 610 | Health Information and Emerging Health Care Technologies | 3 |
| NURS 621 | Leadership and Organizational Systems | 3 |
| NURS 638 | Health Policy Leadership and Advocacy | 3 |
| NURS 664 | DNP Residency: Mentored Practicum (variable credit course repeated for 12 credits) | 12 |
| NURS 665 | DNP Project I: Proposal Development | 3 |
| Direct care concentration core courses | | |
| NURS 502 | Advanced Pharmacology | 3 |

| | | |
|------------------------------|--|-----------|
| NURS 504 | Advanced Pathophysiology | 3 |
| NURS 511 | Advanced Health Assessment | 3 |
| Concentration courses | | |
| NURS 521 | Psychiatric Disorders Across the Lifespan | 4 |
| NURS 522 | Psychopharmacology for Advanced Practice | 3 |
| NURS 597 | Psychiatric Mental Health Practicum I | 2 |
| NURS 598 | Managing Psychiatric Disorders in Special and Vulnerable Populations | 2 |
| NURS 602 | Psychotherapy: Theory and Practice | 2 |
| NURS 641 | Psychiatric Mental Health Practicum II | 4 |
| NURS 659 | Psychiatric Mental Health Practicum III | 4 |
| Total Hours | | 66 |

The minimum total of graduate credit hours required for this degree is 66.

Practice hours/residency requirement

National accreditation requirements stipulate the completion of a minimum of 1,000 clinical hours for students in the post-bachelor's pathway. These 1,000 hours are divided into two major foci: direct patient care clinical hours and residency hours. The program will include 600 direct patient care clinical hours. During this clinical component of the program, students will focus on their role as a care provider, which includes the diagnosis and management of patients appropriate to their concentration. Each clinical course has objectives, assignments and products that demonstrate student achievement of advanced practice patient care competencies. In order to achieve the D.N.P. essential competencies, students will then complete an additional 400 hours that focus on developing the skills needed to lead efforts to improve care outcomes in populations of patients.

D.N.P. program clinical experiences are developed to assist the students achieve the D.N.P. essential competencies. For example, students may work with the quality improvement team in a particular setting to develop and implement an improvement initiative; they may develop an evidence-based practice guideline for a patient problem; or they may develop a policy change initiative in concert with their professional association. The practice experiences, settings and focus of residency hours are individualized and developed mutually by the student and the faculty adviser. Each residency course has individualized objectives, assignments and products that demonstrate student achievement of specific D.N.P. essential competencies. Qualified preceptors, based on their expertise and experience, will be identified to provide supervision as needed to support particular practice experiences. Preceptors and faculty advisers will all contribute to evaluation of student success in meeting the identified objectives developed for each clinical and residency course.

Final evaluation of clinical courses is the responsibility of the clinical faculty for the course. Final evaluation of all residency requirements is the responsibility of the faculty for the course. Residency and clinical courses are graded on a pass-fail basis. The completed assignments from clinical and residency courses culminate in a professional e-portfolio that demonstrates achievement of all course objectives, student learning outcomes and the D.N.P. essentials.

Project requirements

The D.N.P. program culminates in the successful completion of a scholarly work – the D.N.P. project. In collaboration with faculty and their project team, students design, implement and evaluate a quality/

safety project that is focused in their specialized clinical area. The final product is a scholarly manuscript describing the project that is suitable for publication in a professional journal. The project teams consist of doctorally prepared content experts, one of whom must be from the practice site, and select faculty. The curriculum is designed so that students begin planning their D.N.P. project during initial course work and complete the project in their final semester of study. Dissemination of the D.N.P. project findings occur during the final semester as part of the course work.

SCHOOL OF PHARMACY

The School of Pharmacy was established officially in 1898; the University College of Medicine had a school of pharmacy when it opened in 1893. The two-year curriculum gave way to a three-year program in 1925, and in 1932 the school required four years of college work and a Bachelor of Science degree was awarded. In 1960, the program lengthened to a five-year course leading to a Bachelor of Science in Pharmacy degree. In 1975 authority was granted to offer the Doctor of Pharmacy degree, which was initially offered to a small number of students who already completed four or five years of the B.S. program. A six-year program leading to the Doctor of Pharmacy degree was adopted as the only professional offering by the school in 1995. The School of Pharmacy currently enrolls students in a four-year professional Doctor of Pharmacy program curriculum following completion of at least 52 credits of pre-professional studies taken at VCU or elsewhere. The Doctor of Pharmacy degree program includes classroom instruction, practice laboratory instruction, as well as introductory and advanced pharmacy practice experiences.

The authority to award graduate degrees in the pharmaceutical sciences was granted by the Graduate Council in 1952. Departments in the school have the responsibility for administering a graduate program leading to the M.S. and Ph.D. in Pharmaceutical Sciences. This program includes areas of specialization in medicinal chemistry, pharmaceuticals, pharmacotherapy and pharmacy administration. In 2020, the School of Pharmacy in partnership with the College of Engineering first initiated a Ph.D. degree in pharmaceutical engineering. These programs provide the preparation and research experience for academic, governmental and industrial careers. Graduate degrees in pharmaceutical sciences do not provide eligibility for licensure as a pharmacist.

Statement of purpose

The School of Pharmacy at VCU exists to provide exceptional programs benefiting the commonwealth of Virginia and society by offering the highest quality education and training for the development of health care practitioners, scientists, professional leaders and responsible citizens. These individuals are committed to shaping the health care world of tomorrow while serving society's health care needs today.

Mission statement

Mission

To achieve excellence in professional and graduate programs through innovative education and leading-edge research. We will achieve our mission by graduating outstanding future pharmacists and scientists who will improve human health, foster exemplary research and provide sustaining contributions to interprofessional patient care.

Vision

A transformational leader in pharmacy education, clinical practice and clinical and pharmaceutical research.

Core values

- Innovation**
We encourage innovations and ideas that enhance the school's mission.
- Personal growth**
We pursue professional growth and personal development that drives excellence.
- Integrity and respect**
We demonstrate ethical behaviors, personal responsibility and respect for others.
- Collaboration**
We embrace interprofessional and interdisciplinary collaboration in patient care, teaching, learning and research.
- Inclusive excellence**
We promote an environment of engagement and inclusion that values the diversity and contributions of our students, staff, faculty and administrators.

Philosophy

The School of Pharmacy has committed to developing progressive models of pharmacy practice while maintaining the foundational pharmaceutical sciences. In developing the curriculum of the school, the faculty recognizes that an educated person should be prepared to assume a responsible and rewarding role in society. The new paradigm of patient-centered, team-based care guides the school's curriculum committee and faculty in the design and implementation of the Doctor

of Pharmacy curriculum. The curriculum is designed to provide a sound, scientific and professional background for both those who will enter the practice of pharmacy directly and those who wish to continue graduate education in the pharmaceutical sciences. It also includes courses in the arts and humanities in order to provide students with a broad educational base that will permit participation in community life, not only as a professional, but also as an informed, concerned citizen. The professional curriculum is rigorous and highly demanding of the student's time. The faculty has adopted educational outcomes for the curriculum that describe the knowledge, skills, behaviors, abilities and attitudes that promote holistic patient well-being expected of graduates to deliver the highest quality of direct patient care as an interprofessional team member.

Facilities

The School of Pharmacy is located in the Robert Blackwell Smith Building at 12th and East Clay streets. This building — named in honor of a distinguished former dean of pharmacy, former president of the Medical College of Virginia and former provost of the MCV Campus — was completed in 1984 with the help of contributions from many alumni and friends of the School of Pharmacy. Additional classrooms, offices and laboratories are located in McGuire Hall and the Virginia BioTechnology Research Park, both located within a few blocks of the Smith Building. The Smith Building Lobby houses the school's Heritage Trail that displays VCU's, MCV's and the school's history, as well as the history of pharmacy in Virginia.

Classes for students in pharmacy also are conducted in Sanger Hall, located between 11th and 12th streets on East Marshall Street, and McGuire Hall, located at the corner of 12th and Clay streets. In conjunction with VCU Health, students receive clinical experience in the hospitals and clinics on the MCV Campus. Other facilities available for teaching include area hospitals and pharmacies. The major library holdings are in the Tompkins-McCaw Library for the Health Sciences at 12th and East Clay streets.

Location in a major health sciences center provides excellent opportunities for interdisciplinary research and access to clinical facilities. The school is well equipped for graduate research and provides leadership to the VCU Institute for Structural Biology, Drug Discovery and Development at the Virginia BioTechnology Research Park. The school also supports the Center for Compounding Practice and Research, the Center for Biomarker Research and Precision Medicine, and the Center for Pharmacy Practice Innovation.

Pharmaceutical Engineering, Doctor of Philosophy (Ph.D.) [School of Pharmacy]

The Ph.D. in Pharmaceutical Engineering will prepare students to respond to current, emerging and future challenges in the discovery, development and production of pharmaceutical products. The program will prepare talent and leaders who can pursue careers in industry and regulatory and nonprofit agencies, as well as academic settings that deal with drug products. Students will engage in a rigorous and cross-disciplinary educational experience that includes foundational and research-area-specific course work; be empowered with the necessary tools to formulate and answer hypotheses-driven research questions in collaboration with mentors that have special expertise; engage in professional development opportunities to effectively promote and

disseminate their work; and be immersed in a research and innovation environment of excellence.

Graduates will gain the necessary skills and scientific foundation to work in a team-based environment, seek entrepreneurial solutions, and effectively communicate concepts and results. The program will prepare students to work and innovate in areas that create medicines to improve human health including the pharmaceutical industry, medical nonprofits, universities and regulatory authorities.

