TABLE OF CONTENTS

Table of Contents	2	Grade exculsion policy	25
Undergraduate Bulletin	10	Repeated courses	25
About VCU	11	Change of academic program	25
Administration	11	Undergraduate registration	26
Accreditation	11	Undergraduate degree requirements	27
Mission statement	11	Enrollment categories	28
Oak Ridge Associated Universities Consortium	12	Nondegree-seeking student guidelines	28
VCU Health System Authority	12	Medical leave of absence	29
Board of Visitors	12	Graduation information	30
Determination of student classification for in-state tuition purposes	12	Undergraduate study	32
Rights of students under the Family Educational Rights and Privacy Act	13	Admission to the university	32
Consumer information	13	Admission guidelines	32
Academic regulations	14	International admissions	33
Universitywide regulations	14	Admission procedures	33
Current mailing address	14	Freshman application deadlines	34
Attendance	14	Admission notification	34
Course drop vs. withdrawal	14	Admission guidelines for transfer students	34
Student conduct in the classroom	15	Transfer application deadlines	37
Grade review procedures	15	Evaluation of transfer credit	37
VCU Honor System	16	Additional sources of academic credit	38
Consumer information	16	Senior Citizens Higher Education Program	45
Immunizations	16	Enrichment and acceleration opportunities	46
Transcripts	17	Orientation	46
Degree requirements	17	Readmission guidelines	46
Termination of enrollment	17	The Honors College and guaranteed admission	47
Course information	17	Tuition, fees and expenses	47
Grading and marking	18	Financial aid	53
Posthumous degrees	20	Academic advising	57
University right to revocation	21	First-year students	57
Leave of absence	21	Undeclared students	57
Withdrawal from the university	21	Transfer students	58
Effective bulletin	21	Pre-health majors	59
Degree Works	22	Pre-health major in clinical radiation sciences	59
Undergraduate-only regulations	22	Pre-health major in dental hygiene	61
Academic Regulations Appeals Committee	22	Pre-health major in medical laboratory sciences	63
Undergraduate classification	22	Pre-health major in nursing	65
Degree definitions	23	Pre-health and pre-law advising tracks	67
Continuance in undergraduate programs	24	Preparation for the study of dentistry	67
		Preparation for the study of medicine	68
		Preparation for the study of occupational therapy	70
		Preparation for the study of optometry	71
		Preparation for the study of pharmacy	72

Preparation for the study of physical therapy	73	Department of Mechanical and Nuclear Engineering	126
Preparation for professional studies for physician assistant	74	Mechanical Engineering, Bachelor of Science (B.S.)	126
Preparation for professional studies in veterinary medicine	75	Mechanical Engineering, Bachelor of Science (B.S.) with a concentration in nuclear engineering	129
Nondegree-seeking students	76	Mechanical engineering, minor in	132
Advising after the first year	76	College of Health Professions	133
Learning support	77	Administration	133
General education curriculum	77	Accreditation	133
REAL initiative	81	Philosophy	133
Accelerated bachelor's-to-master's programs	81	Programs	134
College of Engineering	83	Licensure/certification	134
Administration	83	Attendance regulations	134
Accreditation	83	Student performance and behavior	134
Degree programs	83	Financial aid	135
Undergraduate information	84	Undergraduate information	135
Cooperative education program	84	Health Services, Bachelor of Science (B.S.)	135
Double major in engineering and physics	85	Department of Medical Laboratory Sciences	137
Dual degree opportunities	86	Medical Laboratory Sciences, Bachelor of Science (B.S.)	138
Department of Biomedical Engineering	87	Department of Radiation Sciences	140
Biomedical Engineering, Bachelor of Science (B.S.)	87	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in diagnostic medical sonography	141
Department of Chemical and Life Science Engineering	91	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in diagnostic medical sonography (second modality)	142
Chemical and Life Science Engineering, Bachelor of Science (B.S.) with a concentration in chemical engineering	91	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in nuclear medicine technology	144
Chemical and Life Science Engineering, Bachelor of Science (B.S.) with a concentration in life science engineering	95	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in nuclear medicine technology (degree completion)	146
Chemical and life science engineering, minor in	98	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in nuclear medicine technology (second modality)	148
Department of Computer Science	98	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiation therapy	150
Computer Science, Bachelor of Science (B.S.)	99	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiation therapy (degree completion)	152
Computer Science, Bachelor of Science (B.S.) with a concentration in cybersecurity	103	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiation therapy (second modality)	153
Computer Science, Bachelor of Science (B.S.) with a concentration in data science	107	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiography	155
Computer Science, Bachelor of Science (B.S.) with a concentration in software engineering	111	Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiography (degree completion)	157
Computer Science, Certificate in (Post-baccalaureate undergraduate certificate)	116	College of Humanities and Sciences	159
Fundamentals of Computing, Certificate in (Undergraduate certificate)	116	Administration	159
Computer science, minor in	117	Accreditation	159
Department of Electrical and Computer Engineering	117	Undergraduate information	159
Computer Engineering, Bachelor of Science (B.S.)	117		
Electrical Engineering, Bachelor of Science (B.S.)	121		
Computer engineering, minor in	125		
Electrical engineering, minor in	125		

Department of African American Studies	161	LGBT+ and queer studies, minor in	209
African American Studies, Bachelor of Arts (B.A.)	162	Department of History	210
African American Studies, Bachelor of Arts (B.A.) with a concentration in artistic, historical and literary perspectives	165	History, Bachelor of Arts (B.A.)	210
African American Studies, Bachelor of Arts (B.A.) with a concentration in political, religious and societal perspectives	167	History, minor in	212
African American Studies, Bachelor of Arts (B.A.) with a concentration in social and behavioral perspectives	169	Medical humanities, minor in	212
African American studies, minor in	171	Department of Kinesiology and Health Sciences	212
Department of Biology	171	Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in exercise science	213
Biology, Bachelor of Science (B.S.)	172	Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in health science	216
Biology, minor in	175	Health Sciences, Certificate in (Post-baccalaureate undergraduate certificate)	218
Department of Chemistry	176	Department of Mathematics and Applied Mathematics	219
Chemistry, Bachelor of Science (B.S.) with a concentration in biochemistry	176	Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in applied mathematics	220
Chemistry, Bachelor of Science (B.S.) with a concentration in chemical modeling	179	Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in biomathematics	223
Chemistry, Bachelor of Science (B.S.) with a concentration in chemical science	181	Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in general mathematical sciences	227
Chemistry, Bachelor of Science (B.S.) with a concentration in professional chemist	185	Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in mathematics	230
Chemistry, Bachelor of Science (B.S.) with a concentration in professional chemist with honors	187	Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in secondary teacher preparation	233
Chemistry, minor in	190	Mathematics, minor in	236
Department of English	190	Department of Military Science and Leadership	236
English, Bachelor of Arts (B.A.)	190	Department of Philosophy	236
American studies, minor in	194	Philosophy, Bachelor of Arts (B.A.)	237
British studies, minor in	195	Philosophy, Bachelor of Arts (B.A.) with a concentration in ethics and public policy	238
Creative writing, minor in	195	Philosophy, Bachelor of Arts (B.A.) with a concentration in philosophy and law	240
English, minor in	196	Philosophy, Bachelor of Arts (B.A.) with a concentration in philosophy and science	242
Professional writing and editing, minor in	197	Philosophy, minor in	245
Department of Forensic Science	197	Philosophy of law, minor in	245
Forensic Science, Bachelor of Science (B.S.) with a concentration in forensic biology	197	Department of Physics	245
Forensic Science, Bachelor of Science (B.S.) with a concentration in forensic chemistry	200	Physics, Bachelor of Science (B.S.)	245
Forensic Science, Bachelor of Science (B.S.) with a concentration in physical evidence	202	Physics, Bachelor of Science (B.S.) with a concentration in nanoscience	248
Department of Gender, Sexuality and Women's Studies	204	Physics, Bachelor of Science (B.S.) with a concentration in pre- medical	250
Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.)	205	Accelerated Bachelor of Science (B.S.) in Physics and Master of Science (M.S.) in Physics and Applied Physics	251
Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.) with a concentration in health, society and social justice	207	Physics, minor in	252
Gender, sexuality and women's studies, minor in	209	Department of Political Science	252

Political Science, Bachelor of Arts (B.A.) with a concentration in civil rights	252	Economics Program	307
Political Science, Bachelor of Arts (B.A.) with a concentration in comparative politics	255	Economics, Bachelor of Science (B.S.) [College of Humanities and Sciences]	308
Political Science, Bachelor of Arts (B.A.) with a concentration in human security	258	Economics, minor in	311
Political Science, Bachelor of Arts (B.A.) with a concentration in international relations	262	Interdisciplinary Degree Program in Science	311
Political Science, Bachelor of Arts (B.A.) with a concentration in political theory and methodology	265	Science, Bachelor of Science (B.S.) with a concentration in biology	311
Political Science, Bachelor of Arts (B.A.) with a concentration in politics and government	268	Science, Bachelor of Science (B.S.) with a concentration in chemistry	315
Political Science, Bachelor of Arts (B.A.) with a concentration in public policy and administration	271	Science, Bachelor of Science (B.S.) with a concentration in physics	318
Political Science, Bachelor of Arts (B.A.) with a concentration in U.S. government	274	Science, Bachelor of Science (B.S.) with a concentration in professional science	320
Nonprofit management and administration, minor in	277	Richard T. Robertson School of Media and Culture	324
Political science, minor in	277	Mass Communications, Bachelor of Science (B.S.) with a concentration in advertising/creative	325
Public management, minor in	277	Mass Communications, Bachelor of Science (B.S.) with a concentration in advertising/strategic	327
Department of Psychology	278	Mass Communications, Bachelor of Science (B.S.) with a concentration in journalism/broadcast	330
Psychology, Bachelor of Science (B.S.)	279	Mass Communications, Bachelor of Science (B.S.) with a concentration in journalism/digital	332
Psychology, Bachelor of Science (B.S.) with a concentration in addiction studies	283	Mass Communications, Bachelor of Science (B.S.) with a concentration in media production	334
Psychology, Bachelor of Science (B.S.) with a concentration in applied psychology	286	Mass Communications, Bachelor of Science (B.S.) with a concentration in public relations	336
Psychology, Bachelor of Science (B.S.) with a concentration in life science	288	Media studies, minor in	338
Psychology, Bachelor of Science (B.S.) with a concentration in pre-graduate school	291	School of World Studies	339
Psychology, Bachelor of Science (B.S.) with a concentration in urban psychology	293	Anthropology, Bachelor of Science (B.S.)	340
Psychology, minor in	295	Foreign Language, Bachelor of Arts (B.A.) with a concentration in dual languages	343
Department of Sociology	295	Foreign Language, Bachelor of Arts (B.A.) with a concentration in French	345
Sociology, Bachelor of Science (B.S.)	296	Foreign Language, Bachelor of Arts (B.A.) with a concentration in German	348
Sociology, minor in	298	Foreign Language, Bachelor of Arts (B.A.) with a concentration in Spanish	352
Department of Statistical Sciences and Operations Research	299	International Studies, Bachelor of Arts (B.A.) with a concentration in European studies	355
Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in operations research	299	International Studies, Bachelor of Arts (B.A.) with a concentration in general studies	358
Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in statistics	303	International Studies, Bachelor of Arts (B.A.) with a concentration in international social justice studies	360
Statistics, Certificate in (Post-baccalaureate undergraduate certificate)	307	International Studies, Bachelor of Arts (B.A.) with a concentration in Latin American studies	363
Statistics, minor in	307	International Studies, Bachelor of Arts (B.A.) with a concentration in world cinema	366
Bachelor of Interdisciplinary Studies Program	307	Religious Studies, Bachelor of Arts (B.A.)	368
Interdisciplinary Studies, Bachelor of (B.I.S.) with a liberal studies for early and elementary education major [College of Humanities and Sciences]	307		

Spanish/English Translation and Interpretation, Certificate in (Undergraduate certificate)	370	Craft and material studies, minor in	397

UNDERGRADUATE BULLETIN

The Virginia Commonwealth University bulletins are published yearly for each of the student populations served by the institution. The Undergraduate Bulletin contains information about university policies, course descriptions and academic requirements for the programs offered to undergraduate students.

ABOUT VCU

Located in the heart of Richmond, the capital of Virginia since 1779, Virginia Commonwealth University serves an integral role in the economic health of the city and the state, educating the current and future workforce, reaching out to the community, advancing research and enhancing patient care.

VCU was founded in 1838 as the medical department of Hampden-Sydney College, becoming the Medical College of Virginia in 1854. In 1968, the General Assembly merged MCV with the Richmond Professional Institute, founded in 1917, to create Virginia Commonwealth University.

Today, VCU offers comprehensive undergraduate, master's, doctoral and professional programs and encompasses one of the largest academic health centers in the nation. With \$335 million in externally funded research awards for the 2020 fiscal year, VCU is one of only 71 institutions in the country with an academic medical center to be designated by the Carnegie Foundation as "Community Engaged" with "Highest Research Activity." Its centers and institutes of excellence support the university's research mission and involve faculty from multiple disciplines in the arts, public policy, biotechnology and health care discoveries.

VCU enrolls more than 29,000 students in more than 200 degree and certificate programs in the arts, sciences and humanities. Twenty-two of the programs are unique in Virginia, many of them crossing the disciplines of VCU's 11 schools and five colleges. VCU has a full-time instructional faculty of more than 2,500 who are nationally and internationally recognized for excellence in the arts, business, education, engineering, the humanities, the life sciences, social work and all the health care professions. With more than 23,000 employees, VCU and VCU Health also have a significant impact on Central Virginia's economy.

Through the guidance of its strategic plan, Quest 2025, VCU is working to meet the demands of diverse populations through impactful research and creativity, rigorous study, and extensive community engagement and is taking its place among the nation's premier urban, public research universities.

VCU and the VCU Health System have been honored with prestigious national and international recognition for top-quality graduate, professional and medical-care programs, reflecting a commitment to be among America's top research universities, supporting students, faculty and the VCU community.

Nondiscrimination

VCU does not discriminate in admissions, treatment, employment or access to its programs or activities on the basis of race, color, religion, national origin (including ethnicity), age, sex (including pregnancy, childbirth and related medical conditions), parenting status, marital status, political affiliation, veteran status, genetic information (including family medical history), sexual orientation, gender identity, gender expression or disability, consistent with applicable law.

VCU's notice of nondiscrimination and nondiscrimination policies, with contact information for the office and individuals responsible for enforcement, are in the university's policy library (<https://policy.vcu.edu/>).

Administration

VCU administration provides leadership and organizational structure for the university, overseeing its goals and mission. Refer to each unit's website (<http://atoz.vcu.edu/administration/>) for a current listing of administrators.

Deans

Deans provide leadership for their respective school or college. Refer to each unit's website (<http://atoz.vcu.edu/academic+departments/organizations/>) for a current listing of its deans, departmental chairs and program heads.

Accreditation

Virginia Commonwealth University is accredited by the Southern Association of Colleges and Schools Commission on Colleges to award baccalaureate, master's and doctoral degrees. Questions about the accreditation of VCU may be directed in writing to the Southern Association of Colleges and Schools Commission on Colleges at 1866 Southern Lane, Decatur, GA 30033-4097, by calling (404) 679-4500, or by using information available on SACSCOC's website (<https://www.sacscoc.org/>).

Mission statement

Virginia Commonwealth University and its academic health sciences center serve as one national urban public research institution dedicated to the success and well-being of our students, patients, faculty, staff and community through:

- Real-world learning that furthers civic engagement, inquiry, discovery and innovation
- Research that expands the boundaries of new knowledge and creative expression and promotes translational applications to improve the quality of human life

- Interdisciplinary collaborations and community partnerships that advance innovation, enhance cultural and economic vitality, and solve society's most complex challenges
- Health sciences that preserve and restore health for all people, seek the cause and cure of diseases through groundbreaking research and educate those who serve humanity
- Deeply engrained core values of diversity, inclusion and equity that provide a safe, trusting and supportive environment to explore, create, learn and serve

Oak Ridge Associated Universities Consortium

Since 1963, students and faculty have benefited from VCU's membership in Oak Ridge Associated Universities, a consortium of 115 colleges and universities and a contractor for the U.S. Department of Energy. ORAU works with its member institutions to help students and faculty gain access to federal research facilities, to keep its members informed about opportunities for scholarship and research appointments and to organize research alliances among its members.

Faculty, graduate students and undergraduate students may access a wide range of opportunities for study and research, including the Lindau-Nobel Laureates and Powe Junior Faculty programs. Many of these programs are designed to increase the numbers of underrepresented minority students pursuing degrees in science- and engineering-related disciplines.

For more information about ORAU and its programs, contact:

- P. Srirama Rao, Ph.D., ORAU Councilor for VCU
(804) 827-2262
- Monnie E. Champion, ORAU Corporate Secretary
(865) 576-2206

Interested parties may also visit the ORAU website at [orau.org](http://www.orau.org) (<http://www.orau.org>).

VCU Health System Authority

In April 1996, Gov. George Allen signed legislation that established the Medical College of Virginia Hospitals Authority. Effective July 1, 1997, the operations, employees and obligations of MCV Hospitals (formerly a division of VCU) were transferred to the Authority. Three years later, in connection with legislation signed by Gov. James Gilmore, the MCV Hospitals Authority became the Virginia Commonwealth University Health System Authority. The clinical activities of MCV Hospitals, MCV Physicians and the VCU School of Medicine are now coordinated and integrated by and through VCU Health.

The VCU Health System Authority is charged by statute with the missions of operating MCV Hospitals as teaching hospitals for the benefit of the health sciences schools of VCU, providing high quality patient care and providing a site for medical and biomedical research, all of which missions are required to be performed in close affiliation with the Office of the Vice President for Health Sciences. VCU's vice president for health sciences also serves as the CEO of the VCU Health System Authority, and five VCU faculty physicians serve as members of the VCU Health board of directors.

Board of Visitors

The Board of Visitors is the voting body of Virginia Commonwealth University. Each year, the governor of Virginia appoints members. Refer to Office of the President's website (<http://www.president.vcu.edu/board/>) for a current listing of board members.

Determination of student classification for in-state tuition purposes

Tuition is determined by the number of credit hours a student is taking, the student's residency classification, course of study and classification level. For in-state tuition benefits, the student must comply with the Code of Virginia (<https://law.lis.virginia.gov/vacode/title23.1/chapter5/>) regulations relative to in-state tuition and reduced rate tuition eligibility.

All applicants to VCU who wish to be considered for in-state tuition rates as Virginia residents must submit the Application for Virginia In-state Tuition Rates. This application is a part of the admissions packet and the nondegree-seeking student enrollment package. The residency determination of the applicant is conveyed at the time of admission as a degree-seeking student or nondegree-seeking student.

New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency determination by completing an Application for Change of Domicile available from the Office of Records and Registration (online). The student must present clear and convincing evidence that they are not residing in the state primarily to attend school. The application deadline is the end of the add/drop period of the semester, and it is the responsibility of the student to establish or to file an appeal to change their residency classification prior to the start of classes for the semester under consideration. In accordance with the Code of Virginia, applications received after the deadline must be considered for the next semester. Submit completed applications with documentation to the university residency appeals officer. Processing may require four to six weeks; therefore it is strongly recommended that applications be submitted earlier than the stated deadline.

The university's service to students is limited to assuring that they understand the procedures for appealing and that they have access to information about the relevant sections of the Code of Virginia. The university provides information about the steps of the process and access to the applicable sections of the statute and the associated guidelines. The university provides qualified staff to review the appeals and make decisions based on the information students provide. The university representative cannot provide advisement to students as to how to present their case for review; neither can they become the student's advocate since these university representatives must make the decision.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Office of Student Accounting. Students denied this status are also notified by mail. The denial letter informs the student of procedures for appeal of this decision, to include filing an appeal with the university residency appeals committee. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Please note that a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

Rights of students under the Family Educational Rights and Privacy Act

Pursuant to a federal statute enacted to protect the privacy rights of students (Family Educational Rights and Privacy Act of 1974 [FERPA], as amended, enacted as Section 438 of the General Education Provisions Act), eligible students of Virginia Commonwealth University are permitted to inspect and review education records of which the student is the subject. A statement of university policy concerning inspection and disclosure of education records has been formulated in compliance with the federal statute. Copies of the policy also are available from the Office of Records and Registration with additional information on their website (<https://rar.vcu.edu/records/family-educational-rights-and-privacy-act/>).

Generally, the act provides that no personally identifiable information will be disclosed without the student's consent, except for directory information and information to other school officials with a legitimate educational interest. When personally identifiable information, other than directory information, is disclosed, a record will be maintained of these disclosures. This record also is available for inspection and review by the student.

If an eligible student feels that his or her education record is inaccurate, misleading or otherwise in violation of the student's privacy or other rights, the student may request an amendment to the record.

Should the university fail to comply with the requirements of the act, the student has the right to file a complaint with the Family Policy Compliance Office, U.S. Department of Education, 400 Maryland Ave., S.W., Washington, D.C. 20202-5901.

Parental notification amendment

Amendments to FERPA signed into federal law in fall 1998 specifically allow notification to the parents or guardians of students under the age of 21 who violate any law or university rule regarding use or possession of alcohol or other controlled substance. The Virginia Attorney General's Task Force on Drinking by College Students also recommended such notification in its 1998 report.

In accordance with these documents, a parental notification procedure has been included in the VCU Drug Free Schools and Workplace Policy.

Consumer information

The federal Higher Education Opportunity Act of 2008 requires that institutions of higher education disclose certain consumer information to current students, prospective students, current employees and/or prospective employees. This consumer information (<https://irds.vcu.edu/consumer-info/>) for VCU is maintained by the Office of Institutional Research and Decision Support.

ACADEMIC REGULATIONS

This section of the Bulletin covers academic regulations and includes universitywide policies, which pertain to all students, as well as those specific to undergraduates and graduate students.

It is the responsibility of all students, both on- and off-campus, to be familiar with the academic regulations in individual school and department publications and on program websites; however, in all cases, the official policies and procedures of the university, as published on this website, take precedence over individual program policies and guidelines.

Students are also subject to any policy changes approved by the university for immediate implementation and published on the Bulletins website for the current academic year.

Universitywide regulations

Regulations presented in this section apply to all VCU students unless otherwise noted. Use the navigation to the left to see additional regulations that are specific to the level of study.

Current mailing address

Every VCU student is responsible for keeping a current mailing address on file with the Office of Records and Registration. Please verify your current address on eServices (<https://my.vcu.edu>).

If a student's mailing address is not accurate, the student should use eServices (<https://my.vcu.edu>) to make changes. Students may also submit any change of address in writing to the Office of Records and Registration, Harris Hall, Box 842520, Richmond, VA 23284-2520 or in person at the Records and Registration Student Services Center in Harris Hall, 1015 Floyd Ave, 1st Floor, Room 1004.

All official mailings are sent to the permanent address on file in the Office of Records and Registration.

Email is considered an official method for communication at VCU because it delivers information in a convenient, timely, cost-effective and environmentally aware manner. Mail sent to a student's VCU email address may include notification of university-related actions, including disciplinary action. Students who use email addresses other than their required name@vcu.edu email address also must check their name@vcu.edu address frequently for official messages from the university.

Attendance

The instructional programs at VCU are based upon a series of class meetings involving lectures, discussions, field experiences, special readings and reporting assignments. Therefore it is important for each student to be in attendance on a regular basis. A student who misses a class session is responsible for completing all material covered or assignments made during the absence.

Students must be informed in writing of the attendance requirements and the corresponding consequences of poor attendance for the courses and/or program in which they are enrolled. Though the attendance requirements may vary widely from one course to another, students must abide by these requirements. Students cannot enroll in two courses

that meet concurrently without written approval from the chair of each department involved.

Consequences of poor attendance

Students having attendance problems should contact the instructor to explain the reasons for nonattendance and to discuss the feasibility of continuing in the course. If the student has fallen so far behind that the successful completion of the course is impossible, the student should withdraw from the course before the withdrawal deadline as published in the VCU academic calendar (<https://academiccalendars.vcu.edu/>).

If the student continues to miss class and does not officially withdraw from the course, the instructor may withdraw the student for nonattendance with a mark of W before the withdrawal deadline as published in the VCU academic calendar (<https://academiccalendars.vcu.edu/>) or may assign an academic grade at the end. Withdrawals are not permitted after the published withdrawal deadline. For classes that do not conform to the semester calendar, the final withdrawal date occurs when half of the course has been completed. Withdrawal dates for summer session classes are provided on the Summer Studies Calendar (<http://www.summer.vcu.edu/calendar/>).

Religious observances

It is the policy of VCU to accord students, on an individual basis, the opportunity to observe their traditional religious holidays. Students wishing to observe a religious holiday of special importance must provide advance written notification to each instructor by the end of the second week of classes. On these dates, instructors are encouraged to avoid scheduling one-time-only activities that cannot be replicated. Through such strategies as providing alternative assignments or examinations, granting permission for audio or video recordings or the use of the Internet, faculty members are expected to make reasonable academic accommodations for students who are absent because of religious observance.

Mandated short-term military training

Students called to report for mandated military training must provide advance written notification to each instructor several weeks in advance of training. Faculty members are expected to make reasonable academic accommodations for students who are absent because of mandated short-term military training (short-term is defined as several days not to exceed two weeks).

Course drop vs. withdrawal

A student may drop a class through the end of the add/drop registration period. When a class is dropped, the registration and associated tuition/fee charges are cancelled. Drop charges are removed to indicate that the student never attended the class or never attended the class beyond the add/drop registration period.

A student may withdraw from a class up to the withdrawal deadline as published in the university academic calendar (<http://www.vcu.edu/academiccalendars/>). Withdrawal from a course does not cancel the registration or the associated tuition/fee charges and results in the assignment of the grade of W. Refunds, if applicable, are issued in accordance with procedures described in the refunds section of the tuition and student fees (<http://bulletin.vcu.edu/graduate/study/graduate-tuition-student-fees/drop-vs-withdraw/>) section of this bulletin.

In both situations, any financial aid already disbursed to the student's account based on the original course registration will be assessed and

adjusted according to the university refund policy and may result in a balance due to the university.

Student conduct in the classroom

The instructional program at VCU is based upon the premise that students enrolled in a class or clinic are entitled to receive instruction free from interference by other students. Accordingly, in classrooms, laboratories, studios and other learning areas, students are expected to conduct themselves in an orderly and cooperative manner so that the faculty member can proceed with customary instruction. Faculty members (including graduate teaching assistants) may set reasonable standards for classroom behavior in order to meet these objectives. If a student believes that the behavior of another student is disruptive, the faculty member should be informed.

If a faculty member believes that a student's behavior is disrupting the class and interfering with normal instruction, the faculty member may direct the student to leave the class or clinic for the remainder of the class period. In such circumstances, the faculty member is the sole judge that the student's behavior is sufficiently disruptive to warrant a temporary dismissal from the classroom or clinic. Disruptive behavior on the part of the student may result in the filing of formal charges under the university's Rules and Procedures document (<https://policy.vcu.edu/universitywide-policies/policies/rules-and-procedures.html>).

Grade review procedures

Students have a right to appeal course grades they consider to have been arbitrarily or capriciously assigned or assigned without regard for the criteria, requirements and procedures of the course stated in the syllabus or guidelines for assignments. Grades determined by actions under authority of the VCU Honor System may not be appealed through this procedure, nor may dismissals that have occurred as a result of correctly derived course grades.

Though the faculty has the responsibility for assigning grades on the basis of academic criteria, such grade designations can sometimes raise conflicts. Thus, while affirming the importance of maintaining standards of excellence and the integrity of the teaching/learning process, the university and its faculty also recognize that, on occasion, grades may be inappropriately assigned. Should such conflicts occur, students have a right to be fairly heard. When discrepancies occur concerning the grading process, the welfare and integrity of both faculty and students are equally important. This document is in no way intended to compromise the work of the faculty.

The faculty member (or members, in the case of a jointly taught course) bear the responsibility for specifying in writing at the beginning of each class section the formal requirements of the course and the weights that will be employed in determining the final course grade. The faculty member(s) shall apply relevant grading criteria uniformly to all members of the class.

Grades received through the grade review procedure are final and may not be appealed.

Initiating an appeal

When a student has evidence that a final grade has not been assigned in accordance with the stated criteria, the student shall discuss it first with the faculty member. The faculty member will explain how the final grade was determined. If the student continues to feel that the grade was incorrectly assigned, a written appeal may be submitted to the chair

of the department in which the course was taught. Students appealing grades assume the burden of proof. The appeal shall state and support with all available evidence the reasons why the student believes the grade should be changed. For grades awarded for the fall semester, the written intent to appeal must be submitted no later than 14 calendar days after the beginning of the spring semester. For grades awarded for the spring semester or summer sessions, the written intent to appeal must be submitted no later than 14 calendar days after the first day of the fall semester. For schools that have a summer session or other less common sessions, school policies may specify other deadlines to ensure a timely appeal. Appeals submitted after the deadline will be heard only in exceptional cases, as determined by the appropriate vice president.

The grade issued by the faculty member shall remain in effect throughout the appeal procedure. In instances in which the failing grade is in a prerequisite course in which safety or well-being of clients, patients or the public is involved, the student shall not be allowed to enroll in the subsequent courses in which safety and well-being may be at issue until and unless the appeal is resolved in the student's favor. In these cases, the student who wishes to appeal is advised to do so as soon as possible and it is the responsibility of the school to move the appeal process expeditiously.

Mediation

The chair of the department shall attempt to mediate an amicable solution within two weeks of receipt of the written appeal. If the complaint is not resolved, the chair shall forward the student's appeal to the dean (or appropriate associate/assistant dean)¹ of the school in which the course was taught. The chair also shall submit to the dean in writing the recommendation made to the two parties regarding the appropriateness of the grade. If the grade being appealed was assigned by the chair of the department, the dean shall assume the mediation responsibility. If the grade being appealed was assigned by the dean, the mediation responsibility will fall to the appropriate vice president.

¹In instances in which the dean of the school chooses for the appropriate associate/assistant dean to manage the grade appeal, the term "associate/assistant dean" may be substituted for the term "dean" throughout this document.

Grade review committee

The dean shall form a grade review committee and designate the chair. The committee has the option of either raising the grade or leaving the grade unchanged.

The committee shall consist of one nonvoting faculty chair, two faculty members and two students selected by the dean from disciplines whose methods and techniques of teaching and testing are as similar as possible to those of the discipline of the course in question. If the course is multidisciplinary and the instructor(s) whose grade is being appealed does not belong administratively in the school in which the course was taught, the committee shall have at least one of the faculty members from the instructor's school.

Either party may challenge the committee's membership for cause within a week of being informed of the membership. The dean shall determine if there is sufficient cause to remove the challenged committee member.

The committee shall meet initially to examine the written appeal and the department chair's recommendation. It can require the faculty member(s) to turn over to the committee grade records for that class or section and any tests, papers and examinations by students of that class that

they may possess. The committee may require the student bringing the appeal to turn over all tests, papers or other evaluations that have been returned and all existing evidence that an improper grade was awarded. The committee shall disregard any claim that a test or paper that has been returned to a student was unjustly graded unless that test or paper is produced for the committee's inspection.

After examining the materials, the committee may, by a majority vote, decline to hear an appeal that it judges to be patently without merit. Otherwise, the committee will authorize its chair to arrange a date for a hearing. The chair of the committee shall meet with each party prior to the hearing to explain the rules and procedures of the hearing.

Grade review hearing

Grade appeal hearings will be open, closed or partially open (i.e., a few close associates of each party may attend) by agreement of the appealing student and the faculty member(s) and the chair of the committee of the appealing student. In case of disagreement, the committee shall decide. The chair has the option to declare closed an open or partially open hearing in cases of disruption or in order to ensure necessary confidentiality.

Both parties may have with them an adviser of their choice (who may not be an attorney), with whom they may consult but who will not participate in the questioning of witnesses and presentation of evidence unless the opposing party and chair agree to it. The committee shall ask any member of the VCU community whose testimony it deems relevant to be available at an agreed-upon time to give testimony.

Either party may present additional witnesses as long as they remain within their allotted time and their testimony is directly relevant to the course at issue. Performance in other courses is not relevant. Witnesses other than the appealing student and the faculty member(s) shall be excluded from the hearing except when testifying. A hearing shall begin with the student outlining the reasons for the appeal and all evidence that exists of an improper grade. The faculty member(s) shall then explain the criteria used for the original grade assigned. Each party will have a time period not to exceed two hours in which to present a position.

The committee shall determine in executive session whether the grade was justified according to the course in which the grade was given. If the evidence is that the grade was determined according to the stated objectives, criteria and grading procedures of the course, the committee shall uphold the grade. The committee should also take into account that purposes, methods, requirements and grading criteria differ from course to course and that difference is a legitimate characteristic of a university and its faculty. Further, the grade in some courses may be partly or solely determined by a faculty member's professional judgment, which in itself cannot be overturned without evidence that the judgment was arbitrarily or capriciously rendered. The committee shall consider (a) whether the faculty member(s) articulated the criteria to be used (some criteria may be implicit within the discipline), (b) whether those criteria were actually used to determine the final grade and (c) whether the results of the evaluation were communicated to the student.

No grade may be changed except by a vote of at least three out of four voting members. When the committee has reached a decision, the committee chair shall submit to the dean in writing the decision and the reasons for it. The dean shall communicate in writing the decision of the committee to the appealing student, faculty member(s) and the department chair. If the grade has been changed, the dean also shall notify the registrar.

The evidence, proceedings and the final decision of the committee shall remain confidential. All documents shall be held in a confidential file by the dean for one year. The party from whom a document was obtained may request that it be returned at the end of the year. All documentation not returned shall be destroyed by the dean one year later.

Approved by the University Assembly Dec. 3, 1981.

Effective Feb. 15, 1982.

Revised September 1996. Effective Aug. 15, 1997.

Please note: Any student who has questions about initiating an appeal using the grade review procedure should call the office of the dean of his or her school or college.

VCU Honor System

VCU recognizes that honesty, truth and integrity are values central to its mission as an institution of higher education. Therefore, all students are subject to the **VCU Honor System**. All VCU students are responsible for being familiar with provisions of this document.

Academic dishonesty is the giving, taking or presenting of information or material by students with the intent of unethically or fraudulently aiding themselves or others on any work that is to be considered in the determination of a grade or the completion of academic requirements. Students in doubt regarding any matter related to the standards of academic integrity in a given course or on a given assignment should consult with the faculty member responsible for the course before presenting the work.

Consumer information

The federal Higher Education Act of 1965, as amended, requires that institutions of higher education disclose certain consumer information to current students, prospective students, current employees and/or prospective employees. This consumer information can be found on the Institutional Research and Decision Support (<https://irds.vcu.edu/>) website and includes information about:

- Financial aid
- General information about VCU
- Student Right-to-know Act – completion and graduation rates for general student body and student athletes
- Equity in Athletics Disclosure Act – athletically related expenses and student aid
- Drug and alcohol abuse prevention
- Campus security
- Family Educational Rights and Privacy Act – student rights with respect to educational records

Paper copies of all of the information listed on the consumer information website are available upon request.

Immunization requirements

The Code of Virginia and VCU require that all full-time students submit validated immunization records to University Student Health Services. This requirement must be completed prior to registering for a second full-time semester. Failure to meet immunization requirements will result in a hold placed on the student's second-semester registration. The hold can be removed only upon receipt of the student's documented records.

Acceptable records include the VCU Certificate of Immunization (Monroe Park Campus), the VCU Health Sciences Certificate of Immunization (only students from the College of Health Professions and the schools of Dentistry, Medicine, Nursing and Pharmacy) or an immunization record from the student's doctor's office, high school, local health department, previous university/college or the U.S. military.

Students who cannot provide documented evidence of all required immunizations must see their health care provider, health department or USHS to complete all requirements.

Students are encouraged to use the online system to submit immunization records. Students should complete an electronic Certificate of Immunization and upload supporting documentation through the USHS web portal. See the USHS website (<https://health.students.vcu.edu/immunizations/>) for more information.

Transcripts

A transcript is a copy of the student's academic record. All official transcripts are embossed with the university seal.

Official transcripts of student academic records are issued by the Office of Records and Registration only upon the written request of the student. Due to federal privacy laws, a signature is required to release a transcript; therefore the office cannot fulfill email or telephone requests for transcripts. The request should be made at least one week before the transcript is needed. All transcripts are \$5 each. Currently enrolled students can obtain unofficial copies of transcripts via eServices (<https://my.vcu.edu/>).

An official transcript is issued only after the student has paid all university bills.

Transcript requests signed by the student may be submitted in person at the Records and Registration Student Services Center in Harris Hall, 1015 Floyd Ave., in Room 1004; or requests may be submitted by mail to the Office of Records and Registration, Box 842520, Richmond, VA 23284-2520. Students and recent alumni may request an official transcript and pay by credit card by logging in to eServices and following the links to "Student/Student Records."

Degree requirements

The minimum course requirements, rules of admission to degree candidacy (as appropriate to degree level), language requirements, thesis or dissertation requirements for graduate degrees, comprehensive examinations, transfer of credits and the like are specified for each program on the individual program pages on this website. Additionally, many schools, programs and departments maintain websites and publish special brochures, student manuals and program guides that may be requested from the appropriate dean or program director.

Termination of enrollment

The university reserves the right to terminate the enrollment of any student for unlawful, disorderly or immoral conduct, or for persistent failure to fulfill the purposes for which he or she was matriculated. Any students whose relations are so severed forfeit all rights and claims with respect to the institution.

In addition to dismissal for failure to comply with standards of conduct described in the Rules and Procedures of VCU (<https://policy.vcu.edu/universitywide-policies/policies/rules-and-procedures.html>) and the VCU

Honor System (<https://conduct.students.vcu.edu/vcu-honor-system/>), a student may be dismissed from the academic unit in which he or she is enrolled for failure to meet academic requirements prescribed by his or her academic unit or failure to exhibit the attitudes and skills deemed necessary to function within the chosen professional practice. Therefore any action by a student considered to be unprofessional conduct according to the code of ethics and the laws and regulations governing the student's chosen profession shall constitute cause for disciplinary action.

Unprofessional conduct includes, but is not limited to:

1. Fraud or deceit in gaining admission to the university, i.e., false or obviously misleading representations on the admissions application
2. An act that violates the established standards regarding conduct of one person toward society, as stated in the VCU Code of Conduct (<https://acs.vcu.edu/integrity-and-compliance-office/vcu-code-of-conduct/>)
3. Conviction of a felony involving moral turpitude

Course information

Credit hour

A credit hour is defined as a reasonable approximation of one hour of classroom or direct faculty instruction and a minimum of two hours out-of-class student work each week for approximately 15 weeks, or the equivalent amount of work over a different amount of time. Credit is based on at least an equivalent amount of work for other academic activities including laboratory work, internships, practica, studio work and other academic work leading to the award of credit hours and is established by individual programs. This definition represents the minimum standard. Student time commitment per credit hour may be higher in individual programs.

Course numbering system

All schools and programs within VCU use the following course numbering system. All course numbers consist of three digits (XXX). The first digit relates to the course level as follows:

0XX – Noncredit courses

Courses with these numbers are offered for students to make up deficiencies in previous training or to improve certain basic skills.

1XX and 2XX – Undergraduate, lower-level

These courses are offered primarily for undergraduate students and may not be used for graduate credit, although graduate students may be required to register for courses at this level to gain a necessary foundation for other course work.

3XX and 4XX – Undergraduate, upper-level

These courses are offered for advanced undergraduates and usually constitute the major portion of specific program work leading to the baccalaureate degree. On occasion, students will be advised by their graduate advisers to enroll in prerequisite 400-level courses. Graduate programs can require that 300- or 400-level courses be taken, but credit in these courses cannot count toward the graduate degree or in the graduate GPA.

5XX – Introductory graduate courses

Graduate students enroll for credit in these courses through the normal graduate advising system. Departments may limit the number of 500-level courses applicable to a graduate degree program. Advanced undergraduates may enroll in these courses for credit with consent of the offering department. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

5XX – Professional graduate courses

These first-year, first-professional (medicine, dentistry and pharmacy) courses are normally open to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

6XX, 7XX and 8XX – Graduate courses

Graduate students enroll for credit in these courses through the normal graduate advising system. Credit is applicable toward only one degree unless a student is admitted to a course of study that allows a defined number of shared courses.

6XX and 7XX – Professional graduate courses

6XX: These second-year first-professional courses are normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

7XX: These third- and fourth-year first-professional courses are normally open only to students enrolled in the M.D., D.D.S. and Pharm.D. programs. Certain courses of this group may be designated by the department and approved by the University Graduate Council for graduate credit.

Grading and marking system

VCU course work is measured both in terms of quantity (semester hours of credit) and quality (grades). Grades are assigned according to a letter system. Each letter is assigned a grade-point value. The scale used is known as a four-point grading system since 4.0 is the highest grade point assigned. The number of grade points earned is computed by multiplying the grade-point value for the letter grade times the number of semester credits for the course. For example, a student who receives an A (four grade points) in a three-credit course earns 12 grade points.

Grade letter	Meaning	Grade-point values per semester credit
A		4.0
B		3.0
C		2.0
D		1.0
F		0.0

Grades designated by a blank, (-), in the grade-point column are not considered in the computation of grade points earned or GPA.

Further explanation of grades/marks above

Grade of pass (P, PP or PS)

This grade is awarded for certain courses to denote satisfactory completion of requirements. The grade of PP results from the conversion of a letter grade of A-C; the grade of PS results from the conversion of a letter grade of D. The grade of P, PP or PS is not included in the calculation of the GPA. (See additional information on PP and PS grades in the pass/fail grade policy for undergraduate students below.)

Grade of progress (PR)

The mark of PR may be assigned only in courses approved for such grading. Unlike the mark of I, PR will not automatically be changed to a failing grade at the end of the succeeding semester. The grade of PR is not included in the calculation of the GPA.

Grades of satisfactory (S) or unsatisfactory (U)

Receipt of the grade of S is formal notification to the student of satisfactory progress. Receipt of the grade of U is formal notification of unsatisfactory progress. A grade of U is a permanent grade and associated credits do not count toward a degree. Future satisfactory performance following a grade of U is reflected in the assignment of the grade of S in subsequent semesters. A grade of S or U is not included in the calculation of the GPA.

Mark of audit (AU)

Class size permitting, students may register for courses on an audit basis. Auditing a course means students enroll in a course but do not receive academic credit upon completion of the course. Students who register on an audit basis are subject to attendance regulations of that class and, unless otherwise specified, at the discretion of the instructor, are subject to the same course requirements as other students in the class.

Students who register on an audit basis may be administratively withdrawn by instructors for a violation of class requirements for audit students, before or after the normal withdrawal deadline as posted

on the VCU Academic Calendar (<http://academiccalendars.vcu.edu/>). Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of the student's semester load in terms of classification as a full-time student. Courses taken for audit, however, do not satisfy minimum enrollment requirements for students receiving graduate teaching or research assistantships, graduate fellowships or university graduate scholarships.

Students may register for audit only during add/drop and late registration periods as a new registration and not as a change from credit to audit. Changes in registration status from audit to credit or from credit to audit will not be approved after the last day of add/drop registration.

Courses assigned the AU mark will not be computed into the GPA and do not result in earned credit hours.

Mark of continued (CO)

The mark of CO may be assigned as an interim mark for those courses that run over more than one grade reporting period. The CO mark indicates the course is not expected to be completed in a single semester and that the student must re-register for the course in the following semester. Upon departmental notification, CO marks for courses not re-registered for in the following semester are converted to F grades. Upon completion of the course, a final grade is assigned for that semester and the previous CO mark(s) remain. This mark may be assigned only in courses approved for such grading. Courses assigned the CO mark will not be computed into the GPA and do not result in earned credit hours.

Mark of credit (CR)

Courses assigned the CR mark will not be computed into the GPA.

Mark of honors (H)

Courses assigned the H mark will not be computed into the GPA.

Mark of high pass (HP)

Courses assigned the HP grade will not be computed into the GPA.

Mark of incomplete (I)

When circumstances beyond a student's control prevent the student from meeting course requirements by the end of the semester, the student may request the instructor to assign the mark of I for that semester. The awarding of a mark of I requires an agreement between instructor and student as to when and how the course will be completed. Once the agreement is reached, the instructor fills out an incomplete grade assignment form bearing the student's signature; the form is submitted instead of a final course grade. A grade cannot be changed to I after the deadline for grade submissions.

The maximum time limit for submission of all course work necessary for removal of an incomplete is the end of the last day of classes of the next semester following the semester in which the incomplete was incurred (i.e., an incomplete awarded in the fall semester must be converted by the last day of classes in the spring semester, and an incomplete awarded in the spring or summer session must be converted by the last day of classes in the fall semester). At that time, an un-removed grade of incomplete is changed automatically to a failing grade. Individual departments and schools may have more stringent time limits. An extension of the time limit is possible, but must be approved, prior to the expiration date stated above, by the instructor and the dean of the school through which the course is offered. For undergraduate and professional students, written approval indicating the new time limit must be filed with the dean of the school through which the course is offered. For graduate

students, written approval indicating the new time limit must be filed with the dean of the Graduate School.

Courses assigned the I mark will not be computed into the GPA.

Mark of incomplete military (IM)

See the "Military services crisis tuition relief, refund and reinstatement guidelines" in the Tuition, fees and expenses (p. 47) section of this bulletin. Courses assigned the IM mark will not be computed into the GPA.

Mark of marginal (M)

Courses assigned the M mark will not be computed into the GPA.

Mark of withdrawn (W)

The mark of W indicates the student has officially withdrawn from the course or has been withdrawn for a violation of the course attendance policy or nonattendance. A student who has officially withdrawn from a course or who has been administratively withdrawn for nonattendance may not attend subsequent meetings of the course.

Students should refer to any school- or course-specific policies related to withdrawal dates. The last day to withdraw for the fall and spring semesters is as published in the VCU academic calendar (<https://academiccalendars.vcu.edu/>), and is typically the end of the 10th week of classes. Summer session students should check the Summer Studies Calendar (<http://www.summer.vcu.edu/calendar/>).

Courses assigned the W will not be computed into the GPA. For further information see the Withdrawal from the university (p. 21) entry in this section of this bulletin.

Mark of withdrawn military (WM)

Courses assigned the WM mark will not be computed into the GPA. See the "Military services crisis tuition relief, refund and reinstatement guidelines" in the Tuition, fees and expenses (p. 47) section of this bulletin.

Pass/fail grade policy for undergraduate students

Undergraduate students may request that a course they are enrolled in be taken under the pass/fail grade option. Undergraduate students can apply no more than 12 credit hours of PP/PS grades taken under the pass/fail grade option over the entirety of their degree program. These restrictions do not apply to courses that are only offered as P/F.

Students may not use the pass/fail grade option:

1. To satisfy a prerequisite that requires a minimum grade of B
2. For courses that may count toward the requirements of the student's major

Under the pass/fail grade option, students would have grades reported as either:

PP. Grade of pass (equivalent to letter grade of A, B or C) is awarded for certain courses to denote satisfactory completion of requirements equivalent to the letter grades of A-C. The grade of PP is not included in the calculation of GPA. The grade of PP will satisfy course requirements of a minimum grade of C to advance to another course.

PS: Grade of pass (equivalent to letter grade of D) is awarded for certain courses to denote satisfactory completion of requirements equivalent to the letter grade of D. The grade of PS is not included in the calculation of GPA. The grade of PS will not satisfy course requirements of a minimum grade of C to advance to another course and students may have to retake the course if they change their major and a minimum letter grade of C was required.

F: Grade of fail (equivalent to letter grade of F) is considered not passing and is included in the calculation of the GPA.

Students should consult with an adviser to understand the implications of their decision.

Instructors of record will not be aware of the student choice. Each faculty member will evaluate student performance in the course consistent with expectations outlined in the course syllabus. If a student has opted for the pass/fail grade option, the assigned grade will be converted to the appropriate pass/fail designation pursuant to the letter grade earned. For example, the instructor would enter a letter grade (A, B, C, D, F) as usual. If the student has chosen the Pass/Fail grade option, then grades A, B or C become a PP; a grade of D becomes a PS; and a grade of F becomes a F.

Students may select the pass/fail grade option for eligible courses no later than the last day to withdraw from a course. All decisions by students are final and irrevocable.

Students have a right to appeal course grades they consider to have been arbitrarily or capriciously assigned or assigned without regard for the criteria, requirements and procedures of the course stated in the syllabus or guidelines for assignments. Students who want to appeal the course grade should follow the guidelines provided under the Grade Review Procedures (p. 15).

Students may not appeal their decision to choose the pass/fail grade option. If students desire to appeal any other matter related to pass/fail outside the grade assigned, students should follow the guidelines provided under Academic Regulations Appeals Committee (p. 22).

Grade-point average

The GPA is computed by dividing the number of grade points earned at VCU by the number of credit hours attempted at VCU. The grades of accepted transfer courses are not included in the computation of the VCU GPA. However, transfer grades are included in the computation of laudatory graduation honors for undergraduate students.

VCU has three program levels: undergraduate, graduate and professional. Each program level has a cumulative GPA. For students who enroll in multiple programs at the same degree level, the GPA for the multiple programs will be merged. For example, a student who graduates from an undergraduate program at VCU and pursues a second undergraduate program at VCU will have one continuous GPA.

Reading the transcript

The E notation, when following a letter grade, means that the course has been repeated and the grade and earned hours are excluded from the GPA.

The A notation, when following a letter grade, means that course is duplicate credit and the grade and hours are included in the GPA, but the hours have been removed from earned hours total.

The I notation, when following a letter grade, means that the grade and earned hours are included in the GPA.

Letter grades preceded by an X are not computed in the GPA.

Grades of D or F may be assigned by the Honor Council and the grade is computed in the GPA. However, a grade of W may be assigned by the Honor Council and is not computed in the GPA. In both cases a notation will be made on the academic transcript detailing the Honor Council assignment.

Change of grade

A final grade may be corrected by the faculty member with proper submission of the change of grade form (for undergraduates) or special action form (for graduate students) to the chair of the department in which the course was taught. Once the chair approves the request, it goes to the school's dean for review, and upon approval, then goes to the Office of Records and Registration or Graduate School, as appropriate. A change of grade that affects the student's academic eligibility to enroll must be made prior to the end of the add/drop period in the semester or summer session in which the student plans to continue attendance. Any change of grade must be completed prior to graduation.

Evaluation and final grade reports

University policy requires faculty to provide students with feedback about their academic performance before the semester or class withdrawal date. Although such feedback does not always take the form of a letter grade, grades do provide a clear indication of class progress. Students are encouraged to discuss their progress in courses with their instructors, especially before the withdrawal deadline.

Students who do not attend class are responsible for dropping or withdrawing from class during the established dates. Exceptions to this policy are made only in rare instances. Requests for an exception should begin with a discussion with the academic adviser and must be filed with the appropriate body within three years of the semester of enrollment..

Grades and unofficial academic histories are available online through **eServices**; official transcripts may be obtained for a fee from the **Office of Records and Registration**.

Additional information about appealing grades can be found on the Grade review procedures (p. 15) page.

Posthumous degrees

Recipients of posthumous degrees should meet the following conditions:

- The student was in good academic standing at the time of his or her death.
- The degree must be awarded within three years of the last day of enrollment.
- There were no disciplinary actions pending against the student.
- The death was not a result of illegal behavior on the part of the student.
- The student earned at least 30 credits at VCU and was within the last 30 credits of graduating (if an undergraduate student).

Graduate and professional programs will determine equivalent progress of students toward their graduate or professional degrees.

A notation that the degree was awarded posthumously will be made in the commencement program and on the transcript, but not on the diploma.

University right to revocation

The university reserves the right to revoke any degree, certificate or other university recognition for cause. In addition, any time following the award of a degree, certificate or other university recognition, the university reserves the right to take appropriate action, including, but not limited to, the revocation of such degree, certificate or other university recognition, on the basis of academic misconduct discovered subsequent to, but which occurred prior to, the awarding of the degree, certificate or other university recognition. More specifically, when an action that constitutes a violation of the VCU Honor System leads to a finding that invalidates a major piece of work required for a degree, certificate or other university recognition so that the validity of the degree, certificate or other university recognition is jeopardized, the student or former student will be subject to a sanction that may include (a) rejection of a thesis, dissertation or other work, (b) revocation of a certification or other university recognition or (c) revocation of a degree.

Leave of absence

Note: This leave of absence regulation applies only to graduate and first-professional students; it does not apply to undergraduate students.

Graduate and first-professional students may request a leave of absence from a program through written appeal to their program director. The program director will forward the request to the appropriate school dean/dean designee who, following departmental governance procedures, will forward their recommendations and any supporting documentation for final approval as necessary.

Students who are out of compliance with continuous enrollment policies (see Graduate registration policies (<http://bulletin.vcu.edu/academic-regs/grad/registration-policies/>)) and who have not been granted approved leaves of absence by the appropriate dean must reapply for admission to VCU and to their degree programs.

Graduate students with approved leaves of absence are exempted from continuous enrollment requirements for the LOA period. Students should note that while leaves of absence temporarily suspend continuous enrollment requirements, they do not extend time limits for completion of degrees. (See policy on Exceptions (<http://bulletin.vcu.edu/academic-regs/grad/exceptions/>)).

Leaves of absence must be requested and approved before or during the first term of leave. Requests for retroactive leaves of absence will not be approved.

The leave of absence prevents registration for the approved leave of absence period. If the student wishes to return to academic study before the end of the approved leave of absence period, they should notify the appropriate school or college to request that the leave of absence be shortened and the registration hold removed.

Because curricular and course content changes may occur and a student's progress toward a degree may be adversely affected because of an extended absence, specific limits may be imposed by individual schools and colleges with respect to the length of time allowed for absences. Extended leaves of absence may also impact financial aid; students should consult the Office of Financial Aid to understand the potential impact of a leave of absence. If there is a delay in return beyond

the allotted time period without written consent of the dean of the school or college, the student may be required to reapply for admission.

Students on leave are eligible for reinstatement of their enrollment through the end of their approved leave period, and many students who take a leave will have no requirements attached to their reinstatement. The dean of the student's school or college may establish specific requirements for reinstatement if the circumstances of the student's departure warrant it. The goal of such conditions is to prepare the student for a successful return to the university; for example, a student may be asked to complete preapproved course work at an outside institution in order to demonstrate readiness to return to rigorous academic work or to participate in a reinstatement consultation with Student Accessibility and Educational Opportunity, Division for Academic Success, University Student Health Services, or University Counseling Services, to facilitate a successful return. If the leave is health-related, any conditions or requirements for reinstatement will be based on an individualized assessment of each student, including consideration of current medical knowledge and/or the best available objective evidence of the student's ability to function academically at the university with or without accommodations. Careful consideration will be given to the opinions and recommendations of a qualified health care professional who treated the student, if available.

Withdrawal from the university

Students may withdraw from any or all courses before the relevant deadlines published in the **VCU Academic Calendars**. Failure to complete this process may result in the assignment of failing grades in any course in which the student is enrolled and does not complete all course requirements.

A mark of W (withdrawn) will be recorded on the permanent student academic record for all courses from which students withdraw. Charges are assessed and adjusted according to the university refund policy, which is published in the tuition and fees section of each level-specific bulletin. Students should consult with the Office of Financial Aid to understand how a withdrawal may impact future financial aid in relation to satisfactory progress.

Whenever possible, students should consult their academic or program adviser prior to any withdrawals. Certain academic programs have specific continuance standards; students in those programs should consult their program adviser to understand how withdrawal may affect continuance in the program.

Additional information about cancellation of registration may be found in the level-specific registration policies sections of this Bulletin. Leave of absence (p. 21) (for graduate and professional students) and medical leave of absence (p. 29) (for undergraduates) are also addressed elsewhere in this Bulletin.

Effective bulletin

The bulletin for the academic year a student enters or re-enters a degree program identifies the curriculum degree requirements for that student. Students in continuous enrollment may fulfill the curriculum degree requirements of the bulletin for the year they entered VCU or choose to be subject to the curriculum degree requirements articulated in a subsequent bulletin. Subsequent bulletins can be chosen throughout a student's academic career. In either case, students must fulfill all curriculum degree requirements listed in the bulletin they choose.

A student's effective bulletin will remain in effect until the degree is awarded. Change in academic program (major, concentration, minor) or adding an academic program will not result in a change in effective bulletin unless the student chooses to be subject to the curriculum degree requirements articulated in a subsequent bulletin.

Students readmitted to the university will fall under the bulletin in effect at the time of readmission. At the discretion of the school dean, department chair or program head, degree requirements may be waived and/or previously taken courses may be substituted for requirements in effect at the time of readmission.

Note: This policy may not apply to first-professional students.

Degree Works

Degree Works is a web-based degree audit tool that helps students and advisers monitor progress toward degree completion. It produces a report that outlines the components and requirements for a student's degree program and tracks the student's progress in completing those requirements.

The report is not intended to replace regular contact with academic/faculty advisers, but provides accurate information to assist students and advisers in making appropriate academic choices based on information in Banner, the university's student information system.

All degree requirements are based on the official curriculum as approved by the university-level curriculum committees and as published in the effective VCU Bulletin of record. While Degree Works is a self-service tool for students and advisers, it is the official means used to confirm that students have completed requirements for graduation.

Note: This policy may not apply to first-professional students.

Undergraduate-only regulations

Regulations presented in this section apply in particular to undergraduate students. Use the navigation to the left to see additional regulations that apply to all students or specifically to graduate students.

Students are responsible for knowing and fulfilling all general and specific degree requirements as described in this section.

It is the responsibility of all undergraduate students to be familiar with the Undergraduate Bulletin of record (the bulletin in effect at the time of official admission), as well as the academic regulations in individual school and department publications and on program websites; however, in all cases, the academic regulations and general degree requirements, as published on this Undergraduate Bulletin website, take precedence over individual program policies and guidelines.

Academic Regulations Appeals Committee

The Academic Regulations Appeals Committee considers appeals for exceptions to undergraduate program academic regulations listed in this bulletin. The committee is a standing committee of the Office of Academic Affairs and reports to the Senior Vice Provost for Academic Affairs.

Undergraduate students who wish to petition the university for a waiver of the academic regulations in this bulletin may do so through the Academic Regulations Appeals Committee. Students who have been accepted to the graduate portion of a five-year bachelor's/master's

program may also need to make an appeal through the Graduate School. A petition for waiver must be submitted prior to conferral of the undergraduate degree and within three years of the last day of classes for the semester in which the waiver would apply.

To begin the appeal process, students should contact the Academic Regulations Appeals Committee representative in the dean's office of their school or college; nondegree-seeking students should contact University Academic Advising at (804) 827-8648. The student then works with the representative to prepare the petition following guidelines established by each school or college. The first step is for the student to prepare a letter that details the extenuating circumstances supporting the student's belief that the university should waive its regulations and grant the request. All circumstances cited in the student's letter must be documented, and the student is responsible for gathering all necessary documentation. Examples of documentation include medical records, police reports, death certificates and employer reports. Things that may not be used as documentation include letters from parents, friends or relatives. Any petition that does not have the required documentation will be tabled and can remain tabled for at most two additional meetings. If the requested documentation has still not been provided by the student after this period, the committee will vote based on the information that it has.

After the Academic Regulations Appeals Committee representative receives the student's letter and all necessary documentation, he or she will prepare a petition cover sheet and, if appropriate, gather pertinent information from faculty. When the petition is complete, it will be submitted to the committee and discussed at one of its meetings. Requests are granted or denied by a majority vote of the committee. Decisions are effective immediately, and students are notified by their representative. All committee procedures are confidential and ensure the right to privacy of the student.

Since a request to waive a regulation is itself an appeal, committee decisions are final, and there is no further appeal within the university. Once a petition is voted upon, if denied, it cannot be brought back for future vote even if new documentation is found. However, a student on academic suspension can bring a request for a waiver of the continuance policy back to the committee once a full semester has passed since the last petition. In exceptional circumstances any member of the Academic Regulations Appeals Committee and/or academic dean may refer a case to the provost who has the right, but not the obligation, to consider remanding it back to the committee for further review.

Certain exceptions may affect current and future financial aid. Students should consult with a financial aid staff member before submitting an appeal. Students with a Student Accounting hold on the first day of an academic semester (fall, spring, summer) due to failure to pay a bill from the previous semester are unable to request a retroactive add of a course during that semester. Students who did not have a Student Accounting hold on the first day of a semester are eligible to request retroactive adds to courses, but they must have all subsequent holds cleared before the request can be considered.

Undergraduate classification

Academic programs

Full-time and part-time degree-seeking students, but not nondegree-seeking students, are classified by credit hours earned as follows:

Year	Credits
Freshmen	one to 23 credit hours
Sophomores	24 to 53 credit hours
Juniors	54 to 84 credit hours
Seniors	85 credit hours and more

Health science programs

Classification is determined by curriculum requirements for individual programs.

Degree definitions

Major

A major is a student's principal field of study. Majors are in specific disciplines or are interdisciplinary groupings of courses that are designed to make a coherent whole. The department or program administering the major specifies required and optional courses. Undergraduate students must declare a major no later than the semester in which they are enrolled in their 60th credit. Some majors require course sequences that necessitate earlier selection of the major in order to earn a baccalaureate degree within four years of full-time study. Therefore a registration hold will be placed on any undeclared undergraduate student enrolled in their 60th credit. The hold will not be removed until the student meets with an adviser for major selection.

The major becomes official only after the Office of Records and Registration has received approval of the change by the appropriate school dean or designee. The major will appear on the student's permanent record at the time of graduation.

The following minimum requirements are needed for completion of a major:

- A minimum of 30 credits in the major area, at least half of which are at the 300 or 400 level
- Any special requirements stipulated by the major

A minimum major GPA of 2.0 (grade of C) is required for graduation. The major area GPA will be calculated from all attempts in courses that are designated as required or optional in the student's major area, regardless of assigned grade. Exceptions to this calculation will be grades omitted due to a historical academic repeat or the grade exclusion policy. Students should consult with their department or program to determine if a higher GPA is specified for graduation. Only course credits taken at VCU are computed in the major GPA.

Concentration

A concentration is a set of courses that provides structured study in a topic within the major. Concentrations require a minimum of nine credits in addition to the specified core requirements in the major. The department or program administering the concentration specifies required and optional courses. The concentration may be used to fulfill career needs or to facilitate in-depth investigation in a topic related to an area of interest to the student. The concentration becomes official only after the Office of Records and Registration has received the change of major/concentration approval by the appropriate school dean or designee. A concentration will appear on the student's permanent record at the time of graduation. All courses in the concentration must be completed before graduation with a bachelor's degree.

Double major

A double major is the concurrent fulfillment of the requirements of two majors. To earn a degree with two majors, the student must complete the courses required in each major, any prerequisite courses required for both majors and the general education requirements, including the University Core curriculum, of the primary major. Individual degree programs may set limits on the number of credits that can be shared between two majors.

One diploma is awarded displaying the primary major and both majors appear on the student's academic record. The primary major appears on the transcript as the degree awarded and the second major will appear as an accompanying note.

The double major becomes official only after the Office of Records and Registration has received the change of major/concentration approval from the appropriate school dean or designee.

Minor

A minor is a set of courses analogous to and named for an existing major or discipline, or an interdisciplinary grouping of courses not represented by a major. Although a minor is not required for completion of most degree programs, a student may elect an approved minor. Minors require a minimum of 18 credits. Unless approved by the University Undergraduate Curriculum Committee, at least nine of the credits in a minor must be in 300-level or higher courses, unless a greater number is specified. Students must achieve a minimum GPA of 2.0 in designated course work in order to earn the minor. The department or program administering the minor specifies required and optional courses. The minor may be used to fulfill career needs or to facilitate in-depth investigation in a discipline of secondary interest to the student.

The minor becomes official only after the Office of Records and Registration has received approval from the appropriate school dean or designee. A student cannot minor in a discipline identical to the major. A minor will appear on the student's permanent record at the time of graduation if the student has completed all requirements for the minor and approval has been granted by the appropriate school dean or designee.

Undergraduate dual degrees

Dual degree programs allow students to pursue concurrent study in two separate undergraduate degree programs and receive two separate program completion credentials (diplomas). Dual degree programs may combine two VCU programs or combine a VCU degree program with a degree offered at another regionally accredited domestic or international institution.

To earn concurrent dual degrees by combining two VCU undergraduate programs, a student must fulfill all the requirements for both majors, the general education requirements of the primary degree program, including the University Core curriculum, and complete an additional 30 credit hours above the minimum degree hour requirement of the primary degree. A diploma is awarded for each degree, and both degrees will appear on the student's academic record. Individual programs may set limits on the number of credits that can be shared between degree programs.

Second baccalaureate degree

A student who already has earned a baccalaureate degree from VCU or another institution and wishes to earn a second baccalaureate degree at

VCU must complete the admissions process outlined in the Admission to the university (p. 32) chapter of this bulletin.

Students who have earned a baccalaureate degree at another regionally accredited institution but who wish to acquire a second baccalaureate degree from VCU will be considered to have fulfilled the University Core Curriculum as well as the university general education requirements for the second degree. Such students will be expected to meet all college, school and departmental requirements.

Students seeking a second baccalaureate degree must earn, at VCU and after acceptance into the second baccalaureate degree program, a minimum of 30 additional credits applicable to the second degree program. Each additional baccalaureate degree pursued requires an additional 30 applicable credits. Prior to undertaking the second degree, students must have their accumulated credits evaluated and approved by the Transfer Center.

In addition, students must meet the degree requirements for all undergraduate students (p. 27) as found in this section of the bulletin.

Accelerated degree programs

Accelerated degree programs allow completion of a program of study in fewer than the usual number of years, most often by attending summer sessions and carrying extra courses during regular academic terms following a prescribed plan of study.

Continuance in undergraduate programs

Monroe Park Campus programs

Definition of good standing

A student who is enrolled at VCU is in “good standing” until such time the student is placed on academic warning, probation or suspension. Students should consult their program of study regarding specific academic standards constituting good standing in the program.

Academic warning

A student is placed on academic warning when the student’s cumulative GPA falls below 2.0 (grade C) at the conclusion of any semester of attendance — fall, spring or summer. Notification of warning appears on the student’s academic record. A degree-seeking student on academic warning may not enroll in more than 14 credits per semester of attendance except under unusual circumstances and with the permission of the dean or designee of the school or college in which the student is enrolled. A student remains on academic warning for one semester of attendance, at the end of which time the student must obtain a minimum cumulative GPA of 2.0. Failure to achieve this GPA results in academic probation.

Academic probation

A student is placed on academic probation when the student’s cumulative GPA falls below 2.0 for two successive semesters of attendance, including summer sessions. Notification of probation appears on the student’s academic record.

A degree-seeking student on academic probation may not enroll in more than 13 credits per semester of attendance. Students on academic probation are expected to improve their cumulative GPA by achieving a minimum semester GPA of 2.0 during each semester of attendance. A student who achieves a minimum cumulative GPA of 2.0 is removed

from academic probation. Failure to achieve a 2.0 semester GPA while on probation results in academic suspension.

Academic suspension

A student is placed on academic suspension if the student earns a semester GPA below 2.0 while on academic probation.

Notification of suspension appears on the student’s academic record. The student also receives a letter from the Office of Records and Registration stating the conditions of the suspension. Academic suspension indicates the student has a record of continued unsatisfactory progress.

A student on a first academic suspension may not enroll at the university for two consecutive semesters, including the summer session. Course work taken at another institution while the student is under academic suspension from VCU is considered part of the criteria for readmission, but the course work is not used to increase the VCU cumulative GPA. If the student is readmitted, the course work will be evaluated according to regular procedures.

A student may apply for readmission to VCU for the semester following completion of the suspension period. A student readmitted after suspension enrolls under the academic probation status and is subject to the provisions of that status. If a student readmitted after suspension fails to obtain a semester GPA of 2.0 in any semester before achieving a minimum cumulative GPA of 2.0, the student is placed on a five-year suspension. The student may be considered for readmission after a minimum five-year separation from VCU.

Although a student may be approved for readmission to VCU, the student is not automatically eligible to receive federal or state financial aid. See the Financial aid (p. 53) section of this bulletin for information about Satisfactory Academic Progress standards and suspension of aid eligibility. Detailed information about the SAP appeals process (<https://finaid.vcu.edu/manage/appeals/>) can be found on the VCU Office of Financial Aid website.

For Readmission guidelines (p. 46), see the Admission to the university section of this bulletin.

Note that the rules and procedures for suspensions assigned due to violations of the honors system, the student conduct policy or other reasons may be different from those described here for academic suspensions.

MCV Campus programs

Warning, probation and suspension are defined by the program of study. Consult the program adviser for further details. Undergraduate students dismissed from an MCV Campus program will be placed in the undeclared major. Students who wish to pursue a different major should follow the process outlined under the Change of academic program (p. 25) section in this bulletin.

The individual health science schools recognize and support the statements set forth by the licensing boards of the respective health professions as they relate to examination, licensure and the practice of each profession. When applicable, these standards may be used in determining a student’s eligibility for continuance in or readmission to the university.

Grade exclusion policy

This policy is applicable to former students enrolled in any undergraduate program at the university who:

1. Have not enrolled at VCU for five years or more
2. Are now entering an undergraduate program
3. Earn a minimum 2.0 GPA on the first 12 semester hours completed upon return

Under this policy, eligible students may request that D and F grades previously earned at VCU be excluded from their total credits earned and GPA computation for the purpose of meeting scholastic continuance and graduation requirements.

All earned grades, including those excluded D and F grades, remain on the student's academic record. Excluded grades must be approved by the appropriate academic dean or designee.

Initiating the grade exclusion option will not result in a change in previously earned academic statuses (warning, probation, suspension). Grades of DN and FN indicate that the letter grade is not computed in the GPA.

The grade exclusion policy may be used only once during a student's enrollment at VCU and cannot be revoked by the student after approval is granted. A student who chooses to use this policy must do so before the awarding of his or her undergraduate degree.

Repeated courses

Because some programs do not allow students to repeat courses, any student planning to do so must first consult with his or her adviser, department chair or program head.

The semester credits attempted and the grade points earned for all attempts are included in computing the cumulative GPA. No matter how often a course is repeated, it may be counted only once as credits presented toward graduation unless otherwise specified in the course description.

If a student repeats a course in which a D or F was earned on the first attempt, the student can file the historical repeat course option form at any time during a semester prior to the awarding of the undergraduate degree. This form must be filed before the last week of classes in any semester so the cumulative GPA can be adjusted at the end of that semester. It is available online at Records and Registration Forms (<http://rar.vcu.edu/forms/>).

In the case of courses that are no longer offered at VCU, students may take the established equivalent course at VCU and the historical repeat described in the previous paragraph applies. Verification of the equivalency should be confirmed with the program offering the course prior to registering for the second course.

The grade is not excluded until the request is made. If, however, more than one D or F grade is received in the same course or its equivalent course, only one of these grades will be excluded from the computation of the cumulative GPA.

Grades for all attempted courses remain on the student's permanent record. Students may not repeat courses for which they have previously

received transfer credit. A repeated course may be counted only once toward credits necessary for graduation. Before repeating a course, the student should consult with the adviser, department chair or program head.

Initiating the repeated course option by using the historical repeat course option form will not result in a change in previously earned academic statuses (warning, probation, suspension). Students who choose to repeat a course must do so before the awarding of their undergraduate degrees from VCU, or from any other college to which VCU course work is transferred. The student's GPA at graduation will not be affected by repeating a course at any time after graduation.

Students who are eligible to file a historical repeat on a course that would change their academic standing have until the end of the add/drop period the following semester to file an ARAC petition with their school/college ARAC representative to request that the academic status be changed. Once the add/drop period for the following semester has passed the student can still submit the historical repeat and have the grade point average changed, but the academic status will not be changed.¹ For courses taken in the spring semester, the following semester is the summer session and the petition must be filed within one week (seven days) of when the first summer session starts.

¹If a student has filed a historical repeat that would change their academic standing to "good standing" (minimum grade point average of 2.0), is returning to VCU after at least one semester as a non-active student, and is not enrolled in any VCU courses, they may file an ARAC petition to change their final academic standing to good standing.

Change of academic program

Before initiating a change of major, concentration or minor, students should contact the office administering the program of study to carefully review the requirements and prerequisites. In certain programs – including those in the schools of the Arts, Business, Media and Culture, and in the Bachelor of Interdisciplinary Studies program – a candidate must fulfill additional requirements before authorization to enter the program is granted. Credits previously earned at VCU or at another university may or may not be applicable to the new academic program.

The academic program change becomes official after the Office of Records and Registration has received authorization from the appropriate school dean or designee. Changes in academic program may occur for the current semester only through the add/drop period. Changes processed after the add/drop period are effective for the following fall or spring semester, and changes processed during the summer sessions are effective for the following fall semester.

Students currently enrolled in an MCV Campus program who wish to change to a curriculum on the Monroe Park Campus should follow the process mentioned above. Such students are subject to the continuance policy of the Monroe Park Campus after the academic program change has occurred. Students currently enrolled in an MCV Campus undergraduate program who wish to change to another MCV Campus undergraduate curriculum must go through the admission process outlined in the Admission to the university (p. 46) chapter of this bulletin.

Students enrolled in a graduate or professional program of study at VCU who wish to return to a previous undergraduate program in which a degree has not been awarded may do so through a change in academic program as outlined above. Such students should consult the graduate

or professional bulletins regarding the process for withdrawing from their current graduate or professional program of study. If a degree already has been awarded in an undergraduate program of study, graduate or professional students must go through the admission process to re-enter an undergraduate program as outlined in the Admission to the university (p. 46) chapter of this bulletin.

Nondegree-seeking students intending to enter a degree-seeking status must go through the admission process outlined in the Admission to the university (p. 32) chapter of this bulletin.

Undergraduate registration

Continuous enrollment

Students who withdraw from all courses after the first week of the semester are considered to have been enrolled for the semester. Students who do not attend VCU for three or more successive semesters excluding summer sessions must submit an application for readmission to Undergraduate Admissions. See the undergraduate readmission/continuous enrollment chart (p. 46) for details on readmission and continuous enrollment. This application must be completed and turned in before the application submission date for the semester in which the student plans to return. For health science programs, breaks in enrollment must be approved by the department.

Student load

Student load is the total number of credits for which a student is enrolled in any one semester. The semester credit is the quantitative unit by which courses are measured and is defined by the number of credit hours as found under general course information (p. 17).

Full-time and part-time students

A student enrolled in 12 credits or more during any fall or spring semester is classified as full time. A student enrolled in 11 credits or less during any semester is classified as part time. Both full-time and part-time students may seek degrees at VCU. However, some curricula may require full-time status. For more information, see the enrollment categories (p. 28) section of this bulletin.

Academic overload

A degree-seeking undergraduate student may take no more than 19 credits per semester without special permission. This maximum load excludes holiday intersession courses. More than 19 credits per semester constitute an academic overload. Health science curricula requiring more than 19 credits per semester are exempt from this rule. See additional information on a course overload in the Tuition and fees charges (p. 47) section of this chapter.

The student's adviser and academic dean may permit a student to attempt more than 19 credits in any one semester. An "Overload Approval Form" may be obtained from the Student Services Center in Harris Hall or online at Records and Registration Forms (<http://rar.vcu.edu/forms/>).

Undergraduate nondegree-seeking students may take no more than 11 credits per semester. Overloads for nondegree-seeking students are not permitted. A nondegree-seeking student who wishes to take more than 11 credits must first be accepted as a degree-seeking student.

For information about credits earned concurrently at another institution, see concurrent registration below.

Credits allowable during summer sessions

Each summer course is designed to provide one semester's work. With careful scheduling, it is possible for students to earn as many as 15 credits during the summer if course work extends over the full summer calendar. Students may not take more than 15 credits without special permission from the Summer Studies Office, which is located at Hibbs Hall, 900 Park Avenue, Room 201; or phone (804) 827-4586.

Summer classes are intensive and demanding. Students experiencing academic difficulty should consider this advisory carefully before registering for summer classes.

Prerequisite enforcement

Qualified course prerequisites take the form of a course subject (HIST) and number (101). Unless otherwise specified, the minimum grade required to satisfy a stated course prerequisite is a D. These prerequisites are enforced at the time of registration and assume successful completion of any prerequisite courses for which a student is currently enrolled. A registration error message is returned if one or more qualifying course prerequisites are not met. Specific prerequisites for an individual course can be viewed via eServices by selecting the View Catalog Entry link. Students who are preregistered in a course with one or more prerequisites and subsequently fail to satisfy the prerequisite(s) will be removed from the course prior to the end of add/drop.

Audit registration

Class size permitting, a student may register for a course on an audit basis. A student may register for audit only during add/drop and late registration periods. Auditing a course means a student enrolls in a course but does not receive academic credit upon completion of the course. A student who registers on an audit basis is subject to attendance regulations of that class and may be administratively withdrawn by an instructor for a violation of class requirements for audit students, before or after the normal 10-week withdrawal deadline. A student who registers for audit may be subject to other course requirements at the discretion of the instructor. Audit students are charged the regular rate of tuition and fees. An audit course is counted as part of the student's semester load for the purposes of full- or part-time enrollment status but not for the purpose of financial aid.

Concurrent registration

To ensure credits earned concurrently at another institution are accepted for transfer at VCU, students should submit an online "Request to Take Courses at Another Institution" for evaluation by the VCU Transfer Center prior to taking the courses. Credits taken at another institution will not be counted toward enrollment level for financial aid purposes at VCU unless these courses are part of an approved articulation agreement that allows or requires courses to be taken at another institution.

Change in registration

Once a student has registered for classes, changes in registration must be made according to the procedures listed below. Whenever a student makes any change in registration, the student should keep a copy of the new schedule as verification of the change. Changes in registration may affect current and future financial aid. Students are advised to consult with a financial aid staff member before making any changes to their enrollment status. See the Financial aid (p. 53) section of this bulletin for detailed information on financial aid.

Cancellation of registration

Cancellation of registration must be completed before the end of the add/drop period. To cancel registration, a student must drop all classes using one of the following methods: 1) in writing to the Office of Records and Registration, 2) in person at the Student Services Center or 3) via eServices (<https://my.vcu.edu>). Refunds are issued in accordance with procedures described under the refunds section in the Tuition, fees and expenses (p. 47) section of this bulletin. For readmission guidelines, consult the Admission to the university (p. 46) section of this bulletin.

During the add/drop period

Exact dates for add/drop periods before and during the first week of classes are listed in the university academic calendar (<http://academiccalendars.vcu.edu>). Changes in registration during the add/drop periods can be made via eServices (<https://my.vcu.edu>). During the add/drop period, courses can be dropped and will not show on a student's permanent record. Changes from audit to credit or credit to audit must be made before the end of the add/drop and late registration periods and can be made at the Student Services Center in Harris Hall.

After the add/drop period

After the add/drop period, students may not attend classes in which they are not registered. Students cannot add a course after the add/drop period. The university academic calendar (<http://academiccalendars.vcu.edu>) lists the date when add/drop ends.

Drops are not permitted after the add/drop period has ended. However, students may withdraw from classes in accordance with prescribed procedures. To officially withdraw from a class, a student must obtain and file the appropriate form with the Office of Records and Registration or utilize eServices (<https://my.vcu.edu>). A student with an academic hold that prevents registration activity on eServices may go in person to the Student Services Center in Records and Registration to withdraw from courses.

If a student stops attending a class and fails to withdraw, a standard grade will still be assigned for that course. Withdrawals become a part of the student's academic record with a mark of W. In classes that do not conform to the normal semester calendar, the final withdrawal date is when half of the course is completed.

For further information see withdrawal from the university below. Students who withdraw from a course may be entitled to a refund. See the university refund policy in the Tuition, fees and expenses (p. 47) section of this bulletin.

Undergraduate degree requirements

The degree requirements that must be fulfilled by all degree-seeking students are listed below. For additional degree requirements, students must consult the school and major departmental sections of this bulletin.

In order for a student to be awarded a diploma, he or she must resolve any outstanding charges owed to the university. The university does not guarantee the award of a degree or a certificate of satisfactory completion of any course of study or training program.

Upper-level courses

A minimum of 45 credits in 300- to 500-level courses or the equivalent is required for a bachelor's degree.

GPA requirement

A minimum cumulative GPA of 2.0 (grade C) is required in order to receive a baccalaureate degree. Only credits taken at VCU are computed in the GPA.

Some programs may require a higher cumulative GPA. Students should consult the section of this bulletin that deals with their major for any GPA requirements above the university's 2.0 minimum.

Major area GPA

A minimum major GPA of 2.0 (grade of C) is required for graduation. The major area GPA will be calculated from all attempts in courses that are designated as required or optional in the student's major area, regardless of assigned grade. Exceptions to this calculation will be grades omitted due to a historical academic repeat or the grade exclusion policy. Students should consult with their department or program to determine if a higher GPA is specified for graduation. Only course credits taken at VCU are computed in the major GPA.

VCU REAL requirement

All newly admitted first-year and transfer undergraduate students entering fall 2021 and thereafter are required to successfully complete at least one VCU "REAL" experiential learning activity. This requirement may be satisfied by successfully completing a 300-level (or higher) course that has received a REAL attribute of Level 2, 3 or 4 or through an approved "REAL" co-curricular experience that has received a REAL attribute of Level 3 or 4.

Having once satisfied the REAL experiential learning requirement, the student will not have to fulfill it again, including cases of a returning student who is pursuing an additional baccalaureate degree, a student who is enrolled in multiple programs and a student who may change majors. Courses and co-curricular activities that satisfy the REAL requirement may be searched for and found in the VCU Schedule of Classes and through the VCU Student Opportunity Center, which is accessible through the VCU REAL website, real.vcu.edu.

Total credits

Each undergraduate VCU degree requires a minimum of 120 semester credits. The total number of semester credits required for graduation depends on the student's major and area of concentration. Specific information on total credit requirements is detailed under individual degree program descriptions in this bulletin.

25 percent rule

Degree candidates must complete at least 25 percent of the credit semester hours required for their bachelor's degree program at VCU, including at least 30 of the last 45 credits. Active-duty service members, reservists and National Guardsmen may complete the minimum of 25 percent of their degree requirements at any time while enrolled at VCU and are exempt from the "30 of the last 45 credits" requirement. Other exceptions to this rule may be granted by the Academic Regulations Appeals Committee. If ARAC approves the request for a waiver, the approved credits must be completed within three years from the time of the waiver.

This requirement does not apply to students who participate in VCU-sponsored programs abroad or who earn course credit at a cooperating university through VCU domestic and international university exchanges

or who are pursuing an undergraduate certificate independently of a baccalaureate degree.

Categories of student enrollment

VCU provides a variety of ways in which a student may pursue a course of study.

Degree-seeking student

This student has fulfilled the admission requirements of the university and a particular school or college and is enrolled in a bachelor's (four-year) degree program or a health sciences preparatory program. A degree-seeking student may engage in studies as either a full-time student (12 credits or more per semester) or as a part-time student, and may enroll for day and/or evening classes.

Furthermore, a degree-seeking student may pursue a program of study in one of the following ways:

1. **As a declared major in a school or college.** The student who declares a specific major when entering VCU begins a course of study leading to a degree in the declared major. (The student may change the major at a later date.)
2. **As a pre-health major.** The student declares a pre-health major (clinical laboratory sciences, dental hygiene, nursing or clinical radiation sciences) and completes the prerequisites for future eligibility to apply for admission into the health science major. Completion of the pre-health major does not guarantee admission into the desired health sciences program. Pre-health majors are not degree-granting programs. Students should consult the program admission requirements for the intended program they wish to pursue.
3. **As an undeclared student.** Students who have not selected a specific major, may select the "undeclared" category. These students are advised through University Academic Advising. Students must define these goals and declare a major area of study no later than the semester in which they complete 60 credits, generally after two years of study.

Nondegree-seeking student

A student who meets the requirements for undergraduate eligibility may enroll for credit as a nondegree-seeking student in day and/or evening classes at VCU without seeking admission to a degree program.

Undergraduate nondegree-seeking students are advised about course selections and aided in educational and vocational planning by University Academic Advising and may schedule an appointment by calling (804) 827-8648. Such students are ineligible for financial aid.

Permission to enroll as a nondegree-seeking student does not ensure later admission as a degree-seeking student. Continuance in this status is dependent on academic performance, and nondegree-seeking students are subject to the continuation regulations stated in this chapter.

The undergraduate nondegree-seeking student may pursue course work in one of the following categories:

1. **As a nondegree holder.** This student has not previously earned a baccalaureate degree. The student may take a maximum of 11 credits per semester (part time).
2. **As a degree holder.** This student has previously earned a baccalaureate degree at VCU or another accredited institution and

plans to pursue additional undergraduate course work. The student may take a maximum of 19 credits per semester.

3. **As a transient student.** This student is presently seeking a baccalaureate degree at another institution of higher education, is in good standing at that institution and plans to pursue a course of study at VCU for no more than two semesters with the intent of transferring the work back to the home institution to complete the degree. The student may take a maximum of 19 credits per semester and must present a letter from the home institution approving the student's status as a transient student at VCU. (Refer to the Nondegree-seeking student guidelines (p. 28) section of this bulletin).

Credits earned as a nondegree-seeking student are recorded on the student's permanent academic record. There is no limit placed on the number of credits that can be earned in this classification. Nondegree-seeking students who wish eventually to earn a baccalaureate degree at VCU are encouraged to seek admission to a degree program before accumulating 22 semester credits.

Nondegree-seeking student guidelines

The first time a student registers as a nondegree-seeking student, he or she must meet one or more of the following conditions of eligibility as appropriate to his or her status:

1. Be a high school graduate or GED holder for one year before the intended semester of entry
2. Be an applicant who meets established admission requirements
3. Be a transfer student who is eligible to return to the former institution or has been out of school for at least one year for a first suspension or five years for the second suspension incurred at any institution
4. Be a former VCU student who is eligible to return (If the student has been suspended from VCU for academic reasons, eligibility for future enrollment must be re-established in accordance with procedures outlined in the Readmission guidelines (p. 46) section of the "Admission to the university" chapter and the suspension policies (p. 24) outlined in this chapter.)
5. Be a bachelor's degree holder taking undergraduate courses
6. Be an eligible transient student (A transient student must present, before or at the time of registration, a letter from the home institution, which states that the student is in good standing, has permission to study at VCU for transfer back to the home institution and which outlines the courses to be studied at VCU.)
7. Be a non-U.S. citizen who has been cleared through the Global Education Office

Students are responsible for knowing the terms of eligibility and for stating that they are eligible for nondegree-seeking student status.

The first time a student registers as a nondegree-seeking student, proof of eligibility is required. Students must provide a signed "Certificate of Eligibility" form, which is available online at Records and Registration Forms (<http://rar.vcu.edu/forms/>). A student also may establish eligibility by providing verification of high school graduation, GED certification or verification that he or she is eligible to return to the previous institution of study.

If the student's eligibility cannot be verified or if the student is found ineligible, the grade on the course taken is changed to no credit (NC).

An administrative hold is placed on future registrations until eligibility is established.

Nondegree-seeking students who hold bachelor's degrees are classified as DHG (degree-holder graduate) if they enroll in one or more graduate courses. DHG students are charged the graduate rate. Nondegree-seeking students who hold undergraduate degrees are classified as DHU (degree-holder undergraduate) if they enroll in all undergraduate courses. DHU students who enroll in 12 or more credits are charged at the full-time undergraduate rate. If they make changes to their course enrollment by the end of the add/drop period, their classification and charges change in accordance with these guidelines.

Degree-holding nondegree-seeking students enrolling in graduate courses should refer to the online Graduate Bulletin.

Nondegree-seeking students who plan to earn a degree eventually must apply for degree admission and, depending on their credentials, may be required to complete 15 credits with an earned GPA of 2.0, which includes a minimum of two courses (totaling six credits) required by their degree curriculum.

Students studying on foreign visas, because of U.S. immigration and naturalization regulations, are expected to enroll as full-time students and usually are not permitted to enroll as nondegree-seeking students.

Medical leave of absence

In certain circumstances, where a student's health condition impedes their academic progress, a student may decide they need to temporarily leave the university to focus appropriate attention and effort on the treatment and recovery necessary for a healthy return to their academic pursuits. In these cases, the student may petition the dean of students' office in the Division of Student Affairs for a medical leave of absence from all courses prior to the last day of classes as published in the VCU Academic Calendars (<https://academiccalendars.vcu.edu/>), and before a final class grade has been assigned and/or posted to their academic record. A staff member in the dean of students' office (<https://students.vcu.edu/find-resources/dean-of-students/>) in the Division of Student Affairs (<https://students.vcu.edu/>) will meet with the student to discuss their need for a medical leave of absence and the extent to which reasonable academic accommodations may enable the student to remain enrolled. The staff member will provide information regarding the medical leave of absence and reinstatement processes, including any reasonable conditions the student will be required to satisfy in order to be reinstated. The university will determine appropriate conditions for reinstatement based on an individualized assessment of the student's reason for taking leave, including consideration of current medical knowledge and/or the best available objective evidence of the student's ability to function academically at the university with or without accommodations. Careful consideration will be given to available opinions and recommendations of a qualified health care professional who treated the student.

If the request for medical leave of absence is approved, the student's academic record will reflect a grade of W for all enrolled courses that term. No special designation for the reason of the withdrawals is made on the academic record, and tuition and fees are charged in the same manner as other withdrawals. Refunds of tuition and fees due to a leave of absence will follow the VCU refund policy, which is published in the Tuition, fees and expenses (p. 47) section of this Bulletin. Certain academic programs have specific continuance standards; students in those programs should consult their program adviser to determine the impact of a leave of absence on the student's status and progress

in the program. Students should consult the Office of Financial Aid to understand the potential negative impact of a leave of absence or withdrawal, for any reason, on their academic progress and future financial aid in relation to satisfactory academic progress.

An undergraduate student who needs to withdraw for health reasons from one or more particular courses, rather than from all courses, may request course withdrawal as an academic accommodation through the Student Accessibility and Educational Opportunity (<https://saeo.vcu.edu/>) office or, for students in health sciences programs, the Division for Academic Success (<https://das.vcu.edu/>). The university may grant selective course withdrawal as a reasonable accommodation to enable qualified students to continue in an academic program. More information about how to seek an accommodation for selective withdrawal for health reasons can be found on the SAEO website (<https://saeo.vcu.edu/>).

Requests for withdrawals for health reasons submitted after the last day of classes in a term are requests for retroactive action and are reviewed by the Academic Regulations Appeals Committee (p. 22).

Once a leave of absence has been granted, a registration hold is placed on the student's record, which prevents registration activity for any future term. If the leave is granted after preregistration for the following academic term has begun, then, in addition to the registration hold, the student's registration for the following term(s) will be cancelled and all courses will be dropped. A student on leave must complete the university's medical leave of absence reinstatement process and be approved for reinstatement in order for the registration hold to be removed.

In the event that the university reasonably determines a student's health poses a significant risk to the health or safety of any member of the university community, including the student, patients or others, and the student is unable or refuses to initiate steps to take leave, administrative leave may be made by the dean of students' office in consultation with the senior vice provost for student affairs (or designee) and, as appropriate, relevant faculty and a qualified health care professional. The student placed on administrative leave may submit a written appeal to the senior vice provost for student affairs (or designee). The appeal must be filed within three business days (unless otherwise noted) of being placed on administrative leave.

Medical leave of absence reinstatement process

Undergraduate students on medical leave are eligible to re-enroll at VCU once they have completed the medical leave of absence reinstatement process. The goal of the reinstatement process is for the student to demonstrate that they are ready to return to the university environment and resume study in their academic program. The student must provide evidence of their readiness to return, including documentation from a qualified health care professional who treated the student during their leave. More information regarding the reinstatement process, including all forms and documents, can be found on the dean of students' website (<https://students.vcu.edu/find-resources/dean-of-students/>).

The dean of students' office (<https://students.vcu.edu/find-resources/dean-of-students/>) in the Division of Student Affairs (<https://students.vcu.edu/>) will review the student's request for reinstatement and determine whether the student has completed all conditions for reinstatement, in consultation with Student Accessibility and Educational Opportunity (<https://saeo.vcu.edu/>), the Division for Academic Success (<https://das.vcu.edu/>), University Student Health Services (<https://health.students.vcu.edu/>) and/or University Counseling Services (<https://>

counseling.vcu.edu/), as appropriate. Such review will consider any medical or other relevant information submitted by the student and will be based on an individualized assessment of each student, including consideration of current medical knowledge and/or the best available objective evidence of the student's ability to function academically at the university with or without accommodations. Careful consideration will be given to the available opinions and recommendations of a qualified health care professional who treated the student. As part of this individualized assessment, the student may be required to undergo an evaluation, including a medical or psychological evaluation, by an independent and objective health care professional designated by the university. The student may also be required to release the evaluation to University Student Health Services (<https://health.students.vcu.edu/>), University Counseling Services (<https://counseling.vcu.edu/>) and other administrators, as appropriate.

Graduation information

Graduation application

VCU confers degrees in May, August and December. A commencement exercise is held in May for May graduates only. A commencement exercise is held in December for August graduates and December graduates. Each student who expects to complete the degree requirements by the end of a semester or summer session must apply to graduate in accordance with dates published on the university academic calendar (<http://academiccalendars.vcu.edu>). Candidates who do not graduate at the end of the semester for which they have applied must reapply.

Students who may have enough credits to be eligible to graduate will be notified by email of the graduation process each semester. The email will contain submission deadlines and steps to begin the graduation checkout process. Eligible students should apply to graduate by the dates indicated in the email and noted in the university academic calendar (<http://academiccalendars.vcu.edu>), which is available online. Departments are notified once a student applies to graduate. Students should schedule a conference with an adviser well in advance of the deadline to ensure they are on track for graduation and should note that approval by the department chair and dean is also required.

Students planning to graduate in the current semester should proceed as follows:

- Complete the Apply to Graduate procedure on eServices (<https://my.vcu.edu>). The undergraduate graduation application will be provided during this process. **If a student is graduating from more than one program (ex. dual or double degree program), they must complete the entire graduation checkout process through eServices for each program. The student's department will be notified once all steps are completed.**
- Complete the undergraduate graduation application according to the instructions provided. A separate set of graduation forms must be completed and submitted for each program from which students intend to graduate.

No degrees will be conferred unless students apply to graduate.

Degrees will be awarded and diplomas issued in a current semester only. Students who do not complete the graduation checkout process in the semester in which they actually complete their programs will be awarded their degrees in the semester in which they apply to graduate. In such

cases, a text notation will be added to the transcript to indicate the date that course work for the degree was completed.

Graduation checklist

The total number of semester credits required for graduation depends upon the degree program. Specific information may be found under degree program descriptions. In addition to the specific requirements listed by the college/school/department, the following graduation checklist for undergraduate students summarizes all general requirements for graduation and issuance of a diploma.

- Overall undergraduate GPA and major area GPA must be, at minimum, 2.0.
- Student must have completed 25 percent of the semester-hour credits required for the bachelor's degree in residence at VCU, including at least 30 of the last 45 credits.
- Student must have earned a minimum of 120 credits, including transfer credits.
- Student must have earned a minimum of 45 upper-level credits.
- All grades of Incomplete (I), Continued (CO), Progress (PR), Not Recorded (NR) and No Grade (NG) must be converted to final letter grades no later than the last day of class of the semester in which the candidate plans to graduate.

