William F. Falls, Jr. (*Clinical Aspects of Renal Tubular Disorders*), assistant professor of medicine at the Medical College of Virginia and chief of the renal section at the Veteran's Administration Hospital, Richmond, received his B.S. and M.D. degrees from the University of Maryland. After completing his internship at the University of Maryland and a tour of duty in the U. S. Navy as a general medical officer, he served as assistant resident in general medicine at MCV. Prior to his present appointments, Dr. Falls spent several years as a fellow in renal and metabolic disease at the University of Texas Southwestern Medical School.

Lee W. Henderson (*New Developments in Hemodialysis for Chronic Renal Failure*) is director of the dialysis unit and assistant director of the clinical research center at the Hospital of the University of Pennsylvania. He received his B.S. degree from Harvard University and his M.D. from the University of Pennsylvania, completing his internship and residency at the Pennsylvania Hospital. Before assuming his academic positions at the Hospital of the University of Pennsylvania, Dr. Henderson spent several years as a renal fellow and research associate at the Peter Bent Brigham Hospital and as an assistant in medicine at Harvard University. He is currently a Markle Scholar in academic medicine.

Robert H. Heptinstall (*Focal Glomerulonephritis*), a native of England, is acting director of the department of pathology at the Johns Hopkins University School of Medicine and acting pathologist-in-chief at the Johns Hopkins Hospital. He received his undergraduate education at King's College, London, and his medical degree from Charing Cross Hospital Medical School, London University. After serving several years as a medical officer in the R.A.M.C., he returned to London and became a member of the pathology department at St. Mary's Hospital. Dr. Heptinstall has held an Eli Lilly travelling fellowship at the Johns Hopkins Hospital and has been a visiting professor of pathology at Washington University School of Medicine, St. Louis, Missouri.

Henry D. Lederer (*Present-Day Psychiatry*), chairman of the department of psychiatry at the Medical College of Virginia, received his premedical education at the University of Chicago and his M.D. degree from Rush Medical College of that school. After completing his internship at the Cincinnati General Hospital and his residency at the University of Cincinnati School of Medicine, he served in the U. S. Army as a psychiatrist and neurologist. Before coming to MCV, he was a member of the faculty at the University of Cincinnati for 16 years and then of Georgetown for two years. Among his main interests are the areas of psychosomatic medicine and psychotherapy of ambulatory patients.

F. Stanford Massie (*Recent Advances in Pediatric Allergy*) is director of pediatric allergy and immunology at the Medical College of Virginia. He received his A.B. and M.D. degrees from Duke University, Durham, N. C., and completed his internship in pediatrics at Duke Hospital. After spending one year as assistant resident in pediatrics at the University of California Medical Center in San Francisco, he served two years as a pediatric medical officer at the U. S. Naval Hospital in Camp Pendleton, California. Returning to the University of California Medical Center after his tour of duty, Dr. Massie was chief resident in pediatrics and a USPH allergy fellow there prior to joining the MCV faculty. His special research interests are isolation and characterization of allergic antibodies.

Roscoe R. Robinson (*Conservative Management of Chronic Renal Failure*) is professor of medicine and director of the division of nephrology at Duke University Medical Center, Durham, N. C. He received his M.D. degree from the University of Oklahoma School of Medicine. Following internship and assistant residency in medicine at Duke University Medical Center, he served as a research fellow of the American Heart Association and visiting fellow in medicine at Columbia-Presbyterian Medical Center in New York. Before returning to Duke University as an associate in medicine, Dr. Robinson spent two years in the U. S. Air Force as chief of the renal unit at the Aerospace Medical Center, Lackland Air Force Base, Texas.

Victor C. Vaughan, III (*Some Issues in Human Development*), a native of Richmond, is professor and chairman of the department of pediatrics at Temple University School of Medicine and medical director of St. Christopher's Hospital for Children. After receiving his A.B. degree from Harvard College and his M.D. from Harvard Medical School, he completed an internship at the Massachusetts General Hospital, followed by pediatric residency training at Yale University School of Medicine. Dr. Vaughan held academic positions at Yale and the Medical College of Georgia, as well as an earlier appointment at Temple University, prior to assuming his present position. His research interests lie in the areas of growth and development, hemolytic disease of the newborn, and pediatric allergy.