Student learning outcomes

- Students will demonstrate the knowledge and understanding of core concepts and processes necessary for developing pharmaceutical drug products.
- Students will be able to identify and solve problems in health care that are relevant to pharmaceutical engineering.
- Students will be able to develop entrepreneurial approaches to pharmaceutical engineering that may lead to innovation in the health care field.
- Students will be able to demonstrate the ability to carry out independent and collaborative work.
- Students will be able to communicate scientific knowledge and discoveries.
- Students will be able to demonstrate the ability to teach and mentor.
- Students will be able to demonstrate the ability to plan and execute research projects.
- Students will be able to demonstrate that they understand and will participate in community engagement/outreach.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the **Graduate School website** and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students.

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the [academic regulations section](#) for additional information on degree candidacy requirements.

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the [academic regulations section](#) for additional information on graduation requirements.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|---|
| Ph.D. | Fall | May 15 | TOEFL or IELTS scores for non-native English speakers |

In addition to the general admission requirements of the VCU Graduate School (p. 35), the following are also required:

- Applicants must have graduated with a bachelor's degree or master's degree (or equivalent professional program) from an accredited college or university, with a degree in a discipline that provides an appropriate background for graduate-level study in pharmaceutical engineering, including but not limited to pharmacy, (bio)chemistry, bioengineering, chemical engineering, materials science, mechanical engineering, biomedical engineering and molecular biology.
- International applicants for whom English is not their native language must demonstrate language competency by achieving a minimum 100 points in TOEFL (BT). A bachelor's or graduate degree from an accredited U.S. institution along with an interview from a faculty member will be accepted in lieu of such an examination.
- Applicants must present a current resume or curriculum vita.
- Applicants must present transcripts (translated and validated if from abroad) from their bachelor's degree program and from any/all graduate programs the candidate may have attended.

Note: The GRE is not required but students are encouraged to submit their scores as additional evidence of their qualifications. Competitive scores are greater than 300 for combined Quantitative and Verbal and 4.0 Analytical score. The GRE cannot be used in place of other admissions requirements.

Transfer credits will be allowed. Students with an advanced degree (M.S. or equivalent professional program) from an accredited college or university, with a degree in a discipline related to pharmaceutical engineering, including but not limited to pharmacy, chemistry, bioengineering, chemical engineering, materials science, mechanical engineering, biomedical engineering and molecular biology, may petition

to transfer up to nine credits of elective courses. If the students have produced a thesis during their advanced studies, they may be eligible to transfer another nine credits of research.

Curriculum requirements

The degree program has three entry points:

- B.S. entry point that will require a minimum of 83 credits to graduate
- M.S. without a thesis entry point that will require a minimum of 74 credits to graduate
- M.S. with a thesis entry point that will require a minimum of 63 credits to graduate

Regardless of the credits to degree, all students must satisfy common curriculum elements, including 12 credits of core courses. All of the courses in the curriculum ensure that students receive the necessary didactic instruction that will enable them to excel in the development of cutting-edge research in pharmaceutical engineering. The curriculum is highly flexible and consists of a combination of core courses, research area elective courses, electives and directed research. Students will develop a dissertation under the supervision of a faculty member, thus offering another opportunity for students to delve into a specific area while at the same time developing professional skills.

Curriculum for students entering with a B.S. degree

| Course | Title | Hours |
|---|---|-----------|
| Core courses | | |
| OVPR 601 | Scientific Integrity | 1 |
| PESC 605 | Advanced Topics in Pharmaceutical Engineering I | 3 |

Degree requirements

Research adviser

Qualified students will be admitted to the Ph.D. program in pharmaceutical engineering upon selection by a pharmaceutical engineering graduate faculty member who is willing to serve as their major research adviser. In the event of admission without an adviser assignment, students will meet with all eligible graduate faculty and

then select an adviser by the end of the first semester. The adviser is responsible for providing the student guidance and counsel essential to scholarly development. The dissertation project will be designed by the student in consultation with the adviser. The student will be responsible for conducting research and promoting the work through peer-reviewed publications and presentations.

The graduate student advisory committee

An advisory committee will be appointed shortly after (within the first year of study) the adviser has been selected and approved. The advisory committee serves as both an examining and consultative body. Together the adviser and the student will select the advisory committee members, which will need to be approved by the pharmaceutical engineering program directors. The advisory committee will consist of at least three graduate faculty members besides the adviser. The faculty members will have expertise in areas related to the student's dissertation work. One of the committee members must be from a program outside pharmaceutical engineering. The advisory committee will work with the adviser in guiding the student through the graduate program; the committee must meet formally once a year to ensure timely progress toward degree completion. The body of experimental work to be incorporated into the dissertation is subject to approval by the membership of the advisory committee, which will conduct the comprehensive (candidacy) exams, qualifying exam and final oral defense examinations.

Admission to candidacy for Ph.D. degree

Students are admitted to candidacy based on completing required course work, the examinations described below and the recommendation of the adviser, advisory committee and the co-directors of the pharmaceutical engineering program. Advancement to candidacy should take place prior to initiating the third academic year in the program.

Part I – Qualifying examination

The qualifying examination consists of a combined written/oral examination to be taken prior to the second year in the program, and after clearing didactic core sequence and laboratories. A majority "pass" from the advisory committee is required for the student to advance. In case the student is not successful in the first iteration, a second examination with the same format will be automatically scheduled for the end of the following semester. Failing a second attempt will result in removal from the program. The written qualifying examination will consist of questions related to core classes and laboratory work, with the format to be determined by the faculty preparing the exams, which are the same as those administering the courses.

Part II – Written comprehensive examination

The written comprehensive examination is taken after successful completion of the qualifying examination. Comprehensive exams are administered to the Ph.D. student based on research proposals. The research proposal should follow the R21 (NIH) format exactly, including budget and other requirements. The topic of the proposal must be related to the student's doctoral dissertation project and agreed upon with the adviser, particularly the aims of the proposal. The student's advisory committee will evaluate the written proposal and will grade as pass/fail.

Oral comprehensive examination

After passing the written comprehensive examination(s), the student is eligible for the oral comprehensive examination, which is conducted by the advisory committee and is chaired by the student's adviser. The oral examination is administered to assess the ability of the candidate to integrate information and display an appropriate mastery of problem-solving capabilities. This is to be a defense of their written exam and

can include questions related to general concepts in pharmaceutical engineering as well as those pertaining to the proposed work. Written and oral comprehensive exams must be taken by the end of the second year of study.

Final Ph.D. examination and oral defense

The final examination requires the student to write a dissertation based on their research and defend it in an oral examination. On completion of their research, and in agreement with the adviser, the student shall prepare a written dissertation describing the completed research using the format approved by the Graduate School and submit it to the pharmaceutical engineering graduate program committee for approval. The student's advisory committee will select an appropriate external examiner to review the written dissertation and attend the dissertation defense. The oral defense of the dissertation under the direction of the student's advisory committee will be open to all faculty members and other graduate students; it will examine the student's project, intellectual context, and the underlying fundamental knowledge or contribution to science.

Following the defense, all committee members and the external examiner will vote on the acceptability of the dissertation. A student can pass the oral defense, signifying that the committee has accepted the dissertation project, with no more than one negative vote. If the outcome is negative, the final oral defense may be retaken with the approval of the directors of the pharmaceutical engineering program. Upon successful completion of the defense and dissertation, the student may apply for graduation from VCU with the degree of Ph.D. in Pharmaceutical Engineering.

Contact

Sandro R. da Rocha, Ph.D.
Professor, School of Pharmacy, and graduate program director
srdarocha@vcu.edu
(804) 828-0985

Additional contact

Thomas Roper, Ph.D.

Program website: pharmegr.vcu.edu/subpages/phd (<https://pharmegr.vcu.edu/subpages/phd/>)

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in medicinal chemistry

Program goal

The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the doctoral level.

Student learning outcomes

- 1. Knowledge of research in pharmaceutical sciences**
The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.
- 2. Design experiments in pharmaceutical sciences**

The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

- 3. Demonstrate appropriate communication skills**
The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.
- 4. Identify problems in pharmaceutical sciences**
The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the academic regulations section for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the academic regulations section for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

See the School of Pharmacy website for the process handbook (<https://pharmacy.vcu.edu/media/pharmacy/documents/GraduateHandbook.pdf>). Current graduate students (<https://pharmacy.vcu.edu/admissions/graduate/students/>) may visit the school's website for additional resources, and prospective students (<https://pharmacy.vcu.edu/admissions/graduate/>) may apply online.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|---------------------------------------|
| Ph.D. | Fall | Jan 1 | GRE, TOEFL (international applicants) |

Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), Ph.D. students in pharmaceutical sciences must complete a minimum of 30 graduate credit hours beyond the master's degree of required (both school and department core) and elective hours. All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below. Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived, students must still complete the minimum number of hours required for the degree.

Curriculum requirements

| Course | Title | Hours |

Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) with a concentration in pharmaceuticals

Program goal

The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the doctoral level.

Student learning outcomes

- Knowledge of research in pharmaceutical sciences**
The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.
- Design experiments in pharmaceutical sciences**

The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

3. Demonstrate appropriate communication skills

The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.