Students are reminded to complete a final check of their academic records before they exit the university to ensure that all temporary grades have been converted, that the record accurately reflects their academic histories and that all degrees have been posted. Requests for changes to the academic record must be made within the first six months following graduation, but this requirement may be superseded by other university-specific deadlines (e.g., those governing requests for a change of grade). Commonwealth of Virginia record-retention requirements may affect the university's ability to address requests for changes to the academic record. Students must settle all financial obligations to the university prior to the issuance of a diploma.

Graduating with honors

Dean's list

The dean's list is a recognition of superior academic performance. A student is automatically placed on the dean's list for each semester in which a minimum semester GPA of 3.5 is attained, based on a minimum of 12 semester credits, excluding courses graded credit/noncredit, with no grade below C. A notation is placed on the student's academic record. Students earning marks of I or PR are ineligible for the dean's list for the semester in which these grades were earned.

Laudatory honors

Candidates for a baccalaureate degree who complete a minimum of 45 credits at VCU may qualify for graduation honors. Cum laude is awarded for a 3.30 to 3.59 GPA, magna cum laude is awarded for a 3.60 to 3.89 GPA and summa cum laude is awarded for a 3.90 GPA or better, at the time of graduation.

Calculation of the GPA for honors determination is based on grades received for all courses taken for credit at VCU, as well as for credits accepted for transfer at VCU. However, to qualify for graduation honors, a student's GPA for courses taken for credit at VCU must be at least as high as the minimum required for the specific honor bestowed. Recognition of graduation honors is made on the student's diploma, permanent record and in the commencement program (because of the early publication of

the commencement program, the honor status from the last semester prior to graduation will be reflected in the commencement program).

Students who have participated in the Honors College and who have met requirements of that program may graduate with "University Honors." Please refer to The Honors College (p. 621) section of this bulletin for more information.

Special notes for graduating financial aid recipients

If a student plans to continue enrollment at VCU after graduation and wants financial aid, he or she must apply and be accepted as a degree/certificate-seeking student and enroll at least half time to meet financial aid enrollment requirements. If a student received federal loan funds during enrollment at VCU, he or she will be required to complete exit counseling. The student's diploma or transcript will not be released until he or she completes this required obligation.

Exit counseling required

Exit counseling is required for students receiving the following loans: William D. Ford Federal Direct Loans (subsidized or unsubsidized), Federal Perkins Loan, Health Professions Student Loan, Nursing Student Loan, Loans for Disadvantaged Students, Primary Care Loan and University Long-term Loan. Borrowers will be notified about exit counseling during the semester in which they are scheduled to graduate or drop below half-time enrollment. Visit the VCU Office of Financial Aid website for additional information about exit counseling for the Direct Loan program (<http://www.finaid.vcu.edu/assistance/loans/exit.html>).

Commencement participation

When a student has submitted a degree application for spring graduation but does not meet degree requirements due to extenuating circumstances, the student's dean may permit the student to participate in commencement exercises. Permission may be granted only when six or fewer credits are lacking for degree completion and the student demonstrates his or her intent to complete the needed credits by the end of the summer session.

When such an exception is made, the dean confirms the following conditions to the student:

- Participation in the commencement ceremonies does not mean the student has been awarded a degree.
- The degree will be awarded in the semester or summer session in which all degree requirements have been met.
- The exemption is made only to accommodate the student's request and does not obligate VCU to ultimately grant a degree unless all requirements and conditions have been met.

MCV Campus graduation candidates for degrees to be conferred at the close of the spring semester must be present at the universitywide graduation ceremony to receive their degrees. No individual may be exempt from this regulation unless excused by the dean of his or her school.

UNDERGRADUATE STUDY

Virginia Commonwealth University currently offers more than 60 undergraduate programs in fields ranging from the arts and humanities to science and engineering to business and education. The University Undergraduate Curriculum Committee performs major coordination among these programs through review of proposed curricular revisions, deletions and additions. Chaired by the senior vice provost for academic affairs, the committee's voting membership comprises two elected faculty members from each academic unit that offers undergraduate degree programs.

General policy governing admission and enrollment

As a comprehensive, metropolitan, public institution, Virginia Commonwealth University seeks to provide excellent higher education for those who will profit from an intellectually challenging experience. The university encourages applications from people who are sincere in their desire to study in an environment where excellence in teaching, research, scholarly activities and community services is stressed.

Recognizing the value of a diverse student body, the university invites applications from all qualified persons without regard to age, race, color, national origin, gender, religion, sexual orientation, veteran's status, political affiliation or disability. Although the university has a primary responsibility to educate Virginia residents, the value and contribution of a diverse student body is recognized and the enrollment of students from other states and countries is encouraged. Entrance requirements are in

full compliance with all applicable federal and state statutes, rules and regulations.

All people admitted to and enrolled in the university are classified as either degree-seeking or nondegree-seeking students. Degree-seeking students are presumed to be working toward a degree in approved educational programs, while nondegree-seeking students are permitted to enroll in classes on a semester basis. Recognizing a commitment to educate students who wish to take courses primarily for self improvement or to continue lifelong education, the university also encourages the enrollment of nondegree-seeking students. The university enrolls as many qualified degree-seeking and nondegree-seeking students as resources permit. When resources are limited, spaces go to those who present credentials showing the greatest potential for academic success in degree programs.

The Board of Visitors establishes general admission policies on the recommendation of the university administration. Admission criteria and policies are recommended by the Office of Admissions as well as the deans of the schools and colleges of the university on the advice of their faculties. Entrance requirements for schools and the colleges within the university may differ. Various departments may have unique admission requirements, such as examinations, auditions, portfolios, interviews, licensure or language proficiency, in order to evaluate a student's potential for success in selected programs and courses. The university selects applicants who present the strongest qualifications in scholastic achievement and potential, standardized examinations, and through the holistic review of other evidence of potential including strength of character. Each applicant is reviewed on an individual basis.

Admission guidelines

The credentials of undergraduate applicants for admission to degree status are reviewed on an individual and holistic basis. Candidates for admission to VCU are reviewed based on their academic merit; leadership, community service and talent (when applicable) also may be considered. First-time freshman applicants should review the freshman admission guidelines below. Transfer applicants should review the transfer applicant guidelines (p. 34) in this bulletin. Applicants interested in enrolling as nondegree-seeking students should read the **nondegree-seeking student guidelines** in the academic regulations section of this bulletin.

Freshman undergraduate admission guidelines

An applicant for degree status must be a graduate of an accredited secondary school (or its equivalent) or hold a GED or have taken a State Department of Education approved High School Equivalency examination. A high school student should submit an application for admission after completion of the junior year, unless applying for the early admission or advanced scholar programs, in which case the application should be submitted after the sophomore year.

All freshman applicants under the age of 22 are required to submit scores from the SAT or ACT, however some situations exist where testing is optional. Additional information on optional and required test scores (<http://www.ugrad.vcu.edu/apply/freshman/requirements.html>) for freshmen is available on the Office of Admissions website.

The college preparatory curriculum is highly preferred, and a minimum of 20 units is required for admission to all programs on the Monroe Park Campus, with the following minimum distribution of subjects: four units in English; three units in mathematics, one of which must be algebra I and one of which must be geometry or algebra II; three units in science,

one of which must be a laboratory science; and three units of history or social sciences or government. Students are encouraged to present at least three units in a modern or ancient language or two units of two foreign languages.

In addition, preference is given to candidates who submit the Advanced Studies diploma or its equivalent. Information about the Advanced Studies diploma can be found on the State Council of Higher Education for Virginia (<http://www.schev.edu/index/students-and-parents/prepare/high-school-graduation-requirements/>) website.

Freshman applicants planning to pursue postgraduate studies in the health professions (dentistry, medicine, occupational therapy, pharmacy and physical therapy) are advised to choose a pre-health advising track in addition to their academic major. For more information about professional health advising tracks and majors, please see the Academic advising (p. 57) section.

The Honors College offers qualified students interested in health science the opportunity for early acceptance into many of the MCV Campus programs. See the Honors College (<http://www.honors.vcu.edu/guaranteed/>) website for details.

Freshman applicants who are not admitted with degree status may be eligible to enroll at VCU as nondegree-seeking students provided one year has elapsed since their actual or intended high school graduation date.

Nondegree-seeking student guidelines

Eligibility guidelines for nondegree-seeking students (p. 28) may be found in the academic regulations section of this bulletin.

Transfer applicant admission guidelines

The university undergraduate transfer policy and the state policy on transfer agreement may be found in the admission guidelines for transfer students (p. 34) section of this bulletin.

School of the Arts freshman admission guidelines

Students applying to the School of the Arts must submit the standard university undergraduate application in addition to supplemental materials. The School of the Arts faculty reviews all applications to programs in the School of the Arts. All visual arts and design applicants and all technical theatre applicants are required to submit a visual portfolio with their application. All performing arts applicants are required to visit VCU for an audition and/or interview. Applicants to the cinema and art history programs also must submit writing samples. For additional supplemental requirements and online application materials (<https://arts.vcu.edu/admissions/how-to-apply/>), visit the School of the Arts website.

International admissions

VCU encourages qualified international students, both immigrant and nonimmigrant, to seek admission to the university. See the Office of Admissions (<https://www.vcu.edu/admissions/apply/international/>) website for additional information.

As required by U.S. regulations and by VCU admission policies, nonimmigrant applicants must demonstrate satisfactory academic achievement, adequate English proficiency and the ability to finance all educational and living expenses. Applicants can refer to the freshman admission guidelines (p. 32), transfer admission guidelines (p. 34)

and admission procedures (p. 33) elsewhere in this section for specific requirements.

Admission procedures

It is the responsibility of the applicant to ensure that all required admission documents are forwarded to the Office of Admissions before the deadline. (Refer to the freshman application deadlines (<https://www.vcu.edu/admissions/apply/freshman/>) or transfer application deadlines (<https://www.vcu.edu/admissions/apply/transfer/>)).

Applications and supporting credentials for undergraduate programs offered on both campuses must be submitted to the Office of Admissions.

All applications and supporting documents become the property of the university and are not returned to the applicant. After all required documents have been received, candidates are notified in writing of the decision by the Office of Admissions.

The following must be submitted to the Office of Admissions when applying for an undergraduate degree program:

1. **Official application form.** Candidates seeking admission or readmission to the university in an undergraduate degree program must file a Common Application (first-time freshman applicants only) or the VCU online application before the specified deadline. Students planning to complete a second baccalaureate degree also must submit this application. Students will be able to check their application status online to be sure the university has received all required materials (admission decisions are not provided online). Care should be taken to read the admissions guidelines in this bulletin, to follow the directions accompanying the application and to complete all information requested. Incomplete or incorrect applications will result in a processing delay.
2. **Application fees.** Application fees are nonrefundable and should be submitted via credit card when applying online. Do not send cash, checks or money orders. For current application fees, see the Office of Admissions website (<https://www.vcu.edu/admissions/>).

The application fee is nonrefundable. Applications may not be processed if submitted without a fee or the applicant will be billed. Students currently enrolled in programs on the VCU Monroe Park Campus who are applying to undergraduate programs on the MCV Campus are not required to remit the application fee.

3. **Official transcript(s).** Freshman applicants are required to submit their official high school transcript(s) showing course work completed to date. The secondary school record should contain courses and grades earned, rank in class and overall GPA. A final transcript also is required showing date of graduation, overall GPA and rank in graduating class if available.

Transfer candidates must request the registrar of each college attended to send an official transcript of their course work. Transfer candidates who have earned fewer than 30 semester credits/45 quarter credits also must submit their secondary school records. Priority application review will be given to applicants who have completed at least 30 credits at their former institution(s) and who apply and submit all required documentation by the recommended application deadline.

Applicants to the School of Nursing undergraduate program on the MCV Campus must submit official transcripts from all colleges, universities and hospital schools/programs attended.

For readmission candidates, the Office of Admissions will obtain the student's VCU transcript. Applicants who have attended other colleges since leaving VCU must request the registrar of each college to send official transcripts to the Office of Admissions.

4. Test scores.

- a. Freshman applicants (high school graduates and GED holders) 22 years of age or younger must submit SAT or ACT scores and, if applicable, an official copy of their GED scores. Electronic submission is preferred.
 - i. **Score optional review**
Excluding the exceptions noted below, freshman applicants with a minimum high school GPA of 3.3 may request that their application be reviewed without submitting standardized test scores. Applicants should request to be considered for admission to the university without test scores on the application for freshman admission.
 - ii. **Exceptions to score optional review**
SAT or ACT scores will be required for freshman applicants who wish to be considered for VCU's merit-based scholarships (the Presidential, Provost and Deans' scholarships), students applying to the VCU Honors College and the College of Engineering, home-schooled students, and non-native English speakers. Applicants in these categories may not request the score optional review.
- b. Transfer applicants 22 years of age or younger and with fewer than 30 semester/45 quarter credits of college work must submit SAT or ACT scores.
- c. Applicants whose native language is one other than English must sit for a test of English proficiency and arrange for the testing agency to send the results to VCU (code 5570). Please visit the Office of Admissions website (<https://www.vcu.edu/admissions/apply/international/undergraduate-applicants/#tabs-193114>) for more information and details about required test scores. Some MCV Campus programs also may require Test of Written English or Test of Spoken English scores.

5. **Supplemental application requirements.** School of the Arts applicants must submit supplemental materials as described on the school's website (<https://arts.vcu.edu/admissions/how-to-apply/>). Applicants to all undergraduate programs on the MCV Campus must submit supplemental application materials as described online on the admissions and aid section of the VCU website (<https://www.vcu.edu/admissions/apply/>).

Freshman application deadlines

Program-specific application deadlines for freshmen are available in the admissions and aid section of the VCU website (<https://www.vcu.edu/admissions/apply/freshman/>).

Admission notification

Freshman applicants accepted to the university for the fall semester are notified by letter of the conditions of their acceptance by April 1 if they meet the Jan. 15 recommended deadline. Freshman applicants who apply under the regular admission process may receive early notification of their acceptance if they present exceptional admission credentials. Transfer applicants to programs on the Monroe Park Campus will be notified of an admission decision on a rolling basis.

Information on advisement and registration procedures, the immunization form, and housing information is included with the acceptance letter. Virginia requires that all full-time students enrolling for the first time in any state institution of higher education furnish an immunization record from a qualified licensed physician. New VCU students must submit their immunization form to University Student Health Services.

When an applicant is tentatively accepted to the university, a final transcript is required to complete the individual's admission file. If the official transcript is not received by the start of the semester for which the student was accepted, an administrative hold will be placed on future registrations until the credentials are received establishing the student's eligibility. The Office of Financial Aid will not be able to disburse funds until the university has received final transcripts.

The university reserves the right to rescind offers of admission if the final documents indicate that the applicant no longer satisfies the entrance requirements upon which acceptance was granted.

Responding to the offer of admission

Fall freshman applicants accepted to the university by April 1 must notify the Office of Admissions of their intent to enroll or not to enroll by May 1. Fall freshman applicants, if accepted after April 1, must notify the university within two weeks of receiving their notification of admission.

Fall transfer applicants accepted to programs on the Monroe Park Campus must notify the Office of Admissions of their intent to enroll by June 1 or two weeks after receiving their letter of admission. Fall applicants to the health sciences programs must respond within the time frame listed on their acceptance letters as determined by the individual department. All students accepted for the spring semester must respond to the offer of admission within two weeks of receiving their notification of admission.

When accepting the offer of admission, all immunization records should be sent to University Student Health Services.

A deposit is required of applicants who accept VCU's offer of admission. The deposit is credited to the student's account with the university and is not deferrable to a future semester. Deposits are not refundable after May 1. Students who have received and accepted a university scholarship are not required to submit a deposit. Students experiencing economic hardships may request a waiver of deposit by providing a copy of their Student Aid Report along with their response form. The decision to grant a waiver is based on information submitted to the university on the student's Free Application for Federal Student Aid.

Admission guidelines for transfer students

Transfer applicants are considered for admission to the university provided they present evidence of good standing at all previous

institutions of higher learning; to be competitive for admission consideration into VCU, they should present a minimum cumulative GPA of 2.5 from all accredited institutions. Priority application review will be given to applicants who have completed a minimum of 30 credits at their former institution(s) and submit all required documentation by the recommended application deadline. Applicants with a minimum of 30 semester (45 quarter) credits are not required to submit high school transcripts or SAT or ACT scores (unless required by the applicant's intended degree program).

Transfer applicants who have earned fewer than 30 semester (45 quarter) credits will be reviewed on the basis of their high school performance; they must submit their high school transcripts in addition to their credentials from all accredited institutions of higher learning. Transfer applicants who have earned fewer than 30 semester (45 quarter) credits and who are 21 years of age or younger must submit SAT or ACT test results and also must meet specific guidelines listed in the Freshman undergraduate admission guidelines (p. 32) section of this chapter.

The undeclared major is not open to students with 60 or more college credits. Transfer applicants will be notified of an admissions decision on a rolling basis until the class is filled.

Some programs have additional requirements for admission as a transfer student. Transfer applicants should consult the appropriate area of this Bulletin or the departmental website for admission requirements.

Transfer applicants who are not admitted with degree status may be eligible to enroll as nondegree-seeking students as determined by the Office of Admissions.

Transfer applicants ineligible to return to a former institution because of an academic suspension may not enroll at VCU for a period of one year for the first suspension and five years for the second suspension.

Transfer applicants who have been suspended from another institution for nonacademic or disciplinary reasons are referred to the Office of the Senior Vice Provost for Student Affairs for preadmission clearance.

Additional information for transfer students is available on the VCU Office of Admissions website (<http://ugrad.vcu.edu/apply/transfer/>) as well as the VCU Transfer Center's (<http://transfer.vcu.edu>) website.

University undergraduate transfer credit policy

An official evaluation of transferable credits for applicants to both Monroe Park Campus and MCV Campus programs is made by the VCU Transfer Center after the applicant has accepted an offer of admission to the university. The Transfer Center will provide an unofficial evaluation of transferable credits to prospective transfer applicants upon request. The acceptance of transfer credits is based on the following guidelines.

Accreditation

1. Collegiate work will be considered for transfer credit from postsecondary institutions that are accredited by one of the six institutional accrediting associations.
 - Middle States Commission on Higher Education
 - Higher Learning Commission
 - New England Association of Schools and Colleges, Commission on Institutions of Higher Education
 - Northwest Commission on Colleges and Universities

- Southern Association of Colleges and Schools, Commission on Colleges
 - Western Association of Schools and Colleges
2. VCU may accept for transfer college-level credits earned at institutions accredited by other accreditation agencies recognized by the U.S. Department of Education that have developed formal articulation agreements with VCU. Articulation agreements (<https://transfer.vcu.edu/prospective/agreements/>) are posted on the Transfer Center website.
 3. Collegiate work will be considered for transfer credit for courses completed at colleges and universities outside of the U.S. which are accredited by one of the six institutional accrediting associations listed previously or approved by the Ministry of Education (or other appropriate governmental agency) of the country in which they are located. Students seeking transfer credit from international institutions are required to submit an official transcript and a course-by-course evaluation completed by a member of one of the following organizations:
 - National Association of Credential Evaluation Services. A list of current member organizations (<http://www.naces.org/members.html>) can be found on the NACES website.
 - Association of International Evaluators, Inc. A list of current members (<http://aice-eval.org/members/>) can be found on the AICE website.

Governing policies

1. The evaluation and award of transfer credit will be based on official transcripts. Students are required to submit official transcripts for all post-secondary institutions attended. To be eligible for evaluation, course work must appear on an official transcript from the institution that offered the course work and initially conferred the credit in question. Students do not retain the right to pick or choose certain courses for transfer. All transferable work will be posted to the VCU transcript. Once awarded, transfer credit will not be removed from a student's VCU record for any reason, unless requested by the Office of Records and Registration.
2. Only courses with grades of C- or higher will be transferable. This includes courses taken on the pass/fail or pass/no pass systems and courses taken for grades of satisfactory or unsatisfactory that receive earned credits and a satisfactory grade (or comparable passing grade) from the transfer institution as long as the comparable passing or satisfactory grade is equivalent to a grade of C- or better. Transfer credits graded as pass/fail will not be included in the computation for determination of academic honors at VCU.
3. VCU follows a semester calendar and posts credits to the VCU transcript in semester hours. Course work completed at institutions that follow a semester-based academic calendar will be posted to the VCU transcript with the semester hour total attempted for each course. Course work completed at institutions on non-semester-based academic calendars will be converted and posted to the VCU transcript with the semester hour equivalent attempted for each course. For example, the conversion rate for quarter-hour credits is one quarter-hour credit to two-thirds of a semester-hour credit.
4. Whenever possible, courses accepted for transfer are evaluated and posted on the VCU transcript as VCU course equivalents to ensure those credits apply to VCU degree requirements. Transferable courses that do not have equivalents at VCU are posted as either lower-level (1XX or 2XX) or upper-level (3XX or 4XX) electives. A full list of equivalency decisions on transferable courses is maintained

on the course equivalency tables located on the Transfer Center's website (<https://transfer.vcu.edu/prospective/equivalency/>).

5. Courses completed at institutions outside of the U.S. will be evaluated based on a course-by-course evaluation completed by a member of either the National Association of Credential Evaluation Services or the Association of International Evaluators, Inc. In addition to a course-by-course evaluation, students with international credit may be required to provide course information such as a syllabus (translated into English, if necessary) to the VCU Transfer Center for the purposes of determining VCU course equivalents. VCU does not accept international credit for English writing composition courses unless the school holds regional accreditation from a U.S. accrediting agency or the syllabus is reviewed and approved by the Department of Focused Inquiry. VCU does not accept English language courses for transfer.
6. No distinction will be made by VCU regarding credit received for college courses that are taken through dual enrollment arrangements with high schools. Students who earn dual enrollment college credit must submit official transcripts to VCU from the college awarding the credit.
7. Credit granted by another institution for prior learning will not be accepted **based on that institution's transcript**. To receive credit for prior learning (e.g. College Level Examination Program, Advanced Placement, International Baccalaureate, Cambridge International Examinations, military training, etc.), the student must present official documentation from the original provider of the nontraditional experience. More information about the type and amount of credit accepted is located in the bulletin section on "Additional sources of academic credit (p. 38)."
8. The following types of credit are not transferable and will not count toward a degree:
 - Credits earned at other institutions carrying a grade of D or passing/satisfactory grade equivalent to a D (unless the D grade is earned at a European institution and converted to a C grade through the European Credit Transfer System)
 - Placement credit granted by another institution
 - Remedial or developmental courses
 - Technical, occupational, vocational and some workforce courses from two-year institutions (unless approved for transfer within an approved articulation agreement of transfer pathway of study)
9. VCU will accept credits for transfer regardless of when they were completed. However, time limits exist in some academic programs, such as in information systems or accounting, to ensure that transfer credits meet present-day academic standards. Students should consult with the Transfer Center regarding these time limits. Credits earned in those program areas with time limits will transfer as electives rather than VCU course equivalents.
10. VCU will accept credits for transfer regardless of the modality of the course delivery, such as online courses. However, due to certain programmatic accreditation requirements, students in the natural sciences may be required to complete in-person labs for major-specific science course requirements after transfer.
11. Accepted transfer credit contributes to hours earned and toward fulfillment of degree requirements at VCU. The grades of accepted transfer courses are recorded as TR on the student's VCU transcript. Hours attempted and quality points earned are not recorded.
12. Accepted transfer credits are not included in the transfer student's overall GPA at VCU. The GPA for fulfillment of VCU degree requirements is computed only from courses taken at VCU. **However,**

the grades and quality points of transferred courses are evaluated in the computation determining graduation honors.

13. A maximum of 90 total undergraduate transfer credits will be accepted. Regardless of how many transfer credits are accepted, students must satisfy all VCU graduation requirements noted in the **graduation checklist**, including the following:
 - Completion of at least 25 percent of the semester-hour credits required for their bachelor's degree program at VCU
 - Completion of at least 30 of the last 45 semester-hour credits required for their bachelor's degree program at VCU
 - Completion of at least 45 upper-level credits (courses numbered 300 or higher)

No more than half (50 percent) of the courses applied to the major requirements can be transferred from another college. In other words, students may need to complete at least 50 percent of their major degree requirements at VCU.

General education requirements for transfer students

1. Transfer students who earn a Uniform Certificate of General Studies, a transfer-oriented associate degree (A.A., A.S., or A.A.& S.), an Associate of Fine Arts (A.F.A.) or a bachelor's degree from a regionally accredited institution prior to enrollment at VCU will be considered to have met all lower-division general education requirements with the exception of certain lower-level and upper-level degree program requirements that also apply to native students.
2. Transfer students from Virginia community colleges and Richard Bland College who have completed approved courses through the Virginia-based Passport or Uniform Certificate of General Studies, with a minimum grade of C, will be considered to have met the comparable general education requirements at VCU. This includes students who complete Passport or UCGS courses through dual enrollment at high school.
3. VCU provides students the option of reverse transfer of credit earned at VCU back to their former college. Virginia Community College System or Richard Bland College transfer students who are eligible for the awarding of an associate degree through reverse transfer of credits within one semester of enrollment at VCU will be considered to have met all lower-division general education requirements. Students must complete all other lower-level and upper-level degree program requirements that also apply to native students.
4. Since some transfer students may have followed VCU course or pathway recommendations based on prior general education requirements, all transfer students have the option of selecting the VCU general education requirements in effect at the date of the student's admission to their prior institution. This option will remain in effect for students matriculating at VCU through fall 2025.

Transfer students from Virginia community colleges who earn an Associate of Applied Science degree as part of an established transfer pathway (e.g., A.A.S. in Nursing to Bachelor of Science in Nursing or A.A.S. in Early Childhood Development to Bachelor of Science in Education) will be considered to have met all lower-division general education requirements with the exception of certain lower-level and upper-level degree program requirements that also apply to native students. A full list of established pathways with A.A.S. degrees, as well as pathways with other associate degrees, can be found online (<https://majormaps.vcu.edu/transfer/>). VCU academic units developing pathways with A.A.S. degrees will ensure that community college students complete a broad range of general education courses, including,

but not limited to, two semesters of English composition (e.g., ENG 111-112).

State policy on transfer agreement

VCU welcomes applications from Virginia community colleges and Richard Bland students who have earned the Associate in Arts, Associate in Science, Associate of Fine Arts, or Associate in Arts and Science degrees, or A.A.&S. or A.S. programs in general studies. In compliance with VCU's guaranteed admission agreements with the Virginia Community College System and Richard Bland College, students holding these degrees with a minimum cumulative GPA of 2.5 and a minimum grade of C in all transferable courses will be guaranteed general admission to the university. GAA students will have junior standing at VCU **as long as they have earned a minimum grade of C in all the transferable courses** and will be considered to have met all lower-division general education requirements with the exception of certain lower-level and upper-level degree program requirements that also apply to native students. (See below for more information about requirements for all students.) Students should closely follow the detailed course suggestions offered on the **Transfer Center** website for Virginia community colleges and Richard Bland College. By following the course recommendations of VCU's transfer maps (<https://transfer.vcu.edu/prospective/pathways/>) or guaranteed admission agreements (<https://transfer.vcu.edu/prospective/agreements/>), additional lower-division courses needed after transfer to VCU can be held to a minimum.

Additionally:

- Students must make proper application for admission to VCU.
- Only courses with minimum grades of C are transferable.
- Credits needed to meet major prerequisites will be based on the **course equivalency tables** or agreements resulting from program-to-program articulation agreements. (See the **list of agreements**.)
- Students will not be required to repeat courses that have been satisfactorily completed at a Virginia community college except in cases where special restrictions apply to all students.
- Applicants to degree programs that are competitive are not guaranteed admission but will be evaluated on the same basis as native students.

For students with any of the associate degrees from a VCCS institution or Richard Bland College, VCU degree requirements in effect at the date of the student's admission to the VCCS or RBC associate degree program will be used in certifying the student for graduation if the student has not interrupted his or her associate degree more than two consecutive semesters (excluding summer sessions).

Students from VCCS institutions, Richard Bland College or other two-year institutions **who have not completed the college parallel A.A., A.F.A., A.S. or A.A.&S. degree** will have the exact designation of their status determined after an official evaluation of acceptable credits. This evaluation is determined by the equivalencies shown in the VCU **course equivalency tables** for Virginia community colleges and Richard Bland College that may be accepted, including not more than 50 percent in the major field of study. However, the applicant should realize that more than two additional years may be necessary to complete the degree requirements in certain curricula.

Requirements of native students which would apply to associate-degree holders after transfer to VCU are:

1. All bachelor's degree programs in the College of Humanities and Sciences, L. Douglas Wilder School of Government and Public Affairs, School of Social Work and VCU Life Sciences require competency through the elementary level of a foreign language (or American Sign Language); some majors require competency through the intermediate level.
2. The School of Social Work requires a 2.5 GPA for admission to upper-level courses. The School of Business requires a minimum GPA for admission to upper-level course work. Please contact the Office of Undergraduate Studies in the School of Business for the current minimum GPA required. The School of Mass Communications requires a 2.5 GPA for admission to upper-level work. The School of Education requires a minimum GPA of 2.8 for admission to the teacher preparation program. For students applying to majors in the School of the Arts, a portfolio evaluation for visual arts applicants and an audition for performance applicants are required.
3. The professional baccalaureate programs within the schools of Dentistry and Nursing and the College of Health Professions, and the doctoral programs in physical therapy and pharmacy have specific program-related lower-level requirements that must be completed to apply to and enter health sciences programs and to achieve success in the programs, if admitted.
4. The health, physical education and exercise science program has specific lower-level requirements related to state-approved program status, professional certification and entry into the practicum sequence. Specified science courses are prerequisite for entry into upper-level kinesiology and exercise science courses.
5. Transfer work from some occupational or technical programs is reviewed under specific conditions for the completion programs in clinical laboratory science and nursing for community college A.A.S. degree holders.
6. Students wishing to transfer to the College of Engineering must have a 3.0 GPA with no grades below a C. Also, minimum grades of B must be attained in mathematics, science or engineering courses to be considered for transfer. Transfer students from the VCCS will follow the **admission agreement for engineering**.
7. The A.A.&S. and A.S. programs in general studies are considered transfer degrees by VCU.
8. Detailed information about the **Virginia Community College/VCU and Richard Bland College/VCU transfer-equivalent courses** is available on the Transfer Center website.

Transfer application deadlines

Program-specific application deadlines for transfer students are available in the admissions and aid section of the VCU website (<https://vcu.edu/admissions/apply/transfer/>).

Evaluation of transfer credit

An evaluation of transferable credits for applicants to both Monroe Park Campus and MCV Campus programs is made by the Transfer Center (or appropriate program) after the accepted applicant's final transcript has been received by the Office of Admissions.

Accepted transfer credit contributes to hours earned and toward fulfillment of degree requirements at VCU. The grades of accepted transfer courses are recorded as TR on the student's VCU transcript, and hours attempted and quality points earned are not recorded. Accepted

transfer credits are not included in the transfer student's overall GPA at VCU. The GPA for fulfillment of VCU degree requirements is computed only from courses taken at VCU. The grades and quality points of transfer courses are evaluated in the computation determining graduation honors. Accepted quarter-hour credits recorded on the VCU transcript are converted to semester-hour credits.

Credits earned at other institutions carrying a grade of D are not accepted for transfer

Courses taken on the pass/fail or pass/no pass systems or courses taken for grades of satisfactory or unsatisfactory that receive earned credits and a satisfactory grade (or comparable passing grade) from the transfer institution receive equivalent semester credit. Transfer credits graded as pass/fail will not be included in the computation for determination of academic honors at VCU.

Degree candidates must complete 30 of the last 45 credit semester hours required for their bachelor's degree program at this institution.

Attainment of the college/school or department minimum GPA and any other standard requirements is required of all students, including, in the case of the School of the Arts, a portfolio evaluation for visual arts applicants and an audition for performing arts applicants. Applicants to degree programs that are competitive are not guaranteed admission but will be evaluated on the same basis as currently enrolled VCU students.

Students who have earned the A.A., A.S. or A.A.&S. degree from a VCCS institution or Richard Bland College should refer to the articulation agreement information in this bulletin.

Students from VCCS institutions, Richard Bland College or other two-year institutions **who have not completed the college parallel A.A., A.S. or A.A.&S. degree** will have the exact designation of their status determined after an evaluation of acceptable credits. This evaluation is determined by the equivalencies shown in the VCU Transfer Guide for Virginia Community Colleges and Richard Bland College that may be accepted, including not more than 50 percent in the major field of study. However, the applicant should realize that more than two additional years may be necessary to complete the degree requirements in certain curricula.

Credits earned in community college occupational or technical programs will be judged on their own merits to determine their applicability toward VCU degree requirements. In addition, many accredited institutions offer correspondence courses, which may be considered for transfer credit.

Additional sources of academic credit

VCU awards advanced standing and credit, with qualifying scores or grades, for additional sources of academic credit. These additional sources include: Advanced Placement, International Baccalaureate, Cambridge Advanced, College Level Examination Program, military service credit recommended by the American Council on Education and the DANTES Subject Standardized Test Program. Students should consult the charts below for academic credit guidelines.

The awarding of credit is determined by the faculty. Faculty members from the relevant academic departments review the subject curricula, subject examinations, grade distributions and marking schemes provided by these examination agencies. After reviewing such materials, faculty members make informed judgments about what credit, if any, is to be awarded. Faculty members verify such judgments through feedback provided from student performance in more advanced courses at VCU. Once the faculty review is complete, the University Undergraduate

Curriculum Committee provides a secondary review and then publishes the results by means of transfer tables in the VCU Undergraduate Bulletin indicating the examination, test score, VCU course equivalent and number of credits awarded.

In order to be eligible for academic credit, new students must submit transcripts and/or scores to the VCU Transfer Center before the end of the first semester of enrollment. Official transcripts may be sent to VCU Transfer Center, Box 842532, Richmond, VA 23284-2532. For more information, contact the Transfer Center at (804) 827-1349.

Note: The Virginia Commonwealth University Board of Visitors gives the University Undergraduate Curriculum Committee the authority to review these sources of academic credit as needed. The UGCC will report substantial changes to the board for further approval. (Approved by VCU Board of Visitors, Nov. 10, 2011.)

Credit for Advanced Placement tests of the College Board

AP tests passed with scores of 3, 4 or 5 will, depending on the test, be considered for advanced standing and credit for the corresponding courses at VCU. The chart below provides information about the VCU equivalent credit for the various AP tests.

To ensure consistency, the VCU Transfer Center is the official credit notification point for AP credit for all university programs. Final determination of credit will be made after test results have been received and evaluated by the Transfer Center. Credits awarded are counted as credits earned toward the degree, but are not used in the computation of the student's VCU grade-point average.

For more information, contact the Transfer Center at (804) 827-1349.

Credit for Cambridge International Examinations

The university may grant credit for Cambridge International Examinations comprising levels Advanced and Advanced Subsidiary offered through the University of Cambridge in England. These courses and examinations are administered through registered CIE Centers in public high schools throughout the United States. A-level syllabuses and exams cover approximately two years of college-level curriculum in a subject and the AS-level syllabus and exam covers the first year of the two-year A-level curriculum.

Cambridge tests passed with a minimum final grades of E will, depending on the test, be considered for advanced standing and credit for the corresponding courses at VCU. The applicability of such credit toward the student's degree program is interpreted by the department or school in which the student seeks a degree.

To ensure consistency, the VCU Transfer Center is the official credit notification point for Cambridge A/AS credit for all university programs. Final determination of credit will be made after test results have been received and evaluated by the Transfer Center. Credits awarded are counted as credits earned toward the degree, but are not used in the computation of the student's VCU grade-point average.

Students requesting evaluation of their Cambridge credits are to request an official copy of their transcript from the CIE coordinators at the student's specific high school. Official transcripts may be sent to VCU Transfer Center, Box 842532, Richmond, VA 23284-2532.

The chart below provides information about the VCU equivalent for various Cambridge examinations. Contact the Transfer Center if an examination is not included in the chart.

For more information regarding Cambridge International Examinations, please contact the VCU Transfer Center at (804) 827-1349.

College Level Examination Program

The College Level Examination Program is designed to allow people who have gained knowledge outside the classroom to take examinations and receive college credit for what they have learned. CLEP scores of 50 or higher will, depending on the test, be considered for advanced standing and credit for the corresponding courses at VCU. The chart below provides information about the VCU equivalent credit for CLEP scores. Contact the VCU Transfer Center if an examination is not included in the chart.

To ensure consistency, the VCU Transfer Center is the official credit notification point for CLEP credit for all university programs. Final determination of credit will be made after test results have been received and evaluated by the Transfer Center. Credits awarded are counted as credits earned toward the degree, but are not used in the computation of the student's VCU grade-point average.

Procedures for new students

Students who took CLEP examinations prior to enrollment at VCU must submit transcripts and/or score sheets to the VCU Transfer Center, 900 Park Ave., Box 842532, Richmond, VA 23284-2532.

Procedures for continuing VCU students

1. Students should obtain CLEP approval forms, information about CLEP general and/or subject examinations, VCU course equivalency information, optional essay requirements and CLEP applications from the Testing Center in Hibbs Hall, First Floor, Box 842500, Richmond, VA 23284-2500; (804) 827-8108.
2. Students should discuss the examination(s) to be taken with an adviser.
3. Students should schedule a CLEP exam at the Testing Center or at another site of their choosing. Proctoring fees vary by site and students are responsible for the proctor and exam fees. The exam fee is paid on the CLEP website.

Regulations for continuing VCU students

1. CLEP credit is officially awarded only to students who are fully accepted into a VCU degree program.
2. A student may not attempt a subject or general examination if it duplicates in part, or full, any VCU course or combination of courses that the student has already completed or enrolled in for credit. This includes courses for which a student enrolls but subsequently withdraws and receives a grade of W.
3. If a student has earned CLEP subject examination credit, the student may not take a VCU course for credit that would duplicate the CLEP credits already earned.
4. A maximum of 54 semester credits can be earned through CLEP examinations.

The chart below provides information about the VCU equivalent for various CLEP examinations. Contact the VCU Transfer Center if an examination is not included in the chart.

For more information regarding CLEP, please contact the VCU Transfer Center at (804) 827-1349.

¹Decisions regarding VCU equivalents were made in consultation with the VCU departments.

Undergraduate credit by examination

Recognizing that VCU enrolls students of varying backgrounds and experiences, the university provides its students the opportunity to accelerate their education through credit by examination. The following outline describes conditions under which credit by examination may be given and the procedure for doing so.

1. With the approval of the dean, each department or program shall:
 - a. Determine which, if any, courses shall be available for credit by examination. The student should check with the department offering course work in the area in which he or she wishes to take credit by examination for a list of the courses so designated.
 - b. Determine the types of examinations, standards of evaluation and evaluators for the courses so designated.
 - c. Determine the qualifications for students to be eligible to take the examinations.
2. The examinations, if available, may be taken by any enrolled student during the fall and spring semesters and during the summer session.
3. The student wishing to take credit by examination must meet the following requirements:
 - a. Not have received a grade listed in this bulletin, including AU or W for the course for which credit by examination is sought. Also, the student should not have been granted transfer credit for a similar course taken elsewhere.
 - b. Be a currently enrolled student as certified by the examining department.
 - c. Meet departmental and school eligibility requirements as evidenced by the written approval of the chair of the examining department.
4. After consultation with the major adviser and within the first four weeks of a semester or the first week of a summer session, the student must complete the Credit by Examination Approval Form with the department chair. The form, available from the department, should be left with the chair when it is completed.
5. Within two weeks, the student is notified by the dean's office of the time and place of examination.
6. After notification, but before taking the exam, the student must pay the university cashier the fee established by VCU for each credit being sought. As verification of payment, the student presents the receipt to the department chair before the examination is taken.
7. After the examination is taken, the results and the examination are sent to the dean's office, which notifies the student of the results. If the student passes the examination, the course title, credits earned and the grade CR are recorded on the student's permanent academic record. Credits so earned are applied toward the graduation

requirement for total credits. However, these credits are not included in the computation of the student's GPA.

Military credit

The university may grant credit for formal military service training courses offered by the various branches of the U.S. armed forces as well as for acceptable scores on standardized tests. VCU also awards military credit for active service in the military. The guidelines for granting such credits include:

1. Service members and veterans of the U.S. Army, U.S. Navy, U.S. Marine Corps and the U.S. Coast Guard receive the **Joint Services Transcript** as a record of their military training. The JST provides credit recommendations for military training through the American Council on Education evaluation process. VCU recognizes the ACE recommendations from the JST and awards transfer credit for military training courses into college credit as determined by VCU faculty if a comparable course is offered at VCU. Examples of the type of transfer credit awarded for military training are listed in the table below.
2. Service members and veterans of the U.S. Air Force receive a transcript from Air University (formerly the **Community College of the Air Force**) with college credits awarded for military training. VCU awards transfer credit from the Air University transcript as transfer credits according to VCU's transfer evaluation guidelines.
3. VCU awards credits based on acceptable scores earned on subject tests taken through Defense Activity for Non-traditional Education Support, a college-credit-by-exam-agency. The DANTES Subject Standardized Tests program is an extensive series of examinations in college subject areas that are comparable to the final or end-of-course examinations in undergraduate courses. The table below lists the amount and type of credit awarded for acceptable scores as determined by VCU faculty evaluation.
4. VCU awards credits based on acceptable scores earned on subject tests taken through the College Level Examination Program, a college-credit-by-exam program. The table below lists the amount and type of credit awarded for acceptable scores as determined by VCU faculty evaluation.
5. **Students who have completed at least one year of U.S. military service may be eligible for the award of 1-6 credits of military science electives (MILS).** To request credit, military applicants are required to provide an official JST or DD-214. The amount of credit is based on time in service (i.e., consecutive months of active duty in the armed forces, terminated under honorable conditions).
 - One year: 1 credit for MILS 2XX
 - Two years: 2 credits for MILS 2XX
 - Three years: 3 credits for MILS 2XX
 - Four years: 3 credits for MILS 2XX and 1 credit for MILS 3XX
 - Five years: 3 credits for MILS 2XX and 2 credits for MILS 3XX

- Six or more years: 3 credits for MILS 2XX and 3 credits for MILS 3XX

All credit given for years of service will be awarded to students not seeking a commission into the Army upon graduation. Students who pursue a commission in the Army through the VCU ROTC program will need to follow the United States Army Cadet Command procedures for completing ROTC requirements. These students will not be allowed to apply years of service toward MILS course credit.

Military credit will count toward the total credits needed for the degree but the applicability of such military credit toward the curricular requirements of the student's degree program is interpreted by the department or school in which the student seeks a degree. Credits accepted are counted as credits earned toward the degree, but are not used in the computation of the student's GPA. Students should consult the VCU Transfer Center for further details about the procedures for awarding military credit.

Credit is accepted directly from each of the above agencies. Service members and veterans of the U.S. Army, U.S. Navy, U.S. Marine Corps and the U.S. Coast Guard may request their military transcripts be sent directly to VCU from the JST system online (<https://jst.doded.mil/smart/welcome.do>). Service members and veterans of the U.S. Air Force may request transcripts be sent directly to VCU from Air University.

Military students may request their test score sheets for CLEP and DSST subject exams from the DANTES website (<https://www.dantes.doded.mil/EducationPrograms/take-tests-get-transcripts/gettranscript.html>).

Transcripts and/or score sheets may be sent to VCU Transfer Center, 900 Park Ave., Box 842532, Richmond, VA 23284-2532.

Examples of transfer credits awarded for military service training courses (as reported on JSTs) based on ACE recommendations

(Additional credit may be awarded on a case-by-case basis.¹)

¹Decisions regarding VCU equivalents were made in consultation with the VCU departments.

Credits earned through the International Student Exchange Program

Credits earned by a VCU student through ISEP appear on the student's transcript, but are not included in the computation of the student's cumulative GPA. See the Education Abroad (p. 616) section of this bulletin. This policy became effective July 1990.

Credits for dual-enrollment courses

Qualified students who have taken college-level work while still enrolled in a secondary school may receive academic credit. Courses taken as dual enrollment will be treated as VCU courses or transfer credits according to the evaluation guidelines (p. 37).

Approved by VCU Board of Visitors, Nov. 10, 2011. **The Virginia Commonwealth University Board of Visitors gives the University Undergraduate Curriculum Committee the authority to review these sources of academic credit as needed. The UUC will report substantial changes to the board for further approval.**

Senior Citizens Higher Education Program

A senior citizen is any person, who, before the beginning of any semester in which they claim entitlement to the senior citizen educational benefit is 60 years of age and has had legal domicile in the commonwealth of Virginia for one year. The senior citizen may take courses without paying tuition or mandatory fees, except for course-/program-related fees, under certain conditions. The tuition-free policy does not apply to the cost of private music lessons, special course and materials fees (e.g., textbooks, laboratory and art fees), or program-specific tuition and fees. Additionally, a waiver may not be submitted for noncredit courses offered through third-party partnerships. The Senior Citizen Tuition Waiver form must be submitted for each semester in which the senior citizen enrolls in classes.

If the senior citizen had a taxable income of not more than \$23,850 for Virginia income tax purposes for the year preceding the year in which enrollment is sought, the individual may take a course for academic credit. The senior citizen will be required to submit tax documentation verifying income. If the person's taxable income exceeded \$23,850, the individual may only audit the course for free.

No limit is placed on the number of terms, quarters or semesters in which a senior citizen who is not enrolled for academic credit may register for courses, but the individual can take no more than three noncredit courses in any one semester. There will be no restriction on the number of courses that may be taken for credit in any semester, or on the number of semesters in which an eligible senior citizen may take courses for credit.

The two additional conditions listed below shall be met before a senior citizen may take a course under the provisions of this program:

1. The senior citizen shall meet the appropriate admission requirements of the institution in which the student plans to enroll.
2. The senior citizen may be admitted to a course only on a space-available basis after all tuition-paying students have been accommodated, unless the senior citizen has completed 75 percent of the degree requirements necessary for a degree. At such time in the senior citizen's program, the senior citizen can enroll in courses at the same time as other tuition-paying students.

Enrichment and acceleration opportunities

Special honors programs and courses are offered at the university. Refer to the appropriate school sections of this bulletin for further information. Interdisciplinary honors courses designed for superior freshmen in any program are also available.

Early admission program

The early admission program permits exceptional students the opportunity to enroll in undergraduate programs at the university as freshmen after the completion of the junior year of high school. The program is available to students who demonstrate readiness for college by their high school record, SAT results and in an interview with an admissions counselor. Applicants for the early admission program must present a minimum GPA of 3.5 and minimum combined SAT scores of 1180 (on the critical reading and math sections of the test only) or demonstrate exceptional talent in their intended area of study. Additionally, early admission applicants must be within two of the required units for graduation and have the written approval of the high school principal (or designee) to seek admission to college as full-time undergraduate students. Candidates interested in this program should contact the Office of Admissions for further information.

Advanced scholars program

Qualified high school students from Richmond and surrounding area high schools may be permitted to carry college-level courses at the university while concurrently completing the high school diploma. Students may select courses of interest and, upon successful completion of the courses, may receive college credit. However, courses selected should not be available in the high school curriculum.

Candidates must be nominated and approved by the secondary school principal. A maximum of 100 candidates are accepted each semester and candidates may enroll in no more than two courses per semester.

As a guide to secondary schools, the following criteria for selection are considered.

1. Each candidate must be nominated and approved by the secondary school principal.
2. Each candidate must have achieved a total of 1180 points on the SAT or 118 on the PSAT, and a minimum GPA of 3.2 on a 4.0 scale
3. Each candidate must be a high school junior or senior.
4. The desired courses to be studied must be available and appropriate.
5. All parties should emphasize that tuition is charged for courses taken as an advanced scholar.

Notification forms and other information may be obtained from the Office of Admissions, Virginia Commonwealth University, Box 842526, Richmond, VA 23284-2526 or (804) 828-1222.

Teacher cadet program

The teacher cadet program is a highly selective program for students who have expressed an interest in pursuing teaching as a career. The program follows a rigorous curriculum that is standardized throughout Virginia public schools. Qualified high school students from Richmond and surrounding area may be permitted to take EDUS 101 as a college-

level course at the university while concurrently completing the high school diploma.

Participating students must meet the following requirements established by the Virginia Department of Education:

- Maintain, at minimum, a 2.7 GPA or its equivalent
- Submit three satisfactory teacher recommendations
- Submit an application that includes a brief essay

In addition, students must be approved by the secondary school principal and, if the student is under the age of 18, must submit documentation of parental approval.

Students successfully completing the course with a grade of B will receive three undergraduate credits that can be used toward electives in the VCU School of Education's five-year extended teacher preparation program. For more information about the teacher cadet program, contact the VCU School of Education at (804) 827-2670 or soessc@vcu.edu.

Orientation

The university provides orientation to all new undergraduate students. Orientation programs are designed to increase the students' awareness of the university's programs, services and facilities and to provide opportunities for faculty advising and registration for their first semester of classes.

After acceptance to the university, students are sent detailed information regarding the orientation program. Included in the summer orientation program is a program for the parents of freshman students that is especially helpful to their understanding of the university and its future relationship to their sons and daughters.

For additional information about orientation, visit the website of the Office of New Student and Family Programs (<http://nsfp.vcu.edu/>). For information regarding orientation to MCV Campus programs, contact the individual department.

Readmission guidelines

Readmission is subject to individual degree program requirements. Contact the program department or consult the appropriate program portion of this bulletin for specific information.

Students who withdraw from all courses after the first week of the semester are considered to have been enrolled for that semester. A student who does not attend VCU for three or more successive fall and spring semesters (excluding summer sessions), must submit an application for readmission to the Office of Admissions. See the undergraduate readmission/continuous enrollment chart below for details on readmission and continuous enrollment. Students who have attended another institution and wish to return after the allowable absence period or who have been suspended since their last enrollment at VCU also must apply for readmission. This application must be made before the application submission date for the semester in which the student plans to return.

Students who wish to return to VCU after enrolling at another institution are considered readmission applicants and should submit official transcripts from the colleges attended since last enrolled at VCU. Students who attend another institution during periods of suspension from VCU are considered readmitted students for admission purposes. If readmitted, they assume their VCU GPA and academic status; any course

work taken at another institution during the suspension will be evaluated according to regular procedures.

Readmission applicants who wish to change their majors may have to meet additional requirements for some programs. Applicants to the School of the Arts must submit supplemental materials as described in the application for undergraduate admission.

Students may apply for readmission to VCU for the semester following completion of the first suspension period (two semesters, one of which may be summer). Under certain circumstances, students may be considered for readmission from the second and final suspension after a period of five years. Students on second suspension who wish to return before the required completion of the five-year suspension period must appeal their readmission to the Academic Regulations Appeals Committee. Students should contact the dean's office of the school or college from which they were suspended to initiate this process. For more information on suspension policies, refer to the section on continuance in academic programs (p. 24).

Applicants who have been suspended from the university for nonacademic or disciplinary reasons are referred to the Office of the Vice Provost for Student Affairs for pre-admission clearance.

Undergraduate readmission/continuous enrollment chart

A student who does not attend VCU for three or more successive fall and spring semesters, excluding summer session, must submit an application for readmission to the Office of Admissions. Students who have attended another institution and wish to return after the allowable absence period or who have been suspended since their last enrollment at VCU also must apply for readmission.

The semester appearing in the "Must return semester" column associated with the term in the "Last enrolled semester" column denotes when a student must return to remain in continuous enrollment. If an undergraduate student wishes to return after the "must return semester," they are required to apply for readmission.

Summers are not included in the calculation of the allowable absence period. If a student chooses to return during the summer, the calculation of the allowable absence period is reset and begins anew with the following fall semester, thus summers are included under the "Last Enrolled Semester" column.

The Honors College and guaranteed admission

For detailed information on admission to The Honors College and the Guaranteed Admission Program, see The Honors College (p. 621) section of this bulletin.

Tuition, fees and expenses

Student Accounting Department
1015 Floyd Avenue
Box 843036
Richmond, Virginia 23284-3036
Phone: (804) 828-2228
Email: stuacctg@vcu.edu
accounting.vcu.edu (<http://accounting.vcu.edu/>)

Danielle L. Mitchell
Director

The Student Accounting Department is located at 1015 Floyd Avenue. The department is responsible for the assessment, billing and collection of tuition, housing and dining charges and other university fees. The department also processes scholarships from outside VCU, bills third parties for student charges and issues refunds to eligible students.

For more information regarding policies and procedures, refer to the Student Accounting website (<http://accounting.vcu.edu/>).

Fees and expenses

Students must pay all applicable tuition, fees, room and meal plans when due, as described in this section. Students are notified at their official VCU email address when their bills are available on the billing and payment site. No paper bills are sent to enrolled students. Tuition and fees for preregistered students, along with charges for housing and dining plans where applicable, are due by the official start of each semester. After the registration period all other students are sent a notification at their official VCU email address when their electronic bill has been issued and should pay by the payment due date indicated on the electronic invoice. Students who fail to pay these charges on time may be assessed a registration/transcript hold and/or a late payment fee. The university reserves the right to revise or alter all tuition and fees, regulations pertaining to student fees, and fee collection procedures at any time. In addition to expenses billed by the university, students should make allowances for books, clothing, supplies, travel and other out-of-pocket costs when figuring their total yearly expenses at the university.

Student financial responsibility

Students who enroll are responsible for:

- Full payment of tuition and fees generated from their registration
- Full payment of all charges for housing and dining services and other applicable miscellaneous charges
- Keeping a current mailing address on file with Enrollment Services (Refunds and tax forms are not issued to students with inactive mailing addresses.)
- Establishing an official VCU email address and reading their email on a regular basis, since email will be used to notify students when their invoices are available in the payment and billing site

Note: Paper bills are not sent to enrolled students. Failure to acknowledge and review the electronic invoice does not relieve responsibility for timely payments. Other important notifications are also sent to the official VCU email address.

Tuition and fees

Tuition and fees are categorized and described on the Student Accounting website at accounting.vcu.edu/tuition (<http://www.accounting.vcu.edu/tuition/>). The university reserves the right to revise or alter all fees, regulations pertaining to student fees, and fee collection procedures at any time.

Outstanding charges

A student who fails to remit payments when due may be assessed a late payment fee and is denied registration for future classes until he or she has paid all amounts owed to the university. Students with balances owed the university are not issued degrees, or official transcripts, until all charges are paid in full.

Student accounts with balances owed the university are referred to the collection unit. Pursuant to Section 2.2-4805 et. seq., of the Code of Virginia, and in accordance with rules and regulations promulgated by the state comptroller and attorney general of the commonwealth of Virginia, VCU will charge interest, costs and fees on all accounts past due. An additional fee of 25 percent of the outstanding balance will be assessed immediately upon referral to the VCU Collection Unit.

Students are reminded that they are ultimately responsible for any unpaid balance on their account as a result of the Office of Financial Aid or their sponsor canceling or reducing the award. The student remains financially

responsible for the charges deferred on the basis of any financial aid if later the student is determined ineligible. Students are also responsible for ensuring that all necessary actions have been taken to receive their financial aid awards. Also see the federal financial aid refund policy.

Any communication disputing an amount owed, including an instrument tendered as full satisfaction of a debt, must be submitted to the Director of Student Accounting, Student Accounting Department, Box 843036, Richmond, VA 23284.

VCU participates in the Virginia Set-off Debt Collection Act of 1981. Under the provisions of this act, a Virginia individual income tax refund is subject to the university's claim for unpaid balances of tuition and fees.

Dishonored payment items

A charge of \$50 will be levied for all dishonored payment items. Returned payment items include returned checks and dishonored credit or debit card payments. A student who pays a past-due balance with a dishonored payment item may be subject to having his or her current and/or future registration cancelled.

Tuition determination and student classification

Tuition is determined by the number of credit hours a student is taking, the student's residency/domiciliary classification, course of study and classification level. For in-state tuition benefits, the student must comply with the Code of Virginia (<https://law.lis.virginia.gov/vacode/title23.1/chapter5/>) regulations relative to in-state tuition and reduced rate tuition eligibility.

All applicants to VCU who wish to be considered for in-state tuition rates as Virginia residents must submit the application for Virginia in-state tuition rates, which is part of the application for undergraduate admission. The residency determination of the applicant is conveyed at the time of admission.

New and continuing students initially classified as non-Virginians for tuition purposes may request a review of the initial residency/domiciliary determination by completing an application for change of domicile available from the Office of Records and Registration (online). The student must present clear and convincing evidence that they are not residing in the state primarily to attend school. The application deadline is 30 days prior to the start of the semester, and it is the responsibility of the student to establish or to file an appeal to change their residency classification prior to the start of classes for the semester under consideration. In accordance with the Code of Virginia, applications received after the start of the semester must be considered for the next semester. Submit completed applications with documentation to the university domicile appeals coordinator. Processing may require four to six weeks; therefore, it is strongly recommended that applications be submitted earlier than the stated deadline.

The university's service to students is limited to assuring that they understand the procedures for appealing and that they have access to information about the relevant sections of the Code of Virginia. VCU provides information about the steps of the process and access to the applicable sections of the statute and the associated guidelines. The university also provides qualified staff to review the appeals and make decisions based on the information students provide. The office cannot provide advice to students as to how to present their case for review; staff members cannot become the student's advocate since their office must make the decision.

Students approved for a change to in-state status for tuition purposes are notified by mail with copies of their approval letters sent to the Office of Financial Aid and the Student Accounting Department. Students denied this status are also notified by mail. The denial letter informs the student of procedures for appeal of this decision, to include filing an appeal with the University Residency Appeals Committee. Students who submit fraudulent applications, falsify documentation or conceal information will be subject to reclassification, payment of all nonresident fees owed and university discipline.

Please note that a student with in-state status for tuition purposes who exceeds 125 percent of the credit hours needed to complete his program will be assessed a tuition surcharge.

Tuition and fees charges

Students accepted into an undergraduate degree program who accept the offer of admission must pay a nonrefundable tuition deposit (amount of deposit may vary according to program). This deposit is credited toward the tuition charge for the first semester. If the student accepts the offer, pays the fee, then decides not to enroll for the intended semester, the deposit is forfeited.

Undergraduate students registered for 12 or more credits are considered full time. Students registered for fewer than 15 credit hours are charged a per-credit-hour tuition rate. Tuition for additional credits is assessed at a reduced per-credit-hour-rate for the additional credits (15 and more). Credits one to 15 are assessed at the full, per-credit-hour rate. Mandatory fees are charged at a per-credit-hour rate and capped at 12 credit hours. Undergraduate students registered for fewer than 12 credits are considered part-time. Part-time students are charged a per-credit-hour rate based on their classification and program.

Intersession and J-term courses are billed on the spring semester invoice, but are computed separately from the spring semester charges. The cost of an intersession course is the standard per-credit-hour tuition with no fees based on the student's classification and program.

Nondegree-seeking students who hold bachelor's degrees are classified as DHG (degree-holder graduate) if they enroll in one or more graduate courses. DHG students registered for fewer than nine credit hours are charged a graduate per-credit-hour rate. If they enroll in nine or more credits, they are charged at the full-time graduate rate. Nondegree-seeking students who hold undergraduate degrees are classified as DHU (degree-holder undergraduate) if they enroll in all undergraduate courses. DHU students registered for fewer than 15 credit hours are charged tuition at a per-credit-hour rate. If registered for 15 or more credit hours, tuition for the additional credits (15 and more) will be assessed at a reduced per-credit-hour rate.

Courses offered through the Office of Continuing and Professional Education are assessed tuition and fee charges in addition to the standard tuition and fee rates.

If students make changes to their course enrollment by the end of the add/drop week, their classification and charges change in accordance with these guidelines.

University fee

This fee is used by the university to support student facilities, campus development, intercollegiate athletics and other programs. Full-time students pay a flat-rate university fee each semester. Part-time students pay this fee on a per-credit basis.

Student activity fee

This fee supports educational, social, cultural and other student activities for undergraduate, graduate and professional students. These activities include the Student Government Association, sports clubs, student organizations and publications. Full-time Monroe Park Campus students pay a flat rate and part-time students pay a per-credit-hour rate; MCV Campus students pay a flat rate based on part-time or full-time enrollment.

Student health fee

All full-time students on both campuses must pay the student health fee. Part-time students may participate in the University Student Health Services on an elective basis by paying the student health fee. USHS offers unlimited office visits for acute and chronic ailments, after-hours phone advice for an urgent medical problem and most laboratory tests associated with acute illnesses ordered by the USHS staff, among other services. The fee does not cover accidental injury, emergency room visits or hospitalization. More specific information as to what is covered and not covered by the fee is available on the USHS website (<http://www.students.vcu.edu/health/services/>).

Technology fee

The technology fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. The fee is used to fund improved access and assistance with information technology.

Library fee

The library fee is charged to all undergraduate, graduate and professional students in all programs. Full-time students pay a flat rate; part-time students pay a per-credit-hour rate. Fee revenues are used to sustain library spaces, services, personnel and operations that advance student success across both campuses and online.

Capital outlay fee

The capital outlay fee is charged to all full-time and part-time non-Virginia resident, on-campus students. Full-time students pay a flat rate. Part-time students pay a per-credit-hour rate. The fee is mandated by the General Assembly with revenues used to reimburse the state for debt service costs attributable to nonresident students related to financing of buildings and equipment.

Campus Learning Center learning support fee

The CLC learning support fee is charged to all freshmen, sophomores and juniors. The fee supports tutors, supplemental instruction leaders and writing consultants for undergraduates.

Off-campus fees

The university fee, the student activity fee and the student health fee are not charged to students taking off-campus classes.

Program fees

Undergraduate students are assessed an additional program fee based on their school/college and their program of study. The fee is assessed at a per-credit-hour rate for part-time students and at a flat rate for full-time students. For specific information about the fees, refer to the Student Accounting Department (<https://accounting.vcu.edu/>) website.

Housing and dining fees

Housing fees

A nonrefundable prepayment fee of \$250 is required for new students at the time the housing/dorm application is submitted and is credited toward the student's first-semester housing costs. New and continuing students should refer to cancellation deadlines established by VCU Residential Life and Housing if they wish to be released from their contractual obligations. After these dates, cancellations are not permitted and students will be held to the terms and conditions of their housing contracts. Students are advised to carefully read the terms and conditions of their housing contracts prior to signing.

Half the yearly housing cost is charged to the student's account each semester and is paid the same time that tuition and other fees are due. Additionally, students will be held responsible for the cost of any damages to their room, its furnishings and its common living area during their residency.

Housing contracts extend through the nine-month academic year or for a 12-month period, depending upon the type of residence hall assignment. Students are not released from their housing contract between semesters. Questions regarding housing contracts should be directed to VCU Residential Life and Housing via email at vcuhousing@vcu.edu or by calling (804) 828-7666.

Dining fees

Dining plans are available to enrolled students who are in good financial standing with the university. All undergraduate students residing in university housing, other than VCU apartment residents, are required to purchase one of the essential dining plans through VCUDine. If a dining plan is not selected, students will be assigned and billed for the 200 Swipe Plan + 300 Dining Dollars.

Dining plans are charged to the student's account each semester and are paid the same time that tuition and other fees are due. Plans added later in the semester are subsequently billed with payment due by the due date indicated on the ebill. Changes and cancellations to dining plans will be accepted up to 4 p.m. on Friday, the second week of classes.

VCU dining plans consist of Swipes and Dining Dollars. Swipes provide a specific number of meals to be used at any time during the semester at the all-you-care-to-eat dining halls or any VCUDine retail location participating in the VCUDine meal exchange program. More than one VCU dining plan may be purchased per semester; however, dining plan swipes and Dining Dollars do not carry over and are forfeited at the end of each semester.

For a complete list of dining plans, locations and hours, see the VCUDine (<http://www.bsv.vcu.edu/dining/>) website.

Dining Dollars

Dining Dollars is a rechargeable declining-balance account on a student's dining plan that allows them to make tax-free food purchases at any VCU dining center or VCU retail location. The tax advantage of Dining Dollars provides an 11.3 percent savings on each VCUDine purchase. Additional Dining Dollars may be added following the purchase of a dining plan at any time during the semester. Additions may be made in increments of \$25 (i.e., \$25, \$50, \$75). Dining Dollars can be purchased by credit/debit card online on the VCUDine (<http://www.bsv.vcu.edu/dining/>) website.

Dining online enrollment and payment

Online enrollment for a VCUDine plan is available on the VCUDine (<http://www.bsv.vcu.edu/dining/>) website. Students will be billed through the Student Accounting Department and payment may be made online through VCU eServices (<http://www.eservices.vcu.edu/>).

Dining plan changes or cancellations must be made by contacting VCUDine at (804) 828-1148 or online through the VCUDine (<http://www.bsv.vcu.edu/dining/>) website. The last day to make changes or cancellations to a plan is the Friday of the second full week of classes.

Please address all dining service concerns and questions to VCUDine, 1111 W. Broad St., Suite A, Room 131, Box 980247, Richmond, VA 23298-0247; call (804) 828-1148; email dining@vcu.edu; or visit the VCUDine (<http://www.bsv.vcu.edu/dining/>) website.

Installment payment plan

The installment payment plan assists students in meeting the cost of their higher education by offering a convenient payment option. The university-administered IPP is offered only during the fall and spring semesters. The plan distributes the cost of tuition, fees, housing and dining charges for a semester into four equal installments.

All students attending the university with current charges of \$100 or more are eligible to participate. All prior semester balances must be paid in full to be eligible.

Students who receive financial aid are also eligible for participation in the IPP. These students may deduct their financial aid (including third party-sponsored scholarships and 529 accounts) to determine the net total due. These payments are not considered installment payments. If it is \$100 or more, the remaining amount may be paid in installments.

In some cases, a student may receive a financial aid refund, and then subsequent charges for the semester are added to the student's account. If the student has received a refund, he or she is ineligible to participate in the IPP unless the refund has been repaid to the university in full. The student must then pay the initial payment and follow the instructions to enroll in the IPP.

There is a \$25 nonrefundable application fee payable with the first installment of each semester. The IPP option must be selected each fall and spring semester regardless of whether the student participated during a previous semester. Interest is not assessed on the outstanding balance. Information about how to participate in the IPP and the online enrollment process is available on the Student Accounting website (<https://accounting.vcu.edu/plan/>).

University refund policy

The official university tuition and fees refund policy is applicable only for the fall and spring semesters (excluding short/nonstandard courses) and is outlined in the table below. Refunds are calculated on a course-by-course, per-credit-hour basis, disregarding the full-time cap amounts. Students who are enrolled full time and withdraw from courses may not receive a refund.

Definition of drop vs. withdraw

Drop – Charges are removed to indicate that the student never attended the class. The student is not eligible to receive financial aid, and any financial aid already credited to the student's account based on the

original course registration will be removed from the student's account and may create a balance due to the university.

Withdraw – Results in the academic grade of W. Charges are assessed and adjusted according to the University Refund Policy. Students who have been given a medical withdrawal are assessed and adjusted no differently than other withdrawals. Students may owe a balance to the university.

Fall and spring semesters – standard classes only

The official university tuition and fees refund policy is applicable only for the fall and spring semesters. This table pertains to both complete withdrawals and reduced course loads for standard classes (excluding short/nonstandard courses). The policy is based on the weeks of the semester and not necessarily the class meeting days (if the semester begins on a Thursday, the first week of classes is from Thursday through the following Wednesday).

Refunds (reduction of charges) are calculated on a course-by-course, per credit hour basis, disregarding the full-time cap amounts for block students and discounted tuition for non-block students. Charges are recalculated based on the number of credit hours in which the student remains enrolled in addition to the nonrefundable percentage portion of credit hours for the withdrawn course(s). Students who are enrolled and withdraw from courses may not receive a reduction in charges.

Withdrawal/drop period	Student refund	Retained by university
Drop prior to the first day of classes	100% tuition and fees	0%
Drop/withdraw first week of class	100% tuition and fees	0%
Withdraw second week of class	80% tuition and university fee	20% tuition and university fee; 100% of all other fees
Withdraw third week of class	60% tuition and university fee	40% tuition and university fee; 100% of all other fees
Withdraw fourth week of class	40% tuition and university fee	60% tuition and university fee; 100% of all other fees
Withdraw after fourth week of class	0%	100% all fees

Fall and spring semesters – short and nonstandard classes

This table pertains to both complete withdrawals and reduced course loads for classes classified as nonstandard or short by the Office of Records and Registration. A full refund for a nonstandard or short course's tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. (This deadline also is applicable if the class does not meet on two consecutive days.) No refund of tuition and fees is given for withdrawals from short and nonstandard courses.

Withdrawal/drop period	Student refund	Retained by university
Drop prior to the first day of classes	100% tuition and fees	0%
Drop/no later than the day following the first day of class	100% tuition and fees	0%
Withdraw	0%	100% tuition and all fees

Summer semester – all courses

This table pertains to both complete withdrawals and reduced course loads for the summer semester. A full refund for summer tuition and applicable fees will be granted if the course is dropped no later than the day following the first day of a given class. (This deadline also is applicable if the class does not meet on two consecutive days.) No refund of tuition and fees is given for withdrawals during the summer semester.

Withdrawal/drop period	Student refund	Retained by university
Drop prior to the first day of classes	100% tuition and fees	0%
Drop/no later than the day following the first day of class	100% tuition and fees	0%
Withdraw	0%	100% tuition and all fees

Intersession and J-term – all courses

This table pertains to holiday intersession courses. A full refund for holiday intersession will be granted if the course is dropped on the day of the first class meeting. No refunds are given for withdrawals of holiday intersession courses.

Withdrawal/drop period	Student refund	Retained by university
Drop prior to the first day of classes	100% tuition	0%
Drop/no later than the day following the first day of class	100% tuition	0%
Withdraw	0%	100% tuition

The refund policy and deadlines of the English Language Program are different from the university's refund policy for academic classes. Details of the policy may be obtained from the English Language Program in the Global Education Office.

Students who are financial aid recipients and withdraw from all courses prior to completing 60 percent of the semester are subject to the Federal Return of Title IV Funds Policy. For more details see the financial aid section of this bulletin.

Refunds will be computed based on the actual withdrawal date certified by the Office of Records and Registration. Refunds will not be made to students who do not attend classes and have not completed the required withdrawal procedure. Refund processing may take approximately two weeks. Exceptions to this refund policy are made only in rare instances. Written application for an exception must be filed in the Student Accounting Department to the university's Refund Waiver Appeals Committee. Appeals must be submitted within three years from the semester in which the student is appealing.

For information regarding cancellations and adjustments to dining and housing charges, refer to the room and dining contract terms and conditions or the Housing (<http://www.housing.vcu.edu/>) and VCU Dine (<http://www.campusdish.com/en-US/CSMA/VirginiaCommonwealth/DiningPlans/>) websites.

Refunds for overpayments

An overpayment from financial aid and scholarships will be refunded automatically through the financial aid refund process, if the overpayment occurs while the student is currently enrolled. During the fall

and spring semesters refunds will begin to be available starting on the first day of classes.

Requests for refunds that are not generated from the overpayment of financial aid should be made in writing to VCU Student Accounting Department, Box 843036, Richmond, VA 23284-3036. Refund request forms are available at the Student Financial Management Center and on the Student Accounting website (<http://www.accounting.vcu.edu/>).

In accordance with credit card regulations, the university will refund the credit card account with any credit balance that may result on a student's account as the outcome of a credit card payment. The remaining credit balance, if any, will be refunded to the student.

Students are responsible for paying any increase in charges that may occur after the generation of any refund. Students are also responsible for paying an outstanding balance as a result of cancelled or reduced financial aid.

Military services tuition relief, refund and reinstatement guidelines

These guidelines apply to students whose service in the uniformed services (military) has necessitated their sudden withdrawal or prolonged absence from their enrollment at Virginia Commonwealth University and provides for the required re-enrollment of such students. Students are offered the following enrollment secession options:

1. Drop all courses before the end of the add/drop period and receive a full reduction of tuition and fee charges. Students residing in university housing and participating in a dining plan will be released from their housing and dining service contracts and will receive a prorated refund of these charges. Students will be asked to sign the drop request form with the director of military student services indicating that they are not receiving a financial aid refund. If the reduction of charges results in an overpayment on the account after any financial aid or third party awards have been reduced, the student will be issued a refund.

This option might best meet the needs of students who are called to active duty service during the first week of school and did not receive a financial aid refund check or direct deposit.

2. Receive a grade of Incomplete (IM – incomplete military) in one or all courses. Students residing in university housing will be released from their housing and dining service contracts and will receive a prorated refund of these charges. Students who chose to take a grade of IM will not have tuition and fees reduced for these courses because, upon receipt of an approved change of grade, credits will still be earned for the semester. Students will have 12 months from the date that they return from active service to complete the course work and earn a course grade. If a student received financial aid, the amount recovered to the financial aid accounts will follow the Federal Financial Aid Refund Policy.

This option might best meet the needs of students who have essentially completed all course work in a class for the semester, but have yet to turn in a final project, an exam or other materials. It should be agreed upon between the instructor and the student that the remaining course work can reasonably be completed during the 12-month period.

3. Accept administrative withdrawal (WM – withdrawn military) from all courses as of the effective date of the orders to active duty. If this option is elected, a full refund of all tuition, fees and prorated

room and dining charges will be made. If a student received financial aid, the amount recovered to the financial aid accounts will follow the Federal Financial Aid Refund Policy. If the reductions of charges results in an overpayment on the account after any financial aid or third party awards have been reduced, the student will be issued a refund.

This option might best meet the needs of students who are called to national service in the middle of a semester and have not completed 75 percent of their class requirements. This option also might best meet the needs of students who are leaving the university during the first week of class and received a financial aid refund check or direct deposit as a result of their financial aid.

4. Students who have completed 75 percent of the course requirements at the time of military activation and, notwithstanding certain exceptions noted below, who meet requirements as determined and agreed upon by the faculty instructor and the student may receive full course credit.

Students may receive full course credit if 75 percent of course requirements have been completed, under certain circumstances. The instructor is responsible for determining what percentage of course requirements have been completed based on factors to include but not limited to contact time, examinations, projects, work experience and clinical experience. The awarding of full credit cannot be made where the incomplete requirements are essential components of the course or program required by law or regulatory bodies, required for competency in the work place, or required to complete licensure examinations.

Leaving the university

To initiate this process, the student must provide the Office of Military Student Services with a copy of his or her active duty orders in addition to a printed copy of his or her course registration for that semester and indicate Option 1, 2, 3 or 4 for each course. If Option 4 is selected, the student must provide documentation from the instructor. The director of military student services will forward all documentation to the university registrar to take the appropriate enrollment action, post the appropriate grades and send a copy of the orders and a copy of the student course request statement to the director of financial aid and the director of student accounting.

Returning to the university

Students who withdrew from the university as a result of military deployment, mobilizations or duty changes are entitled to return without having to requalify for admission so long as the student (a) returns after a cumulative absence of no more than five years and (b) notifies the appropriate admissions office of the intent to return to the university not later than three years after the completion of military service obligation. The student may return to the university in the same program of study. With the consultation of an adviser, a comparable program of study may be chosen for discontinued programs.

VA benefit grievance procedure

The Virginia State Approving Agency, is the approving authority of education and training programs for Virginia. Their office investigates complaints of GI Bill beneficiaries. While most complaints should initially follow school grievance policy, if the situation cannot be resolved at the school, the beneficiary should contact the SAA (<https://www.dvs.virginia.gov/benefits/education/>).

Delayed payments for Chapter 31, 33 or Frye Scholarship students

Chapter 31, 33 or Frye recipients whose tuition and fees payments are delayed will not be denied access to classes, libraries or other institutional facilities or be required to borrow additional funds to cover tuition and fees if these are being covered by the Department of Veterans Affairs.

In the event that a Chapter 31, 33 or Frye recipient is assessed a late fee due to a delayed payment coming from the VA, VCU will waive the late fee if the student submitted the required benefit request forms to the Military Student Services Office in a timely manner; the student paid all noncovered charges by specified payment deadlines; and the delayed Post 9/11 or Frye payment covers the student's outstanding balance. The late fee will be waived once the Post 9/11 payment is received by VCU.

Veterans Access, Choice and Accountability Act of 2014

codified in 38USC3679(c)

The following individuals shall be charged a rate of tuition not to exceed the in-state rate for tuition and fees purposes:

- A veteran using educational assistance under either chapter 30 (Montgomery G.I. Bill – Active Duty Program) or chapter 33 (Post-9/11 G.I. Bill), of title 38, United States Code, who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence) and enrolls in the school within three years of discharge or release from a period of active duty service of 90 days or more
- Anyone using transferred Post-9/11 GI Bill benefits (38 U.S.C. § 3319) who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence) and enrolls in the school within three years of the transferor's discharge or release from a period of active duty service of 90 days or more
- Anyone described above while he or she remains continuously enrolled (other than during regularly scheduled breaks between courses, semesters or terms) at the same school. The person so described must have enrolled in the school prior to the expiration of the three year period following discharge or release as described above and must be using educational benefits under either chapter 30 or chapter 33, of title 38, United States Code
- Anyone using benefits under the Marine Gunnery Sergeant John David Fry Scholarship (38 U.S.C. § 3311(b)(9)) who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence)
- Anyone using transferred Post-9/11 G.I. Bill benefits (38 U.S.C. § 3319) who lives in Virginia while attending a school located in Virginia (regardless of his/her formal state of residence) and the transferor is a member of the uniformed service who is serving on active duty

The policy shall be read to be amended as necessary to be compliant with the requirements of 38 U.S.C. 3679 as amended.

Accident insurance

VCU is not responsible for accidents occurring to students in connection with class, laboratory, shop, fieldwork, athletics, student activities,

travel or other activities. However, the university offers its students an approved insurance plan, providing substantial benefits at group rates. The insurance extends for a 12-month period beginning Aug. 18, or from the beginning of the second semester to the next Aug. 18, and includes coverage for accidents, hospitalization, medical, surgical and other benefits for illnesses. Married students may enroll spouses and children. The university strongly recommends, but does not require, that all students enroll in student group health insurance. For further information, contact University Student Health Services or visit the USHS website (<http://www.students.vcu.edu/health/health-insurance/>).

Financial aid

Student Financial Management Center
Harris Hall
1015 Floyd Ave.
Box 843026
Richmond, Virginia 23284-3026
Phone: (804) 828-6669
Fax: (804) 827-0060
finaid.vcu.edu (<http://finaid.vcu.edu/>)

The Student Financial Management Center provides a variety of services to help students afford higher education via grants, scholarships, work-study employment and loans. Financial counselors provide one-on-one consultations to students, their parents, faculty and staff about accounts, educational expenses and financial management.

VCU Financial Aid administers and distributes funds from federal, state, institutional and private fund sources. Financial Aid uses all available funds to help students gain access to a college education. Aid funds are applied first to the student's university bill; refunds are generated when financial aid exceeds university charges. Eligibility for financial aid varies depending on a student's academic and financial circumstances. In most cases, each student will qualify for some form of financial assistance.

Current and detailed information on financial aid programs, financing college and planning for the future, along with links to free scholarship search services and to schedule one-on-one appointments are available on the SFMC website (<https://sfmc.vcu.edu/>).

Counseling center locations

Four financial counseling and information centers are available to prospective and enrolled students. You may visit the offices in person or submit a written request to receive printed information.

General information

Many students at the university receive financial aid. Below are some recommendations and requirements of VCU Financial Aid.

eServices – online records access

Students are encouraged to use eServices, a password-protected service for viewing VCU student records online, to check the status of their financial aid application and award package. Students also may register for classes, print bills and more. The eServices website is accessed through myVCU portal on the VCU homepage (<http://www.vcu.edu>).

Email – official method of communication

Students are required to obtain an official VCU student email account within one week of the beginning of their first semester of enrollment. Students are responsible for reading university-related communications sent to their official VCU student email account in a timely fashion. VCU Financial Aid uses email to provide financial aid information, to request documentation to support financial aid application data and to provide financial aid application status and award information. Information on how to set up an account is available online (<https://www.vcu.edu/email/>).

Identification requirements

Students must provide picture identification, preferably a VCUCard, for in-person access to financial aid records. For the student's protection, information provided over the telephone and email may be limited if the financial aid staff member is not confident of the student's identity.

University bill

The Student Accounting Department issues online bills for tuition, fees and other university charges. When financial aid awards (grants, scholarships and loans) are not enough to pay university charges, the remaining balance must be paid from personal funds, credit card or the VCU Installment Payment Plan. Federal work-study awards will not be deducted from university charges because those funds are paid directly to the student, based on hours worked. Any outstanding balance owed will prevent a student from registering for courses and receiving official transcripts. Students who fail to pay their balance on time may be assessed a late payment fee and have a financial hold placed on their account. If the balance remains outstanding after the semester ends, their account may be referred to the VCU Collection Unit at which time collection costs will be assessed.

Types of financial aid

There are three basic types of financial aid: loans, grants and work-study. Each type has different features and advantages.

Loans

In terms of total dollars available, long-term loan programs provide the most dollars. A loan is money borrowed and must be repaid at a later time. In most cases, the student is the borrower and repays the loan once he or she is no longer pursuing a degree or certification at least at the half-time enrollment level. There also is a loan program where the parent is the borrower and begins repaying the loan while the student is still enrolled. All educational loans carry competitive interest rates and terms. Some include interest benefits, meaning the federal government pays the interest on the loan while the student is enrolled. Student loan repayment generally begins after the student is no longer enrolled half time. Multiple repayment plans provide the borrower with flexible repayment options. Selected loan programs include:

- Federal Direct Loan (subsidized and unsubsidized)
- Health Professions Student Loan
- Loan for Disadvantaged Students
- Nursing Student Loan
- Primary Care Loan
- Federal Direct PLUS Loan

First-time borrowers in the Federal Direct Loan program must complete entrance counseling prior to the first loan disbursement. A link to directions for completion of this requirement (<https://finaid.vcu.edu/types/loans/>) can be found on the Financial Aid website.

Grants and scholarships

Grants and scholarships are awarded without any expectation of repayment. Most grants are reserved for students with the greatest financial need. Most scholarships are based on merit. Selected programs include:

Undergraduate programs

- Federal Pell Grant
- Commonwealth Award (state grant)
- Virginia Guaranteed Assistance Program (state grant)
- Federal Supplemental Educational Opportunity Grant
- VCU Scholarships
- Honors Scholarships
- Departmental Scholarships

Health profession programs

- Scholarships for Disadvantaged Students
- State Dental Practice Scholarships
- General Assembly Nursing Scholarships
- Departmental Scholarships

Work-study

Work-study is a form of financial aid that pays wages for work performed through employment. Work-study positions are located on campus and in approved locations off campus. Please visit the financial aid website for additional information (<https://finaid.vcu.edu/types/workstudy/>).

Eligibility, availability and special circumstances

Eligibility for financial aid

Most students are eligible for some type of financial aid regardless of family financial circumstances. Basically, to receive aid from any of the federal or state student aid programs, students must:

- Submit a Free Application for Federal Student Aid or Renewal FAFSA designating VCU (school code 003735) to receive FAFSA results.
- Demonstrate financial need, except for some loan programs
- Have a high school diploma or a General Education Development certificate
- Be enrolled or accepted for enrollment to an eligible degree or certificate program
- Be enrolled at least half time, six or more undergraduate credit hours (exceptions possible for Pell Grants) or five or more graduate credit hours
- Be a U.S. citizen or eligible noncitizen
- Have a valid Social Security number (unless from the Republic of the Marshall Islands, the Federated States of Micronesia or the Republic of Palau)
- Meet Satisfactory Academic Progress standards as defined by VCU Financial Aid (The full VCU SAP policy (<https://finaid.vcu.edu/manage/sap/>) is available on the Financial Aid website.)
- Certify that federal and state financial aid will be used for educational purposes only
- Not be in default on a federal student loan and not owe money on a federal student grant
- Comply with Selective Service registration, if required
- Not be convicted under federal or state law of sale or possession of illegal drugs

Detailed information can be found in the federal Student Guide, available in print form from VCU Financial Aid or electronically on the Federal Student Aid website (<https://studentaid.ed.gov/sa/>).

Availability of financial aid for special programs

Summer studies

Limited financial aid may be available during the summer semester. Students interested in financial aid for the summer semester should view the VCU Schedule of Classes (<http://www.pubapps.vcu.edu/scheduleofclasses/>) (posted in March) for more details.

Students interested in financial aid for summer must have a FAFSA on file with VCU Financial Aid and review the summer financial aid policy statement, available on the financial aid website.

Study abroad

Financial assistance is available to eligible students enrolled in approved study-abroad programs. All study-abroad programs must be coordinated through the Global Education Office at (804) 828-8471. Students should work with a financial aid counselor to coordinate aid for their study-abroad program. Information about financial aid and study abroad (<https://global.vcu.edu/abroad/>) is available on the Global Education Office website.

Special circumstances

Financial aid eligibility decisions are made using federal, state and institutional regulations and policies. Students may appeal their award

offers if special circumstances warrant a review. Reasons for an appeal might include one of the following documented circumstances:

- Loss or reduction of employment earnings
- Disability or death of parent or spouse
- Separation or divorce
- Loss or reduction of untaxed income
- Unusual medical expenses
- Dependent and child-care expenses

Any financial aid staff member can advise a student about the procedures on how to file an appeal.

Applying for financial aid

Application process

The financial aid application process for the academic year begins Oct. 1. All students are encouraged to complete and submit the Free Application for Federal Student Aid as soon as possible after Oct. 1, designating VCU (school code 003735) to receive the results. In order to reduce problems, errors and omissions on the FAFSA, students are encouraged to apply electronically using FAFSA online (<https://fafsa.ed.gov/>). Once the FAFSA is filed, the federal processor will send the student a Student Aid Report or electronic SAR acknowledgment, and also will electronically send the information to VCU Financial Aid if VCU was listed as a school to receive the data. If additional information is needed to complete processing of the application, VCU Financial Aid will send the student a request for that information. Responding promptly to such requests will ensure timely processing of the application. Once the review of FAFSA data has been completed, Financial Aid will send the student a financial aid notification.

Priority filing dates

Certain financial aid programs, like federal grants, federal work-study and state grants, have limited funding — this means that there are more students eligible for the programs than there are funds available to award to them. Therefore, students should file the FAFSA as early as possible and reply to requests for additional information promptly to ensure consideration for this type of funding. VCU Financial Aid recommends electronically filing the FAFSA by Feb. 1.

Students who do not have access to the Web may apply using the paper FAFSA, available through VCU, high schools, colleges and most public libraries. Those students completing a paper application should mail it to the federal processor by Feb. 1.

Students should complete the FAFSA early so that it can be processed by the priority filing date of Feb. 1 and may use actual income and tax data in order to meet that deadline. Applicants may be able to use the IRS data retrieval tool to transfer federal tax return information into the FAFSA. Students will receive their actual award letter after their FAFSA application data has been verified.

Applying after the priority filing date

Students can and should apply for financial aid even if they missed the priority filing date because they may still qualify for the Federal Pell Grant and Federal Direct Loans; their parents may qualify for Federal Direct PLUS Loans. If students have not applied for financial aid in a timely manner, they may want to participate in the VCU Installment Payment Plan, which budgets each semester's bill over four payments. Information

about this plan (<https://accounting.vcu.edu/plan/>) can be found on the Student Accounting Department's website.

Verification

To ensure that information provided on the FAFSA is accurate, a student's application may be selected for review at any time during an enrollment period, and the student will be requested to provide documentation that supports the information. By signing the FAFSA, a student (and the student's parent or spouse, if applicable) agrees to furnish such documentation. If the documentation is not provided when requested, financial aid awards will be canceled and any funds already disbursed may need to be repaid.

Satisfactory academic progress

VCU Financial Aid will review all students who have applied for financial aid to be sure that they are making progress toward completion of their degree/certificate. The satisfactory academic progress review will be conducted at least once annually (typically at the end of the spring semester, or whenever the student submits a completed FAFSA). SAP is a combination of qualitative and quantitative components and is measured by:

1. **Grade point average.** Undergraduate students must maintain a 2.0 cumulative GPA. Graduate students must maintain a 3.0 cumulative GPA.
2. **Completion rate.** The completion rate is measured by the number of credit hours earned divided by the number of credit hours attempted. All students who need financial aid funding must successfully complete at least 67 percent of all credit hours attempted (transfer credit hours are included).
3. **Overall progress toward degree/certificate.** Overall progress is measured by the number of credit hours attempted divided by the number of credit hours necessary to complete the degree or certificate program. Students who need financial aid funding may attempt no more than 150 percent of the hours required to complete their degree or certificate program.

When students fail to meet SAP requirements they will receive suspension notices indicating that they are ineligible to receive further financial aid. Students whose eligibility for financial aid has been suspended may submit an appeal if mitigating circumstances prevented the student from maintaining SAP. However, there is no guarantee that the appeal will be approved. Please refer to the Financial Aid website for more details on SAP requirements and the SAP appeal process (<https://finaid.vcu.edu/manage/sap/>).

Federal and state financial aid refund policy

Students who receive federal Title IV or state grant or loan assistance and withdraw from VCU before completing 60 percent of the semester (as measured in calendar days) must have their eligibility recalculated based on the federal return of Title IV funds formula. This federal formula specifies that a student's financial aid eligibility must be recalculated based on the aid the student has earned (based on the number of days that the student was enrolled or attending VCU prior to withdrawal). Any unearned aid (for the period of enrollment that the student did not complete from the date of withdrawal to the end of the semester) must be returned to the appropriate Title IV or state programs from which the student was awarded.

For VCU students who withdraw prior to completing 60 percent of the semester, they will have to return or repay all or a portion of the aid funds

that had been disbursed to their VCU account. As a result, students who withdraw prior to completing 60 percent of the semester may be responsible for all or a portion of their university bill that was previously paid by financial aid sources.

If a student does not officially withdraw from all classes but fails to earn a passing grade in at least one course, federal aid regulations require that the student be considered "unofficially withdrawn," unless it can be documented that the student completed the enrollment period. Unofficial withdrawals require a Title IV refund calculation at the midpoint of the enrollment period. The reduction of federal and state aid will create a balance due to the university that must be repaid.

Military educational benefits and programs

Veteran's certification for VCU is completed within the Military Student Services office located in Grace E. Harris Hall on the Monroe Park Campus. Detailed information about eligibility for Veterans Affairs programs is available on the Military Student Services website (<https://militaryservices.vcu.edu/benefits/>).

Military Student Services
Grace E. Harris Hall, Room 3122
1015 Floyd Avenue
Box 842536
Richmond, Virginia 23284-2536
Phone: (804) 828-6563
Fax: (804) 828-8212
Email: militaryserv@vcu.edu
militaryservices.vcu.edu (<https://militaryservices.vcu.edu/>)

Available programs

For details on any of these programs, please visit the Military Benefits (<https://militaryservices.vcu.edu/benefits/>) and Scholarships and Aid (<https://militaryservices.vcu.edu/scholarships/>) pages on the Military Student Services website.

- Montgomery – GI Bill Active Duty (Chapter 30)
- Vocational Rehabilitation (Voc Rehab, Chapter 31)
- Veterans Education Assistance Program (VEAP, Chapter 32)
- Post 9-11 GI Bill (Chapter 33)
- Survivors' and Dependents Educational Assistance Program (DEA, Chapter 35)
- Montgomery – GI Bill Selected Reserves (Chapter 1606)
- Tutorial Assistance Program
- VA Work-Study Program
- Virginia Military Survivors and Dependents Education Program
- Post 9-11 – Active Duty (Chapter 33)/Yellow Ribbon Program
- Yellow Ribbon Program
- Transferability of Benefit

Eligibility requirements

Eligible veterans/spouses/dependents must comply with the following requirements to receive educational benefits as students:

1. The veteran/spouse/dependent must be accepted into a degree or certificate program or be matriculating as a nondegree-seeking student for only two semesters before having to declare a major.
2. The veteran/spouse/dependent must request certification by completing and submitting VCU's VA education assistance form after obtaining approval via signature of their academic adviser and

registering for courses each semester and each summer session from the Veterans Affairs Office.

3. The veteran/spouse/dependent is eligible to use benefits for only those courses taken toward a degree, certificate program or as prerequisite courses (only two semesters).
4. The veteran/spouse/dependent is not eligible to use benefits for courses taken on an audit basis or if eliminating a course previously taken and paid for by the VA to remove a punitive grade not counted in GPA calculations via VCU's historical repeat option. The repeated course(s) will be paid for by the VA but the student will incur a debt to the VA for the course(s) eliminated from the student's GPA. The VA does not pay for courses that earn no credit.
5. The veteran/spouse/dependent is responsible for ensuring that transcripts are evaluated for transfer credits to be accepted by VCU. Students must submit this information to the Veterans Affairs Office for transmittal to the Veteran's Administration Regional Office.
6. The Veterans Affairs Office must be notified by the student/veteran/spouse/dependent if they change, add, drop or withdraw from courses originally approved by the student/veteran/spouse/dependent's academic adviser and certified by VCU's Veterans Affairs coordinator/certifying official.

Academic advising

Academic advising helps VCU students achieve academic success, as well as develop and pursue educational, career and personal goals. Students may be assigned multiple academic advisers to support their studies depending on their declared major(s), minor(s), honors standing or pre-health interests. To ensure timely degree progression and successful career outcomes, all students are encouraged to visit with their academic adviser at least once a semester, every semester, until graduation.

To make an appointment with your academic adviser(s), log in to vcu.campus.eab.com (<http://vcu.campus.eab.com>) or call (804) 827-8648.

First-year students

University Academic Advising provides academic advising for all first-year students, regardless of their majors. All incoming students are assigned to a specific academic adviser who works closely with them throughout their first year. Advising occurs through many forms, which may include individualized or group advising, or through many first-year courses offered just to first-year students, such as UNIV 101 Introduction to the University. Students can expect their advisers to help them understand university procedures, interpret general education and major requirements, address academic difficulties, find support resources, and help discover and plan out individualized educational and career goals.

Academic advising is an ongoing process. Advisers want to have continuing relationships with their advisees. While first-year students are required to meet with their assigned advisers before registering for classes each semester, it is also important for students to meet with advisers throughout the first year. Students can make appointments (vcu.campus.eab.com (<http://vcu.campus.eab.com>)) or email their advisers to seek help. After students attain sophomore standing or are admitted into their programs of study, they will be transitioned to academic advisers within their majors and minors.

While students are ultimately responsible for understanding information about regulations, majors and courses as outlined in the Undergraduate

Bulletin, academic advisers can help students interpret information to ensure they make appropriate educational choices.

For more information on advising programs, visit the UAA website (<http://academicadvising.vcu.edu/>) or call (804) 827-8648.

Undeclared students

The University Academic Advising Discovery Program offers specialized advising for students who are still deciding about their programs of study, who are in transition between two majors or who have not yet declared a major. Discovery Program advisers help undeclared students consider educational options and make appropriate choices based on personal interests, skills and abilities, values, and professional goals.

