Appendix S1

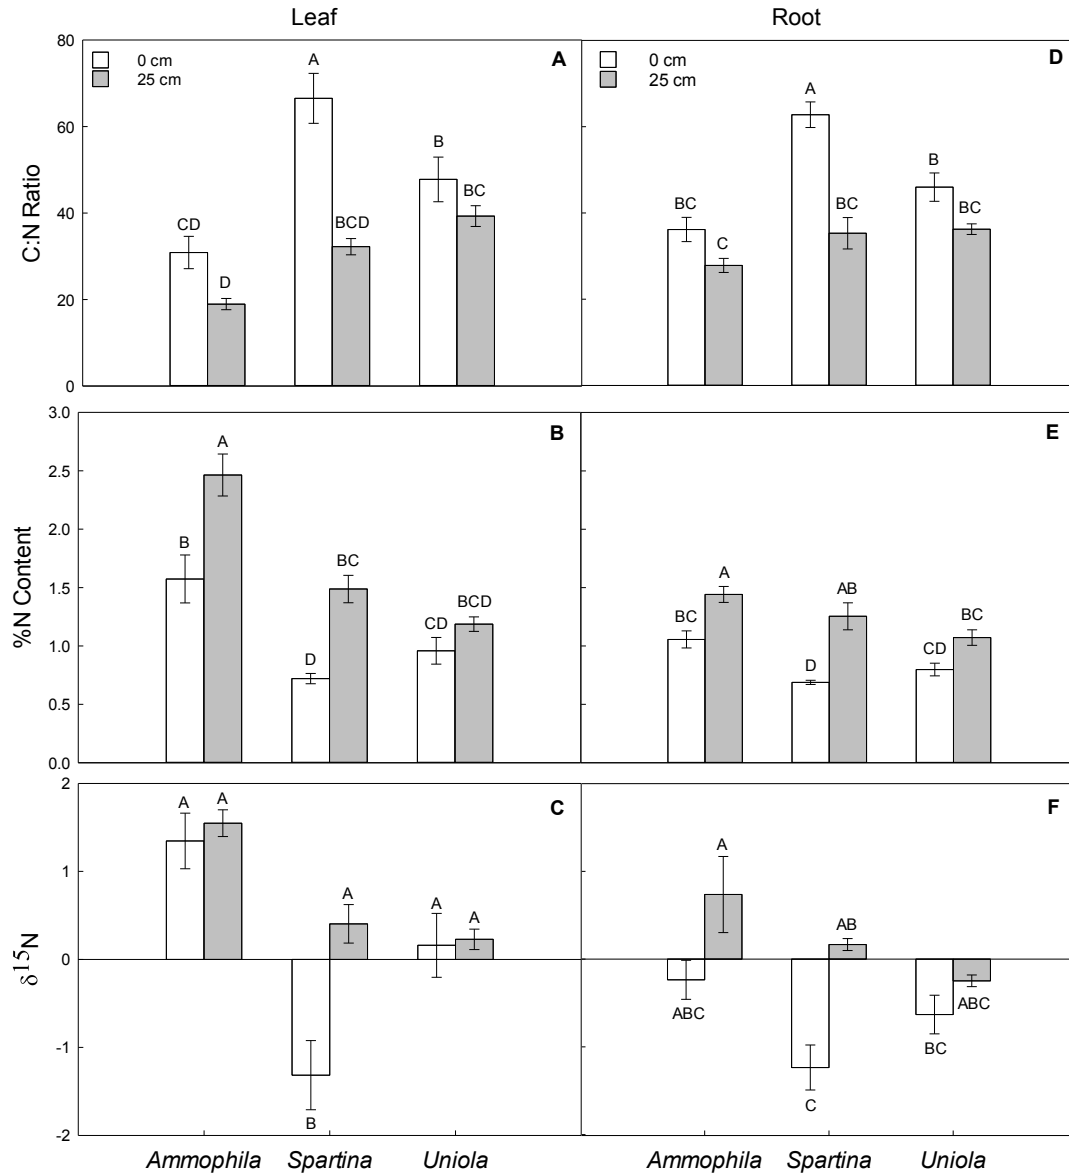

Figure S1. Leaf C:N ratio (A), %N content (B), and $\delta^{15}N$ (C) for each species (\pm SE) and root C:N ratio (D), %N content (E), and $\delta^{15}N$ (F) for each species (\pm SE). Significant differences found using Tukey's HSD ($P < 0.05$). Levels not connected by the same letters are significantly different.

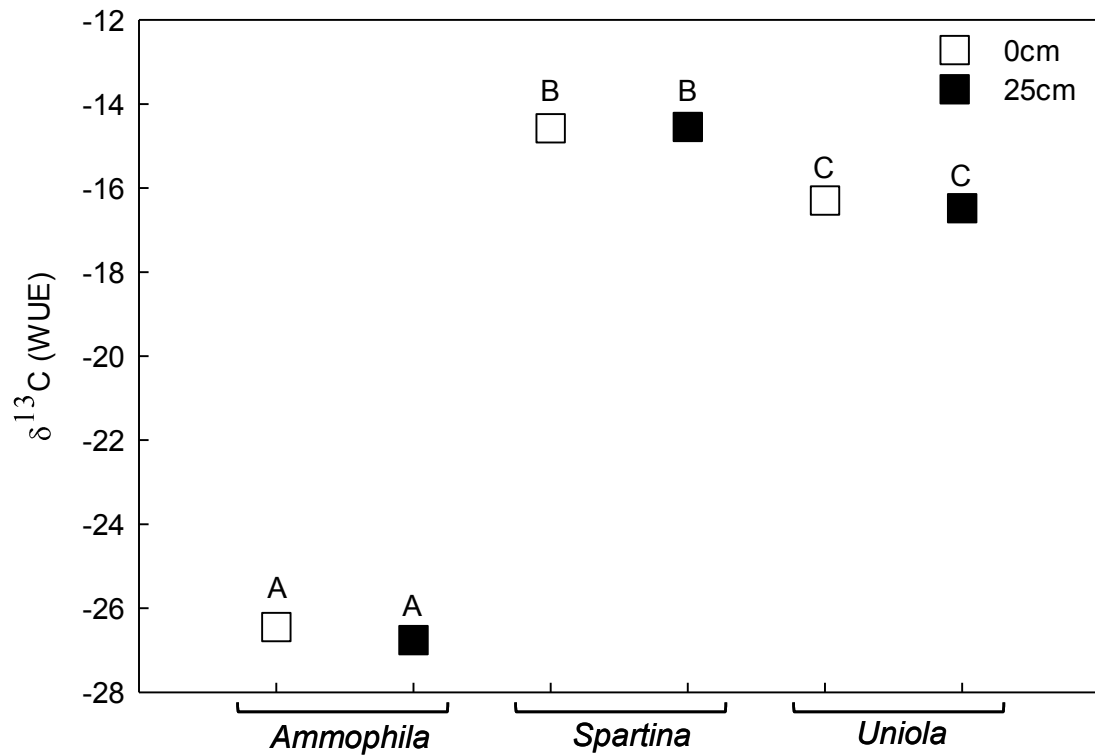

Figure S2. $\delta^{13}\text{C}$ (water use efficiency; WUE \pm SE), significant differences were found using Tukey's HSD ($P < 0.05$). Levels not connected by the same letter are significantly different.