4. Identify problems in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

See the School of Pharmacy website for the process handbook (<https://pharmacy.vcu.edu/media/pharmacy/documents/GraduateHandbook.pdf>). Current graduate students (<https://pharmacy.vcu.edu/admissions/graduate/students/>) may visit the school's website for additional resources, and prospective students (<https://pharmacy.vcu.edu/admissions/graduate/>) may apply online.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|---------------------------------------|
| Ph.D. | Fall | May 1 (priority consideration for financial aid Feb 1) | GRE, TOEFL (international applicants) |
| | Spring | Oct 1 | |

Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have received a baccalaureate from an accredited institution in a related area demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), Ph.D. students in pharmaceutical sciences must complete a minimum of 30 graduate credit hours beyond the master's degree of required (both school and department core) and elective hours. All Ph.D. students must pass the comprehensive exam in each department in order to advance to candidacy. The exam consists of a written and oral component and is administered by either the student advisory committee (oral and written) and/or department faculty (written), depending on which option the student chooses. All Ph.D. students must pass the dissertation review and defense in each department in order to graduate.

In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below. Students are required to complete a dissertation. The 30 credit-hour minimum directed research requirement may be waived for circumstances such as a prior M.S. degree. If waived, students must still complete the minimum number of hours required for the degree.

Curriculum requirements

Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the Department of Pharmaceutics option. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course

requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

| Course | Title | Hours |
|----------|---------------------------------------|-------|
| CHEM 409 | Instrumental Analysis ¹ | 3 |
| PCEU 507 | Pharmaceutics and Biopharmaceutics I | 3 |
| PCEU 508 | Pharmacokinetics | 3 |
| PCEU 509 | Pharmaceutics and Biopharmaceutics II | 3 |

¹

Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

Program requirements

| Course | Title | Hours |
|---|---|-----------|
| Program core | | |
| OVPR 601 or OVPR 602 or OVPR 603 | Scientific Integrity Responsible Scientific Conduct Responsible Conduct of Research | 1 |
| PSCI 607 | Introduction to Pharmaceutical Sciences From Bench to Shelf | 2 |
| PSCI 614 | Research Techniques | 1 |
| PSCI 690 | Seminars in the Pharmaceutical Sciences (one credit per semester) | 4 |
| Concentration courses | | |
| BIOS 543 or STAT 543 | Graduate Research Methods I Statistical Methods I | 3 |
| PCEU 612 | Advanced Physical Pharmacy and Biopharmaceutics | 3 |
| PCEU 625 | Pharmaceutical Analysis | 4 |
| PCEU 690 | Pharmaceutics Research Seminar (one credit per semester) | 4 |
| Electives | | |
| Select a minimum of eight credit hours (recommended for Ph.D.) ¹ | | 8 |
| Research | | |
| PCEU 697 | Directed Research in Pharmaceutics | 30 |
| Total Hours | | 60 |

¹

The elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student. These electives may include courses outside the department.

The minimum total of graduate credit hours required for this degree is 60.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|-----------------|---------------------------------------|
| M.S. | Fall | Jan 1 | GRE, TOEFL (international applicants) |

Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have received a baccalaureate from an accredited institution in a related area, demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate. In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below. A minimum of one elective credit hour is recommended for the M.S. The elective courses taken will generally be selected from a list identified by the major adviser and will be agreed upon by the major adviser and student. These electives may include courses outside the department. Students are required to complete a thesis. The six credit-hour minimum directed research requirement may be waived for circumstances such as a prior related degree. If waived, students must still complete the minimum number of hours required for the degree.

Curriculum requirements

| Course | Title | Hours |
|--|---|-------|
| Program core | | |

Pharmaceutical Sciences, Master of Science (M.S.) with a concentration in pharmaceuticals

Program goal

The School of Pharmacy offers the highest quality of graduate training in pharmaceutical sciences research and mentorship at the Master of Science level.

Student learning outcomes

1. Knowledge of research in pharmaceutical sciences

The candidate should demonstrate a general knowledge of the elements of the pharmaceutical sciences and a detailed knowledge of his/her area of research, including an appropriate familiarity with the research literature, policies and procedures, and methodology pertaining to their field.

2. Design experiments in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the design of experimental protocols and the technical conduct of experimentation related to his/her research.

3. Demonstrate appropriate communication skills

The candidate should demonstrate that an appropriate level of oral, written and visual communication skill has been acquired.

4. Identify problems in pharmaceutical sciences

The candidate should demonstrate an appropriate level of skill in the identification of meaningful problems in the pharmaceutical sciences and the design of and implementation of appropriate problem-solving methods.

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the

graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Other information

See the School of Pharmacy website for the process handbook (<https://pharmacy.vcu.edu/media/pharmacy/documents/GraduateHandbook.pdf>). Current graduate students (<https://pharmacy.vcu.edu/admissions/graduate/students/>) may visit the school's website for additional resources, and prospective students (<https://pharmacy.vcu.edu/admissions/graduate/>) may apply online.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|-----------------------|--|---------------------------------------|
| M.S. | Fall | May 1 (priority consideration for financial aid Feb 1) | GRE, TOEFL (international applicants) |
| | Spring | Oct 1 | |

Special requirements

- Pharm.D. or bachelor's degree in a related area

In addition to the general admission requirements of the VCU Graduate School (p. 35), applicants must have received a baccalaureate from an accredited institution in a related area demonstrating the ability to perform at the graduate level. Prerequisite and foundation course work may be required, depending upon the applicant's discipline.

Degree requirements

In addition to general VCU Graduate School graduation requirements (p. 32), M.S. students in pharmaceutical sciences must complete a minimum of 30 didactic credit hours of required (both school and department core) and elective hours. All M.S. students must pass the thesis review and defense in each department in order to advance to graduate. In addition to the pharmaceutical sciences core courses, students must fulfill course and other degree requirements in their respective concentrations as outlined below. A minimum of six elective credit hours is recommended for the M.S. These courses will be selected based upon individual research program needs and will be chosen through mutual consultation with the student and major adviser. Students are required to complete a thesis. The six credit-hour minimum may be waived for circumstances such as a prior related degree. If waived, students must still complete the minimum number of hours required for the degree.

Curriculum requirements

Prerequisites

All students should have prerequisite knowledge in chemistry, mathematics and biology. The following departmental courses or their equivalents are required for admission into the pharmaceuticals concentration. If a prospective student has not met any of the prerequisites, the course(s) may be included in the student's core course requirements upon recommendation by the prospective graduate adviser and approval by the respective course coordinator (see below).

| Course | Title | Hours |
|----------|---------------------------------------|-------|
| CHEM 409 | Instrumental Analysis ¹ | 3 |
| PCEU 507 | Pharmaceutics and Biopharmaceutics I | 3 |
| PCEU 508 | Pharmacokinetics | 3 |
| PCEU 509 | Pharmaceutics and Biopharmaceutics II | 3 |

1

Undergraduate prerequisite course work may not count toward the minimum 30 graduate credit hours required for the degree and may not

be included in the calculation of graduate statistics, i.e., GPA, 20 percent C or below rule, etc.

Program requirements

| Course | Title | Hours |
|------------------------------|---|-----------|

Pharmacy, Doctor of (Pharm.D.)/ Pharmaceutical Sciences, Doctor of Philosophy (Ph.D.) [dual degree]

The VCU School of Pharmacy offers a Pharm.D./Ph.D. dual degree program for outstanding Pharm.D. students to obtain both a Pharm.D. and a Ph.D. in Pharmaceutical Sciences. The dual degree program provides curricular efficiencies in both the Pharm.D. and Ph.D. programs, opportunities for summer research and elective advanced pharmacy practice experiences, which allow dual degree students to graduate with their Pharm.D. after four years and with efficiencies to complete the Ph.D. degree after approximately two to three additional years.

Credit efficiencies. In the P-3 and P-4 years (corresponding to the G-1 and G-2 years), the student will be enrolled full-time in the Pharm.D./Ph.D. dual degree program. The students will take core or elective graduate courses as Pharm.D. electives, which are also applied toward six credits of their didactic Ph.D. credits. Additionally, students may take up to two elective advanced pharmacy practice experiences, which are also applied toward 10 credits of their Ph.D. research. In order to be eligible for the Pharm.D. degree, students must earn a minimum number of 155 credits, which includes a maximum of 16 credits that may also be applied toward the Ph.D. degree (six didactic credits and 10 APPE/directed research credits). In order to be eligible for the Ph.D., dual degree students must earn a minimum of 30 didactic credits and 30 directed research credits.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admissions process

The program is developed for VCU School of Pharmacy Pharm.D. students to apply during their P-2 year, but applications from P-3 students will be considered. Applications will be evaluated according to the following criteria:

- Pharm.D. GPA: ≥ 3.0 (required).
- Personal statement/essay
- Personal interview by two Pharm.D./Ph.D. subcommittee members
- Required research experience (SRF or equivalent)
- Three letters of recommendation that comment on research accomplishments/experience/potential, including at least one letter from a prospective graduate faculty sponsor in the School of Pharmacy, Pharmaceutical Engineering Program or Department of Pharmacology and Toxicology

Application deadline: Jan. 15

Students admitted into the Pharm.D./Ph.D. dual degree program will receive acceptance letters during the spring semester of the P-2 year (or P-3 year in special cases).

Pharmacy, Doctor of (Pharm.D.)/ Pharmaceutical Sciences, Master of Science (M.S.) [dual degree]

The School of Pharmacy offers a Pharm.D./Master of Science (M.S.) in Pharmaceutical Sciences as a graduate/professional dual degree program that teaches individuals to analyze and solve problems of interest to pharmacists. Students develop a broad range of skills by taking classes and working closely with faculty. Since the degree is offered concurrently with the professional pharmacy degree, certain efficiencies can be realized that permit students to graduate sooner than might be expected; although, this degree may require up to two years of study beyond the Pharm.D. program depending on the student's educational background and chosen area of study. Students will take the required Pharm.D. curriculum, with selected substitutions of required courses with graduate-level courses, in addition to the graduate curriculum.