Meta majors

Students enrolled in the undeclared major at VCU will select a "meta major" concentration until successful admission into a degree program. The meta major structure is designed to support students as they explore related major areas and provide a plan of study for the first academic year. The undeclared major is not a degree-granting program, so students cannot complete a degree in any of the "meta-major" concentrations. As students successfully complete courses and other admissions requirements, students and advisers will determine a time frame to apply for admission into a degree-granting program at VCU.

Undeclared – Arts

Students in the arts meta major are interested in pursuing a program offered through the VCU School of the Arts (<https://arts.vcu.edu/>). These programs include: art education, art history, cinema, communication arts, craft and material studies, dance and choreography, fashion design, fashion merchandising, graphic design, interior design, kinetic imaging, music, painting and printmaking, photography and film, sculpture and extended media, and theatre.

Students in the arts meta major complete recommended courses in the first two semesters required for the School of the Arts, alongside the VCU Core Curriculum and general education program. The recommended courses serve as a guide to students for the best path toward graduation, in as timely a fashion as possible. If a student is still undecided after their first year, they should work closely with their academic adviser to create a customized plan of study for the second year. Students might choose to take additional courses over the summer to catch up or get ahead if the courses they need are offered.

All arts meta major applicants to the VCU School of the Arts must submit a change of major application online. This online application asks for personal and contact information, current and preferred curriculum, a personal statement, extracurricular activities, one to three recommenders' emails and required supplemental materials (audition, essays, portfolio). Students can view the additional application requirements for their major of interest on the School of Arts (<https://arts.vcu.edu/>) website.

Undeclared – Humanities

Students in the humanities meta major are interested in pursuing a humanities-related program offered through VCU's College of Humanities and Sciences. These programs include: English, foreign language, gender, sexuality and women's studies, history, international studies, philosophy, and religious studies.

Students in the humanities meta major complete recommended courses in the first two semesters required for the VCU Core Curriculum alongside the general education program for the College of Humanities and Sciences. The recommended courses serve as a guide to students for the best path toward graduation, in as timely a fashion as possible. If a student is still undecided after their first year, they should work closely with their academic adviser to create a customized plan of study for the second year. Students might choose to take additional courses over the summer to catch up or get ahead if the courses they need are offered.

Undeclared – Social sciences

Students in the social sciences meta major are interested in pursuing a social science-related program offered at VCU. These programs include: African American studies, anthropology, criminal justice, economics*, education*, homeland security and emergency preparedness, mass communications*, political science, psychology, sociology, social work, and urban and regional studies.

Students in the social sciences meta major complete recommended courses in the first two semesters that include a foundation in social science as well as courses required for the VCU Core Curriculum and general education program. The recommended courses serve as a guide to students for the best path toward graduation, in as timely a fashion as possible. If a student is still undecided after their first year, they should work closely with their academic adviser to create a customized plan of study for the second year. Students might choose to take additional courses over the summer to catch up or get ahead if the courses they need are offered.

**Please consult with your adviser as these programs have unique requirements compared to others within the same meta major.*

Undeclared – STEM

Students in the STEM meta major are interested in pursuing a science-, technology-, engineering- or math-related program offered at VCU. These programs include: biology, bioinformatics, biomedical engineering*, chemical and life science engineering*, chemistry, computer engineering*, computer science*, electrical engineering*, environmental studies, forensic science, health, physical education and exercise science, mathematical sciences, mechanical engineering*, physics, interdisciplinary science, secondary education and teaching with a concentration in engineering, and statistics.

Students in the STEM meta major complete recommended courses in the first two semesters that include math and science foundations as well as courses required for the VCU Core Curriculum and general education program. The recommended courses serve as a guide to students for the best path toward graduation, in as timely a fashion as possible. If a student is still undecided after their first year, they should work closely with their academic adviser to create a customized plan of study for the second year. Students might choose to take additional courses over the summer to catch up or get ahead if the courses they need are offered.

**Please consult with your adviser as these programs have unique requirements compared to others within the same meta major.*

Undeclared – Discovery

Students in the discovery meta major are interested in a multitude of programs at VCU and should work closely with their academic adviser to decide on their path of study.

Students in the discovery meta major complete recommended courses in the first two semesters that include courses required for the VCU Core

Curriculum and general education program. The recommended courses serve as a guide to students for the best path toward graduation, in as timely a fashion as possible. If a student is still undecided after their first year, they should work closely with their academic adviser to create a customized plan of study for the second year. Students might choose to take additional courses over the summer to catch up or get ahead if the courses they need are offered.

Specialized programs

The programs below are highly specialized and include additional major and entrance requirements and thus are not included in the meta major options.

Pre-health majors

Pre-health major in clinical laboratory science
Pre-health major in dental hygiene
Pre-health major in nursing
Pre-health major in clinical radiation sciences

Business foundation (departments)

Accounting
Economics
Finance, Insurance and Real Estate (including financial technology program)
Information Systems
Management and Entrepreneurship
Marketing
Supply Chain Management

Academic advising

Discovery Program advisers offer a blend of individual and group counseling sessions and workshops to assist students who have not yet declared a major or who are being transitioned out of competitive standing programs. Advisers assist all undeclared students with monitoring their academic progress, course scheduling, interpreting university regulations and procedures and maximizing their academic success. In addition, each semester the Discovery Program offers UNIV 103, a class that concentrates on careers, educational opportunities and the development of student potential. Advisers also provide alternative advising options for students who do not qualify for, or are not admissible to, their preferred programs of study. By considering alternatives, students will uncover options that they can find personally, educationally and professionally fulfilling.

Students must declare majors within one of the university's schools or colleges no later than the semester in which they complete 60 credits.

Changing to undeclared from another major

Students planning to transition to an undeclared major should complete the online Change of Major Form (<https://docs.google.com/a/vcu.edu/forms/d/e/1FAIpQLScwHVA7WToKtPDdLwnlyODKpQuyO9gZo1gCg1MtVgMKi6ZcEQ/viewform/>).

For more information on advising programs, visit the UAA website (<http://academicadvising.vcu.edu>) or call (804) 827-8648.

Transfer students

Students who transfer to VCU come from a wide range of two- and four-year institutions. VCU recognizes that transfer students constitute a very diverse group with varying and unique needs. Transfer students are

served directly through the school or college according to their intended program of study. The Transfer Center helps transfer students work with Undergraduate Admissions and the undergraduate units to seek ways to continuously facilitate and enhance the transfer process to VCU. The center also assists the schools and colleges of VCU to develop relationships with Virginia community colleges. VCU's chief transfer officer develops and maintains articulation agreements with sister institutions, maintains the VCU Transfer Guide and serves as a point of contact for prospective and incoming transfer students.

For more information on advising programs, visit the Transfer Center website (<http://www.transfer.vcu.edu/>) or call (804) 827-1349.

Pre-health majors

University Academic Advising provides academic advising programs to assist students in pre-health majors in clinical laboratory sciences, clinical radiation sciences, dental hygiene and nursing.

Students pursuing admission into baccalaureate degree programs in clinical laboratory sciences, clinical radiation sciences, dental hygiene or nursing will have "pre-major" status until successful admission into the degree program. The pre-health majors are not degree-granting majors, so students cannot complete a degree in any of the pre-health majors. As students successfully complete science courses and other admissions requirements, students and advisers will determine a timeframe to apply for admission into a degree-granting program in a health care field. UAA provides academic advisers who are uniquely trained to work with pre-health majors, guiding students as they pursue the required course work and skill sets outlined for competitive candidacy in each of these pre-major programs. These advisers are also trained to guide students through parallel majors that will still support successful graduation and career outcomes.

Pre-health major in clinical radiation sciences

Students interested in the pre-health major in clinical radiation sciences must complete the one-year program requirements for application to the Bachelor of Science degree program in clinical radiation sciences offered by the VCU College of Health Professions. The pre-health major in clinical radiation sciences program requires specific prerequisite courses (outlined below). Once accepted, students will spend three years in the clinical radiation sciences degree program, which begins in the fall.

At the time of application, normally fall of the freshman year, the student will be able to indicate their choice of concentration: diagnostic medical sonography, nuclear medicine technology, radiography or radiation therapy. All concentrations require the same academic prerequisite courses listed below.

Completion of the pre-health major in clinical radiation sciences does not guarantee admission to the program for the B.S. in Clinical Radiation Sciences nor does it result in a college degree. Students must be admitted to and complete the baccalaureate program to earn a B.S. degree in clinical radiation sciences. Admission into the program is based on scholastic record, demonstrated aptitude and interest, and a personal interview conducted by the departmental admissions committee.

Students are strongly encouraged to consult with a UAA pre-health major academic adviser to learn about admission requirements that are specific to the program and to speak about alternate/parallel majors. For more information about the admission requirements for the B.S. in Clinical

Radiation Sciences, visit the department's website (https://chp.vcu.edu/programs/#degree_279278).

Requirements for the pre-health major in clinical radiation sciences

It is recommended that applicants select a challenging course load of science and math courses each semester to ensure adequate preparation for the academic rigor of the concentrations within the Bachelor of Science in Radiation Sciences.

Students interested in the pre-health major in clinical radiation sciences must complete biological concepts with laboratory, human anatomy (lab included), human physiology with laboratory, and a physics course with laboratory. The non-science prerequisites for the pre-health major in clinical radiation sciences are: UNIV 111 and UNIV 112, college algebra, introduction to psychology and a selection from VCU's general education curriculum.

Although not required as prerequisites, courses in writing and rhetoric, introduction to clinical radiation sciences, a visual or performing art class, medical terminology, and basic practice of statistics are highly recommended.

Many students will require an additional year of study before applying to the clinical radiation sciences degree program. All students admitted to a Bachelor of Science in Clinical Radiation Sciences must demonstrate aptitude, abilities and skills in the following categories: sensory, communication, physical/mobility, cognitive and behavioral/social. These categories are further delineated in the Technical Standards for Admission and Graduation documentation.

Following a review of admissions credentials, an interview with the admissions committee will be required for most applicants. If needed, the department will contact the student to schedule an interview. Following admission, successful completion of a criminal background check and drug testing will be required (at student expense) for participation in clinical education courses. Failure to pass one of these tests will prevent the student from successfully completing the clinical education requirements and, therefore, the program.

Changing to the pre-health major in clinical radiation sciences from another major

Current VCU students who wish to change their major to the pre-health major in clinical radiation sciences must meet the following criteria to be considered for the major:

- Minimum GPA of 2.8
- No more than 75 credits completed

Students who do not meet these requirements may see a pre-health adviser, but they will not be assigned to a pre-health adviser in Navigate.

Progression policy

Students interested in pursuing the B.S. in Clinical Radiation Sciences are admitted initially into the pre-health major in clinical radiation sciences, which is not a degree-granting major. In order to remain in the pre-clinical radiation sciences program, students must meet the following criteria.

- Students must maintain a minimum 2.8 VCU cumulative GPA.
 - If a student's VCU cumulative GPA drops below 2.8, they will be placed on pre-health probation and allowed one semester to

raise their cumulative GPA to 2.8 – provided it is mathematically possible to do so. If it is not mathematically possible to do so, or if the student fails to raise their minimum cumulative GPA to 2.8 during their probationary semester, they will be removed from the pre-clinical radiation sciences major and transitioned into their secondary major. If no secondary major exists, students will be moved into the Discovery program (undeclared major) where they will receive assistance with selecting another major.

- Pre-health probation students: Students must meet with their pre-health adviser prior to the add/drop deadline of the pursuant semester in order to adjust their class schedule and to create an **action plan**.
- By the time a student has attempted¹ 45 credits, if they have not successfully matriculated into the clinical radiation sciences major, they must declare a secondary major related to their parallel plan.
- If a student exceeds 75 attempted¹ credits and has not successfully matriculated into the clinical radiation sciences major, they will be removed from the pre-clinical radiation sciences major and their secondary major will become their primary major.

Details of special requirements for admission to the clinical radiation sciences program can be found on the degree requirements tab of the clinical radiation sciences concentration pages (<http://bulletin.vcu.edu/undergraduate/allied-health-professions/radiation-sciences/#degreestext>) of this Bulletin.

Transfer students who are admitted to the pre-health major in clinical radiation sciences must apply to the B.S. in Clinical Radiation Sciences degree program following the minimum number of semesters needed to complete the prerequisite courses required for admission. Transfer students must adhere to the same guidelines outlined above (re: declaring secondary majors, developing action plans, etc.).

Students may appeal the removal from the pre-health major in clinical radiation sciences via the associate director of pre-health advising in University Academic Advising. Students must initiate the appeal with their assigned academic adviser. The associate director may, at his or her discretion, extend the time period needed to meet the requirements, generally by only one semester. A student who wishes to appeal must submit his or her appeal at least one week prior to the start of the next semester in which they register for classes.

¹

Attempted hours include credit hours from courses in which a W, an F or any other grade has been assigned. This is reported on the transcript as “overall attempted hours.”

Prerequisites for the clinical radiation sciences program

Course	Title	Hours
VCU courses		
BIOL 205	Basic Human Anatomy ¹	4
MATH 141	Algebra with Applications (satisfies general education quantitative foundations)	4
PHIS 206 & PHIZ 206	Human Physiology and Human Physiology Laboratory	4

Select one of the following (Note the lecture component satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning.):

PHYS 101 & PHYZ 101	Foundations of Physics and Foundations of Physics Laboratory ²	4
OR		
PHYS 201	General Physics I ²	
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology (satisfies general education BOK for social/behavioral sciences and AOI for diversities in the human experience)	4
UNIV 111 Play course video for Focused Inquiry I	Focused Inquiry I (satisfies general education UNIV foundations)	3
UNIV 112 Play course video for Focused Inquiry II	Focused Inquiry II (satisfies general education UNIV foundations)	3
General education course		3
Total Hours		29

¹

The prerequisites for BIOL 205 include BIOL 101 and BIOZ 101.

²

The prerequisite for PHYS 201 is MATH 151.

The minimum total of credit hours required (for admission to clinical radiation sciences program) is 29.

Sample curriculum outline

Freshman year

Term Hours:		4
Total Hours:		33

The minimum number of credit hours required (for admission to clinical radiation sciences program) is 29.

Pre-health major in dental hygiene

Students interested in the pre-health major in dental hygiene must complete the two-year program requirements (a total minimum of 60 credits) for application to the Bachelor of Science degree program in dental hygiene offered by the VCU School of Dentistry. Applications to the program are normally submitted in spring of the sophomore year. Students planning to start the program in the fall would begin the admissions process during the fall semester of the preceding year. Students apply to the baccalaureate program through the American Dental Education Association Dental Hygiene Centralized Application Service in the spring of the year preceding entrance. All prerequisite course work should be completed by the spring of the year of desired admission.

Completion of the pre-health major in dental hygiene does not guarantee admission to the junior- and senior-year program for the B.S. in Dental Hygiene nor does it result in a college degree. Students must be admitted to and complete all program requirements to earn a baccalaureate degree in dental hygiene. Admission into the program is based on both academic and nonacademic qualities (work ethic, knowledge of the profession, motivation, compassion, integrity, communication skills, leadership and desire to contribute to society, resiliency, willingness to accept responsibility, and maturity). Students are strongly encouraged to consult with a UAA pre-health major academic adviser to learn about admission requirements that are specific to the program and to speak about alternate/parallel majors. For more information about the admission requirements and application deadlines for the B.S. in Dental Hygiene, visit the program's website (<http://www.dentistry.vcu.edu/programs/dentalhygiene/admission/>).

Requirements for the pre-health major in dental hygiene

Students in the pre-health major in dental hygiene must complete the specific prerequisite courses outlined below, totaling a minimum 60 credit hours. The Dental Hygiene Program does not accept grades of D and

all courses taken (repeated) are factored into the GPA. Science courses must be completed within six years of matriculation. The Dental Hygiene Program requires any applicant whose native language is not English and who has been educated primarily outside of the United States to submit official Test of English as a Foreign Language or International English Language Testing System scores.

Students interested in the pre-health major in dental hygiene must complete biological concepts and laboratory, human anatomy (laboratory included), human physiology and laboratory, medical microbiology and laboratory, and general chemistry I and laboratory. The non-science prerequisites for the pre-health major are: English composition (UNIV 111, UNIV 112 and UNIV 200), statistics, introduction to psychology, introduction to sociology, effective speech, a visual or performing arts course, humanities elective, and elective courses to complete the 60 credit-hour requirement needed to enroll in the dental hygiene degree program. DENS 101, although not required, is highly recommended.

The remainder of the 60 required credits should be chosen to fulfill VCU's general education curriculum.

Following a review of admissions credentials, eligible and competitive applicants will require an interview with the admissions committee. The department will contact the student/applicant to schedule the interview. Applicants are notified of committee decisions at the earliest possible date.

Changing to the pre-health major in dental hygiene from another major

Current VCU students who wish to change their major to the pre-health major in dental hygiene must meet the following criteria to be considered for the major:

- Minimum GPA of 2.8
- No more than 75 credits completed

Students who do not meet these requirements may see a pre-health adviser, but they will not be assigned to a pre-health adviser in Navigate.

Progression policy

Students interested in pursuing the B.S. in Dental Hygiene are admitted initially into the pre-health major in dental hygiene, which is not a degree-granting major. In order to remain in the pre-dental hygiene program, students must meet the following criteria.

- Students must maintain a minimum 2.8 VCU cumulative GPA.
 - If a student's VCU cumulative GPA drops below 2.8, they will be placed on pre-health probation and allowed one semester to raise their cumulative GPA to a 2.8 — provided it is mathematically possible to do so. If it is not mathematically possible to do so, or if the student fails to raise their minimum cumulative GPA to 2.8 during their probationary semester, they will be removed from the pre-dental hygiene major and transitioned into their secondary major. If no secondary major exists, students will be moved into the Discovery program (Undeclared major) where they will receive assistance with selecting another major.
- Pre-health probation students: Students must meet with their pre-health adviser prior to the add/drop deadline of the pursuant semester in order to adjust their class schedule and to create an **action plan**.

- By the time a student has attempted¹ 60 credits, if they have not successfully matriculated to the dental hygiene major, they must declare a secondary major related to their parallel plan.
- If a student exceeds 75 attempted¹ credits and has not successfully matriculated to the dental hygiene major, they will be removed from the pre-dental hygiene major and their secondary major will become their primary major.

Details of special requirements for admission to the dental hygiene program can be found on the degree requirements tab of the dental hygiene program (<http://bulletin.vcu.edu/undergraduate/dentistry/dental-hygiene-program/dental-hygiene-bs/#degreerequirementstext>) page of this Bulletin.

Transfer students who are admitted to the pre-health major in dental hygiene must apply to the B.S. in Dental Hygiene degree program following the minimum number of semesters needed to complete the prerequisite courses required for admission. Transfer students must adhere to the same guidelines outlined above (re: declaring secondary majors, developing action plans, etc.).

Students may appeal the removal from the pre-health major in dental hygiene via the associate director of pre-health advising in University Academic Advising. Students must initiate the appeal with their assigned academic adviser in UAA. The associate director may, at his or her discretion, extend the time period needed to meet the requirements, generally by only one semester. A student who wishes to appeal must submit his or her appeal at least one week prior to the start of the next semester in which they register for classes.

The minimum number of credit hours required (for admission to dental hygiene program) is 60.

Pre-health major in medical laboratory sciences

Students interested in the pre-health major in medical laboratory sciences must complete the two-year program requirements (a total minimum of 60 credits) for application to the Bachelor of Science degree program in medical laboratory sciences offered by the College of Health Professions. Applications to the program are normally submitted in spring of the sophomore year. Students planning to start the program in the fall would begin the admissions process during the fall semester of the preceding year. Students apply to the baccalaureate program through Undergraduate Admissions in the spring of the year preceding entrance. All prerequisite course work should be completed by the summer of the year of desired admission.

Completion of the pre-health major in medical laboratory sciences does not guarantee admission to the junior- and senior-year program for the B.S. in Medical Laboratory Sciences nor does it result in a college degree. Students must be admitted to and complete the baccalaureate program to earn a B.S. degree in medical laboratory sciences. Admission into the program is based on scholastic record, demonstrated aptitude and interest, and a personal interview conducted by the departmental admissions committee. Students are strongly encouraged to consult with a UAA pre-health major academic adviser to learn about admission requirements that are specific to the program and to speak about alternate/parallel majors. For more information about the admission requirements for the B.S. in Medical Laboratory Sciences, visit the department's website (https://chp.vcu.edu/programs/#degree_279017).

Requirements for the pre-health major in medical laboratory sciences

Students in the pre-health major in medical laboratory sciences must complete 12 credits of biology to include biological concepts or introduction to biological sciences (both with laboratories), 12 credits of chemistry to include a two-semester sequence of general chemistry (both with laboratories) and organic chemistry with laboratory or quantitative analysis with laboratory, nine credits of English composition (UNIV 111, UNIV 112 and UNIV 200), pre-calculus mathematics (three credits), and electives to meet the 60 minimum credits requirement for entrance into the medical laboratory sciences program and to complete VCU's general education curriculum.

In addition to the academic requirements, there are "essential functions" (non-academic) of the medical laboratory sciences program that students must master to successfully participate in the program. The following is a list of the essential technical abilities and skills for

admission that applicants must possess: manual dexterity, fine motor skills, mobility, vision, hearing, the ability to verbally communicate, read and write in the English language, emotional stability, and (other) personal attributes including integrity, responsibility, tolerance and respect. Although not required, introduction to medical laboratory sciences, additional mathematics, biology or chemistry courses, and a physics course are highly recommended.

Following a review of admissions credentials, eligible applicants will require an interview with the admissions committee. The department will contact the student/applicant to schedule the interview. Applicants are notified of committee decisions at the earliest possible date.

Changing to the pre-health major in medical laboratory sciences from another major

Current VCU students who wish to change their major to the pre-health major in clinical laboratory sciences must meet the following criteria to be considered for the major:

- Minimum GPA of 2.5
- No more than 75 credits completed

Students who do not meet these requirements may see a pre-health adviser, but they will not be assigned to a pre-health adviser in Navigate.

Progression policy

Students interested in pursuing the B.S. in Medical Laboratory Sciences are admitted initially into the pre-health major in medical laboratory sciences, which is not a degree-granting major. In order to remain in the pre-medical laboratory sciences program, students must meet the following criteria.

- Students must maintain a minimum 2.5 VCU cumulative GPA.
 - If a student's VCU cumulative GPA drops below 2.5, they will be placed on pre-health probation and allowed one semester to raise their cumulative GPA to 2.5 – provided it is mathematically possible to do so. If it is not mathematically possible to do so, or if the student fails to raise their minimum cumulative GPA to 2.5 during their probationary semester, they will be removed from the pre-medical laboratory sciences major and transitioned into their secondary major. If no secondary major exists, students will be moved into the Discovery program (undeclared major) where they will receive assistance with selecting another major.
- Pre-health probation students: Students must meet with their pre-health adviser prior to the add/drop deadline of the pursuant semester in order to adjust their class schedule and to create an **action plan**.
- By the time a student has attempted¹ 60 credits, if they have not successfully matriculated into the medical laboratory sciences major, they must declare a secondary major related to their parallel plan.
- If a student exceeds 75 attempted¹ credits and has not successfully matriculated into the medical laboratory sciences major, they will be removed from the pre-medical laboratory sciences major and their secondary major will become their primary major.

Details of special requirements for admission to the medical laboratory sciences program can be found on the **degree requirements tab of the B.S. in Medical Laboratory Sciences page** of this Bulletin.

Transfer students who are admitted to the pre-health major in medical laboratory sciences must apply to the B.S. in Medical

Laboratory Sciences degree program following the minimum number of semesters needed to complete the prerequisite courses required for admission. Transfer students must adhere to the same guidelines outlined above (re: declaring secondary majors, developing action plans, etc.).

Students may appeal the removal from the pre-health major in medical laboratory sciences via the associate director of pre-health advising in University Academic Advising. Students must initiate the appeal with their assigned academic adviser. The associate director may, at their discretion, extend the time period needed to meet the requirements, generally by only one semester. A student who wishes to appeal must submit his or her appeal at least one week prior to the start of the next semester in which they register for classes.

1

Attempted hours include credit hours from courses in which a W, an F or any other grade has been assigned. This is reported in the transcript as "overall attempted hours."

Prerequisites for the medical laboratory sciences program

Course	Title	Hours
VCU courses		
Select one of the following biology sequences (Note the three-credit lecture component satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning.):		4
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	
Additional biology credits		8
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	
BIOL 205	Basic Human Anatomy	
BIOL 209 & BIOZ 209	Medical Microbiology and Medical Microbiology Laboratory	
BIOL 300	Cellular and Molecular Biology	
BIOL 303	Microbiology

1

The three-credit lecture component satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning.

The minimum number of credit hours required (for admission to medical laboratory sciences program) is 60.

Pre-health major in nursing

Students interested in the highly competitive nursing program must complete the pre-health major in nursing requirements prior to application. A total minimum of 26 credits is required for application to the traditional Bachelor of Science in Nursing degree program. A minimum cumulative GPA is also required. Applicants who are international or non-native English speakers without a degree from a U.S. high school, college or university must submit TOEFL or IELTS test scores. For more information about these requirements, visit the School of Nursing's website (<http://nursing.vcu.edu>).

Because admission to the B.S. in Nursing program is highly competitive, it is imperative that all pre-health students who intend to pursue a major in nursing work in tandem with their UAA pre-health major academic adviser to consider parallel majors that satisfy similar career outcomes. Completion of the pre-health major in nursing does not guarantee admission to the traditional program for the B.S. in Nursing nor does it result in a college degree.

Requirements for the pre-health major in nursing

Students applying to the traditional B.S. in Nursing degree program must complete biological concepts with laboratory, human anatomy (lab included) with a minimum grade of B, and principles of nutrition. The non-science prerequisites for the pre-health major in nursing are: UNIV 111 and UNIV 112, introduction to psychology and general sociology. Although math is not required for admission to the School of Nursing, students admitted into the nursing program complete a statistics class. Therefore, it is recommended that students who place into college algebra complete a math class during the first year.

While not a requirement of the pre-health major in nursing, students who have space in their schedules to accommodate additional classes are encouraged to begin working on the collateral requirements of the baccalaureate degree. These courses include: BIOL 209 and BIOZ 209, both with minimum grades of B; PHIL 201; PHIS 206 and PHIZ 206, both with minimum grades of B; PSYC 304; STAT 208 or higher; and UNIV 200.

Changing to the pre-health major in nursing from another major

Current VCU students who wish to change their major to the pre-health major in nursing must meet the following criteria to be considered for the major:

- Minimum GPA of 3.0
- No more than 75 credits completed

Students who do not meet these requirements may see a pre-health adviser, but they will not be assigned to a pre-health adviser in Navigate.

Progression policy

Students interested in pursuing the B.S. in Nursing are admitted initially into the pre-health major in nursing, which is not a degree-granting major. In order to remain in the pre-nursing program, students must meet the following criteria.

- Students must maintain a minimum 3.0 VCU cumulative GPA.
 - If a student's VCU cumulative GPA drops below 3.0, they will be placed on pre-health probation and allowed one semester to raise their cumulative GPA to 3.0 – provided it is mathematically possible to do so. If it is not mathematically possible to do so, or if the student fails to raise their minimum cumulative GPA to 3.0 during their probationary semester, they will be removed from the pre-nursing major and transitioned into their secondary major. If no secondary major exists, students will be moved into the Discovery program (undeclared major) where they will receive assistance with selecting another major.
- Pre-health probation students: Students must meet with their pre-health adviser prior to the add/drop deadline of the pursuant semester in order to adjust their class schedule and to create an **action plan**.
- By the time a student has attempted¹ 45 credits, if they have not successfully matriculated into the traditional B.S. in Nursing program, they must declare a secondary major related to their parallel plan.
- By the time a student has attempted 60 credits, they must have completed BIOL 205 (or its equivalent) with a minimum grade of B.
- If a student exceeds 75 attempted¹ credits and has not successfully matriculated into the traditional B.S. in Nursing program, they will be removed from the pre-nursing major and their secondary major will become their primary major.

Details of requirements for admission to the traditional nursing program can be found on the program admission tab of the traditional program concentration page (p. 573) of this Bulletin.

Transfer students who are admitted to the pre-health major in nursing must apply to the traditional program option of the B.S. in Nursing following the minimum number of semesters needed to complete the prerequisite courses required for admission. Transfer students must adhere to the same guidelines outlined above (re: declaring secondary majors, developing action plans, etc.). Transfer students who have exceptionally high credits are strongly encouraged to consider applying

to the **accelerated program**, which is a post-baccalaureate B.S. degree option.

Students may appeal the removal from the pre-health major in nursing via the associate director of pre-health advising in University Academic Advising. Students must initiate the appeal with their assigned academic adviser. The associate director may, at their discretion, extend the time period needed to meet the requirements, generally by only one semester. A student who wishes to appeal must submit their appeal at least one week prior to the start of the next semester in which they register for classes.

1

The three-credit lecture component satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning.

The total minimum requirement (for admission to the traditional nursing program) is 26 credits.

Pre-health and pre-law advising tracks

The Office of Pre-Professional Health Advising in University Academic Advising prepares students for professional school application through guidance with pre-professional health curriculum, admissions test preparation, co-curricular activity involvement and application competitiveness. The advising and services provided by the office will prepare highly qualified, confident and knowledgeable pre-professional health students for admission to professional health programs. Preparatory programs are available for careers in medicine, dentistry, occupational therapy, optometry, pharmacy, physical therapy, physician assistant and veterinary medicine. Additionally, a post-baccalaureate health sciences certificate (p. 218) is available to students who have already earned bachelor's degrees in non-science areas and plan to enter doctoral-level health science training programs.

The office focuses on developing personal and professional competencies which are heralded by the Association of American Medical Colleges (<https://www.aamc.org/>). VCU's pre-professional health advising tracks are not an academic major or minor, but are rather a combination of career development advising coupled with a set of predetermined courses that are widely accepted across the nation for

admission requirements. To qualify for and to maintain your status as a "pre-professional health" student at VCU, program requirements are outlined for each student to follow in order to gain access to the benefits of the pre-professional health advising program.

For more information about how to declare and maintain your pre-professional health advising track, please visit the pre-professional health advising (<https://uaa.vcu.edu/preprofessionalhealth/>) webpage.

Pre-law advising program

VCU Career Services (<http://www.careers.vcu.edu/>) supports aspiring law students by offering career advisory services regarding the law school admissions process. Students are offered assistance regarding application procedures and the law school admission test in preparation for the study of law. The Law School Admission Council (<http://www.LSAC.org>) and the American Bar Association (<http://www.ABA.net.org>) provide comprehensive online information for students regarding preparation for law school, law school admission and accreditation, as well as careers in the legal profession.

As there are no particular prerequisites or a specific major necessary for entrance to law school, students may choose virtually any major or undergraduate program. Traditionally, students applying to law school have pursued liberal arts majors such as history, English, political science, economics, math/sciences or philosophy. Students wishing to specialize in a particular area of law may choose majors from academic disciplines as diverse as art, music, computer science, engineering, nursing, education, business or social work. Taking a broad range of difficult courses from demanding instructors is excellent preparation for a legal education. Whatever the major, it is important that students considering a career in law take advantage of opportunities to develop research and writing skills. Other skills that provide a sound foundation for a legal education include analytical and problem-solving skills, critical reading abilities, oral communication and listening abilities, task organization and management skills, and the values of serving faithfully the interests of others while also promoting justice.

The Department of Philosophy offers a philosophy of law minor for students interested in law school. It is important that students considering the legal profession take challenging course work in which they can develop analytical, research and written and verbal communication skills.

Preparation for the study of dentistry

Important general information

Students interested in the pre-dental advising track must complete a minimum of 90 credit hours including the listed prerequisite courses and be on track to receive a baccalaureate degree to be considered for admission to dental school. Students interested in dental school should consult with a pre-professional health adviser to learn about requirements that are specific to the schools of dentistry to which they hope to apply.

Declaration of the pre-dental advising track through the Office of Pre-Professional Health Advising does not constitute admission to the VCU School of Dentistry. Students must apply separately to the dental school of their choice at the appropriate time.

Students with an interest in preparing for dental school must declare an academic major and should declare and maintain their pre-dental advising track. Students do not earn a pre-dental degree. Students unsure

of their academic majors initially should clarify their academic interests through regular conversations with their advisers. Pre-dental students are encouraged to major in fields of greatest interest to them. To declare a pre-dentistry advising track, see the pre-professional health advising blog (<https://rampages.us/preprofadv/>).

Prerequisites for the VCU School of Dentistry

Students need to complete the prerequisite science courses before being eligible to start the dental program at the VCU School of Dentistry. Students are also required to complete the Dental Admission Test. The DAT is taken before or during the dental school admissions process. Students preparing for the DAT are strongly advised to take courses to build competency in tested subjects prior to taking the exam. Completing all prerequisite course work and taking the DAT prior to applying is highly recommended but not required. Students must provide official DAT scores before their application will be considered for an interview. All prerequisite courses must be completed with a minimum grade of C prior to entering VCU's dental program if accepted.

Science and non-science courses required for the VCU School of Dentistry

General biology, general chemistry, organic chemistry, biochemistry and physics are required science prerequisites for admission to dental school. With the exception of biochemistry, the laboratory component of these prerequisites must also be completed.

English composition and a mathematics/statistics course are non-science prerequisites required for dental school.

Other upper-level science courses in general microbiology, bacteriology, animal or vertebrate physiology, anatomy, genetics and cell biology are strongly recommended. If time permits and the courses are available, courses in immunology, embryology, or developmental biology and histology are highly recommended. Additionally, non-science courses in the behavioral sciences and those involving psychomotor skills are recommended.

Prerequisites for the VCU School of Dentistry

1

MATH 151 is highly recommended and is a prerequisite for other dental school course requirements.

2

MATH 200 is a prerequisite for PHYS 207.

3

MATH 201 is a prerequisite for PHYS 208.

Additional recommended prerequisites for dental schools nationwide

Dental schools across the U.S. have different prerequisites for admission into their program. The list below shows courses required by various schools beyond the courses listed above for the VCU School of Dentistry. Students should discuss career plans with their pre-professional health adviser for additional guidance.

Course	Title	Hours
BIOL 205	Basic Human Anatomy	4
or BIOL 402	Comparative Vertebrate Anatomy	
BIOL 303	Microbiology	3
DENS 101	Introduction to Dentistry	1
PHIS 206	Human Physiology	3
or BIOL 411	Physiology	
UNIV 291	University Special Topics (when topic is appropriate for pre-professional health students)	1-4

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for the study of medicine

Important general information

Students interested in the pre-medicine advising track must obtain a bachelor's degree and complete the necessary prerequisites for medical school. All prerequisites should be completed or on track to be complete prior to medical school matriculation. Best results occur when all prerequisite courses have been taken and grades are available at the time of application. Students interested in medical school should consult with

a pre-professional health adviser to learn about requirements that are specific to the schools of medicine to which they hope to apply.

Declaration of a pre-medical advising track through the Office of Pre-Professional Health Advising does not constitute admission to the VCU School of Medicine. Students must apply separately to the medical school of their choice at the appropriate time.

Students with an interest in preparing for medical school must declare an academic major and should declare and maintain their pre-medical advising track. Students do not earn a pre-medical degree. Students unsure of their academic majors initially should clarify their academic interests through regular conversations with their primary/major academic adviser. Pre-medical students are encouraged to major in fields of greatest interest to them. To declare a pre-medicine advising track, see the pre-professional health advising blog.

Beyond curricular requirements, students must obtain additional experiences to be a competitive applicant for the VCU School of Medicine. Successful applicants have an average of 200 hours of clinical exposure, interacting with both physicians (>60 hours) and patients. Non-clinical community service that demonstrates their passion for serving others over an extended amount of time is required; 200 hours is the average. Students should be knowledgeable about how their clinical exposure and community service has impacted their motivation to study medicine and be successful in the classroom. It is also helpful to the applicant but not mandatory to have research and leadership experience.

Prerequisites for the VCU School of Medicine

The American Association of Medical Colleges recommends students gain a core set of competencies in preparation for the Medical College Admissions Test. The MCAT is taken prior to students applying to medical school and results are weighed heavily in admissions decisions. Best results on the MCAT occur when all prerequisites have been taken prior to sitting for the MCAT exam. Please see the AAMC website (<https://www.aamc.org/>) for more information regarding MCAT content.

Science and non-science prerequisite courses required for the VCU School of Medicine

Science prerequisite course work that students must complete for VCU School of Medicine are general biology, general chemistry, organic chemistry and physics (eight credits each). Another upper-level biological science course is also required. Courses include but are limited to biochemistry, cell biology, anatomy, embryology, genetics, microbiology, molecular biology, immunology or neuroscience.

In addition to the prerequisites listed above, VCU's School of Medicine requires pre-medical students to take two semesters of English composition and two semesters of mathematics (general statistics can count as one semester). All students also must have clinical exposure to physicians and patients and must have community-based nonclinical community service.

The VCU School of Medicine does not require introductory psychology or sociology as prerequisites, but they are highly recommended. Biochemistry, introductory psychology and introductory sociology are topics covered on the MCAT and are prerequisites for some medical schools.

VCU's School of Medicine does accept AP and CLEP credit to meet pre-medical course requirements if these are documented on an official transcript. Please note that lab credit will still be required and applicants may meet lab credit with the lab sections of advanced science courses

or practical experience, such as documented relevant experience in a research lab.

Additional resources

VCU offers an introduction to medicine course (offered as a topic under UNIV 291) every spring semester, which is focused on the VCU medical school application process with insight into medical career choices. Students should see their pre-professional health adviser for additional details.

For more information about the VCU School of Medicine (<https://medschool.vcu.edu/>), visit their website.

Prerequisites for the VCU School of Medicine

Course	Title	Hours

PHIL 201	Introduction to Ethics	3
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology	4
SOCY 101 Play course video for Introduction to Sociology	Introduction to Sociology	3

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for the study of occupational therapy

Important general information

Students interested in the pre-occupational therapy advising track must obtain a bachelor's degree and complete the necessary prerequisites for the occupational therapy doctorate program. Students interested in occupational therapy should consult with a pre-professional health adviser to learn about requirements that are specific to the program and/or school to which they hope to apply.

Declaration of the pre-occupational therapy advising track through the Office of Pre-Professional Health Advising does not constitute admission to the occupational therapy doctorate program in VCU's College of Health Professions. Students must apply separately to the occupational therapy program/school of their choice at the appropriate time.

Students with an interest in preparing for the occupational therapy doctorate program must declare an academic major and should declare and maintain their pre-occupational therapy advising track. Students do not earn a pre-occupational therapy degree. Students unsure of their academic majors initially should clarify their academic interests through regular conversations with their advisers. Those in the pre-occupational therapy advising track are encouraged to major in fields of greatest interest to them. To declare a pre-occupational therapy advising track, see the pre-professional health advising blog (<https://rampages.us/preprofadv/>).

Prerequisites for the VCU occupational therapy doctorate program

Students intending to enroll in the VCU occupational therapy doctorate program must complete a bachelor's degree before entering, as well as declaring and maintaining their pre-occupational therapy advising track. It is recommended that applicants select a challenging course load of science and math courses each semester to ensure adequate preparation for the academic rigor of the occupational therapy program.

Students need to complete the prerequisite courses and the Graduate Record Exam before becoming eligible to start the occupational therapy program in the College of Health Professions at VCU.

In addition to completing the required courses, applicants must also demonstrate evidence of a minimum of 30 observation hours under the supervision of a licensed O.T. practitioner, an occupational therapist or an occupational therapy assistant, prior to the time of application.

Prerequisite courses required for the VCU occupational therapy doctorate program

Students must complete human anatomy (including the lab) as well as human physiology and the human physiology laboratory. A minimum grade of B is a requirement for these prerequisite courses. An introductory-level biology course is a prerequisite for anatomy and physiology at VCU.

Statistics is a prerequisite course. The course should cover the following topics: descriptive statistics, t-test, chi-square, analysis of variance, linear regression and correlational analysis.

A total of 15 social science credits are needed. Psychology of the abnormal, lifespan developmental psychology and at least one sociology or anthropology course is required. The additional six social science credits must be taken within the psychology, sociology or anthropology departments. Introductory courses are acceptable to fulfill the social science prerequisites.

Anatomy, physiology, statistics, developmental psychology and abnormal psychology should be taken within seven years of enrollment in the program.

A medical terminology course and a kinesiology course are recommended but not required.

Prerequisites for the VCU Occupational Therapy Doctorate program

Course	Title	Hours
VCU courses ¹		
ANTH 103 or SOCY 101	Introduction to Anthropology Introduction to Sociology	3
BIOL 205	Basic Human Anatomy (includes lab)	4
PHIS 206 & PHIZ 206	Human Physiology and Human Physiology Laboratory	4
PSYC 304	Life Span Developmental Psychology	3
PSYC 407	Psychology of the Abnormal	3
STAT 314	Applications of Statistics ^{2,3}	4
Social sciences electives (from PSYC, ANTH and/or SOCY)		3-6
Total Hours		24-27

1

Note that some courses require prerequisites to the listed required courses and have been added to the “additional recommended prerequisite courses” list below.

2

Depending on the math placement test results, students may need to complete MATH 151, MATH 200 or MATH 201 and STAT 212 before enrolling in STAT 314.

3

VCU psychology majors can take PSYC 214 in place of STAT 314 (STAT 210 is a prerequisite for PSYC 214).

Additional recommended prerequisites for occupational therapy schools nationwide

Occupational therapy programs across the U.S. have different prerequisites for admission. The list below shows courses required by various schools beyond the courses listed above for the VCU occupational therapy program requirements. Students should discuss career plans with their pre-professional health adviser for additional guidance.

Course	Title	Hours
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	4
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
HPEX 250	Medical Terminology	1-3
PHYS 201	General Physics I	4
PHIL 201	Introduction to Ethics	3
SPCH 121 or SPCH 321	Effective Speech Speech for Business and the Professions	3

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for professional studies in optometry

Important general information

Students interested in the pre-optometry advising track must obtain a bachelor's degree and complete the necessary prerequisites for a Doctor of Optometry program. Those interested in pursuing optometry should consult with a pre-professional health adviser to learn about requirements that are specific to the program and/or school to which they hope to apply.

Admission to and completion of a pre-optometry advising track does not constitute or guarantee admission to an optometry school.

If interested in preparing for optometry school, students must declare an academic major and should declare and maintain their pre-optometry advising track. Students do not earn a pre-optometry degree. Those unsure of their academic majors initially should clarify their academic interests through regular conversations with their advisers. Pre-

optometry students are encouraged to major in fields of greatest interest to them. To declare a pre-optometry advising track, see the [pre-professional health advising blog](#).

Prerequisites for an optometry program

It is recommended that students select a challenging course load of science and math courses each semester to ensure adequate preparation for the academic rigor of an optometry program.

Students need to complete their bachelor's degree, the required science prerequisite courses and the Optometry Admissions Test before becoming eligible to start an optometry program.

Science and non-science courses required for the pre-optometry doctoral program

General biology, cell biology, general chemistry, organic chemistry, biochemistry and physics are required science prerequisites for admission to optometry school. The science courses should be pre-professional level courses designed for science majors or health professional students and should offer laboratory experience. Eight hours of advanced human biological sciences are required; junior or senior-level anatomy or physiology is strongly recommended. Students should consult with a pre-professional health adviser to see if the school they plan to apply to requires human anatomy.

General prerequisites for Doctor of Optometry programs

Course	Title	Hours
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4

STAT 210	Basic Practice of Statistics	3
Total Hours		63-65

1

MATH 200 is a prerequisite for PHYS 207.

2

MATH 201 is a prerequisite for PHYS 208.

3

Students should visit the prospective school's website to confirm if BIOL 205 is required.

4

Students should visit the prospective school's website to confirm if PHIS 206 is required.

Students are encouraged to review admissions requirements for the specific institution(s) that they are considering applying to as well as VCU course descriptions for prerequisite courses. Students should meet with a pre-professional health adviser after declaring the track to develop their curriculum plan.

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for the study of pharmacy

Important general information

Students interested in the pre-pharmacy advising track must complete the necessary prerequisites for pharmacy school. The minimum credit requirement varies for each pharmacy school. VCU requires a total minimum of 56 semester hours, however some students elect to earn a baccalaureate degree before entering the program. Students interested in pharmacy school should consult with a pre-professional health adviser to learn about requirements that are specific to the schools of pharmacy to which they hope to apply.

Declaration of the pre-pharmacy advising track through the Office of Pre-Professional Health Advising does not constitute admission to the VCU School of Pharmacy. Students must apply separately to the pharmacy school of their choice at the appropriate time.

Students with an interest in preparing for pharmacy school must declare an academic major and should declare and maintain their pre-pharmacy advising track. Students do not earn a pre-pharmacy degree. Those unsure of their academic majors initially should clarify their academic interests through regular conversations with their advisers. Pre-pharmacy students are encouraged to major in fields of greatest interest to them. To declare a pre-pharmacy advising track, see the **pre-professional health advising blog**.

Prerequisites for the VCU Pharm.D. program

Students must complete the minimum 56 semester hours of course work and the required science courses to be eligible to start the Pharm.D. program at VCU. However, some students elect to complete their bachelor's degree prior to enrollment into the Pharm.D. program. Students are also required to complete the Pharmacy College Admission Test. The PCAT is taken prior to students applying to pharmacy school

and results are utilized as a component of the holistic admissions review process. Students preparing for the PCAT are strongly advised to take courses to build competency in these areas prior to taking the exam. It is not necessary to have completed all prerequisite course work or to have taken the PCAT prior to submitting your application to pharmacy school. However, you must complete all prerequisite courses and take the PCAT before entering VCU's pharmacy program.

Science and non-science courses required for the VCU Pharm.D. program

General biology, general chemistry, organic chemistry, physics, human anatomy, human physiology, microbiology and biochemistry are required science prerequisites for admission to the VCU Pharm.D. program.

Students must also complete English composition, calculus and statistics as non-science prerequisites for the VCU Pharm.D. program.

Due to the importance of a strong biomedical science foundation for success in the Pharm.D. program, some or all of these courses are highly recommended: genetics, molecular biology, immunology and cell biology. Other highly recommended elective choices are computer science, economics, business, history, foreign languages, philosophy, political science and sociology.

The following prerequisite courses must be completed prior to admission for students entering in the fall semester. Advanced Placement tests of the College Board and/or International Baccalaureate courses will not be accepted for science prerequisites other than physics, although higher-level courses in the same subject area may be substituted (e.g., physical chemistry for general chemistry). AP/IB credit in physics, calculus and statistics courses will be accepted with a minimum score of 3 for AP or 4 for IB.

Prerequisites for VCU's Pharm.D. program

1

Due to the importance of a strong biomedical science foundation in the Pharm.D. program, some or all of these courses are highly recommended: genetics, molecular biology, immunology and cell biology. Recommended elective choices are computer science, economics, business, history, foreign languages, philosophy, political science and sociology.

Additional recommended prerequisites for pharmacy schools nationwide

Pharm.D. programs across the U.S. have different prerequisites for admission. The list below shows courses required by various schools beyond the courses listed above for the VCU Pharm.D. program requirements. Students should discuss career plans with their pre-professional health adviser for additional guidance.

Course	Title	Hours
BIOZ 303	Microbiology Laboratory	2
ECON 210 or ECON 211	Principles of Microeconomics Principles of Macroeconomics	3
PHIL 201	Introduction to Ethics	3
PHIZ 206	Human Physiology Laboratory	1
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology	4
SOCY 101 Play course video for Introduction to Sociology	Introduction to Sociology	3

Additional arts and humanities/social and behavioral sciences course work

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for the study of physical therapy

Important general information

Students interested in the pre-physical therapy advising track must obtain a bachelor's degree and complete the necessary prerequisites for the Doctor of Physical Therapy program. Students interested in physical therapy should consult with a pre-professional health adviser to learn about requirements that are specific to the program and/or school to which they hope to apply.

Declaration of the pre-physical therapy advising track through the Office of Pre-Professional Health Advising does not constitute admission to the

VCU D.P.T. program in the College of Health Professions. Students must apply separately to the physical therapy program/school of their choice at the appropriate time.

Students with an interest in preparing for the physical therapy doctoral program must declare an academic major and should declare and maintain their pre-physical therapy advising track. Students do not earn a pre-physical therapy degree. Those unsure of their academic major initially should clarify their academic interests through regular conversations with their advisers. Students in the pre-physical therapy advising track are encouraged to major in fields of greatest interest to them. To declare a pre-physical therapy advising track, see the **pre-professional health advising blog**.

Prerequisites for the VCU physical therapy doctoral program

Students intending to pursue the physical therapy doctoral program must complete a bachelor's degree before entering. It is recommended that applicants select a challenging course load of science and math courses each semester to ensure adequate preparation for the academic rigor of the physical therapy program.

Students need to complete their bachelor's degrees, the required science prerequisite courses and the Graduate Record Exam before becoming eligible to start the physical therapy program in the College of Health Professions at VCU.

Science and non-science courses required for the VCU physical therapy doctoral program

Students must complete 12 semester hours in the biological sciences, including anatomy and physiology, as well as eight hours of chemistry and eight hours of physics for the VCU physical therapy doctoral program.

Precalculus mathematics, statistics, introduction to psychology and one upper-level psychology (abnormal or developmental is preferred) are non-science prerequisites for the physical therapy program.

VCU students are strongly encouraged to take cell biology as well as other upper-level biology courses. Admission to the D.P.T. program is highly competitive. Taking upper-level biology and/or engineering courses will enhance a student's application and make them more competitive.

Additional information for the VCU physical therapy doctoral program

The following prerequisite courses must be completed prior to admission for students entering in the fall semester. If VCU has awarded college credits for Advanced Placement or International Baccalaureate exams and they are listed on the student's transcript, those credits will be accepted.

Prerequisites for the VCU physical therapy doctoral program

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for professional studies for physician assistant

Important general information

Students interested in the pre-physician assistant advising track must obtain a bachelor's degree and complete the necessary prerequisites

in order to apply for a master's-level physician assistant program. If interested in the field of physician assistant, students should consult with a pre-professional health adviser to learn about requirements that are specific to the program and/or school to which they hope to apply.

Declaration of the pre-physician assistant advising track through the Office of Pre-Professional Health Advising does not constitute admission to any physician assistant program. Students must apply separately to a physician assistant program of their choice at the appropriate time.

If interested in preparing for physician assistant programs, students must declare an academic major and should declare and maintain their pre-physician assistant advising track. Students do not earn a pre-physician assistant degree. Those unsure of their academic majors should initially clarify their academic interests through regular conversations with their advisers. Students in the pre-physician assistant advising track are encouraged to major in fields of greatest interest to them.

Prerequisites for a physician assistant master's program

Students intending to pursue a master's-level physician assistant program must complete a bachelor's degree before entering. It is recommended that applicants select a challenging course load of science and math courses each semester to ensure adequate preparation for the academic rigor of the physician assistant program.

Students must complete their bachelor's degree, the required science prerequisite courses, the Graduate Record Exam and co-curricular requirements before becoming eligible to start a master's-level physician assistant program.

The GRE should be taken prior to applying to physician assistant programs and these scores are weighed heavily in admissions decisions. Students planning to take the GRE are strongly advised to prepare extensively through self-directed study or a prep course.

Science and non-science courses required for a physician assistant master's program

The admissions requirements for the schools and colleges offering graduate-level programs for physician assistant vary at each institution. Students who wish to pursue admissions to these programs should complete two semesters of general biology with laboratories, two semesters of general chemistry with laboratories, a semester of organic chemistry with laboratory and two semesters of human anatomy and physiology with laboratories. The science courses should be pre-professional level courses designed for science majors and offer a laboratory experience.

Other courses such as cell biology, biochemistry, genetics, microbiology and medical terminology are highly recommended, depending on the specific physician assistant program.

Statistics, introduction to psychology and one upper-level psychology (abnormal or developmental are preferred) are non-science prerequisites for the physician assistant program.

Due to the variance in requirements for each program, it is highly recommended that students meet with a pre-professional health adviser early to develop a degree plan.

BIOL 300 is a prerequisite for BIOL 303.

2

CHEM 302 is a prerequisite for CHEM 403.

Additional recommended prerequisites for physician assistant programs nationwide

Physician assistant programs across the U.S. have different prerequisites for admission into their programs. The list below shows courses required by various schools. Students should discuss career plans with their pre-professional health adviser for additional guidance.

Course	Title	Hours
BIOL 300	Cellular and Molecular Biology	3
BIOL 303	Microbiology	3
BIOL 310	Genetics	3

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Preparation for professional studies in veterinary medicine

Important general information

Students interested in the pre-veterinary medicine advising track must obtain a bachelor's degree and complete the necessary prerequisites in order to apply for veterinary school. Those interested in veterinary school should consult with a pre-professional health adviser to learn about requirements that are specific to the schools of veterinary medicine to which they hope to apply.

Declaration of the pre-veterinary medicine advising track through the Office of Pre-Professional Health Advising does not constitute or guarantee admission to any veterinary school. Students must apply separately to a veterinary medicine program of their choice at the appropriate time.

If interested in preparing for veterinary school, students must declare an academic major and should declare and maintain their pre-veterinary advising track. Students do not earn a pre-veterinary medicine degree. Those unsure of their academic majors initially should clarify their academic interests through regular conversations with their advisers. Pre-veterinary medicine students are encouraged to major in fields of greatest interest to them. To declare a pre-veterinary medicine advising track, see the [pre-professional health advising blog](#).

Prerequisites for veterinary school

The Graduate Record Examination is taken prior to application to veterinary school and those scores are weighed heavily in admissions decisions. Students are strongly advised to prepare thoroughly through self-directed study or through a prep course prior to registering to take the GRE.

Science and non-science courses required for veterinary school

Students must complete general biology, cell biology, general chemistry, organic chemistry, biochemistry and physics courses as science prerequisites for admission to veterinary school.

Other science courses, including genetics, animal physiology, comparative vertebrate anatomy and microbiology are strongly recommended for pre-veterinary students.

General prerequisites for Doctor of Veterinary Medicine programs

1

At least six credits in mathematics is required for the Virginia-Maryland College of Veterinary Medicine.

Additional recommended prerequisites for veterinary medicine programs nationwide

Students are encouraged to review admissions requirements for the specific institution(s) that they are considering applying to as well as VCU course descriptions for prerequisite courses. Students should meet with a pre-professional health adviser after declaring the track to develop their curriculum plan.

Course	Title	Hours
BIOL 300	Cellular and Molecular Biology	3
BIOL 303	Microbiology	3
BIOL 310	Genetics	3
BIOL 402	Comparative Vertebrate Anatomy	5
BIOL 411	Physiology	3

Students should also consult with their pre-professional health advisers to discuss an individual plan of study in parallel with their academic majors.

Nondegree-seeking students

University Academic Advising advises students admitted to VCU with a “nondegree-seeking” status. Undergraduate nondegree-seeking students who have not previously earned a baccalaureate degree may take a maximum of 11 credit hours per semester. Transient students who are seeking a degree at another institution of higher education may take up to 19 credit hours per semester. The nondegree-seeking student adviser helps these students identify appropriate courses for registration according to their educational goals, as well as helping with

the registration process. To schedule an appointment with a university academic adviser, please call (804) 827-8648.

Advising after the first year

Academic advising for sophomores, juniors and seniors is generally provided by faculty and professional advisers within the school or college where their major resides. Students in foundation programs such as Business Foundation, Art Foundation or Lower-division Social Work are continuously advised by University Academic Advising until their successful admission into upper-division standing. Students in pre-nursing, pre-clinical laboratory sciences, pre-clinical radiation sciences and pre-dental hygiene are continuously advised by pre-health advisers in UAA until their successful admission to a professional program or transition into parallel majors.

To schedule an appointment with your adviser, log in to vcu.campus.eab.com (<http://vcu.campus.eab.com>). The schools, departments and colleges are listed below.

College of Engineering
Phone: (804) 828-3925

Department of Clinical Laboratory Sciences (in the College of Health Professions)
Phone: (804) 828-9469

Department of Radiation Sciences (in the College of Health Professions)
Phone: (804) 828-9104

College of Humanities and Sciences
(including the Richard T. Robertson School of Media and Culture and the School of World Studies)
Phone: (804) 827-8211

Academic advising and learning support courses

UAA offers several academic advising and learning support courses to students, including “Introduction to the University,” “Investigations in Learning,” and “Education and Career Planning.” These courses support students in achieving academic success.

Learning support

The university offers the following centers and services as additional support to students.

Campus Learning Center

A learning and tutoring resource, the Campus Learning Center enhances undergraduate students’ academic success at VCU. All CLC services are free for currently enrolled students. Students can schedule both individual and drop-in tutoring sessions in a wide variety of subjects, from courses in business to math and the social sciences.

The CLC also provides Supplemental Instruction, a nationally recognized program that provides learning support from student leaders who work with classroom instructors to make sure each SI session is beneficial. Typical SI offerings include sessions in entry-level sciences and the social sciences. SI offerings change slightly each semester, so students are encouraged to check the website for updated offerings as well as meeting times and locations. Focused learning courses in biology (UNIV 151 and UNIV 152) are graded one- or two-credit courses, which integrate what-to-learn with how-to-learn. Each course is assigned a peer leader who is majoring in biology and has had extensive training in facilitating group-study sessions.

The CLC also provides the Campus Testing Center, which offers administration of proctored exams, make-up testing and placement exams. For make-up testing, students must consult with their professors to arrange for tests to be taken in the Campus Testing Center. The professor will then send the exam directly to the test center, and the student will schedule a time to take the exam

For more information on the Campus Learning Center, visit the **CLC on the Web** or call (804) 827-8108.

Writing Center

The Writing Center offers free writing assistance for undergraduates, graduate students and faculty from any discipline. Consultants trained in the practice of effective writing and writing instruction offer one-on-one sessions to facilitate writers’ work on assignments.

The Writing Center is a collaborative environment designed to help students produce sharper, more critical thinking and a greater sense of audience as they write. Writing Center consultants encourage students to connect with their work, to invest in it and to take better ownership of their thinking and the subsequent writing that they produce. Weak writing is characterized by weak thinking and exacerbated even more by the distance between the writing task and the student writer. Negotiating this distance is hard work made all the more difficult when students labor in isolation. Working with a consultant the Writing Center helps overcome this isolation and helps students to view their work as a meaningful expression of their thinking.

The Writing Center offers appointments as well as assistance on a drop-in basis. Online services are available to students enrolled in distance-learning courses and for students who are otherwise unable to make it to campus for face-to-face consultations.

For more information, visit **the Writing Center** online or call (804) 828-4851.

Student-athlete support services

The Office of Student Athlete Support Services coordinates academic advising for all student-athletes throughout their enrollment at VCU. This support enhances the opportunities for academic and personal success for student-athletes. The support staff assists students in the development of educational plans, ensures that VCU policies and NCAA rules and regulations regarding academics are being followed, and that students’ needs are successfully being met.

The student-athlete adviser helps student-athletes to understand VCU policies, achieve adequate progress toward graduation, overcome academic difficulties, develop future career goals and maintain NCAA eligibility. Optimal educational and personal success is maximized through tutoring services, study hall, a mentoring program and life-skills development. All freshmen are required to meet weekly with a team adviser, sophomores meet biweekly and all upperclassmen meet with an adviser at least three times per semester. Student-athletes must meet with their adviser to register for classes each semester.

The Office of Student Athlete Support Services has implemented a unique mentoring program where student-athletes help each other create a strong game plan for success. Each semester, junior and senior student-athletes with a minimum GPA of 3.0 are chosen as mentors. The mentees are freshman student athletes and any other student-athletes in need of intense individual support. The mentors and mentees are required to meet weekly and create detailed academic plans for the coming week. The mentors are required to attend biweekly training with the staff of the Office of Student-Athlete Advising.

General education curriculum

VCU’s general education curriculum seeks to provide a diverse student body with a broad base of knowledge and the intellectual skills to participate actively in a changing world. To those ends, the general education curriculum challenges students to seek creative answers to complex problems, see connections between disciplines and between ideas, and develop an informed perspective on the varieties of human experience. Courses included in the general education curriculum are open to all VCU undergraduate students and therefore do not focus on those skills, techniques or procedures specific to a particular occupation or profession. The general education curriculum which follows consists of 30 credit hours divided into three sections: foundations, breadth of knowledge and areas of inquiry. While foundations courses are distinct from the rest of the general education curriculum, the courses contained within the breadth of knowledge and areas of inquiry sections overlap.

Foundations (12-13 credits)

To ensure that all students enrolled at VCU are provided with a firm foundation upon which to pursue their intellectual and professional goals, the general education curriculum requires that all students take the following courses.

1

A minimum grade of C is required in UNIV 112 and UNIV 200. Transfer credits are not accepted for these three UNIV courses after a student is enrolled at the university.

Breadth of knowledge (SACSCOC) (nine credits)

2

All students must earn at least three credits in each of the three breadth of knowledge areas listed below. All courses listed in the three sections below also count toward the 17-18 credit hour areas of inquiry requirement.

Course	Title	Hours
Humanities/fine arts		
This requirement is fulfilled by these courses included in the four areas of inquiry. Select one of the following.		3
AFAM 111 Play course video for Introduction to Africana Studies	Introduction to Africana Studies	
ARTE 222	Rethinking Popular, Visual and Media Culture	
ARTH 201	Banned! Art and Controversy	
CREA 201	The Creative Economy	
DANC 230	Dance in Hollywood	
ENGL 215	Reading Literature	
ENGL 250	Reading Film	
HIST 201	The Art of Historical Detection: ____	
HIST 202	History Without Borders: ____

Total Hours		9

2

Courses taken to fulfill the three breadth of knowledge requirements categories also count toward the general education curriculum's four areas of inquiry.

Areas of inquiry (17-18 credits total, including the nine credits from breadth of knowledge)

The remaining course work in the general education curriculum must be divided among the four areas of inquiry below, with at least three, and no more than nine, credits from each of the four areas. In fulfilling these requirements, students may apply no more than six credits with the same four-letter prefix (ex. RELS, MGMT) to the 17-18 credit total requirement, regardless of the area of inquiry under which they are listed. Courses taken to complete the breadth of knowledge requirements also fulfill area of inquiry requirements.

Course	Title	Hours
Creativity, innovation and aesthetic inquiry		
Courses in this area encourage students to examine the circumstances that produce creative work; investigate the criteria used to judge creative work; and consider the role of imagination in expressing the human condition.		3-9
ARTE 222	Rethinking Popular, Visual and Media Culture	
ARTH 201	Banned! Art and Controversy	
CREA 201	The Creative Economy	
DANC 230	Dance in Hollywood

VCU's general education learning goals, definitions and outcomes

Communicative fluency

Communicative fluency is understanding and creating shared meaning with effective use of language and communicative practices, intentional engagement of audience, cogent and coherent iteration and negotiation with others, and skillful translation across multiple expressive formulations and modes.

1. Develop and present cogent, coherent and error-free written communication with general and specialized audiences
2. Develop and present cogent, coherent and error-free oral communication with general and specialized audiences
3. Recognize and use other modalities of communication (e.g. digital, expressive and scientific) effectively and appropriately
4. Understand and effectively uses genre and disciplinary conventions for communication, including syntax and mechanics, for a variety of purposes
5. Choose a variety of sources of evidence appropriate to the audience and purpose; selects sources after considering the importance of multiple criteria, such as relevance, currency, authority, scholarship, and bias or point of view
6. Achieve positive outcomes with others through interpreting both verbal and nonverbal information, social perceptiveness, empathy, persuasion and negotiation; able to select key pieces of a complex idea to express in words, sounds and images, in order to build shared understanding

Ethical reasoning

Ethical reasoning includes judgments of right and wrong, good and bad, related to human conduct especially concerning matters of justice, fairness, equity and social responsibility. Value systems, both culturally inherited and different from students' own experiences, inform the deliberations regarding the quality of life and social goods necessary to employ ethical decision-making.

1. Recognize ethical issues
2. Identify one's culturally inherited beliefs through self-awareness and civic identity
3. Understand the different ethical perspectives/concepts and diversity of communities and cultures
4. Apply beliefs and ethical perspectives
5. Demonstrate the impact of ethical decision-making on civic contexts and structures

Global and cultural responsiveness and agility

Global and cultural responsiveness and agility requires (1) suspension of judgment in valuing interactions with culturally different others and (2) empathic and flexible responsiveness to unfamiliar ways of being, recognizing that all actions have correlative intercultural effects. This competency's primary goal, achievable only after several courses with this competency, is for students to advance equity and justice on local and global levels, well-informed by historical and political contexts.

1. Demonstrate understanding of relevant historical, cultural and political contexts
2. Compare and contrast practical and ideological differences among cultures
3. Show appropriate contexts and methods for suspending value judgments

4. Demonstrate capacity for empathy
5. Demonstrate sensibility to actions' consequent reciprocal reactions

Information literacy

Information literacy is a set of integrated abilities to solve problems and generate new knowledge that encompasses recognizing an information need; critically identifying, locating and evaluating appropriate resources; and responsibly and effectively synthesizing, applying and sharing information.

1. Recognize an information need and determine extent and type of information needed
2. Identify and locate appropriate sources
3. Critically evaluate information and its sources
4. Effectively synthesize, apply and share information to accomplish a specific purpose
5. Demonstrate understanding of relevant legal and ethical issues for information use

Problem solving (critical and creative)

Problem solving is the process of designing, evaluating and implementing approaches to open-ended questions in order to achieve a desired outcome or goal, based on both (1) the comprehensive exploration of issues, ideas, artifacts and events before accepting or formulating an opinion or conclusion and (2) the synthesis of ideas, images or expertise, and imaginative thinking characterized by innovation, divergent thinking and risk-taking.

1. Define complex problems, issues or questions
2. Identify and seek out approaches, information, skills and relevant resources
3. Develop and propose multiple solutions (demonstrating intellectual risk-taking and tolerance for ambiguity)
4. Evaluate potential solutions with awareness of contradictions, competing assumptions and consideration of context
5. Analyze the implications, consequences and outcomes of solutions

Quantitative literacy

Quantitative literacy is the knowledge of mathematical/statistical operations and graphical representations of numerical data; the knowledge of how to represent real-world objects, events, information and problems as symbolic data sets; the ability to recognize which mathematical/statistical operations are applicable to given data sets; and the ability to analyze, interpret and explain the output of mathematical/statistical operations performed by the student or presented in the published literature.

1. Convert information into mathematical/symbolic forms
2. Recognize the appropriate mathematical/statistical operations for the analysis of given information/data sets
3. Perform mathematical/statistical operations

4. Extract the meaning of a quantitative analysis, draw inferences and produce appropriate conclusions
5. Express the rationale for the application of specific operations to specific data sets and the validity of conclusions derived from analyses

REAL initiative

VCU's REAL initiative ensures every VCU undergraduate completes at least one experiential learning course or co-curricular activity that engages them fully in meaningful, hands-on research, scholarship or creative work directly relevant to realizing their personal and professional goals. The initiative is driven and defined by the REAL 3Cs: Connect, Create, Contribute. VCU REAL helps **connect** ideas, communities and resources in order to **create** solutions and new approaches that **contribute** to solving today's most pressing social, scientific and economic challenges. Through a graduation requirement for incoming undergraduate students beginning in fall of 2021 and a thriving community of practice engaging faculty, staff and students from across VCU, REAL leverages a long-standing history and traditions as an engaged, urban public institution to prepare VCU students to make their marks as problem-solvers in a changing world.

For students, VCU REAL also provides access to the Student Opportunity Center (<https://real.vcu.edu/soc/>), a central hub to find experiential learning opportunities, including activities that fulfill the REAL undergraduate graduation requirement (<https://real.vcu.edu/>) such as designated internships, service learning courses, education abroad experiences, collaborative research, peer leadership, interdisciplinary projects and more.

Students interested in learning about the REAL undergraduate graduation requirement and ways to fulfill it within their programs of study should contact their academic advisers. For general information regarding graduation with distinction programs and how REAL can give students an edge as they prepare for their next great journey, contact:

Erin Webster Garrett, Ph.D.
 Assistant vice provost for REAL
 901 W. Franklin St., Suite 115

Accelerated bachelor's-to-master's programs

VCU offers a number of accelerated bachelor's-to-master's degree programs that allow academically talented undergraduate students to earn both degrees in a minimum of five years by taking approved graduate-level courses during the senior year of their undergraduate program. Accelerated bachelor's-to-master's programs must be approved by both the University Undergraduate Curriculum Committee and the University Graduate Council. Descriptions for accelerated programs are presented in the Undergraduate Bulletin and can be viewed on the opportunities tab of the participating programs.

To be eligible to apply for an accelerated bachelor's-to-master's program, undergraduate students must have successfully completed a minimum

of 30 hours of course work at VCU and be in good academic standing with a minimum cumulative GPA of 3.0. Individual programs may require higher academic achievement and/or standardized test scores for admission to accelerated programs. Prospective applicants should refer to the individual program section of the Bulletin for specific information on eligibility criteria and admission process, including application deadlines. Undergraduate students must have departmental approval and must apply for admission to the master's program for a future term prior to beginning their final year of full-time undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Once accepted into an accelerated bachelor's-to-master's program, students may enroll in the shared graduate course work identified in the approved curriculum outlined in this Bulletin (or on the student's plan of study approved at the time of admission). Students may complete a maximum of 12 hours of approved graduate course work during the final year of their undergraduate career, which may be applied to both the undergraduate and graduate degrees, based on the standards specified below. Individual programs may set additional restrictions on the number of graduate credits that can be completed while the student is an undergraduate and applied to both the undergraduate and graduate degrees.

Students in accelerated bachelor's-to-master's programs may not utilize the undergraduate students in graduate courses (<http://bulletin.vcu.edu/graduate/study/undergraduate-students-graduate-classes/>) option to complete more than 12 hours of graduate courses before conferral of the undergraduate degree. Graduate courses at the 600-level that have not been identified as part of the shared course work should not be attempted until the undergraduate degree has been conferred and the student's status has changed from undergraduate to graduate. No graduate-level course work should be taken before the senior year. No undergraduate course work may be counted toward the master's degree.

In order to meet continuance standards, students in accelerated bachelor's-to-master's programs must achieve a minimum grade of 3.0 (B) in each graduate course identified in the approved curriculum in the Bulletin (or the student's plan of study approved at the time of admission) and attempted while in undergraduate status. Students who do not receive a minimum grade of 3.0 (B) in graduate course work taken in undergraduate status will be reviewed for possible dismissal from the accelerated program. Substitutions for any of the shared graduate course work must be approved by the undergraduate and graduate advisers before the last day of add/drop registration of the semester in which the student wishes to take the substituted course(s).

COLLEGE OF ENGINEERING

Since its inception as a school in 1996, the now-College of Engineering at VCU has brought innovative, real-world engineering education to Central Virginia. The college currently teaches nearly 2,000 undergraduate students and approximately 300 graduate students. Students can earn B.S., M.S. and Ph.D. degrees through the departments of Biomedical Engineering, Chemical and Life Science Engineering, Computer Science, Electrical and Computer Engineering, and Mechanical and Nuclear Engineering.

Engineering skills alone do not equal success in the 21st century. The college challenges students to think bigger and actively collaborate with community businesses and students from a wealth of backgrounds – such as graphic design, physics and health care. Cross-disciplinary focus areas include sustainability and energy engineering, micro- and nano-electronic systems, pharmaceutical engineering, mechanobiology and regenerative medicine, security and mining of big data, and device design and development.

Students also benefit from close, personal interactions with faculty and from the many opportunities available for internships, cooperative education and undergraduate research experiences. Interdisciplinary research opportunities are offered through various state-of-the-art facilities, including the college's Nanomaterials Core Characterization Facility, the Institute for Engineering and Medicine, the Wright-Virginia Microelectronics Center, the dean's undergraduate research initiative and the da Vinci Center. To learn more, visit the College of Engineering website (<http://www.egr.vcu.edu/>).

Accreditation

The Biomedical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Chemical and Life Science Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Computer Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Computer Science program is accredited by the Computing Accreditation Commission of ABET, <http://www.abet.org>.

The Electrical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

The Nuclear Engineering option in Mechanical Engineering program is accredited by the Engineering Accreditation Commission of ABET, <http://www.abet.org>.

Degree programs

The College of Engineering offers the following degree programs:

Bachelor of Science

Biomedical Engineering
Chemical and Life Science Engineering
Computer Engineering
Computer Science
Electrical Engineering
Mechanical Engineering

- Mechanical Engineering with a concentration in nuclear engineering

Students also may be admitted under “undeclared engineering” for entrance to the College of Engineering. A field of study can be determined after the first semester. Students in undeclared engineering are subject to the change of major criteria listed by each department.

Master of Science

Biomedical Engineering
Computer Science
Engineering

- Engineering with a concentration in chemical and life science engineering
- Engineering with a concentration in electrical and computer engineering

Mechanical and Nuclear Engineering

Doctor of Philosophy

Biomedical Engineering
Chemical and Life Science Engineering
Engineering

- Engineering with a concentration in chemical and life science engineering
- Engineering with a concentration in computer science
- Engineering with a concentration in electrical and computer engineering

Mechanical and Nuclear Engineering

Pharmaceutical Engineering (offered in conjunction with the School of Pharmacy)

Dual degree

M.D./Ph.D. in Biomedical Engineering in participation with the School of Medicine

Interdisciplinary and cooperative studies degree

M.S. degree through the Commonwealth Graduate Engineering Program

Baccalaureate certificate

Fundamentals of Computing

Post-baccalaureate certificate

Computer Science
Cybersecurity
Data Science

Undergraduate information

Academic policies for undergraduates

Students majoring in biomedical, chemical and life science, computer, electrical, or mechanical engineering must attain a minimum grade of C in all major courses taken. If a student receives a grade below C in any major course, that course must be retaken until the student receives a minimum grade of C. Department chairs may also identify other vital courses (i.e., math, physics) within the major for which a minimum grade of C must be achieved.

College policy of reasonable progress

Minimum major grade point average: Upon completion of 36 or more credit hours at VCU, any student whose major GPA falls below 2.0 will be placed on in-college academic probation and will have an advising hold placed on his/her account. The student must meet with the student advising office and their faculty adviser to determine the courses to be taken the next semester. From that point forward, the student must maintain a semester minimum major GPA of 2.0. Upon failing to meet that standard, the student will be dismissed from the program.

Course failures and withdrawals: A student may attempt to complete each required major course a maximum of three times. When a student does not earn a minimum grade of C on the second attempt to complete the same major course (this will include instances in which the student withdraws from a class), the student will be notified and a hold will be placed on his/her account, prohibiting him/her from registering for classes. The student must meet with the student advising office and his/her faculty adviser to determine the courses to be taken the next semester.

If a student earns any combination of three D, F or W grades in a single required major course (including a grade excluded from the GPA calculation), then the student will be immediately dismissed from the program. A student may appeal one grade within seven business days after grades are posted. This appeal will be considered by a department committee, and a decision will be rendered before the last day of add/drop of the subsequent semester. In the case of exceptional circumstances, the committee may grant the student a fourth attempt to complete the course with a minimum grade of C. If the student does

not earn a minimum grade of C on the fourth attempt, he or she will be immediately dismissed from the program.

All departments in the College of Engineering follow the above general policy of reasonable progress, unless they choose to replace them with more restrictive rules. These rules would be described in the "Special requirements" section of the individual curriculum outline.

Because of the rotating nature of higher level technical electives in the computer science program and the student's planned graduation date, computer science students may not be able to take advantage of the repeat course option offered by the university. Students should be aware of this rotating schedule and plan accordingly.

In some cases, students may be required to take foundation courses as the result of placement tests in order to prepare themselves to enter the required courses in mathematics, sciences or languages. Credit received for these foundation courses does not count toward the baccalaureate degree.

Historical repeat option exclusion

All VCU College of Engineering course subjects are exempt from the historical repeat option; students taking CLSE, CMSC, EGMN, EGRB, EGRE or ENGR courses will not be allowed to file the historical repeat option in the case of a D or F in those courses.

VCU College of Engineering students are allowed to apply the current historical repeat option on their non-engineering courses only.

Graduation requirements

Students in the majors of biomedical, computer, electrical and mechanical engineering must complete a minimum of 130 credit hours to be eligible for the bachelor's degree.

Students in chemical and life science engineering with a concentration in chemical engineering must complete a minimum of 126 credit hours to be eligible for a bachelor's degree.

Students in chemical and life science engineering with a concentration in life science engineering must complete a minimum of 127 credit hours to be eligible for a bachelor's degree.

Students in computer science must complete a minimum of 120 credit hours to be eligible for the bachelor's degree.

Requirements for the bachelor's degrees offered by the College of Engineering (engineering disciplines and computer science) include university undergraduate requirements (refer to the academic regulations (p. 22) section in this bulletin), general education requirements and program-level degree requirements.

Students seeking the bachelor's degree for any of the programs within the College of Engineering (computer science or biomedical, chemical and life science, computer, electrical, or mechanical engineering) are responsible for understanding the specific and unique requirements of the individual programs and must complete all of them to be eligible for the granting of the degree sought.

Cooperative education program

The VCU College of Engineering cooperative education program is an optional experiential learning program in which a student works in an approved, full-time, paid industrial position. The student works two or more semesters starting during the sophomore or junior year to meet

specific learning objectives while gaining practical experience relevant to their major and earning money to offset educational expenses. The employer may prefer for the student to alternate semesters of work and school or to work consecutive semesters. An approved co-op experience can substitute for a departmental internship requirement.

Students interested in co-op must first complete ENGR 395 to prepare them to find a job and succeed in a professional environment. When a student is hired into a co-op position, he or she enrolls in ENGR 398 to maintain student status during work terms. He or she also documents progress toward learning objectives and writes about the learning experience. Following the final work term, the student enrolls in ENGR 498 to document that all co-op program requirements have been satisfied. Upon completion of this course, the student's transcript will indicate that the co-op program has been completed.

Students who meet the following criteria are eligible to begin participating in co-op work terms:

- Earned at minimum 24 credit hours, with at least 12 credit hours completed at VCU
- Good academic standing
- Overall minimum GPA of 2.7
- College of Engineering major
- Completed ENGR 395

Employers may require additional credits, higher GPAs or other criteria for eligibility. Also, because employers make the hiring decisions, VCU cannot guarantee that an eligible student will be hired into a co-op position.

A student may request an exception to the eligibility criteria as soon as they receive a co-op job offer or, at the latest, on the first day of the semester that the student will participate in a work term. All requests must be submitted on a form that can be obtained from the College of Engineering Career Services office. Requests will be considered by a committee, and a decision will be rendered on or before the last day of add/drop of that semester. In the case of exceptional circumstances, the committee may allow the student to enroll in ENGR 398 without meeting all of the eligibility criteria.

For more information about the co-op program, visit the College of Engineering Career Services (<http://www.egr.vcu.edu/careerservices/>) website.

Double major (B.S.) in engineering and physics

This program provides biomedical, chemical and life science, electrical, computer, mechanical, and nuclear engineering majors the opportunity to earn a double major in physics, requiring an additional nine to 17 credits beyond the hours required for the primary engineering major. The requirements for the double major are the same as those in the program description for the Bachelor of Science in Physics. Within the double major, a select number of engineering courses are acceptable substitutes for required physics courses.

The lists below show the total credits and required courses necessary – beyond what can be used as requirements for that major – for students to complete a double major in physics. In addition, the courses that are

used from the primary engineering major toward fulfillment of the physics major are provided.

Biomedical engineering (17 credits): Additional courses are MATH 307, PHYS 301, PHYS 320, PHYS 376, PHYS 380 and PHYZ 320 (one credit).

Courses used that are required for the biomedical engineering major include: EGRB 303 replaces PHYS 340; EGRB 401 and EGRB 402 replace PHYS 450 and PHYS 490; and EGRB 427 counts as an upper-level physics elective.* PHYS 207 and PHYS 208 also are required physics courses, and MATH 310 and STAT 441 count as upper-level physics electives.*

Chemical and life science engineering (13 credits): Additional courses are PHYS 301, PHYS 320, PHYS 376, PHYS 380 and PHYZ 320 (one credit).

Courses used that are required for the chemical or life science engineering major include: CLSE 305 replaces PHYS 340; ENGR 402, ENGR 403, CLSE 402 and CLSE 403 replace PHYS 450 and PHYS 490; and CLSE 301 and CLSE 302 count as upper-level physics electives.* PHYS 207 and PHYS 208 are also required physics courses, and STAT 441 counts as an upper-level physics elective.*

Computer engineering (nine credits): Additional courses are PHYS 301, PHYS 340 and PHYS 380.

Courses used that can be taken to complete the computer engineering major include: EGRE 309 (computer engineering elective) replaces PHYS 376; and ENGR 402, ENGR 403 and one selection from EGRE 404 and EGRE 405 (both) or EGRE 406 and EGRE 407 (both) replace PHYS 450 and PHYS 490. EGRE 306 and EGRE 310 also count as an upper-level physics electives,* and the two remaining credits of upper-level physics electives* can be chosen from EGRE 303, EGRE 307, EGRE 334 and EGRE 521. MATH 307, PHYS 320 and PHYZ 320 (one credit) are required for physics and can be used as technical electives for computer engineering. PHYS 207 and PHYS 208 are also required physics courses.

Electrical engineering (nine credits): Additional courses are PHYS 301, PHYS 340 and PHYS 380.

Courses used that can be taken to complete the electrical engineering major include: EGRE 309 replaces PHYS 376; and ENGR 402, ENGR 403, and one selection from EGRE 404 and EGRE 405 (both) or EGRE 406 and EGRE 407 (both) replace PHYS 450 and PHYS 490. EGRE 303, EGRE 306 and EGRE 310 also count as upper-level physics electives.* PHYS 320 and PHYZ 320 (one credit) are required for physics and can be used as technical electives for electrical engineering. PHYS 207 and PHYS 208 are required physics courses.

Mechanical engineering (13 credits): Additional courses are PHYS 301, PHYS 320, PHYS 376, PHYS 380 and PHYZ 320 (one credit).

Courses used that can be taken to complete the mechanical engineering major include: EGMN 302 replaces PHYS 340; and ENGR 402, ENGR 403, EGMN 402 and EGMN 403 replace PHYS 450 and PHYS 490. Taken together, EGMN 301, EGMN 309, and either STAT 441 or EGMN 351 satisfy the upper-level physics elective requirement.* PHYS 207 and PHYS 208 are required physics courses.

Mechanical engineering majors should consult with an adviser to determine whether any upper-level physics courses can be used to satisfy mechanical engineering technical elective or nuclear engineering elective requirements.

* Any physics/physics-related elective course as listed in the bulletin description for the B.S. in Physics.

With regard to general education requirements, students must fulfill the requirements of their primary engineering major. Any student interested in a physics double major should contact the physics department at (804) 828-1818 or physics@vcu.edu.

Dual degree opportunities

Through a cooperative arrangement between VCU's School of Engineering and Virginia Union University, selected students from VUU may pursue a combined curriculum of undergraduate study leading to a Bachelor of Science in an engineering area from VCU in addition to a baccalaureate from VUU. The objectives of this dual degree program are to prepare diverse professionals in the values, knowledge and skills of both fields to provide an integrated base of competency to serve the commonwealth of Virginia. Students from VUU who successfully complete the dual degree program will receive one of the following degree combinations:

- Bachelor of Science in Physics (VUU) and Bachelor of Science in Electrical Engineering (VCU)
- Bachelor of Science in Physics (VUU) and Bachelor of Science in Mechanical Engineering (VCU)
- Bachelor of Science in Chemistry (VUU) and Bachelor of Science in Chemical and Life Science Engineering with a concentration in chemical engineering (VCU)

Among the many benefits offered by participation in the dual degree program are the following:

- Students will be able to receive two degrees concurrently in less time than it would take them to receive the same degrees sequentially.
- By participating in two distinct programs, with full access to all services provided by each program, students benefit from complementary resources.
- Through their simultaneous and active participation in two programs, students will be able to widen their professional and personal network.

General admission requirements

In order to be eligible for the dual degree program, VUU students must be an accepted and enrolled student in the VUU physics or chemistry program and have not completed more than 60 credit hours at VUU. Prior to the completion of 60 credit hours at VUU, the student must indicate their desire to participate in the dual degree program to the VUU dual degree program liaison and apply for pre-dual degree status in VCU's College of Engineering as a nondegree-seeking student. Once VUU students are enrolled in the required courses as a pre-dual degree status student, they must apply for admission through the VCU Office of Admissions for the dual degree program. An admission decision will be made by the VCU College of Engineering once grades for the introductory courses have posted.

Pre-dual degree status

Students at VUU will be permitted to enroll in the introductory VCU courses below as a nondegree-seeking student before they are admitted into the dual degree program:

- Electrical engineering: EGRE 101 or ENGR 101
- Chemical and life science engineering: CLSE 101 or ENGR 101
- Mechanical engineering: EGMN 102, EGMN 103 and EGMN 190

Admission to the dual degree program is not guaranteed and is subject to the rules in the agreement between VCU and VUU. Students must consult with their VUU advisers to learn if and how the above courses would transfer back to VUU in the event that the student does not enroll into the corresponding dual degree program.

Dual degree status

Students who meet the following criteria will be guaranteed admission to the dual degree program with VCU. Students who do not meet all of the following criteria may still apply for admission to the dual degree program and will be evaluated on a competitive basis.

- Students must present a minimum cumulative VUU GPA of 3.0.
- Students must present a minimum cumulative VCU GPA of 3.0 (if applicable)
- Students must have completed the following courses or their equivalents at any institution with a minimum grade of B (3.0) in each course: MATH 200, MATH 201, PHYS 207, CHEM 101 and CHEZ 101, as well as one of ENGR 101, CLSE 101 or EGRE 101 (for electrical or chemical and life science engineering) or all of EGMN 102, EGMN 103 and EGMN 190 (for mechanical engineering).
- The average grade for the following courses or their equivalents at any institution, if attempted, must be at minimum 3.0*: MATH 211, MATH 301, MATH 307 and PHYS 208.
- The average grade for all attempted engineering and computer science courses, regardless of where they are taken, must be at minimum 3.0.*

*All grade averages mentioned herein are computed from all course work attempted at VUU, VCU and other institutions. For repeated course work, grades for all attempts will be averaged.

Once admitted to the program, students are urged to meet with their advisers at VCU and VUU to review their course of study, keeping in mind the timelines and requirements for each program. Each program is responsible for informing the students in the dual degree program of the courses available to meet degree requirements for each of the programs and that are a part of the agreement.

VCU program residency requirements

To fulfill the dual degree requirement for VCU, VUU students must earn at least 25 percent of the credits required for the degree, including at least 30 of the last 45 credits, at VCU. Students must also earn a minimum of 45 upper-level credits.

VUU program residency requirements

Students must meet all VUU degree and program residency requirements.

Failure to complete

Students who fail to make satisfactory academic progress in either program will be reviewed for dismissal from the dual degree program.

Second baccalaureate degree

VUU graduates who have completed the Bachelor of Science degree in physics or chemistry are welcome to apply to the corresponding VCU College of Engineering program as a second baccalaureate student.

Department of Biomedical Engineering

Henry J. Donahue, Ph.D.

Professor and chair

biomedical.egr.vcu.edu (<https://egr.vcu.edu/departments/biomedical/>)

The Department of Biomedical Engineering offers programs at the baccalaureate, master's and doctoral level.

Biomedical engineering provides in-depth study in a variety of specialization areas including biomedical imaging systems, orthopaedic biomechanics, tissue and cellular engineering, biomaterials, artificial organs, human-computer interfaces, cardiovascular devices, rehabilitation and human factors engineering. The programs allow students to participate in cutting-edge research in one of the nation's most advanced engineering facilities. The department has ongoing collaborations with numerous industries, federal laboratories, the VCU science departments, the university's MCV Campus, the Hunter Holmes McGuire Veterans Affairs Medical Center, the Virginia BioTechnology Research Park and numerous biomedical and clinical programs throughout the VCU Medical Center's MCV Hospitals.

- Biomedical Engineering, Bachelor of Science (B.S.) (p. 87)

Biomedical Engineering, Bachelor of Science (B.S.)

Biomedical engineering applies engineering expertise to analyze and solve problems in biology and medicine in order to enhance health care. Students involved in biomedical engineering learn to work with living systems and to apply advanced technology to the complex problems of medical care. Biomedical engineers work with other health care professionals including physicians, nurses, therapists and technicians toward improvements in diagnostic, therapeutic and health delivery systems. Biomedical engineers may be involved with designing medical instruments and devices, developing medical software, tissue and cellular engineering, developing new procedures or conducting state-of-the-art research needed to solve clinical problems.

There are numerous areas of specialization and course work within biomedical engineering. These include:

1. **Bioinstrumentation:** the application of electronics and measurement techniques to develop devices used in the diagnosis and treatment of disease, including heart monitors, intensive care equipment, cardiac pacemakers and many other electronic devices.
2. **Biomaterials:** the development of artificial and living materials used for implantation in the human body, including those used for artificial heart valves, kidney dialysis cartridges, and artificial arteries, hips and knees.
3. **Biomechanics:** the study of motion, forces and deformations in the human body, including the study of blood flow and arterial disease, forces associated with broken bones and their associated repair mechanisms, mechanisms of blunt trauma including head injuries,

orthopedic systems, and the forces and movement associated with human joints such as the knee and hip.

4. **Tissue and cellular engineering:** the application of biochemistry, biophysics and biotechnology toward the development of new cellular and tissue systems and an understanding of disease processes, including development of artificial skin and organs, cell adherence to artificial materials to prevent rejection by the body, and the development of new genetic cellular systems to treat diseases.
5. **Medical imaging:** the development of devices and systems to image the human body to diagnose diseases, including the development and data processing of the CAT scan, MRI (magnetic resonance imaging), medical ultrasound, X-ray and PET (positron emission tomography).
6. **Rehabilitation and human factors engineering:** the development of devices and prosthetics to enhance the capabilities of disabled individuals, including design of wheelchairs, walkers, artificial legs and arms, enhanced communication aids, and educational tools for people with disabilities.

A unique aspect to the undergraduate biomedical engineering is the practicum series, EGRB 101 and EGRB 301, which involves biomedical engineering students participating in medical rounds at the VCU Medical Center's MCV Hospitals, in medical research laboratories throughout the medical center and the Virginia BioTechnology Research Park, and in medical seminars, case studies and medical laboratories. This unique opportunity is the only one of its kind in the nation and involves the cooperation of the VCU Medical Center, one of the nation's largest and most prestigious medical centers.

Learning outcomes

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Degree requirements for Biomedical Engineering, Bachelor of Science (B.S.)

Course	Title	Hours
General education (p. 77)		
Select 12 credits from general education foundations and 18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements

Technical electives	9
Term Hours:	18
Spring semester	
EGRB 402 Biomedical Engineering Senior Design Studio	3
Open elective	3
Technical electives	9
Term Hours:	15
Total Hours:	131

The minimum total of credit hours required for this degree is 131.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Biomedical Engineering in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 155 credits rather than the 161 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have a head start for pursuing careers in industry or continuing in academia. The M.S. degree provides formal research experience and can lead to expanded job opportunities, greater potential for job advancement and higher starting salaries.

Admission to the program

Minimum qualifications for admittance to the program include completion of 95 undergraduate credit hours including EGRB 303, EGRB 307, EGRB 308, EGRB 310 and EGRB 315; an overall GPA of 3.0; and a GPA of 3.2 in biomedical engineering course work. Successful applicants would enter the program in the fall semester of their senior year.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following the spring of their junior year, but no later than June 15 of that year. A letter of endorsement from a prospective thesis adviser from the biomedical engineering faculty must accompany the application. The GRE is waived for admission to the program. Students who are interested in the accelerated program should consult with the faculty adviser to the biomedical engineering graduate program before they have completed 95 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the

undergraduate biomedical engineering adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Biomedical Engineering degree will be awarded upon completion of a minimum of 131 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of six graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will count as open or technical elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate biomedical engineering courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
EGRB 506	Artificial Organs	3
EGRB 507	Biomedical Electronics and Instrumentation	3
EGRB 509	Microcomputer Technology in the Biomedical Sciences	3
EGRB 511	Fundamentals of Biomechanics	3
EGRB 512	Regenerative Engineering and Medicine	3
EGRB 517	Cell Mechanics and Mechanobiology	3
EGRB 513	Cellular Signal Processing	3
EGRB 521	Human Factors Engineering	3
EGRB 591	Special Topics in Biomedical Engineering	1-4

Recommended plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the senior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Senior year		
Fall semester

Department of Chemical and Life Science Engineering

B. Frank Gupton, Ph.D.

Research professor and chair

[chemical.egr.vcu.edu](https://egr.vcu.edu) (<https://egr.vcu.edu/departments/chemical/>)

Chemical and life science engineering represents the formal interaction of chemical engineering with the life sciences. VCU's Department of Chemical and Life Science Engineering is uniquely poised to bring these two premier disciplines together to form a program distinct in the nation. Programs are offered at the undergraduate and graduate levels.

Life science engineering – with interest areas including stem cell and stem cell-derived tissue engineering, biosciences/biotechnology, cellular engineering, biochips and biosensors, bioinformatics and molecular biocomputing, genetic and protein molecular engineering, environmental life science engineering, and molecular- and cellular-based therapeutics – is the fastest growing of all industries that currently employ engineers.

Chemical engineering and life science engineering share a broad range of common foundational knowledge bases, including the principles of mass and energy balances, transport phenomena and thermodynamics, surface and interfacial science, and reaction science and engineering. Strong academic and research programs in chemical and life science engineering will provide a wealth of exciting professional opportunities for successful graduates of the VCU program.

The bachelor's program offers concentrations in chemical engineering and life science engineering, and a chemical and life science engineering concentration is also available in the Master of Science in Engineering program, as well as the Ph.D. in Engineering program. The CLSE concentrations in the graduate-level programs are designed primarily for students who are interested in applying chemical and engineering principles toward important contemporary topics including process design, metabolic engineering, biosensor and biochip development, high-performance polymers in medicine and energy conversion, polymer

surface science, and environmentally benign polymer processing technologies. Major emphasis is placed on chemical and life science engineering fundamentals with additional emphasis on applied chemistry and life sciences.

- Chemical and Life Science Engineering, Bachelor of Science (B.S.) with a concentration in chemical engineering (p. 91)
- Chemical and Life Science Engineering, Bachelor of Science (B.S.) with a concentration in life science engineering (p. 95)
- Chemical and life science engineering, minor in (p. 98)

Chemical and Life Science Engineering, Bachelor of Science (B.S.) with a concentration in chemical engineering

The department offers a Bachelor of Science in Chemical and Life Science Engineering, and includes a chemical engineering concentration and a life science engineering concentration. Each student must choose the desired concentration upon initial registration.

As part of the B.S. degree in chemical and life science engineering, all students complete an approved internship or cooperative education experience.

Student learning outcomes

Upon completing this program, students will demonstrate:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies
8. An understanding of the hazards associated with physical, chemical and/or biological processes

Special requirements

Students must receive a grade of C in all engineering courses in order to graduate. Minimum grades of C in CLSE 115, CLSE 201 and CLSE 202 are required before students may take additional CLSE courses. After passing CLSE 202 with a minimum grade of C, students are allowed to continue with one D grade in any CLSE course. They must retake that course in order to graduate, but may continue taking other CLSE courses. Students are not allowed to continue with two grades of D in CLSE courses and

must successfully retake at least one of those courses with a minimum grade of C to take additional 300- and 400-level CLSE courses.

