This text addresses the complex challenge of comprehending religious otherness. Brown and Brightman present a previously unpublished 1823 letter journal of fur trader George Nelson in which he reflects on his struggle to understand the Cree and Ojibwa people he knew at first hand. While he constantly wondered at the strangeness of Algonquian religion, he also expressed his admiration as frequently. The Cree and the Ojibwa were thoroughly religious and, paradoxical as it seemed to Nelson, he did admit that their religion worked.

Nelson's musings comprise the most thorough account of Algonquian mythology and religious practices written in the nineteenth century. His sketch of Algonquian religion summarizes key myths, surveys the great persons of the Algonquian cosmos, and presents eye-witness accounts of the shaking tent and other rituals. Nelson appreciated the central importance of dreaming and vision questing to Algonquian religion. Using these techniques, Algonquians acquired access to the great others of myth, both those who had human welfare at heart and those like the windigo monster who embodied the antithesis of religious values. These details have special ethnographical and historical value because Nelson's account makes it possible to take some measure of Algonquian religion midway between the seventeenth century Jesuit Relations and the ethnographies of the twentieth.

The book is also an excellent example of how primary documents ought to be published. Brown and Brightman's introduction examines Nelson's life and letters, his career and contact with various Indian groups and, most importantly, his intellectual and religious struggle to make sense of Algonquian religion. Similarly, they append a glossary of the dramatic personae of myth and ritual and thus make Nelson's text more accessible. As important as Nelson's text itself, the authors' essay on "Northern Algonquian Religious and Mythic Themes and Personages" stands as an extremely useful overview of current knowledge of these traditions. In
this way, Brown and Brightman carefully place Nelson's descriptions in
ethnographic and folkloric perspective. They also add a comprehensive
bibliography, and their index is superb.

Two additional essays by Native American scholars round out the
volume. Stan Cuthand reacts to Nelson's text and places it in relation­
ship to contemporary Cree oral tradition. Cuthand also reflects on the
current implications of texts such as Nelson's which record an earlier
way of life: "Today there are many elders who are trying to bring back
Indian religion and who want to emphasize the harmony of man and
nature. Nelson's text shows a starker reality." Writing in a related vein,
Emma Larocque balances the ethnocentric flaws of the text and its
factual failings against its usefulness. She reminds readers also that
Nelson's journal is an important document because it reveals the
tenacious hold civilization-savagery has always had. These two essay­
ists suggest the overall significance of the book in presenting an
invaluable glimpse into past Algonquian culture and in fueling the
ongoing process of native cultural adaptation.

Joseph Bruchac, ed. Survival This Way: Interviews with
American Indian Poets. (Tucson: University of Arizona Press,
1987) 363 pp., $28.95.

It is risky for an editor to compose a book of twenty-one interviews, each
being centered in the same type of questions: What started you writing?
Who were your models? What role does your tradition play in your work?
How do you relate to mainstream poetry? The amazing result of reading
this book is the recognition that it is neither repetitious nor dull, but
highly informative and a pleasure to read. The reason for this outcome
lies not only in the poetic sensibility, literary knowledge, and psycho­
logical skill of the interviewer, but in the quality of the poets selected and
the wide spread of their tribal affiliations, mixed cultural traditions, and
educational as well as personal backgrounds.

While Bruchac excels as interviewer, his preface and his bibliography
are too sparse. The preface lacks a more thorough portrayal of the
background from which these writers are emerging and a rationale for
the selection of the writers interviewed. Was, for example, Leslie Silko not
included because her poetry is so much a part of her fiction? (She is
mentioned in several of the interviews as an important influence on
poets.)