Credit efficiencies. In the P-3 and P-4 years (corresponding to the G-1 and G-2 years), the student will be enrolled full time in the Pharm.D./M.S. dual degree program. The students may take up to six core or elective graduate credits as Pharm.D. electives, which are also applied toward six didactic M.S. credits. In order to be eligible for the Pharm.D. degree, students must earn a minimum number of 155 credits, which includes a maximum of six didactic credits that may also be applied toward the M.S.

degree. In order to be eligible for the M.S., dual degree students must earn a minimum of 24 didactic credits and six directed research credits.

social and economic impact of drug therapy in humans and in health care systems).

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Application to the Pharm.D./M.S. program

Students may be admitted into the program before or during their first two years of enrollment in the Pharm.D. program. Applicants must demonstrate a good academic record, experience in research (e.g., during summer research fellowships with the school's graduate faculty) and successful completion of the Graduate Record Examination. Additionally, each applicant must be sponsored by a graduate faculty member.

Department of Medicinal Chemistry

Umesh R. Desai, Ph.D.

Professor and chair

The Department of Medicinal Chemistry applies the latest strategies and concepts from several broad scientific disciplines – including synthetic chemistry, molecular modeling, computational biology, biological chemistry, structural biology and pharmacology – to discover new pharmaceutical agents and their mechanism of action in various diseases impacting humans.

Department of Pharmaceutics

Douglas H. Sweet, Ph.D.

Professor and chair

The Department of Pharmaceutics offers graduate study leading to the degrees of Master of Science and Doctor of Philosophy in Pharmaceutical Sciences. In addition, students may elect to pursue a joint Pharm.D./Ph.D. program. These programs provide the preparation and research experience for academic, federal and industrial careers.

Department of Pharmacotherapy and Outcomes Science

Dave L. Dixon, Pharm.D., FACC, FCCP, FNLA, BCACP, CDCES, CLS

Associate professor and interim chair

The Department of Pharmacotherapy and Outcomes Science is the largest of the three departments at the VCU School of Pharmacy. The focus of the department is pharmacotherapy (the safe and effective use of drugs in humans) and pharmacy administration (evaluation of the

SCHOOL OF SOCIAL WORK

The oldest of its kind in the South, Virginia Commonwealth University's School of Social Work was established in 1917 as the Richmond School of Social Economy. Later renamed the School of Social Work and Public Health, it became the first unit of Richmond Professional Institute.

The school was created initially in response to community needs in working with World War I veterans and their social and health problems. Subsequent development of the school has expanded activity into all areas of human service.

With the creation of VCU in 1968, the School of Social Work became a unit of what is now the university's Monroe Park Campus. The school offers baccalaureate-, master's- and doctoral-level programs in Richmond, and the capital provides educational opportunities in many state government agencies.

Social work education at VCU is highly individualized and is characterized by a close relationship between faculty and students. Faculty members help students learn the form and method of social work practice, and students are encouraged to discover their own unique style of helping others. The school's educational programs are designed to prepare students for practice in many different kinds of social agencies. A combination of classroom courses and concurrent fieldwork experiences facilitates integration of knowledge, attitudes and skills necessary for professional practice. The integrated class and fieldwork curriculum offers students the opportunity to acquire a substantial base in social work practice, patterns of human behavior and development, organization and operation of social welfare programs and policies, the methods of scientific inquiry in social work, and the needs of special populations.

The profession of social work

The goals of the profession of social work are to provide services to persons who are vulnerable due to a lack of personal, social and/or institutional resources to meet their emotional, health and economic needs. Social work practice is the application of professional knowledge, skills and values across a range of settings and populations. The focus of practice is on individuals, couples, families, groups and communities. In addition to direct clinical social work practice, social workers are involved in the administration of human service programs, social planning, the development of social policies, research and evaluation, and teaching.

In order to achieve the goals of promoting social justice and enhancing well-being for individuals, families, groups and communities, social workers provide a variety of services primarily in public and nonprofit organizational contexts. Examples of the range of settings in which social workers practice include community centers, public social services, child welfare, residential treatment facilities, schools, community mental health agencies, family and children's service agencies, psychiatric and acute care hospitals, substance abuse treatment facilities, services for the elderly, court services and adult and juvenile rehabilitation facilities.

Professional education for social work practice dates to the early 1900s. The contributions of the profession are evidenced in health and mental health care, the well-being of children and families, the development and implementation of social policies, the planning, delivery and evaluation of human services, and a broad base of research on the human condition. The knowledge base of the profession and the integration of related social, behavioral and biological sciences acquired

through professional education facilitates the contributions of social workers in multidisciplinary contexts.

Social work practice is designed to enrich quality of life by enabling individuals, groups, communities and organizations to achieve their greatest potential development. The goal of the School of Social Work at VCU is to provide professional education in response to these needs.

Accreditation

VCU's Bachelor of Social Work and Master of Social Work programs are accredited by the Commission on Accreditation of the Council on Social Work Education – the accrediting body for all schools of social work at both the baccalaureate and master's levels. Copies of the Accreditation Standards and Curriculum Policy Statement are available in the Office of the Dean.

Financial assistance

Although financial assistance is limited, some funds are available from a variety of sources. No prospective student should refrain from seeking admission to the school for financial reasons alone. Besides the federal financial aid programs outlined in the undergraduate or graduate study areas of the bulletins, the university and the school also offer scholarships and/or teaching assistantships at all degree levels.

The H.H. Hibbs Loan Fund was established by the School of Social Work Alumni Association for short-term emergency needs. Enrolled students who wish to apply for a loan should discuss this with their faculty adviser and the associate dean.

For more information on these financial aid opportunities (<https://socialwork.vcu.edu/student/scholarships/>), visit the School of Social Work website.

Continuing education

Continuing education is a vital part of professional development. The School of Social Work offers institutes and workshops as part of the school's commitment to enhance social work practice and broaden educational experiences for students, social workers, field instructors and others in social service delivery systems.

State, regional and local agencies and institutions frequently identify educational and training needs in content or skill areas for selected staff members. The school, through contractual arrangements, contributes expertise in designing and implementing short-term training courses and materials. Offerings are planned throughout the year.

Associations and student interest groups

Alumni Association

The School of Social Work Alumni Association supports the school, its students and faculty. All graduates of the School of Social Work are members of the alumni association. The association falls under the umbrella of the VCU Alumni Association.

B.S.W. Student Association

The Baccalaureate Social Work Student Association, an organization of students in the Bachelor of Social Work Program, was established to facilitate communication among students and between the student body and the school faculty and staff. This organization plays a vital role in the educational process. Through student representation on committees within the school, BSWSA members participate in decision-making processes. In addition, the association enables students to conduct a variety of social and professional activities throughout the year.

M.S.W. Student Association

The Master of Social Work Student Association is the organization of M.S.W. students enrolled in the school. Established for the purposes of facilitating communication among students and between the student body and the school, the association provides a means by which student concerns and ideas can be formulated and acted upon. It also enables students to conduct a variety of social, civic and educational activities throughout the year.

This organization plays a vital role in the educational process. Student contributions to the governance and curriculum of the school are of value to both the institution and the students. Participation in the decision-making process is accomplished through student representation on committees. Faculty and students work closely together throughout the year to meet the needs of graduate social work education. Students participate as full members of committees within the school.

Association of Black Social Workers – VCU Chapter

The Association of Black Social Workers was established to create and maintain an atmosphere of unity and support among black students in the School of Social Work. It serves to assist students in their personal and professional growth and development. Membership in this organization helps students to develop a keen awareness of the acute needs of the black community and the active role that must be assumed by the dedicated black professional social worker in promoting the general welfare of black citizens. To attain these goals, the organization utilizes the educational process and related experiences of students at

the school and in fieldwork. Students are encouraged to participate in all phases of the academic environment.

LGBTQIA and Allied Social Work Group VCU

The LGBTQIA and Allied Social Work Group provides a safe space for LGBTQIA and allied social workers to collaborate and engage in advocacy efforts. The organization also promotes awareness of LGBTQIA topics within the VCU social work community through curriculum building, education and social events.

Doctoral Student Association

The Doctoral Student Association is a collegial association available to all doctoral students regardless of full- or part-time status. Its primary purpose is to provide information, resources, advocacy and support to students throughout the doctoral program experience. Governance of the association is conducted on a rotating leadership and consensual basis. The Doctoral Student Association provides doctoral student representatives to various committees of the school governance structure.

Other student interest groups

The School of Social Work supports the development of groups that address a variety of student needs and interests.

M.S.W. Program

Nicole Lynn Lee, Ph.D.
Director, M.S.W. Program

Program mission and profession purpose and values

The VCU School of Social Work offers a graduate professional curriculum accredited by the Council on Social Work Education leading to the Master of Social Work degree. The mission of the M.S.W. program at VCU is to educate students for advanced practice in either clinical social work or social work administration, planning and policy practice under the guiding principle of promoting a more just society that includes a commitment to the values of diversity, ethics and competent social work practice in a multicultural society. The M.S.W. program's mission is strongly aligned to the purpose of the social work profession in that it fully embodies and promotes the worth and dignity of the person and the empowerment and self-determination of individuals, families and communities. In addition, a strong focus on the values of diversity; social, economic and environmental justice; cultural competence/sensitivity; and the importance of human relationships are the cornerstone of the M.S.W. program mission statement. This mission is consistent with and reflected throughout the NASW Code of Ethics.