MATH 201	Calculus with Analytic Geometry II	4
MATH 301	Differential Equations	3
MATH 307	Multivariate Calculus	4
PHIL 201	Introduction to Ethics (satisfies general education BOK for humanities/fine arts and AOI for diversities in the human experience)	3
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
PHYS 208	University Physics II	5
STAT 441	Applied Statistics for Engineers and Scientists	3
Technical electives (Select 300+-level science, math, business or management courses as described below.)		9
Total Hours		126

The minimum number of credit hours required for this degree is 126.

Technical electives

Technical electives are satisfied by completing courses that meet all of the following criteria:

1. 300 level or greater
2. Offered in BIOC, BIOL, BIOZ, BNFO, BUSN, CHEM, CHEZ, ENVS, ENVZ, FRSC, FRSZ, INNO, LFSC, MATH, MEDC, MGMT, OPER, PHIS, or STAT
3. Three or more credit hours
4. Not otherwise required for the major by the effective Bulletin

Other courses may be used to satisfy the technical elective requirements with prior written approval from the department chair.

Engineering electives

Engineering electives are satisfied by completing courses that meet all of the following criteria:

1. 300-level or greater
2. Offered in the College of Engineering (CLSE, CMSC, EGMN, EGRB, EGRC, EGRE, EGRM, EGRN or ENGR)
3. Offered for three or more credit hours
4. Not otherwise required for the major by the effective Bulletin

Note: A minimum of four credits of ENGR 497 must be completed to use the course to satisfy an engineering elective requirement. Other courses may be used to satisfy the engineering elective requirements with prior written approval from the department chair.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I	1
CLSE 101	Introduction to Engineering	3
MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4

Engineering elective (300+ level)		3

Engineering elective (300+ level)	3
Term Hours:	15
Total Hours:	126

The minimum number of credit hours required for this degree is 126.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Chemical and Life Science Engineering in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 150 credits rather than the 156 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have a head start for pursuing careers in industry or continuing in an academic setting. The M.S. degree provides formal research experience and can lead to expanded job opportunities, greater potential for job advancement and higher starting salaries.

Admission to the program

The minimum qualifications for admittance to the program include completion of 99 undergraduate credit hours including CLSE 301, CLSE 302, CLSE 305, CLSE 312, and CLSE 320; a minimum overall GPA of 3.0; and a GPA of 3.2 in chemical and life science engineering (CLSE) course work. Successful applicants will enter the program in the fall semester of their senior year.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following the spring of their junior year, but no later than June 15 of that year. One reference letter from a chemical and life science engineering faculty member must accompany the application. The GRE is waived for admission to the program. Students who are interested in the accelerated program should consult with the graduate program director before they have completed 99 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the CLSE undergraduate program director and the CLSE graduate program director.

Degree requirements

The Bachelor of Science in Chemical and Life Science Engineering degree will be awarded upon completion of a minimum of 126 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of six graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will apply as required major electives or open elective credits (engineering electives) for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

Examples of graduate chemical and life science engineering courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
CLSE 543	Advanced Reaction Engineering	3
CLSE 544	Applied Transport Phenomena	3
CLSE 549	Process Biotechnology	3
CLSE 551	Nanotoxicology	3
CLSE 560	Protein Engineering	3
CLSE 561	Stem Cell Engineering	3
CLSE 562	Advanced Systems Biology Engineering	3
CLSE 563	Metabolic Engineering	3
CLSE 570	Molecular Physiology and Microanatomy for Chemical and Life Science Engineering	4
CLSE 575	Nanotechnology in Life Science and Engineering	3
CLSE 580	Sustainable Chemical Engineering	3
ENGR 591	Special Topics in Engineering	1-4

Chemical and Life Science Engineering, Bachelor of Science (B.S.) with a concentration in life science engineering

The department offers a Bachelor of Science in Chemical and Life Science Engineering, and includes a chemical engineering concentration and a life science engineering concentration. Each student must choose the desired concentration upon initial registration.

As part of the B.S. degree in chemical and life science engineering, all students complete an approved internship or cooperative education experience.

Student learning outcomes

Upon completing this program, students will demonstrate:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

8. An understanding of the hazards associated with physical, chemical and/or biological processes

Special requirements

Students must receive a grade of C in all engineering courses in order to graduate. Minimum grades of C in CLSE 115, CLSE 201 and CLSE 202 are required before students may take additional CLSE courses. After passing CLSE 202 with a minimum grade of C, students are allowed to continue with one D grade in any CLSE course. They must retake that course in order to graduate, but may continue taking other CLSE courses. Students are not allowed to continue with two grades of D in CLSE courses and must successfully retake at least one of those courses with a minimum grade of C to take additional 300- and 400-level CLSE courses.

Department of Computer Science

Krzysztof J. Cios, Ph.D.

Professor and chair

egr.vcu.edu/departments/computer (<https://egr.vcu.edu/departments/computer/>)

The Department of Computer Science offers undergraduate and graduate programs. The Bachelor of Science in Computer Science is a rigorous, highly concentrated curriculum of computer science courses. It includes advanced study in several important areas of computer science and provides a strong foundation in this discipline. Every course is taught by full-time faculty members who also serve as advisers to both undergraduate and graduate students.

The master's degree program emphasizes continuing self-development of individuals currently engaged in science-, technology- and engineering-related fields. It prepares persons who have completed undergraduate majors in these fields for entry into careers in areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program. The program offers courses in a wide range of areas in computer science, including machine learning,

artificial intelligence, cybersecurity and cloud computing, data mining, bioinformatics, and medical informatics.

- Computer Science, Bachelor of Science (B.S.) (p. 99)
- Computer Science, Bachelor of Science (B.S.) with a concentration in cybersecurity (p. 103)
- Computer Science, Bachelor of Science (B.S.) with a concentration in data science (p. 107)
- Computer Science, Bachelor of Science (B.S.) with a concentration in software engineering (p. 111)
- Computer science, minor in (p. 117)
- Computer Science, Certificate in (Post-baccalaureate undergraduate certificate) (p. 116)
- Fundamentals of Computing (Baccalaureate certificate) (p. 116)

Computer Science, Bachelor of Science (B.S.)

The Bachelor of Science in Computer Science is built on a rigorous, highly concentrated, accredited curriculum of computer science courses, and includes concentrations in cybersecurity, data science and software engineering. The program provides a strong foundation in the discipline and includes advanced study in several important areas of computer science.

The degree requires a minimum of 120 credit hours and includes undergraduate requirements, general education requirements and computer science major requirements.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. Apply computer science theory and software development fundamentals to produce computing-based solutions

Special requirements

Students must receive a minimum grade of C in all computer science courses in order to graduate.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Computer Science in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 150 credits necessary if the two degrees are pursued separately.

The program is designed to develop skills and educate computer science students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the

theoretical and applied aspects of computer science are emphasized in this program.

Admission to the program

Minimum qualifications for admittance to the program include completion of 30 undergraduate credit hours including six computer science courses CMSC 255 (<http://bulletin.vcu.edu/search/?P=CMSC%20255>), CMSC 256 (<http://bulletin.vcu.edu/search/?P=CMSC%20256>), CMSC 257 (<http://bulletin.vcu.edu/search/?P=CMSC%20257>), CMSC 302 (<http://bulletin.vcu.edu/search/?P=CMSC%20302>), CMSC 303 (<http://bulletin.vcu.edu/search/?P=CMSC%20303>) and CMSC 311 (<http://bulletin.vcu.edu/search/?P=CMSC%20311>); an overall GPA of 3.0; and a GPA of 3.4 in the six courses identified above. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with the faculty advisers to both the undergraduate and graduate computer science programs before they have completed the six undergraduate courses listed above. By the end of their junior year, undergraduate students must secure approval for joining the accelerated program from the undergraduate program director for computer science. Students must have approval from the undergraduate program director to participate in an accelerated program and must apply for admission to the master's program immediately following the spring of their junior year, but no later than May 31 of that year, prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study.

Three reference letters (including one from the computer science undergraduate program director and at least one more from a computer science faculty member) must accompany the application. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, with the minimum major GPA of 3.2, students are fully admitted to the master's program. To graduate with the M.S. in Computer Science, students will meet graduation requirements of the degree as presented in the bulletin that is effective at the time of their full admission to the master's program.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "[Satisfactory academic progress \(http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/\)](http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate computer science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Computer Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. At most, six of these graduate credits will substitute for open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate computer science courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours

Computer Science, Bachelor of Science (B.S.) with a concentration in cybersecurity

The Bachelor of Science in Computer Science is built on a rigorous, highly concentrated, accredited curriculum of computer science courses, and includes concentrations in cybersecurity, data science and software engineering. The program provides a strong foundation in the discipline and includes advanced study in several important areas of computer science.

The degree requires a minimum of 120 credit hours and includes undergraduate requirements, general education requirements and computer science major requirements.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. Apply computer science theory and software development fundamentals to produce computing-based solutions

Special requirements

Students must receive a minimum grade of C in all computer science courses in order to graduate

Degree requirements for Computer Science, Bachelor of Science (B.S.) with a concentration in cybersecurity

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Computer Science in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 150 credits necessary if the two degrees are pursued separately.

The program is designed to develop skills and educate computer science students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

Admission to the program

Minimum qualifications for admittance to the program include completion of 30 undergraduate credit hours including six computer science courses CMSC 255 ([http://bulletin.vcu.edu/search/?P=CMSC %20255](http://bulletin.vcu.edu/search/?P=CMSC%20255)), CMSC 256 ([http://bulletin.vcu.edu/search/?P=CMSC %20256](http://bulletin.vcu.edu/search/?P=CMSC%20256)), CMSC 257 ([http://bulletin.vcu.edu/search/?P=CMSC %20257](http://bulletin.vcu.edu/search/?P=CMSC%20257)), CMSC 302 ([http://bulletin.vcu.edu/search/?P=CMSC %20302](http://bulletin.vcu.edu/search/?P=CMSC%20302)), CMSC 303 ([http://bulletin.vcu.edu/search/?P=CMSC %20303](http://bulletin.vcu.edu/search/?P=CMSC%20303)) and CMSC 311 ([http://bulletin.vcu.edu/search/?P=CMSC %20311](http://bulletin.vcu.edu/search/?P=CMSC%20311)); an overall GPA of 3.0; and a GPA of 3.4 in the six courses identified above. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with the faculty advisers to both the undergraduate and graduate computer science programs before they have completed the six undergraduate courses listed above. By the end of their junior year, undergraduate students must secure approval for joining the accelerated program from the undergraduate program director for computer science. Students must have approval from the undergraduate program director to participate in an accelerated program and must apply for admission to the master's program immediately following the spring of their junior year, but no later than May 31 of that year, prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will

be the next available admission term following the last semester of undergraduate study.

Three reference letters (including one from the computer science undergraduate program director and at least one more from a computer science faculty member) must accompany the application. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, with the minimum major GPA of 3.2, students are fully admitted to the master's program. To graduate with the M.S. in Computer Science, students will meet graduation requirements of the degree as presented in the bulletin that is effective at the time of their full admission to the master's program.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate computer science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Computer Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. At most, six of these graduate credits will substitute for open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate computer science courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Computer Science, Bachelor of Science (B.S.) with a concentration in data science

The Bachelor of Science in Computer Science is built on a rigorous, highly concentrated, accredited curriculum of computer science courses, and includes concentrations in cybersecurity, data science and software engineering. The program provides a strong foundation in the discipline and includes advanced study in several important areas of computer science.

The degree requires a minimum of 120 credit hours and includes undergraduate requirements, general education requirements and computer science major requirements.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. Apply computer science theory and software development fundamentals to produce computing-based solutions

Special requirements

Students must receive a minimum grade of C in all computer science courses in order to graduate

Degree requirements for Computer Science, Bachelor of Science (B.S.) with a concentration in data science

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
CMSC 255	Introduction to Programming	4

Natural science electives (BIOL, CHEM or PHYS courses that count toward the major in that science)		6

Open electives

Select any course.	3-5
Total Hours	120

1

Select one of the following options:

- Option A: CHEM 101 and CHEZ 101 and CHEM 102 and CHEZ 102
- Option B: PHYS 207 and PHYS 208
- Option C: BIOL 151 and BIOZ 151 and BIOL 152 and BIOZ 152

The minimum number of credit hours required for this degree is 120.

Approved humanities electives

Course	Title	Hours
Select six credits from the following programs or subject areas:		
	African-American studies	
	American studies	
	Anthropology	
	School of the Arts	
	English	
	Foreign language	
	History	
	Philosophy	
	Psychology	
	Religious studies	
	Social work	
	Sociology	
	Urban studies	

Some courses in other programs (including most honors modules and other courses that focus on human behavior, communication and/or social interaction) may be counted toward this requirement with departmental approval.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
CMSC 255	Introduction to Programming	4

Term Hours:		14
Total Hours:		120-122

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Computer Science in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 150 credits necessary if the two degrees are pursued separately.

The program is designed to develop skills and educate computer science students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

Admission to the program

Minimum qualifications for admittance to the program include completion of 30 undergraduate credit hours including six computer science courses CMSC 255 (<http://bulletin.vcu.edu/search/?P=CMSC%20255>), CMSC 256 (<http://bulletin.vcu.edu/search/?P=CMSC%20256>), CMSC 257 (<http://bulletin.vcu.edu/search/?P=CMSC%20257>), CMSC 302 (<http://bulletin.vcu.edu/search/?P=CMSC%20302>), CMSC 303 (<http://bulletin.vcu.edu/search/?P=CMSC%20303>) and CMSC 311 (<http://bulletin.vcu.edu/search/?P=CMSC%20311>); an overall GPA of 3.0; and a GPA of 3.4 in the six courses identified above. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the

minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with the faculty advisers to both the undergraduate and graduate computer science programs before they have completed the six undergraduate courses listed above. By the end of their junior year, undergraduate students must secure approval for joining the accelerated program from the undergraduate program director for computer science. Students must have approval from the undergraduate program director to participate in an accelerated program and must apply for admission to the master's program immediately following the spring of their junior year, but no later than May 31 of that year, prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study.

Three reference letters (including one from the computer science undergraduate program director and at least one more from a computer science faculty member) must accompany the application. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, with the minimum major GPA of 3.2, students are fully admitted to the master's program. To graduate with the M.S. in Computer Science, students will meet graduation requirements of the degree as presented in the bulletin that is effective at the time of their full admission to the master's program.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "[Satisfactory academic progress \(http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/\)](http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate computer science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Computer Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. At most, six of these graduate credits will substitute for open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate computer science courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
Use course picker to select shared courses. Maximum for shared credits is 12.

Computer Science, Bachelor of Science (B.S.) with a concentration in software engineering

The Bachelor of Science in Computer Science is built on a rigorous, highly concentrated, accredited curriculum of computer science courses, and includes concentrations in cybersecurity, data science and software engineering. The program provides a strong foundation in the discipline

and includes advanced study in several important areas of computer science.

The degree requires a minimum of 120 credit hours and includes undergraduate requirements, general education requirements and computer science major requirements.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Analyze a complex computing problem and apply principles of computing and other relevant disciplines to identify solutions
2. Design, implement and evaluate a computing-based solution to meet a given set of computing requirements in the context of the program's discipline
3. Communicate effectively in a variety of professional contexts
4. Recognize professional responsibilities and make informed judgments in computing practice based on legal and ethical principles
5. Function effectively as a member or leader of a team engaged in activities appropriate to the program's discipline
6. Apply computer science theory and software development fundamentals to produce computing-based solutions

Special requirements

Students must receive a minimum grade of C in all computer science courses in order to graduate. graduate

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Computer Science in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 150 credits necessary if the two degrees are pursued separately.

The program is designed to develop skills and educate computer science students to be major contributors in the computing industry. The graduate program in computer science provides state-of-the-art education through the use of didactic courses to those students who wish to further their knowledge and careers within the computing industry. The program emphasizes continuing self-development and broadening of the knowledge of individuals currently engaged in science, technology and engineering-related fields. It also prepares persons who have completed undergraduate majors in these fields for entry into a career in the numerous areas that use computing technology. Both the theoretical and applied aspects of computer science are emphasized in this program.

Admission to the program

Minimum qualifications for admittance to the program include completion of 30 undergraduate credit hours including six computer science courses CMSC 255 (<http://bulletin.vcu.edu/search/?P=CMSC%20255>), CMSC 256 (<http://bulletin.vcu.edu/search/?P=CMSC%20256>), CMSC 257 (<http://bulletin.vcu.edu/search/?P=CMSC%20257>), CMSC 302 (<http://bulletin.vcu.edu/search/?P=CMSC%20302>), CMSC 303 (<http://bulletin.vcu.edu/search/?P=CMSC%20303>) and CMSC 311 (<http://bulletin.vcu.edu/search/?P=CMSC%20311>); an overall GPA of 3.0; and a GPA of 3.4 in the six courses identified above. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with the faculty advisers to both the undergraduate and graduate computer science programs before they have completed the six undergraduate courses listed above. By the end of their junior year, undergraduate students must secure approval for joining the accelerated program from the undergraduate program director for computer science. Students must have approval from the undergraduate program director to participate in an accelerated program and must apply for admission to the master's program immediately following the spring of their junior year, but no later than May 31 of that year, prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study.

Three reference letters (including one from the computer science undergraduate program director and at least one more from a computer science faculty member) must accompany the application. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, with the minimum major GPA of 3.2, students are fully admitted to the master's program. To graduate with the M.S. in Computer Science, students will meet graduation requirements of the degree as presented in the bulletin that is effective at the time of their full admission to the master's program.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "[Satisfactory academic progress \(http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/\)](http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate computer science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Computer Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. At most, six of these graduate credits will substitute for open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate computer science courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
Use course picker to select shared courses. Maximum for shared credits is 12.		
CMSC 501	Advanced Algorithms	3
CMSC 502	Parallel Algorithms	3
CMSC 510	Regularization Methods for Machine Learning	3
CMSC 516	Advanced Natural Language Processing	3
CMSC 525	Introduction to Software Analysis, Testing and Verification	3
CMSC 591	Topics in Computer Science	3
Total Hours		18

Recommended course sequence/plan of study for students pursuing a thesis master's

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
CMSC 312	Introduction to Operating Systems	3

CMSC 401	Algorithm Analysis with Advanced Data Structures	3
Approved natural science elective (BIOL, CHEM or PHYS course that counts toward the major in that science)		3
Select one of the following:		4-5
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I	
PHYS 207	University Physics I	
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I

Computer Science, Certificate in (Post-baccalaureate undergraduate certificate)

The Certificate in Computer Science is available to students who have received bachelor's degrees in other subject areas and wish to pursue the study of computer science. Additionally students must have completed one semester of calculus or discrete mathematics (MATH 200 or MATH 211 or equivalent with a minimum grade of B) and maintained a minimum overall GPA of 3.0 in their bachelor's degree for acceptance into the program. Students who receive the certificate through this program equip themselves for many professional opportunities in the scientific community and with government agencies. The certificate is also designed to allow interested students to prepare for graduate study in computer science.

This program requires a minimum of 30 credits in computer science at the 200 level or higher. Appropriate course work completed before or after receiving the bachelor's degree can be applied to the certification with approval.

Course	Title	Hours
Required courses		
CMSC 255	Introduction to Programming	4
CMSC 256	Data Structures and Object Oriented Programming	4
CMSC 257	Computer Systems	4
CMSC 302	Introduction to Discrete Structures	3
CMSC 311	Computer Organization	3
CMSC 401	Algorithm Analysis with Advanced Data Structures	3

Additional courses

The remaining three courses must be at a 300-level or higher in computer science with at least one of these courses at the 400-level (including CMSC 506 or 508). 9

Total Hours 30

The minimum total of credit hours required for this certificate is 30.

For additional specializations, check departmental requirements.

Upon successful completion of all course work in five years or less, with a minimum GPA of 2.5, the student is awarded the computer science certificate. Successful completion of this program does not guarantee admission to the master's degree program in computer science.

Fundamentals of Computing, Certificate in (Baccalaureate certificate)

The Certificate in Fundamentals of Computing will prepare non-computer science students for employment that requires a solid understanding of computing, including data analysis, data visualization and data security. This baccalaureate certificate runs concurrently with a student's major and is not a stand-alone program.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Analyze a problem and create a software solution for the problem
2. Discuss networks and cybersecurity
3. Apply knowledge of data-focused systems to create and use data and able to discuss the analysis of data
4. Apply knowledge of the software engineering process to build and test a website

Admission requirements

All applicants to the certificate are required to meet the admission requirements of VCU and submit a change of major form. The admission requirements outlined below will apply to all students.

- Applicants must have successfully completed 30 credit hours.
- Applicants must have a minimum GPA of 2.5.
- Applicants must have a declared major.

Curriculum requirements

The curriculum will prepare students to integrate digital technology knowledge with other disciplines. Students will have cross-disciplinary skills and experience across two dimensions as well as deep knowledge in their primary field of study with strong ability in digital technology areas such as data analysis, visualization, and cybersecurity. The curriculum focuses on computational problem-solving with an emphasis on interpreting and communicating the increasingly important information collected in the digital world along with the essential cybersecurity knowledge to appropriately secure data.

Degree requirements

Course	Title	Hours
CMSC 210	Computers and Programming	3
CMSC 320	Software Engineering and Web Development	3

CMSC 330	Data Science Skills	3
CMSC 340	Cybersecurity Skills	3
Total Hours		12

The minimum total of credit hours required for this certificate is 12.

Computer science, minor in

The minor in computer science consists of at least 18 credits in computer science, including the following:

Course	Title	Hours
CMSC 255	Introduction to Programming	4
or EGRE 245	Engineering Programming	
CMSC 256	Data Structures and Object Oriented Programming	3-4
or EGRE 347	Applied Object-oriented Programming	
Select nine upper-level credits in computer science		9
Select at least two additional credits in computer science at the 200 level or above. ¹		2
Total Hours		18-19

1

The following courses will not count toward the computer science minor: CMSC 210, CMSC 320, CMSC 330 and CMSC 340.

All courses required for the minor must be completed with a minimum grade of C.

Department of Electrical and Computer Engineering

Erdem Topsakal, Ph.D.

Professor and chair

[electrical-and-computer.egr.vcu.edu \(https://egr.vcu.edu/departments/electrical/\)](https://egr.vcu.edu/departments/electrical/)

The Department of Electrical and Computer Engineering prepares students for highly competitive, national placement in electrical and computer engineering employment and graduate education by providing a thorough grounding in electrical science and design, together with a sound foundation in mathematics, basic sciences and life skills.

The department offers baccalaureate degrees in computer engineering and electrical engineering, in addition to minors in both areas, as well as the option to choose course work appropriate for a pre-medicine or pre-dentistry curriculum. An electrical and computer engineering track is available in the Master of Science in Engineering as well as the Ph.D. in Engineering. The track is designed to prepare students for practice, research and/or teaching of electrical and computer engineering at the advanced level by providing intensive preparation for professional practice in the microelectronics, nanoelectronics, computer engineering, and controls and communications aspects of electrical and computer engineering. At the advanced level, this track prepares individuals to perform original, leading-edge research in the broad areas of microelectronics, nanoelectronics, controls and communications, and computer engineering.

The curricula of the department provide a strong foundation in the fundamentals of the profession, including engineering problem-solving,

breadth in the major facets of the profession and the opportunity to specialize in today's critical areas of computer engineering, communication systems and microelectronics. Graduates will be well prepared for constant technological change and growth through lifelong learning.

- Computer Engineering, Bachelor of Science (B.S.) (p. 117)
- Electrical Engineering, Bachelor of Science (B.S.) (p. 121)
- Computer engineering, minor in (p. 125)
- Electrical engineering, minor in (p. 125)

Computer Engineering, Bachelor of Science (B.S.)

Computer engineers are responsible for developing the powerful computer systems that have become a part of our everyday life. Applications for computer engineering span the spectrum from high-performance, general-purpose computing systems such as desktop workstations used in all facets of business, to small microprocessors embedded in larger systems and functioning as controllers. These latter applications, known as embedded systems, can be found in control systems for trains, aircraft and automobiles; medical equipment; telecommunications systems; and consumer electronics and appliances. This explosive growth of computer systems in use in almost every new appliance or vehicle has resulted in a strong demand for engineers trained in the development of these systems, and all indications are that this trend will continue for the foreseeable future.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies

Special requirements

Program D grade policy: Students must receive a minimum grade of C in all engineering, computer science, physics, mathematics and all technical electives to graduate.

PHYS 208	University Physics II	5
SPCH 321	Speech for Business and the Professions	3
Open electives		
Select any course.		3
Total Hours		130

The minimum number of credit hours required for this degree is 130.

Capstone project (four credits)

The program culminates in the capstone project. In order to prepare for the appropriate focus area of the capstone project, students, with the help of their academic adviser, should plan a course of study beginning in the fall semester of their junior year.

Technical electives (17 credits)

The 17 credit hours in the junior and senior year must be chosen from the approved lists. The following criteria must be met:

- At least eight credit hours must come from the electrical and computer engineering or computer science areas
- At least three credit hours must come from outside the electrical and computer engineering and computer science areas
- Courses not from the approved lists must be approved by the adviser and department chair.
- Courses must be technical courses at the 300 level or above.
- No more than three credit hours may come from independent study courses.
- If a student wants to apply ENGR 497 toward their technical electives, a minimum of four credit hours must be earned.
- A maximum of nine credits of ENGR 410, ENGR 497 and independent study courses may be used toward technical electives.

Note: Some of the listed courses may have prerequisites that do not count as technical electives.

The minimum number of credit hours required for this degree is 130.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. in Computer Engineering and M.S. in Engineering with a concentration in electrical and computer engineering in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to six credit hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 154 credits rather than the 160 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have a head start for pursuing careers in industry or continuing in academia. The M.S. degree provides formal research experience and can lead to expanded job opportunities, greater potential for job advancement and higher starting salaries.

Admission to the program

Students in VCU's B.S. in Computer Engineering program can apply to this accelerated program. Minimum qualifications for admittance to the program include the following:

1. Completion of 97 undergraduate credits, including the prerequisite courses for the capstone project and a minimum of 11 courses from the major requirements (p. 117)
2. A minimum overall GPA of 3.0 and a minimum GPA of 3.2 in major course work

Students who are interested in the accelerated program should consult with the graduate director before they have completed 97 undergraduate credits.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following the spring semester of their junior year, but no later than June 15 of that year. A reference letter from a computer engineering faculty member must accompany the application.

Successful applicants will enter the accelerated program in the fall semester of their senior year and start the M.S. program in the next term immediately following the last semester of undergraduate study. The GRE is waived for the admission to the M.S. Additionally, these students must:

1. Fulfill all requirements for the B.S. degree in computer engineering at VCU
2. Maintain a minimum major GPA of 3.2 and minimum overall GPA of 3.0
3. Complete a minimum of six credits of graduate course work in their senior year

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the ECE undergraduate program director and the ECE graduate program director.

Degree requirements

The Bachelor of Science in Computer Engineering degree will be awarded upon completion of a minimum of 130 credits and the satisfactory completion of all undergraduate degree requirements as presented in the Undergraduate Bulletin (p. 117).

A maximum of six graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will apply as required major electives or open elective credits (engineering electives) for the undergraduate degree. These courses are shared credits

with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

Examples of graduate engineering courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
EGRE 521	Advanced Semiconductor Devices	3
EGRE 525	Fundamentals of Photonics Engineering	3
EGRE 526	Computer Networks and Communications	3
EGRE 531	Multicore and Multithreaded Programming	3
EGRE 532	GPU Computing	3
EGRE 535	Digital Signal Processing	3
EGRE 540	RF Communications and Antennas	3
EGRE 541	Medical Devices	3
EGRE 553	Industrial Automation	3
EGRE 554	Advanced Industrial Automation	3
EGRE 555	Dynamics and Multivariable Control I	3
EGRE 573	Sustainable and Efficient Power Systems	3
EGRE 591	Special Topics in Electrical and Computer Engineering	1-4

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the senior year.

Course	Title	Hours

EGRE, ENGR, EGRB, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM at 500-level or above, approved by the adviser

Electrical Engineering, Bachelor of Science (B.S.)

The profession of electrical engineering touches all aspects of our lives in that electrical engineers design and fabricate devices and systems critical in applications such as computing, communications, health care, manufacturing and automation, power generation and utilization, transportation, and entertainment. An element very important to these and many other applications is the microelectronic device or system.

In the sub-area of microelectronics, electrical engineers design and fabricate electronic materials such as semiconductors, conductors and superconductors used in the manufacture of electronic devices. As a natural progression, electrical engineers design and fabricate electronic devices such as transistors, which control or modulate the flow of energy; sensors of light, mechanical force, chemicals, etc.; electromagnetic radiation sources such as lasers, light emitting diodes and microwave power sources. Following this progression, we find electrical engineers designing and fabricating integrated circuits such as microprocessors and memory elements; flat-panel displays, etc., which are found in applications ranging from supercomputers to watches, clocks and toys. Further in this progression we find electrical engineers designing and fabricating today's and tomorrow's computers.

Computer systems and application-specific integrated circuits are the elements that enable the existence of today's communication systems, such as the Internet, satellite systems, telemedicine, wired and wireless (cellular) telephones, along with standard and high definition television. Additionally, along with sensors, microwave power sources and actuators, they permit our present and future automated manufacturing lines, air and traffic control systems, and automotive safety and traffic control through collision avoidance radar systems, antilocking brake systems, air bag actuators, automatic traffic routing and the "smart highway" of the future.

Electrical engineers play an ever increasing role in the design and building of major facets of today's and tomorrow's health care systems and medical research through the application of microelectronic instrumentation and diagnostic tools such as MRI and CAT scan systems. The field of electrical engineering truly permeates every facet

of our lives and thus provides excellent employment opportunities to the general practitioner or specialist in more than 35 different subspecialties.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. Apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. Communicate effectively with a range of audiences
4. Recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. Function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. Develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. Acquire and apply new knowledge as needed, using appropriate learning strategies

Special requirements

Program D grade policy: Students must receive a minimum grade of C in all engineering, computer science, physics, mathematics and all technical electives to graduate.

Degree requirements for Electrical Engineering, Bachelor of Science (B.S.)

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
EGRE 101	Introduction to Engineering	4
EGRE 206	Electric Circuits	4
EGRE 207	Electric Circuits II	4
EGRE 245	Engineering Programming	4
EGRE 246	Advanced Engineering Programming	3
EGRE 254	Digital Logic Design	4
EGRE 303	Electronic Devices	3
EGRE 306	Introduction to Microelectronics	4
EGRE 309	Introduction to Electromagnetic Fields	3
EGRE 310	Electromagnetic Fields and Waves	3
EGRE 335	Signals and Systems	4
EGRE 336	Introduction to Communication Systems	3
EGRE 337	Statistical Information Processing	3
EGRE 364	Microcomputer Systems	4
ENGR 402 & ENGR 403	Senior Design Studio (Seminar) and Senior Design Studio (Seminar)	2

• Additional major requirements		
Select one of the following sequences:		4
EGRE 404 & EGRE 405	Senior Design Studio I (Laboratory/Project Time) and Senior Design Studio II (Laboratory/Project Time)	
EGRE 406 & EGRE 407	Senior Design Studio I - VIP (Laboratory/Project Time) and Senior Design Studio II - VIP (Laboratory/Project Time)	
Technical electives (see list and requirements below)		18
Ancillary requirements		
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I	1
ECON 205	The Economics of Product Development and Markets	3
MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4
MATH 201	Calculus with Analytic Geometry II	4
MATH 301	Differential Equations	3
MATH 307	Multivariate Calculus	4
PHIL 201	Introduction to Ethics (satisfies general education BOK for humanities/fine arts and AOI for diversities in the human experience)	3
PHYS 207	University Physics I (may also satisfy general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
PHYS 208	University Physics II	5
SPCH 321	Speech for Business and the Professions	3
Open electives		
Select any course.		3
Total Hours		130

The minimum number of credit hours required for this degree is 130.

Capstone project (four credits)

The program culminates in the capstone project. In order to prepare for the appropriate focus area of the capstone project, students, with the help of their academic adviser, should plan a course of study beginning in the fall semester of their junior year.

Technical electives (18 credits)

The 18 credit hours in the junior and senior year must be chosen from the approved lists. The following criteria must be met:

- At least 10 credit hours must be from approved electrical engineering electives (with or without lab).
- At least three credit hours must be from approved electives outside electrical engineering.
- Courses not from the approved lists must be approved by the adviser and department chair.

- Courses must be technical courses at the 300-level or above.
- No more than three credit hours may come from independent study courses.
- If a student wants to apply ENGR 497 toward their technical electives, a minimum of four credit hours must be earned.
- A maximum of nine credits of ENGR 410, ENGR 497 and independent study courses may be used toward technical electives.

NOTE: Some of the listed courses may have prerequisites that do not count as technical electives.

Course	Title	Hours
Approved electrical engineering electives with lab		
EGMN 416	Mechatronics	3
EGRE 307	Integrated Circuits	4
EGRE 334	Introduction to Microfabrication	4
EGRE 365	Digital Systems	4
EGRE 426	Computer Organization and Design	3
EGRE 428	Introduction to Integrated Systems Design	2
EGRE 429	Advanced Digital Systems Design	2
EGRE 435	Microscale and Nanoscale Fabrication	4
EGRE 454	Automatic Controls	4
EGRE 535	Digital Signal Processing	3
Approved electrical engineering electives without lab		
EGMN 315	Process and Systems Dynamics	3
EGMN 427	Robotics	3
EGRE 347	Applied Object-oriented Programming	3
EGRE 436	Advanced Microscale and Nanoscale Fabrication	3
EGRE 444	Communication Systems	3
EGRE 455	Control Systems Design	3
EGRE 471	Power System Analysis	3
EGRE 521	Advanced Semiconductor Devices	3
EGRE 525	Fundamentals of Photonics Engineering	3
EGRE 526/CMSC 506	Computer Networks and Communications	3
EGRE 531	Multicore and Multithreaded Programming	3
EGRE 532	GPU Computing	3
EGRE 540	RF Communications and Antennas	3
EGRE 541	Medical Devices	3
EGRE 553	Industrial Automation	3
EGRE 554	Advanced Industrial Automation	3
EGRE 555	Dynamics and Multivariable Control I	3
EGRE 573	Sustainable and Efficient Power Systems	3
ENGR 410	Review of Internship (Completion of internship required)	1
Approved electives outside electrical engineering		
CMSC 312	Introduction to Operating Systems	3
CMSC 355	Fundamentals of Software Engineering	3
CMSC 420	Software Project Management	3
EGMN 309	Material Science for Engineers	3

EGMN 321	Numerical Methods	3
EGRB 407	Physical Principles of Medical Imaging	3
EGRB 408	Advanced Biomedical Signal Processing	3
EGRB 507	Biomedical Electronics and Instrumentation	3
ENGR 497	Vertically Integrated Projects	1,2
MATH 310	Linear Algebra	3
MATH 351	Applied Abstract Algebra	3
PHYS 307	The Physics of Sound and Music	3
PHYS 320	Modern Physics	3
PHYZ 320	Modern Physics Laboratory	1

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I	1
EGRE 101	Introduction to Engineering	4
MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		

Term Hours: 15

Spring semester

EGRE 245	Engineering Programming	4
MATH 201	Calculus with Analytic Geometry II	4
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		

Term Hours: 16

Sophomore year

Fall semester

EGRE 206	Electric Circuits	4
EGRE 246	Advanced Engineering Programming	3
MATH 301	Differential Equations	3
PHYS 208	University Physics II	5
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3

Term Hours: 18

Spring semester

EGRE 207	Electric Circuits II	4
----------	----------------------	---

EGRE 254	Digital Logic Design	4
EGRE 335	Signals and Systems	4
MATH 307	Multivariate Calculus	4

EGRE 310	Electromagnetic Fields and Waves	3
EGRE 336	Introduction to Communication Systems	3
Technical elective		4
Term Hours:		16
Senior year		
Fall semester		
EGRE 404	Senior Design Studio I (Laboratory/Project or Time)	2
EGRE 406	or Senior Design Studio I - VIP (Laboratory/Project Time)	
ENGR 402	Senior Design Studio (Seminar)	1
SPCH 321	Speech for Business and the Professions	3
General education course (select AOI for global perspectives)		3
Technical electives		7
Term Hours:		16
Spring semester		
EGRE 405	Senior Design Studio II (Laboratory/Project or Time)	2
EGRE 407	or Senior Design Studio II - VIP (Laboratory/Project Time)	
ENGR 403	Senior Design Studio (Seminar)	1
General education course (select AOI for creativity, innovation and aesthetic inquiry)		3
Open elective		3
Technical electives		7
Term Hours:		16
Total Hours:		130

The minimum number of credit hours required for this degree is 130.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. in Electrical Engineering and M.S. in Engineering with a concentration in electrical and computer engineering in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count

up to six credit hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 154 credits rather than the 160 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have a head start for pursuing careers in industry or continuing in academia. The M.S. degree provides formal research experience and can lead to expanded job opportunities, greater potential for job advancement and higher starting salaries.

Admission to the program

Students in VCU's B.S. in Electrical Engineering program can apply to this accelerated program. Minimum qualifications for admittance to the program include the following:

1. Completion of 98 undergraduate credits, including the prerequisite courses for the capstone project and a minimum of **12 courses from the major requirements**
2. A minimum overall GPA of 3.0 and a minimum GPA of 3.2 in major course work.

Students who are interested in the accelerated program should consult with the graduate director before they have completed 98 undergraduate credits.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following the spring semester of their junior year, but no later than June 15 of that year. A reference letter from an electrical engineering faculty member must accompany the application.

Successful applicants will enter the accelerated program in the fall semester of their senior year and start the M.S. program in the next term immediately following the last semester of undergraduate study. The GRE is waived for the admission to M.S. Additionally, these students must:

1. Fulfill all requirements for the B.S. degree in electrical engineering at VCU
2. Maintain a minimum major GPA of 3.2 and minimum overall GPA of 3.0
3. Complete a minimum of six credits of graduate course work in their senior year

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the ECE undergraduate program director and the ECE graduate program director.

Degree requirements

The Bachelor of Science in Electrical Engineering degree will be awarded upon completion of a minimum of 130 credits and the satisfactory completion of all undergraduate degree requirements as stated in the **Undergraduate Bulletin**.

A maximum of six graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will apply as required major electives or open elective credits (engineering electives) for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

Examples of graduate engineering courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
EGRE 521	Advanced Semiconductor Devices	3
EGRE 525	Fundamentals of Photonics Engineering	3
EGRE 526	Computer Networks and Communications	3
EGRE 531	Multicore and Multithreaded Programming	3
EGRE 532	GPU Computing	3
EGRE 535	Digital Signal Processing	3
EGRE 540	RF Communications and Antennas	3
EGRE 541	Medical Devices	3
EGRE 553	Industrial Automation	3
EGRE 554	Advanced Industrial Automation	3
EGRE 555	Dynamics and Multivariable Control I	3
EGRE 573	Sustainable and Efficient Power Systems	3
EGRE 591	Special Topics in Electrical and Computer Engineering	1-4

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the senior year.

Course	Title	Hours
Senior year		
Fall semester		
EGRE 404	Senior Design Studio I (Laboratory/Project Time)	2
or EGRE 406	Senior Design Studio I - VIP (Laboratory/Project Time)

Term Hours:		12

¹

EGRE, ENGR, EGRB, EGMN, CMSC, CLSE, PHYS, MATH, OPER, STAT, CHEM at 500-level or above and approved by the adviser

Computer engineering, minor in

The minor in computer engineering consists of completing the following courses (21-22 credits):

Course	Title	Hours
Select one of the following:		
CMSC 255 & CMSC 256	Introduction to Programming and Data Structures and Object Oriented Programming	7
EGRE 245 & EGRE 246	Engineering Programming and Advanced Engineering Programming	
EGRE 254	Digital Logic Design	4
EGRE 364	Microcomputer Systems	3-4
or CMSC 311	Computer Organization	
EGRE 365	Digital Systems	4
EGRE 426	Computer Organization and Design	3
Total Hours		21-22

All courses required for the minor must be completed with a minimum grade of C.

Electrical engineering, minor in

The minor in electrical engineering consists of completing at least 18 credits in electrical engineering courses (EGRE courses and EGMN 315). The courses must include:

Course	Title	Hours
EGRE 206	Electric Circuits	4
EGRE 207	Electric Circuits II	4
Select nine upper-level credits in electrical engineering		9

Select at least one additional credit in electrical engineering	1
Total Hours	18

All courses required for the minor must be completed with a minimum grade of C.

Department of Mechanical and Nuclear Engineering

Gary Tepper, Ph.D.
Professor and chair

[mechanical-and-nuclear.egr.vcu.edu](https://egr.vcu.edu/mechanical-and-nuclear.egr.vcu.edu) (<https://egr.vcu.edu/departments/mechanical/>)

Mechanical engineering is one of the oldest and broadest engineering disciplines. Mechanical engineers design and analyze machines of all types including automobiles, airplanes, rockets, submarines, power generation systems, biomedical instrumentation, robots, manufacturing systems, household appliances and many, many more. In addition to well-known areas such as nuclear energy, nuclear propulsion and nuclear medicine, nuclear engineers are involved in many other applications of nuclear science and technology in fields as diverse as agriculture, industry, homeland security, forensics, environmental protection and even art. The Department of Mechanical and Nuclear Engineering provides quality graduate and undergraduate education through the following degree-granting programs:

- B.S. in Mechanical Engineering (general mechanical engineering curriculum)
- B.S. in Mechanical Engineering (nuclear engineering concentration)
- M.S. in Mechanical and Nuclear Engineering (thesis and non-thesis options, as well as online option)
- Ph.D. in Mechanical and Nuclear Engineering

Current areas of research within the department include but are not limited to energy conversion systems, smart materials, corrosion, medical devices, aerosol science, sensors, radiation detection and measurement, nuclear reactor design, robotics, fluid mechanics, nanotechnology, and biomechanics.

- Mechanical Engineering, Bachelor of Science (B.S.) (p. 126)
- Mechanical Engineering, Bachelor of Science (B.S.) with a concentration in nuclear engineering (p. 129)
- Mechanical engineering, minor in (p. 132)

Mechanical Engineering, Bachelor of Science (B.S.)

Mechanical engineering is one of the oldest and broadest engineering disciplines. Mechanical engineers design and analyze machines of all types, including automobiles, airplanes, rockets, submarines, power generation systems, biomedical instrumentation, robots, manufacturing systems, household appliances and many, many more.

In addition, mechanical engineers design and analyze the energy sources that provide power to machines, fluids that interact with machines and the materials from which machines are constructed. Mechanical engineers also work in cutting-edge fields such as nanotechnology, alternative energy sources and environmentally friendly "green" manufacturing processes. Another important application of mechanical

engineering is in medicine, where artificial organs, surgical tools and drug-delivery systems are vital to human well-being.

Mechanical engineers are in continuous demand by virtually all industries and are also employed by state and federal governments and enjoy one of the highest starting salaries of all college majors. Mechanical engineering graduates can, if they wish, continue their studies and obtain advanced degrees in fields such as business, law, medicine and engineering.

The VCU Department of Mechanical and Nuclear Engineering is the largest in the College of Engineering and offers an accredited B.S. degree in mechanical engineering, including the option of obtaining a major concentration nuclear engineering.

As part of the B.S. degree in mechanical engineering, all students complete an approved internship or cooperative education experience.

Student learning outcomes

Upon completing this program, students will demonstrate:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Special requirements

Students must earn a minimum grade of C in all required engineering courses; in all courses used to satisfy engineering and professional elective requirements; and in the following:

Course	Title	Hours
MATH 200	Calculus with Analytic Geometry I	4
MATH 201	Calculus with Analytic Geometry II	4
MATH 301	Differential Equations	3
MATH 307	Multivariate Calculus	4
PHYS 207	University Physics I	5

Students must maintain a minimum major GPA of 2.0.

Open electives		
Select any course.		3
Total Hours		130

The minimum number of credit hours required for this degree is 130.

Engineering and professional electives

Students must complete a combined total of 12 credits of engineering electives and professional electives. No more than six credits of professional electives may apply toward this total.

Engineering electives

Engineering electives are satisfied by completing courses that meet all four of the following criteria:

1. College of Engineering course (CLSE, CMSC, EGMN, EGRB, EGRE, ENGR)
2. Not otherwise required for the major by the effective bulletin
3. 300-level or greater
4. Three or more credit hours, except for ENGR 497

Note: A minimum of four credits of ENGR 497 must be completed to use this course to meet engineering elective requirements.

A minimum of three credits of engineering electives must come from courses other than CMSC 492, EGMN 492, EGRE 492, ENGR 399, ENGR 492 and ENGR 497. A maximum total of six credits of these same courses may be used as engineering electives as long as they are not being used to satisfy another major requirement.

Professional electives

Professional electives are satisfied by completing courses that meet all four of the following criteria:

1. One of the following course rubrics: ACCT, ANAT, BIOC, BIOL, BIOS, BNFO, BUSN, CHEM, ECON, ENVS, FIRE, HSEP, INFO, INNO, INSC, LFSC, MATH, MGMT, MKTG, NANO, OPER, PHIS, PHYS, STAT, SCMA, VNTR

2. Not otherwise required for the major by the effective bulletin
3. 300-level or greater
4. Three or more credit hours

Other courses may be used to satisfy engineering or professional elective requirements with prior written approval from the department chair.

All courses used to satisfy engineering or professional elective requirements must be completed with a minimum grade of C.

Courses taken at other institutions

Students enrolled in degree programs at VCU must receive prior approval to take courses at other institutions to ensure credits earned concurrently at another institution are accepted for transfer at VCU. After enrolling in the VCU undergraduate mechanical engineering program, a student must receive prior approval to complete any course at another institution, and the following policies apply.

1. A student will not be approved to take an EGMN-equivalent course at another institution in a semester when the VCU course is offered. The department chair may approve an exception to this policy in extraordinary circumstances.
2. A total of no more than two EGMN-equivalent courses can be taken at another institution after enrolling in the VCU mechanical engineering program. The department chair may approve additional courses in exceptional circumstances.
3. A student may not transfer an EGMN-equivalent course from another institution for an EGMN course in which the student has a VCU honor code violation. The department chair may approve an exception to this policy in extraordinary circumstances.
4. Courses other than EGMN-equivalent courses (EGRE, MATH, PHYS, etc.) may be approved to be taken outside of VCU if the student receives prior approval for each course using the appropriate VCU form.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I	1
EGMN 103	Mechanical and Nuclear Engineering Practicum I	1
EGMN 190	Introduction to Mechanical and Nuclear Engineering	1
MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course	video for Focused Inquiry I	
	General education course (select AOI for creativity, innovation and aesthetic inquiry)	3
Term Hours:		16

Spring semester

EGMN 203	Mechanical and Nuclear Engineering Practicum II	1
EGMN 215	Engineering Visualization and Computation	3
MATH 201	Calculus with Analytic Geometry II	4
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course	video for Focused Inquiry II	
Term Hours:		16

Sophomore year

Fall semester

EGMN 102	Engineering Statics	3
EGMN 309	Material Science for Engineers	3
ENGR 395	Professional Development	1
MATH 301	Differential Equations	3
PHYS 208	University Physics II	5
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
Term Hours:		18

Spring semester

EGMN 201	Dynamics and Kinematics	3
EGMN 202	Mechanics of Deformables	3
EGMN 204	Thermodynamics	3
EGRE 206	Electric Circuits	4
MATH 307	Multivariate Calculus	4
Term Hours:		17

Junior year

Fall semester

EGMN 300	Mechanical Systems Design	3
EGMN 301	Fluid Mechanics	3
EGMN 311	Solid Mechanics Lab	1.5
EGMN 321	Numerical Methods	3
EGMN 420	CAE Design	3
STAT 441	Applied Statistics for Engineers and Scientists	3
Term Hours:		16.5

Spring semester

ECON 205	The Economics of Product Development and Markets (satisfies general education BOK for social/behavioral sciences and AOI for global perspectives)	3
EGMN 303	Thermal Systems Design	3
EGMN 312	Thermal Sciences Lab	1.5
EGMN 421	CAE Analysis	3
EGMN 302	Heat Transfer	3
EGMN 315	Process and Systems Dynamics	3
Term Hours:		16.5

Summer semester

ENGR 396	Internship Experience	0
Term Hours:		0
Senior year		
Fall semester		
EGMN 402	Senior Design Studio (Laboratory/Project Time)	2
EGMN 416	Mechatronics	3
ENGR 402	Senior Design Studio (Seminar)	1
ENGR 496	Internship Review	0
General education course (select AOI for diversities in the human experience; recommended to select a course that also satisfies BOK for humanities/fine arts if not already satisfied)		3
Engineering elective		3
Engineering or professional elective		3
Term Hours:		15
Spring semester		
EGMN 403	Senior Design Studio (Laboratory/Project Time)	2
ENGR 403	Senior Design Studio (Seminar)	1
MGMT 310	Managing People in Organizations	3
Engineering elective		3
Engineering or professional elective		3
General education course or open elective (select general education BOK for humanities/fine arts; if all general education requirements are already satisfied, select a open elective)		3
Term Hours:		15
Total Hours:		130

The minimum number of credit hours required for this degree is 130.

Mechanical Engineering, Bachelor of Science (B.S.) with a concentration in nuclear engineering

Mechanical engineering is one of the oldest and broadest engineering disciplines. Mechanical engineers design and analyze machines of all types, including automobiles, airplanes, rockets, submarines, power generation systems, biomedical instrumentation, robots, manufacturing systems, household appliances and many, many more.

In addition, mechanical engineers design and analyze the energy sources that provide power to machines, fluids that interact with machines and the materials from which machines are constructed. Mechanical engineers also work in cutting-edge fields such as nanotechnology, alternative energy sources and environmentally friendly "green" manufacturing processes. Another important application of mechanical engineering is in medicine, where artificial organs, surgical tools and drug-delivery systems are vital to human well-being.

Mechanical engineers are in continuous demand by virtually all industries and are also employed by state and federal governments and enjoy one of the highest starting salaries of all college majors. Mechanical engineering graduates can, if they wish, continue their studies and obtain advanced degrees in fields such as business, law, medicine and engineering.

The VCU Department of Mechanical and Nuclear Engineering is the largest in the College of Engineering and offers an accredited B.S. degree in mechanical engineering, including the option of obtaining a major concentration nuclear engineering. The curriculum for the freshman year is the same with or without the nuclear concentration.

As part of the B.S. degree in mechanical engineering, all students complete an approved internship or cooperative education experience.

Student learning outcomes

Upon completing this program, students will demonstrate:

1. An ability to identify, formulate and solve complex engineering problems by applying principles of engineering, science and mathematics
2. An ability to apply engineering design to produce solutions that meet specified needs with consideration of public health, safety and welfare, as well as global, cultural, social, environmental and economic factors
3. An ability to communicate effectively with a range of audiences
4. An ability to recognize ethical and professional responsibilities in engineering situations and make informed judgments, which must consider the impact of engineering solutions in global, economic, environmental and societal contexts
5. An ability to function effectively on a team whose members together provide leadership, create a collaborative and inclusive environment, establish goals, plan tasks and meet objectives
6. An ability to develop and conduct appropriate experimentation, analyze and interpret data, and use engineering judgment to draw conclusions
7. An ability to acquire and apply new knowledge as needed, using appropriate learning strategies

Special requirements

Students must earn a minimum grade of C in all required engineering courses; in all courses used to satisfy nuclear engineering elective requirements; and in the following:

Course	Title	Hours
MATH 200	Calculus with Analytic Geometry I	4
MATH 201	Calculus with Analytic Geometry II	4
MATH 301	Differential Equations	3
MATH 307	Multivariate Calculus	4
PHYS 207	University Physics I	5

Students must maintain a minimum major GPA of 2.0.

Degree requirements for Mechanical Engineering, Bachelor of Science (B.S.) with a concentration in nuclear engineering

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
EGMN 102	Engineering Statics	3

EGMN 103	Mechanical and Nuclear Engineering Practicum I	1
EGMN 190	Introduction to Mechanical and Nuclear Engineering	1
EGMN 201	Dynamics and Kinematics	3
EGMN 202	Mechanics of Deformables	3
EGMN 203	Mechanical and Nuclear Engineering Practicum II	1
EGMN 204	Thermodynamics	3
EGMN 215	Engineering Visualization and Computation	3
EGMN 300	Mechanical Systems Design	3
EGMN 301	Fluid Mechanics	3
EGMN 302	Heat Transfer	3
EGMN 303	Thermal Systems Design	3
EGMN 309	Material Science for Engineers	3
EGMN 311	Solid Mechanics Lab	1.5
EGMN 312	Thermal Sciences Lab	1.5

EGMN 321	Numerical Methods	3
EGMN 402	Senior Design Studio (Laboratory/Project Time)	2
EGMN 403	Senior Design Studio (Laboratory/Project Time)	2
EGMN 420	CAE Design	3
EGRE 206	Electric Circuits	4
ENGR 395	Professional Development	1
ENGR 402	Senior Design Studio (Seminar)	1
ENGR 403	Senior Design Studio (Seminar)	1
• Concentration requirements		
EGMN 351	Nuclear Engineering Fundamentals	3
EGMN 352	Nuclear Reactor Theory	3
EGMN 355	Radiation Safety and Shielding	3
EGMN 359	Nuclear Power Plants	3
EGMN 456	Reactor Design and Systems	3
EGMN 530	System Analysis of the Nuclear Fuel Cycle	3

• Additional major requirements

Approved internship or cooperative education experience		0
ENGR 296	Part-time Internship Experience	
or ENGR 396	Internship Experience	
or ENGR 398	Cooperative Education Experience	
Review of internship or cooperative education experience		0
ENGR 496	Internship Review	
or ENGR 498	Review of Cooperative Education Experience	

• Major electives

Select nuclear engineering electives as described below. 6

Ancillary requirements

CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I	1

MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4
ECON 205	The Economics of Product Development and Markets (satisfies general education BOK for social/behavioral sciences and AOI for global perspectives)	3
MATH 201	Calculus with Analytic Geometry II	4
MATH 301	Differential Equations	3
MATH 307	Multivariate Calculus	4
MGMT 310	Managing People in Organizations	3
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
PHYS 208	University Physics II	5
Total Hours		130

The minimum number of credit hours required for this degree is 130.**Nuclear engineering electives**

Mechanical engineering students completing the nuclear engineering concentration will choose two nuclear engineering elective courses from the following list. A special topic, independent study or other course may be used as a nuclear engineering elective with prior written approval of the department chair.

Course	Title	Hours
EGMN 510	Probabilistic Risk Assessment	3
EGMN 545	Energy Conversion Systems	3
EGMN 550	Energy and Sustainability	3
EGMN 560	Monte Carlo Simulations	3
EGMN 574	Nuclear Safeguards, Security and Nonproliferation	3
EGMN 575	Fast Breeder Reactors	3

All courses used to satisfy nuclear engineering elective requirements must be completed with a minimum grade of C.

Courses taken at other institutions

Students enrolled in degree programs at VCU must receive prior approval to take courses at other institutions to ensure credits earned concurrently at another institution are accepted for transfer at VCU. After enrolling in the VCU undergraduate mechanical engineering program, a student must receive prior approval to complete any course at another institution, and the following policies apply.

1. A student will not be approved to take an EGMN-equivalent course at another institution in a semester when the VCU course is offered. The department chair may approve an exception to this policy in extraordinary circumstances.
2. A total of no more than two EGMN-equivalent courses can be taken at another institution after enrolling in the VCU mechanical engineering program. The department chair may approve additional courses in exceptional circumstances.
3. A student may not transfer an EGMN-equivalent course from another institution for an EGMN course in which the student has a VCU honor code violation. The department chair may approve an exception to this policy in extraordinary circumstances.

4. Courses other than EGMN-equivalent courses (EGRE, MATH, PHYS, etc.) may be approved to be taken outside of VCU if the student receives prior approval for each course using the appropriate VCU form.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I	1
EGMN 103	Mechanical and Nuclear Engineering Practicum I	1
EGMN 190	Introduction to Mechanical and Nuclear Engineering	1
MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		
General education course (select AOI for creativity, innovation and aesthetic inquiry)		3
Term Hours:		16

Spring semester

EGMN 203	Mechanical and Nuclear Engineering Practicum II	1
EGMN 215	Engineering Visualization and Computation	3
MATH 201	Calculus with Analytic Geometry II	4
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		
Term Hours:		16

Sophomore year

Fall semester		Hours
EGMN 102	Engineering Statics	3
EGMN 351	Nuclear Engineering Fundamentals	3
ENGR 395	Professional Development	1
MATH 301	Differential Equations	3
PHYS 208	University Physics II	5
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
Term Hours:		18
Spring semester		Hours
EGMN 201	Dynamics and Kinematics	3

EGMN 202	Mechanics of Deformables	3
EGMN 204	Thermodynamics	3
EGMN 359	Nuclear Power Plants	3
MATH 307	Multivariate Calculus	4
Term Hours:		16

Junior year

Fall semester		Hours
EGMN 300	Mechanical Systems Design	3
EGMN 301	Fluid Mechanics	3
EGMN 311	Solid Mechanics Lab	1.5
EGMN 321	Numerical Methods	3
EGMN 355	Radiation Safety and Shielding	3
EGMN 420	CAE Design	3
Term Hours:		16.5

Spring semester

EGMN 302	Heat Transfer	3
EGMN 303	Thermal Systems Design	3
EGMN 312	Thermal Sciences Lab	1.5
EGMN 352	Nuclear Reactor Theory	3
EGRE 206	Electric Circuits	4
Nuclear engineering elective		3
Term Hours:		17.5

Summer semester

ENGR 396	Internship Experience	0
Term Hours:		0

Senior year

Fall semester		Hours
ECON 205	The Economics of Product Development and Markets (satisfies general education BOK for social/behavioral sciences and AOI for global perspectives)	3
EGMN 309	Material Science for Engineers	3
EGMN 402	Senior Design Studio (Laboratory/Project Time)	2
EGMN 456	Reactor Design and Systems	3
ENGR 402	Senior Design Studio (Seminar)	1
ENGR 496	Internship Review	0
General education course (select AOI for diversities in the human experience; select a course that also satisfies BOK for humanities/fine arts if not already satisfied by another course)		3
Term Hours:		15
Spring semester		Hours
EGMN 315	Process and Systems Dynamics	3
EGMN 403	Senior Design Studio (Laboratory/Project Time)	2
EGMN 530	System Analysis of the Nuclear Fuel Cycle	3
ENGR 403	Senior Design Studio (Seminar)	1
MGMT 310	Managing People in Organizations	3
Nuclear engineering elective		3
Term Hours:		15

Term Hours:		15
Total Hours:		130

The minimum number of credit hours required for this degree is 130.

Mechanical engineering, minor in

The minor in mechanical engineering consists of 21 credits and successful completion of the following courses:

Course	Title	Hours
EGMN 102	Engineering Statics	3
EGMN 201	Dynamics and Kinematics	3
EGMN 202	Mechanics of Deformables	3
EGMN 204	Thermodynamics	3
EGMN 300 or EGMN 420	Mechanical Systems Design CAE Design	3
EGMN 301	Fluid Mechanics	3
EGMN 302 or EGMN 315	Heat Transfer Process and Systems Dynamics	3
Total Hours		21

A maximum of nine credits of comparable course work may be substituted with approval of the chair of the mechanical engineering department. Within these nine credits, EGRB 203 is an approved substitute for EGMN 102, and EGRB 310 is an approved substitute for EGMN 202.

COLLEGE OF HEALTH PROFESSIONS

The College of Health Professions was established on Jan. 1, 1969, to provide an administrative structure for existing educational programs in allied health disciplines and to direct the development of new programs in response to the growing need for allied health manpower. At the outset, the college incorporated existing educational programs for hospital administration, medical technology, physical therapy, and radiologic technology and X-ray technicians.

In the years since its establishment, the college has grown significantly — developing unique, cutting-edge curricula and degree offerings in both traditional and nontraditional formats — to meet the increasing demand for allied health teachers, researchers and practitioners. Considered a leader in distance education, VCU's College of Health Professions offers the only interdisciplinary, Internet-based doctoral program in allied health in the country: the Ph.D. in Health Related Sciences. The college currently incorporates nine departments and offers programs at the baccalaureate, certificate, master's and doctoral levels.

Administration

900 East Leigh Street
Box 980233
Richmond, Virginia 23298-0233
(804) 828-7247
Fax: (804) 828-8656
chp.vcu.edu

Susan Parish, Ph.D., M.S.W.
Dean

Debra A. Ropelewski
Senior associate dean for finance and administration

Amy Armstrong, Ph.D.
Associate dean for faculty development and research

Alena C. Hampton, Ph.D.
Associate dean for academic affairs and student success

Angela Duncan, Ph.D.
Associate dean for diversity, equity and inclusion

Daniel Lee, Ph.D.
Associate dean for research and strategic initiatives

Michel Landry, P.T., M.B.A., Ph.D.
Associate dean for global health

Accreditation

The College of Health Professions is an institutional member of the American Society of Allied Health Professions and the Virginia Association of Allied Health Professions. All of its programs are approved or accredited by the appropriate national professional or educational organizations.

Medical laboratory sciences (bachelor's degree)

National Accrediting Agency for Clinical Laboratory Sciences

5600 N. River Road, Suite 720, Rosemont, IL 60018-5519; (847) 939-3597, (773) 714-8880 or (773) 714-8886 (fax); info@naacls.org; naacls.org (<http://naacls.org>). Upon graduation the student is eligible to take the national examination for MLS given by the Board of Certification of the American Society for Clinical Pathology.

Health administration (master's and executive master's degrees)

Commission on Accreditation of Healthcare Management Education

Nuclear medicine technology (bachelor's degree in Clinical Radiation Sciences)

Joint Review Committee on Educational Programs in Nuclear Medicine Technology

Nurse anesthesia (doctorate)

Council on Accreditation of Nurse Anesthesia Educational Programs (COA, 222 South Prospect Avenue, Park Ridge, Illinois, 847-692-7050). The COA is recognized by the U.S. Department of Education and the Council on Higher Education Accreditation to accredit programs of nurse anesthesia. Graduates of the entry-to-practice doctoral program are eligible to take the examination for certification conducted by the National Board of Certification and Recertification for Nurse Anesthetists.

Occupational therapy (master's degree)

Accreditation Council for Occupational Therapy Education

Patient counseling (certificate)

Association for Clinical Pastoral Education

Physical therapy (D.P.T.)

Commission on Accreditation in Physical Therapy Education, American Physical Therapy Association

Radiation therapy technology and radiography (bachelor's degree in Clinical Radiation Sciences)

Joint Review Committee on Education in Radiologic Technology

Rehabilitation counseling (master's degree)

Council for Accreditation of Counseling and Related Educational Programs

Philosophy

The faculty of the college is committed to offering, through the establishment and maintenance of rigorous standards of excellence, educational programs that will prepare students for professional careers in the allied health disciplines. Development of professional attitudes, emotional maturity and ethical behavior of students is a vital component of the educational process. It is essential that students gain a deep respect for the dignity of human beings and the inherent rights of patients and others who receive services. The programs are designed to include not only the development of skills to assure excellence in quality of health care, but also factual knowledge and experiences that will provide the basis for continuing intellectual and professional growth.

Community services of the college and faculty include continuing education, consultative resources and participation in all pertinent areas of health care. An integral part of these efforts is to stimulate and sponsor research activities in the allied health disciplines represented within the college and to encourage interdisciplinary research.

Programs

Both entry- and advanced-level undergraduate, graduate, professional and certificate programs are offered by the College of Health Professions. University and accreditation requirements for the individual programs guide the establishment of general admission prerequisites and course and degree requirements. Regulations and procedures for each program are outlined in these bulletins and are intended to ensure the selection of applicants whose motivation, ability, character and health status qualify them to pursue their program of study successfully.

Programs currently offered by this college and the degrees conferred on their graduates are:

College of Health Professions – Dean's Office

- B.S. in Health Services
- Ph.D. in Health Related Sciences

Department of Gerontology

- Graduate Certificate in Aging Studies
- Master of Science

Department of Health Administration

- Master of Health Administration
- Master of Health Administration and Doctor of Medicine (dual degree offered with the VCU School of Medicine)
- Master of Health Administration and Juris Doctor (dual degree offered with the T. C. Williams School of Law at the University of Richmond)
- Master of Health Administration and Master of Science in Information Systems (dual degree offered with the VCU School of Business)
- Master of Science in Health Administration (Professional M.S.H.A. Program – Online)
- Ph.D. in Health Services Organization and Research

Department of Medical Laboratory Sciences

- Bachelor of Science
- Master of Science

Department of Nurse Anesthesia

- Doctor of Nurse Anesthesia Practice
 - Entry-to-practice
 - Post-professional

Department of Occupational Therapy

- Occupational Therapy Doctorate

Department of Patient Counseling

- Post-baccalaureate graduate Certificate in Patient Counseling
- Master of Science

- Master of Science and Master of Divinity (dual degree offered with the School of Theology at Virginia Union University)

Department of Physical Therapy

- Doctor of Physical Therapy
- Ph.D. in Rehabilitation and Movement Science

Department of Radiation Sciences

- Bachelor of Science

Department of Rehabilitation Counseling

- Master of Science in Rehabilitation and Mental Health Counseling
- Post-master's Certificate in Professional Counseling

Licensure/certification

Graduates of most of the programs offered in the College of Health Professions are required or eligible to take national and/or state certification or licensure examinations. Requirements of licensing and certifying agencies vary. Some licensure and certification agencies consider individuals convicted of a felony ineligible for licensure or certification. For information, prospective students should contact the licensure or certification agency for the specific allied health discipline.

Attendance regulations

The faculty considers attendance at lectures, laboratories and other functions a requisite to the successful acquisition of the knowledge and skills required of the professional. Hence, the faculty cannot condone absence without good reason from any regularly scheduled educational experience. At the beginning of each course, instructors relate to their classes the policy of the department concerning the attendance regulations for that semester. The nature of make-up work in the event of absence will be the prerogative of the instructor.

Student performance and behavior

The goals and objectives of the College of Health Professions and its component departments and programs relate to the education of persons preparing for professional careers in the allied health disciplines. An integral requisite of students and practitioners is an undeviating acceptance of a professional attitude and pride that will motivate them to adhere to a code of professional ethics and to develop fully their competencies for practice.

The suitability of student performance and behavior relating to these professions and to the consumers of health care is a paramount concern of the administration and faculty of this college. To assure a quality of educational and clinical preparation for its graduates, the following statement is promulgated:

- If, in the judgment of the faculty and administration of the College of Health Professions, a student is not considered suitable for emotional, professional or related reasons, the student's academic status may be appropriately altered.

If any questions arise regarding the standards of performance or behavior, it is the responsibility of students to apprise themselves of acceptable character and conduct requirements prior to matriculation in the designated department or program.

Standards of professional behavior

These standards describe behaviors expected from the faculty and students of the College of Health Professions. They are in addition to those standards of behavior and ethical conduct required by the college's departments and professional organizations. They are supplemental to the university statement regarding conduct in the classroom.

- Recognize one's position as a role model of your profession for other members of the health care team
- Carry out academic, clinical and research responsibilities in a conscientious manner, making every effort to exceed expectations and demonstrating a commitment to lifelong learning
- Treat patients, faculty and students with respect, demonstrating sensitivity to diversity regarding ethnicity, culture, age, gender, disability, social and economic status, sexual orientation, etc., without discrimination, bias or harassment
- Maintain patient/client confidentiality
- Respect the privacy of all members of the campus community and avoid promoting gossip and rumor
- Interact with all members of the health care team in a collaborative and supportive fashion, with respect and recognition of the roles played by each individual
- Provide help or seek assistance for any member of the health care team who is recognized as impaired in his/her ability to perform his/her professional obligations
- Be mindful of the limits of one's knowledge and abilities and seek help from others whenever appropriate
- Abide by accepted ethical standards in the scholarship, research and practice of patient/client care
- Abide by the guidelines of the VCU Honor System

Financial aid

Financial aid is available for all students meeting the criteria for financial assistance. For details of the programs available contact the Financial Aid Office, Box 980244, Richmond, VA 23298-0244 or telephone (804) 828-9800.

The college and departments also offer financial awards, honors and scholarships. Details may be found on the college's and individual departments' websites at chp.vcu.edu.

Undergraduate information

Preparatory study for health sciences

University Academic Advising administers programs in preparation for admission into health sciences programs. For detailed information on the pre-health major in clinical laboratory sciences (<http://bulletin.vcu.edu/undergraduate/undergraduate-study/academic-advising/prehealth-majors/clinical-laboratory-sciences/>), see the UAA section of this bulletin, which also includes detailed information on the pre-health major in radiation sciences (p. 59).

Health Services, Bachelor of Science (B.S.)

Laurie Cathers, Ph.D., LMSW
Program director

The Bachelor of Science in Health Services will prepare future health care leaders with the knowledge, skills and competencies to meet the challenges of managing responsibilities across the range of health care organizations. With an emphasis on evidence-based practice, the program will prepare students to work as medical and health services providers charged with planning, directing and coordinating medical and health services. Graduates will be able to work in diverse health care settings, such as hospitals, specific clinical areas or departments within those facilities, health management organizations or in medical practice groups.

The program is designed for students who wish to create a pathway into a health care field. It provides a core set of courses to build a foundation of health care knowledge. It also provides the flexibility for students to focus their studies on a particular area of interest through the selection of open and restricted elective courses. The flexibility gives students an opportunity to identify how their strengths, values and skills can best serve the health of their communities.

Student learning outcomes

Upon completion of the B.S. in Health Services degree program, graduates will be able to:

- Describe health, illness and human development in the context of the U.S. health care system
- Analyze contemporary issues and trends in health promotion and delivery in the context of the U.S. health care system
- Demonstrate a basic understanding of professional and ethical behaviors within the health care context
- Identify and analyze cultural and economic factors impacting health disparities in the U.S. health care system
- Apply effective written and oral communications skills within the health care services context
- Analyze and apply basic theories of leadership and change management to the health care services workplace
- Evaluate and interpret evidence-based practices in the health care services context

Degree requirements

The B.S. in Health Services requires 120 credits.

Service-learning requirement

All students in the degree program will have a culminating experiential learning opportunity in the final semester of the senior year when they take ALHP 435. All students will receive constructive feedback from their faculty adviser and also the site supervisor for the relevant experiential and applied learning experience. The course is designed to prepare students for career search, future professional and educational opportunities, and reflective oral and written presentations on professional and ethical practice in the service-learning environment.

Curriculum requirements

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
ALHP 310	Introduction to Health Care Professions	3

ALHP 320	Person-centered Care	3
ALHP 325	Introduction to Rehabilitation Services	3
ALHP 330	Human Growth and Development for the Health Professions	3
ALHP 340	Health Care Technology and Innovation	3
ALHP 410	Professional and Clinical Ethics	3
ALHP 415	Health Care Financing and Budgeting	3
ALHP 416	Health Care Economics	3
ALHP 420	Health Care Leadership Development	3
ALHP 425	Health Care Management and Performance	3

Department of Medical Laboratory Sciences

Teresa S. Nadder, Ph.D., MLS(ASCP)^{CM}

Associate professor and chair

cls.chp.vcu.edu (<https://cls.chp.vcu.edu/>)

The Department of Medical Laboratory Sciences supports the philosophy and mission of the university and the College of Health Professions, and provides an environment that nurtures excellence in education, research and service. The programs offered by the department are dedicated to enhancing and promoting medical laboratory science. The department fosters fair and equitable educational experiences for students of all ages and diverse backgrounds. Strong affiliations with clinical educators and the integration of innovative technology in the academic setting facilitate both the education and research goals of the department.

The department provides students with superior studies in medical laboratory science, including both theoretical and applied clinical education, and develops problem-solving expertise, leadership capabilities and communication skills. By providing advanced theoretical and technical education, the graduate program serves to maintain and update the competency of laboratory professionals and to prepare students to assume roles as laboratory supervisors, university educators and researchers. A mature, responsible approach to the acquisition

of knowledge is cultivated in order to establish continuing intellectual growth and an enthusiasm for the profession.

The department meets the growing health care needs of the community by providing highly competent and professional medical laboratory scientists who will be able to function effectively upon entrance into the field and be prepared to explore future scientific and technological advances in laboratory science. And the department promotes continued professional development and personal growth for the faculty and staff to fulfill and balance the individual's abilities and aspirations with the departmental, college and institutional mission and needs. Members of the department conduct themselves in a forthright, ethical manner and practice the highest standard of quality performance.

The objectives of the Department of Medical Laboratory Sciences are:

- To provide an educational program that prepares students to accurately perform and evaluate analytical tests on body fluids, cells and products
- To foster the development of professional conduct, interpersonal communication skills and ethical principles
- To develop and promote strategies for lifelong learning and to encourage continued professional growth through research, continued education and active participation in professional societies

History

Clinical and medical laboratory scientists have been trained on the MCV Campus since 1927. However, the Department (formerly school) of Medical Technology was not formally established until 1952, at which time the curriculum included six months of didactic experience with lectures and laboratory sessions held in the department, followed by a six-month rotation through the clinical laboratories. The school offered a certificate and/or bachelor's degree program; the certificate program was discontinued during the 1961-62 school year.

In 1974 the curriculum was expanded to the current two-plus-two year program in which students complete 60 semester hours of prerequisites followed by two years of professional course work. The graduate program in medical laboratory sciences was started in 1967 to provide advanced education for certified medical technologists/clinical laboratory scientists. In 1985 the program was modified to allow candidates holding a degree in another area of science to obtain graduate education in medical laboratory sciences.

In 1994, the department name was changed to the Department of Clinical Laboratory Sciences. In 2003, an accelerated track was initiated to integrate the undergraduate and graduate programs, which requires completion of two years of prerequisites and three years of full-time professional course work, and leads to the simultaneous awarding of both the bachelor's and master's degrees.

To aggressively address the critical shortage of clinical laboratory scientists and meet the growing staffing needs of rural Virginia, in 2014 the department began its delivery of the Bachelor of Science using facilities at the Southwest Virginia Higher Education Center in Abingdon, Virginia. Students receive their curriculum of study via two-way synchronous distance education and clinical training rotations in southwest Virginia and eastern Tennessee.

In 2020, the department was approved for a name change and became the Department of Medical Laboratory Sciences.

Facilities

The Department of Medical Laboratory Sciences is located at the College of Health Professions building at 900 East Leigh Street on the MCV Campus. Faculty and clerical offices are located in this facility, as well as student classrooms, general teaching laboratory, study areas and a student lounge. Classrooms and a general teaching laboratory are also present at the Southwest Virginia Higher Education Center at One Partnership Circle, Abingdon, Virginia.

- Medical Laboratory Sciences, Bachelor of Science (B.S.) (p. 138)

Medical Laboratory Sciences, Bachelor of Science (B.S.)

Medical laboratory scientists receive training in the following areas: clinical chemistry, the study of chemical reactions that occur in normal and diseased processes; hematology, the study of the cellular elements of the blood and blood-forming tissues and hemostatic mechanism; urine and body fluids analysis, the study of principles and practices of urinalysis, kidney function, and analyses of cerebrospinal fluid and other body fluids; microbiology, the study of microbiological aspects of infectious disease and the isolation and identification of pathogenic bacteria; immunohematology, the application of theory and principles of blood banking, cell typing, compatibility testing and antibody identification; and immunology, the study of the immune system and the serological and molecular techniques used for diagnosing infectious disease. With the rapid advancement of knowledge in the field of laboratory medicine, there is a growing need for highly skilled and knowledgeable clinical laboratory scientists. Employment is found in hospitals; physicians' offices; research facilities; molecular diagnostics, biotechnology and public health laboratories; industrial quality control; veterinary clinics; and sales and service of health care equipment. In addition to the technical arena, opportunities as managers or consultants exist for graduates of this program.

Upon graduation the student is eligible to take the national examination for Medical Laboratory Scientists given by the Board of Certification of the American Society for Clinical Pathology.

Mission statement

The mission of the undergraduate program is to serve the health care needs of the community by providing highly competent and professional medical laboratory scientists who will be able to function effectively upon entrance into the field and be prepared to explore future scientific and technological advances in laboratory science.

Student learning outcomes

1. Demonstrate knowledge

Students will demonstrate knowledge of the basic underlying scientific concepts and proficiency in performing the full range of laboratory tests in the areas of hematology, clinical chemistry, immunohematology (blood banking), microbiology, body fluids, serology/immunology and molecular diagnostics.

2. Environment conducive for student learning

VCU will provide a high quality educational setting for the development of students' professional skills.

3. Success in workplace

The program will provide the community with competent and professional medical laboratory scientists who can function effectively upon entrance into the field.

4. Professional conduct

Students will demonstrate appropriate professional conduct and leadership characteristics to include effective communication skills, ethical conduct and problem-solving abilities.

Academic regulations

The minimum passing grade for all professional courses leading to the Bachelor of Science degree is D. All courses must be completed with a passing grade, with no more than one D, for the student to be eligible for promotion or graduation. Satisfactory completion of the previous semester's course work is a prerequisite to the next semester.

Promotion/graduation is based on recommendations of the faculty. The student is expected to do all of the following:

- Maintain a minimum GPA of 2.0 at VCU
- Maintain a minimum GPA of 2.0 in CLLS course work
- Obtain a passing grade in all CLLS courses, with no more than one course grade of D in CLLS course work
- Complete the clinical education requirements to the satisfaction of the clinical and academic faculty
- Exhibit the attitudes and skills deemed necessary to function as a professional medical laboratory scientist
- Pay all fees

Detailed grading policies including the mechanism for grade appeals are given to each entering student during orientation.

Program admission

See the Department of Medical Laboratory Sciences website for admissions requirements. (<https://cls.chp.vcu.edu/admissions/>)

Special requirements

All students will have fulfilled core and general education requirements and a minimum of 60 transferable semester credits at an accredited college or university including:

- Biology: 12 hours to include general biology; human physiology and anatomy recommended
- Chemistry: 12 hours to include eight hours of general chemistry; remaining four hours can be (in order of preference) quantitative analysis, organic chemistry or qualitative analysis
- English: six to nine hours of composition (VCU: UNIV 111-UNIV 112 and UNIV 200 or their equivalents)
- Mathematics: three hours of college algebra or higher level; additional mathematics or physics recommended
- Humanities/arts: three hours (selected from courses in history, philosophy, political science, religion, foreign languages, literature, art history or art appreciation)
- Social sciences: three hours (selected from courses in anthropology, economics, geography, psychology or sociology)

Applicants should possess the following essential technical abilities and skills for admission consideration:

- Manual dexterity: ability to use hand(s) or prosthetic devices with coordination
- Fine motor: ability to manipulate small objects with fingertips or adaptive devices
- Mobility: ability to maneuver in the laboratory and around instruments and in patient-care settings
- Vision: ability to distinguish red, yellow, blue and green colors; to distinguish clear from cloudy; and to distinguish objects through a microscope
- Hearing: ability to hear with assistive devices (i.e., phone receivers, hearing aid, etc.)
- Speech: ability to verbally communicate in English
- Writing: ability to communicate effectively in written form in English
- Reading: ability to read, understand and follow directions printed in English
- Emotional and physical stability: ability to work accurately and safely under stress, adapt to changing environments and prioritize tasks
- Personal attributes: must demonstrate integrity, responsibility, tolerance and respect

Department of Radiation Sciences

Jeffrey S. Legg, Ph.D., RT(R)(CT)(QM), FASRT

Associate professor and chair

radsci.chp.vcu.edu (<https://radsci.chp.vcu.edu/>)

The Department of Radiation Sciences is an integral part of the College of Health Professions and shares its values. The department serves as a national leader in the education of students in the radiologic sciences and provides learning opportunities that are innovative and educationally sound. Strong linkages with clinical affiliates and their staffs are vital to the department's success. Faculty and staff work in a cooperative spirit in an environment conducive to inquisitiveness and independent learning to help a diverse student body develop to its fullest potential. The faculty is committed to the concept of lifelong learning and promotes standards of clinical practice that will serve students throughout their professional careers. Faculty members serve as resources for professionals in practice and contribute to an expanded knowledge base in the field of clinical radiation sciences.

The mission of the Department of Radiation Sciences is to enable a diverse student body to develop its fullest potential and to graduate baccalaureate-level radiologic health professionals who demonstrate outstanding technical, communication and critical-thinking skills.

Department of Radiation Sciences' goals

- For entry-level and second modality programs, students will be clinically competent.
 - Students will attain clinical competence.
 - Graduates will demonstrate clinical competence while employed in the radiation sciences.
- Students will communicate effectively.

- Students will demonstrate effective communication during their clinical experience.
 - Students will demonstrate effective communication through the research project.
 - Graduates will demonstrate effective communication while employed in the radiation sciences.
- Students will demonstrate critical-thinking skills.
 - Students will demonstrate critical-thinking skills during their clinical experience.
 - Students will demonstrate critical-thinking skills in developing their research project.
 - Students will model professionalism.
 - Students will demonstrate professionalism during their clinical experience.
 - Graduates will demonstrate professionalism while employed in the radiation sciences.
 - The department will assure program effectiveness.

History

Radiologic technology education began at the Medical College of Virginia in the 1930s with a one-year training program in radiography. This program has undergone a number of changes through the years to evolve into the current baccalaureate educational program.

A concentration in nuclear medicine technology was added in 1984 and in radiation therapy in 1992. Degree-completion programs have been added to provide an opportunity for certified technologists and therapists to complete requirements for the baccalaureate degree.

Facilities

The educational facilities for the Department of Radiation Sciences are located on the third floor of the College of Health Professions building at 900 E. Leigh St., Suite 3000. These facilities include energized laboratories in radiography, nuclear medicine, radiation therapy and diagnostic medical sonography. The radiography laboratory includes a radiographic/fluoroscopic digital imaging system and a mobile unit. The nuclear medicine laboratory offers a gamma camera and working radionuclide hotlab. Radiation therapy offers an immersive virtual 3-D educational system as well as a 3-D treatment planning lab. And last, the diagnostic medical sonography lab features multiple ultrasound machines and imaging phantoms.

During the various phases of the curriculum, students will be assigned to one or more of the following affiliate institutions: VCU Health's MCV and Children's Hospitals and multiple satellite facilities; McGuire VA Medical Center; Spotsylvania Regional Medical Center; Henrico Doctors' Hospitals; and a variety of smaller clinics and facilities.

- Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in:
 - Diagnostic medical sonography (p. 141)
 - Diagnostic medical sonography (second modality) (p. 142)
 - Nuclear medicine technology (p. 144)
 - Nuclear medicine technology (degree completion) (p. 146)
 - Nuclear medicine technology (second modality) (p. 148)
 - Radiation therapy (p. 150)
 - Radiation therapy (degree completion) (p. 152)
 - Radiation therapy (second modality) (p. 153)

- Radiography (p. 155)
- Radiography (degree completion) (p. 157)

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in diagnostic medical sonography

The department offers a Bachelor of Science in Clinical Radiation Sciences with the following areas of concentration: diagnostic medical sonography, nuclear medicine technology, radiation therapy and radiography. Upon meeting prerequisites and gaining admission to the program, students complete a three-year, full-time program that includes general education and professional course work. Graduates of the program are eligible for national certification examinations in their respective area of concentration.

Upon completion of one of the concentrations, the graduate is eligible for the relevant national certification examination administered by the American Registry of Radiologic Technologists. Graduates of the nuclear medicine technology concentration also are eligible for the certification examination administered by the Nuclear Medicine Technology Certification Board. Graduates of the diagnostic medical sonography concentration are also eligible for the certification examination administered by the American Registry for Diagnostic Medical Sonography.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate proficiency in performing imaging/therapy procedures
- Demonstrate proper patient care skills
- Practice appropriate methods of patient safety (to include radiation safety as appropriate)
- Demonstrate effective verbal and written communication
- Demonstrate the ability to critically think and problem solve in a clinical setting
- Critically analyze published research in the radiation sciences
- Demonstrate professional and ethical behavior

Special requirements

Students may see prerequisite course work for admission to this program on the pre-health major in clinical radiation sciences (p. 59) page elsewhere in this Bulletin.

English proficiency

All non-native applicants must meet VCU's minimum TOEFL score requirements prior to admission.

Enrolled students must earn a minimum grade of C in the following CLRS courses:

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in diagnostic medical sonography (second modality)

The department offers second modality B.S. degree concentrations for American Registry of Radiologic Technologists-certified radiographers who desire to continue their professional education and concentrate in radiation therapy, nuclear medicine technology or diagnostic medical sonography. Upon meeting admission prerequisites, students complete a five-semester, full-time course of study including didactic, laboratory and clinical education. Graduates are eligible for additional national professional certification examinations.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate proficiency in performing imaging/therapy procedures
- Demonstrate proper patient care skills
- Practice appropriate methods of patient safety (to include radiation safety as appropriate)
- Demonstrate effective verbal and written communication
- Demonstrate the ability to critically think and problem solve in a clinical setting
- Critically analyze published research in the radiation sciences
- Demonstrate professional and ethical behavior

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in nuclear medicine technology

The department offers a Bachelor of Science in Clinical Radiation Sciences with the following areas of concentration: diagnostic medical sonography, nuclear medicine technology, radiation therapy and radiography. Upon meeting prerequisites and gaining admission to the program, students complete a three-year, full-time program that includes general education and professional course work. Graduates of the program are eligible for national certification examinations in their respective area of concentration.

Upon completion of one of the concentrations, the graduate is eligible for the relevant national certification examination administered by the American Registry of Radiologic Technologists. Graduates of the nuclear medicine technology concentration also are eligible for the certification examination administered by the Nuclear Medicine Technology Certification Board. Graduates of the diagnostic medical sonography concentration are also eligible for the certification examination administered by the American Registry for Diagnostic Medical Sonography.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate proficiency in performing imaging/therapy procedures
- Demonstrate proper patient care skills
- Practice appropriate methods of patient safety (to include radiation safety as appropriate)
- Attain clinical competence in entry-level sonographic procedures
- Communicate effectively with patients, staff and physicians in the radiology department
- Demonstrate effective verbal and written communication
- Demonstrate the ability to critically think and problem solve in a clinical setting
- Critically analyze published research in the radiation sciences
- Demonstrate professional and ethical behavior

Special requirements

Students may see prerequisite course work for admission to this program on the pre-health major in clinical radiation sciences (p. 59) page elsewhere in this Bulletin.

English proficiency

All non-native applicants must meet VCU's minimum TOEFL score requirements prior to admission.

Enrolled students must earn a minimum grade of C in the following CLRS courses:

Course	Title	Hours
CLRS 208	Foundations of Patient Care	4
CLRS 232	Radiation Safety	2
CLRS 303	Orientation to Nuclear Medicine	2

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in nuclear medicine technology (degree completion)

Full- or part-time opportunities to complete a baccalaureate degree are offered for technologists or therapists certified by the American Registry of Radiologic Technologists, Nuclear Medicine Technology Certification Board and/or American Registry of Diagnostic Medical Sonography. In addition to general education and professional course work, the student selects electives from a wide variety of courses, allowing the design of a program that best meets the goals and interests of the individual.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate effective written communication
- Demonstrate critical-thinking skills in developing a research project

Special requirements

Prerequisites

NMTCB/ARRT Certification (or eligibility) in nuclear medicine¹

¹

Must be NMTCB/ARRT certified within two semesters of enrollment.

English proficiency

All non-native applicants must meet VCU's minimum TOEFL score requirements prior to admission.

Enrolled students must earn a minimum grade of C in CLRS 430.

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in nuclear medicine technology (second modality)

The department offers second modality B.S. degree concentrations for American Registry of Radiologic Technologists-certified radiographers who desire to continue their professional education and concentrate in radiation therapy, nuclear medicine technology or diagnostic medical sonography. Upon meeting admission prerequisites, students complete a five-semester, full-time course of study including didactic, laboratory and clinical education. Graduates are eligible for additional national professional certification examinations.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate proficiency in performing imaging/therapy procedures
- Demonstrate proper patient care skills
- Practice appropriate methods of patient safety (to include radiation safety as appropriate)
- Attain clinical competence in entry-level sonographic procedures
- Communicate effectively with patients, staff and physicians in the radiology department
- Demonstrate effective verbal and written communication
- Demonstrate the ability to critically think and problem solve in a clinical setting

- Critically analyze published research in the radiation sciences
- Demonstrate professional and ethical behavior

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiation therapy (degree completion)

Full- or part-time opportunities to complete a baccalaureate degree are offered for technologists or therapists certified by the American Registry of Radiologic Technologists and/or the Nuclear Medicine Technology Certification Board. In addition to general education and professional course work, the student selects electives from a wide variety of courses, allowing the design of a program that best meets the goals and interests of the individual.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate effective verbal communication
- Demonstrate effective written communication
- Demonstrate the ability to problem solve
- Critically analyze published research in the radiation sciences
- Broaden knowledge and awareness of service opportunities in the imaging sciences

Special requirements

Prerequisites

ARRT Certification (or eligibility) in radiation therapy¹

1

Must be ARRT certified within two semesters of enrollment.

English proficiency

All non-native applicants must meet VCU's minimum TOEFL score requirements prior to admission.

Enrolled students must earn a minimum grade of C in CLRS 430.

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiation therapy (second modality)

The department offers second modality B.S. degree concentrations for American Registry of Radiologic Technologists-certified radiographers who desire to continue their professional education and concentrate in radiation therapy, nuclear medicine technology or diagnostic medical sonography. Upon meeting admission prerequisites, students complete a five-semester, full-time course of study including didactic, laboratory and clinical education. Graduates are eligible for additional national professional certification examinations.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate proficiency in performing imaging/therapy procedures
- Demonstrate proper patient care skills
- Practice appropriate methods of patient safety (to include radiation safety as appropriate)
- Demonstrate effective verbal and written communication
- Demonstrate the ability to critically think and problem solve in a clinical setting
- Critically analyze published research in the radiation sciences
- Demonstrate professional and ethical behavior

Clinical Radiation Sciences, Bachelor of Science (B.S.) with a concentration in radiography

The department offers a Bachelor of Science in Clinical Radiation Sciences with the following areas of concentration: diagnostic medical sonography, nuclear medicine technology, radiation therapy and radiography. Upon meeting prerequisites and gaining admission to the program, students complete a three-year, full-time program that includes general education and professional course work. Graduates of the program are eligible for national certification examinations in their respective area of concentration.

Upon completion of one of the concentrations, the graduate is eligible for the relevant national certification examination administered by the American Registry of Radiologic Technologists. Graduates of the nuclear medicine technology concentration also are eligible for the certification examination administered by the Nuclear Medicine Technology Certification Board. Graduates of the diagnostic medical sonography concentration are also eligible for the certification

examination administered by the American Registry for Diagnostic Medical Sonography.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate proficiency in performing imaging/therapy procedures
- Demonstrate proper patient care skills
- Practice appropriate methods of patient safety (to include radiation safety as appropriate)
- Attain clinical competence in entry-level sonographic procedures
- Communicate effectively with patients, staff and physicians in the radiology department
- Demonstrate effective verbal and written communication
- Demonstrate the ability to critically think and problem solve in a clinical setting
- Critically analyze published research in the radiation sciences
- Demonstrate professional and ethical behavior

Special requirements

Students may see prerequisite course work for admission to this program on the pre-health major in clinical radiation sciences (p. 59) page elsewhere in this Bulletin.

English proficiency

All non-native applicants must meet VCU's minimum TOEFL score requirements prior to admission.

Enrolled students must earn a minimum grade of C in the following CLRS courses:

Course	Title	Hours
CLRS 201	Radiographic Imaging and Exposure I	3

COLLEGE OF HUMANITIES AND SCIENCES

The faculty and staff of the College of Humanities and Sciences are dedicated to excellence in teaching, research and public service. The mission of Virginia Commonwealth University provides the framework for this pursuit of excellence.

Teaching and learning are central to the college, and the college is central to educational and intellectual life at VCU. The college meets the educational needs of a diverse student body, provides general education for all undergraduate students of the university, preparatory programs for the health sciences, engineering and law, and educates future teachers in the liberal arts and sciences. The college offers comprehensive undergraduate, graduate and professional programs of study that link a foundation of understanding and knowledge with skills on which students can build careers, become responsible citizens and continue lifelong learning.

Scholarship, creative work and professional accomplishment are essential to teaching and learning. The college is responsible for advancing understanding and increasing knowledge for its own sake, for the educational benefit of its students, and for the good of the larger community.

In both teaching and research, the College of Humanities and Sciences seriously upholds the responsibilities of being part of a public, metropolitan university. Through service and public teaching, the college meets the challenges and opportunities afforded by VCU's urban environment and by its location in the capital of the commonwealth.

The college achieves national and international recognition through the success of its students, the advancement of the disciplines and professions represented by its programs, and through the individual and collaborative research of its faculty.

Information concerning curricula is given in the individual program descriptions.

Minors and certificate programs

In addition to a major, a student may elect a minor area of study in any program or department offering such a program. The minor can be used to fulfill career needs or serve as a means for the student to study a discipline of secondary interest.

Students interested in pursuing a minor should discuss their intentions with their advisers or the chair of the major department. When the student decides on a minor, a change of major/minor form must be completed in the Office of Records and Registration. When the student files for graduation, the student must complete the minor application along with the graduation application.

Courses for the minor should be chosen from courses approved by departments offering minors in their areas. Generally, students cannot minor in the same area as their major.

A minor designation on the transcript requires a minimum of 18 credit hours and a minimum 2.0 GPA must be achieved in the minor. Prerequisites for courses are stated under course descriptions.

Detailed descriptions of each minor and certificate program appear in this bulletin.

Minors are offered in the following areas:

- African American studies
- African studies
- American studies
- anthropology
- Asian and Chinese studies
- biology
- British studies
- chemistry
- creative writing

- economics
- English
- European studies
- French
- gender, sexuality and women's studies
- German
- history
- international social justice studies
- Italian studies
- Latin American studies
- LGBT+ and queer studies
- mathematics
- media studies
- Middle Eastern and Islamic studies
- nonprofit management and administration
- philosophy
- philosophy of law
- physics
- political science
- professional writing and editing
- psychology
- public management
- religious studies
- Russian studies
- sociology
- Spanish
- statistics
- world cinema

Undergraduate certificates are awarded in the following areas and levels:

- Spanish/English translation and interpretation (baccalaureate certificate)
- statistics (post-baccalaureate undergraduate certificate)

Teacher preparation

Students in the College of Humanities and Sciences can apply to the Extended Teacher Preparation Program sponsored jointly with the School of Education. This program awards both a bachelor's degree from the College of Humanities and Sciences and a master's degree from the School of Education. Students who successfully complete this program will be certified to teach in early childhood, middle or secondary education.

Additional information on this five-year program is available at the School of Education's Office of Student Services in Room 3106, Oliver Hall, or by calling (804) 827-2670. A more thorough description of this program is found under the "School of Education" section of this bulletin and in the extended teacher preparation handbook available from the School of Education's Department of Teaching and Learning or the College of Humanities and Sciences dean's office.

Information about VCU students' performances on the state-mandated licensure tests (Praxis I: Reading, Writing and Mathematics and Praxis II: Specialty Area Tests) is available on the School of Education website: [soe.vcu.edu](http://www.soe.vcu.edu) (<http://www.soe.vcu.edu>).

Educational goals

The ultimate goal of a liberal arts education is to help students develop the abilities to think and continue their learning. These skills will aid students as they take their places in a world dominated by change. These abilities also will aid students in their future endeavors as they encounter problems, whether in their personal or professional lives or in their communities. Graduates of the College of Humanities and Sciences are broadly educated, not simply trained, allowing them to function as understanding participants in events rather than as spectators or even victims of those events.

To achieve this goal, the faculty of the College of Humanities and Sciences has identified the following specific requirements.

- Students should write well, organize their ideas, support them and communicate them clearly and effectively.
- Students should reason logically and be able to quantify experiences.
- Students should have knowledge of the fundamental ideas and methods of the natural sciences.
- Students should be able to analyze ethical conflicts.
- Students should have an understanding of literature and the other arts.
- Students should have knowledge of American heritage and those of other cultures, along with an introduction to a foreign language.
- Students should have a basic knowledge of human behavior and social, political and cultural institutions.

Academic advising

All freshmen majoring in areas offered within the College of Humanities and Sciences are advised through University Academic Advising. Please refer to the "Undergraduate study" section of this bulletin for further information on the first-year advising program (p. 57). After attaining sophomore standing, students within the College of Humanities and Sciences receive academic advising from within the department or school of their majors. The advising system for each department and school varies somewhat; however, each student is assigned an adviser according to their program of study. Students are encouraged to take full advantage of the educational and career-planning assistance provided by their assigned advisers. Ultimately, students are responsible for understanding all university and college requirements needed to earn a degree and for seeking out academic advising on a regular basis. The academic advisers provide assistance with interpreting policies, requirements and regulations, maximizing academic success, and enriching the overall undergraduate educational experience.

Graduation requirements

All baccalaureate degree programs in the College of Humanities and Sciences require students to complete a minimum of 120 credits. No more than four of those credits can be physical education/activity courses. See program descriptions for exact number of major credits (30 credit minimum) and elective courses to complete the total required 120 credits. For students majoring in a four-year bachelor's degree program within the College of Humanities and Sciences (including students in the pre-dental, pre-medical, pre-optometry, pre-veterinary and extended teacher preparation program classifications), there are three areas of requirements that must be completed for graduation:

1. University general education requirements (see departmental major sections for any additional ancillary requirements)¹
2. Departmental major requirements

3. Electives to complete the total of a minimum of 120 credits

¹ Each degree program within the College of Humanities and Sciences includes the ancillary requirements listed below. (Note: The fine arts and HUMS 202 requirements are waived if a previous degree or general education certificate has been completed, following the same guidelines for waiving general education requirements that are stated in the transfer policies section of this bulletin; and all three of these requirements are waived if a student is completing a primary degree program in an academic unit outside of the College of Humanities and Sciences.)

- Foreign language (0-8 credits): The study of a foreign language enhances students' appreciation for and knowledge of other cultures. Students who have studied a foreign language have cognitive development, creativity and divergent thinking. Students must complete a foreign language through the 102 level or equivalent through credit, placement testing or other demonstrated proficiency.
- Experiential fine arts (1-3 credits): Students involved in the fine arts gain a greater understanding of the cultural and aesthetic possibilities of the world around them. Students satisfy this requirement by the completion of one course offered by the School of the Arts.
- HUMS 202 (<http://bulletin.vcu.edu/search/?P=HUMS%20202>) (1 credit): An online personal finance course focusing on participatory, application-based exercises designed to arm students with the ability to make educated decisions in relation to future financial choices such as payment of student loans, understanding credit card statements, applying for mortgages, credit rating and planning for retirement.

Department of African American Studies

Mignonne Guy, Ph.D.

Associate professor and chair

afam.vcu.edu (<http://www.afam.vcu.edu>)

The Department of African American Studies at Virginia Commonwealth University provides an educationally rich environment in which students and scholars research, learn and teach about the past and present realities of people of African descent. Employing a wide range of theories, perspectives, methods and tools, departmental faculty explore social, political, economic and cultural realities and connections between the experiences of persons in Africa and throughout the African Diaspora. The department emphasizes experiential learning, offers study abroad opportunities and internships.

- African American Studies, Bachelor of Arts (B.A.) (p. 162)
- African American Studies, Bachelor of Arts (B.A.) with a concentration in artistic, historical and literary perspectives (p. 165)
- African American Studies, Bachelor of Arts (B.A.) with a concentration in (p. 167) political, religious and societal perspectives (p. 167)
- African American Studies, Bachelor of Arts (B.A.) with a concentration in (p. 169) social and behavioral perspectives (p. 169)
- African American studies, minor in (p. 171)

African American Studies, Bachelor of Arts (B.A.)

The Bachelor of Arts in African American Studies is an interdisciplinary degree that provides students with knowledge of human cultures and intellectual and practical skills to engage complexity, diversity and change. The degree program fosters students' personal and social responsibility and, through applied learning experiences, empowers students to negotiate and to solve the complex problems of the 21st century. African American studies majors often pursue graduate and professional degree programs in business, education, history, international relations, law, political science, psychology, public health and social work. Career opportunities with a B.A. only in African American Studies include employment in community health agencies, public and private schools and nonprofit organizations.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- 1. Define Black experiences across the African Diaspora.**
The program aims for each major to demonstrate knowledge of the major concepts, perspectives and theories in Africana studies. This knowledge includes an understanding of the intellectual origins and extant and emergent interdisciplinary scholarship that provide context, definition and form to the collective experiences of persons of African descent.
- 2. Document and measure Black experiences across the African Diaspora.**
The program aims for each major to demonstrate analytical skills that enable them to compare and contrast the utility of qualitative and quantitative approaches in Africana studies and critical-thinking skills that allow them to assess the cultural, political and social implication of such approaches when measuring the experiences of people across Africa and its Diaspora.
- 3. To interpret Black experiences across the African Diaspora.**
The program aims for each major to demonstrate an awareness of the interpretive frameworks that give meaning to Black experiences across the Diaspora. This awareness includes recognition of the intersectionality of artistic, cultural and historical perspectives; gendered, political and religious perspectives; and social and behavioral perspectives.
- 4. To affirm and validate Black experiences across the African Diaspora.**
The program aims for each major to demonstrate the ability to critically engage and to propose integrity-based solutions to novel problems that impact persons of African descent and their communities.

Special requirements

Majors in African American Studies must meet the general education requirements of the College of Humanities and Sciences. The Bachelor of Arts in African American Studies requires the completion of 120 credits with at least 30 credits in African American Studies courses. At least 15 of the 30 credits in African American Studies must be in upper-level courses. Students also are required to establish an area of study by taking either a minimum of four courses in a single cooperating department or in one of the following multidisciplinary concentrations: artistic, historical and literary perspectives; political, religious and societal perspectives; or social and behavioral perspectives. At least one of the four courses taken in a single cooperating department must have

an Africana focus, and at least one of the four courses must be an upper-level course.

A cooperating department or program is defined as one that regularly offers at least one course with an Africana focus per year, which includes: Anthropology, Dance, English, Gender, Sexuality and Women's Studies, Geography, History, Mass Communications, Music history, Political Science, Psychology, Religious Studies, Sociology, and Theatre. When non-Africana-focused courses are used to meet the concentration requirement, they must be selected in consultation with the African American studies adviser

Degree requirements for African American Studies, Bachelor of Arts (B.A.)

Course	Title	Hours
General education (p. 77)

African American Studies, Bachelor of Arts (B.A.) with a concentration in artistic, historical and literary perspectives

The Bachelor of Arts in African American Studies is an interdisciplinary degree that provides students with knowledge of human cultures and intellectual and practical skills to engage complexity, diversity and change. The degree program fosters students' personal and social responsibility and, through applied learning experiences, empowers students to negotiate and to solve the complex problems of the 21st century. African American studies majors often pursue graduate and professional degree programs in business, education, history, international relations, law, political science, psychology, public health and social work. Career opportunities with a B.A. only in African American Studies include employment in community health agencies, public and private schools and nonprofit organizations.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- **Define Black experiences across the African Diaspora.**
We aim for each of our majors to demonstrate knowledge of the major concepts, perspectives and theories in Africana studies. This knowledge includes an understanding of the intellectual origins and extant and emergent interdisciplinary scholarship that provide context, definition and form to the collective experiences of persons of African descent.
- **Document and measure Black experiences across the African Diaspora.**

We aim for each of our majors to demonstrate analytical skills that enable them to compare and contrast the utility of qualitative and quantitative approaches in Africana studies and critical-thinking skills that allow them to assess the cultural, political and social implications of such approaches when measuring the experiences of people across Africa and its Diaspora.

- **To interpret Black experiences across the African Diaspora.**
We aim for each of our majors to demonstrate an awareness of the interpretive frameworks that give meaning to Black experiences across the Diaspora. This awareness includes recognition of the intersectionality of artistic, cultural and historical perspectives; gendered, political and religious perspectives; and social and behavioral perspectives.
- **To affirm and validate Black experiences across the African Diaspora.**
We aim for each of our student majors to demonstrate the ability to critically engage and to propose integrity-based solutions to novel problems that impact persons of African descent and their communities

Special requirements

Majors in African American studies must meet the general education requirements of the College of Humanities and Sciences. The Bachelor of Arts in African American Studies requires the completion of 120 credits with at least 30 credits in African American Studies courses. At least 15 of the 30 credits in African American Studies must be in upper-level courses.

Students also are required to establish an area of study by taking a minimum of four courses in the artistic, historical and literary perspectives concentration. At least one of the four courses must be an upper-level course.

Open electives		12
Term Hours:		15
Total Hours:		120-123

1

Any one of GSWS 393, POLI 320, PSYC 317, SOCY 320 or SLWK 380 may be substituted for this course if completed with a minimum grade of C.

The minimum number of credit hours required for this degree is 120.

African American Studies, Bachelor of Arts (B.A.) with a concentration in political, religious and societal perspectives

The Bachelor of Arts in African American Studies is an interdisciplinary degree that provides students with knowledge of human cultures and intellectual and practical skills to engage complexity, diversity and change. The degree program fosters students' personal and social responsibility and, through applied learning experiences, empowers students to negotiate and to solve the complex problems of the 21st century. African American studies majors often pursue graduate and professional degree programs in business, education, history, international relations, law, political science, psychology, public health and social work. Career opportunities with a B.A. only in African American Studies include employment in community health agencies, public and private schools and nonprofit organizations.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- **Define Black experiences across the African Diaspora.**
We aim for each of our majors to demonstrate knowledge of the major concepts, perspectives and theories in Africana studies. This knowledge includes an understanding of the intellectual origins

and extant and emergent interdisciplinary scholarship that provide context, definition and form to the collective experiences of persons of African descent.

- **Document and measure Black experiences across the African Diaspora.**
We aim for each of our majors to demonstrate analytical skills that enable them to compare and contrast the utility of qualitative and quantitative approaches in Africana studies and critical-thinking skills that allow them to assess the cultural, political and social implications of such approaches when measuring the experiences of people across Africa and its Diaspora.
- **To interpret Black experiences across the African Diaspora.**
We aim for each of our majors to demonstrate an awareness of the interpretive frameworks that give meaning to Black experiences across the Diaspora. This awareness includes recognition of the intersectionality of artistic, cultural and historical perspectives; gendered, political and religious perspectives; and social and behavioral perspectives.
- **To affirm and validate Black experiences across the African Diaspora.**
We aim for each of our student majors to demonstrate the ability to critically engage and to propose integrity-based solutions to novel problems that impact persons of African descent and their communities.

Special requirements

Majors in African American studies must meet the general education requirements of the College of Humanities and Sciences. The Bachelor of Arts in African American Studies requires the completion of 120 credits with at least 30 credits in African American Studies courses. At least 15 of the 30 credits in African American Studies must be in upper-level courses.

Students also are required to establish an area of study by taking a minimum of four courses in the political, religious and societal perspectives concentration. At least one of the four courses must be an upper-level course.

The minimum number of credit hours required for this degree is 120.

African American studies, minor in

The minor in African American studies requires a minimum of 18 credits. Students must complete the following:

Course	Title	Hours
AFAM 111	Play course video for Introduction to Africana Studies	3
AFAM 201	Theories and Foundations of Africana Studies	3
AFAM 211	Africana Social and Political Thought	3
AFAM 311	African Diaspora Experiences	3
	Select one course at the 300-level or above from two of the following concentration areas: ¹	6
	Artistic, historical and literary perspectives	
	Political, religious, and societal perspective	
	Social and behavioral perspectives	

1

Refer to list of courses in the respective concentrations.

Courses in African American studies are designed to help students gain a knowledge and appreciation of the history and culture of the Africana world and its contributions to world civilizations.

Department of Biology

Derek Johnson, Ph.D.

Associate professor and chair

Fernando Tenjo, Ph.D.

Associate professor and associate chair

Maria Rivera, Ph.D.

Associate professor and director of graduate studies

biology.vcu.edu (<http://biology.vcu.edu/>)

The Department of Biology offers programs leading to baccalaureate, master's and doctoral degrees; the doctoral degree is offered through the Ph.D. in Integrative Life Sciences program. Students may specialize within many areas, such as molecular and cellular biology, genetics, aquatic and terrestrial ecology, systematics, physiology, neurobiology, and developmental biology. Students also may develop an interdisciplinary focus to their degree program, for example within areas such as bioinformatics, cancer biology, forensic science and environmental science.

In addition to the courses offered by the Department of Biology, graduate students may enroll in graduate courses offered through VCU Life Sciences and these departments in the VCU School of Medicine: Anatomy and Neurobiology, Biochemistry and Molecular Biology, Biostatistics, Human and Molecular Genetics, Microbiology and Immunology, Pathology, Pharmacology and Toxicology, and Physiology and Biophysics. Visit the Department of Biology's website (<http://biology.vcu.edu/>) for additional information.

- Biology, Bachelor of Science (B.S.) (p. 172)
- Biology, minor in (p. 175)

Biology, Bachelor of Science (B.S.)

The four-year curriculum in biology prepares students for graduate study in biology, for employment in laboratory or field programs in private industry or government agencies and for teaching in secondary schools. This curriculum also prepares students for admission into schools of medicine, dentistry and veterinary medicine, and into allied health programs.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

Knowledge base

Students will demonstrate knowledge of evolutionary processes and the functions and interactions of cells, organisms and species.

Communication skills

Students will demonstrate oral and written communication skills needed for professional careers in the field of biology.

Critical-thinking skills

Students will demonstrate critical thinking, problem-solving and analytical skills.

Method and inquiry

Students will demonstrate knowledge in the methods of inquiry and research in biology.

Transfer students

Transfer students intending to major in biology must satisfy all biology major course requirements and complete a minimum of 15 credits of VCU biology courses at the 300-, 400- or 500-level.

Extended Teacher Preparation Program

Biology majors interested in teaching careers in secondary education can enroll in the Extended Teacher Preparation Program, which simultaneously awards a bachelor's degree in biology and a master's degree in teaching. For more information about this program, jointly administered by the College of Humanities and Sciences and the School of Education, contact the School of Educations Student Services Center.

Honors in biology

Biology majors may graduate with honors in biology. To qualify, students must have overall and biology GPAs of at least 3.5 and must complete the following courses in this sequence: BIOL 392, at least four credits of BIOL 495 and BIOL 490. Grades of A or B must be earned in each of the listed courses. Students who qualify will have the notation "Honors in Biology" placed on their transcript. Students must meet all Department of Biology requirements for graduation. Students should consult with their academic advisers to create a program suitable to their particular needs and interests.

Special requirements

The curriculum for a Bachelor of Science in Biology requires a minimum of 120 credits, with at least 40 of those credits in biology or other approved courses. A cumulative GPA of 2.0 for biology courses is required. At least five laboratory experiences must be taken from all biology courses, including BIOZ 151 and BIOZ 152; up to two laboratory experiences can be selected from BIOZ 395, BIOL 451, BIOL 453, BIOL 492 or BIOL 495. Topics courses (BIOL 391, BIOZ 391, BIOL 491 and BIOZ 491) may count as laboratory experiences only when approved in advance by the Department of Biology undergraduate academic committee. Registration in BIOZ 395, BIOL 492 or BIOL 495 must be for a minimum of two credit hours to count as one of the **five** required laboratory experiences. A maximum total of six credits for all undergraduate research and internships in biology (BIOZ 395, BIOL 395, BIOL 451, BIOL 453, BIOL 492, BIOL 493 and BIOL 495) may be applied to the 40 credits of Biology required for the major. Additional credits from these courses may be applied to upper level and open elective credits toward the degree. A maximum of four combined credits from BIOL 496 and BIOL 499 may be applied to degree requirements. While BIOL 496 may be repeated for credit toward degree requirements when serving as a preceptorship for different courses, it may not be repeated with the same course for credit toward the degree. No more than five credits of the 100-level (or introductory level) biology courses can be applied to the major.

A minimum grade of C in the following courses is required for enrollment in all courses for which they are prerequisites and to successfully complete the B.S. in Biology.

Course	Title	Hours

Term Hours: 14-18

Total Hours: 120-131

The minimum number of credit hours required for this degree is 120.

Biology, minor in

The minor in biology requires a minimum of 20 credits in biology, including the following:

Course	Title	Hours
Biology core courses		
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4
Select three courses from the following options:		9
BIOL 200	Quantitative Biology	
BIOL 300	Cellular and Molecular Biology	
BIOL 310	Genetics	
BIOL 317	Ecology	
BIOL 318	Evolution	

Select an additional three credits in biology at the upper level, at least one of which must be a biology laboratory experience. 3

Total Hours 20

Only courses applicable toward the B.S. in Biology can be applied toward the minor in biology. For a list of approved biology electives, see "Biology, Bachelor of Science (B.S.) (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/biology/biology-bs/#degreerequirementstext>)" (<http://bulletin.vcu.edu/undergraduate/college-humanities-sciences/biology/biology-bs/>) in the Undergraduate Bulletin.

A minimum GPA of 2.0 is required for all courses applicable to the minor. A minimum of nine upper-level biology credits must be taken at VCU.

BNFO 251/LFSC 251 and BNFO 252/LFSC 252 are approved course substitutes for BIOZ 151 and BIOZ 152, respectively.

Professor and chair

chemistry.vcu.edu (<https://chemistry.vcu.edu/>)

The Department of Chemistry offers programs leading to the Bachelor of Science, Master of Science and Doctor of Philosophy degrees. For undergraduate students, the Bachelor of Science offers concentrations in chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling.

For graduate students, the Master of Science and Doctor of Philosophy programs provide opportunities for concentrated study in analytical, inorganic, organic or physical chemistry, or chemical physics. A plan of study is worked out for each student to ensure a sound basis for research. In keeping with the university's commitment as an urban institution, the department also offers part-time programs leading to these degrees.

Refer to the department's website (<https://chemistry.vcu.edu/>) for more information.

- Chemistry, Bachelor of Science (B.S.) with a concentration in:
 - Biochemistry (p. 176)
 - Chemical modeling (p. 179)
 - Chemical science (p. 181)
 - Professional chemist (p. 185)
 - Professional chemist with honors (p. 187)
- Chemistry, minor in (p. 190)

Chemistry, Bachelor of Science (B.S.) with a concentration in biochemistry

The curriculum in chemistry prepares students for graduate study in chemistry and related fields and for admission to schools of medicine, dentistry, pharmacy and veterinary medicine. It prepares students to teach in secondary schools or to work in chemical and industrial laboratories and in related fields of business and industry. The

department also offers required and elective courses in chemistry to students in other programs of study.

The Department of Chemistry offers five areas of concentration for completing the Bachelor of Science in Chemistry: chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling. With proper selection of electives, the degree satisfies admission requirements to most schools of medicine, dentistry, pharmacy and veterinary medicine.

The biochemistry concentration focuses on the biological aspects of chemistry, including molecular genetics and molecular biotechnology. This degree is another option for students planning to study medicine or dentistry.

Student learning outcomes

- Demonstrate student expertise in analytical, inorganic, organic and physical chemistry. Proficiency in the major concepts and theoretical principles of chemistry, especially the relationship between molecular structure and function. Demonstrate critical thinking and problem solving skills, such as the ability to perform calculations necessary to describe and model chemical phenomena.
- Develop of appropriate written and oral communication skills needed to explain chemical phenomena including summary reports, research papers, notebook writing, use of the chemical literature, group discussion during class and oral presentations.
- Demonstrate competency in laboratory skills in three areas: bench-top chemistry skills, usage of state-of-the-art instrumentation and computer usage.
- Demonstrate an understanding of the need for ethical practices in chemistry and an awareness of the practice of chemistry and the issues facing chemists and society. Focus on professionalism and career preparation..
- Demonstrate proficiency in proper procedures and regulations for safe handling and use of chemicals.
- Demonstrate proficiency in scientific literacy skills including searching, reading and critically reviewing, scientific publications.
- Demonstrate proficiency in information processing by generating and interpreting data represented in tables, graphs, drawings and models.

Special requirements

Students must complete 44-45 credits in chemistry and related courses and 44-46 credits of ancillary requirements in addition to general education requirements.

A minimum grade of C is required in each prerequisite course, except for CHEM 100, which requires a minimum grade of B.

Course	Title	Hours
CHEM 100	Introductory Chemistry (if required through placement qualifiers)	3
CHEM 101	General Chemistry I	3
CHEM 102	General Chemistry II	3
CHEM 301	Organic Chemistry	3
CHEM 302	Organic Chemistry	3
CHEM 309	Quantitative Analysis	3
CHEM 313	Physical Chemistry I	3
or CHEM 314	Physical Chemistry I with Math Modules	
CHEZ 101	General Chemistry Laboratory I	1

CHEZ 102	General Chemistry Laboratory II	1
CHEZ 301	Organic Chemistry Laboratory I	2
CHEZ 302	Organic Chemistry Laboratory II	2
CHEZ 309	Quantitative Analysis Laboratory	2

VCU students in other programs who wish to declare chemistry as their major must complete CHEM 101, CHEZ 101, CHEM 102 and CHEZ 102, each with a minimum grade of C and have a minimum GPA in their chemistry courses of 2.0.

Chemistry, Bachelor of Science (B.S.) with a concentration in chemical modeling

The curriculum in chemistry prepares students for graduate study in chemistry and related fields and for admission to schools of medicine, dentistry, pharmacy and veterinary medicine. It prepares students to teach in secondary schools or to work in chemical and industrial laboratories and in related fields of business and industry. The department also offers required and elective courses in chemistry to students in other programs of study.

The Department of Chemistry offers five areas of concentration for completing the Bachelor of Science in Chemistry: chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling. With proper selection of electives, the degree satisfies admission requirements to most schools of medicine, dentistry, pharmacy and veterinary medicine.

The chemical modeling concentration emphasizes areas of overlap between chemistry and the mathematical sciences and computer science. Students in this concentration will focus on learning the chemistry and computer technology for modeling the structure, properties and reactivity of molecules.

Student learning outcomes

- Demonstrate student expertise in analytical, inorganic, organic and physical chemistry. Proficiency in the major concepts and theoretical principles of chemistry, especially the relationship between molecular structure and function. Demonstrate critical thinking and problem solving skills, such as the ability to perform calculations necessary to describe and model chemical phenomena.
- Develop of appropriate written and oral communication skills needed to explain chemical phenomena including summary reports, research papers, notebook writing, use of the chemical literature, group discussion during class and oral presentations.
- Demonstrate competency in laboratory skills in three areas: bench-top chemistry skills, usage of state-of-the-art instrumentation and computer usage.
- Demonstrate an understanding of the need for ethical practices in chemistry and an awareness of the practice of chemistry and the issues facing chemists and society. Focus on professionalism and career preparation..
- Demonstrate proficiency in proper procedures and regulations for safe handling and use of chemicals.
- Demonstrate proficiency in scientific literacy skills including searching, reading and critically reviewing, scientific publications.
- Demonstrate proficiency in information processing by generating and interpreting data represented in tables, graphs, drawings and models.

Special requirements

Students must complete 39-40 credits in chemistry and related major courses and 47 credits of ancillary requirements in addition to general education requirements.

A minimum grade of C is required in each prerequisite course except for CHEM 100, which requires a minimum of B.

Chemistry, Bachelor of Science (B.S.) with a concentration in chemical science

The curriculum in chemistry prepares students for graduate study in chemistry and related fields and for admission to schools of medicine, dentistry, pharmacy and veterinary medicine. It prepares students to teach in secondary schools or to work in chemical and industrial laboratories and in related fields of business and industry. The department also offers required and elective courses in chemistry to students in other programs of study.

The Department of Chemistry offers five areas of concentration for completing the Bachelor of Science in Chemistry: chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling. With proper selection of electives, the degree satisfies admission requirements to most schools of medicine, dentistry, pharmacy and veterinary medicine.

The chemical science concentration is tailored for the pre-professional study of the health sciences and other interdisciplinary areas where an emphasis on chemistry is sought. This concentration for the bachelor's degree in chemistry permits students to select more courses from other disciplines. With fewer requirements in mathematics, physics and chemistry, this concentration is one option for students planning to study medicine or dentistry.

Student learning outcomes

- Demonstrate student expertise in analytical, inorganic, organic and physical chemistry. Proficiency in the major concepts and theoretical principles of chemistry, especially the relationship between molecular structure and function. Demonstrate critical thinking and problem solving skills, such as the ability to perform calculations necessary to describe and model chemical phenomena.
- Develop of appropriate written and oral communication skills needed to explain chemical phenomena including summary reports, research papers, notebook writing, use of the chemical literature, group discussion during class and oral presentations.
- Demonstrate competency in laboratory skills in three areas: bench-top chemistry skills, usage of state-of-the-art instrumentation and computer usage.
- Demonstrate an understanding of the need for ethical practices in chemistry and an awareness of the practice of chemistry and the issues facing chemists and society. Focus on professionalism and career preparation..
- Demonstrate proficiency in proper procedures and regulations for safe handling and use of chemicals.
- Demonstrate proficiency in scientific literacy skills including searching, reading and critically reviewing, scientific publications.
- Demonstrate proficiency in information processing by generating and interpreting data represented in tables, graphs, drawings and models.

Special requirements

Students must complete 36-37 credits in chemistry and 33-35 credits of ancillary requirements in addition to general education requirements.

A minimum grade of C is required in each prerequisite course except for CHEM 100, which requires a minimum grade of B.

Open electives	14

Term Hours: 15-17

Total Hours: 120-125

1

Students in this concentration meet the capstone requirement by taking at least one two-credit 400-level CHEZ course or two credits of CHEM 392 (<http://bulletin.vcu.edu/search/?P=CHEM%20392>) or CHEM 492 (<http://bulletin.vcu.edu/search/?P=CHEM%20492>) and at least one three-credit 400- or 500-level CHEM course from the electives list.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Chemistry in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count nine hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 141 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have had advanced training in chemistry through a combination of laboratory and classroom work and gained important professional development skills. Students may have the ability to design and incorporate graduate courses in another discipline as part of the accelerated program based on their career objectives. The goal of the accelerated program is to significantly enhance the student's qualifications to pursue a career in industry, teaching or the government. Alternatively, students who distinguish themselves may be able to pursue advanced study at the doctoral level in chemistry or chemical biology on an accelerated timetable.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including CHEM 313 or CHEM 314, CHEZ 313, CHEM 315, CHEM 320, CHEM 302 and CHEZ 302, and CHEM 309 and CHEZ 309; a minimum overall GPA of 3.0; and a minimum GPA of 3.25 in chemistry course work. Successful applicants would enter the program in the fall semester of their senior year.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The graduate admissions committee in chemistry will evaluate the application and make a recommendation to the graduate school for admission. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following completion of their junior year, but no later than May 15 of that year. Three reference letters (at least one from a chemistry faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the graduate faculty adviser to the chemistry master's program before they have completed 60 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate chemistry adviser and the faculty adviser to the chemistry graduate program.

Degree requirements

The Bachelor of Science in Chemistry with a concentration in chemical science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree

requirements as stated in the Undergraduate Bulletin. Students in the accelerated program will be required to take CHEM 409 and CHEZ 409 during the fall semester of senior year, as well as three credits of CHEM 392 or CHEM 492 each semester of the senior year in lieu of some elective course work.

A maximum of nine graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will substitute as open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

Undergraduate students admitted to the accelerated program may select nine credits from the four approved courses below.

Course	Title	Hours
CHEM 504	Advanced Organic Chemistry I	3
CHEM 510	Atomic and Molecular Structure	3
CHEM 511	Chemical Thermodynamics and Kinetics	3
CHEM 520	Advanced Inorganic Chemistry	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students in the chemical science concentration in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
CHEM 313 or CHEM 314	Physical Chemistry I Physical Chemistry I with Math Modules	3-4
CHEZ 313	Physical Chemistry Laboratory I (if taken)	2

Term Hours:	10	

Chemistry, Bachelor of Science (B.S.) with a concentration in professional chemist

The curriculum in chemistry prepares students for graduate study in chemistry and related fields and for admission to schools of medicine, dentistry, pharmacy and veterinary medicine. It prepares students to teach in secondary schools or to work in chemical and industrial laboratories and in related fields of business and industry. The department also offers required and elective courses in chemistry to students in other programs of study.

The Department of Chemistry offers five areas of concentration for completing the Bachelor of Science in Chemistry: chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling. With proper selection of electives, the degree satisfies admission requirements to most schools of medicine, dentistry, pharmacy and veterinary medicine.

The professional chemist concentration requires a greater number of chemistry courses, and is designed for students whose future studies or career plans involve chemistry as a central theme. With the proper combination of courses, this degree can be certified as meeting the requirements of the American Chemical Society.

Student learning outcomes

- Demonstrate student expertise in analytical, inorganic, organic and physical chemistry. Proficiency in the major concepts and theoretical principles of chemistry, especially the relationship between molecular structure and function. Demonstrate critical thinking and problem solving skills, such as the ability to perform calculations necessary to describe and model chemical phenomena.
- Develop of appropriate written and oral communication skills needed to explain chemical phenomena including summary reports, research papers, notebook writing, use of the chemical literature, group discussion during class and oral presentations.
- Demonstrate competency in laboratory skills in three areas: bench-top chemistry skills, usage of state-of-the-art instrumentation and computer usage.

- Demonstrate an understanding of the need for ethical practices in chemistry and an awareness of the practice of chemistry and the issues facing chemists and society. Focus on professionalism and career preparation..
- Demonstrate proficiency in proper procedures and regulations for safe handling and use of chemicals.
- Demonstrate proficiency in scientific literacy skills including searching, reading and critically reviewing, scientific publications.
- Demonstrate proficiency in information processing by generating and interpreting data represented in tables, graphs, drawings and models.

Special requirements

Students must complete 48-49 credits in chemistry and 28-36 credits of ancillary requirements in addition to general education requirements.

A minimum grade of C is required in each prerequisite course except for CHEM 100, which requires a minimum grade of B:

Course	Title	Hours
CHEM 100	Introductory Chemistry (if required through placement qualifiers)	3
CHEM 101	General Chemistry I	3
CHEM 102	General Chemistry II	3
CHEM 301	Organic Chemistry	3
CHEM 302	Organic Chemistry	3
CHEM 309	Quantitative Analysis	3
CHEM 313	Physical Chemistry I	3
or CHEM 314	Physical Chemistry I with Math Modules	
CHEZ 101	General Chemistry Laboratory I	1
CHEZ 102	General Chemistry Laboratory II	1
CHEZ 301	Organic Chemistry Laboratory I	2
CHEZ 302	Organic Chemistry Laboratory II	2
CHEZ 309	Quantitative Analysis Laboratory	2

VCU students in other programs who wish to declare chemistry as their major must complete CHEM 101, CHEZ 101, CHEM 102 and CHEZ 102, each with a minimum grade of C and have a minimum GPA in their chemistry courses of 2.0.

Students in this concentration meet the capstone requirement by taking at least one two-credit 400-level CHEZ course or two credits of CHEM 392 or CHEM 492 and at least one three-credit 400- or 500-level CHEM course from the electives list. Note course recommendations in the plan of study.

The minimum number of credit hours required for this degree is 120.

Chemistry, Bachelor of Science (B.S.) with a concentration in professional chemist with honors

The curriculum in chemistry prepares students for graduate study in chemistry and related fields and for admission to schools of medicine, dentistry, pharmacy and veterinary medicine. It prepares students to teach in secondary schools or to work in chemical and industrial laboratories and in related fields of business and industry. The department also offers required and elective courses in chemistry to students in other programs of study.

The Department of Chemistry offers five areas of concentration for completing the Bachelor of Science in Chemistry: chemical science, professional chemist, professional chemist with honors, biochemistry and chemical modeling. With proper selection of electives, the degree satisfies admission requirements to most schools of medicine, dentistry, pharmacy and veterinary medicine.

Student learning outcomes

- Demonstrate student expertise in analytical, inorganic, organic and physical chemistry. Proficiency in the major concepts and theoretical principles of chemistry, especially the relationship between molecular structure and function. Demonstrate critical thinking and problem solving skills, such as the ability to perform calculations necessary to describe and model chemical phenomena.
- Develop of appropriate written and oral communication skills needed to explain chemical phenomena including summary reports, research papers, notebook writing, use of the chemical literature, group discussion during class and oral presentations.

- Demonstrate competency in laboratory skills in three areas: bench-top chemistry skills, usage of state-of-the-art instrumentation and computer usage.
- Demonstrate an understanding of the need for ethical practices in chemistry and an awareness of the practice of chemistry and the issues facing chemists and society. Focus on professionalism and career preparation..
- Demonstrate proficiency in proper procedures and regulations for safe handling and use of chemicals.
- Demonstrate proficiency in scientific literacy skills including searching, reading and critically reviewing, scientific publications.
- Demonstrate proficiency in information processing by generating and interpreting data represented in tables, graphs, drawings and models.

Special requirements

The professional chemist with honors concentration is an intensive, research-based option for students interested in developing a research focus. This option requires a 3.0 GPA in chemistry to be maintained after completing eight credits of chemistry courses. As part of the requirement for completing this concentration, an honors thesis is written and the work is presented as a seminar in the Department of Chemistry. With the proper combination of courses, this degree can be certified as meeting the requirements of the American Chemical Society.

CHEM 403 and CHEM 406 and CHEZ 406 and CHEM 409 and CHEZ 409 are required to satisfy the requirements for the American Chemical Society certification of the professional chemist concentration. MATH 307 also is required for the American Chemical Society certification.

Students must complete 46-47 credits in chemistry and 36 credits of ancillary requirements in addition to general education requirements. A minimum grade of C is required in each prerequisite course except for CHEM 100, which requires a minimum of B.

Course	Title	Hours
CHEM 100	Introductory Chemistry (if required through placement qualifiers)	3
CHEM 101	General Chemistry I	3

CHEM 302 & CHEZ 302	Organic Chemistry and Organic Chemistry Laboratory II	5
Select one additional three-credit upper-level (300-400) chemistry course		3
Total Hours		21

A minimum of nine upper-level chemistry credits must be taken at VCU. Consult course descriptions for prerequisites in mathematics and physics.

Department of English

Catherine Ingrassia, Ph.D.
Professor and chair

Sachi Shimomura, Ph.D.
Associate professor and associate chair

Gretchen Comba
Teaching associate professor and director of undergraduate studies

Jennifer Rhee, Ph.D.
Associate professor and director of the M.A. program

David Wojahn
Professor and director of the creative writing program

Oliver C. Speck, Ph.D.
Associate professor of film studies and director of the MATX program
[english.vcu.edu](http://www.english.vcu.edu) (<http://www.english.vcu.edu>)

The purpose of the Department of English is to teach students to see their worlds with clarity and respond to them with sensitivity, through reading and writing. Students are invited to read and explore a diversity of texts created in different times and voices and then to respond to these texts variously and critically, situating them within their contexts and discerning their important aesthetic features, rhetorical elements and social functions.

Students in this department also are encouraged to express themselves in expository or imaginative works that engage thought and feeling, evince purpose clearly, marshal appropriate evidence and observe principles of rhetorical decorum.

The Department of English offers a Bachelor of Arts in English, as well as minors in American studies, British studies, English (for non-English majors), creative writing, professional writing and editing; the Master of Arts in English and the Master of Fine Arts in Creative Writing; and a doctoral program leading to a Ph.D. in Media, Art, and Text. Use the program index links to view individual program descriptions and curricula, or visit the department's website (<http://www.english.vcu.edu>) for additional information.

- English, Bachelor of Arts (B.A.) (p. 190)
- American studies, minor in (p. 194)
- British studies, minor in (p. 195)
- Creative writing, minor in (p. 195)
- English, minor in (p. 196)
- Professional writing and editing, minor in (p. 197)

English, Bachelor of Arts (B.A.)

The Bachelor of Arts program in English requires a minimum of 120 credits, with at least 33 upper-level (numbered 300 to 499) credits in the major. Six of the 33 credits may be taken in upper-level foreign literature read in the original language or upper-level foreign literature in English translation (FLET). UNIV 111 and UNIV 112 (or equivalent) and a 200-level literature course (or equivalent) do not count toward the major.

English majors must take a minimum of nine credits at the 400 level, including the senior seminar, ENGL 499. Students may expect 300-level courses in the department to emphasize historical breadth,

while 400-level courses will offer in-depth focus. ENGL 410-ENGL 414, ENGL 480-ENGL 485 and ENGL 499 will include British, American or other literatures (world, transatlantic, etc.). For specific topics, see the Schedule of Classes; majors are encouraged to choose 400-level courses from more than one literary tradition (British, American, other literatures).

Program goals and student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Read closely a wide variety of texts from diverse traditions and recognize how texts are shaped by historical, geographical and generic contexts
 - Learning outcome 1: Employ strategies for interpreting form and ideas through close reading in order to build knowledge of human experience
 - Learning outcome 2: Demonstrate competence at synthesizing ideas within given contexts and perspectives
- Write clear and effective compositions that reflect their understanding of literary genres, critical perspectives and rhetorical purposes
 - Learning outcome 3: Evince a thorough understanding of context, audience and purpose
 - Learning outcome 4: Organize and synthesize ideas to reveal insightful patterns related to the focus of the writing assignment
- Employ various strategies for research in order to write persuasive essays
 - Learning outcome 5: Demonstrate discernment at engaging high-quality, credible, relevant sources as parts of published scholarly conversations
 - Learning outcome 6: Integrate evidence into a well-structured, logical argument

1

No single course may be used to satisfy two of these requirements.

Required electives/optional focus

As part of the English major, electives allow students to take courses of particular interest to them. Electives may not be used to satisfy any other requirements for the major, except ENGL 499. In consultation with an adviser, students are encouraged to cluster their elective courses in one of the following focus areas.

- Literary studies (including courses grouped by historical period, genre, region, national and minority traditions, thematics, literary movement, literary influence, etc.)

- Writing (including both expository and creative writing)
- Criticism and theory (including approaches to literature, form and theory courses, etc.)
- Cultural studies (including courses that focus on race, class, gender, ethnicity, film, popular culture, etc.)
- Linguistics (including courses that focus on history of the language, cross-cultural communications, etc.)

Students are advised to consult the full listing and description of English courses before planning their elective courses.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
	video for Focused Inquiry I	
	Foreign language 101	3
	General education course (select quantitative foundations; MATH 131 or STAT 208 recommended)	3
	General education course (select BOK for humanities/ fine arts and AOI for creativity, innovation and aesthetic inquiry)	3
	General education course (select BOK for social/ behavioral sciences and AOI for diversities in human experience)	3
Term Hours:		15

Spring semester

HUMS 202	Choices in a Consumer Society	1
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
	video for Focused Inquiry II	
	Experiential fine arts	1-3
	Foreign language 102	3
	General education course (select AOI for global perspectives)	3
	General education course (select BOK for natural science and AOI for scientific and logical reasoning)	3
Term Hours:		14-16

Sophomore year

Fall semester		Hours
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
	General education course (select any AOI)	3
	General education course (select any AOI)	3
	Literary contexts: literary history and culture course (from list) or foreign language (201)	3
	Open elective	3
Term Hours:		15

Spring semester

ENGL 301	Introduction to the English Major	3
	Linguistics, writing or criticism (from list)	3
	Literary contexts: literary history and culture course (from list) or foreign language (202 or 205)	3
	Literature between 1700 and 1945 (from list)	3
	Open electives	4
Term Hours:		16

Junior year

Fall semester		Hours
	Linguistics, writing or criticism (from list)	3
	Literature of diversity (from list)	3
	Literature prior to 1700 (from list)	3
	Open electives	6
Term Hours:		15

Spring semester

	ENGL 400-level elective	3
	Literature prior to 1700 (from list)	3
	Literature between 1700 and 1945 (from list)	3
	Open electives	6
Term Hours:		15

Senior year

Fall semester		Hours
	ENGL 400-level elective	3
	Open electives	12
Term Hours:		15
Spring semester		Hours
	ENGL 499 Senior Seminar in English	3
	Open electives	12
Term Hours:		15
Total Hours:		120-122

The minimum number of credit hours required for this degree is 120.

Accelerated B.A. and M.A.

The accelerated B.A. and M.A. program allows qualified students to earn both the B.A. and M.A. in English in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count a maximum of 12 credit hours of graduate courses toward both the B.A. and M.A. degrees. Thus, the two degrees may be earned with a minimum of 138 credits rather than the 150 credits necessary if the two degrees are pursued separately.

The accelerated M.A. in English program is designed for students who wish for continued study of and competency in the discipline and/or are considering a Ph.D. in English.

Admission to the program

Minimum qualifications for admittance to the program include completion of at least 60 and no more than 75 undergraduate credit hours including ENGL 301 and a minimum of three courses at the 300 or 400 level (completion of a course in the 480s is strongly recommended) or permission of the chair; an overall GPA of 3.0; and a GPA of 3.5 in English course work. Successful applicants would enter the program in the fall semester of their senior year.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following completion of their junior year, but no later than March 1 of that year. A minimum of two letters of reference (at least one from an English faculty member) and a paper of any length written in a 300- or 400-level English course that demonstrates the student's commitment to the discipline must accompany the application. Students who are interested in the accelerated program should consult with the either the director of undergraduate studies, the coordinator of undergraduate advising or the graduate programs adviser before they have completed 60-75 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided initially by the coordinator of undergraduate advising, and then the director of the master's program and coordinator of graduate programs. If a student who is admitted to the program chooses not to complete the degree, the graduate credits hours will be applied to the B.A. The department is committed to providing strong and seamless mentoring and advising for students in this program.

Degree requirements

The Bachelor of Arts in English will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. Up to 12 of these graduate credits will substitute for open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate English courses that may be taken as an undergraduate, once a student is admitted to the program, are listed below. Additionally, students have the option to take ENGL 501, but only 12 graduate credits may be shared between the two degrees.

Course	Title	Hours
ENGL 560	Studies in British Literature and Culture	3
ENGL 570	Special Topics in American Literature and Culture	3
ENGL 605	Introduction to Scholarship in English Studies	3
ENGL 606	Literary Criticism	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior

to admission to the accelerated program in the senior year. **Note: It is recommended that students take at least one course numbered in the 480s during the junior year.**

Course	Title	Hours
Junior year		
Fall semester		
ENGL 300- or 400-level linguistics, writing or criticism		3

American studies, minor in

The minor in American studies consists of at least 18 upper-level credits to be distributed as follows:

Course	Title	Hours
Select six credits in American studies (AMST) courses		6
Select three credits in humanities electives		3
Select three credits in social science electives		3

Select six credits in either humanities, social science or other approved electives, or in independent study 6

Total Hours 18

All courses selected to fulfill distribution areas must deal with American materials and topics. A list of recommended courses and electives is available from the coordinator.

British studies, minor in

David Latané, Ph.D.

Professor and coordinator, British studies

The minor in British studies requires at least 18 credits, 15 of which must be taken at the 300 level or above. Courses must come from at least two different departments.

Course	Title	Hours
Core 1: Modern Britain		
Select one of the following:		3
ENGL 341	British Literature and Culture After 1945	
ENGL 391	Topics in Literature (as appropriate)	
or ENGL 491	Topics in Writing	
HUMS 391	Special Topics in the Humanities and Sciences (as appropriate)	
HIST 325	History of Modern Britain	
Core 2: British origins		
Select one of the following:		3
ENGL 401	Shakespeare	
ENGL 402	Chaucer	
ENGL 403	Milton

Department of Forensic Science

Tracey Dawson Green, Ph.D.

Professor and chair

Catherine Connon, Ph.D.

Assistant professor and undergraduate program director

Sarah Williams, Ph.D.

Associate professor and graduate program director

forensicscience.vcu.edu (<http://forensicscience.vcu.edu/>)

The Department of Forensic Science offers programs leading to bachelor's and master's degrees.

The Bachelor of Science is for students who plan a career or graduate study in the forensic sciences. The forensic science program provides students with fundamental learning in forensic laboratory analyses and crime scene investigation, with academic emphasis in biology, chemistry and criminal justice. The program offers three concentrations: forensic

biology, forensic chemistry and physical evidence. Students will select one of the three concentrations prior to the second semester of their sophomore year. The B.S. in Forensic Science supplies students with the necessary skills for professional careers in forensic laboratories, public and private, basic research laboratories, clinical laboratories, and/or to pursue graduate studies. Students also will be prepared to pursue advanced degrees in the physical sciences, biological sciences, forensic science, law, allied health and medicine, to name a few.

The Master of Science in Forensic Science prepares students for careers as forensic scientists in government and private laboratories. Students receive in-depth exposure to specializations within the field, including drug analysis, DNA analysis, trace evidence, criminalistics and legal issues.

For more information visit the departmental website (<http://forensicscience.vcu.edu/>).

- Forensic Science, Bachelor of Science (B.S.) with a concentration in:
 - Forensic biology (p. 197)
 - Forensic chemistry (p. 200)
 - Physical evidence (p. 202)

Forensic Science, Bachelor of Science (B.S.) with a concentration in forensic biology

The forensic biology concentration requires an additional 24 credits in biology, forensic science and elective credits beyond the core requirements and is well-suited for students interested in graduate study or careers in the forensic biology section of forensic laboratories. Students also will be prepared for work in molecular biology laboratories in both the public and private sectors. Students completing the forensic biology concentration will be eligible for a minor in chemistry. Additionally, students who complete BIOL 317 or BIOL 318 will be eligible for a minor in biology.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate a basic understanding of the laws of criminal procedure and rules of evidence
- Demonstrate proper crime scene investigation and reconstruction
- Demonstrate ethical and professional duties and responsibilities of the forensic scientist
- Be able to apply basic principles and laboratory procedures of biology to forensic science
- Demonstrate capabilities, use and limitations of forensic laboratory techniques

Special requirements

The forensic science program requires a minimum of 120 credits including completion of the general education requirements (see more information below), 34 forensic science core program credits and 24 concentration-specific credits.

For the forensic biology concentration, a minimum of five elective credit hours of advanced biology, chemistry and/or forensic science course work (with lab, at the 300- to 500-level) must be taken.

All of the general education foundation courses will be automatically fulfilled through this degree by taking the following required courses: UNIV 111, UNIV 112, UNIV 200 and MATH 200 (13 credits).

Students will need to take a total of 17 credits from areas of inquiry (including nine credits from breadth of knowledge). Some of these general education areas of inquiry and breadth of knowledge requirements will also be automatically fulfilled through this degree by taking the following required courses: CHEM 101 and CHEZ 101 (four credits) both satisfy breadth of knowledge for natural sciences and area of inquiry for scientific and logical reasoning; and either PHYS 201 or 207 (four to five credits) satisfies area of inquiry for scientific and logical reasoning.

In addition to these required courses, students will need to select at least three additional general education courses from the remaining areas of inquiry. Three credits are required from each of the following areas of inquiry (nine credits total): diversities in the human experience; creativity, innovation and aesthetic inquiry; and global perspectives. Two of the selected general education courses should also fulfill the breadth of knowledge requirement from the areas of humanities/fine arts and social/behavioral sciences.

Degree requirements for Forensic Science, Bachelor of Science (B.S.) with a forensic biology concentration

Total Hours		120

¹

Students must receive a minimum grade of C in these courses, including concentration electives. If a course is a prerequisite for another course, a minimum grade of C must be obtained in the prerequisite course before proceeding to the subsequent course.

²

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Note: This plan of study assumes that the student:

- Scored well enough on the VCU Mathematics Placement Test to place into MATH 200 or that the student has completed MATH 151 with a minimum grade of C (a pre- or corequisite for BIOL 151, BIOZ 151 and CHEM 101; a prerequisite for CHEM 102).
- Scored well enough on the chemistry placement exam/assessment or has successfully completed CHEM 100 with a minimum grade of B (a prerequisite for CHEM 101).

1

There is little, if any, flexibility regarding when to take these courses in order to enroll in FRSC 300 during spring semester of sophomore year.

2

At least three additional general education courses are required. Three credits are required from the areas of inquiry for diversities in the human experience; creativity, innovation and aesthetic inquiry; and global perspectives. Two of the selected general education courses should also fulfill the breadth of knowledge requirement from the areas of humanities/fine arts and social/behavioral sciences.

The minimum number of credit hours required for this degree is 120.

Forensic Science, Bachelor of Science (B.S.) with a concentration in forensic chemistry

The forensic chemistry concentration requires an additional 27-28 credits in chemistry, calculus, forensic science and elective credits beyond the core requirements and is well-suited for students interested in graduate study or careers in the chemical analysis of forensic evidence, including the areas of drug analysis, toxicology and trace evidence analysis. Students also will be prepared for work in private analytical laboratories. Students completing the forensic chemistry concentration will be eligible for a minor in chemistry.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate a basic understanding of the laws of criminal procedure and rules of evidence
- Demonstrate proper crime scene investigation and reconstruction
- Demonstrate ethical and professional duties and responsibilities of the forensic scientist
- Be able to apply basic principles and laboratory procedures of chemistry to forensic science
- Demonstrate capabilities, use and limitations of forensic laboratory techniques

Special requirements

The forensic science program requires a minimum of 120 credits including completion of the general education requirements (see more information below), 34 forensic science core program credits and 27-28 concentration-specific credits.

All of the general education foundation courses will be automatically fulfilled through this degree by taking the following required courses: UNIV 111, UNIV 112, UNIV 200 and MATH 200 (13 credits).

Students will need to take a total of 17 credits from areas of inquiry (including nine credits from breadth of knowledge). Some of these general education areas of inquiry and breadth of knowledge requirements will also be automatically fulfilled through this degree by taking the following required courses: CHEM 101 and CHEZ 101 (four credits) both satisfy breadth of knowledge for natural sciences and area of inquiry for scientific and logical reasoning; and either PHYS 201 or 207 (four to five credits) satisfies area of inquiry for scientific and logical reasoning.

In addition to these required courses, students will need to select at least three additional general education courses from the remaining areas of inquiry. Two of the selected general education courses should also fulfill the breadth of knowledge requirement from the areas of humanities/fine arts and social/behavioral sciences.

The minimum number of credit hours required for this degree is 120.

Forensic Science, Bachelor of Science (B.S.) with a concentration in physical evidence

The physical evidence concentration requires an additional 24 credits in chemistry, forensic science and elective credits beyond the core requirements and is well-suited for students interested in graduate study or careers in latent fingerprint examination and the analysis of impression evidence, as well as firearm and toolmark analyses. Students also will be prepared for work in private analytical laboratories. Students completing the forensic chemistry concentration will be eligible for a minor in chemistry.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate a basic understanding of the laws of criminal procedure and rules of evidence
- Demonstrate proper crime scene investigation and reconstruction
- Demonstrate ethical and professional duties and responsibilities of the forensic scientist
- Be able to apply basic principles and laboratory procedures of physics and chemistry to forensic science
- Demonstrate capabilities, use and limitations of forensic laboratory techniques

Special requirements

The forensic science program requires a minimum of 120 credits including completion of the general education requirements (see more information below), 34 forensic science core program credits and 24 concentration-specific credits.

For the physical evidence concentration, a minimum of four elective credit hours of advanced biology, chemistry and/or forensic science course work (300- to 500-level) must be taken.

All of the general education foundation courses will be automatically fulfilled through this degree by taking the following required courses: UNIV 111, UNIV 112, UNIV 200 and MATH 200 (13 credits).

Students will need to take a total of 17 credits from areas of inquiry (including nine credits from breadth of knowledge). Some of these general education areas of inquiry and breadth of knowledge requirements will also be automatically fulfilled through this degree by taking the following required courses: CHEM 101 and CHEZ 101 (four credits) both satisfy breadth of knowledge for natural sciences and area of inquiry for scientific and logical reasoning; and either PHYS 201 or 207 (four to five credits) satisfies area of inquiry for scientific and logical reasoning.

In addition to these required courses, students will need to select at least three additional general education courses from the remaining areas of inquiry. Three credits are required from each of the following areas of inquiry (nine credits total): diversities in the human experience; creativity, innovation and aesthetic inquiry; and global perspectives. Department of Gender, Sexuality and Women's Studies

Kathleen Ingram, Ph.D.

Associate professor and chair

Elizabeth Canfield, Ph.D.

Associate professor, associate chair and graduate program director

Levi Walter

Administrative coordinator

gsws.vcu.edu (<http://gsws.vcu.edu/>)

The Department of Gender, Sexuality and Women's Studies is committed to social transformation. Representing a wide range of disciplines, faculty in the department produce and disseminate interdisciplinary feminist knowledge and theories, and view them as vitally connected to community engagement and activism. The department encourages students to understand gender and sexuality as inextricably bound to other forms of difference and to examine how the construction of difference produces and reinforces social, cultural, economic and political inequities.

Students in the department are introduced to new analytical, theoretical and creative frameworks to enable them to understand, critique and transform themselves and the world around them. Through teaching, activism, scholarly and creative production and community engagement,

the department provides analytical and critical tools to equip students for careers in a broad range of fields.

The department offers a Bachelor of Arts in Gender, Sexuality and Women's Studies, as well as the option to complete the B.A. with a concentration in health, society and social justice. In addition, the department offers a minor in gender, sexuality and women's studies and serves as the administrative home for the interdisciplinary minor in LGBT+ and queer studies. At the graduate level, the department offers a post-baccalaureate graduate Certificate in Gender, Sexuality and Women's Studies.

- Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.) (p. 205)
- Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.) with a concentration in health, society and social justice (p. 207)
- Gender, sexuality and women's studies, minor in (p. 209)
- LGBT+ and queer studies, minor in (p. 209)

Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.)

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will demonstrate strong critical thinking skills that connect theory to action.
- Students will employ multiple theories informed by intersectionality.
- Students will demonstrate critical engagement with multiple epistemologies and methods of research.
- Students will articulate the ways diverse feminisms converge and diverge in the 21st century.
- Students will articulate contexts for intellectual, academic and artistic activism.

Special requirements

A Bachelor of Arts in Gender, Sexuality and Women's Studies requires a total of 120 credits with 30 credits in GSWS courses and at least 15 of those credits in upper-level courses. Students may choose a general interdisciplinary program or a health and science concentration.

All students must complete the requirements for the Bachelor of Arts in the College of Humanities and Sciences. All students also must complete core course requirements of GSWS 301 and GSWS 401, in addition to the ancillary requirement of GSWS 201.

The general interdisciplinary program requires that students take at least one course in each of the following thematic areas: race, racism and antiracism; art, media, culture and creative expression; methods of social transformation; and systems of power. The remaining credits in the major are electives, but must be GSWS courses or courses crosslisted with GSWS. These electives may include GSWS 391, GSWS 492 and GSWS 493. Note, however, that an independent study or internship is permitted only after the student has an agreement with a supervising faculty member and permission from the major's adviser.

Degree requirements for Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.)

Gender, Sexuality and Women's Studies, Bachelor of Arts (B.A.) with a concentration in health, society and social justice

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will demonstrate strong critical thinking skills that connect theory to action.
- Students will employ multiple theories informed by intersectionality.

- Students will demonstrate critical engagement with multiple epistemologies and methods of research.
- Students will articulate the ways diverse feminisms converge and diverge in the 21st century.
- Students will articulate contexts for intellectual, academic and artistic activism.

Special requirements

A Bachelor of Arts in Gender, Sexuality and Women's Studies requires a total of 120 credits with 30 credits in GSWS courses and at least 15 of these credits in upper-level courses. Students may choose a general interdisciplinary program or a health, society and social justice concentration.

All students must complete the requirements for the Bachelor of Arts in the College of Humanities and Sciences. All students also must complete core course requirements of GSWS 301 and GSWS 401, with the ancillary requirement of GSWS 201.

Students in the health, society and social justice concentration must take GSWS 393, in addition to three credits from the race, racism and anti-racism area and 12 credits from the health, society and social justice perspectives area.

The remaining credits in the major are electives, but must be GSWS courses or courses in other departments that have been approved by the major's adviser. These electives may include GSWS 391, GSWS 491, GSWS 492 or GSWS 493. Note, however, that an independent study or internship is permitted only after the student has an agreement with a supervising faculty member and permission from the major's adviser.

Gender, sexuality and women's studies, minor in

The minor in gender, sexuality and women's studies consists of 18 credits in GSWS courses or courses crosslisted with GSWS courses. Students are required to take the following:

Course	Title	Hours
GSWS 201	Introduction to Gender, Sexuality and Women's Studies	3
GSWS elective on feminist theory		3
GSWS elective on race, racism and anti-racism		3
GSWS electives (may choose courses crosslisted with GSWS)		9
Total Hours		18

LGBT+ and queer studies, minor in

The minor in LGBT+ and queer studies requires 18 credits, at least nine of which must be upper level. Students must complete GSWS 205 and choose an additional five courses in the area of LGBT+ and queer studies.

Note that these electives cannot all come from the same discipline, but students may select relevant topics courses in consultation with an adviser for this minor. At least one of the electives must focus on race and/or ethnicity as they relate to LGBT+ and queer studies and one of the electives must focus outside the United States. Course requirements are distributed as follows:

Course	Title	Hours
GSWS 205	Introduction to LGBT+ and Queer Studies	3
Select one course on race and/or ethnicity as they relate to LGBT+ and queer studies ¹		3
Select one course that focuses on LGBT+ and queer studies outside the United States ¹		3
Select three courses in LGBT+ and queer studies electives ¹		9

1

A list of recommended courses to fulfill distribution areas is available from the adviser for the minor.

Administrative coordinator

The Department of History offers programs at the graduate and undergraduate levels, specializing in a multidimensional analysis of the human past. Faculty research interests vary among thematic, topical, national or chronological emphases. For more information regarding the department and its specialty areas, visit their website (<http://history.vcu.edu/>).

- History, Bachelor of Arts (B.A.) (p. 210)
- History, minor in (p. 212)
- Medical humanities, minor in (p. 212)

History, Bachelor of Arts (B.A.)

The Bachelor of Arts in History requires a minimum of 120 credits, with at least 36 of those credits in history. Students must complete HIST 300 with a minimum grade of C prior to enrolling in more than six credits of 300- or 400-level history courses. Students in the program can take

advantage of a wide range of courses with thematic, topical, national or chronological emphases to fulfill requirements and electives. Students should consult with their advisers each semester to design a program that meets these requirements and suits their interests and career objectives.

The history curriculum exposes students to a multidimensional analysis of the human past. Faculty members seek to impart to students an awareness of the forces of change and continuity; good judgement as to the appropriateness (or inappropriateness) of analogies between one set of historical circumstances and another; an appreciation of the need for skepticism and informed judgment in historical studies; and an understanding of the role of biases and frames of reference in historical research. As such, the study of history not only has the intrinsic appeal of any disciplined intellectual inquiry, but also leads to personal and social awareness within the rich tradition of the liberal arts. The B.A. in History provides students an ideal preparation for a wide range of careers and further professional study, and it constitutes an indispensable basis for active citizenship.

Student learning outcomes

Upon completing this program, students will be able to demonstrate:

1. **Library and research skills.** Students should be able to locate information independently and evaluate its utility for their research purposes.
2. **Critical reading skills.** Students should be able to engage a wide variety of written texts and glean useful information from them.
3. **Critical thinking about sources of information.** Students should be able to evaluate the quality and utility of sources used to understand the past, keeping in mind their context and purpose.
4. **Critical thinking about logical inferences.** Students should be able to make useful connections among sources of information about history and be able to propose causal relationships based on discrete pieces of information.
5. **Formulation of persuasive analysis.** Students should be able to use both historical sources and logical inferences to make convincing arguments about the past.
6. **Writing skills.** Students should be able to write clearly, accurately, persuasively and elegantly about the past and to employ the research apparatus normative to historical writing.
7. **Other information presentation skills.** Students should be able to present information and arguments about the past in other formats, such as oral presentations, museum exhibits, archival guides, web-based presentations, etc.
8. **Interpersonal and project management skills.** Students should be able to carry out the stages of any project or assignment in an organized, proactive manner, showing independence, timeliness, professional ethics, problem-solving skills, teamwork and collaboration, integrative learning and the transfer of skills, self-assessment, and good judgment in seeking support or resources.

Degree requirements for History, Bachelor of Arts (B.A.)

Note: The history major requires at least six credits from each of three areas: a) Europe, b) United States and c) Africa, Asia, Latin America or the Middle East which may be satisfied by 100-level and 300-level HIST courses selected as major electives.

HIST 490 or HIST 493	Seminar in History or Internship	3-4
Open electives		12

Term Hours: 15-16

Total Hours: 120-124

The minimum number of credit hours required for this degree is 120.

History, minor in

The minor in history consists of 18 credits in history, 12 of which must be at the upper level (300-400), including:

Course	Title	Hours
Select at least one three-credit course in three of the following regions:		9
Africa		
North America		
Asia		
Europe		
Latin America		
Middle East		
Select additional history courses		9
Total Hours		18

Medical humanities, minor in

Note: Admission to this program is temporarily suspended.

The minor in medical humanities consists of 18 credits in courses that address the nonscientific aspects of professional health care training. To achieve the minor, students must complete each of the following courses:

Course	Title	Hours
ARTH 361	The Human Condition: An Arts Perspective	3
PHIL 213	Ethics and Health Care	3
SCTS 301/ENGL 369	Illness Narratives	3
Core I: History of science, technology and medicine		
Select one of the following:		3
HIST 389	History in Film: ____ (science film topics only)	
HIST/SCTS 392	Revolutions in Science I	
HIST/SCTS 393	Revolutions in Science II	
HIST/SCTS 397	Genetics and Society: 1865 to the Present	
HIST/SCTS 398	History of Medicine and Public Health: ____	
SCTS 300	Introduction to Science and Technology Studies	
Core II: Cross-cultural and diversity perspectives that impact health care		
Select one of the following:		3
AFAM/ANTH/INTL/GSWS 309	Gender and Global Health	
AFAM 310	Black Health Matters: Social Determinants of Health in the African American Community	
ANTH 301/BIOL 341	Human Evolution	
ANTH 391	Topics in Anthropology (medical anthropology topic only)	
ENGL/GSWS 353	Women Writers	

ENGL/GSWS 354	Queer Literature: ____
GSWS 392	Women's Health Care Across the Life Span
WRLD 220	Human Rights and Literature

Core III: Psych-social dimensions of healing and caregiving

Select one of the following:	3
HCMG 300	Health Care Organization and Services
PSYC 304	Life Span Developmental Psychology
PSYC 308	Stress and its Management
PSYC 412	Health Psychology
SOCY/GSWS 333	Gender in Society

Total Hours **18**

Department of Kinesiology and Health Sciences

R. Lee Franco, Ph.D.

Associate professor and chair

khs.vcu.edu (<http://khs.vcu.edu/>)

The Department of Kinesiology and Health Sciences offers programs that prepare students to pursue careers that utilize exercise interventions for both healthy and diseased populations and/or careers designed for students who wish to enter a health care-related field (that does not require licensure, certification or registry status). The department offers one undergraduate degree program; the Bachelor of Science with either the exercise science concentration or the health science concentration.

Along with the undergraduate program, the department also offers a Master of Science in Health and Movement Sciences and Doctor of Philosophy in Rehabilitation and Movement Science.

The M.S. in Health and Movement Sciences program provides advanced course work for students interested in the application of health and movement science principles to exercise science, teaching and sports medicine. This program has a central focus on the sciences and is flexible enough so that students, with the assistance of an adviser, can design a program that truly meets their professional goals.

The Doctor of Philosophy in Rehabilitation and Movement Science program is interdisciplinary in nature and includes faculty from the departments of Kinesiology and Health Sciences, Physical Therapy, and Physical Medicine and Rehabilitation. Students choose a concentration in either exercise physiology or neuromusculoskeletal dynamics.

The department also offers a post-baccalaureate undergraduate Certificate in Health Sciences that is designed for students who hold a baccalaureate degree in a non-science area and wish to pursue their undergraduate pre-health sciences requirements at VCU.

For more information, consult the department's website (<http://khs.vcu.edu/>).

- Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in exercise science (p. 213)
- Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in health science (p. 216)
- Health Sciences, Certificate in (Post-baccalaureate undergraduate certificate) (p. 218)

Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in exercise science

The exercise science concentration prepares students to serve as leaders of fitness, health and conditioning programs in corporate, commercial, university and clinical settings that provide exercise programming for apparently healthy individuals and those with chronic disease. Career paths include exercise physiologist, corporate fitness director, cardiopulmonary rehabilitation specialist, strength and conditioning specialist and wellness director. Additionally, the exercise science concentration prepares students for graduate study in exercise science or athletic training and offers an excellent option for those students who want to obtain the pre-requisites for post-graduate study in physical therapy, occupational therapy and medicine.

Student learning outcomes

- National standing in strength and conditioning: Students will demonstrate knowledge in optimal strength and conditioning assessments and programming for a variety of populations.
- National standing in exercise physiology: Students will apply knowledge and skills in exercise testing, prescription and program development for both healthy and medically appropriate populations.
- Effective communication: Students will demonstrate the ability to communicate effectively by giving an oral presentation in class.

Special requirements

A minimum grade of C is required in all HPEX courses and electives. Students cannot use more than one HPEX course (three credits) from the health science core as an elective. All students must attempt a department-approved national certification examination prior to graduation.

Degree requirements for Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in exercise science

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
HPEX 300	Health Care Delivery in the U.S.	3
HPEX 310	Fitness and Health	3

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. in Health, Physical Education and Exercise Science with a concentration in exercise science and M.S. in Health and Movement Science in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have completed advanced course work focused on the application of health and movement science principles to exercise science, preparing graduates for a wide range of career options that promote physical well-being in healthy children and adults, athletes, and clinical populations. These career opportunities exist in health and fitness centers, sports programs, clinical settings, academic institutions, rehabilitation facilities and public health agencies, where graduates can pursue employment in community, corporate and university exercise programs, cardiac rehabilitation or advanced study and research in the field of exercise physiology.

Admission to the program

Minimum qualifications for admittance to the program include completion of 84 undergraduate credit hours including HPEX 375, HPEX 440 and undergraduate courses specific to the complementary graduate courses offered in the student's senior year (HPEX 350 prior to HEMS 604; HPEX 371 prior to HEMS 605; HPEX 441 prior to HEMS 610; HPEX 475 prior to HEMS 675); an overall minimum GPA of 3.0; and a GPA of 3.0 in ancillary requirements, HPEX core and exercise science

core course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following completion of their junior year, but no later than July 1 of that year. Three reference letters (at least two from a kinesiology and health science faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the graduate program director of the M.S. program before they have completed 84 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a minimum 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate health, physical education and exercise science adviser and the graduate program director of the master's program.

Degree requirements

The Bachelor of Science in Health, Physical Education and Exercise Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will substitute for required major electives for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate health and movement science courses that may be taken as an undergraduate, once a student is admitted to the program, are listed below.

Course	Title	Hours
HEMS 600	Introduction to Research Design in Health and Movement Sciences	3
HEMS 601	Movement Physiology	3
HEMS 604	Nutrition for Health and Physical Activity ¹	3
HEMS 605	Psychology of Physical Activity ¹	3
HEMS 610	Laboratory Techniques in Rehabilitation Science ¹	3
HEMS 675	Clinical Exercise Physiology ¹	3

Term Hours:	12

Health, Physical Education and Exercise Science, Bachelor of Science (B.S.) with a concentration in health science

The health science concentration is designed for students who wish to enter a health care-related field (that does not require licensure, certification or registry status) such as corporate wellness, human services, nonprofit health promotion and medical and pharmaceutical sales. Graduates holding a degree with a concentration in health science can also be qualified to enter either graduate or professional health science programs, such as public health, health education and promotion, physical therapy, occupational therapy, pharmacy, nursing, speech-language pathology, audiology, radiation safety, clinical laboratory science and health care administration.

Student learning outcomes

- Analyzing data: Graduates will be able to analyze data from a variety of sources to assess individual community health topics.
- Solving health problems: Graduates will be able to solve complex health science issues and problems using interdisciplinary sciences.

Special requirements

A minimum grade of C is required in all HPEX core, health science core, clinical experiences and elective courses. Students cannot use more than one HPEX course (three credits) from the exercise science core as an elective.

Health Sciences, Certificate in (Post-baccalaureate undergraduate certificate)

The post-baccalaureate undergraduate Certificate in Health Sciences is designed for students who hold a baccalaureate degree in a non-science area and wish to pursue their undergraduate pre-health sciences requirements at VCU. The program is intended for students who have few or none of the prerequisites they need to enter doctoral-level programs in physical therapy, pharmacy, dentistry, medicine, osteopathic medicine, optometry or veterinary sciences. This program challenges students to complete more intensive science and math course work than the basic prerequisites and maintain at least a 3.0 cumulative GPA. The certificate program assists students in becoming more competitive for admission into graduate-level programs in the health sciences, but it does not guarantee admission into any program.

Those students completing the certificate are expected to achieve competency in introductory and more advanced-level science courses and will be granted opportunities to gain health care experience. Students can learn about health care program admissions requirements and strengthen their credentials through advising, student-run club activities and seminars.

Depending on the types of courses students complete before entering the program, the certificate can take one to three years to complete with either full- or part-time study. Students are advised on how to progress based on prior math and science course work, work and family constraints, and other factors that could affect the time frame to completion. The certificate program requires the completion of minimal competencies and a core curriculum.

Before beginning the core curriculum, students must show minimum competency by completing or transferring in equivalent courses with minimum grades of B for the following:

Course	Title	Hours
MATH 151	Precalculus Mathematics	4
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I	4
CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	4

Students must have completed all chemistry courses within five years of the time they begin the program in order to apply them toward the minimum competency requirement.

The academic requirements to complete the core portion of the program are as follows: a minimum of 25 credit hours (comprising at least six courses) in mathematics, statistics, chemistry, biology or physics. All program core courses must be at the 200 level or above. At least three of the courses in the core must have a laboratory.

A maximum of 11 credit hours can be transferred toward the core curriculum of the certificate program. Students must have earned a minimum grade of B in all course work accepted for transfer, which must come from an accredited institution. Students should consult with the pre-health sciences advisers to determine the most appropriate courses to meet their educational and career goals.

Courses will be selected from the following lists:

Course	Title	Hours
Math and statistics		
MATH 200	Calculus with Analytic Geometry I	4
STAT 210	Basic Practice of Statistics	3
STAT 314	Applications of Statistics	4
Biology		
BIOL 205	Basic Human Anatomy	4
BIOL 209 or BIOL 303	Medical Microbiology Microbiology	3
BIOL 300	Cellular and Molecular Biology	3
BIOL 308	Vertebrate Histology	4
BIOL 310 & BIOZ 310	Genetics and Laboratory in Genetics	5
BIOL 402	Comparative Vertebrate Anatomy	5
BIOL/FRSC 438	Forensic Molecular Biology	3
BIOL 445	Neurobiology and Behavior	4

The minimum total of credit hours required for this certificate is 25.

While matriculating all students must maintain a minimum cumulative GPA of 3.0. Courses may not be repeated after gaining admission into the certificate program. Failure to maintain the minimum GPA will result in formal dismissal from the certificate program.

Students accepted into the program must also commit to at least 50 hours of volunteer service in the VCU Medical Center Volunteer Program or a private health care setting. Volunteer hours must be documented and submitted to the Office of Pre-professional Health Advising at the time application is submitted for graduation.

Admission to the post-baccalaureate health sciences certificate program is based on students' academic achievement in their baccalaureate programs and whether the certificate program will help them achieve their professional goals. The program accepts students to start in the fall and spring semesters. Application deadlines are the same for transfer students applying to the university. The program is not offered to students pursuing entry into undergraduate- or master's-level health professions programs, nor is it open to those pursuing pre-health course work as part of their undergraduate concentrations at VCU.

Department of Mathematics and Applied Mathematics

Glenn Hurlbert, Ph.D.

Professor and chair

math.vcu.edu (<http://www.math.vcu.edu>)

The Department of Mathematics and Applied Mathematics offers an undergraduate program leading to a Bachelor of Science in Mathematical Sciences with concentrations in applied mathematics, biomathematics, mathematics and secondary mathematics teacher preparation. The department administers the Master of Science in Mathematical Sciences concentrations in applied mathematics or mathematics and is involved in administering the Doctor of Philosophy in Systems Modeling and Analysis. The curricula of these programs are run jointly with additional concentrations offered by the Department of Statistical Sciences and Operations Research.

- Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in:
 - Applied mathematics (p. 220)
 - Biomathematics (p. 223)
 - General mathematical sciences (p. 227)
 - Mathematics (p. 230)
 - Secondary teacher preparation (p. 233)
- Mathematics, minor in (p. 236)

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in applied mathematics

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. In the Department of Mathematics and Applied Mathematics, students pursuing the Bachelor of Science in Mathematical Sciences can choose a concentration of applied mathematics, which focuses on the analytical and computational techniques necessary to solve many of today's problems. These methods traditionally had been applied in such areas as chemistry and physics, but now are applied in many other areas.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.
- Students will write mathematical proofs clearly, concisely and correctly.
- Students will solve mathematical problems.
- Students will solve and interpret mathematical problems which originate from applications outside of mathematics.
- Students will use technology to solve and/or explore mathematics problems.
- Students will read and comprehend mathematical works.
- Students will collaborate in projects.
- Students will make effective presentations to demonstrate their their understanding of mathematical ideas.
- Students will write prose about mathematics.

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor's degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the "Academic regulations and general degree requirement" section of this bulletin.

Degree requirements for Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in applied mathematics

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
MATH 201	Calculus with Analytic Geometry II ¹	4
MATH 307	Multivariate Calculus ¹	4
MATH 310	Linear Algebra ¹	3
• Additional major requirements		
MATH 255	Introduction to Computational Mathematics	3
	or CMSC 245 Introduction to Programming Using C++	
	or EGRE 245 Engineering Programming	
MATH 300	Introduction to Mathematical Reasoning ¹	3
MATH 407	Advanced Calculus	3
MATH 490	Mathematical Expositions	3
• Concentration requirements		
MATH 301	Differential Equations ¹	3
MATH 415	Numerical Methods	3
MATH 435	Mathematical and Computational Modeling	3
Select two from:		6
MATH 432	Ordinary Differential Equations	
MATH 433	Partial Differential Equations	
MATH 434	Discrete Dynamical Systems	
Concentration electives ²		0-6
Ancillary requirements		
HUMS 202	Choices in a Consumer Society	1
MATH 200	Calculus with Analytic Geometry I (satisfies general education quantitative foundations) ¹	4
STAT 212	Concepts of Statistics	3
Experiential fine arts ³		1-3
Foreign language through the 102 level (by course or placement)		0-6

Natural science sequence: Select one sequence from list below (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning) 8-10

Natural science elective (different from chosen science sequence) 3-5

Open electives

Select any course. 21-39

Total Hours 120

1

These courses/credits require a minimum grade of C.

2

Six additional upper-level credits in the mathematical sciences (MATH, STAT, OPER, CMSC) or the completion of a minor or a double major.

3

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

Natural science sequence

Course	Title	Hours
Select one of the following sequences: 8-10		
Sequence 1		
BIOL 151	Introduction to Biological Sciences I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
BIOZ 151	Introduction to Biological Science Laboratory I	1
BIOL 152	Introduction to Biological Sciences II	3
BIOZ 152	Introduction to Biological Science Laboratory II	1
Sequence 2		
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I (satisfies general education AOI for scientific and logical reasoning)	1
CHEM 102	General Chemistry II	3
CHEZ 102	General Chemistry Laboratory II	1
Sequence 3		
PHYS 201	General Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	4
PHYS 202	General Physics II	4
Sequence 4		
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
PHYS 208	University Physics II	5

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester	Hours
MATH 200 Calculus with Analytic Geometry I (satisfies general education quantitative foundations)	4
UNIV 101 Introduction to the University	1
UNIV 111 Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I	
General education course (select AOI for creativity, innovation and aesthetic inquiry)	3
General education course (select AOI for diversities in the human experience)	3

Term Hours: 14

Spring semester

HUMS 202 Choices in a Consumer Society	1
MATH 201 Calculus with Analytic Geometry II	4

MATH 490 Mathematical Expositions	3
Open electives	7-9

Term Hours: 13-15

Total Hours: 120-128

¹

Different science than chosen for sequence.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students in the applied mathematics and biomathematics concentrations to earn both the B.S. in Mathematical Sciences and the M.S. in Mathematical Sciences with a concentration in applied mathematics in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to nine hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 141 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees are better prepared for a career in a technical industry, for a career in teaching and/or for further studies in a quantitative Ph.D. program, such as mathematics, data sciences or statistics. An accelerated B.S. and M.S. degree in Mathematics offers a direct pathway toward high-paying positions in big tech companies and financial institutions. Over the past decade, the increasingly competitive application process for Ph.D. programs in mathematics has made it extremely difficult for students holding only a B.S. degree to be admitted. On the other hand, students graduating from VCU with a master's in mathematical sciences have a history of getting into highly rated Ph.D. programs, often with generous funding.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours, including STAT 212, MATH 255, MATH 301, MATH 307, MATH 310, MATH 380 (this course for the biomathematics concentration only) and MATH 407; an overall GPA of 3.0; and a GPA of 3.0 in mathematics course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit general GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following completion of their junior year, but no later than June 15 of that year. Three reference letters (at least one from a Department of Mathematics and Applied Mathematics faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the Mathematical Sciences M.S. program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate mathematics adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Mathematical Sciences degree (with a concentration in either applied mathematics or biomathematics) will be awarded upon completion of a minimum of 120 credits in undergraduate program credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

Students must pass a comprehensive exam in the core courses and selected elective courses determined by the Department of Mathematics and Applied Mathematics.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits substitute for major requirements and required major electives for the undergraduate degree and are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate mathematics courses that may be taken as an undergraduate once a student is admitted to the program are below.

Course	Title	Hours
MATH 507	Bridge to Modern Analysis (may count as undergraduate major elective)	3
MATH 515	Numerical Analysis (may count as undergraduate major requirement or open elective)	3
MATH 535	Introduction to Dynamical Systems (may count as undergraduate major elective)	3
MATH 610	Advanced Linear Algebra	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in biomathematics

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. In the Department of Mathematics and Applied Mathematics, students pursuing the Bachelor of Science in Mathematical Sciences can choose a concentration of biomathematics, which focuses on the overlap between mathematics and the disciplines of biology and medicine. This concentration covers the mathematical methods of modeling and analysis of phenomena in the life sciences.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.

- Students will write mathematical proofs clearly, concisely and correctly.
- Students will solve mathematical problems.
- Students will solve and interpret mathematical problems which originate from applications outside of mathematics.
- Students will use technology to solve and/or explore mathematics problems.
- Students will read and comprehend mathematical works.
- Students will collaborate in projects.
- Students will make effective presentations to demonstrate their their understanding of mathematical ideas.
- Students will write prose about mathematics.

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor's degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the "Academic regulations and general degree requirement" section of this bulletin.

Different science than chosen for sequence.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students in the applied mathematics and biomathematics concentrations to earn both the B.S. in Mathematical Sciences and the M.S. in Mathematical Sciences with a concentration in applied mathematics in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to nine hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 141 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees are better prepared for a career in a technical industry, for a career in teaching and/or for further studies in a quantitative Ph.D. program, such as mathematics, data sciences or statistics. An accelerated B.S. and M.S. degree in Mathematics offers a direct pathway toward high-paying positions in big tech companies and financial institutions. Over the past decade, the increasingly competitive application process for Ph.D. programs in mathematics has made it extremely difficult for students holding only a B.S. degree to be admitted. On the other hand, students graduating from VCU with a master's in mathematical sciences have a history of getting into highly rated Ph.D. programs, often with generous funding.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours, including STAT 212, MATH 255, MATH 301, MATH 307, MATH 310, MATH 380 (this course for the biomathematics concentration only) and MATH 407; an overall GPA of 3.0; and a GPA of 3.0 in mathematics course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit general GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the

undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following completion of their junior year, but no later than June 15 of that year. Three reference letters (at least one from a Department of Mathematics and Applied Mathematics faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the Mathematical Sciences M.S. program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate mathematics adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Mathematical Sciences degree (with a concentration in either applied mathematics or biomathematics) will be awarded upon completion of a minimum of 120 credits in undergraduate program credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

Students must pass a comprehensive exam in the core courses and selected elective courses determined by the Department of Mathematics and Applied Mathematics.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits substitute for major requirements and required major electives for the undergraduate degree and are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate mathematics courses that may be taken as an undergraduate once a student is admitted to the program are below.

Course	Title	Hours
MATH 507	Bridge to Modern Analysis (may count as undergraduate major elective)	3
MATH 515	Numerical Analysis (may count as undergraduate major requirement or open elective)	3
MATH 535	Introduction to Dynamical Systems (may count as undergraduate major elective)	3
MATH 610	Advanced Linear Algebra	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
MATH 407	Advanced Calculus	3

MATH 432	Ordinary Differential Equations	3
Experiential fine arts		1-3
General education course		3
Natural science sequence		4-5
Term Hours:		14-17
Spring semester		
MATH 433	Partial Differential Equations	3
MATH 435	Mathematical and Computational Modeling	3
General education course		3
Natural science sequence		4-5
Open elective		3
Term Hours:		16-17
Senior year		
Fall semester		
MATH 507	Bridge to Modern Analysis	3
MATH 535	Introduction to Dynamical Systems	3
MATH 585	Biomathematics Seminar:____ (biomathematics concentration only)	1
MATH 610	Advanced Linear Algebra	3
Natural science elective		3-5
Open electives		3
Term Hours:		15-18
Spring semester		
MATH 490	Mathematical Expositions	3
MATH 515	Numerical Analysis	3
Concentration elective (appropriate to applied mathematics or biomathematics)		3
Open electives		6
Term Hours:		15
Fifth year		
Fall semester		
MATH 615	Iterative Numerical Methods	3
MATH 769	Topics in Applied Mathematics: ____	3
Graduate math elective		3
Term Hours:		9
Spring semester		
MATH 632 or MATH 633	Ordinary Differential Equations I Partial Differential Equations	3
MATH 690	Research Seminar	2
Math electives (600- to 700-level)		6
Term Hours:		11

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in general mathematical sciences

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a

technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research.

Student learning outcomes

Upon completing this program:

- Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.
- Students will write mathematical proofs clearly, concisely and correctly.
- Students will solve mathematical problems.
- Students will solve and interpret mathematical problems which originate from applications outside of mathematics.
- Students will use technology to solve and/or explore mathematics problems.
- Students will read and comprehend mathematical works.
- Students will collaborate on projects.
- Students will make effective presentations to demonstrate their understanding of mathematical ideas.
- Students will write prose about mathematics.

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor's degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the "Academic regulations and general degree requirement" section of this bulletin.

Degree requirements for Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in general mathematical sciences

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
MATH 201	Calculus with Analytic Geometry II ¹	4
MATH 307	Multivariate Calculus ¹	4
MATH 310	Linear Algebra ¹	3

The minimum number of credit hours required for this degree is 120.

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in mathematics

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. In the Department of Mathematics and Applied Mathematics, students pursuing the Bachelor of Science in Mathematical Sciences can choose a concentration of mathematics, which fosters the understanding of the power and the beauty of pure mathematics and its applications to various branches of knowledge.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.
- Students will write mathematical proofs clearly, concisely and correctly.
- Students will solve mathematical problems.
- Students will solve and interpret mathematical problems which originate from applications outside of mathematics.
- Students will use technology to solve and/or explore mathematics problems.
- Students will read and comprehend mathematical works.
- Students will collaborate in projects.
- Students will make effective presentations to demonstrate their their understanding of mathematical ideas.
- Students will write prose about mathematics.

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor's degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the "Academic regulations and general degree requirement" section of this bulletin.

Different science than chosen for sequence.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students in the mathematics concentration to earn both the B.S. in Mathematical

Sciences and the M.S. in Mathematical Sciences with a concentration in mathematics in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to nine hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 141 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees are better prepared for a career in a technical industry, for a career in teaching and/or for further studies in a quantitative Ph.D. program, such as mathematics, data sciences or statistics. An accelerated B.S. and M.S. degree in Mathematics offers a direct pathway toward high-paying positions in big tech companies and financial institutions. Over the past decade, the increasingly competitive application process for Ph.D. programs in mathematics has made it extremely difficult for students holding only a B.S. degree to be admitted. On the other hand, students graduating from VCU with a master's in mathematical sciences have a history of getting into highly rated Ph.D. programs, often with generous funding.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours, including STAT 212, MATH 255, MATH 301, MATH 307, MATH 310 and MATH 407; an overall GPA of 3.0; and a GPA of 3.0 in mathematics course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit general GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following completion of their junior year, but no later than June 15 of that year. Three reference letters (at least one from a Department of Mathematics and Applied Mathematics faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the Mathematical Sciences M.S. program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate mathematics adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Mathematical Sciences degree (with a concentration in either applied mathematics or biomathematics) will be awarded upon completion of a minimum of 120 credits in undergraduate

program credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

Students must pass a comprehensive exam in the core courses and selected elective courses determined by the Department of Mathematics and Applied Mathematics.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may substitute for major requirements and required major electives for the undergraduate degree and are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate mathematics courses that may be taken as an undergraduate once a student is admitted to the program are below.

Course	Title	Hours
MATH 502 or MATH 610	Abstract Algebra I Advanced Linear Algebra	3
MATH 507	Bridge to Modern Analysis	3
MATH 550 or MATH 602	Combinatorics Abstract Algebra II	3
MATH 556	Graph Theory	3

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in secondary teacher preparation

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. In the Department of Mathematics and Applied Mathematics, students pursuing the Bachelor of Science in Mathematical Sciences can choose a concentration of secondary teacher preparation, which prepares students for teaching mathematics in secondary schools when completed in conjunction with the Master of Teaching degree offered through the School of Education as part of the Extended Teacher Preparation Program.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will write mathematics (not including mathematical proofs) clearly, concisely and correctly.
- Students will write mathematical proofs clearly, concisely and correctly.
- Students will solve mathematical problems.

- Students will solve and interpret mathematical problems which originate from applications outside of mathematics.
- Students will use technology to solve and/or explore mathematics problems.
- Students will read and comprehend mathematical works.
- Students will collaborate in projects.
- Students will make effective presentations to demonstrate their their understanding of mathematical ideas.
- Students will write prose about mathematics.

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor’s degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the “Academic regulations and general degree requirement” section of this bulletin.

Different science than chosen for sequence.

The minimum number of credit hours required for this degree is 120.

Mathematics, minor in

A minor in mathematics consists of at least 18 credits (and a minimum of five courses) offered by the Department of Mathematics and Applied Mathematics, including the following:

Course	Title	Hours
Select a minimum of three credits of calculus		3
Select a minimum of nine upper-level credits		9
Select six additional credits.		6
Total Hours		18

None of the following courses may be used to fulfill the required 18 credits:

Course	Title	Hours
MATH 303	Investigations in Geometry	3
MATH 361	Numbers and Operations	3
MATH 362	Algebra and Functions	3
Any 100-level course		

Courses in subjects areas other than MATH cannot be applied to the minor. A minimum GPA of 2.0 must be achieved in the minor. Students in the mathematical sciences majors cannot minor in mathematics.

Department of Military Science and Leadership

[has.vcu.edu/mil](http://www.has.vcu.edu/mil/) (<http://www.has.vcu.edu/mil/>)

The military science curriculum teaches the principles of management and leadership as a foundation for civilian and military careers. Graduates of this program are eligible for appointments as commissioned officers in the U.S. Army, the U.S. Army Reserve or Army National Guard.

For more information on participating in ROTC or on scholarship opportunities, please contact rotc@vcu.edu or call (804) 828-7682.

Scholarships

Army ROTC offers students several opportunities for scholarships worth more than \$29,000 at VCU. High school students and students on campus may apply for a four-year scholarship. Two-year scholarships also are available to on-campus students. All scholarships cover VCU tuition, most books, laboratory fees and provide between \$300 to \$500 a month during the school year for living expenses.

The four-year program

The traditional four-year program is divided into two parts.

Basic course

Normally freshman and sophomore years, which cover military history, traditions, organizations and national defense. The emphasis in the course is on leadership development and general life skills. There is no commitment to the U.S. Army, unless the student is on a ROTC scholarship.

Advanced course

Departmental approval is required to enter junior- and senior-level classes. They cover instruction and practice in management, tactics, ethics, professionalism and continued leadership development.

All ROTC uniforms and materials are furnished at no cost. Students selected for advanced classes receive \$450 or \$500 a month during the school year.

During the summer between the junior and senior years, students will attend a four-week course, Leadership Development and Assessment Camp. LDAC provides hands-on experience and evaluations for students at Fort Lewis, Wash.

The two-year program

Students who have not taken any of the basic classes are still eligible for a commission through the two-year program.

In this program, student attend the Leader's Training Course at Fort Knox, Ky., for four weeks during the summer. Upon completion of LTC, students are eligible for the advanced courses in their junior and senior years.

Simultaneous membership program

This program allows students to become members of the Army National Guard or the Army Reserve while enrolled in Army ROTC.

Advanced ROTC SMP students are paid for their guard/reserve training plus they receive a monthly ROTC allowance of \$400, \$450 or \$500 for up to three years.

ROTC for veterans

If students are veterans, military experience can fulfill the basic course requirements. Some veterans may enroll directly into advanced courses. In addition to any financial assistance received from ROTC, veterans still are qualified to receive any and all VEAP/GI Bill/Army College Fund benefits to which they are entitled.

Department of Philosophy

Donald Smith, Ph.D.

Associate professor and chair

philosophy.vcu.edu (<http://philosophy.vcu.edu/>)

Philosophy aims at a deeper understanding of matters that should most concern the human race. Philosophical questions crop up in science, religion, art, morality, politics, medicine and in everyday life. Students enrolled in philosophy are encouraged to think seriously about fundamental issues in all these domains and to formulate coherent and well-grounded points of view. Because of its extensive use of critical and analytical reasoning, philosophy equips students for careers in medicine, law, business and other fields that require careful thought and the clear expression of ideas.

The Department of Philosophy offers a Bachelor of Arts in Philosophy. The department offers courses for students in other programs, as well as for those majoring in philosophy or religious studies.

- Philosophy, Bachelor of Arts (B.A.) (p. 237)
- Philosophy, Bachelor of Arts (B.A.) with a concentration in:
 - Ethics and public policy (p. 238)
 - Philosophy and law (p. 240)
 - Philosophy and science (p. 242)
- Philosophy, minor in (p. 245)
- Philosophy of law, minor in (p. 245)

Philosophy, Bachelor of Arts (B.A.)

The Bachelor of Arts in Philosophy requires a minimum of 120 credits, with at least 30 of those credits in philosophy. Fifteen of these credits must be selected from upper-level philosophy courses.

Majors intending to pursue graduate studies in philosophy are advised to choose the curriculum outlined below.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Demonstrate a good knowledge of and facility with the methods and concepts of modern, analytic philosophy
2. Demonstrate a good knowledge of the current state of academic discussion of some of the central philosophical topics
3. Demonstrate some knowledge of the history of philosophy, including both major themes and movements and some specific figures and systems
4. Demonstrate the ability to think critically and systemically about philosophical problems, both abstract and practical, and to write clearly and cogently about them
5. Demonstrate the ability to construct and analyze arguments clearly and cogently, independently of their subject matter.

¹

PHIL 201 satisfies general education BOK for humanities/fine arts and AOI for diversities in the human experience. Students who chose this course will take additional electives to fulfill degree requirements.

The minimum number of credit hours required for this degree is 120.

Philosophy, Bachelor of Arts (B.A.) with a concentration in philosophy and law

The Bachelor of Arts in Philosophy with a concentration in philosophy and law is an interdisciplinary curriculum requiring a minimum of 120 credits, with at least 30 of those credits in the major area, at least half of which must be upper-level.

Students whose main interests are philosophy of law and the relation between philosophy and law (and who may wish to pursue graduate work in law and related areas) will probably want to choose the philosophy and law concentration.

Student learning outcomes

Upon completing this program, students will:

1. Demonstrate a good knowledge of a facility with the methods and concepts of modern, analytic philosophy.
2. Demonstrate a good knowledge of the current state of academic discussion of some of the central philosophical topics.
3. Demonstrate some knowledge of the history of philosophy, including both major themes and movements and some specific figures and systems.

4. Demonstrate the ability to think critically and systematically about philosophical problems, both abstract and practical, and to write clearly and cogently about them.
5. Demonstrate the ability to construct and analyze arguments clearly and cogently, independently of their subject matter.
6. Demonstrate a good knowledge of philosophical questions about law including but not limited to questions about the nature of law and its authority.
7. Demonstrate a good knowledge of the specific workings of the law especially with respect to constitutional issues.

PHIL 201 satisfies general education BOK for humanities/fine arts and AOI for diversities in the human experience. Students who chose this course will take additional electives to fulfill degree requirements.

Term Hours:	15
Total Hours:	120-123

¹

PHIL 201 satisfies general education BOK for humanities/fine arts and AOI for diversities in the human experience. Students who chose this course will take additional electives to fulfill degree requirements.

The minimum number of credit hours required for this degree is 120.

Philosophy, Bachelor of Arts (B.A.) with a concentration in philosophy and science

The Bachelor of Arts in Philosophy with a concentration in philosophy and science is an interdisciplinary curriculum requiring a minimum of 120 credits, with at least 30 of those credits in the major area, at least half of which must be upper-level.

Students with a strong interest in the philosophy of science and the relation between philosophy and science (and those considering graduate work in an area of science) will probably want to choose the philosophy and science concentration.

Student learning outcomes

Upon completing this program, students will:

1. Demonstrate a good knowledge of and facility with the methods and concepts of modern, analytic philosophy.
2. Demonstrate a good knowledge of the current state of academic discussion of some of the central philosophical topics.
3. Demonstrate some knowledge of the history of philosophy, including both major themes and movements and some specific figures and systems.
4. Demonstrate the ability to think critically and systematically about philosophical problems, both abstract and practical, and to write clearly and cogently about them.
5. Demonstrate the ability to construct and analyze arguments clearly and cogently, independently of their subject matter.
6. Demonstrate a good knowledge of philosophical questions about scientific inquiry including but not limited to questions about scientific explanation, the confirmation and disconfirmation of scientific theories, and what distinguishes science from non-science.
7. Demonstrate a good knowledge of a particular area of science including the research methods of that area of science.