Upon completion of the M.S.W. program, students will possess the knowledge, skills, values and ethics that guide the core practice standards of the VCU School of Social Work, NASW and CSWE's Educational Policy and Accreditation standards. The curriculum fosters student learning about human rights through course work that addresses poverty and the enhancement of the quality of life for all persons. The program curriculum promotes human and community well-being by providing courses focused on service to and empowerment of people who experience oppression or vulnerability due to inadequate or inequitable distribution of personal, social or institutional resources. This perspective is infused across the curriculum. Within this context, social work practice is defined as the application of professional knowledge,

skills and values across a range of settings and populations for the prevention and amelioration of personal and social problems. The curriculum connects with the profession's purpose of using scientific inquiry within the practice setting by providing students with practice knowledge based upon the analysis of critical application of qualitative and quantitative research from within the profession and related social, behavioral and biological sciences. The interactions among persons and their environments are the primary targets of social work practice and students obtain critical skills to provide services including the restoration, rehabilitation, maintenance and enhancement of the functioning of individuals, families, groups, communities and organizations.

- Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice (p. 761)
- Social Work, Master of (M.S.W.) with a concentration in clinical practice (p. 766)

Opportunities exist to combine the M.S.W. with certification and degree programs within the university as well as programs offered in conjunction with other institutions. See the Opportunities tab for additional information.

- Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree] (p. 771)
- Social Work, Master of (M.S.W.)/Nonprofit Management, Certificate in (Post-baccalaureate graduate certificate) [dual degree] (p. 772)
- Social Work, Master of (M.S.W.)/Public Health, Master of (M.P.H.) [dual degree] (p. 82)
- Social Work, Master of (M.S.W.)/school social work practice certification [dual degree]
- Social Work, Master of (M.S.W.)/Divinity, Master of from the Baptist Theological Seminary at Richmond or the Samuel DeWitt Proctor School of Theology at Virginia Union University [dual degree]
- Social Work, Master of (M.S.W.)/Juris Doctor with the University of Richmond [dual degree]

Social Work, Master of (M.S.W.) with a concentration in administration, planning and policy practice

Program accreditation

Council on Social Work Education

The concentration in administration, planning and policy practice prepares graduates to become leaders skilled in analyzing, formulating, implementing and evaluating policies, plans and programs. The knowledge, values and skills that are taught emphasize current theory and research through classroom and field-based experiences. Practice takes place in the context of a complex, changing environment in which communities and governmental, legislative, nonprofit and for-profit organizations advocate for, plan and deliver social services and advocate for social change. The major themes within the integrated curriculum are social and economic justice, diversity, leadership and advocacy. This concentration is not available to distance education students at this time.

Program goals

Flowing from the mission of the School of Social Work and guided by the principles of promoting social justice, human rights, diversity, cultural

competence/sensitivity and ethical practice, the goals of the M.S.W. program are:

1. To provide for a generalist knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations
2. To provide for a program that prepares students for work in concentration areas of specialization in either clinical social work or social work administration, planning and policy practice in a range of settings
3. To provide for an educational environment where students apply the profession's values and ethical principles
4. To provide for an educational environment where students gain a greater understanding of implications of diversity through education on identifying cultural strengths and ways to counteract individual and institutional prejudice, oppression and discrimination
5. To provide for an educational environment where students apply research methods to analyze and critically evaluate professional practice, programs and service delivery systems
6. To provide for an educational environment where students gain a greater understanding of advocacy and involvement in advocacy to affect social and economic justice

Program competencies

Competency 1 – Demonstrate ethical and professional behavior

Competency 2 – Engage diversity and difference in practice

Competency 3 – Advance human rights and social, economic and environmental justice

Competency 4 – Engage in practice-informed research and research-informed practice

Competency 5 – Engage in policy practice

Competency 6 – Engage with individuals, families, groups, organizations and communities

Competency 7 – Assess individuals, families, groups, organizations and communities

Competency 8 – Intervene with individuals, families, groups, organizations and communities

Competency 9 – Evaluate with individuals, families, groups, organizations and communities

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master's or doctoral status according to the degree candidacy requirements of the student's graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student's faculty regarding the student's academic achievements and the student's readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|---|-------------------|--------------------|
| M.S.W. | Fall (regular standing formats – all on-campus part- and full-time) | Third Wed in Jan | |
| | Summer (advanced standing format) | Second Wed in Nov | |

Special requirements

- The School of Social Work requires a specific outline for the professional statement that is different from what is shown in the graduate admissions website. Please visit the School of Social Work website for this specific information.

Full-time and part-time on-campus applicants are admitted to begin study in the fall semester. Advanced standing applicants are admitted for the summer session. At the time of application, applicants may apply for full-time or part-time on-campus (Richmond) or advanced standing. Application forms and instructions for applying to all graduate programs are available on the Graduate Admissions website (<https://www.vcu.edu/admissions/apply/graduate/>).

In addition to the general admission requirements of the VCU Graduate School (<http://bulletin.vcu.edu/graduate/study/admission-graduate-study/admission-requirements/>), the School of Social Work has established the following minimum criteria for admission to the 60-credit hour full-time or part-time format:

- A bachelor's degree from an accredited college or university
- A cumulative GPA of 3.0 on a 4.0 scale for all undergraduate course work
- Completion of the following prerequisites: two three-credit courses in the social and behavioral sciences (e.g., psychology, sociology, anthropology, political science, economics), or health sciences, biological sciences or humanities.

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the professional statement and (2) the applicant's background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

General admission procedures

Applications will only be reviewed when they are complete and received by the deadline. This includes the application form, three letters of reference (such as from faculty, employers and/or colleagues who know the applicant's academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, including VCU transcripts from those who are VCU graduates, a professional statement based upon the outline provided on the M.S.W. website (<http://socialwork.vcu.edu/programs/msw/admission.html>) and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline.

Admission to the advanced standing format

The advanced standing option leads to a Master of Social Work degree upon completion of 42 credit hours. Advanced standing begins in late May, continues through the summer and culminates with graduation the following May. The advanced standing option is offered full-time only. Admission to advanced standing is available to a select group of students with a bachelor's degree (B.S.W.) from an undergraduate social work program accredited by the Council on Social Work Education, completed no more than five years prior to the date of application to the M.S.W. program. The minimum requirement for admission to the advanced standing format is a 3.0 GPA on a 4.0 scale for all undergraduate course work. As part of the application packet, applicants must submit their field practicum evaluation(s) and a reference letter from the field practicum faculty. Applicants who meet these criteria will be scheduled for a structured on-campus interview

that includes a written case assessment. Refer to the M.S.W. website (<http://socialwork.vcu.edu/programs/msw/admission.html>) for more information.

Transfer admits

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a statement of good standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, professional statement, resume and reference letters. No more than 30 credit hours will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants from non-social work graduate programs may transfer graduate courses that could count as electives. To do so, they must submit course syllabi for transfer evaluation. A maximum of six credit hours of elective course work may be accepted in transfer from non-social work graduate programs in accordance with Graduate School policies governing transfer credit and time limits for degree completion. Only courses that have not been applied to another degree will be eligible for transfer. No course credit is given for life or work experience.

Course waiver information for new M.S.W. students

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an A or B grade in the courses that are the basis for the waiver request; these courses must have been completed within the past five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs (but not in the advanced standing format), and from B.A., B.S. or other undergraduate programs may be waived from no more than three of the following foundation courses:

| Course | Title | Hours |
|------------------------|---|-------|
| SLWK 601 & SLWK 610 | Human Behavior in the Social Environment I and Human Behavior in the Social Environment II | 6 |
| SLWK 609 | Foundations of Research in Social Work Practice | 3 |

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are granted waivers but not transfer credit hours must take elective courses to fulfill the number of credit hours that have been waived. Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. program office to request the Equivalency Portfolio Form(s) and instructions.

Degree requirements

In addition to general VCU Graduate School graduation requirements (<http://bulletin.vcu.edu/academic-regs/grad/graduation-info/>), the regular standing format for the M.S.W. degree requires the completion of 60 credit hours of graduate study (two years of full-time study). The first 30 credit hours (generalist curriculum) may be taken in one academic year on a full-time basis or may be extended to a maximum of two years in the structured part-time format. To earn the M.S.W. degree in the advanced standing option requires 42 credits of full-time graduate study. Students in advanced standing do not complete the generalist curriculum

but instead take 12 credit hours during the summer prior to entering the concentration curriculum.

All students select a concentration for the last 30 credit hours, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time format. Students are usually in a field instruction practicum two days each week during the generalist curriculum and three days each week during the concentration curriculum. Course credit for work or life experience is not granted in lieu of M.S.W. course credit hours.

The purpose of the Master of Social Work program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society.

The generalist curriculum comprises the first 30 credit hours of the M.S.W. program. The purpose of the generalist practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Generalist practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision-making, multicultural competency and social and economic justice. The generalist curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

Concentration options

After completion of the generalist year of study or summer studies for advanced standing, M.S.W. students choose an advanced concentration in clinical practice or in administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

Administration, planning and policy practice concentration (SWAPPP)

The concentration in administration, planning and policy practice prepares graduates to become leaders skilled in analyzing, formulating, implementing and evaluating policies, plans and programs. The knowledge, values and skills that are taught emphasize current theory and research through classroom and field-based experiences. Practice takes place in the context of a complex, changing environment in which communities and governmental, legislative, nonprofit and for-profit organizations advocate for, plan and deliver social services and advocate for social change. The major themes within the integrated curriculum are social and economic justice, diversity, leadership and advocacy. This concentration is not available to distance education students at this time.