Degree requirements for Philosophy, Bachelor of Arts (B.A.) with a concentration in philosophy and science

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
PHIL 222	Logic	3
PHIL 490	Seminar in Philosophy	3
• Additional major requirements		
PHIL 101	Introduction to Philosophy	3
or PHIL 103	Ancient Greek and Medieval Western Philosophy	
or PHIL 104	Modern Western Philosophy	
PHIL 331	Philosophy of Science	3
Select two of the following:		6
PHIL 300	Philosophical Concepts	
PHIL 301	Metaphysics	
PHIL 302	Epistemology	
PHIL 303	Philosophy of Language	
PHIL 320	Philosophy of Law	
PHIL 327	Normative Ethics	
PHIL 328	Metaethics	
PHIL 335	Social and Political Philosophy	
• Scientific focus area		
Choose one of the scientific focus areas listed below. Each focus area consists of a three-credit course on the research methods of a scientific discipline and six upper-level credits in that discipline.		9
• Major electives		
PHIL elective (any level)		3
Ancillary requirements		
HUMS 202	Choices in a Consumer Society	1
PHIL 201	Introduction to Ethics ¹	3
or PHIL 211	History of Ethics	
or PHIL 212	Ethics and Applications	
or PHIL 213	Ethics and Health Care	
or PHIL 214	Ethics and Business	
Experiential fine arts ²		1-3
Foreign language through the 102 level (by course or placement)		0-6
Open electives

Total Hours		24

Department of Physics

Shiv Khanna, Ph.D.

Professor and chair

physics.vcu.edu (<http://www.physics.vcu.edu>)

The Department of Physics offers programs leading to the Bachelor of Science in Physics and the Master of Science in Physics and Applied Physics. The department also offers an accelerated B.S.-M.S. program that allows students in the baccalaureate program to take graduate courses that will count toward the M.S. in Physics and Applied Physics degree.

- Physics, Bachelor of Science (B.S.) (p. 245)
- Physics, Bachelor of Science (B.S.) with a concentration in nanoscience (p. 248)
- Physics, Bachelor of Science (B.S.) with a concentration in pre-medical (p. 250)
- Accelerated Bachelor of Science in Physics and Master of Science in Physics and Applied Physics (p. 251)
- Physics, minor in (p. 252)

Physics, Bachelor of Science (B.S.)

The Bachelor of Science in Physics requires a minimum of 120 credits, including 54 credits in physics and physics-related courses, as detailed in the course lists.

The curriculum in physics prepares students for technical careers in physics or an allied area, for careers in engineering and for the teaching of physics in secondary schools. The curriculum also prepares students for graduate studies in physics or a related area.

Student learning outcomes

Students will learn to perform scientific reasoning and complex problem-solving. Physics majors will receive a fundamental understanding of the main areas of physics so that they are prepared for jobs that use physics-based technologies. They are expected to have mastered the analytical approach to solving technical problems by identifying simple subsystems that obey known physical laws and using these laws to approximate the behavior of the whole system.

Students will demonstrate a fundamental understanding of the main areas of physics.

Students will demonstrate communication skills, both written and oral, needed to explain the analysis of technical problems.

Students will demonstrate scientific literacy skills including searching, reading and critically reviewing scientific publications.

Students will demonstrate proficiency in information processing by generating and interpreting data presented in tables, graphs, drawings and models.

Double major in engineering and physics

A detailed description of this program (p. 85) can be found in the "College of Engineering" section of this bulletin.

Physics and physics-related electives

Course **Title** **Hours**

Any of the following upper-level physics courses:

PHYS 302	Classical Mechanics II	
PHYS 325	Visualization of Physics Using Mathematica	
PHYS 335	Experimental Skills for Physicists	
PHYS 351	Guided Inquiry for University Physics I	
PHYS 352	Guided Inquiry for University Physics II	
PHYS 377	Electromagnetism II	
PHYS 397	Directed Study (maximum of 3 credits)	
PHYS 420	Quantum Physics II	
PHYS 422	Optics	
PHYS 440	Introduction to Condensed Matter Physics	
PHYS 480	Particle Physics	
PHYS 483	Introduction to Astrophysics	
PHYS 491	Topics in Physics (maximum of 3 credits)	
PHYS 492	Independent Study (maximum of 3 credits)	
PHYS 514	Modeling Biocomplexity	
PHYS 522	Optics and Laser Physics	
PHYS 571	Theoretical Mechanics	
PHYS 573	Analytical Methods in Physics	
PHYS 576	Electromagnetic Theory	
PHYS 580	Quantum Mechanics	
PHYS 583	Geometrical Methods of Physics and Gravitation	

Any of the following math or statistics courses:

MATH 310	Linear Algebra	
MATH 415	Numerical Methods	
MATH 433	Partial Differential Equations	
MATH 511	Applied Linear Algebra	
STAT 441	Applied Statistics for Engineers and Scientists	

Any of the following chemistry courses:

CHEM 409	Instrumental Analysis	
CHEM 510	Atomic and Molecular Structure	

Any of the following engineering courses:

CLSE 301	Transport Phenomena I	
CLSE 302	Transport Phenomena II	
EGMN 301	Fluid Mechanics	
EGMN 309	Material Science for Engineers	
EGMN 351	Nuclear Engineering Fundamentals	
EGMN 352	Nuclear Reactor Theory	

EGRB 427	Biomaterials
EGRE 303	Electronic Devices
EGRE 306	Introduction to Microelectronics
EGRE 307	Integrated Circuits
EGRE 310	Electromagnetic Fields and Waves
EGRE 334	Introduction to Microfabrication
EGRE 521	Advanced Semiconductor Devices

Those students intending to pursue graduate studies in physics should choose electives from the following:

Course	Title	Hours
PHYS 302	Classical Mechanics II	
PHYS 325	Visualization of Physics Using Mathematica	
PHYS 420	Quantum Physics II	
PHYS 440	Introduction to Condensed Matter Physics	
PHYS 480	Particle Physics	
PHYS 483	Introduction to Astrophysics	
PHYS 514	Modeling Biocomplexity	
PHYS 522	Optics and Laser Physics	
PHYS 571	Theoretical Mechanics	
PHYS 573	Analytical Methods in Physics	
PHYS 576	Electromagnetic Theory	
PHYS 580	Quantum Mechanics	
PHYS 583	Geometrical Methods of Physics and Gravitation	

Those interested in experimental physics should also take one or more credits in PHYS 397 or PHYS 492.

Courses not applicable toward the major

Course	Title	Hours
PHYS 101	Foundations of Physics	
PHYS 103	Elementary Astronomy	
PHYS 107	Wonders of Technology

Physics, Bachelor of Science (B.S.) with a concentration in pre-medical

The Bachelor of Science in Physics with a concentration in pre-medical requires a minimum of 120 credits. The curriculum prepares students for a health sciences career using physics-based technologies. Students from this program who apply to medical school will have a distinctively rigorous preparation. The curriculum also prepares students for graduate medical physics, biomedical engineering and M.D.-Ph.D. programs.

Student learning outcomes

Students will learn to perform scientific reasoning and complex problem-solving. Physics majors will receive a fundamental understanding of the main areas of physics so that they are prepared for jobs that use physics-based technologies. They are expected to have mastered the analytical approach to solving technical problems by identifying simple subsystems that obey known physical laws and using these laws to approximate the behavior of the whole system.

Accelerated Bachelor of Science (B.S.) in Physics and Master of Science (M.S.) in Physics and Applied Physics

Students who are enrolled in the Bachelor of Science in Physics program may elect to take graduate courses that will count toward the Master of Science in Physics and Applied Physics degree. Up to six hours of graduate credit may be earned in this way without any special provision. In order to offer more than six hours of pre-admission graduate credit toward the graduate degree, a student must apply to the physics department graduate admission committee for admission to the accelerated B.S.-M.S. program. Persons applying for admission to this program should (1) submit a curricular plan for completing the bachelor's degree within two years or its part-time equivalent; (2) indicate which graduate courses they intend to offer toward the physics master's degree; (3) have a minimum B average.

The M.S. degree completion form should be accompanied by a memo from the Department of Physics graduate admission committee to indicate which graduate courses were taken under the accelerated B.S.-

M.S. program. See the program page in the Graduate Bulletin (<http://bulletin.vcu.edu/graduate/college-humanities-sciences/physics/physics-applied-physics-ms-accelerated-physics-bs-masters/>) for additional information.

Physics, minor in

A minor in physics requires 20 credits consisting of the following courses:

Course	Title	Hours
PHYS 207	University Physics I	5
PHYS 208	University Physics II	5
PHYS 320 & PHYZ 320	Modern Physics and Modern Physics Laboratory	4
Select an additional six credits of physics or physics-related courses that are acceptable for the major.		6
Total Hours		20

Department of Political Science

Jason Ross Arnold, Ph.D.

Associate professor and chair

Alexandra Reckendorf, Ph.D.

Assistant professor and associate chair

politicalscience.vcu.edu (<http://politicalscience.vcu.edu/>)

Political science is the systematic study of institutions, behavior and ideas in order to further the understanding and explanation of government and politics at the local, state, national and international levels. The discipline has a rich history that bridges the present with the past and future, is pluralistic in its modes of inquiry and adopts a critical approach that makes use of qualitative and quantitative analytic methods.

VCU's political science department uses its unique position on an urban campus — located in the state capital and just a short distance from Washington, D.C. — to provide students with transformative learning experiences promoting active and engaged citizenship, both domestically and globally. Faculty integrate their teaching with cutting-edge scholarship that advances the boundaries of the discipline and meaningfully impacts public debate and policy.

The department values diversity of thought and identity, inclusive pedagogy, informal mentorships, active citizenship and the free expression of ideas through innovative scholarship, teaching and community engagement. Faculty are dedicated to developing programs and a curriculum that prepare graduates to be informed and inquisitive citizens who are positioned to make a difference as professionals and lifelong learners.

These faculty members have expertise in a broad spectrum of subjects, including international health; Russian politics; U.S. presidential decision-making; national security and foreign policy; feminist political theory; women and politics, law and public policy; the politics of reproductive and genetic technologies; international relations; local economic development in the US; international relations and political theory; European politics and history; international political economy; public administration; constitutional law; information politics; comparative politics; American politics; public opinion and political behavior in the U.S.; democracy and development in Africa; political corruption;

non-governmental organizations; global environmental politics; climate change; politics of developing countries; state-building and democratization; public administration; international water rights; comparative public policy; immigration; labor politics; Latin American politics; legislative behavior; partisan gerrymandering; campaign finance; religion and politics; modern British and American political theory; political communication; political behavior; political leadership; black women in politics; state legislatures; international development and conflict; and political violence.

- Political Science, Bachelor of Arts (B.A.) with a concentration in:
 - Civil rights (p. 252)
 - Comparative politics (p. 255)
 - Human security (p. 258)
 - International relations (p. 262)
 - Political theory and methodology (p. 265)
 - Politics and government (p. 268)
 - Public policy and administration (p. 271)
 - U.S. government (p. 274)

- Public management, minor in (p. 277)

Political Science, Bachelor of Arts (B.A.) with a concentration in civil rights

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield
Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.
5. Expository and analytic writing

Students will demonstrate skill in expository and analytic writing in the political science discipline

6. Political behavior

Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 with an A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of nine credits from internships, mentorships or independent studies toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two

degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3
PADM/GVPA/CRJS/ URSP 623	Research Methods for Government and Public Affairs	3
Select one of the following:		3
PADM 624	Quantitative Methods for Public Administration	
Or a PADM elective course (elective requirement for the M.P.A. and elective for the undergraduate major)		
PADM 650	Principles of Nonprofit Management	3

Recommended course sequence/plan of study

Political Science, Bachelor of Arts (B.A.) with a concentration in comparative politics

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield

Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.

5. Expository and analytic writing
Students will demonstrate skill in expository and analytic writing in the political science discipline
6. Political behavior
Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 Senior Seminar with an A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of nine credits from internships, mentorships, or independent studies toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the

undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3
PADM/GVPA/CRJS/ URSP 623	Research Methods for Government and Public Affairs	3
Select one of the following:		3
PADM 624	Quantitative Methods for Public Administration	
Or a PADM elective course (elective requirement for the M.P.A. and elective for the undergraduate major)		
PADM 650	Principles of Nonprofit Management	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
POLI elective		3
Approved H&S General Education elective		3-4
Open electives		9
Term Hours:		15-16
Spring semester		
POLI 490	Senior Seminar	3
POLI elective		3
Approved H&S General Education elective		3-4
Open electives		6
Term Hours:		15-16
Senior year		
Fall semester		
PADM 601	Principles of Public Administration (may count for both undergraduate and graduate credits in accelerated program)	3

PADM 602	Public Administration Theory (may count for both undergraduate and graduate credits in accelerated program)	3
POLI elective		3
Open electives		6
Term Hours:		15
Spring semester		
PADM 607	Public Human Resource Management (may count for both undergraduate and graduate credits in accelerated program)	3
PADM 623	Research Methods for Government and Public Affairs (may count for both undergraduate and graduate credits in accelerated program)	3
POLI elective		3
Open electives		6
Term Hours:		15
Fifth year		
Fall semester		
PADM 609	Financial Management in Government	3
PADM 624	Quantitative Methods for Public Administration	3
PADM 625	Public Policy Analysis	3
500- to 600-level PADM, CRJS, GVPA, HSEP or URSP elective		3
Term Hours:		12
Spring semester		
GVPA 693	Internship	0-3
PADM 627	Workshop in Policy Analysis and Evaluation	3
PADM 689	Seminar in Public Administration: Integration of Theory and Practice	3
500- to 600-level PADM, CRJS, GVPA, HSEP or URSP electives		6
Term Hours:		12-15

Political Science, Bachelor of Arts (B.A.) with a concentration in human security

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield
Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.
5. Expository and analytic writing
Students will demonstrate skill in expository and analytic writing in the political science discipline
6. Political behavior
Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 Senior Seminar with an A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of nine credits from internships, mentorships or independent studies toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

The minimum number of credit hours required for this degree is 120.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the “[Satisfactory academic progress \(http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/\)](http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/)” section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3

Political Science, Bachelor of Arts (B.A.) with a concentration in international relations

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield
Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.
5. Expository and analytic writing
Students will demonstrate skill in expository and analytic writing in the political science discipline
6. Political behavior
Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 with an A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of six internship and three independent study credits toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "[Satisfactory academic progress \(http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/\)](http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Political Science, Bachelor of Arts (B.A.) with a concentration in political theory and methodology

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield
Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.
5. Expository and analytic writing
Students will demonstrate skill in expository and analytic writing in the political science discipline
6. Political behavior
Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 Senior Seminar with an

A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of nine credits from internships, mentorships or independent studies toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two

degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3

Political Science, Bachelor of Arts (B.A.) with a concentration in politics and government

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield

Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.

5. Expository and analytic writing
Students will demonstrate skill in expository and analytic writing in the political science discipline
6. Political behavior
Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 with an A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of six internship and three independent study credits toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public

sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "[Satisfactory academic progress \(http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/\)](http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program,

meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3
PADM/GVPA/CRJS/ URSP 623	Research Methods for Government and Public Affairs	3
Select one of the following:		3
PADM 624	Quantitative Methods for Public Administration	
Or a PADM elective course (elective requirement for the M.P.A. and elective for the undergraduate major)		
PADM 650	Principles of Nonprofit Management	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
POLI elective		3
Approved H&S General Education elective		3-4
Open electives		9
Term Hours:		15-16
Spring semester		
POLI 490	Senior Seminar	3
POLI elective		3
Approved H&S General Education elective		3-4
Open electives		6
Term Hours:		15-16
Senior year		
Fall semester		
PADM 601	Principles of Public Administration (may count for both undergraduate and graduate credits in accelerated program)	3
PADM 602	Public Administration Theory (may count for both undergraduate and graduate credits in accelerated program)	3
POLI elective		3
Open electives		6
Term Hours:		15
Spring semester		
PADM 607	Public Human Resource Management (may count for both undergraduate and graduate credits in accelerated program)	3

PADM 623	Research Methods for Government and Public Affairs (may count for both undergraduate and graduate credits in accelerated program)	3
POLI elective		3
Open electives		6
Term Hours:		15
Fifth year		
Fall semester		
PADM 609	Financial Management in Government	3
PADM 624	Quantitative Methods for Public Administration	3
PADM 625	Public Policy Analysis	3
500- to 600-level PADM, CRJS, GVPA, HSEP or URSP elective		3
Term Hours:		12
Spring semester		
GVPA 693	Internship	0-3
PADM 627	Workshop in Policy Analysis and Evaluation	3
PADM 689	Seminar in Public Administration: Integration of Theory and Practice	3
500- to 600-level PADM, CRJS, GVPA, HSEP or URSP electives		6
Term Hours:		12-15

Political Science, Bachelor of Arts (B.A.) with a concentration in U.S. government

The Department of Political Science offers a Bachelor of Arts in Political Science as well as elective courses in political science for program majors and non-majors.

The political science curriculum has two central objectives. It offers the student a broad liberal arts education along with a comprehensive understanding of the nature and the functioning of the political process and government. It also provides a sound foundation for graduate study in political science, public administration and nonprofit management, or for careers that require knowledge of governance and the political process, such as law.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Assumptions, methods and analytical tools
Students will demonstrate knowledge of the assumptions, methods and analytical tools of the discipline of political science.
2. Current political and policy issues
Students will demonstrate knowledge of current political and policy issues.
3. Theory and principles of four subfields
Students will demonstrate an understanding of basic theory and conceptual principles of political science in the four subfields of American government, political theory, international relations and comparative politics.
4. Advanced understanding of one subfield
Students will demonstrate an advanced understanding of current theoretical and empirical study in one subfield.
5. Expository and analytic writing

Students will demonstrate skill in expository and analytic writing in the political science discipline

6. Political behavior

Students will demonstrate knowledge of the ways in which individuals, national governmental organizations, political movements and parties, nation-states, and intergovernmental institutions work to achieve their political objectives.

Honors in political science

Political science majors can earn honors in political science. Students earn honors status when they complete POLI 490 Senior Seminar with an A grade and graduate with an overall 3.0 GPA and a 3.3 GPA in political science.

Special requirements

To graduate with a Bachelor of Arts in Political Science, students must complete 45 upper-level credits (including upper-level course work in the major) and maintain a cumulative and major GPA of 2.0. Students may count a maximum of nine credits from internships, mentorships or independent studies toward the major. Students may also apply three credits from courses in other departments toward the major with prior approval from the department chair.

Degree requirements for Political Science, Bachelor of Arts (B.A.) with a concentration in U.S. government

Term Hours:	15
Total Hours:	120-122

The minimum number of credit hours required for this degree is 120.

Accelerated B.A. and M.P.A.

The accelerated B.A. and M.P.A. program allows qualified students to earn both the B.A. in Political Science and the Master of Public Administration in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.P.A. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately. Students who do not have at least one year of professional-level experience in the public sector or in a nonprofit agency are required to earn three additional hours of credit in a public service practicum/internship. In this case, the two degrees may be earned with a minimum of 147 credits rather than the 159 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate knowledge about the assumptions, methods and analytical tools of the discipline of political science and current political and policy issues; and they will be prepared, professional public managers, public officials and citizens who are able to meet the challenges of public service in both government and nonprofit sectors and serve the profession and local, state, federal and international communities.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in political science courses; an overall GPA of 3.0; and a GPA of 3.3 in political science course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.P.A. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students who are interested in the accelerated program should consult with both a political science academic adviser and a graduate adviser to the M.P.A. program before they have completed 90 credits. To be considered for acceptance into the program and before enrolling in 600-level M.P.A. courses, students must complete the application to graduate study, submit standardized test scores and supply the supporting information required for admission.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate political science adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Political Science degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate public administration courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
PADM 601	Principles of Public Administration	3
PADM 602	Public Administration Theory	3
PADM 607	Public Human Resource Management	3
PADM 609	Financial Management in Government	3
PADM/GVPA/CRJS/ URSP 623	Research Methods for Government and Public Affairs	3
Select one of the following:		3
PADM 624	Quantitative Methods for Public Administration	3
Or a PADM elective course (elective requirement for the M.P.A. and elective for the undergraduate major)		
PADM 650	Principles of Nonprofit Management	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
POLI elective		3
Approved H&S General Education elective		3-4
Open electives		9

PADM 625	Public Policy Analysis	3
500- to 600-level PADM, CRJS, GVPA, HSEP or URSP elective		3
Term Hours:		12
Spring semester		
GVPA 693	Internship	0-3
PADM 627	Workshop in Policy Analysis and Evaluation	3
PADM 689	Seminar in Public Administration: Integration of Theory and Practice	3
500- to 600-level PADM, CRJS, GVPA, HSEP or URSP electives		6
Term Hours:		12-15

Nonprofit management and administration, minor in

The minor in nonprofit management and administration is designed to introduce students to the history and current profile of American and international nonprofit and nongovernmental organizations as providers of public services and political actors in the national and international political environment. The minor also emphasizes basic knowledge and skills needed for professional work in the nonprofit sector as well as graduate study in public administration, law and public policy.

Minor requirements

The minor consists of 18 credits. All students must take the following courses:

Course	Title	Hours
POLI 370	Foundations of Nonprofit Management	3
POLI 372	Ethics, Law and Governance	3
POLI 374	Financial Management for Nonprofits	3
Select three of the following courses as electives:		9
MASC 210	Public Relations	
MGMT 331	Human Resource Management	
POLI 320	Research Methods in Political Science	
POLI 331	Public Administration	
POLI 493	Political Science Internship (see adviser)	
SLWK 230	Communication in the Helping Process	
SOCY 310	Social Movements and Social Conflict	
Total Hours		18

Political science, minor in

A minor in political science consists of 18 credits, including:

Course	Title	Hours
POLI 103	U.S. Government	3
POLI/INTL 105	International Relations	3
Select at least three upper-level (300-400) credits in each of the following four main subfields of political science:		12
Comparative politics		
International relations		
Political theory and methodology		
U.S. government		
Total Hours		18

See a political science adviser for list of courses in each area. POLI 492, POLI 493 and POLI 494 cannot be used to fulfill the 12 upper-level credits. Approved courses for each subfield correspond to the concentration elective list of the same listed within the major requirements.

Public management, minor in

A minor in public management is designed for students who wish to prepare for a variety of employment opportunities in government and related fields. It provides an overview of public affairs at the national, state and local levels. Its emphasis is on acquainting students with the political context of public administration, issues of particular importance in the private sector, and the complexity of planning and decision-making. By emphasizing both professional skill and analytical thinking, it offers the possibility to develop valuable workplace skills and analytical capabilities that may qualify graduates for professional opportunities with local, state or federal agencies, and an ultimate career in the public sector. A public management minor also is solid preparation for graduate study in law, public administration, public policy and political science. Students in the minor may arrange an internship to provide experience and practical exposure to public management.

Minor requirements

The minor consists of 18 upper-level credits. All students must take the following courses:

Course	Title	Hours
POLI 310	Public Policy	3
POLI 322	State and Local Government and Politics	3
POLI 331	Public Administration	3
Select three of the following electives:		
POLI 309	Bureaucratic Politics	3
POLI 321	Urban Politics	3
POLI 323	Virginia Government and Politics	3
POLI 329	Intergovernmental Relations	3
POLI 344	Contemporary Political Theory	3
POLI 370	Foundations of Nonprofit Management	3
POLI 493	Political Science Internship (see adviser)	3
Total Hours		18

Department of Psychology

Michael Southam-Gerow, Ph.D.

Professor and chair

Terri Sullivan, Ph.D.

Professor and director of graduate studies

Linda E. Zyzniewski, Ph.D.

Professor and director of undergraduate studies

Lucy Hudson

Director of academic operations

LaToya Davis

Associate director of psychology advising and undergraduate academic operations

psychology.vcu.edu (<http://www.psychology.vcu.edu>)

In addition to the Bachelor of Science in Psychology, the Department of Psychology offers instruction in clinical, counseling, health and general psychology leading to the Doctor of Philosophy degree. Students in all doctoral degree programs are educated first as psychologists and then helped to develop competence in a more specialized area relevant to their scholarly and professional objectives. In addition, special training and experience in college teaching is available.

Honors in psychology

Psychology majors in the baccalaureate program can earn honors in psychology. Any student is eligible to join the program if he or she declares a major in psychology, meets one of the three following entrance requirements and joins the Honors College.

Entering freshmen must have combined SAT scores of at least 1910 and rank in the top 15 percent of their high school graduating class and present an unweighted 3.5 GPA (4.0 scale). Students transferring to VCU must have a 3.5 cumulative GPA in at least 30 college semester hours of credit and have no more than 60 college semester hours of credit. Continuing VCU students must have a 3.5 cumulative GPA and have taken a minimum of 20, but no more than 60, credits at VCU.

Once admitted to the program, the honors student must complete an honors thesis during a three-semester course sequence (PSYC 497, 498,

499), typically begun in their junior year, in which they propose, conduct and successfully defend their research.

A student in the program will graduate with honors in psychology if he or she has completed this three-course sequence with an A in each course, has maintained a GPA of 3.5, overall and in psychology, has had their thesis defense approved by members of the committee with no more than one negative vote and has completed all other requirements for the Bachelor of Science in Psychology.

Psychology advising (Psyugrad)

Students choose to major in psychology for many reasons. Most often they select the major from a combination of wanting to help other people and wanting to learn the scientific principles of behavior. Students in the program expect to receive career counseling and information on graduate and/or professional school training. The department has developed methods to meet these expectations.

Psyugrad has been established by the department to provide advising to undergraduate majors with educational and career planning. Students are shown how to choose appropriate electives for bachelor's-level careers in mental health services, personnel, management, corrections, rehabilitation, health services, education and laboratory research. In addition, all psychology majors are enrolled in PSYUGRAD, a Blackboard organization. PSYUGRAD provides up-to-date information on research opportunities, jobs, special presentations and advising documents.

The adviser's role is to consult with students about various areas of professional opportunity, explain the role of graduate education and suggest general areas of study outside of the psychology department that might fit the student's interests and goals. Advisers are available on a walk-in basis at the department's Psyugrad Advising Office located at the White House, 806 W. Franklin Street, Room 107. Hours are posted on PSYUGRAD Blackboard.

PSYC 492 and PSYC 494 are two of the upper-level electives specifically designed to enhance the psychology major's career pursuits for either employment or graduate-level training. Both of these courses provide opportunities for direct, practical experience with close supervision. Students may register for one, two or three credits following consultation with a faculty mentor who will supervise the experience. Students are expected to work three hours per week per credit hour for each of these experiences. They may be repeated for up to a total of 12 credits, but with no more than six credits of each.

The Department of Psychology offers service-learning courses (PSYC 307/LFSC 307; PSYC 493) that involve participation in an organized community service experience. Through classroom discussions and written assignments, students relate theories and research presented in class with community experiences. Through service-learning courses, students:

- Gain an understanding and appreciation of the community and its diverse people
- Explore an area of study or a career option
- Critically reflect on their values and responsibilities as citizens

In many cases, a service-learning course will meet the urban experience general education requirement (refer to the Schedule of Classes).

- Psychology, Bachelor of Science (B.S.) (p. 279)
- Psychology, Bachelor of Science (B.S.) with a concentration in:

- Addiction studies (p. 283)
- Applied psychology (p. 286)
- Life science (p. 288)
- Pre-graduate school (p. 291)
- Urban psychology (p. 293)
- Psychology, minor in (p. 295)

Psychology, Bachelor of Science (B.S.)

The Bachelor of Science in Psychology curriculum reflects the discipline's major functions — scientific research, teaching, acting as a healing profession and raising philosophical questions about the assumptions, values and ideals of human beings and their societies, which reflects psychology's origin in philosophy. Through a core set of requirements the student systematically develops understanding and skill in scientific methods of inquiry, focusing on the human mind and behavior. To fulfill the degree requirements, students may pursue the standard curriculum by selecting courses from four content areas that introduce students to the healing and philosophical sides of psychology and provide a broad understanding of the field as a whole; or the student may apply to one of several more focused concentrations that draw upon the special strengths of the VCU Department of Psychology.

Program outcomes

Upon completing this program, students will know and know how to do the following:

- **Understanding of content domain**
The curriculum of the B.S. in Psychology is designed to provide students with an accurate, comprehensive and up-to-date understanding of psychological concepts, principles and findings in the key domains of the field, including developmental processes, social processes, physiological and behavioral processes, and mental health and well-being.
- **Development of intellectual domain**
The curriculum of the B.S. in Psychology fosters the development of the intellectual skills required to generate theories, do research, communicate ideas and information to others, evaluate conclusions statistically and locate the information needed for these intellectual pursuits. Students will learn to think scientifically, understand the relationships between theories, observations and conclusions, and skillfully evaluate the empirical support for various theories and findings.
- **Development of affective and interpersonal domain**
Students seeking the B.S. in Psychology learn a number of practical, applied life skills pertaining to personal adjustment, relations with others and cross-cultural awareness.

Student learning outcomes

I. Communication and professional development

- **Effective communication skills:** Students will be able to communicate psychological theory and research to a range of audiences in oral and written formats in the capstone course.

II. Development of intellectual domain

- **Critical evaluation skills:** Students will be proficient in evaluating psychological theory and research methods; thinking scientifically

about behavior and mental processes; and basing judgments on psychological theory and research.

- **Empirical research skills:** Students will demonstrate proficiency in applying methodological knowledge in measurement, experimental design and analysis of psychological data.

III. Ethical responsibility in a diverse world

- **Ethical practices:** Students will demonstrate an understanding of ethical issues in psychological research and practice.

Special requirements

The Bachelor of Science in Psychology curriculum requires a minimum of 120 credits, with at least 30 credits in psychology courses. A maximum of 40 credits in psychology (this limit does not apply to PSYC courses numbered 490 and above) can be presented for the degree. At least 15 of the 30 minimum-required credits must be completed at VCU. All students must complete the following:

Course	Title	Hours
Psychology standard requirements		
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology	4
PSYC 214	Applications of Statistics	3
PSYC 317	Experimental Methods	3
Ancillary requirements		
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	4
Select one of the following:		3-4
BIOL 103	Global Environmental Biology	
BIOL 201	Human Biology	
Or an approved biology course		
STAT 210	Basic Practice of Statistics	3

For the standard curriculum, students must complete the psychology standard requirements, PSYC 451, at least one course from each of the following four domains or content areas, and at least three psychology electives.

Course	Title	Hours
Developmental		
PSYC 301	Child Psychology	3
PSYC 302	Psychology of Adolescence	3
PSYC 304	Life Span Developmental Psychology (cannot take both for credit toward a degree)	3
PSYC 306	Psychology of Adult Development	3
PSYC 307	Community Solutions: Multiple Perspectives	3
GRTY 510	Aging	3
Social/personality		
PSYC 309	Personality	3
PSYC 321	Social Psychology	3

PSYC/AFAM 322	Personality and Behavior of the African American	3	BIOL 101	Biological Concepts (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
PSYC 323	Interpersonal Relations	3	BIOL 103 or BIOL 201	Global Environmental Biology ¹ Human Biology	3-4
PSYC/RELS 333	Psychology and Religious Experience	3	BIOZ 101	Biological Concepts Laboratory	1
PSYC/GSWS 335	Psychology of Women	3	HUMS 202	Choices in a Consumer Society	1
PSYC/SOCY 341	Group Dynamics	3	PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology (satisfies general education BOK for social/behavioral sciences and AOI for diversities in the human)	4
Physiological/learning			STAT 210	Basic Practice of Statistics (satisfies general education quantitative foundations)	3
PSYC 401	Physiological Psychology	3	Electives (upper level)		21
PSYC 406	Perception	3	Experiential fine arts ²		1-3
PSYC 410	Principles of Learning and Cognition	3	Foreign language through the 102 level (by course or placement)		0-6
Self-development/applied psychology			Open electives		
PSYC 303	Personal Adjustment	3	Select any course.		23-32
PSYC 308	Stress and its Management	3	Total Hours		120
PSYC 310	Industrial Psychology	3			
PSYC 318	Principles of Psychological Tests and Measurements	3			
PSYC 340	Introduction to the Helping Relationship	3			
PSYC 407	Psychology of the Abnormal	3			
PSYC 412	Health Psychology	3			
PSYC 415	Psychological Theories of Addiction	3			
PSYC 416	Psychological Treatment of Addiction	3			
PSYC 426	Child Psychopathology	3			

Standard psychology courses must be taken sequentially and ideally should be completed by the end of the junior year. These courses are PSYC 101 with a minimum grade of C; PSYC 214 with a minimum grade of C (PSYC 214 also has the prerequisite requirement of STAT 210 or its equivalent with a minimum grade of C); and PSYC 317 with a minimum grade of C (PSYC 317 also has the prerequisite requirement of PSYC 214 or its equivalent with a minimum grade of C).

PSYC 451 is the capstone course and must be taken in the senior year.

Students must achieve a minimum cumulative VCU GPA of 2.0 and also achieve a minimum GPA of 2.0 in the major in order to graduate.

Degree requirements for Psychology, Bachelor of Science (B.S.)

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
PSYC 214	Applications of Statistics	3
PSYC 317	Experimental Methods	3
PSYC 451	History of Psychology	3
• Additional major requirements		
Select at least one course from each of the domains listed above.		12
• Major electives		
PSYC electives (upper-level)		9
Ancillary requirements		

BIOL 103 satisfies general education AOI for scientific and logical reasoning. Students who chose this course will take additional electives to fulfill degree requirements.

2

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
BIOL 101	Biological Concepts (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
BIOZ 101	Biological Concepts Laboratory	1
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology (satisfies general education BOK for social/behavioral sciences and AOI for diversities in the human experience)	4
STAT 210	Basic Practice of Statistics (satisfies general education quantitative foundations)	3
UNIV 101	Introduction to the University	1

UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		

Term Hours: 15

Spring semester

HUMS 202	Choices in a Consumer Society	1
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		
General education course (select AOI for global perspectives)		3
General education course (select AOI for creativity, innovation and aesthetic inquiry)		3
Open electives		6

Term Hours: 16

Sophomore year

Fall semester

BIOL 103 or BIOL 201	Global Environmental Biology ¹ or Human Biology ¹	3-4
HUMS 291	Special Topics in the Humanities and Sciences	1
PSYC 214	Applications of Statistics	3
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
Experiential fine arts		1-3
Foreign language 101		3

Term Hours: 14-17

Spring semester

PSYC 317	Experimental Methods	3
PSYC elective (upper-level)		3
Foreign language 102		3
General education course (select BOK to complete breadth of knowledge requirement)		3
Open elective (or select general education course that satisfies AOI for scientific and logical reasoning if BIOL 103 was not selected above)		3

Term Hours: 15

Junior year

Fall semester

Course in developmental domain		3
Course in social/personality domain		3
Elective (upper-level)		3
Open electives		6

Term Hours: 15

Spring semester

Course in physiological/learning domain		3
Course in self-development/applied psychology domain		3
PSYC elective (upper-level)		3
Open electives		6

Term Hours: 15

Senior year

Fall semester

PSYC 451	History of Psychology	3
PSYC elective (upper-level)		3
PSYC or other electives (upper-level)		6
Open elective		3

Term Hours: 15

Spring semester

PSYC or other elective (upper-level)		3
Electives (upper-level)		6
Open electives		6

Term Hours: 15

Total Hours: 120-123

¹

BIOL 103 satisfies general education AOI for scientific and logical reasoning. Students who chose this course will take additional electives to fulfill degree requirements.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.Ed.

The accelerated B.S. in Psychology and M.Ed. in Counselor Education program allows qualified students to earn both the B.S. in Psychology and M.Ed. in Counselor Education in six years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.S and M.Ed. degrees. Thus, the two degrees may be earned with a minimum of 168 credits rather than the 180 credits necessary if the two degrees are pursued separately.

Students holding the undergraduate degree in psychology will have knowledge in human behavior, learning and cognition that provides a foundation for graduate study in counselor education. The counselor education program will provide students with research-based professional and clinical experiences necessary for effective counseling, supervision, teaching, advocacy and leadership in diverse settings. Program faculty will prepare students to become licensed school counselors, couples and family counselors, or counselors and student affairs professionals in higher education institutions.

Admission to the program

Minimum qualifications for admittance to the program include completion of 75 undergraduate credit hours, including at least one undergraduate CLED course; minimum undergraduate GPA of 3.0 or minimum cumulative GPA of 3.0 on the most recent 60 credits of course work. Successful applicants would enter the program in the fall semester of their senior year.

Students who are interested in the accelerated program should consult with both a psychology academic adviser and a graduate counselor education adviser before they have completed 75 credits. Undergraduate students must have psychology departmental approval (e.g., academic adviser, department chair) to participate in this accelerated program and also meet admission criteria of the M.Ed. in Counselor Education program prior to beginning their final year of full-time undergraduate study. These criteria include the following:

- Three letters of recommendation addressing the student's potential for graduate study in education (including at least one from a psychology faculty member)
- Current resume
- Statement of intent (consult with counselor education faculty)
- Transcripts of all previous college work
- Personal interview (to be scheduled after application is received)

Candidates should submit applications for admission immediately following the fall of their junior year, but no later than Jan. 15 of the same academic year. Students enrolled in the accelerated program must complete the accelerated graduate course work (CLED courses) in two semesters during their final year of the baccalaureate program. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study.

Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, with a minimum undergraduate GPA of 3.0 or minimum cumulative GPA of 3.0 on the most recent 60 credits of course work and minimum grades of B in all 600-level CLED courses, students are fully admitted to the master's program. To graduate with the M.Ed. in Counselor Education, students will meet graduation requirements of the degree as presented in the bulletin that is effective at the time of their full admission to the master's program.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Both the undergraduate psychology adviser and the graduate counselor education faculty adviser provide guidance to students admitted to the accelerated program.

Degree requirements

The Bachelor of Science in Psychology degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy major elective or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate counselor education (CLED) courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
CLED 600	Professional Orientation and Ethical Practice in Counseling	3
CLED 601	Theories of Counseling	3
CLED 605	Career Information and Exploration	3
CLED 612	Wellness Counseling	3

Recommended course sequence/plan of study

Psychology, Bachelor of Science (B.S.) with a concentration in addiction studies

The Bachelor of Science in Psychology curriculum reflects the discipline's major functions – scientific research, teaching, acting as a healing profession and raising philosophical questions about the assumptions, values and ideals of human beings and their societies, which reflects psychology's origin in philosophy. Through a core set of requirements the student systematically develops understanding and skill in scientific methods of inquiry, focusing on the human mind and behavior. To fulfill the degree requirements, students may pursue the standard curriculum by selecting courses from four content areas that introduce students to the healing and philosophical sides of psychology and provide a broad understanding of the field as a whole; or the student may apply to one of several more focused concentrations that draw upon the special strengths of the VCU Department of Psychology.

Program outcomes

Upon completing this program, students will know and know how to do the following:

- **Understanding of content domain**

The curriculum of the B.S. in Psychology is designed to provide students with an accurate, comprehensive and up-to-date understanding of psychological concepts, principles and findings in the key domains of the field, including developmental processes, social processes, physiological and behavioral processes, and mental health and well-being.

- **Development of intellectual domain**

The curriculum of the B.S. in Psychology fosters the development of the intellectual skills required to generate theories, do research, communicate ideas and information to others, evaluate conclusions statistically and locate the information needed for these intellectual pursuits. Students will learn to think scientifically, understand the relationships between theories, observations and conclusions, and skillfully evaluate the empirical support for various theories and findings.

- **Development of affective and interpersonal domain**

Students seeking the B.S. in Psychology learn a number of practical, applied life skills pertaining to personal adjustment, relations with others and cross-cultural awareness.

Student learning outcomes

I. Communication and professional development

- Effective communication skills: Students will be able to communicate psychological theory and research to a range of audiences in oral and written formats in the capstone course.

II. Development of intellectual domain

- Critical evaluation skills: Students will be proficient in evaluating psychological theory and research methods; thinking scientifically about behavior and mental processes; and basing judgments on psychological theory and research.
- Empirical research skills: Students will demonstrate proficiency in applying methodological knowledge in measurement, experimental design and analysis of psychological data.

III. Ethical responsibility in a diverse world

- Ethical practices: Students will demonstrate an understanding of ethical issues in psychological research and practice.

Special requirements

The Bachelor of Science in Psychology curriculum requires a minimum of 120 credits, with at least 30 credits in psychology courses. A maximum of 40 credits in psychology (this limit does not apply to PSYC courses numbered 490 and above) can be presented for the degree. At least 15 of the 30 minimum-required credits must be completed at VCU. All students must complete the following:

Course	Title	Hours
Psychology standard requirements		
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology	4
PSYC 214	Applications of Statistics	3
PSYC 317	Experimental Methods	3

Ancillary requirements

BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	4
Select one of the following:		3-4
BIOL 103	Global Environmental Biology	
BIOL 201	Human Biology	
Or an approved biology course		
STAT 210	Basic Practice of Statistics	3

For the addiction studies concentration, students must complete the psychology standard requirements, PSYC 415, PSYC 416, PSYC 451 and PSYC 493 and at least one course from each of the developmental, social/personality and physiological/learning domains or content areas.

Course	Title	Hours
Developmental		
GRTY 510	Aging	3
PSYC 301	Child Psychology	3
PSYC 302	Psychology of Adolescence	3
PSYC 304	Life Span Developmental Psychology (cannot take both for credit toward a degree)	3
PSYC 306	Psychology of Adult Development	3
PSYC 307	Community Solutions: Multiple Perspectives	3
Social/personality		
PSYC 309	Personality	3
PSYC 321	Social Psychology	3
PSYC/AFAM 322	Personality and Behavior of the African American	3
PSYC 323	Interpersonal Relations	3
PSYC/RELS 333	Psychology and Religious Experience	3
PSYC/GSWS 335	Psychology of Women	3
PSYC/SOCY 341	Group Dynamics	3
Physiological/learning		
PSYC 401	Physiological Psychology	3
PSYC 406	Perception	3
PSYC 410	Principles of Learning and Cognition	3

Standard psychology courses must be taken sequentially and ideally should be completed by the end of the junior year. These courses are PSYC 101 with a minimum grade of C; PSYC 214 with a minimum grade of C (PSYC 214 also has the prerequisite requirement of STAT 210 or its equivalent with a minimum grade of C); and PSYC 317 with a minimum grade of C (PSYC 317 also has the prerequisite requirement of PSYC 214 or its equivalent with a minimum grade of C).

PSYC 451 is the capstone course and must be taken in the senior year.

Students must achieve a minimum cumulative VCU GPA of 2.0 and also achieve a minimum GPA of 2.0 in the major in order to graduate.

BIOL 103	Global Environmental Biology	
BIOL 201	Human Biology	
Or an approved biology course		
STAT 210	Basic Practice of Statistics	3

This information outlines the requirements for students who are admitted and pursuing the applied psychology concentration. To be admitted, continue and graduate with this concentration, students must achieve a minimum cumulative VCU GPA of 2.5 and also achieve a minimum GPA of 2.5 in the major. This concentration requires 30 credit hours in the major.

Standard psychology courses must be taken sequentially and ideally should be completed by the end of the junior year. These are PSYC 101 with a minimum grade of C; PSYC 214 with a minimum grade of C (PSYC 214 also has the prerequisite requirement of STAT 210 or its equivalent with a minimum grade of C); and PSYC 317 with a minimum grade of C (PSYC 317 also has the prerequisite requirement of PSYC 214 or its equivalent with a minimum grade of C).

PSYC 451 is the capstone course and must be taken in the senior year.

BIOL 103 satisfies general education AOI for scientific and logical reasoning. Students who chose this course will take additional electives to fulfill degree requirements.

The minimum number of credit hours required for this degree is 120.

Psychology, Bachelor of Science (B.S.) with a concentration in life science

The Bachelor of Science in Psychology curriculum reflects the discipline's major functions – scientific research, teaching, acting as a healing profession and raising philosophical questions about the assumptions, values and ideals of human beings and their societies, which reflects psychology's origin in philosophy. Through a core set of requirements the student systematically develops understanding and skill in scientific methods of inquiry, focusing on the human mind and behavior. To fulfill the degree requirements, students may pursue the standard curriculum by selecting courses from four content areas that introduce students to the healing and philosophical sides of psychology and provide a broad understanding of the field as a whole; or the student may apply to one of several more focused concentrations that draw upon the special strengths of the VCU Department of Psychology.

Program outcomes

Upon completing this program, students will know and know how to do the following:

- **Understanding of content domain**

The curriculum of the B.S. in Psychology is designed to provide students with an accurate, comprehensive and up-to-date understanding of psychological concepts, principles and findings in the key domains of the field, including developmental processes, social processes, physiological and behavioral processes, and mental health and well-being.

- **Development of intellectual domain**

The curriculum of the B.S. in Psychology fosters the development of the intellectual skills required to generate theories, do research, communicate ideas and information to others, evaluate conclusions statistically and locate the information needed for these intellectual pursuits. Students will learn to think scientifically, understand the relationships between theories, observations and conclusions, and skillfully evaluate the empirical support for various theories and findings.

• **Development of affective and interpersonal domain**

Students seeking the B.S. in Psychology learn a number of practical, applied life skills pertaining to personal adjustment, relations with others and cross-cultural awareness.

Student learning outcomes

I. Communication and professional development

- Effective communication skills: Students will be able to communicate psychological theory and research to a range of audiences in oral and written formats in the capstone course.

II. Development of intellectual domain

- Critical evaluation skills: Students will be proficient in evaluating psychological theory and research methods; thinking scientifically about behavior and mental processes; and basing judgments on psychological theory and research.
- Empirical research skills: Students will demonstrate proficiency in applying methodological knowledge in measurement, experimental design and analysis of psychological data.

III. Ethical responsibility in a diverse world

- Ethical practices: Students will demonstrate an understanding of ethical issues in psychological research and practice.

Special requirements

The Bachelor of Science in Psychology curriculum requires a minimum of 120 credits, with at least 30 credits in psychology courses. A maximum of 40 credits in psychology (this limit does not apply to PSYC courses numbered 490 and above) can be presented for the degree. At least 15 of the 30 minimum-required credits must be completed at VCU. All students must complete the following:

Course	Title	Hours
Psychology standard requirements		
PSYC 101 Play course video for Introduction to Psychology	Introduction to Psychology	4
PSYC 214	Applications of Statistics	3
PSYC 317	Experimental Methods	3
Ancillary requirements		
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	4
Select one of the following:		3
BIOL 201	Human Biology	

Or an approved biology course

STAT 210	Basic Practice of Statistics	3
----------	------------------------------	---

This information outlines the requirements for students who are admitted and pursuing the life science concentration. To be admitted, continue and graduate with this concentration, students must achieve a minimum cumulative VCU GPA of 2.5 and also achieve a minimum GPA of 2.5 in the major. This concentration requires 34 credit hours in the major.

Standard psychology courses must be taken sequentially and ideally should be completed by the end of the junior year. These courses are PSYC 101 with a minimum grade of C; PSYC 214 with a minimum grade of C (PSYC 214 also has the prerequisite requirement of STAT 210 or its equivalent with a minimum grade of C); and PSYC 317 with a minimum grade of C (PSYC 317 also has the prerequisite requirement of PSYC 214 or its equivalent with a minimum grade of C).

PSYC 451 is the capstone course and must be taken in the senior year.

PSYC 201 cannot be used to meet this requirement.

At least nine of the 18 credits must be taken at VCU.

Department of Sociology

Susan Bodnar-Deren, Ph.D.

Associate professor and chair

sociology.vcu.edu (<http://www.sociology.vcu.edu>)

The sociology department at VCU provides an engaged, learner-centered experience for our undergraduate and graduate students through active involvement in faculty research and community development. Through cutting-edge research, excellent undergraduate and graduate teaching focused on critical thinking, exciting applied opportunities, vital service and community outreach both nationally and internationally, and preparation of students for a wide range of jobs, sociology plays a central role in quality liberal arts education. Sociology is a “social science”; it is a discipline grounded in using sociological theory and the scientific method to create the knowledge necessary for understanding and improving social life. Using theory as a foundation for analysis, sociologists collect and analyze empirical data useful in making decisions related to public life, such as social and economic policy, and private life, such as family and interpersonal health. It is this relationship between sociological theory, as the foundation of critical thinking, and the scientific method, as the guiding principles of analysis, which makes sociology a rapidly expanding field with expertise increasingly sought after by those who craft policies and create programs.

The Department of Sociology offers a Bachelor of Science in Sociology at the undergraduate level, as well as a Master of Science at the graduate level.

- Sociology, Bachelor of Science (B.S.) (p. 296)
- Sociology, minor in (p. 298)

Sociology, Bachelor of Science (B.S.)

The Bachelor of Science in Sociology requires a minimum of 120 credits, with at least 33 of those credits in sociology and other approved courses. The baccalaureate curriculum in sociology seeks to ensure that each student develops a solid foundation in the basic principles, theories and techniques of analysis in sociology. It also encourages students to pursue an interdisciplinary approach by incorporating course credit from closely related subject areas in other programs. Since students majoring in sociology vary in their interests and career goals, the curriculum allows for a great deal of flexibility in developing individual courses of study. Students who are interested in pursuing graduate studies in sociology usually will take more than the minimum number of upper-level courses. The program provides opportunities for involvement in faculty research through its course offerings, which include independent study, internships and honors research.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Understand sociological theory
Students will demonstrate an ability to apply different theoretical perspectives to social issues as well as compare and contrast basic theoretical orientations.
- Understand sociological concepts
Students will demonstrate knowledge of basic concepts in sociology, such that students will be able to define, give examples and demonstrate the relevance of culture, social structure, institutions, socialization, stratification, social change and differentiations by race/ethnicity, gender, sexuality, age and class.
- Understand sociological research and analysis
Students will demonstrate knowledge of basic methodological approaches (both quantitative and qualitative) in sociology and the general role of methodology in building sociological knowledge.

Students will know how to retrieve data sets from the Internet, read and produce descriptive statistics, and work with data analysis software, such as SPSS.

Degree requirements for Sociology, Bachelor of Science (B.S.)

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements ¹		
SOCY 202	Foundations of Theory	3
SOCY 320	Research Methods in the Social Sciences	3
SOCY 402	Contemporary Theory	3
SOCY 406	Sociology Senior Seminar	3
• Major electives		
Select SOCY courses (300- to 400-level) ²		18
Ancillary requirements		
HUMS 202	Choices in a Consumer Society	1
SOCY 101 Play course video for Introduction to Sociology	Introduction to Sociology (satisfies general education BOK for social/behavioral sciences and AOI for diversities in the human experience)	3
STAT 210	Basic Practice of Statistics (satisfies general education quantitative foundations)	3
Experiential fine arts ³		1-3
Foreign language through the 102 level (by course or placement)		0-6
Open electives		
Select any course.		50-58
Total Hours		120

The minimum number of credit hours required for this degree is 120.

1

A minimum grade of C is required in each course.

2

Students have an option of completing three elective credits chosen from any 300- or 400-level SOCS course.

3

Course offered by the School of the Arts.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester	Hours
MATH 131 Introduction to Contemporary Mathematics (or open elective if placed out of MATH 131)	3

UNIV 101	Introduction to the University	1
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		
Experiential fine arts		1-3
General education course (select AOI for global perspectives)		3
General education course (select AOI for creativity, innovation and aesthetic inquiry)		3

Term Hours: 14-16

Spring semester

HUMS 202	Choices in a Consumer Society	1
SOCY 101	Introduction to Sociology (satisfies general education BOK for social/behavioral sciences and AOI for diversities in the human experience)	3
Play course video for Introduction to Sociology		
STAT 210	Basic Practice of Statistics (satisfies general education quantitative foundations)	3

UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		
General education course (select AOI for scientific and logical reasoning)		3
Open elective		3

Term Hours: 16

Sophomore year

Fall semester

SOCY 202	Foundations of Theory	3
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
Foreign language 101		3
General education course (select BOK to complete breadth of knowledge requirement)		3
Open elective		3

Term Hours: 15

Spring semester

SOCY 320	Research Methods in the Social Sciences	3
Foreign language 102		3
General education course (select BOK to complete breadth of knowledge requirement)		3
Major elective (300-level)		3
Open elective		3

Term Hours: 15

Fall semester

Major elective (300-level)		3
Major electives (300- to 400-level, except SOCY 402 or SOCY 406)		6

Open electives (upper-level preferred, may take additional SOCY electives)	6
--	---

Term Hours: 15

Spring semester

Major electives (300- to 400-level)	6
Open electives (upper-level preferred, may take additional SOCY electives)	9

Term Hours: 15

Senior year

Fall semester

SOCY 402	Contemporary Theory	3
Open electives (upper-level preferred, may take additional SOCY electives)		12

Term Hours: 15

Spring semester

SOCY 406	Sociology Senior Seminar	3
Open electives (upper-level preferred, may take additional SOCY electives)		12

Term Hours: 15

Total Hours: 120-122

The minimum number of credit hours required for this degree is 120.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Sociology in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 144 credits rather than the 156 credits necessary if the two degrees are pursued separately.

Students holding these degrees will have the strong analytical and methodological skills that prepare them for future academic and/or professional work. Using both theory and methods, students will develop a sociological imagination central to the critical analysis of modern social problems. The program will also provide students with opportunities to participate in research projects, internships and other training programs where they develop the skills to evaluate, refine and apply what they learn in the classroom.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including a minimum of nine credit hours in sociology courses; an overall GPA of 3.0; and a GPA of 3.3 in sociology course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.) Prior to being formally considered for admission and before enrolling in graduate courses, the student must complete the graduate school application, submit GRE general aptitude scores and supply supporting information required for admission.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.S. program admission deadline. The entry term for the master's program will be the next available admission term following the last semester of

undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Three reference letters (at least one from a sociology faculty member) must accompany the application. The director of graduate studies for the sociology master's program will provide guidance of students in this program. Students who are interested in this program should consult with the director of graduate studies or the director of undergraduate studies before they have completed 90 credits. Both directors may be contacted for more information about admission procedures.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate sociology adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Sociology degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate sociology courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
SOCY 502	Contemporary Sociological Theory	3
SOCY/STAT 508	Introduction to Social Statistics	3
SOCY 601	Sociological Research Methods	3
SOCY/STAT 608	Statistics for Social Research	3

Other SOCY graduate courses, with the approval of the director of graduate studies, may serve as an elective requirement for the M.S. degree and an elective for the undergraduate major

Total Hours 12

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
300-level SOCY elective		3
300- to 400-level SOCY electives (except SOCY 402 or SOCY 406)		6

Open electives (upper-level preferred, may take additional SOCY electives) 7

Term Hours: 16

Spring semester

300- to 400-level SOCY electives or approved SOCY or SOCS electives 6

Open electives (upper-level preferred, may take additional SOCY electives) 9

Term Hours: 15

Senior year

Fall semester

SOCY 502 Contemporary Sociological Theory (may count for both undergraduate and graduate credits in accelerated program) 3

SOCY/STAT 508 Introduction to Social Statistics (may count for both undergraduate and graduate credits in accelerated program) 3

Open electives (upper-level preferred, may take additional SOCY electives) 9

Term Hours: 15

Spring semester

SOCY 406 Sociology Senior Seminar 3

SOCY 601 Sociological Research Methods (may count for both undergraduate and graduate credits in accelerated program) 3

SOCY/STAT 608 Statistics for Social Research (may count for both undergraduate and graduate credits in accelerated program) 3

Open electives (upper-level preferred, may take additional SOCY electives) 6

Term Hours: 15

Fifth year

Fall semester

SOCY 602 Applications of Sociological Research Methods 3

SOCY 699 Seminar in Sociological Practice 3

500- to 600-level SOCY electives 6

Term Hours: 12

Spring semester

SOCY 699 Seminar in Sociological Practice 3

500- to 600-level SOCY electives 6

Term Hours: 12

Sociology, minor in

A sociology minor consists of 18 credits including:

Course	Title	Hours
SOCY 101 Play course video for Introduction to Sociology		3

SOCY 202	Foundations of Theory	3
Select 12 additional credits in upper-level (300-400) sociology courses ¹		12
Total Hours		18

1

Students have an option of completing three elective credits chosen from any 300- or 400-level SOCS course.

Department of Statistical Sciences and Operations Research

D'Arcy P. Mays III, Ph.D.

Associate professor and chair

ssor.vcu.edu (<https://ssor.vcu.edu/>)

The Department of Statistical Sciences and Operations Research offers programs leading to a Bachelor of Science in Mathematical Sciences, a Master of Science in Mathematical Sciences with a concentration in either operations research or statistics and a Doctor of Philosophy in Systems Modeling and Analysis. The curriculum of the programs is run jointly with the Department of Mathematics and Applied Mathematics (p. 219).

The department also offers a post-baccalaureate undergraduate Certificate in Statistics and a graduate Certificate in Applied Statistics.

- Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in operations research (p. 299)
- Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in statistics (p. 303)
- Statistics, minor in (p. 307)
- Statistics, Certificate in (Post-baccalaureate undergraduate certificate) (p. 307)

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in operations research

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. In the Department of Statistical Sciences and Operations Research, students pursuing the Bachelor of Science in Mathematical Sciences can choose a concentration of operations research, which focuses on modern mathematical techniques

for solving problems arising from other fields, such as engineering, business or economics.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Apply theories of mathematical programming
- Perform stochastic models and decision analysis
- Obtain, analyze and interpret data
- Use commonly used operations research software
- Identify and apply operations research models
- Develop understanding of mathematics
- Communicate technical information orally and in writing

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor's degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the "Academic regulations and general degree requirement" section of this bulletin

Degree requirements for Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in operations research

Foreign language through the 102 level (by course or placement)		0-6
Natural science sequence: Select one sequence from list below (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)		8-10
Natural science elective (different from chosen science sequence)		3-5
Open electives		
Select any course.		9-25
Total Hours		120

¹

These courses/credits require a minimum grade of C.

²

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

Natural science sequence

Course	Title	Hours
Select one of the following sequences:		
Sequence 1		

BIOL 151	Introduction to Biological Sciences I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
BIOZ 151	Introduction to Biological Science Laboratory I	1
BIOL 152	Introduction to Biological Sciences II	3
BIOZ 152	Introduction to Biological Science Laboratory II	1
Sequence 2		
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I (satisfies general education AOI for scientific and logical reasoning)	1
CHEM 102	General Chemistry II	3
CHEZ 102	General Chemistry Laboratory II	1
Sequence 3		
PHYS 201	General Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	4
PHYS 202	General Physics II	4
Sequence 4		
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
PHYS 208	University Physics II	5

Electives

For the operations research concentration, three electives must be chosen from the following list:

Course	Title	Hours
CMSC 302	Introduction to Discrete Structures	3
CMSC 303	Introduction to the Theory of Computation	3
CMSC 391	Topics in Computer Science ¹	3
CMSC 401	Algorithm Analysis with Advanced Data Structures	3
INFO 364	Database Systems	3
MATH 301	Differential Equations	3
MATH 305	Elementary Number Theory	3
MATH/BNFO 380	Introduction to Mathematical Biology	4
MATH 391	Topics in Mathematics ¹	1-3
MATH 401	Introduction to Abstract Algebra	3
MATH 407	Advanced Calculus	3
MATH 409	General Topology	3
MATH 432	Ordinary Differential Equations	3
MATH 433	Partial Differential Equations	3
MATH 434	Discrete Dynamical Systems	3
MATH 507	Bridge to Modern Analysis	3
MATH 511	Applied Linear Algebra	3
MATH 515	Numerical Analysis	3
OPER 591	Topics in Operations Research ¹	1-3

SSOR 492	Independent Study ¹	2-4
STAT 305	Intermediate Statistics ²	3
STAT 310	Introduction to Statistical Inference	3
STAT 314	Applications of Statistics ²	4
STAT 321	Introduction to Statistical Computing	3
STAT 391	Topics in Statistics ¹	3
STAT 415	Statistical Consulting	3
STAT 421	Applied Statistical Computing Using R	3
STAT 422	Structured Problem Solving Using Statistics	3
STAT 423	Nonparametric Statistics	3
STAT 425	Multivariate Statistics	3
STAT 435	Industrial Statistics	3
STAT 441	Applied Statistics for Engineers and Scientists ³	3
STAT 443	Regression	3
STAT 475	Time Series	3
STAT/BIOS 513	Mathematical Statistics I	3
STAT/BIOS 514	Mathematical Statistics II	3
STAT 544	Statistical Methods II	3
STAT 546	Linear Models	3
STAT 591	Topics in Statistics ¹	3

1

Special topics and independent study courses require prior approval from the department chair or the student's adviser.

2

Students may choose only one of STAT 305, STAT 314 or STAT 441.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

1

Different science than chosen for sequence.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Mathematical Sciences with concentration in operations research in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to nine hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 141 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate a comprehensive understanding of the theory and application of mathematical programming and of stochastic models. They will know how to obtain, analyze and interpret data, and learn how to use software common in the industry, allowing them to model operations research problems. Students will know how to clearly and concisely present technical information in writing and through oral presentations. The program will also provide students with opportunities to participate in research

projects, internships and other training programs where they develop the skills to evaluate, refine and apply what they learn in the classroom.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including MATH 200, MATH 201 and MATH 307 (calculus sequence), STAT 212, STAT 309, OPER 327 and STAT 403; an overall minimum GPA of 3.0; and a minimum GPA of 3.3 in mathematics, operations research and statistics course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.S. program admission deadline. Three reference letters (at least one from a department faculty member) must accompany the application. The adviser of graduate studies for the mathematical sciences master's program with a concentration in operations research will provide guidance of students in this program. Students who are interested in the accelerated program should consult with the faculty adviser to the operations research concentration of the M.S. program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate mathematical sciences adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Mathematical Sciences degree with concentration in operations research will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. Nine of these credits are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate operations research and statistics courses that may be taken as an undergraduate, once a student is admitted to the program, are in the table below.

Course	Title	Hours
OPER 527	Optimization I	3
OPER 528	Stochastic Simulation	3

Approved 500-level OPER or STAT course, or approved 600-level OPER or STAT with OPER 527 or OPER 528 as prerequisites	3
Approved 500-level or 600-level OPER or STAT course	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in statistics

The curriculum in mathematical sciences promotes understanding of the mathematical sciences and their structures, uses and relationships to other disciplines. To this end, the scholarly growth of the faculty and students in the mathematical sciences is nurtured through study, research and a high standard of teaching. The curriculum provides a sound foundation for the student seeking to enter a career with a technological orientation or for the student who wishes to pursue graduate study in applied mathematics, biomathematics, mathematics, operations research, statistics, teaching mathematics in secondary schools or related fields.

A Bachelor of Science is offered jointly by the Department of Mathematics and Applied Mathematics and the Department of Statistical Sciences and Operations Research. In the Department of Statistical Sciences and Operations Research, students pursuing the Bachelor of Science in Mathematical Sciences can choose a concentration of statistics, which teaches students how mathematical models used in the investigation of uncertain phenomena are developed and applied to experimental and nonexperimental data.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Understand basic statistical concepts and terms
- Perform data collection
- Analyze data
- Use statistical software packages
- Understand probability and inference
- Understand calculus and linear algebra
- Communicate results in writings and orally
- Use general linear model

Special requirements

The B.S. in Mathematical Sciences requires a minimum of 120 credits. Along with the general education requirements of the College of Humanities and Sciences and the undergraduate degree requirements, students are required to take core courses and fulfill specific requirements for the degree.

Based on the results of the Mathematics Placement Test, students may be required to take MATH 151. No more than one course in mathematics (MATH) at the 100 level can count for the general requirements toward the degree. Credit for 100-level mathematical sciences courses cannot be applied toward the mathematical sciences courses required for the major in mathematical sciences.

Double major

Students who meet the requirements for two of the concentrations within the mathematical sciences curriculum can receive a double major. To

initiate a double major, students must obtain the appropriate form from the Office of Records and Registration.

Second baccalaureate degree

For students possessing a bachelor's degree and wishing to gain undergraduate preparation in an area of mathematical sciences, second baccalaureate degrees are offered through the department. For detailed information about these programs, refer to the "Academic regulations and general degree requirement" section of this bulletin

Degree requirements for Mathematical Sciences, Bachelor of Science (B.S.) with a concentration in statistics

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
MATH 201	Calculus with Analytic Geometry II ¹	4
MATH 307	Multivariate Calculus ¹	4
MATH 310	Linear Algebra ¹	3
• Additional major requirements		
MATH 211 or MATH 300	Mathematical Structures ¹ Introduction to Mathematical Reasoning	3
SSOR 490	Developing Professional Skills in Operations Research and Statistics ¹	3
SSOR 495	Expositions in Statistical Sciences and Operations Research ¹	1
STAT 309	Introduction to Probability Theory ¹	3
• Concentration requirements		
STAT 305	Intermediate Statistics ¹	3
STAT 310	Introduction to Statistical Inference ¹	3
STAT 321	Introduction to Statistical Computing ¹	3
Concentration electives		
Select from concentration electives below. ¹		18
Ancillary requirements		
HUMS 202	Choices in a Consumer Society	1
MATH 200	Calculus with Analytic Geometry I ¹	4
STAT 212	Concepts of Statistics (satisfies general education quantitative foundations)	3
Experiential fine arts ²		1-3
Foreign language through the 102 level (by course or placement)		0-6
Natural science sequence: Select one sequence from list below (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)		8-10
Natural science elective (different from chosen science sequence)		3-5
Open electives		
Select any course.		16-28
Total Hours		120

1

These courses/credits require a minimum grade of C.

2

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

Natural science sequence

Course	Title	Hours
Select one of the following sequences:		
Sequence 1		
BIOL 151	Introduction to Biological Sciences I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
BIOZ 151	Introduction to Biological Science Laboratory I	1
BIOL 152	Introduction to Biological Sciences II	3
BIOZ 152	Introduction to Biological Science Laboratory II	1
Sequence 2		
CHEM 101	General Chemistry I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
CHEZ 101	General Chemistry Laboratory I (satisfies general education AOI for scientific and logical reasoning)	1
CHEM 102	General Chemistry II	3
CHEZ 102	General Chemistry Laboratory II	1
Sequence 3		
PHYS 201	General Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	4
PHYS 202	General Physics II	4
Sequence 4		
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
PHYS 208	University Physics II	5
Electives		
For the statistics concentration, six electives (18 credits) must be chosen from the following list. A minimum grade of C is required in these courses.		
Course	Title	Hours
SSOR 493	Internship	3
STAT 403	Introduction to Stochastic Processes	3
STAT 415	Statistical Consulting	3
STAT 421	Applied Statistical Computing Using R	3
STAT 423	Nonparametric Statistics	3
STAT 425	Multivariate Statistics	3
STAT 435	Industrial Statistics	3
STAT 443	Regression	3
STAT 475	Time Series	3

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
MATH 200	Calculus with Analytic Geometry I	4
STAT 212	Concepts of Statistics (satisfies general education quantitative foundations)	3
UNIV 101	Introduction to the University	1
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		
General education course (select AOI for creativity, innovation and aesthetic inquiry)		3
Term Hours:		14

Spring semester

HUMS 202	Choices in a Consumer Society	1
MATH 201	Calculus with Analytic Geometry II	4
MATH 211	Mathematical Structures	3
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		
General education course (select AOI for diversities in the human experience)		3
Term Hours:		14

Sophomore year

Fall semester		Hours
MATH 307	Multivariate Calculus	4
STAT 305	Intermediate Statistics	3
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
Foreign language 101		3
General education course (select AOI for global perspectives)		3
Term Hours:		16

Spring semester

MATH 310	Linear Algebra	3
STAT 321	Introduction to Statistical Computing	3
Foreign language 102		3
General education course (select BOK to complete breadth of knowledge requirement)		3
General education course (select BOK to complete breadth of knowledge requirement)		3

Open electives		12
Term Hours:		16

Total Hours: 120-126

¹

Different science than chosen for sequence.

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.S.

The accelerated B.S. and M.S. program allows qualified students to earn both the B.S. and M.S. in Mathematical Sciences with a concentration in statistics in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to nine hours of graduate courses toward both the B.S. and M.S. degrees. Thus, the two degrees may be earned

with a minimum of 141 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees will demonstrate a comprehensive understanding of basic statistical concepts, probability and inference, general linear modeling, calculus, and linear algebra. They will know how to select appropriate samples and conduct appropriate experimental data collection methods. Additionally, students will be able to use statistical software packages to perform appropriate analysis of data, including knowledge of the assumptions associated with the procedures and how to determine the appropriate procedure to use. Students will know how to clearly and concisely present technical information in writing and through oral presentations. The program will also provide students with opportunities to participate in research projects, internships and other training programs where they develop the skills to evaluate, refine and apply what they learn in the classroom.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including STAT 212, STAT 305, STAT 321, STAT 309 and STAT 310; an overall minimum GPA of 3.0; and a minimum GPA of 3.3 in mathematics and statistics course work. Successful applicants would enter the program in the fall semester of their senior year. (Optional: Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.)

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Candidates should submit applications for admission immediately following the spring of their junior year, but no later than the M.S. program admission deadline. Three reference letters (at least one from a statistics faculty member) must accompany the application. The adviser of graduate studies for the mathematical sciences master's program with a concentration in statistics will provide guidance of students in this program. Students who are interested in the accelerated program should consult with the faculty adviser to the statistics concentration of the M.S. program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate mathematical sciences adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Mathematical Sciences degree with concentration in statistics will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits may be used to satisfy

required major electives or open elective credits for the undergraduate degree. Nine of these credits are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate statistics courses that may be taken as an undergraduate, once a student is admitted to the program, are in the table below.

Course	Title	Hours
STAT 513	Mathematical Statistics I	3
STAT 514	Mathematical Statistics II	3
STAT 546	Linear Models	3
600-level STAT course, approved by the graduate adviser		3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
STAT 309	Introduction to Probability Theory	3
Experiential fine arts		1-3
General education course		3-4
Natural science sequence		4-5
Statistics concentration elective		3

Graduate statistics electives		3
Term Hours:		9

Statistics, Certificate in (Post-baccalaureate undergraduate certificate)

The Certificate in Statistics is open to students who have received bachelor's degrees in other areas. The primary goal of the program is to allow students with undergraduate majors in science, engineering and the social sciences an opportunity to acquire the formal training in statistics that is currently in demand in industry and government. Some students also may find the program a useful way to prepare for graduate study in statistics.

To be admitted to the program, a student must complete a baccalaureate degree. Application materials and further information may be obtained by calling (804) 828-0001 or TDD (804) 828-0100, or by writing to the following address: Virginia Commonwealth University, Department of Statistical Sciences and Operations Research, Post-baccalaureate Certificate in Statistics, P.O. Box 843083, Richmond, VA 23284-3083.

The certificate program in statistics requires completion of the mathematics and statistics courses listed below. A maximum of 15 credits toward certification may be transferred from course work completed before or after receiving a bachelor's degree. At least 18 approved credits must be from STAT courses at the 300 level or higher and must be taken at VCU. No more than six of these 18 credits can be from courses taken before admission to the certificate program. The student must achieve a minimum GPA (on courses taken at VCU) of 2.5 with no grade below C. All requirements for the certificate must be completed within five years of admission to the program.

The following courses are required (right column contains credit hours for VCU courses):

Course	Title	Hours
Required courses		
MATH 200	Calculus with Analytic Geometry I	4
MATH 201	Calculus with Analytic Geometry II	4
MATH 307	Multivariate Calculus	4
STAT 210 or STAT 212	Basic Practice of Statistics Concepts of Statistics	3
STAT 305 or STAT 314	Intermediate Statistics Applications of Statistics	3-4
STAT 309	Introduction to Probability Theory	3
STAT 310	Introduction to Statistical Inference	3
STAT 321	Introduction to Statistical Computing	3
Electives		
Choose two from the following:		6
STAT 403	Introduction to Stochastic Processes	
STAT 415	Statistical Consulting	

STAT 421	Applied Statistical Computing Using R	
STAT 423	Nonparametric Statistics	
STAT 425	Multivariate Statistics	
STAT 435	Industrial Statistics	
STAT 443	Regression	
STAT 475	Time Series	
Total Hours		33-34

The minimum total of credit hours required for this certificate is 33.

Students accepted to the program will have access to the program coordinator and undergraduate advisers to best determine a plan of study. Statistics courses taught in other units of the university (for example, SCMA 301 and SCMA 302) may be credited toward the certificate with the permission of the program coordinator.

Statistics, minor in

A minor in statistics consists of a minimum of 18 credits and is administered by the Department of Statistical Sciences and Operations Research. These credits include:

Course	Title	Hours
Calculus (three credits minimum)		3
STAT 210 or STAT 212	Basic Practice of Statistics Concepts of Statistics	3
Upper-level statistics courses		12
Total Hours		18

A minimum GPA of 2.0 must be achieved in the minor. Mathematical sciences majors cannot minor in statistics.

Bachelor of Interdisciplinary Studies Program

The Bachelor of Interdisciplinary Studies provides opportunities for students to combine disciplines in unique ways. Students can apply for a nontraditional, individualized and interdisciplinary course of study by designing their own curriculum. (For a detailed description of the individualized interdisciplinary studies program (p. 601) offered through the University College, see the program page in this bulletin.) There are currently no active interdisciplinary studies programs open for entry in the College of Humanities and Sciences.

Interdisciplinary Studies, Bachelor of (B.I.S.) with a liberal studies for early and elementary education major [College of Humanities and Sciences]

Note: Admission to this program is permanently suspended prior to closure.

Economics Program

- Economics, Bachelor of Science (B.S.) [College of Humanities and Sciences] (p. 308)
- Economics, minor in (p. 311)

Economics, Bachelor of Science (B.S.) [College of Humanities and Sciences]

Undergraduate work in economics is excellent preparation for careers in business, government and teaching, as well as for graduate work in economics and professional schools such as law, public administration and medicine. Specialization in economics prepares students for careers that emphasize analytical thinking, a broad understanding of the economy and business organizations and the proper choice of policies by governments and business enterprises. Because of their analytical, quantitative and decision-making skills, students who major in economics are sought after for a wide array of management and analyst positions.

Economics majors are strongly encouraged to take additional courses in statistics and mathematics, especially if they intend to pursue either careers as practicing economists or graduate study in economics or business. Recommended mathematics courses include one or more of the following courses:

Course	Title	Hours
ECON 403	Introduction to Mathematical Economics	3
MATH 201	Calculus with Analytic Geometry II	4

Recommended statistics courses include one or more of the following courses:

Course	Title	Hours
ECON 501	Introduction to Econometrics	3
SCMA 302	Business Statistics II	3
STAT 314	Applications of Statistics	4

Students should consult with their advisers to determine which of these courses fit their particular interests and backgrounds.

Mission

The mission of the B.S. in Economics is to provide undergraduate students with economic knowledge and skills which will enable them to compete successfully in changing regional, national and global economic environments.

Learning goals

The goal of the economics curriculum is to impart critical-thinking skills, communication skills and quantitative proficiency to its students.

Student learning outcomes

- Students will solve key microeconomic problems.
- Students will solve key macroeconomic problems.
- Students will be able to interpret and analyze data and express economic relationships using graphs, equations and words.
- Students will demonstrate strong oral and written communication skills.
- Students will be able to employ economic models and data to analyze questions of economic significance.

Declaration of major and transfer policies

Admission to the B.S. in Economics program requires a minimum GPA of 2.5. Transfer students who have not yet earned VCU credit must have earned a minimum overall GPA of 2.5 at their previous institution.

Continuing students must have a minimum VCU GPA of 2.5 to enroll in the economics program. To be admitted to the program a student must have earned a minimum grade of C in ECON 210 and ECON 211 or their equivalents.

In addition to meeting the general requirements of the university and the College of Humanities and Sciences, transfer students who plan to enroll in the economics major must comply with the following requirements:

1. Incoming transfer students must have a minimum cumulative GPA of 2.5 from all accredited institutions.
2. Only courses completed at an accredited four-year university will be considered for acceptance to fulfill major requirements at the 300-level or above. Courses completed at an accredited two-year institution will be considered for acceptance to fulfill major requirements at the 200-level.
3. Transfer credits may be applied to no more than 12 hours in the major requirements at the 300-level or above.

Special requirements

The curriculum requires 33 credits of ECON courses. Students also must take MATH 200 or BUSN 212, as well as STAT 210 as collateral requirements as outlined in the degree requirements below. Students may need to take additional mathematics courses to satisfy the prerequisites for MATH 200 or BUSN 212.

Degree requirements for Economics, Bachelor of Science (B.S.)

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
ECON 300	Contemporary Economic Issues	3
ECON 301	Microeconomic Theory	3
ECON 302	Macroeconomic Theory	3
• Additional major requirements		
ECON 211	Principles of Macroeconomics	3
ECON 431	Labor Economics	3
or ECON 441	Experimental Economics	
or ECON 442	Economic Growth	
or ECON 461	Monetary Policy Seminar	
or ECON 489	Senior Seminar in Economics	
• Major electives		
Select ECON (300- or 400-level or 501)		15

Spring semester

Major electives		6
Open electives		9
Term Hours:		15
Total Hours:		120-124

The minimum number of credit hours required for this degree is 120.

Accelerated B.S. and M.A.

The accelerated B.S. and M.A. program allows qualified students to earn both the B.S. and M.A. in economics in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to 12 hours of 600-level graduate courses toward both the B.S. and M.A. degrees. Thus, the two degrees may be earned with a minimum of 138 credits rather than the 150 credits necessary if the two degrees are pursued separately.

Students holding these degrees will be more competitive when seeking positions requiring the acquisition, manipulation and analysis of data. While undergraduates are required to obtain some data skills, the M.A. program is far more focused in this area with a course in mathematical economics and three econometrics classes. Furthermore, two of these econometrics classes require students to gather data, perform analysis and report on that analysis. Such practical skills are highly valued in the labor market.

Admission to the program

Minimum qualifications for admittance to the program include completion of 85 undergraduate credit hours including ECON 300, ECON 301 and ECON 302; an overall GPA of 3.25; and a GPA of 3.25 in economics and quantitative course work. Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration. Successful applicants would enter the accelerated program in the summer following their junior year and start the M.A. program in the term after which they receive their bachelor's degree.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

It is recommended that candidates submit applications for admission to the accelerated program immediately following completion of their junior year, but no later than May 15 of that year. Three reference letters (at least one from an economics faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the economics M.A. program before they have completed 85 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress (<http://bulletin.vcu.edu/academic-regs/grad/satisfactory-academic-progress/>)" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate economics adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Science in Economics degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate

Bulletin. A maximum of 12 graduate credits at the 600 level may be taken prior to completion of the baccalaureate degree. These graduate credits substitute for required major electives or open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

Students in the accelerated program are also required to take ECON 501 as an undergraduate major elective or open elective.

The graduate economics courses that may be taken as an undergraduate, once a student is admitted to the program, are:

Course	Title	Hours
ECON 604	Advanced Microeconomic Theory	3
ECON 612	Econometrics	3
ECON 614	Mathematical Economics	3
Elective ¹		3
Total Hours		12

¹

Students will choose an elective in consultation with the faculty adviser to the M.A. program to serve as an elective for both programs.

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year

Term Hours:	9

Economics, minor in

This minor, offered through the College of Humanities and Sciences, requires a minimum of 18 credits in economics, including:

Course	Title	Hours
ECON 203	Introduction to Economics ¹	3
or ECON 205	The Economics of Product Development and Markets	
or ECON 210	Principles of Microeconomics	
ECON 211	Principles of Macroeconomics	3
Select the remaining courses from upper-level (300-400) economics courses		12
Total Hours		18

1

If selected, a minimum grade of B is required for ECON 203 or ECON 205.

Interdisciplinary Degree Program in Science

Charlene D. Crawley, Ph.D.
Coordinator

[has.vcu.edu/science](http://www.has.vcu.edu/science/) (<http://www.has.vcu.edu/science/>)

The interdisciplinary program in science provides students with a broad, yet fundamental, grounding in the sciences. In addition to the spectrum of required mathematics and science courses, students select a concentration from biology, chemistry, physics or professional science.

Students completing this curriculum earn a Bachelor of Science in Science.

For information concerning the program and advising, students should contact the program coordinator or their academic adviser.

- Science, Bachelor of Science (B.S.) with a concentration in:
 - Biology (p. 311)
 - Chemistry (p. 315)
 - Physics (p. 318)
 - Professional science (p. 320)

Science, Bachelor of Science (B.S.) with a concentration in biology

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate broad and core science proficiency
- Demonstrate competency in at least two sciences or in a non-science area
- Apply learning to selection and pursuit of professional or graduate career objective
- Demonstrate proficiency in communication of scientific or research findings
- Demonstrate ability to apply the scientific method/approach to professional problems
- Demonstrate appreciation of the interrelation of core sciences to interdisciplinary problems

Special requirements

The Bachelor of Science in Science requires a minimum of 120 credits.

Along with the general education requirements of the undergraduate programs and the College of Humanities and Sciences for a Bachelor of Science degree, this curriculum requires 28 to 33 credits in foundation science and mathematics courses and 36 to 38 credits in supplemental courses in the concentration. In preparation for the required mathematical sciences courses, all students must take the Mathematics Placement Test. Science majors are strongly encouraged to select a minor in an area different from their area of concentration that will complement their career interests and contribute additional upper-level credits to their curriculum.

Science majors declaring the biology concentration may not simultaneously declare a major or minor in biology.

Grade requirements

A minimum grade of C is required in each prerequisite course:

Course	Title	Hours
CHEM 100	Introductory Chemistry (if required through placement test)	3
CHEM 101	General Chemistry I	3
CHEM 102	General Chemistry II	3
CHEM 301	Organic Chemistry	3
CHEM 302	Organic Chemistry	3

A minimum grade of C is required in the following courses before enrollment in advanced BIOL courses:

Course	Title	Hours
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4
BIOL 300	Cellular and Molecular Biology	3

Degree requirements for Science, Bachelor of Science (B.S.) with a concentration in biology

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
INSC 490	Capstone Research Experience in Interdisciplinary Science	3
• Additional major requirements		
CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	4
ENVS 301	Introduction to Meteorology (or upper-level natural or health science elective from list below)	3
ENVS 310	Introduction to Oceanography (or upper-level natural or health science elective from list below)	2-3
PHYS 202 or PHYS 208	General Physics II University Physics II	4-5
Select one of the following:		4
ENVS 105 & URSZ 204	Physical Geology and Physical Geography Laboratory	
URSP 204 & URSZ 204	Physical Geography and Physical Geography Laboratory	
Or a 200-level or higher natural science elective and a 200-level or higher natural science laboratory elective from the list below		
• Concentration requirements		
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4
BIOL 300	Cellular and Molecular Biology	3
BIOL 310	Genetics	3
BIOZ 310	Laboratory in Genetics (or other upper-level biology laboratory)	1-2
BIOL 317	Ecology	3
• Major electives		
Select one upper-level animal or one upper-level plant course, with laboratory, from list below		4
Select two upper-level biology electives		6
Ancillary requirements		
BIOL 151	Introduction to Biological Sciences I	3
BIOZ 151	Introduction to Biological Science Laboratory I	1
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I (both satisfy general education BOK for natural sciences and AOI for scientific and logical reasoning)	4
HUMS 202	Choices in a Consumer Society	1
MATH 151	Precalculus Mathematics (or placement; satisfies general education quantitative foundations)	4

MATH 200 or SCMA 212 or STAT 314	Calculus with Analytic Geometry I Differential Calculus and Optimization for Business Applications of Statistics	3-4
PHYS 201 or PHYS 207	General Physics I (either satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning) University Physics I	4-5
STAT 208 or STAT 210	Statistical Thinking Basic Practice of Statistics	3
Experiential fine arts ¹		1-3
Foreign language through the 102 level (by course or placement)		0-6
Open electives		
Select any course.		21-34
Total Hours		120

¹

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

Animal and plant courses

Course	Title	Hours
Animal group		
BIOL 309	Entomology ¹	4
BIOL 312	Invertebrate Zoology	3
BIOZ 312	Invertebrate Zoology Laboratory	1
BIOL 313	Vertebrate Natural History	3
BIOZ 313	Vertebrate Natural History Laboratory	1
BIOL 391	Topics in Biology (as approved)	1-4
BIOZ 391	Topics in Biology Laboratory (as approved)	1-4
BIOL 402	Comparative Vertebrate Anatomy	5
BIOL 416	Ornithology	3
BIOZ 416	Ornithology Laboratory	2
BIOL 417	Mammalogy ¹	4
BIOL 435	Herpetology ¹	3
BIOL 445	Neurobiology and Behavior ¹	4
BIOL 503	Fish Biology ¹	4

CHEM 101	General Chemistry I	3
CHEM 102	General Chemistry II	3
CHEM 301	Organic Chemistry	3
CHEM 302	Organic Chemistry	3

A minimum grade of C is required in the following courses before enrollment in advanced BIOL courses:

Course	Title	Hours
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4
BIOL 300	Cellular and Molecular Biology	3

Degree requirements for Science, Bachelor of Science (B.S.) with a concentration in physics

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
INSC 490	Capstone Research Experience in Interdisciplinary Science	3
• Additional major requirements		
ENVS 301	Introduction to Meteorology (or upper-level science elective)	3
ENVS 310	Introduction to Oceanography (or upper-level science elective)	3
MATH 201	Calculus with Analytic Geometry II	4
MATH 301	Differential Equations	3
MATH 307	Multivariate Calculus	4
• Concentration requirements		
PHYS 208	University Physics II	5

PHYS 301	Classical Mechanics I	3
PHYS 320 & PHYZ 320	Modern Physics and Modern Physics Laboratory	4
PHYS 450	Senior Physics Laboratory	3
• Major electives		
Select an additional eight to nine credits from the following:		8-9
CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	
OPER 327	Mathematical Modeling	
PHYS 103 & PHYZ 103	Elementary Astronomy and Elementary Astronomy Laboratory	
PHYS/MHIS 307	The Physics of Sound and Music	
Or any course allowable for the B.S. in Physics, or a science elective approved by adviser		
Ancillary requirements		
Select one of the following:		4
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	
BIOL 103	Global Environmental Biology	
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	
HUMS 202	Choices in a Consumer Society	1
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I (both satisfy general education BOK for natural sciences and AOI for scientific and logical reasoning)	4
MATH 151	Precalculus Mathematics (or placement; satisfies general education quantitative foundations)	4
MATH 200	Calculus with Analytic Geometry I	4
PHYS 207	University Physics I (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	5
Experiential fine arts ¹		1-3
Foreign language through the 102 level (by course or placement)		0-6
Open electives		
Select any course.		27-36
Total Hours		120

1

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year**Fall semester**

		Hours
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I (both satisfy general education BOK for natural sciences and AOI for scientific and logical reasoning)	4
MATH 151	Precalculus Mathematics (satisfies general education quantitative foundations)	4
UNIV 101	Introduction to the University	1
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		
General education course (select AOI for global perspectives)		3

Term Hours: 15**Spring semester**

CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	4
HUMS 202	Choices in a Consumer Society	1
MATH 200	Calculus with Analytic Geometry I	4
PHYS 207	University Physics I (satisfies general education AOI for scientific and logical reasoning)	5
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		

Term Hours: 17**Sophomore year****Fall semester**

Select one of the following:		4
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	-
BIOL 103	Global Environmental Biology	-
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	-
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	-
MATH 201	Calculus with Analytic Geometry II	4
PHYS 208	University Physics II	5
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3

Term Hours: 16**Spring semester**

MATH 301	Differential Equations	3
PHYS 320 & PHYZ 320	Modern Physics and Modern Physics Laboratory	4
General education course (select BOK to satisfy breadth of knowledge requirement and AOI for creativity, innovation and aesthetic inquiry)		3

General education course (select BOK to satisfy breadth of knowledge requirement and AOI for diversities in the human experience) 3-4

Term Hours: 13-14

Junior year

Fall semester

PHYS 103 Elementary Astronomy 3
or
OPER 327 or Mathematical Modeling

PHYS 301 Classical Mechanics I 3

PHYS 307 The Physics of Sound and Music (fulfills experiential fine arts gen ed requirement) 3

Foreign language 101, upper-level open elective or minor elective 3

Open elective 3

Term Hours: 15

Spring semester

ENVS 301 Introduction to Meteorology (or upper-level science elective) 3

ENVS 310 Introduction to Oceanography (or upper-level science elective) 3

PHYS 450 Senior Physics Laboratory 3

Foreign language 102, upper-level open elective or minor elective 3

Upper-level open elective or minor elective 3

Term Hours: 15

Senior year

Fall semester

BIOL 317 Ecology 3
or
ENVS 315 or Energy and the Environment
or
PHYS 315 or Environmental Pollution
or
BIOL 332
or
ENVS 330

ENVS 105 Physical Geology 3
or
URSP 204 or Physical Geography

URSZ 204 Physical Geography Laboratory 1

Experiential fine arts (if not fulfilled by PHYS/MHIS 307, upper-level recommended) 1-3

Open elective 3

Upper-level open elective or minor elective 3

Term Hours: 14-16

Spring semester

INSC 490 Capstone Research Experience in Interdisciplinary Science 3

Upper-level electives or minor electives 9

Upper-level science elective 3

Term Hours: 15

Total Hours: 120-123

Science, Bachelor of Science (B.S.) with a concentration in professional science

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate broad and core science proficiency
- Demonstrate competency in at least two sciences or in a non-science area
- Apply learning to selection and pursuit of professional or graduate career objective
- Demonstrate proficiency in communication of scientific or research findings
- Demonstrate ability to apply the scientific method/approach to professional problems
- Demonstrate appreciation of the interrelation of core sciences to interdisciplinary problems

Special requirements

The Bachelor of Science in Science requires a minimum of 120 credits.

Along with the general education requirements of the undergraduate programs and the College of Humanities and Sciences for a Bachelor of Science degree, this curriculum requires 29 to 33 credits in foundation science and mathematics courses and 35 to 39 credits in supplemental courses in the concentration. In preparation for the required mathematical sciences courses, all students must take the Mathematics Placement Test. Science majors are strongly encouraged to select a minor in an area different from their area of concentration that will complement their career interests and contribute additional upper-level credits to their curriculum.

Grade requirements

A minimum grade of C is required in each prerequisite course:

Course	Title	Hours
CHEM 100	Introductory Chemistry (if required through placement test)	3
CHEM 101	General Chemistry I	3
CHEM 102	General Chemistry II	3
CHEM 301	Organic Chemistry	3
CHEM 302	Organic Chemistry	3

A minimum grade of C is required in the following courses before enrollment in advanced BIOL courses:

Course	Title	Hours
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	4
BIOL 300	Cellular and Molecular Biology	3

The minimum number of credit hours required for this degree is 120.

Degree requirements for B.S. in Science with a concentration in professional science

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements		
INSC 490	Capstone Research Experience in Interdisciplinary Science	3
• Additional major requirements		
BIOL 341/ANTH 301	Human Evolution (or upper-level natural science elective from list below)	4
INSC 300	Experiencing Science (or upper-level natural science elective from list below)	3
or ENVS/ENGL 368	Nature Writing	
BIOL 317	Ecology (or upper-level natural science elective from list below)	3
or BIOL 332/ENVS 330	Environmental Pollution	
or ENVS/PHYS 315	Energy and the Environment	
ENVS 301	Introduction to Meteorology (or upper-level natural science elective from list below)	3
or ENVS 401	Meteorology and Climatology	
ENVS 310	Introduction to Oceanography (or upper-level natural science elective from list below)	3
or ENVS 411	Oceanography	
Select one of the following:		4
PHYS 101 & PHYZ 101	Foundations of Physics and Foundations of Physics Laboratory (PHYS 101 is a gen ed course and cannot be counted toward the major)	
PHYS 107	Wonders of Technology	
ENVS 105 & URSZ 204	Physical Geology and Physical Geography Laboratory	
URSP 204 & URSZ 204	Physical Geography and Physical Geography Laboratory	
Or a 200-level or higher natural science elective and a 200-level or higher natural science laboratory elective from the list below		
• Concentration requirements		
Select an ethics or upper-level health-related science elective from either of the lists below.		3
Select research, internship (see research experience electives list) or upper-level service-learning experience (to equal a minimum of three credits alone or in combination with other upper-level natural or health science electives).		3
Select two additional courses at the 200-level or higher in mathematics, science, teaching mathematics and/or science with adviser's approval. Choose from the following:		5-6

EDUS 300	School and Society (may be used if student is preparing for teaching)	
EDUS 301	Human Development and Learning (may be used if student is preparing for teaching)	
LFSC/RELS 401	Faith and Life Sciences	
MATH or STAT: 200-level or higher		
Or a 200-level or higher natural or health science elective from list below		
Ancillary requirements		
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	4
or BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I	4
or CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	
HUMS 202	Choices in a Consumer Society	1
MATH 151	Precalculus Mathematics	4
MATH 200	Calculus with Analytic Geometry I	3-4
or SCMA 212	Differential Calculus and Optimization for Business	
or STAT 314	Applications of Statistics	
PHYS 201	General Physics I	4-5
or PHYS 202	General Physics II	
or PHYS 207	University Physics I	
or PHYS 208	University Physics II	
STAT 208	Statistical Thinking (either satisfies general education quantitative foundations)	3
or STAT 210	Basic Practice of Statistics	
Select one of the following:		3-4
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	
BIOL 103	Global Environmental Biology	
CHEM 110	Chemistry and Society	
PHYS 103	Elementary Astronomy	
Or a 200-level or higher natural science elective and a 200-level or higher natural science laboratory elective from the list below		
Select a second introductory science course (with laboratory) in two of the following three areas: biology, chemistry or physics ¹		8-10
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	
CHEM 101 & CHEZ 101	General Chemistry I and General Chemistry Laboratory I	
CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	
PHYS 201	General Physics I	

PHYS 202	General Physics II	
PHYS 207	University Physics I	
PHYS 208	University Physics II	
Experiential fine arts ¹		1-3
Foreign language through the 102 level (by course or placement)		0-6
Open electives		
Select any course.		16-30
Total Hours		120

1

Do not select PHYS 202 or PHYS 208 if the other course was selected above; this will ensure that you have two courses that satisfy the general education BOK for natural sciences and AOI for scientific and logical reasoning.

2

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

Natural science electives

Course	Title	Hours
LFSC 301	Integrative Life Sciences Research	3
LFSC 401	Faith and Life Sciences	3
PHTX 400	Drugs and Their Actions	3
Any 200-level or higher BIOL, BNFO, CHEM, CLSE, EGRB, ENVS, FRSC, INSC or PHYS course, except:		
BIOL 392	Introduction to Research	
BIOL 475	Biology Capstone Seminar: ____	
BIOL 477	Biology Capstone Experience	
BIOL 489	Communicating Research	
BIOL 490	Presenting Research	
BIOL 492	Independent Study	
BIOL 493	Biology Internship	
BIOL 495	Research and Thesis	
BIOL 496	Biology Preceptorship: ____	
BNFO 292	Independent Study	
BNFO 492	Independent Study	
BNFO 496	Undergraduate Teaching Assistantship in Bioinformatics	
CHEM 392	Directed Study	
CHEM 492	Independent Study	
CHEM 493	Chemistry Internship	
ENGR 490	Engineering Seminar	
ENGR 492	Independent Study in Engineering	
ENVS 490	Research Seminar in Environmental Studies	
ENVS 492	Independent Study	
ENVS 493	Environmental Studies Internship	
FRSC 490	Professional Practices in Forensic Science	
FRSC 492	Forensic Science Independent Study	
FRSC 493	Forensic Science Internship	

INSC 490	Capstone Research Experience in Interdisciplinary Science
PHYS 490	Seminar in Conceptual Physics
PHYS 492	Independent Study

Natural science laboratory electives

Course	Title	Hours
BIOL 205	Basic Human Anatomy ¹	4
BIOL 309	Entomology ¹	4
BIOL 320	Biology of the Seed Plant ¹	4
BIOL 402	Comparative Vertebrate Anatomy ¹	5
BIOL 417	Mammalogy ¹	4
BIOL 435	Herpetology ¹	3
BIOL 445	Neurobiology and Behavior ¹	4
BIOL 503	Fish Biology ¹	4
BIOZ: any 200-level or higher course		
BNFO 380	Introduction to Mathematical Biology ¹	4
BNFO 420	Applications in Bioinformatics ¹	3
BNFO 440	Computational Methods in Bioinformatics ¹	3
CHEZ: any 200-level or higher course		
EGRB 307	Biomedical Instrumentation ¹	4
EGRB 308	Biomedical Signal Processing ¹	4
EGRB 310	Biomechanics ¹	4
ENVZ 335	Environmental Geology Laboratory	1
FRSZ: any 200-level or higher course		
PHIZ 206	Human Physiology Laboratory	1
PHYS 202	General Physics II ¹	4
PHYS 208	University Physics II ¹	5
PHYZ 320	Modern Physics Laboratory	1

1

Courses have a combined lecture and lab and will satisfy both natural science lecture and laboratory requirements.

Health science electives

Course	Title	Hours
AFAM/ANTH/INTL/ GSWS 309	Gender and Global Health	3
AFAM 310	Black Health Matters: Social Determinants of Health in the African American Community	3
GSWS 392	Gender and Health Across the Life Span	3
HPEX 325	Pathology and Pharmacology in Athletic Training	3
HPEX 345	Nutrition for Health and Disease	3
HPEX 350	Nutrition	3
HPEX 353	Disease Trends, Prevention and Control	3
HPEX 373	Structural Kinesiology	3
HPEX 374	Musculoskeletal Structure and Movement	4
HPEX 375	Physiology of Exercise	3
HPEX 440	Chronic Disease and Exercise Management	3

PSYC 401	Physiological Psychology	3
PSYC 412	Health Psychology	3
PSYC/GSWS 414	Psychology of Women's Health	3
SCTS 300	Introduction to Science and Technology Studies	3
SCTS 301	Illness Narratives	3
SCTS 392	Revolutions in Science I	3
SCTS 393	Revolutions in Science II	3
SCTS 397	Genetics and Society: 1865 to the Present	3
SCTS 398	History of Medicine and Public Health: _____	3
SOCY 344	Medical Sociology	3

Ethics electives

Course	Title	Hours
LFSC/RELS 401	Faith and Life Sciences	3
PHIL 201	Introduction to Ethics	3
PHIL 211	History of Ethics	3
PHIL 212	Ethics and Applications	3
PHIL 213	Ethics and Health Care	3
PHIL 214	Ethics and Business	3
RELS 340/INTL 341	Global Ethics and the World's Religions	3

Research, internship electives

Course	Title	Hours
AFAM 399	Interdisciplinary Research Methods	3
ANTH 303	Archaeological Methods and Research Design	4
BIOL 490	Presenting Research	1
BIOL 492	Independent Study	1-4
BIOL 493	Biology Internship	1-3
CHEM 492	Independent Study	1-4
CHEM 493	Chemistry Internship	1-3
FRSC 492	Forensic Science Independent Study	1-3
FRSC 493	Forensic Science Internship	3
PHYS 492	Independent Study	1-3
PSYC 317	Experimental Methods	3
SOCY 320	Research Methods in the Social Sciences	3

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester	Hours
Select one of the following CHEM sequences (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning):	3-4
CHEM 101 & CHEZ 101	-
General Chemistry I and General Chemistry Laboratory I	
CHEM 110	-
Chemistry and Society	
MATH 151	4
Precalculus Mathematics	

STAT 208	Statistical Thinking (either satisfies general education quantitative foundations) or STAT 210 or Basic Practice of Statistics	3
UNIV 101	Introduction to the University	1
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		
Term Hours:		14-15

Spring semester

Select one of the following sequences:	4-5	
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	-
BIOL 103	Global Environmental Biology	-
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	-
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	-
CHEM 102 & CHEZ 102	General Chemistry II and General Chemistry Laboratory II	-
PHYS 101 & PHYZ 101	Foundations of Physics and Foundations of Physics Laboratory	-
PHYS 107	Wonders of Technology	-
PHYS 201	General Physics I	-
PHYS 207	University Physics I	-
HUMS 202	Choices in a Consumer Society	1
MATH 200	Calculus with Analytic Geometry I or Differential Calculus and Optimization for Business or Applications of Statistics	3-4
or SCMA 212		
or STAT 314		
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		
General education course (select AOI for global perspectives)		3
Term Hours:		14-16

Sophomore year

Fall semester

Select one of the following BIOL sequences:	4	
BIOL 101 & BIOZ 101	Biological Concepts and Biological Concepts Laboratory	-
BIOL 103	Global Environmental Biology	-
BIOL 151 & BIOZ 151	Introduction to Biological Sciences I and Introduction to Biological Science Laboratory I	-
BIOL 152 & BIOZ 152	Introduction to Biological Sciences II and Introduction to Biological Science Laboratory II	-
Select one of the following PHYS sequences:	4-5	

PHYS 101 & PHYZ 101	Foundations of Physics and Foundations of Physics Laboratory	-
PHYS 107	Wonders of Technology	-
PHYS 202	General Physics II	-
PHYS 208	University Physics II	-
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
	General education course (select AOI for diversities in the human experience)	3
	General education course (select select BOK to satisfy breadth of knowledge requirement and AOI for creativity, innovation and aesthetic inquiry)	3

Term Hours: 17-18

Spring semester

	Select one of the following combinations or a 200-level science with laboratory:	4
ENVS 105 & URSZ 204	Physical Geology and Physical Geography Laboratory	-
URSP 204 & URSZ 204	Physical Geography and Physical Geography Laboratory	-
	Select a second introductory science course (with laboratory) in one of the following three areas: biology, chemistry or physics	4
	Experiential fine arts (SPCH 321, ARTE 301 or other upper-level option recommended)	1-3
	General education course (select BOK to satisfy breadth of knowledge requirement)	3
	Open elective	3

Term Hours: 15-17

Junior year

Fall semester

	Select one of the following or upper-level science:	3
INSC 300	Experiencing Science	-
ENVS 368 or ENGL 368	Nature Writing or Nature Writing	-
PHYS 103	Elementary Astronomy	3
PHYZ 103	Elementary Astronomy Laboratory (or Introduction to Pre-Health topics course, or a 200-level science with laboratory)	1
	Ethics or other health-related science	3
	Foreign language 101, upper-level open elective or minor elective	3
	General education course (if no science selection above satisfies AOI for scientific and logical reasoning) or open elective	3

Term Hours: 16

Spring semester

	Select one of the following:	3
BIOL 317	Ecology	-
BIOL 332 or ENVS 330	Environmental Pollution or Environmental Pollution	-
ENVS 315 or PHYS 315	Energy and the Environment or Energy and the Environment	-

ENVS 310 or ENVS 411	Introduction to Oceanography (or upper-level science) or Oceanography	3
	Additional course at the 200-level or higher in mathematics, science, teaching mathematics and/or science with adviser's approval	3
	Foreign language 102, upper-level open elective or minor elective	3
	Upper-level open elective or minor elective	3

Term Hours: 15

Senior year

Fall semester

BIOL 341/ ANTH 301	Human Evolution (or upper-level science)	4
ENVS 301 or ENVS 401	Introduction to Meteorology or Meteorology and Climatology	3
	Additional course at the 200-level or higher in mathematics, science, teaching mathematics and/or science with adviser's approval	3
	Select a second introductory science course (with laboratory) in a second of the following three areas: biology, chemistry or physics	4
	Upper-level open elective or minor elective	1-2

Term Hours: 15-16

Spring semester

INSC 490	Capstone Research Experience in Interdisciplinary Science	3
	Research, internship or upper-level service-learning experience	3
	Upper-level open electives or minor electives	8-9

Term Hours: 14-15

Total Hours: 120-128

The minimum number of credit hours required for this degree is 120.

Peyton Rowe

Associate professor and interim director

Karen McIntyre, Ph.D.

Associate professor and director of graduate studies

Natasha Long

Coordinator of student services

The Robertson School of Media and Culture prepares effective and skilled communicators through quality instruction, advising and student services, based on real-world applications. Through research,

professional service and scholarship in applied communications, the school advances the knowledge and practice of a multidisciplinary and evolving media environment. The school values truth, ethics, creativity, innovation, collaboration, cultural diversity, shared governance and community engagement.

The school offers a Bachelor of Science in Mass Communications with specialization in one of four concentrations: advertising, journalism, media production or public relations. The school also awards the Master of Science in Mass Communications, with concentrations in the areas of integrated communication and multimedia journalism.

Undergraduate information

Admission guidelines and requirements

Incoming students can declare mass communications as their major through the last day of add/drop. VCU students in other programs who wish to declare mass communications as their major must complete MASC 101 with a minimum grade of C and have a minimum cumulative GPA of 2.5. In addition, students planning to major in advertising must complete MASC 201 with a minimum grade of C; and students planning to major in public relations must complete MASC 210 with a minimum grade of C.

Full-time students can spend no more than two academic years in the foundation from the time of enrollment. If they have not advanced to a concentration, then they will be separated from the major.

Admittance to a concentration in the Robertson School of Media and Culture is contingent on meeting the following requirements: an overall minimum GPA of 2.5 in all courses and completion of the required mass communications foundation courses. Transfer students will be evaluated on an individual basis but generally will be required to meet the prerequisites for admission during the second semester they are enrolled at VCU.

Once admitted to a concentration, students must maintain a minimum cumulative and major GPA of 2.5. If a student's GPA falls below 2.5, he or she will have one year to meet the GPA requirement. Students who fail to do so will be separated from the program. This does not preclude the student from completing another major at VCU.

Certification of these requirements must accompany a formal petition for admission to a concentration. Students at this time must select a concentration and, if available, a sub-concentration.

Students who have been separated from the major may appeal to the school's Undergraduate Studies Committee by following the process described on the school's website.

Mass Communications Scholars Program

The Mass Communication Scholars Program demands a rigorous course load and a high GPA. It prepares students for professional positions in the communications fields and for competitive post-graduate programs. The program supports the highest standards of excellence in education and is designed to enhance the education achievement of students through a variety of special opportunities, demands and programs.

The Mass Communication Scholars Program is open to undergraduate mass communications majors who have been accepted into the VCU Honors College.

To graduate as Mass Communications Scholars, students must:

- Maintain an overall 3.5 GPA and a 3.5 GPA in the major.
- Maintain good standing in the VCU Honors College.
- Complete 18 credit hours in honors courses or "variants." At least 15 of these honors credits must be taken in the school. At least three honors credits must be completed each academic year.
- Attend at least four Honors-speakers events or colloquia each academic year for exchange of ideas.
- Complete a capstone, three-credit thesis or project course, MASC 492.
- Complete an approved international component.
- Compile a dossier or portfolio of their work to document their educational career, major, interests and scholarly pursuits. The dossier will include an essay on how the student has become a well-educated individual deserving of Mass Communications Scholars designation.

The Robertson School of Media and Culture will offer at least two honors courses or "variants" per year. Variants are courses in which students may receive honors credit while in non-honors courses by meeting additional requirements such as more advanced readings, greater depth in research or project work or additional assignments as deemed appropriate by the instructor (and approved by the Honors College).

The Mass Communications Scholars Program is a departmental honors program linked to the VCU Honors College. Mass communications students will be able to graduate with mass communications honors and with university honors. Mass Communications Scholars will earn a distinctive designation at their graduation ceremony.

Honors courses and courses designated as variants will be listed in the Schedule of Classes for each semester. Students wishing to enter the Mass Communications Scholars Program should contact the program coordinator.

- Mass Communications, Bachelor of Science (B.S.) with a concentration in:
 - Advertising/creative (p. 325)
 - Advertising/strategic (p. 327)
 - Journalism/broadcast (p. 330)
 - Journalism/digital (p. 332)
 - Media production (p. 334)
 - Public relations (p. 336)
- Media studies, minor in (p. 338)

Mass Communications, Bachelor of Science (B.S.) with a concentration in advertising/creative

The Richard T. Robertson School of Media and Culture offers a Bachelor of Science in Mass Communications with concentrations in one of four areas: advertising, journalism, media production or public relations. The concentration in advertising prepares students for careers at advertising agencies, marketing departments of corporations or service organizations, and media companies.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Write correctly and clearly in forms and styles appropriate for the communication professions, audiences and purposes they serve
- Conduct research and evaluate information by methods appropriate to the communication professions in which they work
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness
- Apply tools and technologies appropriate for the communication professions in which they work
- Apply basic numerical and statistical concepts
- Think critically, creatively and independently
- Demonstrate an understanding of the history and role of professionals and institutions in shaping communications
- Understand and apply the principles and laws appropriate to the communication professions in which they work, including copyright and trademark law
- Demonstrate an understanding of the diversity of groups in a global society in relationship to communications
- Demonstrate an understanding of professional ethical principles and work ethically
- Understand concepts and apply theories in the use and presentation of images and information

Special requirements

The **overview section** of the Robertson School of Media and Culture explains the requirements for students to be admitted to, and remain in, the foundation program or a specific concentration in the school.

Students must earn a total of 45 credits in classes at the 300-level and above, including upper-level mass communications course work. To graduate from the mass communications program, students must have both a minimum cumulative GPA and a minimum major GPA of 2.5 and must earn a minimum grade of C in their senior-level capstone courses. The mass communications curriculum includes the foundation and specific concentrations.

Foundation course work for advertising students

MASC 101; MASC 201; MASC 204 with a minimum grade of C; and completion of UNIV 111, UNIV 112, ECON 203 and the College of Humanities and Sciences' math and statistics (must choose STAT 208) and natural sciences and scientific and logical reasoning requirements. Completion of both ECON 210 and ECON 211 may substitute for ECON 203.

To enroll in MASC 203 or MASC 204, students must receive departmental permission.

To enroll in a mass communications course, majors must have earned a minimum grade of C in all courses prerequisite for that course.

Mass Communications, Bachelor of Science (B.S.) with a concentration in journalism/digital

The Richard T. Robertson School of Media and Culture offers a Bachelor of Science in Mass Communications with concentrations in one of four areas: advertising, journalism, media production or public relations. The journalism concentration provides students with the skills and practice necessary for careers in the news media.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Write correctly and clearly in forms and styles appropriate for the communication professions, audiences and purposes they serve
- Conduct research and evaluate information by methods appropriate to the communication professions in which they work
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness
- Apply tools and technologies appropriate for the communication professions in which they work
- Apply basic numerical and statistical concepts
- Think critically, creatively and independently
- Demonstrate an understanding of the history and role of professionals and institutions in shaping communications
- Understand and apply the principles and laws appropriate to the communication professions in which they work, including copyright and trademark law
- Demonstrate an understanding of the diversity of groups in a global society in relationship to communications
- Demonstrate an understanding of professional ethical principles and work ethically
- Understand concepts and apply theories in the use and presentation of images and information

Special requirements

The **overview section** of the Robertson School of Media and Culture explains the requirements for students to be admitted to, and remain in, the foundation program or a specific concentration in the school.

Students must earn a total of 45 credits in classes at the 300-level and above, including upper-level mass communications course work. To graduate from the mass communications program, students must have a cumulative and major GPA of 2.5 and must earn a minimum grade of C in their senior-level capstone courses. The mass communications curriculum includes the foundation and specific concentrations.

Foundation course work for journalism students

MASC 101, MASC 203 and MASC 261, each with a minimum grade of C; and completion of UNIV 111, UNIV 112, POLI 103, ECON 203 and the College of Humanities and Sciences' math and statistics (must choose STAT 208), and natural sciences and scientific and logical reasoning requirements. (Completion of both ECON 210 and ECON 211 may substitute for ECON 203.)

To enroll in MASC 203, students must receive departmental permission.

To enroll in a mass communications course, majors must have earned a minimum grade of C in all courses prerequisite for that course.

These capstone courses may not be taken simultaneously without permission from the instructor.

2

Six credits of MASC 475, which is repeatable, will satisfy the capstone requirement.

3

Completion of both ECON 210 and ECON 211 may substitute for ECON 203; ECON 210 satisfies the same general education categories.

4

Courses offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester		Hours
MASC 101	Mass Communications (satisfies general education BOK for social/behavioral sciences and AOI for diversities in the human experience)	3

Mass Communications, Bachelor of Science (B.S.) with a concentration in media production

The Richard T. Robertson School of Media and Culture offers a Bachelor of Science in Mass Communications with concentrations in one of four areas: advertising, journalism, media production or public relations. The media production concentration prepares students for behind-the-scenes careers in film, television, video, online and other media creating compelling stories and messages.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Write correctly and clearly in forms and styles appropriate for the communication professions, audiences and purposes they serve
- Conduct research and evaluate information by methods appropriate to the communication professions in which they work
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness
- Apply tools and technologies appropriate for the communication professions in which they work
- Apply basic numerical and statistical concepts
- Think critically, creatively and independently
- Demonstrate an understanding of the history and role of professionals and institutions in shaping communications
- Understand and apply the principles and laws appropriate to the communication professions in which they work, including copyright and trademark law
- Demonstrate an understanding of the diversity of groups in a global society in relationship to communications
- Demonstrate an understanding of professional ethical principles and work ethically
- Understand concepts and apply theories in the use and presentation of images and information

Special requirements

The **overview section** of the Robertson School of Media and Culture explains the requirements for students to be admitted to, and remain in, the foundation program or a specific concentration in the school.

Students must earn a total of 45 credits in classes at the 300-level and above, including upper-level mass communications course work. To graduate from the mass communications program, students must have a cumulative and major GPA of 2.5 and must earn a minimum grade of C in their senior-level capstone courses. The mass communications curriculum includes the foundation and specific concentrations.

Foundation course work for media production students

MASC 101, MASC 255 and MASC 285, each with a minimum grade of C; and completion of UNIV 111, UNIV 112, ECON 203 and the College of Humanities and Sciences' math and statistics (must choose STAT 208 or STAT 210), and natural sciences and scientific and logical reasoning requirements. (Completion of both ECON 210 and ECON 211 may substitute for ECON 203.)

To enroll in MASC 203, students must receive departmental permission.

To enroll in a mass communications course, majors must have earned a minimum grade of C in all courses prerequisite for that course.

Mass Communications, Bachelor of Science (B.S.) with a concentration in public relations

The Richard T. Robertson School of Media and Culture offers a Bachelor of Science in Mass Communications with concentrations in one of four areas: advertising, journalism, media production or public relations. The public relations concentration is designed to prepare students for employment in industry, government, nonprofit associations and public relations agencies.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Write correctly and clearly in forms and styles appropriate for the communication professions, audiences and purposes they serve
- Conduct research and evaluate information by methods appropriate to the communication professions in which they work
- Critically evaluate their own work and that of others for accuracy and fairness, clarity, appropriate style and grammatical correctness
- Apply tools and technologies appropriate for the communication professions in which they work
- Apply basic numerical and statistical concepts
- Think critically, creatively and independently
- Demonstrate an understanding of the history and role of professionals and institutions in shaping communications
- Understand and apply the principles and laws appropriate to the communication professions in which they work, including copyright and trademark law
- Demonstrate an understanding of the diversity of groups in a global society in relationship to communications
- Demonstrate an understanding of professional ethical principles and work ethically
- Establish an environment that encourages, supports and reinforces professionalism at all levels of learning
- Understand concepts and apply theories in the use and presentation of images and information

Special requirements

The **overview section** of the Robertson School of Media and Culture explains the requirements for students to be admitted to, and remain in, the foundation program or a specific concentration in the school.

Students must earn a total of 45 credits in classes at the 300-level and above, including upper-level mass communications course work. To graduate from the mass communications program, students must have both a minimum cumulative GPA and a minimum major GPA of 2.5 and must earn a minimum grade of C in their senior-level capstone courses. The mass communications curriculum includes the foundation and specific concentrations.

Foundation course work for public relations students

MASC 101; MASC 203 with a minimum grade of C; MASC 210 with a minimum grade of C; and completion of UNIV 111, UNIV 112, POLI 103, ECON 203 and the College of Humanities and Sciences' math and statistics (must choose STAT 208 OR STAT 210), and natural sciences and scientific and logical reasoning requirements. Completion of both ECON 210 and ECON 211 may substitute for ECON 203.

To enroll in MASC 203, students must receive departmental permission.

To enroll in a mass communications course, majors must have earned a minimum grade of C in all courses prerequisite for that course.

Media studies, minor in

The minor in media studies consists of a minimum of 18 credits in mass communications as described below, including a minimum of nine upper-level credits. To declare the minor, students must pass MASC 101 with a minimum grade of C and have a minimum cumulative GPA of 2.50. All courses counted toward the minor must be completed with a minimum grade of C; to graduate, students must have a minimum 2.50 minor GPA. Permission is required to enroll in all courses except MASC 101. All students in the minor in media studies program are required to register with the Robertson School of Media and Culture prior to beginning course work. Media studies course work will be distributed as follows:

Course	Title	Hours
Required courses		
MASC 101	Mass Communications	3
MASC 203 or MASC 204	Journalism Writing Story	3
MASC 408	Communications Law	3
Elective courses		
Select nine credits from the following, prerequisites apply:		
MASC/INTL 151	Global Communications	
MASC 201	Curiousness	
MASC 210	Public Relations	
MASC 251	Global Health and Social Media	
MASC 291	Topics in Communications	
MASC 261	History and Development of Journalism	
MASC 300	Technical Prowess <small>Students can only take MASC 300, 301 or 334 once for credit</small>	
MASC 301	Graphics for Journalism <small>Students can only take MASC 300, 301 or 334 once for credit</small>	
MASC 317	Visual Acuteness	
MASC 334	Visual Communication and Design for Public Relations <small>Students can only take MASC 300, 301 or 334 once for credit</small>	
MASC 344	Data Journalism and Visualization

School of World Studies

312 North Shafer Street
Box 842021
Richmond, Virginia 23284-2021
(804) 827-1111
worldstudies.vcu.edu (<http://www.worldstudies.vcu.edu>)

Amy Rector, Ph.D.

Associate professor and director

The School of World Studies is an interdisciplinary unit that explores the diversity of the human experience and prepares students to contribute to a healthy, equitable and sustainable world. With training in the humanities, social sciences and natural sciences, school faculty conduct research on language, religion, film, literature, politics, economics and the environment, and their relationship to local and global movements for racial, social and environmental justice. The World School offer majors in anthropology (<https://worldstudies.vcu.edu/academic-programs/anthropology/>), foreign language (<https://worldstudies.vcu.edu/academic-programs/foreign-languages/>), international studies (<https://worldstudies.vcu.edu/academic-programs/international-studies/>) and religious studies (<https://worldstudies.vcu.edu/academic-programs/religious-studies/>), as well as a number of minors including European studies, Italian studies, Latin American studies, Middle Eastern and Islamic studies, Russian studies and world cinema. Course instruction is enriched by a range of opportunities to gain real-world experience. School of World Studies majors acquire the critical knowledge, analytic abilities, experience and communication skills to succeed in all aspects of life and participate in the project of building a generous world for all.

See what SWS students (<https://worldstudies.vcu.edu/meet-our-students-alumni/student-spotlights/>) and alumni (<https://worldstudies.vcu.edu/meet-our-students-alumni/alumni-profiles/>) are doing to make this vision of the world real.

Languages

Learning a language is incredibly rewarding because it increases mental acuity and global cultural competence and enhances opportunities for cross-cultural dialogue and collaboration. Language proficiency opens doors for personal as well as professional interaction from right here in

Richmond to all reaches of the globe. The School of World Studies offers courses in:

- Arabic
- Chinese
- French
- German
- Italian
- Russian
- Spanish

In cases where the appropriate level of instruction is unavailable, or students are interested in pursuing languages not offered at VCU, the School of World Studies Advising Office will assist in identifying language study options at other U.S. institutions or abroad.

Foreign language courses

Students planning to take a foreign language course at VCU must take the placement test in order to determine proper course selection. Specific information about the placement test (<http://www.worldstudies.vcu.edu/academics/foreign-languages/language-placement-testing/>) is available on the School of World Studies website. Placement scores determine at which skill level the students begins course work in the respective language. Students who test above a specific course level continue with higher level courses to fulfill degree or graduation requirements.

Students who wish to complete a language through the intermediate level or higher are required to **consecutively** complete 101, 102 and 201 or the equivalent through placement. Students may then choose either 202 or 205 to complete the intermediate level.

Foreign language requirement and native speaker information

All students within the College of Humanities and Sciences are required to meet a foreign language requirement either through the 102 level for the college general education program or through a higher level as specified by the individual program. Specific information on assessment (<https://worldstudies.vcu.edu/for-students/language-placement-testing/native-speaker/>) to waive the foreign language requirement is available on the School of World Studies website.

Experiential learning and study abroad

World ePass

The School of World Studies is committed to the premise that learning is best facilitated through engagement with the dynamic complexities and challenges of the world outside the classroom. As part of this commitment, each major within the school is required to complete a World ePass (<https://worldstudies.vcu.edu/for-students/academic-advising/world-epass/>) portfolio.

The intention of the World ePass is to highlight each student's breadth of experience and skills gleaned beyond the core curriculum: cultural competencies, experiential learning opportunities, participation in student research, presentation at conferences, international engagement, multicultural campus activities, foreign language acquisition and academic achievements.

Students obtain initial information and guidance on creating their World ePass through an introductory video (<https://vimeo.com/354730257/5c4beb6e72/>).

The World ePass portfolio content requirements include professional preparation, transferable skills articulation, academic career highlights, experiential learning experiences and global citizenship. Once students have started the process of ePass creation, they submit the site address through the World ePass submission site.

All experiential learning opportunities must receive prior approval from the SWS Advising Office. These include internships, service-learning courses, certain noncredit options and study abroad.

World ePass completion

Evaluation of the World ePass is on a pass/fail basis. Prior to graduation with a degree from the VCU School of World Studies, the World ePass must be reviewed and approved, with input from SWS faculty, by the SWS advising coordinator.

Study abroad

All School of World Studies students are encouraged to participate in a study abroad program.

Opportunities range from a summer intensive program to a semester or academic year-length experience. Summer study-abroad programs provide students with opportunities for short-term immersion in the language, culture and civilization of the countries they visit. Information about all current study abroad opportunities (<https://global.vcu.edu/abroad/>) can be found on the Global Education Office website. For more information about World Studies faculty-led study abroad programs, visit the School of World Studies website (<https://worldstudies.vcu.edu/>).

Anthropology, Bachelor of Science (B.S.)

worldstudies.vcu.edu/academics/anthropology (<http://worldstudies.vcu.edu/academics/anthropology/>)

The Bachelor of Science in Anthropology curriculum seeks to ensure that each student develops a solid foundation in the basic principles, theories and techniques of analysis. Since students majoring in anthropology vary in their interests and career goals, the curriculum allows for a great deal of flexibility developing individual courses of study. Students who are interested in pursuing graduate studies in anthropology will usually take more than the minimum number of upper-level courses. The department provides opportunities for involvement in faculty research through its course offerings, which include independent study, internships and honors research.

The Bachelor of Science in Anthropology requires a minimum of 120 credits, with at least 35 of those credits in anthropology averaging a minimum GPA of 2.25. Students must take at least 25 credits in upper-level (300, 400 or 500) ANTH courses. However, a student with a particular anthropological interest that can be best served by courses without the ANTH prefix may suggest a relevant selection of up to six elective credits from such classes to be counted toward the major. Alternatively, in addition to the three experiential credits fulfilling collateral requirements, a maximum of six credits from internships and/or independent studies may be counted toward the elective degree requirements. A plan for such selection must be presented to and approved by the program coordinator in the student's junior year or, for those students entering the program at the junior level, at a time stipulated by the program coordinator.

In order to begin upper-level course work in any foreign language, students must have consecutively completed 101, 102, 201, and 202 or 205 courses in a respective foreign language or prove the equivalent proficiency level through placement testing.

Anthropology majors are strongly encouraged to complete a minor, preferably one offered in World Studies. Students should refer to the listing in the general description of the School of World Studies.

Student learning outcomes

1. Global knowledge, citizenship and ethics: Anthropology graduates will recognize and describe cultural, economic, informational and social interdependencies that exist among nations and cultures today, including an ethical understanding of the effects of such factors as racial, ethnic and gender differences.
2. Scientific and anthropological literacy: Students will evaluate and assess scientific findings by employing concepts and methodologies of modern science as applied to anthropological questions.
3. Advanced oral and written communication skills: Graduates will effectively communicate ideas about anthropological tenets in both oral and written formats.
4. Research methods and design skills: Students will demonstrate the ability to design appropriate anthropological research questions and apply research methodologies to answer those questions.
5. Critical-thinking skills: Graduates will critically evaluate their own cultural and biological histories and experiences, as well as those of others.
6. Experiential learning: Students will synthesize and apply anthropological tenets in experiential learning opportunities including

study abroad, internships, service-learning, independent studies or field schools.

Upon completing this program, students will know and know how to do the following:

The goal of the anthropology program is to impart to students a global awareness and appreciation of the full range of human biological and cultural diversity across time and space, as well as of the underlying similarities derived from humans' common evolutionary origins.

Students gain proficiency in the knowledge and application of disciplinary and interdisciplinary research methods and analytic concepts, and are trained to develop a holistic and comparative perspective on the human condition, with regard to the cultural, biological, archaeological and linguistic dimensions of anthropological inquiry.

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Honors in anthropology

Majors in the anthropology program may earn a Bachelor of Science degree with honors in anthropology. Participation in honors thesis research is available to outstanding senior majors and involves the preparation of a senior thesis during the last two semesters of the baccalaureate degree program.

In order to participate in the program, students must meet program entrance requirements, identify a project mentor and receive approval for a project proposal. Honors will be awarded following acceptance of the thesis by the Honors Thesis Committee. The committee will consist of, at a minimum, the project mentor, one other member of the anthropology faculty and one faculty member from outside of the anthropology program.

The project may involve any recognized anthropological topic, theory and/or method that promises to enhance the student's disciplinary perspective, skills and creativity. The project may involve an extension of work initiated in a course, an entirely new project or a collaborative project with the faculty mentor. If the project is an extension of work initiated in a course or developed collaboratively with the mentor, independent, separate, substantial development of the topic in the thesis should be evident in the final product. The thesis should reflect work of high quality for a senior-level course.

Students majoring in anthropology are eligible to participate in the departmental honors program if they have maintained a minimum 3.0 overall GPA and a minimum of 3.3 GPA in the major. Application materials consist of transcripts documenting the required GPAs, a five-to-seven page proposal (including a history and description of the proposed project, an annotated bibliography of relevant sources, a work plan, and a schedule for completion of the project) and a letter of endorsement from the faculty member who has agreed to act as project mentor. Applications must be made and project approval received no later than the first two weeks of classes in the semester in which the project will commence. A departmental committee will review the application materials, meet with the candidate to discuss the project proposal as needed and render an admission decision. Once admitted, program

participants will enroll in ANTH 497. The course may be included in the required hours for the major.

Students will complete six credit hours (over two sequential semesters in their senior year) in ANTH 497 and ANTH 498. The student's work will be evaluated by the project mentor and a departmental committee at the end of the first semester (ANTH 497) and a grade will be assigned. If allowed to continue, the student will enroll in ANTH 498 the subsequent semester. At the completion of ANTH 498, the completed senior honors thesis will be submitted to the HTC following its acceptance by the faculty mentor and confirmation that the candidate has maintained the requisite GPAs.

Upon submission of the thesis, the student will make an oral presentation (to be made no later than two weeks before the end of classes) to the HTC and other faculty as deemed appropriate, summarizing the research procedures and findings. The HTC will then evaluate the thesis for the award of honors. In order to receive honors, the thesis must be evaluated as deserving of a grade of A. Whether or not honors are awarded, a final grade will be submitted for ANTH 498. The awarding of honors for the thesis will earn an Honors Certificate from the department and notation of the student's standing as an honors graduate on the final grade transcript. Students must submit a final copy of the thesis to both the department and the VCU Libraries no later than the last day of classes.

Degree requirements for Anthropology, Bachelor of Science (B.S.)

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
• Major core requirements ¹		
ANTH 105/INTL 104	Introduction to Archaeology	3
ANTH 301/BIOL 341	Human Evolution	4
ANTH 302	Archaeological Theory	3
ANTH 399	Junior Seminar	1
ANTH 454	Theory in Cultural Anthropology	3
ANTH 490	Anthropology Senior Capstone	3
• Additional major requirements		
Select two from:		6
ANTH 210	Biological Anthropology	
ANTH 220	Cultural Anthropology	
ANTH 230	Anthropological Linguistics	
Methods requirement		
Select two from:		6
ANTH 303	Archaeological Methods and Research Design	
ANTH 315	Field Methods and Research Design in Cultural Anthropology	
ANTH 328	Language, Culture and Cognition	
• Major electives ²		
Select at least two courses from one of the elective groups below.		6

Ancillary requirements

ANTH/INTL 103	Introduction to Anthropology (satisfies general education BOK for social/behavioral sciences and AOI for global perspectives)	3
BIOL 101	Biological Concepts (satisfies general education BOK for natural sciences and AOI for scientific and logical reasoning)	3
HUMS 202	Choices in a Consumer Society	1
MATH 131	Introduction to Contemporary Mathematics (or higher numbered math course with a minimum grade of C; satisfies general education quantitative foundations)	3
STAT 210	Basic Practice of Statistics	3
Experiential fine arts ³		1-3
Experiential learning		
Select one of the following:		0-3
Major-specific service-learning course		
Study abroad program		
Internship (ANTH 398, ANTH 493, FRLG 493, INTL 493, WRLD 493)		
Foreign language through the 102 level (by course or placement)		0-6
World ePass completion		0
Open electives		
Select any course.		39-50
Total Hours		120

1

Students must attain a minimum grade of C in each of the core anthropology courses.

2

Students must receive approval through the SWS Advising Office for topics courses counting toward the appropriate elective group.

3

Course offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

ANTH electives

Course	Title	Hours
Select at least two courses from one of the following elective groups.		
Biological anthropology		
ANTH 307	Human Osteology	4
ANTH 309	Gender and Global Health	3
ANTH 310	Forensic Anthropology	3
ANTH 380	Medical Anthropology	3
ANTH 383	Evolutionary Medicine and Anthropology	3
ANTH 391	Topics in Anthropology ²	3
ANTH 398	Field Investigations in Anthropology	1-8
ANTH 403	Primatology	4

ANTH 469	Human Dentition: ID and Anthropology	1-3
ANTH 491	Advanced Topics in Anthropology ²	1-3

Archaeology

ANTH 321	Gender and Culture in Africa	3

The minimum number of credit hours required for this degree is 120.

Foreign Language, Bachelor of Arts (B.A.) with a concentration in dual languages

In today's world, language learning is more important than ever. The ability to navigate across diverse language, ethnic, racial and cultural borders allows connection with others, helping create a more inclusive and mutually respectful society. Additionally, employers the world over value the communication skills, cultural competence and practical experiences language students acquire through course work, internships, service learning and study abroad. Proficiency in a second language offers special practical benefits: VCU graduates with language skills are among the more qualified candidates for jobs in international businesses, nonprofits and government agencies. They also qualify for jobs as language teachers in schools, where they often serve as role models, mentors and leaders.

VCU's B.A. in Foreign Language curriculum allows students to focus on either one or two languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. VCU course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, globally and virtually. Special effort is made to develop intercultural communication competence.

Becoming a language major is one of the best decisions a student can make! Most will find a seamless transition to VCU from high school or

community college programs. Placement testing and the transfer of Advanced Placement, IB and other college-level courses from high school or from a community college can shorten time to degree completion and make it easier for students to pursue dual or double majors and build on minors or certificate programs from across VCU.

Student learning outcomes

- Development of oral and aural communication skills in context
- Development of written communication skills
- Development of critical and analytical reading skills
- Development of historical, literary and cultural competency

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

To earn a Bachelor of Arts in Foreign Languages with a concentration in dual languages, students must complete 39 credits within the major (18 credits in a target language and 15 credits in a second language), 27 credits of which must be upper-level (300-level or above), with a minimum major GPA of 2.25.

All foreign language majors, students transferring credits from study abroad and transfer students who major in a foreign language must include in their target-language course work a minimum of 12 VCU credits. Both credit and distribution requirements (minimum of 11 courses in target languages) for the concentration must be satisfied.

Foreign language majors who plan on becoming language teachers in the K-12 school system are required to complete a total of 30 credits of upper-level (300- and 400-level) course work in one target language to meet certification requirements.

Degree requirements for Foreign Language, Bachelor of Arts (B.A.) with a concentration in dual languages

Course	Title	Hours

Accelerated B.A. and M.S.

The accelerated B.A. and M.S. program allows qualified students to earn both the B.A. in Foreign Language with a concentration in French and M.S. in Business with a concentration in marketing management in a minimum of five years by completing up to 12 credit hours of approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to three credit hours of graduate courses toward both the B.A. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 147 credits rather than the 150 credits necessary if the two degrees are pursued separately.

In their senior year students would also take up to nine credit hours of graduate-level foundations courses, which are prerequisites for the graduate program.

Students holding these degrees will be very competitive due to the combined knowledge and skills in language, culture and business and will be well prepared for success in an increasingly global marketplace.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including WRLD 302 and 21 credits earned at the 300-level in FREN; an overall GPA of 3.25; and a GPA of 3.0 in the major course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program. Students may be admitted after completing all courses listed as recommended for the junior year in the course sequence below; applications must be received no later than Nov. 1 for the spring semester admission and no later than July 1 for fall semester admission. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Two reference letters (at least one from a School of World Studies faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the M.S. in Business with a concentration in marketing management program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate School of World Studies adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Foreign Language degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion

of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will apply toward open elective credits for the undergraduate degree. Three of these credits, MKTG 672, are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements. Nine credits are foundation courses for the graduate program and apply to the undergraduate degree only.

The graduate business courses that may be taken as an undergraduate once a student is admitted to the program – and how they apply – are shown in the table below.

Course	Title	Hours
ACCT 507	Fundamentals of Accounting (graduate foundation; satisfies open elective in undergraduate program)	3
MKTG 672	Influencing Consumer Behavior (shared between undergraduate and graduate programs)	3
FIRE 520	Financial Concepts of Management (graduate foundation; satisfies open elective in undergraduate program)	3
SCMA 524	Statistical Fundamentals for Business Management (graduate foundation; satisfies open elective in undergraduate program)	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
FREN 300	Communication and Composition	3

Foreign Language, Bachelor of Arts (B.A.) with a concentration in German

worldstudies/languages (<https://worldstudies.vcu.edu/academic-programs/foreign-languages/>)

In today's world, language learning is more important than ever. The ability to navigate across diverse language, ethnic, racial and cultural borders allows connection with others, helping create a more inclusive and mutually respectful society. Additionally, employers the world over value the communication skills, cultural competence and practical experiences language students acquire through course work, internships, service learning and study abroad. Proficiency in a second language offers special practical benefits: VCU graduates with language skills are among the more qualified candidates for jobs in international businesses, nonprofits and government agencies. They also qualify for jobs as language teachers in schools, where they often serve as role models, mentors and leaders.

VCU's B.A. in Foreign Language curriculum allows students to focus on either one or two languages, including the option to combine their major with other disciplines as they work with advisers to plan for their future careers. VCU course work leads majors to explore cultural traditions and historical developments in various parts of the world, and to pursue applied vocabulary and practices that they can use in real-world situations locally, nationally, globally and virtually. Special effort is made to develop intercultural communication competence.

Becoming a language major is one of the best decisions a student can make! Most will find a seamless transition to VCU from high school or community college programs. Placement testing and the transfer of Advanced Placement, IB and other college-level courses from high school or from a community college can shorten time to degree completion and

make it easier for students to pursue dual or double majors and build on minors or certificate programs from across VCU.

Student learning outcomes

- Development of oral and aural communication skills in context
- Development of written communication skills
- Development of critical and analytical reading skills
- Development of historical, literary and cultural competency

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

To earn a Bachelor of Arts in Foreign Language, students must complete at least 39 credits within the major, 33 credits of which must be upper-level (300-level or above), with a minimum major GPA of 2.25.

All foreign language majors, students transferring credits from study abroad and transfer students who intend to major in a foreign language must include in their target-language course work a minimum of 12 VCU credits. Both credit and distribution requirements (minimum of 11 courses in target language) for the concentration must be satisfied.

Foreign language majors who plan on becoming language teachers in the K-12 school system are required to complete a total of 30 credits of upper level (300- and 400-level) course work in one target language to meet certification requirements.

Degree requirements for Foreign Language, Bachelor of Arts (B.A.) with a concentration in German

Course	Title	Hours
General education (p. 77)		
Select 12 -13 credits from foundations of learning and 17-18 credits from areas of inquiry.		30

Total Hours: 120-130

The minimum number of credit hours required for this degree is 120.

Accelerated B.A. and M.S.

The accelerated B.A. and M.S. program allows qualified students to earn both the B.A. in Foreign Language with a concentration in German and M.S. in Business with a concentration in marketing management in a minimum of five years by completing up to 12 credit hours of approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to three credit hours of graduate courses toward both the B.A. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 147 credits rather than the 150 credits necessary if the two degrees are pursued separately.

In their senior year students would also take up to nine credit hours of graduate-level foundations courses, which are prerequisites for the graduate program.

Students holding these degrees will be very competitive due to the combined knowledge and skills in language, culture and business and will be well prepared for success in an increasingly global marketplace.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including WRLD 302 and 21 credits earned at the 300-level in GRMN; an overall GPA of 3.25; and a GPA of 3.0 in the major course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not

meet the minimum GPA requirements may submit GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program. Students may be admitted after completing all courses listed as recommended for the junior year in the course sequence below; applications must be received no later than Nov. 1 for the spring semester admission and no later than July 1 for fall semester admission. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Two reference letters (at least one from a School of World Studies faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the M.S. in Business with a concentration in marketing management program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate School of World Studies adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Foreign Language degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will apply toward open elective credits for the undergraduate degree. Accelerated B.A. and M.S.

The accelerated B.A. and M.S. program allows qualified students to earn both the B.A. in Foreign Language with a concentration in Spanish and M.S. in Business with a concentration in marketing management in a minimum of five years by completing up to 12 credit hours of approved graduate courses during the senior year of their undergraduate program. Students in the program may count up to three credit hours of graduate courses toward both the B.A. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 147 credits rather than the 150 credits necessary if the two degrees are pursued separately.

In their senior year students would also take up to nine credit hours of graduate-level foundations courses, which are prerequisites for the graduate program.

Students holding these degrees will be very competitive due to the combined knowledge and skills in language, culture and business and will be well prepared for success in an increasingly global marketplace.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours including WRLD 302 and 21 credits earned at the 300-level in GRMN; an overall GPA of 3.25; and a GPA of 3.0 in the major course work. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program. Students may be admitted after completing all courses listed as recommended for the junior year in the course sequence below; applications must be received no later than Nov. 1 for the spring semester admission and no later than July 1 for fall semester admission. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Two reference letters (at least one from a School of World Studies faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the M.S. in Business with a concentration in marketing management program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate School of World Studies adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Foreign Language degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will apply toward open elective credits for the undergraduate degree. Three of these credits, MKTG 672, are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements. Nine credits are foundation courses for the graduate program and apply to the undergraduate degree only.

The graduate business courses that may be taken as an undergraduate once a student is admitted to the program – and how they apply – are shown in the table below.

Course	Title	Hours
ACCT 507	Fundamentals of Accounting (graduate foundation; satisfies open elective in undergraduate program)	3
MKTG 672	Influencing Consumer Behavior (shared between undergraduate and graduate programs)	3

FIRE 520	Financial Concepts of Management (graduate foundation; satisfies open elective in undergraduate program)	3
SCMA 524	Statistical Fundamentals for Business Management (graduate foundation; satisfies open elective in undergraduate program)	3

Electives	6	
Term Hours:	15	
Spring semester		
MKTG 657	Market Planning Project	3
Electives	9	
Term Hours:	12	

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
SPAN 300	Communication and Composition	3
SPAN 305 or SPAN 307 or SPAN 311	Oral Communication Spanish Conversation and Film Spanish Through the Media	3
Open electives		9
Term Hours:		15
Spring semester (on-campus or study abroad semester)		
SPAN 301	Self and Society: Effective Writing	3
SPAN 320 or SPAN 321	Civilization of Spain I Latin American Civilization I	3
SPAN 330 or SPAN 331	Survey of Spanish Literature Survey of Latin American Literature	3
SPAN elective (300-level)		3
Open elective		3
Term Hours:		15
Senior year		
Fall semester		
ACCT 507	Fundamentals of Accounting	3
SCMA 524	Statistical Fundamentals for Business Management	3

MKTG 671	Marketing Management	3
MKTG 675	Digital Marketing	3
MKTG 679	Brand Strategy	3

International Studies, Bachelor of Arts (B.A.) with a concentration in European studies

The international studies program offers a varied interdisciplinary humanities curriculum, global in scope and designed to increase students' knowledge about the cultures and traditions, languages, literature and media, history, values, concerns, and aspirations of peoples in different countries and regions of the world. The goal of the program is ultimately also to both broaden students' comparative intercultural perspectives and develop their cross-cultural communication abilities. Within each chosen concentration, the interdisciplinary range of offerings allows for flexibility in configuring each individual's course of study, which can be organized in a manner that best suits a student's particular needs.

Student learning outcomes

1. Students will be able to critically analyze culturally specific as well as global issues from a variety of disciplinary perspectives.
2. Students will demonstrate knowledge of universals and differences in worldviews and ethical systems (values) across a range of cultures.
3. Students will acquire the cross-cultural communication skills and cultural sensitivity to interact effectively in international and/or multicultural settings, and to engage with cultural difference in an informed and compassionate fashion.
4. Students will attain intermediate college-level proficiency in a second language in each of the four modalities: speaking, listening, reading and writing.

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

To earn a Bachelor of Arts in International Studies, students must complete 120 course credits, at least 36 of which must be in the major, with a minimum GPA of 2.25. Students must take at least 21 credits total of upper-level (300- or 400-level) courses within the major, with a minimum of **nine** credits at the upper level earned at VCU (not through transfer credit). The focus of a degree in international studies is interdisciplinary and should reflect a well-rounded mix of courses completed in a variety of disciplines (e.g. ANTH, HIST, POLI, SOCY, WRLD and foreign languages such as FREN, GRMN, ITAL, RUSS, SPAN).

International studies majors are encouraged to complete the course requirements for a minor that will broaden their international studies perspectives. Minor options are varied and may be chosen from a broad range of subject areas. Students also may want to consider a second

major. Advisers will work with students to explore the benefits of a double major and a minor.

Students must fulfill an experiential learning requirement through an approved internship, service-learning course or study-abroad program. Within the core requirements, students must complete six credits of foreign language study through the advanced level (300 level or higher). Native speakers of a language not taught at VCU can demonstrate fluency through evaluation to meet the requirement and then substitute six credits of additional course work chosen from the concentration electives to complete the degree. For students studying a foreign language not taught at VCU, or for which no upper-level courses are offered on campus, the School of World Studies advisers will assist the student in identifying appropriate language study options at other U.S. institutions or abroad. International studies majors also must fulfill the college general education requirements for the Bachelor of Arts degree.

To major in international studies, students must take course work that fulfills the requirements for the concentration chosen.

Degree requirements for International Studies, Bachelor of Arts (B.A.) with a concentration in European studies

Courses offered by the School of the Arts

The minimum number of credit hours required for this degree is 120.

Concentration courses

The concentration in European studies requires a total of 18 elective credits of interdisciplinary course work. A maximum of six elective credits within the concentration may be earned within the same discipline (e.g. HIST, SPAN, POLI, RELS, etc.) Courses marked "when appropriate" require preapproval from the School of World Studies Advising Office.

Course	Title	Hours
Select a minimum of three credits from the following:		
HIST 101 or HIST 102	Survey of European History	3
HIST 310	The Early Middle Ages	
HIST 311	High and Later Middle Ages	
HIST 312	Europe in the Early Modern Period, 1350-1650	
HIST 313	Europe in Absolutism and Enlightenment, 1648-1815	
HIST 314	The Zenith of European Power, 1815-1914	
HIST 315	The Age of Total War in Europe, 1914-1945	
HIST 316	Postwar Europe, 1945 to the Present	
HIST 317	History of France I	
HIST 318	History of France II	
HIST 319	History of Germany I	
HIST 320	History of Germany II	
HIST 321	The Holocaust	
HIST 322	Nazi Germany	
HIST 324	History of Early Modern Britain	
HIST 325	History of Modern Britain	
HIST 326	The British Empire	
HIST 327	History of Russia I	
HIST 328	History of Russia II	
HIST 329	History of Spain and Portugal	
HIST 330/ GSWS 339	History of Gender and Sexuality in Europe I	
HIST 331/ GSWS 340	History of Gender and Sexuality in Europe II	
HIST 391	Topics in History (when appropriate)	
HIST 404	Studies in Modern European History: —	
Select a minimum of three credits from the following:		
ANTH/INTL 455	Anthropology of Development and Globalization (when appropriate)	3
FRLG/INTL 345/ URSP 350	Great Cities of the World (when appropriate)	
INTL 491	Topics in International Studies (when appropriate)	
INTL 492	Independent Study (when appropriate)	
MGMT/INTL 419	Doing Business in Europe	
POLI/INTL 352	European Governments and Politics	
POLI 354/354	Russian and Post-Soviet Politics	

POLI 362/362	International Organizations and Institutions	
POLI/INTL 365	International Political Economy	
URSP/INTL 334	Regional Geography of ____ (when appropriate)	
Select a minimum of three credits from the following:		3
FLET 391	Topics in Foreign Literature in English Translation (when appropriate)	
FREN 320	French Civilization and Culture I	
FREN 321	French Civilization and Culture II	
FREN 420	French Regional Culture	
FREN 421	French Contemporary Culture	
FREN 425	French Media	
FREN 450	Francophone Literatures and Cultures	
GRMN 320	From the Vandals to Kant: Civilization and Literature I	
GRMN 321	From Faust to Nazism: Civilization and Literature II	
GRMN 322	From Kafka's World to the EU: Civilization and Literature III	
GRMN 420	The Turn of the Century	
GRMN 423	Folk/Popular Culture	
GRMN 424	Culture and Society	
ITAL 320	Italian Cinema: ____	
ITAL 330	Themes in Italian Literature: ____	
ITAL 391	Topics in Italian	
RELS 310	Mediterranean Religions	
RUSS 311	Conversation and Media	
RUSS 330	Literature and Culture: ____	
RUSS 422	Russian Film	
RUSS 491	Topics in Russian	
SPAN 320	Civilization of Spain I	
SPAN 330	Survey of Spanish Literature	
SPAN 420	Civilization of Spain II	
SPAN 433	Don Quixote	
WRLD 391	Topics in World Languages and Cultures (taught on campus, and when appropriate)	
WRLD 422	National Cinema (when appropriate)	
WRLD 491	Topics in World Languages and Cultures (when appropriate)	
Students may also choose three credits from the following art history courses to complete concentration requirements:		0-3
ARTH 305	Classical Art and Architecture	
ARTH 310	Medieval Art and Architecture	
ARTH 315	Renaissance Art and Architecture	
ARTH 320	Baroque and Rococo Art and Architecture	
ARTH 324	18th-century Art in Europe	
ARTH 325	19th-century Art in Europe	
ARTH 367	German Expressionism	

To complete the remaining credits for the concentration, students choose additional courses from the above categories.

Total Hours 18

Courses taken through an accredited study abroad program must be preapproved through the SWS Advising Office.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

International Studies, Bachelor of Arts (B.A.) with a concentration in general studies

The international studies program offers a varied interdisciplinary humanities curriculum, global in scope and designed to increase students' knowledge about the cultures and traditions, languages, literature and media, history, values, concerns, and aspirations of peoples in different countries and regions of the world. The goal of the program is ultimately also to both broaden students' comparative intercultural perspectives and develop their cross-cultural communication abilities. Within each chosen concentration, the interdisciplinary range of offerings allows for flexibility in configuring each individual's course of study, which can be organized in a manner that best suits a student's particular needs.

Student learning outcomes

1. Students will be able to critically analyze culturally specific as well as global issues from a variety of disciplinary perspectives.
2. Students will demonstrate knowledge of universals and differences in worldviews and ethical systems (values) across a range of cultures.
3. Students will acquire the cross-cultural communication skills and cultural sensitivity to interact effectively in international and/or multicultural settings, and to engage with cultural difference in an informed and compassionate fashion.
4. Students will attain intermediate college-level proficiency in a second language in each of the four modalities: speaking, listening, reading and writing.

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

To earn a Bachelor of Arts in International Studies, students must complete 120 course credits, at least 36 of which must be in the major, with a minimum GPA of 2.25. Students must take at least 21 credits total of upper-level (300- or 400-level) courses within the major, with a minimum of **nine** credits at the upper level earned at VCU (not through transfer credit). The focus of a degree in international studies is interdisciplinary and should reflect a well-rounded mix of courses completed in a variety of disciplines (e.g. ANTH, HIST, POLI, SOCY, WRLD and foreign language).

International studies majors are encouraged to complete the course requirements for a minor that will broaden their international studies perspectives. Minor options are varied and may be chosen from a broad range of subject areas. Students also may want to consider a second major. Advisers will work with students to explore the benefits of a double major and a minor.

Students must fulfill an experiential learning requirement through an approved internship, service-learning course or study-abroad program. Within the core requirements, students must complete six credits of

foreign language study through the advanced level (300 level or higher). Native speakers of a language not taught at VCU can demonstrate fluency through evaluation to meet the requirement and then substitute six credits of additional course work chosen from the concentration electives to complete the degree. For students studying a foreign language not taught at VCU, or for which no upper-level courses are offered on campus, the School of World Studies advisers will assist the student in identifying appropriate language study options at other U.S. institutions or abroad. International studies majors also must fulfill the college general education requirements for the Bachelor of Arts degree.

To major in international studies, students must take course work that fulfills the requirements for the concentration chosen.

To complete the major credit requirements in international studies, students propose course work comprising a coherent set of courses deepening their knowledge in a particular area. Students must formulate and seek pre-approval of their course plan through the SWS Advising

Office. A minimum of 21 credits within the major must be earned through upper-level course work (300- and 400-level).

The minimum number of credit hours required for this degree is 120.

International Studies, Bachelor of Arts (B.A.) with a concentration in international social justice studies

The international studies program offers a varied interdisciplinary humanities curriculum, global in scope and designed to increase students' knowledge about the cultures and traditions, languages, literature and media, history, values, concerns, and aspirations of peoples in different countries and regions of the world. The goal of the program is ultimately also to both broaden students' comparative intercultural perspectives and develop their cross-cultural communication abilities. Within each chosen concentration, the interdisciplinary range of offerings allows for flexibility in configuring each individual's course of study, which can be organized in a manner that best suits a student's particular needs.

Student learning outcomes

1. Students will be able to critically analyze culturally specific as well as global issues from a variety of disciplinary perspectives.
2. Students will demonstrate knowledge of universals and differences in worldviews and ethical systems (values) across a range of cultures.
3. Students will acquire the cross-cultural communication skills and cultural sensitivity to interact effectively in international and/or multicultural settings, and to engage with cultural difference in an informed and compassionate fashion.
4. Students will attain intermediate college-level proficiency in a second language in each of the four modalities: speaking, listening, reading and writing.

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

To earn a Bachelor of Arts in International Studies, students must complete 120 course credits, at least 36 of which must be in the major, with a minimum GPA of 2.25. Students must take at least 21 credits total of upper-level (300- or 400-level) courses within the major, with a minimum of **nine** credits at the upper level earned at VCU (not through transfer credit). The focus of a degree in international studies is interdisciplinary and should reflect a well-rounded mix of courses completed in a variety of disciplines (e.g. ANTH, HIST, POLI, SOCY, WRLD and foreign language).

International studies majors are encouraged to complete the course requirements for a minor that will broaden their international studies perspectives. Minor options are varied and may be chosen from a broad range of subject areas. Students also may want to consider a second major. Advisers will work with students to explore the benefits of a double major and a minor.

International Studies, Bachelor of Arts (B.A.) with a concentration in Latin American studies

The international studies program offers a varied interdisciplinary humanities curriculum, global in scope and designed to increase students' knowledge about the cultures and traditions, languages, literature and media, history, values, concerns, and aspirations of peoples in different countries and regions of the world. The goal of the program is ultimately also to both broaden students' comparative intercultural perspectives and develop their cross-cultural communication abilities. Within each chosen concentration, the interdisciplinary range of offerings allows for flexibility in configuring each individual's course of study, which can be organized in a manner that best suits a student's particular needs.

Student learning outcomes

1. Students will be able to critically analyze culturally specific as well as global issues from a variety of disciplinary perspectives.
2. Students will demonstrate knowledge of universals and differences in worldviews and ethical systems (values) across a range of cultures.
3. Students will acquire the cross-cultural communication skills and cultural sensitivity to interact effectively in international and/or multicultural settings, and to engage with cultural difference in an informed and compassionate fashion.
4. Students will attain intermediate college-level proficiency in a second language in each of the four modalities: speaking, listening, reading and writing.

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

To earn a Bachelor of Arts in International Studies, students must complete 120 course credits, at least 36 of which must be in the major, with a minimum GPA of 2.25. Students must take at least 21 credits total of upper-level (300- or 400-level) courses within the major, with a minimum of **nine** credits at the upper level earned at VCU (not through transfer credit). The focus of a degree in international studies is interdisciplinary and should reflect a well-rounded mix of courses

completed in a variety of disciplines (e.g. ANTH, HIST, POLI, SOCY, WRLD and foreign language).

International studies majors are encouraged to complete the course requirements for a minor that will broaden their international studies perspectives. Minor options are varied and may be chosen from a broad range of subject areas. Students also may want to consider a second major. Advisers will work with students to explore the benefits of a double major and a minor.

Students must fulfill an experiential learning requirement through an approved internship, service-learning course or study-abroad program. Within the core requirements, students must complete six credits of foreign language study through the advanced level (300 level or higher). Native speakers of a language not taught at VCU can demonstrate fluency through evaluation to meet the requirement and then substitute six credits of additional course work chosen from the concentration electives to complete the degree. For students studying a foreign language not taught at VCU, or for which no upper-level courses are offered on campus, the School of World Studies advisers will assist the student in identifying appropriate language study options at other U.S. institutions or abroad. International studies majors also must fulfill the college general education requirements for the Bachelor of Arts degree.

To major in international studies, students must take course work that fulfills the requirements for the concentration chosen.

Religious Studies, Bachelor of Arts (B.A.)

worldstudies.vcu.edu/academics/relstudies (<http://worldstudies.vcu.edu/academics/religious-studies/>)

The mission of the Religious Studies Program at VCU is to advance understanding of the nature, history and diversity of religious traditions.

Religious studies is guided by the idea that studying humanity's diverse and developing religious traditions is vital to understanding what it means to be human and how to live wisely as members of the world community. Students explore the artistic, ethical, literary, psychological and social dimensions of religions, as well as the relationship between religious ideas, institutions, and practices and matters of gender, sexuality, race, nationality, health, social justice, human rights and nature.

Religious studies emphasizes excellence in written, oral and visual interpretation and communication, critical thinking, informed dialogue, and global citizenship. Combining classroom- and community-based learning through study-abroad programs, internships and community service, religious studies empowers students to engage intellectually and practically with diverse communities and work to build a peaceful, generous and affirming society.

Student learning outcomes

1. Demonstrate knowledge of diverse religious traditions
2. Utilize the vocabulary, concepts and research methods of the academic study of religion
3. Analyze the influence of religions on ethics, society and culture
4. Make clear, well-organized and substantive written and oral presentations

Experiential learning and study abroad

Each student completing a degree program within the School of World Studies is required to complete a World ePass as part of their experiential learning requirement; students are also encouraged to participate in a study abroad program. For more information on the ePass portfolio and study abroad opportunities, students may visit the overview page for the School of World Studies (p. 339).

Special requirements

The Bachelor of Arts in Religious Studies requires a minimum of 120 credits, with at least 30 credits in religious studies courses or in courses listed as acceptable for religious studies credit. Up to six of the 30 credits may be taken in language studies relevant to one's area of research interest and with the appropriate approval through the School of World Studies Advising Office. Other courses occasionally may be substituted should the needs and background of an individual student warrant substitutions. Religious studies majors are encouraged to consider a second major or minor that complements their study of religions (e.g. English, international studies), as well as study-abroad opportunities to enrich their studies.

What follows is a sample plan that meets the prescribed requirements within a four-year course of study at VCU. Please contact your adviser before beginning course work toward a degree.

Freshman year

Fall semester	Hours
RELS 108 Human Spirituality (satisfies general education BOK for humanities/fine arts and AOI for diversities in the human experience)	3

UNIV 101	Introduction to the University	1
UNIV 111	Focused Inquiry I (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry I		
Experiential fine arts		1-3
Foreign language 101		3
General education course (select quantitative foundations)		3-4
Term Hours:		14-17

Spring semester

HUMS 202	Choices in a Consumer Society	1
RELS 311	Religions of the World	3
or	or Religions of the World	
RELS 312		
UNIV 112	Focused Inquiry II (satisfies general education UNIV foundations)	3
Play course video for Focused Inquiry II		
Foreign language 102		3
General education course (select AOI for global perspectives)		3
Open elective		3
Term Hours:		16

Sophomore year**Fall semester**

RELS 311	Religions of the World	3
or	or Religions of the World	
RELS 312		
UNIV 200	Inquiry and the Craft of Argument (satisfies general education UNIV foundations)	3
General education course (select AOI for creativity, innovation and aesthetic inquiry)		3
General education course (select AOI for scientific and logical reasoning)		3
Open elective		3
Term Hours:		15

Spring semester

RELS 340	Global Ethics and the World's Religions	3
General education course (select BOK to complete breadth of knowledge requirement)		3
General education course (select BOK to complete breadth of knowledge requirement)		3
Open elective		3
Religion, society and culture elective		3
Term Hours:		15

Junior year**Fall semester**

RELS elective		3
Open electives		9
Religion, society and culture elective		3
Term Hours:		15

Spring semester

On-campus or study abroad semester		
RELS elective		3
Open electives		12
Term Hours:		15

Summer semester

Study abroad (recommended); credits completed during study abroad will decrease open electives needed in subsequent semesters		0-6
Term Hours:		0-6

Senior year**Fall semester**

RELS 493	Religious Studies Internship (or other experiential learning opportunity if not already met)	1-3
or	or Senior Capstone Seminar	
RELS 490		
RELS elective (400-level)		3
Open electives		11-12
World ePass completion		
Term Hours:		15-18

Spring semester

RELS 490	Senior Capstone Seminar (if not taken in the fall)	3
or	or Religious Studies Internship	
RELS 493		
RELS elective (400-level)		3
Open electives		9
Term Hours:		15

Total Hours: 120-132

The minimum number of credit hours required for this degree is 120.

Spanish/English Translation and Interpretation, Certificate in (Undergraduate certificate)

The certificate program prepares advanced Spanish students for further study, national certification exams and/or future employment in these growing fields. The program combines theoretical and applied course work with applied practice in the community, allowing students to hone their skills in a specialization of their choice or to apply for the certificate in general translation and interpretation. Students with advanced-level Spanish and English skills who are concentrating in liberal arts or professional programs as well as other majors are encouraged to apply.

Admission to the certificate program requires completion of SETI 400 with a minimum grade of B or a score of "advanced" on the Avant STAMP assessment test.

Students may earn this certificate concurrently with a baccalaureate degree in another undergraduate program at the university, or may earn the certificate independently from another degree, provided they have a baccalaureate degree from any institution. The six-course sequence focuses on the knowledge and skills needed for translation and interpretation in any field, including translation theory and praxis, research methods, computer-assisted translation tools, industry standards, simultaneous interpretation, consecutive interpretation, and sight translation. Students in specialized interpretation courses

(legal and medical) receive further instruction in terminology related to their areas of interest. The internship requires 120 clock hours of work including translation and/or interpretation practice.

This certificate program requires 18 credits as shown below and successful completion of a comprehensive exit assessment.

Course	Title	Hours
SETI 410	Introduction to Spanish-English Translation (Pre-requisites)	3
SETI 411	Intermediate Translation	3
SETI 420	Introduction to Spanish-English Interpretation	3
SETI 421 or SETI 491	Intermediate Interpretation Topics in Spanish-English Translation and Interpretation	3
SETI 422 or SETI 423	Legal Interpretation Medical Interpretation	3
SETI 493	SETI Internship	3
Total Hours		18

The minimum number of credit hours required for this certificate is 18.

For more information, contact the School of World Studies Advising Office at (804) 827-1111.

African studies, minor in

The African studies minor consists of 18 credits. A minimum of 12 credits must be earned at the upper (300- or 400-) level. No more than six credits can be earned within the same discipline.

Note: Language Placement Test results cannot substitute for completion of course work.

Course	Title	Hours
Select a minimum of three credits of geographically pertinent foreign language course work at the advanced level (300 or above) ¹		3
Select 15 credits from the following:		15
ANTH 391	Topics in Anthropology ²	
ARTH 350/ AFAM 413		
FREN 421	French Contemporary Culture ²	
HIST/AFAM 105	Survey of African History	
HIST/AFAM 106	Survey of African History	
INTL/AFAM/ANTH 200	Introduction to African Societies	
INTL/FLET 391		
INTL/AFAM/ANTH 420	Women of Africa	
INTL/FREN 450	Francophone Literatures and Cultures	
INTL 591	Topics in International Studies ²	
POLI/AFAM/INTL 356	Government and Politics of Africa	
POLI/AFAM/INTL 357	Politics of Southern Africa	
WRLD/INTL 203	Cultural Texts and Contexts: ____ ²	

WRLD 220	Human Rights and Literature ²
WRLD 391	Topics in World Languages and Cultures ²
WRLD 491	Topics in World Languages and Cultures ²

Total Hours **18**

¹

If this level of instruction is not available in a chosen language at the university, the School of World Studies Advising Office will assist students in identifying appropriate language study options at other U.S. institutions or abroad. Geographically pertinent foreign languages not taught at VCU will be considered on a case-by-case basis.

²

When appropriate: Always check first with the SWS Advising Office before enrolling in these courses.

Courses taken through an accredited study abroad program in an appropriate location (must be preapproved through the SWS Advising Office)

Anthropology, minor in

An anthropology minor shall consist of 18 credits in anthropology (with at least six of these credits taken in the anthropology program at VCU), including:

Course	Title	Hours
ANTH 103	Introduction to Anthropology	3
Select two of the following:		6
ANTH 105	Introduction to Archaeology	
ANTH 210	Biological Anthropology	
ANTH 220	Cultural Anthropology	
ANTH 230	Anthropological Linguistics	
Select nine additional upper-level ANTH credits (300-, 400- or 500-level)		9
Total Hours		18

Asian and Chinese studies, minor in

The Asian and Chinese studies minor consists of 21 credits. A minimum of 12 credits must be earned at the upper (300- or 400-) level.

Native speakers of Chinese may not use intermediate credit in the language to count toward the minor.

Note: Language Placement Test results cannot substitute for completion of course work.

Course	Title	Hours
Select a minimum of three credits of Chinese at the advanced level (300 or above)		3
RELS 311	Religions of the World	3
Select 15 credits from the following (no more than six credits can be earned within the same discipline):		15
CHIN 202	Intermediate Chinese ¹	
Select a minimum of three credits from the following:		
HIST 107	Survey of East Asian Civilizations	

HIST 108	Survey of East Asian Civilizations
HIST 201	The Art of Historical Detection: ____ ²
HIST 379	The History of Modern Japan
HIST 386	History of Late Imperial China, 900-1800
HIST 387	The History of Modern China, 1800 to the Present
HIST 389	History in Film: ____ ²
HIST 391	Topics in History ²
POLI/INTL 355	Asian Governments and Politics
POLI 359/ INTL 452	The Politics of Developing Areas
POLI/INTL 364	Vietnam
Select a minimum of three credits from the following:	
ARTH 245	Survey of Asian Art
ARTH 449	Studies in Asian Art
FLET/INTL 391	Topics in Foreign Literature in English Translation ²
RELS 320	Taoism
RELS/PHIL 322	Tibetan Buddhism
RELS/PHIL/INTL 410	The Chinese Tradition in Philosophy
RELS/PHIL/INTL 412	Zen Buddhism
RELS 442	Seminar in Hinduism
WRLD/INTL 203	Cultural Texts and Contexts: ____ ²
WRLD 220	Human Rights and Literature ²
WRLD 391	Topics in World Languages and Cultures ²
WRLD 491	Topics in World Languages and Cultures ²

Total Hours **21**

European studies, minor in

The European studies minor consists of 18 credits. A minimum of 12 credits must be earned at the upper (300- or 400-) level. No more than six credits can be earned within the same discipline.

Geographically pertinent foreign languages not taught at VCU will be considered on a case-by-case basis through the School of World Studies Advising Office.

Note: Language placement test results cannot substitute for completion of course work.

Course	Title	Hours
Select a minimum of three credits of geographically pertinent foreign language course work at the advanced level (300 or above)		3
Select 15 credits from the following:		15
Select a minimum of three credits from the following:		
HIST 101	Survey of European History	
HIST 102	Survey of European History	
HIST 310	The Early Middle Ages	
HIST 311	High and Later Middle Ages	

HIST 312	Europe in the Early Modern Period, 1350-1650
HIST 313	Europe in Absolutism and Enlightenment, 1648-1815

RUSS 422	Russian Film	
RUSS 491	Topics in Russian	
SPAN 320	Civilization of Spain I	
SPAN 330	Survey of Spanish Literature	
SPAN 420	Civilization of Spain II	
WRLD 230	Introduction to World Cinema	
Total Hours		18

¹

When appropriate: Always check first with the SWS Advising Office before enrolling in these courses.

Courses taken through an approved study abroad program in an appropriate location must be pre-approved through the SWS Advising Office.

Students majoring in art history may apply three credits of an art history course relevant to Europe toward the minor. The art history course must be approved through the SWS Advising Office.

French, minor in

A minor in French requires at least 18 credits in the chosen language, none of which may be earned at the 100 level.

Course	Title	Hours
FREN 201	Intermediate French (or 300-level FREN course) ¹	3
FREN 202	Intermediate French Readings (or 300-level FREN course) ¹	3
or FREN 205	Intermediate Conversation	
Choose a minimum of 12 credits of course work at the 300 level or higher		12
Total Hours		18

¹

Students who place through the intermediate level and begin taking French at the 300 level cannot count FREN 201, FREN 202 or FREN 205 toward the minor. These students are required to complete all 18 credits of the minor through course work at the 300 level or above.

German, minor in

A minor in German requires at least 18 credits in the chosen language, none of which may be earned at the 100 level.

Course	Title	Hours
GRMN 201	Intermediate German I (or 300-level GRMN course) ¹	3
GRMN 202	Intermediate German II (or 300-level GRMN course) ¹	3
or GRMN 205	Intermediate Conversation	
Choose a minimum of 12 credits at the 300 level or higher		12
Total Hours		18

¹

Students who place through the intermediate level and begin taking German at the 300 level cannot count GRMN 201, GRMN 202 or GRMN 205 toward the minor. These students are required to complete all 18 credits of the minor through course work at the 300 level or above.

International social justice studies, minor in

The international social justice studies minor consists of 18 credits. A minimum of 12 credits must be earned at the upper (300- or 400-) level. No more than six credits can be earned within the same discipline.

Students must complete a minimum of three credits of foreign language course work at the advanced level (300 or above).

Note: Language placement test results cannot substitute for completion of course work.

Students choose from the following courses to complete the minor:

Course	Title	Hours
Select a minimum of three credits from the following:		3-6
WRLD 210	International Social Justice Studies	
WRLD 220	Human Rights and Literature	
Select a minimum of three credits from the following:		3-6
RELS 450/ INTL 449	Religion, Globalization and Social Justice	
RELS/AFAM/INTL 451	Religion, Racism and Social Justice	
RELS/GSWS/INTL 453	Western Religions, Women and Social Justice	
RELS 455/ INTL 456	Catholic Ethics and Social Justice	

Select three different three-credit courses, one from at least three of the following interest areas:

History, gender, race and religion:

AFAM/SOCY/ GSWS 305	African American Family in Social Context
AFAM/ANTH/ INTL/GSWS 309	Gender and Global Health
ANTH/AFAM/INTL 200	Introduction to African Societies

ANTH/AFAM/INTL 420	Women of Africa
FLET/INTL 391	Topics in Foreign Literature in English Translation
HIST 365/ GSWS 341	History of Gender and Sexuality in America I
HIST 380/ AFAM 390/GSWS 390	Forced and Coerced Labor in Africa and the Americas
POLI/GSWS 366/ INTL 368	Women and Global Politics
RELS 340/ INTL 341	Global Ethics and the World's Religions
GSWS 301	Feminist Theory
GSWS/AFAM/ POLI 318	Politics of Race, Class and Gender
WRLD 391	Topics in World Languages and Cultures

Literature:

AFAM/ENGL 363/ INTL 366	African Literature
AFAM/ENGL 365/ INTL 367	Caribbean Literature
FLET/INTL 391	Topics in Foreign Literature in English Translation
FREN/INTL 450	Francophone Literatures and Cultures ¹
SPAN 322	Hispanic Immigrants in the U.S.
SPAN 332	Latino Writers in the U.S.
SPAN 491	Topics in Spanish ¹

Politics and globalization:

AFAM/POLI 302	Politics of the Civil Rights Movement
ANTH/INTL 349	Rethinking a Continent: Latin America
ANTH/INTL 350	Rethinking a Continent: Europe
ANTH/INTL 455	Anthropology of Development and Globalization
MASC/WRLD 359	International Media Coverage: The Middle East
POLI/AFAM/INTL 356	Government and Politics of Africa
POLI/AFAM/INTL 357	Politics of Southern Africa
POLI/INTL 365	International Political Economy
POLI/GSWS 366/ INTL 368	Women and Global Politics

World cinema:

ANTH 331	Public Culture: Anthropology Through Film
FREN 422	French Cinema
GRMN 422	German Film
ITAL 320	Italian Cinema: ____
RELS 422	Religion and Film
RUSS 422	Russian Film
SPAN 422	Spanish and Latin American Cinema
WRLD 422	National Cinema

Topics courses:

ANTH 391	Topics in Anthropology ¹
FLET/INTL 391	Topics in Foreign Literature in English Translation ¹
FREN 491	Topics in French ¹
GRMN 491	Topics in German ¹
RELS 391	Topics in Religious Studies ¹
RELS 490	Senior Capstone Seminar ¹
RELS 491	Topics in Religious Studies ¹
RUSS 491	Topics in Russian ¹
WRLD 491	Topics in World Languages and Cultures ¹

Total Hours **18**

¹

Students must receive approval through the SWS Advising Office for topics courses counting toward the minor.

Italian studies, minor in

A minor in Italian studies requires at least 18 credits, none of which can be earned at the 100 level.

Course	Title	Hours
ITAL 201	Intermediate Italian	3
ITAL 202 or ITAL 205	Intermediate Italian Readings Intermediate Conversation	3
Select at least six credits at the 300 level or above from courses taught in Italian		6
Select six credits from courses taught in either Italian or English		6
Total Hours		18

Courses taught in English must focus on subjects related to Italian culture, such as literature in translation, cultural studies or Italian cinema.

Note: Language placement test results cannot substitute for completion of course work. Italian studies minors must take at least two upper-level courses at VCU in Italian.

Latin American studies, minor in

The Latin American studies minor consists of 18 credits. A minimum of 12 credits must be earned at the upper (300- or 400-) level. No more than six credits can be earned within the same discipline, except for SPAN; a total of nine credits of SPAN course work may be count toward the minor.

Students must complete a minimum of three credits of Spanish at the advanced level (300 or above).

Note: Language placement test results cannot substitute for completion of course work.

Students choose from the following courses to complete the minor:

Course	Title	Hours
Select a minimum of 18 credits from the following, with a maximum of only six credits per discipline:		18
ANTH/INTL 348	South American Ethnography	
ANTH/INTL 349	Rethinking a Continent: Latin America	

ANTH 391	Topics in Anthropology ¹
ARTH 335	Pre-Columbian Art and Architecture
ARTH 338	Colonial Art and Architecture of Latin America
ARTH 339	Modern and Contemporary Art and Architecture of Latin America
FLET 391	Topics in Foreign Literature in English Translation ¹
HIST 109	Survey of Latin American History
HIST 110	Survey of Latin American History
HIST 370	History of Central America
HIST 371	History of Mexico
HIST 372	History of Brazil
HIST 373	History of the Andes to 1800
HIST 374	History of the Andes From 1800
HIST 376	Caribbean History to 1838
HIST 377	Caribbean History Since 1838
HIST 391	Topics in History ¹
HIST 409	Studies in Latin American History: ____
INTL 491	Topics in International Studies ¹
POLI/INTL 353	Latin American Governments and Politics
PORT 391	Topics in Portuguese

When appropriate: Always check first with the SWS Advising Office before enrolling in these courses.

Courses taken through an approved study abroad program in an appropriate location (must be preapproved through the SWS Advising Office).

Spanish, minor in

A minor in Spanish requires at least 18 credits in the chosen language, none of which may be earned at the 100 level.

Course	Title	Hours
SPAN 201 or SPAN 300 or SPAN 301	Intermediate Spanish ¹ Advanced Grammar and Writing Advanced Grammar and Writing	3
SPAN 202 or SPAN 205 or SPAN 300 or SPAN 301	Intermediate Spanish Readings ¹ Intermediate Spanish Conversation Advanced Grammar and Writing Advanced Grammar and Writing	3
Select only one of the following conversation courses: ²		3
SPAN 305	Spanish Communication	
SPAN 307	Spanish Conversation and Film	
SPAN 311	Spanish Through the Media	
Choose a minimum of nine credits of course work at the 300 level or higher ¹		9
Total Hours		18

¹

Students who place through the intermediate level and begin taking Spanish at the 300 level cannot count SPAN 201, SPAN 202 or SPAN 205 toward the minor. These students are required to complete all 18 credits of the minor through course work at the 300 level or higher.

²

Only one of these conversation courses may count toward the completion of the minor.

World cinema, minor in

The world cinema minor consists of 18 credits. A minimum of 12 credits must be earned at the upper (300- or 400-) level.

Note: Language Placement Test results cannot substitute for completion of course work.

Course	Title	Hours
WRLD 230	Introduction to World Cinema	3
WRLD 330	Introduction to Film Studies	3
WRLD 422	National Cinema	3
WRLD 430	Film and the City	3
Select one of the following:		3
ARTH 270	History of the Motion Picture I	
ARTH 271	History of the Motion Picture II	
ENGL 385	Fiction into Film	
Select a minimum of three credits of relevant foreign language course work at the advanced level (300 or above)		3
Total Hours		18

SCHOOL OF THE ARTS

The School of the Arts offers 25 degree programs and comprises more than 3,000 students. With the inclusion of our campus in Qatar come an additional four programs. It all began as one night class taught by Theresa Pollak in the fall of 1928.

The school strives to be a stimulating community of students and teachers who cross the boundaries of conventional art and design disciplines, apply aesthetic and intellectual vision to the expression of complex ideas, value artistic tradition and experimentation in the search for creative solutions, connect international experience with professional education, integrate technical skills with theoretical understanding and care about the impact of their work on people.

Theatre (bachelor's and master's degrees)

National Association for Schools of Theatre

Programs

The School of the Arts offers degrees in the following areas of study:

Advanced Media Production Technology

- Post-baccalaureate undergraduate certificate

Art Education

- Master of Art Education

Art History

- Bachelor of Arts
- Master of Arts
- Doctor of Philosophy

Arts

- Bachelor of Fine Arts with a concentration in art education

Cinema

- Bachelor of Arts

Communication Arts

- Bachelor of Fine Arts

Craft and Material Studies

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Dance and Choreography

- Bachelor of Fine Arts

Design

- Master of Fine Arts (with concentrations in design studies [at VCUQ], interior environments and visual communications)

Fashion

- Bachelor of Arts
- Bachelor of Fine Arts

Fine Arts

- Master of Fine Arts (with concentrations in ceramics, fibers, furniture design, glassworking and jewelry/metalworking; kinetic imaging; painting or printmaking; photography and film; sculpture)

Graphic Design

- Bachelor of Fine Arts

Interior Design

- Bachelor of Fine Arts

Kinetic Imaging

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Music

- Bachelor of Arts
- Bachelor of Music
- Master of Music

Painting and Printmaking

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Photography and Film

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Sculpture

- Bachelor of Fine Arts
- See Fine Arts concentrations for master's option

Theatre

- Bachelor of Arts
- Bachelor of Fine Arts
- Master of Fine Arts

School of the Arts Visual Resource Center

VCU's Cabell Library houses an extensive collection of books, publications and magazines on the visual and performing arts. VCU subscribes to ARTstor, the largest online image bank for the arts.

VCU is a short distance from Washington, D.C., Baltimore, Philadelphia and New York and the museums, libraries and research facilities in those urban areas.

Undergraduate information

General information

Students who have matriculated in a professional curriculum receive enrollment preference for courses in their program. However, unless otherwise indicated, all courses are open to any student in the university.

Because of the sequence in which course work is arranged, only transfer students will be considered for mid-year admission. With the exception of art history classes, all courses must be taken in their numerical sequence unless approved by the chair of the department in which they are listed.

In many of the courses, a considerable amount of work is done outside the classroom. This work is done in addition to the work done in the scheduled classes students are required to attend. Departments within the school reserve the right to retain examples of student work for permanent collections. Before enrollment, students should contact the appropriate department chair for a more detailed curriculum outline than that which appears in this bulletin.

Academic requirements

All majors in the School of the Arts must earn a minimum GPA of 2.0 in their major concentration as well as the overall GPA in order to meet the university requirements for graduation.

The department and the student's adviser periodically evaluate the record of each student. If at any time during undergraduate studies the department faculty concludes a student is not demonstrating adequate progress in the area of concentration, the student will be advised to withdraw from that department.

Some degree programs stipulate minimum GPA requirements in the major concentration higher than 2.0 and other special reviews to determine satisfactory progress in their programs. Students are advised to refer to the individual department sections in this bulletin detailing prerequisites (i.e. portfolio reviews, juries, recitals, progress review, etc.) that govern admission to advanced-level study.

Student participation in both credit- and noncredit-bearing department activities may be required. Students matriculating in School of the Arts degree programs are bound by the policies and procedures stipulated in this bulletin and in other current departmental student handbooks or policy documents of the school's academic departments in which students are registered for courses.

Special charges

All full-time majors enrolled in the School of the Arts are charged a comprehensive fee each semester. The fee schedule (<http://accounting.vcu.edu/tuition/coursefees/#arts>) is available on the Financial Aid website. The fees are prorated to the individual departments that determine the expenditures, resulting in a rebate to the students through materials, services and/or equipment, and may include models, field trips or special lectures. Students enrolled in any of the numerous courses that require an additional outlay for materials will be billed for those individual fees by the Student Accounting Department.

Internships and cooperative education

The School of the Arts encourages qualified students to enter into limited and carefully selected internship arrangements. To assist students, departments and programs are encouraged to identify, evaluate and select internship arrangements that will expand and complement the

scope of the student's educational experience, as well as support the missions of the university, school, and department or program.

Internship arrangements are coordinated by the individual department or program and are considered university-supported activities involving enrolled students and faculty. Participants in such arrangements are subject to all applicable university policies and procedures. These policies and procedures include, but are not limited to, conflict of interest, intellectual properties, faculty rights and responsibilities, and those policies and procedures outlined in the VCU Insider Student Handbook and Resource Guide.

While the School of the Arts encourages student internship arrangements, it disallows student internship arrangements when family members serve in a supervisory capacity. Should such an internship arrangement become an option, the approval of the dean must be received prior to completing any final agreement.

The School of the Arts also participates in the cooperative education program. Qualifying students can take part in this program through most departments. Contact the specific department for details.

Transfer students

Departmental faculty committees determine placement in all upper-level courses after evaluating the student's record, performance, audition and/or creative work. The student should contact the appropriate department chair at the time of acceptance to arrange for this evaluation before actual enrollment.

Undergraduate credit by examination

Recognizing that VCU enrolls students of varying backgrounds and experiences, the School of the Arts provides its students the opportunity to accelerate their education through "credit by examination." The conditions under which credit by examination (p. 38) may be given as well as the procedures are outlined in the "Admission to the university" section of this bulletin.

500-level courses

500-level courses are available only to upper-division undergraduate students with the approval of the chair of the department that offers the course.

Arts honors

Undergraduate arts majors may earn arts honors. A student must be enrolled in The Honors College and a major within the School of the Arts. To earn arts honors, students must complete 15 credits of arts honors courses and a senior capstone course or experience (this varies with each major).

Arts honors graduates will be recognized at commencement with special regalia, and the distinction is noted on the transcript.

Inquires should be directed to Jody Symula, director of student services. Interested students can email jlsymula@vcu.edu for an advising appointment.

Advanced Media Production Technology, Certificate in (Post-baccalaureate undergraduate certificate)

The certificate in advanced media production technology is a 24-credit post-baccalaureate undergraduate certificate program available to students pursuing the study of advanced digital media and post-production techniques. The certificate is designed to blend creative skills with the technical expertise required to compete for employment in the field of digital media. Students in the program are encouraged to approach the development of digital media with a cross-disciplinary, entrepreneurial spirit and to apply information and communications technology in novel ways. Students who receive a certificate through this program equip themselves for many opportunities in the professional digital media community of both production and post-production providers.

Special requirements

Students must possess a baccalaureate degree from an accredited academic institution and apply through the School of the Arts for admission. A minimum GPA of 2.5 is required for graduation.

Learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Evaluate and determine production goals for digital media
2. Create and produce professional-level digital media
3. Demonstrate broad-based knowledge in the components of audio production
4. Demonstrate broad-based knowledge in the core components of post-production
5. Work in professional post-production business and virtual production environments

Art Foundation Program

Jody Symula
Program lead

arts.vcu.edu/programs/art-foundation (<http://arts.vcu.edu/programs/art-foundation/>)

The mission of the Art Foundation Program is to provide an intellectually rigorous, studio-based experience in the fundamental issues of art and design while providing a platform for students to explore and discover. The program seeks to develop in its students an enthusiasm for their work, a means to reflect analytically and an ability to cultivate skills that will serve throughout their education. The Art Foundation Program seeks to establish connections between programs in art and design and to participate in a larger forum of ideas and concepts relevant to all of the disciplines.

Completion of the Art Foundation Program is a prerequisite for entry into all fine art and design departments: Art Education, Communication Arts, Craft and Material Studies, Fashion Design, Graphic Design, Interior Design, Kinetic Imaging, Painting and Printmaking, Photography and Film, and Sculpture and Extended Media.

After successfully completing all components of the major declaration process, completing all course requirements and achieving the minimum department grade point average students progress to their choice of major department.

Transfer students in art and design are also required to complete the Art Foundation Program but may be awarded transfer credits on a case-by-case basis.

Learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will acquire and apply knowledge of fundamental art and design techniques, concepts and approaches within their studio work.
- Students will be introduced to contemporary art and design concepts and begin to apply them in their studio work.
- Students will develop critique skills by engaging in constructive critical discourse.
- Students will develop an awareness of professional opportunities and resources within the university and the external arts community.
- Students will develop a body of studio course work submitted for assessment.

- Gain an international film perspective
- Create all aspects of the art of storytelling
- Produce narrative short films
- Develop creative collaborations
- Synthesize other disciplines with filmmaking

Special requirements

Students must maintain a minimum cumulative GPA of 2.0 in the program.

Majors in the Cinema Program may choose to complete a second major or minor in any other department or program that supports their educational and artistic goals. Alternatively, students may create a customized plan of study for a second major by requesting admission to the Bachelor of Interdisciplinary Studies program.

Cinema Program

TyRuben Ellingson

Program director

The Bachelor of Arts in Cinema is focused on narrative movie production. Consequently, the program is designed to advance conceptual understanding of visual storytelling and to teach and practice the technical methodologies foundational to movie-making.

Cinema majors collaborate on student productions under the supervision of faculty with professional production experience. Each summer session, students and faculty work collectively on a series of films funded by the School of the Arts.

- Cinema, Bachelor of Arts (B.A.) (p. 381)

Cinema, Bachelor of Arts (B.A.)

The Bachelor of Arts in Cinema is focused on narrative movie production. Consequently, the program is designed to advance conceptual understanding of visual storytelling and to teach and practice the technical methodologies foundational to movie-making.

Cinema majors collaborate on student productions under the supervision of faculty with professional production experience. Each summer session, students and faculty work collectively on a series of films funded by the School of the Arts.

Course work explores the proper use of motion picture cameras, lights, sound recording equipment and editorial software. Students also learn the history and theory of film, and develop skills in screenwriting, producing, directing and the business of movie-making.

The B.A. in Cinema requires a minimum of 120 credits, including 48 in the major. At least 45 of the 120 credits must be taken as 300- and 400-level courses. Students are admitted directly into the cinema program and are not required to complete the Art Foundation Program.

Many full-time students enrolled in the cinema program graduate with their B.A. degree after the successful completion of the summer session following their third year.

Student learning outcomes

Upon completing this program, students will be able to:

- Operate film equipment and screenwriting, editing, scheduling and budgeting software

Department of Art Education

Ryan Patton, Ph.D.

Associate professor and chair

arts.vcu.edu/arteducation (<http://arts.vcu.edu/arteducation/>)

The Department of Art Education supports instruction in art that encourages the construction of meaning. Faculty and students are actively involved with the art world, education and local and global communities through art-based service-learning, visual culture studies, critical thinking, exhibition, assessment, curriculum, critical theory and emerging digital technologies (virtual and interactive).

The department emphasizes interdisciplinary connections throughout the School of the Arts and the university as a whole. Through their own research and instruction, art teacher candidates engage their students and themselves in traditional and nontraditional forms of inquiry to contribute to the continuing growth and strength of the profession.

- Arts, Bachelor of Fine Arts (B.F.A.) with a concentration in art education (p. 382)

Arts, Bachelor of Fine Arts (B.F.A.) with a concentration in art education

The Bachelor of Fine Arts in Arts with a concentration in art education is an approved teacher preparation program that complies with the professional standards of the Virginia Department of Education and the Southern Association of Colleges and Schools. It is further accredited by the National Council for Accreditation of Teacher Education and the National Association of Schools of Art and Design. All of these agencies assure the highest professional program standards. Graduates of the program are eligible for Virginia teacher licensure to teach art in pre-kindergarten through grade 12.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will develop a professional philosophical position about the relevance and importance of art education.
- Students will implement/acquire a variety of art instructional strategies that reflect an understanding of the artistic, cognitive, emotional and social development of children, as well as national, state and local curricular standards and assessment techniques, in order to meet the needs of diverse learners.
- Students will be able to create and adapt learning environments that address the needs of all students.
- Students will be able to design assessment methods to measure student knowledge and skills, improve student learning and further professional practice.
- Students will teach art in ways that engage traditional and contemporary artists (diverse in regards to gender, ethnicity, sexual identity, social class and other dimensions of identity).
- Students will seek internships, service-learning positions and local, national and international experiences that lead to research and deepen engagement with diverse communities.

Special requirements

Admission

Undergraduate students admitted to the School of the Arts who have successfully completed the Art Foundation Program (or the equivalent at another institution) are eligible to apply through the Department of Art Education to enter the program.

Students currently attending VCU must have a minimum cumulative GPA of 2.0 to be considered for departmental admission; however, there is a higher cumulative GPA requirement of 2.8 for departmental admission to teacher preparation (see below for more information).

Accepted students

Accepted students are required to attend an orientation session with an academic adviser from the Department of Art Education. Transfer students, second-degree-seeking students, double majors and change of major students are required to meet with the administrative director prior to beginning course work in the department. The name and contact information of academic advisers may be obtained from the Department of Art Education.

Art education policy of reasonable progress

A student seeking a B.F.A. in Arts with a concentration in art education who does not enroll in courses in the major for three or more consecutive semesters (not including summers) will be dismissed from the program. To continue in the program, students must reapply to the program, submitting a portfolio and undergoing a grade review. Declared double majors not enrolled in ARTE courses for three consecutive semesters (not including summers) are required to state their intention to continue the major in writing to the chair.

Course failures and withdrawals

All students must successfully complete the courses outlined in the curriculum. Students must earn a minimum grade of C in all ARTE courses. A student who earns a grade of D or F or withdraws from any required course may repeat the course once. If a grade of D or F is earned in the repeated course or if the student withdraws, the student will be terminated from the program. Students with special circumstances who wish to remain in the major must appeal to the chair and receive approval in writing to continue in the program.

Cautionary status

If a student's GPA falls below a 2.8 or if a faculty member raises concerns about a student's professional disposition at any point, the student will be put on cautionary status. The chair will review students designated with cautionary status each semester to determine continuation in the program. Students will be notified if they are placed on cautionary status.

Pre-teacher preparation

During the first two semesters in the Department of Art Education, students should complete ARTE 310 during the fall semester and ARTE 311 during the spring semester. Note: ARTE 310 is a prerequisite of ARTE 311.

Students will be required to register for and take the required Virginia Communication and Literacy Assessment exam during ARTE 310. Students must successfully pass the VCLA exam in order to be eligible for departmental admission into teacher preparation (see below for further explanation).

It is advised that students complete ARTE 250, EDUS 301 and SEDP 330 or ARTE 450 during their first year in the Department of Art Education.

Teacher Preparation Program

All students are required to apply for teacher preparation during ARTE 311. Students who do not have passing test scores at that time will be eligible to reapply in the fall for spring teacher prep admission. Students are granted provisional teacher prep acceptance pending successful second year review.

Applications are due to the administrative director by established deadlines of each semester. If students do not complete their applications on time with official copies of passing score reports, they will not be guaranteed enrollment in ARTE 401 the following semester.

Requirements for departmental admission to teacher preparation:

- Submission of completed Application to Teacher Preparation form by established deadline
- Minimum of 2.8 cumulative GPA
- Successful completion of ARTE 310 and ARTE 311 (six credits)
- Successful completion or enrollment in EDUS 301
- Passing scores on required VCLA exam
- Submission of SAT or ACT scores
- No record of a felony conviction
- Completion of the Dispositions Acknowledgement Form (included with departmental Application for Teacher Preparation)
- Successful second-year review

Departmental admission to the Teacher Preparation Program is required for enrollment in practicum courses (ARTE 401 and ARTE 402) and clinical internship (ARTE 404, TEDU 485 and TEDU 486). Note: ARTE 401 is a prerequisite of ARTE 402. Enrollment is granted to practicum courses through an override from the Department of Art Education.