Curriculum requirements

Generalist courses

| Course | Title | Hours |
|----------|---|-------|
| SLWK 601 | Human Behavior in the Social Environment I | 3 |
| SLWK 602 | Policy, Community and Organizational Practice I | 3 |
| SLWK 603 | Power, Privilege and Oppression | 3 |

| | | |
|------------------------------|--|-----------|
| SLWK 604 | Social Work Practice with Individuals, Families and Groups I | 3 |
| SLWK 605 | Social Work Practice with Individuals, Families and Groups II | 3 |
| SLWK 606 | Policy, Community and Organizational Practice II | 3 |
| SLWK 609 | Foundations of Research in Social Work Practice | 3 |
| SLWK 610 | Human Behavior in the Social Environment II | 3 |
| Select one of the following: | | 6 |
| SLWK 693 & SLWK 694 | Generalist Field Instruction I and Generalist Field Instruction II (Change name to Generalist Field Instruction I) | |
| SLWK 695 | Block Generalist Field Instruction (Change name to Generalist Field Instruction) ¹ | |
| Total Hours | | 30 |

1

Part-time students may choose a block field placement in lieu of SLWK 693 and SLWK 694. Only one field placement can be a block placement

Advanced standing option

In the advanced standing option students do not take the generalist courses outlined above, but instead take 12 credit hours in the summer prior to their concentration year that include courses in practice/human behavior, policy and research, in addition to completing a field education course with a field placement that will extend throughout their concentration year of study. The purpose of this curriculum is to enhance and restore understanding of the generalist curriculum content for entering B.S.W. students prior to entering the concentration year.

(Taken summer semester prior to concentration courses)

| Course | Title | Hours |
|--------------------|---|-----------|
| SLWK 607 | Social Work Practice with Individuals, Families and Groups for Advanced-standing Students | 3 |
| SLWK 608 | Social Work Practice in Organizations and Communities for Advanced-standing Students | 3 |
| SLWK 611 | Social Work Research for Advanced-standing Students | 3 |
| SLWK 612 | Advanced Standing Field Instruction | 3 |
| Total Hours | | 12 |

Required administration, planning and policy concentration courses

| Course | Title | Hours |
|----------|---|-------|
| SLWK 710 | Concentration Social Policy (Change course name to Specialized Social Policy) | 3 |
| SLWK 711 | Strategies for Social Work Planning and Administrative Practice | 3 |

| | | |

The minimum total of graduate credit hours required for this degree is 60.

Students pursuing the Master of Social Work have an opportunity to combine their studies and complete other degree programs offered within the university and some outside institutions in these areas.

Master of Divinity (M.Div)

The combination of the Master of Social Work and the Master of Divinity is a four-year professional program offered by VCU in cooperation with the Samuel DeWitt Proctor School of Theology at Virginia Union University. This dual degree program prepares students for service in occupations where social work and the church's ministries intersect, enabling social workers to perform and evaluate social work practices as they relate to biblical, theological, ethical, educational and pastoral perspectives. Graduates are equipped for various forms of ministry in which clinical and administrative skills in social work are critical.

This program requires four continuous years of study and leads to an M.S.W. conferred by VCU and a Master of Divinity conferred by VUU. Students need to apply and be accepted to both programs and may begin study at either institution following the approved curriculum plan. Alternately a student may begin at either VCU or the seminary and then, in accordance with application deadlines, apply for admission to the other school during the first year of study.

Application process

Prospective students apply to the VCU School of Social Work and VUU, must meet both sets of admission standards and must be accepted to both programs. For the M.S.W. program, refer to the Admission page (<https://socialwork.vcu.edu/programs/msw/admission.html>) of the M.S.W. website. For information about admission to VUU, contact:

Samuel DeWitt Proctor School of Theology
1500 N. Lombardy St.
Richmond, Virginia 23220
(804) 257-5715

Gender violence intervention certificate

The dual degree Master of Social Work and Certificate in Gender Violence Intervention (p. 569) is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

Application process

Apply online at **VCU Graduate Admissions**. For additional information, contact:

Nicole Lynn Lee, Ph.D.
M.S.W. program director
s2nlee@vcu.edu
(804) 828-6882

Sarah Jane Brubaker, Ph.D.
Director, Gender Violence Intervention Program
sbrubaker@vcu.edu
Phone: (804) 827-2400

Juris Doctor (J.D.)

Through a cooperative agreement with the University of Richmond T.C. Williams Law School (<https://lawcatalog.richmond.edu/dual-degree/>), selected students in either school may pursue a dual degree four-year curriculum of graduate study leading to the Master of Social Work and Juris Doctor. This program is established in recognition of the role of public law in social and economic life. The dual degree program prepares professionals to be well-versed in the values, knowledge and skills of both fields, bringing an integrated base of competency to the resolution of human and social problems. The time normally required for completion of the integrated four-year curriculum is one academic year less than if each degree were pursued separately. Elective courses will enable students to select areas in law and social work which meet their particular interests.

Application process

Applicants must successfully meet the admission requirements of both schools and, upon admission, are assigned an adviser in each school. Students may begin the course work in either school, with the sequence of courses being determined by the point of entry. For more information, contact:

Nicole Lynn Lee, Ph.D.
M.S.W. program director
s2nlee@vcu.edu
(804) 828-6882

John F. Preis, J.D.
Associate Dean of Academic Affairs; Professor of Law
University of Richmond, T.C. Williams Law School

(804) 287-6398

Nonprofit management certificate

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, M.S.W. students may simultaneously earn

the post-baccalaureate graduate Certificate in Nonprofit Management (p. 576) offered by the Wilder School. Students gain knowledge and skills that they will need to become leaders and change agents in this rapidly growing sector.

Application process

To earn a Certificate in Nonprofit management in conjunction with the M.S.W., students will complete a graduate school application for the certificate program and pay the required fee to the university.

Nicole Lynn Lee, Ph.D.
M.S.W. program director
s2nlee@vcu.edu
(804) 828-6882

Nancy Stutts, Ph.D.
Director of nonprofit studies
nbstutts@vcu.edu

Master of Public Health (M.P.H) [dual degree]

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the VCU School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. This dual degree program prepares graduates to work with individuals, families, groups, communities and/or organizations; to advocate for social, health care and economic justice in a diverse and multicultural society; and to promote physical and mental health across the life course. Program details (p. 82) can be found in the dual degree opportunities section of this Bulletin.

Social Work, Master of (M.S.W.) with a concentration in clinical practice

Program accreditation

Council on Social Work Education

Clinical social work practice involves a mutual problem-solving process in which multidimensional assessment, goal-setting, planned intervention and evaluation are prominent components, all of which are informed by current scientific knowledge. All clinical practice is grounded in the values and purposes of the social work profession. The goal of clinical social work is to promote effective coping with life challenges and transitions. This is achieved by helping people solve problems, change dysfunctional behavior, resolve emotional and interpersonal conflicts, develop and use social networks and resources, and maintain achieved capacities and strengths. This goal rests on the fundamental belief in the dignity of all human beings and in communal responsibility for all members of the multicultural society.

Program goals

Flowing from the mission of the School of Social Work and guided by the principles of promoting social justice, human rights, diversity, cultural

competence/sensitivity and ethical practice, the goals of the M.S.W. program are:

1. To provide for a generalist knowledge, skills, ethics and values essential for work with individuals, families, groups, communities and organizations
2. To provide for a program that prepares students for work in concentration areas of specialization in either clinical social work or social work administration, planning and policy practice in a range of settings
3. To provide for an educational environment where students apply the profession's values and ethical principles
4. To provide for an educational environment where students gain a greater understanding of implications of diversity through education on identifying cultural strengths and ways to counteract individual and institutional prejudice, oppression and discrimination
5. To provide for an educational environment where students apply research methods to analyze and critically evaluate professional practice, programs and service delivery systems
6. To provide for an educational environment where students gain a greater understanding of advocacy and involvement in advocacy to affect social and economic justice

Program competencies

Competency 1 – Demonstrate ethical and professional behavior

Competency 2 – Engage diversity and difference in practice

Competency 3 – Advance human rights and social, economic and environmental justice

Competency 4 – Engage in practice-informed research and research-informed practice

Competency 5 – Engage in policy practice

Competency 6 - Engage with individuals, families, communities and organizations

Competency 7 – Assess individuals, families, groups, organizations and communities

Competency 8 – Intervene with individuals, families, groups, organizations and communities

Competency 9 – Evaluate with individuals, families, groups, organizations and communities

VCU Graduate Bulletin, VCU Graduate School and general academic policies and regulations for all graduate students in all graduate programs

The VCU Graduate Bulletin website documents the official admission and academic rules and regulations that govern graduate education for all graduate programs at the university. These policies are established by the graduate faculty of the university through their elected representatives to the University Graduate Council.

It is the responsibility of all graduate students, both on- and off-campus, to be familiar with the VCU Graduate Bulletin as well as the Graduate School website (<http://www.graduate.vcu.edu/>) and academic

regulations in individual school and department publications and on program websites. However, in all cases, the official policies and procedures of the University Graduate Council, as published on the VCU Graduate Bulletin and Graduate School websites, take precedence over individual program policies and guidelines.

Visit the **academic regulations section** for additional information on academic regulations for graduate students. (p. 17)

Degree candidacy requirements

A graduate student admitted to a program or concentration requiring a final research project, work of art, thesis or dissertation, must qualify for continuing master’s or doctoral status according to the degree candidacy requirements of the student’s graduate program. Admission to degree candidacy, if applicable, is a formal statement by the graduate student’s faculty regarding the student’s academic achievements and the student’s readiness to proceed to the final research phase of the degree program.

Graduate students and program directors should refer to the following degree candidacy policy as published in the VCU Graduate Bulletin for complete information and instructions.

Visit the **academic regulations section** for additional information on degree candidacy requirements. (p. 26)

Graduation requirements

As graduate students approach the end of their academic programs and the final semester of matriculation, they must make formal application to graduate. No degrees will be conferred until the application to graduate has been finalized.

Graduate students and program directors should refer to the following graduation requirements as published in the Graduate Bulletin for a complete list of instructions and a graduation checklist.

Visit the **academic regulations section** for additional information on graduation requirements. (p. 32)

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)

Admission requirements

| Degree: | Semester(s) of entry: | Deadline dates: | Test requirements: |
|---------|---|-------------------|--------------------|
| M.S.W. | Fall (regular standing formats – all on-campus part- and full-time) | Third Wed in Jan | |
| | Advanced standing on-campus: summer only | Second Wed in Nov | |

Online formats: Key application
spring, summer deadlines vary;
and fall see <https://onlinesocialwork.vcu.edu/admissions/key-dates-deadlines>
(<https://onlinesocialwork.vcu.edu/admissions/key-dates-deadlines/>)

Special requirements

- The School of Social Work requires a specific outline for the professional statement that is different from what is shown in the graduate admissions website. Please visit the School of Social Work website for this specific information.

Full-time and part-time on-campus applicants are admitted to begin study in the fall semester. Full-time and part-time online applicants are admitted in fall, spring and summer terms. Advanced standing applicants are admitted for the summer session. At the time of application, applicants may apply for one of the following: full-time and part-time on-campus (Richmond), full-time and part-time distance education or advanced standing. Application forms and instructions for applying to all graduate programs are available on the **Graduate Admissions website**.

In addition to the **general admission requirements of the VCU Graduate School**, the School of Social Work has established the following minimum criteria for admission to the 60-credit hour full-time or part-time format:

1. A bachelor’s degree from an accredited college or university
2. A cumulative GPA of 3.0 on a 4.0 scale for all undergraduate course work
3. Completion of the following prerequisites: two three-credit courses in the social and behavioral sciences (e.g., psychology, sociology, anthropology, political science, economics), or health sciences, biological sciences or humanities.

Applicants who have not completed all the liberal arts prerequisites may be considered for admission but must have completed the prerequisite courses prior to enrollment and must provide official transcripts to document their completion. Courses may be completed at a community college or four-year institution. In addition to the academic requirements, the applicant must demonstrate commitment to social welfare and social justice. This should be reflected in (1) the professional statement and (2) the applicant’s background, social work employment, internships and volunteer work in community agencies serving vulnerable and/or oppressed populations.

General admission procedures

Applications will only be reviewed when they are complete and received by the deadline. This includes the application form, three letters of reference (such as from faculty, employers and/or colleagues who know the applicant’s academic and work/volunteer abilities), official transcripts from all undergraduate and graduate colleges and universities attended, including VCU transcripts from those who are VCU graduates, a **professional statement based upon the outline provided on the M.S.W.**

website and an employment and volunteer experience resume. The applicant is responsible for ensuring that all materials are submitted prior to the application deadline.

Admission to the advanced standing format

The advanced standing option leads to a Master of Social Work degree upon completion of 42 credit hours. Advanced standing begins in late May, continues through the summer and culminates with graduation the following May. The advanced standing option is offered full-time only. Admission to advanced standing is available to a select group of students with a bachelor's degree (B.S.W.) from an undergraduate social work program accredited by the Council on Social Work Education, completed no more than five years prior to the date of application to the M.S.W. program. The minimum requirement for admission to the advanced standing format is a 3.0 GPA on a 4.0 scale for all undergraduate course work. As part of the application packet, applicants must submit their field practicum evaluation(s) and a reference letter from the field practicum faculty. Applicants who meet these criteria will be scheduled for a structured on-campus interview that includes a written case assessment. Refer to the **M.S.W. website** for more information.

Transfer admits

Applicants transferring from other CSWE-accredited M.S.W. programs must submit course syllabi, field practicum evaluations and a statement of good standing from the dean or director of the program from which the student is transferring. These materials must be submitted in addition to the required application form, transcripts, professional statement, resume and reference letters. No more than 30 credit hours will be accepted in transfer, and transfer credit will be awarded in accordance with university policies governing transfer credit and time limits for degree completion.

Applicants from non-social work graduate programs may transfer graduate courses that could count as electives. To do so, they must submit course syllabi for transfer evaluation. A maximum of six credit hours of elective course work may be accepted in transfer from non-social work graduate programs in accordance with Graduate School policies governing transfer credit and time limits for degree completion. Only courses that have not been applied to another degree will be eligible for transfer. No course credit is given for life or work experience.

Course waiver information for new M.S.W. students

Students may request to be waived from courses in the M.S.W. program if they can demonstrate they have satisfactorily completed the equivalent courses. Students must present evidence of content equivalency to the M.S.W. program director and have earned an A or B grade in the courses that are the basis for the waiver request; these courses must have been completed within the past five years. A portfolio process is used to assess equivalency. Graduate students from non-M.S.W. programs, from B.S.W. programs (but not in the advanced standing format), and from B.A., B.S. or other undergraduate programs may be waived from no more than three of the following foundation courses:

| Course | Title | Hours |
|------------------------|---|-------|
| SLWK 601 & SLWK 610 | Human Behavior in the Social Environment I and Human Behavior in the Social Environment II | 6 |
| SLWK 609 | Foundations of Research in Social Work Practice | 3 |

The course waiver does not result in award of credit. Credit may be awarded only through transfer of graduate courses (see Transfer Policy). Students who are granted waivers but not transfer credit hours must take elective courses to fulfill the number of credit hours that have been waived. Students interested in pursuing a waiver for one or more of the specified foundation courses should contact the M.S.W. program office to request the Equivalency Portfolio Form(s) and instructions.

Degree requirements

In addition to general **VCU Graduate School graduation requirements**, the regular standing format for the M.S.W. degree requires the completion of 60 credit hours of graduate study (two years of full-time study). The first 30 credit hours (generalist curriculum) may be taken in one academic year on a full-time basis or may be extended to a maximum of two years in the structured part-time format. To earn the M.S.W. degree in the advanced standing option requires 42 credits of full-time graduate study. Students in advanced standing do not complete the generalist curriculum but instead take 12 credit hours during the summer prior to entering the concentration curriculum.

All students select a concentration for the last 30 credit hours, which can be completed in one academic year on a full-time basis or extended to a maximum of two years in the structured part-time format. Students are usually in a field instruction practicum two days each week during the generalist curriculum and three days each week during the concentration curriculum. Course credit for work or life experience is not granted in lieu of M.S.W. course credit hours.

The purpose of the Master of Social Work program is to prepare graduate-level social workers with mastery of the knowledge, values and skills essential for advanced social work practice in a multicultural society.

The generalist curriculum comprises the first 30 credit hours of the M.S.W. program. The purpose of the generalist practice, in laying the groundwork for concentration study, is to develop the knowledge and skill base necessary to apply and carry out core competencies (relationship building, problem identification, assessment, selecting and planning interventions, implementation, and evaluation) with individuals, families, groups, communities and organizations. Generalist practice emphasizes critical thinking, client strengths, commitment to social work values and ethical principles, self-awareness, professional development, evidence-based decision-making, multicultural competency and social and economic justice. The generalist curriculum includes courses in social work practice, human behavior, social policy, social justice, research and field instruction.

Concentration options

After completion of the generalist year of study or summer studies for advanced standing, M.S.W. students choose an advanced concentration in clinical practice or in administration, planning and policy practice. The concentration curriculum prepares graduates for active roles in practice and program evaluation and in the generation of knowledge for future practice, programs and policy.

Clinical practice concentration

Clinical social work practice involves a mutual problem-solving process in which multidimensional assessment, goal setting, planned intervention and evaluation are prominent components, all of which are informed by current scientific knowledge. All clinical practice is grounded in the values and purposes of the social work profession. The goal of clinical social work is to promote effective coping with life challenges and

transitions. This is achieved by helping people solve problems, change dysfunctional behavior, resolve emotional and interpersonal conflicts, develop and use social networks and resources, and maintain achieved capacities and strengths. This goal rests on the fundamental belief in the dignity of all human beings and in communal responsibility for all members of the multicultural society.

Clinical social work practice takes place in the context of a purposeful relationship. The conscious use of the professional self is central in building and maintaining such relationships. Interventions may involve therapeutic, supportive, educational and resource-management activities. These interventions are based on a process of strengthening and reordering organizational structures in the lives of clients: intrapersonal (including intrapsychic), interpersonal, institutional and/or social.