Second-year review

A review of student work, GPA and dispositions takes place at the completion of ARTE 311. Reviews are rated satisfactory unsatisfactory or provisional. The student must receive a satisfactory or provisional evaluation from the faculty to continue in the program. Students who receive provisional approval will be reviewed by the chair after each practicum to determine continuation in the program.

Students must register for and take the required Praxis II: Art Content Knowledge exam (www.ets.org) before they apply for clinical internship (student teaching).

During teacher preparation, students will continue to complete required art history, studio and general studies course work.

Clinical internship

All students are required to complete a full semester of clinical internship (student teaching). Students must complete and submit an application to clinical internship by the established deadline in order to be eligible. If students do not complete their applications on time with hard copies of passing score reports, they will not be guaranteed acceptance into clinical internship. Students are granted provisional student teaching acceptance pending successful faculty practicum review.

Requirements for clinical internship:

- Departmental admission into the Teacher Preparation Program
- Submission of completed departmental application for clinical internship by established deadline
- Successful completion of all other required course work
- Minimum of 3.0 cumulative GPA
- Passing scores on the Virginia Communication and Literacy Assessment
- Passing scores on the Praxis II: Art Content Knowledge exam
- Completion of the online Child Abuse Prevention training and certification of successful completion
- Submission of a tuberculosis screening must accompany the application for clinical internship and must be dated no more than a year from the expected date of completion of clinical internship
- Successful faculty practicum review

Department of Art History

Carolyn Phinizy, Ph.D.

Assistant professor and chair

arts.vcu.edu/arhistory (<http://arts.vcu.edu/arhistory/>)

The Department of Art History offers programs that acquaint students with the humanistic discipline of art historical inquiry. While providing

students with the opportunity for a broad education drawing on the liberal arts and humanities, the department also emphasizes a close bond with the studio and performing arts and enjoys a close relationship with the other departments in the School of the Arts.

The department offers a broad-based education in the humanistic discipline of art history at the baccalaureate, master's and doctoral levels.

Overseas studies are available through university-sponsored programs abroad in Europe and Asia. Graduate assistantships and fellowships are available to full-time graduate students.

- Art History, Bachelor of Arts (B.A.) (p. 386)
- Art history, minor in (p. 389)

Art History, Bachelor of Arts (B.A.)

The B.A. in Art History is a liberal arts program composed of an academic course of study exposing the student to the scholarship, theoretical perspectives and research methods of not only the history of art, but related disciplines in the humanities. Courses focus on cultures, historical periods and regions. The program also includes possibilities for directed research projects as well as museum internships. This curriculum provides students the best possible background for future graduate work in art history.

Learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will demonstrate a command of art historical terminology and the ability to identify key works of art in relationship to historical contexts.
- Students will demonstrate the ability to conduct rigorous research and write papers that incorporate visual analysis and current scholarship in the interpretation of artworks.
- Students will demonstrate the ability to read critically and apply art historical research methods used in research papers.
- Students will demonstrate the ability to interpret works of art in relationship to the historical, cultural and/or geographical contexts in which they were made.

Special requirements

Art history majors must earn a minimum grade of C in each ARTH course to be applied to the curriculum requirements.

Degree requirements for Art History, Bachelor of Arts (B.A.)

See degree requirements for course distribution.

The minimum number of credit hours required for this degree is 120.

Accelerated B.A. and M.A.

The accelerated B.A. and M.A. program allows academically talented students to earn both the B.A. and M.A. in Art History in a minimum of five years by completing approved graduate courses during the senior year of their undergraduate program. The accelerated program may be undertaken in either concentration. Students in the program may count up to 12 hours of graduate courses toward both the B.A. and M.A. degrees. Thus, the two degrees may be earned with a minimum of 138 credits rather than the 150 credits necessary if the two degrees are pursued separately.

This option offers students a faster and more cost-effective path to professional success by making them more competitive for jobs in the field immediately following graduation and for admission to doctoral programs in art history. Students holding these degrees will attain the skills considered critical to success in the field and continued advanced study in art history, including the ability to apply critical and analytical concepts, frameworks and methods; the ability to contextualize scholarship in relationship to existing art historical/museological knowledge, discourse and/or debate; the ability to translate art historical scholarship written in a language or languages relevant to their research; and the ability to conduct scholarly inquiry that makes a scholarly professional contribution.

Admission to the program

Minimum qualifications for admittance to the program include completion of 54 undergraduate credit hours, including a minimum of 21 credits of art history course work (may include AP and transfer courses); an overall GPA of 3.0; and a GPA of 3.5 in art history course work. Applicants should have completed or be enrolled in ARTH 390.

Successful applicants would enter the program in the fall semester of their senior year.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study. The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Students must initiate the approved graduate work in a fall semester. Candidates should submit applications in the prior spring semester, no later than April 15. Students must provide the names of two art history faculty who can provide recommendations as well as a statement of interest and a writing sample that demonstrates an aptitude for research. Students who are interested in the accelerated program should consult with the faculty adviser to the art history master's program before they have completed 84 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate art history adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Art History degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. These graduate credits will substitute for required open elective credits for the undergraduate degree. These courses are shared credits with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate art history courses that may be taken as an undergraduate, once a student is admitted to the program, are listed below.

Course	Title	Hours
ARTH 690	Historiography and Methodology of Art History	3
Museum studies seminar (select one)		3
ARTH 681	Museums and Communities	
ARTH 682	The Museum as Educational Institution

1

Use the courses tab above to navigate to a list of all ARTH (<http://bulletin.vcu.edu/azcourses/arth/>) courses; only one history of film class (ARTH 270, ARTH 271, ARTH 370 or ARTH 374) can be counted toward the art history minor.

Only courses in which a student earns a minimum grade of C may be applied to the minor.

Department of Communication Arts

Matt Wallin
Professor and chair

arts.vcu.edu/communicationarts

The Department of Communication Arts will cultivate engaged, innovative and technically skilled artists and designers seeking a degree centered on narrative illustration and entertainment design. By offering robust and rigorous courses that embrace all forms of media, graduates will be prepared to forge dynamic careers.

The program

Centered on a rigorous investigation of studio methods and practices, the communication arts curriculum additionally explores historical, conceptual and theoretical concerns critical to the development of a well-rounded and informed understanding of image, media, content and context.

With a history richly rooted in drawing, painting and art theory, the communication arts program is effectively tailored to provide students educational opportunities to develop the types of quality skills and meaningful understandings that are relevant and sought after in the expanding universe of communication medias.

It is a curriculum that endeavors to provide a balance between past, present and future, valuing artistic traditions and techniques, while thoughtfully embracing new tools, technologies, opportunities and outcomes.

Woven throughout the program, the study of communication arts is concerned with the powerful and timeless relationship between art and narrative – image and story – which invites each student to embrace, amplify and build upon their unique views and life experience so that they may, in the lifetime beyond university, add to humanity’s ongoing evolution and unfolding.

The communication arts department offers a B.F.A. in Communication Arts as well as a B.F.A. in Communication Arts with a concentration in scientific illustration. The communication arts department also offers a minor in scientific illustration for students majoring in biology or environmental sciences.

- Communications Arts, Bachelor of Fine Arts (B.F.A.) (p. 390)
- Communication Arts, Bachelor of Fine Arts (B.F.A.) with a concentration in scientific illustration (p. 391)
- Communication Arts, Bachelor of Fine Arts (B.F.A.) with a concentration in visual effects (p. 393)
- Scientific illustration, minor in (p. 395)
- Visual effects, minor in (p. 395)

Communication Arts, Bachelor of Fine Arts (B.F.A.)

The B.F.A in Communication Arts is for students interested in narrative illustration and entertainment design; students will explore the powerful and timeless relationship between art and narrative through drawing.

In the sophomore year, students will expand their artistic skills and conceptual understandings with courses in figure drawing, 3D modeling, visual studies of design, typography and the history of visual communication. In the junior year, students will build upon the sophomore experience with courses in digital drawing, concept drawing, sequential imaging, advanced 3D imaging and mixed-media illustration. In the senior year, students will refine their personal studio methods, develop expertise in their areas of focus, organize a portfolio and prepare for professional opportunities.

Student learning outcomes

- Students will demonstrate proficiency in observational drawing.
- Students will be able to analyze, synthesize and evaluate artwork from conceptualization to completion.

- Students will effectively apply the elements and principles of design to creative solutions.
- Students will demonstrate technical proficiency in a variety of digital and physical media.
- Students will engage with the historical and current contexts of communication arts.
- Students will demonstrate professional best practices and ethical behavior.

Special requirements

A cumulative GPA of 2.0 in the major is expected for continuance in the program.

Communication Arts, Bachelor of Fine Arts (B.F.A.) with a concentration in scientific illustration

The B.F.A. in Communication Arts with a concentration in scientific illustration is designed for students who seek to develop the artistic skills and visual communication strategies necessary to effectively present complex and detailed scientific information. The degree requirements combine art and design courses with science courses to develop a broad base of scientific understanding and refined artistic aptitude.

The communication arts courses for the concentration mirror those for the non-concentration B.F.A., with additional requirements focused on representational drawing of scientific observations. The approved science courses allow students to pursue a focused scientific specialty or a broad understanding of scientific concepts.

Students will need to plan their academic study efficiently in order to include the appropriate science courses into the academic requirements for the B.F.A. degree. Seeking advisement during the process is highly recommended.

A student who intends to establish a professional career in medical illustration should refer to the minor in scientific illustration (p. 395).

Student learning outcomes

- Students will demonstrate proficiency in observational drawing.
- Students will be able to analyze, synthesize and evaluate artwork from conceptualization to completion.
- Students will effectively apply the elements and principles of design to creative solutions.
- Students will demonstrate technical proficiency in a variety of digital and physical media.
- Students will engage with the historical and current contexts of communication arts.
- Students will demonstrate professional best practices and ethical behavior.

Special requirements

A cumulative GPA of 2.0 in the major is expected for continuance in the program.

Communication Arts, Bachelor of Fine Arts (B.F.A.) with a concentration in visual effects

The B.F.A. in Communication Arts with a concentration in visual effects is designed for students seeking a specialization in the artistic, technical and narrative production of digital visual effects for live-action footage.

The communication arts courses for the concentration mirror those for the non-concentration B.F.A., with additional requirements focused on 2D and 3D software, digital filming, compositing, motion-capture and applicable post-production workflows. The approved cinema course will focus on the mechanics of screenwriting to serve as a foundation for interpreting narrative storytelling into a visual effects storyboard.

The 18 credits required in the concentration will combine art and technology to develop a broad understanding of digital visual effects. A student who intends to establish a professional career in post-production and visual effects will benefit from this concentration.

Student learning outcomes

- Students will demonstrate proficiency in drawing, including the figure.
- Students will demonstrate conceptual and critical thinking.
- Students will articulate conceptual and visual ideas to communicate content.
- Students will demonstrate competence in the use of traditional media.
- Students will demonstrate competence in the use of digital media and emerging technologies.
- Students will demonstrate knowledge of the historical and current context of communication arts.
- Students will demonstrate ethical and professional practices.

Special requirements

A cumulative GPA of 2.0 in the major is expected for continuance in the program.

Scientific illustration, minor in

The minor in scientific illustration is open only to students majoring in biology or environmental sciences. Students must apply and acceptance is based on a portfolio and application review.

A cumulative GPA of 2.0 in the minor is expected for continuance in the program.

Completion of the minor requires 21 credits in COAR courses to include the following:

Course	Title	Hours
COAR 201	Drawing Studies: The Figure Observed	3
COAR 202	Drawing Studies: The Figure in Context	3
COAR 203	Digital 3D Studio	3
COAR 325	Botanical Drawing	3
COAR 332	Digital Drawing	3
COAR 341	Scientific Illustration	3
COAR 432	3D Image and Movement	3
Total Hours		21

Visual effects, minor in

Students must apply for this minor and acceptance is based on an application review. A cumulative GPA of 2.0 in the minor is expected for continuance in the program.

Completion of the minor requires 18 credits in the following courses:

Course	Title	Hours
CINE 217	Mechanics of Screenwriting	3
COAR 203	Digital 3D Studio	3
COAR 308	Cut Scene	3

COAR 432	3D Image and Movement	3

Department of Craft and Material Studies

Cynthia Myron

Assistant professor and chair

arts.vcu.edu/craft (<http://arts.vcu.edu/craft/>)

The Department of Craft and Material Studies explores the language of ceramics, glass, wood, fiber and metal. The department offers both a Bachelor of Fine Arts in Craft and Material Studies and a Master of Fine Arts in Fine Arts degree with concentrations in five disciplines: ceramics, fiber, furniture design, glassworking and jewelry/metalworking.

Students are encouraged to learn and explore through the traditional craft media. Together, faculty and students hone, improvise and redefine ancient technologies with new technologies; they bend and blend concepts and materials.

The Department of Craft and Material Studies is housed in a state-of-the-art facility that provides a safe and excellent physical environment in which to work. Students have access to well-equipped studios in each of the five media areas. The department shares the facilities with the departments of Sculpture, Painting and Printmaking, and Kinetic Imaging.

- Craft and Material Studies, Bachelor of Fine Arts (B.F.A.) (p. 395)
- Craft and material studies, minor in (p. 397)

Craft and Material Studies, Bachelor of Fine Arts (B.F.A.)

The Department of Craft and Material Studies offers a professionally oriented program that leads to a Bachelor of Fine Arts with focus areas in ceramics, fiberwork/fabric design, glassworking, metalsmithing/jewelry or woodworking/furniture design. Within these areas of specialization, courses are designed to assist students in developing concepts, personal direction, and the necessary skills and technical competencies to enable them to pursue a professional career or graduate study. In addition to the areas of study, students have the opportunity for a diverse education in the liberal arts and humanities. Students are encouraged to select courses in other schools in the university that will add to their general knowledge. A student may elect a minor area of study in any department or program offering a minor. The minor can be used to fulfill career objectives or to investigate a discipline of secondary interest.

Career opportunities for craft majors include setting up an independent studio or gallery, restoration or repair work, teaching or participating in the Artist-in-Residence programs in the public schools, and consulting and designing for industry.

Learning outcomes

Upon completing this program, students will:

1. Demonstrate an understanding of craft and its potential impact on art and culture

- Translate their creative ideas and develop a personal voice through their studio practice
- Demonstrate competency in the use of new and traditional craft techniques and media
- Utilize professional practices in the field of craft and art

Special requirements

Successful completion of the Art Foundation curriculum is required before admittance into the craft and material studies major. To enroll in an advanced-level craft and material studies course, students must have earned a minimum grade of C in all course prerequisites.

Craft and material studies, minor in

Students may apply for the minor after successfully completing one 200-level craft and material studies course. Acceptance is based on a portfolio and application review. The minor requires a minimum of 18 credits and consists of the following:

Course	Title	Hours
Complete two of the following introductory craft and material studies courses:		8
CRAF 211	Jewelry	
CRAF 221	Woodworking Techniques	
CRAF 240	Introduction to Ceramics	
CRAF 250	Introduction to Glass Fabrication	
CRAF 260	Introduction to Textiles	
Complete a minimum of nine credits in upper-level craft and material studies course work		9
Complete a minimum of one additional credit in 200- to 400-level craft and material studies course work		1
Total Hours		18

Department of Dance and Choreography

arts.vcu.edu/dance (<http://arts.vcu.edu/dance/>)

The VCU Department of Dance and Choreography offers a pre-professional program that provides students with numerous opportunities for individual artistic growth in a community that values communication, collaboration and self-motivation. The department provides an invigorating educational environment designed to prepare students for the demands and challenges of a career as an informed and engaged artist in the field of dance.

Graduates of the program thrive as performers, makers, teachers, administrators and in many other facets of the field of dance. Alongside general education courses, dance-focused academics and creative-process classes (i.e. composition and choreography), dance majors are typically required to take two technique classes daily throughout the majority of their studies. The continuous study of modern/contemporary dance and ballet is a strong component of the curriculum. In addition, elective courses in partnering, jazz, hip hop, West African, contact improvisation, yoga, Pilates and other studio experiences are offered, rounding out a curriculum that also involves studies in anatomy and dance science, dance history, and music, among other areas. The program also provides opportunities for repertory experience and independent study. VCU is an accredited member of the National Association of Schools of Dance.

- Dance and Choreography, Bachelor of Fine Arts (B.F.A.) (p. 398)
- Dance and Choreography, Bachelor of Fine Arts (B.F.A.) with a concentration in performance/Richmond Ballet (p. 400)
- Dance and choreography, minor in (p. 402)

Dance and Choreography, Bachelor of Fine Arts (B.F.A.)

The Bachelor of Fine Arts in Dance and Choreography requires a total of 120 credits, with 81 of those credits as the major core curriculum. Alongside general education courses, dance-focused academics and creative process classes (i.e. composition and choreography), dance majors are typically required to take two technique classes daily throughout the majority of their studies. The continuous study of modern/contemporary dance and ballet is a strong component of the curriculum. In addition, elective courses in partnering, jazz, hip hop, West African, contact improvisation, yoga, Pilates and other studio experiences are offered, rounding out a curriculum that also involves studies in anatomy and dance science, dance history, and music, among other areas. Within the major core there are opportunities for repertory experience and for independent study.

The dance major program is rigorous. Students' technique placement within the required major courses is determined through departmental assessment and placement processes. Formal evaluation procedures include a placement class for entering students, juried examinations at the end of the first semester of the freshman and sophomore years and every semester of the junior and senior years. In the second semester of the freshman and sophomore years the jury is folded into a comprehensive career evaluation called the Freshmen Review and the Sophomore Readmittance Exam, respectively. These career evaluations are to assess each student's progress in relationship to the standards of the program and progress toward degree completion. Students in the major program may be notified of probationary status after the Freshmen

Review. All majors must pass the Sophomore Readmittance Exam in order to continue in the major. This exam stands on its own as a separate evaluation from course grades.

The VCU dance program provides abundant opportunities for students to interact with faculty and guest artists in academic, professional, creative and performance contexts. Within the School of the Arts, dance students have frequent opportunities to work collaboratively with other students in the arts. Possibilities include the visual arts, participation in multimedia events and productions outside the dance department. Any dance major can perform in numerous formal concerts, informal showings and lecture-demonstrations produced by the department. Opportunities also are available for training in teaching, but students interested in earning state certification should consult their advisers.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students should achieve proficiency in improvisation, composition, choreography and related art forms that encourage creativity and an individual point of view.
- Students should become proficient in modern dance technique and performance and a diverse range of other dance techniques in order to maximize their potential to become versatile dancers of technical excellence.
- Students should demonstrate a global and historical perspective of dance as an art form, with an emphasis on diverse contemporary approaches to dance making, research and performance.
- Students should demonstrate writing and critical-thinking skills.
- Students should demonstrate comprehensive and theoretical understanding of the field of dance.

Special requirements

An audition is required for acceptance into the dance program. Applicants must follow the admissions guidelines for arts students as described in the "Admission to the university" section of the bulletin.

To be eligible for graduation, dance majors must meet the proficiency requirements of having completed two semesters of level IV technique (DANC 401-DANC 402) or achieved an equivalent through departmentally approved summer study. In order to graduate, students must also complete a senior project, which is a practical presentation in creative work. Senior projects are approved in multiple stages by a review committee composed of full-time faculty members. Eligibility is based on the student's overall academic record (credits earned, requirements met). Approval in stage one is based on the quality of the student's written proposal; in stage two it is based upon evaluation/review of the student's completed project proposed for presentation.

Dance and Choreography, Bachelor of Fine Arts (B.F.A.) with a concentration in performance/Richmond Ballet

VCU's Department of Dance and Choreography offers a four-year degree concentration within the B.F.A. specifically designed for Richmond Ballet trainees. This unique program bridges trainee experience with the Richmond Ballet professional company and rigorous pre-professional training with a focus in modern/contemporary dance. During the first two years, students receive VCU credit for their work at the Richmond Ballet while taking general education courses, dance history and improvisation at VCU. Students then complete the degree with two years at VCU, taking courses in modern/contemporary dance, ballet, composition, dance science, teaching methods and more. There are many opportunities to perform throughout the four years. This B.F.A. program is designed for disciplined students who are interested in attaining versatility in both ballet and modern/contemporary dance while exploring creative, historical and global perspectives of the field.

A very small number of students in this degree program are offered the opportunity to join Richmond Ballet II after their first two years. Students are encouraged to discuss professional and academic plans with their advisers should this occur.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students must demonstrate proficiency in improvisation, composition, choreography and related art forms that encourage creativity and an individual point of view.
- Students must demonstrate proficiency in modern dance and a diverse range of other dance techniques. The objective is to maximize students' potential to become versatile dancers of technical excellence.

- Students must demonstrate a global and historical perspective of dance as an art form with an emphasis on contemporary approaches to dance making and performance.
- Students must demonstrate writing and critical-thinking skills.
- Students must demonstrate comprehensive and theoretical understanding of the field.

Special requirements

An audition is required for acceptance into the dance program. Applicants must follow the admissions guidelines for arts students as described in the "Admission to the university" section of the bulletin.

The two-year trainee program of the Richmond Ballet provides intensive study and opportunities to perform in concert with the Richmond Ballet Company. Within this concentration, Richmond Ballet trainees enroll as full-time VCU dance majors when they enroll in the Richmond Ballet Trainee Program. Students must pass auditions for both programs and meet VCU academic requirements for admission.

Students in the performance/Richmond Ballet concentration must pay tuition for both the VCU and the Richmond Ballet Trainee programs.

Technique proficiency standard

All dance majors in the Richmond Ballet Trainee BFA must complete ballet technique to the level DANC 412 and modern technique to the DANC 302 level (or an equivalent approved by the chair and full-time faculty) to be eligible for graduation.

Senior project

In order to graduate, students must also complete DANC 490, which is a practical presentation in performance. A review committee, composed of full-time faculty members, approves senior projects in multiple stages. Eligibility is based on the student's overall academic record (credits earned, requirements met). Approval in stage one is based on the quality of the student's written proposal; in stage two it is based upon evaluation/review of the student's completed project proposed for presentation.

Dance and choreography, minor in

The dance and choreography minor is designed to be flexible and serve the interests of individual students. Students can begin accruing credit hours toward a dance and choreography minor at any time. Requests for the minor can be made only after the student has earned a minimum

of six credits in dance at VCU, with a minimum overall GPA of 2.0. Transfer credits are not accepted toward the minor. Minor requests are to be submitted to the dance and choreography academic adviser and approved by the department chair. The minor consists of a total of 18 credits, with a minimum of nine credits at the 300 level or higher. Students choosing this minor should expect that not all classes are offered each term. Also, most classes for the minor are designated "nonmajor," which generally means they are open to the university population and fill quickly.

No audition is required for the dance and choreography minor.

Department of Fashion Design and Merchandising

Deidra Arrington

Associate professor and chair

arts.vcu.edu/fashion (<http://arts.vcu.edu/fashion/>)

The Department of Fashion Design and Merchandising offers two programs. The fashion design concentration leads to a Bachelor of Fine Arts degree and the fashion merchandising concentration leads to a Bachelor of Arts degree.

Both concentrations are extremely time-consuming. Students are expected to put class attendance and study time above other campus activities or employment.

All students are required to have a laptop computer. The department can provide specifications.

Students must take classes in the sequence prescribed by the department and adhere to all prerequisites. Failure to comply can lengthen the number of semesters necessary for completion of degree requirements.

Internships provide not only experience but industry contacts, and are strongly recommended. They may be conducted primarily during the summer semester.

- Fashion, Bachelor of Arts (B.A.) with a concentration in fashion merchandising (p. 403)
- Fashion, Bachelor of Fine Arts (B.F.A.) with a concentration in fashion design (p. 406)
- Fashion merchandising, minor in (p. 408)

Fashion, Bachelor of Arts (B.A.) with a concentration in fashion merchandising

The major in fashion merchandising requires a strong background in marketing, business and specialized professional courses with an emphasis on globalism. Students are directed toward assignments that will develop their skills in research, writing, presentation and critical thinking. Graduates find career opportunities in fashion forecasting, product development, advertising and promotion, retail management, buying, and international marketing.

Internships provide not only experience but industry contacts, and are strongly recommended. They may be conducted primarily during the summer semester.

Study abroad programs are readily available for fashion merchandising majors.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Implement technical skills: The program will provide students with technical knowledge and skills of contemporary computer software.
2. Utilize problem-solving: Apply quantitative and qualitative skills to problem-solving within the apparel industry. Students will be familiar with the various levels of the fashion industry, and understand how

the different business levels and segments intersect. Students will have knowledge of numerous occupations in the fashion industry.

3. Understand the fashion industry and its occupations: Students will understand the workings of the wholesale segment of the fashion industry including market segmentation, buyer behavior and career opportunities. Numerous simulations and outside evaluators will be used.
4. Understand the wholesale industry: Students will understand how theoretical perspectives on markets, trade and economic development can be applied to historical and current data on production, consumption and trade.
5. Understand global economics: Students will understand how theoretical perspectives on markets, trade and economic development can be applied to historical and current data on production, consumption and trade.
6. Application of the design principles: Students will successfully apply the elements and principles of design to various fashion-related projects and presentations.
7. Knowledge of the theory of contemporary fashion: Students will be aware of the historical significance of fashion in contemporary history.
8. Application of merchandising math: Students will demonstrate understanding of the fashion buyer's job with regard to merchandise planning and control.

Accelerated B.A. and M.S.

The accelerated B.A. and M.S. program allows qualified students to earn both the B.A. in Fashion with a concentration in fashion merchandising and M.S. in Business with a concentration in marketing management in a minimum of five years by completing up to 12 credit hours of approved graduate courses during the senior year of their undergraduate program.

Students in the program may count up to three credit hours of graduate courses toward both the B.A. and M.S. degrees. Thus, the two degrees may be earned with a minimum of 147 credits rather than the 150 credits necessary if the two degrees are pursued separately.

In their senior year students would also take up to nine credit hours of graduate-level foundations courses, which are prerequisites for the graduate program.

Students holding these degrees will be very competitive due to the combined knowledge and skills in marketing, culture and business and will be well prepared for success in an increasingly global marketplace.

Admission to the program

Minimum qualifications for admittance to the program include completion of 90 undergraduate credit hours and an overall GPA of 3.25. Successful applicants would enter the program in the fall semester of their senior year. Students who do not meet the minimum GPA requirements may submit GRE scores to receive further consideration.

Undergraduate students must have departmental approval to participate in an accelerated program and must apply for admission to the master's program prior to beginning their final year of full-time undergraduate study.

Students may be admitted after completing all courses listed as recommended for the junior year in the course sequence below.

The entry term for the master's program will be the next available admission term following the last semester of undergraduate study. Applications must be received no later than Nov. 1 for spring semester admission and no later than July 1 for fall semester admission. Admission to the master's program is provisional until the undergraduate degree has been conferred. Upon completion and conferral of the undergraduate degree, students are fully admitted to the master's program.

Two reference letters (at least one from a School of Arts faculty member) must accompany the application. Students who are interested in the accelerated program should consult with the faculty adviser to the M.S. in Business with a concentration in marketing management program before they have completed 90 credits.

Once admitted into the accelerated program, students must meet the standards of performance applicable to graduate students as described in the "Satisfactory academic progress" section of the Graduate Bulletin, including maintaining a 3.0 GPA. Guidance to students admitted to the accelerated program is provided by both the undergraduate School of the Arts adviser and the faculty adviser to the graduate program.

Degree requirements

The Bachelor of Arts in Fashion degree will be awarded upon completion of a minimum of 120 credits and the satisfactory completion of all undergraduate degree requirements as stated in the Undergraduate Bulletin.

A maximum of 12 graduate credits may be taken prior to completion of the baccalaureate degree. Three of these credits, MKTG 672, are shared with the graduate program, meaning that they will be applied to both undergraduate and graduate degree requirements.

The graduate business courses that may be taken as an undergraduate once a student is admitted to the program – and how they apply – are shown in the table below.

Course	Title	Hours
ACCT 507	Fundamentals of Accounting (graduate foundation; satisfies ACCT 202 or open elective in undergraduate program)	3
MKTG 672	Influencing Consumer Behavior (shared between undergraduate and graduate programs)	3
FIRE 520	Financial Concepts of Management (graduate foundation; satisfies open elective in undergraduate program)	3
SCMA 524	Statistical Fundamentals for Business Management (graduate foundation; satisfies open elective in undergraduate program)	3

Recommended course sequence/plan of study

What follows is the recommended plan of study for students interested in the accelerated program beginning in the fall of the junior year prior to admission to the accelerated program in the senior year.

Course	Title	Hours
Junior year		
Fall semester		
FASH 319	Contemporary Fashion	3
FASH 341	Merchandise Planning and Control	3
FASH 380	Fashion Branding	3
MKTG 301	Marketing Principles	3

Electives		9
Term Hours:		12

Fashion, Bachelor of Fine Arts (B.F.A.) with a concentration in fashion design

The fashion design curriculum offers technical and design courses that provide skills required in the fashion industry. Individual designs are presented in two-dimensional form, developed and perfected through techniques used in the fashion industry, and then executed in final and three-dimensional form in fabrics appropriate to the design. Junior design students are encouraged to complete internships in the fashion industry in New York City. Internships provide not only experience but industry contacts, and are strongly recommended. They may be conducted primarily during the summer semester.

Study abroad programs are readily available for fashion design majors.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. Utilize problem-solving skills: Apply investigative and research skills in the completion of studio projects
2. Implement industry-standard computer technology
3. Demonstrate professional visual and oral presentation skills
4. Understand the global nature of the fashion industry

Special requirements

Sophomores are required to purchase departmentally approved dress forms.

Degree requirements for Fashion, Bachelor of Fine Arts (B.F.A.) with a concentration in fashion design

Course	Title	Hours

Fashion merchandising, minor in

Students from any department in the university may request enrollment in the fashion merchandising minor provided they have a minimum GPA of 3.0. The minor consists of 18 credits, nine of which must be at the 300-400 level. Students in the Bachelor of Arts in Fashion with a concentration in fashion merchandising program are not eligible for this minor.

Department of Graphic Design

arts.vcu.edu/graphicdesign (<http://arts.vcu.edu/graphicdesign/>)

The Department of Graphic Design champions agency through the competencies of collaboration, research, making and cultural literacy. The department believes in responding to the reality of our time and that design is activated by content, condition and impact. Further, that design exists in a continuum: The study of the historical past as it informs the now strengthens design's ability to strategically speculate on future forms, languages and systems.

The department provides an education that values the inclusion of diverse backgrounds, skill sets and experiences. Students develop acuties to communicate effectively through visual and verbal representation, and are prepared — as individuals and collaborators — to be practitioners not limited by the confines of current professional practices.

- Graphic Design, Bachelor of Fine Arts (B.F.A.) (p. 408)

Graphic Design, Bachelor of Fine Arts (B.F.A.)

The sophomore year in the graphic design program is focused on orientation to, and experimentation within, design practice. Students develop processes of making, meaning-building and critical engagement with ideas related to form, medium, materials and tools. This year provides a critical framework to develop a vocabulary allowing them to begin to discuss ideas around information hierarchies and meaning-making as well as legibility and translation.

The junior year is focused on experimentation with, and construction of, narrative structures, argument, advocacy and rhetoric (text, text and image, sequence). The underlying social, political and pluralistic demands of graphic design are emphasized. It situates the student and their work/practice within a context and community and introduces methods to facilitate collaboration with those directly and indirectly impacted by the end results of the design process

The senior year is focused on deepening, refining and situating individuated experiences; formulating and synthesizing learning by teaching others through participatory engagement; and building a situated design practice, while understanding that design is inseparable from the culture at large. The student experience in the program culminates in a capstone project that demonstrates their readiness and capacity to engage responsibly and creatively in the field and is presented in a public exhibition.

Admission

Students who have successfully completed the Art Foundation Program are eligible to apply for admission to the B.F.A. program in the Department of Graphic Design.

Students who wish to transfer into the graphic design program must first apply to the Art Foundation Program for evaluation. A transfer student must demonstrate equivalent preparation at other institutions and submit a portfolio of work for review by graphic design faculty. Transfer students admitted into the graphic design program must complete all

major requirements determined to be missing from their academic design experience. Transfer students should expect to spend a minimum of five semesters in the graphic design program in order to qualify for a B.F.A.

Due to the sequence of the required graphic design courses, students are admitted only for the fall semester.

Standards of graphic design

Students must complete the required pre- and corequisites of the graphic design program in the order presented in the curriculum outline. This structure enables students to develop knowledge and skills based in graphic design that will prepare them for upper-level studio courses and successful entry into the graphic design profession.

Students must earn a minimum cumulative GPA of 2.5 to be accepted to the graphic design program. Once accepted, students must maintain a minimum 2.5 GPA in GDES courses to continue in the program.

Students are required to meet regularly with the department undergraduate academic adviser each semester on scheduled advising dates to make sure they are completing courses as required.

A portfolio review of graphic design course work takes place at the end of the third semester. The student's portfolio, presentation, GPA and individual course assessments are evaluated holistically during this review to determine if the student may continue in the program. Additionally, the following courses must be successfully completed by the end of the third semester to be eligible for participation in the review:

Course	Title	Hours
GDES 220	Design Practices	4
GDES 221	Core Studio I	4
GDES 231	Theory Inquiry	3
GDES 222	Core Studio II	4
GDES 321	Core Studio III	4
GDES 331	Precedents Inquiry	3
GDES 380	Multi Studio I	4
GDES 398	Dialogues	1

GDES elective (300-500 level)

Learning outcomes

Upon completing this program, students will know and know how to do the following:

- **Prioritize making as a primary mode of investigation and exchange:** Students will engage with labor as a physical and emotional activity that is fundamental to the design process. They will understand and practice design as a process that is not driven by assumptions, presumptions or preconceptions.
- **Understand that research is an essential component of the design process:** Students will employ research as a critical lens to understand context and to validate the relevance of design decisions and processes.
- **Develop capacity to design in collaboration with others:** Students will become equipped to participate in broad and diverse exchanges that expand the range and depth of design processes that are oriented to nonhierarchical learning and making.
- **Develop cultural literacy:** Students will be cognizant of forces that affect the formation and reinforcement of meaning and value.

These forces define who we are and how the decisions we make can cultivate the dignity of individuals and communities.

Special requirements

Once accepted, students must maintain a minimum 2.5 GPA in GDES courses to continue in the program. Student GDES course work GPA is monitored at the end of fall and spring semesters. A student with GDES course work GPA that falls below 2.5 by the end of any semester is placed on departmental probation for the next semester. Students placed on GDES GPA probation must bring their GDES course work GPA to a minimum of 2.5 by the end of the following semester. Students failing to bring their GDES course work GPA to a minimum of 2.5 by the end of that semester are no longer permitted to continue in the program.

Department of Interior Design

Roberto Ventura

Associate professor and chair

arts.vcu.edu/interiordesign (<http://arts.vcu.edu/interiordesign/>)

The Department of Interior Design is accredited by the Council for Interior Design Accreditation. The mission of the department is to provide an intellectually rigorous, studio-based experience grounded in the issues of interior architecture. The department develops in its students an enduring passion and curiosity for their work, a determination to continually seek quality in their endeavors, an ability to reflect constructively upon their actions as individuals and a responsibility for their lifelong education. The department focuses students' professional activities while encouraging connections between these activities and the larger forum of ideas that enrich their culture and environment. The Bachelor of Fine Arts in Interior Design program prepares students for careers in interior design or entry into programs of advanced study.

The department also offers a Master of Fine Arts in Design with a concentration in interior environments with a professional entry-level option and a post-professional option. These tracks seek to produce competent creative designers whose design solutions are based on human response in the contemporary environment. Mastery of design skills, development of productive habits, knowledge of resources and an awareness of interrelated disciplines equip the student with the tools and expertise necessary to pursue creative design positions.

The department relates with the professional interior design community through a variety of activities. The faculty invites featured speakers to share experiences, participate in the annual ASID EXPO, facilitate mentorships with professional designers and support student internships. An active student chapter of the American Society of Interior Designers provides additional enriching opportunities for student involvement.

The department offers limited accelerated undergraduate preparation for those individuals who lack full preparation. Assessment of the individual candidate's needs will determine the scope of the preparatory course work. This is an opportunity to gain the skills and design experiences required to qualify for admission to the graduate degree program.

The department has a very comprehensive website with extensive information about the program, interior design in general, faculty, student work and the department newsletter. In advance of scheduling a meeting for department advising or for application to the program, students should review the department website (<https://arts.vcu.edu/academics/departments/interior-design/>).

- Interior Design, Bachelor of Fine Arts (B.F.A.) (p. 411)

Interior Design, Bachelor of Fine Arts (B.F.A.)

The Department of Interior Design, accredited by the Council for Interior Design Accreditation, provides the breadth of a university education with the depth of a professional curriculum. The curriculum provides for the study of space, form, color and light in collaboration with the pragmatic investigation of building codes, materials, finishes, construction methods and business practices. An important focus also is placed on the study of design theory and the history of interior environments. All of these areas are synthesized in the curriculum to provide learning of the overall

context of the built interior environment. Graduates are prepared with the skills and knowledge that can facilitate the student's transition into an entry-level interior design position at a successful firm or corporation, or entry into programs of advanced study. The department also prepares students with the skills and knowledge that will allow for lifelong learning and professional development in the design industry. Prospective students are encouraged to review the School of the Arts undergraduate admissions website as well as the Art Foundation Program website.

Student learning outcomes

Upon completing this program, students will know and know how to do the following.

1. Students will demonstrate professional values. The students will demonstrate professional values that address client and user needs in response to the built environment, professional ethics, environmental ethics and the role of sustainability in the practice of interior design. Students will demonstrate an understanding of a global perspective approach to thinking and problem-solving (viewing design with awareness and respect for cultural and social differences of people; understanding issues that affect the sustainability of the planet; understanding of the implications of conducting the practice of design within a world market). Students will demonstrate critical and analytical thinking, creative thinking, and the ability to think visually and volumetrically. Students will demonstrate professional discipline (i.e., time management, organizational skills) and active listening skills. Students will understand the importance of community, public service and engagement.
2. Student work will demonstrate design fundamentals. Students will demonstrate knowledge of design fundamentals including design elements and principles, color principles, theories and systems, theories of design and composition, and principles and theories of lighting design. Students will demonstrate an understanding of the theories of human behavior in the built environment including human factors (ergonomics, anthropometrics), the relationship between human behavior and the built environment, and an understanding of the principles of sustainability. Students will demonstrate knowledge of the history of art, architecture and design. Students will demonstrate knowledge on public safety issues and awareness of code regulations as they relate to planning interior spaces.
3. Student work will demonstrate knowledge of interior design. Students will demonstrate knowledge and application of the following: design process; design elements and principles; programming skills; competent schematic design and conceptual development; design development skills; skills in preparing drawings, schedules and specifications; understanding of how design solutions are impacted by codes, building systems and interior furnishing materials; and understanding of the impact of laws, codes, regulations, standards and practices that protect the health, safety and welfare of the public.
4. Student work will demonstrate effective communication. Students must express ideas clearly in a variety of methods. Completed design work will be presented verbally and through a series of drawings, models and other physical or digital media. Growth of presentation methods will be evident as students progress in their course work.

Standards of interior design

1. Students who have successfully completed the Art Foundation Program may enter the program in the fall semester only. All applicants must submit a portfolio of work. The department uses the portfolio evaluation criteria established in the School of the Arts for

initial acceptance. A second portfolio review of interior design studio work takes place at the end of the sophomore year. The faculty uses the portfolio as an advising tool to determine student placement in the program. The student's GPA also is evaluated to determine if the student may continue in the program. The following courses must be completed at the end of the sophomore year to be eligible for continuation in the program:

Course	Title	Hours
IDES 201	Introductory Interior Design Studio I	4
IDES 202	Introductory Interior Design Studio II	4
IDES 211	Interior Graphics I	3
IDES 212	Interior Graphics II	3
IDES 231	Fundamentals of Interior Design	3
IDES 251	Historic Environments: Ancient Through 19th Century	3
IDES 252	Historic Environments: 20th-21st Centuries	3
IDES 311	Advanced Interior Graphics I	3

- Students who wish to transfer into the interior design program must first apply to the Art Foundation Program for evaluation. A student must demonstrate equivalent preparation at other institutions and submit a portfolio of work for review by interior design faculty. Transfer students admitted into the program must complete all major requirements determined to be missing from their academic design experience.
- Students must complete the required pre- and corequisites of the program in the order presented in the curriculum outline. This structure enables students to develop knowledge and skill bases in interior design that will prepare them for upper-level interior design studio courses (IDES 301, IDES 302, IDES 400 and IDES 401) and successful entry into the interior design profession.
- Students must earn a minimum 2.5 GPA on all work before entering the program, in the semester immediately before entering the major and each semester they continue in the program. Students must maintain a minimum grade of C in each studio in order to continue to the next semester of studio courses.
- Students are required to have a laptop computer and appropriate software upon entry into the interior design program. The department recommends a specific computer package that is used throughout the academic year. The package is updated each year because of changes in computer technology. The total cost is approximately \$3,800 and financial aid is available to those who qualify. An interior design student kit also is required upon initial entry into the program; it contains a variety of drawing supplies for graphics and interior design studios. Students will receive the computer requirements and student kit requirements upon acceptance into the program.
- Students with experience in interior design or related fields may challenge some interior design courses based on regulations for "Undergraduate credit by examination (p. 38)" as stated in this bulletin. Students must be accepted into the interior design program and challenges are based upon demonstrated experience, portfolio work and professional years of experience. No more than nine credit hours may be challenged and the challenge may not be requested during the final semester before graduation. Courses that may be challenged include:

Course	Title	Hours
IDES 211	Interior Graphics I	3
IDES 212	Interior Graphics II	3

IDES 231	Fundamentals of Interior Design	3
IDES 321	Interior Materials and Textiles	3
IDES 324	Furniture Design	3
IDES 431	ID Business Practices	3

- A student majoring in interior design who does not enroll in courses in the major as a full-time student for three or more consecutive semesters (including summer) must reapply to the program, submitting a portfolio and undergoing a grade review.

Special requirements

- Students may enter the Interior Design program in the fall semester only.
- Students must earn at a minimum 2.5 GPA on all work before entering the program, in the semester immediately before entering the major and each semester they continue in the program.

Department of Kinetic Imaging

Stephen Vitiello

Professor and chair

[arts.vcu.edu/kineticimaging/](http://www.arts.vcu.edu/kineticimaging/) (<http://www.arts.vcu.edu/kineticimaging/>)

The Department of Kinetic Imaging prepares students to use video, animation and sound for the purpose of art-making, self-expression and experimentation. The kinetic imaging programs are designed for students who want to study video art, sound design and experimental two-dimensional and three-dimensional animation. Emphasis is placed on artistic uses of the media.

The department offers an undergraduate curriculum leading to a Bachelor of Fine Arts in Kinetic Imaging as well as a graduate level program that results in a Master of Fine Arts in Fine Arts.

- Kinetic Imaging, Bachelor of Fine Arts (B.F.A.) (p. 414)

- Sound design, minor in (p. 415)

Kinetic Imaging, Bachelor of Fine Arts (B.F.A.)

The Department of Kinetic Imaging prepares students to use video, animation and sound for the purpose of art-making, self-expression and experimentation. The program is designed for students who want to study video art, sound design and experimental two- and three-dimensional animation. Emphasis is placed on artistic uses of the media.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will demonstrate the ability to create media art that is conceptually grounded and evidences individual reflection and critical inquiry.
- Students will be able to make appropriate choices of media and presentation to support the conceptual intent of their work.
- Students will demonstrate the ability to construct meaning, synthesize ideas, ask pertinent questions and identify resources. Students will be able to successfully bring critical analysis and review to collaborative critique sessions and also to written responses.
- Students will demonstrate an advanced level of skills in their use of technology and tools for the production of video, animation, sound and emerging media. This includes a wide range of technology in regards to both equipment and software.

Degree requirements for Kinetic Imaging, Bachelor of Fine Arts (B.F.A.)

Department of Music

arts.vcu.edu/music (<http://arts.vcu.edu/music/>)

VCU Music: Educating musicians to shape the stage, the classroom and the world

The Department of Music is committed to the advancement of Western art music and jazz as academic disciplines, as fields of professional endeavor and as significant expressions of culture. Entrance and graduation requirements comply with the National Association of Schools of Music guidelines. The department offers degree programs at the baccalaureate and master's levels, and each of them is described in detail on individual program pages within the Bulletins website. Students in the VCU Music community are involved in a musically rich environment of studio lessons, small classes, independent study and performances. They hear outstanding professional performers in the classical and jazz traditions and attend on-campus master classes with major touring artists. Student soloists also may appear with regional and university ensembles. Through the Mary Anne Rennolds Chamber Concert Series and other events, the department is one of the region's major sponsors of music performances. Approximately 250 students choose to major in music, with many other students from throughout the university taking courses and participating in ensembles. There are 26 full-time faculty, more than half of whom hold doctorates, in addition to 45 part-time instructors. Among the faculty are internationally recognized performers, composers, researchers and teachers – musician-educators who are active in all facets of the professional music world. The faculty includes members and regular performers with ensembles that include the Richmond and Virginia symphonies, the New York Philharmonic, the Virginia Opera, Rhythm and Brass, and the Atlantic Chamber Ensemble. The faculty maintains a high level of recognition through each individual's publications, recordings, international performances and lectures. The department is housed in two buildings. The principal facility is the W.E. Singleton Center for the Performing Arts, which includes the 502-seat Sonia Vlahcevic Concert Hall, faculty offices, rehearsal rooms and special studios for organ, percussion and piano. The James W. Black Music Center has a 347-seat recital hall, classrooms, practice rooms, rehearsal spaces, faculty offices and studios.

Admission and auditions

An audition and interview are necessary for admission to programs in the Department of Music. Students must also meet the general admission requirements of the university. For audition information contact Virginia Commonwealth University, Department of Music, 922 Park Ave., Box 842004, Richmond, VA 23284-2004; phone (804) 828-1169 or email apply4music@vcu.edu.

Music education candidacy

In order to achieve candidacy, music education majors must maintain a minimum cumulative GPA of 2.8 and must demonstrate satisfactory

completion of the Praxis I, ACT or SAT. Music education students who do not achieve candidacy will not be allowed to continue in the music education program, but may continue in one of the other music degree programs provided they meet the requirements.

Courses for non-majors

Students majoring in a field other than music are welcome and encouraged to register for ensembles, private lessons and a variety of classroom courses in music specifically designed for the non-music major. Some courses require an audition.

Grades and achievement levels

All music majors are required to maintain a cumulative GPA of 2.0 and pass at least one applied achievement level within any two-semester period (not including summers) in order to continue as music majors. Jazz studies majors must pass one applied achievement level of classical instrument study per two-semester period (not including summers) and at least one jazz applied music level within the first three semesters in order to maintain a jazz studies concentration. All music students also must pass MHIS 145-MHIS 146 by the end of the fourth semester. Any student who fails to meet or maintain these standards will not be allowed to continue as a music major. A student may audition for readmission into the department as a music major only with permission from the Department of Music.

A cumulative GPA of 2.8 is required for music education students to qualify for student teaching placement. Music education students who do not maintain a cumulative 2.8 GPA will not be allowed to continue in the music education track, but may continue in the Bachelor of Arts program or the Bachelor of Music performance track if they meet the minimum requirements that apply to those respective degree programs.

Electives in music

Students majoring in a field other than music may register for ensembles, private lessons and a variety of classroom courses in music. Classes in music appreciation, African-American music, introduction to writing music, basic music skills and special offerings in music are specifically designed for the non-music major.

Internship in music

Interested students should consult with a faculty member closely associated with the appropriate field. As the student approaches junior academic standing, he or she may apply to the department for participation in APPM 493. Applications will be reviewed on the basis of academic GPA, instructor recommendation(s), professional promise, and demonstrated interest and competence in the area of study. The student must possess a minimum 2.5 overall GPA with a minimum 3.0 GPA in major course work in music. All students (including transfers) must have completed a minimum of 60 credits.

All internships for credit are approved by the Department of Music. The experience may also be coordinated by VCU's Cooperative Education/ Internship Program. The latter office requires completion of an application and resume.

Fees

All students registering for applied lessons (APPL 200) pay an applied lesson fee. Current fee rates for applied lessons (<https://accounting.vcu.edu/tuition/fees/>) can be found on the Student Accounting website.

Recital/convocation attendance

All undergraduate majors are required to pass four semesters of recital/convocation attendance for graduation. During each semester of enrollment, the student must attend a minimum number of concerts or recitals plus departmental convocations in order to pass the requirement.

Master class

This requirement consists of participation in weekly master classes in the student's applied major area. For students in the Bachelor of Music program, enrollment in master class is required for each semester that students enroll for a two-credit lesson on their principal performing instrument. A minimum of eight semesters in the performance concentration (jazz studies majors take four semesters classical and four semesters jazz) and six semesters for the music education concentration are required. Students in the Bachelor of Arts in Music program must also enroll in master class each semester they take a two-credit lesson until they complete a minimum of four semesters of master class on the same instrument.

Ensemble requirements

To ensure consistent skill development in ensemble settings, only one large ensemble credit per semester will be counted toward a student's large ensemble requirements. Students whose principal instrument is a band or orchestral instrument must satisfy the large ensemble requirement by performing in a large ensemble on that instrument. Students whose principal instrument is voice must satisfy the requirement by performing in a large choral ensemble on voice. Those whose principal instrument is piano must complete four of their six elective credits by playing the piano in ensembles. Jazz studies majors must have ensembles approved in advance by their adviser or program director. Bachelor of Arts students must earn six credits in either large or small ensembles.

- Music, Bachelor of (B.M.) with a concentration in music education/instrumental (p. 417)
- Music, Bachelor of (B.M.) with a concentration in music education/vocal-choral (p. 419)
- Music, Bachelor of (B.M.) with a concentration in performance/guitar (p. 421)
- Music, Bachelor of (B.M.) with a concentration in performance/jazz studies (p. 423)
- Music, Bachelor of (B.M.) with a concentration in performance/piano (p. 425)
- Music, Bachelor of (B.M.) with a concentration in performance/strings (p. 427)
- Music, Bachelor of (B.M.) with a concentration in performance/voice (p. 429)
- Music, Bachelor of (B.M.) with a concentration in performance/winds and percussion (p. 431)
- Music, Bachelor of Arts (B.A.) (p. 432)
- Music, minor in (p. 434)

Music, Bachelor of (B.M.) with a concentration in music education/instrumental

The Bachelor of Music with a music education/instrumental concentration incorporates requirements necessary to qualify for the commonwealth of Virginia's Collegiate Professional Certificate to teach music in public schools. Reciprocity between Virginia and numerous other states makes it possible for those music education students who become certified to teach in Virginia to obtain certification in those other states. A prospective student intending to pursue the instrumental concentration endorsement must complete the degree with a primary instrument of wind band or orchestra tradition; for those seeking the vocal-choral concentration endorsement, this instrument must be voice. For a student who wishes to elect the guitar or piano as a primary instrument, please contact the music department for details.

Student learning outcomes

Upon completing this program, students will know and know how to do the following.

Students will:

- Demonstrate professional music teaching competencies
- Acquire professional procedures
- Demonstrate professional performance skills
- Develop comprehensive musicianship
- Acquire supporting competencies
- Develop artistic/intellectual mission

Special requirements

A cumulative GPA of 3.0 is required for music education students to qualify for student teaching placement. Music education students who do not maintain a cumulative 3.0 GPA will not be allowed to continue in the music education track, but may continue in the Bachelor of Arts program or the Bachelor of Music performance track if they meet the minimum requirements that apply to those respective degree programs.

Music, minor in

Any VCU student may declare a minor in music with approval from the Department of Music. The music minor comprises 18 credits of which a minimum of nine credits must be at the 300 or 400 level. The minor in music must include a minimum of two semesters of study of APPL 200 and two semesters of APPM 300-level ensemble courses. A music adviser counsels each student about the selection of appropriate courses based on the student's competence and interest. Depending on

audition results and course prerequisites, students may select from the following to meet their minor requirements:

Course	Title	Hours
Applied lessons ¹		
APPL 200	Applied Lessons (1 credit/half-hour lessons - audition may be required)	
Applied music ²		
APPM 355	Orchestra	
APPM 356	Symphonic Wind Ensemble	
APPM 357	University Band	
APPM 358	Commonwealth Singers	
APPM 359	Choral Arts Society	
APPM 360	Jazz Orchestra	
APPM 361	Small Jazz Ensemble	
APPM 362	Accompanying: Piano	
APPM 363	Flute Choir	
APPM 364	Guitar Ensemble	
APPM 367	Piano Ensemble	
APPM 368	Woodwind Ensemble	
APPM 369	Percussion Ensemble	
APPM 371	String Chamber Music	
APPM 372	Brass Ensemble	
APPM 377	Vocal Chamber Ensemble	
APPM 378	Vox Concordia	
Music courses ³		
Any APPL, APPM, MHIS, MUED or MUSC courses		
Additional courses		
CREA 201	The Creative Economy	
CREA 300	Idea Accelerator	
CREA 350	Piloting the Enterprise	
CREA 450	Creative Disruption	

¹

One credit per half-hour lesson – audition may be required.

²

One credit each – audition may be required.

³

Audition or prerequisite may be required; see individual course descriptions for details.

A 2.0 GPA is required among courses applied toward the minor. A minimum total of 18 credits is required.

Department of Painting and Printmaking

arts.vcu.edu/paintingprintmaking (<http://arts.vcu.edu/paintingprintmaking/>)

The Department of Painting and Printmaking offers an undergraduate program that earns a Bachelor of Fine Arts in Painting and Printmaking, as well as a graduate program of study that leads to the Master of Fine Arts in Fine Arts. Students admitted to the programs are expected to have a high level of competence in either painting or printmaking.

The graduate program is designed to encourage the development of professional attitudes and skills, with an emphasis on individual investigation.

The department is housed in the Fine Arts Building with 15 individual graduate studios plus a large graduate printmaking area in addition four state-of-the-art undergraduate printmaking studios: etching, lithography, screenprinting and digital. These facilities provide an excellent physical environment for the programs with easy access to the other fine art areas of sculpture and crafts. Established in 1928, the Department of Painting and Printmaking was the first department in what has become the School of the Arts. For nearly 70 years, the department has made significant contributions to the development of the School of the Arts' reputation as one of the premier art schools in the country.

The department supports an active and ambitious program of visiting artists and lecturers. Leading figures in the world of contemporary art visit to discuss their work, critique, visit studios, conduct workshops and meet with students throughout the year.

The Master of Fine Arts degree is the terminal degree in the studio areas of fine arts and is a requirement for most college and university teaching positions. Many graduate students have gained teaching experience in the department as part of their assistantship responsibilities, teaching classes in painting, drawing and printmaking. The department assists graduate students financially through a variety of teaching assistantships, graduate assistantships and scholarships.

- Painting and Printmaking, Bachelor of Fine Arts (B.F.A.) (p. 435)
- Painting and printmaking, minor in (p. 436)

Painting and Printmaking, Bachelor of Fine Arts (B.F.A.)

Faculty and students in the Department of Painting and Printmaking work together in a professional and creative learning environment. The undergraduate curriculum enables students to adopt a specialized focus within the discipline and use elective options to pursue other areas of interest in the School of the Arts, the university and the community. It also permits students to tailor a course of study suited to their professional and personal ambitions. The undergraduate program provides students with opportunities for concentrated experiences in both practice and theory as a foundation for independent exploration and artistic development. Classroom discussions invite students to examine a range of contemporary critical issues, which enable them to understand their own studio work in relation to historical continuum. As students develop their skills in critical analysis they are challenged to articulate and justify their ideas both visually and verbally.

The size and diversity of the faculty guarantee exposure to a plurality of ideas and stylistic approaches. In addition, the department's visiting artist program brings to campus leading figures in the world of contemporary art for discussions of their work, critiques of student work and workshops.

Learning outcomes

Upon completing this program:

- Students are expected to achieve technical proficiency in painting and printmaking, and possess the skill to translate their creative ideas through studio practice.

- Students are expected to develop personal voices as artists based on an awareness of social, historical and critical issues.
- Students have the ability to think critically and to articulate their ideas via conversation, public speaking and writing.
- Students comprehend the potential impact of contemporary art on culture.

Special requirements

- Open electives: The 12 credits required in this area may be either academic (lecture) or studio, but nine additional studio credits must be taken outside of the Department of Painting and Printmaking.
- Studio courses are designed to be taken in the following sequence: 200 level (basic), 300 level (intermediate) and 400 level (advanced). Instructors may ask you to withdraw from a course if you lack the appropriate background of knowledge and experience.

Department of Photography and Film

arts.vcu.edu/photofilm (<http://arts.vcu.edu/photofilm/>)

The Department of Photography and Film aims to facilitate a comprehensive artistic, technical and intellectual understanding and use of the mediums of photography and film; to provide a rigorous education in the arts, specifically in photographic and moving image media, and a broad education in other academic subjects; to foster a climate that inspires creativity, intellectual curiosity, freedom of expression and critical-thinking. The department fosters a pluralistic approach that allows both faculty and students to expand the traditional boundaries of the respective media and engage in multidisciplinary practice.

The department offers undergraduate concentrations in photography and filmmaking resulting in a Bachelor of Fine Arts in Photography and Film, as well as a graduate program that leads to a Master of Fine Arts in Fine Arts with a concentration in photography and film.

To promote student development and research of contemporary art practice and theory, the Department of Photography and Film presents a diverse and active visiting artist program. Through lectures, critiques and research courses, students are exposed to the valuable insights of respected international artists, scholars and critics. In addition, the visiting artists teach topics courses exploring the current artistic and conceptual foundations found in their own work. Graduate students are encouraged to establish an individual critical dialogue with the visiting artists and faculty and attain a strong critical and historical basis for their work.

The facilities include several critique and screening rooms; a large black-and-white darkroom; a large state-of-the-art digital photography and film editing lab; a shooting studio; a student checkout center with a wide range of still photography and film cameras, professional lights and sound recording equipment; a professionally staffed graphics lab located in the same building that provides student with digital services on several high-tech imaging devices; and individual graduate M.F.A. studios.

- Photography and Film, Bachelor of Fine Arts (B.F.A.) with a concentration in filmmaking (p. 437)
- Photography and Film, Bachelor of Fine Arts (B.F.A.) with a concentration in photography (p. 439)

Photography and Film, Bachelor of Fine Arts (B.F.A) with a concentration in filmmaking

The Department of Photography and Film offers a variety of basic, intermediate and advanced photography and filmmaking classes leading to a Bachelor of Fine Arts in Photography and Film.

The program provides students with the ability to intelligently express, investigate or document using photography and/or film and to interpret meaning in still and moving images. Emphasis is placed on photography and film as contemporary fine arts. The department promotes a fundamental and effective philosophy that students maintain creative freedom, have access to resources and are enrolled in courses in which they can refine their voices and skills through traditional and contemporary media, tools and professional working methods.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- **Historical perspectives**
Students will clearly recall a functional knowledge of photographic and independent film history and theory, define the relationship of photography/film to the visual disciplines and relate the medium's influence on culture. Students will incorporate a broad perception of cultural diversity including age, race, gender, ethnicity, nationality, etc., communicating insight and ownership of a personal meaning of diversity.
- **Applied criticism and theory**
Students can analyze, assess and debate contemporary sociopolitical issues and theoretical discourses within the context of contemporary photography and film as well as related media practice and research. Topics to be examined can include but are not limited to multiculturalism, environmentalism, queer theory, feminist and gender studies, postmodernism, modernism, psychoanalytical, Marxism, post-structuralism, post-colonialism and post-digital. Students will incorporate a broad perception of cultural diversity including age, race, gender, ethnicity, nationality, etc., communicating insight and ownership of a personal meaning of diversity within applied criticism and theory.
- **Effective visual communication**
Students can effectively author and present visual illustrations, representations, descriptions, explanations and/or contextualizations of their artistic, research-based and career-oriented photography/film pursuits, ideas and emotions for a broad range of purposes and audiences.
- **Effective oral communication**
Students can effectively deliver oral descriptions, explanations and/or contextualizations of their artistic, research-based and career-oriented photography/film pursuits, ideas and emotions for a broad range of purposes and audiences.
- **Studio technique**
Students definitively recognize, explain, employ, appraise and compute the use of basic to advanced photographic and film tools, techniques, technologies and processes sufficient to advance their work from concept to finished product. Students will display evidence of professional proficiency regarding the methods and modes of production presented in required courses covering technical mastery of antique, analog and digital photography/filmmaking processes and techniques.
- **Professional practice skills**
Students demonstrate and apply broad knowledge of current business practices and resources of professional artists and independent commercial photographers and filmmakers. Students are capable of estimating costs, administering their legal rights as authors of visual art, establishing a professional network, generating and distributing marketing materials, establishing a reliable mode of art production, acquiring additional training, and devising business plans. Students can recognize ethical issues when presented within the context of professional practice.

Department of Sculpture and Extended Media

arts.vcu.edu/sculpture (<http://arts.vcu.edu/sculpture/>)

The Department of Sculpture and Extended Media's eight full-time faculty members and various part-time and technical faculty represent a spectrum of directions and philosophical attitudes. Faculty interests range from formal to conceptual, from the concrete to the evanescent. This breadth of interests is presented to students and contributes to the comprehensive nature of the department. Students are not only exposed to traditional sculpture media, but encouraged to explore technology's parameters and to pursue interdisciplinary activity.

The department encourages sculpture students to broaden their experience in other areas. By promoting a curriculum that encourages students to take a wide range of courses throughout the university, faculty stress links between art, science, the humanities and the world. As a consequence, sculpture students have rich, productive associations with professors in many fields.

Sculpture students are challenged to exploit their full potential by questioning notions of contemporary art. The goal is to provide students with the vocabulary, the seeds of discernment and the skills of both analysis and synthesis in order to become participants in the dialogue of our time. All of this takes place in an environment of high expectation regarding self-motivation, intellectual capacity and responsibility.

The sculpture program is housed in a state-of-the-art facility. Sculpture majors are provided with semi-private, locked studio spaces and are given time, support and encouragement to pursue their independently determined goals.

- Sculpture, Bachelor of Fine Arts (B.F.A.) (p. 441)
- Sculpture, minor in (p. 443)

Sculpture, Bachelor of Fine Arts (B.F.A.)

The Department of Sculpture and Extended Media is a heterogeneous group of students and artists/teachers. Together, we examine the fundamental, philosophical, critical, technical, and historical components of art. We do so with an eye toward developing and advancing the discipline of sculpture in its broadest and most inclusive terms within an atmosphere of mutual respect.

Our charge is to create an environment of speculation and high expectation regarding self-motivation, intellectual capacity, and responsibility in order to establish conditions that promote student's ability to construct a thinking self. It is to explore and grow with technology's parameters in the process of discovering applications to new modes of expression. It is to stress the links between art, science, the humanities, emerging philosophies and the conditions of an ever-changing world. And it is to provide students with tools of discernment, vocabulary, and the skills of analysis and synthesis to become participants in the critical dialogues of our age.

Within this context, students strive to measure up to the best performances modeled for them by history, by their peers and by faculty engaged in vital research.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will be proficient in the use of equipment, techniques and resources.
- Students will be able to participate in dialogue of contemporary art.
- Students will be able to utilize professional practices in the field of the arts.

Special requirements

Successful completion of the Art Foundation curriculum is required before continuing in the Department of Sculpture and Extended Media.

2

300-level or higher from: COAR, CRAF, DANC, FASH, GDES, IDES, KINE, APPM/MHIS/MUSC, PAPR, PHTO, THEA

The minimum number of credit hours required for this degree is 120.

Sculpture, minor in

Successful completion of the Art Foundation Program is a prerequisite for the minor in sculpture. The minor consists of a minimum of 18 credits and must include the following courses, in order:

Course	Title	Hours
SCPT 211	Basic Sculpture I	4
SCPT 212	Basic Sculpture II	4
SCPT 311 or SCPT 312	Intermediate Sculpture	4
SCPT 411 or SCPT 412	Advanced Sculpture	4
SCPT upper-level		2-4
Total Hours		18-20

Department of Theatre

Sharon Ott

Associate professor and chair

arts.vcu.edu/theatre (<http://arts.vcu.edu/theatre/>)

The mission of the Department of Theatre is to educate and train students as theatre professionals and/or academicians in the field of performance, design/technology or theatre pedagogy.

In fulfilling its mission, the Department of Theatre provides students with the professional and cultural foundations essential for achieving the highest standards of the art. The department offers three degrees – a Bachelor of Arts, a Bachelor of Fine Arts and a Master of Fine Arts – to which applicants are admitted based on demonstration of ability, genuine interest determined during an interview, and audition and/or portfolio presentation.

In addition to introductory theatre and acting courses for non-majors, the department also serves students throughout the university with offerings in speech communication.

The Department of Theatre employs 23 faculty and staff and enrolls 230 undergraduate and 40 to 50 full-time graduate students. Theatre VCU produces four mainstage productions and numerous graduate and undergraduate directing projects each year.

- Theatre, Bachelor of Arts (B.A.) (p. 443)
- Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in costume design/technical production (p. 444)
- Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in lighting design/technical production (p. 446)
- Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in performance (p. 448)
- Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in performance/musical theatre (p. 449)
- Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in scene design/technical production (p. 451)
- Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in stage management/technical production (p. 453)

- Musical theatre, minor in (p. 455)
- Theatre, minor in (p. 455)

Theatre, Bachelor of Arts (B.A.)

The department offers a Bachelor of Arts that may be entered into during the third year. All freshman and transfer students entering the Department of Theatre are initially classified as Theatre Foundation students. After successfully completing the first two years of core theatre courses in their foundation areas of emphasis, students apply for admission into a specific degree program (B.F.A. or B.A.) in theatre. The B.A. is designed for students who want a program with a strong emphasis in theatre combined with a strong liberal arts component, and a minor (or other course of directed study) in an area other than theatre.

Student participation in both credit- and noncredit-bearing department activities will be required. Students matriculating in School of the Arts degree programs are bound by the policies and procedures stipulated in this bulletin and in any other current handbook or policy document adopted by the individual programs.

Because of the environment that exists in the Department of Theatre, all aspects of theatre as art, craft, business and education are experienced together. The curriculum immerses students in the practicalities of theatre. Throughout the four years, students work with voice, body and imagination; this practical application, combined with a strong liberal arts component and a minor (or course of directed study), offers a wide field of academic and human experience.

Learning outcomes

Upon completing this program, students will know and know how to do the following:

- Students will demonstrate knowledge of theatre history, performance theory, and dramatic literature and its practical artistic application
- Students will complete a minor or other course of directed study to demonstrate broad-based knowledge of the sciences and/or humanities.
- Students will demonstrate successful application of foundational performance and design/technology skills.

Theatre, Bachelor of Fine Arts (B.F.A.) with a concentration in performance/musical theatre

The Department of Theatre offers a Bachelor of Fine Arts that may be entered into during the third year. All freshman and transfer students entering the department are initially classified as Theatre Foundation students. After successfully completing the first two years of core theatre courses in their foundation areas of emphasis, students apply for admission to a specific degree program (B.F.A. or B.A.). In the B.F.A. students concentrate on areas in performance, including musical theatre, and stage management, as well as three areas of design/technology: scenic, lighting and costume. (See the individual concentration pages for curricular outlines.)

Student participation in both credit- and noncredit-bearing department activities may be required. Students matriculating in School of the Arts degree programs are bound by the policies and procedures stipulated in this bulletin and in any other current handbook or policy document adopted by the individual programs.

Because of the environment that exists in these preprofessional programs, all aspects of theatre as art, craft, business and education are experienced together. The curriculum immerses students in the practicalities of theatre. Throughout the four years, the performer works daily with voice, body and imagination, while the designer/technician is involved in studio classes and practical application.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate skills and techniques needed to enter the profession as a musical theatre actor
- Demonstrate knowledge of history, theory and literature of theatre and musical theatre and their practical applications

Musical theatre, minor in

Any VCU student may declare a minor in musical theatre with approval from the Department of Theatre. The musical theatre minor comprises 18 credits of which a minimum of nine credits must be at the 300 or 400 level. A musical theatre adviser counsels each student about the selection of appropriate courses based on the student's competence and interest. Depending on audition results and course prerequisites, students may select from the following to meet their minor requirements:

Course	Title	Hours
APPL 200	Applied Lessons	1
DANC 133	Introduction to Ballet Technique I	2
DANC 134	Introduction to Ballet Technique II	2
DANC 183	Introduction to Modern Dance Technique	2
DANC 184	Introduction to Modern Dance Technique	2
MHIS 115	Fundamental Musicianship	2
THEA 200	Broadway Seminar	1
THEA 316	Musical Theatre History	3
THEA 317	Musical Theatre Performance I	3
THEA 318	Musical Theatre Performance II	3
THEA 319	Musical Theatre Dance Styles: Landmark Choreographers	2
THEA 417	Cabaret Storytelling	3

Note: An audition or other prerequisites may be required to enroll in some of these courses. See individual course descriptions for details.

Theatre, minor in

Any VCU student may declare a minor in theatre with approval from the Department of Theatre. The minor consists of 18 credits, with nine of those at the 300 or 400 level. The department chair or associate chair will consult with each student interested in the minor in theatre about the selection of appropriate courses based on the student's interests and skills. Students may select from the following courses to meet the requirements of the minor.

Course	Title	Hours
THEA 107	Introduction to Stage Performance	3
THEA 110	Improvisation	3
THEA 112	Fundamentals of Theatrical Design	3

Founded in 1998 as a collaboration between the Qatar Foundation for Education, Science and Community Development and Virginia Commonwealth University School of the Arts, the School of the Arts in Qatar offers the baccalaureate degrees in art history, fashion design, graphic design, interior design, and painting and printmaking, as well as a Master of Fine Art in Design. Its purpose is to provide special educational opportunities preparing graduates for leadership roles in the design professions and art history. Courses emulate those offered on VCU's Monroe Park Campus. Graduates are prepared for exciting careers in these growing fields.

VCU School of the Arts obtained the appropriate approvals from the VCU Board of Visitors and the State Council of Higher Education for Virginia and admitted the first class to what would become VCU School of the Arts in Qatar in fall 1998. SCHEV approved the request in April 2001 and forwarded its recommendation to the governor and General Assembly. The 2002 General Assembly adopted legislation authorizing VCU to establish a campus in Qatar.

Admission

Overview of application requirements

Admission policies for VCU School of the Arts in Qatar are the same as those in effect for VCU School of the Arts in Richmond with minor

exceptions that recognize the culture and heritage of applicants from the Gulf region. Applications must include the requirements as listed below.

1. Applicants must present the Qatari Thanawiya (General Secondary Education Certificate) or equivalent certificate from an accredited high school. Students applying from the British system must submit the results of their IGCSE and A- or AS-level tests. Students applying from the U.S. system must complete a college preparatory curriculum. Students whose grades do not qualify them for admission are recommended to an academic bridge program (see below (p. 457)).
2. Applicants must submit college/university transcripts, if any, of all institutions of higher education attended, course descriptions and a foreign credential assessment by World Education Services
3. Applicants must show proficiency in the English language, as evidenced by official test scores of the Test of English as a Foreign Language or the International English Language Testing System.
4. Applicants must complete the VCUQatar application for admission.
5. An art portfolio is required for applicants to the Bachelor of Fine Arts programs in graphic design, interior design, fashion, or painting and printmaking.
6. Applicants to the Bachelor of Arts program in art history must submit an essay. Topics are specified and vary each year.
7. Applicants must submit a personal statement.
8. A letter of recommendation is required.

All application items listed above are required to be considered for admission. Once submitted, application materials become the confidential property of VCUQatar.

Academic requirements

Admission to the School of the Arts in Qatar is granted on a competitive basis.

- Qatari Thanawiya score must be, at minimum, 80 percent.
- Applicants completing the British curriculum must present at least five IGSC and three AS subject tests with minimum grades of B.
- Applicants completing the U.S. curriculum must present a minimum GPA of 3.0 (on a 4.0 scale).
- Transcripts issued in a language other than English must be accompanied by an official English language translation.

Evaluation of transcripts

VCUQatar course credit may be available to applicants who took or completed International Baccalaureate Diploma program courses, Cambridge International Examinations and/or Advanced Placement tests of the College Entrance Examination Board.

To be considered for course credits, test records and/or transcripts must be submitted prior to the end of the first semester of enrollment at VCUQatar.

Applicants applying for transfer credit from a postsecondary institution must submit official transcripts of all institutions of higher education attended, as well as course descriptions, and a foreign credential evaluation by World Education Services. Faculty and administrative committees determine placement in all upper-level courses after evaluating the student's record and portfolio of course work.

English language proficiency requirements

TOEFL (at minimum)

- 80 (internet-based)
- 213 (computer-based)
- 550 (paper-based)

IELTS (at minimum)

- 6.0 overall band score

Test scores must be sent electronically by the testing center to VCUQatar. Additionally, students must submit a copy of their Student Test Score report. Test scores may not be more than two years older than the date received at VCUQatar. VCUQatar's TOEFL institutional code is 8753.

Mathematics placement test

All incoming students are required to take the mathematics placement test. Placement tests are generally held during the New Student Orientation Program at VCUQatar.

Academic bridge program

Applicants whose grades do not qualify them for admission are recommended to the academic bridge program of the Qatar Foundation. Applicants admitted as dual enrolled students at ABP and VCUQatar are guaranteed admission to VCUQatar after successful completion of the academic bridge program. Dual enrollment status is limited and highly competitive.

First-year incubator program

Academically strong applicants who show promise of artistic talent may be admitted to the first-year incubator program, the pre-Art Foundation Program, at VCUQatar

Academics

Art Foundation Program

Students admitted to the Bachelor of Fine Arts Program at VCUQatar complete the Art Foundation Program during their first year of enrollment. Upon successful completion of the Art Foundation Program, students move in to their major field of study. Students admitted to the Bachelor of Arts program at VCUQatar are directly admitted to the major in art history.

Liberal Arts and Sciences Program

In addition to the courses in the major field of study, students at VCUQatar complete core course work within the Liberal Arts and Sciences Program, which provides academic breadth and depth through courses that promote comprehensive intellectual, cultural and social development.

Honors Program

Students who are academically strong and who are interested in enhanced learning and added intellectual stimulation may apply to become part of the VCUQatar Honors Program (p. 466).

Internships

VCUQatar students are required to complete internship course work for which university credit is offered. These placements are under the supervision of faculty members within the major.

Education abroad

VCUQatar students are strongly encouraged to participate in a one-term exchange or study abroad program or in short-term international field trips offered during breaks or holidays.

Degree requirements

To earn a degree from VCU at VCUQatar, students must complete the stated number of course credits, meet all course requirements for the major and the Liberal Arts and Sciences Program and attain a minimum cumulative GPA of 2.00 and a minimum GPA of 2.00 in the major concentration.

Degree programs

Baccalaureate programs within the School of the Arts in Qatar prepare students for careers in the following departments:

- Art history (p. 457)
- Fashion design (p. 459)
- Graphic design (p. 460)
- Interior design (p. 462)
- Painting and printmaking (p. 464)
- Islamic art history, minor in – VCU Qatar Campus (p. 466)

Art History, Bachelor of Arts (B.A.) [VCUQ]

Radha Dalal, Ph.D.

Assistant professor and interim director

[qatar.vcu.edu/arthistory](https://www.qatar.vcu.edu/arthistory/) (<https://www.qatar.vcu.edu/arthistory/>)

The Bachelor of Arts in Art History is a liberal arts program composed of an academic course of study exposing the student to the scholarship, theoretical perspectives and research methods of not only the history of art, but related disciplines in the humanities. Courses focus on cultures, historical periods and regions. The program also includes possibilities for directed research projects as well as museum internships. This curriculum provides students the best possible background for future graduate work in art history.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Demonstrate a command of art historical terminology and the ability to identify key works of art in relationship to historical contexts
- Demonstrate the ability to interpret works of art in relationship to the historical, cultural and/or geographical contexts in which they were made
- Demonstrate the ability to read critically and apply art historical research methods in research papers
- Demonstrate the ability to conduct rigorous research and write papers that incorporate visual analysis and current scholarship in the interpretation of artworks

Special requirements

Art history majors must earn a minimum grade of C in each ARTH course to be applied to the curriculum requirements. In addition to the regular admissions requirements of VCU School of the Arts in Qatar, applicants

to the art history program must submit the following: 1) official SAT or ACT scores and 2) an essay as a writing sample with their online application. Details on the essay topic and length are found on the VCU-Q online application process. For additional information please see the department's website (<http://arts.vcu.edu/arhistory/>).

Fashion, Bachelor of Fine Arts (B.F.A.) with a concentration in fashion design [VCUQ]

Christopher Fink

Assistant professor and chair

The fashion design curriculum offers technical and design courses that provide skills required in the fashion industry. Individual designs are presented in two-dimensional form, developed and perfected through techniques used in the fashion industry, and then executed in final and three-dimensional form in fabrics appropriate to the design. A fashion industry internship is required.

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- Utilize problem-solving skills: Apply investigative and research skills in the completion of studio projects
- Implement industry-standard computer technology.
- Demonstrate professional visual and oral presentation skills
- Understand the global nature of the fashion industry

Graphic Design, Bachelor of Fine Arts (B.F.A.) [VCUQ]

Astrid Kensinger

Associate professor and chair

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

- **Prioritize making as a primary mode of investigation and exchange:** Students will engage with labor as a physical and emotional activity that is fundamental to the design process. They will understand and practice design as a process that is not driven by assumptions, presumptions or preconceptions.
- **Understand that research is an essential component of the design process:** Students will employ research as a critical lens to understand context and to validate the relevance of design decisions and processes.
- **Develop capacity to design in collaboration with others:** Students will become equipped to participate in broad and diverse exchanges that expand the range and depth of design processes that are oriented to nonhierarchical learning and making.
- **Develop cultural literacy:** Students will be cognizant of forces that affect the formation and reinforcement of meaning and value. These forces define who we are and how the decisions we make can cultivate the dignity of individuals and communities.

Interior Design, Bachelor of Fine Arts (B.F.A.) [VCUQ]

Liam Colquhoun

Assistant professor and interim chair

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

1. **Students will demonstrate professional values.** The students will demonstrate professional values that address client and user needs in response to the built environment, professional ethics, environmental ethics and the role of sustainability in the practice of interior design. Students will demonstrate an understanding of a global perspective approach to thinking and problem-solving (viewing design with awareness and respect for cultural and social differences of people; understanding issues that affect the sustainability of the planet; understanding of the implications of conducting the practice of design within a world market). Students will demonstrate critical and analytical thinking, creative thinking, and the ability to think visually and volumetrically. Students will demonstrate professional discipline (i.e., time management, organizational skills) and active listening skills. Students will understand the importance of community and public service.
2. **Student work will demonstrate design fundamentals.** Students will demonstrate knowledge of design fundamentals including design elements and principles, color principles, theories and systems, theories of design and composition, and principles and theories of lighting design. Students will demonstrate an understanding of the theories of human behavior in the built environment including human factors (ergonomics, anthropometrics), the relationship between human behavior and the built environment, and an understanding of the principles of sustainability. Students will demonstrate knowledge of the history of art, architecture and design.
3. **Student work will demonstrate knowledge of interior design.** Students will demonstrate knowledge and application of the design process and two- and three-dimensional design elements and principles in the development of the spatial envelope. Student work will demonstrate programming skills, including problem identification, identification of client and user needs, and information gathering research and analysis (functional requirements, code research, sustainability issues, etc.). Student work will demonstrate competent schematic design, concept development and problem-solving (concept statements, conceptual drawings, space planning). Student work will demonstrate competent design development skills (selection of finishes and materials; furniture selection and plan, plans, elevations, sketches, and study models; luminaires and lighting sources; design justification solutions in relation to the program and concept; appropriate selection and application of decorative architectural elements). Student work will demonstrate

competent skills in preparing drawings, schedules and specifications as an integrated system in a single project. Student work should demonstrate an understanding of appropriate selection and application of art and accessories, the ability to custom design interior elements, way-finding methods and graphic identification. Student work must demonstrate understanding that design solutions affect and are impacted by building systems and interior materials. Students must demonstrate understanding of the impact of laws, codes, regulations, standards and practices that protect the health, safety and welfare of the public.

4. **Student work will demonstrate effective communication.** Student work will demonstrate competence in drafting and lettering, both manual and computer-aided techniques; illustrative drawing; and presentation of color, materials and furnishings. Students must express ideas clearly in oral presentations and critiques; communicate clearly in writing of specifications, schedules, and contracts and other business-related documents, such as project programs, concept statements, reports, research papers, resumes and correspondence. Student work must demonstrate the student's ability to successfully render the design intent using two- and three-dimensional methods (manual and computer-aided).
5. **Students will demonstrate a foundation in business and professional practices.** Students will demonstrate understanding of project management (estimating, budget management, contract administration, information management, conflict resolution, assessment processes including post-occupancy evaluation). Students must demonstrate knowledge of licensing and registration requirements for interior designers and professional design organizations, Students must demonstrate understanding of basic business computer applications (word processing, spreadsheets) and business procedures (marketing, strategic planning).

Special requirements

For consideration and entry into the interior design major, students must successfully complete all foundation studio courses and submit a portfolio of their work for review.

Painting and Printmaking, Bachelor of Fine Arts (B.F.A.) [VCUQ]

Aissa H. Deebi, Ph.D.

Associate professor and director

Student learning outcomes

Upon completing this program, students will know and know how to do the following:

PLO 1 – Technical skill: Students will achieve proficiency of tools, techniques and materials used in their media area. Students are expected to achieve technical proficiency in painting and printmaking and possess the skill to translate their creative ideas through studio practice.

PLO 2 – Creativity: Students should develop the capacity to combine or synthesize existing ideas, images or expertise in original ways. Students should be able to think, react and work in an imaginary way characterized by a high degree of innovation, divergent thinking, problem solving, risk taking and the embracing of contradictions. Students are expected to develop personal voices as artists based on an awareness of social, historical and critical issues.

PLO 3 – Critical and conceptual thinking: Students should demonstrate comprehensive exploration of issues, ideas, artifacts and practices before accepting or formulating an opinion or conclusion. Students have the ability to think critically and to articulate their ideas via conversation, public speaking and writing.

PLO 4 – Professional practice: Students should possess the professional skills required by contemporary artists and those working within the field of creative practices. Student should be well versed the [sic] necessary skills to promote their work, document their work and liaise with other professionals. Students comprehend the potential impact of contemporary art on culture.

Special requirements

- Studio courses are designed to be taken in the following sequence: 200 level (basic), 300 level (intermediate) and 400 level (advanced). Instructors may ask students to withdraw from a course if they lack the appropriate background of knowledge and experience.

Islamic art history, minor in – VCU Qatar Campus

A minor in Islamic art history consists of 18 credits, which must include:

Course	Title	Hours
ARTH 103	Survey of Art I	3
ARTH 104	Survey of Art II	3
ARTH 260	Islamic Art Survey	3
Select nine credits from any ARTH course at the 300 or 400 level that is open to non-majors ¹		9
Total Hours		18

1

Use the courses tab above to access a link to a list of all ARTH courses.

Only courses in which a student earns a minimum grade of C may be applied to the minor. A student may apply for the art history minor after successful completion of ARTH 103 or ARTH 104.

Students who have completed at least six credits of the 300-level courses required in the minor may be allowed into ARTH 465 or ARTH 466 with the permission of the department.

Note: This minor is offered only to students on the VCU Qatar Campus.

Honors Program at VCUQatar

Jesse Ulmer

Assistant professor and administrator

Email: ulmerjg@vcu.edu

Phone: +974 5527 2055

Website: [qatar.vcu.edu/honors-program](http://www.qatar.vcu.edu/honors-program/) (<http://www.qatar.vcu.edu/honors-program/>)

The Honors Program at VCUQatar is designed to fulfill the needs of talented and academically high-achieving undergraduate students. The program offers an advanced liberal education that cultivates interdisciplinary research, creativity, multicultural literacy, self-development, experiential learning and community-building. Students are expected to complete a number of honors-level courses in a diverse range of disciplines that will help prepare them for careers or graduate-level learning. The program provides students with a foundation in social and behavioral sciences, natural and physical sciences, the humanities, fine arts and design. Students will engage in advanced undergraduate research to produce innovative work that integrates concepts and approaches from multiple disciplines, a process that requires risk-taking and the pursuit of novel methods. Honors students are expected to learn how to adapt to changing environments and utilize emerging technologies. Moreover, honors students are expected to develop advanced levels of multicultural literacy and to develop the capacity to positively impact whatever groups and communities they find themselves in. These expectations form the objectives of the program and will serve as a basis for assessment.

In addition, the context and mission of the program represents a synthesis of the many institutions and cultures that surround and support it. As part of the VCU Honors College in Richmond, Virginia, the Honors Program at VCUQatar offers students opportunities to exchange ideas, ask questions and explore values; as part of the VCU School of the Arts, the program champions artistic excellence and self-expression; and as part of VCUQatar and Qatar Foundation, the program strives to contribute to the development of Qatar through creative innovation and collaboration. The end result of this unique convergence is an honors program deeply committed to developing cultural diversity and interdisciplinary study in a context of academic and creative excellence.

Admission

Students from all undergraduate majors offered at VCUQatar are eligible to apply to the Honors Program if they meet the minimum criteria, which include a minimum 3.5 grade point average, a letter of recommendation from a VCUQatar faculty member and the submission of an application essay.

Students may apply to the Honors Program at VCUQatar as early as the first semester of their freshman year. Students must submit an online application to the VCU Honors College. Admission decisions are made jointly by The Honors College in Richmond and the Honors Program at VCUQatar.

Graduation with University Honors

To graduate with the distinction of University Honors, students admitted to the program must complete a total of 24 honors credits:

- Liberal arts and sciences courses (15 credits)

- Honors social and behavioral sciences: 3 credits
- Honors natural and physical sciences: 3 credits
- Honors literacy and critical thinking: 6 credits
- Honors research methods: 3 credits
- Honors experiential learning project (3 credits)
- Honors course work in major course of study (6 credits)

To graduate with honors, members of the Honors Program at VCUQatar must meet the following criteria: 3.5 overall GPA (including every course **attempted**); 3.2 honors GPA (including every honors course **attempted**); the completion of the above curriculum; and successful completion and submission of an honors dossier.

Overall, students are encouraged to consult an Honors Program adviser to explore additional ways to earn honors credit that include honors independent study and non-honors to honors course contract options. More detailed information on these options can be found on The Honors College (<http://honors.vcu.edu/>) website.

Guidelines and regulations

To continue as a member of the Honors Program at VCUQatar, students must maintain a minimum cumulative GPA of 3.5. Should an honors student's cumulative GPA fall below 3.5, but not below 3.0, the student may be placed on honors probation for one semester.

SCHOOL OF BUSINESS

A close-knit community within a leading urban, public university, the VCU School of Business enrolls 4,000 students in a wide range of bachelor's, master's, certificate and doctoral programs. The school ranks in the top 5 percent of business schools worldwide due to its accreditation by AACSB International. From its founding in 1937, the school has developed strong connections with the business community in Richmond and beyond, with students actively engaged in internships, corporate projects and learning from executives.

Strategic plan

In 2015-16, the VCU School of Business launched a bold strategic plan, EPIC, to build on its strengths and ensure that the school's students are prepared to thrive in a changing world. As the business landscape grows increasingly complex, companies in every industry need creative solutions. Leaders are seeking to hire graduates who have a solid foundation in their chosen business discipline — combined with the ability to bring fresh thinking and a creative approach to solving problems.

Our vision

Drive the future of business through the power of creativity

Our mission

To be a dynamic hub of business education and research, fueled by creativity and a commitment to preparing students to lead in a complex world

EPIC Pillars

Experiential learning, Problem-solving curricula, Impactful research, Creative culture

The School of Business, its programs and faculty have received national recognition from top publications such as U.S. News & World Report, the Princeton Review, Bloomberg Businessweek, The CEO Magazine and Advertising Age. In 2014, the top-ranked VCU Brandcenter joined the School of Business. Graduates from all programs are welcomed into the VCU Business Alumni Society.

Shannon K. Mitchell, Ph.D.
Associate dean for academic quality and accreditation

Jana P. McQuaid, Ed.D.
Assistant dean for student resources and enrollment management

Nanda K. Rangan, Ph.D.
Associate dean for international and strategic initiatives

Accreditation

The School of Business is accredited by the Association to Advance Collegiate Schools of Business, which accredits programs of professional education in business at the collegiate level. AACSB International accreditation represents the highest standard of achievement for business schools worldwide. Institutions that earn accreditation confirm their commitment to quality and continuous improvement through a rigorous and comprehensive peer review. AACSB International accreditation is the hallmark of excellence in management education.

The School of Business is the first school of business in the nation to gain accreditation from the Accreditation Board for Engineering and Technology for its undergraduate program in information systems.

Financial aid, scholarships and awards

Scholarships and awards

In addition to university scholarships, business students may apply and compete for scholarships awarded through School of Business endowed scholarship funds or through the various School of Business academic programs. For detailed information on scholarships and awards, visit the School of Business website.

Assistantships

The School of Business offers a limited number of graduate assistantships to full-time students for the academic year. For further information, write to the Graduate Studies in Business Office.

Graduate students also are eligible for funds administered under the National Defense Loan and college work-study programs. For further information, please visit the Division of Student Affairs website (<https://students.vcu.edu/student-jobs/graduate-assistant-positions/>).

Undergraduate information

Undergraduate programs

The school offers undergraduate baccalaureate degree programs in accounting, business, economics, finance, financial technology, information systems, real estate and marketing, each of which earns a Bachelor of Science.

Post-baccalaureate undergraduate certificates in accounting and information systems are also offered, as well as minors in entrepreneurship, general business, human resource management, marketing insights and real estate.

A minor in economics is offered by the College of Humanities and Sciences. Business majors (other than economics) are eligible for this minor. See the program listing for more information (p. 311).

Programs, degree levels and specializations are outlined below.

Bachelor of Science

- Accounting
- Business
 - Finance
 - Human resource management

- Management
 - Business administration
 - Entrepreneurship
 - International management
- Risk management and insurance
- Supply chain management and analytics
- Economics
- Finance
 - Risk management and insurance
- Financial technology
 - Actuarial science
 - Financial engineering
- Information systems
- Marketing
 - General marketing
 - Marketing communication and analytics
 - Personal selling and business marketing
 - Product and brand management
- Real estate

Post-baccalaureate undergraduate certificates

- Accounting
- Information systems

Minors

- Entrepreneurship
- General business
- Human resource management
- Marketing insights
- Real estate

Shared undergraduate business curriculum

The following programs have certain elements that are shared among them.

- **Accounting, Bachelor of Science (B.S.)**
- **Business, Bachelor of Science (B.S.), human resource management, management/business administration, management/entrepreneurship, management/international management, and supply chain management and analytics concentrations**
- **Finance, Bachelor of Science (B.S.), no concentration and risk management and insurance concentration**
- **Economics, Bachelor of Science (B.S.)**
- **Information Systems, Bachelor of Science (B.S.)**
- **Marketing, Bachelor of Science (B.S.), general marketing, marketing communication and analytics, personal selling and business marketing, and product and brand management concentrations**
- **Real Estate, Bachelor of Science (B.S.)**

Learning goals

The mission of the shared undergraduate business curriculum, in conjunction with universitywide general education requirements, is to

provide students the knowledge, skills, opportunities and experiences needed as a framework for the various major programs of study.

The goals of the shared curriculum are:

- Effective communication
- A broad-based knowledge of business functions and processes
- Quantitative skills
- Critical-thinking and development of creative solutions to business problems
- A solid foundation for making responsible and ethical business decisions

Student learning outcomes

Upon completing this program, students will know how to do the following:

- Communicate successfully in a variety of business situations
- Demonstrate understanding of the basic functions of business
- Use data to support decision-making
- Lead and work effectively in teams
- Apply creative problem-solving techniques to business problems
- Use ethical principles while making business decisions

Special requirements

The admission requirements for the School of Business (p. 472) detail the deadlines and other requirements for students to be admitted to one of these major programs of study. The following courses must be completed before the student may declare a specific business major: ACCT 203, ACCT 204, BUSN 201 or BUSN 205, BUSN 212 or MATH 200, BUSN 225, ECON 210, ECON 211, UNIV 111, UNIV 112 and UNIV 200.

The School of Business has special academic policies (<http://bulletin.vcu.edu/undergraduate/business/undergraduate-information/academic-policies/>), including policies on transfer credits, that apply to all undergraduate degrees.

All baccalaureate degree programs in the School of Business require successful completion of the business knowledge exam as administered in BUSN 499.

Students may need to take additional mathematics courses as prerequisites to BUSN 212 or MATH 200. These credits will count as open electives in the degree program.

No more than six credits from the INFO 16X Digital Literacy courses may be applied to the degree.

No more than four credits in physical education courses may be applied to the degree.

INTL 493 may not be counted toward a business degree.

Credit for SPCH 121 or SPCH 321 will substitute for BUSN 225, and no more than three credits of these courses may be applied toward a business degree. Students who earned a minimum grade of B in either ECON 203 or ECON 205 at VCU may substitute that credit for ECON 210.

School of Business students cannot use the pass/fail grading policy for the following courses: ACCT 203, ACCT 204, BUSN 212, ECON 211, FIRE 311, INFO 360, MATH 200, MGMT 303, MGMT 310, MGMT 434,

MKTG 301, SCMA 301, SCMA 320 or any course that counts toward the calculation of the major GPA. Students should check with their academic adviser before taking the pass/fail grading option.

Course	Title	Hours
General education (p. 77)		
Select 12-13 credits from general education foundations and 17-18 credits from areas of inquiry.		30
Major requirements		
Satisfy requirements of the chosen business major, which will be a minimum of 30 credit hours.		30
Ancillary requirements		
• Ancillary core requirements		
ACCT 203 & ACCT 204	Introduction to Accounting I and Introduction to Accounting II	6
BUSN 225	Winning Presentations	3
BUSN 301	Career and Professional Development	1
BUSN 499	Business Knowledge Exam	0
ECON 210	Principles of Microeconomics (satisfies general education BOK for social/behavioral sciences and/or AOI for global perspectives)	3

Business honors

Undergraduate business majors may earn business honors. Any student enrolled in the VCU Honors College and in the business foundation program or with a major within the School of Business is eligible to participate.

The mission of the Business Honors Program is to provide a challenging experience for high-ability School of Business students that boosts creativity, strategic thinking, teamwork and leadership in collaboration with the VCU Honors College.

The Business Honors Program produces exceptional business graduates who are prepared to excel in any environment of their choosing. It will achieve this by:

- Fostering a culture of intellectual curiosity and achievement
- Creating long-term, cohesive relationships within a community of highly motivated VCU students
- Partnering with local industry leaders to provide internships, seminars and professional mentoring