Curriculum requirements

Generalist courses

| Course | Title | Hours |
|------------------------------|--|-----------|
| SLWK 601 | Human Behavior in the Social Environment I | 3 |
| SLWK 602 | Policy, Community and Organizational Practice I | 3 |
| SLWK 603 | Power, Privilege and Oppression | 3 |
| SLWK 604 | Social Work Practice with Individuals, Families and Groups I | 3 |
| SLWK 605 | Social Work Practice with Individuals, Families and Groups II | 3 |
| SLWK 606 | Policy, Community and Organizational Practice II | 3 |
| SLWK 609 | Foundations of Research in Social Work Practice | 3 |
| SLWK 610 | Human Behavior in the Social Environment II | 3 |
| Select one of the following: | | 6 |
| SLWK 693 & SLWK 694 | Generalist Field Instruction I and Generalist Field Instruction II (Change course title to Generalist Field Instruction I) | |
| SLWK 695 | Block Generalist Field Instruction (Change course title to Block Generalist Field Instruction) ¹ | |
| Total Hours | | 30 |

¹

Part-time students may choose a block field placement in lieu of SLWK 693 and SLWK 694. Only one field placement can be a block placement

Advanced standing option

In the advanced standing option students do not take the generalist courses outlined above, but instead take 12 credit hours in the summer prior to their concentration year that include courses in practice/human behavior, policy and research, in addition to completing a field education course with a field placement that will extend throughout their concentration year of study. The purpose of this curriculum is to enhance and restore understanding of the generalist curriculum content for entering BSW students prior to entering the concentration year.

(Taken summer semester prior to concentration courses)

| Course | Title | Hours |
|--------------------|---|-----------|
| SLWK 607 | Social Work Practice with Individuals, Families and Groups for Advanced-standing Students | 3 |
| SLWK 608 | Social Work Practice in Organizations and Communities for Advanced-standing Students | 3 |
| SLWK 611 | Social Work Research for Advanced-standing Students | 3 |
| SLWK 612 | Advanced Standing Field Instruction | 3 |
| Total Hours | | 12 |

Required clinical concentration courses

| Course | Title | Hours |
|--------------------------------|---|-----------|
| SLWK 703 | Mental, Emotional and Behavioral Disorders | 3 |
| SLWK 704 | Clinical Social Work Practice I | 3 |
| SLWK 705 | Clinical Social Work Practice II | 3 |
| SLWK 706 | Research for Clinical Social Work Practice I | 3 |
| SLWK 707 | Research for Clinical Social Work Practice II | 3 |
| SLWK 710 | Concentration Social Policy | 3 |
| Select one of the following: | | 6 |
| SLWK 793 & SLWK 794 | Concentration Field Instruction I and Concentration Field Instruction II | |
| SLWK 795 | Concentration Block Field Instruction ¹ | |
| SLWK 796 & SLWK 797 & SLWK 798 | Concentration Field Instruction Extended Semesters I and Concentration Field Instruction Extended Semesters II and Concentration Field Instruction Extended Semesters III | |
| Total Hours | | 24 |

¹

Part-time students may choose a block field placement in lieu of SLWK 793 and SLWK 794. Only one field placement can be a block placement.

Electives

| Course | Title | Hours |
|---|-------|----------|
| Complete six additional credit hours of electives chosen from SLWK 717-SLWK 792. Electives from outside the School of Social Work are accepted as part of the combined offerings for dual degrees and certificates. Other electives from outside the school may be accepted with prior approval from the M.S.W. program director. | | 6 |
| Total Hours | | 6 |

The minimum total of graduate credit hours required for this degree is 60.

| Elective | | 3 |
| Term Hours: | | 15 |

Total Hours: 60

The minimum total of graduate credit hours required for this degree is 60.

Students pursuing the Master of Social Work have an opportunity to combine their studies and complete other degree programs offered within the university and some outside institutions in these areas.

Master of Divinity (M.Div)

The combination of the Master of Social Work and the Master of Divinity is a four-year professional program offered by VCU in cooperation with the Samuel DeWitt Proctor School of Theology at Virginia Union University. This dual degree program prepares students for service in occupations where social work and the church's ministries intersect, enabling social workers to perform and evaluate social work practices as they relate to biblical, theological, ethical, educational and pastoral

perspectives. Graduates are equipped for various forms of ministry in which clinical and administrative skills in social work are critical.

This program requires four continuous years of study and leads to an M.S.W. conferred by VCU and a Master of Divinity conferred by VUU. Students need to apply and be accepted to both programs and may begin study at either institution following the approved curriculum plan. Alternately a student may begin at either VCU or the seminary and then, in accordance with application deadlines, apply for admission to the other school during the first year of study.

Application process

Prospective students apply to the VCU School of Social Work and VUU, must meet both sets of admission standards and must be accepted to both programs. For the M.S.W. program, refer to the Admission page (<https://socialwork.vcu.edu/programs/msw/admission.html>) of the M.S.W. website. For information about admission to VUU, contact:

Samuel DeWitt Proctor School of Theology
1500 N. Lombardy St.
Richmond, Virginia 23220
(804) 257-5715

Gender violence intervention certificate

The dual degree Master of Social Work and Certificate in Gender Violence Intervention (p. 569) is a coordinated effort among the L. Douglas Wilder School of Government and Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence.

Application process

Apply online at **VCU Graduate Admissions**. For additional information, contact:

Nicole Lynn Lee, Ph.D.
M.S.W. program director
s2nlee@vcu.edu
(804) 828-6882

Sarah Jane Brubaker, Ph.D.
Director, Gender Violence Intervention Program
sbrubaker@vcu.edu
(804) 827-2400

Juris Doctor (J.D.)

Through a cooperative agreement with the University of Richmond T.C. Williams Law School (<https://lawcatalog.richmond.edu/dual-degree/>), selected students in either school may pursue a dual degree four-year curriculum of graduate study leading to the Master of Social Work and Juris Doctor. This program is established in recognition of the role of public law in social and economic life. The dual degree program prepares professionals to be well-versed in the values, knowledge and skills of both fields, bringing an integrated base of competency to the resolution of human and social problems. The time normally required for completion of the integrated four-year curriculum is one academic year less than if each degree were pursued separately. Elective courses will enable students to select areas in law and social work which meet their particular interests.

Application process

Applicants must successfully meet the admission requirements of both schools and, upon admission, are assigned an adviser in each school.

Students may begin the course work in either school, with the sequence of courses being determined by the point of entry. For more information, contact:

Nicole Lynn Lee, Ph.D.
M.S.W. program director
s2nlee@vcu.edu
(804) 828-6882

John F. Preis, J.D.
Associate dean of academic affairs and professor of law
University of Richmond, T.C. Williams Law School

(804) 287-6398

Nonprofit management certificate

Through a cooperative arrangement with the L. Douglas Wilder School of Government and Public Affairs, M.S.W. students may simultaneously earn the post-baccalaureate graduate Certificate in Nonprofit Management (p. 576) offered by the Wilder School. Students gain knowledge and skills that they will need to become leaders and change agents in this rapidly growing sector.

Application process

To earn a Certificate in Nonprofit management in conjunction with the M.S.W., students will complete a graduate school application for the certificate program and pay the required fee to the university.

Director of nonprofit studies
nbstutts@vcu.edu

Master of Public Health (M.P.H) [dual degree]

Through a collaborative program between the VCU School of Social Work and the Division of Epidemiology in the VCU School of Medicine's Department of Family Medicine and Population Health, students complete a three-year full-time program of study, including summer course work, to obtain the Master of Social Work and Master of Public Health degrees. This dual degree program prepares graduates to work with individuals, families, groups, communities and/or organizations; to advocate for social, health care and economic justice in a diverse and multicultural society; and to promote physical and mental health across the life course. Program details (p. 82) can be found in the dual degree opportunities section of this Bulletin.

School social work certificate

In conjunction with the VCU School of Education, students may meet Virginia Department of Education standards for certification as school social workers in Virginia, while completing requirements for the M.S.W. degree. Students interested in a certification in school social work should contact their advisers during the first semester of the M.S.W. program.

Social Work, Master of (M.S.W.)/Gender Violence Intervention, Certificate in (Post-baccalaureate graduate certificate) [dual degree]

The dual degree Master of Social Work and Certificate in Gender Violence Intervention program is a collaborative effort among the L. Douglas Wilder School of Public Affairs, the School of Social Work and community advocates working in the area of sexual and domestic violence. Master of Social Work students may simultaneously earn the Certificate in Gender Violence Intervention offered by the L. Douglas Wilder School of Government and Public Affairs. The certificate requires a total of 15 credit hours.

To enroll in the Certificate in Gender Violence Intervention simultaneously with the M.S.W., students must complete a graduate application for the certificate program and pay the required fee to Graduate Admissions; however, no supporting information is required for students who are already enrolled in good standing in the M.S.W. program.

Applicants will need to complete an online application through Graduate Admissions (<https://www.vcu.edu/admissions/apply/graduate/>), pay the application fee and submit a personal statement expressing their interest in the program and indicating that they are currently in the M.S.W. program. Students may email the Graduate School (gradmail@vcu.edu) to arrange for references, resume/CV and transcripts already on file from the M.S.W. program to be added to the application.

Additional information may be obtained from Virginia Commonwealth University, School of Social Work, Box 842027, Richmond, VA 23284-2027, Attention: Elizabeth Cramer, Ph.D., [ecramer@vcu.edu; (804) 828-9027], Certificate in Gender Violence Intervention Adviser. Detailed information about the Certificate in Gender Violence Intervention is available from Sarah Jane Brubaker, Ph.D., Wilder School [sbrubaker@vcu.edu; (804) 827-2400]. Certificate courses can be completed after M.S.W. degree requirements have been completed as long as there is continuous enrollment. All M.S.W. students interested in the certificate should check the course schedule for changes and other course offerings.

See the individual program pages (<http://bulletin.vcu.edu/graduate/school-government-public-affairs/gender-violence-intervention-certificate/>) for specific admission requirements, application deadlines, program goals, student learning outcomes, degree requirements and graduation requirements for the M.S.W. and Certificate in Gender Violence Intervention programs.

Apply online today. (<https://www.vcu.edu/admissions/apply/graduate/>)
